## FOREWORD

This volume, issued by the Auditing Standards Board (ASB), is a Codification of currently effective Statements on Auditing Standards (SASs) and the related Auditing Interpretations applicable to the preparation and issuance of audit reports for all nonissuers (nonissuers are all entities other than issuers as defined by the Sarbanes-Oxley Act, or other entities who are required to be audited by a registered public accounting firm as prescribed by the rules of the Securities and Exchange Commission). This volume is also a Codification of currently effective Statements on Standards for Attestation Engagements (SSAEs), and the related Attestation Interpretations. Superseded portions have been deleted and all applicable amendments have been included.

SASs are issued by the ASB, the senior technical body of the AICPA designated to issue pronouncements on auditing matters applicable to the preparation and issuance of audit reports for entities that are nonissuers. Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct, requires an AICPA member who performs an audit (the auditor) of the financial statements of a nonissuer to comply with standards promulgated by the ASB. An auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. An auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, an auditor may depart from a presumptively mandatory requirement provided the auditor documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Auditing Interpretations of SASs are *Interpretive Publications* pursuant to AU section 150, *Generally Accepted Auditing Standards*. Interpretive Publications are recommendations on the application of SASs in specific circumstances, including engagements for entities in specialized industries. Interpretive Publications are issued under the authority of the ASB. An auditor should be aware of and consider interpretations applicable to his or her audit. An interpretation is not as authoritative as a pronouncement of the ASB; however, if an auditor does not apply an auditing interpretation, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance. The specific terms used to define professional requirements in the SASs are not intended to apply to interpretations since interpretations are not auditing standards. It is the ASB's intention to make conforming changes to the interpretations over the next several years to remove any language that would imply a professional requirement where none exists.

SSAEs are issued by senior technical bodies of the AICPA designated to issue pronouncements on attestation matters. Rule 202 of the AICPA Code of Professional Conduct requires an AICPA member who performs an attest engagement (a practitioner) to comply with such pronouncements. A practitioner is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. A practitioner is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, a practitioner may depart from a presumptively mandatory requirement provided the practitioner documents his or her justification for the departure and how the alternative

procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Attestation Interpretations are recommendations on the application of SSAEs in specific circumstances, including engagements for entities in specialized industries, issued under the authority of AICPA senior technical bodies. An interpretation is not as authoritative as a pronouncement of the ASB; however, if a practitioner does not apply an attestation interpretation, the practitioner should be prepared to explain how he or she complied with the SSAE provisions addressed by such attestation guidance. The specific terms used to define professional requirements in the SSAEs are not intended to apply to interpretations since interpretations are not attestation standards. It is the ASB's intention to make conforming changes to the interpretations over the next several years to remove any language that would imply a professional requirement where none exists.

The Accounting and Review Services Committee, ASB, and Consulting Services Executive Committee are the senior technical committees of the Institute designated to issue enforceable standards under Rules 201 and 202 of the AICPA's Code of Professional Conduct concerning attest services in their respective areas of responsibility.

## STANDARDS RECENTLY ISSUED

<u>Statement</u>	<u>Title</u>	<u>Issue Date</u>	<u>Section</u>
SAS No. 112	<i>Communicating Internal Control Related Matters Identified in an Audit</i>	May 2006	325
SAS No. 113	<i>Omnibus Statement on Auditing Standards—2006</i>	November 2006	Integrated into AU 150, 316, <sup>1</sup> 328, 333, 341, 341A, 342, and 560
SAS No. 114	<i>The Auditor's Communication With Those Charged With Governance</i>	December 2006	380 <sup>2</sup>
SSAE No. 14	<i>SSAE Hierarchy</i>	November 2006	50

This edition of the *Codification of Statements on Auditing Standards (Including Statements on Standards for Attestation Engagements)* codifies SASs No. 104 through No. 111 (the "Risk Assessment" SASs) as follows:

<b>SAS No.</b>	<b>Codified Into AU Section</b>	<b>Amends or Supersedes SAS No.</b>
<b>The General Standards</b>		
No. 104, <i>Amendment to Statement on Auditing Standards No. 1, Codification of Auditing Standards and Procedures ("Due Professional Care in the Performance of Work")</i>	230	Amends SAS No. 1, section 230, <i>Due Professional Care in the Performance of Work</i>
<b>Statements on Auditing Standards—Introduction</b>		
No. 105, <i>Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards</i>	150	Amends SAS No. 95, <i>Generally Accepted Auditing Standards</i>
<b>The Standards of Field Work</b>		
No. 106, <i>Audit Evidence</i>	326	Supersedes SAS No. 31, <i>Evidential Matter</i>
No. 107, <i>Audit Risk and Materiality in Conducting an Audit</i>	312	Supersedes SAS No. 47, <i>Audit Risk and Materiality in Conducting an Audit</i>

<sup>1</sup> SAS No. 99, *Consideration of Fraud in a Financial Statement Audit*, as originally issued in October 2002, has been moved to AU section 316A until the effective date of SAS No. 113.

<sup>2</sup> SAS No. 61, *Communication With Audit Committees*, as amended by SAS Nos. 89, *Audit Adjustments*, and 90, *Audit Committee Communications*, as well as its related Auditing Interpretation, have been moved to AU sections 380A and 9380A, respectively, until the effective date of SAS No. 114.

<b>SAS No.</b>	<b>Codified Into AU Section</b>	<b>Amends or Supersedes SAS No.</b>
No. 108, <i>Planning and Supervision</i>	311	Supersedes SAS No. 22, <i>Planning and Supervision</i> ; Supersedes SAS No. 1, section 310, <i>Appointment of the Independent Auditor</i>
No. 109, <i>Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement</i>	314	Supersedes SAS No. 55, <i>Consideration of Internal Control in a Financial Statement Audit</i>
No. 110, <i>Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained</i>	318	Supersedes SAS No. 45, <i>Omnibus Statement on Auditing Standards—1983</i> , section 313, <i>Substantive Tests Prior to the Balance-Sheet Date</i> ; Supersedes SAS No. 55
No. 111, <i>Amendment to Statement on Auditing Standards No. 39, Audit Sampling</i>	350	Amends SAS No. 39, <i>Audit Sampling</i>

This edition of the *Codification of Statements on Auditing Standards (Including Statements on Standards for Attestation Engagements)* also moves the following until the effective date of SASs No. 104 through No. 111:

<b>Amended or Superseded SAS No.</b>	<b>Impact</b>	<b>AU Section</b>
<b>The General Standards</b>		
No. 1, section 230, as amended by SAS No. 41, <i>Working Papers</i> , SAS No. 82, <i>Consideration of Fraud in a Financial Statement Audit</i> , and SAS No. 99	Amended by SAS No. 104	230A
<b>Statements on Auditing Standards—Introduction</b>		
No. 95, as amended by SAS No. 98, <i>Omnibus Statement on Auditing Standards—2002</i> , and SAS No. 102, <i>Defining Professional Requirements in Statements on Auditing Standards</i>	Amended by SAS No. 105	150A
<b>The Standards of Field Work</b>		
No. 31, as amended by SAS No. 48, <i>The Effects of Computer Processing on the Audit of Financial Statements</i> , and SAS No. 80, <i>Amendment to Statement on Auditing Standards No. 31, Evidential Matter</i> , as well as its related Auditing Interpretations	Superseded by SAS No. 106	326A and 9326A, respectively
No. 47, as amended by SAS No. 82, SAS No. 96, <i>Audit Documentation</i> , and SAS No. 98, as well as its related Auditing Interpretations	Superseded by SAS No. 107	312A and 9312A, respectively

<i>Amended or Superseded SAS No.</i>	<i>Impact</i>	<i>AU Section</i>
<b>The Standards of Field Work—continued</b>		
No. 1, section 310, as amended by SAS No. 45, SAS No. 83, <i>Establishing an Understanding With the Client</i> , and SAS No. 89	Superseded by SAS No. 108	310 (not moved)
No. 22, as amended by SAS No. 47, SAS No. 48, and SAS No. 77, <i>Amendments to Statement on Auditing Standards No. 22, Planning and Supervision, No. 59, The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern, and No. 62, Special Reports</i> , as well as its related Auditing Interpretations	Superseded by SAS No. 108	311A and 9311A, respectively
No. 55, as amended by SAS No. 78, <i>Consideration of Internal Control in a Financial Statement Audit: An Amendment to Statement on Auditing Standards No. 55</i> , and SAS No. 94, <i>The Effect of Information Technology on the Auditor's Consideration of Internal Control in a Financial Statement Audit</i>	Superseded (together with SAS No. 110) by SAS No. 109	319 (not moved)
No. 45, section 313, as originally issued in August 1983	Superseded by SAS No. 110	313 (not moved)
No. 55, as amended by SAS No. 78 and SAS No. 94	Superseded (together with SAS No. 109) by SAS No. 110	319 (not moved)
No. 39, as amended by SAS No. 43, <i>Omnibus Statement on Auditing Standards</i> , and SAS No. 45, as well as its related Auditing Interpretation	Amended by SAS No. 111	350A and 9350A, respectively

Other changes to this edition of the *Codification of Statements on Auditing Standards (Including Statements on Standards for Attestation Engagements)* include:

<u>Section</u>	<u>Change</u>
PC Part I	Revision of <i>Applicability of AICPA Professional Standards and Public Company Accounting Oversight Board Standards</i>
PC Part II	Deletion of <i>List of Selected Final PCAOB Auditing Rules and Standards</i>
AU 311.25	Amendment of SAS No. 108 due to the issuance of SAS No. 114
AU 339A and 9339A	Deletion of SAS No. 96, as originally issued in January 2002, as well as its related Auditing Interpretation, as a result of SAS No. 103, <i>Audit Documentation</i> , becoming effective

<u>Section</u>	<u>Change</u>
AU 341.17	Amendment of SAS No. 59, <i>The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern</i> , due to the issuance of SAS No. 114 <sup>3</sup>
AU 530A	Deletion of SAS No. 1, section 530, <i>Dating of the Independent Auditor's Report</i> , as amended by SAS No. 29, <i>Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents</i> , and SAS No. 98, as a result of SAS No. 103 becoming effective
AU Risk Assessment Standards: SAS No. 104–SAS No. 111	Deletion of SAS No. 104 through SAS No. 111, in its originally issued form, due to their codification as outlined above
AU Appendix B	Revision of <i>Analysis of International Standards on Auditing</i>
AU Appendix F	Revision of <i>Other Auditing Publications</i>
AT 101.19, .21, .23, .35, .39, .42, .51, .63, .66, .71, and .78	Amendment of chapter 1, "Attest Engagements," of SSAE No. 10, <i>Attestation Standards: Revision and Recodification</i> , due to the issuance of SSAE No. 14

In addition, conforming and editorial changes have been made throughout the literature to reflect the issuance of SAS Nos. 103 through 113 and SSAE No. 14.

## HOW TO USE THIS VOLUME

### Scope of the Volume . . .

This volume, which is a reprint of the auditing part of the looseleaf edition of AICPA Professional Standards, includes Statements on Auditing Standards Nos. 1 through 114 and Statements on Standards for Attestation Engagements Nos. 1 through 14, issued by the Auditing Standards Board, Accounting and Review Services Committee, and the Consulting Services Executive Committee, and Auditing Interpretations and Attest Engagements Interpretations issued by the AICPA staff.

### How This Volume Is Arranged ...

The contents of this volume are arranged as follows:

#### **Applicability of AICPA Professional Standards and PCAOB Standards**

#### **Cross-References to SASs**

#### **Statements on Auditing Standards and related Auditing Interpretations**

AU § 100—Introduction

AU § 200—The General Standards

AU § 300—The Standards of Field Work

AU § 400—The First, Second, and Third Standards of Reporting

AU § 500—The Fourth Standard of Reporting

AU § 600—Other Types of Reports

AU § 700—Special Topics

AU § 800—Compliance Auditing

AU § 900—Special Reports of the Committee on Auditing Procedure

AU § Risk Assessment Standards: SAS No. 104—SAS No. 111

#### **Appendixes**

#### **Topical Index**

#### **Statements on Standards for Attestation Engagements and related Attest Engagements Interpretations**

AT § 20—Defining Professional Requirements in Statements on Standards for Attestation Engagements

AT § 50—SSAE Hierarchy

AT § 101—Attest Engagements

AT § 201—Agreed-Upon Procedures Engagements

AT § 301—Financial Forecasts and Projections

AT § 401—Reporting on Pro Forma Financial Information

AT § 501—Reporting on an Entity's Internal Control Over Financial Reporting

AT § 601—Compliance Attestation

AT § 701—Management's Discussion and Analysis

#### **Topical Index**

## How to Use This Volume . . .

The arrangement of material in this volume is indicated in the general table of contents at the front of the volume. There is a detailed table of contents covering the material within each major division.

The Applicability of AICPA Professional Standards and PCAOB Standards section consists of one part as follows:

Part I is a full-length narrative that provides guidance about Standards applicable to nonissuers and Standards applicable to issuers. Information about the PCAOB's Interim Standards is included, as well as information about major differences between GAAS and PCAOB Standards.

The Cross-References to SASs section consists of three parts as follows:

Part I is a list of Statements on Auditing Procedure Nos. 1–54, Statements on Auditing Standards Nos. 1–114 and Statements on Standards for Attestation Engagements Nos. 1–14.

Part II provides a list of sources of sections in the current text.

Part III is a list of sections in Statement on Auditing Standards No. 1, *Codification of Auditing Standards and Procedures*.

The major divisions are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AU section 210.04 refers to the fourth paragraph of section 210, *Training and Proficiency of the Independent Auditor*.

Auditing Interpretations are numbered in the 9000 series with the last three digits indicating the section to which the Interpretation relates. Interpretations immediately follow their corresponding section. For example, Interpretations related to section 311 are numbered 9311 which directly follows section 311.

There are five appendixes as follows:

Appendix A provides the historical background for the present Statements on Auditing Standards.

Appendix B provides an analysis of International Standards on Auditing to AICPA Statements on Auditing Standards.

Appendix C is reserved.

Appendix D provides a list of AICPA Audit and Accounting Guides and Statements of Position.

Appendix E provides a schedule of changes in Statements on Auditing Standards since the issuance of Statement on Auditing Standards No. 1, *Codification of Auditing Standards and Procedures*.

Appendix F provides a list of other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff and are, therefore, presumed to be appropriate under GAAS as defined in section 150, *Generally Accepted Auditing Standards*.

Statements on Standards for Attestation Engagements and Attest Engagements Interpretations appear with the prefix AT in their section numbers. Attest Engagements Interpretations are numbered in the 9000 series with the last three digits indicating the section to which the Interpretation relates. Interpretations immediately follow their corresponding section. For example, Interpretations relating to section 101 are numbered 9101 which directly follows section 101.

The AU topical index covers the Statements on Auditing Standards and Auditing Interpretations. The AT topical index covers the Statements on Standards for Attestation Engagements and Attest Engagements Interpretations.

The topical indexes use the key word method to facilitate reference to the pronouncements. The indexes are arranged alphabetically by topic with references to major division, section and paragraph numbers.

**[The next page is 23.]**

## Part I

# **Applicability of AICPA Professional Standards and Public Company Accounting Oversight Board Standards**

## **Background**

As a result of the passage of the Sarbanes-Oxley Act of 2002 (Act), auditing and related professional practice standards to be used in the performance of and reporting on audits of the financial statements of public companies are established by the Public Company Accounting Oversight Board (PCAOB).

The term *public companies*, as used above, actually encompasses more entities than just public companies. To state the authority of the PCAOB more precisely—the Act authorizes the PCAOB to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for entities subject to the Act or the rules of the Securities and Exchange Commission (SEC).

Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of *issuers*, as defined by the Act, and other entities when prescribed by the rules of the SEC (hereinafter collectively referred to as *issuers*).

For audits of entities not subject to the Act or the rules of the SEC (hereinafter referred to as *nonissuers*), the preparation and issuance of audit reports must be conducted in accordance with the AICPA Code of Professional Conduct and the standards promulgated by the AICPA Auditing Standards Board (ASB). Audits of nonissuers remain governed by generally accepted auditing standards (GAAS) and Statements on Quality Control Standards as issued by the ASB.

### **Who Is an Issuer?**

The term *issuer* means an issuer (as defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)), the securities of which are registered under section 12 of that Act (15 U.S.C. 78l), or that is required to file reports under section 15(d) (15 U.S.C. 78o(d)), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn.

## **Standards Applicable to the Audits of Nonissuers**

With the formation of the PCAOB, the ASB was reconstituted and its jurisdiction amended to recognize the ASB as a body with the authority to promulgate auditing, attestation and quality control standards relating to the preparation and issuance of audit reports for nonissuers.

Failure to follow ASB standards in the audit of a nonissuer would be considered a violation of Rule 201, *General Standards* [ET section 201.01], and/or Rule 202, *Compliance With Standards* [ET section 202.01], of the AICPA's *Code of Professional Conduct* (AICPA Code).

As a caution to readers, pursuant to Statement on Auditing Standards (SAS) No. 95, *Generally Accepted Auditing Standards* [AU section 150], interpretative publications are recommendations on the application of SASs in specific circumstances, including engagements for entities in specialized industries. Interpretative Publications, which include auditing interpretations, auditing guidance in Audit and Accounting Guides (Guides), and auditing guidance found in Statements of Position (SOPs), are issued under the authority of the ASB. The auditor should identify Interpretative Publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable Interpretative Publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

The ASB will continue to issue SASs and Interpretative Publications that relate to audits of nonissuers and auditors should be alert to those issuances.

## Standards Applicable to the Audits of Issuers

Rule 3100 issued by the PCAOB (see PCAOB Release No. 2003-009) generally requires all registered public accounting firms to adhere to the PCAOB's standards in connection with the preparation or issuance of any audit report on the financial statements of an issuer. Rule 3100 requires registered public accounting firms and their associated persons to comply with all applicable standards. Accordingly, if the PCAOB's standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

## Compliance With Standards Applicable to the Audits of Issuers

Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards in connection with an audit of the financial statements of an issuer may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of the Act. In addition, the Act provides that any violation of the PCAOB's Rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the PCAOB's Rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations."

Rules 201 [ET section 201.01] and 202 [ET section 202.01] of the AICPA's *Code of Professional Conduct* require a member who performs auditing and other professional services to comply with standards promulgated by bodies designated by AICPA Council. AICPA Council has designated the PCAOB as a body with the authority to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers.

The AICPA's Professional Ethics Division is able to hold an AICPA member who performs audits of the financial statements of issuers accountable under Rules 201 [ET section 201.01] and 202 [ET section 202.01] of the AICPA's *Code of Professional Conduct* for compliance with PCAOB's auditing and related professional practice standards when performing such audits.

## PCAOB's Adoption of Interim Standards

The PCAOB is subject to SEC oversight. As such, rules and standards issued by the PCAOB must be approved by the SEC before they become effective.

The PCAOB has adopted interim standards through rules contained in PCAOB Release No. 2003-006. The SEC granted approval to these rules. Essentially, the interim standards that the PCAOB adopted were the generally accepted auditing standards, attestation standards, quality control standards issued by the ASB, certain former AICPA SEC Practice Section (SECPS) membership requirements, certain AICPA ethics and independence rules, and Independence Standards Board rules as they existed on April 16, 2003. These interim standards will remain in effect while the PCAOB conducts a review of standards applicable to registered public accounting firms. Based on this review, the PCAOB may modify, repeal, replace or adopt, in part or in whole, the interim standards. As stated below, the PCAOB's interim independence standards are not to be interpreted to supersede the SEC's independence requirements. The PCAOB has also made certain conforming amendments to the interim standards to reflect the adoption of PCAOB standards.

If a provision of a PCAOB standard addresses a subject matter that also is addressed in the interim standards, the affected position of the interim standard should be considered superseded or effectively amended. The PCAOB's interim standards (known as the Interim Professional Auditing Standards) consist of five rules (Rules 3200T, 3300T, 3400T, 3500T, and 3600T), which are described below.

### **Rule 3200T—Interim Auditing Standards, as Amended by PCAOB Release 2003-026**

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with generally accepted auditing standards as described in the ASB's SAS No. 95, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

### **Rule 3300T—Interim Attestation Standards, as Amended by PCAOB Release 2003-026**

Rule 3300T governs the conduct of engagements that (i) are described in the ASB's Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attestation Standards: Revision and Recodification* [AT sections 101–701], and (ii) relate to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's SSAEs, and related interpretations and AICPA Statements of Position, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

### **Rule 3400T—Interim Quality Control Standards, as Amended by PCAOB Release 2003-026**

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Through Rule 3400T, the PCAOB has provisionally designated the Statements on Quality Control Standards

proposed and issued by the ASB and certain former AICPA SECPS<sup>1</sup> membership requirements, as they existed, and as they applied to SECPS members, on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Quality Control Standards.

Because the PCAOB intends the Interim Quality Control Standards to preserve existing standards as they applied on April 16, 2003 consistent with Section 103(a)(3) of the Act, those Interim Quality Control Standards adapted from the former AICPA SECPS requirements apply only to those firms that were members of the AICPA's SECPS on April 16, 2003.

Those requirements address the following matters:

- Continuing professional education of audit firm personnel
- Concurring partner review of the audit report and the financial statements of SEC registrants
- Written communication statement to all professional personnel of firm policies and procedures on the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided
- Notification to the SEC of resignations and dismissals from audit engagements for SEC registrants
- Audit firm obligations with respect to the policies and procedures of correspondent firms and of other members of international firms or international associations of firms
- Policies and procedures to comply with applicable independence requirements

### **Rule 3500T—Interim Ethics Standards, as Amended by PCAOB Release 2003-026**

Rule 3500T sets forth ethical standards for registered public accounting firms and their personnel. Through Rule 3500T, the PCAOB has provisionally designated Rule 102, *Integrity and Objectivity*, and its Interpretations [ET sections 102.01 and 191] of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Ethics Standards.

### **Rule 3600T—Interim Independence Standards, as Amended by PCAOB Release 2003-026**

Rule 3600T sets forth independence standards for registered public accounting firms and their personnel. Through Rule 3600T, the PCAOB has provisionally designated Rule 101, *Independence*, and its Interpretations [ET sections 101.01 and 191] of the AICPA Code, and Interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, and Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2 of the Independence Standards Board (ISB), to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Independence Standards. In addition, the PCAOB requires compliance with the SEC's independence rules. The PCAOB's Interim Independence Standards are not to be

---

<sup>1</sup> Effective January 1, 2004, the AICPA *Center for Public Company Audit Firms* restructured and replaced the SECPS.

interpreted to supersede the SEC's independence requirements. Therefore, to the extent that a provision of the SEC's rule or policy is more restrictive—or less restrictive—than the PCAOB's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive requirement.

## Major Existing Differences Between AICPA Standards and PCAOB Standards

As this publication was being finalized, the major differences between AICPA standards and final PCAOB standards approved by the SEC are as follows:

- **Risk Assessment Standards.** In March 2006, the ASB issued eight SASs, No. 104 through No. 111, collectively referred to as the risk assessment standards. These standards are applicable to nonissuers and become effective for audits of financial statements for periods beginning on or after December 15, 2006. These standards provide extensive guidance concerning the auditor's assessment of the risks of material misstatement in a financial statement audit, and the design and performance of audit procedures whose nature, timing, and extent are responsive to the assessed risks. Additionally, the SASs establish standards and provide guidance on planning and supervision, the nature of audit evidence, and evaluating whether the audit evidence obtained affords a reasonable basis for an opinion regarding the financial statements under audit. SAS Nos. 104–111 make significant changes to numerous AU sections in the auditing literature. These standards and their changes do not apply to audits conducted in accordance with PCAOB standards.
- **Audit Documentation.** PCAOB Auditing Standard No. 3, *Audit Documentation*, is applicable to audits of issuers. SAS No. 103, *Audit Documentation* [AU section 339], which supersedes SAS No. 96, *Audit Documentation*, is applicable to audits of nonissuers. SAS No. 103 is effective for audits of financial statements for periods ending on or after December 15, 2006, with earlier application permitted.
- **Audit of Internal Control.** In connection with the requirement of Section 404(b) of the Sarbanes-Oxley Act that an issuer's independent auditor attest to and report on management's assessment of the effectiveness of internal control, PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, establishes requirements and provides direction that apply when an auditor is engaged to audit the internal control over financial reporting and to perform that audit in conjunction with the audit of an issuer's financial statements. PCAOB conforming amendments related to PCAOB Auditing Standard No. 2 supersede SAS No. 60, *Communication of Internal Control Related Matters Noted in an Audit*, and AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*, of the interim auditing standards and interim attestation standards.
- **References in Auditor's Reports.** PCAOB Auditing Standard No. 1 requires registered public accounting firms to include in their reports on engagements performed pursuant to the PCAOB's auditing and related professional practice standards, including audits and reviews of financial statements, a reference to the standards of the Public Company Accounting Oversight Board (United States).

- **Evaluating Control Deficiencies.** PCAOB Auditing Standard No. 2, which is applicable to audits of issuers, establishes general requirements for evaluating deficiencies in internal control over financial reporting. In May 2006, the ASB issued SAS No. 112 [AU section 325]. As noted previously, SAS No. 112 supersedes SAS No. 60. SAS No. 112 establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. SAS No. 112 is effective whenever an auditor of a nonissuer expresses an opinion on financial statements (including a disclaimer of opinion) and is effective for audits of financial statements for periods ending on or after December 15, 2006. SAS No. 112 is not applicable to audits conducted in accordance with PCAOB standards.
- **Auditor Communication With Those Charged With Governance.** In December 2006, the ASB issued SAS No. 114, *The Auditor's Communication With Those Charged With Governance* [AU section 380], which is applicable to audits of nonissuers. This new SAS replaces SAS No. 61, *Communication With Audit Committees* [AU section 380A]. The standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit, and also establishes standards and provides guidance on which matters should be communicated, who they should be communicated to, and the form and timing of the communication. SAS No. 114 is not applicable to audits conducted in accordance with PCAOB standards.
- **Independence Matters.** Rule 3600T requires compliance with Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2 of the Independence Standards Board. Also, to the extent that a provision of the SEC's independence rules or policies are more restrictive—or less restrictive—than the PCAOB's interim independence standards, a registered public accounting firm shall comply with the more restrictive requirement.
- **Independence Matters.** The PCAOB has adopted ethics and independence rules concerning independence, tax services, and contingent fees. See PCAOB Rules 3501, 3502, 3520, 3521, 3522, 3523, and 3524.
- **Concurring Partner.** Rule 3400T requires the establishment of policies and procedures for a concurring review (generally the SECPS membership rule).<sup>2</sup>
- **Communication of Firm Policy.** Rule 3400T requires registered firms to communicate through a written statement to all professional firm personnel the broad principles that influence the firm's quality control and operating policies and procedures on, at a minimum, matters that relate to the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided, and inform professional firm personnel periodically that compliance with those principles is mandatory (generally the SECPS membership rule).
- **Affiliated Firms.** Rule 3400T requires registered firms that are part of an international association to seek adoption of policies and

---

<sup>2</sup> Firms that were not members of the AICPA's SECPS as of April 16, 2003 do not have to comply with this requirement.

procedures by the international organization or individual foreign associated firms consistent with PCAOB standards.

- **Partner Rotation.** Rule 3600T requires compliance with the SEC's independence rules which include partner rotation.
- **Continuing Professional Education (CPE) Requirements.** Rule 3400T requires registered accounting firms to ensure that all of their professionals participate in at least 20 hours of qualifying CPE every year (generally the SECPS membership rule).

## **Standards Applicable if a Nonissuer's Financial Statements Are Audited in Accordance With Both GAAS and PCAOB Auditing Standards**

The Audit Issues Task Force (a task force of the ASB) has issued Auditing Interpretation No. 18, "Reference to PCAOB Standards in an Audit Report on a Nonissuer," of SAS No. 58, *Reports on Audited Financial Statements* [AU section 9508.89–.92], that addresses the question of which standards are applicable and how should the auditor report if an auditor is engaged to perform an audit of a nonissuer in accordance with GAAS and PCAOB auditing standards. The Interpretation states that an auditor may indicate that the audit was conducted in accordance with GAAS and another set of auditing standards. If the auditor conducted the audit in accordance with generally accepted auditing standards and the auditing standards of the PCAOB, the auditor may indicate in the auditor's report that the audit was conducted in accordance with both sets of standards. The Interpretation provides example report language.

## **AICPA Standards and the Audits of Issuers**

If a registered public accounting firm performs an audit or review of *an issuer* in accordance with PCAOB standards, the auditor does not need to follow standards promulgated by the ASB. However, AICPA members are required to comply with the AICPA Code in addition to the ethics and independence rules and standards required by the SEC and PCAOB.

## AU Section 100

# STATEMENTS ON AUDITING STANDARDS – Introduction

*The following is a Codification of currently effective Statements on Auditing Standards (SASs) and related Auditing Interpretations. Statements on Auditing Standards are issued by the Auditing Standards Board (ASB), the senior technical body of the Institute designated to issue pronouncements on auditing matters. Rule 202 of the Institute's Code of Professional Conduct requires adherence to the applicable generally accepted auditing standards promulgated by the ASB. An auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. An auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, an auditor may depart from a presumptively mandatory requirement provided the auditor documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.*

*Interpretations are issued under the authority of the Auditing Standards Board to provide recommendations on the application of Statements on Auditing Standards in specific circumstances, including engagements for entities in specialized industries. An auditor should be aware of and consider interpretations applicable to his or her audit. An interpretation is not as authoritative as a pronouncement of the ASB; however, if an auditor does not apply an auditing interpretation, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing interpretation. The specific terms used to define professional requirements in the SASs are not intended to apply to interpretations since interpretations are not auditing standards. It is the ASB's intention to make conforming changes to the interpretations over the next several years to remove any language that would imply a professional requirement where none exists.*

## AU Section 110

# *Responsibilities and Functions of the Independent Auditor*

Source: SAS No. 1, section 110; SAS No. 78; SAS No. 82.

Issue date, unless otherwise indicated: November, 1972.

.01 The objective of the ordinary audit of financial statements by the independent auditor is the expression of an opinion on the fairness with which they present, in all material respects, financial position, results of operations, and its cash flows in conformity with generally accepted accounting principles. The auditor's report is the medium through which he expresses his opinion or, if circumstances require, disclaims an opinion. In either case, he states whether his audit has been made in accordance with generally accepted auditing standards. These standards require him to state whether, in his opinion, the financial statements are presented in conformity with generally accepted accounting principles and to identify those circumstances in which such principles have not been consistently observed in the preparation of the financial statements of the current period in relation to those of the preceding period.

### **Distinction Between Responsibilities of Auditor and Management**

.02 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.<sup>1</sup> Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected.<sup>2</sup> The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.03 The financial statements are management's responsibility. The auditor's responsibility is to express an opinion on the financial statements. Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, initiate,

---

<sup>1</sup> See section 312, *Audit Risk and Materiality in Conducting an Audit*, and section 316, *Consideration of Fraud in a Financial Statement Audit*. The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for error or fraud. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>2</sup> See section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

authorize, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements. The entity's transactions and the related assets, liabilities, and equity are within the direct knowledge and control of management. The auditor's knowledge of these matters and internal control is limited to that acquired through the audit. Thus, the fair presentation of financial statements in conformity with generally accepted accounting principles<sup>3</sup> is an implicit and integral part of management's responsibility. The independent auditor may make suggestions about the form or content of the financial statements or draft them, in whole or in part, based on information from management during the performance of the audit. However, the auditor's responsibility for the financial statements he or she has audited is confined to the expression of his or her opinion on them. [Revised, April 1989, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. As amended, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

## Professional Qualifications

**.04** The professional qualifications required of the independent auditor are those of a person with the education and experience to practice as such. They do not include those of a person trained for or qualified to engage in another profession or occupation. For example, the independent auditor, in observing the taking of a physical inventory, does not purport to act as an appraiser, a valuer, or an expert in materials. Similarly, although the independent auditor is informed in a general manner about matters of commercial law, he does not purport to act in the capacity of a lawyer and may appropriately rely upon the advice of attorneys in all matters of law. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.05** In the observance of generally accepted auditing standards, the independent auditor must exercise his judgment in determining which auditing procedures are necessary in the circumstances to afford a reasonable basis for his opinion. His judgment is required to be the informed judgment of a qualified professional person. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

## Detection of Fraud

**[.06-.09]** [Superseded January 1977 by Statement on Auditing Standards No. 16, as superseded by Statement on Auditing Standards No. 53, as superseded by section 316. Paragraphs renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

---

<sup>3</sup> The responsibilities and functions of the independent auditor are also applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles; references in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations. [Footnote added, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

## **Responsibility to the Profession**

**.10** The independent auditor also has a responsibility to his profession, the responsibility to comply with the standards accepted by his fellow practitioners. In recognition of the importance of such compliance, the American Institute of Certified Public Accountants has adopted, as part of its Code of Professional Conduct, rules which support the standards and provide a basis for their enforcement. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

---

**[The next page is 71.]**

## AU Section 120

# Defining Professional Requirements in Statements on Auditing Standards

Source: SAS No. 102.

Effective December 2005.

## Introduction

.01 This section sets forth the meaning of certain terms used in Statements on Auditing Standards (SASs) issued by the Auditing Standards Board in describing the professional requirements imposed on auditors.

## Professional Requirements

.02 SASs contain professional requirements together with related guidance in the form of explanatory material. Auditors have a responsibility to consider the entire text of a SAS in carrying out their work on an engagement and in understanding and applying the professional requirements of the relevant SASs.

.03 Not every paragraph of a SAS carries a professional requirement that the auditor is expected to fulfill. Rather, the professional requirements are communicated by the language and the meaning of the words used in the SASs.

.04 SASs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on auditors, as follows:

- *Unconditional requirements.* The auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SASs use the words *must* or *is required* to indicate an unconditional requirement.
- *Presumptively mandatory requirements.* The auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the auditor may depart from a presumptively mandatory requirement provided the auditor documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SASs use the word *should* to indicate a presumptively mandatory requirement.

If a SAS provides that a procedure or action is one that the auditor "should consider," the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of a SAS are to be understood and applied in the context of the explanatory material that provides guidance for their application. Section 339, *Audit Documentation*, establishes standards and provides guidance on the form, content, and extent of audit documentation.

## Explanatory Material

**.05** Explanatory material is defined as the text within a SAS (excluding any related appendixes or interpretations<sup>1</sup>) that may:

- Provide further explanation and guidance on the professional requirements; or
- Identify and describe other procedures or actions relating to the activities of the auditor.

**.06** Explanatory material that provides further explanation and guidance on the professional requirements is intended to be descriptive rather than imperative. That is, it explains the objective of the professional requirements (where not otherwise self-evident); it explains why the auditor might consider or employ particular procedures, depending on the circumstances; and it provides additional information for the auditor to consider in exercising professional judgment in performing the engagement.

**.07** Explanatory material that identifies and describes other procedures or actions relating to the activities of the auditor is not intended to impose a professional requirement for the auditor to perform the suggested procedures or actions. Rather, these procedures or actions require the auditor's attention and understanding; how and whether the auditor carries out such procedures or actions in the engagement depends on the exercise of professional judgment in the circumstances consistent with the objective of the standard. The words *may*, *might*, and *could* are used to describe these actions and procedures.

## Application

**.08** The provisions of this section are effective upon issuance.<sup>2</sup>

---

[The next page is 81.]

---

<sup>1</sup> Auditing interpretations and certain appendixes represent interpretive publications, which differ from explanatory material. Interpretive publications, as defined in paragraphs .05 and .06 of section 150, *Generally Accepted Auditing Standards*, as amended, reside outside of the standards section of a SAS and are recommendations on the application of the SAS in specific circumstances, including engagements for entities in specialized industries. In contrast, explanatory material is always contained within the standards sections of the SAS and is meant to be more descriptive in nature. Interpretive publications are issued under the authority of the Auditing Standards Board (ASB) and consist of auditing interpretations of the SASs, appendixes to the SASs (except for previously issued appendixes to original pronouncements that when adopted modified other SASs), auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.

<sup>2</sup> The specific terms used to define professional requirements in this section are not intended to apply to interpretive publications issued under the authority of the ASB, since interpretive publications are not auditing standards. (See footnote 1.) It is the ASB's intention to make conforming changes to the interpretive publications over the next several years to remove any language that would imply a professional requirement where none exists. It is the ASB's intention that such language would only be used in the standards sections of the SASs.

## AU Section 150

# Generally Accepted Auditing Standards

(Supersedes SAS No. 1, section 150)

Source: SAS No. 95; SAS No. 98; SAS No. 102; SAS No. 105; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after December 15, 2001, unless otherwise indicated.

.01 An independent auditor plans, conducts, and reports the results of an audit in accordance with generally accepted auditing standards (GAAS). Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

## Auditing Standards

.02 The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

### *General Standards*

1. The auditor must have adequate technical training and proficiency to perform the audit.
2. The auditor must maintain independence in mental attitude in all matters relating to the audit.
3. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.

### *Standards of Field Work*

1. The auditor must adequately plan the work and must properly supervise any assistants.
2. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.
3. The auditor must obtain sufficient appropriate<sup>1</sup> audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

---

<sup>1</sup> See paragraph .06 of section 326, *Audit Evidence*, for the definition of the term *appropriate*. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 105.]

*Standards of Reporting*<sup>2</sup>

1. The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).<sup>3</sup>
2. The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.
3. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.
4. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 105. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

**.03** Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct [ET section 202.01], requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB.<sup>4</sup> The ASB develops and issues standards in the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

**.04** The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.<sup>5</sup> When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. [As amended, effective December 2005, by Statement on Auditing Standards

<sup>2</sup> The reporting standards apply only when the auditor issues a report. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

<sup>3</sup> When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

<sup>4</sup> In certain engagements, the auditor also may be subject to other auditing requirements, such as Government Auditing Standards issued by the comptroller general of the United States, or rules and regulations promulgated by the U.S. Securities and Exchange Commission. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>5</sup> See section 312, *Audit Risk and Materiality in Conducting an Audit*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

No. 102. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

## Interpretive Publications

**.05** *Interpretive publications* consist of auditing Interpretations of the SASs, appendixes to the SASs,<sup>6</sup> auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.<sup>7</sup> Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.06** The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

## Other Auditing Publications

**.07** *Other auditing publications* include AICPA auditing publications not referred to above; auditing articles in the *Journal of Accountancy* and other professional journals; auditing articles in the *AICPA CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.<sup>8</sup> Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

**.08** If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing

---

<sup>6</sup> Appendixes to SASs referred to in paragraph .05 of this section do not include previously issued appendixes to original pronouncements that when adopted modified other SASs. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98. Footnote renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>7</sup> Auditing Interpretations of the SASs are included in the codified version of the SASs and are cross-referenced from the related AU sections in Appendix C. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in Appendix D. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>8</sup> The auditor is not expected to be aware of the full body of other auditing publications. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.<sup>9</sup>

## Effective Date

.09 This section is effective for audits of financial statements for periods beginning on or after December 15, 2001.

---

---

<sup>9</sup> Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are listed in AU Appendix F. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

## AU Section 150A

# Generally Accepted Auditing Standards

(Supersedes SAS No. 1, section 150)

Source: SAS No. 95; SAS No. 98; SAS No. 102.

Effective for audits of financial statements for periods beginning on or after December 15, 2001, unless otherwise indicated.

.01 An independent auditor plans, conducts, and reports the results of an audit in accordance with generally accepted auditing standards (GAAS). Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

### Auditing Standards

.02 The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

#### *General Standards*

1. The audit is to be performed by a person or persons having adequate technical training and proficiency as an auditor.
2. In all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors.
3. Due professional care is to be exercised in the performance of the audit and the preparation of the report.

#### *Standards of Field Work*

1. The work is to be adequately planned and assistants, if any, are to be properly supervised.
2. A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed.
3. Sufficient competent evidential matter is to be obtained through inspection, observation, inquiries, and confirmations to afford a reasonable basis for an opinion regarding the financial statements under audit.

#### *Standards of Reporting*

1. The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).
2. The report shall identify those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.
3. Informative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.

4. The report shall contain either an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.

**.03** Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct [ET section 202.01], requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB.<sup>1</sup> The ASB develops and issues standards in the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

**.04** The auditor should have sufficient knowledge of the SASs to identify those that are applicable to his or her audit. The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.<sup>2</sup> When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. [As amended, effective December 2005, by Statement on Auditing Standards No. 102.]

## Interpretive Publications

**.05** *Interpretive publications* consist of auditing Interpretations of the SASs, appendixes to the SASs,<sup>3</sup> auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.<sup>4</sup> Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.06** The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

---

<sup>1</sup> In certain engagements, the auditor also may be subject to other auditing requirements, such as Government Auditing Standards issued by the comptroller general of the United States, or rules and regulations promulgated by the U.S. Securities and Exchange Commission.

<sup>2</sup> See section 312A, *Audit Risk and Materiality in Conducting an Audit*.

<sup>3</sup> Appendixes to SASs referred to in paragraph .05 of this section do not include previously issued appendixes to original pronouncements that when adopted modified other SASs. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

<sup>4</sup> Auditing Interpretations of the SASs are included in the codified version of the SASs and are cross-referenced from the related AU sections in Appendix C. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in Appendix D. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

## Other Auditing Publications

.07 *Other auditing publications* include AICPA auditing publications not referred to above; auditing articles in the *Journal of Accountancy* and other professional journals; auditing articles in the *AICPA CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.<sup>5</sup> Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

.08 If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.<sup>6</sup>

## Effective Date

.09 This section is effective for audits of financial statements for periods beginning on or after December 15, 2001.

---

[The next page is 97.]

---

<sup>5</sup> The auditor is not expected to be aware of the full body of other auditing publications. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>6</sup> Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are listed in AU Appendix F. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 105, March 2006. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

## AU Section 161

# ***The Relationship of Generally Accepted Auditing Standards to Quality Control Standards***

(Supersedes SAS No. 4)<sup>[1]</sup>

Source: SAS No. 25; SAS No. 98.

Issue date, unless otherwise indicated: November, 1979.

**.01** The independent auditor is responsible for compliance with generally accepted auditing standards in an audit engagement. Rule 202 [ET section 202.01] of the Rules of Conduct of the Code of Professional Conduct of the American Institute of Certified Public Accountants requires members to comply with such standards when associated with financial statements.

**.02** A firm of independent auditors has a responsibility to adopt a system of quality control in conducting an audit practice.<sup>2</sup> Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with generally accepted auditing standards in its audit engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 96. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.03** Generally accepted auditing standards relate to the conduct of individual audit engagements; quality control standards relate to the conduct of a firm's audit practice as a whole. Thus, generally accepted auditing standards and quality control standards are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of individual audit engagements and the conduct of a firm's audit practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular audit engagement was not performed in accordance with generally accepted auditing standards. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

---

[The next page is 131.]

---

<sup>[1]</sup> [Footnote deleted by the issuance of Statement on Auditing Standards No. 98, September 2002.]

<sup>2</sup> The elements of quality control are identified in Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* [QC section 20]. A system of quality control is broadly defined as a process to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

**AU Section 201*****Nature of the General Standards***

**Source:** SAS No. 1, section 201.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The general standards are personal in nature and are concerned with the qualifications of the auditor and the quality of his work as distinct from those standards which relate to the performance of his field work and to his reporting. These personal, or general, standards apply alike to the areas of field work and reporting.

---

**[The next page is 151.]**

## AU Section 210

### *Training and Proficiency of the Independent Auditor*

Source: SAS No. 1, section 210; SAS No. 5.

Issue date, unless otherwise indicated: November, 1972.

.01 The first general standard is:

The auditor must have adequate technical training and proficiency to perform the audit.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 This standard recognizes that however capable a person may be in other fields, including business and finance, he cannot meet the requirements of the auditing standards without proper education and experience in the field of auditing.

.03 In the performance of the audit which leads to an opinion, the independent auditor holds himself out as one who is proficient in accounting and auditing. The attainment of that proficiency begins with the auditor's formal education and extends into his subsequent experience. The independent auditor must undergo training adequate to meet the requirements of a professional. This training must be adequate in technical scope and should include a commensurate measure of general education. The junior assistant, just entering upon an auditing career, must obtain his professional experience with the proper supervision and review of his work by a more experienced superior. The nature and extent of supervision and review must necessarily reflect wide variances in practice. The auditor charged with final responsibility for the engagement must exercise a seasoned judgment in the varying degrees of his supervision and review of the work done and judgment exercised by his subordinates, who in turn must meet the responsibility attaching to the varying gradations and functions of their work.

.04 The independent auditor's formal education and professional experience complement one another; each auditor exercising authority upon an engagement should weigh these attributes in determining the extent of his supervision of subordinates and review of their work. It should be recognized that the training of a professional man includes a continual awareness of developments taking place in business and in his profession. He must study, understand, and apply new pronouncements on accounting principles and auditing procedures as they are developed by authoritative bodies within the accounting profession.

.05 In the course of his day-to-day practice, the independent auditor encounters a wide range of judgment on the part of management, varying from true objective judgment to the occasional extreme of deliberate misstatement. He is retained to audit and report upon the financial statements of a business because, through his training and experience, he has become skilled in accounting and auditing and has acquired the ability to consider objectively

and to exercise independent judgment with respect to the information recorded in books of account or otherwise disclosed by his audit. [As amended July, 1975 by Statement on Auditing Standards No. 5.]

---

**[The next page is 161.]**

## AU Section 220

### *Independence*

**Source:** SAS No. 1, section 220.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The second general standard is:

The auditor must maintain independence in mental attitude in all matters relating to the audit.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

**.02** This standard requires that the auditor be independent; aside from being in public practice (as distinct from being in private practice), he must be without bias with respect to the client since otherwise he would lack that impartiality necessary for the dependability of his findings, however excellent his technical proficiency may be. However, independence does not imply the attitude of a prosecutor but rather a judicial impartiality that recognizes an obligation for fairness not only to management and owners of a business but also to creditors and those who may otherwise rely (in part, at least) upon the independent auditor's report, as in the case of prospective owners or creditors.

**.03** It is of utmost importance to the profession that the general public maintain confidence in the independence of independent auditors. Public confidence would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence. To *be* independent, the auditor must be intellectually honest; to be *recognized* as independent, he must be free from any obligation to or interest in the client, its management, or its owners. For example, an independent auditor auditing a company of which he was also a director might be intellectually honest, but it is unlikely that the public would accept him as independent since he would be in effect auditing decisions which he had a part in making. Likewise, an auditor with a substantial financial interest in a company might be unbiased in expressing his opinion on the financial statements of the company, but the public would be reluctant to believe that he was unbiased. Independent auditors should not only be independent in fact; they should avoid situations that may lead outsiders to doubt their independence.

**.04** The profession has established, through the AICPA's Code of Professional Conduct, precepts to guard against the *presumption* of loss of independence. "Presumption" is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests. Insofar as these precepts have been incorporated in the profession's code, they have the force of professional law for the independent auditor.

**.05** The Securities and Exchange Commission (SEC) has also adopted requirements for independence of auditors who report on financial statements filed with it that differ from the AICPA requirements in certain respects.<sup>[1]</sup>

---

<sup>[1]</sup> [Footnote deleted, December 2001, to acknowledge the dissolution of the Independence Standard Board.]

**.06** The independent auditor should administer his practice within the spirit of these precepts and rules if he is to achieve a proper degree of independence in the conduct of his work.

**.07** To emphasize independence from management, many corporations follow the practice of having the independent auditor appointed by the board of directors or elected by the stockholders.

---

**[The next page is 165.]**

## AU Section 230

# ***Due Professional Care in the Performance of Work\****

Source: SAS No. 1, section 230; SAS No. 41; SAS No. 82; SAS No. 99; SAS No. 104.

Issue date, unless otherwise indicated: November, 1972.

**.01** The third general standard is:

The auditor must exercise due professional care in the performance of the audit and the preparation of the report.<sup>1</sup>

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

**.02** This standard requires the independent auditor to plan and perform his or her work with due professional care. Due professional care imposes a responsibility upon each professional within an independent auditor's organization to observe the standards of field work and reporting. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.03** *Cooley on Torts*, a legal treatise, describes the obligation for due care as follows:

Every man who offers his services to another and is employed assumes the duty to exercise in the employment such skill as he possesses with reasonable care and diligence. In all these employments where peculiar skill is requisite, if one offers his services, he is understood as holding himself out to the public as possessing the degree of skill commonly possessed by others in the same employment, and if his pretensions are unfounded, he commits a species of fraud upon every man who employs him in reliance on his public profession. But no man, whether skilled or unskilled, undertakes that the task he assumes shall be performed successfully, and without fault or error; he undertakes for good faith and integrity, but not for infallibility, and he is liable to his employer for negligence, bad faith, or dishonesty, but not for losses consequent upon pure errors of judgment.<sup>2</sup>

---

\* [Title amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>1</sup> This amendment revises the third general standard of the ten generally accepted auditing standards. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>2</sup> D. Haggard, *Cooley on Torts*, 472 (4th ed., 1932). [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.04** The matter of due professional care concerns what the independent auditor does and how well he or she does it. The quotation from *Cooley on Torts* provides a source from which an auditor's responsibility for conducting an audit with due professional care can be derived. The remainder of the section discusses the auditor's responsibility in the context of an audit. [As amended, April 1982, by Statement on Auditing Standards No. 41. As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.05** An auditor should possess "the degree of skill commonly possessed" by other auditors and should exercise it with "reasonable care and diligence" (that is, with due professional care). [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.06** Auditors should be assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability so that they can evaluate the audit evidence they are examining. The auditor with final responsibility for the engagement should know, at a minimum, the relevant professional accounting and auditing standards and should be knowledgeable about the client.<sup>3</sup> The auditor with final responsibility is responsible for the assignment of tasks to, and supervision of, assistants.<sup>4</sup> [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Professional Skepticism

**.07** Due professional care requires the auditor to exercise *professional skepticism*. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor uses the knowledge, skill, and ability called for by the profession of public accounting to diligently perform, in good faith and with integrity, the gathering and objective evaluation of evidence. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.08** Gathering and objectively evaluating audit evidence requires the auditor to consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.09** The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

---

<sup>3</sup> See section 311, *Planning and Supervision*, paragraph .07. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>4</sup> See section 311.11. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Reasonable Assurance

**.10** While exercising due professional care, the auditor must plan and perform the audit to obtain sufficient appropriate audit evidence so that audit risk will be limited to a low level that is, in his or her professional judgment, appropriate for expressing an opinion on the financial statements. The high, but not absolute, level of assurance that is intended to be obtained by the auditor is expressed in the auditor's report as obtaining reasonable assurance about whether the financial statements are free of material misstatement (whether caused by error or fraud). Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Therefore, an audit conducted in accordance with generally accepted auditing standards may not detect a material misstatement. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 104.]

**.11** The independent auditor's objective is to obtain sufficient competent evidential matter to provide him or her with a reasonable basis for forming an opinion. The nature of most evidence derives, in part, from the concept of selective testing of the data being audited, which involves judgment regarding both the areas to be tested and the nature, timing, and extent of the tests to be performed. In addition, judgment is required in interpreting the results of audit testing and evaluating audit evidence. Even with good faith and integrity, mistakes and errors in judgment can be made. Furthermore, accounting presentations contain accounting estimates, the measurement of which is inherently uncertain and depends on the outcome of future events. The auditor exercises professional judgment in evaluating the reasonableness of accounting estimates based on information that could reasonably be expected to be available prior to the completion of field work.<sup>5</sup> As a result of these factors, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing.<sup>6</sup> [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.12** Because of the characteristics of fraud, a properly planned and performed audit may not detect a material misstatement. Characteristics of fraud include (a) concealment through collusion among management, employees, or third parties; (b) withheld, misrepresented, or falsified documentation; and (c) the ability of management to override or instruct others to override what otherwise appears to be effective controls. For example, auditing procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among personnel within the entity and third parties or among management or employees of the entity. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. In addition, an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. Furthermore, an auditor may not discover the existence of a modification of documentation through a side agreement that management or

---

<sup>5</sup> See section 342, *Auditing Accounting Estimates*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>6</sup> See section 326, *Evidential Matter*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

a third party has not disclosed. Finally, management has the ability to directly or indirectly manipulate accounting records and present fraudulent financial information by overriding controls in unpredictable ways. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

**.13** Since the auditor's opinion on the financial statements is based on the concept of obtaining reasonable assurance, the auditor is not an insurer and his or her report does not constitute a guarantee. Therefore, the subsequent discovery that a material misstatement, whether from error or fraud, exists in the financial statements does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with generally accepted auditing standards. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

---

## AU Section 230A

### ***Due Professional Care in the Performance of Work\****

Source: SAS No. 1, section 230; SAS No. 41; SAS No. 82; SAS No. 99.

Issue date, unless otherwise indicated: November, 1972.

.01 The third general standard is:

Due professional care is to be exercised in the planning and performance of the audit and the preparation of the report.<sup>1</sup>

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.02 This standard requires the independent auditor to plan and perform his or her work with due professional care. Due professional care imposes a responsibility upon each professional within an independent auditor's organization to observe the standards of field work and reporting. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.03 *Cooley on Torts*, a legal treatise, describes the obligation for due care as follows:

Every man who offers his services to another and is employed assumes the duty to exercise in the employment such skill as he possesses with reasonable care and diligence. In all these employments where peculiar skill is requisite, if one offers his services, he is understood as holding himself out to the public as possessing the degree of skill commonly possessed by others in the same employment, and if his pretensions are unfounded, he commits a species of fraud upon every man who employs him in reliance on his public profession. But no man, whether skilled or unskilled, undertakes that the task he assumes shall be performed successfully, and without fault or error; he undertakes for good faith and integrity, but not for infallibility, and he is liable to his employer for negligence, bad faith, or dishonesty, but not for losses consequent upon pure errors of judgment.<sup>2</sup>

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.04 The matter of due professional care concerns what the independent auditor does and how well he or she does it. The quotation from *Cooley on Torts* provides a source from which an auditor's responsibility for conducting an audit with due professional care can be derived. The remainder of the section

---

\* [Title amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>1</sup> This amendment revises the third general standard of the ten generally accepted auditing standards. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>2</sup> D. Haggard, *Cooley on Torts*, 472 (4th ed., 1932). [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

discusses the auditor's responsibility in the context of an audit. [As amended, April 1982, by Statement on Auditing Standards No. 41. As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.05** An auditor should possess "the degree of skill commonly possessed" by other auditors and should exercise it with "reasonable care and diligence" (that is, with due professional care). [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.06** Auditors should be assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability so that they can evaluate the audit evidence they are examining. The auditor with final responsibility for the engagement should know, at a minimum, the relevant professional accounting and auditing standards and should be knowledgeable about the client.<sup>3</sup> The auditor with final responsibility is responsible for the assignment of tasks to, and supervision of, assistants.<sup>4</sup> [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Professional Skepticism

**.07** Due professional care requires the auditor to exercise *professional skepticism*. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor uses the knowledge, skill, and ability called for by the profession of public accounting to diligently perform, in good faith and with integrity, the gathering and objective evaluation of evidence. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.08** Gathering and objectively evaluating audit evidence requires the auditor to consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.09** The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Reasonable Assurance

**.10** The exercise of due professional care allows the auditor to obtain *reasonable assurance* that the financial statements are free of material misstatement, whether caused by error or fraud. Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud.

---

<sup>3</sup> See section 311, *Planning and Supervision*, paragraph .07. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>4</sup> See section 311.11. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

Therefore, an audit conducted in accordance with generally accepted auditing standards may not detect a material misstatement. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.11 The independent auditor's objective is to obtain sufficient competent evidential matter to provide him or her with a reasonable basis for forming an opinion. The nature of most evidence derives, in part, from the concept of selective testing of the data being audited, which involves judgment regarding both the areas to be tested and the nature, timing, and extent of the tests to be performed. In addition, judgment is required in interpreting the results of audit testing and evaluating audit evidence. Even with good faith and integrity, mistakes and errors in judgment can be made. Furthermore, accounting presentations contain accounting estimates, the measurement of which is inherently uncertain and depends on the outcome of future events. The auditor exercises professional judgment in evaluating the reasonableness of accounting estimates based on information that could reasonably be expected to be available prior to the completion of field work.<sup>5</sup> As a result of these factors, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing.<sup>6</sup> [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.12 Because of the characteristics of fraud, a properly planned and performed audit may not detect a material misstatement. Characteristics of fraud include (a) concealment through collusion among management, employees, or third parties; (b) withheld, misrepresented, or falsified documentation; and (c) the ability of management to override or instruct others to override what otherwise appears to be effective controls. For example, auditing procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among personnel within the entity and third parties or among management or employees of the entity. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. In addition, an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. Furthermore, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed. Finally, management has the ability to directly or indirectly manipulate accounting records and present fraudulent financial information by overriding controls in unpredictable ways. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

.13 Since the auditor's opinion on the financial statements is based on the concept of obtaining reasonable assurance, the auditor is not an insurer and his or her report does not constitute a guarantee. Therefore, the subsequent discovery that a material misstatement, whether from error or fraud, exists in the financial statements does not, in and of itself, evidence (a) failure to obtain

---

<sup>5</sup> See section 342, *Auditing Accounting Estimates*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>6</sup> See section 326A, *Evidential Matter*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with generally accepted auditing standards. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## AU Section 310

### ***Appointment of the Independent Auditor***<sup>\*,†, §</sup>

Source: SAS No. 1, section 310; SAS No. 45; SAS No. 83; SAS No. 89.

Issue date, unless otherwise indicated: November, 1972.

**.01** The first standard of field work is:

The work is to be adequately planned and assistants, if any, are to be properly supervised.

**.02** Aspects of supervising assistants are discussed in section 210, *Training and Proficiency of the Independent Auditor*, and section 311, *Planning and Supervision*. Aspects of planning the field work and the timing of auditing procedures are discussed in section 311 and section 313, *Substantive Tests Prior to the Balance-Sheet Date*. [As amended August 1983, by Statement on Auditing Standards No. 45.] (See section 313.)

### **Appointment of the Independent Auditor**

**.03** Consideration of the first standard of field work recognizes that early appointment of the independent auditor has many advantages to both the auditor and his client. Early appointment enables the auditor to plan his work so that it may be done expeditiously and to determine the extent to which it can be done before the balance-sheet date. [As amended August, 1983, by Statement on Auditing Standards No. 45.] (See section 313.)

### **Appointment of Auditor Near or After the Year-End Date**

**.04** Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, he should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, he should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion. Sometimes the audit limitations present in such circumstances can be remedied. For example, the taking of the physical inventory can be postponed or another physical inventory can be taken which the auditor can observe. (See section 331.09-13.)

---

\* [Title amended, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83.]

† **Note:** Title originally amended and former paragraphs .05-.09 under the heading "Timing of Audit Work" superseded, August 1983, by Statement on Auditing Standards No. 45. (See section 313.)

§ Section 311, *Planning and Supervision*, supersedes this section effective for audits of financial statements for periods beginning on or after December 15, 2006. This section will be deleted closer to the effective date of section 311.

## Establishing an Understanding With the Client

**.05** The auditor should establish an understanding with the client regarding the services to be performed for each engagement.<sup>1</sup> Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. For example, it reduces the risk that the client may inappropriately rely on the auditor to protect the entity against certain risks or to perform certain functions that are the client's responsibility. The understanding should include the objectives of the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement.<sup>2</sup> The auditor should document the understanding in the working papers, preferably through a written communication with the client. If the auditor believes an understanding with the client has not been established, he or she should decline to accept or perform the engagement. [Paragraph added, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83.]

**.06** An understanding with the client regarding an audit of the financial statements generally includes the following matters.

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.
- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect

<sup>1</sup> See Statement on Quality Control Standards No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*, paragraph 16 [QC section 20.16]. [Footnote added, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83.]

<sup>2</sup> The objectives of certain engagements may differ. The understanding should reflect the effects of those objectives on the responsibilities of management and the auditor, and on the limitations of the engagement. The following are examples:

- Reviews of interim financial information (see section 722, *Interim Financial Information*, paragraph .07)
- Audits of recipients of governmental financial assistance (see section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*, paragraph .10)
- Application of agreed-upon procedures to specified elements, accounts or items of a financial statement (see AT section 201, *Agreed-Upon Procedures Engagements*)

[Footnote added, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83. Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10. Footnote revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 100.]

error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

- An audit includes obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify reportable conditions. However, the auditor is responsible for ensuring that the audit committee or others with equivalent authority or responsibility are aware of any reportable conditions which come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements<sup>3</sup> aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

These matters may be communicated in the form of an engagement letter. [Paragraph added, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83. As effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

**.07** An understanding with the client also may include other matters, such as the following:

- Arrangements regarding the conduct of the engagement (for example, timing, client assistance regarding the preparation of schedules, and the availability of documents)
- Arrangements concerning involvement of specialists or internal auditors, if applicable
- Arrangements involving a predecessor auditor
- Arrangements regarding fees and billing
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (Regulators, including the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements.)
- Conditions under which access to the auditor's working papers may be granted to others
- Additional services to be provided relating to regulatory requirements
- Arrangements regarding other services to be provided in connection with the engagement

[Paragraph added, effective for engagements for periods ending on or after June 15, 1998, by Statement on Auditing Standards No. 83.]

---

[The next page is 241.]

---

<sup>3</sup> Section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .04, states that a misstatement can result from errors or fraud. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

## AU Section 311

### *Planning and Supervision*

(Supersedes SAS No. 22)

Source: SAS No. 108; SAS No. 114.

See section 9311 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

**.01** The first standard of field work states, "The auditor must adequately plan the work and must properly supervise any assistants." This section establishes standards and provides guidance to the independent auditor conducting an audit in accordance with generally accepted auditing standards on the considerations and activities applicable to planning and supervision. Planning and supervision continue throughout the audit.

**.02** Audit planning involves developing an overall audit strategy for the expected conduct, organization, and staffing of the audit. The nature, timing, and extent of planning vary with the size and complexity of the entity, and with the auditor's experience with the entity and understanding of the entity and its environment, including its internal control.

**.03** Obtaining an understanding of the entity and its environment, including its internal control, is an essential part of planning and performing an audit in accordance with generally accepted auditing standards.<sup>1</sup> The auditor must plan the audit so that it is responsive to the assessment of the risk of material misstatement based on the auditor's understanding of the entity and its environment, including its internal control. Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures,<sup>2</sup> the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy.

---

<sup>1</sup> Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, establishes standards and provides guidance on obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement, whether due to error or fraud, at the financial statement and relevant assertion levels. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, establishes standards and provides guidance on the auditor's overall responses and the nature, timing, and extent of further audit procedures that are responsive to the assessed risks.

<sup>2</sup> Paragraph .03 of section 314 provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risk of material misstatement of the financial statements.

.04 The auditor with final responsibility for the audit may delegate portions of the planning and supervision of the audit to other firm personnel.<sup>3</sup> For purposes of this section, (a) firm personnel other than the auditor with final responsibility for the audit are referred to as *assistants* and (b) the term *auditor* refers to either the auditor with final responsibility for the audit or assistants.

## Planning

### Appointment of the Independent Auditor

.05 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date.

.06 Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion. Sometimes the audit limitations present in such circumstances can be remedied. For example, the taking of the physical inventory can be postponed or another physical inventory, which the auditor can observe, can be taken.

.07 Section 315, *Communications Between Predecessor and Successor Auditors*, provides guidance concerning a change of auditors. Among other matters, it describes communications that a successor auditor should evaluate before accepting an engagement.

### Establishing an Understanding With the Client

.08 The auditor should establish an understanding with the client<sup>4</sup> regarding the services to be performed for each engagement<sup>5</sup> and should document the understanding through a written communication with the client. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. For example, it reduces the risk that the client may inappropriately rely on the auditor to protect the entity against certain risks or to perform certain functions that are the client's responsibility. The understanding should include the objectives of

---

<sup>3</sup> Paragraphs .14 through .20 of section 314 provide guidance about the discussion among the audit team. The objective of this discussion is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

<sup>4</sup> Generally, the auditor establishes an understanding of the services to be performed with the entity's management. In some cases, the auditor may establish such an understanding with those charged with governance. The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting and disclosure process. In some cases, those charged with governance are responsible for approving the financial statements (in other cases, management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committees* expressed elsewhere in generally accepted auditing standards.

<sup>5</sup> See paragraph .16 of QC section 20.16, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement.<sup>6</sup>

**.09** An understanding with the client regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.
- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.
- An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the management representation letter that the effects of any uncorrected

---

<sup>6</sup> The objectives of certain engagements may differ. The understanding should reflect the effects of those objectives on the responsibilities of management and the auditor, and on the limitations of the engagement. The following are examples:

- Audits of recipients of governmental financial assistance (see paragraph .10 of section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*).
- Application of agreed-upon procedures to specified elements, accounts, or items of a financial statement (see AT section 201, *Agreed-Upon Procedures Engagements*).
- Engagements to examine the effectiveness of an entity's internal control over financial reporting (see AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*).

misstatements<sup>7</sup> aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

These matters should be communicated in the form of an engagement letter.

**.10** An understanding with the client also may include other matters, such as the following:

- The overall audit strategy (see paragraphs .13 through .18)
- Involvement of specialists or internal auditors, if applicable
- Involvement of a predecessor auditor
- Fees and billing
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators may restrict or prohibit such liability limitation arrangements)
- Conditions under which access to audit documentation may be granted to others
- Additional services to be provided relating to regulatory requirements
- Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Ethics Interpretation No. 101-3, "Performance of Nonattest Services," [ET section 101.05], under Rule 101, *Independence*.

## Preliminary Engagement Activities

**.11** In addition to the procedures related to the appointment of the auditor and establishing an understanding of the terms of the engagement as discussed above, the auditor should perform the following activities at the beginning of the current audit engagement:

- Perform procedures regarding the continuance of the client relationship and the specific audit engagement.
- Evaluate the auditor's compliance with ethical requirements, including independence.

The auditor's consideration of client continuance and ethical requirements, including independence, occurs throughout the performance of the audit engagement as changes in conditions and circumstances occur. However, the auditor's initial procedures on both client continuance and evaluation of the auditor's ethical requirements (including independence) should be performed prior to performing other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often occur shortly after (or in connection with) the completion of the previous audit. See QC section 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

**.12** The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect the auditor's ability to plan and perform the audit engagement to reduce audit

---

<sup>7</sup> Paragraph .07 of section 312, *Audit Risk and Materiality in Conducting an Audit*, states that a misstatement can result from errors or fraud.

risk to an acceptably low level or may pose an unacceptable level of risk to the auditor. Performing these preliminary engagement activities helps ensure that the auditor plans an audit engagement for which:

- The auditor maintains the necessary independence and ability to perform the engagement.
- There are no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- There is no misunderstanding with the client as to the terms of the engagement.

## The Overall Audit Strategy<sup>8</sup>

- .13** The auditor should establish the overall audit strategy for the audit.
- .14** In establishing the overall audit strategy, the auditor should:
- a. Determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry-specific reporting requirements, and the locations of the entity;
  - b. Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and
  - c. Consider the important factors that will determine the focus of the audit team's efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity-specific, industry, financial reporting, or other relevant developments.

In developing the audit strategy, the auditor also should consider the results of preliminary engagement activities (see paragraphs .11 and .12) and, where practicable, experience gained on other engagements performed for the entity. The Appendix [paragraph .34] to this section lists examples of matters the auditor may consider in establishing the overall audit strategy for an engagement.

**.15** The process of developing the audit strategy helps the auditor determine the resources necessary to perform the engagement, such as:

- The resources to assign for specific audit areas, such as the use of appropriately experienced team members for high-risk areas or the involvement of experts on complex matters;
- The amount of resources to assign to specific audit areas, such as the number of team members assigned to observe the inventory count at material locations, the extent of review of other auditors' work, or the audit budget in hours to allocate to high-risk areas;
- When these resources are to be assigned, such as whether at an interim audit period or at key cutoff dates;

---

<sup>8</sup> See paragraphs .04 through .06 of section 318 for further guidance on the auditor's overall responses in performing an audit.

- How such resources are to be managed, directed, and supervised, such as when team briefing and debriefing meetings are expected to be held, how the auditor with final responsibility and manager reviews are expected to take place (for example, on-site or off-site), and whether to complete engagement quality control reviews.

**.16** The auditor should update and document any significant revisions to the overall audit strategy to respond to changes in circumstances.

**.17** Once the audit strategy has been established, the auditor is able to start the development of a more detailed audit plan to address the various matters identified in the audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. Although the auditor may establish the audit strategy before developing the detailed audit plan, the two planning activities are not necessarily discrete or sequential processes but are closely interrelated since changes in one may result in consequential changes to the other. Paragraphs .19 through .21 provide further guidance on developing the audit plan.

**.18** In audits of small entities, the entire audit may be conducted by a very small audit team. Many audits of small entities involve the auditor with final responsibility (who may be a sole practitioner) working with one audit team member (or without any audit team members). With a smaller team, coordination and communication between team members are easier. Establishing the overall audit strategy for the audit of a small entity need not be a complex or time-consuming exercise; it varies according to the size of the entity and the complexity of the audit. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the audit documentation and highlighting issues identified in the audit just completed, updated, and changed in the current period based on discussions with the owner-manager, can serve as the basis for planning the current audit engagement.

## The Audit Plan

**.19** The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level.

**.20** The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures.

**.21** The audit plan should include:

- A description of the nature, timing, and extent of planned risk assessment procedures sufficient to assess the risks of material misstatement, as determined under section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.
- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. The plan for further audit procedures reflects the auditor's decision whether to test the operating effectiveness of controls, and the nature, timing, and extent of planned substantive procedures.

- A description of other audit procedures to be carried out for the engagement in order to comply with generally accepted auditing standards (for example, seeking direct communication with the entity's lawyers).

Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures may occur early in the audit process. However, planning of the nature, timing, and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. The auditor should document changes to the original audit plan. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances, and disclosures before completing the more detailed audit plan of all remaining further audit procedures.

## Determining the Extent of Involvement of Professionals Possessing Specialized Skills

**.22** The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. For example, a tax practitioner or a professional with valuation skills employed by the audit firm may be used to perform audit procedures as part of the audit team's work on the audit. If such a professional is part of the audit team, the auditor's responsibilities for supervising that professional are equivalent to those for other assistants (see paragraph .28). In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified audit procedures will meet the auditor's objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

**.23** The use of professionals possessing information technology (IT) skills to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor should consider such factors as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

**.24** Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls.

## Communication With Those Charged With Governance

**.25** Section 380, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 114.]

## Additional Considerations in Initial Audit Engagements

**.26** The auditor should perform the following activities before starting an initial audit:

- a. Perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see QC section 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*).
- b. Communicate with the previous auditor, where there has been a change of auditors (see section 315)

**.27** The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For initial audits, additional matters the auditor should consider in developing the overall audit strategy and audit plan include the following:

- Arrangements to be made with the previous auditor, for example, to review the previous auditor's audit documentation.
- Any major issues (including the application of accounting principles or of auditing and reporting standards) discussed with management in connection with the initial selection as auditors, the communication of these matters to those charged with governance, and how these matters affect the overall audit strategy and audit plan.
- The planned audit procedures to obtain sufficient appropriate audit evidence regarding opening balances.
- The assignment of firm personnel with appropriate levels of capabilities and competence to respond to anticipated significant risks.
- Other procedures required by the firm's system of quality control for initial audit engagements (for example, the firm's system of quality control may require the involvement of another partner or senior individual to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance).

## Supervision

**.28** Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client's business and industry.

**.29** The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.<sup>9</sup>

**.30** In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor's report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

**.31** The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor's report. The person with final responsibility for the audit may delegate parts of the review responsibility to other assistants, in accordance with the firm's quality control system. See section 339, *Audit Documentation*, for guidance on documenting the review of audit documentation.

**.32** Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

## Effective Date

**.33** This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

---

<sup>9</sup> For further guidance on the discussion among the audit team, see paragraphs .14 through .18 of section 316, *Consideration of Fraud in a Financial Statement Audit*, and paragraphs .14 through .20 of section 314.

## Appendix

### Examples of Matters the Auditor May Consider in Establishing the Overall Audit Strategy

**A1.** This appendix provides examples of matters the auditor may consider in establishing the overall audit strategy. Many of these matters will also influence the auditor's detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Not all matters listed here are relevant to every audit engagement and the list is not necessarily complete. In addition, the auditor may consider these matters in an order different from that shown below.

#### Scope of the Audit Engagement

**A2.** The auditor may consider the following matters when establishing the scope of the audit engagement:

- The basis of reporting on which the financial information to be audited has been prepared, including any need for reconciliations to another basis of reporting.
- Industry-specific reporting requirements, such as reports mandated by industry regulators.
- The expected audit coverage, including the number and locations to be included.
- The nature of the control relationships between a parent and its subsidiaries that determine how the group is to be consolidated.
- The extent to which locations are audited by other auditors.
- The nature of the subsidiaries or divisions to be audited, including the need for specialized knowledge.
- The reporting currency to be used, including any need for currency translation for the financial information audited.
- The need for statutory or regulatory audit requirements, for example, the Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organization*.
- The availability of the work of internal auditors and the extent of the auditor's potential reliance on such work.
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them.
- The expected use of audit evidence obtained in prior audits, for example, audit evidence related to risk assessment procedures and tests of controls.
- The effect of information technology on the audit procedures, including the availability of data and the expected use of computer-assisted audit techniques.

- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews.
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity.
- The availability of client personnel and data.

### **Reporting Objectives, Timing of the Audit, and Communications Required**

**A3.** The auditor may consider the following matters when ascertaining the reporting objectives of the engagement, the timing of the audit, and the nature of communications required:

- The entity's timetable for reporting, including interim periods.
- The organization of meetings with management and those charged with governance to discuss the nature, extent, and timing of the audit work.
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters, and communications to those charged with governance.
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement and the expected deliverables resulting from the audit procedures.
- Communication with auditors of other locations regarding the expected types and timing of reports to be issued and other communications in connection with the audit of other locations.
- The expected nature and timing of communications among audit team members, including the nature and timing of team meetings and timing of the review of work performed.
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit.

### **Scope of the Audit**

**A4.** The auditor may consider the following matters when setting the scope of the audit:

- With respect to materiality:
  - Setting materiality for planning purposes.
  - Setting and communicating materiality for auditors of other locations.
  - Reconsidering materiality as audit procedures are performed during the course of the audit.
  - Identifying the material locations and account balances.
- Audit areas where there is a higher risk of material misstatement.
- The effect of the assessed risk of material misstatement at the overall financial statement level on scope, supervision, and review.

- The selection of the audit team (including, where necessary, the engagement quality control reviewer) and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas where there may be higher risks of material misstatement.
- Engagement budgeting, including considering the appropriate amount of time to set aside for areas where there may be higher risks of material misstatement.
- The manner in which the auditor emphasizes to audit team members the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating audit evidence.
- Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified weaknesses and action taken to address them.
- Management's commitment to the design and operation of internal control.
- Volume of transactions, which may be a factor in determining whether it is more effective for the auditor to rely on internal control.
- Importance attached to internal control throughout the entity to the successful operation of the business.
- Significant business developments affecting the entity, including changes in information technology and business processes; changes in key management; and acquisitions, mergers, and divestments.
- Significant industry developments, such as changes in industry regulations and new reporting requirements.
- Significant accounting changes, such as changes in generally accepted accounting principles.
- Other significant relevant developments, such as changes in the legal environment affecting the entity.

## AU Section 9311

# ***Planning and Supervision: Auditing Interpretations of Section 311***

### **1. Communications Between the Auditor and Firm Personnel Responsible for Non-Audit Services**

**.01 Question**—Section 311, *Planning and Supervision*, Appendix A, paragraph A2. [section 311.34], lists the following procedure that an auditor may consider in planning an audit: "Discussing matters that may affect the audit with firm personnel responsible for non-audit services to the entity."

**.02** What specific things should the auditor consider in performing this procedure?

**.03 Interpretation**—The auditor should consider the nature of non-audit services that have been performed. He should assess whether the services involve matters that might be expected to affect the entity's financial statements or the performance of the audit, for example, tax planning or recommendations on a cost accounting system. If the auditor decides that the performance of the non-audit services or the information likely to have been gained from it may have implications for his audit, he should discuss the matter with personnel who rendered the services and consider how the expected conduct and scope of his audit may be affected. In some cases, the auditor may find it useful to review the pertinent portions of the work papers prepared for the non-audit engagement as an aid in determining the nature of the services rendered or the possible audit implications.

[Issue Date: February, 1980; Revised: March, 2006.]

## AU Section 311A

### *Planning and Supervision*

Source: SAS No. 22; SAS No. 47; SAS No. 48; SAS No. 77.

See section 9311A for interpretations of this section.

Effective for periods ending after September 30, 1978,  
unless otherwise indicated.

.01 The first standard of field work requires that "the work is to be adequately planned and assistants, if any, are to be properly supervised." This section provides guidance to the independent auditor conducting an audit in accordance with generally accepted auditing standards on the considerations and procedures applicable to planning and supervision, including preparing an audit program, obtaining knowledge of the entity's business, and dealing with differences of opinion among firm personnel. Planning and supervision continue throughout the audit, and the related procedures frequently overlap.

.02 The auditor with final responsibility for the audit may delegate portions of the planning and supervision of the audit to other firm personnel. For purposes of this section, (a) firm personnel other than the auditor with final responsibility for the audit are referred to as *assistants* and (b) the term *auditor* refers to either the auditor with final responsibility for the audit or assistants.

### Planning

.03 Audit planning involves developing an overall strategy for the expected conduct and scope of the audit. The nature, extent, and timing of planning vary with the size and complexity of the entity, experience with the entity, and knowledge of the entity's business. In planning the audit, the auditor should consider, among other matters:

- a. Matters relating to the entity's business and the industry in which it operates (see paragraph .07).
- b. The entity's accounting policies and procedures.
- c. The methods used by the entity to process significant accounting information (see paragraph .09), including the use of service organizations, such as outside service centers.
- d. Planned assessed level of control risk. (See section 319.)
- e. Preliminary judgment about materiality levels for audit purposes.
- f. Financial statement items likely to require adjustment.
- g. Conditions that may require extension or modification of audit tests, such as the risk of material error or fraud or the existence of related party transactions.
- h. The nature of reports expected to be rendered (for example, a report on consolidated or consolidating financial statements, reports on financial statements filed with the SEC, or special reports such as those on compliance with contractual provisions).

[As amended, December, 1983, by Statement on Auditing Standards No. 47. (See section 312A.14.) As amended, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48.]

**.04** Procedures that an auditor may consider in planning the audit usually involve review of his records relating to the entity and discussion with other firm personnel and personnel of the entity. Examples of those procedures include:

- a. Reviewing correspondence files, prior year's working papers, permanent files, financial statements, and auditor's reports.
- b. Discussing matters that may affect the audit with firm personnel responsible for non-audit services to the entity.
- c. Inquiring about current business developments affecting the entity.
- d. Reading the current year's interim financial statements.
- e. Discussing the type, scope, and timing of the audit with management of the entity, the board of directors, or its audit committee.
- f. Considering the effects of applicable accounting and auditing pronouncements, particularly new ones.
- g. Coordinating the assistance of entity personnel in data preparation.
- h. Determining the extent of involvement, if any, of consultants, specialists, and internal auditors.
- i. Establishing the timing of the audit work.
- j. Establishing and coordinating staffing requirements.

The auditor may wish to prepare a memorandum setting forth the preliminary audit plan, particularly for large and complex entities.

**.05** In planning the audit, the auditor should consider the nature, extent, and timing of work to be performed and should prepare a written audit program (or set of written audit programs) for every audit. The audit program should set forth in reasonable detail the audit procedures that the auditor believes are necessary to accomplish the objectives of the audit. The form of the audit program and the extent of its detail will vary with the circumstances. In developing the program, the auditor should be guided by the results of the planning considerations and procedures. As the audit progresses, changed conditions may make it necessary to modify planned audit procedures. [As amended, effective for engagements beginning after December 15, 1995, by Statement on Auditing Standards No. 77.]

**.06** The auditor should obtain a level of knowledge of the entity's business that will enable him to plan and perform his audit in accordance with generally accepted auditing standards. That level of knowledge should enable him to obtain an understanding of the events, transactions, and practices that, in his judgment, may have a significant effect on the financial statements. The level of knowledge customarily possessed by management relating to managing the entity's business is substantially greater than that which is obtained by the auditor in performing his audit. Knowledge of the entity's business helps the auditor in:

- a. Identifying areas that may need special consideration.
- b. Assessing conditions under which accounting data are produced, processed, reviewed, and accumulated within the organization.

- c. Evaluating the reasonableness of estimates, such as valuation of inventories, depreciation, allowances for doubtful accounts, and percentage of completion of long-term contracts.
- d. Evaluating the reasonableness of management representations.
- e. Making judgments about the appropriateness of the accounting principles applied and the adequacy of disclosures.<sup>[1]</sup>

**.07** The auditor should obtain a knowledge of matters that relate to the nature of the entity's business, its organization, and its operating characteristics. Such matters include, for example, the type of business, types of products and services, capital structure, related parties, locations, and production, distribution, and compensation methods. The auditor should also consider matters affecting the industry in which the entity operates, such as economic conditions, government regulations, and changes in technology, as they relate to his audit. Other matters, such as accounting practices common to the industry, competitive conditions, and, if available, financial trends and ratios should also be considered by the auditor.

**.08** Knowledge of an entity's business is ordinarily obtained through experience with the entity or its industry and inquiry of personnel of the entity. Working papers from prior years may contain useful information about the nature of the business, organizational structure, operating characteristics, and transactions that may require special consideration. Other sources an auditor may consult include AICPA accounting and audit guides, industry publications, financial statements of other entities in the industry, textbooks, periodicals, and individuals knowledgeable about the industry.

**.09** The auditor should consider the methods the entity uses to process accounting information in planning the audit because such methods influence the design of the internal control. The extent to which computer processing is used in significant accounting applications,<sup>2</sup> as well as the complexity of that processing, may also influence the nature, timing, and extent of audit procedures. Accordingly, in evaluating the effect of an entity's computer processing on an audit of financial statements, the auditor should consider matters such as—

- a. The extent to which the computer is used in each significant accounting application.
- b. The complexity of the entity's computer operations, including the use of an outside service center.<sup>3</sup>
- c. The organizational structure of the computer processing activities.
- d. The availability of data. Documents that are used to enter information into the computer for processing, certain computer files, and other evidential matter that may be required by the auditor may exist only for a short period or only in computer-readable form. In some computer systems, input documents may not exist at all because information is directly entered into the system. An entity's data retention policies

---

<sup>[1]</sup> [Footnote deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

<sup>2</sup> Significant accounting applications are those that relate to accounting information that can materially affect the financial statements the auditor is auditing. [Footnote added by issuance of Statement on Auditing Standards No. 48.]

<sup>3</sup> See section 324, *Service Organizations*, for guidance concerning the use of a service center for computer processing of significant accounting applications. [Footnote revised, June 1992, by issuance of Statement on Auditing Standards No. 70. Title amended, effective December 1999, by Statement on Auditing Standards No. 88.]

may require the auditor to request retention of some information for his review or to perform audit procedures at a time when the information is available. In addition, certain information generated by the computer for management's internal purposes may be useful in performing substantive tests (particularly analytical procedures).<sup>4</sup>

- e. The use of computer-assisted audit techniques to increase the efficiency of performing audit procedures.<sup>[5]</sup> Using computer-assisted audit techniques may also provide the auditor with an opportunity to apply certain procedures to an entire population of accounts or transactions. In addition, in some accounting systems, it may be difficult or impossible for the auditor to analyze certain data or test specific control procedures without computer assistance.

[Paragraph added, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48.]

**.10** The auditor should consider whether specialized skills are needed to consider the effect of computer processing on the audit, to understand the controls, or to design and perform audit procedures. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should have sufficient computer-related knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified procedures will meet the auditor's objectives; and to evaluate the results of the procedures applied as they relate to the nature, timing, and extent of other planned audit procedures. The auditor's responsibilities with respect to using such a professional are equivalent to those for other assistants.<sup>6</sup> [Paragraph added, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48.]

## Supervision

**.11** Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant problems encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984.]

**.12** Assistants should be informed of their responsibilities and the objectives of the procedures that they are to perform. They should be informed of matters that may affect the nature, extent, and timing of procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing problems. The auditor with final responsibility for the audit should direct assistants to bring to his attention significant accounting and auditing questions raised during the audit so

---

<sup>4</sup> Section 329, *Analytical Procedures*, provides guidance pertaining to such procedures. [Footnote added, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48.]

<sup>[5]</sup> [Footnote deleted.]

<sup>6</sup> Since the use of a specialist who is effectively functioning as a member of the audit team is not covered by section 336, *Using the Work of a Specialist*, a computer audit specialist requires the same supervision and review as any assistant. [Footnote added, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48.]

that he may assess their significance. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984.]

**.13** The work performed by each assistant should be reviewed to determine whether it was adequately performed and to evaluate whether the results are consistent with the conclusions to be presented in the auditor's report. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984.]

**.14** The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his disagreement with the conclusions reached if, after appropriate consultation, he believes it necessary to disassociate himself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984.]

## Effective Date

**.15** Statements on Auditing Standards generally are effective at the time of their issuance. However, since this section provides for practices that may differ in certain respects from practices heretofore considered acceptable, this section will be effective for audits made in accordance with generally accepted auditing standards for periods ending after September 30, 1978. [Formerly paragraph .13, number changed by issuance of Statement on Auditing Standards No. 48, effective for periods beginning after August 31, 1984.]

## AU Section 9311A

# *Planning and Supervision: Auditing Interpretations of Section 311A*

### **1. Communications Between the Auditor and Firm Personnel Responsible for Non-Audit Services**

**.01 Question**—Section 311A, *Planning and Supervision*, paragraph .04b, lists the following procedure that an auditor may consider in planning an audit: "Discussing matters that may affect the audit with firm personnel responsible for non-audit services to the entity."

**.02** What specific things should the auditor consider in performing this procedure?

**.03 Interpretation**—The auditor should consider the nature of non-audit services that have been performed. He should assess whether the services involve matters that might be expected to affect the entity's financial statements or the performance of the audit, for example, tax planning or recommendations on a cost accounting system. If the auditor decides that the performance of the non-audit services or the information likely to have been gained from it may have implications for his audit, he should discuss the matter with personnel who rendered the services and consider how the expected conduct and scope of his audit may be affected. In some cases, the auditor may find it useful to review the pertinent portions of the work papers prepared for the non-audit engagement as an aid in determining the nature of the services rendered or the possible audit implications.

[Issue Date: February, 1980.]

### **[2.] Planning Considerations for an Audit of a Federally Assisted Program**

[.04-.34] [Withdrawn March, 1989.]

### **3. Responsibility of Assistants for the Resolution of Accounting and Auditing Issues**

**.35 Question**—Section 311A, *Planning and Supervision*, paragraph .14, states, "The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit." What are the responsibilities of assistants when there are disagreements or concerns with respect to accounting and auditing issues of significance to the financial statements or auditor's report?

**.36 Response**—Rule 201 of the Code of Professional Conduct [ET section 201.01] states that a member shall "Exercise due professional care in the performance of professional services." The discussion of the third general standard [section 230A, *Due Professional Care in the Performance of Work*, paragraph .02] states that "due professional care imposes a responsibility upon each professional within an independent auditor's organization to observe the standards of field work and reporting." The first general standard requires assistants to meet the responsibility attached to the work assigned to them.

**.37** Accordingly, each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm, disagreements or concerns the assistant might have with respect to accounting and auditing issues that he believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. In addition, each assistant should have a right to document his disagreement if he believes it is necessary to disassociate himself from the resolution of the matter.

[Issue Date: February, 1986; Revised: January, 2004.]

**[4.] Audit Considerations for the Year 2000 Issue**

**[.38-.47]** [Withdrawn July, 2000 by the Audit Issues Task Force.]

**[The next page is 255.]**

## AU Section 312

# Audit Risk and Materiality in Conducting an Audit

(Supersedes SAS No. 47.)

Source: SAS No. 107.

See section 9312 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

**.01** This section provides guidance on the auditor's consideration of audit risk and materiality when performing an audit of financial statements in accordance with generally accepted auditing standards. Audit risk and materiality affect the application of generally accepted auditing standards, especially the standards of fieldwork and reporting, and are reflected in the auditor's standard report. Audit risk and materiality, among other matters, need to be considered together in designing the nature, timing, and extent of audit procedures and in evaluating the results of those procedures.

**.02** The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor that states, "Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected."<sup>1</sup> Audit risk<sup>2</sup> is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated.<sup>3</sup>

**.03** The concept of materiality recognizes that some matters, either individually or in the aggregate, are important for fair presentation of financial statements in conformity with generally accepted accounting principles,<sup>4</sup> while other matters are not important. In performing the audit, the auditor is

---

<sup>1</sup> See section 110, *Responsibilities and Functions of the Independent Auditor* and section 230, *Due Professional Care in the Performance of Work*, for a further discussion of reasonable assurance.

<sup>2</sup> In addition to audit risk, the auditor is also exposed to loss of or injury to his or her professional practice from litigation, adverse publicity, or other events arising in connection with financial statements audited and reported on. This exposure is present even though the auditor has performed the audit in accordance with generally accepted auditing standards and has reported appropriately on those financial statements. Even if an auditor assesses this exposure as low, the auditor does not perform less extensive audit procedures than otherwise is appropriate under generally accepted auditing standards.

<sup>3</sup> This definition of *audit risk* does not include the risk that the auditor might erroneously conclude that the financial statements are materially misstated. In such a situation, the auditor ordinarily reconsiders or extends audit procedures and requests that management perform specific tasks to reevaluate the appropriateness of the financial statements. These steps ordinarily lead the auditor to the correct conclusion. This definition also excludes the risk of an inappropriate reporting decision unrelated to the detection and evaluation of a misstatement in the financial statements, such as an inappropriate decision regarding the form of the auditor's report because of a limitation on the scope of the audit.

<sup>4</sup> The concepts of audit risk and materiality also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles as defined in section 623, *Special Reports*. References in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations.

concerned with matters that, either individually or in the aggregate, could be material to the financial statements. The auditor's responsibility is to plan and perform the audit to obtain reasonable assurance that material misstatements, whether caused by errors or fraud, are detected.

## Materiality in the Context of an Audit

.04 The auditor's consideration of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. The perceived needs of users are recognized in the discussion of materiality in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*, which defines *materiality* as "the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement." That discussion recognizes that materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.<sup>5</sup>

## Users

.05 In an audit of financial statements, the auditor's judgment as to matters that are material to users of financial statements is based on consideration of the needs of users as a group; the auditor does not consider the possible effect of misstatements on specific individual users, whose needs may vary widely.<sup>6</sup>

.06 The evaluation of whether a misstatement could influence economic decisions of users, and therefore be material, involves consideration of the characteristics of those users. Users are assumed to:

- a. Have an appropriate knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with an appropriate diligence;
- b. Understand that financial statements are prepared and audited to levels of materiality;
- c. Recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment, and the consideration of future events; and
- d. Make appropriate economic decisions on the basis of the information in the financial statements.

The determination of materiality, therefore, takes into account how users with such characteristics could reasonably be expected to be influenced in making economic decisions.

## Nature and Causes of Misstatements

.07 The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements,

---

<sup>5</sup> See paragraphs .59 and .60 for further guidance regarding qualitative considerations in evaluating audit findings.

<sup>6</sup> When determining materiality in audits of financial statements or other historical financial information prepared for a special purpose, the auditor considers the needs of specific users in the context of the objective of the engagement.

taken as a whole, are not materially misstated. Misstatements can result from errors or fraud<sup>7</sup> and may consist of any of the following:

- a. An inaccuracy in gathering or processing data from which financial statements are prepared
- b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under generally accepted accounting principles
- c. The omission of a financial statement element, account, or item
- d. A financial statement disclosure that is not presented in conformity with generally accepted accounting principles
- e. The omission of information required to be disclosed in conformity with generally accepted accounting principles
- f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts; and
- g. Management's judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate.

**.08** Misstatements may be of two types: known and likely, defined as follows:

- a. *Known misstatements.* These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.
- b. *Likely misstatements.* These are misstatements that:
  - i. Arise from differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).
  - ii. The auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample<sup>8</sup> to the entire population from which the sample was drawn).

**.09** The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor's consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising

---

<sup>7</sup> The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts are defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors or fraud.

<sup>8</sup> Audit sample includes statistical and nonstatistical sample. See section 350, *Audit Sampling*.

from misappropriation of assets. These two types of misstatements are further described in section 316, *Consideration of Fraud in a Financial Statement Audit*.

**.10** Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor's response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

## Considerations at the Financial Statement Level

**.11** The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of:

- a. Determining the extent and nature of risk assessment procedures
- b. Identifying and assessing the risks of material misstatement
- c. Determining the nature, timing, and extent of further audit procedures
- d. Evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with generally accepted accounting principles

**.12** Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels.<sup>9</sup> The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.<sup>10</sup>

**.13** The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor's professional judgment, appropriate for expressing an opinion on the financial statements. As discussed in paragraph .20, audit risk may be assessed in quantitative or nonquantitative terms.

**.14** The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor's experience with and knowledge of the entity and its environment, including its internal control. As discussed in paragraphs .17 through .26, certain entity-related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

**.15** In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity's control environment and are not necessarily identifiable with specific relevant assertions at

---

<sup>9</sup> See paragraph .102 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. See also paragraphs .14 through .19 of section 326, *Audit Evidence*, for discussion and guidance on the use of assertions in obtaining audit evidence.

<sup>10</sup> See section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

**.16** In an audit of an entity with operations in multiple locations or with multiple components, the auditor should consider the extent to which audit procedures should be performed at selected locations or components. The factors an auditor should consider regarding the selection of a particular location or component include (a) the nature and amount of assets and transactions executed at the location or component; (b) the degree of centralization of records or information processing; (c) the effectiveness of the control environment, particularly with respect to management's direct control over the exercise of authority delegated to others and its ability to effectively supervise activities at the location or component; (d) the frequency, timing, and scope of monitoring activities by the entity or others at the location or component; (e) judgments about materiality of the location or component; and (f) risks associated with the location, such as political or economic instability.

## Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

**.17** There is an inverse relationship between audit risk and materiality considerations. For example, the risk that relevant assertions related to a particular account balance, class of transactions, or disclosure could be misstated by an extremely large amount might be very low, but the risk that it could be misstated by an extremely small amount might be very high. Holding other considerations equal, either a decrease in the level of audit risk that the auditor judges to be appropriate in an account balance, class of transactions, or disclosure or a decrease in the amount of misstatements in the balance, class, or disclosure that the auditor believes could be material would require the auditor to do one or more of the following: (a) perform more effective audit procedures, (b) perform audit procedures closer to year end, or (c) increase the extent of particular audit procedures.

**.18** In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole. Auditors use various methods to design audit procedures to detect such misstatements.

**.19** The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. For example, the auditor should consider the risk of understatement as well as overstatement at the relevant assertion level such as when a liability may be understated (completeness) or when inventory may be overstated as a result of obsolescence (valuation). The auditor should seek to reduce audit

risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk. Auditors use various approaches to accomplish that objective.

**.20** At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk (AR) consists of (a) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (b) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as *high, medium, or low* risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor's approach or methodology.

**.21** The risk that the relevant assertions related to account balances, classes of transactions, or disclosures are misstated consists of the following two components:

- *Inherent risk* (IR) is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks<sup>11</sup> also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.
- *Control risk* (CR) is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

**.22** Inherent risk and control risk are the entity's risks, that is, they exist independently of the audit of financial statements. This section and other

---

<sup>11</sup> See section 314, paragraphs .29 through .33.

sections describe the risk of material misstatement (RMM) as the auditor's combined assessment of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risk of material misstatement in different ways as long as they achieve the same result.

**.23** The auditor should assess the risk of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

**.24** *Detection risk* (DR) is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results. These other factors might be addressed through adequate planning, proper assignment of personnel to the engagement team, the application of professional skepticism, supervision and review of the audit work performed, and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk (TD) and substantive analytical procedures risk (AP).

**.25** Detection risk relates to the substantive audit procedures and is managed by the auditor's response to risk of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risk of material misstatement at the relevant assertion level. The greater the risk of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risk of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

**.26** The model,  $AR = RMM \times DR$ ,<sup>12</sup> expresses the general relationship of audit risk and the risks associated with the auditor's assessments of risk of material misstatement (inherent and control risks); of the risk that substantive tests of details and substantive analytical procedures would fail to detect a material misstatement that could occur in a relevant assertion, given that such misstatements occur and are not detected by the entity's controls; and of the allowable risk that material error will not be detected by the test of details, given that a material misstatement might occur in a relevant assertion and not be detected by internal control or substantive analytical procedures and other relevant substantive procedures. The model is not intended to be a mathematical formula including all factors that may influence the assessment of audit

---

<sup>12</sup> Risk of material misstatement (RMM) is the product of inherent risk (IR) and control risk (CR); and detection risk (DR) is the product of test of details risk (TD) and substantive analytical procedures risk (AP).

risk; however, some auditors find such a model to be useful when planning appropriate risk levels for audit procedures to reduce the auditor's desired audit risk to an appropriate low level.<sup>13</sup>

## Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

**.27** The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit (see section 311, *Planning and Supervision*). Determining a materiality level for the financial statements taken as a whole helps guide the auditor's judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor's report thereon. As discussed in paragraph .60, the circumstances related to some identified misstatements may cause the auditor to evaluate them as material even if they are below the materiality level determined when establishing the overall audit strategy.

**.28** The determination of what is material to the users is a matter of professional judgment. The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in generally accepted accounting principles (for example, financial position, financial performance, and cash flows), or other specific requirements.
- Whether there are financial statement items on which, for the particular entity, users' attention tends to be focused (for example, for the purpose of evaluating financial performance).
- The nature of the entity and the industry in which it operates.
- The size of the entity, nature of its ownership, and the way it is financed.

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit-oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner-managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset-based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

**.29** When determining materiality, the auditor should consider prior periods' financial results and financial positions, the period-to-date financial results

---

<sup>13</sup> Table 2 in the Appendix [paragraph .48] of section 350, *Audit Sampling*, illustrates how this application of the model might work when applying sampling.

and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity's circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates. For example, when the auditor usually determines materiality for a particular entity based on a percentage of profit, circumstances that give rise to an exceptional decrease or increase in profit may lead the auditor to conclude that materiality is more appropriately determined using a normalized profit figure based on past results.

**.30** Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited. Materiality is determined based on the auditor's understanding of the user needs and expectations. User expectations may differ based on the degree of inherent uncertainty associated with the measurement of particular items in the financial statements, among other considerations. For example, the fact that the financial statements include very large provisions with a high degree of estimation uncertainty (for example, provisions for insurance claims in the case of an insurance company, oil rig decommissioning costs in the case of an oil company, or, more generally, legal claims against an entity) may influence the user's assessment of materiality. However, for audit purposes, this factor does not cause the auditor to follow different procedures for planning or evaluating misstatements than those outlined for other entities.

## **Materiality for Particular Items of Lesser Amounts Than the Materiality Level Determined for the Financial Statements Taken as a Whole**

**.31** When establishing the overall strategy for the audit, the auditor should consider whether, in the specific circumstances of the entity, misstatements of particular items of lesser amounts than the materiality level determined for the financial statements taken as a whole, if any, could, in the auditor's judgment, reasonably be expected to influence economic decisions of users taken on the basis of the financial statements. Any such amounts determined represent lower materiality levels to be considered in relation to the particular items in the financial statements.

**.32** In making this judgment, the auditor should consider factors such as the following:

- Whether accounting standards, laws, or regulations affect users' expectations regarding the measurement or disclosure of certain items (for example, related party transactions and the remuneration of management and those charged with governance)
- The key disclosures in relation to the industry and the environment in which the entity operates (for example, research and development costs for a pharmaceutical company)
- Whether attention is focused on the financial performance of a particular subsidiary or division that is separately disclosed in the consolidating financial statements (for example, for a newly acquired business)

**.33** In considering whether, in the specific circumstances of the entity, misstatements of particular items of lesser amounts than the materiality level for the financial statements taken as a whole, if any, could reasonably be considered material by the users of the financial statements, the auditor may consider

whether the views and expectations of those charged with governance and management<sup>14</sup> might be helpful.

## Tolerable Misstatement<sup>15</sup>

**.34** *Tolerable misstatement* is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. This term may be referred to as *tolerable error* in other standards.

**.35** When assessing the risks of material misstatements and designing and performing further audit procedures to respond to the assessed risks, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels determined in accordance with paragraphs .11 and .31 could, in the aggregate, result in a material misstatement of the financial statements. To do so, the auditor should determine one or more levels of tolerable misstatement. Such levels of tolerable misstatement are normally lower than the materiality levels.

**.36** The auditor must perform the audit to obtain reasonable assurance of detecting misstatements that the auditor believes could be large enough, individually or in the aggregate, to be quantitatively material to the financial statements. Although the auditor should be alert for misstatements that could be qualitatively material (see paragraphs .59 and .60), it ordinarily is not practical to design audit procedures to detect them.

## Considerations as the Audit Progresses

**.37** In some situations, the auditor may consider materiality for planning purposes before the financial statements to be audited are prepared. In those situations, the auditor's judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods, as long as recognition is given to the effects of major changes in the entity's circumstances (for example, a significant merger) and relevant changes in the economy as a whole or the industry in which the entity operates.

**.38** Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor's judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings. For example, while performing the audit, the auditor may become aware of additional quantitative or qualitative factors that were not initially considered but that could be important to users of the financial statements and that should be considered in making judgments about materiality when evaluating audit findings.

**.39** If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures.

**.40** The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may

---

<sup>14</sup> Paragraph .25 of section 311, *Planning and Supervision*, provides further discussion and guidance regarding communications with those charged with governance and management.

<sup>15</sup> See section 350 for further discussion and guidance on tolerable misstatement.

exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.<sup>16</sup>

**.41** If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

## Communication of Misstatements to Management

**.42** The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,<sup>17</sup> and communicate them to the appropriate level of management. This communication should occur on a timely basis.

**.43** Timely communication of potential misstatements to the appropriate level of management is important for management to evaluate whether the items are misstatements, or to inform the auditor if they disagree, and to take action as necessary. The determination of which level of management is the appropriate one is based on such factors as the nature, size, and frequency of the misstatement and which level of management can take the necessary action.

**.44** When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements, as defined in paragraph .08.

**.45** The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement (see paragraph .53), other than those that the auditor believes are trivial.

**.46** Where the auditor evaluates the amount of likely misstatement from a sample in a class of transactions, account balance, or disclosure as material, either individually or in aggregate with other misstatements, the auditor should request management to examine the class of transactions, account balance, or disclosure in order to identify and correct misstatements therein. For example, if an auditor identifies a misstatement while testing the cost prices of raw materials inventory, the auditor should extrapolate this misstatement to the raw materials account balance. If material, the auditor should then request management to examine the entire raw materials account balance to identify and correct any additional misstatements.

**.47** Where the auditor has identified a likely misstatement involving differences in estimates such as a difference in a fair value estimate, the auditor should request management to review the assumptions and methods used in developing management's estimate.

**.48** After management has (a) examined a class of transactions, account balance, or disclosure and corrected misstatements that are found and (b) challenged the assumptions and methods used in developing an estimate for which the auditor has identified a likely misstatement, the auditor should reevaluate

---

<sup>16</sup> See section 318, paragraph .73, for further guidance with respect to isolated misstatements.

<sup>17</sup> Matters that are "trivial" are amounts designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

the amount of likely misstatement. This includes performing additional further audit procedures, if necessary.

**.49** If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor, or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity's accounting practices (see paragraph .60) and the implications for the auditor's report (see paragraph .67).

## Evaluating Audit Findings<sup>18</sup>

**.50** In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence, and determine the effect of such misstatements on the financial statements taken as a whole.

**.51** The consideration and aggregation of misstatements should include likely misstatements (the auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined),<sup>19</sup> not just known misstatements (the amount of misstatements specifically identified).<sup>20</sup> Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

**.52** Before considering the aggregate effect of identified uncorrected misstatements, the auditor should consider each misstatement separately to evaluate:

- a. Its effect in relation to the relevant individual classes of transactions, account balances, or disclosures, including whether materiality levels for particular items of lesser amounts than the materiality level for the financial statements taken as a whole, determined in accordance with paragraph .31, have been exceeded.
- b. Whether, in considering the effect of the individual misstatement on the financial statements taken as a whole, it is appropriate to offset misstatements. For example, it may be appropriate to offset misstatements of items within the same account balance in the financial statements.
- c. The effect of misstatements related to prior periods. In prior periods, misstatements may not have been corrected by the entity because they

---

<sup>18</sup> This consideration includes any misstatements that remain uncorrected from different entity locations or from audits of portions of the entity that are performed by other auditors.

<sup>19</sup> See paragraphs .68 through .77 of section 316, *Consideration of Fraud in a Financial Statement Audit*, for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. Those paragraphs provide specific guidance on the auditor's consideration of an audit adjustment that is, or may be, the result of fraud.

<sup>20</sup> If the auditor were to examine all of the items in a balance or a class, the likely misstatement applicable to recorded transactions in the balance or class would be the amount of known misstatements specifically identified.

did not cause the financial statements for those periods to be materially misstated. Those misstatements might also affect the current period's financial statements.<sup>21</sup>

**.53** In aggregating misstatements, the auditor should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

**.54** When the auditor tests relevant assertions related to an account balance or a class of transactions by a substantive analytical procedure,<sup>22</sup> the auditor might not specifically identify misstatements but would obtain only an indication of whether misstatement might exist in the balance or class and possibly its approximate magnitude. If the substantive analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor should request management to investigate and, if necessary, should expand his or her audit procedures to enable him or her to determine whether a misstatement exists in the account balance or class of transactions.

**.55** When an auditor uses audit sampling to test a relevant assertion for an account balance or a class of transactions, he or she should project the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. That projected misstatement, along with the results of other substantive procedures, contributes to the auditor's assessment of likely misstatement in the balance or class.

**.56** The risk of material misstatement of the financial statements is generally greater when account balances and classes of transactions are subject to estimation rather than precise measurement because of the inherent subjectivity in estimating future events. Estimates, such as those for inventory obsolescence, uncollectible receivables, and warranty obligations, are subject not only to the unpredictability of future events, but also to misstatements that may arise from using inadequate or inappropriate data or misapplying appropriate data. Because no one accounting estimate can be considered accurate with certainty, the auditor may determine that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may not be significant, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

**.57** The "closest reasonable estimate" may be a range of acceptable amounts or a precisely determined point estimate, if that is a better estimate than any other amount. In some cases, the auditor may use a method that produces a range of acceptable amounts to determine the reasonableness of amounts recorded. For example, the auditor's analysis of specific problem accounts receivable and recent trends in bad-debt write-offs as a percent of sales may cause the auditor to conclude that the allowance for doubtful accounts should be between \$130,000 and \$160,000. If management's recorded estimate<sup>23</sup> falls within that range of acceptable amounts, the auditor may conclude

---

<sup>21</sup> The measurement of the effect, if any, on the current period's financial statements of misstatements uncorrected in prior periods involves accounting considerations and is therefore not addressed.

<sup>22</sup> Section 329, *Analytical Procedures*, provides guidance on the use of analytical procedures.

<sup>23</sup> Section 328, *Auditing Fair Value Measurements and Disclosures*, and section 342, *Auditing Accounting Estimates*, provide guidance with respect to the auditor's procedures to obtain an understanding of management's estimation process.

that the recorded amount is reasonable and no difference would be aggregated. If management's recorded estimate falls outside the auditor's range of acceptable amounts, the difference between the recorded amount and the amount at the closest end of the auditor's range would be aggregated as a likely misstatement.<sup>24</sup>

**.58** The auditor should also consider whether the difference between estimates best supported by the audit evidence and the estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the entity's management. For example, if each accounting estimate included in the financial statements was individually reasonable, but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.<sup>25</sup> In these circumstances, the auditor should reconsider whether other recorded estimates reflect a similar bias and should perform additional audit procedures that address those estimates. In addition, the possibility might exist that management's recorded estimates were clustered at one end of the range of acceptable amounts in the preceding year and clustered at the other end of the range of acceptable amounts in the current year, thus indicating the possibility that management is using swings in accounting estimates to offset higher- or lower-than-expected earnings. If the auditor believes that such circumstances exist, he or she should consider whether these matters should be communicated to those charged with governance, as described in paragraphs .08 and .11 of section 380A, *Communication With Audit Committees*.

**.59** As discussed in paragraph .04, there are quantitative and qualitative materiality considerations. As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.<sup>26</sup>

**.60** Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Qualitative factors that the auditor may consider relevant to his or her consideration of whether misstatements are material include the following:

- a. The potential effect of the misstatement on trends, especially trends in profitability.
- b. A misstatement that changes a loss into income or vice versa.
- c. The potential effect of the misstatement on the entity's compliance with loan covenants, other contractual agreements, and regulatory provisions.
- d. The existence of statutory or regulatory reporting requirements that affect materiality thresholds.

---

<sup>24</sup> See Interpretation No. 14, "Reasonable Estimation of the Amount of a Loss," of FASB Statements of Financial Accounting Standards No. 5, *Accounting for Contingencies*.

<sup>25</sup> Section 316, paragraph .64, also provides guidance to the auditor in performing a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.

<sup>26</sup> See section 317.

- e. The misstatement masks a change in earnings or other trends, especially in the context of general economic and industry conditions.
- f. A misstatement that has the effect of increasing management's compensation, for example, by satisfying the requirements for the award of bonuses or other forms of incentive compensation.
- g. The sensitivity of the circumstances surrounding the misstatement, for example, the implications of misstatements involving fraud and possible illegal acts, violations of contractual provisions, and conflicts of interest.
- h. The significance of the financial statement element affected by the misstatement, for example, a misstatement affecting recurring earnings as contrasted to one involving a nonrecurring charge or credit, such as an extraordinary item.
- i. The effects of misclassifications, for example, misclassification between operating and nonoperating income or recurring and nonrecurring income items or a misclassification between fundraising costs and program activity costs in a not-for-profit organization.
- j. The significance of the misstatement relative to reasonable user needs, for example:
  - Earnings to investors and the equity amounts to creditors.
  - The magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests (buy-sell agreement).
  - The effect of misstatements of earnings when contrasted with expectations.

Obtaining the views and expectations of those charged with governance and management may be helpful in gaining or corroborating an understanding of user needs, such as those illustrated above.

- k. The definitive character of the misstatement, for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty.
- l. The motivation of management with respect to the misstatement, for example, (i) an indication of a possible pattern of bias by management when developing and accumulating accounting estimates, (ii) a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process, or (iii) intentional decision not to follow generally accepted accounting principles.
- m. The existence of offsetting effects of individually significant but different misstatements.
- n. The likelihood that a misstatement that is currently immaterial may have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- o. The cost of making the correction. It may not be cost-beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management as noted in item *l* above.
- p. The risk that possible additional undetected misstatements would affect the auditor's evaluation.

These circumstances are only examples; not all are likely to be present in all audits, nor is the list necessarily complete. The existence of any circumstances such as these does not necessarily lead to a conclusion that the misstatement is material.

.61 If the auditor believes that a misstatement is, or may be, the result of fraud, the auditor should consider the implications of the misstatement in relation to other aspects of the audit as described in section 316, even if the effect of the misstatement is not material to the financial statements.

## Evaluating Whether the Financial Statements Taken as a Whole Are Free of Material Misstatement

.62 The auditor must evaluate whether the financial statements taken as a whole are free of material misstatement. In making this evaluation, the auditor should consider both the evaluation of the uncorrected (known and likely) misstatements required in paragraphs .50 through .53 and the qualitative considerations in paragraphs .60.

.63 When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit. For example, an amount that is material to the financial statements of one entity may not be material to the financial statements of another entity of a different size or nature. Also, what is material to the financial statements of a particular entity might change from one period to another.

.64 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor's report (see paragraph .67).

.65 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

.66 The auditor can reduce audit risk by modifying the nature, timing, and extent of planned audit procedures in performing the audit. If the auditor believes that such risk is unacceptably high, the auditor should perform additional audit procedures or satisfy himself or herself that the entity has adjusted the financial statements to reduce audit risk to an appropriate low level.<sup>27</sup>

## Evaluating the Overall Effect of Audit Findings on the Auditor's Report

.67 If the auditor concludes that, or is unable to conclude whether, the financial statements are materially misstated, the auditor must determine the

---

<sup>27</sup> See section 318, paragraphs .70 through .76, with respect to the auditor's evaluation of the sufficiency and appropriateness of audit evidence obtained.

implications for the auditor's report on the financial statements. See paragraphs .20 through .63 of section 508, *Reports on Audited Financial Statements*, regarding discussion about departures from unqualified opinions.

## Communications With Those Charged With Governance

**.68** Standards and guidance regarding communications about materiality and misstatements to those charged with governance are set out in Section 380A, *Communication With Audit Committees*. In addition, section 325, *Communicating Internal Control Related Matters Identified in an Audit*, requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit. [Revised, May 2006, due to conforming changes necessary due to the issuance of Statement on Standards No. 112.]

## Documentation

**.69** The auditor should document:

- a. The levels of materiality, as discussed in paragraph .27, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.
- b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.
- c. The auditor's conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.
- d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management.

**.70** Uncorrected misstatements should be documented in a manner that allows the auditor to:

- a. Separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods;
- b. Consider the aggregate effect of misstatements on the financial statements; and
- c. Consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material (see paragraph .60).

## Effective Date

**.71** This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

## AU Section 312A

# ***Audit Risk and Materiality in Conducting an Audit***\*

Source: SAS No. 47; SAS No. 82; SAS No. 96; SAS No. 98.

See section 9312A for interpretations of this section.

Effective for audits of financial statements for periods beginning after June 30, 1984, unless otherwise indicated.

.01 This section provides guidance on the auditor's consideration of audit risk and materiality when planning and performing an audit of financial statements in accordance with generally accepted auditing standards. Audit risk and materiality affect the application of generally accepted auditing standards, especially the standards of field work and reporting, and are reflected in the auditor's standard report. Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures.

.02 The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor that states, "Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected."<sup>1</sup> Audit risk<sup>2</sup> is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated.<sup>3</sup> [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

---

\* This section has been revised to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.

<sup>1</sup> See section 110, *Responsibilities and Functions of the Independent Auditor*, and section 230A, *Due Professional Care in the Performance of Work*, for a further discussion of reasonable assurance. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>2</sup> In addition to audit risk, the auditor is also exposed to loss or injury to his or her professional practice from litigation, adverse publicity, or other events arising in connection with financial statements audited and reported on. This exposure is present even though the auditor has performed the audit in accordance with generally accepted auditing standards and has reported appropriately on those financial statements. Even if an auditor assesses this exposure as low, the auditor should not perform less extensive procedures than would otherwise be appropriate under generally accepted auditing standards.

<sup>3</sup> This definition of audit risk does not include the risk that the auditor might erroneously conclude that the financial statements are materially misstated. In such a situation, the auditor would ordinarily reconsider or extend auditing procedures and request that the client perform specific tasks to re-evaluate the appropriateness of the financial statements. These steps would ordinarily lead the auditor to the correct conclusion. This definition also excludes the risk of an inappropriate reporting decision unrelated to the detection and evaluation of misstatements in the financial statements, such as an inappropriate decision regarding the form of the auditor's report because of a limitation on the scope of the audit. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.03** The concept of materiality recognizes that some matters, either individually or in the aggregate, are important for fair presentation of financial statements in conformity with generally accepted accounting principles,<sup>4</sup> while other matters are not important. The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements taken as a whole are not materially misstated. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

**.04** Financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, is important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles. Misstatements can result from errors or fraud.<sup>5</sup> [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.05** In planning the audit, the auditor is concerned with matters that could be material to the financial statements. The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.06** The term *errors* refers to unintentional misstatements or omissions of amounts or disclosures in financial statements. Errors may involve—

- Mistakes in gathering or processing data from which financial statements are prepared.
- Unreasonable accounting estimates arising from oversight or misinterpretation of facts.
- Mistakes in the application of accounting principles relating to amount, classification, manner of presentation, or disclosure.<sup>6</sup>

[Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.07** Although *fraud* is a broad legal concept, the auditor's interest specifically relates to fraudulent acts that cause a misstatement of financial

---

<sup>4</sup> The concepts of audit risk and materiality also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles; references in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations.

<sup>5</sup> The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors or fraud. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>6</sup> Errors do not include the effect of accounting processes employed for convenience, such as maintaining accounting records on the cash basis or the tax basis and periodically adjusting those records to prepare financial statements in conformity with generally accepted accounting principles. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

statements. Two types of misstatements are relevant to the auditor's consideration in a financial statement audit—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets. These two types of misstatements are further described in section 316, *Consideration of Fraud in a Financial Statement Audit*. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.08** When considering the auditor's responsibility to obtain reasonable assurance that the financial statements are free from material misstatement, there is no important distinction between errors and fraud. There is a distinction, however, in the auditor's response to detected misstatements. Generally, an isolated, immaterial error in processing accounting data or applying accounting principles is not significant to the audit. In contrast, when fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.09** When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor ordinarily should consider their nature and amount in relation to the nature and amount of items in the financial statements under audit. For example, an amount that is material to the financial statements of one entity may not be material to the financial statements of another entity of a different size or nature. Also, what is material to the financial statements of a particular entity might change from one period to another. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.10** The auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person who will rely on the financial statements. The perceived needs of a reasonable person are recognized in the discussion of materiality in Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*, which defines materiality as "the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement." That discussion recognizes that materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.11** As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.<sup>7</sup> [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

---

<sup>7</sup> See section 317. [Footnote renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Planning the Audit

.12 The auditor should consider audit risk and materiality both in (a) planning the audit and designing auditing procedures and (b) evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with generally accepted accounting principles. The auditor should consider audit risk and materiality in the first circumstance to obtain sufficient competent evidential matter on which to properly evaluate the financial statements in the second circumstance. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

## Considerations at the Financial Statements Level<sup>[8]</sup>

.13 The auditor should plan the audit so that audit risk will be limited to a low level that is, in his or her professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

.14 Section 311, *Planning and Supervision*, requires the auditor, in planning the audit, to take into consideration, among other matters, his or her preliminary judgment about materiality levels for audit purposes.<sup>9</sup> That judgment may or may not be quantified. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

.15 According to section 311, the nature, timing, and extent of planning and thus of the considerations of audit risk and materiality vary with the size and complexity of the entity, the auditor's experience with the entity, and his or her knowledge of the entity's business. Certain entity-related factors also affect the nature, timing, and extent of auditing procedures with respect to specific account balances and classes of transactions and related assertions. (See paragraphs .24 through .33.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

.16 An assessment of the risk of material misstatement (whether caused by error or fraud) should be made during planning.<sup>10</sup> The auditor's understanding

---

<sup>[8]</sup> [Footnote renumbered and deleted by the issuance of Statement on Auditing Standards No. 82, February 1997.]

<sup>9</sup> This section amends section 311, *Planning and Supervision*, paragraph .03e, by substituting the words "Preliminary judgment about materiality levels" in place of the words "Preliminary estimates of materiality levels." [Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

<sup>10</sup> Prior to or in conjunction with the information gathering procedures described in section 316.19–.34, members of the audit team should discuss the potential for material misstatement due to fraud. The discussion should include (1) an exchange of ideas or brainstorming among the audit team members and (2) an emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud. As part of planning, the auditor also should perform the following procedures to obtain information that is used (as described in section 316.35 through .42) to identify the risks of material misstatement due to fraud:

- a. Make inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed.
- b. Consider any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit.
- c. Consider whether one or more fraud risk factors exist.
- d. Consider other information that may be helpful in the identification of risks material misstatement due to fraud.

The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit (section 316.68). [Footnote added, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

of internal control may heighten or mitigate the auditor's concern about the risk of material misstatement.<sup>11</sup> As part of that understanding, the auditor is required by section 316.43–.45 to evaluate whether the entity's programs and controls that address the identified risks of material misstatement due to fraud have been suitably designed and placed in operation and to assess these risks taking into account this evaluation.<sup>12</sup> The auditor should consider the effect of these assessments on the overall audit strategy and the expected conduct and scope of the audit. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

**.17** Whenever the auditor has concluded that there is significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision. The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the level of risk for the engagement. Ordinarily, higher risk requires more experienced personnel or more extensive supervision by the auditor with final responsibility for the engagement during both the planning and the conduct of the engagement. Higher risk may cause the auditor to expand the extent of procedures applied, apply procedures closer to or as of year end, particularly in critical audit areas, or modify the nature of procedures to obtain more persuasive evidence. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.18** In an audit of an entity with operations in multiple locations or components, the auditor should consider the extent to which auditing procedures should be performed at selected locations or components. The factors an auditor should consider regarding the selection of a particular location or component include (a) the nature and amount of assets and transactions executed at the location or component, (b) the degree of centralization of records or information processing, (c) the effectiveness of the control environment, particularly with respect to management's direct control over the exercise of authority delegated to others and its ability to effectively supervise activities at the location or component, (d) the frequency, timing, and scope of monitoring activities by the entity or others at the location or component, and (e) judgments about materiality of the location or component. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.19** In planning the audit, the auditor should use his or her judgment as to the appropriately low level of audit risk and his or her preliminary judgment about materiality levels in a manner that can be expected to provide, within the inherent limitations of the auditing process, sufficient evidential matter to obtain reasonable assurance about whether the financial statements are free of material misstatement. Materiality levels include an overall level for each statement; however, because the statements are interrelated, and for reasons of efficiency, the auditor ordinarily considers materiality for planning purposes

---

<sup>11</sup> See section 319, *Consideration of Internal Control in a Financial Statement Audit*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Footnote renumbered, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

<sup>12</sup> [Footnote renumbered and deleted, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

in terms of the smallest aggregate level of misstatements that could be considered material to any one of the financial statements. For example, if the auditor believes that misstatements aggregating approximately \$100,000 would have a material effect on income but that such misstatements would have to aggregate approximately \$200,000 to materially affect financial position, it would not be appropriate for him or her to design auditing procedures that would be expected to detect misstatements only if they aggregate approximately \$200,000. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.20** The auditor plans the audit to obtain reasonable assurance of detecting misstatements that he or she believes could be large enough, individually or in the aggregate, to be quantitatively material to the financial statements. Although the auditor should be alert for misstatements that could be qualitatively material, it ordinarily is not practical to design procedures to detect them. Section 326A, *Evidential Matter*, states that "an auditor typically works within economic limits; his or her opinion, to be economically useful, must be formed within a reasonable length of time and at reasonable cost." [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.21** In some situations, the auditor considers materiality for planning purposes before the financial statements to be audited are prepared. In other situations, planning takes place after the financial statements under audit have been prepared, but the auditor may be aware that they require significant modification. In both types of situations, the auditor's preliminary judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods, as long as recognition is given to the effects of major changes in the entity's circumstances (for example, a significant merger) and relevant changes in the economy as a whole or the industry in which the entity operates. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.22** Assuming, theoretically, that the auditor's judgment about materiality at the planning stage was based on the same information available at the evaluation stage, materiality for planning and evaluation purposes would be the same. However, it ordinarily is not feasible for the auditor, when planning an audit, to anticipate all of the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit. Thus, the auditor's preliminary judgment about materiality ordinarily will differ from the judgment about materiality used in evaluating the audit findings. If significantly lower materiality levels become appropriate in evaluating audit findings, the auditor should re-evaluate the sufficiency of the auditing procedures he or she has performed. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.23** In planning auditing procedures, the auditor should also consider the nature, cause (if known), and amount of misstatements that he or she is aware of from the audit of the prior period's financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

### **Considerations at the Individual Account-Balance or Class-of-Transactions Level**

**.24** The auditor recognizes that there is an inverse relationship between audit risk and materiality considerations. For example, the risk that a particular account balance or class of transactions and related assertions could be

misstated by an extremely large amount might be very low, but the risk that it could be misstated by an extremely small amount might be very high. Holding other planning considerations equal, either a decrease in the level of audit risk that the auditor judges to be appropriate in an account balance or a class of transactions or a decrease in the amount of misstatements in the balance or class that the auditor believes could be material would require the auditor to do one or more of the following: (a) select a more effective auditing procedure, (b) perform auditing procedures closer to year end, or (c) increase the extent of a particular auditing procedure. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.25** In determining the nature, timing, and extent of auditing procedures to be applied to a specific account balance or class of transactions, the auditor should design procedures to obtain reasonable assurance of detecting misstatements that he or she believes, based on the preliminary judgment about materiality, could be material, when aggregated with misstatements in other balances or classes, to the financial statements taken as a whole. Auditors use various methods to design procedures to detect such misstatements. In some cases, auditors explicitly estimate, for planning purposes, the maximum amount of misstatements in the balance or class that, when combined with misstatements in other balances or classes, could exist without causing the financial statements to be materially misstated. In other cases, auditors relate their preliminary judgment about materiality to a specific account balance or class of transactions without explicitly estimating such misstatements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.26** The auditor needs to consider audit risk at the individual account-balance or class-of-transactions level because such consideration directly assists in determining the scope of auditing procedures for the balance or class and related assertions. The auditor should seek to restrict audit risk at the individual balance or class level in such a way that will enable him or her, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk. Auditors use various approaches to accomplish that objective. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.27** At the account-balance or class-of-transactions level, audit risk consists of (a) the risk (consisting of inherent risk and control risk) that the balance or class and related assertions contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other balances or classes and (b) the risk (detection risk) that the auditor will not detect such misstatements. The discussion that follows describes audit risk in terms of three component risks.<sup>13</sup> The way the auditor considers these component risks and combines them involves professional judgment and depends on the audit approach.

- a. *Inherent risk* is the susceptibility of an assertion to a material misstatement, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related balances

---

<sup>13</sup> The formula in the Appendix [paragraph .48] to section 350A, *Audit Sampling*, describes audit risk in terms of four component risks. Detection risk is presented in terms of two components: the risk that analytical procedures and other relevant substantive tests would fail to detect misstatements equal to tolerable misstatement, and the allowable risk of incorrect acceptance for the substantive test of details. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Footnote renumbered, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

or classes than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates pose greater risks than do accounts consisting of relatively routine, factual data. External factors also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those factors that are peculiar to a specific assertion for an account balance or a class of transactions, factors that relate to several or all of the balances or classes may influence the inherent risk related to an assertion for a specific balance or class. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

- b. *Control risk* is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.
- c. *Detection risk* is the risk that the auditor will not detect a material misstatement that exists in an assertion. Detection risk is a function of the effectiveness of an auditing procedure and of its application by the auditor. It arises partly from uncertainties that exist when the auditor does not examine 100 percent of an account balance or a class of transactions and partly because of other uncertainties that exist even if he or she were to examine 100 percent of the balance or class. Such other uncertainties arise because an auditor might select an inappropriate auditing procedure, misapply an appropriate procedure, or misinterpret the audit results. These other uncertainties can be reduced to a negligible level through adequate planning and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards.

[Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.28** Inherent risk and control risk differ from detection risk in that they exist independently of the audit of financial statements, whereas detection risk relates to the auditor's procedures and can be changed at his or her discretion. Detection risk should bear an inverse relationship to inherent and control risk. The less the inherent and control risk the auditor believes exists, the greater the detection risk that can be accepted. Conversely, the greater the inherent and control risk the auditor believes exists, the less the detection risk that can be accepted. These components of audit risk may be assessed in quantitative terms such as percentages or in nonquantitative terms that range, for example, from a minimum to a maximum. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.29** When the auditor assesses inherent risk for an assertion related to an account balance or a class of transactions, he or she evaluates numerous factors that involve professional judgment. In doing so, the auditor considers not only factors peculiar to the related assertion, but also, other factors pervasive to

the financial statements taken as a whole that may also influence inherent risk related to the assertion. If an auditor concludes that the effort required to assess inherent risk for an assertion would exceed the potential reduction in the extent of auditing procedures derived from such an assessment, the auditor should assess inherent risk as being at the maximum when designing auditing procedures. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.30** The auditor also uses professional judgment in assessing control risk for an assertion related to the account balance or class of transactions. The auditor's assessment of control risk is based on the sufficiency of evidential matter obtained to support the effectiveness of internal control in preventing or detecting misstatements in financial statement assertions. If the auditor believes controls are unlikely to pertain to an assertion or are unlikely to be effective, or believes that evaluating their effectiveness would be inefficient, he or she would assess control risk for that assertion at the maximum. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.31** The auditor might make separate or combined assessments of inherent risk and control risk. If the auditor considers inherent risk or control risk, separately or in combination, to be less than the maximum, he or she should have an appropriate basis for these assessments. This basis may be obtained, for example, through the use of questionnaires, checklists, instructions, or similar generalized materials and, in the case of control risk, the understanding of internal control and the performance of suitable tests of controls. However, professional judgment is required in interpreting, adapting, or expanding such generalized material as appropriate in the circumstances. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.32** The detection risk that the auditor can accept in the design of auditing procedures is based on the level to which he or she seeks to restrict audit risk related to the account balance or class of transactions and on the assessment of inherent and control risks. As the auditor's assessment of inherent risk and control risk decreases, the detection risk that can be accepted increases. It is not appropriate, however, for an auditor to rely completely on assessments of inherent risk and control risk to the exclusion of performing substantive tests of account balances and classes of transactions where misstatements could exist that might be material when aggregated with misstatements in other balances or classes. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.33** An audit of financial statements is a cumulative process; as the auditor performs planned auditing procedures, the evidence obtained may cause him or her to modify the nature, timing, and extent of other planned procedures. As a result of performing auditing procedures or from other sources during the audit, information may come to the auditor's attention that differs significantly from the information on which the audit plan was based. For example, the extent of misstatements detected may alter the judgment about the levels of inherent and control risks, and other information obtained about the financial statements may alter the preliminary judgment about materiality. In such cases, the auditor may need to re-evaluate the auditing procedures he or she plans to apply, based on the revised consideration of audit risk and materiality for all or certain of the account balances or classes of transactions and related assertions. [Paragraph renumbered and amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Evaluating Audit Findings

**.34** In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor should consider the effects, both individually and in the aggregate, of misstatements that are not corrected by the entity. In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative considerations (see paragraphs .08–.11). The consideration and aggregation of misstatements should include the auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined (hereafter referred to as likely misstatements<sup>14</sup>), not just the amount of misstatements specifically identified (hereafter referred to as known misstatements).<sup>15</sup> Likely misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole. Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.35** When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him or her to estimate the likely misstatement in the balance or class. When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. That projected misstatement, along with the results of other substantive tests, contributes to the auditor's assessment of likely misstatement in the balance or class.<sup>[16–17]</sup> [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.36** The risk of material misstatement of the financial statements is generally greater when account balances and classes of transactions include accounting estimates rather than essentially factual data because of the inherent subjectivity in estimating future events. Estimates, such as those for inventory obsolescence, uncollectible receivables, and warranty obligations, are subject

---

<sup>14</sup> The term *likely misstatements* includes any known misstatements. See section 316.75–.77 for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. Those paragraphs provide specific guidance on the auditor's consideration of an audit adjustment that is, or may be, the result of fraud. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98. Footnote renumbered and revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

<sup>15</sup> If the auditor were to examine all of the items in a balance or a class, the likely misstatement applicable to recorded transactions in the balance or class would be the amount of known misstatements specifically identified. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98. Footnote renumbered, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

<sup>[16–17]</sup> [Footnotes renumbered and deleted by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

not only to the unpredictability of future events but also to misstatements that may arise from using inadequate or inappropriate data or misapplying appropriate data. Since no one accounting estimate can be considered accurate with certainty, the auditor recognizes that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may be reasonable, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement. The auditor should also consider whether the difference between estimates best supported by the audit evidence and the estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the entity's management. For example, if each accounting estimate included in the financial statements was individually reasonable, but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.37** In prior periods, likely misstatements may not have been corrected by the entity because they did not cause the financial statements for those periods to be materially misstated. Those misstatements might also affect the current period's financial statements.<sup>18</sup> If the auditor believes that there is an unacceptably high risk that the current period's financial statements may be materially misstated when those prior-period likely misstatements that affect the current period's financial statements are considered along with likely misstatements arising in the current period, the auditor should include in aggregate likely misstatement the effect on the current period's financial statements of those prior-period likely misstatements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.38** If the auditor concludes, based on the accumulation of sufficient evidential matter, that the effects of likely misstatements, individually or in the aggregate, cause the financial statements to be materially misstated, the auditor should request management to eliminate the misstatement. If the material misstatement is not eliminated, the auditor should issue a qualified or an adverse opinion on the financial statements. Material misstatements may be eliminated by, for example, application of appropriate accounting principles, other adjustments in amounts, or the addition of appropriate disclosure of inadequately disclosed matters. Even though the effects of likely misstatements on the financial statements may be immaterial, the auditor should recognize that an accumulation of immaterial misstatements in the balance sheet could contribute to material misstatements of future financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.39** If the auditor concludes that the effects of likely misstatements, individually or in the aggregate, do not cause the financial statements to be

---

<sup>18</sup> The measurement of the effect, if any, on the current period's financial statements of misstatements uncorrected in prior periods involves accounting considerations and is therefore not addressed in this section. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote subsequently renumbered, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

materially misstated, he or she should recognize that they could still be materially misstated because of further misstatement remaining undetected. As the aggregate likely misstatements increase, the risk that the financial statements may be materially misstated also increases. The auditor generally reduces this risk of material misstatement in planning the audit by restricting the extent of detection risk he or she is willing to accept for an assertion related to an account balance or a class of transactions. The auditor can reduce this risk of material misstatement by modifying the nature, timing, and extent of planned auditing procedures in performing the audit. (See paragraph .33.) Nevertheless, if the auditor believes that such risk is unacceptably high, he or she should perform additional auditing procedures or satisfy himself or herself that the entity has adjusted the financial statements to reduce the risk of material misstatement to an acceptable level. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

.40 The auditor should document the nature and effect of aggregated misstatements. The auditor also should document his or her conclusion as to whether the aggregated misstatements cause the financial statements to be materially misstated. [Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96.]

.41 In aggregating likely misstatements that the entity has not corrected, pursuant to paragraphs .34 and .35, the auditor may designate an amount below which misstatements need not be accumulated. This amount should be set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

## Effective Date

.42 This section is effective for audits of financial statements for periods beginning after June 30, 1984. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

## AU Section 9312A

# ***Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312A***

### **1. The Meaning of the Term *Misstatement***

**.01 Question**—Section 312A, *Audit Risk and Materiality in Conducting an Audit*, paragraph .04, states that financial statements would be considered materially misstated if "they contain misstatements whose effect, individually or in the aggregate, is important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles." Section 312A.04 also states that misstatements can result from errors or fraud. The term *misstatement* is used throughout generally accepted auditing standards; however, this term is not defined. What is the meaning of the term *misstatement*?

**.02 Interpretation**—In the absence of materiality considerations, a misstatement causes the financial statements not to be in conformity with generally accepted accounting principles.<sup>1</sup> A misstatement may consist of any of the following:

- a. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under generally accepted accounting principles
- b. The omission of a financial statement element, account, or item
- c. A financial statement disclosure that is not presented in accordance with generally accepted accounting principles
- d. The omission of information required to be disclosed in accordance with generally accepted accounting principles.

**.03 Misstatements** may be of two types: known and likely. Section 312A.35 refers to known misstatements as "the amount of misstatements specifically identified." For example, the failure to accrue an unpaid invoice for goods received or services rendered prior to the end of the period presented would be a known misstatement. Section 312A.35 refers to likely misstatements as "the auditor's best estimate of the total misstatements in the account balances or classes of transactions. . . ." Likely misstatements may be identified when an auditor performs analytical or sampling procedures. For example, if an auditor applies sampling procedures to a certain class of transactions that identify a known misstatement in the items sampled, the auditor will then determine the likely misstatement by projecting the known difference identified in the

---

<sup>1</sup> Reference to generally accepted accounting principles includes, where applicable, a comprehensive basis of accounting other than generally accepted accounting principles as defined in section 623, *Special Reports*, paragraph .04.

sample to the total population tested. With regard to analytical procedures, section 312A.35 states, in part—

When the auditor tests an account balance or class of transactions and related assertions by an analytical procedure, he or she ordinarily would not specifically identify misstatements but would only obtain an indication of whether misstatements might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor ordinarily would have to employ other procedures to enable him or her to estimate the likely misstatement in the balance or class.

**.04** Likely misstatements also are associated with accounting estimates. Section 312A.36 states, in part—

The risk of material misstatement of the financial statements is generally greater when account balances and classes of transactions include accounting estimates rather than essentially factual data because of the inherent subjectivity in estimating future events. Estimates, such as those for inventory obsolescence, uncollectible receivables, and warranty obligations, are subject not only to the unpredictability of future events but also to misstatements that may arise from using inadequate or inappropriate data or misapplying appropriate data. Since no one accounting estimate can be considered accurate with certainty, the auditor recognizes that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may be reasonable, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement and aggregate it with other likely misstatements.

[Issue Date: December, 2000.]

## 2. Evaluating Differences in Estimates

**.05** *Question*—Section 312A.36 states, in part—

Since no one accounting estimate can be considered accurate with certainty, the auditor recognizes that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may be reasonable, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement and aggregate it with other likely misstatements.

With respect to an estimate, what should the auditor consider in determining the amount of the likely misstatements to be aggregated?

**.06** *Interpretation*—In determining the amount of the likely misstatements to be aggregated, the auditor considers the "closest reasonable estimate" which may be a range of acceptable amounts or a point estimate, if that is a better estimate than any other amount.

**.07** In some cases the auditor may use a method that produces a range of acceptable amounts to determine the reasonableness of amounts recorded. For example, the auditor's analysis of specific problem accounts receivable and recent trends in bad-debt write-offs as a percent of sales may cause the auditor to conclude that the allowance for doubtful accounts should be between \$130,000 and \$160,000. If management's recorded estimate falls within that range, the auditor ordinarily would conclude that the recorded amount is reasonable and

no difference would be aggregated. If management's recorded estimate falls outside the auditor's range of acceptable amounts, the difference between the recorded amount and the amount at the closest end of the auditor's range would be aggregated as a misstatement. For example, if management has recorded \$110,000 as the allowance, the amount by which the recorded estimate falls outside the range (\$20,000) is aggregated as a misstatement.

.08 In other cases the auditor may determine that a point estimate is a better estimate than any other amount. In those situations, the auditor would use that amount to determine the reasonableness of the recorded amount. The auditor would compare the point estimate to the amount recorded by the client and include any difference in the aggregation of misstatements.<sup>2</sup>

.09 Section 312A.36 indicates that the auditor should be alert to the possibility that management's recorded estimates are clustered at either end of the auditor's range of acceptable amounts, indicating a possible bias on the part of management. Section 312A.36 states, in part—

The auditor should also consider whether the difference between estimates best supported by the audit evidence and the estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the entity's management. For example, if each accounting estimate included in the financial statements was individually reasonable, but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.

In these circumstances, the auditor should reconsider whether other recorded estimates reflect a similar bias and should perform additional audit procedures that address those estimates. In addition, the auditor should be alert to the possibility that management's recorded estimates were clustered at one end of the range of acceptable amounts in the preceding year and clustered at the other end of the range of acceptable amounts in the current year, thus indicating the possibility that management is using swings in accounting estimates to offset higher or lower than expected earnings. If the auditor believes that such circumstances exist, the auditor should consider whether these matters should be communicated to the entity's audit committee, as described in section 380A, *Communication With Audit Committees*, paragraphs .08 and .11.

[Issue Date: December, 2000.]

### 3. Quantitative Measures of Materiality in Evaluating Audit Findings

.10 Question—Section 312A, *Audit Risk and Materiality in Conducting an Audit*, provides guidance to the auditor on evaluating the effect of misstatements on the financial statements under audit. Section 312A.10 states, in part—

The auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person who will rely on the financial statements.

Section 312A.34 further describes the auditor's evaluation of the quantitative aspects of materiality. It states, in part—

In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles,

---

<sup>2</sup> See Interpretation No. 14, "Reasonable Estimation of the Amount of a Loss" of FASB Statement No. 5, *Accounting for Contingencies*.

the auditor should aggregate misstatements that the entity has not corrected in a way that enables him or her to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

What factors should the auditor consider in assessing the *quantitative* impact of identified misstatements?

**.11 Interpretation**—The quantitative evaluation of identified misstatements is a matter of professional judgment and should reflect a measure of materiality that is based on the element or elements of the financial statements that, in the auditor's judgment, are expected to affect the judgment of a reasonable person who will rely on the financial statements, considering the nature of the reporting entity. For example, it is generally recognized that after-tax income from continuing operations is, in most circumstances, the measure of greatest significance to the financial statement users of entities whose debt or equity securities are publicly traded. Depending on the entity's particular circumstances, other elements of the financial statements that may be useful in making a quantitative assessment of the materiality of identified misstatements include current assets, net working capital, total assets, total revenues, gross profit, total equity, and cash flows from operations. In all instances, the element or elements selected should reflect, in the auditor's judgment, the measures most likely to be considered important by the financial statement users.

**.12 Question**—An entity's after-tax income or loss from continuing operations may be nominal or may fluctuate widely from year to year due to the inclusion in the results of operations of significant, unusual, or infrequently occurring income or expense items. What other quantitative measures could be considered if after-tax income or loss from continuing operations is nominal or fluctuates widely from period to period?

**.13 Interpretation**—In certain circumstances, a quantitative measure of materiality based on after-tax income from continuing operations may not be appropriate. The auditor may identify another element or elements that are appropriate in the circumstances or may compute an amount of current-year after-tax income from continuing operations adjusted to exclude unusual or infrequently occurring items of income or expense.<sup>3</sup>

**.14** The selection of an alternate element or elements for use in assessing a quantitative measure of materiality is a matter of the auditor's professional judgment. In choosing an alternate element or elements, the auditor should evaluate the perceived needs of the financial statement users, the particular circumstances that caused the abnormal results for the current year, the likelihood of their recurrence, and any other matters that, in the auditor's judgment, may be relevant to a quantitative assessment of materiality.

[Issue Date: December, 2000.]

#### 4. Considering the Qualitative Characteristics of Misstatements

**.15 Question**—Section 312A, *Audit Risk and Materiality in Conducting an Audit*, paragraph .34, states, in part—

Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

---

<sup>3</sup> Paragraph 26 of APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, discusses unusual or infrequently occurring items.

What qualitative factors should the auditor consider in assessing whether misstatements are material?

**.16 Interpretation**—Section 312A.10 states that the auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person. Section 312A.11 states—

As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

Section 508, *Reports on Audited Financial Statements*, paragraph .36, states that the significance of an item to a particular entity (for example, inventories to a manufacturing company), the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality. Section 312A.10 also makes reference to the discussion of materiality in Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*. FASB Concepts Statement No. 2, paragraphs 123 through 132, includes a discussion about matters that might affect a materiality judgment.

**.17** The auditor considers relevant qualitative factors in his or her qualitative considerations. Qualitative factors the auditor may consider relevant to his or her consideration include the following:

- a. The potential effect of the misstatement on trends, especially trends in profitability.
- b. A misstatement that changes a loss into income or vice versa.
- c. The effect of the misstatement on segment information, for example, the significance of the matter to a particular segment important to the future profitability of the entity, the pervasiveness of the matter on the segment information, and the impact of the matter on trends in segment information, all in relation to the financial statements taken as a whole. (See Interpretation No. 4 of section 326A, *Evidential Matter*, "Applying Auditing Procedures to Segment Disclosures in Financial Statements" [section 9326A.39]).
- d. The potential effect of the misstatement on the entity's compliance with loan covenants, other contractual agreements, and regulatory provisions.
- e. The existence of statutory or regulatory reporting requirements that affect materiality thresholds.
- f. A misstatement that has the effect of increasing management's compensation, for example, by satisfying the requirements for the award of bonuses or other forms of incentive compensation.
- g. The sensitivity of the circumstances surrounding the misstatement, for example, the implications of misstatements involving fraud and possible illegal acts, violations of contractual provisions, and conflicts of interest.
- h. The significance of the financial statement element affected by the misstatement, for example, a misstatement affecting recurring earnings as contrasted to one involving a non-recurring charge or credit, such as an extraordinary item.

- i.* The effects of misclassifications, for example, misclassification between operating and non-operating income or recurring and non-recurring income items or a misclassification between fundraising costs and program activity costs in a not-for-profit organization.
- j.* The significance of the misstatement or disclosures relative to known user needs, for example—
  - The significance of earnings and earnings per share to public-company investors and the significance of equity amounts to private-company creditors.
  - The magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests (buy/sell agreement).
  - The effect of misstatements of earnings when contrasted with expectations.

Obtaining the views and expectations of the entity's audit committee and management may be helpful in gaining or corroborating an understanding of user needs, such as those illustrated above.

- k.* The definitive character of the misstatement, for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty.
- l.* The motivation of management with respect to the misstatement, for example, (i) an indication of a possible pattern of bias by management when developing and accumulating accounting estimates or (ii) a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process.
- m.* The existence of offsetting effects of individually significant but different misstatements.
- n.* The likelihood that a misstatement that is currently immaterial may have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- o.* The cost of making the correction—it may not be cost-beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management as noted in paragraph .17(*l*) above.
- p.* The risk that possible additional undetected misstatements would affect the auditor's evaluation.

## AU Section 313

# ***Substantive Tests Prior to the Balance Sheet Date***<sup>§</sup>

(Supersedes SAS No. 1, section 310.05–.09)\*

Source: SAS No. 45.

**Effective for periods ended after September 30, 1983, unless otherwise indicated.**

.01 This section provides guidance for audits of financial statements concerning—

- a. Factors to be considered before applying principal substantive tests to the details of particular asset or liability accounts as of a date (*interim date*) that is prior to the balance-sheet date.
- b. Auditing procedures to provide a reasonable basis for extending from an interim date to the balance-sheet date (*remaining period*) the audit conclusions from such principal substantive tests.
- c. Coordinating the timing of auditing procedures.

