# annual report **1984-85**

Major developments affected the Institute and its members this year. Public concern and Congressional studies brought the accounting profession more into the limelight. Extensive proposals to change the tax law provided an opportunity for members to mobilize and to participate in the legislative process. Accountant's liability and availability of insurance coverage have emerged as a major concern of the membership. The need to reconsider the organization's mission and

# MESSAGE TO MEMBERS

approach to achieving compliance with standards of professional conduct has become more apparent. To address these and other developments, the Institute and its members have taken a number of important initiatives.

Congress, the media, and others are concerned about the quality of audits. Congressional hearings centered on the effectiveness of self-regulation, auditing and accounting standards setting, and auditor independence. The Institute, as one of the first participants in these hearings, provided testimony (mailed to all members) that expressed a clear commitment to implement "sound solutions to real problems" the hearings might identify.

We believe the actions and initiatives taken by the profession this year to improve audit quality evidence our commitment to meet the needs of the public and to discharge our responsibilities with integrity and objectivity. Ahead we may find that even more is expected of us by the public we serve. We must be ready to consider how the profession can reasonably meet any legitimate public expectations identified.

## AMERICAN INSTITUTE OF CERTIFIED PUBLIC ACCOUNTANTS

## PUBLIC EXPECTATIONS AND AUDITOR'S RESPONSIBILITY

Auditors perform their societal role with due professional care and with concern for the public interest. However, a gap apparently exists between what some expect from the audit function and the responsibility auditors have reasonably assumed. This expectation gap largely relates to the auditor's responsibility for detecting errors and irregularities, for reporting illegal acts, and for providing the public with an "early warning" when a company is in financial difficulty.

984-85

Recognizing the need to revisit important auditing standards and to consider their continued applicability in the light of public expectations, the Auditing Standards Board is reconsidering the guidance currently provided in these areas. A number of key issues are under study including auditor responsibility for discovering fraud, auditor responsibility for reporting illegal acts to others, "cooked books" and intentional distortions of financial statements and how auditing standards communicate the auditor's broad responsibility.

In considering the broad issue of the public's desire for "early warning" from independent auditors, the Institute has concluded that management and auditors may need additional accounting guidance on disclosure of uncertainties involving risk and the concentration of business. Accordingly, the Accounting Standards Executive Committee will appoint a task force to evaluate the adequacy of current FASB standards in that area. The task force is expected to produce an issues paper for the FASB's consideration.

Meanwhile, the Auditing Standards Board has approved issuing an exposure draft that provides the following: illustrative procedural suggestions regarding the auditing of contingencies and uncertainties; guidance on how to evaluate footnote disclosure in this difficult area; and sharper criteria than in present literature about when the auditor should qualify an opinion as subject to uncertainty. The exposure draft is expected to be available for public comment by early fall.

Failures by banks and savings and loan associations have raised questions about the adequacy of loan loss reserves. To address these questions, additional guidance on auditing loan loss reserves is being developed by the Institute's banking committee with the aid of a full-time consultant.

All of these activities are important. While they are in progress, the Institute is continuing to study the "expectation gap" with a view toward identifying other appropriate initiatives.

## PREVENTION AND DETECTION OF FRAUD

Increasing allegations of fraud have raised questions about the system of corporate accountability and the effectiveness of independent audits. We all recognize that public confidence in the financial reporting system is of paramount importance. Those who deliberately issue misleading financial statements obtain capital unfairly at the expense of honest competitors for capital. Accordingly, on behalf of the membership the Institute has spearheaded the appointment of an independent National Commission to identify ways to detect and prevent improprieties by all those involved in the financial reporting process.

The Commission, announced in June, has six members: Chairman James C. Treadway, Jr., former SEC Commissioner and partner in the law firm of Baker & Botts; William M. Batten, immediate past Chairman of the New York Stock Exchange; William S. Kanaga, immediate past Chairman of Arthur Young & Company; Hugh L. Marsh, General Manager of Internal Audit, Aluminum Company of America; Thomas I. Storrs, immediate past Chairman of NCNB (North Carolina National Bank) Corporation; and Donald H. Trautlein, Chairman and Chief Executive Officer of Bethlehem Steel Corporation.

