MISSISSIPPI STATE HOSPITAL

TO THE

Legislature of Mississippi

For The Years 1936-1937

## OFFICERS

### BOARD OF TRUSTEES OF ELEEMOSYNARY INSTITUTIONS

J. H. JOHNSON, Chairman of Board.....	Clarksdale, Mississippi
DR. H. N. MAYES.....	New Albany, Mississippi
LOUIS P. CASHMAN.....	Vicksburg, Mississippi
HARVEY HURT.....	Waynesboro, Mississippi
DR. H. H. PURYEAR.....	Carthage, Mississippi
CHARLES E. BRUMFIELD, Executive Secretary.....	Magnolia, Mississippi

### RESIDENT OFFICERS

J. S. HICKMAN, M.D. ....	Superintendent
WM. J. CAVANAUGH, M.D. ....	Physician
H. F. TATUM, M.D. ....	Physician
M. V. MOSBY, D.D.S. ....	Dentist
W. F. MAYO .....	Business Manager
W. H. COPP .....	Bookkeeper
MILDRED CAVETT .....	Laboratory Technician
C. L. STUART .....	Supervisor and Druggist
MRS. MARY L. VAN ZANDT .....	Female Supervisor
ANNIE NEAL KING .....	Director of Occupational Therapy
BOB GRIFFIN .....	Chief Engineer
L. F. ARMSTRONG .....	Master Farmer
IRBY A. MAJURE .....	Dairyman
HARVEY GREEN .....	Baker
REV. S. P. DUBOIS .....	Chaplain

## REPORT OF SUPERINTENDENT OF EAST MISSISSIPPI STATE HOSPITAL

To the Board of Trustees of the State Eleemosynary Institutions:

The Biennial Report of the Superintendent, ending June 30, 1937, is herein respectfully submitted.

I will make this report as brief as possible, as I hope every member of the Legislature will take time to read and digest it.

I have served as Superintendent only thirteen months of this twenty-four month period. I found more than \$4,000.00 deficit when I took charge, which will show up in detail in the business manager's report. I will state though, it has been paid in full.

The following records may seem to show inefficiency and that the hospital is not taking care of its prorata share of patients as we have an average of 28 less than for the first year of the biennium. We have, however, admitted all patients brought to us—338, or, 28 more than the first year. We had the same number of deaths, but more paroles, which caused our daily average population to be less. This decrease in population and increase of paroles, I believe, was due to having more employees and better cooperation.

I further believe that since we take care of more patients, as the records show, that our hospital has made progress in efficiency and economy, and as proof, we offer the following facts: 901 patients on books with an 800 capacity, and a 790 daily average.

There remained on the hospital records on July 1, 1935, a total of 914 patients; 465 men and 449 women. During the first year of this biennium there were admitted 310 patients; 206 men and 104 women. Three hundred and twenty-eight (328) patients were allowed to leave the hospital on parole; 221 men and 107 women. Of the 328 patients paroled, 66 were returned from parole; 48 men and 18 women. The total number of deaths during the year was 57; 38 men and 19 women. The total number receiving treatment during the year was 1,224; 671 men and 553 women. The daily average for the year was 818. Eight hundred and twelve (812) patients were actually in the hospital at the end of the period covered by this report; 411 men and 401 women. There were 122 patients on parole; 83 men and 39 women.

There remained on the hospital records on July 1, 1936, a total of 934 patients; 494 men and 440 women. During the second year of this biennium there were admitted 338 patients; 228 men and 110 women. Of this number, 92 were readmissions; 60 men and 32 women. Three hundred eighty-four (384) patients were allowed to leave the hospital on parole; 265 men and 119 women. Of the 384 paroled, 112 patients were returned from parole; 80 men and 32 women. There were 5 patients transferred to other hospitals. The total number of deaths during the year was 57; 28 men and 29 women. The total number receiving treatment during the

year was 1,272; 722 men and 550 women. The daily average for the year was 790. Seven hundred and eighty-six (786) patients were actually in the hospital at the end of the period covered by this report; 393 men and 393 women. There were 115 patients on parole; 77 men and 38 women.

