INTRODUCTION

The *Accountants' Index* is a standard reference work published as a service to the accounting profession.

This thirty-eighth supplement of the *Accountants' Index* is a continuation of the preceding thirty-seven supplements to the original 1920 volume. The original index, published in 1921, covered the “known English literature on the subject of accounting in print in 1912 and published since that year to and including December 31, 1920.” These volumes cover materials indexed by the AICPA Library Services staff for the period January through December 1989.

KAREN HEGGE NELOMS
Director
AICPA Library Services Division
HOW TO USE THE ACCOUNTANTS’ INDEX

The Accountants’ Index is the index to the AICPA Library. All references listed in the Accountants’ Index are retained in the AICPA Library and are available for loan to members of the AICPA and to special libraries. This 38th supplement covers the titles added to the Library’s collection during 1989.

A subject/author index to English language periodicals, the Accountants’ Index also lists books, pamphlets and government documents by author, title and subject. The Library catalogs books and indexes journals in the fields of accounting, auditing, data processing, financial reporting, financial management, investments and securities, management and taxation. Special businesses and industries are also covered.

The Index is arranged in dictionary format and full citations are given with each entry. For the convenience of AICPA Library users and our reference librarians, the Library classification numbers assigned to books and pamphlets appear in square brackets. Journal titles are italicized. Users are referred to the directories in the beginning of volume 1 for addresses of publishers.