The Institute formed this Commission in cooperation with other organizations including the American Accounting Association, the Financial Executives Institute, and the Institute of Internal Auditors. G. Dewey Arnold, CPA, is heading a

Washington-based staff to coordinate the Commission's work, which is expected to span approximately 18 months.

## GOVERNMENT SECURITIES DEALERS

In response to concerns about the failures of government securities dealers, within a four month period a study was completed and more than 40,000 copies of a comprehensive report issued by a special task force on audits of repurchase security transactions. The report provides understandable descriptions of complex repurchase transactions, explains the risk inherent in such transactions, and discusses how the auditor can assess these risks. The Auditing Standards Board and the Financial Accounting Standards Board are carefully studying the report's recommendations.

Because related party transactions were significant to several failures involving government securities dealers, a soon to be issued interpretation of generally accepted auditing standards will emphasize the need for the auditor to understand the business purpose and economics of these transactions from the perspective of all the parties involved.

## SHOPPING" FOR ACCOUNTING PRINCIPLES

Wide concern is being expressed about the increased frequency of companies choosing to consult with other auditing firms when dissatisfied with positions taken by their auditors on accounting or disclosure matters. Generally accepted accounting principles provide the framework for responding to such requests, and existing ethical standards also deal with the matter. However, in view of the potential for adversely affecting the quality of financial reporting, consideration is being given to providing additional guidance in these situations. Because we must be concerned about possible public perception that professional standards may be compromised, we urge all members to apply their best professional judgment when these matters arise.

## DIVISION FOR CPA FIRMS

The Division for CPA Firms continues its emphasis on quality performance by its members through a variety of membership requirements. Because the program is not well understood, the Division undertook an ambitious public information effort that stresses the importance of membership in the Division and the usefulness of peer review. The multimedia program incorporates newspaper advertising, news releases, and editorial briefings for major newspapers and magazines. Media training programs helped to prepare members for their roles as newsmakers.

Administratively, the two Sections continued their efforts to improve the procedures for peer review while reducing paperwork and costs, and to increase uniformity in the process.

The Private Companies Practice Section introduced several new services to attract new members. These included a toll-free consultation service, a confidential consulting review program, a report review for firms that do not perform audits, and a comprehensive member information manual.

The SEC Practice Section expanded its requirements for concurring partner review and audit partner rotation; both steps were aimed at enhancing the reliability of audits. The Section has consistently required that litigation involving SEC registrants be reported and that requirement has now been extended to publicly held financial institutions. In response to concerns about opinion shopping and professionalism, firms will be required to adopt quality control policies and procedures covering opinions on accounting principles which will be subject to peer review.

# AICPA ANNUAL REPORT 1984-85

## TAX DEVELOPMENTS

# PROFESSIONAL LIABILITY

Through its network of committees and task forces, the Federal Taxation Division commented at every stage as the current tax reform proposals moved through the legislative process. It submitted to the Congress, Treasury and other interested parties a comprehensive analysis of the provisions of the administration's proposal that has come to be known as "Treasury II." And in our testimony before the House Ways and Means Committee and other submissions, the Institute expressed strong opposition to the proposal to require businesses to use the accrual method for tax reporting in specified situations. This requirement would apply if more than \$5 million in annual gross receipts is reported or if some method other than cash is regularly used for financial reporting purposes – a proposal that would dramatically affect smaller businesses and CPA firms. We thank the many Institute members who are writing to their Congressional representatives to point out the unfairness and needless complexity of this proposal. We are hopeful that this operation of our "key person program" will prove effective.

Difficulties in communication between the IRS and taxpayers and their tax advisers also continue as a major problem. The Institute sought relief, bringing the problems to the attention of the IRS and Treasury Department at frequent meetings and offering recommendations for improvement.