During the biennium, 2,496 patients were treated. Of this number 712, or 28.5 percent were paroled, and 114, or 4.6 percent died. Considering the fact that the death rate for the entire population of the United States is 1.15 percent, I think our death rate is extremely low for a hospital group of patients who are mentally and physically sick, and, many coming to us in the late years of life. The principal causes of death are, chronic myocarditis, arteriosclerosis, pellagra, general paralysis of the insane, cerebral hemorrhage and epilepsy. For the percentages of the various psychoses of admissions, I refer you to Schedule 5-A, of this report.

#### Psychiatric Report

We have a well organized Medical Staff, and treatment consists of individualization of each case. Psychotherapy has replaced institutional supervision; hydrotherapy and occupational therapy have replaced idleness and restraint; kindness has replaced threats; a balanced diet has worked more wonders among our patients than any other one thing. Our personal contact creates a confidence and cooperation, rather than resentment and antagonism.

We have many patients that were confined to cells, now taking part in outdoor exercises and occupational work. We teach them to live with themselves, and in many instances where they have proper supervision, they can live in the outside world.

#### Medical Report

Staff meetings are held daily for diagnostic purposes; the Superintendent presiding, with staff members present; namely, Dr. W. J. Cavanaugh, who is in charge of the male service; Dr. C. L. Stuart, supervisor of the male service; Dr. H. F. Tatum who is in charge of the female service, and Mrs. Mary Locke Van Zandt, supervisor of the female service. These meetings are called promptly at 10:00 A. M., which is just after the doctors and supervisors have made their daily inspection of the wards, cottages and hospital wards. They first give in detail, the condition of each service and the patients, which is placed on daily record. Immediately following this, we take up the diagnostic problems. The summary of each case is read and a diligent examination of the patient is made before a final diagnosis is made.

#### Laboratory Department

The Laboratory Department is under the supervision of Miss Mildred Cavett, who is well qualified by training, as well as experience. She makes routine examinations of urine and feces, and makes complete blood pictures and spinal fluid, when it is found necessary, to arrive at a difficult diagnosis. Will refer you to the detailed report of the Laboratory Technician for the work done in this department for the biennium.

### Drug Room and X-Ray

The drug room is in charge of Dr. W. J. Cavanaugh, as well as the general X-Ray department. He has as his assistant, Dr. C. L. Stuart. This work is efficiently carried on.

### Dental X-Ray and Laboratory Department

This department is under the direction of Dr. M. V. Mosby, who is well qualified for the position, and is intensely interested and doing his work in keeping with the progressive dentists.

### Surgical Department

All surgical cases are immediately transferred to the hospital where Miss Bonnie Mae Keys, R.N., is supervisor of the hospital. The major surgery is done by Dr. R. L. Rhymes. He is assisted by our medical staff and nurses in charge of the hospital. We have done a number of sterilizations, which is the major procedure in controlling insanity. We have done all necessary major surgery without a single death and with much benefit to our patients both in a physical as well as a mental therapy. I cannot praise Dr. Rhymes too highly for his efficient and cooperative work in our hospital.

### Office Work

Mrs. Carrie Watson is filing clerk and secretary to the Superintendent. She is assisted by Miss Nylic Holland as stenographer, who takes all records of the staff meetings. This work has been carried on by Mrs. Watson in a very efficient way.

### Switchboard

The switchboard has been moved from the stenographer and filing clerk's office to the hall and placed under the supervision of Miss Helen Brumfield, day operator. She has an assistant. She also acts as hostess and keeps the daily records for the Superintendent.

### Occupational Therapy Department

This department is under the supervision of Miss Annie Neal King, who has two assistants. We believe that occupational therapy is a means of diversion, which plays an important part in aiding the patients to mental and physical readjustments. In this department we have a habit training class. Here, every effort is made to find the kind of work that will interest the patient and stimulate his creative instincts. All forms of recreational work are planned and given by the occupational therapy department; consisting of weekly dances, community singing and religious services. Very often, after this special training has been given, the patient can be replaced to his former occupation in the hospital, or returned home, if he can be placed under proper supervision.