Guidance concerning the timing of tests of controls is provided in section 319.99. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

.02 Audit testing at interim dates may permit early consideration of significant matters affecting the year-end financial statements (for example, related party transactions, changed conditions, recent accounting pronouncements, and financial statement items likely to require adjustment). In addition, much of the audit planning, including obtaining an understanding of internal control, assessing control risk and the application of substantive tests to transactions can be conducted prior to the balance-sheet date.<sup>1</sup>

.03 Applying principal substantive tests to the details of an asset or liability account as of an interim date rather than as of the balance-sheet date potentially increases the risk that misstatements that may exist at the balance-sheet date will not be detected by the auditor. The potential for such increased

---

<sup>§</sup> Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, supersedes this section effective for audits of financial statements for periods beginning on or after December 15, 2006. This section will be deleted closer to the effective date of section 318.

\* Editor's note deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.

<sup>1</sup> Substantive tests such as the following can be applied to transactions through any selected date(s) prior to the balance-sheet date and completed as part of the year-end procedures: (1) tests of details of the additions to and reductions of accounts such as property, investments, and debt and equity capital; (2) tests of details of transactions affecting income and expense accounts; (3) tests of accounts that are not to be audited by testing the details of items composing the balance (for example, warranty reserves, clearing accounts, certain deferred charges); and (4) analytical procedures applied to income and expense accounts.

audit risk tends to become greater as the remaining period is lengthened. This potential incremental audit risk can be controlled, however, if the substantive tests to cover the remaining period can be designed in a way that will provide a reasonable basis for extending to the balance-sheet date the audit conclusions from the tests of details at the interim date.

## **Factors to Be Considered Before Applying Principal Substantive Tests to the Details of Balance-Sheet Accounts at Interim Dates**

**.04** Before applying principal substantive tests to the details of asset or liability accounts at an interim date, the auditor should assess the difficulty in controlling the incremental audit risk. Paragraphs .05 through .07 discuss considerations that affect that assessment. In addition, the auditor should consider the cost of the substantive tests that are necessary to cover the remaining period in a way that will provide the appropriate audit assurance at the balance-sheet date. Applying principal substantive tests to the details of asset and liability accounts at an interim date may not be cost-effective if substantive tests to cover the remaining period cannot be restricted due to the assessed level of control risk.

**.05** Assessing control risk at below the maximum is not required in order to have a reasonable basis for extending audit conclusions from an interim date to the balance-sheet date; however, if the auditor assesses control risk at the maximum during the remaining period, he should consider whether the effectiveness of certain of the substantive tests to cover that period will be impaired. For example, effective controls may be lacking over the internal documents that provide indications of transactions that have been executed. Substantive tests that are based on such documents and relate to the completeness assertion for the remaining period may be ineffective because the documents may be incomplete. Likewise, substantive tests covering the remaining period that relate to the existence assertion at the balance-sheet date may be ineffective if effective controls over the custody and physical movement of assets are not present. In both of the above examples, if the auditor concludes that the effectiveness of such substantive tests would be impaired, additional assurance should be sought or the accounts should be examined as of the balance-sheet date.

**.06** The auditor should consider whether there are rapidly changing business conditions or circumstances that might predispose management to misstate financial statements in the remaining period.<sup>2</sup> If such conditions or circumstances are present, the auditor might conclude that the substantive tests to cover the remaining period would not be effective in controlling the incremental audit risk associated with them. In those situations, the asset and liability accounts affected should ordinarily be examined as of the balance-sheet date.

**.07** The auditor should consider whether the year-end balances of the particular asset or liability accounts that might be selected for interim examination are reasonably predictable with respect to amount, relative significance, and composition. He should also consider whether the entity's proposed procedures for analyzing and adjusting such accounts at interim dates and for establishing proper accounting cutoffs are appropriate. In addition, the auditor

---

<sup>2</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraph .85 (Appendix). [Footnote revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

should consider whether the accounting system will provide information concerning the balances at the balance-sheet date and the transactions in the remaining period that is sufficient to permit investigation of (a) significant unusual transactions or entries (including those at or near year-end); (b) other causes of significant fluctuations, or expected fluctuations that did not occur; and (c) changes in the composition of the account balances. If the auditor concludes that evidential matter related to the above would not be sufficient for purposes of controlling audit risk, the account should be examined as of the balance-sheet date.

## Extending Audit Conclusions to the Balance-Sheet Date

.08 Substantive tests should be designed to cover the remaining period in such a way that the assurance from those tests and the substantive tests applied to the details of the balance as of an interim date, and any audit assurance provided from the assessed level of control risk, achieve the audit objectives at the balance-sheet date. Such tests ordinarily should include (a) comparison of information concerning the balance at the balance-sheet date with the comparable information at the interim date to identify amounts that appear unusual and investigation of any such amounts and (b) other analytical procedures or substantive tests of details, or a combination of both, to provide a reasonable basis for extending to the balance-sheet date the audit conclusions relative to the assertions tested directly or indirectly at the interim date.<sup>3</sup>

.09 If misstatements are detected in account balances at interim dates, the auditor may be required to modify the planned nature, timing, or extent of the substantive tests covering the remaining period that relate to such accounts or to reperform certain auditing procedures at the balance-sheet date. The assessment of possible misstatement as of the balance-sheet date should be based on the auditor's judgment of the state of the particular account(s) as of that date, after considering (a) the possible implications of the nature and cause of the misstatements detected at the interim date, (b) the possible relationship to other phases of the audit, (c) the corrections subsequently recorded by the entity, and (d) the results of auditing procedures covering the remaining period (including those that are responsive to the particular possibilities for misstatement). For example, the auditor might conclude that the estimate of unrecorded credit memos at an interim date is representative of such misstatements at the balance-sheet date, based on substantive tests covering the remaining period. On the other hand, the assessment of the possible effects at the balance-sheet date of other types of cutoff misstatements at an interim date might be based on the results of reperforming substantive tests of the cutoff.

## Coordinating the Timing of Auditing Procedures

.10 The timing of auditing procedures also involves consideration of whether related auditing procedures are properly coordinated. This includes, for example—

- a. Coordinating the auditing procedures applied to related party transactions and balances.<sup>4</sup>

---

<sup>3</sup> Factors to be considered in determining the relative mix of tests of details and analytical procedures include (1) the nature of the transactions and balances in relation to the assertions involved, (2) the availability of historical data or other criteria for use in analytical procedures, and (3) the availability of records required for effective tests of details and the nature of the tests to which they are susceptible.

<sup>4</sup> See section 334, *Related Parties*.

- b. Coordinating the testing of interrelated accounts and accounting cut-offs.
- c. Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items.

Decisions about coordinating related auditing procedures should be made in the light of the assessed level of control risk and of the particular auditing procedures that could be applied, either for the remaining period or at year-end, or both.

---

## AU Section 314

# ***Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement***

(Supersedes SAS No. 55)

Source: SAS No. 109.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

### **Introduction**

.01 This section establishes standards and provides guidance about implementing the second standard of field work, as follows:

The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.

The importance of the auditor's risk assessment as a basis for further audit procedures is discussed in the explanation of audit risk in section 312, *Audit Risk and Materiality in Conducting an Audit*. See section 326, *Audit Evidence*, for guidance on how the auditor uses relevant assertions<sup>1</sup> in sufficient detail to form a basis for the assessment of risks of material misstatement and to design and perform further audit procedures. The auditor should make risk assessments at the financial statement and relevant assertion levels based on an appropriate understanding of the entity and its environment, including its internal control. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, discusses the auditor's responsibility to determine overall responses and to design and perform further audit procedures whose nature, timing, and extent are responsive to the risk assessments. This section should be applied in conjunction with the standards and guidance provided in other sections. In particular, the auditor's responsibility to consider fraud in an audit of financial statements is discussed in section 316, *Consideration of Fraud in a Financial Statement Audit*.

.02 The following is an overview of this standard:

- *Risk assessment procedures and sources of information about the entity and its environment, including its internal control.* This section explains the audit procedures that the auditor should perform to obtain the understanding of the entity and its environment, including its internal control (risk assessment procedures). The audit team should discuss the susceptibility of the entity's financial statements to material misstatement.

---

<sup>1</sup> *Relevant assertions* are assertions that have a meaningful bearing on whether the account is fairly stated. For example, valuation may not be relevant to the cash account unless currency translation is involved; however, existence and completeness are always relevant. Similarly, valuation may not be relevant to the gross amount of the accounts receivable balance, but is relevant to the related allowance accounts. Additionally, the auditor might, in some circumstances, focus on the presentation and disclosure assertions separately in connection with the period-end financial reporting process.

- *Understanding the entity and its environment, including its internal control.* This section provides guidance to the auditor in understanding specified aspects of the entity and its environment, and components of its internal control, in order to identify and assess risks of material misstatement, and in designing and performing further audit procedures.
- *Assessing the risks of material misstatement.* This section provides guidance to the auditor in assessing the risks of material misstatement at the financial statement and relevant assertion levels. The auditor should:
  - Identify risks by considering the entity and its environment, including relevant controls, and by considering the classes of transactions, account balances, and disclosures in the financial statements.
  - Relate the identified risks to what could go wrong at the relevant assertion level.
  - Consider the significance and the likelihood of material misstatement for each identified risk.

This section also provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity's controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented.

- *Documentation.* This section provides related documentation guidance.

**.03** Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example when:

- Establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses.
- Considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures.
- Identifying areas where special audit consideration may be necessary, for example, related-party transactions, the appropriateness of management's use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions.
- Developing expectations for use when performing analytical procedures.
- Designing and performing further audit procedures to reduce audit risk to an appropriately low level.
- Evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management's assumptions and of management's oral and written representations.

**.04** The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its

internal control. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

## **Risk Assessment Procedures and Sources of Information About the Entity and Its Environment, Including Its Internal Control**

.05 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in section 316. As described in section 326, audit procedures to obtain the understanding are referred to as *risk assessment procedures* because some of the information obtained by performing such procedures may be used by the auditor as audit evidence to support assessments of the risks of material misstatement. In addition, in performing risk assessment procedures, the auditor may obtain audit evidence about the relevant assertions related to classes of transactions, account balances, or disclosures and about the operating effectiveness of controls, even though such audit procedures were not specifically planned as substantive procedures or as tests of controls. The auditor also may choose to perform substantive procedures or tests of controls concurrently with risk assessment procedures because it is efficient to do so.

### **Risk Assessment Procedures**

.06 The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

- a. Inquiries of management and others within the entity
- b. Analytical procedures
- c. Observation and inspection

The auditor is not required to perform all the risk assessment procedures described above for each aspect of the understanding described in paragraph .21. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

.07 In addition, the auditor might perform other procedures where the information obtained may be helpful in identifying risks of material misstatement. For example, in cooperation with the entity, the auditor may consider making inquiries of others outside the entity such as the entity's external legal counsel or of valuation experts that the entity has used. Reviewing information obtained from external sources such as reports by analysts, banks, or rating agencies; trade and economic journals; or regulatory or financial publications may also be useful in obtaining information about the entity.

.08 Although much of the information the auditor obtains by inquiries can be obtained from management and those responsible for financial reporting, inquiries of others within the entity, such as production and internal audit personnel, and other employees with different levels of authority, may be useful in

providing the auditor with a different perspective in identifying risks of material misstatement. In determining others within the entity to whom inquiries may be directed, or the extent of those inquiries, the auditor should consider what information may be obtained that might help the auditor in identifying risks of material misstatement. For example:

- Inquiries directed toward those charged with governance<sup>2</sup> may help the auditor understand the environment in which the financial statements are prepared.
- Inquiries directed toward internal audit personnel may relate to their activities concerning the design and effectiveness of the entity's internal control and whether management has satisfactorily responded to any findings from these activities.
- Inquiries of employees involved in initiating, authorizing, processing, or recording complex or unusual transactions may help the auditor in evaluating the appropriateness of the selection and application of certain accounting policies.
- Inquiries directed toward in-house legal counsel may relate to such matters as litigation, compliance with laws and regulations, knowledge of fraud or suspected fraud affecting the entity, warranties, post-sales obligations, arrangements (such as joint ventures) with business partners, and the meaning of contract terms.
- Inquiries directed toward marketing, sales, or production personnel may relate to changes in the entity's marketing strategies, sales trends, production strategies, or contractual arrangements with its customers.

**.09** Paragraphs .04 and .06 of section 329, *Analytical Procedures*, specify that the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

**.10** Observation and inspection may support inquiries of management and others, and also provide information about the entity and its environment. Such audit procedures ordinarily include:

- Observation of entity activities and operations
- Inspection of documents (such as business plans and strategies), records, and internal control manuals
- Reading reports prepared by management (such as quarterly management reports and interim financial statements), those charged with

---

<sup>2</sup> See footnote 4 of section 311, *Planning and Supervision*, for the definition of and discussion about those charged with governance.

governance (such as minutes of board of directors' meetings), and internal audit

- Visits to the entity's premises and plant facilities
- Tracing transactions through the information system relevant to financial reporting, which may be performed as part of a walk-through

**.11** When the auditor intends to use information about the entity and its environment obtained in prior periods, the auditor should determine whether changes have occurred that may affect the relevance of such information in the current audit. For continuing engagements, the auditor's previous experience with the entity contributes to the understanding of the entity. For example, audit procedures performed in previous audits ordinarily provide audit evidence about the entity's organizational structure, business, and controls, as well as information about past misstatements and whether or not they were corrected on a timely basis, which assists the auditor in assessing risks of material misstatement in the current audit. However, such information may have been rendered irrelevant by changes in the entity or its environment. The auditor should make inquiries and perform other appropriate audit procedures, such as walk-throughs of systems, to determine whether changes have occurred that may affect the relevance of such information.

**.12** Section 316 specifies that the auditor should specifically assess the risk of material misstatement<sup>3</sup> of the financial statements due to fraud and states that the auditor should consider that assessment in designing audit procedures to be performed. In making this assessment, the auditor should also consider fraud risk factors that relate to either material misstatements arising from fraudulent financial reporting or misstatements arising from misappropriation of assets. Fraud risk factors that relate to fraudulent financial reporting are (a) management's characteristics and influence over the control environment, (b) industry conditions, and (c) operating characteristics and financial stability. Fraud risk factors that relate to misappropriation of assets are (a) susceptibility of assets to misappropriations and (b) absence of controls. The auditor's response to the assessment of the risk of material misstatement due to fraud is influenced by the nature and significance of the risk factors identified as being present. In some circumstances, the auditor may conclude that the conditions indicate a need to modify audit procedures. In these circumstances, the auditor should consider whether the assessment of the risk of material misstatement due to fraud calls for an overall response, one that is specific to a particular account balance, class of transactions, or disclosures at the relevant assertion level, or both. However, since such risk factors do not necessarily indicate the existence of fraud, the results of the assessment of the risk of material misstatement due to fraud provide only a broad initial indication about whether a material misstatement due to fraud may exist. Accordingly, the auditor should consider the results of the assessment of the risk of material misstatement due to fraud performed during planning along with other information gathered in identifying the risks of material misstatements.

**.13** When relevant to the audit, the auditor also should consider other information such as that obtained from the auditor's client acceptance or continuance process or, where practicable, experience gained on other engagements performed for the entity, for example, engagements to review interim financial information.

---

<sup>3</sup> Risk of material misstatement is described as the auditor's combined assessment of inherent risk and control risk. See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for the definition of and further discussion about risk of material misstatement.

## Discussion Among the Audit Team

**.14** The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity's financial statements to material misstatements. This discussion could be held concurrently with the discussion among the audit team that is specified by section 316 to discuss the susceptibility of the entity's financial statements to fraud. When the entire engagement is performed by a single auditor, the auditor should consider and document the susceptibility of the entity's financial statements to material misstatements. In these circumstances, the auditor should consider other factors that may be necessary in the engagement, such as personnel possessing specialized skills.

**.15** Professional judgment should be used to determine which members of the audit team should be included in the discussion, how and when it should occur, and the extent of the discussion. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion; however, it is not necessary for all team members to have a comprehensive knowledge of all aspects of the audit. The extent of the discussion is influenced by the roles, experience, and information needs of the audit team members. An additional consideration is whether to include specialists assigned to the audit team. For example, the auditor may determine that a professional possessing information technology (IT)<sup>4</sup> or other specialized skills is needed on the audit team and therefore include that individual in the discussion.

**.16** The auditor with final responsibility should consider which matters are to be communicated to members of the engagement not involved in the discussion. In a multilocation audit, for example, there may be multiple discussions that involve the key members of the audit team in each significant location.

**.17** The objective of this discussion<sup>5</sup> is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

**.18** The discussion provides an opportunity for more experienced team members, including the auditor with final responsibility for the audit, to share their insights based on their knowledge of the entity and for the team members to exchange information about the business risks<sup>6</sup> to which the entity is subject and about how and where the financial statements might be susceptible to material misstatement. As specified in section 316, particular emphasis should be given to the susceptibility of the entity's financial statements to material misstatement due to fraud. In addition, the audit team should discuss critical issues, such as areas of significant audit risk; areas susceptible to management override of controls; unusual accounting procedures used by the client; important control systems; materiality at the financial statement level and at the account level; and how materiality will be used to determine the extent of

---

<sup>4</sup> Information technology (IT) encompasses automated means of originating, processing, storing, and communicating information, and includes recording devices, communication systems, computer systems (including hardware and software components and data), and other electronic devices. An entity's use of IT may be extensive; however, the auditor is primarily interested in the entity's use of IT to initiate, authorize, record, process, and report transactions or other financial data.

<sup>5</sup> There may be one or more discussions, depending on the circumstances of the engagement.

<sup>6</sup> See paragraphs .29 through .33.

testing. The discussion should also address application of generally accepted accounting principles to the entity's facts and circumstances and in light of the entity's accounting policies.

**.19** The auditor should plan and perform the audit with an attitude of professional skepticism. The discussion among the audit team members should emphasize the need to exercise professional skepticism throughout the engagement, to be alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred, and to be rigorous in following up on such indications.

**.20** Depending on the circumstances of the audit, there may be multiple discussions in order to facilitate the ongoing exchange of information between audit team members regarding the susceptibility of the entity's financial statements to material misstatements. The purpose is for audit team members to communicate and share information obtained throughout the audit that may affect the assessment of the risks of material misstatement due to fraud or error or the audit procedures performed to address the risks.

## Understanding the Entity and Its Environment, Including Its Internal Control

**.21** The auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- a. Industry, regulatory, and other external factors
- b. Nature of the entity
- c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- d. Measurement and review of the entity's financial performance
- e. Internal control, which includes the selection and application of accounting policies

**.22** Appendix A [paragraph .125] contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment relating to categories (a) through (d) above. Appendix B [paragraph .126] contains a detailed explanation of the internal control components.

**.23** The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor's experience with it. In addition, identifying significant changes in any of the above aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

## Industry, Regulatory, and Other External Factors

**.24** The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.<sup>7</sup>

---

<sup>7</sup> See section 317, *Illegal Acts by Clients*, for additional requirements related to the legal and regulatory framework applicable to the entity and the industry.

**.25** The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long-term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements. Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.

## Nature of the Entity

**.26** The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity's operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

**.27** The entity may have a complex structure with subsidiaries or other components in multiple locations. In addition to the difficulties of consolidation in such cases, other issues with complex structures that may give rise to risks of material misstatement include the allocation of goodwill to subsidiaries, and its impairment; whether investments are joint ventures, subsidiaries, or investments accounted for using the equity method; and whether special-purpose entities are accounted for appropriately.

**.28** An understanding of the ownership, management, and other key personnel and their relations between owners and other people or entities is also important in determining whether related-party transactions have been identified and accounted for appropriately. Section 334, *Related Parties*, provides additional guidance on the auditor's considerations relevant to related parties.

## Objectives and Strategies and Related Business Risks

**.29** The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic and the entity's strategies and objectives change over time.

**.30** Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. For example, a new entrant to the marketplace with the competitive advantage of brand recognition and economies of scale may represent a business risk to a manufacturer's ability to garner as much shelf space at retailers and compete on price. The potential risk of material misstatement of the financial statements related to such business

risk might be obsolescence or overproduction of inventory that could only be sold at discounted amounts. Business risk particularly may arise from change or complexity, although a failure to recognize the need for change may also give rise to risk. Change may arise, for example, from the development of new products that may fail; from an inadequate market, even if successfully developed; or from flaws that may result in liabilities and reputation risk. As an example of complexity, the conduct and management of long-term engineering projects (such as ship construction or the building of a suspension bridge) give rise to risks in the areas of percentage of completion, pricing, costing, design, and performance control. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks.

**.31** Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement. A business risk may have an immediate consequence for the risk of misstatement for classes of transactions, account balances, or disclosures at the relevant assertion level or for the financial statements taken as a whole. For example, the business risk arising from a contracting customer base due to industry consolidation may increase the risk of misstatement associated with the valuation of accounts receivable. Similarly, a business risk may have an immediate consequence for the risk of misstatement of the financial statements taken as a whole. For example, the business risk of significant transactions with related parties may increase the risk of misstatement of a range of significant account balances and relevant assertions. Furthermore, a business objective and related risks may also have a longer-term consequence that the auditor may need to consider when assessing the appropriateness of the going concern assumption. For example, the business risk of a decline in the industry in which the entity operates may affect the entity's ability to continue as a going concern. The auditor's consideration of whether a business risk may result in material misstatement is, therefore, made in light of the entity's circumstances. Examples of conditions and events that may indicate risks of material misstatement are given in Appendix C [paragraph .127].

**.32** Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .76 to .80.

**.33** Smaller entities often do not set their objectives and strategies, or manage the related business risks, through formal plans or processes. In many cases there may be no documentation of such matters. In such entities, the auditor's understanding may be obtained through inquiries of management and observation of how the entity responds to such matters.

## Measurement and Review of the Entity's Financial Performance

**.34** The auditor should obtain an understanding of the measurement and review of the entity's financial performance. Performance measures and their review indicate to the auditor aspects of the entity's performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity's performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

**.35** Management's measurement and review of the entity's financial performance is to be distinguished from the monitoring of controls (discussed as a component of internal control in paragraphs .97 through .101), although their purposes may overlap. Monitoring of controls, however, is specifically concerned with the effective operation of internal control through consideration of information about the controls. The measurement and review of performance is directed at whether business performance is meeting the objectives set by management (or third parties), but it may be that performance indicators also provide information that enables management to identify deficiencies in internal control.

**.36** Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity's performance with that of competitors. External parties may also measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may provide information useful to the auditor's understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from Web sites.

**.37** Internal measures may highlight unexpected results or trends requiring management's inquiry of others in order to determine their cause and take corrective action (including, in some cases, the detection and correction of misstatements on a timely basis). Performance measures may also indicate to the auditor a risk of misstatement of related financial statement information. For example, performance measures may indicate that the entity has unusually rapid growth or profitability when compared to that of other entities in the same industry. Such information, particularly if combined with other factors such as performance-based bonus or incentive remuneration, may indicate the potential risk of management bias in the preparation of the financial statements.

**.38** Much of the information used in performance measurement may be produced by the entity's information system. If management assumes that data used for reviewing the entity's performance is accurate without having a basis for that assumption, errors may exist in the information, potentially leading management to incorrect conclusions about performance. When the auditor intends to make use of the performance measures for the purpose of the audit (for example, for analytical procedures), the auditor should consider whether the information related to management's review of the entity's performance provides a reliable basis and is sufficiently precise for such a purpose. If making use of performance measures, the auditor should consider whether they are precise enough to detect material misstatements.

**.39** Smaller entities ordinarily do not have formal processes to measure and review the entity's financial performance. Management nevertheless often relies on certain key indicators that knowledge and experience of the business suggest are reliable bases for evaluating financial performance and taking appropriate action.

## Internal Control<sup>8</sup>

**.40** The auditor should obtain an understanding of the five components of internal control sufficient to assess the risk of material misstatement of the

---

<sup>8</sup> This section recognizes the definition and description of internal control contained in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO Report).

financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. The auditor should use such knowledge to:

- Identify types of potential misstatements.
- Consider factors that affect the risks of material misstatement.
- Design tests of controls, when applicable, and substantive procedures.

**.41** Internal control<sup>9</sup> is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.<sup>10</sup> Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. Internal control consists of five interrelated components:

- a. *Control environment* sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.
- b. Entity's *risk assessment* is the entity's identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.
- c. *Information and communication systems* support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.
- d. *Control activities* are the policies and procedures that help ensure that management directives are carried out.
- e. *Monitoring* is a process that assesses the quality of internal control performance over time.

Appendix B [paragraph .126] contains a detailed discussion of the internal control components.

**.42** The division of internal control into the five components provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit. The division does not necessarily reflect how an entity considers and implements internal control. Also, the auditor's primary consideration is whether, and how, a specific control prevents, or detects and corrects, material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Accordingly, auditors may use different terminology or frameworks to describe the various aspects of internal control, and their effect on the audit, than those used in this section, provided all the components described in this section are addressed.

**.43** The way in which internal control is designed and implemented varies with an entity's size and complexity. Specifically, smaller entities may use less formal means and simpler processes and procedures to achieve their objectives.

---

<sup>9</sup> Internal control also may be referred to as internal control structure.

<sup>10</sup> It follows that internal control is designed and effected to address business risks that threaten the achievement of any of these objectives.

For example, smaller entities with active management involvement in the financial reporting process may not have extensive descriptions of accounting procedures or detailed written policies. For some entities, in particular very small entities, the owner-manager<sup>11</sup> may perform functions that in a larger entity would be regarded as belonging to several of the components of internal control. Therefore, the components of internal control may not be clearly distinguished within smaller entities, but their underlying purposes are equally valid.

.44 The auditor should obtain an understanding of the entity's selection and application of accounting policies and should consider whether they are appropriate for its business and consistent with generally accepted accounting principles and accounting policies used in the relevant industry,<sup>12</sup> or with a comprehensive basis of accounting other than generally accepted accounting principles.<sup>13</sup> The understanding encompasses the methods the entity uses to account for significant and unusual transactions; the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus; and changes in the entity's accounting policies. The auditor should also identify financial reporting standards and regulations that are new to the entity and consider when and how the entity will adopt such requirements. Where the entity has changed its selection of or method of applying a significant accounting policy, the auditor should consider the reasons for the change and whether it is appropriate and consistent with generally accepted accounting principles.

.45 The presentation of financial statements in conformity with generally accepted accounting principles should include adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their appended notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth. The auditor should consider whether the entity has disclosed a particular matter appropriately in light of the circumstances and facts of which the auditor is aware at the time.

.46 For the purposes of this section, the term *internal control* encompasses all five components of internal control stated above. In addition, the term *controls* refers to one or more of the components, or any aspect thereof.

### **Controls Relevant to Reliable Financial Reporting and to the Audit**

.47 There is a direct relationship between an entity's objectives and the internal control components it implements to provide reasonable assurance about their achievement. In addition, internal control is relevant to the entire entity, or to any of its operating units or business functions. This relationship is depicted as follows:

Although the entity's objectives, and therefore controls, relate to financial reporting, operations, and compliance, as referred to in paragraph .41, not all of these objectives and controls are relevant to the audit. Further, although internal control applies to the entire entity, or to any of its operating units or business functions, an understanding of internal control relating to each of the

---

<sup>11</sup> This section uses the term *owner-manager* to indicate proprietors of entities who are involved in the running of the entity on a day-to-day basis.

<sup>12</sup> See section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*.

<sup>13</sup> The term *comprehensive basis of accounting other than generally accepted accounting principles* is defined in section 623, *Special Reports*. Hereafter, reference to generally accepted accounting principles in this section includes, where applicable, an other comprehensive basis of accounting.

entity's operating units and business functions may not be necessary to the performance of the audit.

**.48** Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles, including the management of risk that may give rise to a risk of material misstatement in those financial statements. However, it is not necessary to assess all controls in connection with assessing the risks of material misstatement and designing and performing further audit procedures in response to assessed risks. It is a matter of the auditor's professional judgment, as to the controls or combination of controls that should be assessed. However, as stated in paragraph .115, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. In exercising that judgment, the auditor should consider the circumstances, the applicable component, and factors such as the following:

- Materiality.
- The size of the entity.
- The nature of the entity's business, including its organization and ownership characteristics.
- The diversity and complexity of the entity's operations.
- Applicable legal and regulatory requirements.
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations.

**.49** Controls over the completeness and accuracy of information produced by the entity may also be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures. The auditor's previous experience with the entity and information obtained in understanding the entity and its environment and throughout the audit assist the auditor in identifying controls relevant to the audit.

**.50** Controls relating to operations and compliance<sup>14</sup> objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

**.51** An entity generally has controls relating to objectives that are not relevant to an audit and therefore need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as a manufacturing plant's computerized production scheduling system), but these controls ordinarily would not be relevant to the audit.

**.52** Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting

---

<sup>14</sup> An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*.

and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.53 Controls relevant to the audit may exist in any of the components of internal control and a further discussion of controls relevant to the audit is included under the heading of each internal control component below (see paragraphs .67 through .101). In addition, paragraphs .115 and .117 discuss certain risks for which the auditor should evaluate the design of the entity's controls over such risks and determine whether they have been implemented.

### ***Depth of Understanding of Internal Control***

.54 Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Further explanation is contained in the discussion of each internal control component below (see paragraphs .67 through .101). Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. An improperly designed control may represent a material weakness<sup>15</sup> in the entity's internal control and the auditor should consider whether to communicate this to those charged with governance and management.

.55 As stated in paragraph .06, the auditor should perform risk assessment procedures to obtain an understanding of internal control. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

.56 Obtaining an understanding of an entity's controls is not sufficient to serve as testing the operating effectiveness of controls, unless there is some automation<sup>16</sup> that provides for the consistent application of the operation of the control (manual and automated elements of internal control relevant to the audit are further described below). For example, obtaining audit evidence about the implementation of a manually operated control at a point in time does not provide audit evidence about the operating effectiveness of the control at other times during the period under audit. However, IT enables an entity to process large volumes of data consistently and enhances the entity's ability to monitor the performance of control activities and to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems. Therefore, because generally, IT processing is inherently consistent, performing audit procedures to determine whether an automated control has

---

<sup>15</sup> A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected.

<sup>16</sup> This is assuming effective IT general controls.

been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of IT general controls, including computer security and program change control. Tests of the operating effectiveness of controls are further described in section 318.

### ***Characteristics of Manual and Automated Elements of Internal Control Relevant to the Auditor's Risk Assessment***

**.57 *Effect of information technology on internal control.*** An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives, and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

**.58** The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported.<sup>17</sup> In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, and reconciliations and follow-up of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions, or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

**.59** Generally, IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to:

- Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data.
- Enhance the timeliness, availability, and accuracy of information.
- Facilitate the additional analysis of information.
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures.
- Reduce the risk that controls will be circumvented.

---

<sup>17</sup> Paragraph B9 of Appendix B [paragraph .126] defines *initiation*, *authorizing*, *recording*, *processing*, and *reporting* as used throughout this section.

- Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.
- .60 IT also poses specific risks to an entity's internal control, including:
  - Reliance on systems or programs that are processing data inaccurately, processing inaccurate data, or both.
  - Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions.
  - Unauthorized changes to data in master files.
  - Unauthorized changes to systems or programs.
  - Failure to make necessary changes to systems or programs.
  - Inappropriate manual intervention.
  - Potential loss of data or inability to access data as required.

.61 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.62 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions.
- Circumstances where misstatements are difficult to define, anticipate, or predict.
- In changing circumstances that require a control response outside the scope of an existing automated control.
- In monitoring the effectiveness of automated controls.

.63 Manual controls are performed by people, and therefore pose specific risks to the entity's internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot therefore be assumed. Manual systems may be less suitable for the following:

- High volume or recurring transactions, or in situations where errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated.
- Control activities where the specific ways to perform the control can be adequately designed and automated.

### ***Limitations of Internal Control***

.64 Internal control, no matter how well designed and operated, can provide an entity with reasonable, but not absolute, assurance about achieving an

entity's objectives. The likelihood of achievement is affected by limitations inherent to internal control. These include the realities that human judgment in decision making can be faulty and that breakdowns in internal control can occur because of human failures such as simple errors or mistakes. For example, if an entity's information system personnel do not sufficiently understand how an order entry system processes sales transactions, they may design changes to the system that will erroneously process sales for a new line of products. On the other hand, such changes may be correctly designed but misunderstood by individuals who translate the design into program code. Errors also may occur in the use of information produced by IT. For example, automated controls may be designed to report transactions over a specified amount for management review, but individuals responsible for conducting the review may not understand the purpose of such reports and, accordingly, may fail to review them or investigate unusual items.

**.65** Additionally, controls, whether manual or automated, can be circumvented by the collusion of two or more people or inappropriate management override of internal control. For example, management may enter into undisclosed agreements with customers that alter the terms and conditions of the entity's standard sales contracts, which may result in improper revenue recognition. Also, edit checks in a software program that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

**.66** Smaller entities often have fewer employees, which may limit the extent to which segregation of duties is practicable. However, for key areas, even in a very small entity, it can be practicable to implement some degree of segregation of duties or other form of unsophisticated but effective controls. The potential for override of controls by the owner-manager depends to a great extent on the control environment and, in particular, the owner-manager's attitudes about the importance of internal control.

### **Internal Control Components**

**.67 Control environment.** The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

**.68** The primary responsibility for the prevention and detection of fraud and error rests with those charged with governance and the management of the entity. In obtaining an understanding of the control environment, the auditor should consider the design and implementation of entity programs and controls to address the risk of fraud as discussed in section 316. The absence or inadequacy of such programs and controls may constitute a significant deficiency or a material weakness. An example of such programs is a "hotline process" for employees to report on a confidential basis any known or suspected fraudulent activity.

**.69** In evaluating the design of the entity's control environment, the auditor should consider the following elements and how they have been incorporated into the entity's processes:

- a. *Communication and enforcement of integrity and ethical values.* Essential elements that influence the effectiveness of the design, administration, and monitoring of controls.
- b. *Commitment to competence.* Management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

- c. *Participation of those charged with governance.* Independence from management, the experience and stature of its members, the extent of its involvement and scrutiny of activities, the information it receives, the degree to which difficult questions are raised and pursued with management, and its interaction with internal and external auditors.
- d. *Management's philosophy and operating style.* Management's approach to taking and managing business risks, and management's attitudes and actions toward financial reporting, information processing and accounting functions, and personnel.
- e. *Organizational structure.* The framework within which an entity's activities for achieving its objectives are planned, executed, controlled, and reviewed.
- f. *Assignment of authority and responsibility.* How authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established.
- g. *Human resource policies and practices.* Recruitment, orientation, training, evaluating, counseling, promoting, compensating, and remedial actions.

For example, management's response to internal control deficiencies communicated in prior periods may relate to one or more of the aforementioned elements, such as commitment to competence or management's philosophy and operating style.

**.70** The auditor should obtain sufficient knowledge of the control environment to understand the attitudes, awareness, and actions of those charged with governance concerning the entity's internal control and its importance in achieving reliable financial reporting. In understanding the control environment, the auditor should concentrate on the implementation of controls because controls may be established but not acted upon.

**.71** The responsibilities of those charged with governance are of considerable importance. This is recognized in codes of practice and other regulations or guidance produced for the benefit of those charged with governance. The basis for management remuneration, especially executive performance-related compensation, places stress on management arising from the conflicting demands of fair reporting and the perceived benefits to shareholders of improved results. It is one, but not the only, role of those charged with governance to counterbalance such pressures. In understanding the control environment, the auditor should consider such matters as the independence of the directors and their ability to evaluate the actions of management. The auditor also should consider whether there is a group of those charged with governance that understands the entity's business transactions and evaluates whether the financial statements are presented fairly in conformity with generally accepted accounting principles.

**.72** In understanding the control environment elements, the auditor should consider whether they have been implemented. The auditor should obtain sufficient appropriate audit evidence through a combination of inquiries and other risk assessment procedures, for example, corroborating inquiries through observation or inspection of documents. For example, through inquiries of management and employees, the auditor may obtain an understanding of how management communicates to employees its views on business practices and ethical behavior. The auditor should determine whether controls have been implemented by considering, for example, whether management has established a formal code of conduct and whether it acts in a manner that supports or condones violations of or authorizes exceptions to the code.

**.73** Audit evidence for elements of the control environment may not be available in documentary form, in particular for smaller entities where communication between management and other personnel may be informal, yet effective. For example, management's commitment to ethical values and competence are often implemented through the behavior and attitude they demonstrate in managing the entity's business instead of in a written code of conduct. Consequently, management's attitudes, awareness, and actions are of particular importance in the design of a smaller entity's control environment. In addition, the role of those charged with governance is often undertaken by the owner-manager where there are no other owners.

**.74** When obtaining an understanding of the control environment, the auditor also should consider the collective effect on the control environment of strengths and weaknesses in various control environment elements. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties in a small business, or an active and independent board of directors may influence the philosophy and operating style of senior management in larger entities. Alternatively, management's failure to commit sufficient resources to address security risks presented by IT may adversely affect internal control by allowing improper changes to be made to computer programs or to data, or by allowing unauthorized transactions to be processed. Similarly, human resource policies and practices directed toward hiring competent financial, accounting, and IT personnel may not mitigate a strong bias by top management to overstate earnings.

**.75** The existence of a satisfactory control environment is a positive factor when the auditor assesses the risks of material misstatement of the financial statements. Although an effective control environment is not an absolute deterrent to fraud because of the limitations of internal control, it may help reduce the risks of fraud. Because of the pervasive effect of the control environment on assessing the risks of material misstatement, the auditor's preliminary judgment about its effectiveness often influences the nature, timing, and extent of the further audit procedures to be performed. For example, weaknesses in the control environment may lead the auditor to perform more substantive procedures as of the date of the balance sheet rather than at an interim date, modify the nature of the tests of controls or substantive procedures to obtain more persuasive evidence, or increase the number of locations to be included in the scope of the audit. Conversely, an effective control environment may allow the auditor to have some degree of increased confidence in internal control and the reliability of evidence generated internally within the entity and thus, for example, allow the auditor to perform tests of controls and substantive procedures at an interim date rather than at the balance sheet date. However, the control environment ordinarily is not specific enough to prevent or detect material misstatements in account balances, classes of transactions, or disclosures and related assertions. The auditor, therefore, should consider the effect of other components of internal control in conjunction with the control environment when assessing the risks of material misstatement, for example, the monitoring of controls and the operation of specific control activities.

**.76** *The entity's risk assessment process.* An entity's risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates

recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

**.77** Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements.<sup>18</sup> Risks can arise or change due to circumstances such as the following:

- Changes in operating environment
- New personnel
- New or revamped information systems
- Rapid growth
- New technology
- New business models, products, or activities
- Corporate restructurings
- Expanded foreign operations
- New accounting pronouncements

**.78** The auditor should obtain sufficient knowledge of the entity's risk assessment process to understand how management considers risks relevant to financial reporting objectives and decides about actions to address those risks. In evaluating the design and implementation of the entity's risk assessment process, the auditor should consider how management identifies business risks relevant to financial reporting, estimates the significance of the risks, assesses the likelihood of their occurrence, and decides upon actions to manage them. An entity's risk assessment process for financial reporting that encompasses the elements of internal control herein might be part of an entity's risk management framework. As such, auditors should focus on aspects of the framework that affect risks of material misstatements in financial reporting. If the entity's risk assessment process is appropriate to the circumstances, it assists the auditor in identifying risks of material misstatement.

**.79** The auditor should inquire about business risks that management has identified and should consider whether they may result in material misstatement of the financial statements. An entity's risk assessment process differs from the auditor's consideration of audit risk in a financial statement audit. The purpose of an entity's risk assessment process is to identify, analyze, and manage risks that affect the entity's objectives. In a financial statement audit, the auditor assesses risks to evaluate the likelihood that material misstatements could occur in the financial statements. Not all of the entity's risks are necessarily audit risks. However, the entity's risk assessment process may affect the auditor's consideration of audit risk. During the audit, the auditor may identify business risks or risks of material misstatement in the financial statements that management failed to identify. In such cases, the auditor should consider why the entity's risk assessment process failed to identify those risks and whether the process is appropriate to its circumstances.

**.80** In a smaller entity, management may not have a formal risk assessment process as described in paragraph .76. For such entities, the auditor should discuss with management how risks to the business are identified by management and how they are addressed.

---

<sup>18</sup> These assertions are discussed in section 326, *Audit Evidence*.

**.81 Information system, including the related business processes relevant to financial reporting, and communication.** The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial reports.

**.82** Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

**.83** The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand:

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures, within both automated and manual systems, by which those transactions are initiated, authorized, recorded, processed, and reported in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions.
- How the information system captures events and conditions, other than classes of transactions, that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

**.84** When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

**.85** The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it is used by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

**.86** In obtaining an understanding of the financial reporting process (including the closing process), the auditor should obtain an understanding of the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include those used to:

- *Enter transaction totals into the general ledger (or equivalent record).* In some information systems, IT may be used to transfer such information automatically from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts

being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to transfer information automatically there may be little or no visible evidence of such intervention in the information systems.

- *Initiate, authorize, record, and process journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements, or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more easily identified through the use of computer-assisted audit techniques.
- *Initiate and record recurring and nonrecurring adjustments to the financial statements.* These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.
- *Combine and consolidate general ledger data.* This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).
- *Prepare financial statements and disclosures.* These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

**.87** The auditor should obtain an understanding of the entity's information system relevant to financial reporting in a manner that is appropriate to the entity's circumstances. This includes obtaining an understanding of how transactions originate within the entity's business processes. An entity's business processes are the activities designed to develop, purchase, produce, sell, and distribute an entity's products and services; ensure compliance with laws and regulations; and record information, including accounting and financial reporting information.

**.88** The auditor should obtain sufficient knowledge of the communication component to understand how the entity communicates financial reporting roles and responsibilities and significant matters relating to financial reporting. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting and may take such forms as policy manuals and financial reporting manuals. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. The auditor's understanding of communication pertaining to financial reporting

matters also includes communications between management and those charged with governance, particularly the audit committee, as well as external communications, such as those with regulatory authorities.

**.89 Control activities.** The auditor should obtain an understanding of those control activities relevant to the audit. Control activities are the policies and procedures that help ensure that management directives are carried out; for example, that necessary actions are taken to address risks that threaten the achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels. Examples of specific control activities include the following:

- *Authorization.* Control activities related to the initiation of derivatives and other off-balance sheet transactions may be relevant to the auditor's design of audit procedures related to the completeness assertion.
- *Segregation of duties.* Whether the personnel responsible for recording estimates for uncollectible accounts receivables are independent of personnel authorizing sales transactions may be relevant to the auditor's design of audit procedures related to the valuation assertion.
- *Safeguarding.* Control activities related to whether inventory is securely stored and the movement and access to inventory is limited to authorized individuals may be relevant to the auditor's design of audit procedures related to the existence assertion, in particular, the auditor's consideration as to the number of locations to visit.
- *Asset accountability.* Control activities related to reconciliations of the detailed records to the general ledger are ordinarily necessary to design and perform audit procedures for material classes of transactions and account balances.

**.90** The auditor should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. The auditor should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts. Also, control activities are relevant to the audit if the auditor is required to evaluate them as discussed in paragraphs .115 through .117.

**.91** In obtaining an understanding of control activities, the auditor's primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents, or detects and corrects, material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. The auditor's emphasis is on identifying and obtaining an understanding of control activities that address the areas where the auditor considers that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to such objective.

**.92** The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

**.93** Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer-produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

**.94** General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. While ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over "systems development" may not be relevant to the financial statements being audited.

**.95** The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

**.96** The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

**.97 *Monitoring of controls.*** The auditor should obtain an understanding of the major types of activities that the entity uses to monitor internal control over financial reporting, including the sources of the information related to those activities, and how those activities are used to initiate corrective actions to its controls.

**.98** An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes whether they are operating as intended and that they are modified as

appropriate for changes in conditions. Monitoring of controls may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and legal department's oversight of compliance with the entity's ethical or business practice policies.

**.99** Monitoring of controls is a process to assess the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. Monitoring is done to ensure that controls continue to operate effectively. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them. Management accomplishes monitoring of controls through ongoing activities, separate evaluations, or a combination of the two. In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's activities. When obtaining an understanding of the internal audit function, the auditor should follow the guidance in paragraphs .04 through .08 of section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*. Management's monitoring activities may include using information from communications from external parties such as customer complaints and regulator comments that may indicate problems or highlight areas in need of improvement.

**.100** In many entities, much of the information used in monitoring may be produced by the entity's information system. If management assumes that data used for monitoring is accurate without having a basis for that assumption, errors may exist in the information, potentially leading management to incorrect conclusions from its monitoring activities. The auditor should obtain an understanding of the sources of the information related to the entity's monitoring activities, and the basis upon which management considers the information to be sufficiently reliable for the purpose.

**.101** The auditor's understanding of management's monitoring of controls may assist the auditor in identifying the existence of more detailed controls or other activities that the auditor may consider in making risk assessments.

## Assessing the Risks of Material Misstatement

**.102** The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should:

- Identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- Relate the identified risks to what can go wrong at the relevant assertion level.
- Consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- Consider the likelihood that the risks could result in a material misstatement of the financial statements.

**.103** The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the

design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in section 318.

**.104** The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. The latter risks (risks at the financial statement level) may derive in particular from a weak control environment.

**.105** The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

**.106** In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

**.107** Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

**.108** Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

**.109** In assessing risks, deficiencies in an entity's internal control may come to the auditor's attention that are significant enough that they are, in the auditor's judgment, significant deficiencies that should be communicated to those charged with governance as required by section 325, *Communication of Internal Control Related Matters Noted in an Audit*. Furthermore, the auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an

audit cannot be conducted. Also, concerns about the condition and reliability of an entity's records may cause the auditor to conclude that it is unlikely that sufficient appropriate audit evidence will be available to support an unqualified opinion on the financial statements. In such circumstances, the auditor should consider a qualification or disclaimer of opinion, but in some cases the auditor's only recourse may be to withdraw from the engagement.

## Significant Risks That Require Special Audit Consideration

**.110** As part of the risk assessment described in paragraph .102, the auditor should determine which of the risks identified are, in the auditor's judgment, risks that require special audit consideration (such risks are defined as "significant risks"). Paragraphs .45 and .53 of section 318 describe the consequences for further audit procedures of identifying a risk as significant.

**.111** The determination of significant risks, which arise on most audits, is a matter for the auditor's professional judgment. In exercising this judgment, the auditor should consider inherent risk<sup>19</sup> to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. Routine, noncomplex transactions that are subject to systematic processing are less likely to give rise to significant risks because they have lower inherent risks. On the other hand, significant risks are often derived from business risks that may result in a material misstatement. In considering the nature of the risks, the auditor should consider a number of matters, including the following:

- Whether the risk is a risk of fraud
- Whether the risk is related to recent significant economic, accounting, or other developments and, therefore, requires specific attention
- The complexity of transactions
- Whether the risk involves significant transactions with related parties
- The degree of subjectivity in the measurement of financial information related to the risks, especially those involving a wide range of measurement uncertainty
- Whether the risk involves significant nonroutine transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual

**.112** Significant risks often relate to significant nonroutine transactions and judgmental matters. Nonroutine transactions are transactions that are unusual, either due to size or nature, and that therefore occur infrequently. Judgmental matters may include the development of accounting estimates for which there is significant measurement uncertainty.

**.113** Risks of material misstatement may be greater for risks relating to significant nonroutine transactions arising from matters such as the following:

- Greater management intervention to specify the accounting treatment
- Greater manual intervention for data collection and processing
- Complex calculations or accounting principles

---

<sup>19</sup> The auditor does this before considering the effect of identified controls related to the risk.

- The nature of nonroutine transactions, which may make it difficult for the entity to implement effective controls over the risks
- Significant related-party transactions

**.114** Risks of material misstatement may be greater for risks relating to significant judgmental matters that require the development of accounting estimates arising from matters such as the following:

- Accounting principles for accounting estimates or revenue recognition may be subject to differing interpretation.
- Required judgment may be subjective or complex, or may require assumptions about the effects of future events, for example, judgment about fair value.

**.115** For significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. An understanding of the entity's controls related to significant risks should provide the auditor with adequate information to develop an effective audit approach. Management ought to be aware of significant risks; however, risks relating to significant nonroutine or judgmental matters are often less likely to be subject to routine controls. Therefore, the auditor's understanding of whether the entity has designed and implemented controls for such significant risks includes whether and how management responds to the risks and whether control activities such as a review of assumptions by senior management or experts, formal processes for estimations, or approval by those charged with governance have been implemented to address the risks. For example, where there are nonrecurring events such as the receipt of notice of a significant lawsuit, consideration of the entity's response will include such matters as whether it has been referred to appropriate experts (such as internal or external legal counsel), whether an assessment has been made of the potential effect, and how it is proposed that the circumstances are to be disclosed in the financial statements.

**.116** If management has not appropriately responded by implementing controls over significant risks and if, as a result, the auditor judges that there is a significant deficiency or material weakness in the entity's internal control over financial reporting, the auditor should communicate this matter to those charged with governance. In these circumstances, the auditor also should consider the implications for the auditor's risk assessment.

### **Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence**

**.117** As part of the risk assessment described in paragraph .102, the auditor should evaluate the design and determine the implementation of the entity's controls, including relevant control activities, over those risks for which, in the auditor's judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph .24 of section 318.

**.118** The understanding of the entity's information system relevant to financial reporting enables the auditor to identify risks of material misstatement that relate directly to the recording of routine classes of transactions or account balances and the preparation of reliable financial statements; these include risks of inaccurate or incomplete processing. Ordinarily, such risks relate

to significant classes of transactions, such as an entity's revenue, purchases, and cash receipts or cash payments.

**.119** The characteristics of routine day-to-day business transactions often permit highly automated processing with little or no manual intervention. In such circumstances, it may not be possible to perform only substantive procedures in relation to the risk. For example, in circumstances where a significant amount of an entity's information is initiated, authorized, recorded, processed, or reported electronically, such as in an integrated system, the auditor may determine that it is not possible to design effective substantive procedures that by themselves would provide sufficient appropriate audit evidence that relevant classes of transactions or account balances are not materially misstated. In such cases, audit evidence may be available only in electronic form, and its appropriateness and sufficiency usually depend on the effectiveness of controls over its accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, authorized, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively.

**.120** Examples of situations in which the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence that certain relevant assertions are not materially misstated include the following:

- An entity that conducts its business using IT to initiate orders for the purchase and delivery of goods based on predetermined rules of what to order and in what quantities and to pay the related accounts payable based on system-generated decisions initiated upon the confirmed receipt of goods and terms of payment. No other documentation of orders placed or goods received is produced or maintained, other than through the IT system.
- An entity that provides services to customers via electronic media (for example, an Internet service provider or a telecommunications company) and uses IT to create a log of the services provided to its customers, to initiate and process its billings for the services, and to automatically record such amounts in electronic accounting records that are part of the system used to produce the entity's financial statements.

## Revision of Risk Assessment

**.121** The auditor's assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor's risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs .70 and .74 of section 318 for further guidance.

## Documentation

**.122** The auditor should document:

- a. The discussion among the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, including how and when the discussion occurred, the subject matter discussed, the audit team members who participated, and significant decisions reached concerning planned responses at the financial statement and relevant assertion levels.
- b. Key elements of the understanding obtained regarding each of the aspects of the entity and its environment identified in paragraph .21, including each of the components of internal control identified in paragraph .41, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures.
- c. The assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level as required by paragraph .102 and the basis for the assessment.
- d. The risks identified and related controls evaluated as a result of the requirements in paragraphs .110 and .117.

**.123** The manner in which these matters are documented is for the auditor to determine using professional judgment. Section 339, *Audit Documentation*, provides general guidance regarding the purpose, content, and ownership and confidentiality of audit documentation. Examples of common techniques used alone or in combination include narrative descriptions, questionnaires, checklists, and flowcharts. Such techniques may also be useful in documenting the auditor's assessment of the risks of material misstatement at the overall financial statement and relevant assertions level. The form and extent of this documentation are influenced by the nature, size, and complexity of the entity and its environment, including its internal control, and the availability of information from the entity and the specific audit methodology and technology used in the course of the audit. For example, documentation of the understanding of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity and its environment, including its internal control, and the more extensive the audit procedures performed by the auditor, the more extensively the auditor should document his or her work. The specific audit methodology and technology used in the course of the audit will also affect the form and extent of documentation.

## Effective Date

**.124** This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

## Appendix A

### Understanding the Entity and Its Environment

**A1.** This Appendix provides additional guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity's financial performance. The examples provided cover a broad range of matters applicable to many engagements; however, not all matters are relevant to every engagement and the list of examples is not necessarily complete. Additional guidance on internal control is contained in Appendix B [paragraph .126].

### Industry, Regulatory, and Other External Factors

**A2.** Examples of matters an auditor may consider include the following:

- Industry conditions
  - The market and competition, including demand, capacity, and price competition
  - Cyclical or seasonal activity
  - Product technology relating to the entity's products
  - Supply availability and cost
- Regulatory environment
  - Accounting principles and industry-specific practices
  - Regulatory framework for a regulated industry
  - Legislation and regulation that significantly affect the entity's operations
    - Regulatory requirements
    - Direct supervisory activities
  - Taxation (corporate and other)
  - Government policies currently affecting the conduct of the entity's business
    - Monetary, including foreign exchange controls
    - Fiscal
    - Financial incentives (for example, government aid programs)
    - Tariffs and trade restrictions
  - Environmental requirements affecting the industry and the entity's business
- Other external factors currently affecting the entity's business
  - General level of economic activity (for example, recession, growth)
  - Interest rates and availability of financing
  - Inflation and currency revaluation

## Nature of the Entity

A3. Examples of matters an auditor may consider include the following:

- Business operations
  - Nature of revenue sources (for example, manufacturer; wholesaler; banking, insurance, or other financial services; import-export trading, utility, transportation, and technology products and services)
  - Products or services and markets (for example, major customers and contracts, terms of payment, profit margins, market share, competitors, exports, pricing policies, reputation of products, warranties, backlog, trends, marketing strategy and objectives, and manufacturing processes)
  - Conduct of operations (for example, stages and methods of production, subsidiaries or divisions, delivery of products and services, and details of declining or expanding operations)
  - Alliances, joint ventures, and outsourcing activities
  - Involvement in e-commerce, including Internet sales and marketing activities
  - Geographic dispersion and industry segmentation
  - Location of production facilities, warehouses, and offices
  - Key customers
  - Important suppliers of goods and services (for example, long-term contracts, stability of supply, terms of payment, imports, and methods of delivery, such as "just-in-time")
  - Employment (for example, by location, supply, wage levels, union contracts, pension and other postemployment benefits, stock option or incentive bonus arrangements, and government regulation related to employment matters)
  - Research and development activities and expenditures
  - Transactions with related parties
- Investments
  - Acquisitions, mergers, or disposals of business activities (planned or recently executed)
  - Investments and dispositions of securities and loans
  - Capital investment activities, including investments in plant and equipment and technology, and any recent or planned changes
  - Investments in nonconsolidated entities, including partnerships, joint ventures, and special-purpose entities
  - Life cycle stage of enterprise (start-up, growing, mature, declining)
- Financing
  - Group structure—major subsidiaries and associated entities, including consolidated and nonconsolidated structures
  - Debt structure, including covenants, restrictions, guarantees, and off-balance-sheet financing arrangements
  - Leasing of property, plant, or equipment for use in the business
  - Beneficial owners (local and foreign business reputation and experience)
  - Related parties

- Use of derivative financial instruments
- Financial reporting
  - Accounting principles and industry-specific practices
  - Revenue recognition practices
  - Accounting for fair values
  - Inventories (for example, locations and quantities)
  - Foreign currency assets, liabilities, and transactions
  - Industry-specific significant categories (for example, loans and investments for banks, accounts receivable and inventory for manufacturers, research and development for pharmaceuticals)
  - Accounting for unusual or complex transactions including those in controversial or emerging areas (for example, accounting for stock-based compensation)
  - Financial statement presentation and disclosure

## Objectives and Strategies and Related Business Risks

**A4.** Examples of matters an auditor may consider include the following:

- Existence of objectives (that is, how the entity addresses industry, regulatory, and other external factors) relating to, for example, the following:
  - Industry developments (a potential related business risk might be, for example, that the entity does not have the personnel or expertise to deal with the changes in the industry)
  - New products and services (a potential related business risk might be, for example, that there is increased product liability)
  - Expansion of the business (a potential related business risk might be, for example, that the demand has not been accurately estimated)
  - New accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation, or increased costs)
  - Regulatory requirements (a potential related business risk might be, for example, that there is increased legal exposure)
  - Current and prospective financing requirements (a potential related business risk might be, for example, the loss of financing due to the entity's inability to meet requirements)
  - Use of information technology (IT) (a potential related business risk might be, for example, that systems and processes are not compatible)
  - Risk appetite of managers and stakeholders
- Effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation)

## Measurement and Review of the Entity's Financial Performance

**A5.** Examples of matters an auditor may consider include:

- Key ratios and operating statistics
- Key performance indicators

- Employee performance measures and incentive compensation policies
- Trends
- Use of forecasts, budgets, and variance analysis
- Analyst reports and credit rating reports
- Competitor analysis
- Period-on-period financial performance (revenue growth, profitability, and leverage)

## Appendix B

### Internal Control Components

**B1.** As set forth in paragraph .41 and described in .67 through .101, internal control consists of the following components:

- a. Control environment
- b. Risk assessment
- c. Information and communication systems
- d. Control activities
- e. Monitoring

This Appendix further explains these components as they relate to the financial statement audit.

### Control Environment

**B2.** The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for effective internal control, providing discipline and structure.

**B3.** The control environment encompasses the following elements:

- a. *Communication and enforcement of integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical values are essential elements of the control environment that influence the effectiveness of the design, administration, and monitoring of other components of internal control. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. They include management's actions to remove or reduce incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. They also include the communication of entity values and behavioral standards to personnel through policy statements and codes of conduct and by example.
- b. *Commitment to competence.* Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
- c. *Participation of those charged with governance.* An entity's control consciousness is significantly influenced by those charged with governance. Attributes include those charged with governance's independence from management, the experience and stature of its members, the extent of its involvement and scrutiny of activities, the appropriateness of its actions, the information it receives, the degree to which difficult questions are raised and pursued with management, and its interaction with internal and external auditors. The importance of responsibilities of those charged with governance is recognized in codes

of practice and other regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle-blower procedures and of the process for reviewing the effectiveness of the entity's internal control.

- d. *Management's philosophy and operating style.* Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include the following: management's approach to taking and monitoring business risks; management's attitudes and actions toward financial reporting (conservative or aggressive selection from available alternative accounting principles, and conscientiousness and conservatism with which accounting estimates are developed); and management's attitudes toward information processing and accounting functions and personnel.
- e. *Organizational structure.* An entity's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed. Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. An entity develops an organizational structure suited to its needs. The appropriateness of an entity's organizational structure depends in part on its size and the nature of its activities.
- f. *Assignment of authority and responsibility.* This factor includes how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established. It also includes policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it includes policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.
- g. *Human resource policies and practices.* Human resource policies and practices relate to recruitment, orientation, training, evaluating, counseling, promoting, compensating, and remedial actions. For example, standards for recruiting the most qualified individuals—with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior—demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

### **Application to Small and Midsized Entities**

**B4.** Small and midsized entities may implement the control environment elements differently than larger entities. For example, smaller entities might not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Similarly, those charged with governance in smaller entities may not include independent or outside members.

## Entity's Risk Assessment Process

**B5.** An entity's risk assessment process is its process for identifying and responding to business risks and the results thereof. For financial reporting purposes, the entity's risk assessment process includes how management identifies risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to manage them. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

**B6.** Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks, or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to such circumstances as the following:

- *Changes in operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on or understanding of internal control.
- *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
- *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
- *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

### **Application to Small and Midsized Entities**

**B7.** The basic concepts of the entity's risk assessment process are relevant to every entity, regardless of size, but the risk assessment process is likely to be less formal and less structured in small and midsized entities than in larger ones. All

entities should have established financial reporting objectives, but they may be recognized implicitly rather than explicitly in smaller entities. Management may be able to learn about risks related to these objectives through direct personal involvement with employees and outside parties.

### **Information System, Including the Related Business Processes Relevant to Financial Reporting, and Communication**

**B8.** An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and information technology [IT]), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems rely extensively on IT.

**B9.** The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether IT or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transactions by the appropriate level of management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by IT or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity's financial performance and in other functions. The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

**B10.** Accordingly, an information system encompasses methods and records that:

- Identify and record all valid transactions.
- Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
- Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- Present properly the transactions and related disclosures in the financial statements.

**B11.** Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on.

**B12.** Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

### ***Application to Small and Midsized Entities***

**B13.** Information systems and related business processes relevant to financial reporting in small or midsized organizations are likely to be less formal than in larger organizations, but their role is just as significant. Smaller entities with active management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Communication may be less formal and easier to achieve in a small or midsized company than in a larger enterprise due to the smaller organization's size and fewer levels as well as management's greater visibility and availability.

### **Control Activities**

**B14.** Control activities are the policies and procedures that help ensure that management directives are carried out, for example, that necessary actions are taken to address risks that threaten the achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

**B15.** Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:

- *Performance reviews.* These control activities include reviewing and analyzing actual performance versus budgets, forecasts, and prior-period performance; relating different sets of data—operating or financial—to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information, and reviewing functional or activity performance, such as a bank's consumer loan manager's review of reports by branch, region, and loan type for loan approvals and collections.
- *Information processing.* A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end-user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.
- *Physical controls.* These activities encompass the physical security of assets, including adequate safeguards such as secured facilities to

limit access to assets and records; authorization for access to computer programs and data files; and periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security, and inventory counts with accounting records). The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when any inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.

- *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Examples of segregation of duties include reporting, reviewing and approving reconciliations, and approval and control of documents.

**B16.** Certain control activities may depend on the existence of appropriate higher-level policies established by management or those charged with governance. For example, authorization controls may be delegated under established guidelines, such as investment criteria set by those charged with governance; alternatively, nonroutine transactions such as major acquisitions or divestments may require specific high-level approval, including in some cases that of shareholders.

### ***Application to Small and Midsized Entities***

**B17.** The concepts underlying control activities in small or midsized organizations are likely to be similar to those in larger entities, but the formality with which they operate varies. Further, smaller entities may find that certain types of control activities are not relevant because of controls applied by management. For example, management's retention of authority for approving credit sales, significant purchases, and draw-downs on lines of credit can provide strong control over those activities, lessening or removing the need for more detailed control activities. An appropriate segregation of duties often appears to present difficulties in smaller organizations. Even companies that have only a few employees, however, may be able to assign responsibilities to achieve appropriate segregation or, if that is not possible, to use management oversight of the incompatible activities to achieve control objectives.

### **Monitoring of Controls**

**B18.** An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies.

**B19.** Monitoring of controls is a process to assess the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. Monitoring is done to ensure that controls continue to operate effectively. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them. Monitoring of controls is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two.

**B20.** Ongoing monitoring activities are built into the normal recurring activities of an entity and include regular management and supervisory activities. Managers of sales, purchasing, and production at divisional and corporate levels are in touch with operations and may question reports that differ significantly from their knowledge of operations.

**B21.** In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's controls through separate evaluations. They regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the design and operation of internal control. They communicate information about strengths and weaknesses and recommendations for improving internal control.

**B22.** Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

### ***Application to Small and Midsized Entities***

**B23.** Ongoing monitoring activities of small and midsized entities are more likely to be informal and are typically performed as a part of the overall management of the entity's operations. Management's close involvement in operations often will identify significant variances from expectations and inaccuracies in financial data.

## Appendix C

### Conditions and Events That May Indicate Risks of Material Misstatement

C1. The following are examples of conditions and events that may indicate the existence of risks of material misstatement. The examples provided cover a broad range of conditions and events; however, not all conditions and events are relevant to every audit engagement and the list of examples is not necessarily complete.

- Operations in regions that are economically unstable, for example, countries with significant currency devaluation or highly inflationary economies.
- Operations exposed to volatile markets, for example, futures trading.
- High degree of complex regulation.
- Going concern and liquidity issues, including loss of significant customers.
- Marginally achieving explicitly stated strategic objectives.
- Constraints on the availability of capital and credit.
- Changes in the industry in which the entity operates.
- Changes in the supply chain.
- Developing or offering new products or services, or moving into new lines of business.
- Expanding into new locations.
- Changes in the entity, such as large acquisitions, reorganizations, or other unusual events.
- Entities or divisions likely to be sold.
- Complex alliances and joint ventures.
- Use of off-balance-sheet finance, special-purpose entities, and other complex financing arrangements.
- Significant transactions with related parties.
- Lack of personnel with appropriate accounting and financial reporting skills.
- Changes in key personnel, including departure of key executives.
- Weaknesses in internal control, especially those not addressed by management.
- Inconsistencies between the entity's information technology (IT) strategy and its business strategies.
- Changes in the IT environment.
- Installation of significant new IT systems related to financial reporting.

- Inquiries into the entity's operations or financial results by regulatory or government bodies.
- Past misstatements, history of errors, or a significant amount of adjustments at period end.
- Significant amount of nonroutine or nonsystematic transactions, including intercompany transactions and large revenue transactions at period end.
- Transactions that are recorded based on management's intent, for example, debt refinancing, assets to be sold, and classification of marketable securities.
- Application of new accounting pronouncements.
- Complex processes related to accounting measurements.
- Events or transactions that result in significant measurement uncertainty, including accounting estimates.
- Pending litigation and contingent liabilities, for example, sales warranties, financial guarantees, and environmental remediation.

## AU Section 315

# Communications Between Predecessor and Successor Auditors

(Supersedes SAS No. 7)

Source: SAS No. 84; SAS No. 93.

Effective with respect to acceptance of an engagement after March 31, 1998, unless otherwise indicated.

### Introduction

.01 This section provides guidance on communications between predecessor and successor auditors when a change of auditors is in process or has taken place. It also provides communications guidance when possible misstatements are discovered in financial statements reported on by a predecessor auditor. This section applies whenever an independent auditor is considering accepting an engagement to audit or reaudit (see paragraph .14 of this section) financial statements in accordance with generally accepted auditing standards, and after such auditor has been appointed to perform such an engagement.

.02 For the purposes of this section, the term *predecessor auditor* refers to an auditor who (a) has reported on the most recent audited financial statements<sup>1</sup> or was engaged to perform but did not complete an audit of the financial statements<sup>2</sup> and (b) has resigned, declined to stand for reappointment, or been notified that his or her services have been, or may be, terminated. The term *successor auditor* refers to an auditor who is considering accepting an engagement to audit financial statements but has not communicated with the predecessor auditor as provided in paragraphs .07 through .10 and to an auditor who has accepted such an engagement. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

### Change of Auditors

.03 An auditor should not accept an engagement until the communications described in paragraphs .07 through .10 have been evaluated.<sup>3</sup> However, an auditor may make a proposal for an audit engagement before communicating with the predecessor auditor. The auditor may wish to advise the prospective

---

<sup>1</sup> The provisions of this section are not required if the most recent audited financial statements are more than two years prior to the beginning of the earliest period to be audited by the successor auditor.

<sup>2</sup> There may be two predecessor auditors: the auditor who reported on the most recent audited financial statements and the auditor who was engaged to perform but did not complete an audit of any subsequent financial statements. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

<sup>3</sup> When the most recent financial statements have been compiled or reviewed in accordance with the Statements on Standards for Accounting and Review Services, the accountant who reported on those financial statements is not a predecessor auditor. Although not required by this section, in these circumstances the successor auditor may find the matters described in paragraphs .08 and .09 useful in determining whether to accept the engagement.

client (for example, in a proposal) that acceptance cannot be final until the communications have been evaluated.

**.04** Other communications between the successor and predecessor auditors, described in paragraph .11, are advisable to assist in the planning of the engagement. However, the timing of these other communications is more flexible. The successor auditor may initiate these other communications either prior to acceptance of the engagement or subsequent thereto.

**.05** When more than one auditor is considering accepting an engagement, the predecessor auditor should not be expected to be available to respond to inquiries until a successor auditor has been selected by the prospective client and has accepted the engagement subject to the evaluation of the communications with the predecessor auditor as provided in paragraphs .07 through .10.

**.06** The initiative for communicating rests with the successor auditor. The communication may be either written or oral. Both the predecessor and successor auditors should hold in confidence information obtained from each other. This obligation applies whether or not the successor auditor accepts the engagement.

### Communications Before Successor Auditor Accepts Engagement

**.07** Inquiry of the predecessor auditor is a necessary procedure because the predecessor auditor may be able to provide information that will assist the successor auditor in determining whether to accept the engagement. The successor auditor should bear in mind that, among other things, the predecessor auditor and the client may have disagreed about accounting principles, auditing procedures, or similarly significant matters.

**.08** The successor auditor should request permission from the prospective client to make an inquiry of the predecessor auditor prior to final acceptance of the engagement. Except as permitted by the Rules of the Code of Professional Conduct, an auditor is precluded from disclosing confidential information obtained in the course of an engagement unless the client specifically consents. Thus, the successor auditor should ask the prospective client to authorize the predecessor auditor to respond fully to the successor auditor's inquiries. If a prospective client refuses to permit the predecessor auditor to respond or limits the response, the successor auditor should inquire as to the reasons and consider the implications of that refusal in deciding whether to accept the engagement.

**.09** The successor auditor should make specific and reasonable inquiries of the predecessor auditor regarding matters that will assist the successor auditor in determining whether to accept the engagement. Matters subject to inquiry should include—

- Information that might bear on the integrity of management.
- Disagreements with management as to accounting principles, auditing procedures, or other similarly significant matters.
- Communications to audit committees or others with equivalent authority and responsibility<sup>4</sup> regarding fraud and illegal acts by clients.

---

<sup>4</sup> For entities that do not have audit committees, the phrase "others with equivalent authority and responsibility" may include the board of directors, the board of trustees, or the owner in owner-managed entities.

- Communications to management and those charged with governance regarding significant deficiencies and material weaknesses in internal control.<sup>5</sup>
- The predecessor auditor's understanding as to the reasons for the change of auditors.

The successor auditor may wish to consider other reasonable inquiries. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

**.10** The predecessor auditor should respond promptly and fully, on the basis of known facts, to the successor auditor's reasonable inquiries. However, should the predecessor auditor decide, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor auditor should clearly state that the response is limited. If the successor auditor receives a limited response, its implications should be considered in deciding whether to accept the engagement.

## Other Communications

**.11** The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized.<sup>6</sup> It is customary in such circumstances for the predecessor auditor to make himself or herself available to the successor auditor and make available for review certain of the working papers. The predecessor auditor should determine which working papers are to be made available for review and which may be copied. The predecessor auditor should ordinarily permit the successor auditor to review working papers, including documentation of planning, internal control, audit results, and other matters of continuing accounting and auditing significance, such as the working paper analysis of balance sheet accounts, and those relating to contingencies. Also, the predecessor auditor should reach an understanding with the successor auditor as to the use of the working papers.<sup>7</sup> The extent, if any, to which a predecessor auditor permits access to the working papers is a matter of judgment.

## Successor Auditor's Use of Communications

**.12** The successor auditor must obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements he or she has been engaged to audit, including evaluating the consistency of the application of accounting principles. The audit evidence used in analyzing the impact of the opening balances on the current-year financial statements and consistency of accounting principles is a matter of professional judgment. Such audit evidence may include the most recent audited financial

---

<sup>5</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*; section 317, *Illegal Acts by Clients*; and section 325, *Communicating Internal Control Related Matters Identified in an Audit*. [Footnote revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

<sup>6</sup> Appendix A [paragraph .24] contains an illustrative client consent and acknowledgment letter.

<sup>7</sup> Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers. Appendix B [paragraph .25] contains an illustrative successor auditor acknowledgment letter.

statements, the predecessor auditor's report thereon,<sup>8</sup> the results of inquiry of the predecessor auditor, the results of the successor auditor's review of the predecessor auditor's working papers relating to the most recently completed audit, and audit procedures performed on the current period's transactions that may provide evidence about the opening balances or consistency. For example, evidence gathered during the current year's audit may provide information about the realizability and existence of receivables and inventory recorded at the beginning of the year. The successor auditor may also apply appropriate auditing procedures to account balances at the beginning of the period under audit and to transactions in prior periods. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.13** The successor auditor's review of the predecessor auditor's working papers may affect the nature, timing, and extent of the successor auditor's procedures with respect to the opening balances and consistency of accounting principles. However, the nature, timing, and extent of audit work performed and the conclusions reached in both these areas are solely the responsibility of the successor auditor. In reporting on the audit, the successor auditor should not make reference to the report or work of the predecessor auditor as the basis, in part, for the successor auditor's own opinion.

## Audits of Financial Statements That Have Been Previously Audited

**.14** If an auditor is asked to audit and report on financial statements that have been previously audited and reported on (henceforth referred to as a reaudit), the auditor considering acceptance of the reaudit engagement is also a successor auditor, and the auditor who previously reported is also a predecessor auditor. In addition to the communications described in paragraphs .07 through .10, the successor auditor should state that the purpose of the inquiries is to obtain information about whether to accept an engagement to perform a reaudit.

**.15** If the successor auditor accepts the reaudit engagement, he or she may consider the information obtained from inquiries of the predecessor auditor and review of the predecessor auditor's report and working papers in planning the reaudit. However, the information obtained from those inquiries and any review of the predecessor auditor's report and working papers is not sufficient to afford a basis for expressing an opinion. The nature, timing, and extent of the audit work performed and the conclusions reached in the reaudit are solely the responsibility of the successor auditor performing the reaudit.