Expression of our views on tax matters is strengthened by the existence of the voluntary Tax Division, formed last year for members with a strong interest in taxation. The Division, whose membership now stands at 16,500, offers various services and provides an opportunity for CPAs to share experiences and ideas on tax matters.

The insurance industry in 1984 suffered the heaviest underwriting losses in eighty years. Product liability and negligence recoveries are too often based on a social theory that every loss must be recovered. This has resulted in severe cost increases and constrictions in availability for all types of casualty coverage. The professions have been particularly hard hit and accountants have shared the problem with doctors, lawyers, architects and others.

Despite the depressed state of the casualty insurance industry, the AICPA's professional liability plan continues to grow; nearly 15,000 local and regional firms benefit from its protection. However, substantial rate increases were necessary to preserve the plan's stability and ensure its continuance. The professional liability insurance committee is studying past results in the hope of predicting and isolating potential losses. In addition, we have begun a long-term study of accountants' legal liability to determine what might be done to bring members' liability exposure into line with the responsibilities reasonably assumed by CPAs.

One of our primary legislative efforts in Washington has been directed at seeking changes in the civil provisions of the Racketeer Influenced and Corrupt Organizations Act (RICO). RICO, enacted more than a decade ago as a legislative weapon to combat organized crime, has come to be used against ordinary businesses in ways Congress never intended. Many parties that sue legitimate businesses, individual CPAs, or accounting firms use RICO's civil provisions as the basis for seeking treble damages plus reimbursement of legal costs. To correct such abuses of civil RICO, the Institute was instrumental in seeking the introduction of legislation to require that, before RICO provisions could be used in a civil suit, a related criminal conviction must have occurred. In this way, we can guarantee that civil RICO's targets will be those convicted persons Congress had in mind all along. We supported this effort through our testimony before the House and Senate Judiciary Committees and in white papers prepared for distribution to involved groups. We also obtained the aid of other involved organizations to ensure that our collective voices are heard.

## PERSONAL FINANCIAL PLANNING

To support the wave of member interest in personal financial planning, the Institute this year organized a Personal Financial Planning Committee to help practitioners provide high-quality services in that very competitive market. The Committee will make available practical service aids such as guidance on government regulations and reporting on financial statements. Booklets will explain the financial planning services CPAs provide.

## FEDERAL TRADE COMMISSION

The Federal Trade Commission continues a wide-ranging study of how antitrust laws apply to professional organizations. The Commission has asked the AICPA for documents relating to the Code of Professional Ethics to evaluate whether the Rules of Conduct or their interpretations violate the FTC Act.

Selected documents are being provided under arrangements that will preserve the confidentiality of ethics proceedings. We have no indication what direction this nonpublic review is likely to take.

## MISSION

A significant study of the Institute's mission began last year. In looking at the objectives of our 231,500-member organization, the committee is considering whether the traditional focus on the public practitioner is still appropriate at a time when the portion of industry CPA members nears 50 percent. A preliminary report was presented to Council in May, and the suggestions offered are being incorporated into revised recommendations. The draft emphasizes the CPAs' concern for the public interest as an important aspect of the AICPA's mission.

# AICPA ANNUAL REPORT 1984-85

## SPECIAL COMMITTEE ON STANDARDS OF PROFESSIONAL CONDUCT

Improving the quality of practice is a concern of the entire profession. Accordingly, the AICPA Special Committee on Standards of Professional Conduct submitted an interim report to AICPA Council in the spring on a program to strengthen professional standards and increase member adherence to them. A key recommendation calls for replacing the existing ethics code with a goal-oriented, positively stated code that would apply to all AICPA members. The interim report also recommends a mandatory quality-assurance program for CPAs in public practice, performed with the cooperation of state societies and state boards of accountancy. The Committee is working out final details of its proposal for submission to Council and, ultimately, to the entire membership.

## **EXTERNAL RELATIONS**

**OPERATIONS** 

The groundwork was laid this year to give a greater dimension to the Institute's public relations activities. Heavier emphasis is being placed on building a positive public impression of CPAs, positioning the Institute as the authoritative voice of the profession, and supporting practitioners as providers of high quality services.

