INTRODUCTION

The *Accountants’ Index* is a standard reference work published as a service to the accounting profession.

This twenty-fifth supplement to the *Accountants’ Index* is a continuation of the preceding twenty-four supplements to the original 1920 volume. The original Index, published in 1921, covered the “known English literature on the subject of accounting in print in 1912 and published since that year to and including December 31, 1920.” This volume covers materials indexed from January 1976 through early December 1976.

Naomi Werblowsky and Helen Younger assisted with the indexing for this twenty-fifth supplement and their contribution is gratefully acknowledged.

HOW TO USE THE ACCOUNTANTS’ INDEX

Since the Accountants’ Index is the index to the AICPA Library, all references listed in the Accountants’ Index are retained in the AICPA Library and are available for loan to members of the AICPA and to special libraries. This 25th supplement covers the titles added to the Library’s collection during 1976.

A subject/author index to English language periodicals, the Accountants’ Index also lists books, pamphlets and government documents by author, title and subject. The Library collects books and indexes journals in the fields of accounting, auditing, data processing, financial reporting, financial management, investments and securities, management and taxation. Special businesses and industries are also covered.

The Index is arranged in dictionary format and full citations are given with each entry. For the convenience of AICPA Library users and our reference librarians, the Library classification numbers assigned to books and pamphlets appear in square brackets. Journal titles are italicized.

Users are referred to the directories in the beginning of this volume for addresses of publishers. This supplement also contains cross references which are not yet included in the quarterly issues. If a “blind reference” is encountered, the user should check previous supplements for the heading given.

Estate planning concerns the management and disposition of property during a person's lifetime, and the disposition of that property at the person's death. Estate planning is a critical aspect of financial planning and involves the use of legal documents, such as wills, trusts, and powers of attorney, to manage assets and ensure the fulfillment of the person's wishes after their death.

The image contains a list of articles and publications related to estate planning, covering various aspects such as planning strategies, tax issues, and professional advice. The entries are categorized under headings like Estate Planning, Planning, Taxation — Estates And Trusts, and Accountants' Index 1976.

For example, one article lists a discussion on how to approach estate planning problems, providing guidance on how to cope with the problems areas. Another entry details the distribution of estate in accordance with the wishes of the deceased, highlighting the importance of clear and comprehensive documentation.

Several entries focus on tax implications, such as the reduction of estate taxes and the strategic use of trusts to minimize tax liability. The text suggests that the estate tax problems from joint account withdrawals are significant, and strategies to manage these issues are discussed.

The entries also touch on the role of accountants in estate planning, emphasizing their expertise in advising on financial matters and the legal implications of estate management.

In summary, the image provides a comprehensive overview of estate planning, encompassing legal strategies, tax implications, and professional advice for individuals and practitioners involved in this area.