**.16** The successor auditor should plan and perform the reaudit in accordance with generally accepted auditing standards. The successor auditor should not assume responsibility for the predecessor auditor's work or issue a report that reflects divided responsibility as described in section 543, *Part of Audit Performed by Other Independent Auditors*. Furthermore, the predecessor auditor is not a specialist as defined in section 336, *Using the Work of a Specialist*, or an internal auditor as defined in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

**.17** If the successor auditor has audited the current period, the results of that audit may be considered in planning and performing the reaudit of the

---

<sup>8</sup> The successor auditor may wish to make inquiries about the professional reputation and standing of the predecessor auditor. See section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10a.

preceding period or periods and may provide audit evidence that is useful in performing the reaudit. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.18** If, in a reaudit engagement, the successor auditor is unable to obtain sufficient appropriate audit evidence to express an opinion on the financial statements, the successor auditor should qualify or disclaim an opinion because of the inability to perform procedures the successor auditor considers necessary in the circumstances. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.20** In a reaudit, the successor auditor generally will be unable to observe inventory or make physical counts at the reaudit date or dates in the manner discussed in paragraphs .09 through .11 of section 331, *Inventories*. In such cases, the successor auditor may consider the knowledge obtained from his or her review of the predecessor auditor's working papers and inquiries of the predecessor auditor to determine the nature, timing, and extent of procedures to be applied in the circumstances. The successor auditor performing the reaudit should, if material, observe or perform some physical counts of inventory at a date subsequent to the period of the reaudit, in connection with a current audit or otherwise, and apply appropriate tests of intervening transactions. Appropriate procedures may include tests of prior transactions, reviews of records of prior counts, and the application of analytical procedures, such as gross profit tests.

## Discovery of Possible Misstatements in Financial Statements Reported on by a Predecessor Auditor

**.21** If during the audit or reaudit, the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should request that the client inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter. The successor auditor should communicate to the predecessor auditor any information that the predecessor auditor may need to consider in accordance with section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, which sets out the procedures that an auditor should follow when the auditor subsequently discovers facts that may have affected the audited financial statements previously reported on.<sup>9</sup>

**.22** If the client refuses to inform the predecessor auditor or if the successor auditor is not satisfied with the resolution of the matter, the successor auditor should evaluate (a) possible implications on the current engagement and (b) whether to resign from the engagement. Furthermore, the successor auditor may wish to consult with his or her legal counsel in determining an appropriate course of further action.

## Effective Date

**.23** This section will be effective with respect to acceptance of an engagement after March 31, 1998. Earlier application is permitted.

---

<sup>9</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .70 through .74, for reporting guidance.

## Appendix A

### Illustrative Client Consent and Acknowledgment Letter

1. Paragraph .11 of this section states, "The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

ABC Enterprises

[Address]

You have given your consent to allow [*name of successor CPA firm*], as successor independent auditors for ABC Enterprises (ABC), access to our working papers for our audit of the December 31, 19X1, financial statements of ABC. You also have given your consent to us to respond fully to [*name of successor CPA firm*] inquiries. You understand and agree that the review of our working papers is undertaken solely for the purpose of obtaining an understanding about ABC and certain information about our audit to assist [*name of successor CPA firm*] in planning the audit of the December 31, 19X2, financial statements of ABC.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Attached is the form of the letter we will furnish [*name of successor CPA firm*] regarding the use of the working papers.

Very truly yours,

[*Predecessor Auditor*]

## Appendix B

### Illustrative Successor Auditor Acknowledgment Letter

1. Paragraph .11, footnote 7, of this section states, "Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

[Successor Auditor]

[Address]

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the December 31, 20X1, financial statements of ABC Enterprises (ABC). We rendered a report on those financial statements and have not performed any audit procedures subsequent to the audit report date. In connection with your audit of ABC's 20X2 financial statements, you have requested access to our working papers prepared in connection with that audit. ABC has authorized our firm to allow you to review those working papers.

Our audit, and the working papers prepared in connection therewith, of ABC's financial statements were not planned or conducted in contemplation of your review. Therefore, items of possible interest to you may not have been specifically addressed. Our use of professional judgment and the assessment of audit risk and materiality for the purpose of our audit mean that matters may have existed that would have been assessed differently by you. We make no representation as to the sufficiency or appropriateness of the information in our working papers for your purposes.

We understand that the purpose of your review is to obtain information about ABC and our 19X1 audit results to assist you in planning your 19X2 audit of ABC. For that purpose only, we will provide you access to our working papers that relate to that objective.

Upon request, we will provide copies of those working papers that provide factual information about ABC. You agree to subject any such copies or information otherwise derived from our working papers to your normal policy for retention of working papers and protection of confidential client information. Furthermore, in the event of a third-party request for access to your working papers prepared in connection with your audits of ABC, you agree to obtain our permission before voluntarily allowing any such access to our working papers or information otherwise derived from our working papers, and to obtain on our behalf any releases that you obtain from such third party. You agree to advise us promptly and provide us a copy of any subpoena, summons, or other court order for access to your working papers that include copies of our working papers or information otherwise derived therefrom.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Very truly yours,

[Predecessor Auditor]

By: \_\_\_\_\_

Accepted:

[Successor Auditor]

By: \_\_\_\_\_

Date: \_\_\_\_\_

Even with the client's consent, access to the predecessor auditor's working papers may still be limited. Experience has shown that the predecessor auditor may be willing to grant broader access if given additional assurance concerning the use of the working papers. Accordingly, the successor auditor might consider agreeing to the following limitations on the review of the predecessor auditor's working papers in order to obtain broader access:

- The successor auditor will not comment, orally or in writing, to anyone as a result of the review as to whether the predecessor auditor's engagement was performed in accordance with generally accepted auditing standards.
- The successor auditor will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of the predecessor auditor's audit.
- The successor auditor will not use the audit procedures or results thereof documented in the predecessor auditor's working papers as audit evidence in rendering an opinion on the 19X2 financial statements of ABC Enterprises, except as contemplated in Statement on Auditing Standards No. 84.

The following paragraph illustrates the above:

Because your review of our working papers is undertaken solely for the purpose described above and may not entail a review of all our working papers, you agree that (1) the information obtained from the review will not be used by you for any other purpose, (2) you will not comment, orally or in writing, to anyone as a result of that review as to whether our audit was performed in accordance with generally accepted auditing standards, (3) you will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of our audit, and (4) you will not use the audit procedures or results thereof documented in our working papers as audit evidence in rendering your opinion on the 19X2 financial statements of ABC, except as contemplated in Statement on Auditing Standards No. 84.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## AU Section 316

# Consideration of Fraud in a Financial Statement Audit

(Supersedes SAS No. 82)

Source: SAS No. 99; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after December 15, 2002, unless otherwise indicated.

## Introduction and Overview

.01 Section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph .02, states, "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. [footnote omitted]"<sup>1</sup> This section establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).<sup>2</sup>

.02 The following is an overview of the organization and content of this section:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs .05 through .12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph .13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs .14 through .18.)

---

<sup>1</sup> The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see section 312, *Audit Risk and Materiality in Conducting an Audit*, or fraud).

<sup>2</sup> Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). AT section 101, *Attest Engagements*, and CS section 100, *Consulting Services: Definitions and Standards*, provide guidance to accountants relating to the performance of such services.

- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by
  - a. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs .20 through .27.)
  - b. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs .28 through .30.)
  - c. Considering fraud risk factors. (See paragraphs .31 through .33, and the Appendix, "Examples of Fraud Risk Factors" [paragraph .85].)
  - d. Considering certain other information. (See paragraph .34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs .35 through .42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs .43 through .45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. (See paragraph .46 through .49.) The section requires the auditor to respond to the results of the risk assessment in three ways:
  - a. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned. (See paragraph .50.)
  - b. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed. (See paragraphs .51 through .56.)
  - c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls. (See paragraphs .57 through .67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs .68 through .74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs .75 through .78.)
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs .79 through .82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph .83.)

**.03** The requirements and guidance set forth in this section are intended to be integrated into an overall audit process, in a logical manner that is consistent with the requirements and guidance provided in other sections, including section 311, *Planning and Supervision*; section 312, *Audit Risk and Materiality in Conducting an Audit*; section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 318 *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. Even though some requirements and guidance set forth in this section are presented in a manner that suggests a sequential audit process, auditing in fact involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly the sequence of the requirements and guidance in this section may be implemented differently among audit engagements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 109 and No. 110.]

**.04** Although this section focuses on the auditor's consideration of fraud in an audit of financial statements, it is management's responsibility to design and implement programs and controls to prevent, deter, and detect fraud.<sup>3</sup> That responsibility is described in section 110.03, which states, "Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, authorize, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements." Management, along with those who have responsibility for oversight of the financial reporting process (such as the audit committee, board of trustees, board of directors, or the owner in owner-managed entities), should set the proper tone; create and maintain a culture of honesty and high ethical standards; and establish appropriate controls to prevent, deter, and detect fraud. When management and those responsible for the oversight of the financial reporting process fulfill those responsibilities, the opportunities to commit fraud can be reduced significantly. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

## Description and Characteristics of Fraud

**.05** Fraud is a broad legal concept and auditors do not make legal determinations of whether fraud has occurred. Rather, the auditor's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. For purposes of the section, *fraud* is an intentional act that results in a material misstatement in financial statements that are the subject of an audit.<sup>4</sup>

---

<sup>3</sup> In its October 1987 report, the National Commission on Fraudulent Financial Reporting, also known as the Treadway Commission, noted, "The responsibility for reliable financial reporting resides first and foremost at the corporate level. Top management, starting with the chief executive officer, sets the tone and establishes the financial reporting environment. Therefore, reducing the risk of fraudulent financial reporting must start with the reporting company."

<sup>4</sup> Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether the misstatement is intentional or not.

.06 Two types of misstatements are relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets.

- *Misstatements arising from fraudulent financial reporting* are intentional misstatements or omissions of amounts or disclosures in financial statements designed to deceive financial statement users where the effect causes the financial statements not to be presented, in all material respects, in conformity with generally accepted accounting principles (GAAP).<sup>5</sup> Fraudulent financial reporting may be accomplished by the following:
  - Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
  - Misrepresentation in or intentional omission from the financial statements of events, transactions, or other significant information
  - Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Fraudulent financial reporting need not be the result of a grand plan or conspiracy. It may be that management representatives rationalize the appropriateness of a material misstatement, for example, as an aggressive rather than indefensible interpretation of complex accounting rules, or as a temporary misstatement of financial statements, including interim statements, expected to be corrected later when operational results improve.

- *Misstatements arising from misappropriation of assets* (sometimes referred to as theft or defalcation) involve the theft of an entity's assets where the effect of the theft causes the financial statements not to be presented, in all material respects, in conformity with GAAP. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services that have not been received. Misappropriation of assets may be accompanied by false or misleading records or documents, possibly created by circumventing controls. The scope of this section includes only those misappropriations of assets for which the effect of the misappropriation causes the financial statements not to be fairly presented, in all material respects, in conformity with GAAP.

.07 Three conditions generally are present when fraud occurs. First, management or other employees have an *incentive* or are under *pressure*, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an *opportunity* for a fraud to be perpetrated. Third, those involved are able to *rationalize* committing a fraudulent act. Some individuals possess an *attitude*, character, or set of ethical values that allow them to knowingly and intentionally commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them. The greater the incentive or pressure, the more likely an individual will be able to rationalize the acceptability of committing fraud.

---

<sup>5</sup> Reference to generally accepted accounting principles (GAAP) includes, where applicable, a comprehensive basis of accounting other than GAAP as defined in section 623, *Special Reports*, paragraph .04.

**.08** Management has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.<sup>6</sup> Management can either direct employees to perpetrate fraud or solicit their help in carrying it out. In addition, management personnel at a component of the entity may be in a position to manipulate the accounting records of the component in a manner that causes a material misstatement in the consolidated financial statements of the entity. Management override of controls can occur in unpredictable ways.

**.09** Typically, management and employees engaged in fraud will take steps to conceal the fraud from the auditors and others within and outside the organization. Fraud may be concealed by withholding evidence or misrepresenting information in response to inquiries or by falsifying documentation. For example, management that engages in fraudulent financial reporting might alter shipping documents. Employees or members of management who misappropriate cash might try to conceal their thefts by forging signatures or falsifying electronic approvals on disbursement authorizations. An audit conducted in accordance with GAAS rarely involves the authentication of such documentation, nor are auditors trained as or expected to be experts in such authentication. In addition, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed.

**.10** Fraud also may be concealed through collusion among management, employees, or third parties. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. For example, through collusion, false evidence that controls have been operating effectively may be presented to the auditor, or consistent misleading explanations may be given to the auditor by more than one individual within the entity to explain an unexpected result of an analytical procedure. As another example, the auditor may receive a false confirmation from a third party that is in collusion with management.

**.11** Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain conditions may suggest to the auditor the possibility that fraud may exist. For example, an important contract may be missing, a subsidiary ledger may not be satisfactorily reconciled to its control account, or the results of an analytical procedure performed during the audit may not be consistent with expectations. However, these conditions may be the result of circumstances other than fraud. Documents may legitimately have been lost or misfiled; the subsidiary ledger may be out of balance with its control account because of an unintentional accounting error; and unexpected analytical relationships may be the result of unanticipated changes in underlying economic factors. Even reports of alleged fraud may not always be reliable because an employee or outsider may be mistaken or may be motivated for unknown reasons to make a false allegation.

**.12** As indicated in paragraph .01, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or

---

<sup>6</sup> Frauds have been committed by management override of existing controls using such techniques as (a) recording fictitious journal entries, particularly those recorded close to the end of an accounting period to manipulate operating results, (b) intentionally biasing assumptions and judgments used to estimate account balances, and (c) altering records and terms related to significant and unusual transactions.

error.<sup>7</sup> However, absolute assurance is not attainable and thus even a properly planned and performed audit may not detect a material misstatement resulting from fraud. A material misstatement may not be detected because of the nature of audit evidence or because the characteristics of fraud as discussed above may cause the auditor to rely unknowingly on audit evidence that appears to be valid, but is, in fact, false and fraudulent. Furthermore, audit procedures that are effective for detecting an error may be ineffective for detecting fraud.

## The Importance of Exercising Professional Skepticism

.13 Due professional care requires the auditor to exercise professional skepticism. See section 230, *Due Professional Care in the Performance of Work*, paragraphs .07 through .09. Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. In exercising professional skepticism in gathering and evaluating evidence, the auditor should not be satisfied with less-than-persuasive evidence because of a belief that management is honest.

## Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.14 Prior to or in conjunction with the information-gathering procedures described in paragraphs .19 through .34 of this section, members of the audit team should discuss the potential for material misstatement due to fraud. The discussion should include:

- An exchange of ideas or "brainstorming" among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. (See paragraph .15.)
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud. (See paragraph .16.)

.15 The discussion among the audit team members about the susceptibility of the entity's financial statements to material misstatement due to fraud should include a consideration of the known external and internal factors affecting the entity that might (a) create incentives/pressures for management and others to commit fraud, (b) provide the opportunity for fraud to be perpetrated, and (c) indicate a culture or environment that enables management to rationalize committing fraud. The discussion should occur with an attitude that includes a questioning mind as described in paragraph .16 and, for this purpose,

---

<sup>7</sup> For a further discussion of the concept of reasonable assurance, see section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13.

setting aside any prior beliefs the audit team members may have that management is honest and has integrity. In this regard, the discussion should include a consideration of the risk of management override of controls.<sup>8</sup> Finally, the discussion should include how the auditor might respond to the susceptibility of the entity's financial statements to material misstatement due to fraud.

**.16** The discussion among the audit team members should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit, as described in paragraph .13. This should lead the audit team members to continually be alert for information or other conditions (such as those presented in paragraph .68) that indicate a material misstatement due to fraud may have occurred. It should also lead audit team members to thoroughly probe the issues, acquire additional evidence as necessary, and consult with other team members and, if appropriate, experts in the firm, rather than rationalize or dismiss information or other conditions that indicate a material misstatement due to fraud may have occurred.

**.17** Although professional judgment should be used in determining which audit team members should be included in the discussion, the discussion ordinarily should involve the key members of the audit team. A number of factors will influence the extent of the discussion and how it should occur. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. Another factor to consider in planning the discussions is whether to include specialists assigned to the audit team. For example, if the auditor has determined that a professional possessing information technology skills is needed on the audit team (see section 311.31), it may be useful to include that individual in the discussion. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

**.18** Communication among the audit team members about the risks of material misstatement due to fraud also should continue throughout the audit—for example, in evaluating the risks of material misstatement due to fraud at or near the completion of the field work. (See paragraph .74 and footnote 28.)

## Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

**.19** Section 314 provides guidance about how the auditor obtains an understanding of the entity and its environment, including its internal control. In performing that work, information may come to the auditor's attention that should be considered in identifying risks of material misstatement due to fraud. As part of this work, the auditor should perform the following procedures to obtain information that is used (as described in paragraphs .35 through .42) to identify the risks of material misstatement due to fraud:

- a. Make inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed. (See paragraphs .20 through .27.)
- b. Consider any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit. (See paragraphs .28 through .30.)

---

<sup>8</sup> See footnote 6.

- c. Consider whether one or more fraud risk factors exist. (See paragraphs .31 through .33, and the Appendix [paragraph .85].)
- d. Consider other information that may be helpful in the identification of risks of material misstatement due to fraud. (See paragraph .34.)  
[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

## Making Inquiries of Management and Others Within the Entity About the Risks of Fraud

**.20** The auditor should inquire of management about:<sup>9</sup>

- Whether management has knowledge of any fraud or suspected fraud affecting the entity
- Whether management is aware of allegations of fraud or suspected fraud affecting the entity, for example, received in communications from employees, former employees, analysts, regulators, short sellers, or others
- Management's understanding about the risks of fraud in the entity, including any specific fraud risks the entity has identified or account balances or classes of transactions for which a risk of fraud may be likely to exist
- Programs and controls<sup>10</sup> the entity has established to mitigate specific fraud risks the entity has identified, or that otherwise help to prevent, deter, and detect fraud, and how management monitors those programs and controls. For examples of programs and controls an entity may implement to prevent, deter, and detect fraud, see the exhibit titled "Management Antifraud Programs and Controls" [paragraph .86] at the end of this section.
- For an entity with multiple locations, (a) the nature and extent of monitoring of operating locations or business segments, and (b) whether there are particular operating locations or business segments for which a risk of fraud may be more likely to exist
- Whether and how management communicates to employees its views on business practices and ethical behavior

**.21** The inquiries of management also should include whether management has reported to the audit committee or others with equivalent authority and responsibility<sup>11</sup> (hereafter referred to as the audit committee) on how the entity's internal control<sup>12</sup> serves to prevent, deter, or detect material misstatements due to fraud.

**.22** The auditor also should inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud

<sup>9</sup> In addition to these inquiries, section 333, *Management Representations*, requires the auditor to obtain selected written representations from management regarding fraud.

<sup>10</sup> Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, paragraph .41, defines internal control and its five interrelated components (the control environment, risk assessment, control activities, information and communication, and monitoring). Entity programs and controls intended to address the risks of fraud may be part of any of the five components discussed in section 314. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

<sup>11</sup> Examples of "others with equivalent authority and responsibility" may include the board of directors, the board of trustees, or the owner in an owner-managed entity, as appropriate.

<sup>12</sup> See footnote 10.

and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity. An entity's audit committee sometimes assumes an active role in oversight of the entity's assessment of the risks of fraud and the programs and controls the entity has established to mitigate these risks. The auditor should obtain an understanding of how the audit committee exercises oversight activities in that area.

**.23** For entities that have an internal audit function, the auditor also should inquire of appropriate internal audit personnel about their views about the risks of fraud, whether they have performed any procedures to identify or detect fraud during the year, whether management has satisfactorily responded to any findings resulting from these procedures, and whether the internal auditors have knowledge of any fraud or suspected fraud.

**.24** In addition to the inquiries outlined in paragraphs .20 through .23, the auditor should inquire of others within the entity about the existence or suspicion of fraud. The auditor should use professional judgment to determine those others within the entity to whom inquiries should be directed and the extent of such inquiries. In making this determination, the auditor should consider whether others within the entity may be able to provide information that will be helpful to the auditor in identifying risks of material misstatement due to fraud—for example, others who may have additional knowledge about or be able to corroborate risks of fraud identified in the discussions with management (see paragraph .20) or the audit committee (see paragraph .22).

**.25** Examples of others within the entity to whom the auditor may wish to direct these inquiries include:

- Employees with varying levels of authority within the entity, including, for example, entity personnel with whom the auditor comes into contact during the course of the audit in obtaining (a) an understanding of the entity's systems and internal control, (b) in observing inventory or performing cutoff procedures, or (c) in obtaining explanations for fluctuations noted as a result of analytical procedures
- Operating personnel not directly involved in the financial reporting process
- Employees involved in initiating, recording, or processing complex or unusual transactions—for example, a sales transaction with multiple elements, or a significant related party transaction
- In-house legal counsel

**.26** The auditor's inquiries of management and others within the entity are important because fraud often is uncovered through information received in response to inquiries. One reason for this is that such inquiries may provide individuals with an opportunity to convey information to the auditor that otherwise might not be communicated. Making inquiries of others within the entity, in addition to management, may be useful in providing the auditor with a perspective that is different from that of individuals involved in the financial reporting process. The responses to these other inquiries might serve to corroborate responses received from management, or alternatively, might provide information regarding the possibility of management override of controls—for example, a response from an employee indicating an unusual change in the way transactions have been processed. In addition, the auditor may obtain information from these inquiries regarding how effectively management has communicated standards of ethical behavior to individuals throughout the organization.

**.27** The auditor should be aware when evaluating management's responses to the inquiries discussed in paragraph .20 that management is often in the best

position to perpetrate fraud. The auditor should use professional judgment in deciding when it is necessary to corroborate responses to inquiries with other information. However, when responses are inconsistent among inquiries, the auditor should obtain additional audit evidence to resolve the inconsistencies.

## Considering the Results of the Analytical Procedures Performed in Planning the Audit

**.28** Section 329, *Analytical Procedures*, paragraphs .04 and .06, requires that analytical procedures be performed in planning the audit with an objective of identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning implications. In performing analytical procedures in planning the audit, the auditor develops expectations about plausible relationships that are reasonably expected to exist, based on the auditor's understanding of the entity and its environment. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying the risks of material misstatement due to fraud.

**.29** In planning the audit, the auditor also should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that may indicate a material misstatement due to fraudulent financial reporting. An example of such an analytical procedure that addresses this objective is a comparison of sales volume, as determined from recorded revenue amounts, with production capacity. An excess of sales volume over production capacity may be indicative of recording fictitious sales. As another example, a trend analysis of revenues by month and sales returns by month during and shortly after the reporting period may indicate the existence of undisclosed side agreements with customers to return goods that would preclude revenue recognition.<sup>13</sup>

**.30** Analytical procedures performed during planning may be helpful in identifying the risks of material misstatement due to fraud. However, because such analytical procedures generally use data aggregated at a high level, the results of those analytical procedures provide only a broad initial indication about whether a material misstatement of the financial statements may exist. Accordingly, the results of analytical procedures performed during planning should be considered along with other information gathered by the auditor in identifying the risks of material misstatement due to fraud.

## Considering Fraud Risk Factors

**.31** Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate incentives/pressures to perpetrate fraud, opportunities to carry out the fraud, or attitudes/rationalizations to justify a fraudulent action. Such events or conditions are referred to as "fraud risk factors." Fraud risk factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances where fraud exists.

**.32** When obtaining information about the entity and its environment, the auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment

---

<sup>13</sup> See paragraph .70 for a discussion of the need to update these analytical procedures during the overall review stage of the audit.

in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud.

.33 Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in the Appendix [paragraph .85]. These illustrative risk factors are classified based on the three conditions generally present when fraud exists: *incentive/pressure* to perpetrate fraud, an *opportunity* to carry out the fraud, and *attitude/rationalization* to justify the fraudulent action. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

### Considering Other Information That May Be Helpful in Identifying Risks of Material Misstatement Due to Fraud

.34 The auditor should consider other information that may be helpful in identifying risks of material misstatement due to fraud. Specifically, the discussion among the engagement team members (see paragraphs .14 through .18) may provide information helpful in identifying such risks. In addition, the auditor should consider whether information from the results of (a) procedures relating to the acceptance and continuance of clients and engagements<sup>14</sup> and (b) reviews of interim financial statements may be relevant in the identification of such risks. Finally, as part of the consideration of audit risk at the individual account balance or class of transaction level (see section 312.17 through .26), the auditor should consider whether identified inherent risks would provide useful information in identifying the risks of material misstatement due to fraud (see paragraph .39). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

## Identifying Risks That May Result in a Material Misstatement Due to Fraud<sup>15</sup>

### Using the Information Gathered to Identify Risk of Material Misstatements Due to Fraud

.35 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered (see paragraphs .19 through .34) in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives/pressures, opportunities, and attitudes/rationalizations (see paragraph .07). However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks. Although the risk of material

---

<sup>14</sup> See Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* [QC section 20.14–.16], as amended.

<sup>15</sup> Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to identify and assess the risk of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances and disclosures. See section 314.102. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

misstatement due to fraud may be greatest when all three fraud conditions are observed or evident, the auditor cannot assume that the inability to observe one or two of these conditions means there is no risk of material misstatement due to fraud. In fact, observing that individuals have the requisite attitude to commit fraud, or identifying factors that indicate a likelihood that management or other employees will rationalize committing a fraud, is difficult at best.

**.36** In addition, the extent to which each of the three conditions referred to above are present when fraud occurs may vary. In some instances the significance of incentives/pressures may result in a risk of material misstatement due to fraud, apart from the significance of the other two conditions. For example, an incentive/pressure to achieve an earnings level to preclude a loan default, or to "trigger" incentive compensation plan awards, may alone result in a risk of material misstatement due to fraud. In other instances, an easy opportunity to commit the fraud because of a lack of controls may be the dominant condition precipitating the risk of fraud, or an individual's attitude or ability to rationalize unethical actions may be sufficient to motivate that individual to engage in fraud, even in the absence of significant incentives/pressures or opportunities.

**.37** The auditor's identification of fraud risks also may be influenced by characteristics such as the size, complexity, and ownership attributes of the entity. For example, in the case of a larger entity, the auditor ordinarily considers factors that generally constrain improper conduct by management, such as the effectiveness of the audit committee and the internal audit function, and the existence and enforcement of a formal code of conduct. In the case of a smaller entity, some or all of these considerations may be inapplicable or less important, and management may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and management by example. Also, the risks of material misstatement due to fraud may vary among operating locations or business segments of an entity, requiring an identification of the risks related to specific geographic areas or business segments, as well as for the entity as a whole.<sup>16</sup>

**.38** The auditor should evaluate whether identified risks of material misstatement due to fraud can be related to specific financial-statement account balances or classes of transactions and related assertions, or whether they relate more pervasively to the financial statements as a whole. Relating the risks of material misstatement due to fraud to the individual accounts, classes of transactions, and assertions will assist the auditor in subsequently designing appropriate auditing procedures.

**.39** Certain accounts, classes of transactions, and assertions that have high inherent risk because they involve a high degree of management judgment and subjectivity also may present risks of material misstatement due to fraud because they are susceptible to manipulation by management. For example, liabilities resulting from a restructuring may be deemed to have high inherent risk because of the high degree of subjectivity and management judgment involved in their estimation. Similarly, revenues for software developers may be deemed to have high inherent risk because of the complex accounting principles applicable to the recognition and measurement of software revenue transactions. Assets resulting from investing activities may be deemed to have high

---

<sup>16</sup> Section 312.16 provides guidance on the auditor's consideration of the extent to which auditing procedures should be performed at selected locations or components. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

inherent risk because of the subjectivity and management judgment involved in estimating fair values of those investments.

.40 In summary, the identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including:

- The *type* of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The *significance* of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements
- The *likelihood* of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements<sup>17</sup>
- The *pervasiveness* of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions.

## A Presumption That Improper Revenue Recognition Is a Fraud Risk

.41 Material misstatements due to fraudulent financial reporting often result from an overstatement of revenues (for example, through premature revenue recognition or recording fictitious revenues) or an understatement of revenues (for example, through improperly shifting revenues to a later period). Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. (See paragraph .54 for examples of auditing procedures related to the risk of improper revenue recognition.)<sup>18</sup>

## A Consideration of the Risk of Management Override of Controls

.42 Even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur, and accordingly, the auditor should address that risk (see paragraph .57) apart from any conclusions regarding the existence of more specifically identifiable risks.

## Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.43 Section 314 requires the auditor to obtain an understanding of each of the five components of internal control sufficient to plan the audit. It also notes that such knowledge should be used to identify types of potential misstatements, consider factors that affect the risk of material misstatement, design

---

<sup>17</sup> The occurrence of material misstatements of financial statements due to fraud is relatively infrequent in relation to the total population of published financial statements. However, the auditor should not use this as a basis to conclude that one or more risks of a material misstatement due to fraud are not present in a particular entity. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>18</sup> For a discussion of indicators of improper revenue recognition and common techniques for overstating revenue and illustrative audit procedures, see the AICPA Audit Guide *Auditing Revenue in Certain Industries*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

tests of controls when applicable, and design substantive tests. Additionally, section 314 notes that controls, whether manual or automated, can be circumvented by collusion of two or more people or inappropriate management override of internal control. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

**.44** As part of the understanding of internal control sufficient to plan the audit, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation.<sup>19</sup> These programs and controls may involve (a) specific controls designed to mitigate specific risks of fraud—for example, controls to address specific assets susceptible to misappropriation, and (b) broader programs designed to prevent, deter, and detect fraud—for example, programs to promote a culture of honesty and ethical behavior. The auditor should consider whether such programs and controls mitigate the identified risks of material misstatement due to fraud or whether specific control deficiencies may exacerbate the risks (see paragraph .80). The exhibit at the end of this section [paragraph .88] discusses examples of programs and controls an entity might implement to create a culture of honesty and ethical behavior, and that help to prevent, deter, and detect fraud.

**.45** After the auditor has evaluated whether the entity's programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation, the auditor should assess these risks taking into account that evaluation. This assessment should be considered when developing the auditor's response to the identified risks of material misstatement due to fraud (see paragraphs .46 through .67).<sup>20</sup>

## Responding to the Results of the Assessment<sup>21</sup>

**.46** The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence. As noted in paragraph .13, professional skepticism is an attitude that includes a critical assessment of the competency and sufficiency of audit evidence. Examples of the application of professional skepticism in response to the risks of material misstatement due to fraud are (a) designing additional or different auditing procedures to obtain more reliable evidence in support of specified financial statement account balances, classes of transactions, and related assertions, and (b) obtaining additional corroboration of management's explanations or representations concerning material matters, such as through third-party confirmation, the use of a specialist, analytical procedures, examination of documentation from independent sources, or inquiries of others within or outside the entity.

---

<sup>19</sup> See footnote 10. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>20</sup> Notwithstanding that the auditor assesses identified risks of material misstatement due to fraud, the assessment need not encompass an overall judgment about whether risk for the entity is classified as *high*, *medium*, or *low* because such a judgment is too broad to be useful in developing the auditor's response described in paragraphs .46 through .67. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>21</sup> Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, requires the auditor to determine overall responses and design and perform further audit procedures to respond to the assessed risks of material misstatement at the financial statement and relevant assertion levels in a financial statement audit. See paragraphs .04 and .07 of section 318. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

**.47** The auditor's response to the assessment of the risks of material misstatement of the financial statements due to fraud is influenced by the nature and significance of the risks identified as being present (paragraphs .35 through .42) and the entity's programs and controls that address these identified risks (paragraphs .43 through .45).

**.48** The auditor responds to risks of material misstatement due to fraud in the following three ways:

- a. A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned (see paragraph .50).
- b. A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed (see paragraphs .51 through .56).
- c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur (see paragraphs .57 through .67).

**.49** The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action (see paragraph .78).

## Overall Responses to the Risk of Material Misstatement

**.50** Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

- *Assignment of personnel and supervision.* The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement (see section 210, *Training and Proficiency of the Independent Auditor*, paragraph .03). For example, the auditor may respond to an identified risk of material misstatement due to fraud by assigning additional persons with specialized skill and knowledge, such as forensic and information technology (IT) specialists, or by assigning more experienced personnel to the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud (see section 311.28).
- *Accounting principles.* The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions. In this respect, the auditor may have a greater concern about whether the accounting principles selected and policies adopted are being applied in an inappropriate manner to create a material misstatement of the financial statements. In developing judgments about the quality of such principles (see section 380A, *Communication With Audit Committees*, paragraph .11), the auditor should consider whether their collective application indicates a bias that may create such a material misstatement of the financial statements.
- *Predictability of auditing procedures.* The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed—for example, performing substantive tests of selected account balances and assertions not otherwise

tested due to their materiality or risk, adjusting the timing of testing from that otherwise expected, using differing sampling methods, and performing procedures at different locations or at locations on an unannounced basis.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

## Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

**.51** The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. However, because management may have the ability to override controls that otherwise appear to be operating effectively (see paragraph .08), it is unlikely that audit risk can be reduced to an appropriately low level by performing only tests of controls.

**.52** The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures in the following ways:

- The *nature* of auditing procedures performed may need to be changed to obtain evidence that is more reliable or to obtain additional corroborative information. For example, more audit evidence may be needed from independent sources outside the entity, such as public-record information about the existence and nature of key customers, vendors, or counterparties in a major transaction. Also, physical observation or inspection of certain assets may become more important (see section 326, *Audit Evidence*, paragraphs .06 through .13). Furthermore, the auditor may choose to employ computer-assisted audit techniques to gather more extensive evidence about data contained in significant accounts or electronic transaction files. Finally, inquiry of additional members of management or others may be helpful in identifying issues and corroborating other audit evidence (see paragraphs .24 through .26 and paragraph .53).
- The *timing* of substantive tests may need to be modified. The auditor might conclude that substantive testing should be performed at or near the end of the reporting period to best address an identified risk of material misstatement due to fraud (see section 318, *Performing Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*). That is, the auditor might conclude that, given the risks of intentional misstatement or manipulation, tests to extend audit conclusions from an interim date to the period-end reporting date would not be effective.

In contrast, because an intentional misstatement—for example, a misstatement involving inappropriate revenue recognition—may have been initiated in an interim period, the auditor might elect to apply substantive tests to transactions occurring earlier in or throughout the reporting period.

- The *extent* of the procedures applied should reflect the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing analytical procedures at a more detailed

level may be appropriate (see section 350, *Audit Sampling*, paragraph .22, and section 329). Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105, No. 106, No. 110 and No. 111.]

**.53** The following are examples of modification of the nature, timing, and extent of tests in response to identified risks of material misstatements due to fraud.

- Performing procedures at locations on a surprise or unannounced basis, for example, observing inventory on unexpected dates or at unexpected locations or counting cash on a surprise basis.
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Making oral inquiries of major customers and suppliers in addition to sending written confirmations, or sending confirmation requests to a specific party within an organization.
- Performing substantive analytical procedures using disaggregated data, for example, comparing gross profit or operating margins by location, line of business, or month to auditor-developed expectations.<sup>22</sup>
- Interviewing personnel involved in activities in areas where a risk of material misstatement due to fraud has been identified to obtain their insights about the risk and how controls address the risk (also see paragraph .24).
- If other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches, discussing with them the extent of work that needs to be performed to address the risk of material misstatement due to fraud resulting from transactions and activities among these components.

### ***Additional Examples of Responses to Identified Risks of Misstatements Arising From Fraudulent Financial Reporting***

**.54** The following are additional examples of responses to identified risks of material misstatements relating to fraudulent financial reporting:

- *Revenue recognition.* Because revenue recognition is dependent on the particular facts and circumstances, as well as accounting principles and practices that can vary by industry, the auditor ordinarily will develop auditing procedures based on the auditor's understanding of the entity and its environment, including the composition of revenues, specific attributes of the revenue transactions, and unique industry considerations. If there is an identified risk of material misstatement due to fraud that involves improper revenue recognition, the auditor also may want to consider:

---

<sup>22</sup> Section 329, *Analytical Procedures*, provides guidance on performing analytical procedures as substantive tests. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
  - Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements.<sup>23</sup> For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
  - Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.
  - Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures.
  - For those situations for which revenue transactions are electronically initiated, authorized, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.
- *Inventory quantities.* If there is an identified risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis (see paragraph .53) or to conduct inventory counts at all locations on the same date. In addition, it may be appropriate for inventory counts to be conducted at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.

It also may be appropriate for the auditor to perform additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals. Using the work of a specialist may be helpful in this regard.<sup>24</sup> Furthermore, additional testing of count sheets, tags, or other records, or the retention of copies of these records, may be warranted to minimize the risk of subsequent alteration or inappropriate compilation.

---

<sup>23</sup> Section 330, *The Confirmation Process*, provides guidance about the confirmation process in audits performed in accordance with GAAS. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>24</sup> Section 336, *Using the Work of a Specialist*, provides guidance to an auditor who uses the work of a specialist in performing an audit in accordance with GAAS. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

Following the physical inventory count, the auditor may want to employ additional procedures directed at the quantities included in the priced out inventories to further test the reasonableness of the quantities counted—for example, comparison of quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records. The auditor also may consider using computer-assisted audit techniques to further test the compilation of the physical inventory counts—for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

- **Management estimates.** The auditor may identify a risk of material misstatement due to fraud involving the development of management estimates. This risk may affect a number of accounts and assertions, including asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of a segment of the business), and other significant accrued liabilities (such as pension and other postretirement benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. As indicated in section 342, *Auditing Accounting Estimates*, estimates are based on subjective as well as objective factors and there is a potential for bias in the subjective factors, even when management's estimation process involves competent personnel using relevant and reliable data.

In addressing an identified risk of material misstatement due to fraud involving accounting estimates, the auditor may want to supplement the audit evidence otherwise obtained (see section 342.09 through .14). In certain circumstances (for example, evaluating the reasonableness of management's estimate of the fair value of a derivative), it may be appropriate to engage a specialist or develop an independent estimate for comparison to management's estimate. Information gathered about the entity and its environment may help the auditor evaluate the reasonableness of such management estimates and underlying judgments and assumptions.

A retrospective review of similar management judgments and assumptions applied in prior periods (see paragraphs .63 through .65) may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

### ***Examples of Responses to Identified Risks of Misstatements Arising From Misappropriations of Assets***

**.55** The auditor may have identified a risk of material misstatement due to fraud relating to misappropriation of assets. For example, the auditor may conclude that the risk of asset misappropriation at a particular operating location is significant because a large amount of easily accessible cash is maintained at that location, or there are inventory items such as laptop computers at that location that can easily be moved and sold.

**.56** The auditor's response to a risk of material misstatement due to fraud relating to misappropriation of assets usually will be directed toward certain account balances. Although some of the audit responses noted in paragraphs .52

through .54 may apply in such circumstances, such as the procedures directed at inventory quantities, the scope of the work should be linked to the specific information about the misappropriation risk that has been identified. For example, if a particular asset is highly susceptible to misappropriation and a potential misstatement would be material to the financial statements, obtaining an understanding of the controls related to the prevention and detection of such misappropriation and testing the operating effectiveness of such controls may be warranted. In certain circumstances, physical inspection of such assets (for example, counting cash or securities) at or near the end of the reporting period may be appropriate. In addition, the use of substantive analytical procedures, such as the development by the auditor of an expected dollar amount at a high level of precision, to be compared with a recorded amount, may be effective in certain circumstances.

## Responses to Further Address the Risk of Management Override of Controls

.57 As noted in paragraph .08, management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. By its nature, management override of controls can occur in unpredictable ways. Accordingly, in addition to overall responses (paragraph .50) and responses that address specifically identified risks of material misstatement due to fraud (see paragraphs .51 through .56), the procedures described in paragraphs .58 through .67 should be performed to further address the risk of management override of controls.

**.58 Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.** Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (a) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (b) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications. Accordingly, the auditor should design procedures to test the appropriateness of journal entries recorded in the general ledger and other adjustments (for example, entries posted directly to financial statement drafts) made in the preparation of the financial statements. More specifically, the auditor should:

- a. Obtain an understanding of the entity's financial reporting process<sup>25</sup> and the controls over journal entries and other adjustments. (See paragraphs .59 and .60.)
- b. Identify and select journal entries and other adjustments for testing. (See paragraph .61.)
- c. Determine the timing of the testing. (See paragraph .62.)

---

<sup>25</sup> Section 314 requires the auditor to obtain an understanding of the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. This understanding includes (a) the procedures used to enter transaction totals into the general ledger; (b) the procedures used to initiate, record, and process journal entries in the general ledger; and (c) other procedures used to record recurring and nonrecurring adjustments to the financial statements. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- d. Inquire of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments.

**.59** The auditor's understanding of the entity's financial reporting process may help in identifying the type, number, and monetary value of journal entries and other adjustments that typically are made in preparing the financial statements. For example, the auditor's understanding may include the sources of significant debits and credits to an account, who can initiate entries to the general ledger or transaction processing systems, what approvals are required for such entries, and how journal entries are recorded (for example, entries may be initiated and recorded online with no physical evidence, or may be created in paper form and entered in batch mode).

**.60** An entity may have implemented specific controls over journal entries and other adjustments. For example, an entity may use journal entries that are preformatted with account numbers and specific user approval criteria, and may have automated controls to generate an exception report for any entries that were unsuccessfully proposed for recording or entries that were recorded and processed outside of established parameters. The auditor should obtain an understanding of the design of such controls over journal entries and other adjustments and determine whether they are suitably designed and have been placed in operation.

**.61** The auditor should use professional judgment in determining the nature, timing, and extent of the testing of journal entries and other adjustments. For purposes of identifying and selecting specific entries and other adjustments for testing, and determining the appropriate method of examining the underlying support for the items selected, the auditor should consider:

- *The auditor's assessment of the risk of material misstatement due to fraud.* The presence of fraud risk factors or other conditions may help the auditor to identify specific classes of journal entries for testing and indicate the extent of testing necessary.
- *The effectiveness of controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and adjustments may affect the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of those controls. However, even though controls might be implemented and operating effectively, the auditor's procedures for testing journal entries and other adjustments should include the identification and testing of specific items.
- *The entity's financial reporting process and the nature of the evidence that can be examined.* The auditor's procedures for testing journal entries and other adjustments will vary based on the nature of the financial reporting process. For many entities, routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments might involve both manual and automated procedures and controls. Regardless of the method, the auditor's procedures should include selecting from the general ledger journal entries to be tested and examining support for those items. In addition, the auditor should be aware that journal entries and other adjustments might exist in either electronic or paper form. When information technology (IT) is used in the financial reporting process, journal entries and other adjustments might exist only in electronic form. Electronic evidence often requires extraction of the desired data by an auditor with IT knowledge and

skills or the use of an IT specialist. In an IT environment, it may be necessary for the auditor to employ computer-assisted audit techniques (for example, report writers, software or data extraction tools, or other systems-based techniques) to identify the journal entries and other adjustments to be tested.

- *The characteristics of fraudulent entries or adjustments.* Inappropriate journal entries and other adjustments often have certain unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used accounts, (b) made by individuals who typically do not make journal entries, (c) recorded at the end of the period or as post-closing entries that have little or no explanation or description, (d) made either before or during the preparation of the financial statements that do not have account numbers, or (e) containing round numbers or a consistent ending number.
- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to errors in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain intercompany transactions, or (f) are otherwise associated with an identified risk of material misstatement due to fraud. The auditor should recognize, however, that inappropriate journal entries and adjustments also might be made to other accounts. In audits of entities that have several locations or components, the auditor should consider the need to select journal entries from locations based on the factors set forth in section 312.16.
- *Journal entries or other adjustments processed outside the normal course of business.* Standard journal entries used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record recurring periodic accounting estimates generally are subject to the entity's internal controls. Nonstandard entries (for example, entries used to record nonrecurring transactions, such as a business combination, or entries used to record a nonrecurring estimate, such as an asset impairment) might not be subject to the same level of internal control. In addition, other adjustments such as consolidating adjustments, report combinations, and reclassifications generally are not reflected in formal journal entries and might not be subject to the entity's internal controls. Accordingly, the auditor should consider placing additional emphasis on identifying and testing items processed outside of the normal course of business.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.62** Because fraudulent journal entries often are made at the end of a reporting period, the auditor's testing ordinarily should focus on the journal entries and other adjustments made at that time. However, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how it is accomplished, the auditor should consider whether there also is a need to test journal entries throughout the period under audit.

**.63 *Reviewing accounting estimates for biases that could result in material misstatement due to fraud.*** In preparing financial statements, management is responsible for making a number of judgments or assumptions

that affect significant accounting estimates<sup>26</sup> and for monitoring the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates. As discussed in section 312.58, the auditor should consider whether differences between estimates best supported by the audit evidence and the estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management, in which case the auditor should reconsider the estimates taken as a whole. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.64** The auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management. The significant accounting estimates selected for testing should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current-year estimates. This review, however, is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

**.65** If the auditor identifies a possible bias on the part of management in making accounting estimates, the auditor should evaluate whether circumstances producing such a bias represent a risk of a material misstatement due to fraud. For example, information coming to the auditor's attention may indicate a risk that adjustments to the current-year estimates might be recorded at the instruction of management to arbitrarily achieve a specified earnings target.

**.66 *Evaluating the business rationale for significant unusual transactions.*** During the course of the audit, the auditor may become aware of significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment. The auditor should gain an understanding of the business rationale for such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.

**.67** In understanding the business rationale for the transactions, the auditor should consider:

- Whether the form of such transactions is overly complex (for example, involves multiple entities within a consolidated group or unrelated third parties).
- Whether management has discussed the nature of and accounting for such transactions with the audit committee or board of directors.
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.

---

<sup>26</sup> See section 342, *Auditing Accounting Estimates*, paragraphs .02 and .16, for a definition of accounting estimates and a listing of examples. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by the audit committee or board of directors.
- Whether the transactions involve previously unidentified related parties<sup>27</sup> or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

## Evaluating Audit Evidence

**.68 Assessing risks of material misstatement due to fraud throughout the audit.** The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. Conditions may be identified during fieldwork that change or support a judgment regarding the assessment of the risks, such as the following:

- Discrepancies in the accounting records, including:
  - Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or entity policy
  - Unsupported or unauthorized balances or transactions
  - Last-minute adjustments that significantly affect financial results
  - Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties
  - Tips or complaints to the auditor about alleged fraud
- Conflicting or missing audit evidence, including:
  - Missing documents
  - Documents that appear to have been altered<sup>28</sup>
  - Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist
  - Significant unexplained items on reconciliations
  - Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures (See paragraph .72.)
  - Unusual discrepancies between the entity's records and confirmation replies
  - Missing inventory or physical assets of significant magnitude
  - Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies

---

<sup>27</sup> Section 334, *Related Parties*, provides guidance with respect to the identification of related-party relationships and transactions, including transactions that may be outside the ordinary course of business (see, in particular, section 334.06). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>28</sup> As discussed in paragraph .09, auditors are not trained as or expected to be experts in the authentication of documents; however, if the auditor believes that documents may not be authentic, he or she should investigate further and consider using the work of a specialist to determine the authenticity. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments
- Problematic or unusual relationships between the auditor and management, including:
  - Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought<sup>29</sup>
  - Undue time pressures imposed by management to resolve complex or contentious issues
  - Complaints by management about the conduct of the audit or management intimidation of audit team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management
  - Unusual delays by the entity in providing requested information
  - Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques
  - Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel
  - An unwillingness to add or revise disclosures in the financial statements to make them more complete and transparent

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.69** *Evaluating whether analytical procedures performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.* As discussed in paragraphs .28 through .30, the auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatement due to fraud. The auditor also should evaluate whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit (see section 329) indicate a previously unrecognized risk of material misstatement due to fraud.

**.70** If not already performed during the overall review stage of the audit, the auditor should perform analytical procedures relating to revenue, as discussed in paragraph .29, through the end of the reporting period.

**.71** Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income often are particularly relevant. These might include, for example, (a) uncharacteristically large amounts of income being reported in the last week or two of the reporting period from unusual transactions, as well as (b) income that is inconsistent with trends in cash flow from operations.

**.72** Some unusual or unexpected analytical relationships may have been identified and may indicate a risk of material misstatement due to fraud because management or employees generally are unable to manipulate certain

---

<sup>29</sup> Denial of access to information may constitute a limitation on the scope of the audit that may require the auditor to consider qualifying or disclaiming an opinion on the financial statements. (See section 508, *Reports on Audited Financial Statements*, paragraph .24.) [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

information to create seemingly normal or expected relationships. Some examples are as follows:

- The relationship of net income to cash flows from operations may appear unusual because management recorded fictitious revenues and receivables but was unable to manipulate cash.
- Changes in inventory, accounts payable, sales, or cost of sales from the prior period to the current period may be inconsistent, indicating a possible employee theft of inventory, because the employee was unable to manipulate all of the related accounts.
- A comparison of the entity's profitability to industry trends, which management cannot manipulate, may indicate trends or differences for further consideration when identifying risks of material misstatement due to fraud.
- A comparison of bad debt write-offs to comparable industry data, which employees cannot manipulate, may provide unexplained relationships that could indicate a possible theft of cash receipts.
- An unexpected or unexplained relationship between sales volume as determined from the accounting records and production statistics maintained by operations personnel—which may be more difficult for management to manipulate—may indicate a possible misstatement of sales.

**.73** The auditor also should consider whether responses to inquiries throughout the audit about analytical relationships have been vague or implausible, or have produced evidence that is inconsistent with other audit evidence accumulated during the audit. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

***.74 Evaluating the risks of material misstatement due to fraud at or near the date of the auditor's report.*** At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of auditing procedures and other observations (for example, conditions and analytical relationships noted in paragraphs .69 through .73) affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. This evaluation primarily is a qualitative matter based on the auditor's judgment. Such an evaluation may provide further insight about the risks of material misstatement due to fraud and whether there is a need to perform additional or different audit procedures. As part of this evaluation, the auditor with final responsibility for the audit should ascertain that there has been appropriate communication with the other audit team members throughout the audit regarding information or conditions indicative of risks of material misstatement due to fraud.<sup>30</sup>

***.75 Responding to misstatements that may be the result of fraud.*** When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of

---

<sup>30</sup> To accomplish this communication, the auditor with final responsibility for the audit may want to arrange another discussion among audit team members about the risks of material misstatement due to fraud (see paragraphs .14 through .18). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

fraud.<sup>31</sup> That determination affects the auditor's evaluation of materiality and the related responses necessary as a result of that evaluation.<sup>32</sup>

**.76** If the auditor believes that misstatements are or may be the result of fraud, but the effect of the misstatements is not material to the financial statements, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. For example, fraud involving misappropriations of cash from a small petty cash fund normally would be of little significance to the auditor in assessing the risk of material misstatement due to fraud because both the manner of operating the fund and its size would tend to establish a limit on the amount of potential loss, and the custodianship of such funds normally is entrusted to a nonmanagement employee.<sup>33</sup> Conversely, if the matter involves higher-level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management.<sup>34</sup> In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (a) the nature, timing, and extent of the tests of balances or transactions and (b) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

**.77** If the auditor believes that the misstatement is or may be the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- a. Attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.<sup>35</sup>
- b. Consider the implications for other aspects of the audit (see paragraph .76).
- c. Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee.<sup>36</sup>
- d. If appropriate, suggest that the client consult with legal counsel.

---

<sup>31</sup> See footnote 4. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>32</sup> Section 312.60 states in part, "Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material." Section 312.59 states, "As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements." [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>33</sup> However, see paragraphs .79 through .82 of this section for a discussion of the auditor's communication responsibilities. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>34</sup> Section 312.10 states that there is a distinction between the auditor's response to detected misstatements due to error and those due to fraud. When fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>35</sup> See section 508 for guidance on auditors' reports issued in connection with audits of financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>36</sup> If the auditor believes senior management may be involved, discussion of the matter directly with the audit committee may be appropriate. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.78** The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility.<sup>37</sup> Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (a) the implications about the integrity of management and (b) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not possible to definitively describe when withdrawal is appropriate.<sup>38</sup> The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

## Communicating About Possible Fraud to Management, the Audit Committee, and Others<sup>39</sup>

**.79** Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. This is appropriate even if the matter might be considered inconsequential, such as a minor defalcation by an employee at a low level in the entity's organization. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee. In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

**.80** If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected), the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance.<sup>[40]</sup> (See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, paragraph .04). The auditor

---

<sup>37</sup> See footnote 11. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>38</sup> If the auditor, subsequent to the date of the report on the audited financial statements, becomes aware that facts existed at that date that might have affected the report had the auditor been aware of such facts, the auditor should refer to section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, for guidance. Furthermore, section 315, *Communications Between Predecessor and Successor Auditors*, paragraphs .21 and .22, provide guidance regarding communication with a predecessor auditor. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>39</sup> The requirements to communicate noted in paragraphs .79 through .82 extend to any intentional misstatement of financial statements (see paragraph .03). However, the communication may use terms other than fraud—for example, irregularity, intentional misstatement, misappropriation, or defalcations—if there is possible confusion with a legal definition of fraud or other reason to prefer alternative terms. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>[40]</sup> [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

also should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud (see paragraph .44) represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

**.81** The auditor also may wish to communicate other risks of fraud identified as a result of the assessment of the risks of material misstatements due to fraud. Such a communication may be a part of an overall communication to the audit committee of business and financial statement risks affecting the entity and/or in conjunction with the auditor communication about the quality of the entity's accounting principles (see section 380A.11).

**.82** The disclosure of possible fraud to parties other than the client's senior management and its audit committee ordinarily is not part of the auditor's responsibility and ordinarily would be precluded by the auditor's ethical or legal obligations of confidentiality unless the matter is reflected in the auditor's report. The auditor should recognize, however, that in the following circumstances a duty to disclose to parties outside the entity may exist:

- a. To comply with certain legal and regulatory requirements<sup>41</sup>
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*<sup>42</sup>
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance<sup>43</sup>

Because potential conflicts between the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters covered by paragraphs .79 through .81 with parties outside the client.

## Documenting the Auditor's Consideration of Fraud

**.83** The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed (See paragraphs .14 through .17.)

---

<sup>41</sup> These requirements include reports in connection with the termination of the engagement, such as when the entity reports an auditor change on Form 8-K and the fraud or related risk factors constitute a *reportable event* or is the source of a *disagreement*, as these terms are defined in Item 304 of Regulation S-K. These requirements also include reports that may be required, under certain circumstances, pursuant to Section 10A(b)1 of the Securities Exchange Act of 1934 relating to an illegal act that has a material effect on the financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>42</sup> Section 315 requires the specific permission of the client. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

<sup>43</sup> For example, *Government Auditing Standards* (the Yellow Book) require auditors to report fraud or illegal acts directly to parties outside the audited entity in certain circumstances. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud (See paragraphs .19 through .34.)
- Specific risks of material misstatement due to fraud that were identified (see paragraphs .35 through .45), and a description of the auditor's response to those risks (See paragraphs .46 through .56.)
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion (See paragraph .41.)
- The results of the procedures performed to further address the risk of management override of controls (See paragraphs .58 through .67.)
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions (See paragraphs .68 through .73.)
- The nature of the communications about fraud made to management, the audit committee, and others (See paragraphs .79 through .82.)

## Effective Date

**.84** This section is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of this section is permissible.

.85

## Appendix

### Examples of Fraud Risk Factors

**A.1** This appendix contains examples of risk factors discussed in paragraphs .31 through .33 of the section. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

### Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

**A.2** The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

#### Incentives/Pressures

- a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):
  - High degree of competition or market saturation, accompanied by declining margins
  - High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
  - Significant declines in customer demand and increasing business failures in either the industry or overall economy
  - Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
  - Recurring negative cash flows from operations and an inability to generate cash flows from operations while reporting earnings and earnings growth
  - Rapid growth or unusual profitability, especially compared to that of other companies in the same industry
  - New accounting, statutory, or regulatory requirements
- b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:
  - Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages

- Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures
  - Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
  - Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- c. Information available indicates that management or the board of directors' personal financial situation is threatened by the entity's financial performance arising from the following:
- Significant financial interests in the entity
  - Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow<sup>1</sup>
  - Personal guarantees of debts of the entity
- d. There is excessive pressure on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals.

## Opportunities

- a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:
- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm
  - A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
  - Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
  - Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions
  - Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist
  - Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification

---

<sup>1</sup> Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

- b. There is ineffective monitoring of management as a result of the following:
- Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls
  - Ineffective board of directors or audit committee oversight over the financial reporting process and internal control
- c. There is a complex or unstable organizational structure, as evidenced by the following:
- Difficulty in determining the organization or individuals that have controlling interest in the entity
  - Overly complex organizational structure involving unusual legal entities or managerial lines of authority
  - High turnover of senior management, counsel, or board members
- d. Internal control components are deficient as a result of the following:
- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required)
  - High turnover rates or employment of ineffective accounting, internal audit, or information technology staff
  - Ineffective accounting and information systems, including situations involving significant deficiencies or material weaknesses in internal control

### Attitudes/Rationalizations

Risk factors reflective of attitudes/rationalizations by board members, management, or employees, that allow them to engage in and/or justify fraudulent financial reporting, may not be susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from fraudulent financial reporting. For example, auditors may become aware of the following information that may indicate a risk factor:

- Ineffective communication, implementation, support, or enforcement of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or board members alleging fraud or violations of laws and regulations
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend
- A practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts
- Management failing to correct known significant deficiencies or material weaknesses in internal control on a timely basis
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons

- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
  - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
  - Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report
  - Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee
  - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

### **Risk Factors Relating to Misstatements Arising From Misappropriation of Assets**

**A.3** Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalizations. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and weaknesses in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

#### **Incentives/Pressures**

- a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:
  - Known or anticipated future employee layoffs
  - Recent or anticipated changes to employee compensation or benefit plans
  - Promotions, compensation, or other rewards inconsistent with expectations

#### **Opportunities**

- a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:
  - Large amounts of cash on hand or processed
  - Inventory items that are small in size, of high value, or in high demand

- Easily convertible assets, such as bearer bonds, diamonds, or computer chips
  - Fixed assets that are small in size, marketable, or lacking observable identification of ownership
- b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:
- Inadequate segregation of duties or independent checks
  - Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations
  - Inadequate job applicant screening of employees with access to assets
  - Inadequate recordkeeping with respect to assets
  - Inadequate system of authorization and approval of transactions (for example, in purchasing)
  - Inadequate physical safeguards over cash, investments, inventory, or fixed assets
  - Lack of complete and timely reconciliations of assets
  - Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns
  - Lack of mandatory vacations for employees performing key control functions
  - Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation
  - Inadequate access controls over automated records, including controls over and review of computer systems event logs.

## Attitudes/Rationalizations

Risk factors reflective of employee attitudes/rationalizations that allow them to justify misappropriations of assets, are generally not susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from misappropriation of assets. For example, auditors may become aware of the following attitudes or behavior of employees who have access to assets susceptible to misappropriation:

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
- Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

[Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

## Exhibit

### Management Antifraud Programs and Controls

#### Guidance to Help Prevent, Deter, and Detect Fraud

(This exhibit is reprinted for the reader's convenience but is not an integral part of the section.)

This document is being issued jointly by the following organizations:

American Institute of Certified Public Accountants

Association of Certified Fraud Examiners

Financial Executives International

Information Systems Audit and Control Association

The Institute of Internal Auditors

Institute of Management Accountants

Society for Human Resource Management

In addition, we would also like to acknowledge the American Accounting Association, the Defense Industry Initiative, and the National Association of Corporate Directors for their review of the document and helpful comments and materials.

We gratefully acknowledge the valuable contribution provided by the Anti-Fraud Detection Subgroup:

Daniel D. Montgomery, *Chair*

Toby J.F. Bishop

Dennis H. Chookaszian

Susan A. Finn

Dana Hermanson

David L. Landsittel

Carol A. Langelier

Joseph T. Wells

Janice Wilkins

Finally, we thank the staff of the American Institute of Certified Public Accountants for their support on this project:

This document was commissioned by the Fraud Task Force of the AICPA's Auditing Standards Board. This document has not been adopted, approved, disapproved, or otherwise acted upon by a board, committee, governing body, or membership of the above issuing organizations.

## **Preface**

Some organizations have significantly lower levels of misappropriation of assets and are less susceptible to fraudulent financial reporting than other organizations because these organizations take proactive steps to prevent or deter fraud. It is only those organizations that seriously consider fraud risks and take proactive steps to create the right kind of climate to reduce its occurrence that have success in preventing fraud. This document identifies the key participants in this antifraud effort, including the board of directors, management, internal and independent auditors, and certified fraud examiners.

Management may develop and implement some of these programs and controls in response to specific identified risks of material misstatement of financial statements due to fraud. In other cases, these programs and controls may be a part of the entity's enterprise-wide risk management activities.

Management is responsible for designing and implementing systems and procedures for the prevention and detection of fraud and, along with the board of directors, for ensuring a culture and environment that promotes honesty and ethical behavior. However, because of the characteristics of fraud, a material misstatement of financial statements due to fraud may occur notwithstanding the presence of programs and controls such as those described in this document.

## Introduction

Fraud can range from minor employee theft and unproductive behavior to misappropriation of assets and fraudulent financial reporting. Material financial statement fraud can have a significant adverse effect on an entity's market value, reputation, and ability to achieve its strategic objectives. A number of highly publicized cases have heightened the awareness of the effects of fraudulent financial reporting and have led many organizations to be more proactive in taking steps to prevent or deter its occurrence. Misappropriation of assets, though often not material to the financial statements, can nonetheless result in substantial losses to an entity if a dishonest employee has the incentive and opportunity to commit fraud.

The risk of fraud can be reduced through a combination of prevention, deterrence, and detection measures. However, fraud can be difficult to detect because it often involves concealment through falsification of documents or collusion among management, employees, or third parties. Therefore, it is important to place a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals that they should not commit fraud because of the likelihood of detection and punishment. Moreover, prevention and deterrence measures are much less costly than the time and expense required for fraud detection and investigation.

An entity's management has both the responsibility and the means to implement measures to reduce the incidence of fraud. The measures an organization takes to prevent and deter fraud also can help create a positive workplace environment that can enhance the entity's ability to recruit and retain high-quality employees.

Research suggests that the most effective way to implement measures to reduce wrongdoing is to base them on a set of core values that are embraced by the entity. These values provide an overarching message about the key principles guiding all employees' actions. This provides a platform upon which a more detailed code of conduct can be constructed, giving more specific guidance about permitted and prohibited behavior, based on applicable laws and the organization's values. Management needs to clearly articulate that all employees will be held accountable to act within the organization's code of conduct.

This document identifies measures entities can implement to prevent, deter, and detect fraud. It discusses these measures in the context of three fundamental elements. Broadly stated, these fundamental elements are (1) create and maintain a *culture* of honesty and high ethics; (2) *evaluate* the risks of fraud and implement the processes, procedures, and controls needed to mitigate the risks and reduce the opportunities for fraud; and (3) develop an appropriate *oversight* process. Although the entire management team shares the responsibility for implementing and monitoring these activities, with oversight from the board of directors, the entity's chief executive officer (CEO) should initiate and support such measures. Without the CEO's active support, these measures are less likely to be effective.

The information presented in this document generally is applicable to entities of all sizes. However, the degree to which certain programs and controls are applied in smaller, less-complex entities and the formality of their application are likely to differ from larger organizations. For example, management of a smaller entity (or the owner of an owner-managed entity), along with those charged with governance of the financial reporting process, are responsible for creating a culture of honesty and high ethics. Management also is responsible for implementing a system of internal controls commensurate with the nature and size of the organization, but smaller entities may find that certain types

of control activities are not relevant because of the involvement of and controls applied by management. However, all entities must make it clear that unethical or dishonest behavior will not be tolerated.

## Creating a Culture of Honesty and High Ethics

It is the organization's responsibility to create a culture of honesty and high ethics and to clearly communicate acceptable behavior and expectations of each employee. Such a culture is rooted in a strong set of core values (or value system) that provides the foundation for employees as to how the organization conducts its business. It also allows an entity to develop an ethical framework that covers (1) fraudulent financial reporting, (2) misappropriation of assets, and (3) corruption as well as other issues.<sup>1</sup>

Creating a culture of honesty and high ethics should include the following.

### *Setting the Tone at the Top*

Directors and officers of corporations set the "tone at the top" for ethical behavior within any organization. Research in moral development strongly suggests that honesty can best be reinforced when a proper example is set—sometimes referred to as the tone at the top. The management of an entity cannot act one way and expect others in the entity to behave differently.

In many cases, particularly in larger organizations, it is necessary for management to both behave ethically and openly communicate its expectations for ethical behavior because most employees are not in a position to observe management's actions. Management must show employees through its words and actions that dishonest or unethical behavior will not be tolerated, even if the result of the action benefits the entity. Moreover, it should be evident that all employees will be treated equally, regardless of their position.

For example, statements by management regarding the absolute need to meet operating and financial targets can create undue pressures that may lead employees to commit fraud to achieve them. Setting unachievable goals for employees can give them two unattractive choices: fail or cheat. In contrast, a statement from management that says, "We are aggressive in pursuing our targets, while requiring truthful financial reporting at all times," clearly indicates to employees that integrity is a requirement. This message also conveys that the entity has "zero tolerance" for unethical behavior, including fraudulent financial reporting.

The cornerstone of an effective antifraud environment is a culture with a strong value system founded on integrity. This value system often is reflected in a code of conduct.<sup>2</sup> The code of conduct should reflect the core values of the entity and guide employees in making appropriate decisions during their workday. The code of conduct might include such topics as ethics, confidentiality, conflicts of interest, intellectual property, sexual harassment, and fraud.<sup>3</sup> For a code of

---

<sup>1</sup> Corruption includes bribery and other illegal acts.

<sup>2</sup> An entity's value system also could be reflected in an ethics policy, a statement of business principles, or some other concise summary of guiding principles.

<sup>3</sup> Although the discussion in this document focuses on fraud, the subject of fraud often is considered in the context of a broader set of principles that govern an organization. Some organizations, however, may elect to develop a fraud policy separate from an ethics policy. Specific examples of topics in a fraud policy might include a requirement to comply with all laws and regulations and explicit guidance regarding making payments to obtain contracts, holding pricing discussions with competitors, environmental discharges, relationships with vendors, and maintenance of accurate books and records.

conduct to be effective, it should be communicated to all personnel in an understandable fashion. It also should be developed in a participatory and positive manner that will result in both management and employees taking ownership of its content. Finally, the code of conduct should be included in an employee handbook or policy manual, or in some other formal document or location (for example, the entity's intranet) so it can be referred to when needed.

Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. For examples of codes of conduct, see Attachment 1, "AICPA 'CPA's Handbook of Fraud and Commercial Crime Prevention,' An Organizational Code of Conduct," and Attachment 2, "Financial Executives International Code of Ethics Statement" provided by Financial Executives International. In addition, visit the Institute of Management Accountant's Ethics Center at [www.imanet.org](http://www.imanet.org) for their members' standards of ethical conduct.

### ***Creating a Positive Workplace Environment***

Research results indicate that wrongdoing occurs less frequently when employees have positive feelings about an entity than when they feel abused, threatened, or ignored. Without a positive workplace environment, there are more opportunities for poor employee morale, which can affect an employee's attitude about committing fraud against an entity. Factors that detract from a positive work environment and may increase the risk of fraud include:

- Top management that does not seem to care about or reward appropriate behavior
- Negative feedback and lack of recognition for job performance
- Perceived inequities in the organization
- Autocratic rather than participative management
- Low organizational loyalty or feelings of ownership
- Unreasonable budget expectations or other financial targets
- Fear of delivering "bad news" to supervisors and/or management
- Less-than-competitive compensation
- Poor training and promotion opportunities
- Lack of clear organizational responsibilities
- Poor communication practices or methods within the organization

The entity's human resources department often is instrumental in helping to build a corporate culture and a positive work environment. Human resource professionals are responsible for implementing specific programs and initiatives, consistent with management's strategies, that can help to mitigate many of the detractors mentioned above. Mitigating factors that help create a positive work environment and reduce the risk of fraud may include:

- Recognition and reward systems that are in tandem with goals and results
- Equal employment opportunities
- Team-oriented, collaborative decision-making policies
- Professionally administered compensation programs
- Professionally administered training programs and an organizational priority of career development

Employees should be empowered to help create a positive workplace environment and support the entity's values and code of conduct. They should be given the opportunity to provide input to the development and updating of the entity's code of conduct, to ensure that it is relevant, clear, and fair. Involving employees in this fashion also may effectively contribute to the oversight of the entity's code of conduct and an environment of ethical behavior (see the section titled "Developing an Appropriate Oversight Process").

Employees should be given the means to obtain advice internally before making decisions that appear to have significant legal or ethical implications. They should also be encouraged and given the means to communicate concerns, anonymously if preferred, about potential violations of the entity's code of conduct, without fear of retribution. Many organizations have implemented a process for employees to report on a confidential basis any actual or suspected wrongdoing, or potential violations of the code of conduct or ethics policy. For example, some organizations use a telephone "hotline" that is directed to or monitored by an ethics officer, fraud officer, general counsel, internal audit director, or another trusted individual responsible for investigating and reporting incidents of fraud or illegal acts.

### ***Hiring and Promoting Appropriate Employees***

Each employee has a unique set of values and personal code of ethics. When faced with sufficient pressure and a perceived opportunity, some employees will behave dishonestly rather than face the negative consequences of honest behavior. The threshold at which dishonest behavior starts, however, will vary among individuals. If an entity is to be successful in preventing fraud, it must have effective policies that minimize the chance of hiring or promoting individuals with low levels of honesty, especially for positions of trust.

Proactive hiring and promotion procedures may include:

- Conducting background investigations on individuals being considered for employment or for promotion to a position of trust<sup>4</sup>
- Thoroughly checking a candidate's education, employment history, and personal references
- Periodic training of all employees about the entity's values and code of conduct, (training is addressed in the following section)
- Incorporating into regular performance reviews an evaluation of how each individual has contributed to creating an appropriate workplace environment in line with the entity's values and code of conduct
- Continuous objective evaluation of compliance with the entity's values and code of conduct, with violations being addressed immediately

### ***Training***

New employees should be trained at the time of hiring about the entity's values and its code of conduct. This training should explicitly cover expectations of all employees regarding (1) their duty to communicate certain matters; (2) a list of the types of matters, including actual or suspected fraud, to be communicated along with specific examples; and (3) information on how to communicate those matters. There also should be an affirmation from senior management regarding employee expectations and communication responsibilities. Such training should include an element of "fraud awareness," the tone of which should be

---

<sup>4</sup> Some organizations also have considered follow-up investigations, particularly for employees in positions of trust, on a periodic basis (for example, every five years) or as circumstances dictate.

positive but nonetheless stress that fraud can be costly (and detrimental in other ways) to the entity and its employees.

In addition to training at the time of hiring, employees should receive refresher training periodically thereafter. Some organizations may consider ongoing training for certain positions, such as purchasing agents or employees with financial reporting responsibilities. Training should be specific to an employee's level within the organization, geographic location, and assigned responsibilities. For example, training for senior manager level personnel would normally be different from that of nonsupervisory employees, and training for purchasing agents would be different from that of sales representatives.

### **Confirmation**

Management needs to clearly articulate that all employees will be held accountable to act within the entity's code of conduct. All employees within senior management and the finance function, as well as other employees in areas that might be exposed to unethical behavior (for example, procurement, sales and marketing) should be required to sign a code of conduct statement annually, at a minimum.

Requiring periodic confirmation by employees of their responsibilities will not only reinforce the policy but may also deter individuals from committing fraud and other violations and might identify problems before they become significant. Such confirmation may include statements that the individual understands the entity's expectations, has complied with the code of conduct, and is not aware of any violations of the code of conduct other than those the individual lists in his or her response. Although people with low integrity may not hesitate to sign a false confirmation, most people will want to avoid making a false statement in writing. Honest individuals are more likely to return their confirmations and to disclose what they know (including any conflicts of interest or other personal exceptions to the code of conduct). Thorough follow-up by internal auditors or others regarding nonreplies may uncover significant issues.

### **Discipline**

The way an entity reacts to incidents of alleged or suspected fraud will send a strong deterrent message throughout the entity, helping to reduce the number of future occurrences. The following actions should be taken in response to an alleged incident of fraud:

- A thorough investigation of the incident should be conducted.<sup>5</sup>
- Appropriate and consistent actions should be taken against violators.
- Relevant controls should be assessed and improved.
- Communication and training should occur to reinforce the entity's values, code of conduct, and expectations.

Expectations about the consequences of committing fraud must be clearly communicated throughout the entity. For example, a strong statement from management that dishonest actions will not be tolerated, and that violators may be terminated and referred to the appropriate authorities, clearly establishes consequences and can be a valuable deterrent to wrongdoing. If wrongdoing occurs

---

<sup>5</sup> Many entities of sufficient size are employing antifraud professionals, such as certified fraud examiners, who are responsible for resolving allegations of fraud within the organization and who also assist in the detection and deterrence of fraud. These individuals typically report their findings internally to the corporate security, legal, or internal audit departments. In other instances, such individuals may be empowered directly by the board of directors or its audit committee.

and an employee is disciplined, it can be helpful to communicate that fact, on a no-name basis, in an employee newsletter or other regular communication to employees. Seeing that other people have been disciplined for wrongdoing can be an effective deterrent, increasing the perceived likelihood of violators being caught and punished. It also can demonstrate that the entity is committed to an environment of high ethical standards and integrity.