The Institute accelerated media relations, introduced a hometown press release program to publicize individual CPA activities, and arranged news conferences. We also produced a television documentary on the first four days of Congressional hearings. Special events called the attention of the White House to our public service record and resulted in CPAs participating in regional radio and television talk shows.

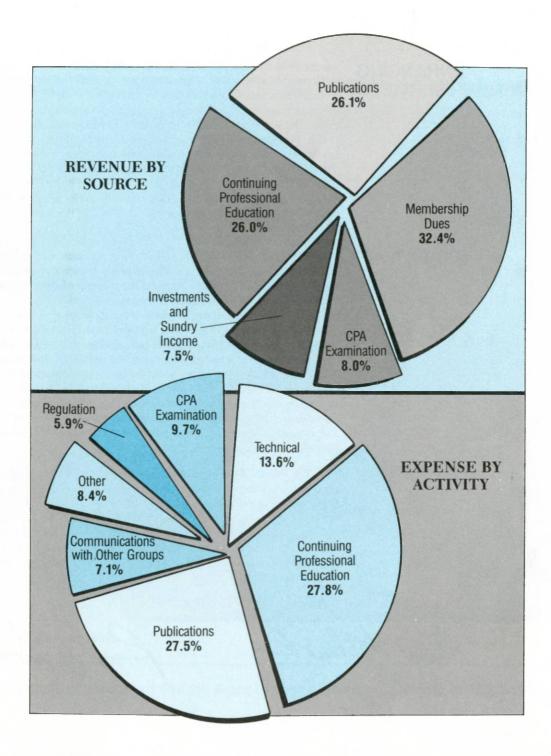

AICPA members are involved in one of the most comprehensive efforts in history to reach out to the nation's small business community. Two CPAs have been named to the National Steering Committee for the White House Conference on Small Business, to be held in August 1986. In addition, members of the AICPA and state CPA societies are serving as moderators, issue experts, and secretariats at regional meetings sponsored by the White House Conference. State CPA societies and other groups have been provided with guidance on publicizing the accounting profession's participation in this program.

The Institute received a "C-Flag" award from the White House Office of Private Sector Initiatives for demonstrating its commitment to community involvement and public service. Two Institute programs were registered with the White House: the annual Public Service Award Program and the Financial Management Seminar for Nonprofit Organizations.

Revenue increased by \$2.4 million to \$62.1 million whereas expenses were up by \$7.3 million to \$63.2 million resulting in expenses exceeding revenue by \$1.1 million. The Institute nevertheless continues to be in a strong financial position, the fund balance of \$17.7 million having increased by about \$7.5 million over the last three years. We expect to return to an excess of revenue over expenses in the fiscal year ending July 31, 1986.

A combination of two main factors led to the lower than anticipated results in the current year: a loss in CPE operations of \$1.3 million and substantially higher than expected costs of professional services. The latter resulted from greater than budgeted legal fees attributable to the Congressional hearings, the FTC investigation, legislative activities and the special study on professional liability exposure.

Revenue from CPE operations unexpectedly declined by 5% as compared with the prior year, primarily because of increased competition from a variety of suppliers—which reduced CPE market share. While steps are being taken to increase market share and otherwise respond to changing market conditions, it is unlikely that CPE will return to breakeven until fiscal 1987. CPE had produced net revenue of \$1.3 million over the two preceding years.

## ENHANCING MEMBER SERVICES

Recommendations of outside consultants for a realignment of staff activities to enhance member services were substantially completed during the year. The number of staff officers reporting directly to the President was reduced through the creation of two senior posts. Thomas P. Kelley, formerly Vice President-Technical, was appointed to the position of Group Vice President–Professional with overall responsibility for technical and self-regulatory activities. An experienced operating

# AICPA ANNUAL REPORT 1984-85

## ENHANCING MEMBER SERVICES (continued)

executive in the association field, Kenneth J. Kerin, was recruited late in the year as Group Vice President–Operations with overall responsibility for business and member-service related activities, including CPE and publications. Recognizing member concern for enhancing the image of the profession, a new vice presidential post was created and a highly regarded communications and publications professional, William J. Corbett, was engaged to give new emphasis to this area. Also continuing to report directly to the President are two experienced staff members: Theodore C. Barreaux, Vice President responsible for Washington Activities, and Donald J. Schneeman, General Counsel and Secretary. While other changes are yet to be made to give greater emphasis to member services and strategic planning, we believe these changes better position the staff organization to serve the needs of the membership.