### Beautician Therapy for Female Patients

This work is placed in the hands of Miss Margaret Lee, who is well trained in her profession, and, after working here for more than two years, she has learned to handle her patients, which makes her treatment

much more valuable. And when she has given facial and hair treatments, and manicures, many times it causes the patients to become interested in themselves again, and regain their feminine pride, and makes a great change in the general appearance of the patients; and many call to go back to the beauty shop before their regular turn.

#### **Barber Shop for Men**

This department is in charge of Mr. W. A. Lewis, who is a trained barber by profession, and his several years' training here makes him well fitted for the place. He shaves each patient twice a week and trims their hair once each month. We find that this is a good treatment.

#### **Recreational and Amusement Sports, Music and Entertainment**

All music is furnished by the W.P.A. Orchestra, under the direction of Mr. John Stroble, who is quite capable. He has been serving in this capacity for more than two years, to make music for the dances and special music for the holidays. Other recreation and amusements are by the occupational therapy department, and consists of basket ball, tennis and indoor baseball.

#### **Religious Activities**

This work is in charge of Rev. S. P. DuBois, who, by having long experience, has been able to make this service a spiritual uplifting, as well as entertainment for the patients. He is assisted by the occupational therapy department in song service. However, every effort is made to provide religious counselors of the faith to which the patients give their allegiance.

#### **Business Office**

Mr. W. F. Mayo has been in charge of the business office for the last year of the biennium. He has as his bookkeeper, Mr. Wallace Copp, and also has Mr. Brooks Cochran in charge of the commissary and as general utility man. Mr. Mayo and his assistants cooperate well, and likewise, with the Superintendent, as well as with the State Board of Control. He has supervised the business well and by so doing, we have not only worked hard to find the leaks, but have been able to check them. Therefore, we have not had to apply such rigid economy to the detriment of the patients and the institution, but we have been able to carry on the progress of the hospital in an efficient manner.

#### **Inventory**

Inventory of repairs, furniture, equipment, swine, poultry, dairy and mules has been carefully taken and shows an increase over last year of \$47,065.72. A portion of this was due to carelessness in taking the inventory the first year of the biennium. A great amount is in new equipment, repairs, increase in dairy herd, poultry and swine during the last year of this administration. In these repairs you will notice that \$772.52 was spent in building the fishpond dam, which of course was built by the labor of the institution. This dam was destroyed before my administration began, and I was requested by the Legislature to replace it.

Would like to say we have a decrease in the valuation of the mules to the amount of \$1,120.00, as their valuation was rated entirely too high, being old and at their ages, the valuation decreases rapidly. You will notice we have the same number.

#### Farming Industry

The farming industry is under one general head, Mr. L. F. Armstrong is the general superintendent. He has as his assistants, Mr. J. T. Darby, assistant over the general farm; Mr. E. R. Haynes, assistant gardener; Mr. M. L. Cumberland, tractor driver, and Mr. C. C. Collins, poultryman. Mr. Armstrong also has charge of the swine. Also, has charge of the cannery and has canned more than 2,000 gallons of tomatoes, has preserved more than 100 gallons tomato juice, 720 gallons kraut; also pickles. He is not only a good farmer, but keeps his crew well organized and during the last fiscal year has shown a profit of around \$8,000.00, as well as given employment to many patients, who would have been idle otherwise.

#### Dairy

Mr. Irby Majure has been Superintendent of the dairy during the last year of the biennium. He has two assistants. We really had a problem when we took charge. We had 136 head of cattle after having a general moving of the neighbors cows from the herd. We immediately found that we had Bangs' Disease (abortion) in the herd. We made three tests and had to butcher 49 cows and 2 bulls. We had one cow to die; sold 21 male calves and now have 136 in the herd, and probably all these free from communicable diseases. We now have 86 cows bred and a promise of doubling our herd within two or three years. Our milk supply has been doubled in amount in so far as the records show, that we could find. At the normal price for milk and butter, the dairy has shown a profit of more than \$9,000.00. The farm and dairy have been the only salvation for the low appropriation.