## Evaluating Antifraud Processes and Controls

Neither fraudulent financial reporting nor misappropriation of assets can occur without a perceived opportunity to commit and conceal the act. Organizations should be proactive in reducing fraud opportunities by (1) identifying and measuring fraud risks, (2) taking steps to mitigate identified risks, and (3) implementing and monitoring appropriate preventive and detective internal controls and other deterrent measures.

### *Identifying and Measuring Fraud Risks*

Management has primary responsibility for establishing and monitoring all aspects of the entity's fraud risk-assessment and prevention activities.<sup>6</sup> Fraud risks often are considered as part of an enterprise-wide risk management program, though they may be addressed separately.<sup>7</sup> The fraud risk-assessment process should consider the vulnerability of the entity to fraudulent activity (fraudulent financial reporting, misappropriation of assets, and corruption) and whether any of those exposures could result in a material misstatement of the financial statements or material loss to the organization. In identifying fraud risks, organizations should consider organizational, industry, and country-specific characteristics that influence the risk of fraud.

The nature and extent of management's risk assessment activities should be commensurate with the size of the entity and complexity of its operations. For example, the risk assessment process is likely to be less formal and less structured in smaller entities. However, management should recognize that fraud can occur in organizations of any size or type, and that almost any employee may be capable of committing fraud given the right set of circumstances. Accordingly, management should develop a heightened "fraud awareness" and an appropriate fraud risk-management program, with oversight from the board of directors or audit committee.

### *Mitigating Fraud Risks*

It may be possible to reduce or eliminate certain fraud risks by making changes to the entity's activities and processes. An entity may choose to sell certain segments of its operations, cease doing business in certain locations, or reorganize its business processes to eliminate unacceptable risks. For example, the risk of misappropriation of funds may be reduced by implementing a central lockbox at a bank to receive payments instead of receiving money at the entity's various locations. The risk of corruption may be reduced by closely monitoring the

---

<sup>6</sup> Management may elect to have internal audit play an active role in the development, monitoring, and ongoing assessment of the entity's fraud risk-management program. This may include an active role in the development and communication of the entity's code of conduct or ethics policy, as well as in investigating actual or alleged instances of noncompliance.

<sup>7</sup> Some organizations may perform a periodic self-assessment using questionnaires or other techniques to identify and measure risks. Self-assessment may be less reliable in identifying the risk of fraud due to a lack of experience with fraud (although many organizations experience some form of fraud and abuse, material financial statement fraud or misappropriation of assets is a rare event for most) and because management may be unwilling to acknowledge openly that they might commit fraud given sufficient pressure and opportunity.

entity's procurement process. The risk of financial statement fraud may be reduced by implementing shared services centers to provide accounting services to multiple segments, affiliates, or geographic locations of an entity's operations. A shared services center may be less vulnerable to influence by local operations managers and may be able to implement more extensive fraud detection measures cost-effectively.

### ***Implementing and Monitoring Appropriate Internal Controls***

Some risks are inherent in the environment of the entity, but most can be addressed with an appropriate system of internal control. Once fraud risk assessment has taken place, the entity can identify the processes, controls, and other procedures that are needed to mitigate the identified risks. Effective internal control will include a well-developed control environment, an effective and secure information system, and appropriate control and monitoring activities.<sup>8</sup> Because of the importance of information technology in supporting operations and the processing of transactions, management also needs to implement and maintain appropriate controls, whether automated or manual, over computer-generated information.

In particular, management should evaluate whether appropriate internal controls have been implemented in any areas management has identified as posing a higher risk of fraudulent activity, as well as controls over the entity's financial reporting process. Because fraudulent financial reporting may begin in an interim period, management also should evaluate the appropriateness of internal controls over interim financial reporting.

Fraudulent financial reporting by upper-level management typically involves override of internal controls within the financial reporting process. Because management has the ability to override controls, or to influence others to perpetrate or conceal fraud, the need for a strong value system and a culture of ethical financial reporting becomes increasingly important. This helps create an environment in which other employees will decline to participate in committing a fraud and will use established communication procedures to report any requests to commit wrongdoing. The potential for management override also increases the need for appropriate oversight measures by the board of directors or audit committee, as discussed in the following section.

Fraudulent financial reporting by lower levels of management and employees may be deterred or detected by appropriate monitoring controls, such as having higher-level managers review and evaluate the financial results reported by individual operating units or subsidiaries. Unusual fluctuations in results of particular reporting units, or the lack of expected fluctuations, may indicate potential manipulation by departmental or operating unit managers or staff.

### **Developing an Appropriate Oversight Process**

To effectively prevent or deter fraud, an entity should have an appropriate oversight function in place. Oversight can take many forms and can be performed by many within and outside the entity, under the overall oversight of the audit committee (or board of directors where no audit committee exists).

---

<sup>8</sup> The report of the Committee of Sponsoring Organizations (COSO) of the Treadway Commission, *Internal Control—Integrated Framework*, provides reasonable criteria for management to use in evaluating the effectiveness of the entity's system of internal control.

### **Audit Committee or Board of Directors**

The audit committee (or the board of directors where no audit committee exists) should evaluate management's identification of fraud risks, implementation of antifraud measures, and creation of the appropriate "tone at the top." Active oversight by the audit committee can help to reinforce management's commitment to creating a culture with "zero tolerance" for fraud. An entity's audit committee also should ensure that senior management (in particular, the CEO) implements appropriate fraud deterrence and prevention measures to better protect investors, employees, and other stakeholders. The audit committee's evaluation and oversight not only helps make sure that senior management fulfills its responsibility, but also can serve as a deterrent to senior management engaging in fraudulent activity (that is, by ensuring an environment is created whereby any attempt by senior management to involve employees in committing or concealing fraud would lead promptly to reports from such employees to appropriate persons, including the audit committee).

The audit committee also plays an important role in helping the board of directors fulfill its oversight responsibilities with respect to the entity's financial reporting process and the system of internal control.<sup>9</sup> In exercising this oversight responsibility, the audit committee should consider the potential for management override of controls or other inappropriate influence over the financial reporting process. For example, the audit committee may obtain from the internal auditors and independent auditors their views on management's involvement in the financial reporting process and, in particular, the ability of management to override information processed by the entity's financial reporting system (for example, the ability for management or others to initiate or record nonstandard journal entries). The audit committee also may consider reviewing the entity's reported information for reasonableness compared with prior or forecasted results, as well as with peers or industry averages. In addition, information received in communications from the independent auditors<sup>10</sup> can assist the audit committee in assessing the strength of the entity's internal control and the potential for fraudulent financial reporting.

As part of its oversight responsibilities, the audit committee should encourage management to provide a mechanism for employees to report concerns about unethical behavior, actual or suspected fraud, or violations of the entity's code of conduct or ethics policy. The committee should then receive periodic reports describing the nature, status, and eventual disposition of any fraud or unethical conduct. A summary of the activity, follow-up and disposition also should be provided to the full board of directors.

If senior management is involved in fraud, the next layer of management may be the most likely to be aware of it. As a result, the audit committee (and other directors) should consider establishing an open line of communication with members of management one or two levels below senior management to assist in identifying fraud at the highest levels of the organization or investigating any fraudulent activity that might occur.<sup>11</sup> The audit committee typically has

<sup>9</sup> See the Report of the NACD Blue Ribbon Commission on the Audit Committee, (Washington, D.C.: National Association of Corporate Directors, 2000). For the board's role in the oversight of risk management, see Report of the NACD Blue Ribbon Commission on Risk Oversight, (Washington, D.C.: National Association of Corporate Directors, 2002).

<sup>10</sup> See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, and section 380A, *Communications With Audit Committees*. [Footnote revised, May 2006, due to conforming changes necessary due to the issuance of Statement on Standards No. 112.]

<sup>11</sup> *Report of the NACD Best Practices Council: Coping with Fraud and Other Illegal Activity, A Guide for Directors, CEOs, and Senior Managers* (1998) sets forth "basic principles" and "implementation approaches" for dealing with fraud and other illegal activity.

the ability and authority to investigate any alleged or suspected wrongdoing brought to its attention. Most audit committee charters empower the committee to investigate any matters within the scope of its responsibilities, and to retain legal, accounting, and other professional advisers as needed to advise the committee and assist in its investigation.

All audit committee members should be financially literate, and each committee should have at least one financial expert. The financial expert should possess:

- An understanding of generally accepted accounting principles and audits of financial statements prepared under those principles. Such understanding may have been obtained either through education or experience. It is important for someone on the audit committee to have a working knowledge of those principles and standards.
- Experience in the preparation and/or the auditing of financial statements of an entity of similar size, scope and complexity as the entity on whose board the committee member serves. The experience would generally be as a chief financial officer, chief accounting officer, controller, or auditor of a similar entity. This background will provide a necessary understanding of the transactional and operational environment that produces the issuer's financial statements. It will also bring an understanding of what is involved in, for example, appropriate accounting estimates, accruals, and reserve provisions, and an appreciation of what is necessary to maintain a good internal control environment.
- Experience in internal governance and procedures of audit committees, obtained either as an audit committee member, a senior corporate manager responsible for answering to the audit committee, or an external auditor responsible for reporting on the execution and results of annual audits.

### **Management**

Management is responsible for overseeing the activities carried out by employees, and typically does so by implementing and monitoring processes and controls such as those discussed previously. However, management also may initiate, participate in, or direct the commission and concealment of a fraudulent act. Accordingly, the audit committee (or the board of directors where no audit committee exists) has the responsibility to oversee the activities of senior management and to consider the risk of fraudulent financial reporting involving the override of internal controls or collusion (see discussion on the audit committee and board of directors above).

Public companies should include a statement in the annual report acknowledging management's responsibility for the preparation of the financial statements and for establishing and maintaining an effective system of internal control. This will help improve the public's understanding of the respective roles of management and the auditor. This statement has also been generally referred to as a "Management Report" or "Management Certificate." Such a statement can provide a convenient vehicle for management to describe the nature and manner of preparation of the financial information and the adequacy of the internal accounting controls. Logically, the statement should be presented in close proximity to the formal financial statements. For example, it could appear near the independent auditor's report, or in the financial review or management analysis section.

### ***Internal Auditors***

An effective internal audit team can be extremely helpful in performing aspects of the oversight function. Their knowledge about the entity may enable them to identify indicators that suggest fraud has been committed. The *Standards for the Professional Practice of Internal Auditing* (IIA Standards), issued by the Institute of Internal Auditors, state, "The internal auditor should have sufficient knowledge to identify the indicators of fraud but is not expected to have the expertise of a person whose primary responsibility is detecting and investigating fraud." Internal auditors also have the opportunity to evaluate fraud risks and controls and to recommend action to mitigate risks and improve controls. Specifically, the IIA Standards require internal auditors to assess risks facing their organizations. This risk assessment is to serve as the basis from which audit plans are devised and against which internal controls are tested. The IIA Standards require the audit plan to be presented to and approved by the audit committee (or board of directors where no audit committee exists). The work completed as a result of the audit plan provides assurance on which management's assertion about controls can be made.

Internal audits can be both a detection and a deterrence measure. Internal auditors can assist in the deterrence of fraud by examining and evaluating the adequacy and the effectiveness of the system of internal control, commensurate with the extent of the potential exposure or risk in the various segments of the organization's operations. In carrying out this responsibility, internal auditors should, for example, determine whether:

- The organizational environment fosters control consciousness.
- Realistic organizational goals and objectives are set.
- Written policies (for example, a code of conduct) exist that describe prohibited activities and the action required whenever violations are discovered.
- Appropriate authorization policies for transactions are established and maintained.
- Policies, practices, procedures, reports, and other mechanisms are developed to monitor activities and safeguard assets, particularly in high-risk areas.
- Communication channels provide management with adequate and reliable information.
- Recommendations need to be made for the establishment or enhancement of cost-effective controls to help deter fraud.

Internal auditors may conduct proactive auditing to search for corruption, misappropriation of assets, and financial statement fraud. This may include the use of computer-assisted audit techniques to detect particular types of fraud. Internal auditors also can employ analytical and other procedures to isolate anomalies and perform detailed reviews of high-risk accounts and transactions to identify potential financial statement fraud. The internal auditors should have an independent reporting line directly to the audit committee, to enable them to express any concerns about management's commitment to appropriate internal controls or to report suspicions or allegations of fraud involving senior management.

### ***Independent Auditors***

Independent auditors can assist management and the board of directors (or audit committee) by providing an assessment of the entity's process for identifying,

assessing, and responding to the risks of fraud. The board of directors (or audit committee) should have an open and candid dialogue with the independent auditors regarding management's risk assessment process and the system of internal control. Such a dialogue should include a discussion of the susceptibility of the entity to fraudulent financial reporting and the entity's exposure to misappropriation of assets.

### ***Certified Fraud Examiners***

Certified fraud examiners may assist the audit committee and board of directors with aspects of the oversight process either directly or as part of a team of internal auditors or independent auditors. Certified fraud examiners can provide extensive knowledge and experience about fraud that may not be available within a corporation. They can provide more objective input into management's evaluation of the risk of fraud (especially fraud involving senior management, such as financial statement fraud) and the development of appropriate antifraud controls that are less vulnerable to management override. They can assist the audit committee and board of directors in evaluating the fraud risk assessment and fraud prevention measures implemented by management. Certified fraud examiners also conduct examinations to resolve allegations or suspicions of fraud, reporting either to an appropriate level of management or to the audit committee or board of directors, depending upon the nature of the issue and the level of personnel involved.

## Attachment 1: AICPA "CPA's Handbook of Fraud and Commercial Crime Prevention," An Organizational Code of Conduct

The following is an example of an organizational code of conduct, which includes definitions of what is considered unacceptable, and the consequences of any breaches thereof. The specific content and areas addressed in an entity's code of conduct should be specific to that entity.

### *Organizational Code of Conduct*

The Organization and its employees must, at all times, comply with all applicable laws and regulations. The Organization will not condone the activities of employees who achieve results through violation of the law or unethical business dealings. This includes any payments for illegal acts, indirect contributions, rebates, and bribery. The Organization does not permit any activity that fails to stand the closest possible public scrutiny.

All business conduct should be well above the minimum standards required by law. Accordingly, employees must ensure that their actions cannot be interpreted as being, in any way, in contravention of the laws and regulations governing the Organization's worldwide operations.

Employees uncertain about the application or interpretation of any legal requirements should refer the matter to their superior, who, if necessary, should seek the advice of the legal department.

### *General Employee Conduct*

The Organization expects its employees to conduct themselves in a businesslike manner. Drinking, gambling, fighting, swearing, and similar unprofessional activities are strictly prohibited while on the job.

Employees must not engage in sexual harassment, or conduct themselves in a way that could be construed as such, for example, by using inappropriate language, keeping or posting inappropriate materials in their work area, or accessing inappropriate materials on their computer.

### *Conflicts of Interest*

The Organization expects that employees will perform their duties conscientiously, honestly, and in accordance with the best interests of the Organization. Employees must not use their position or the knowledge gained as a result of their position for private or personal advantage. Regardless of the circumstances, if employees sense that a course of action they have pursued, are presently pursuing, or are contemplating pursuing may involve them in a conflict of interest with their employer, they should immediately communicate all the facts to their superior.

### *Outside Activities, Employment, and Directorships*

All employees share a serious responsibility for the Organization's good public relations, especially at the community level. Their readiness to help with religious, charitable, educational, and civic activities brings credit to the Organization and is encouraged. Employees must, however, avoid acquiring any business interest or participating in any other activity outside the Organization that would, or would appear to:

- Create an excessive demand upon their time and attention, thus depriving the Organization of their best efforts on the job.
- Create a conflict of interest—an obligation, interest, or distraction—that may interfere with the independent exercise of judgment in the Organization's best interest.

*Relationships With Clients and Suppliers*

Employees should avoid investing in or acquiring a financial interest for their own accounts in any business organization that has a contractual relationship with the Organization, or that provides goods or services, or both to the Organization, if such investment or interest could influence or create the impression of influencing their decisions in the performance of their duties on behalf of the Organization.

*Gifts, Entertainment, and Favors*

Employees must not accept entertainment, gifts, or personal favors that could, in any way, influence, or appear to influence, business decisions in favor of any person or organization with whom or with which the Organization has, or is likely to have, business dealings. Similarly, employees must not accept any other preferential treatment under these circumstances because their position with the Organization might be inclined to, or be perceived to, place them under obligation.

*Kickbacks and Secret Commissions*

Regarding the Organization's business activities, employees may not receive payment or compensation of any kind, except as authorized under the Organization's remuneration policies. In particular, the Organization strictly prohibits the acceptance of kickbacks and secret commissions from suppliers or others. Any breach of this rule will result in immediate termination and prosecution to the fullest extent of the law.

*Organization Funds and Other Assets*

Employees who have access to Organization funds in any form must follow the prescribed procedures for recording, handling, and protecting money as detailed in the Organization's instructional manuals or other explanatory materials, or both. The Organization imposes strict standards to prevent fraud and dishonesty. If employees become aware of any evidence of fraud and dishonesty, they should immediately advise their superior or the Law Department so that the Organization can promptly investigate further.

When an employee's position requires spending Organization funds or incurring any reimbursable personal expenses, that individual must use good judgment on the Organization's behalf to ensure that good value is received for every expenditure.

Organization funds and all other assets of the Organization are for Organization purposes only and not for personal benefit. This includes the personal use of organizational assets, such as computers.

*Organization Records and Communications*

Accurate and reliable records of many kinds are necessary to meet the Organization's legal and financial obligations and to manage the affairs of the Organization. The Organization's books and records must reflect in an accurate and timely manner all business transactions. The employees responsible for accounting and recordkeeping must fully disclose and record all assets, liabilities, or both, and must exercise diligence in enforcing these requirements.

Employees must not make or engage in any false record or communication of any kind, whether internal or external, including but not limited to:

- False expense, attendance, production, financial, or similar reports and statements
- False advertising, deceptive marketing practices, or other misleading representations

*Dealing With Outside People and Organizations*

Employees must take care to separate their personal roles from their Organization positions when communicating on matters not involving Organization business. Employees must not use organization identification, stationery, supplies, and equipment for personal or political matters.

When communicating publicly on matters that involve Organization business, employees must not presume to speak for the Organization on any topic, unless they are certain that the views they express are those of the Organization, and it is the Organization's desire that such views be publicly disseminated.

When dealing with anyone outside the Organization, including public officials, employees must take care not to compromise the integrity or damage the reputation of either the Organization, or any outside individual, business, or government body.

*Prompt Communications*

In all matters relevant to customers, suppliers, government authorities, the public and others in the Organization, all employees must make every effort to achieve complete, accurate, and timely communications—responding promptly and courteously to all proper requests for information and to all complaints.

*Privacy and Confidentiality*

When handling financial and personal information about customers or others with whom the Organization has dealings, observe the following principles:

1. Collect, use, and retain only the personal information necessary for the Organization's business. Whenever possible, obtain any relevant information directly from the person concerned. Use only reputable and reliable sources to supplement this information.
2. Retain information only for as long as necessary or as required by law. Protect the physical security of this information.
3. Limit internal access to personal information to those with a legitimate business reason for seeking that information. Use only personal information for the purposes for which it was originally obtained. Obtain the consent of the person concerned before externally disclosing any personal information, unless legal process or contractual obligation provides otherwise.

## **Attachment 2: Financial Executives International Code of Ethics Statement**

The mission of Financial Executives International (FEI) includes significant efforts to promote ethical conduct in the practice of financial management throughout the world. Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. This code provides principles that members are expected to adhere to and advocate. They embody rules regarding individual and peer responsibilities, as well as responsibilities to employers, the public, and other stakeholders.

All members of FEI will:

1. Act with honesty and integrity, avoiding actual or apparent conflicts of interest in personal and professional relationships.
2. Provide constituents with information that is accurate, complete, objective, relevant, timely, and understandable.
3. Comply with rules and regulations of federal, state, provincial, and local governments, and other appropriate private and public regulatory agencies.
4. Act in good faith; responsibly; and with due care, competence, and diligence, without misrepresenting material facts or allowing one's independent judgment to be subordinated.
5. Respect the confidentiality of information acquired in the course of one's work except when authorized or otherwise legally obligated to disclose. Confidential information acquired in the course of one's work will not be used for personal advantage.
6. Share knowledge and maintain skills important and relevant to constituents' needs.
7. Proactively promote ethical behavior as a responsible partner among peers, in the work environment, and in the community.
8. Achieve responsible use of and control over all assets and resources employed or entrusted.

---

## AU Section 316A

# Consideration of Fraud in a Financial Statement Audit

(Supersedes SAS No. 82)

Source: SAS No. 99.

Effective for audits of financial statements for periods beginning on or after December 15, 2002.

## Introduction and Overview

.01 Section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph .02, states, "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. [footnote omitted]"<sup>1</sup> This section establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).<sup>2</sup>

.02 The following is an overview of the organization and content of this section:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs .05 through .12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph .13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs .14 through .18.)

---

<sup>1</sup> The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see section 312, *Audit Risk and Materiality in Conducting an Audit*, or fraud).

<sup>2</sup> Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). AT section 101, *Attest Engagements*, and CS section 100, *Consulting Services: Definitions and Standards*, provide guidance to accountants relating to the performance of such services.

- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by
  - a. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs .20 through .27.)
  - b. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs .28 through .30.)
  - c. Considering fraud risk factors. (See paragraphs .31 through .33, and the Appendix, "Examples of Fraud Risk Factors" [paragraph .85].)
  - d. Considering certain other information. (See paragraph .34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs .35 through .42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs .43 through .45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. (See paragraph .46 through .49.) The section requires the auditor to respond to the results of the risk assessment in three ways:
  - a. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned. (See paragraph .50.)
  - b. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed. (See paragraphs .51 through .56.)
  - c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls. (See paragraphs .57 through .67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs .68 through .74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs .75 through .78.)
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs .79 through .82.)

- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph .83.)

**.03** The requirements and guidance set forth in this section are intended to be integrated into an overall audit process, in a logical manner that is consistent with the requirements and guidance provided in other sections, including section 311, *Planning and Supervision*; section 312, *Audit Risk and Materiality in Conducting an Audit*; section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; and section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. Even though some requirements and guidance set forth in this section are presented in a manner that suggests a sequential audit process, auditing in fact involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly the sequence of the requirements and guidance in this section may be implemented differently among audit engagements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 109 and No. 110.]

**.04** Although this section focuses on the auditor's consideration of fraud in an audit of financial statements, it is management's responsibility to design and implement programs and controls to prevent, deter, and detect fraud.<sup>3</sup> That responsibility is described in section 110.03, which states, "Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, authorize, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements." Management, along with those who have responsibility for oversight of the financial reporting process (such as the audit committee, board of trustees, board of directors, or the owner in owner-managed entities), should set the proper tone; create and maintain a culture of honesty and high ethical standards; and establish appropriate controls to prevent, deter, and detect fraud. When management and those responsible for the oversight of the financial reporting process fulfill those responsibilities, the opportunities to commit fraud can be reduced significantly. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

## Description and Characteristics of Fraud

**.05** Fraud is a broad legal concept and auditors do not make legal determinations of whether fraud has occurred. Rather, the auditor's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. For purposes of the section, *fraud* is an intentional act that results in a material misstatement in financial statements that are the subject of an audit.<sup>4</sup>

---

<sup>3</sup> In its October 1987 report, the National Commission on Fraudulent Financial Reporting, also known as the Treadway Commission, noted, "The responsibility for reliable financial reporting resides first and foremost at the corporate level. Top management, starting with the chief executive officer, sets the tone and establishes the financial reporting environment. Therefore, reducing the risk of fraudulent financial reporting must start with the reporting company."

<sup>4</sup> Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether the misstatement is intentional or not.

.06 Two types of misstatements are relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets.

- *Misstatements arising from fraudulent financial reporting* are intentional misstatements or omissions of amounts or disclosures in financial statements designed to deceive financial statement users where the effect causes the financial statements not to be presented, in all material respects, in conformity with generally accepted accounting principles (GAAP).<sup>5</sup> Fraudulent financial reporting may be accomplished by the following:
  - Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
  - Misrepresentation in or intentional omission from the financial statements of events, transactions, or other significant information
  - Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Fraudulent financial reporting need not be the result of a grand plan or conspiracy. It may be that management representatives rationalize the appropriateness of a material misstatement, for example, as an aggressive rather than indefensible interpretation of complex accounting rules, or as a temporary misstatement of financial statements, including interim statements, expected to be corrected later when operational results improve.

- *Misstatements arising from misappropriation of assets* (sometimes referred to as theft or defalcation) involve the theft of an entity's assets where the effect of the theft causes the financial statements not to be presented, in all material respects, in conformity with GAAP. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services that have not been received. Misappropriation of assets may be accompanied by false or misleading records or documents, possibly created by circumventing controls. The scope of this section includes only those misappropriations of assets for which the effect of the misappropriation causes the financial statements not to be fairly presented, in all material respects, in conformity with GAAP.

.07 Three conditions generally are present when fraud occurs. First, management or other employees have an *incentive* or are under *pressure*, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an *opportunity* for a fraud to be perpetrated. Third, those involved are able to *rationalize* committing a fraudulent act. Some individuals possess an *attitude*, character, or set of ethical values that allow them to knowingly and intentionally commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them. The greater the incentive or pressure, the more likely an individual will be able to rationalize the acceptability of committing fraud.

---

<sup>5</sup> Reference to generally accepted accounting principles (GAAP) includes, where applicable, a comprehensive basis of accounting other than GAAP as defined in section 623, *Special Reports*, paragraph .04.

**.08** Management has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.<sup>6</sup> Management can either direct employees to perpetrate fraud or solicit their help in carrying it out. In addition, management personnel at a component of the entity may be in a position to manipulate the accounting records of the component in a manner that causes a material misstatement in the consolidated financial statements of the entity. Management override of controls can occur in unpredictable ways.

**.09** Typically, management and employees engaged in fraud will take steps to conceal the fraud from the auditors and others within and outside the organization. Fraud may be concealed by withholding evidence or misrepresenting information in response to inquiries or by falsifying documentation. For example, management that engages in fraudulent financial reporting might alter shipping documents. Employees or members of management who misappropriate cash might try to conceal their thefts by forging signatures or falsifying electronic approvals on disbursement authorizations. An audit conducted in accordance with GAAS rarely involves the authentication of such documentation, nor are auditors trained as or expected to be experts in such authentication. In addition, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed.

**.10** Fraud also may be concealed through collusion among management, employees, or third parties. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. For example, through collusion, false evidence that controls have been operating effectively may be presented to the auditor, or consistent misleading explanations may be given to the auditor by more than one individual within the entity to explain an unexpected result of an analytical procedure. As another example, the auditor may receive a false confirmation from a third party that is in collusion with management.

**.11** Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain conditions may suggest to the auditor the possibility that fraud may exist. For example, an important contract may be missing, a subsidiary ledger may not be satisfactorily reconciled to its control account, or the results of an analytical procedure performed during the audit may not be consistent with expectations. However, these conditions may be the result of circumstances other than fraud. Documents may legitimately have been lost or misfiled; the subsidiary ledger may be out of balance with its control account because of an unintentional accounting error; and unexpected analytical relationships may be the result of unanticipated changes in underlying economic factors. Even reports of alleged fraud may not always be reliable because an employee or outsider may be mistaken or may be motivated for unknown reasons to make a false allegation.

**.12** As indicated in paragraph .01, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or

---

<sup>6</sup> Frauds have been committed by management override of existing controls using such techniques as (a) recording fictitious journal entries, particularly those recorded close to the end of an accounting period to manipulate operating results, (b) intentionally biasing assumptions and judgments used to estimate account balances, and (c) altering records and terms related to significant and unusual transactions.

error.<sup>7</sup> However, absolute assurance is not attainable and thus even a properly planned and performed audit may not detect a material misstatement resulting from fraud. A material misstatement may not be detected because of the nature of audit evidence or because the characteristics of fraud as discussed above may cause the auditor to rely unknowingly on audit evidence that appears to be valid, but is, in fact, false and fraudulent. Furthermore, audit procedures that are effective for detecting an error may be ineffective for detecting fraud.

## The Importance of Exercising Professional Skepticism

.13 Due professional care requires the auditor to exercise professional skepticism. See section 230, *Due Professional Care in the Performance of Work*, paragraphs .07 through .09. Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. In exercising professional skepticism in gathering and evaluating evidence, the auditor should not be satisfied with less-than-persuasive evidence because of a belief that management is honest.

## Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.14 Prior to or in conjunction with the information-gathering procedures described in paragraphs .19 through .34 of this section, members of the audit team should discuss the potential for material misstatement due to fraud. The discussion should include:

- An exchange of ideas or "brainstorming" among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. (See paragraph .15.)
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud. (See paragraph .16.)

.15 The discussion among the audit team members about the susceptibility of the entity's financial statements to material misstatement due to fraud should include a consideration of the known external and internal factors affecting the entity that might (a) create incentives/pressures for management and others to commit fraud, (b) provide the opportunity for fraud to be perpetrated, and (c) indicate a culture or environment that enables management to rationalize committing fraud. The discussion should occur with an attitude that includes a questioning mind as described in paragraph .16 and, for this purpose,

---

<sup>7</sup> For a further discussion of the concept of reasonable assurance, see section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13.

setting aside any prior beliefs the audit team members may have that management is honest and has integrity. In this regard, the discussion should include a consideration of the risk of management override of controls.<sup>8</sup> Finally, the discussion should include how the auditor might respond to the susceptibility of the entity's financial statements to material misstatement due to fraud.

**.16** The discussion among the audit team members should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit, as described in paragraph .13. This should lead the audit team members to continually be alert for information or other conditions (such as those presented in paragraph .68) that indicate a material misstatement due to fraud may have occurred. It should also lead audit team members to thoroughly probe the issues, acquire additional evidence as necessary, and consult with other team members and, if appropriate, experts in the firm, rather than rationalize or dismiss information or other conditions that indicate a material misstatement due to fraud may have occurred.

**.17** Although professional judgment should be used in determining which audit team members should be included in the discussion, the discussion ordinarily should involve the key members of the audit team. A number of factors will influence the extent of the discussion and how it should occur. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. Another factor to consider in planning the discussions is whether to include specialists assigned to the audit team. For example, if the auditor has determined that a professional possessing information technology skills is needed on the audit team (see section 311.31), it may be useful to include that individual in the discussion. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

**.18** Communication among the audit team members about the risks of material misstatement due to fraud also should continue throughout the audit—for example, in evaluating the risks of material misstatement due to fraud at or near the completion of the field work. (See paragraph .74 and footnote 28.)

## Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

**.19** Section 314 provides guidance about how the auditor obtains an understanding of the entity and its environment, including its internal control. In performing that work, information may come to the auditor's attention that should be considered in identifying risks of material misstatement due to fraud. As part of this work, the auditor should perform the following procedures to obtain information that is used (as described in paragraphs .35 through .42) to identify the risks of material misstatement due to fraud:

- a. Make inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed. (See paragraphs .20 through .27.)
- b. Consider any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit. (See paragraphs .28 through .30.)

---

<sup>8</sup> See footnote 6.

- c. Consider whether one or more fraud risk factors exist. (See paragraphs .31 through .33, and the Appendix [paragraph .85].)
- d. Consider other information that may be helpful in the identification of risks of material misstatement due to fraud. (See paragraph .34.)

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

## Making Inquiries of Management and Others Within the Entity About the Risks of Fraud

**.20** The auditor should inquire of management about:<sup>9</sup>

- Whether management has knowledge of any fraud or suspected fraud affecting the entity
- Whether management is aware of allegations of fraud or suspected fraud affecting the entity, for example, received in communications from employees, former employees, analysts, regulators, short sellers, or others
- Management's understanding about the risks of fraud in the entity, including any specific fraud risks the entity has identified or account balances or classes of transactions for which a risk of fraud may be likely to exist
- Programs and controls<sup>10</sup> the entity has established to mitigate specific fraud risks the entity has identified, or that otherwise help to prevent, deter, and detect fraud, and how management monitors those programs and controls. For examples of programs and controls an entity may implement to prevent, deter, and detect fraud, see the exhibit titled "Management Antifraud Programs and Controls" [paragraph .86] at the end of this section.
- For an entity with multiple locations, (a) the nature and extent of monitoring of operating locations or business segments, and (b) whether there are particular operating locations or business segments for which a risk of fraud may be more likely to exist
- Whether and how management communicates to employees its views on business practices and ethical behavior

**.21** The inquiries of management also should include whether management has reported to the audit committee or others with equivalent authority and responsibility<sup>11</sup> (hereafter referred to as the audit committee) on how the entity's internal control<sup>12</sup> serves to prevent, deter, or detect material misstatements due to fraud.

---

<sup>9</sup> In addition to these inquiries, section 333, *Management Representations*, requires the auditor to obtain selected written representations from management regarding fraud.

<sup>10</sup> Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, paragraph .41, defines internal control and its five interrelated components (the control environment, risk assessment, control activities, information and communication, and monitoring). Entity programs and controls intended to address the risks of fraud may be part of any of the five components discussed in section 314. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

<sup>11</sup> Examples of "others with equivalent authority and responsibility" may include the board of directors, the board of trustees, or the owner in an owner-managed entity, as appropriate.

<sup>12</sup> See footnote 10.

**.22** The auditor also should inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity. An entity's audit committee sometimes assumes an active role in oversight of the entity's assessment of the risks of fraud and the programs and controls the entity has established to mitigate these risks. The auditor should obtain an understanding of how the audit committee exercises oversight activities in that area.

**.23** For entities that have an internal audit function, the auditor also should inquire of appropriate internal audit personnel about their views about the risks of fraud, whether they have performed any procedures to identify or detect fraud during the year, whether management has satisfactorily responded to any findings resulting from these procedures, and whether the internal auditors have knowledge of any fraud or suspected fraud.

**.24** In addition to the inquiries outlined in paragraphs .20 through .23, the auditor should inquire of others within the entity about the existence or suspicion of fraud. The auditor should use professional judgment to determine those others within the entity to whom inquiries should be directed and the extent of such inquiries. In making this determination, the auditor should consider whether others within the entity may be able to provide information that will be helpful to the auditor in identifying risks of material misstatement due to fraud—for example, others who may have additional knowledge about or be able to corroborate risks of fraud identified in the discussions with management (see paragraph .20) or the audit committee (see paragraph .22).

**.25** Examples of others within the entity to whom the auditor may wish to direct these inquiries include:

- Employees with varying levels of authority within the entity, including, for example, entity personnel with whom the auditor comes into contact during the course of the audit in obtaining (a) an understanding of the entity's systems and internal control, (b) in observing inventory or performing cutoff procedures, or (c) in obtaining explanations for fluctuations noted as a result of analytical procedures
- Operating personnel not directly involved in the financial reporting process
- Employees involved in initiating, recording, or processing complex or unusual transactions—for example, a sales transaction with multiple elements, or a significant related party transaction
- In-house legal counsel

**.26** The auditor's inquiries of management and others within the entity are important because fraud often is uncovered through information received in response to inquiries. One reason for this is that such inquiries may provide individuals with an opportunity to convey information to the auditor that otherwise might not be communicated. Making inquiries of others within the entity, in addition to management, may be useful in providing the auditor with a perspective that is different from that of individuals involved in the financial reporting process. The responses to these other inquiries might serve to corroborate responses received from management, or alternatively, might provide information regarding the possibility of management override of controls—for example, a response from an employee indicating an unusual change in the way transactions have been processed. In addition, the auditor may obtain information from these inquiries regarding how effectively management has

communicated standards of ethical behavior to individuals throughout the organization.

.27 The auditor should be aware when evaluating management's responses to the inquiries discussed in paragraph .20 that management is often in the best position to perpetrate fraud. The auditor should use professional judgment in deciding when it is necessary to corroborate responses to inquiries with other information. However, when responses are inconsistent among inquiries, the auditor should obtain additional audit evidence to resolve the inconsistencies.

## Considering the Results of the Analytical Procedures Performed in Planning the Audit

.28 Section 329, *Analytical Procedures*, paragraphs .04 and .06, requires that analytical procedures be performed in planning the audit with an objective of identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning implications. In performing analytical procedures in planning the audit, the auditor develops expectations about plausible relationships that are reasonably expected to exist, based on the auditor's understanding of the entity and its environment. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying the risks of material misstatement due to fraud.

.29 In planning the audit, the auditor also should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that may indicate a material misstatement due to fraudulent financial reporting. An example of such an analytical procedure that addresses this objective is a comparison of sales volume, as determined from recorded revenue amounts, with production capacity. An excess of sales volume over production capacity may be indicative of recording fictitious sales. As another example, a trend analysis of revenues by month and sales returns by month during and shortly after the reporting period may indicate the existence of undisclosed side agreements with customers to return goods that would preclude revenue recognition.<sup>13</sup>

.30 Analytical procedures performed during planning may be helpful in identifying the risks of material misstatement due to fraud. However, because such analytical procedures generally use data aggregated at a high level, the results of those analytical procedures provide only a broad initial indication about whether a material misstatement of the financial statements may exist. Accordingly, the results of analytical procedures performed during planning should be considered along with other information gathered by the auditor in identifying the risks of material misstatement due to fraud.

## Considering Fraud Risk Factors

.31 Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate incentives/pressures to perpetrate fraud, opportunities to carry out the fraud, or attitudes/rationalizations to justify a fraudulent action. Such events or conditions are referred to as "fraud risk factors." Fraud risk

---

<sup>13</sup> See paragraph .70 for a discussion of the need to update these analytical procedures during the overall review stage of the audit.

factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances where fraud exists.

**.32** When obtaining information about the entity and its environment, the auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud.

**.33** Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in the Appendix [paragraph .85]. These illustrative risk factors are classified based on the three conditions generally present when fraud exists: *incentive/pressure* to perpetrate fraud, an *opportunity* to carry out the fraud, and *attitude/rationalization* to justify the fraudulent action. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

## Considering Other Information That May Be Helpful in Identifying Risks of Material Misstatement Due to Fraud

**.34** The auditor should consider other information that may be helpful in identifying risks of material misstatement due to fraud. Specifically, the discussion among the engagement team members (see paragraphs .14 through .18) may provide information helpful in identifying such risks. In addition, the auditor should consider whether information from the results of (a) procedures relating to the acceptance and continuance of clients and engagements<sup>14</sup> and (b) reviews of interim financial statements may be relevant in the identification of such risks. Finally, as part of the consideration of audit risk at the individual account balance or class of transaction level (see section 312.17 through .26), the auditor should consider whether identified inherent risks would provide useful information in identifying the risks of material misstatement due to fraud (see paragraph .39). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

## Identifying Risks That May Result in a Material Misstatement Due to Fraud

### Using the Information Gathered to Identify Risk of Material Misstatements Due to Fraud

**.35** In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered (see paragraphs .19 through .34) in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives/pressures, opportunities, and attitudes/rationalizations (see paragraph .07). However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks. Although the risk of material

---

<sup>14</sup> See Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* [QC section 20.14–.16], as amended.

misstatement due to fraud may be greatest when all three fraud conditions are observed or evident, the auditor cannot assume that the inability to observe one or two of these conditions means there is no risk of material misstatement due to fraud. In fact, observing that individuals have the requisite attitude to commit fraud, or identifying factors that indicate a likelihood that management or other employees will rationalize committing a fraud, is difficult at best.

.36 In addition, the extent to which each of the three conditions referred to above are present when fraud occurs may vary. In some instances the significance of incentives/pressures may result in a risk of material misstatement due to fraud, apart from the significance of the other two conditions. For example, an incentive/pressure to achieve an earnings level to preclude a loan default, or to "trigger" incentive compensation plan awards, may alone result in a risk of material misstatement due to fraud. In other instances, an easy opportunity to commit the fraud because of a lack of controls may be the dominant condition precipitating the risk of fraud, or an individual's attitude or ability to rationalize unethical actions may be sufficient to motivate that individual to engage in fraud, even in the absence of significant incentives/pressures or opportunities.

.37 The auditor's identification of fraud risks also may be influenced by characteristics such as the size, complexity, and ownership attributes of the entity. For example, in the case of a larger entity, the auditor ordinarily considers factors that generally constrain improper conduct by management, such as the effectiveness of the audit committee and the internal audit function, and the existence and enforcement of a formal code of conduct. In the case of a smaller entity, some or all of these considerations may be inapplicable or less important, and management may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and management by example. Also, the risks of material misstatement due to fraud may vary among operating locations or business segments of an entity, requiring an identification of the risks related to specific geographic areas or business segments, as well as for the entity as a whole.<sup>15</sup>

.38 The auditor should evaluate whether identified risks of material misstatement due to fraud can be related to specific financial-statement account balances or classes of transactions and related assertions, or whether they relate more pervasively to the financial statements as a whole. Relating the risks of material misstatement due to fraud to the individual accounts, classes of transactions, and assertions will assist the auditor in subsequently designing appropriate auditing procedures.

.39 Certain accounts, classes of transactions, and assertions that have high inherent risk because they involve a high degree of management judgment and subjectivity also may present risks of material misstatement due to fraud because they are susceptible to manipulation by management. For example, liabilities resulting from a restructuring may be deemed to have high inherent risk because of the high degree of subjectivity and management judgment involved in their estimation. Similarly, revenues for software developers may be deemed to have high inherent risk because of the complex accounting principles applicable to the recognition and measurement of software revenue transactions. Assets resulting from investing activities may be deemed to have high inherent risk because of the subjectivity and management judgment involved in estimating fair values of those investments.

---

<sup>15</sup> Section 312.16 provides guidance on the auditor's consideration of the extent to which auditing procedures should be performed at selected locations or components. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.40** In summary, the identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including:

- The *type* of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The *significance* of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements
- The *likelihood* of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements<sup>16</sup>
- The *pervasiveness* of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions.

## **A Presumption That Improper Revenue Recognition Is a Fraud Risk**

**.41** Material misstatements due to fraudulent financial reporting often result from an overstatement of revenues (for example, through premature revenue recognition or recording fictitious revenues) or an understatement of revenues (for example, through improperly shifting revenues to a later period). Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. (See paragraph .54 for examples of auditing procedures related to the risk of improper revenue recognition.)<sup>17</sup>

## **A Consideration of the Risk of Management Override of Controls**

**.42** Even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur, and accordingly, the auditor should address that risk (see paragraph .57) apart from any conclusions regarding the existence of more specifically identifiable risks.

## **Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks**

**.43** Section 314 requires the auditor to obtain an understanding of each of the five components of internal control sufficient to plan the audit. It also notes that such knowledge should be used to identify types of potential misstatements, consider factors that affect the risk of material misstatement, design tests of controls when applicable, and design substantive tests. Additionally,

---

<sup>16</sup> The occurrence of material misstatements of financial statements due to fraud is relatively infrequent in relation to the total population of published financial statements. However, the auditor should not use this as a basis to conclude that one or more risks of a material misstatement due to fraud are not present in a particular entity.

<sup>17</sup> For a discussion of indicators of improper revenue recognition and common techniques for overstating revenue and illustrative audit procedures, see the AICPA Audit Guide *Auditing Revenue in Certain Industries*.

section 314 notes that controls, whether manual or automated, can be circumvented by collusion of two or more people or inappropriate management override of internal control. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

**.44** As part of the understanding of internal control sufficient to plan the audit, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation.<sup>18</sup> These programs and controls may involve (a) specific controls designed to mitigate specific risks of fraud—for example, controls to address specific assets susceptible to misappropriation, and (b) broader programs designed to prevent, deter, and detect fraud—for example, programs to promote a culture of honesty and ethical behavior. The auditor should consider whether such programs and controls mitigate the identified risks of material misstatement due to fraud or whether specific control deficiencies may exacerbate the risks (see paragraph .80). The exhibit at the end of this section [paragraph .88] discusses examples of programs and controls an entity might implement to create a culture of honesty and ethical behavior, and that help to prevent, deter, and detect fraud.

**.45** After the auditor has evaluated whether the entity's programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation, the auditor should assess these risks taking into account that evaluation. This assessment should be considered when developing the auditor's response to the identified risks of material misstatement due to fraud (see paragraphs .46 through .67).<sup>19</sup>

## Responding to the Results of the Assessment

**.46** The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence. As noted in paragraph .13, professional skepticism is an attitude that includes a critical assessment of the competency and sufficiency of audit evidence. Examples of the application of professional skepticism in response to the risks of material misstatement due to fraud are (a) designing additional or different auditing procedures to obtain more reliable evidence in support of specified financial statement account balances, classes of transactions, and related assertions, and (b) obtaining additional corroboration of management's explanations or representations concerning material matters, such as through third-party confirmation, the use of a specialist, analytical procedures, examination of documentation from independent sources, or inquiries of others within or outside the entity.

**.47** The auditor's response to the assessment of the risks of material misstatement of the financial statements due to fraud is influenced by the nature and significance of the risks identified as being present (paragraphs .35 through .42) and the entity's programs and controls that address these identified risks (paragraphs .43 through .45).

**.48** The auditor responds to risks of material misstatement due to fraud in the following three ways:

---

<sup>18</sup> See footnote 10.

<sup>19</sup> Notwithstanding that the auditor assesses identified risks of material misstatement due to fraud, the assessment need not encompass an overall judgment about whether risk for the entity is classified as *high*, *medium*, or *low* because such a judgment is too broad to be useful in developing the auditor's response described in paragraphs .46 through .67.

- a. A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned (see paragraph .50).
- b. A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed (see paragraphs .51 through .56).
- c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur (see paragraphs .57 through .67).

**.49** The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action (see paragraph .78).

## Overall Responses to the Risk of Material Misstatement

**.50** Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

- *Assignment of personnel and supervision.* The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement (see section 210, *Training and Proficiency of the Independent Auditor*, paragraph .03). For example, the auditor may respond to an identified risk of material misstatement due to fraud by assigning additional persons with specialized skill and knowledge, such as forensic and information technology (IT) specialists, or by assigning more experienced personnel to the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud (see section 311.28).
- *Accounting principles.* The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions. In this respect, the auditor may have a greater concern about whether the accounting principles selected and policies adopted are being applied in an inappropriate manner to create a material misstatement of the financial statements. In developing judgments about the quality of such principles (see section 380A, *Communication With Audit Committees*, paragraph .11), the auditor should consider whether their collective application indicates a bias that may create such a material misstatement of the financial statements.
- *Predictability of auditing procedures.* The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed—for example, performing substantive tests of selected account balances and assertions not otherwise tested due to their materiality or risk, adjusting the timing of testing from that otherwise expected, using differing sampling methods, and performing procedures at different locations or at locations on an unannounced basis.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

## Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.51 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. However, because management may have the ability to override controls that otherwise appear to be operating effectively (see paragraph .08), it is unlikely that audit risk can be reduced to an appropriately low level by performing only tests of controls.

.52 The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures in the following ways:

- The *nature* of auditing procedures performed may need to be changed to obtain evidence that is more reliable or to obtain additional corroborative information. For example, more audit evidence may be needed from independent sources outside the entity, such as public-record information about the existence and nature of key customers, vendors, or counterparties in a major transaction. Also, physical observation or inspection of certain assets may become more important (see section 326, *Audit Evidence*, paragraphs .06 through .13). Furthermore, the auditor may choose to employ computer-assisted audit techniques to gather more extensive evidence about data contained in significant accounts or electronic transaction files. Finally, inquiry of additional members of management or others may be helpful in identifying issues and corroborating other audit evidence (see paragraphs .24 through .26 and paragraph .53).
- The *timing* of substantive tests may need to be modified. The auditor might conclude that substantive testing should be performed at or near the end of the reporting period to best address an identified risk of material misstatement due to fraud (see section 318, *Performing Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*). That is, the auditor might conclude that, given the risks of intentional misstatement or manipulation, tests to extend audit conclusions from an interim date to the period-end reporting date would not be effective.

In contrast, because an intentional misstatement—for example, a misstatement involving inappropriate revenue recognition—may have been initiated in an interim period, the auditor might elect to apply substantive tests to transactions occurring earlier in or throughout the reporting period.

- The *extent* of the procedures applied should reflect the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing analytical procedures at a more detailed level may be appropriate (see section 350, *Audit Sampling*, paragraph .22, and section 329). Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105, No. 106, No. 110 and No. 111.]

**.53** The following are examples of modification of the nature, timing, and extent of tests in response to identified risks of material misstatements due to fraud.

- Performing procedures at locations on a surprise or unannounced basis, for example, observing inventory on unexpected dates or at unexpected locations or counting cash on a surprise basis.
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Making oral inquiries of major customers and suppliers in addition to sending written confirmations, or sending confirmation requests to a specific party within an organization.
- Performing substantive analytical procedures using disaggregated data, for example, comparing gross profit or operating margins by location, line of business, or month to auditor-developed expectations.<sup>20</sup>
- Interviewing personnel involved in activities in areas where a risk of material misstatement due to fraud has been identified to obtain their insights about the risk and how controls address the risk (also see paragraph .24).
- If other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches, discussing with them the extent of work that needs to be performed to address the risk of material misstatement due to fraud resulting from transactions and activities among these components.

### ***Additional Examples of Responses to Identified Risks of Misstatements Arising From Fraudulent Financial Reporting***

**.54** The following are additional examples of responses to identified risks of material misstatements relating to fraudulent financial reporting:

- *Revenue recognition.* Because revenue recognition is dependent on the particular facts and circumstances, as well as accounting principles and practices that can vary by industry, the auditor ordinarily will develop auditing procedures based on the auditor's understanding of the entity and its environment, including the composition of revenues, specific attributes of the revenue transactions, and unique industry considerations. If there is an identified risk of material misstatement due to fraud that involves improper revenue recognition, the auditor also may want to consider:
  - Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.

---

<sup>20</sup> Section 329, *Analytical Procedures*, provides guidance on performing analytical procedures as substantive tests.

- Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements.<sup>21</sup> For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
  - Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.
  - Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures.
  - For those situations for which revenue transactions are electronically initiated, authorized, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.
- *Inventory quantities.* If there is an identified risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis (see paragraph .53) or to conduct inventory counts at all locations on the same date. In addition, it may be appropriate for inventory counts to be conducted at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.

It also may be appropriate for the auditor to perform additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals. Using the work of a specialist may be helpful in this regard.<sup>22</sup> Furthermore, additional testing of count sheets, tags, or other records, or the retention of copies of these records, may be warranted to minimize the risk of subsequent alteration or inappropriate compilation.

Following the physical inventory count, the auditor may want to employ additional procedures directed at the quantities included in the priced out inventories to further test the reasonableness of the quantities counted—for example, comparison of quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records. The auditor also may consider using computer-assisted audit techniques to further test the compilation of the physical inventory

---

<sup>21</sup> Section 330, *The Confirmation Process*, provides guidance about the confirmation process in audits performed in accordance with GAAS.

<sup>22</sup> Section 336, *Using the Work of a Specialist*, provides guidance to an auditor who uses the work of a specialist in performing an audit in accordance with GAAS.

counts—for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

- **Management estimates.** The auditor may identify a risk of material misstatement due to fraud involving the development of management estimates. This risk may affect a number of accounts and assertions, including asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of a segment of the business), and other significant accrued liabilities (such as pension and other postretirement benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. As indicated in section 342, *Auditing Accounting Estimates*, estimates are based on subjective as well as objective factors and there is a potential for bias in the subjective factors, even when management's estimation process involves competent personnel using relevant and reliable data.

In addressing an identified risk of material misstatement due to fraud involving accounting estimates, the auditor may want to supplement the audit evidence otherwise obtained (see section 342.09 through .14). In certain circumstances (for example, evaluating the reasonableness of management's estimate of the fair value of a derivative), it may be appropriate to engage a specialist or develop an independent estimate for comparison to management's estimate. Information gathered about the entity and its environment may help the auditor evaluate the reasonableness of such management estimates and underlying judgments and assumptions.

A retrospective review of similar management judgments and assumptions applied in prior periods (see paragraphs .63 through .65) may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

### ***Examples of Responses to Identified Risks of Misstatements Arising From Misappropriations of Assets***

**.55** The auditor may have identified a risk of material misstatement due to fraud relating to misappropriation of assets. For example, the auditor may conclude that the risk of asset misappropriation at a particular operating location is significant because a large amount of easily accessible cash is maintained at that location, or there are inventory items such as laptop computers at that location that can easily be moved and sold.

**.56** The auditor's response to a risk of material misstatement due to fraud relating to misappropriation of assets usually will be directed toward certain account balances. Although some of the audit responses noted in paragraphs .52 through .54 may apply in such circumstances, such as the procedures directed at inventory quantities, the scope of the work should be linked to the specific information about the misappropriation risk that has been identified. For example, if a particular asset is highly susceptible to misappropriation and a potential misstatement would be material to the financial statements, obtaining an understanding of the controls related to the prevention and detection of such misappropriation and testing the operating effectiveness of such controls may be warranted. In certain circumstances, physical inspection of such assets

(for example, counting cash or securities) at or near the end of the reporting period may be appropriate. In addition, the use of substantive analytical procedures, such as the development by the auditor of an expected dollar amount at a high level of precision, to be compared with a recorded amount, may be effective in certain circumstances.

## Responses to Further Address the Risk of Management Override of Controls

**.57** As noted in paragraph .08, management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. By its nature, management override of controls can occur in unpredictable ways. Accordingly, in addition to overall responses (paragraph .50) and responses that address specifically identified risks of material misstatement due to fraud (see paragraphs .51 through .56), the procedures described in paragraphs .58 through .67 should be performed to further address the risk of management override of controls.

**.58 *Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.*** Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (a) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (b) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications. Accordingly, the auditor should design procedures to test the appropriateness of journal entries recorded in the general ledger and other adjustments (for example, entries posted directly to financial statement drafts) made in the preparation of the financial statements. More specifically, the auditor should:

- a. Obtain an understanding of the entity's financial reporting process<sup>23</sup> and the controls over journal entries and other adjustments. (See paragraphs .59 and .60.)
- b. Identify and select journal entries and other adjustments for testing. (See paragraph .61.)
- c. Determine the timing of the testing. (See paragraph .62.)
- d. Inquire of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments.

**.59** The auditor's understanding of the entity's financial reporting process may help in identifying the type, number, and monetary value of journal entries and other adjustments that typically are made in preparing the financial statements. For example, the auditor's understanding may include the sources of significant debits and credits to an account, who can initiate entries to the general ledger or transaction processing systems, what approvals are required

---

<sup>23</sup> Section 314 requires the auditor to obtain an understanding of the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. This understanding includes (a) the procedures used to enter transaction totals into the general ledger; (b) the procedures used to initiate, record, and process journal entries in the general ledger; and (c) other procedures used to record recurring and nonrecurring adjustments to the financial statements. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

for such entries, and how journal entries are recorded (for example, entries may be initiated and recorded online with no physical evidence, or may be created in paper form and entered in batch mode).

**.60** An entity may have implemented specific controls over journal entries and other adjustments. For example, an entity may use journal entries that are preformatted with account numbers and specific user approval criteria, and may have automated controls to generate an exception report for any entries that were unsuccessfully proposed for recording or entries that were recorded and processed outside of established parameters. The auditor should obtain an understanding of the design of such controls over journal entries and other adjustments and determine whether they are suitably designed and have been placed in operation.

**.61** The auditor should use professional judgment in determining the nature, timing, and extent of the testing of journal entries and other adjustments. For purposes of identifying and selecting specific entries and other adjustments for testing, and determining the appropriate method of examining the underlying support for the items selected, the auditor should consider:

- *The auditor's assessment of the risk of material misstatement due to fraud.* The presence of fraud risk factors or other conditions may help the auditor to identify specific classes of journal entries for testing and indicate the extent of testing necessary.
- *The effectiveness of controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and adjustments may affect the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of those controls. However, even though controls might be implemented and operating effectively, the auditor's procedures for testing journal entries and other adjustments should include the identification and testing of specific items.
- *The entity's financial reporting process and the nature of the evidence that can be examined.* The auditor's procedures for testing journal entries and other adjustments will vary based on the nature of the financial reporting process. For many entities, routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments might involve both manual and automated procedures and controls. Regardless of the method, the auditor's procedures should include selecting from the general ledger journal entries to be tested and examining support for those items. In addition, the auditor should be aware that journal entries and other adjustments might exist in either electronic or paper form. When information technology (IT) is used in the financial reporting process, journal entries and other adjustments might exist only in electronic form. Electronic evidence often requires extraction of the desired data by an auditor with IT knowledge and skills or the use of an IT specialist. In an IT environment, it may be necessary for the auditor to employ computer-assisted audit techniques (for example, report writers, software or data extraction tools, or other systems-based techniques) to identify the journal entries and other adjustments to be tested.
- *The characteristics of fraudulent entries or adjustments.* Inappropriate journal entries and other adjustments often have certain unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used accounts, (b) made by

individuals who typically do not make journal entries, (c) recorded at the end of the period or as post-closing entries that have little or no explanation or description, (d) made either before or during the preparation of the financial statements that do not have account numbers, or (e) containing round numbers or a consistent ending number.

- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to errors in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain intercompany transactions, or (f) are otherwise associated with an identified risk of material misstatement due to fraud. The auditor should recognize, however, that inappropriate journal entries and adjustments also might be made to other accounts. In audits of entities that have several locations or components, the auditor should consider the need to select journal entries from locations based on the factors set forth in section 312.16.
- *Journal entries or other adjustments processed outside the normal course of business.* Standard journal entries used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record recurring periodic accounting estimates generally are subject to the entity's internal controls. Nonstandard entries (for example, entries used to record nonrecurring transactions, such as a business combination, or entries used to record a nonrecurring estimate, such as an asset impairment) might not be subject to the same level of internal control. In addition, other adjustments such as consolidating adjustments, report combinations, and reclassifications generally are not reflected in formal journal entries and might not be subject to the entity's internal controls. Accordingly, the auditor should consider placing additional emphasis on identifying and testing items processed outside of the normal course of business.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.62** Because fraudulent journal entries often are made at the end of a reporting period, the auditor's testing ordinarily should focus on the journal entries and other adjustments made at that time. However, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how it is accomplished, the auditor should consider whether there also is a need to test journal entries throughout the period under audit.

**.63 *Reviewing accounting estimates for biases that could result in material misstatement due to fraud.*** In preparing financial statements, management is responsible for making a number of judgments or assumptions that affect significant accounting estimates<sup>24</sup> and for monitoring the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates. As discussed in section 312.58, the auditor should consider whether differences between estimates best supported by the audit evidence and the estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management, in

---

<sup>24</sup> See section 342, *Auditing Accounting Estimates*, paragraphs .02 and .16, for a definition of accounting estimates and a listing of examples.

which case the auditor should reconsider the estimates taken as a whole. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.64** The auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management. The significant accounting estimates selected for testing should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current-year estimates. This review, however, is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

**.65** If the auditor identifies a possible bias on the part of management in making accounting estimates, the auditor should evaluate whether circumstances producing such a bias represent a risk of a material misstatement due to fraud. For example, information coming to the auditor's attention may indicate a risk that adjustments to the current-year estimates might be recorded at the instruction of management to arbitrarily achieve a specified earnings target.

**.66 *Evaluating the business rationale for significant unusual transactions.*** During the course of the audit, the auditor may become aware of significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment. The auditor should gain an understanding of the business rationale for such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.

**.67** In understanding the business rationale for the transactions, the auditor should consider:

- Whether the form of such transactions is overly complex (for example, involves multiple entities within a consolidated group or unrelated third parties).
- Whether management has discussed the nature of and accounting for such transactions with the audit committee or board of directors.
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by the audit committee or board of directors.
- Whether the transactions involve previously unidentified related parties<sup>25</sup> or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

---

<sup>25</sup> Section 334, *Related Parties*, provides guidance with respect to the identification of related-party relationships and transactions, including transactions that may be outside the ordinary course of business (see, in particular, section 334.06).

## Evaluating Audit Evidence

**.68 Assessing risks of material misstatement due to fraud throughout the audit.** The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. Conditions may be identified during fieldwork that change or support a judgment regarding the assessment of the risks, such as the following:

- Discrepancies in the accounting records, including:
  - Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or entity policy
  - Unsupported or unauthorized balances or transactions
  - Last-minute adjustments that significantly affect financial results
  - Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties
  - Tips or complaints to the auditor about alleged fraud
- Conflicting or missing audit evidence, including:
  - Missing documents
  - Documents that appear to have been altered<sup>26</sup>
  - Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist
  - Significant unexplained items on reconciliations
  - Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures (See paragraph .72.)
  - Unusual discrepancies between the entity's records and confirmation replies
  - Missing inventory or physical assets of significant magnitude
  - Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies
  - Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments
- Problematic or unusual relationships between the auditor and management, including:
  - Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought<sup>27</sup>
  - Undue time pressures imposed by management to resolve complex or contentious issues

---

<sup>26</sup> As discussed in paragraph .09, auditors are not trained as or expected to be experts in the authentication of documents; however, if the auditor believes that documents may not be authentic, he or she should investigate further and consider using the work of a specialist to determine the authenticity.

<sup>27</sup> Denial of access to information may constitute a limitation on the scope of the audit that may require the auditor to consider qualifying or disclaiming an opinion on the financial statements. (See section 508, *Reports on Audited Financial Statements*, paragraph .24.)

- Complaints by management about the conduct of the audit or management intimidation of audit team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management
- Unusual delays by the entity in providing requested information
- Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques
- Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel
- An unwillingness to add or revise disclosures in the financial statements to make them more complete and transparent

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.69 *Evaluating whether analytical procedures performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.*** As discussed in paragraphs .28 through .30, the auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatement due to fraud. The auditor also should evaluate whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit (see section 329) indicate a previously unrecognized risk of material misstatement due to fraud.

**.70** If not already performed during the overall review stage of the audit, the auditor should perform analytical procedures relating to revenue, as discussed in paragraph .29, through the end of the reporting period.

**.71** Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income often are particularly relevant. These might include, for example, (a) uncharacteristically large amounts of income being reported in the last week or two of the reporting period from unusual transactions, as well as (b) income that is inconsistent with trends in cash flow from operations.

**.72** Some unusual or unexpected analytical relationships may have been identified and may indicate a risk of material misstatement due to fraud because management or employees generally are unable to manipulate certain information to create seemingly normal or expected relationships. Some examples are as follows:

- The relationship of net income to cash flows from operations may appear unusual because management recorded fictitious revenues and receivables but was unable to manipulate cash.
- Changes in inventory, accounts payable, sales, or cost of sales from the prior period to the current period may be inconsistent, indicating a possible employee theft of inventory, because the employee was unable to manipulate all of the related accounts.
- A comparison of the entity's profitability to industry trends, which management cannot manipulate, may indicate trends or differences for further consideration when identifying risks of material misstatement due to fraud.

- A comparison of bad debt write-offs to comparable industry data, which employees cannot manipulate, may provide unexplained relationships that could indicate a possible theft of cash receipts.
- An unexpected or unexplained relationship between sales volume as determined from the accounting records and production statistics maintained by operations personnel—which may be more difficult for management to manipulate—may indicate a possible misstatement of sales.

**.73** The auditor also should consider whether responses to inquiries throughout the audit about analytical relationships have been vague or implausible, or have produced evidence that is inconsistent with other audit evidence accumulated during the audit. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.74 *Evaluating the risks of material misstatement due to fraud at or near the completion of fieldwork.*** At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of auditing procedures and other observations (for example, conditions and analytical relationships noted in paragraphs .69 through .73) affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. This evaluation primarily is a qualitative matter based on the auditor's judgment. Such an evaluation may provide further insight about the risks of material misstatement due to fraud and whether there is a need to perform additional or different audit procedures. As part of this evaluation, the auditor with final responsibility for the audit should ascertain that there has been appropriate communication with the other audit team members throughout the audit regarding information or conditions indicative of risks of material misstatement due to fraud.<sup>28</sup>

**.75 *Responding to misstatements that may be the result of fraud.*** When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud.<sup>29</sup> That determination affects the auditor's evaluation of materiality and the related responses necessary as a result of that evaluation.<sup>30</sup>

**.76** If the auditor believes that misstatements are or may be the result of fraud, but the effect of the misstatements is not material to the financial statements, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. For example, fraud involving misappropriations of cash from a small petty cash fund normally would be of little significance to the auditor in assessing the risk of material misstatement due to fraud because both the manner of operating the fund and its size would tend to establish a limit on the amount of potential loss, and the custodianship of such funds normally is entrusted to a nonmanagement

---

<sup>28</sup> To accomplish this communication, the auditor with final responsibility for the audit may want to arrange another discussion among audit team members about the risks of material misstatement due to fraud (see paragraphs .14 through .18).

<sup>29</sup> See footnote 4.

<sup>30</sup> Section 312.60 states in part, "Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material." Section 312.59 states, "As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements." [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

employee.<sup>31</sup> Conversely, if the matter involves higher-level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management.<sup>32</sup> In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (a) the nature, timing, and extent of the tests of balances or transactions and (b) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

**.77** If the auditor believes that the misstatement is or may be the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- a. Attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.<sup>33</sup>
- b. Consider the implications for other aspects of the audit (see paragraph .76).
- c. Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and the audit committee.<sup>34</sup>
- d. If appropriate, suggest that the client consult with legal counsel.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.78** The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to the audit committee or others with equivalent authority and responsibility.<sup>35</sup> Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (a) the implications about the integrity of management and (b) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not possible to definitively describe when withdrawal is appropriate.<sup>36</sup> The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

---

<sup>31</sup> However, see paragraphs .79 through .82 of this section for a discussion of the auditor's communication responsibilities.

<sup>32</sup> Section 312.10 states that there is a distinction between the auditor's response to detected misstatements due to error and those due to fraud. When fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

<sup>33</sup> See section 508 for guidance on auditors' reports issued in connection with audits of financial statements.

<sup>34</sup> If the auditor believes senior management may be involved, discussion of the matter directly with the audit committee may be appropriate.

<sup>35</sup> See footnote 11.

<sup>36</sup> If the auditor, subsequent to the date of the report on the audited financial statements, becomes aware that facts existed at that date that might have affected the report had the auditor been aware of such facts, the auditor should refer to section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, for guidance. Furthermore, section 315, *Communications Between Predecessor and Successor Auditors*, paragraphs .21 and .22, provide guidance regarding communication with a predecessor auditor.

## Communicating About Possible Fraud to Management, the Audit Committee, and Others<sup>37</sup>

**.79** Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. This is appropriate even if the matter might be considered inconsequential, such as a minor defalcation by an employee at a low level in the entity's organization. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee. In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

**.80** If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected), the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance.<sup>[38]</sup> (See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, paragraph .04). The auditor also should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud (see paragraph .44) represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

**.81** The auditor also may wish to communicate other risks of fraud identified as a result of the assessment of the risks of material misstatements due to fraud. Such a communication may be a part of an overall communication to the audit committee of business and financial statement risks affecting the entity and/or in conjunction with the auditor communication about the quality of the entity's accounting principles (see section 380A.11).

**.82** The disclosure of possible fraud to parties other than the client's senior management and its audit committee ordinarily is not part of the auditor's responsibility and ordinarily would be precluded by the auditor's ethical or legal obligations of confidentiality unless the matter is reflected in the auditor's report. The auditor should recognize, however, that in the following circumstances a duty to disclose to parties outside the entity may exist:

- a. To comply with certain legal and regulatory requirements<sup>39</sup>

---

<sup>37</sup> The requirements to communicate noted in paragraphs .79 through .82 extend to any intentional misstatement of financial statements (see paragraph .03). However, the communication may use terms other than fraud—for example, irregularity, intentional misstatement, misappropriation, or defalcations—if there is possible confusion with a legal definition of fraud or other reason to prefer alternative terms.

<sup>[38]</sup> [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

<sup>39</sup> These requirements include reports in connection with the termination of the engagement, such as when the entity reports an auditor change on Form 8-K and the fraud or related risk factors constitute a *reportable event* or is the source of a *disagreement*, as these terms are defined in Item 304 of Regulation S-K. These requirements also include reports that may be required, under certain circumstances, pursuant to Section 10A(b)1 of the Securities Exchange Act of 1934 relating to an illegal act that has a material effect on the financial statements.

- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*<sup>40</sup>
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance<sup>41</sup>

Because potential conflicts between the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters covered by paragraphs .79 through .81 with parties outside the client.

## Documenting the Auditor's Consideration of Fraud

**.83** The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed (See paragraphs .14 through .17.)
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud (See paragraphs .19 through .34.)
- Specific risks of material misstatement due to fraud that were identified (see paragraphs .35 through .45), and a description of the auditor's response to those risks (See paragraphs .46 through .56.)
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion (See paragraph .41.)
- The results of the procedures performed to further address the risk of management override of controls (See paragraphs .58 through .67.)
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions (See paragraphs .68 through .73.)
- The nature of the communications about fraud made to management, the audit committee, and others (See paragraphs .79 through .82.)

## Effective Date

**.84** This section is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of this section is permissible.

---

<sup>40</sup> Section 315 requires the specific permission of the client.

<sup>41</sup> For example, *Government Auditing Standards* (the Yellow Book) require auditors to report fraud or illegal acts directly to parties outside the audited entity in certain circumstances.

## Appendix

### Examples of Fraud Risk Factors

**A.1** This appendix contains examples of risk factors discussed in paragraphs .31 through .33 of the section. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

### Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

**A.2** The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

#### Incentives/Pressures

- a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):
  - High degree of competition or market saturation, accompanied by declining margins
  - High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
  - Significant declines in customer demand and increasing business failures in either the industry or overall economy
  - Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
  - Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth
  - Rapid growth or unusual profitability, especially compared to that of other companies in the same industry
  - New accounting, statutory, or regulatory requirements
- b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:
  - Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages

- Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures
  - Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
  - Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- c. Information available indicates that management or the board of directors' personal financial situation is threatened by the entity's financial performance arising from the following:
- Significant financial interests in the entity
  - Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow<sup>1</sup>
  - Personal guarantees of debts of the entity
- d. There is excessive pressure on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals.

## Opportunities

- a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:
- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm
  - A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
  - Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
  - Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions
  - Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist
  - Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification

---

<sup>1</sup> Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

- b. There is ineffective monitoring of management as a result of the following:
  - Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls
  - Ineffective board of directors or audit committee oversight over the financial reporting process and internal control
- c. There is a complex or unstable organizational structure, as evidenced by the following:
  - Difficulty in determining the organization or individuals that have controlling interest in the entity
  - Overly complex organizational structure involving unusual legal entities or managerial lines of authority
  - High turnover of senior management, counsel, or board members
- d. Internal control components are deficient as a result of the following:
  - Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required)
  - High turnover rates or employment of ineffective accounting, internal audit, or information technology staff
  - Ineffective accounting and information systems, including situations involving significant deficiencies or material weaknesses in internal control

### Attitudes/Rationalizations

Risk factors reflective of attitudes/rationalizations by board members, management, or employees, that allow them to engage in and/or justify fraudulent financial reporting, may not be susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from fraudulent financial reporting. For example, auditors may become aware of the following information that may indicate a risk factor:

- Ineffective communication, implementation, support, or enforcement of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or board members alleging fraud or violations of laws and regulations
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend
- A practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts
- Management failing to correct known significant deficiencies and material weaknesses in internal control on a timely basis
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons

- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
  - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
  - Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report
  - Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee
  - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

[Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

## **Risk Factors Relating to Misstatements Arising From Misappropriation of Assets**

**A.3** Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalizations. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and weaknesses in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

### **Incentives/Pressures**

- a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:
  - Known or anticipated future employee layoffs
  - Recent or anticipated changes to employee compensation or benefit plans
  - Promotions, compensation, or other rewards inconsistent with expectations

### **Opportunities**

- a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:

- Large amounts of cash on hand or processed
  - Inventory items that are small in size, of high value, or in high demand
  - Easily convertible assets, such as bearer bonds, diamonds, or computer chips
  - Fixed assets that are small in size, marketable, or lacking observable identification of ownership
- b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:
- Inadequate segregation of duties or independent checks
  - Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations
  - Inadequate job applicant screening of employees with access to assets
  - Inadequate recordkeeping with respect to assets
  - Inadequate system of authorization and approval of transactions (for example, in purchasing)
  - Inadequate physical safeguards over cash, investments, inventory, or fixed assets
  - Lack of complete and timely reconciliations of assets
  - Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns
  - Lack of mandatory vacations for employees performing key control functions
  - Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation
  - Inadequate access controls over automated records, including controls over and review of computer systems event logs.

### Attitudes/Rationalizations

Risk factors reflective of employee attitudes/rationalizations that allow them to justify misappropriations of assets, are generally not susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from misappropriation of assets. For example, auditors may become aware of the following attitudes or behavior of employees who have access to assets susceptible to misappropriation:

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
- Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

## Exhibit

### Management Antifraud Programs and Controls

#### Guidance to Help Prevent, Deter, and Detect Fraud

(This exhibit is reprinted for the reader's convenience but is not an integral part of the section.)

This document is being issued jointly by the following organizations:

American Institute of Certified Public Accountants  
Association of Certified Fraud Examiners  
Financial Executives International  
Information Systems Audit and Control Association  
The Institute of Internal Auditors  
Institute of Management Accountants  
Society for Human Resource Management

In addition, we would also like to acknowledge the American Accounting Association, the Defense Industry Initiative, and the National Association of Corporate Directors for their review of the document and helpful comments and materials.