## DIRECTORS

We would like to take this opportunity to thank all the members of the Board of Directors who serve the Institute with hard work and dedication. We particularly want to recognize the contribution of the three public members: Barbara Hackman Franklin, whose activities include government service, education and corporate board memberships; Alan Levenson, a highly respected Washington attorney; and Thomas Pryor, whose investment advisory activities bring to us a perspective of those who use CPA services. Their participation in Institute activities serves as a constant reminder of the importance of the public interest to the work of CPAs. Tom Pryor will be completing a seven-year period of service on the Board this year. His efforts on behalf of the profession extend well beyond that period and include service on the Wheat Commission, which recommended the creation of the FASB more than a decade ago. Tom, who will be greatly missed, will be replaced by Ralph Saul, former president of the American Stock Exchange and a former chief executive officer.

## **THE FUTURE**

The events of the past year serve to confirm that we live and work in a rapidly changing environment filled with new challenges and opportunities for the future. Optimism, innovation and quality in all our services, and willingness to be full participants in the free enterprise system should be the key to our continuing success.

We are a proud profession and stand today with a great reservoir of high public regard. Let us build an even better profession on that solid foundation, taking care to preserve the qualities of competence, integrity and objectivity for which we are so well recognized.

# **Responsibility for Financial Statements**

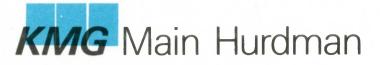

The management of the Institute is responsible for the preparation of the financial statements and all other information in this annual report. Financial statements were prepared in accordance with generally accepted accounting principles applied on a consistent basis. All financial information included in the report agrees with the financial statements. In preparing the financial statements, management makes informed estimates and judgments with consideration given to materiality, about the expected results of various events and transactions.

Management maintains a system of internal accounting control that includes personnel selection, appropriate division of responsibilities, and formal procedures and policies consistent with high standards of accounting and administrative practice. Two important elements of the system are an internal audit function and an employee code of conduct. Consideration has been given to the necessary balance between the costs of systems of internal control and the benefits derived.

Management reviews and modifies its systems of accounting and internal control in light of changes in conditions and operations as well as in response to recommendations from the independent certified public accountants and the internal auditor. Management believes the accounting and internal control systems provide reasonable assurance assets are safeguarded and financial information is reliable.

The Board of Directors, through its Audit Committee of non-management Directors, is responsible for determining that management fulfills its responsibilities in the preparation of financial statements and the control of operations. The Audit Committee recommends the independent certified public accountants to the Board of Directors. The Board presents this recommendation to the Council for approval. The Committee meets with management, the independent certified public accountants, and the internal auditor approves the overall scope of audit work and related fee arrangements, and reviews audit reports and findings. In addition, the independent certified public accountants and the internal auditor meet with the Audit Committee, without management present, to discuss audit results and other matters.

## TO THE MEMBERS OF THE AMERICAN INSTITUTE OF CERTIFIED PUBLIC ACCOUNTANTS

We have examined the balance sheet of the American Institute of Certified Public Accountants as of July 31, 1985 and 1984, and the related statements of revenue and expenses, changes in fund balances, and changes in financial position for the years then ended. We have also examined the balance sheet of the American Institute of Certified Public Accountants Foundation, the AICPA Benevolent Fund, Inc. and the Accounting Research Association, Inc. as of July 31, 1985 and 1984 and the related statements of changes in fund balances for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements identified above present fairly the financial position of each of the aforementioned organizations at July 31, 1985 and 1984, and the results of their operations and the changes in their fund balances and, for the American Institute of Certified Public Accountants, the changes in its financial position for the years then ended, all in conformity with generally accepted accounting principles which, except for the change, with which we concur, in the actuarial method of computing pension expense as described in Note 6 to the financial statements, have been applied on a consistent basis.

