In the QUEUE

NSF Undergrad STEM Ed Program

The NSF Improving Undergraduate STEM Education (IUSE) program promotes novel, creative, and transformative approaches to generating and using new knowledge about STEM teaching and learning to improve STEM education for undergraduate students. Proposals are due each January and July. https://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf23510. To watch for webinars or sign up for office hours with program officers, see <https://new.nsf.gov/funding/opportunities/improving-undergraduate-stem-education-directorate>.

What's All the Hype About?

Watch the UM Research Hype Video Here

Did you
KNOW?

Research Security - Know Your Collaborator

UM recognizes that international collaboration is a critical part of a collaborative scientific ecosystem. Unfortunately, select practices by some foreign governments have conflicted with the UM's, and our nation's, values and culture of open sciences, which resulted in the federal government implementing new regulations and procedures recently. In order to be compliant with federal laws and regulations, as well as to ensure your future federal research funding opportunities are not jeopardized by collaborating with prohibited or high-risk entities, please review and follow the recommendations in the included *What to Consider Before You Agree to an International Collaboration* handout.