We gratefully acknowledge the valuable contribution provided by the Anti-Fraud Detection Subgroup:

Daniel D. Montgomery, *Chair*  
Toby J.F. Bishop  
Dennis H. Chookaszian  
Susan A. Finn  
Dana Hermanson

David L. Landsittel  
Carol A. Langelier  
Joseph T. Wells  
Janice Wilkins

Finally, we thank the staff of the American Institute of Certified Public Accountants for their support on this project:

*Program Manager*  
*Knowledge Management*

This document was commissioned by the Fraud Task Force of the AICPA's Auditing Standards Board. This document has not been adopted, approved, disapproved, or otherwise acted upon by a board, committee, governing body, or membership of the above issuing organizations.

## Preface

Some organizations have significantly lower levels of misappropriation of assets and are less susceptible to fraudulent financial reporting than other organizations because these organizations take proactive steps to prevent or deter fraud. It is only those organizations that seriously consider fraud risks and take proactive steps to create the right kind of climate to reduce its occurrence that have success in preventing fraud. This document identifies the key participants in this antifraud effort, including the board of directors, management, internal and independent auditors, and certified fraud examiners.

Management may develop and implement some of these programs and controls in response to specific identified risks of material misstatement of financial statements due to fraud. In other cases, these programs and controls may be a part of the entity's enterprise-wide risk management activities.

Management is responsible for designing and implementing systems and procedures for the prevention and detection of fraud and, along with the board of directors, for ensuring a culture and environment that promotes honesty and ethical behavior. However, because of the characteristics of fraud, a material misstatement of financial statements due to fraud may occur notwithstanding the presence of programs and controls such as those described in this document.

## Introduction

Fraud can range from minor employee theft and unproductive behavior to misappropriation of assets and fraudulent financial reporting. Material financial statement fraud can have a significant adverse effect on an entity's market value, reputation, and ability to achieve its strategic objectives. A number of highly publicized cases have heightened the awareness of the effects of fraudulent financial reporting and have led many organizations to be more proactive in taking steps to prevent or deter its occurrence. Misappropriation of assets, though often not material to the financial statements, can nonetheless result in substantial losses to an entity if a dishonest employee has the incentive and opportunity to commit fraud.

The risk of fraud can be reduced through a combination of prevention, deterrence, and detection measures. However, fraud can be difficult to detect because it often involves concealment through falsification of documents or collusion among management, employees, or third parties. Therefore, it is important to place a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals that they should not commit fraud because of the likelihood of detection and punishment. Moreover, prevention and deterrence measures are much less costly than the time and expense required for fraud detection and investigation.

An entity's management has both the responsibility and the means to implement measures to reduce the incidence of fraud. The measures an organization takes to prevent and deter fraud also can help create a positive workplace environment that can enhance the entity's ability to recruit and retain high-quality employees.

Research suggests that the most effective way to implement measures to reduce wrongdoing is to base them on a set of core values that are embraced by the entity. These values provide an overarching message about the key principles guiding all employees' actions. This provides a platform upon which a more detailed code of conduct can be constructed, giving more specific guidance about permitted and prohibited behavior, based on applicable laws and the organization's values. Management needs to clearly articulate that all employees will be held accountable to act within the organization's code of conduct.

This document identifies measures entities can implement to prevent, deter, and detect fraud. It discusses these measures in the context of three fundamental elements. Broadly stated, these fundamental elements are (1) create and maintain a *culture* of honesty and high ethics; (2) *evaluate* the risks of fraud and implement the processes, procedures, and controls needed to mitigate the risks and reduce the opportunities for fraud; and (3) develop an appropriate *oversight* process. Although the entire management team shares the responsibility for implementing and monitoring these activities, with oversight from the board of directors, the entity's chief executive officer (CEO) should initiate and support such measures. Without the CEO's active support, these measures are less likely to be effective.

The information presented in this document generally is applicable to entities of all sizes. However, the degree to which certain programs and controls are applied in smaller, less-complex entities and the formality of their application are likely to differ from larger organizations. For example, management of a smaller entity (or the owner of an owner-managed entity), along with those charged with governance of the financial reporting process, are responsible for creating a culture of honesty and high ethics. Management also is responsible for implementing a system of internal controls commensurate with the nature and size of the organization, but smaller entities may find that certain types

of control activities are not relevant because of the involvement of and controls applied by management. However, all entities must make it clear that unethical or dishonest behavior will not be tolerated.

## Creating a Culture of Honesty and High Ethics

It is the organization's responsibility to create a culture of honesty and high ethics and to clearly communicate acceptable behavior and expectations of each employee. Such a culture is rooted in a strong set of core values (or value system) that provides the foundation for employees as to how the organization conducts its business. It also allows an entity to develop an ethical framework that covers (1) fraudulent financial reporting, (2) misappropriation of assets, and (3) corruption as well as other issues.<sup>1</sup>

Creating a culture of honesty and high ethics should include the following.

### ***Setting the Tone at the Top***

Directors and officers of corporations set the "tone at the top" for ethical behavior within any organization. Research in moral development strongly suggests that honesty can best be reinforced when a proper example is set—sometimes referred to as the tone at the top. The management of an entity cannot act one way and expect others in the entity to behave differently.

In many cases, particularly in larger organizations, it is necessary for management to both behave ethically and openly communicate its expectations for ethical behavior because most employees are not in a position to observe management's actions. Management must show employees through its words and actions that dishonest or unethical behavior will not be tolerated, even if the result of the action benefits the entity. Moreover, it should be evident that all employees will be treated equally, regardless of their position.

For example, statements by management regarding the absolute need to meet operating and financial targets can create undue pressures that may lead employees to commit fraud to achieve them. Setting unachievable goals for employees can give them two unattractive choices: fail or cheat. In contrast, a statement from management that says, "We are aggressive in pursuing our targets, while requiring truthful financial reporting at all times," clearly indicates to employees that integrity is a requirement. This message also conveys that the entity has "zero tolerance" for unethical behavior, including fraudulent financial reporting.

The cornerstone of an effective antifraud environment is a culture with a strong value system founded on integrity. This value system often is reflected in a code of conduct.<sup>2</sup> The code of conduct should reflect the core values of the entity and guide employees in making appropriate decisions during their workday. The code of conduct might include such topics as ethics, confidentiality, conflicts of interest, intellectual property, sexual harassment, and fraud.<sup>3</sup> For a code of

---

<sup>1</sup> Corruption includes bribery and other illegal acts.

<sup>2</sup> An entity's value system also could be reflected in an ethics policy, a statement of business principles, or some other concise summary of guiding principles.

<sup>3</sup> Although the discussion in this document focuses on fraud, the subject of fraud often is considered in the context of a broader set of principles that govern an organization. Some organizations, however, may elect to develop a fraud policy separate from an ethics policy. Specific examples of topics in a fraud policy might include a requirement to comply with all laws and regulations and explicit guidance regarding making payments to obtain contracts, holding pricing discussions with competitors, environmental discharges, relationships with vendors, and maintenance of accurate books and records.

conduct to be effective, it should be communicated to all personnel in an understandable fashion. It also should be developed in a participatory and positive manner that will result in both management and employees taking ownership of its content. Finally, the code of conduct should be included in an employee handbook or policy manual, or in some other formal document or location (for example, the entity's intranet) so it can be referred to when needed.

Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. For examples of codes of conduct, see Attachment 1, "AICPA 'CPA's Handbook of Fraud and Commercial Crime Prevention,' An Organizational Code of Conduct," and Attachment 2, "Financial Executives International Code of Ethics Statement" provided by Financial Executives International. In addition, visit the Institute of Management Accountant's Ethics Center at [www.imanet.org](http://www.imanet.org) for their members' standards of ethical conduct.

### ***Creating a Positive Workplace Environment***

Research results indicate that wrongdoing occurs less frequently when employees have positive feelings about an entity than when they feel abused, threatened, or ignored. Without a positive workplace environment, there are more opportunities for poor employee morale, which can affect an employee's attitude about committing fraud against an entity. Factors that detract from a positive work environment and may increase the risk of fraud include:

- Top management that does not seem to care about or reward appropriate behavior
- Negative feedback and lack of recognition for job performance
- Perceived inequities in the organization
- Autocratic rather than participative management
- Low organizational loyalty or feelings of ownership
- Unreasonable budget expectations or other financial targets
- Fear of delivering "bad news" to supervisors and/or management
- Less-than-competitive compensation
- Poor training and promotion opportunities
- Lack of clear organizational responsibilities
- Poor communication practices or methods within the organization

The entity's human resources department often is instrumental in helping to build a corporate culture and a positive work environment. Human resource professionals are responsible for implementing specific programs and initiatives, consistent with management's strategies, that can help to mitigate many of the detractors mentioned above. Mitigating factors that help create a positive work environment and reduce the risk of fraud may include:

- Recognition and reward systems that are in tandem with goals and results
- Equal employment opportunities
- Team-oriented, collaborative decision-making policies
- Professionally administered compensation programs
- Professionally administered training programs and an organizational priority of career development

Employees should be empowered to help create a positive workplace environment and support the entity's values and code of conduct. They should be given the opportunity to provide input to the development and updating of the entity's code of conduct, to ensure that it is relevant, clear, and fair. Involving employees in this fashion also may effectively contribute to the oversight of the entity's code of conduct and an environment of ethical behavior (see the section titled "Developing an Appropriate Oversight Process").

Employees should be given the means to obtain advice internally before making decisions that appear to have significant legal or ethical implications. They should also be encouraged and given the means to communicate concerns, anonymously if preferred, about potential violations of the entity's code of conduct, without fear of retribution. Many organizations have implemented a process for employees to report on a confidential basis any actual or suspected wrongdoing, or potential violations of the code of conduct or ethics policy. For example, some organizations use a telephone "hotline" that is directed to or monitored by an ethics officer, fraud officer, general counsel, internal audit director, or another trusted individual responsible for investigating and reporting incidents of fraud or illegal acts.

### ***Hiring and Promoting Appropriate Employees***

Each employee has a unique set of values and personal code of ethics. When faced with sufficient pressure and a perceived opportunity, some employees will behave dishonestly rather than face the negative consequences of honest behavior. The threshold at which dishonest behavior starts, however, will vary among individuals. If an entity is to be successful in preventing fraud, it must have effective policies that minimize the chance of hiring or promoting individuals with low levels of honesty, especially for positions of trust.

Proactive hiring and promotion procedures may include:

- Conducting background investigations on individuals being considered for employment or for promotion to a position of trust<sup>4</sup>
- Thoroughly checking a candidate's education, employment history, and personal references
- Periodic training of all employees about the entity's values and code of conduct, (training is addressed in the following section)
- Incorporating into regular performance reviews an evaluation of how each individual has contributed to creating an appropriate workplace environment in line with the entity's values and code of conduct
- Continuous objective evaluation of compliance with the entity's values and code of conduct, with violations being addressed immediately

### ***Training***

New employees should be trained at the time of hiring about the entity's values and its code of conduct. This training should explicitly cover expectations of all employees regarding (1) their duty to communicate certain matters; (2) a list of the types of matters, including actual or suspected fraud, to be communicated along with specific examples; and (3) information on how to communicate those matters. There also should be an affirmation from senior management regarding employee expectations and communication responsibilities. Such training should include an element of "fraud awareness," the tone of which should be

---

<sup>4</sup> Some organizations also have considered follow-up investigations, particularly for employees in positions of trust, on a periodic basis (for example, every five years) or as circumstances dictate.

positive but nonetheless stress that fraud can be costly (and detrimental in other ways) to the entity and its employees.

In addition to training at the time of hiring, employees should receive refresher training periodically thereafter. Some organizations may consider ongoing training for certain positions, such as purchasing agents or employees with financial reporting responsibilities. Training should be specific to an employee's level within the organization, geographic location, and assigned responsibilities. For example, training for senior manager level personnel would normally be different from that of nonsupervisory employees, and training for purchasing agents would be different from that of sales representatives.

### **Confirmation**

Management needs to clearly articulate that all employees will be held accountable to act within the entity's code of conduct. All employees within senior management and the finance function, as well as other employees in areas that might be exposed to unethical behavior (for example, procurement, sales and marketing) should be required to sign a code of conduct statement annually, at a minimum.

Requiring periodic confirmation by employees of their responsibilities will not only reinforce the policy but may also deter individuals from committing fraud and other violations and might identify problems before they become significant. Such confirmation may include statements that the individual understands the entity's expectations, has complied with the code of conduct, and is not aware of any violations of the code of conduct other than those the individual lists in his or her response. Although people with low integrity may not hesitate to sign a false confirmation, most people will want to avoid making a false statement in writing. Honest individuals are more likely to return their confirmations and to disclose what they know (including any conflicts of interest or other personal exceptions to the code of conduct). Thorough follow-up by internal auditors or others regarding nonreplies may uncover significant issues.

### **Discipline**

The way an entity reacts to incidents of alleged or suspected fraud will send a strong deterrent message throughout the entity, helping to reduce the number of future occurrences. The following actions should be taken in response to an alleged incident of fraud:

- A thorough investigation of the incident should be conducted.<sup>5</sup>
- Appropriate and consistent actions should be taken against violators.
- Relevant controls should be assessed and improved.
- Communication and training should occur to reinforce the entity's values, code of conduct, and expectations.

Expectations about the consequences of committing fraud must be clearly communicated throughout the entity. For example, a strong statement from management that dishonest actions will not be tolerated, and that violators may be terminated and referred to the appropriate authorities, clearly establishes consequences and can be a valuable deterrent to wrongdoing. If wrongdoing occurs

---

<sup>5</sup> Many entities of sufficient size are employing antifraud professionals, such as certified fraud examiners, who are responsible for resolving allegations of fraud within the organization and who also assist in the detection and deterrence of fraud. These individuals typically report their findings internally to the corporate security, legal, or internal audit departments. In other instances, such individuals may be empowered directly by the board of directors or its audit committee.

and an employee is disciplined, it can be helpful to communicate that fact, on a no-name basis, in an employee newsletter or other regular communication to employees. Seeing that other people have been disciplined for wrongdoing can be an effective deterrent, increasing the perceived likelihood of violators being caught and punished. It also can demonstrate that the entity is committed to an environment of high ethical standards and integrity.

## Evaluating Antifraud Processes and Controls

Neither fraudulent financial reporting nor misappropriation of assets can occur without a perceived opportunity to commit and conceal the act. Organizations should be proactive in reducing fraud opportunities by (1) identifying and measuring fraud risks, (2) taking steps to mitigate identified risks, and (3) implementing and monitoring appropriate preventive and detective internal controls and other deterrent measures.

### *Identifying and Measuring Fraud Risks*

Management has primary responsibility for establishing and monitoring all aspects of the entity's fraud risk-assessment and prevention activities.<sup>6</sup> Fraud risks often are considered as part of an enterprise-wide risk management program, though they may be addressed separately.<sup>7</sup> The fraud risk-assessment process should consider the vulnerability of the entity to fraudulent activity (fraudulent financial reporting, misappropriation of assets, and corruption) and whether any of those exposures could result in a material misstatement of the financial statements or material loss to the organization. In identifying fraud risks, organizations should consider organizational, industry, and country-specific characteristics that influence the risk of fraud.

The nature and extent of management's risk assessment activities should be commensurate with the size of the entity and complexity of its operations. For example, the risk assessment process is likely to be less formal and less structured in smaller entities. However, management should recognize that fraud can occur in organizations of any size or type, and that almost any employee may be capable of committing fraud given the right set of circumstances. Accordingly, management should develop a heightened "fraud awareness" and an appropriate fraud risk-management program, with oversight from the board of directors or audit committee.

### *Mitigating Fraud Risks*

It may be possible to reduce or eliminate certain fraud risks by making changes to the entity's activities and processes. An entity may choose to sell certain segments of its operations, cease doing business in certain locations, or reorganize its business processes to eliminate unacceptable risks. For example, the risk of misappropriation of funds may be reduced by implementing a central lockbox

---

<sup>6</sup> Management may elect to have internal audit play an active role in the development, monitoring, and ongoing assessment of the entity's fraud risk-management program. This may include an active role in the development and communication of the entity's code of conduct or ethics policy, as well as in investigating actual or alleged instances of noncompliance.

<sup>7</sup> Some organizations may perform a periodic self-assessment using questionnaires or other techniques to identify and measure risks. Self-assessment may be less reliable in identifying the risk of fraud due to a lack of experience with fraud (although many organizations experience some form of fraud and abuse, material financial statement fraud or misappropriation of assets is a rare event for most) and because management may be unwilling to acknowledge openly that they might commit fraud given sufficient pressure and opportunity.

at a bank to receive payments instead of receiving money at the entity's various locations. The risk of corruption may be reduced by closely monitoring the entity's procurement process. The risk of financial statement fraud may be reduced by implementing shared services centers to provide accounting services to multiple segments, affiliates, or geographic locations of an entity's operations. A shared services center may be less vulnerable to influence by local operations managers and may be able to implement more extensive fraud detection measures cost-effectively.

### ***Implementing and Monitoring Appropriate Internal Controls***

Some risks are inherent in the environment of the entity, but most can be addressed with an appropriate system of internal control. Once fraud risk assessment has taken place, the entity can identify the processes, controls, and other procedures that are needed to mitigate the identified risks. Effective internal control will include a well-developed control environment, an effective and secure information system, and appropriate control and monitoring activities.<sup>8</sup> Because of the importance of information technology in supporting operations and the processing of transactions, management also needs to implement and maintain appropriate controls, whether automated or manual, over computer-generated information.

In particular, management should evaluate whether appropriate internal controls have been implemented in any areas management has identified as posing a higher risk of fraudulent activity, as well as controls over the entity's financial reporting process. Because fraudulent financial reporting may begin in an interim period, management also should evaluate the appropriateness of internal controls over interim financial reporting.

Fraudulent financial reporting by upper-level management typically involves override of internal controls within the financial reporting process. Because management has the ability to override controls, or to influence others to perpetrate or conceal fraud, the need for a strong value system and a culture of ethical financial reporting becomes increasingly important. This helps create an environment in which other employees will decline to participate in committing a fraud and will use established communication procedures to report any requests to commit wrongdoing. The potential for management override also increases the need for appropriate oversight measures by the board of directors or audit committee, as discussed in the following section.

Fraudulent financial reporting by lower levels of management and employees may be deterred or detected by appropriate monitoring controls, such as having higher-level managers review and evaluate the financial results reported by individual operating units or subsidiaries. Unusual fluctuations in results of particular reporting units, or the lack of expected fluctuations, may indicate potential manipulation by departmental or operating unit managers or staff.

### **Developing an Appropriate Oversight Process**

To effectively prevent or deter fraud, an entity should have an appropriate oversight function in place. Oversight can take many forms and can be performed by many within and outside the entity, under the overall oversight of the audit committee (or board of directors where no audit committee exists).

---

<sup>8</sup> The report of the Committee of Sponsoring Organizations (COSO) of the Treadway Commission, *Internal Control—Integrated Framework*, provides reasonable criteria for management to use in evaluating the effectiveness of the entity's system of internal control.

### ***Audit Committee or Board of Directors***

The audit committee (or the board of directors where no audit committee exists) should evaluate management's identification of fraud risks, implementation of antifraud measures, and creation of the appropriate "tone at the top." Active oversight by the audit committee can help to reinforce management's commitment to creating a culture with "zero tolerance" for fraud. An entity's audit committee also should ensure that senior management (in particular, the CEO) implements appropriate fraud deterrence and prevention measures to better protect investors, employees, and other stakeholders. The audit committee's evaluation and oversight not only helps make sure that senior management fulfills its responsibility, but also can serve as a deterrent to senior management engaging in fraudulent activity (that is, by ensuring an environment is created whereby any attempt by senior management to involve employees in committing or concealing fraud would lead promptly to reports from such employees to appropriate persons, including the audit committee).

The audit committee also plays an important role in helping the board of directors fulfill its oversight responsibilities with respect to the entity's financial reporting process and the system of internal control.<sup>9</sup> In exercising this oversight responsibility, the audit committee should consider the potential for management override of controls or other inappropriate influence over the financial reporting process. For example, the audit committee may obtain from the internal auditors and independent auditors their views on management's involvement in the financial reporting process and, in particular, the ability of management to override information processed by the entity's financial reporting system (for example, the ability for management or others to initiate or record nonstandard journal entries). The audit committee also may consider reviewing the entity's reported information for reasonableness compared with prior or forecasted results, as well as with peers or industry averages. In addition, information received in communications from the independent auditors<sup>10</sup> can assist the audit committee in assessing the strength of the entity's internal control and the potential for fraudulent financial reporting.

As part of its oversight responsibilities, the audit committee should encourage management to provide a mechanism for employees to report concerns about unethical behavior, actual or suspected fraud, or violations of the entity's code of conduct or ethics policy. The committee should then receive periodic reports describing the nature, status, and eventual disposition of any fraud or unethical conduct. A summary of the activity, follow-up and disposition also should be provided to the full board of directors.

If senior management is involved in fraud, the next layer of management may be the most likely to be aware of it. As a result, the audit committee (and other directors) should consider establishing an open line of communication with members of management one or two levels below senior management to assist in identifying fraud at the highest levels of the organization or investigating any fraudulent activity that might occur.<sup>11</sup> The audit committee typically has

For the board's role in the oversight of risk management, see Report of the NACD Blue Ribbon Commission on Risk Oversight, (Washington, D.C.: National Association of Corporate Directors, 2002).

<sup>10</sup> See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, and section 380A, *Communications With Audit Committees*. [Footnote revised, May 2006, due to conforming changes necessary due to the issuance of Statement on Standards No. 112.]

<sup>11</sup> *Report of the NACD Best Practices Council: Coping with Fraud and Other Illegal Activity, A Guide for Directors, CEOs, and Senior Managers* (1998) sets forth "basic principles" and "implementation approaches" for dealing with fraud and other illegal activity.

the ability and authority to investigate any alleged or suspected wrongdoing brought to its attention. Most audit committee charters empower the committee to investigate any matters within the scope of its responsibilities, and to retain legal, accounting, and other professional advisers as needed to advise the committee and assist in its investigation.

All audit committee members should be financially literate, and each committee should have at least one financial expert. The financial expert should possess:

- An understanding of generally accepted accounting principles and audits of financial statements prepared under those principles. Such understanding may have been obtained either through education or experience. It is important for someone on the audit committee to have a working knowledge of those principles and standards.
- Experience in the preparation and/or the auditing of financial statements of an entity of similar size, scope and complexity as the entity on whose board the committee member serves. The experience would generally be as a chief financial officer, chief accounting officer, controller, or auditor of a similar entity. This background will provide a necessary understanding of the transactional and operational environment that produces the issuer's financial statements. It will also bring an understanding of what is involved in, for example, appropriate accounting estimates, accruals, and reserve provisions, and an appreciation of what is necessary to maintain a good internal control environment.
- Experience in internal governance and procedures of audit committees, obtained either as an audit committee member, a senior corporate manager responsible for answering to the audit committee, or an external auditor responsible for reporting on the execution and results of annual audits.

### ***Management***

Management is responsible for overseeing the activities carried out by employees, and typically does so by implementing and monitoring processes and controls such as those discussed previously. However, management also may initiate, participate in, or direct the commission and concealment of a fraudulent act. Accordingly, the audit committee (or the board of directors where no audit committee exists) has the responsibility to oversee the activities of senior management and to consider the risk of fraudulent financial reporting involving the override of internal controls or collusion (see discussion on the audit committee and board of directors above).

Public companies should include a statement in the annual report acknowledging management's responsibility for the preparation of the financial statements and for establishing and maintaining an effective system of internal control. This will help improve the public's understanding of the respective roles of management and the auditor. This statement has also been generally referred to as a "Management Report" or "Management Certificate." Such a statement can provide a convenient vehicle for management to describe the nature and manner of preparation of the financial information and the adequacy of the internal accounting controls. Logically, the statement should be presented in close proximity to the formal financial statements. For example, it could appear near the independent auditor's report, or in the financial review or management analysis section.

### ***Internal Auditors***

An effective internal audit team can be extremely helpful in performing aspects of the oversight function. Their knowledge about the entity may enable them to identify indicators that suggest fraud has been committed. The *Standards for the Professional Practice of Internal Auditing* (IIA Standards), issued by the Institute of Internal Auditors, state, "The internal auditor should have sufficient knowledge to identify the indicators of fraud but is not expected to have the expertise of a person whose primary responsibility is detecting and investigating fraud." Internal auditors also have the opportunity to evaluate fraud risks and controls and to recommend action to mitigate risks and improve controls. Specifically, the IIA Standards require internal auditors to assess risks facing their organizations. This risk assessment is to serve as the basis from which audit plans are devised and against which internal controls are tested. The IIA Standards require the audit plan to be presented to and approved by the audit committee (or board of directors where no audit committee exists). The work completed as a result of the audit plan provides assurance on which management's assertion about controls can be made.

Internal audits can be both a detection and a deterrence measure. Internal auditors can assist in the deterrence of fraud by examining and evaluating the adequacy and the effectiveness of the system of internal control, commensurate with the extent of the potential exposure or risk in the various segments of the organization's operations. In carrying out this responsibility, internal auditors should, for example, determine whether:

- The organizational environment fosters control consciousness.
- Realistic organizational goals and objectives are set.
- Written policies (for example, a code of conduct) exist that describe prohibited activities and the action required whenever violations are discovered.
- Appropriate authorization policies for transactions are established and maintained.
- Policies, practices, procedures, reports, and other mechanisms are developed to monitor activities and safeguard assets, particularly in high-risk areas.
- Communication channels provide management with adequate and reliable information.
- Recommendations need to be made for the establishment or enhancement of cost-effective controls to help deter fraud.

Internal auditors may conduct proactive auditing to search for corruption, misappropriation of assets, and financial statement fraud. This may include the use of computer-assisted audit techniques to detect particular types of fraud. Internal auditors also can employ analytical and other procedures to isolate anomalies and perform detailed reviews of high-risk accounts and transactions to identify potential financial statement fraud. The internal auditors should have an independent reporting line directly to the audit committee, to enable them to express any concerns about management's commitment to appropriate internal controls or to report suspicions or allegations of fraud involving senior management.

### ***Independent Auditors***

Independent auditors can assist management and the board of directors (or audit committee) by providing an assessment of the entity's process for identifying,

assessing, and responding to the risks of fraud. The board of directors (or audit committee) should have an open and candid dialogue with the independent auditors regarding management's risk assessment process and the system of internal control. Such a dialogue should include a discussion of the susceptibility of the entity to fraudulent financial reporting and the entity's exposure to misappropriation of assets.

### ***Certified Fraud Examiners***

Certified fraud examiners may assist the audit committee and board of directors with aspects of the oversight process either directly or as part of a team of internal auditors or independent auditors. Certified fraud examiners can provide extensive knowledge and experience about fraud that may not be available within a corporation. They can provide more objective input into management's evaluation of the risk of fraud (especially fraud involving senior management, such as financial statement fraud) and the development of appropriate antifraud controls that are less vulnerable to management override. They can assist the audit committee and board of directors in evaluating the fraud risk assessment and fraud prevention measures implemented by management. Certified fraud examiners also conduct examinations to resolve allegations or suspicions of fraud, reporting either to an appropriate level of management or to the audit committee or board of directors, depending upon the nature of the issue and the level of personnel involved.

## **Attachment 1: AICPA "CPA's Handbook of Fraud and Commercial Crime Prevention," An Organizational Code of Conduct**

The following is an example of an organizational code of conduct, which includes definitions of what is considered unacceptable, and the consequences of any breaches thereof. The specific content and areas addressed in an entity's code of conduct should be specific to that entity.

### *Organizational Code of Conduct*

The Organization and its employees must, at all times, comply with all applicable laws and regulations. The Organization will not condone the activities of employees who achieve results through violation of the law or unethical business dealings. This includes any payments for illegal acts, indirect contributions, rebates, and bribery. The Organization does not permit any activity that fails to stand the closest possible public scrutiny.

All business conduct should be well above the minimum standards required by law. Accordingly, employees must ensure that their actions cannot be interpreted as being, in any way, in contravention of the laws and regulations governing the Organization's worldwide operations.

Employees uncertain about the application or interpretation of any legal requirements should refer the matter to their superior, who, if necessary, should seek the advice of the legal department.

### *General Employee Conduct*

The Organization expects its employees to conduct themselves in a businesslike manner. Drinking, gambling, fighting, swearing, and similar unprofessional activities are strictly prohibited while on the job.

Employees must not engage in sexual harassment, or conduct themselves in a way that could be construed as such, for example, by using inappropriate language, keeping or posting inappropriate materials in their work area, or accessing inappropriate materials on their computer.

### *Conflicts of Interest*

The Organization expects that employees will perform their duties conscientiously, honestly, and in accordance with the best interests of the Organization. Employees must not use their position or the knowledge gained as a result of their position for private or personal advantage. Regardless of the circumstances, if employees sense that a course of action they have pursued, are presently pursuing, or are contemplating pursuing may involve them in a conflict of interest with their employer, they should immediately communicate all the facts to their superior.

### *Outside Activities, Employment, and Directorships*

All employees share a serious responsibility for the Organization's good public relations, especially at the community level. Their readiness to help with religious, charitable, educational, and civic activities brings credit to the Organization and is encouraged. Employees must, however, avoid acquiring any business interest or participating in any other activity outside the Organization that would, or would appear to:

- Create an excessive demand upon their time and attention, thus depriving the Organization of their best efforts on the job.
- Create a conflict of interest—an obligation, interest, or distraction—that may interfere with the independent exercise of judgment in the Organization's best interest.

*Relationships With Clients and Suppliers*

Employees should avoid investing in or acquiring a financial interest for their own accounts in any business organization that has a contractual relationship with the Organization, or that provides goods or services, or both to the Organization, if such investment or interest could influence or create the impression of influencing their decisions in the performance of their duties on behalf of the Organization.

*Gifts, Entertainment, and Favors*

Employees must not accept entertainment, gifts, or personal favors that could, in any way, influence, or appear to influence, business decisions in favor of any person or organization with whom or with which the Organization has, or is likely to have, business dealings. Similarly, employees must not accept any other preferential treatment under these circumstances because their position with the Organization might be inclined to, or be perceived to, place them under obligation.

*Kickbacks and Secret Commissions*

Regarding the Organization's business activities, employees may not receive payment or compensation of any kind, except as authorized under the Organization's remuneration policies. In particular, the Organization strictly prohibits the acceptance of kickbacks and secret commissions from suppliers or others. Any breach of this rule will result in immediate termination and prosecution to the fullest extent of the law.

*Organization Funds and Other Assets*

Employees who have access to Organization funds in any form must follow the prescribed procedures for recording, handling, and protecting money as detailed in the Organization's instructional manuals or other explanatory materials, or both. The Organization imposes strict standards to prevent fraud and dishonesty. If employees become aware of any evidence of fraud and dishonesty, they should immediately advise their superior or the Law Department so that the Organization can promptly investigate further.

When an employee's position requires spending Organization funds or incurring any reimbursable personal expenses, that individual must use good judgment on the Organization's behalf to ensure that good value is received for every expenditure.

Organization funds and all other assets of the Organization are for Organization purposes only and not for personal benefit. This includes the personal use of organizational assets, such as computers.

*Organization Records and Communications*

Accurate and reliable records of many kinds are necessary to meet the Organization's legal and financial obligations and to manage the affairs of the Organization. The Organization's books and records must reflect in an accurate and timely manner all business transactions. The employees responsible for accounting and recordkeeping must fully disclose and record all assets, liabilities, or both, and must exercise diligence in enforcing these requirements.

Employees must not make or engage in any false record or communication of any kind, whether internal or external, including but not limited to:

- False expense, attendance, production, financial, or similar reports and statements
- False advertising, deceptive marketing practices, or other misleading representations

*Dealing With Outside People and Organizations*

Employees must take care to separate their personal roles from their Organization positions when communicating on matters not involving Organization business. Employees must not use organization identification, stationery, supplies, and equipment for personal or political matters.

When communicating publicly on matters that involve Organization business, employees must not presume to speak for the Organization on any topic, unless they are certain that the views they express are those of the Organization, and it is the Organization's desire that such views be publicly disseminated.

When dealing with anyone outside the Organization, including public officials, employees must take care not to compromise the integrity or damage the reputation of either the Organization, or any outside individual, business, or government body.

*Prompt Communications*

In all matters relevant to customers, suppliers, government authorities, the public and others in the Organization, all employees must make every effort to achieve complete, accurate, and timely communications—responding promptly and courteously to all proper requests for information and to all complaints.

*Privacy and Confidentiality*

When handling financial and personal information about customers or others with whom the Organization has dealings, observe the following principles:

1. Collect, use, and retain only the personal information necessary for the Organization's business. Whenever possible, obtain any relevant information directly from the person concerned. Use only reputable and reliable sources to supplement this information.
2. Retain information only for as long as necessary or as required by law. Protect the physical security of this information.
3. Limit internal access to personal information to those with a legitimate business reason for seeking that information. Use only personal information for the purposes for which it was originally obtained. Obtain the consent of the person concerned before externally disclosing any personal information, unless legal process or contractual obligation provides otherwise.

## **Attachment 2: Financial Executives International Code of Ethics Statement**

The mission of Financial Executives International (FEI) includes significant efforts to promote ethical conduct in the practice of financial management throughout the world. Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. This code provides principles that members are expected to adhere to and advocate. They embody rules regarding individual and peer responsibilities, as well as responsibilities to employers, the public, and other stakeholders.

All members of FEI will:

1. Act with honesty and integrity, avoiding actual or apparent conflicts of interest in personal and professional relationships.
2. Provide constituents with information that is accurate, complete, objective, relevant, timely, and understandable.
3. Comply with rules and regulations of federal, state, provincial, and local governments, and other appropriate private and public regulatory agencies.
4. Act in good faith; responsibly; and with due care, competence, and diligence, without misrepresenting material facts or allowing one's independent judgment to be subordinated.
5. Respect the confidentiality of information acquired in the course of one's work except when authorized or otherwise legally obligated to disclose. Confidential information acquired in the course of one's work will not be used for personal advantage.
6. Share knowledge and maintain skills important and relevant to constituents' needs.
7. Proactively promote ethical behavior as a responsible partner among peers, in the work environment, and in the community.
8. Achieve responsible use of and control over all assets and resources employed or entrusted.

## AU Section 317

### *Illegal Acts by Clients*

(Supersedes section 328)

Source: SAS No. 54.

See section 9317 for interpretations of this section.

**Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated**

.01 This section prescribes the nature and extent of the consideration an independent auditor should give to the possibility of illegal acts by a client in an audit of financial statements in accordance with generally accepted auditing standards. The section also provides guidance on the auditor's responsibilities when a possible illegal act is detected.

#### **Definition of Illegal Acts**

.02 The term *illegal acts*, for purposes of this section, refers to violations of laws or governmental regulations. Illegal acts by clients are acts attributable to the entity whose financial statements are under audit or acts by management or employees acting on behalf of the entity. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

#### **Dependence on Legal Judgment**

.03 Whether an act is, in fact, illegal is a determination that is normally beyond the auditor's professional competence. An auditor, in reporting on financial statements, presents himself as one who is proficient in accounting and auditing. The auditor's training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his attention may be illegal. However, the determination as to whether a particular act is illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law.

#### **Relation to Financial Statements**

.04 Illegal acts vary considerably in their relation to the financial statements. Generally, the further removed an illegal act is from the events and transactions ordinarily reflected in financial statements, the less likely the auditor is to become aware of the act or to recognize its possible illegality.

.05 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

However, the auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statements assertions rather than from the perspective of legality *per se*. The auditor's responsibility to detect and report misstatements resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for misstatements caused by error or fraud as described in section 110, *Responsibilities and Functions of the Independent Auditor*.

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects, and their financial statement effect is indirect. An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. For example, securities may be purchased or sold based on inside information. While the direct effects of the purchase or sale may be recorded appropriately, their indirect effect, the possible contingent liability for violating securities laws, may not be appropriately disclosed. Even when violations of such laws and regulations can have consequences material to the financial statements, the auditor may not become aware of the existence of the illegal act unless he is informed by the client, or there is evidence of a governmental agency investigation or enforcement proceeding in the records, documents, or other information normally inspected in an audit of financial statements.

## The Auditor's Consideration of the Possibility of Illegal Acts

.07 As explained in paragraph .05, certain illegal acts have a direct and material effect on the determination of financial statement amounts. Other illegal acts, such as those described in paragraph .06, may, in particular circumstances, be regarded as having material but indirect effects on financial statements. The auditor's responsibility with respect to detecting, considering the financial statement effects of, and reporting these other illegal acts is described in this section. These other illegal acts are hereinafter referred to simply as *illegal acts*. The auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred. However, because of the characteristics of illegal acts explained above, an audit made in accordance with generally accepted auditing standards provides no assurance that illegal acts will be detected or that any contingent liabilities that may result will be disclosed.

## Audit Procedures in the Absence of Evidence Concerning Possible Illegal Acts

.08 Normally, an audit in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts. However, procedures applied for the purpose of forming an opinion

on the financial statements may bring possible illegal acts to the auditor's attention. For example, such procedures include reading minutes; inquiring of the client's management and legal counsel concerning litigation, claims, and assessments; performing substantive tests of details of transactions or balances. The auditor should make inquiries of management concerning the client's compliance with laws and regulations. Where applicable, the auditor should also inquire of management concerning—

- The client's policies relative to the prevention of illegal acts.
- The use of directives issued by the client and periodic representations obtained by the client from management at appropriate levels of authority concerning compliance with laws and regulations.

The auditor also obtains written representations from management concerning the absence of violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency. (See section 333, *Management Representations*.) The auditor need perform no further procedures in this area absent specific information concerning possible illegal acts.

### Specific Information Concerning Possible Illegal Acts

.09 In applying audit procedures and evaluating the results of those procedures, the auditor may encounter specific information that may raise a question concerning possible illegal acts, such as the following:

- Unauthorized transactions, improperly recorded transactions, or transactions not recorded in a complete or timely manner in order to maintain accountability for assets
- Investigation by a governmental agency, an enforcement proceeding, or payment of unusual fines or penalties
- Violations of laws or regulations cited in reports of examinations by regulatory agencies that have been made available to the auditor
- Large payments for unspecified services to consultants, affiliates, or employees
- Sales commissions or agents' fees that appear excessive in relation to those normally paid by the client or to the services actually received
- Unusually large payments in cash, purchases of bank cashiers' checks in large amounts payable to bearer, transfers to numbered bank accounts, or similar transactions
- Unexplained payments made to government officials or employees
- Failure to file tax returns or pay government duties or similar fees that are common to the entity's industry or the nature of its business

### Audit Procedures in Response to Possible Illegal Acts

.10 When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements. In doing so, the auditor should inquire of management at a level above those involved, if possible. If management

does not provide satisfactory information that there has been no illegal act, the auditor should—

- a. Consult with the client's legal counsel or other specialists about the application of relevant laws and regulations to the circumstances and the possible effects on the financial statements. Arrangements for such consultation with client's legal counsel should be made by the client.
- b. Apply additional procedures, if necessary, to obtain further understanding of the nature of the acts.

.11 The additional audit procedures considered necessary, if any, might include procedures such as the following:

- a. Examine supporting documents, such as invoices, canceled checks, and agreements and compare with accounting records.
- b. Confirm significant information concerning the matter with the other party to the transaction or with intermediaries, such as banks or lawyers.
- c. Determine whether the transaction has been properly authorized.
- d. Consider whether other similar transactions or events may have occurred, and apply procedures to identify them.

## The Auditor's Response to Detected Illegal Acts

.12 When the auditor concludes, based on information obtained and, if necessary, consultation with legal counsel, that an illegal act has or is likely to have occurred, the auditor should consider the effect on the financial statements as well as the implications for other aspects of the audit.

## The Auditor's Consideration of Financial Statement Effect

.13 In evaluating the materiality of an illegal act that comes to his attention, the auditor should consider both the quantitative and qualitative materiality of the act. For example, section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .59, states that "an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue." [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

.14 The auditor should consider the effect of an illegal act on the amounts presented in financial statements including contingent monetary effects, such as fines, penalties and damages. Loss contingencies resulting from illegal acts that may be required to be disclosed should be evaluated in the same manner as other loss contingencies. Examples of loss contingencies that may arise from an illegal act are: threat of expropriation of assets, enforced discontinuance of operations in another country, and litigation.

.15 The auditor should evaluate the adequacy of disclosure in the financial statements of the potential effects of an illegal act on the entity's operations. If material revenue or earnings are derived from transactions involving illegal acts, or if illegal acts create significant unusual risks associated with material revenue or earnings, such as loss of a significant business relationship, that information should be considered for disclosure.

## Implications for Audit

.16 The auditor should consider the implications of an illegal act in relation to other aspects of the audit, particularly the reliability of representations of management. The implications of particular illegal acts will depend on the relationship of the perpetration and concealment, if any, of the illegal act to specific control procedures and the level of management or employees involved.

## Communication With the Audit Committee

.17 The auditor should assure himself that the audit committee, or others with equivalent authority and responsibility, is adequately informed with respect to illegal acts that come to the auditor's attention.<sup>1</sup> The auditor need not communicate matters that are clearly inconsequential and may reach agreement in advance with the audit committee on the nature of such matters to be communicated. The communication should describe the act, the circumstances of its occurrence, and the effect on the financial statements. Senior management may wish to have its remedial actions communicated to the audit committee simultaneously. Possible remedial actions include disciplinary action against involved personnel, seeking restitution, adoption of preventive or corrective company policies, and modifications of specific control activities. If senior management is involved in an illegal act, the auditor should communicate directly with the audit committee. The communication may be oral or written. If the communication is oral, the auditor should document it.

## Effect on the Auditor's Report

.18 If the auditor concludes that an illegal act has a material effect on the financial statements, and the act has not been properly accounted for or disclosed, the auditor should express a qualified opinion or an adverse opinion on the financial statements taken as a whole, depending on the materiality of the effect on the financial statements.

.19 If the auditor is precluded by the client from obtaining sufficient appropriate audit evidence to evaluate whether an illegal act that could be material to the financial statements has, or is likely to have, occurred, the auditor generally should disclaim an opinion on the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.20 If the client refuses to accept the auditor's report as modified for the circumstances described in paragraphs .18 and .19, the auditor should withdraw from the engagement and indicate the reasons for withdrawal in writing to the audit committee or board of directors.

.21 The auditor may be unable to determine whether an act is illegal because of limitations imposed by the circumstances rather than by the client or because of uncertainty associated with interpretation of applicable laws or regulations or surrounding facts. In these circumstances, the auditor should consider the effect on his report.<sup>2</sup>

---

<sup>1</sup> For entities that do not have audit committees, the phrase "others with equivalent authority and responsibility" may include the board of directors, the board of trustees, or the owner in owner-managed entities.

<sup>2</sup> See section 508, *Reports on Audited Financial Statements*.

## Other Considerations in an Audit in Accordance With Generally Accepted Auditing Standards

**.22** In addition to the need to withdraw from the engagement, as described in paragraph .20, the auditor may conclude that withdrawal is necessary when the client does not take the remedial action that the auditor considers necessary in the circumstances even when the illegal act is not material to the financial statements. Factors that should affect the auditor's conclusion include the implications of the failure to take remedial action, which may affect the auditor's ability to rely on management representations, and the effects of continuing association with the client. In reaching a conclusion on such matters, the auditor may wish to consult with his own legal counsel.

**.23** Disclosure of an illegal act to parties other than the client's senior management and its audit committee or board of directors is not ordinarily part of the auditor's responsibility, and such disclosure would be precluded by the auditor's ethical or legal obligation of confidentiality, unless the matter affects his opinion on the financial statements. The auditor should recognize, however, that in the following circumstances a duty to notify parties outside the client may exist:<sup>3</sup>

- a. When the entity reports an auditor change under the appropriate securities law on Form 8-K<sup>4</sup>
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*<sup>5</sup>
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive financial assistance from a government agency

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may wish to consult with legal counsel before discussing illegal acts with parties outside the client.

## Responsibilities in Other Circumstances

**.24** An auditor may accept an engagement that entails a greater responsibility for detecting illegal acts than that specified in this section. For example, a governmental unit may engage an independent auditor to perform an audit in accordance with the Single Audit Act of 1984. In such an engagement,

---

<sup>3</sup> Auditors may be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in section 10A(b)1 of the Securities Exchange Act of 1934) to make a report to the Securities and Exchange Commission relating to an illegal act that has a material effect on the financial statements. [Footnote added, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

<sup>4</sup> Disclosure to the Securities and Exchange Commission may be necessary if, among other matters, the auditor withdraws because the board of directors has not taken appropriate remedial action. Such failure may be a reportable disagreement on Form 8-K. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

<sup>5</sup> In accordance with section 315, communications between predecessor and successor auditors require the specific permission of the client. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

the independent auditor is responsible for testing and reporting on the governmental unit's compliance with certain laws and regulations applicable to Federal financial assistance programs. Also, an independent auditor may undertake a variety of other special engagements. For example, a corporation's board of directors or its audit committee may engage an auditor to apply agreed-upon procedures and report on compliance with the corporation's code of conduct under the attestation standards.

## **Effective Date**

**.25** This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible.

## AU Section 9317

### ***Illegal Acts by Clients: Auditing Interpretations of Section 317***

#### **[1.] Consideration of Internal Control in a Financial Statement Audit and the Foreign Corrupt Practices Act**

[.01–.02] [Deleted November, 2006.]

#### **2. Material Weaknesses in Internal Control and the Foreign Corrupt Practices Act**

**.03 Question**—What course of action should be followed by the auditor of an entity subject to the internal accounting control provision of the *Foreign Corrupt Practices Act of 1977* to comply with section 317 when a material weakness in internal control comes to his attention?

**.04 Interpretation**—The standards applied by an auditor in determining a material weakness in internal control may differ from the standards for determining a violation of the Act. Nevertheless, a specific material weakness may ultimately be determined to be a violation and, hence, an illegal act. Therefore, the auditor should inquire of the client's management and consult with the client's legal counsel as to whether the material weakness is a violation of the Act.

**.05** In consultation with management and legal counsel, consideration should be given to corrective action taken or in process. If management has concluded that corrective action for a material weakness is not practicable, consideration should be given to the reasons underlying that conclusion, including management's evaluation of the costs of correction in relation to the expected benefit to be derived.<sup>1</sup> If it is determined that there has been a violation of the Act and appropriate consideration is not given to the violation, the auditor should consider withdrawing from the current engagement or dissociating himself from any future relationship with the client (see section 317.22).

**.06** A violation of the internal accounting control provision of the Act would not, in and of itself, have a direct effect on amounts presented in audited financial statements. However, the contingent monetary effect on an entity ultimately determined to have willfully violated the internal accounting control provision of the Act could be fines of up to \$10,000 for the violation. The auditor

---

<sup>1</sup> The legislative history of the Act indicates that cost-benefit considerations are appropriate in determining compliance with the accounting provisions of the Act. For example, the Senate committee report stated that "the size of the business, diversity of operations, degree of centralization of financial and operating management, amount of contact by top management with day-to-day operations, and numerous other circumstances are factors which management must consider in establishing and maintaining an internal accounting control system."

should consider the materiality of such contingent monetary effect in relation to the audited financial statements taken as a whole. Other loss contingencies, as defined by FASB Statement No. 5 [AC section C59], ordinarily would not result from a weakness in internal control which gives rise to such a violation of the Act.

[Issue Date: October, 1978.]

## AU Section 318

# ***Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained***

(Supersedes SAS No. 55)

Source: SAS No. 110.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

### **Introduction**

.01 This section establishes standards and provides guidance on determining overall responses and designing and performing further audit procedures to respond to the assessed risks of material misstatement<sup>1</sup> at the financial statement and relevant assertion levels in a financial statement audit, and on evaluating the sufficiency and appropriateness of the audit evidence obtained. In particular, this section provides guidance about implementing the third standard of field work, as follows:

The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

.02 The following is an overview of this standard:

- *Overall responses.* This section provides guidance to the auditor in determining overall responses to address risks of material misstatement at the financial statement level and provides guidance on the nature of those responses.
- *Audit procedures responsive to risks of material misstatement at the relevant assertion level.* This section provides guidance to the auditor in designing and performing further audit procedures, including tests of the operating effectiveness of controls, where relevant or necessary, and substantive procedures, whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. In addition, this section includes matters the auditor should consider in determining the nature, timing, and extent of such further audit procedures.
- *Evaluating the sufficiency and appropriateness of the audit evidence obtained.* This section provides guidance to the auditor in evaluating whether the risk assessments remain appropriate and to conclude whether sufficient appropriate audit evidence has been obtained.
- *Documentation.* This section provides related documentation guidance.

---

<sup>1</sup> Risk of material misstatement is described as the auditor's combined assessment of inherent risk and control risk. See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for the definition of and discussion about risk of material misstatement.

.03 To reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level<sup>2</sup> The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

### Overall Responses<sup>3</sup>

.04 The auditor's overall responses to address the assessed risks of material misstatement at the financial statement level may include emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence, assigning more experienced staff or those with specialized skills or using specialists, providing more supervision, or incorporating additional elements of unpredictability in the selection of further audit procedures to be performed. Additionally, the auditor may make general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date.

.05 The assessment of the risks of material misstatement at the financial statement level is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, the auditor should consider an appropriate response. For example, the auditor could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.06 Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach), or an approach that uses tests of controls as well as substantive procedures (combined approach).

### Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level

.07 The auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor's further audit procedures and the risk assessments. In designing further audit procedures, the auditor should consider such matters as:

- The significance of the risk
- The likelihood that a material misstatement will occur

---

<sup>2</sup> See paragraph .102 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

<sup>3</sup> See paragraphs .13 through .18 of section 311, *Planning and Supervision*, for further guidance on the auditor's overall audit strategy.

- The characteristics of the class of transactions, account balance, or disclosure involved
- The nature of the specific controls used by the entity, in particular, whether they are manual or automated
- Whether the auditor expects to obtain audit evidence to determine if the entity's controls are effective in preventing or detecting material misstatements

The nature of the audit procedures is of most importance in responding to the assessed risks.

**.08** The auditor's assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, the auditor may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, the auditor may exclude the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures<sup>4</sup> have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level.<sup>5</sup> The auditor often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

**.09** Regardless of the audit approach selected, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure as specified by paragraph .51. Because effective internal controls generally reduce, but do not eliminate, risk of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

**.10** In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, the auditor's further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in paragraph .07, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

## Considering the Nature, Timing, and Extent of Further Audit Procedures

### *Nature*

**.11** The nature of further audit procedures refers to their purpose (tests of controls or substantive procedures) and their type, that is, inspection,

---

<sup>4</sup> Audit procedures performed for the purpose of assessing risk (risk assessment procedures) are discussed in paragraphs .06 through .13 of section 314.

<sup>5</sup> Paragraphs .117 through .120 of section 314 describe circumstances in which the auditor may determine that it is not possible or practicable to reduce detection risk at the relevant assertion level to an appropriately low level with audit evidence obtained only from substantive procedures.

observation, inquiry, confirmation, recalculation, reperformance, or analytical procedures. Certain audit procedures may be more appropriate for some assertions than others. For example, in relation to revenue, tests of controls may be most responsive to the assessed risk of misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of misstatement of the occurrence assertion.

**.12** The auditor's selection of audit procedures is based on the risk of material misstatement. The higher the auditor's assessment of risk, the more reliable and relevant is the audit evidence sought by the auditor from substantive procedures. This may affect both the types of audit procedures to be performed and their combination. For example, the auditor may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management's representation.

**.13** In determining the audit procedures to be performed, the auditor should consider the reasons for the assessment of the risk of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure. This includes considering both the particular characteristics of each class of transactions, account balance, or disclosure (that is, the inherent risks) and whether the auditor's risk assessment takes account of the entity's controls (that is, the control risk). For example, if the auditor considers that there is a lower risk that a material misstatement may occur because of the particular characteristics of a class of transactions (without consideration of the related controls), the auditor may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if the auditor expects that there is a lower risk that a material misstatement may occur because an entity has effective controls and the auditor intends to design substantive procedures based on the effective operation of those controls, then the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness. This may be the case for a class of transactions of reasonably uniform, noncomplex characteristics that are routinely processed and controlled by the entity's information system.

**.14** The auditor should obtain audit evidence about the accuracy and completeness of information produced by the entity's information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity's information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information. See paragraph .57 of this section and paragraph .10 of section 326, *Audit Evidence*, for further guidance.

### **Timing**

**.15** Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies.

**.16** The auditor may perform tests of controls or substantive procedures at an interim date or at period end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls

or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period (see paragraphs .37 through .39, and .58 through .65).

**.17** In considering when to perform audit procedures, the auditor should also consider such matters as:

- The control environment
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times)
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period end)
- The period or date to which the audit evidence relates

**.18** Certain audit procedures can be performed only at or after period end, for example, agreeing the financial statements to the accounting records, or examining adjustments made during the course of preparing the financial statements. If there is a risk that the entity may have entered into improper sales contracts or that transactions may not have been finalized at period end, the auditor should perform procedures to respond to that specific risk. For example, when transactions are individually material or an error in cutoff may lead to material misstatement, the auditor should inspect transactions near the period end.

### **Extent**

**.19** Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the tolerable misstatement, the assessed risk of material misstatement, and the degree of assurance the auditor plans to obtain. In particular, the auditor may increase the extent of audit procedures as the risk of material misstatement increases. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk and reliable; therefore, the nature of the audit procedure is the most important consideration.

**.20** An auditor may use techniques such as computer-assisted audit techniques (CAATs) to enable him or her to extensively test electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to identify transactions with specific characteristics, or to test an entire population instead of a sample.

**.21** Valid conclusions may ordinarily be drawn using sampling approaches. However, if the sample size is too small, the sampling approach or the method of selection is not appropriate to achieve the specific audit objective, or exceptions are not appropriately followed up, there will be an unacceptable risk that the auditor's conclusion based on a sample may be different from the conclusion reached if the entire population was subjected to the same audit procedure. Section 350, *Audit Sampling*, provides guidance on planning, performing, and evaluating audit samples.

**.22** This section regards the use of different audit procedures in combination as an aspect of the nature of testing as discussed above. However, the auditor should consider whether the extent of testing is appropriate when performing different audit procedures in combination.

## Tests of Controls

**.23** The auditor should perform tests of controls when the auditor's risk assessment<sup>6</sup> includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

**.24** When, in accordance with paragraph .117 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs .119 and .120 of section 314, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using information technology (IT) and no documentation of transactions is produced or maintained, other than through the IT system.

**.25** Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs .106 through .108 of section 314 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

**.26** Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures,<sup>7</sup> the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

**.27** Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, because, generally, IT processing is inherently consistent, performing risk assessment procedures to determine whether an automated control has been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of IT general controls including computer security and program change control (see paragraph .49). Also, in obtaining an understanding of the control environment, the auditor may have made inquiries

---

<sup>6</sup> The auditor's strategy reflects the level of assurance the auditor plans to obtain regarding controls.

<sup>7</sup> Paragraph .06 of section 314 discusses the use of risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control, that the auditor uses to support assessments of the risks of material misstatement of the financial statements.

about management's use of budgets, observed management's comparison of monthly budgeted and actual expenses, and inspected reports pertaining to the investigation of variances between budgeted and actual amounts. These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented and may also provide audit evidence about the effectiveness of the operation of budgeting policies in preventing or detecting material misstatements in the classification of expenses. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

### ***Nature of Tests of Controls***

**.28** The auditor should select audit procedures to obtain assurance about the operating effectiveness of controls. As the planned level of assurance increases, the auditor should seek more reliable or more extensive audit evidence. In circumstances in which the auditor adopts an approach consisting primarily of tests of controls, in particular related to those risks where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures, the auditor should perform tests of controls to obtain a higher level of assurance about their operating effectiveness. Tests of the operating effectiveness of controls ordinarily include procedures such as inquiries of appropriate entity personnel; inspection of documents, reports, or electronic files, indicating performance of the control; observation of the application of the control; and performance of the application of the control by the auditor.

**.29** The auditor should perform other audit procedures in combination with inquiry to test the operating effectiveness of controls. Tests of the operating effectiveness of controls ordinarily include the same types of audit procedures used to evaluate the design and implementation of controls, and may also include reperformance of the application of the control by the auditor. Since inquiry alone is not sufficient, the auditor should use a combination of audit procedures to obtain sufficient appropriate audit evidence regarding the operating effectiveness of controls. Those controls subject to testing by performing inquiry combined with inspection or reperformance ordinarily provide more assurance than those controls for which the audit evidence consists solely of inquiry and observation. For example, an auditor may inquire about and observe the entity's procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor should supplement the observation with inquiries of entity personnel and may also inspect documentation about the operation of such controls at other times during the audit period in order to obtain sufficient appropriate audit evidence.

**.30** The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about whether the control was operating effectively at relevant times during the period under audit. For some controls, operating effectiveness is evidenced by documentation. In such circumstances, the auditor may decide to inspect the documentation to obtain audit evidence about operating effectiveness. For other controls, however, such documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed by a computer. In such circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation or the use of CAATs.

**.31** In designing tests of controls, the auditor should consider the need to obtain audit evidence supporting the effective operation of controls directly related to the relevant assertions as well as other indirect controls on which these controls depend. For example, the auditor may identify a user review of an exception report of credit sales over a customer's authorized credit limit as a direct control related to an assertion. In this case, the auditor should consider the effectiveness of the user's review of the report and also the controls related to the accuracy of the information in the report (for example, the IT general and application controls).

**.32** In the case of an automated application control, because of the inherent consistency of IT processing, audit evidence about the implementation of the control, when considered in combination with audit evidence obtained regarding the operating effectiveness of the entity's IT general controls (and in particular, security and change controls), may provide substantial audit evidence about its operating effectiveness during the relevant period.

**.33** When responding to the risk assessment, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. The objective of tests of controls is to evaluate whether a control operated effectively. The objective of tests of details is to support relevant assertions or detect material misstatements at the relevant assertion level. Although these objectives are different, both may be accomplished concurrently through performance of a test of controls and a test of details on the same transaction, known as a dual-purpose test. For example, the auditor may examine an invoice to determine whether it has been approved and to provide substantive evidence of a transaction. The auditor should carefully consider the design and evaluation of such tests in order to accomplish both objectives. Furthermore, when performing such tests the auditor should consider how the outcome of the tests of controls may affect the auditor's determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, the auditor should consider whether the sample size for substantive procedures should be increased from that originally planned.

**.34** The absence of misstatements detected by a substantive procedure does not provide audit evidence that controls related to the relevant assertion being tested are effective; however, misstatements that the auditor detects by performing substantive procedures should be considered by the auditor when assessing the operating effectiveness of related controls. A material misstatement detected by the auditor's procedures that was not identified by the entity should be regarded as at least a significant deficiency and a strong indicator that a material weakness in internal control exists and should be communicated to management and those charged with governance.<sup>8</sup>

### **Timing of Tests of Controls**

**.35** The timing of tests of controls depends on the auditor's objective and the period of reliance on those controls. When the auditor tests controls at a particular time, the auditor may obtain audit evidence that the controls operated effectively only at that time. However, when the auditor tests controls throughout a period, the auditor may obtain audit evidence of the effectiveness of the operation of the controls during that period.

**.36** The auditor should test controls for the particular time, or throughout the period, for which the auditor intends to rely on those controls. Audit evidence pertaining only to a point in time may be sufficient for the auditor's

---

<sup>8</sup> See footnote 4 of section 311 for the definition of the term *those charged with governance*.

purpose, for example, when testing controls over the entity's physical inventory counting at the period end. If, on the other hand, the auditor needs audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and the auditor should supplement those tests with other tests of controls that are capable of providing audit evidence that the control operated effectively at relevant times during the period under audit. For example, for a control embedded in a computer program, the auditor may test the operation of the control at a particular point in time to obtain audit evidence about whether the control is operating effectively at that point in time. The auditor then may perform tests of controls directed toward obtaining audit evidence about whether the control operated consistently during the audit period, such as tests of general controls pertaining to the modification and use of that computer program during the audit period. Such additional tests may be made as part of the tests of controls over the entity's monitoring of controls.

**.37** When the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor should determine what additional audit evidence should be obtained for the remaining period.

**.38** In making that determination, the auditor should consider the significance of the assessed risks of material misstatement at the relevant assertion level, the specific controls that were tested during the interim period, the degree to which audit evidence about the operating effectiveness of those controls was obtained, the length of the remaining period, the extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls, and the control environment. The auditor should obtain audit evidence about the nature and extent of any significant changes in internal control, including changes in the information system, processes, and personnel that occur subsequent to the interim period.

**.39** Additional audit evidence may be obtained, for example, by extending the testing of the operating effectiveness of controls over the remaining period, or testing the entity's monitoring of controls.

**.40** If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in prior audits, the auditor should obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit. The auditor should obtain audit evidence about whether such changes have occurred by a combination of observation, inquiry, and inspection to confirm the understanding of those specific controls. Paragraph .24 of section 326 states that the auditor should perform audit procedures to establish the continuing relevance of audit evidence obtained in prior periods when the auditor plans to use such audit evidence in the current period. For example, in performing the prior audit, the auditor may have determined that an automated control was functioning as intended. The auditor should obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning, for example, through inquiries of management and the inspection of logs to indicate whether controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls.

**.41** If the auditor plans to rely on controls that have changed since they were last tested, the auditor should test the operating effectiveness of such controls in the current audit. Changes may affect the relevance of the audit evidence obtained in prior periods such that it may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of

prior-period audit evidence; however, a change that causes data to be accumulated or calculated differently does affect it.

**.42** If, based on the understanding of the entity and its environment, the auditor plans to rely on controls that have not changed since they were last tested, the auditor should test the operating effectiveness of such controls at least once in every third year in an annual audit.<sup>9</sup> As indicated in paragraphs .40 and .45, the auditor may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that have changed since they were last tested or for controls that mitigate a significant risk. The auditor's decision about whether to rely on audit evidence obtained in prior audits for other controls is a matter of professional judgment. In addition, the length of time between retesting such controls is also a matter of professional judgment, but it should not exceed more than two years. The auditor should test a control at least once in every third year in an annual audit, because as time elapses between testing a control, the audit evidence provided in the current audit period about the operating effectiveness of a control tested in a prior audit becomes less relevant and reliable (see paragraph .44).

**.43** In considering whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in prior audits and, if so, the length of time that may elapse before retesting a control, the auditor should consider:

- The effectiveness of other elements of internal control, including the control environment, the entity's monitoring of controls, and the entity's risk assessment process.
- The risks arising from the characteristics of the control, including whether controls are manual or automated (see paragraphs .57 through .63 of section 314 for a discussion of specific risks arising from manual and automated elements of a control).
- The effectiveness of IT general controls.
- The effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control from tests of operating effectiveness in prior audits.
- Whether the lack of a change in a particular control poses a risk due to changing circumstances.
- The risk of material misstatement and the extent of reliance on the control.

In general, the higher the risk of material misstatement, or the greater the reliance on controls, the shorter the time elapsed, if any, is likely to be. Factors that ordinarily decrease the period for retesting a control, or result in not relying on audit evidence obtained in prior audits at all, include:

- A weak control environment.
- Weak monitoring controls.
- A significant manual element to the relevant controls.
- Personnel changes that significantly affect the application of the control.

---

<sup>9</sup> This guidance may not be appropriate for audits not performed at least on an annual basis.

- Changing circumstances that indicate the need for changes in the control.
- Weak IT general controls.

**.44** When there are a number of controls for which the auditor determines that it is appropriate to use audit evidence obtained in prior audits, the auditor should test the operating effectiveness of some controls each year. The purpose of such tests of operating effectiveness is to avoid the possibility that the auditor might apply the approach of paragraph .42 to all controls on which the auditor proposes to rely, but test all those controls in a single audit period with no testing of controls in the subsequent two audit periods. In addition to providing audit evidence about the operating effectiveness of the controls being tested in the current audit, such tests provide collateral evidence about the continuing effectiveness of the control environment and therefore contribute to the decision about whether it is appropriate to rely on audit evidence obtained in prior audits. Therefore, when the auditor determines in accordance with paragraphs .40 through .43 that it is appropriate to use audit evidence obtained in prior audits for a number of controls, the auditor should plan to test a sufficient portion of the controls in each audit period, so that at a minimum, each control is tested at least every third audit.

**.45** When, in accordance with paragraph .110 of section 314, the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, and if the auditor plans to rely on the operating effectiveness of controls intended to mitigate that significant risk, the auditor should obtain audit evidence about the operating effectiveness of those controls from tests of controls performed in the current period. The greater the risk of material misstatement, the more audit evidence the auditor should obtain that controls are operating effectively. Accordingly, although the auditor should consider information obtained in prior audits in designing tests of controls to mitigate a significant risk, the auditor should not rely on audit evidence about the operating effectiveness of controls over such risks obtained in a prior audit, but instead should obtain audit evidence about the operating effectiveness of controls over such risks in the current period.

### ***Extent of Tests of Controls***

**.46** The auditor should design sufficient tests of controls to obtain sufficient appropriate audit evidence that the controls are operating effectively throughout the period of reliance. Factors that the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.
- The extent to which audit evidence is obtained from tests of other controls related to the relevant assertion.
- The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control).
- The expected deviation from the control.

Considering the above factors, when a control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and if the control operates frequently, the auditor should consider using an audit sampling technique to obtain reasonable assurance of the operation of the control. When a control is applied on a periodic basis (for example, monthly reconciliation of accounts receivable subsidiary ledger to the general ledger) the auditor should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). Refer further to section 350, *Audit Sampling*, and the related Audit Guide.

**.47** To reduce the extent of substantive procedures in an audit, the tests of controls performed by the auditor need to be sufficient to determine the operating effectiveness of the controls at the relevant assertion level and the level of planned reliance (see paragraph .50).

**.48** The auditor should increase the extent of tests of controls the more the auditor relies on the operating effectiveness of controls in the assessment of risk. In addition, as the rate of expected deviation from a control increases, the auditor should increase the extent of testing of the control. However, the auditor should consider whether the rate of expected deviation indicates that obtaining audit evidence from the performance of tests of controls will not be sufficient to reduce the control risk at the relevant assertion level. If the rate of expected deviation is expected to be too high, the auditor may determine that tests of controls for a particular assertion may be inappropriate.

**.49** Generally, IT processing is inherently consistent; therefore, the auditor may be able to limit the testing to one or a few instances of the control operation. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor should perform tests to determine that the control continues to function effectively. Such tests might include determining that changes to the program are not made without being subject to the appropriate program change controls, that the authorized version of the program is used for processing transactions, and that other relevant general controls are effective. Such tests also might include determining that changes to the programs have not been made, as may be the case when the entity uses packaged software applications without modifying or maintaining them. For example, the auditor may test the administration of IT security to obtain audit evidence that unauthorized access has not occurred during the period.

## Substantive Procedures

**.50** Substantive procedures are performed to detect material misstatements at the relevant assertion level, and include tests of details of classes of transactions, account balances, and disclosures and substantive analytical procedures. The auditor should plan and perform substantive procedures to be responsive to the related assessment of the risk of material misstatement.

**.51** Regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. This reflects the fact that the auditor's assessment of risk is judgmental and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations to internal control, including management

override, and even effective internal controls generally reduce, but do not eliminate, the risk of material misstatement.

**.52** The auditor's substantive procedures should include the following audit procedures related to the financial statement reporting process:

- Agreeing the financial statements, including their accompanying notes, to the underlying accounting records; and
- Examining material journal entries and other adjustments made during the course of preparing the financial statements.

The nature and extent of the auditor's examination of journal entries and other adjustments depend on the nature and complexity of the entity's financial reporting system and the associated risks of material misstatement.

**.53** When, in accordance with paragraph .110 of section 314, the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a risk that management is inflating sales by improperly recognizing revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external written confirmation requests not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor may find it effective to supplement such external written confirmations with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms.

**.54** When the approach to significant risks consists only of substantive procedures, the audit procedures appropriate to address such significant risks consist of tests of details only, or a combination of tests of details and substantive analytical procedures. The auditor should consider the guidance in paragraphs .55 through .68 in designing the nature, timing, and extent of substantive procedures for significant risks. To obtain sufficient appropriate audit evidence, the substantive procedures related to significant risks are most often designed to obtain audit evidence with higher reliability.

### ***Nature of Substantive Procedures***

**.55** Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation. The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor's assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor's determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor

has obtained audit evidence about the operating effectiveness of controls. The Appendix [paragraph .79] includes examples of substantive procedures that may be performed on inventories of a manufacturing entity.

**.56** The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

**.57** In designing substantive analytical procedures, the auditor should consider such matters as:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity's preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph .14.

### ***Timing of Substantive Procedures***

**.58** In some circumstances, substantive procedures may be performed at an interim date. When substantive procedures are performed at an interim date, the auditor should perform further substantive procedures or substantive procedures combined with tests of controls to cover the remaining period that provide a reasonable basis for extending the audit conclusions from the interim date to the period end.

**.59** Performing substantive procedures at an interim date increases the risk that misstatements that may exist at the period end are not detected by the auditor. This risk increases as the remaining period is lengthened. In considering whether to perform substantive procedures at an interim date, the auditor should consider such factors as:

- The control environment and other relevant controls
- The availability of information at a later date that is necessary for the auditor's procedures
- The objective of the substantive procedure
- The assessed risk of material misstatement
- The nature of the class of transactions or account balance and relevant assertions
- The ability of the auditor to reduce the risk that misstatements that exist at the period end are not detected by performing appropriate substantive procedures or substantive procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that exist at period end are not detected

**.60** Although it is not necessary to obtain audit evidence about the operating effectiveness of controls in order to have a reasonable basis for extending audit conclusions from an interim date to the period end, the auditor should consider whether performing only substantive procedures to cover the remaining period is sufficient. If the auditor concludes that substantive procedures alone would not be sufficient to cover the remaining period, tests of the operating effectiveness of relevant controls should be performed or the substantive procedures should be performed as of the period end.

**.61** In circumstances in which the auditor has identified risks of material misstatement due to fraud, the auditor's responses to address those risks may include changing the timing of audit procedures. For example, the auditor might conclude that, given the risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period-end reporting date would not be effective. In such circumstances, the auditor might conclude that substantive procedures should be performed at or near the end of the reporting period to best address an identified risk of material misstatement due to fraud.<sup>10</sup>

**.62** When performing substantive procedures at an interim date, the auditor may compare and may reconcile information concerning the balance at the period end with the comparable information at the interim date to identify amounts that appear unusual, investigates any such amounts, and may perform substantive analytical procedures or tests of details to test the intervening period. When the auditor plans to perform substantive analytical procedures with respect to the intervening period, the auditor should consider whether the period-end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition. The auditor should also consider whether the entity's procedures for analyzing and adjusting such classes of transactions or account balances at interim dates and for establishing proper accounting cutoffs are appropriate. In addition, the auditor should consider whether the information system relevant to financial reporting will provide information concerning the balances at the period end and the transactions in the remaining period that is sufficient to

---

<sup>10</sup> See paragraph .52 of section 316, *Consideration of Fraud in a Financial Statement Audit*.

permit investigation of (a) significant unusual transactions or entries (including those at or near the period end); (b) other causes of significant fluctuations, or expected fluctuations that did not occur; and (c) changes in the composition of the classes of transactions or account balances.

**.63** If misstatements are detected in classes of transactions or account balances at an interim date, the auditor should consider modifying the related assessment of risk and the planned nature, timing, or extent of the substantive procedures covering the remaining period that relate to such classes of transactions or account balances, or the auditor may extend or may repeat such audit procedures at the period end.

**.64** The use of audit evidence from the performance of substantive procedures in a prior audit is not sufficient to reduce detection risk to an acceptably low level in the current period. In most cases, audit evidence from the performance of substantive procedures in a prior audit provides little or no audit evidence for the current period. In order for audit evidence obtained in a prior audit to be used in the current period as substantive audit evidence, the audit evidence and the related subject matter must not fundamentally change. An example of audit evidence obtained from the performance of substantive procedures in a prior period that may be relevant in the current year is prior audit evidence substantiating the purchase cost of a building or building addition. As specified by paragraph .24 of section 326, if the auditor plans to use audit evidence obtained from the performance of substantive procedures in a prior audit, the auditor should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

**.65** The timing of audit procedures also involves consideration of whether related audit procedures are properly coordinated. This includes, for example:

- a. Coordinating the audit procedures applied to related-party transactions and balances.<sup>11</sup>
- b. Coordinating the testing of interrelated accounts and accounting cutoffs.
- c. Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items.

Decisions about coordinating related audit procedures should be made in the light of the risks of material misstatement and of the particular audit procedures that could be applied, either for the remaining period or at period end, or both.

### ***Extent of the Performance of Substantive Procedures***

**.66** The greater the risk of material misstatement, the less detection risk that can be accepted; consequently, the greater the extent of substantive procedures. Because the risk of material misstatement includes consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

**.67** In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the

---

<sup>11</sup> See section 334, *Related Parties*.

population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous sub-populations for sampling. Section 350 contains guidance on the use of sampling and other means of selecting items for testing.

**.68** In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases. Section 329, *Analytical Procedures*, contains guidance on the application of analytical procedures during an audit.

