topics. He was much concerned about maintaining the internal consistency and coordination of a total body of thought.

Certain themes are recurrent in all of Littleton's writings. Ever conscious of the role of history and its influence in the development of accounting ideas, Littleton looked to history as a source of guidance for present practices and ideas. He viewed change as a continuing element in the evolutionary development of accounting as a discipline responsive to change and need. He emphasized continuously the interrelationship between theory and practice. The theory of accounting is rooted in transactions reflecting actions and experiences. Theory and practice are inseparably connected; therefore, accounting is a practical art. In his continuing discussions of the historical cost concept, Littleton repeatedly stressed the necessary choice among alternatives; the choice between the use of cost or value in income determination.

An Introduction to Corporate Accounting Standards, coauthored with W. A. Paton and published in 1940, has been noted (by Eldon S. Hendriksen, Accounting Theory, Revised, 1970) as the single most significant contribution of its period to the development of accounting theory. It is likely that no single United States' accounting publication has been cited so often or esteemed so highly. It has been a staple in courses in accounting theory since its publication and has thereby influenced accounting teaching and research.

Structure of Accounting Theory, published in 1953, grew out of Littleton's seminars, thinking, and writing over a twenty year period. It can be viewed as a culmination of his considered thought.

It is apparent that 302 articles, editorials, comments, discussions, bulletins, papers, and book reviews written and presented in various accounting journals from 1926 to 1966 constitute a conspicuous contribution to the literature of accounting. A broad spectrum of topics were covered although the bulk were basic, continuing topics of interest and importance to the field of accounting.

After graduation with a degree in business administration from the University of Illinois in 1912, Littleton worked with the public accounting firm of Deloitte, Pflender, Griffth and Co. in Chicago, Illinois from 1912-1915. In 1915 he returned to his alma mater as an accounting instructor. He received a Master of Arts degree in economics in 1918, an Illinois CPA certificate in 1919, and a Doctor of Philosophy degree in 1931. His doctoral thesis was awarded the American Accounting Association's Alpha Kappa Psi Award for his many contributions to his profession. He was elected to the Accounting Hall of Fame in 1956.