Would like to state that these are all white patients; all mentally or physically sick, that all expenses are included, such as clothing, tobacco, food, repairs, improvements, salaries for employees, auditing of the books, the Board's expenses, insurance. In fact all expenses are included.

	Average No. Patients	Per Cap. Cost Per Patient per mo.	Per Cap. Cost Per Hosp. Day
July, 1936 .....	808	\$12.87	.42
August, 1936 .....	806	14.19	.46
September, 1936 .....	790	14.00	.47
October, 1936 .....	790	14.86	.48
November, 1936 .....	785	13.82	.46
December, 1936 .....	786	15.30	.49
January, 1937 .....	780	14.47	.47
February, 1937 .....	778	12.82	.46
March, 1937 .....	775	16.53	.53
April, 1937 .....	783	16.25	.54
May, 1937 .....	780	14.31	.46
June, 1937 .....	784	15.03	.50

### Grounds

The hospital grounds consists of lawns, cemetery, flower garden and green houses, under the supervision of Mr. J. A. Grice, with one assistant. Will say it is equally as well kept as at any time of the hospital history. I feel that the cemetery has been improved upon, well cleaned off and shubbery placed in proper places, and we are now placing cement markers for each grave. The road has been worked and opened up to the cemetery; fences rebuilt to keep cows from trampling over the graves.

We have shrubbery extending from the kitchen to the dairy barn; all diseased or dead shrubbery are immediately replaced with new.

The green houses are kept in the best condition, which are used to provide future shrubbery, for transplanting flowers, in bedding use for winter blooming purposes.

The flower garden is given to raising nursery-stock, which is used to beautify the campus, rock gardens and general grounds.

We feel sure we have the most beautiful grounds to be found in this part of the country. Aside from the beauty or aesthetic value, the patients appreciate them, which places them in a contented mood, and which is excellent treatment for them. We also furnish sprays for the sick, as well as the dead.

### Sewing Room

This department is under the direction of Miss Eva Harrington. She has eight or ten female patients who help her to make all clothing for the female service. And also make the underwear for the male patients. This is very profitable for the institution and for occupational therapy for the patients.

### Patch Room

The patch room is under the supervision of Mrs. M. E. Wade. They have eight or ten more female patients occupied in the department. They make all repairs of the men's clothing, as well as the female. This is profitable for the institution, as well as good treatment for the patients.

### Kitchen and Bakery

This department is under the supervision of Mr. Harvey Green, who is experienced and well qualified to handle this position. Here is where all the cooking and planning of the meals is done for the combined service. Every care is taken to see that a well balanced ration is furnished while the same care is used to prevent waste. One of the doctors and a supervisor visits these dining rooms daily at meal time; and, the monthly report shows that the patients have gradually gained in weight and never complaining of the food.

### Kitchen and Dining Room for Employees

This is under the supervision of Miss Gertrude Filer. She has two assistants. This department is well handled. Mr. Mayo, the Steward, is consulted in furnishing of both of the kitchens.

### Engineering Department

Mr. Bob Griffin is Chief Engineer and has control of the heat, light, water and sewerage disposal systems. These systems have been kept in a good state of repair. The ice plant has maintained all necessary cold storage and furnished ice for our institution, as well as for the Matty-Hersee Hospital. Gas meters are read by this department along with the Mississippi Power Company. The water for the hospital is supplied by the City of Meridian, and meters read by our engineering department.

### Laundry

The laundry is under the supervision of Mr. J. H. Terry. He has two assistants in this department. Three of the machines have had to be rebuilt during the biennium.

### Carpenter Shop

One of the most useful, as well as the busiest departments of the institution is under the supervision of Mr. C. R. Posey. He has one assistant. All necessary repairs are made by this department, as well as new buildings are constructed by them. He has three patients also that work in the department.