## **Adequacy of Presentation and Disclosure**

**.69** The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles. The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with generally accepted accounting principles also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph .15 of section 326 for a description of the relevant assertions related to presentation and disclosure.

## **Evaluating the Sufficiency and Appropriateness of the Audit Evidence Obtained<sup>12</sup>**

**.70** Based on the audit procedures performed and the audit evidence obtained, the auditor should evaluate whether the assessments of the risks of material misstatement at the relevant assertion level remain appropriate.

**.71** An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessments were based. For example, the extent of misstatements that the auditor detects by performing substantive procedures may alter the auditor's judgment about the risk

---

<sup>12</sup> See paragraph .67 of section 312.

assessments and may indicate a material weakness in internal control. In addition, analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement (see section 329). In such circumstances, the auditor should reevaluate the planned audit procedures based on the revised consideration of assessed risks for all or some of the relevant assertions related to classes of transactions, account balances, or disclosures. Paragraph .121 of section 314 contains further guidance on revising the auditor's risk assessment.

**.72** The concept of effectiveness of the operation of controls recognizes that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error. When such deviations are detected during the performance of tests of controls, the auditor should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions. In addition, the auditor should consider whether any misstatements detected from the performance of substantive procedures alter the auditor's judgment as to the effectiveness of the related controls. The auditor should determine whether the tests of controls performed provide an appropriate basis for reliance on the controls, whether additional tests of controls are necessary, or whether the potential risks of misstatement need to be addressed using substantive procedures.

**.73** The auditor should not assume that an instance of fraud or error is an isolated occurrence, and therefore should consider how the detection of such misstatement affects the assessed risks of material misstatement. Before the conclusion of the audit, the auditor should evaluate whether audit risk has been reduced to an appropriately low level and whether the nature, timing, and extent of the audit procedures may need to be reconsidered. For example, the auditor should reconsider:

- The nature, timing, and extent of substantive procedures
- The audit evidence of the operating effectiveness of relevant controls, including the entity's risk assessment process

**.74** The auditor should conclude whether sufficient appropriate audit evidence has been obtained to reduce to an appropriately low level the risk of material misstatement in the financial statements. In developing an opinion, the auditor should consider all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the relevant assertions in the financial statements.

**.75** The sufficiency and appropriateness of audit evidence to support the auditor's conclusions throughout the audit are a matter of professional judgment. The auditor's judgment as to what constitutes sufficient appropriate audit evidence is influenced by such factors as the:

- Significance of the potential misstatement in the relevant assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements.
- Effectiveness of management's responses and controls to address the risks.
- Experience gained during previous audits with respect to similar potential misstatements.
- Results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.

- Source and reliability of available information.
- Persuasiveness of the audit evidence.
- Understanding of the entity and its environment, including its internal control.

**.76** If the auditor has not obtained sufficient appropriate audit evidence as to a material financial statement assertion, the auditor should attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should express a qualified opinion or a disclaimer of opinion.<sup>13</sup>

## Documentation

**.77** The auditor should document:

- a. The overall responses to address the assessed risks of misstatement at the financial statement level
- b. The nature, timing, and extent of the further audit procedures
- c. The linkage of those procedures with the assessed risks at the relevant assertion level
- d. The results of the audit procedures
- e. The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. Section 339, *Audit Documentation*, establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

## Effective Date

**.78** This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

---

<sup>13</sup> See paragraphs .20 through .34 and .61 through .63 of section 508, *Reports on Audited Financial Statements*, for further guidance on expression of a qualified opinion or a disclaimer of opinion.

**Appendix**

**Illustrative Financial Statement Assertions and Examples of Substantive Procedures Illustrations for Inventories of a Manufacturing Company**

A1. This Appendix illustrates the use of assertions in designing substantive procedures and does not illustrate tests of controls. The following examples of substantive procedures are not intended to be all-inclusive, nor is it expected that all of the procedures would be applied in an audit. The particular substantive procedures to be used in each circumstance depend on the auditor's risk assessments and tests of controls.

<i>Illustrative Assertions About Account Balances</i>	<i>Examples of Substantive Procedures</i>
<b>Existence</b>	
Inventories included in the balance sheet physically exist.	<ul style="list-style-type: none"> <li>• Physical examination of inventory items.</li> <li>• Obtaining confirmation of inventories at locations outside the entity.</li> <li>• Inspection of documents relating to inventory transactions between a physical inventory date and the balance sheet date.</li> </ul>
Inventories represent items held for sale or use in the normal course of business.	<ul style="list-style-type: none"> <li>• Inspecting perpetual inventory records, production records, and purchasing records for indications of current activity.</li> <li>• Reconciling items in the inventory listing to a current computer-maintained sales catalog and subsequent sales and delivery reports using computer-assisted audit techniques (CAATs).</li> <li>• Inquiry of production and sales personnel.</li> <li>• Using the work of specialists to corroborate the nature of specialized products.</li> </ul>
<b>Rights and Obligations</b>	
The entity has legal title or similar rights of ownership to the inventories.	<ul style="list-style-type: none"> <li>• Examining paid vendors' invoices, consignment agreements, and contracts.</li> <li>• Obtaining confirmation of inventories at locations outside the entity.</li> </ul>

<b><i>Illustrative Assertions About Account Balances</i></b>	<b><i>Examples of Substantive Procedures</i></b>
Inventories exclude items billed to customers or owned by others.	<ul style="list-style-type: none"> <li>● Examining paid vendors' invoices, consignment agreements, and contracts.</li> <li>● Inspecting shipping and receiving transactions near year end for recording in the proper period.</li> </ul>
<b>Completeness</b>	
Inventory quantities include all products, materials, and supplies on hand.	<ul style="list-style-type: none"> <li>● Observing physical inventory counts.</li> <li>● Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities.</li> <li>● Inspecting shipping and receiving transactions near year end for recording in the proper period.</li> </ul>
Inventory quantities include all products, materials, and supplies owned by the company that are in transit or stored at outside locations.	<ul style="list-style-type: none"> <li>● Obtaining confirmation of inventories at locations outside the entity.</li> <li>● Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities.</li> </ul>
Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.	<ul style="list-style-type: none"> <li>● Inspecting shipping and receiving transactions near year end for recording in the proper period.</li> <li>● Examining the inventory listing for inclusion of test counts recorded during the physical inventory observation.</li> <li>● Reconciliation of all inventory tags and count sheets used in recording the physical inventory counts using CAATs</li> <li>● Recalculation of inventory listing for clerical accuracy using CAATs.</li> <li>● Reconciling physical counts to perpetual records and general ledger balances and investigating significant fluctuations using CAATs.</li> </ul>
<b>Valuation and Allocation</b>	
Inventories are properly stated at cost (except when market is lower).	<ul style="list-style-type: none"> <li>● Examining paid vendors' invoices and comparing product prices to standard cost build-ups.</li> <li>● Analytically comparing direct labor rates to production records.</li> <li>● Recalculation of the computation of standard overhead rates.</li> <li>● Examining analyses of purchasing and manufacturing standard cost variances.</li> </ul>

<b><i>Illustrative Assertions About Account Balances</i></b>	<b><i>Examples of Substantive Procedures</i></b>
<p>Slow-moving, excess, defective, and obsolete items included in inventories are properly identified.</p>	<ul style="list-style-type: none"> <li>• Examining an analysis of inventory turnover.</li> <li>• Analyzing industry experience and trends.</li> <li>• Analytically comparing the relationship of inventory balances to anticipated sales volume.</li> <li>• Walk-through of the plant for indications of products not being used.</li> <li>• Inquiring of production and sales personnel concerning possible excess, or defective or obsolete inventory items.</li> <li>• Logistic and distribution business process (e.g., cycle time, volume of returns, or problems with suppliers).</li> </ul>
<p>Inventories are reduced, when appropriate, to replacement cost or net realizable value.</p>	<ul style="list-style-type: none"> <li>• Inspecting sales catalogs or industry publications for current market value quotations.</li> <li>• Recalculation of inventory valuation reserves.</li> <li>• Analyzing current production costs.</li> <li>• Examining sales after year end and open purchase order commitments.</li> </ul>
<p><b>Rights and Obligations</b></p>	
<p>The pledge or assignment of any inventories is appropriately disclosed.</p>	<ul style="list-style-type: none"> <li>• Obtaining confirmation of inventories pledged under loan agreements.</li> </ul>
<p><b>Completeness</b></p>	
<p>The financial statements include all disclosures related to inventories specified by generally accepted accounting principles.</p>	<ul style="list-style-type: none"> <li>• Using a disclosure checklist to determine whether the disclosures included in generally accepted accounting principles were made.</li> </ul>
<p><b>Understandability</b></p>	
<p>Inventories are properly classified in the balance sheet as current assets.</p>	<ul style="list-style-type: none"> <li>• Examining drafts of the financial statements for appropriate balance sheet classification.</li> </ul>
<p>Disclosures related to inventories are understandable.</p>	<ul style="list-style-type: none"> <li>• Reading disclosures for clarity.</li> </ul>

<i><b>Illustrative Assertions About Account Balances</b></i>	<i><b>Examples of Substantive Procedures</b></i>
<p><b>Accuracy and Valuation</b></p> <p>The major categories of inventories and their bases of valuation are accurately disclosed in the financial statements.</p>	<ul style="list-style-type: none"> <li>• Examining drafts of the financial statements for appropriate disclosures.</li> <li>• Reconciling the categories of inventories disclosed in the draft financial statements to the categories recorded during the physical inventory observation.</li> </ul>

## AU Section 319

# Consideration of Internal Control in a Financial Statement Audit<sup>§</sup>

Source: SAS No. 55; SAS No. 78; SAS No. 94.\*

Effective for audits of financial statements for periods beginning on or after January 1, 1990, unless otherwise indicated.

### Introduction

.01 This section provides guidance on the independent auditor's consideration of an entity's internal control in an audit of financial statements in accordance with generally accepted auditing standards. It defines internal control,<sup>1</sup> describes the objectives and components of internal control, and explains how an auditor should consider internal control in planning and performing an audit. In particular, this section provides guidance about implementing the second standard of field work: "A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed."

.02 In all audits, the auditor should obtain an understanding of internal control sufficient to plan the audit by performing procedures to understand the design of controls relevant to an audit of financial statements and determining whether they have been placed in operation. In obtaining this understanding, the auditor considers how an entity's use of information technology (IT)<sup>2</sup> and manual procedures may affect controls relevant to the audit. The auditor then assesses control risk for the assertions embodied in the account balance, transaction class, and disclosure components of the financial statements.

---

<sup>§</sup> Sections 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, supersede this section effective for audits of financial statements for periods beginning on or after December 15, 2006. This section will be deleted closer to the effective date of sections 314 and 318.

\* This section has been revised to reflect the amendments and conforming changes necessary due to the issuance of Statement on Auditing Standards No. 78, effective for audits of financial statements for periods beginning on or after January 1, 1997. The amendments are made to recognize the definition and description of internal control contained in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO Report). This section has also been amended to reflect the issuance of Statement on Auditing Standards No. 94, effective for audits of financial statements for periods beginning on or after June 1, 2001. Earlier application is permissible.

<sup>1</sup> Internal control also may be referred to as internal control structure.

<sup>2</sup> Information technology (IT) encompasses automated means of originating, processing, storing, and communicating information, and includes recording devices, communication systems, computer systems (including hardware and software components and data), and other electronic devices. An entity's use of IT may be extensive; however, the auditor is primarily interested in the entity's use of IT to initiate, record, process, and report transactions or other financial data.

**.03** The auditor may determine that assessing control risk below the maximum level<sup>3</sup> for certain assertions would be effective and more efficient than performing only substantive tests. In addition, the auditor may determine that it is not practical or possible to restrict detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. In such circumstances, the auditor should obtain evidential matter about the effectiveness of both the design and operation of controls to reduce the assessed level of control risk. Such evidential matter may be obtained from tests of controls planned and performed concurrent with or subsequent to obtaining the understanding.<sup>4</sup> Such evidential matter also may be obtained from procedures that were not specifically planned as tests of controls but that nevertheless provide evidential matter about the effectiveness of the design and operation of the controls. For certain assertions, the auditor may desire to further reduce the assessed level of control risk. In such cases, the auditor considers whether evidential matter sufficient to support a further reduction is likely to be available and whether performing additional tests of controls to obtain such evidential matter would be efficient.

**.04** Alternatively, the auditor may assess control risk at the maximum level because he or she believes controls are unlikely to pertain to an assertion or are unlikely to be effective, or because evaluating the effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive tests would be effective in restricting detection risk to an acceptable level. When evidence of an entity's initiation, recording, or processing of financial data exists only in electronic form, the auditor's ability to obtain the desired assurance only from substantive tests would significantly diminish.

**.05** The auditor uses the understanding of internal control and the assessed level of control risk in determining the nature, timing, and extent of substantive tests for financial statement assertions.

## Definition of Internal Control

**.06** *Internal control* is a process—effected by an entity's board of directors, management, and other personnel—designed to provide reasonable assurance regarding the achievement of objectives in the following categories: (a) reliability of financial reporting, (b) effectiveness and efficiency of operations, and (c) compliance with applicable laws and regulations.

**.07** Internal control consists of five interrelated components:

- a. *Control environment* sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.
- b. *Risk assessment* is the entity's identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.
- c. *Control activities* are the policies and procedures that help ensure that management directives are carried out.

---

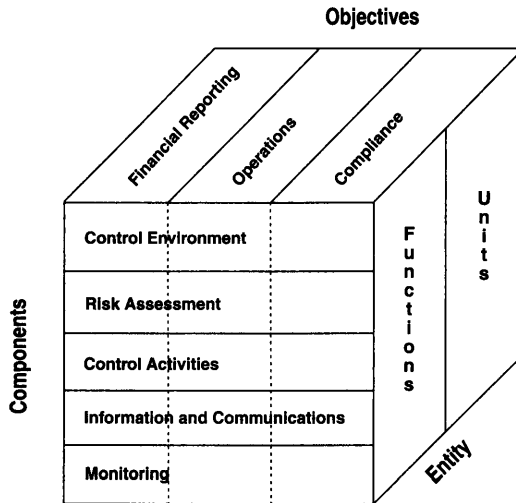

<sup>3</sup> Control risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms that range, for example, from a maximum to a minimum. The term *maximum level* is used in this section to mean the greatest probability that a material misstatement that could occur in a financial statement assertion will not be prevented or detected on a timely basis by an entity's internal control.

<sup>4</sup> If the auditor is unable to obtain such evidential matter, he or she should consider the guidance in section 326, *Evidential Matter*, paragraphs .14 and .25.

- d. *Information and communication* systems support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.
- e. *Monitoring* is a process that assesses the quality of internal control performance over time.

## Relationship Between Objectives and Components

.08 There is a direct relationship between objectives, which are what an entity strives to achieve, and components, which represent what is needed to achieve the objectives. In addition, internal control is relevant to the entire entity, or to any of its operating units or business functions. This relationship is depicted as follows:

.09 Although an entity's internal control addresses objectives in each of the categories referred to in paragraph .06, not all of these objectives and related controls are relevant to an audit of the entity's financial statements. Also, although internal control is relevant to the entire entity or to any of its operating units or business functions, an understanding of internal control relevant to each of the entity's operating units and business functions may not be necessary to plan and perform an effective audit.

## Financial Reporting Objective

.10 Generally, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements for external purposes that are fairly presented in conformity with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles.<sup>5</sup>

<sup>5</sup> The term *comprehensive basis of accounting other than generally accepted accounting principles* is defined in section 623, *Special Reports*, paragraph .04. Hereafter, reference to generally accepted accounting principles in this section includes, where applicable, an other comprehensive basis of accounting.

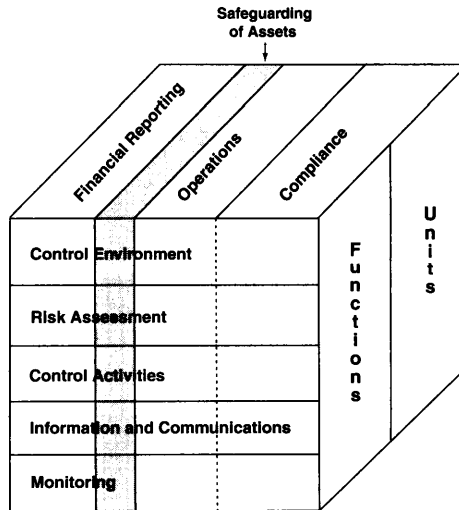

### Operations and Compliance Objectives

.11 The controls relating to operations and compliance<sup>6</sup> objectives may be relevant to an audit if they pertain to data the auditor evaluates or uses in applying auditing procedures. For example, controls pertaining to nonfinancial data that the auditor uses in analytical procedures, such as production statistics, or pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.12 An entity generally has controls relating to objectives that are not relevant to an audit and therefore need not be considered. For example, controls concerning compliance with health and safety regulations or concerning the effectiveness and efficiency of certain management decision-making processes (such as the appropriate price to charge for its products or whether to make expenditures for certain research and development or advertising activities), although important to the entity, ordinarily do not relate to a financial statement audit. Similarly, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as a commercial airline's system of automated controls to maintain flight schedules), but these controls ordinarily would not be relevant to the financial statement audit and therefore need not be considered.

### Safeguarding of Assets

.13 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. This relationship is depicted as follows:

In obtaining an understanding of each of the components of internal control to plan the audit, the auditor's consideration of safeguarding controls is generally

<sup>6</sup> An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*.

limited to those relevant to the reliability of financial reporting. For example, use of a lockbox system for collecting cash or access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit.

## Application of Components to a Financial Statement Audit

.14 The division of internal control into five components provides a useful framework for auditors to consider the impact of an entity's internal control in an audit. However, it does not necessarily reflect how an entity considers and implements internal control. Also, the auditor's primary consideration is whether a specific control affects financial statement assertions rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

.15 The five components of internal control are applicable to the audit of every entity. The components should be considered in the context of—

- The entity's size.
- The entity's organization and ownership characteristics.
- The nature of the entity's business.
- The diversity and complexity of the entity's operations.
- Applicable legal and regulatory requirements.
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations.<sup>7</sup>

## Effect of Information Technology on Internal Control

.16 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives, and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.17 The use of IT also affects the fundamental manner in which transactions are initiated, recorded, processed, and reported.<sup>8</sup> In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable

---

<sup>7</sup> See section 324, *Service Organizations*, for guidance if an entity obtains services that are part of its information system from another organization.

<sup>8</sup> Paragraph 12 of the Appendix [paragraph .110] defines *initiation, recording, processing, and reporting* as used throughout this section.

records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, and reconciliations and follow-up of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

**.18** IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to—

- Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data.
- Enhance the timeliness, availability, and accuracy of information.
- Facilitate the additional analysis of information.
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures.
- Reduce the risk that controls will be circumvented.
- Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

**.19** IT also poses specific risks to an entity's internal control, including—

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.
- Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions.
- Unauthorized changes to data in master files.
- Unauthorized changes to systems or programs.
- Failure to make necessary changes to systems or programs.
- Inappropriate manual intervention.
- Potential loss of data.

**.20** The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

## Limitations of an Entity's Internal Control

**.21** Internal control, no matter how well designed and operated, can provide only reasonable assurance of achieving an entity's control objectives. The likelihood of achievement is affected by limitations inherent to internal control. These include the realities that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human failures such as simple errors or mistakes. For example, errors may occur in designing, maintaining, or monitoring automated controls. If an entity's IT personnel do not completely understand how an order entry system processes sales transactions, they may erroneously design changes to the system to process sales for a new line of products. On the other hand, such changes may be correctly designed but misunderstood by individuals who translate the design into program code. Errors also may occur in the use of information produced by IT. For example, automated controls may be designed to report transactions over a specified dollar limit for management review, but individuals responsible for conducting the review may not understand the purpose of such reports and, accordingly, may fail to review them or investigate unusual items.

**.22** Additionally, controls, whether manual or automated, can be circumvented by the collusion of two or more people or inappropriate management override of internal control. For example, management may enter into side agreements with customers that alter the terms and conditions of the entity's standard sales contract in ways that would preclude revenue recognition. Also, edit routines in a software program that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

**.23** Internal control is influenced by the quantitative and qualitative estimates and judgments made by management in evaluating the cost-benefit relationship of an entity's internal control. The cost of an entity's internal control should not exceed the benefits that are expected to be derived. Although the cost-benefit relationship is a primary criterion that should be considered in designing internal control, the precise measurement of costs and benefits usually is not possible.

**.24** Custom, culture, and the corporate governance system may inhibit fraud, but they are not absolute deterrents. An effective control environment, too, may help reduce the risk of fraud. For example, an effective board of directors, audit committee, and internal audit function may constrain improper conduct by management. Alternatively, the control environment may reduce the effectiveness of other components. For example, when the nature of management incentives increases the risk of material misstatement of financial statements, the effectiveness of control activities may be reduced.

## Obtaining an Understanding of Internal Control

**.25** In all audits, the auditor should obtain an understanding of each of the five components of internal control sufficient to plan the audit. A sufficient understanding is obtained by performing procedures to understand the design of controls relevant to an audit of financial statements and determining whether they have been placed in operation. In planning the audit, such knowledge should be used to—

- Identify types of potential misstatement.
- Consider factors that affect the risk of material misstatement.

- Design tests of controls, when applicable. Paragraphs .65 through .69 of this section discuss factors the auditor considers in determining whether to perform tests of controls.
- Design substantive tests.

**.26** The nature, timing, and extent of procedures the auditor chooses to perform to obtain the understanding will vary depending on the size and complexity of the entity, previous experience with the entity, the nature of the specific controls used by the entity including the entity's use of IT, the nature and extent of changes in systems and operations, and the nature of the entity's documentation of specific controls. For example, the understanding of risk assessment needed to plan an audit for an entity operating in a relatively stable environment may be limited. Also, the understanding of monitoring needed to plan an audit for a small, noncomplex entity may be limited. Similarly, the auditor may need only a limited understanding of control activities to plan an audit for a noncomplex entity that has significant owner-manager approval and review of transactions and accounting records. On the other hand, the auditor may need a greater understanding of control activities to plan an audit for an entity that has a large volume of revenue transactions and that relies on IT to measure and bill for services based on a complex, frequently changing rate structure.

**.27** Whether a control has been *placed in operation* at a point in time is different from its *operating effectiveness* over a period of time. In obtaining knowledge about whether controls have been placed in operation, the auditor determines that the entity is using them. Operating effectiveness, on the other hand, is concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied, and by whom it was applied. The auditor determines whether controls have been placed in operation as part of the understanding of internal control necessary to plan the audit. The auditor evaluates the operating effectiveness of controls as part of assessing control risk, as discussed in paragraphs .62 through .83 of this section. Although understanding internal control and assessing control risk are discussed separately in this section, they may be performed concurrently in an audit. Furthermore, some of the procedures performed to obtain the understanding may provide evidential matter about the operating effectiveness of controls relevant to certain assertions.

**.28** The auditor's understanding of internal control may sometimes raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity's records may cause the auditor to conclude that it is unlikely that sufficient competent evidential matter will be available to support an opinion on the financial statements.

## Understanding of Internal Control Necessary to Plan the Audit

**.29** In making a judgment about the understanding of internal control necessary to plan the audit, the auditor considers the knowledge obtained from other sources about the types of misstatement that could occur, the risk that such misstatements may occur, and the factors that influence the design of tests of controls, when applicable, and substantive tests. Other sources of such knowledge include information from previous audits and the auditor's understanding of the industry and market in which the entity operates. The auditor also considers his or her assessment of inherent risk, judgments about materiality, and

the complexity and sophistication of the entity's operations and systems, including the extent to which the entity relies on manual controls or on automated controls.

**.30** In making a judgment about the understanding of internal control necessary to plan the audit, the auditor also considers IT risks that could result in misstatements. For example, if an entity uses IT to perform complex calculations, the entity receives the benefit of having the calculations consistently performed. However, the use of IT also presents risks, such as the risk that improperly authorized, incorrectly defined, or improperly implemented changes to the system or programs performing the calculations, or to related program tables or master files, could result in consistently performing those calculations inaccurately. As an entity's operations and systems become more complex and sophisticated, it becomes more likely that the auditor would need to increase his or her understanding of the internal control components to obtain the understanding necessary to design tests of controls, when applicable, and substantive tests.

**.31** The auditor should consider whether specialized skills are needed for the auditor to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive tests. A professional possessing IT skills may be either on the auditor's staff or an outside professional. In determining whether such a professional is needed on the audit team, the auditor considers factors such as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

**.32** Procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls. If the use of a professional possessing IT skills is planned, the auditor should have sufficient IT-related knowledge to communicate the audit objectives to the professional, to evaluate whether the specified procedures will meet the auditor's objectives, and to evaluate the results of the procedures as they relate to the nature, timing, and extent of other planned audit procedures.<sup>9</sup>

**.33** Paragraphs .34 through .57 of this section provide an overview of the five internal control components and the auditor's understanding of the components relating to a financial statement audit. A more detailed discussion of these components is provided in the Appendix [paragraph .110].

### **Control Environment**

**.34** The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other

---

<sup>9</sup> See section 311, *Planning and Supervision*, paragraph .10.

components of internal control, providing discipline and structure. Control environment factors include the following:

- a. Integrity and ethical values
- b. Commitment to competence
- c. Board of directors or audit committee participation
- d. Management's philosophy and operating style
- e. Organizational structure
- f. Assignment of authority and responsibility
- g. Human resource policies and practices

**.35** The auditor should obtain sufficient knowledge of the control environment to understand management's and the board of directors' attitude, awareness, and actions concerning the control environment, considering both the substance of controls and their collective effect. The auditor should concentrate on the substance of controls rather than their form, because controls may be established but not acted upon. For example, management may establish a formal code of conduct but act in a manner that condones violations of that code.

**.36** When obtaining an understanding of the control environment, the auditor considers the collective effect on the control environment of strengths and weaknesses in various control environment factors. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties in a small business, or an active and independent board of directors may influence the philosophy and operating style of senior management in larger entities. Alternatively, management's failure to commit sufficient resources to address security risks presented by IT may adversely affect internal control by allowing improper changes to be made to computer programs or to data, or by allowing unauthorized transactions to be processed. Similarly, human resource policies and practices directed toward hiring competent financial, accounting, and IT personnel may not mitigate a strong bias by top management to overstate earnings.

### **Risk Assessment**

**.37** An entity's risk assessment for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are fairly presented in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

**.38** Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements.<sup>10</sup> Risks can arise or change due to circumstances such as the following:

- Changes in operating environment
- New personnel
- New or revamped information systems
- Rapid growth

---

<sup>10</sup> These assertions are discussed in section 326.

- New technology
- New business models, products, or activities
- Corporate restructurings
- Expanded foreign operations
- New accounting pronouncements

**.39** The auditor should obtain sufficient knowledge of the entity's risk assessment process to understand how management considers risks relevant to financial reporting objectives and decides about actions to address those risks. This knowledge might include understanding how management identifies risks, estimates the significance of the risks, assesses the likelihood of their occurrence, and relates them to financial reporting. The use of IT may be an important element in an entity's risk assessment process, including providing timely information to facilitate the identification and management of risks.

**.40** An entity's risk assessment differs from the auditor's consideration of audit risk in a financial statement audit. The purpose of an entity's risk assessment is to identify, analyze, and manage risks that affect entity objectives. In a financial statement audit, the auditor assesses inherent and control risks to evaluate the likelihood that material misstatements could occur in the financial statements.

### **Control Activities**

**.41** Control activities are the policies and procedures that help ensure that management directives are carried out. They help ensure that necessary actions are taken to address risks to achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels. Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:

- Performance reviews
- Information processing
- Physical controls
- Segregation of duties

**.42** The auditor should obtain an understanding of those control activities relevant to planning the audit. As the auditor obtains an understanding of the other components, he or she is also likely to obtain knowledge about some control activities. For example, in obtaining an understanding of the documents, records, and processing steps in the financial reporting information system that pertain to cash, the auditor is likely to become aware of whether bank accounts are reconciled. The auditor should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities to plan the audit. Ordinarily, audit planning does not require an understanding of the control activities related to each account balance, transaction class, and disclosure component in the financial statements or to every assertion relevant to them.

**.43** The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, record, process, and report transactions or other financial data. These controls help ensure

that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

**.44** Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer-produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

**.45** General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition and maintenance; access security; and application system acquisition, development, and maintenance.

**.46** The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

### ***Information and Communication***

**.47** The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial reports.

**.48** Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

**.49** The auditor should obtain sufficient knowledge of the information system relevant to financial reporting to understand—

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures, both automated and manual, by which transactions are initiated, recorded, processed, and reported from their occurrence to their inclusion in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions.
- How the information system captures other events and conditions that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

**.50** When IT is used to initiate, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

**.51** In obtaining an understanding of the financial reporting process, the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include—

- *The procedures used to enter transaction totals into the general ledger.* In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.
- *The procedures used to initiate, record, and process journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through physical inspection of printed documents.
- *Other procedures used to record recurring and nonrecurring adjustments to the financial statements.* These are procedures that are not reflected in formal journal entries, such as consolidating adjustments, report combinations, and reclassifications.

**.52** The auditor also should obtain sufficient knowledge of the means the entity uses to communicate financial reporting roles and responsibilities and significant matters relating to financial reporting.

### **Monitoring**

**.53** An important management responsibility is to establish and maintain internal control. Management monitors controls to consider whether they are operating as intended and that they are modified as appropriate for changes in conditions.

**.54** Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. This process is accomplished through ongoing activities, separate evaluations, or a combination of the two. In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's activities. Monitoring activities may include using information from communications from external parties such as customer complaints and regulator comments that may indicate problems or highlight areas in need of improvement. In many entities, much of the information used in monitoring may be produced by the entity's information system. If management assumes that data used for monitoring are accurate without having a basis for that assumption, errors may exist in the information, potentially leading management to incorrect conclusions from its monitoring activities.

**.55** The auditor should obtain sufficient knowledge of the major types of activities the entity uses to monitor internal control over financial reporting, including the source of the information related to those activities, and how those activities are used to initiate corrective actions. When obtaining an understanding of the internal audit function, the auditor should follow the guidance in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, paragraphs .04 through .08.

### **Application to Small and Midsized Entities**

**.56** The way in which the objectives of internal control are achieved will vary based on an entity's size and complexity, among other considerations. Specifically, small and midsized entities may use less formal means to ensure that internal control objectives are achieved. For example, smaller entities with active management involvement in the financial reporting process may not have extensive descriptions of accounting procedures, sophisticated information systems, or written policies. Smaller entities may not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Similarly, smaller entities may not have an independent or outside member on their board of directors.

**.57** When small or midsized entities are involved in complex transactions or are subject to legal and regulatory requirements also found in larger entities, more formal means of ensuring that internal control objectives are achieved may be present. Also, small and midsized entities may use IT in various ways to achieve their objectives. For example, a small entity may use sophisticated applications of IT as part of its information system. The impact of IT on an entity's internal control is related more to the nature and complexity of the systems in use than to the entity's size.

### **Procedures to Obtain Understanding**

**.58** In obtaining an understanding of controls that are relevant to audit planning, the auditor should perform procedures to obtain sufficient knowledge about the design of the relevant controls pertaining to each of the five internal control components and determine whether they have been placed in operation. This knowledge is ordinarily obtained through previous experience with the entity and procedures such as inquiries of appropriate management, supervisory, and staff personnel; inspection of entity documents and records; and observation of entity activities and operations. The nature and extent of

the procedures performed generally vary from entity to entity and are influenced by the size and complexity of the entity, the auditor's previous experience with the entity, the nature of the particular control, and the nature of the entity's documentation of specific controls.

**.59** For example, the auditor's prior experience with the entity may provide an understanding of its classes of transactions. Inquiries of appropriate entity personnel and inspection of documents and records, such as source documents, journals, and ledgers, may provide an understanding of the accounting records. Similarly, in obtaining an understanding of the design of automated controls and determining whether they have been placed in operation, the auditor may make inquiries of appropriate entity personnel and inspect relevant systems documentation, reports (for example, exception reports or reports evidencing the processing of transactions or application of other controls), or other documents.

**.60** The auditor's assessments of inherent risk and judgments about materiality for various account balances and transaction classes also affect the nature and extent of the procedures performed to obtain the understanding. For example, the auditor may conclude that planning the audit of the prepaid insurance account does not require specific procedures to be included in obtaining the understanding of internal control.

## Documenting the Understanding

**.61** The auditor should document the understanding of the entity's internal control components obtained to plan the audit. The form and extent of this documentation is influenced by the nature and complexity of the entity's controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity's internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor's documentation should be.

## Assessing Control Risk

**.62** Section 326, *Evidential Matter*, states that most of the independent auditor's work in forming an opinion on financial statements consists of obtaining and evaluating evidential matter concerning the assertions in such financial statements. These assertions are embodied in the account balance, transaction class, and disclosure components of financial statements and are classified according to the following broad categories:

- Existence or occurrence
- Completeness
- Rights and obligations
- Valuation or allocation
- Presentation and disclosure

In planning and performing an audit, an auditor considers these assertions in the context of their relationship to a specific account balance or class of transactions.

**.63** The risk of material misstatement<sup>11</sup> in financial statement assertions consists of inherent risk, control risk, and detection risk. Inherent risk is the susceptibility of an assertion to a material misstatement assuming there are no related controls. Control risk is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the entity's internal control. Detection risk is the risk that the auditor will not detect a material misstatement that exists in an assertion.

**.64** Assessing control risk is the process of evaluating the effectiveness of an entity's internal control in preventing or detecting material misstatements in the financial statements. Control risk should be assessed in terms of financial statement assertions.

**.65** After obtaining the understanding of internal control, the auditor may assess control risk at the maximum level<sup>12</sup> for some or all assertions because he or she believes controls are unlikely to pertain to an assertion or are unlikely to be effective, or because evaluating the effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive tests would be effective in restricting detection risk to an acceptable level. For example, the auditor may determine that performing only substantive tests would be effective and more efficient than performing tests of controls for assertions related to fixed assets and to long-term debt in an entity where a limited number of transactions are related to those financial statement components, and when the auditor can readily obtain corroborating evidence in the form of documents and confirmations. In circumstances where the auditor is performing only substantive tests in restricting detection risk to an acceptable level and where the information used by the auditor to perform such substantive tests is produced by the entity's information system, the auditor should obtain evidence about the accuracy and completeness of the information.

**.66** In other circumstances, the auditor may determine that assessing control risk below the maximum level for certain assertions would be effective and more efficient than performing only substantive tests. In addition, the auditor may determine that it is not practical or possible to restrict detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. In such circumstances, the auditor should obtain evidential matter about the effectiveness of both the design and operation of controls to reduce the assessed level of control risk.<sup>13</sup>

**.67** In determining whether assessing control risk at the maximum level or at a lower level would be an effective approach for specific assertions, the auditor should consider—

- The nature of the assertion.
- The volume of transactions or data related to the assertion.

---

<sup>11</sup> For purposes of this section, a material misstatement in a financial statement assertion is a misstatement whether caused by error or fraud as discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*, that either individually or when aggregated with other misstatements in other assertions would be material to the financial statements taken as a whole.

<sup>12</sup> See footnote 3.

<sup>13</sup> See footnote 4.

- The nature and complexity of the systems, including the use of IT, by which the entity processes and controls information supporting the assertion.
- The nature of the available evidential matter, including audit evidence that is available only in electronic form.

**.68** In circumstances where a significant amount of information supporting one or more financial statement assertions is electronically initiated, recorded, processed, or reported, the auditor may determine that it is not possible to design effective substantive tests that by themselves would provide sufficient evidence that the assertions are not materially misstated. For such assertions, significant audit evidence may be available only in electronic form. In such cases, its competence and sufficiency as evidential matter usually depend on the effectiveness of controls over its accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively. In such circumstances, the auditor should perform tests of controls to gather evidential matter to use in assessing control risk.

**.69** Examples of situations where the auditor may find it impossible to design effective substantive tests that by themselves would provide sufficient evidence that certain assertions are not materially misstated include the following:

- An entity that conducts business using IT to initiate orders for goods based on predetermined decision rules and to pay the related payables based on system-generated information regarding receipt of goods. No other documentation of orders or goods received is produced or maintained.
- An entity that provides electronic services to customers (for example, an Internet service provider or a telephone company) and uses IT to log services provided to users, initiate bills for the services, process the billing transactions, and automatically record such amounts in electronic accounting records that are used to produce the financial statements.

## Assessing Control Risk Below the Maximum Level

**.70** Assessing control risk below the maximum level involves<sup>14</sup>—

- Identifying specific controls relevant to specific assertions.
- Performing tests of controls.
- Concluding on the assessed level of control risk.

### *Identifying Specific Controls Relevant to Specific Assertions*

**.71** The auditor's understanding about internal control should be used to identify the types of potential misstatements that could occur and to consider factors that affect the risk of material misstatement. In assessing control risk,

---

<sup>14</sup> Section 324 describes reports that an auditor may obtain that may assist in identifying controls relevant to specific assertions and obtaining evidential matter regarding their operating effectiveness when an entity uses a service organization.

the auditor should identify the controls that are likely to prevent or detect material misstatement in specific assertions. In identifying controls relevant to specific financial statement assertions, the auditor should consider that the controls can have either a pervasive effect on many assertions or a specific effect on an individual assertion, depending on the nature of the particular internal control component involved. For example, the conclusion that an entity's control environment is highly effective may influence the auditor's decision about the number of an entity's locations at which auditing procedures are to be performed or whether to perform certain auditing procedures for some account balances or transaction classes at an interim date. Either decision affects the way in which auditing procedures are applied to specific assertions, even though the auditor may not have specifically considered each individual assertion that is affected by such decisions.

**.72** Conversely, some control activities may have a specific effect on an individual assertion embodied in a particular account balance or transaction class. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence assertion for the inventory account balance.

**.73** Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in reducing control risk for that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing control risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

**.74** General controls relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. The auditor should consider the need to identify not only application controls directly related to one or more assertions, but also relevant general controls.

### ***Performing Tests of Controls***

**.75** Procedures directed toward evaluating the effectiveness of the design of a control are concerned with whether that control is suitably designed to prevent or detect material misstatements in specific financial statement assertions. Procedures to obtain such evidential matter ordinarily include inquiries of appropriate entity personnel; inspection of documents, reports, or electronic files; and observation of the application of specific controls. For entities with complex internal control, the auditor should consider the use of flowcharts, questionnaires, or decision tables to facilitate the application of procedures directed toward evaluating the effectiveness of the design of a control.

**.76** Procedures to obtain evidential matter about the effectiveness of the operation of a control are referred to as tests of controls (paragraphs .90 through .104 of this section discuss characteristics of evidential matter to consider when performing tests of controls). Tests of controls directed toward the operating effectiveness of a control are concerned with how the control (whether manual or automated) was applied, the consistency with which it was applied during the audit period, and by whom it was applied. These tests ordinarily include procedures such as inquiries of appropriate entity personnel; inspection of documents, reports, or electronic files, indicating performance

of the control; observation of the application of the control; and reperformance of the application of the control by the auditor. In some circumstances, a specific procedure may address the effectiveness of both design and operation. However, a combination of procedures may be necessary to evaluate the effectiveness of the design or operation of a control.

**.77** In designing tests of automated controls, the auditor should consider the need to obtain evidence supporting the effective operation of controls directly related to the assertions as well as other indirect controls on which these controls depend. For example, the auditor may identify a "user review of an exception report of credit sales over a customer's authorized credit limit" as a direct control related to an assertion. In such cases, the auditor should consider the effectiveness of the user review of the report and also the controls related to the accuracy of the information in the report (for example, the general controls).

**.78** Because of the inherent consistency of IT processing, the auditor may be able to reduce the extent of testing of an automated control. For example, a programmed application control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor should consider performing tests to determine that the control continues to function effectively. Such tests might include determining that changes to the program are not made without being subject to the appropriate program change controls, that the authorized version of the program is used for processing transactions, and that other relevant general controls are effective. Such tests also might include determining that changes to the programs have not been made, as may be the case when the entity uses packaged software applications without modifying or maintaining them.

**.79** To test automated controls, the auditor may need to use techniques that are different from those used to test manual controls. For example, computer-assisted audit techniques may be used to test automated controls or data related to assertions. Also, the auditor may use other automated tools or reports produced by IT to test the operating effectiveness of general controls, such as program change controls, access controls, and system software controls. The auditor should consider whether specialized skills are needed to design and perform such tests of controls.

### ***Concluding on the Assessed Level of Control Risk***

**.80** The conclusion reached as a result of assessing control risk is referred to as the assessed level of control risk. In determining the evidential matter necessary to support an assessed level of control risk below the maximum level, the auditor should consider the characteristics of evidential matter about control risk discussed in paragraphs .90 through .104. Generally, however, the lower the assessed level of control risk, the greater the assurance the evidential matter must provide that the controls relevant to an assertion are designed and operating effectively.

**.81** The auditor uses the assessed level of control risk (together with the assessed level of inherent risk) to determine the acceptable level of detection risk for financial statement assertions. The auditor uses the acceptable level of detection risk to determine the nature, timing, and extent of the auditing procedures

to be applied to the account balance or class of transactions to detect material misstatements in the financial statement assertions. Auditing procedures designed to detect such misstatements are referred to in this section as substantive tests.

**.82** As the acceptable level of detection risk decreases, the assurance provided from substantive tests should increase. Consequently, the auditor may do one or more of the following:

- Change the nature of substantive tests from a less effective to a more effective procedure, such as using tests directed toward independent parties outside the entity rather than tests directed toward parties or documentation within the entity.
- Change the timing of substantive tests, such as performing them at year end rather than at an interim date.
- Change the extent of substantive tests, such as using a larger sample size.

## Documenting the Assessed Level of Control Risk

**.83** In addition to the documentation of the understanding of internal control discussed in paragraph .61, the auditor should document his or her conclusions about the assessed level of control risk. Conclusions about the assessed level of control risk may differ as they relate to various account balances or classes of transactions. For those financial statement assertions where control risk is assessed at the maximum level, the auditor should document his or her conclusion that control risk is at the maximum level but need not document the basis for that conclusion. For those assertions where the assessed level of control risk is below the maximum level, the auditor should document the basis for his or her conclusion that the effectiveness of the design and operation of controls supports that assessed level. The nature and extent of the auditor's documentation are influenced by the assessed level of control risk, the nature of the entity's internal control, and the nature of the entity's documentation of internal control.

## Relationship of Understanding to Assessing Control Risk

**.84** Although understanding internal control and assessing control risk are discussed separately in this section, they may be performed concurrently in an audit. The objective of procedures performed to obtain an understanding of internal control (discussed in paragraphs .58 through .60) is to provide the auditor with knowledge necessary for audit planning. The objective of tests of controls (discussed in paragraphs .75 through .79) is to provide the auditor with evidential matter to use in assessing control risk. However, procedures performed to achieve one objective may also pertain to the other objective.

**.85** Based on the assessed level of control risk the auditor expects to support and audit efficiency considerations, the auditor often plans to perform some tests of controls concurrently with obtaining the understanding of internal control. In addition, even though some of the procedures performed to obtain the understanding were not specifically planned as tests of controls, they may nevertheless provide evidential matter about the effectiveness of both the design and operation of the controls relevant to certain assertions. For

example, because of the inherent consistency of IT processing, performing procedures to determine whether an automated control has been placed in operation may serve as a test of that control's operating effectiveness, depending on such factors as whether the program has been changed or whether there is a significant risk of unauthorized change or other improper intervention. Also, in obtaining an understanding of the control environment, the auditor may have made inquiries about management's use of budgets, observed management's comparison of monthly budgeted and actual expenses, and inspected reports pertaining to the investigation of variances between budgeted and actual amounts. Although these procedures provide knowledge about the design of the entity's budgeting policies and whether they have been placed in operation, they may also provide evidential matter about the effectiveness of the operation of budgeting policies in preventing or detecting material misstatements in the classification of expenses. In some circumstances, that evidential matter may be sufficient to support an assessed level of control risk that is below the maximum level for the presentation and disclosure assertions pertaining to expenses in the income statement.

**.86** When the auditor concludes that procedures performed to obtain the understanding of internal control also provide evidential matter for assessing control risk, he or she should consider the guidance in paragraphs .90 through .104 in judging the degree of assurance provided by that evidential matter. Although such evidential matter may not provide sufficient assurance to support an assessed level of control risk that is below the maximum level for certain assertions, it may do so for other assertions and thus provide a basis for modifying the nature, timing, or extent of the substantive tests that the auditor plans for those assertions. However, such procedures are not sufficient to support an assessed level of control risk below the maximum level if they do not provide sufficient evidential matter to evaluate the effectiveness of both the design and operation of a control relevant to an assertion.

### Further Reduction in the Assessed Level of Control Risk

**.87** After obtaining the understanding of internal control and assessing control risk, the auditor may desire to further reduce the assessed level of control risk for certain assertions. In such cases, the auditor considers whether additional evidential matter sufficient to support a further reduction is likely to be available, and whether it would be efficient to perform tests of controls to obtain that evidential matter. The results of the procedures performed to obtain the understanding of internal control, as well as pertinent information from other sources, help the auditor to evaluate those two factors.

**.88** In considering efficiency, the auditor recognizes that additional evidential matter that supports a further reduction in the assessed level of control risk for an assertion would result in less audit effort for the substantive tests of that assertion. The auditor weighs the increase in audit effort associated with the additional tests of controls that is necessary to obtain such evidential matter against the resulting decrease in audit effort associated with the reduced substantive tests.

**.89** For those assertions for which the auditor performs additional tests of controls, the auditor determines the assessed level of control risk that the results of those tests will support. This assessed level of control risk is used in determining the appropriate detection risk to accept for those assertions and, accordingly, in determining the nature, timing, and extent of substantive tests for such assertions.

## Evidential Matter to Support the Assessed Level of Control Risk

**.90** When the auditor assesses control risk below the maximum level, he or she should obtain sufficient evidential matter to support that assessed level. The evidential matter<sup>15</sup> that is sufficient to support a specific assessed level of control risk is a matter of judgment. Evidential matter varies substantially in the assurance it provides to the auditor as he or she develops an assessed level of control risk. The type of evidential matter, its source, its timeliness, and the existence of other evidential matter related to the conclusion to which it leads all bear on the degree of assurance evidential matter provides.

**.91** These characteristics influence the nature, timing, and extent of the tests of controls that the auditor applies to obtain evidential matter about control risk. The auditor selects such tests from a variety of techniques such as inquiry, observation, inspection, and reperformance of a control that pertains to an assertion. No one specific test of controls is always necessary, applicable, or equally effective in every circumstance.

### Type of Evidential Matter

**.92** The nature of the particular controls that pertain to an assertion influences the type of evidential matter that is available to evaluate the effectiveness of the design or operation of those controls. For some controls, documentation of design or operation may exist. In such circumstances, the auditor may decide to inspect the documentation to obtain evidential matter about the effectiveness of design or operation.

**.93** For other controls, however, such documentation may not be available or relevant. For example, documentation of design or operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as undocumented monitoring controls or control activities performed by a computer. In such circumstances, evidential matter about the effectiveness of design or operation may be obtained through such methods as observation, inquiry, or the use of computer-assisted audit techniques.

### Source of Evidential Matter

**.94** Generally, evidential matter about the effectiveness of the design and operation of controls obtained directly by the auditor, such as through observation, provides more assurance than evidential matter obtained indirectly or by inference, such as through inquiry. For example, evidential matter that is obtained by the auditor's direct personal observation of the individual who applies a control generally provides more assurance than making inquiries about the application of the control. The auditor should consider, however, that the observed application of a control might not be performed in the same manner when the auditor is not present.

**.95** Inquiry alone generally will not provide sufficient evidential matter to support a conclusion about the effectiveness of design or operation of a specific control. When the auditor determines that a specific control may have

---

<sup>15</sup> See also section 326 for guidance on evidential matter.

a significant effect in reducing control risk to a low level for a specific assertion, he or she ordinarily needs to perform additional tests to obtain sufficient evidential matter to support the conclusion about the effectiveness of the design or operation of that control.

### **Timeliness of Evidential Matter**

**.96** The timeliness of the evidential matter concerns when it was obtained and the portion of the audit period to which it applies. In evaluating the degree of assurance that is provided by evidential matter, the auditor should consider that the evidential matter obtained by some tests of controls, such as observation, pertains only to the point in time at which the auditing procedure was applied. Consequently, such evidential matter may be insufficient to evaluate the effectiveness of the design or operation of controls for periods not subjected to such tests. In such circumstances, the auditor may decide to supplement those tests with other tests of controls that are capable of providing evidential matter about the entire audit period. For example, for an application control performed by a computer program, the auditor may test the operation of the control at a particular point in time to obtain evidential matter about whether the control is operating effectively at that point in time. The auditor may then perform tests of controls directed toward obtaining evidential matter about whether the application control operated consistently during the audit period, such as tests of general controls pertaining to the modification and use of that computer program during the audit period.

**.97** Evidential matter about the effective design or operation of controls that was obtained in prior audits may be considered by the auditor in assessing control risk in the current audit. To evaluate the use of such evidential matter for the current audit, the auditor should consider the significance of the assertion involved, the specific controls that were evaluated during the prior audits, the degree to which the effective design and operation of those controls were evaluated, the results of the tests of controls used to make those evaluations, and the evidential matter about design or operation that may result from substantive tests performed in the current audit. The auditor should also consider that the longer the time elapsed since tests of controls were performed to obtain evidential matter about control risk, the less assurance they may provide.

**.98** When considering evidential matter obtained from prior audits, the auditor should obtain evidential matter in the current period about whether changes have occurred in internal control, including its policies, procedures, and personnel, subsequent to the prior audits, as well as the nature and extent of any such changes. For example, in performing the prior audit, the auditor may have determined that an automated control was functioning as intended. The auditor should obtain evidence to determine whether changes to the automated control have been made that would affect its continued effective functioning. Consideration of evidential matter about these changes, together with the considerations in the preceding paragraph, may support either increasing or decreasing the evidential matter about the effectiveness of design and operation to be obtained in the current period.

**.99** When the auditor obtains evidential matter about the design or operation of controls during an interim period, he or she should determine what additional evidential matter should be obtained for the remaining period. In making that determination, the auditor should consider the significance of the assertion involved, the specific controls that were evaluated during the interim period, the degree to which the effective design and operation of those

controls were evaluated, the results of the tests of controls used to make that evaluation, the length of the remaining period, and the evidential matter about design or operation that may result from the substantive tests performed in the remaining period. The auditor should obtain evidential matter about the nature and extent of any significant changes in internal control, including its policies, procedures, and personnel, that occur subsequent to the interim period.

### **Interrelationship of Evidential Matter**

**.100** The auditor should consider the combined effect of various types of evidential matter relating to the same assertion in evaluating the degree of assurance that evidential matter provides. In some circumstances, a single type of evidential matter may not be sufficient to evaluate the effective design or operation of a control. To obtain sufficient evidential matter in such circumstances, the auditor may perform other tests of controls pertaining to that control. For example, an auditor may observe the procedures for opening the mail and processing cash receipts to evaluate the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor may supplement the observation with inquiries of entity personnel and inspection of documentation about the operation of such controls at other times during the audit period.

**.101** In addition, when evaluating the degree of assurance provided by evidential matter, the auditor should consider the interrelationship of an entity's control environment, risk assessment, control activities, information and communication, and monitoring. Although an individual internal control component may affect the nature, timing, or extent of substantive tests for a specific financial statement assertion, the auditor should consider the evidential matter about an individual component in relation to the evidential matter about the other components in assessing control risk for a specific assertion.

**.102** Generally, when various types of evidential matter support the same conclusion about the design or operation of a control, the degree of assurance provided increases. Conversely, if various types of evidential matter lead to different conclusions about the design or operation of a control, the assurance provided decreases. For example, based on the evidential matter that the control environment is effective, the auditor may have reduced the number of locations at which auditing procedures will be performed. If, however, when evaluating specific control activities, the auditor obtains evidential matter that such activities are ineffective, he or she may re-evaluate his or her conclusion about the control environment and, among other things, decide to perform auditing procedures at additional locations.

**.103** Similarly, evidential matter indicating that the control environment is ineffective may adversely affect an otherwise effective control for a particular assertion. For example, a control environment that is likely to permit unauthorized changes in a computer program may reduce the assurance provided by evidential matter obtained from evaluating the effectiveness of the program at a particular point in time. In such circumstances, the auditor may decide to obtain additional evidential matter about the design and operation of that program during the audit period. For example, the auditor might obtain and control a copy of the program and use computer-assisted audit techniques to compare that copy with the program that the entity uses to process data.

**.104** An audit of financial statements is a cumulative process; as the auditor assesses control risk, the information obtained may cause him or her to modify the nature, timing, or extent of the other planned tests of controls for

assessing control risk. In addition, information may come to the auditor's attention as a result of performing substantive tests or from other sources during the audit that differs significantly from the information on which his or her planned tests of controls for assessing control risk were based. For example, the extent of misstatements that the auditor detects by performing substantive tests may alter his or her judgment about the assessed level of control risk. In such circumstances, the auditor may need to re-evaluate the planned substantive procedures, based on a revised consideration of the assessed level of control risk for all or some of the financial statement assertions.

## Correlation of Control Risk With Detection Risk

**.105** The ultimate purpose of assessing control risk is to contribute to the auditor's evaluation of the risk that material misstatements exist in the financial statements. The process of assessing control risk (together with assessing inherent risk) provides evidential matter about the risk that such misstatements may exist in the financial statements. The auditor uses this evidential matter as part of the reasonable basis for an opinion referred to in the third standard of field work, which follows:

Sufficient competent evidential matter is to be obtained through inspection, observation, inquiries, and confirmations to afford a reasonable basis for an opinion regarding the financial statements under audit.

**.106** After considering the level to which he or she seeks to restrict the risk of a material misstatement in the financial statements and the assessed levels of inherent risk and control risk, the auditor performs substantive tests to restrict detection risk to an acceptable level. As the assessed level of control risk decreases, the acceptable level of detection risk increases. Accordingly, the auditor may alter the nature, timing, and extent of the substantive tests performed.

**.107** Although the inverse relationship between control risk and detection risk may permit the auditor to change the nature or the timing of substantive tests or limit their extent, ordinarily the assessed level of control risk cannot be sufficiently low to eliminate the need to perform any substantive tests to restrict detection risk for all of the assertions relevant to significant account balances or transaction classes. Consequently, regardless of the assessed level of control risk, the auditor should perform substantive tests for significant account balances and transaction classes.

**.108** The substantive tests that the auditor performs consist of tests of details of transactions and balances, and analytical procedures. In assessing control risk, the auditor also may use tests of details of transactions as tests of controls. The objective of tests of details of transactions performed as substantive tests is to detect material misstatements in the financial statements. The objective of tests of details of transactions performed as tests of controls is to evaluate whether a control operated effectively. Although these objectives are different, both may be accomplished concurrently through performance of a test of details on the same transaction. The auditor should recognize, however, that careful consideration should be given to the design and evaluation of such tests to ensure that both objectives will be accomplished.

## Effective Date

**.109** This amendment is effective for audits of financial statements for periods beginning on or after June 1, 2001. Earlier application is permissible.

## Appendix

### Internal Control Components

1. This Appendix discusses the five internal control components set forth in paragraph .07 and further described in paragraphs .34 through .57 as they relate to a financial statement audit.

### Control Environment

2. The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.
3. The control environment encompasses the following factors:
  - a. *Integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical values are essential elements of the control environment, affecting the design, administration, and monitoring of other components. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. They include management's actions to remove or reduce incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. They also include the communication of entity values and behavioral standards to personnel through policy statements and codes of conduct and by example.
  - b. *Commitment to competence.* Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
  - c. *Board of directors or audit committee participation.* An entity's control consciousness is influenced significantly by the entity's board of directors or audit committee. Attributes include the board or audit committee's independence from management, the experience and stature of its members, the extent of its involvement and scrutiny of activities, the appropriateness of its actions, the degree to which difficult questions are raised and pursued with management, and its interaction with internal and external auditors.
  - d. *Management's philosophy and operating style.* Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include the following: management's approach to taking and monitoring business risks; management's attitudes and actions toward financial reporting (conservative or aggressive selection from available alternative accounting principles, and conscientiousness and conservatism with which accounting estimates are developed); and management's attitudes toward information processing and accounting functions and personnel.

- e. *Organizational structure.* An entity's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and monitored. Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. An entity develops an organizational structure suited to its needs. The appropriateness of an entity's organizational structure depends, in part, on its size and the nature of its activities.
- f. *Assignment of authority and responsibility.* This factor includes how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established. It also includes policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it includes policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.
- g. *Human resource policies and practices.* Human resource policies and practices relate to hiring, orientation, training, evaluating, counseling, promoting, compensating, and remedial actions. For example, standards for hiring the most qualified individuals—with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior—demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

## Application to Small and Midsized Entities

4. Small and midsized entities may implement the control environment factors differently than larger entities. For example, smaller entities might not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Similarly, smaller entities may not have an independent or outside member on their board of directors.

## Risk Assessment

5. An entity's risk assessment for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are fairly presented in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

6. Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, record, process, and report financial data consistent with the assertions of management in the financial statements. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:
- *Changes in operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
  - *New personnel.* New personnel may have a different focus on or understanding of internal control.
  - *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control.
  - *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
  - *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
  - *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
  - *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
  - *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
  - *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

### Application to Small and Midsized Entities

7. The basic concepts of the risk assessment process should be present in every entity, regardless of size, but the risk assessment process is likely to be less formal and less structured in small and midsized entities than in larger ones. All entities should have established financial reporting objectives, but they may be recognized implicitly rather than explicitly in smaller entities. Management may be able to learn about risks related to these objectives through direct personal involvement with employees and outside parties.

## Control Activities

8. Control activities are the policies and procedures that help ensure that necessary actions are taken to address risks to achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.
9. Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:
  - *Performance reviews.* These control activities include reviews of actual performance versus budgets, forecasts, and prior period performance; relating different sets of data—operating or financial—to one another, together with analyses of the relationships and investigative and corrective actions; and review of functional or activity performance, such as a bank's consumer loan manager's review of reports by branch, region, and loan type for loan approvals and collections.
  - *Information processing.* A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. General controls commonly include controls over data center and network operations; system software acquisition and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end-user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.
  - *Physical controls.* These activities encompass the physical security of assets, including adequate safeguards such as secured facilities, over access to assets and records; authorization for access to computer programs and data files; and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when any inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.
  - *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and

maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties.

### Application to Small and Midsized Entities

10. The concepts underlying control activities in small or midsized organizations are likely to be similar to those in larger entities, but the formality with which they operate varies. Further, smaller entities may find that certain types of control activities are not relevant because of controls applied by management. For example, management's retention of authority for approving credit sales, significant purchases, and draw-downs on lines of credit can provide strong control over those activities, lessening or removing the need for more detailed control activities. An appropriate segregation of duties often appears to present difficulties in smaller organizations. Even companies that have only a few employees, however, may be able to assign their responsibilities to achieve appropriate segregation or, if that is not possible, to use management oversight of the incompatible activities to achieve control objectives.

### Information and Communication

11. An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of information technology.
12. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in monitoring and other functions. The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.
13. Accordingly, an information system encompasses methods and records that—
  - Identify and record all valid transactions.
  - Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.

- Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
  - Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
  - Present properly the transactions and related disclosures in the financial statements.
14. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on.
15. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

### **Application to Small and Midsized Entities**

16. Information systems in small or midsized organizations are likely to be less formal than in larger organizations, but their role is just as significant. Smaller entities with active management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Communication may be less formal and easier to achieve in a small or midsized company than in a larger enterprise due to the smaller organization's size and fewer levels as well as management's greater visibility and availability.

### **Monitoring**

17. Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. This process is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two.
18. Ongoing monitoring activities are built into the normal recurring activities of an entity and include regular management and supervisory activities. Managers of sales, purchasing, and production at divisional and corporate levels are in touch with operations and may question reports that differ significantly from their knowledge of operations.
19. In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's activities through separate evaluations. They regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the design and operation of internal control. They communicate information about strengths and weaknesses and recommendations for improving internal control.

20. Monitoring activities may include using information from communications from external parties. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

### **Application to Small and Midsized Entities**

21. Ongoing monitoring activities of small and midsized entities are more likely to be informal and are typically performed as a part of the overall management of the entity's operations. Management's close involvement in operations often will identify significant variances from expectations and inaccuracies in financial data.

## **AU Section 9319**

### ***Consideration of Internal Control in a Financial Statement Audit: Auditing Interpretations of Section 319***

[1.] Audit Considerations for the Year 2000 Issue [Withdrawn July, 2000]

---

[The next page is 381.]

## AU Section 322

# ***The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements***

(Supersedes SAS No. 9)

Source: SAS No. 65.

**Effective for audits of financial statements for periods ending after December 15, 1991, unless otherwise indicated.**

.01 The auditor considers many factors in determining the nature, timing, and extent of auditing procedures to be performed in an audit of an entity's financial statements. One of the factors is the existence of an internal audit function.<sup>1</sup> This section provides the auditor with guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor in an audit performed in accordance with generally accepted auditing standards.

### **Roles of the Auditor and the Internal Auditors**

.02 One of the auditor's responsibilities in an audit conducted in accordance with generally accepted auditing standards is to obtain sufficient appropriate audit evidence to provide a reasonable basis for the opinion on the entity's financial statements. In fulfilling this responsibility, the auditor maintains independence from the entity. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>2</sup>

.03 Internal auditors are responsible for providing analyses, evaluations, assurances, recommendations, and other information to the entity's management and board of directors or to others with equivalent authority and responsibility. To fulfill this responsibility, internal auditors maintain objectivity with respect to the activity being audited.

### **Obtaining an Understanding of the Internal Audit Function**

.04 An important responsibility of the internal audit function is to monitor the performance of an entity's controls. When obtaining an understanding of

---

<sup>1</sup> An *internal audit function* may consist of one or more individuals who perform internal auditing activities within an entity. This section is not applicable to personnel who have the title *internal auditor* but who do not perform internal auditing activities as described herein.

<sup>2</sup> Although internal auditors are not independent from the entity, The Institute of Internal Auditors' *Standards for the Professional Practice of Internal Auditing* defines internal auditing as an independent appraisal function and requires internal auditors to be independent of the activities they audit. This concept of independence is different from the independence the auditor maintains under the AICPA Code of Professional Conduct.

internal control,<sup>3</sup> the auditor should obtain an understanding of the internal audit function sufficient to identify those internal audit activities that are relevant to planning the audit. The extent of the procedures necessary to obtain this understanding will vary, depending on the nature of those activities.

**.05** The auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- a. Organizational status within the entity.
- b. Application of professional standards (see paragraph .11).
- c. Audit plan, including the nature, timing, and extent of audit work.
- d. Access to records and whether there are limitations on the scope of their activities.

In addition, the auditor might inquire about the internal audit function's charter, mission statement, or similar directive from management or the board of directors. This inquiry will normally provide information about the goals and objectives established for the internal audit function.

**.06** Certain internal audit activities may not be relevant to an audit of the entity's financial statements. For example, the internal auditors' procedures to evaluate the efficiency of certain management decision-making processes are ordinarily not relevant to a financial statement audit.

**.07** Relevant activities are those that provide evidence about the design and effectiveness of controls that pertain to the entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions embodied in the financial statements or that provide direct evidence about potential misstatements of such data. The auditor may find the results of the following procedures helpful in assessing the relevancy of internal audit activities:

- a. Considering knowledge from prior-year audits
- b. Reviewing how the internal auditors allocate their audit resources to financial or operating areas in response to their risk-assessment process
- c. Reading internal audit reports to obtain detailed information about the scope of internal audit activities

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.08** If, after obtaining an understanding of the internal audit function, the auditor concludes that the internal auditors' activities are not relevant to the financial statement audit, the auditor does not have to give further consideration to the internal audit function unless the auditor requests direct assistance from the internal auditors as described in paragraph .27. Even if some of the internal auditors' activities are relevant to the audit, the auditor may conclude that it would not be efficient to consider further the work of the internal auditors. If the auditor decides that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of audit

---

<sup>3</sup> Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, describes the procedures the auditor follows to obtain an understanding of internal control and indicates that the internal audit function is part of the entity's monitoring component. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

procedures, the auditor should assess the competence and objectivity of the internal audit function in light of the intended effect of the internal auditors' work on the audit.

## Assessing the Competence and Objectivity of the Internal Auditors

### Competence of the Internal Auditors

.09 When assessing the internal auditors' competence, the auditor should obtain or update information from prior years about such factors as—

- Educational level and professional experience of internal auditors.
- Professional certification and continuing education.
- Audit policies, programs, and procedures.
- Practices regarding assignment of internal auditors.
- Supervision and review of internal auditors' activities.
- Quality of working-paper documentation, reports, and recommendations.
- Evaluation of internal auditors' performance.

### Objectivity of the Internal Auditors

.10 When assessing the internal auditors' objectivity, the auditor should obtain or update information from prior years about such factors as—

- The organizational status of the internal auditor responsible for the internal audit function, including—
  - Whether the internal auditor reports to an officer of sufficient status to ensure broad audit coverage and adequate consideration of, and action on, the findings and recommendations of the internal auditors.
  - Whether the internal auditor has direct access and reports regularly to the board of directors, the audit committee, or the owner-manager.
  - Whether the board of directors, the audit committee, or the owner-manager oversees employment decisions related to the internal auditor.
- Policies to maintain internal auditors' objectivity about the areas audited, including—
  - Policies prohibiting internal auditors from auditing areas where relatives are employed in important or audit-sensitive positions.
  - Policies prohibiting internal auditors from auditing areas where they were recently assigned or are scheduled to be assigned on completion of responsibilities in the internal audit function.

### Assessing Competence and Objectivity

.11 In assessing competence and objectivity, the auditor usually considers information obtained from previous experience with the internal audit function, from discussions with management personnel, and from a recent external quality review, if performed, of the internal audit function's activities. The auditor

may also use professional internal auditing standards<sup>4</sup> as criteria in making the assessment. The auditor also considers the need to test the effectiveness of the factors described in paragraphs .09 and .10. The extent of such testing will vary in light of the intended effect of the internal auditors' work on the audit. If the auditor determines that the internal auditors are sufficiently competent and objective, the auditor should then consider how the internal auditors' work may affect the audit.

## Effect of the Internal Auditors' Work on the Audit

.12 The internal auditors' work may affect the nature, timing, and extent of the audit, including—

- Procedures the auditor performs when obtaining an understanding of the entity's internal control (paragraph .13).
- Procedures the auditor performs when assessing risk (paragraphs .14 through .16).
- Substantive procedures the auditor performs (paragraph .17).

When the work of the internal auditors is expected to affect the audit, the guidance in paragraphs .18 through .26 should be followed for considering the extent of the effect, coordinating audit work with internal auditors, and evaluating and testing the effectiveness of internal auditors' work.

## Understanding of Internal Control

.13 The auditor obtains a sufficient understanding of the design of controls relevant to the audit of financial statements to plan the audit and to determine whether they have been placed in operation. Since a primary objective of many internal audit functions is to review, assess, and monitor controls, the procedures performed by the internal auditors in this area may provide useful information to the auditor. For example, internal auditors may develop a flowchart of a new computerized sales and receivables system. The auditor may review the flowchart to obtain information about the design of the related controls. In addition, the auditor may consider the results of procedures performed by the internal auditors on related controls to obtain information about whether the controls have been placed in operation. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 78.]

## Risk Assessment

.14 The auditor assesses the risk of material misstatement at both the financial-statement level and the account-balance or class-of-transaction level.

### ***Financial-Statement Level***

.15 At the financial-statement level, the auditor makes an overall assessment of the risk of material misstatement. When making this assessment, the auditor should recognize that certain controls may have a pervasive effect on many financial statement assertions. The control environment and accounting system often have a pervasive effect on a number of account balances and transaction classes and therefore can affect many assertions. The auditor's assessment of risk at the financial-statement level often affects the overall audit

---

<sup>4</sup> Standards have been developed for the professional practice of internal auditing by The Institute of Internal Auditors and the General Accounting Office. These standards are meant to (a) impart an understanding of the role and responsibilities of internal auditing to all levels of management, boards of directors, public bodies, external auditors, and related professional organizations; (b) permit measurement of internal auditing performance; and (c) improve the practice of internal auditing.

strategy. The entity's internal audit function may influence this overall assessment of risk as well as the auditor's resulting decisions concerning the nature, timing, and extent of auditing procedures to be performed. For example, if the internal auditors' plan includes relevant audit work at various locations, the auditor may coordinate work with the internal auditors (see paragraph .23) and reduce the number of the entity's locations at which the auditor would otherwise need to perform auditing procedures.

### **Account-Balance or Class-of-Transaction Level**

.16 At the account-balance or class-of-transaction level, the auditor performs procedures to obtain and evaluate audit evidence concerning management's assertions. The auditor assesses control risk for each of the significant assertions and performs tests of controls to support assessments below the maximum. When planning and performing tests of controls, the auditor may consider the results of procedures planned or performed by the internal auditors. For example, the internal auditors' scope may include tests of controls for the completeness of accounts payable. The results of internal auditors' tests may provide appropriate information about the effectiveness of controls and change the nature, timing, and extent of testing the auditor would otherwise need to perform. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

### **Substantive Procedures**

.17 Some procedures performed by the internal auditors may provide direct evidence about material misstatements in assertions about specific account balances or classes of transactions. For example, the internal auditors, as part of their work, may confirm certain accounts receivable and observe certain physical inventories. The results of these procedures can provide evidence the auditor may consider in restricting detection risk for the related assertions. Consequently, the auditor may be able to change the timing of the confirmation procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

### **Extent of the Effect of the Internal Auditors' Work**

.18 Even though the internal auditors' work may affect the auditor's procedures, the auditor should perform procedures to obtain sufficient appropriate audit evidence to support the auditor's report. Evidence obtained through the auditor's direct personal knowledge, including physical examination, observation, computation, and inspection, is generally more persuasive than information obtained indirectly. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>5</sup>

.19 The responsibility to report on the financial statements rests solely with the auditor. Unlike the situation in which the auditor uses the work of other independent auditors,<sup>6</sup> this responsibility cannot be shared with the internal auditors. Because the auditor has the ultimate responsibility to express an opinion on the financial statements, judgments about assessments of inherent and control risks, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the auditor.

---

<sup>5</sup> See section 326, *Audit Evidence*, paragraph .13. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

<sup>6</sup> See section 543, *Part of Audit Performed by Other Independent Auditors*.

**.20** In making judgments about the extent of the effect of the internal auditors' work on the auditor's procedures, the auditor considers—

- a. The materiality of financial statement amounts—that is, account balances or classes of transactions.
- b. The risk (consisting of inherent risk and control risk) of material misstatement of the assertions related to these financial statement amounts.
- c. The degree of subjectivity involved in the evaluation of the audit evidence gathered in support of the assertions.<sup>7</sup>

As the materiality of the financial statement amounts increases and either the risk of material misstatement or the degree of subjectivity increases, the need for the auditor to perform his or her own tests of the assertions increases. As these factors decrease, the need for the auditor to perform his or her own tests of the assertions decreases.

**.21** For assertions related to material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is high, the auditor should perform sufficient procedures to fulfill the responsibilities described in paragraphs .18 and .19. In determining these procedures, the auditor gives consideration to the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions. However, for such assertions, the consideration of internal auditors' work cannot alone reduce audit risk to an acceptable level to eliminate the necessity to perform tests of those assertions directly by the auditor. Assertions about the valuation of assets and liabilities involving significant accounting estimates, and about the existence and disclosure of related-party transactions, contingencies, uncertainties, and subsequent events, are examples of assertions that might have a high risk of material misstatement or involve a high degree of subjectivity in the evaluation of audit evidence.

**.22** On the other hand, for certain assertions related to less material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is low, the auditor may decide, after considering the circumstances and the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions, that audit risk has been reduced to an acceptable level and that testing of the assertions directly by the auditor may not be necessary. Assertions about the existence of cash, prepaid assets, and fixed-asset additions are examples of assertions that might have a low risk of material misstatement or involve a low degree of subjectivity in the evaluation of audit evidence.

## Coordination of the Audit Work With Internal Auditors

**.23** If the work of the internal auditors is expected to have an effect on the auditor's procedures, it may be efficient for the auditor and the internal auditors to coordinate their work by—

- Holding periodic meetings.
- Scheduling audit work.
- Providing access to internal auditors' working papers.

---

<sup>7</sup> For some assertions, such as existence and occurrence, the evaluation of audit evidence is generally objective. More subjective evaluation of the audit evidence is often required for other assertions, such as the valuation and disclosure assertions.

- Reviewing audit reports.
- Discussing possible accounting and auditing issues.

## Evaluating and Testing the Effectiveness of Internal Auditors' Work

**.24** The auditor should perform procedures to evaluate the quality and effectiveness of the internal auditors' work, as described in paragraphs .12 through .17, that significantly affects the nature, timing, and extent of the auditor's procedures. The nature and extent of the procedures the auditor should perform when making this evaluation are a matter of judgment depending on the extent of the effect of the internal auditors' work on the auditor's procedures for significant account balances or classes of transactions.