The accompanying summary of accounting policies and notes to statements are an integral part of these statements.

## American Institute of CPAs and Related Organization Funds

## **Accounting Policies**

These financial statements have been prepared in accordance with generally accepted accounting principles in the United States. The accounting principles used also conform, in all material respects, with the International Accounting Standards adopted by the International Accounting Standards Committee (IASC).

A summary of the accounting policies of the American Institute of Certified Public Accountants (Institute) and, if applicable, the American Institute of Certified Public Accountants Foundation (Foundation), the AICPA Benevolent Fund (Benevolent Fund) and the Accounting Research Association (ARA) follows:

Assets, liabilities, revenue and expenses are recognized on the accrual basis.

• Marketable securities are stated at the lower of aggregate cost or market. If market value has declined below cost, the resulting valuation allowance is shown as a reduction of the fund balance. Gains and losses on the sale of securities are included in operating results.

In 1984 the marketable securities of the Institute, Foundation, Benevolent Fund, ARA and the Division for CPA Firms were consolidated into three investment pools. The funds of these organizations are each assigned units of participation in such pools.

• Inventories are stated at the lower of cost or market. A monthly moving average method is used for determining inventory cost.

Authorship costs applicable to publications and continuing professional education courses the Institute expects will be sold in the future are amortized over the lesser of a three-year period or the useful life of the course. All other editorial costs are expensed as incurred.

• Furniture, equipment and leasehold improvements are stated at cost, less accumulated depreciation or amortization computed on the straight-line method. Furniture, and equipment are depreciated over their estimated useful lives of five to ten years. Leasehold improvements are amortized over the shorter of their useful lives or the remainder of the lease period.

• The Institute records dues as revenue in the applicable membership period. Dues of ARA members who support the Financial Accounting Standards Board (FASB) are assessed on a calendar year basis and recorded as additions to the fund balance in equal monthly amounts during each calendar year. Contributions collected by the ARA on behalf of the Governmental Accounting Standards Board (GASB) are recognized as revenue when received.

 Subscription and advertising revenue are recorded as publications are issued.

Contributions to specific funds are recorded as additions to fund balances in the period to which the contributions are intended to apply. • Notes and mortgages received by the Benevolent Fund in connection with assistance payments to members and their families are recorded as assets, net of amounts deemed uncollectible.

• Accounting policies, as they relate to the Institute's pension plan, are described in Note 6 to the financial statements.

## Notes to Financial Statements July 31, 1985 and 1984

#### **1.Marketable Securities**

Marketable securities, at cost, of the Institute consist of:

As of J	July 31
(in tho	usands)
1985	1984

	Contraction of the local division of the loc
U.S. Treasury bonds and notes \$ 7,875	\$13,336
Corporate demand notes 460	
Bonds, notes and CD's 4,552	2,763
Equities 7,842	1,057
\$20,729	\$20,312
Market \$21,847	\$20,480

#### 2.Inventories

Inventories of the Institute at July 31, 1985 and 1984 consisted of:

	1985	1984
Paper and material stock	\$1,038,986	\$ 418,898
Publications in process Printed publications and	451,136	683,319
course material	2,733,227	2,575,113
	\$4,223,349	\$3,677,330

#### **3. Furniture, Equipment and Leasehold Improvements**

Furniture, equipment, and leasehold improvements of the Institute at July 31, 1985 and 1984 were:

	1985	1984
Furniture and equipment	. \$4,910,745	\$4,705,086
Leasehold improvements		3,670,994
	8,756,416	8,376,080
Less accumulated depreciation		
and amortization	. 3,990,305	3,926,557
	\$4,766,111	\$4,449,523

Depreciation and amortization of leasehold improvements for the years ended July 31, 1985 and 1984 were \$825,916 and \$706,368.