### Painting Shop

The painting shop is under the supervision of Mr. George Henley, who has painted most of the resident buildings, as well as many of the wards of the institution. He also paints all necessary signs for the institution.

### Acknowledgments

As Superintendent, I wish to express my appreciation of the many gifts and kindnesses received during the past year, and thanks to the grateful people who have been so constantly mindful of the sick and afflicted. All articles received for the patients are listed and carefully checked, and turned over to them.

### Recommendations

The care of the mentally sick is one of the greatest of the state. The taxpayers spend more than a million dollars each biennium for care and treating of those that are sick mentally, but have never spent one cent to prevent mental sickness. Mental Hygiene Clinics should be held in various parts of the state in order to teach nervous inclined children, and prevent them from having to be cared for in the hospitals in their latter days in a State Hospital. I would recommend that this hospital should have an appropriation of at least \$325,000.00 per biennium, to take care of the mentally sick. I would also recommend that we should have at least \$70,000.00 to repair all buildings, plumbing, water-works, refrigeration, painting, etc.

The table below is given to show the efficiency in handling this hospital, which begins 1930 and ends 1937.

	Admitted	Died	Discharged	Employees	Appropriations
1930	485	105	393	78	\$430,000.00—1930 & 1931
1931	484	98	381	81	
1932	462	55	367	58	\$300,000.00—1932 & 1933
1933	362	56	393	59	
1934	469	67	313	78	\$287,500.00—1934 & 1935
1935	304	51	306	82	
1936	310	57	233	91	\$275,000.00—1936 & 1937
1937	338	57	314	94	

#### Conclusion

I wish to express my appreciation for the aid and co-operation that the Board of Control has given me in being able to carry on the operation of this hospital, as well as possible under the circumstances. This appropriation has been the lowest for many years and the expenses for operating our business has been exceedingly high, and a difficult undertaking.

I also wish to thank my staff, other officials and all employees for the faithful and loyal service that they have rendered to the institution and to the State during the biennium.

Respectfully submitted,

J. S. HICKMAN, M. D.

Superintendent.

#### NEW EQUIPMENT AND IMPROVEMENTS

New tractor, with starter & lights .....	\$1,068.00
1 New mower .....	191.50
1 New Hammer mill .....	280.00
1 New pick-up .....	600.00
1 New incubator .....	695.00
Farm implements .....	220.00
Fruit trees .....	329.40
Cockerels .....	75.00
Hot beds and cold frames .....	300.00
1 New Refrigerator .....	65.00
Road slips .....	44.25
	<hr/>
	\$ 3,868.15
Repairs on buildings & equipment .....	5,389.45
	<hr/>
	\$ 9,257.60
Also spent \$775.00 rebuilding Mosby's dam .....	775.00
	<hr/>
	\$10,032.60

## PRODUCTS FROM FARM

July 1, 1936 to June 30, 1937

## SCHEDULE 4—MOVEMENT OF PATIENT POPULATION

For the Year Beginning July 1, 1935 and Ending June 30, 1936

	Men	Women	Total	Men	Women	Total
1. Number patients on books of Hospital at beginning of hospit'l yr. July, 1 1935						
(a) In hospital .....	417	399	816			
(b) On parole .....	48	50	98			
Total .....				465	449	914
2. Admissions during year:						
(a) First admissions .....	164	82	246			
(b) Readmissions .....	42	22	64			
3. Total .....				206	104	310
4. Total on books .....				671	553	1224
5. Discharges during year:						
(a) Recovered .....	5	13	18			
(b) Improved .....	38	49	87			
(c) Not improved .....	38	21	59			
(d) Without psychoses (Drug addicts, Alcoholics, etc.) .....	58	11	69			
(e) Died .....	38	19	57			
6. Total Discharges .....				177	133	290
7. Number patients on books at end of hospital year June 30, 1936:						
(a) In hospital .....	411	401	812			
(b) On parole .....	83	39	122