#### **4.Taxes**

The Institute is a professional organization that qualifies under Section 501(c)(6) of the Internal Revenue Code. The Institute is subject to tax on unrelated business income arising from the sale of advertising in the *Journal of Accountancy* and the *Tax Adviser*.

### **5.Lease Commitments**

Rental commitments under noncancellable operating leases in effect as of July 31, 1985 were \$28,424,000. This amount excludes future escalation of charges for real estate taxes and building operating expenses. The principal lease (which has a 20-year base period) started in 1974 and can be terminated at the end of 15 years if the Institute pays certain penalties. Minimum rental commitments are:

#### Year Ended July 31,

1986 .			 3,696,000
1987 .			 3,512,000
1988 .			 3,082,000
1989 .			 2,990,000
			 2,904,000
Years s	ubsequent t	o 1991 .	 12,240,000
			\$28,424,000

Rental expense for the years ended July 31, 1985 and 1984 were \$5,177,000 and \$4,789,000.

#### **6.Retirement Plan**

Substantially all of the Institute's full-time employees are covered by a noncontributory defined benefit pension plan. Pension benefits begin to vest after five years of service and are based on years of service and average final salary. Actuarial assumptions and plan provisions are periodically reviewed by the Institute and its independent actuarial consultant to assure plan assets will be adequate to provide pension and survivor benefits.

The Institute's policy is to fund accrued pension costs. Expenses related to the Institute's pension plan were approximately \$614,000 in fiscal 1985 and \$987,000 in fiscal 1984. Prior to 1985, the Institute used the frozen initial liability method to determine pension costs. In accord with recommendations received from its independent actuarial consultant, the Institute changed to the projected unit credit method during the year. Over a period of years, the change is expected to reduce fluctuations in pension costs as a percentage of payroll and to reduce the over funding of the pension plan.

The effect of this change was to reduce pension expense by \$390,000 for the year ended July 31, 1985. Changes in the assumed rate of return and in other actuarial assumptions reduced pension expense by an additional \$85,000.

The accumulated plan benefits and plan net assets available as of the most recent valuation dates were:

	May 1,			
		1985	1984	
Actuarial present value of accumulated plan benefits:				
Vested Non-vested			\$ 6,833,988 1,395,201	
	\$	7,660,915	\$ 8,229,189	
Net assets available for benefits	.\$	13,395,518	\$11,709,390	

The actuarial present value of accumulated plan benefits results from applying actuarial assumptions to reflect the time value of money and the probability of making future periodic payments in accord with the plan's provisions. The accumulated benefits information was determined by the Institute's independent actuarial consultants in accordance with the requirements of Financial Accounting Standards Board Statement No. 36, "Disclosure of Pension Information." As required by the Financial Accounting Standards Board, the present value of plan benefits does not take into account (in contrast to the valuations used to determine pension cost) future increases in compensation of eligible employees.

The assumed rates of return used in determining the actuarial present value of accumulated plan benefits was increased from 6% in 1984 to 7% in 1985. This change, along with other actuarial changes had the effect of decreasing the actuarial present value of accumulated plan benefits by \$904,000.

## 7.Commitment of Foundation Funds

The Foundation plans to distribute, from the Accounting Education Fund for Disadvantaged Students, approximately \$350,000 each year for scholarships to minority students and for assistance programs to strengthen the accounting faculty of minority universities.

### 8. Commitment to Financial Accounting Foundation (FAF)

The Institute makes an annual contribution of \$2.00 per member to the FAF to support the work of the Financial Accounting Standards Board (FASB). The Accounting Research Association, Inc. (ARA) also makes a best efforts commitment to raise funds for the FASB from sources within the accounting profession, which commitment amounted to \$1,800,000 for the year 1985.

The ARA also makes a best efforts commitment to raise funds for support of the Governmental Accounting Standards Board (GASB). The commitment for 1985 is \$400,000.

It is anticipated the Institute and the ARA will continue to support both the FASB and GASB by contributing to the FAF.

#### **9.Special Purpose and Related Organization Funds** The purposes of the related organization funds are:

*Foundation:* To advance the profession of accountancy and to develop and improve accountancy education.

*Benevolent Fund:* To raise money to provide financial assistance to needy members of the Institute and their families.

Accounting Research Association: To provide a best efforts commitment to the financing of the Financial Accounting Foundation.

*Endowment Fund:* As part of consolidation of investment funds, the Endowment Fund was transferred from the Institute to the Foundation and consolidated with the Library Fund during fiscal 1983-84.

## **10.Division for CPA Firms**

The AICPA acts as custodian of the cash and marketable securities of the Division for CPA Firms. The amounts involved are shown on the accompanying balance sheets as offsetting assets and liabilities.

The balances at July 31, 1985 were:

	Cash	Marketable Securities	Total
Private Companies Practice Section SEC Practice Section .		\$ 409,290 1,280,408	
SEC Fractice Section .		\$1,689,698	

The Division's balance sheet and statement of changes in fund balances, on the accrual basis, were:

	July 31, 1985		
Balance Sheet	Private Companies Practice Section	SEC Practice Section	
Assets:			
Cash	\$ 32,410	\$ 77,378	
Marketable Securities			
(quoted market \$1,725,664)	409,290	1,280,408

Unearned advance dues	39,397	455,448	
Fund balances	338,874	734,780	
	\$453,359	\$1,390,418	

Statement of Changes in Fund Balances	Year Ended July 31, 1985	
Additions: Dues	\$ 80,318 45,916	\$1,059,085 104,767
Deductions:	126,234	1,163,852
Expenses of Public Oversight Board:		
Salaries and fees	=	586,218 338,812 925,030
Public relations program Membership directory Legal fees Administrative and	154,083 18,157 —	157,095 17,995 18,197
other expenses	59,725	9,297
Net increase (decrease) in funds Gain on sale of securities Fund balances.	<u>231,965</u> (105,731) 4,080	<u>1,127,614</u> <u>36,238</u> 7,428
beginning of year         Fund balances, end of year	440,525 \$338,874	691,114 \$ 734,780

In addition to the expenses above, the Institute incurred expenses during the years ended July 31, 1985 and 1984 in support of the Division for CPA Firms and in connection with related quality control programs. These expenses are included in the accompanying Summary of Expenses by Activity.

### **Supplementary Information (Unaudited)**

FASB Statement No. 33, *Financial Reporting and Changing Prices*, requires that certain publicly held companies present information about the effects of price changes and encourages other enterprises, including non-business organizations, to experiment with such information. This supplementary information was prepared in response to FASB Statement No. 33.

The historical cost financial data adjusted for general inflation is the result of restating all historical revenue and expense measurements in terms of dollars of average 1984-85 general purchasing power as reflected by the Consumer Price Index. Restatement of the prior years' reported results in terms of a constant measuring unit, today's dollars, makes all years comparable. When adjusted for the effect of general inflation, the five-year presentation more clearly portrays the trends in revenue, expenses and general fund balances. The inflation-adjusted data indicates that the Institute's revenue and expenses have increased at a rather modest rate when compared to the increases on a historical basis. Over the last five years, revenue has increased at a compound rate of 11.4% per year and expenses at a 12.46% rate. When adjusted for the effects of inflation, these rates of increase are 4.9% and 5.9% respectively. For the year ended July 31, 1985, expenses exceeded revenue on a historical and constant dollar basis by \$1,290,000 and \$1,409,000 respectively.

General inflation also causes a loss of purchasing power from holding monetary assets (the excess of cash, deposits, commercial paper, notes and receivables over current payables). The Institute's return on investments, during the period from fiscal 1981 to 1985, more than offset the loss in purchasing power on all net monetary assets during the same period. Basically, return on investments exceeded the rate of inflation.

### Supplementary Information 1981-1985 (Thousands of Dollars)