**.25** In developing the evaluation procedures, the auditor should consider such factors as whether the internal auditors'—

- Scope of work is appropriate to meet the objectives.
- Audit programs are adequate.
- Working papers adequately document work performed, including evidence of supervision and review.
- Conclusions are appropriate in the circumstances.
- Reports are consistent with the results of the work performed.

**.26** In making the evaluation, the auditor should test some of the internal auditors' work related to the significant financial statement assertions. These tests may be accomplished by either (a) examining some of the controls, transactions, or balances that the internal auditors examined or (b) examining similar controls, transactions, or balances not actually examined by the internal auditors. In reaching conclusions about the internal auditors' work, the auditor should compare the results of his or her tests with the results of the internal auditors' work. The extent of this testing will depend on the circumstances and should be sufficient to enable the auditor to make an evaluation of the overall quality and effectiveness of the internal audit work being considered by the auditor.

## Using Internal Auditors to Provide Direct Assistance to the Auditor

**.27** In performing the audit, the auditor may request direct assistance from the internal auditors. This direct assistance relates to work the auditor specifically requests the internal auditors to perform to complete some aspect of the auditor's work. For example, internal auditors may assist the auditor in obtaining an understanding of internal control or in performing tests of controls or substantive tests, consistent with the guidance about the auditor's responsibility in paragraphs .18 through .22. When direct assistance is provided, the auditor should assess the internal auditors' competence and objectivity (see paragraphs .09 through .11) and supervise,<sup>8</sup> review, evaluate, and test the work performed by internal auditors to the extent appropriate in the circumstances. The auditor should inform the internal auditors of their responsibilities, the

---

<sup>8</sup> See section 311, *Planning and Supervision*, paragraphs .28 through .32, for the type of supervisory procedures to apply. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

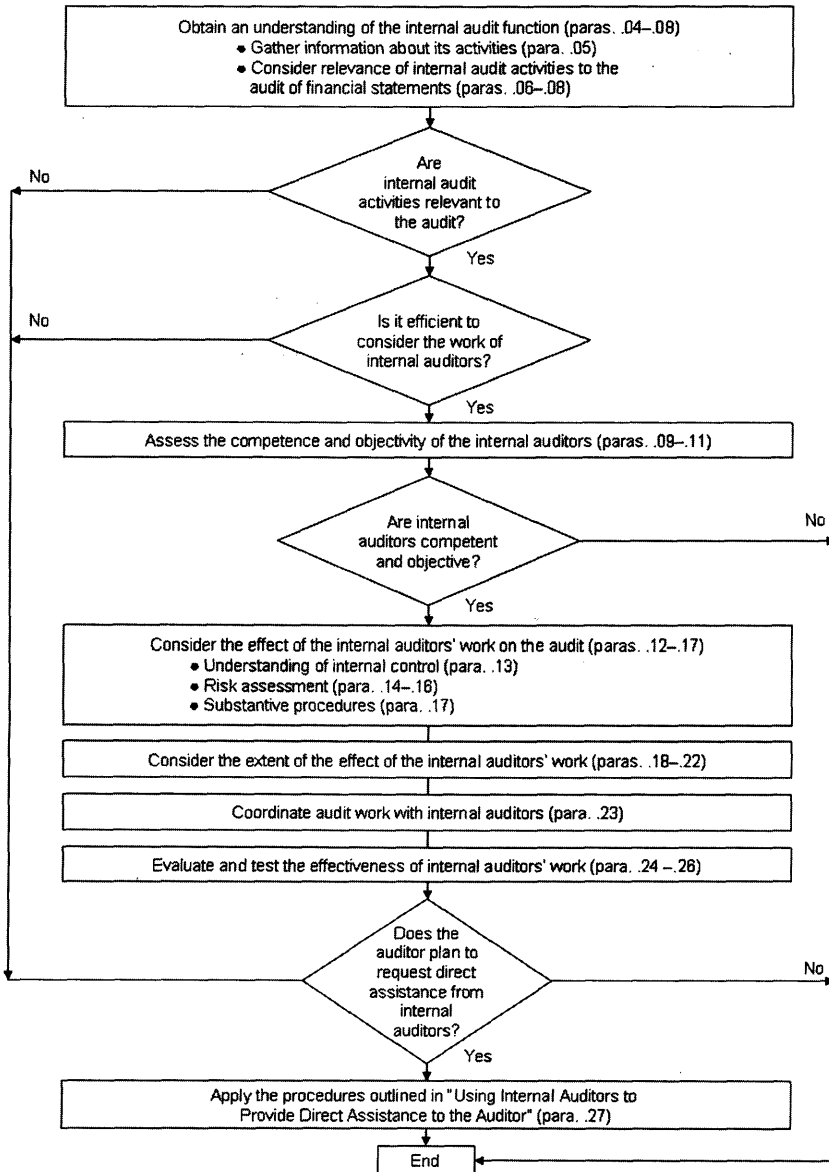

objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. The auditor should also inform the internal auditors that all significant accounting and auditing issues identified during the audit should be brought to the auditor's attention.

### **Effective Date**

.28 This section is effective for audits of financial statements for periods ending after December 15, 1991. Early application of the provisions of this section is permissible.

## Appendix

# The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

[The next page is 395.]

## AU Section 324

### ***Service Organizations***\*

(Supersedes SAS No. 44)

Sources: SAS No. 70; SAS No. 78; SAS No. 88; SAS No. 98.

See section 9324 for interpretations of this section.

Effective for service auditors' reports dated after March 31, 1993, unless otherwise indicated.

### **Introduction and Applicability**

.01 This section provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain transactions. This section also provides guidance for independent auditors who issue reports on the processing of transactions by a service organization for use by other auditors.

.02 For purposes of this section, the following definitions apply:

- *User organization*—The entity that has engaged a service organization and whose financial statements are being audited
- *User auditor*—The auditor who reports on the financial statements of the user organization
- *Service organization*—The entity (or segment of an entity) that provides services to a user organization that are part of the user organization's information system
- *Service auditor*—The auditor who reports on controls of a service organization that may be relevant to a user organization's internal control as it relates to an audit of financial statements
- *Report on controls placed in operation*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date
- *Report on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements,<sup>1</sup> on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific

---

\* Title amended, effective December 1999, by Statement on Auditing Standards No. 88.

<sup>1</sup> In this section, a service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements will be referred to as a service organization's *controls*.

date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.03** The guidance in this section is applicable to the audit of the financial statements of an entity that obtains services from another organization that are part of its information system. A service organization's services are part of an entity's information system if they affect any of the following:

- The classes of transactions in the entity's operations that are significant to the entity's financial statements
- The procedures, both automated and manual, by which the entity's transactions are initiated, authorize, recorded, processed, and reported from their occurrence to their inclusion in the financial statements
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the entity's financial statements involved in initiating, recording, processing and reporting the entity's transactions
- How the entity's information system captures other events and conditions that are significant to the financial statements
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures

Service organizations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others, mortgage bankers that service mortgages for others, and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions. The guidance in this section may also be relevant to situations in which an organization develops, provides, and maintains the software used by client organizations. The provisions of this section are not intended to apply to situations in which the services provided are limited to executing client organization transactions that are specifically authorized by the client, such as the processing of checking account transactions by a bank or the execution of securities transactions by a broker. This section also is not intended to apply to the audit of transactions arising from financial interests in partnerships, corporations, and joint ventures, such as working interests in oil and gas ventures, when proprietary interests are accounted for and reported to interest holders. [As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.04** This section is organized into the following sections:

- a. The user auditor's consideration of the effect of the service organization on the user organization's internal control and the availability of evidence to—
  - Obtain the necessary understanding of the user organization's internal control to plan the audit

- Assess control risk at the user organization
- Perform substantive procedures
- b. Considerations in using a service auditor's report
- c. Responsibilities of service auditors

## **The User Auditor's Consideration of the Effect of the Service Organization on the User Organization's Internal Control and the Availability of Audit Evidence**

.05 The user auditor should consider the discussion in paragraphs .06 through .21 when planning and performing the audit of an entity that uses a service organization to process its transactions.

### **The Effect of Use of a Service Organization on a User Organization's Internal Control**

.06 When a user organization uses a service organization, transactions that affect the user organization's financial statements are subjected to controls that are, at least in part, physically and operationally separate from the user organization. The significance of the controls of the service organization to those of the user organization depends on the nature of the services provided by the service organization, primarily the nature and materiality of the transactions it processes for the user organization and the degree of interaction between its activities and those of the user organization. To illustrate how the degree of interaction affects user organization controls, when the user organization initiates transactions and the service organization executes and does the accounting processing of those transactions, there is a high degree of interaction between the activities at the user organization and those at the service organization. In these circumstances, it may be practicable for the user organization to implement effective controls for those transactions. However, when the service organization initiates, executes, and does the accounting processing of the user organization's transactions, there is a lower degree of interaction and it may not be practicable for the user organization to implement effective controls for those transactions. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

### **Planning the Audit**

.07 Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, states that an auditor should obtain an understanding of each of the five components of the entity's internal control sufficient to assess the risk of material misstatement. This understanding may encompass controls placed in operation by the entity and by service organizations whose services are part of the entity's information system. In planning the audit, such knowledge should be used to—

- Identify types of potential misstatements.
- Consider factors that affect the risk of material misstatement.
- Design tests of controls, when applicable. Paragraphs .23 through .27 of section 318 discuss factors the auditor considers in determining whether to perform tests of controls
- Design substantive tests.

[As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78. As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 109 and No. 110.]

**[.08]** [Paragraph deleted by the issuance of Statement on Auditing Standards No. 88, December 1999.]

**.09** Information about the nature of the services provided by a service organization that are part of the user organization's information system and the service organization's controls over those services may be available from a wide variety of sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports by service auditors, internal auditors, or regulatory authorities on the service organization's controls. If the services and the service organization's controls over those services are highly standardized, information obtained through the user auditor's prior experience with the service organization may be helpful in planning the audit. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

**.10** After considering the available information, the user auditor may conclude that he or she has the means to obtain a sufficient understanding of internal control to plan the audit. If the user auditor concludes that information is not available to obtain a sufficient understanding to plan the audit, he or she may consider contacting the service organization, through the user organization, to obtain specific information or request that a service auditor be engaged to perform procedures that will supply the necessary information, or the user auditor may visit the service organization and perform such procedures. If the user auditor is unable to obtain sufficient evidence to achieve his or her audit objectives, the user auditor should qualify his or her opinion or disclaim an opinion on the financial statements because of a scope limitation. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

## **Assessing Control Risk at the User Organization**

**.11** The user auditor uses his or her understanding of the internal control to assess control risk for the assertions embodied in the account balances and classes of transactions, including those that are affected by the activities of the service organization. In doing so, the user auditor may identify certain user organization controls that, if effective, would permit the user auditor to assess control risk below the maximum for particular assertions. Such controls may be applied at either the user organization or the service organization. The user auditor may conclude that it would be efficient to obtain audit evidence about the operating effectiveness of controls to provide a basis for assessing control risk below the maximum. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.12** A service auditor's report on controls placed in operation at the service organization should be helpful in providing a sufficient understanding to plan the audit of the user organization. Such a report, however, is not intended to provide any evidence of the operating effectiveness of the relevant controls that would allow the user auditor to reduce the assessed level of control risk below the maximum. Such audit evidence should be derived from one or more of the following:

- a. Tests of the user organization's controls over the activities of the service organization (for example, the user auditor may test the user organization's independent reperformance of selected items processed by a service organization or test the user organization's reconciliation of output reports with source documents)
- b. A service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls
- c. Appropriate tests of controls performed by the user auditor at the service organization

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.13** The user organization may establish effective controls over the service organization's activities that may be tested and that may enable the user auditor to reduce the assessed level of control risk below the maximum for some or all of the related assertions. If a user organization, for example, uses a service organization to process its payroll transactions, the user organization may establish controls over the submission and receipt of payroll information that could prevent or detect material misstatements. The user organization might reperform the service organization's payroll calculations on a test basis. In this situation, the user auditor may perform tests of the user organization's controls over payroll processing that would provide a basis for assessing control risk below the maximum for the assertions related to payroll transactions. Alternatively, the user auditor may decide to assess control risk at the maximum level because he or she believes controls are unlikely to pertain to an assertion, are unlikely to be effective, or because he or she believes obtaining evidence about the operating effectiveness of the service organization's controls, such as those over changes in payroll programs, would not be efficient. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.14** The user auditor may find that controls relevant to assessing control risk below the maximum for particular assertions are applied only at the service organization. If the user auditor plans to assess control risk below the maximum for those assertions, he or she should evaluate the operating effectiveness of those controls by obtaining a service auditor's report that describes the results of the service auditor's tests of those controls (that is, a report on controls placed in operation and tests of operating effectiveness, or an agreed-upon procedures report)<sup>2</sup> or by performing tests of controls at the service organization. If the user auditor decides to use a service auditor's report, the user auditor should consider the extent of the evidence provided by the report about the effectiveness of controls intended to prevent or detect material misstatements in the particular assertions. The user auditor remains responsible for evaluating the evidence presented by the service auditor and for determining its effect on the assessment of control risk at the user organization.

**.15** The user auditor's assessments of control risk regarding assertions about account balances or classes of transactions are based on the combined evidence provided by the service auditor's report and the user auditor's own procedures. In making these assessments, the user auditor should consider the nature, source, and interrelationships among the evidence, as well as the

---

<sup>2</sup> See AT section 201, *Agreed-Upon Procedures Engagements*, for guidance on performing and reporting on agreed-upon procedures engagements. [Footnote added, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

period covered by the tests of controls. The user auditor uses the assessed levels of control risk, as well as his or her understanding of internal control, in determining the nature, timing, and extent of substantive tests for particular assertions.

**.16** The guidance in section 326.06, regarding the auditor's consideration of the sufficiency of audit evidence to support a specific assessed level of control risk is applicable to user auditors considering audit evidence provided by a service auditor's report on controls placed in operation and tests of operating effectiveness. Because the report may be intended to satisfy the needs of several different user auditors, a user auditor should determine whether the specific tests of controls and results in the service auditor's report are relevant to assertions that are significant in the user organization's financial statements. For those tests of controls and results that are relevant, a user auditor should consider whether the nature, timing, and extent of such tests of controls and results provide appropriate evidence about the effectiveness of the controls to support the user auditor's assessed level of control risk. In evaluating these factors, user auditors should also keep in mind that, for certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less support for control risk reduction the test may provide. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105 and No. 106.]

### **Audit Evidence From Substantive Audit Procedures Performed by Service Auditors**

**.17** Service auditors may be engaged to perform procedures that are substantive in nature for the benefit of user auditors. Such engagements may involve the performance, by the service auditor, of procedures agreed upon by the user organization and its auditor and by the service organization and its auditor. In addition, there may be requirements imposed by governmental authorities or through contractual arrangements whereby service auditors perform designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organization may be used by user auditors as part of the evidence necessary to support their opinions.

### **Considerations in Using a Service Auditor's Report**

**.18** In considering whether the service auditor's report is satisfactory for his or her purposes, the user auditor should make inquiries concerning the service auditor's professional reputation. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10a.

**.19** In considering whether the service auditor's report is sufficient to meet his or her objectives, the user auditor should give consideration to the guidance in section 543.12. If the user auditor believes that the service auditor's report may not be sufficient to meet his or her objectives, the user auditor may supplement his or her understanding of the service auditor's procedures and conclusions by discussing with the service auditor the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, he or she may contact the service organization, through the user organization, to request that the service auditor perform agreed-upon procedures at the service organization, or the user auditor may perform such procedures.

**.20** When assessing a service organization's controls and how they interact with a user organization's controls, the user auditor may become aware of the existence of significant deficiencies or material weaknesses in internal control. In such circumstances, the user auditor should consider the guidance provided in section 325, *Communicating Internal Control Related Matters Identified in an Audit*. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

**.21** The user auditor should not make reference to the report of the service auditor as a basis, in part, for his or her own opinion on the user organization's financial statements. The service auditor's report is used in the audit, but the service auditor is not responsible for examining any portion of the financial statements as of any specific date or for any specified period. Thus, there cannot be a division of responsibility for the audit of the financial statements.

## Responsibilities of Service Auditors

**.22** The service auditor is responsible for the representations in his or her report and for exercising due care in the application of procedures that support those representations. Although a service auditor's engagement differs from an audit of financial statements conducted in accordance with generally accepted auditing standards, it should be performed in accordance with the general standards and with the relevant fieldwork and reporting standards. Although the service auditor should be independent from the service organization, it is not necessary for the service auditor to be independent from each user organization.

**.23** As a result of procedures performed at the service organization, the service auditor may become aware of illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations. The terms *errors*, *fraud*, and *illegal acts* are discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*, and section 317, *Illegal Acts by Clients*; the discussions therein are relevant to this section. When the service auditor becomes aware of such matters, he or she should determine from the appropriate level of management of the service organization whether this information has been communicated appropriately to affected user organizations, unless those matters are clearly inconsequential. If the management of the service organization has not communicated the information to affected user organizations and is unwilling to do so, the service auditor should inform the service organization's audit committee or others with equivalent authority or responsibility. If the audit committee does not respond appropriately to the service auditor's communication, the service auditor should consider whether to resign from the engagement. The service auditor may wish to consult with his or her attorney in making this decision.

**.24** The type of engagement to be performed and the related report to be prepared should be established by the service organization. However, when circumstances permit, discussions between the service organization and the user organizations are advisable to determine the type of report that will be most suitable for the user organizations' needs. This section provides guidance on the two types of reports that may be issued:

- a. *Reports on controls placed in operation*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date. Such reports may

be useful in providing a user auditor with an understanding of the controls necessary to plan the audit and to design effective tests of controls and substantive tests at the user organization, but they are not intended to provide the user auditor with a basis for reducing his or her assessments of control risk below the maximum.

- b. *Reports on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified. Such reports may be useful in providing the user auditor with an understanding of the controls necessary to plan the audit and may also provide the user auditor with a basis for reducing his or her assessments of control risk below the maximum.

## Reports on Controls Placed in Operation

**.25** The information necessary for a report on controls placed in operation ordinarily is obtained through discussions with appropriate service organization personnel and through reference to various forms of documentation, such as system flowcharts and narratives.

**.26** After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

**.27** Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. For the type of report described in paragraph .24a, these procedures need not be supplemented by tests of the operating effectiveness of the service organization's controls.

**.28** Although a service auditor's report on controls placed in operation is as of a specified date, the service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes that the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered insignificant by user organization's and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include—

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.
- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

**.29** A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization should contain—

- a. A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b. A description of the scope and nature of the service auditor's procedures.
- c. Identification of the party specifying the control objectives.
- d. An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.
- e. A disclaimer of opinion on the operating effectiveness of the controls.
- f. The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.
- g. A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to future periods any evaluation of the description.
- h. Identification of the parties for whom the report is intended.

**.30** If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

**.31** It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

**.32** The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.33** The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

**.34** For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that—

- a. The service organization identify and appropriately describe such control objectives and the relevant controls.
- b. The service auditor consider the linkage of the controls to the stated control objectives.
- c. The service auditor obtain sufficient evidence to reach an opinion.

**.35** The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

**.36** The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

**.37** The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed below the maximum.

**.38** The following is a sample report on controls placed in operation at a service organization. The report should have, as an attachment, a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the \_\_ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,<sup>3</sup> and (3) such controls had been placed in operation as of \_\_\_\_\_. The control objectives were specified by \_\_\_. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization's controls, individually or in the aggregate.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

The description of controls at XYZ Service Organization is as of \_\_\_\_\_ and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers \_\_\_\_\_.

**.39** If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

---

<sup>3</sup> If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspections of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of.

**.40** If, after applying the criteria in paragraph .32, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

## Reports on Controls Placed in Operation and Tests of Operating Effectiveness

*Paragraphs .41 through .56 repeat some of the information contained in paragraphs .25 through .40 to provide readers with a comprehensive, stand-alone presentation of the relevant considerations for each type of report.*

**.41** The information necessary for a report on controls placed in operation and tests of operating effectiveness ordinarily is obtained through discussions with appropriate service organization personnel, through reference to various forms of documentation, such as system flowcharts and narratives, and through the performance of tests of controls. Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. The service auditor applies tests of controls to determine whether specific controls are operating with sufficient effectiveness to achieve specified control objectives. Section 350, *Audit Sampling*, provides guidance on the application and evaluation of audit sampling in performing tests of controls.

**.42** After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

**.43** The service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered significant by user organizations and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include—

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.
- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

**.44** A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization and tests of operating effectiveness should contain—

- a. A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b. A description of the scope and nature of the service auditor's procedures.
- c. Identification of the party specifying the control objectives.
- d. An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant

to a user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.

- e. The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.
- f. A reference to a description of tests of specific service organization controls designed to obtain evidence about the operating effectiveness of those controls in achieving specified control objectives. The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied, and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided.
- g. A statement of the period covered by the service auditor's report on the operating effectiveness of the specific controls tested.
- h. The service auditor's opinion on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.
- i. When all of the control objectives listed in the description of controls placed in operation are not covered by tests of operating effectiveness, a statement that the service auditor does not express an opinion on control objectives not listed in the description of tests performed at the service organization.
- j. A statement that the relative effectiveness and significance of specific service organization controls and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations.
- k. A statement that the service auditor has performed no procedures to evaluate the effectiveness of controls at individual user organizations.
- l. A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to the future any evaluation of the description or any conclusions about the effectiveness of controls in achieving control objectives.
- m. Identification of the parties for whom the report is intended.

.45 If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

**.46** It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. Similarly, if the operating effectiveness of controls at the service organization is dependent on the application of controls at user organizations, this should be delineated in the description of tests performed.

**.47** The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.48** The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

**.49** For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that—

- a. The service organization identify and appropriately describe such control objectives and the relevant controls.
- b. The service auditor consider the linkage of the controls to the stated control objectives.
- c. The service auditor obtain sufficient evidence to reach an opinion.

**.50** The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

**.51** The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

**.52** The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide

evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed below the maximum. Evidence that may enable the user auditor to conclude that control risk may be assessed below the maximum may be obtained from the results of specific tests of operating effectiveness.

**.53** The management of the service organization specifies whether all or selected applications and control objectives will be covered by the tests of operating effectiveness. The service auditor determines which controls are, in his or her judgment, necessary to achieve the control objectives specified by management. The service auditor then determines the nature, timing, and extent of the tests of controls needed to evaluate operating effectiveness. Testing should be applied to controls in effect throughout the period covered by the report. To be useful to user auditors, the report should ordinarily cover a minimum reporting period of six months.

**.54** The following is a sample report on controls placed in operation at a service organization and tests of operating effectiveness. It should be assumed that the report has two attachments: (a) a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements and (b) a description of controls for which tests of operating effectiveness were performed, the control objectives the controls were intended to achieve, the tests applied, and the results of those tests. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the \_\_\_ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,<sup>4</sup> and (3) such controls had been placed in operation as of \_\_\_. The control objectives were specified by \_\_\_. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X, to obtain evidence about their effectiveness in meeting the

---

<sup>4</sup> If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

control objectives, described in Schedule X, during the period from \_\_\_ to \_\_\_. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from \_\_\_ to \_\_\_. [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.]<sup>5</sup>

The relative effectiveness and significance of specific controls at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at XYZ Service Organization is as of \_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_ to \_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

**.55** If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspection of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_.

---

<sup>5</sup> This sentence should be added when all of the control objectives listed in the description of controls placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of controls placed in operation are included in the tests of operating effectiveness. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

**.56** If, after applying the criteria in paragraph .47, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the related control objectives would be achieved if the described controls were complied with satisfactorily.

## **Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events**

**.57** Changes in a service organization's controls that could affect user organizations' information systems may occur subsequent to the period covered by the service auditor's report but before the date of the service auditor's report. These occurrences are referred to as subsequent events. A service auditor should consider information about two types of subsequent events that come to his or her attention. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.58** The first type consists of events that provide additional information about conditions that existed during the period covered by the service auditor's report. This information should be used by the service auditor in determining whether controls at the service organization that could affect user organizations' information systems were placed in operation, suitably designed, and, if applicable, operating effectively during the period covered by the engagement. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.59** The second type consists of those events that provide information about conditions that arose subsequent to the period covered by the service auditor's report that are of such a nature and significance that their disclosure is necessary to prevent users from being misled. This type of information ordinarily will not affect the service auditor's report if the information is adequately disclosed by management in a section of the report containing "Other Information Provided by the Service Organization." If this information is not disclosed by the service organization, the service auditor should disclose it in a section of the report containing "Other Information Provided by the Service Auditor" and/or in the service auditor's report. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.60** Although a service auditor has no responsibility to detect subsequent events, the service auditor should inquire of management as to whether it is aware of any subsequent events through the date of the service auditor's report that would have a significant effect on user organizations. In addition, a service auditor should obtain a representation from management regarding subsequent events. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

### **Written Representations of the Service Organization's Management**

**.61** Regardless of the type of report issued, the service auditor should obtain written representations from the service organization's management that—

- Acknowledge management's responsibility for establishing and maintaining appropriate controls relating to the processing of transactions for user organizations.
- Acknowledge the appropriateness of the specified control objectives.
- State that the description of controls presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control.
- State that the controls, as described, had been placed in operation as of a specific date.
- State that management believes its controls were suitably designed to achieve the specified control objectives.
- State that management has disclosed to the service auditor any significant changes in controls that have occurred since the service organization's last examination.
- State that management has disclosed to the service auditor any illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations.
- State that management has disclosed to the service auditor all design deficiencies in controls of which it is aware, including those for which management believes the cost of corrective action may exceed the benefits.
- State that management has disclosed to the service auditor any subsequent events that would have a significant effect on user organizations.

If the scope of the work includes tests of operating effectiveness, the service auditor should obtain a written representation from the service organization's management stating that management has disclosed to the service auditor all instances, of which it is aware, when controls have not operated with sufficient effectiveness to achieve the specified control objectives. [Paragraph renumbered and amended, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

### **Reporting on Substantive Procedures**

**.62** The service auditor may be requested to apply substantive procedures to user transactions or assets at the service organization. In such circumstances, the service auditor may make specific reference in his or her report to

having carried out the designated procedures or may provide a separate report in accordance with AT section 201, *Agreed-Upon Procedures Engagements*. Either form of reporting should include a description of the nature, timing, extent, and results of the procedures in sufficient detail to be useful to user auditors in deciding whether to use the results as evidence to support their opinions. [Revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

## Effective Date

**.63** This section is effective for service auditors' reports dated after March 31, 1993. Earlier application of this section is encouraged. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

---

[The next page is 421.]

## AU Section 9324

# ***Service Organizations: Auditing Interpretations of Section 324***

### **1. Describing Tests of Operating Effectiveness and the Results of Such Tests**

**.01 Question**—Paragraph .44f of section 324, *Service Organizations*, specifies the elements that should be included in a description of tests of operating effectiveness, which is part of a report on controls placed in operation and tests of operating effectiveness. Section 324.44f states:

"...The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided."

When a service auditor performs an engagement that includes tests of operating effectiveness, what information and how much detail should be included in the description of the "tests applied" and the "results of the tests"?

**.02 Interpretation**—In all cases, for each control objective tested, the description of tests of operating effectiveness should include all of the elements listed in section 324.44f, whether or not the service auditor concludes that the control objective has been achieved. The description should provide sufficient information to enable user auditors to assess control risk for financial statement assertions affected by the service organization. The description need not be a duplication of the service auditor's detailed audit program, which in some cases would make the report too voluminous for user auditors and would provide more than the required level of detail.

**.03** In describing the nature, timing, and extent of the tests applied, the service auditor also should indicate whether the items tested represent a sample or all of the items in the population, but need not indicate the size of the population. In describing the results of the tests, the service auditor should include exceptions and other information that in the service auditor's judgment could be relevant to user auditors. Such exceptions and other information should be included for each control objective, whether or not the service auditor concludes that the control objective has been achieved. When exceptions that could be relevant to user auditors are noted, the description also should include the following information:

- The size of the sample, when sampling has been used
- The number of exceptions noted
- The nature of the exceptions

If no exceptions or other information that could be relevant to user auditors are identified by the tests, the service auditor should indicate that finding (for example, "No relevant exceptions noted").

[Issue Date: April, 1995.]

## **2. Service Organizations That Use the Services of Other Service Organizations (Subservice Organizations)**

**.04 Question**—A service organization may use the services of another service organization, such as a bank trust department that uses an independent computer processing service organization to perform its data processing. In this situation, the bank trust department is a service organization and the computer processing service organization is considered a subservice organization. How are a user auditor's and a service auditor's procedures affected when a service organization uses a subservice organization?

**.05 Interpretation**—When a service organization uses a subservice organization, the user auditor should determine whether the processing performed by the subservice organization affects assertions in the user organization's financial statements and whether those assertions are significant to the user organization's financial statements. To plan the audit and assess control risk, a user auditor may need to consider the controls at both the service organization and the subservice organization. Paragraphs .06 through .17 of section 324, *Service Organizations*, provide guidance to user auditors on considering the effect of a service organization on a user organization's internal control. Although section 324.06–.17 do not specifically refer to subservice organizations, when a subservice organization provides services to a service organization, the guidance in these paragraphs should be interpreted to include the subservice organization. For example, in situations where subservice organizations are used, the interaction between the user organization and the service organization described in section 324.06 would be expanded to include the interaction between the user organization, the service organization and the subservice organization.

**.06** Similarly, a service auditor engaged to examine the controls of a service organization and issue a service auditor's report may need to consider functions performed by the subservice organization and the effect of the subservice organization's controls on the service organization.

**.07** The degree of interaction and the nature and materiality of the transactions processed by the service organization and the subservice organization are the most important factors to consider in determining the significance of the subservice organization's controls to the user organization's internal control. Section 324.11–.16 describe how a user auditor's assessment of control risk is affected when a user organization uses a service organization. When a subservice organization is involved, the user auditor may need to consider activities at both the service organization and the subservice organization in applying the guidance in these paragraphs.

**.08 Question**—How does a user auditor obtain information about controls at a subservice organization?

**.09 Interpretation**—If a user auditor concludes that he or she needs information about the subservice organization to plan the audit or to assess control risk, the user auditor (a) may contact the service organization through

the user organization and may contact the subservice organization either through the user organization or the service organization to obtain specific information or (b) may request that a service auditor be engaged to perform procedures that will supply the necessary information. Alternatively, the user auditor may visit the service organization or subservice organization and perform such procedures.

**.10 Question**—When a service organization uses a subservice organization, what information about the subservice organization should be included in the service organization's description of controls?

**.11 Interpretation**—A service organization's description of controls should include a description of the functions and nature of the processing performed by the subservice organization in sufficient detail for user auditors to understand the significance of the subservice organization's functions to the processing of the user organizations' transactions. Ordinarily, disclosure of the identity of the subservice organization is not required. However, if the service organization determines that the identity of the subservice organization would be relevant to user organizations, the name of the subservice organization may be included in the description. The purpose of the description of the functions and nature of the processing performed by the subservice organization is to alert user organizations and their auditors to the fact that another entity (that is, the subservice organization) is involved in the processing of the user organizations' transactions and to summarize the functions the subservice organization performs.

**.12** When a subservice organization performs services for a service organization, there are two alternative methods of presenting the description of controls. The service organization determines which method will be used.

- a. *The Carve-Out Method*—The subservice organization's relevant control objectives and controls are excluded from the description and from the scope of the service auditor's engagement. The service organization states in the description that the subservice organization's control objectives and related controls are omitted from the description and that the control objectives in the report include only the objectives the service organization's controls are intended to achieve.
- b. *The Inclusive Method*—The subservice organization's relevant controls are included in the description and in the scope of the engagement. The description should clearly differentiate between controls of the service organization and controls of the subservice organization. The set of control objectives includes all of the objectives a user auditor would expect both the service organization and the subservice organization to achieve. To accomplish this, the service organization should coordinate the preparation and presentation of the description of controls with the subservice organization.

In either method, the service organization includes in its description of controls a description of the functions and nature of the processing performed by the subservice organization, as set forth in paragraph .11.

**.13** If the functions and processing performed by the subservice organization are significant to the processing of user organization transactions, and the service organization does not disclose the existence of the subservice organization and the functions it performs, the service auditor may need to issue a qualified or adverse opinion as to the fairness of the presentation of the description of controls.

**.14 Question**—How is the service auditor's report affected by the method of presentation selected?

**.15 Interpretation**—If the service organization has adopted the carve-out method, the service auditor should modify the scope paragraph of the service auditor's report to briefly summarize the functions and nature of the processing performed by the subservice organization. This summary ordinarily would be briefer than the information provided by the service organization in its description of the functions and nature of the processing performed by the subservice organization. The service auditor should include a statement in the scope paragraph of the service auditor's report indicating that the description of controls includes only the control objectives and related controls of the service organization; accordingly, the service auditor's examination does not extend to controls at the subservice organization.

**.16** An example of the scope paragraph of a service auditor's report using the carve-out method is presented below. Additional or modified report language is shown in *boldface italics*.

### **Sample Scope Paragraph of a Service Auditor's Report Using the Carve-Out Method**

#### Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) such controls had been placed in operation as of June 30, 20XX. ***Example Trust Company uses a computer processing service organization for all of its computerized application processing. The accompanying description includes only those control objectives and related controls of Example Trust Company and does not include control objectives and related controls of the computer processing service organization. Our examination did not extend to controls of the computer processing service organization.*** The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

[The remainder of the report is the same as the standard service auditor's report illustrated in section 324.38 and .54.]

**.17** If the service organization has used the inclusive method, the service auditor should perform procedures comparable to those described in section 324.12. Such procedures may include performing tests of the service organization's controls over the activities of the subservice organization or performing

procedures at the subservice organization. If the service auditor will be performing procedures at the subservice organization, the service organization should arrange for such procedures. The service auditor should recognize that the subservice organization generally is not the client for the engagement. Accordingly, in these circumstances the service auditor should determine whether it will be possible to obtain the required evidence to support the portion of the opinion covering the subservice organization and whether it will be possible to obtain an appropriate letter of representations regarding the subservice organization's controls.

.18 An example of a service auditor's report using the inclusive method is presented below. Additional or modified report language is shown in **boldface italics**.

### **Sample Service Auditor's Report Using the Inclusive Method**

#### Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company **and Computer Processing Service Organization, an independent service organization that provides computer processing services to Example Trust Company**, applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's **and Computer Processing Service Organization's** controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) the controls had been placed in operation as of June 30, 20XX. The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned controls presents fairly, in all material respects, the relevant aspects of Example Trust Company's **and Computer Processing Service Organization's** controls that had been placed in operation as of June 30, 20XX. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily and user organizations applied the controls contemplated in the design of Example Trust Company's controls.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from January 1, 20XX, to June 30, 20XX. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of Example Trust Company and to their auditors to be taken into consideration, along with information about internal control at user organizations, when making assessments of control risk for user organizations.

In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from January 1, 20XX, to June 30, 20XX.

The relative effectiveness and significance of specific controls at Example Trust Company *and Computer Processing Service Organization*, and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at Example Trust Company *and Computer Processing Service Organization* is as of June 30, 20XX, and information about tests of the operating effectiveness of specific controls covers the period from January 1, 20XX, to June 30, 20XX. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization *and Computer Processing Service Organization* is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.<sup>1</sup>

This report is intended solely for use by the management of Example Trust Company, its users, and the independent auditors of its users.

July 10, 20XX

[Issue Date: April, 1995; Revised: February, 1997;  
Revised: April, 2002.]

### **[3.] Responsibilities of Service Organizations and Service Auditors With Respect to Information About the Year 2000 Issue in a Service Organization's Description of Controls**

[.19–.34] [Withdrawn July, 2000 by the Audit Issues Task Force.]

### **4. Responsibilities of Service Organizations and Service Auditors With Respect to Forward-Looking Information in a Service Organization's Description of Controls**

**.35 Question**—Section 324.32 requires a service auditor to consider "whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies." A service auditor performing a service auditor's engagement may become aware that a service organization, whose system is correctly processing data during the period covered by the service auditor's examination, has not performed contingency planning or made adequate provision for disaster recovery, and may not be able to retrieve or process data in future periods. Does section 324.32 require a service

---

<sup>1</sup> This sentence has been expanded to describe the risks of projecting any evaluation of the controls to future periods because of the failure to make needed changes to a system or controls, as provided for in Interpretation No. 5, "Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods" (paragraphs .38–.40).

auditor to identify, in his or her report, design deficiencies that do not affect processing during the period covered by the service auditor's examination but may represent potential problems in future periods?

**.36 Interpretation**—No. Section 324.32 addresses design deficiencies that could adversely affect processing *during the period covered by the service auditor's examination*. Section 324.32 does not apply to design deficiencies that potentially could affect processing *in future periods*. If the computer programs are correctly processing data during the period covered by the service auditor's examination, and such design deficiencies currently do not affect user organizations' abilities to initiate, authorize, record, process, or report financial data, the service auditor would not be required to report such design deficiencies in his or her report, based on the requirements in section 324.32. However, if a service auditor becomes aware of design deficiencies at the service organization that could potentially affect the processing of user organizations' transactions in future periods, the service auditor, in his or her judgment, may choose to communicate this information to the service organization's management and advise management to disclose this information and its plans for correcting the design deficiencies in a section of the service auditor's document titled "Other Information Provided by the Service Organization."<sup>2</sup>

**.37** If the service organization includes information about the design deficiencies in the section of the document titled "Other Information Provided by the Service Organization," the service auditor should read the information and consider applying by analogy the guidance in section 550, *Other Information in Documents Containing Audited Financial Statements*. In addition, the service auditor should include a paragraph in his or her report disclaiming an opinion on the information provided by the service organization. The following is an example of such a paragraph.

The information in section 4 describing XYZ Service Organization's plans to modify its disaster recovery plan is presented by the Service Organization to provide additional information and is not a part of the Service Organization's description of controls that may be relevant to a user organization's internal control. Such information has not been subjected to the procedures applied in the examination of the description of the controls applicable to the processing of transactions for user organizations and, accordingly, we express no opinion on it.

A service auditor also may consider communicating information about the design deficiencies in the section of the service auditor's document titled "Other Information Provided by the Service Auditor."

[Issue Date: February, 2002; Revised: March, 2006.]

## 5. Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods

**.38 Question**—Section 324.29g and .44l state that a service auditor's report should contain a statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting

---

<sup>2</sup> Chapter 2 of the AICPA Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*, proposes four sections of a service auditor's document.

1. Independent service auditor's report (the letter from the service auditor expressing his or her opinion)
2. Service organization's description of controls
3. Information provided by the independent service auditor (This section generally contains a description of the service auditor's tests of operating effectiveness and the results of those tests.)
4. Other information provided by the service organization

to future periods any evaluation of the description. Section 324.44<sup>l</sup> goes on to state that the report also should refer to the risk of projecting to the future "any conclusions about the effectiveness of controls in achieving control objectives." The sample service auditor's reports in section 324.38 and .54 include illustrative paragraphs that illustrate this caveat. The following excerpt is from section 324.54:

The description of controls at XYZ Service Organization is as of \_\_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_\_\_ to \_\_\_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

The validity of projections to the future about the effectiveness of controls may be affected by changes made to the system and the controls, and also by the failure to make needed changes, for example, changes to accommodate new processing requirements. May a service auditor's report be expanded to describe the risk of projecting to the future conclusions about the effectiveness of controls?

**.39 Interpretation**—The sample reports in section 324.38 and .54 may be expanded to describe this risk. The first and second sentences of the illustrative paragraph above address the potential effect of change on the description of controls as of a specified date; accordingly, they do not require modification because new processing requirements would not affect the description as of the specified date. However, the last sentence in the sample report paragraph above could be expanded to describe the risk of projecting an evaluation of the controls to future periods because of changes to the system or controls, or the failure to make needed changes to the system or controls.

**.40** Suggested additions to the paragraph in the illustrative service auditor's reports in section 324.38 and .54 are the following (new language is shown in italics.):

The description of controls at XYZ Service Organization is as of \_\_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_\_\_ to \_\_\_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes *made to the system or controls, or the failure to make needed changes to the system or controls*, may alter the validity of such conclusions.

## AU Section 325

# Communicating Internal Control Related Matters Identified in an Audit

(Supersedes SAS No. 60.)

Source: SAS No. 112.

Effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier implementation is permitted.

## Introduction

.01 This section establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. It is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion). In particular, this section:

- Defines the terms *significant deficiency* and *material weakness*.
- Provides guidance on evaluating the severity of control deficiencies identified in an audit of financial statements.
- Requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit.

.02 The term *those charged with governance* is defined in footnote 5 of section 339, *Audit Documentation*, as "the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting and disclosure process." In most entities, governance is a collective responsibility that may be carried out by a board of directors, a committee of the board of directors (for example, an audit or legislative oversight committee), a committee of management (for example, a finance, budget, or governmental agency executive committee), partners, equivalent persons, or some combination of these parties. In some smaller entities, management and those charged with governance may be the same people, for example, the owner in an owner-managed entity or a sole trustee.

.03 Internal control is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls related to financial reporting and operations objectives. Generally, controls that are relevant to an audit of financial statements are those that pertain to the entity's objective of reliable financial reporting. In this section, the term *financial reporting* relates to the preparation of reliable financial statements that are fairly presented in conformity with generally accepted

accounting principles.<sup>1</sup> The design and formality of an entity's internal control will vary depending on the entity's size, the industry in which it operates, its culture, and management's philosophy.

**.04** In an audit of financial statements, the auditor is not required to perform procedures to identify deficiencies in internal control<sup>2, 3</sup> or to express an opinion on the effectiveness of the entity's internal control.<sup>4</sup> However, during the course of an audit, the auditor may become aware of control deficiencies while obtaining an understanding of the entity's internal control, assessing the risks of material misstatement of the financial statements due to error or fraud, performing further audit procedures to respond to assessed risk, communicating with management or others (for example, internal auditors or governmental authorities), or otherwise. The auditor's awareness of control deficiencies varies with each audit and is influenced by the nature, timing, and extent of audit procedures performed, as well as other factors.

## Definitions

**.05** A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that even if the control operates as designed, the control objective is not always met. A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or qualifications to perform the control effectively. Control deficiencies may involve one or more of the five interrelated components of internal control.

**.06** A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood<sup>5</sup>

<sup>1</sup> Reference to generally accepted accounting principles includes, where applicable, a comprehensive basis of accounting other than generally accepted accounting principles, as that term is defined in paragraph .04 of section 623, *Special Reports*.

<sup>2</sup> Hereinafter in this section, the term *internal control* means internal control over financial reporting.

<sup>3</sup> Section 319, *Consideration of Internal Control in a Financial Statement Audit*, contains a detailed discussion of internal control and the following five interrelated components of internal control: (a) the control environment, (b) risk assessment, (c) control activities, (d) information and communication, and (e) monitoring.

<sup>4</sup> The auditor's responsibility for communicating matters related to an entity's internal control identified in an audit of financial statements is not the same as the practitioner's responsibility for reporting on the effectiveness of an entity's internal control in an attestation engagement performed under AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*.

<sup>5</sup> The term *remote likelihood* as used in the definitions of the terms *significant deficiency* and *material weakness* has the same meaning as the term *remote* as used in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*. Paragraph 3 of FASB Statement No. 5 states:

When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This section uses the terms *probable*, *reasonably possible*, and *remote* to identify three areas within that range, as follows:

- a. *Probable*. The future event or events are likely to occur.
- b. *Reasonably possible*. The chance of the future event or events occurring is more than remote but less than likely.
- c. *Remote*. The chance of the future events or events occurring is slight.

Therefore, the likelihood of an event is "more than remote" when it is at least reasonably possible.

that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected. A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

**.07** The phrase "more than inconsequential" as used in the definition of significant deficiency describes the magnitude of potential misstatement that could occur as a result of a significant deficiency and serves as a threshold for evaluating whether a control deficiency or combination of control deficiencies is a significant deficiency. A misstatement is inconsequential if a reasonable person would conclude, after considering the possibility of further undetected misstatements, that the misstatement, either individually or when aggregated with other misstatements, would clearly be immaterial to the financial statements. If a reasonable person would not reach such a conclusion regarding a particular misstatement, that misstatement is more than inconsequential.

**.08** In determining whether a potential misstatement would be more than inconsequential, the auditor should consider qualitative and quantitative factors. Inconsequential in this context is not the same concept as the threshold amount the auditor establishes in an audit of financial statements below which known and likely misstatements need not be accumulated. For example, for the purposes of evaluating control deficiencies, a potential misstatement that is less than 20 percent of overall financial statement materiality may be considered inconsequential, before considering qualitative factors. However, a potential misstatement that is less than 20 percent of overall financial statement materiality may be considered more than inconsequential as a result of qualitative factors.<sup>6</sup>

## Evaluating Control Deficiencies Identified as Part of the Audit

**.09** The auditor must evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses. The significance of a control deficiency depends on the potential for a misstatement, not on whether a misstatement actually has occurred. Accordingly, the absence of identified misstatement does not provide evidence that identified control deficiencies are not significant deficiencies or material weaknesses.

**.10** When evaluating whether control deficiencies, individually or in combination, are significant deficiencies or material weaknesses, the auditor should consider the likelihood and magnitude of misstatement.

**.11** The following are examples of factors that may affect the likelihood that a control, or combination of controls, could fail to prevent or detect a misstatement:

- The nature of the financial statement accounts, disclosures, and assertions involved. For example, suspense accounts and related party transactions involve greater risk.
- The susceptibility of the related assets or liabilities to loss or fraud.

---

<sup>6</sup> Interpretation No. 4, "Considering the Qualitative Characteristics of Misstatements" (section 9312.15-17), of section 312, *Audit Risk and Materiality in Conducting an Audit*, identifies qualitative factors an auditor may consider in determining whether a misstatement is material.

- The subjectivity and complexity of the amount involved, and the extent of judgment needed to determine that amount.
- The cause and frequency of any known or detected exceptions related to the operating effectiveness of a control.
- The interaction or relationship of the control with other controls.
- The interaction of the control deficiency with other control deficiencies.
- The possible future consequences of the deficiency.

.12 Several factors affect the magnitude of a misstatement that could result from a deficiency or deficiencies in controls. The factors include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency.
- The volume of activity in the account balance or class of transactions exposed to the deficiency in the current period or expected in future periods.

The maximum amount by which an account balance or total of transactions can be overstated generally is the recorded amount. However, because of the potential for unrecorded amounts, the recorded amount is not a limitation on the amount of potential understatement.

.13 Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood of misstatement and may, in combination, constitute a significant deficiency or material weakness, even though such deficiencies are individually insignificant. Therefore, the auditor should evaluate individual control deficiencies that affect the same account balance, disclosure, relevant assertion, or component of internal control, to determine whether they collectively result in a significant deficiency or material weakness.

.14 In determining whether a control deficiency or combination of control deficiencies is a significant deficiency or material weakness, the auditor also should evaluate the possible mitigating effects of effective compensating controls that have been tested and evaluated as part of the financial statement audit. A compensating control is a control that limits the severity of a control deficiency and prevents it from rising to the level of a significant deficiency or, in some cases, a material weakness. Compensating controls operate at a level of precision, considering the possibility of further undetected misstatements, that would result in the prevention or detection of a misstatement that is more than inconsequential or material to the financial statements. Although compensating controls mitigate the effects of a control deficiency, they do not eliminate the control deficiency.

.15 The auditor's evaluation of the possible mitigating effects of compensating controls can be illustrated by the following example, in which an owner-managed entity does not segregate duties within the accounts payable function. As a compensating control, the owner reviews the supporting documentation for all disbursements exceeding \$1,000. The auditor could evaluate the effect of this compensating control and determine whether it operates effectively for the purpose of mitigating the effects of the control deficiency in the accounts payable function (the lack of segregation of duties).

.16 In an audit in which the auditor has decided to test the operating effectiveness of controls, the auditor may encounter deviations in the operation of those controls. A control that has an observed nonnegligible deviation rate is a deficiency regardless of the reason for the deviation. For example, if the auditor

designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because, based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

**.17** The auditor should conclude whether prudent officials, having knowledge of the same facts and circumstances, would agree with the auditor's classification of the deficiency.

**.18** Deficiencies in the following areas ordinarily are at least significant deficiencies in internal control:

- Controls over the selection and application of accounting principles that are in conformity with generally accepted accounting principles. Having sufficient expertise in selecting and applying accounting principles is an aspect of such controls.
- Antifraud programs and controls.
- Controls over nonroutine and nonsystematic transactions.
- Controls over the period-end financial reporting process, including controls over procedures used to enter transaction totals into the general ledger; initiate, authorize, record, and process journal entries into the general ledger; and record recurring and nonrecurring adjustments to the financial statements.

**.19** Each of the following is an indicator of a control deficiency that should be regarded as at least a significant deficiency and a strong indicator of a material weakness in internal control:

- Ineffective oversight of the entity's financial reporting and internal control by those charged with governance.
- Restatement of previously issued financial statements to reflect the correction of a material misstatement. (The correction of a misstatement includes misstatements due to error or fraud; it does not include restatements to reflect a change in accounting principle to comply with a new accounting principle or a voluntary change from one generally accepted accounting principle to another generally accepted accounting principle.)
- Identification by the auditor of a material misstatement in the financial statements for the period under audit that was not initially identified by the entity's internal control. This includes misstatements involving estimation and judgment for which the auditor identifies likely material adjustments and corrections of the recorded amounts. (This is a strong indicator of a material weakness even if management subsequently corrects the misstatement.)
- An ineffective internal audit function or risk assessment function at an entity for which such functions are important to the monitoring or risk assessment component of internal control, such as for very large or highly complex entities.
- For complex entities in highly regulated industries, an ineffective regulatory compliance function. This relates solely to those aspects of the ineffective regulatory compliance function for which associated violations of laws and regulations could have a material effect on the reliability of financial reporting.

- Identification of fraud of any magnitude on the part of senior management. (The auditor has a responsibility to plan and perform procedures to obtain reasonable assurance about whether the financial statements are free of material misstatement caused by error or fraud.<sup>7</sup> However, for the purposes of evaluating and communicating deficiencies in internal control, the auditor should evaluate fraud of any magnitude—including fraud resulting in immaterial misstatements—on the part of senior management, of which he or she is aware.)
- Failure by management or those charged with governance to assess the effect of a significant deficiency previously communicated to them and either correct it or conclude that it will not be corrected. See paragraph .20 for communication requirements in these circumstances.
- An ineffective control environment. Control deficiencies in various other components of internal control could lead the auditor to conclude that a significant deficiency or material weakness exists in the control environment.

See the Appendix [paragraph .32] of this section for examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

## Communication—Form, Content, and Timing

**.20** Control deficiencies identified during the audit that upon evaluation are considered significant deficiencies or material weaknesses under this section must be communicated in writing to management and those charged with governance as a part of each audit, including significant deficiencies and material weaknesses that were communicated to management and those charged with governance in previous audits, and have not yet been remediated. (Significant deficiencies and material weaknesses that previously were communicated and have not yet been remediated may be communicated in writing by referring to the previously issued written communication and the date of that communication.)

**.21** The written communication referred to in paragraph .20 is best made by the report release date, which is the date the auditor grants the entity permission to use the auditor's report in connection with the financial statements, but should be made no later than 60 days following the report release date. See section 339.23 for additional guidance related to the report release date.

**.22** For some matters, early communication to management or those charged with governance may be important. Accordingly, the auditor may decide to communicate certain identified significant deficiencies and material weaknesses during the audit. If the communication is made during the audit, the form of interim communication would be affected by the relative significance of the identified control deficiencies and the urgency for corrective follow-up action. Such early communication is not required to be in writing. However, regardless of how the early communication is delivered, the auditor must communicate all significant deficiencies and material weaknesses in

---

<sup>7</sup> Section 316, *Consideration of Fraud in a Financial Statement Audit*, provides guidance on the auditor's responsibilities for planning and performing the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether caused by error or fraud.

writing to management and those charged with governance in accordance with paragraphs .20 and .21.

**.23** The existence of significant deficiencies or material weaknesses may already be known to management and may represent a conscious decision by management or those charged with governance to accept that degree of risk because of cost or other considerations. Management is responsible for making decisions concerning costs to be incurred and related benefits. The auditor's responsibility to communicate significant deficiencies and material weaknesses in accordance with paragraph .20 exists regardless of management's decisions.

**.24** Nothing precludes the auditor from communicating to management and those charged with governance other matters that the auditor:

- Believes to be of potential benefit to the entity, such as recommendations for operational or administrative efficiency, or for improving internal control.
- Has been requested to communicate, for example, control deficiencies that are not significant deficiencies or material weaknesses.

Such matters may be communicated either orally or in writing. If the information is communicated orally, the auditor should document the communication.

**.25** The written communication regarding significant deficiencies and material weaknesses identified during an audit of financial statements should:

- State that the purpose of the audit was to express an opinion on the financial statements, but not to express an opinion on the effectiveness of the entity's internal control over financial reporting.
- State that the auditor is not expressing an opinion on the effectiveness of internal control.
- Include the definition of the terms *significant deficiency* and, where relevant, *material weakness*.
- Identify the matters that are considered to be significant deficiencies and, if applicable, those that are considered to be material weaknesses.
- State that the communication is intended solely for the information and use of management, those charged with governance, and others within the organization and is not intended to be and should not be used by anyone other than these specified parties. If an entity is required to furnish such auditor communications to a governmental authority, specific reference to such governmental authorities may be made.

**.26** The following is an illustrative written communication encompassing the requirements in paragraph .25.

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies [*and other deficiencies that we consider to be material weaknesses*].

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the following deficiencies to be significant deficiencies in internal control:

*[Describe the significant deficiencies that were identified.]*

*[A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control. We believe that the following deficiencies constitute material weaknesses.]*

*[Describe the material weaknesses that were identified.]*

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any specified governmental authorities*] and is not intended to be and should not be used by anyone other than these specified parties.

**.27** If the auditor wishes, he or she may include additional statements in the communication regarding the general inherent limitations of internal control, including the possibility of management override of controls, or the specific nature and extent of the auditor's consideration of internal control during the audit.

**.28** A client may ask the auditor to issue a communication indicating that no material weaknesses were identified during the audit of the financial statements for the client to submit to governmental authorities. The following is an illustrative communication that may be used when the auditor has not identified any material weaknesses and wishes, or has been requested, to advise management and those charged with governance that no material weaknesses were identified.<sup>8</sup>

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

---

<sup>8</sup> If an examination of internal control under AT section 501 was performed for the same period or "as of" date as the audit of the financial statements, the issuance of a report indicating that no material weaknesses had been identified during the audit of the financial statements would not be appropriate.

Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any specified governmental authorities*] and is not intended to be and should not be used by anyone other than these specified parties.

If one or more significant deficiencies have been identified, the auditor may add the following sentence to the fourth paragraph of the communication:

However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*].

**.29** The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

**.30** Management may wish to, or may be required by a regulator to, prepare a written response to the auditor's communication regarding significant deficiencies or material weaknesses identified in the audit. Such management communications may include a description of corrective actions taken by the entity, the entity's plans to implement new controls, or a statement indicating that management believes the cost of correcting a significant deficiency or material weakness would exceed the benefits to be derived from doing so. If such a written response is included in a document containing the auditor's written communication to management and those charged with governance concerning identified significant deficiencies or material weaknesses, the auditor should add a paragraph to his or her written communication disclaiming an opinion on such information. Following is an example of such a paragraph.

ABC Company's written response to the significant deficiencies [*and material weaknesses*] identified in our audit has not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

**Effective Date**

.31 This section is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier implementation is permitted.

.32

## Appendix

### Examples of Circumstances That May Be Control Deficiencies, Significant Deficiencies, or Material Weaknesses

Paragraph .18 of this section identifies areas in which control deficiencies ordinarily are at least significant deficiencies, and paragraph .19 identifies indicators that a control deficiency should be regarded as at least a significant deficiency and a strong indicator of a material weakness. The following are examples of circumstances that may be control deficiencies, significant deficiencies, or material weaknesses.

#### *Deficiencies in the Design of Controls*

- Inadequate design of internal control over the preparation of the financial statements being audited.
- Inadequate design of internal control over a significant account or process.
- Inadequate documentation of the components of internal control.
- Insufficient control consciousness within the organization, for example, the tone at the top and the control environment.
- Absent or inadequate segregation of duties within a significant account or process.
- Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
- Inadequate design of information technology (IT) general and application controls that prevent the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
- Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles, the person responsible for the accounting and reporting function lacks the skills and knowledge to apply generally accepted accounting principles in recording the entity's financial transactions or preparing its financial statements.
- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time.
- The absence of an internal process to report deficiencies in internal control to management on a timely basis.

#### *Failures in the Operation of Internal Control*

- Failure in the operation of effectively designed controls over a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.

- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy, for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements.
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. This circumstance may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of material weakness and significant deficiency relate to likelihood of misstatement of the financial statements, the failure of a preventive control such as inventory tags will not result in a significant deficiency or material weakness if the detective control (physical inventory) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent or detect a material misstatement of the financial statements.
- Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions, for example, consistent understatement of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by client personnel to the auditor (an indicator of fraud).
- Management override of controls.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.

# AU Section 326

## Audit Evidence

(Supersedes SAS No. 31)

Source: SAS No. 106.

See section 9326 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

### Introduction

.01 This section provides guidance about concepts underlying the third standard of field work: "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit." This section:

- Defines *audit evidence*;
- Defines *relevant assertions* and discusses their use in assessing risks and designing appropriate further audit procedures;<sup>1</sup>
- Discusses qualitative aspects that the auditor considers in determining the sufficiency and appropriateness of audit evidence; and
- Describes various audit procedures and discusses the purposes for which they may be performed.

### Concept of Audit Evidence

.02 *Audit evidence* is all the information used by the auditor in arriving at the conclusions on which the audit opinion is based and includes the information contained in the accounting records underlying the financial statements and other information. Auditors are not expected to examine all information that may exist.<sup>2</sup> Audit evidence, which is cumulative in nature, includes audit evidence obtained from audit procedures performed during the course of the audit and may include audit evidence obtained from other sources, such as previous audits and a firm's quality control procedures for client acceptance and continuance.

.03 Accounting records generally include the records of initial entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers, journal entries, and other adjustments to the financial statements that are not reflected in formal journal entries; and records such as worksheets and spreadsheets supporting cost allocations, computations, reconciliations, and disclosures. The entries in the accounting records are often initiated, authorized, recorded, processed, and

---

<sup>1</sup> Further audit procedures include tests of the operating effectiveness of controls and substantive procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement. See paragraph .07 of section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

<sup>2</sup> See paragraph .13.

reported in electronic form. In addition, the accounting records may be part of integrated systems that share data and support all aspects of the entity's financial reporting, operations, and compliance objectives.

**.04** Management is responsible for the preparation of the financial statements based on the accounting records of the entity. The auditor should obtain audit evidence by testing the accounting records, for example, through analysis and review, reperforming procedures followed in the financial reporting process, and reconciling related types and applications of the same information. Through the performance of such audit procedures, the auditor may determine that the accounting records are internally consistent and agree to the financial statements. However, because accounting records alone do not provide sufficient appropriate audit evidence on which to base an audit opinion on the financial statements, the auditor should obtain other audit evidence.

**.05** Other information that the auditor may use as audit evidence includes minutes of meetings; confirmations from third parties; industry analysts' reports; comparable data about competitors (benchmarking); controls manuals; information obtained by the auditor from such audit procedures as inquiry, observation, and inspection; and other information developed by or available to the auditor that permits the auditor to reach conclusions through valid reasoning.

## Sufficient Appropriate Audit Evidence

**.06** *Sufficiency* is the measure of the quantity of audit evidence. *Appropriateness* is the measure of the quality of audit evidence, that is, its relevance and its reliability in providing support for, or detecting misstatements in, the classes of transactions, account balances, and disclosures and related assertions. The auditor should consider the sufficiency and appropriateness of audit evidence to be obtained when assessing risks and designing further audit procedures. The quantity of audit evidence needed is affected by the risk of misstatement (the greater the risk, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less the audit evidence that may be required). Accordingly, the sufficiency and appropriateness of audit evidence are interrelated. However, merely obtaining more audit evidence may not compensate if it is of a lower quality.

**.07** A given set of audit procedures may provide audit evidence that is relevant to certain assertions but not to others. For example, inspection of records and documents related to the collection of receivables after the period end may provide audit evidence regarding both existence and valuation, although not necessarily the appropriateness of period-end cutoffs. On the other hand, the auditor often obtains audit evidence from different sources or of a different nature that is relevant to the same assertion. For example, the auditor may analyze the aging of accounts receivable and the subsequent collection of receivables to obtain audit evidence relating to the valuation of the allowance for doubtful accounts. Furthermore, obtaining audit evidence relating to a particular assertion, for example, the physical existence of inventory, is not a substitute for obtaining audit evidence regarding another assertion, for example, rights and obligations.

**.08** The reliability of audit evidence is influenced by its source and by its nature and is dependent on the individual circumstances under which it is obtained. Generalizations about the reliability of various kinds of audit evidence can be made; however, such generalizations are subject to important exceptions. Even when audit evidence is obtained from sources external to the entity, circumstances may exist that could affect the reliability of the information

obtained. For example, audit evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. While recognizing that exceptions may exist, the following generalizations about the reliability of audit evidence are useful:

- Audit evidence is more reliable when it is obtained from knowledgeable independent sources outside the entity.
- Audit evidence that is generated internally is more reliable when the related controls imposed by the entity are effective.
- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence is more reliable when it exists in documentary form, whether paper, electronic, or other medium (for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of the matters discussed).
- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles.

**.09** The auditor should consider the reliability of the information to be used as audit evidence, for example, photocopies; facsimiles; or filmed, digitized, or other electronic documents, including consideration of controls over their preparation and maintenance where relevant. However, an audit rarely involves the authentication of documentation, nor is the auditor trained as or expected to be an expert in such authentication.

**.10** When information produced by the entity is used by the auditor to perform further audit procedures, the auditor should obtain audit evidence about the accuracy and completeness of the information.<sup>3</sup> In order for the auditor to obtain reliable audit evidence, the information upon which the audit procedures are based needs to be sufficiently complete and accurate. For example, in auditing revenue by applying standard prices to records of sales volume, the auditor should consider the accuracy of the price information and the completeness and accuracy of the sales volume data. Obtaining audit evidence about the completeness and accuracy of the information produced by the entity's information system may be performed concurrently with the actual audit procedure applied to the information when obtaining such audit evidence is an integral part of the audit procedure itself. In other situations, the auditor may have obtained audit evidence of the accuracy and completeness of such information by testing controls over the production and maintenance of the information. However, in some situations the auditor may determine that additional audit procedures are needed. For example, these additional procedures may include using computer-assisted audit techniques (CAATs) to recalculate the information.

**.11** The auditor ordinarily obtains more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. In addition, obtaining audit evidence from different sources or of a different nature may indicate that an individual item of audit evidence is not reliable. For example, corroborating information obtained from a source independent of the entity may increase the assurance the auditor obtains from a management representation. Conversely, when audit evidence obtained from one source is inconsistent with that obtained

---

<sup>3</sup> See paragraphs .14 and .57 of section 318.

from another, the auditor should determine what additional audit procedures are necessary to resolve the inconsistency.

**.12** The auditor may consider the relationship between the cost of obtaining audit evidence and the usefulness of the information obtained. However, the matter of difficulty or expense involved is not in itself a valid basis for omitting an audit procedure for which there is no appropriate alternative.

**.13** In forming the audit opinion, the auditor does not examine all the information available (evidence) because conclusions ordinarily can be reached by using sampling approaches and other means of selecting items for testing. Also, the auditor may find it necessary to rely on audit evidence that is persuasive rather than conclusive; however, to obtain reasonable assurance,<sup>4</sup> the auditor must not be satisfied with audit evidence that is less than persuasive. The auditor should use professional judgment and should exercise professional skepticism in evaluating the quantity and quality of audit evidence, and thus its sufficiency and appropriateness, to support the audit opinion.

## The Use of Assertions in Obtaining Audit Evidence

**.14** Management is responsible for the fair presentation of financial statements that reflect the nature and operations of the entity.<sup>5</sup> In representing that the financial statements are fairly presented in conformity with generally accepted accounting principles,<sup>6</sup> management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of information in the financial statements and related disclosures.

**.15** Assertions used by the auditor (see paragraph .16) fall into the following categories:

- a. Assertions about classes of transactions and events for the period under audit:
  - i. *Occurrence.* Transactions and events that have been recorded have occurred and pertain to the entity.
  - ii. *Completeness.* All transactions and events that should have been recorded have been recorded.
  - iii. *Accuracy.* Amounts and other data relating to recorded transactions and events have been recorded appropriately.
  - iv. *Cutoff.* Transactions and events have been recorded in the correct accounting period.
  - v. *Classification.* Transactions and events have been recorded in the proper accounts.
- b. Assertions about account balances at the period end:
  - i. *Existence.* Assets, liabilities, and equity interests exist.
  - ii. *Rights and obligations.* The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.
  - iii. *Completeness.* All assets, liabilities, and equity interests that should have been recorded have been recorded.

---

<sup>4</sup> Section 230, paragraphs .10 through .13, provides guidance on reasonable assurance as it relates to an audit of financial statements.

<sup>5</sup> See section 110, paragraph .03.

<sup>6</sup> Reference to generally accepted accounting principles in this section includes, where applicable, a comprehensive basis of accounting other than generally accepted accounting principles as defined in section 623, *Special Reports*.

- iv. Valuation and allocation.* Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.
- c. Assertions about presentation and disclosure:*
  - i. Occurrence and rights and obligations.* Disclosed events and transactions have occurred and pertain to the entity.
  - ii. Completeness.* All disclosures that should have been included in the financial statements have been included.
  - iii. Classification and understandability.* Financial information is appropriately presented and described and disclosures are clearly expressed.
  - iv. Accuracy and valuation.* Financial and other information are disclosed fairly and at appropriate amounts.

**.16** The auditor may use the relevant assertions as they are described above or may express them differently provided aspects described above have been covered. For example, the auditor may choose to combine the assertions about transactions and events with the assertions about account balances. As another example, there may not be a separate assertion related to cutoff of transactions and events when the occurrence and completeness assertions include appropriate consideration of recording transactions in the correct accounting period.

**.17** The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

**.18** Relevant assertions are assertions that have a meaningful bearing on whether the account is fairly stated. For example, valuation may not be relevant to the cash account unless currency translation is involved; however, existence and completeness are always relevant. Similarly, valuation may not be relevant to the gross amount of the accounts receivable balance but is relevant to the related allowance accounts. Additionally, the auditor might, in some circumstances, focus on the presentation and disclosure assertion separately in connection with the period-end financial reporting process.

**.19** For each significant class of transactions, account balance, and presentation and disclosure, the auditor should determine the relevance of each of the financial statement assertions. To identify relevant assertions, the auditor should determine the source of likely potential misstatements in each significant class of transactions, account balance, and presentation and disclosure. In determining whether a particular assertion is relevant to a significant account balance or disclosure, the auditor should evaluate:

- a.* The nature of the assertion;
- b.* The volume of transactions or data related to the assertion; and
- c.* The nature and complexity of the systems, including the use of information technology, by which the entity processes and controls information supporting the assertion.

## Audit Procedures for Obtaining Audit Evidence

.20 The auditor should obtain audit evidence to draw reasonable conclusions on which to base the audit opinion by performing audit procedures to:

- a. Obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as *risk assessment procedures*);
- b. When necessary, or when the auditor has determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *tests of controls*); and
- c. Detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *substantive procedures* and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.21 The auditor must perform risk assessment procedures<sup>7</sup> to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.22 Tests of controls are necessary in two circumstances. When the auditor's risk assessment includes an expectation of the operating effectiveness of controls, the auditor should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness.<sup>8</sup>

.23 As described in section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, the auditor should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor's risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement.<sup>9</sup> Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence.

.24 The auditor should use one or more types of the audit procedures described in paragraphs .27 through .41 of this section. These audit procedures, or combinations thereof, may be used as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor. Paragraph .05 of section 314, *Understanding the*

---

<sup>7</sup> See paragraph .05 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, for an explanation of risk assessment procedures.

<sup>8</sup> See paragraphs .117 through .120 of section 314 and paragraph .24 of section 318.

<sup>9</sup> See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for definition of risk of material misstatement.

*Entity and Its Environment and Assessing the Risks of Material Misstatement*, provides guidance to the auditor to perform a combination of audit procedures when performing risk assessment procedures. In addition, a combination of two or more of these audit procedures may be necessary to obtain sufficient appropriate audit evidence when performing tests of controls or substantive procedures at the relevant assertion level. In certain circumstances, audit evidence obtained from previous audits may provide audit evidence where the auditor should perform audit procedures to establish its continuing relevance.<sup>10</sup>

.25 The nature and timing of the audit procedures to be used may be affected by the fact that some of the accounting data and other information may be available only in electronic form or only at certain points or periods in time.<sup>11</sup> Source documents, such as purchase orders, bills of lading, invoices, and checks, may be replaced with electronic messages. For example, entities may use electronic commerce or image processing systems. In electronic commerce, the entity and its customers or suppliers use connected computers over a public network, such as the Internet, to transact business electronically. Purchasing, shipping, billing, cash receipt, and cash disbursement transactions are often consummated entirely by the exchange of electronic messages between the parties. In image processing systems, documents are scanned and converted into electronic images to facilitate storage and reference, and the source documents may not be retained after conversion. Certain electronic information may exist at a certain point in time. However, such information may not be retrievable after a specified period of time if files are changed and if backup files do not exist. An entity's data retention policies may require the auditor to request retention of some information for the auditor's review or to perform audit procedures at a time when the information is available.

.26 When the information is in electronic form, the auditor may carry out through CAATs certain of the audit procedures described in the following sections.

## Inspection of Records or Documents

.27 Inspection consists of examining records or documents, whether internal or external, in paper form, electronic form, or other media. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, on the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records or documents for evidence of authorization.

.28 Some documents represent direct audit evidence of the existence of an asset, for example, a document constituting a financial instrument such as a stock or bond. Inspection of such documents may not necessarily provide audit evidence about ownership or value. In addition, inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting principles, such as revenue recognition.

## Inspection of Tangible Assets

.29 Inspection of tangible assets consists of physical examination of the assets. Inspection of tangible assets may provide appropriate audit evidence with respect to their existence, but not necessarily about the entity's rights and

---

<sup>10</sup> See paragraph .64 of section 318.

<sup>11</sup> See paragraphs .57 through .63 of section 314.

obligations or the valuation of the assets. Inspection of individual inventory items ordinarily accompanies the observation of inventory counting. For example, when observing an inventory count, the auditor may inspect individual inventory items (such as opening containers included in the inventory count to ensure that they are not empty) to verify their existence.

## Observation

**.30** Observation consists of looking at a process or procedure being performed by others. Examples include observation of the counting of inventories by the entity's personnel and observation of the performance of control activities. Observation provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed. See section 331, *Inventories*, for further guidance on observation of the counting of inventory.

## Inquiry

**.31** Inquiry consists of seeking information of knowledgeable persons, both financial and nonfinancial, inside or outside the entity. Inquiry is an audit procedure that is used extensively throughout the audit and often is complementary to performing other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.

**.32** Inquiry normally involves:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned.
- Asking clear, concise, and relevant questions.
- Using open or closed questions appropriately.
- Listening actively and effectively.
- Considering the reactions and responses and asking follow-up questions.
- Evaluating the response.

**.33** In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See section 333, *Management Representations*, for further guidance on written representations.

**.34** Responses to inquiries may provide the auditor with information not previously possessed or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information that the auditor has obtained, for example, information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures. The auditor should resolve any significant inconsistencies in the information obtained.

**.35** The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement at the relevant assertion level. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

**.36** Although corroboration of evidence obtained through inquiry is often of particular importance, in the case of inquiries about management's intent, the information available to support management's intent may be limited. In these cases, understanding management's past history of carrying out its stated intentions with respect to assets or liabilities, management's stated reasons for choosing a particular course of action, and management's ability to pursue a specific course of action may provide relevant information about management's intent.

## Confirmation

**.37** Confirmation, which is a specific type of inquiry, is the process of obtaining a representation of information or of an existing condition directly from a third party. For example, the auditor may seek direct confirmation of receivables by communication with debtors. Confirmations are frequently used in relation to account balances and their components but need not be restricted to these items. A confirmation request can be designed to ask if any modifications have been made to the agreement, and if so, what the relevant details are. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties. Confirmations also are used to obtain audit evidence about the absence of certain conditions, for example, the absence of an undisclosed agreement that may influence revenue recognition. See section 330, *The Confirmation Process*, for further guidance on confirmations.

## Recalculation

**.38** Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation can be performed through the use of information technology, for example, by obtaining an electronic file from the entity and using CAATs to check the accuracy of the summarization of the file.

## Reperformance

**.39** Reperformance is the auditor's independent execution of procedures or controls that were originally performed as part of the entity's internal control, either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable.

## Analytical Procedures

**.40** Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. See section 329, *Analytical Procedures*, for further guidance on analytical procedures.

**.41** An analytical procedure might be scanning, which is the auditor's use of professional judgment to review accounting data to identify significant or unusual items and then to test those items. This includes the identification of anomalous individual items within account balances or other data through the reading or analysis of entries in transaction listings, subsidiary ledgers, general ledger control accounts, adjusting entries, suspense accounts, reconciliations, and other detailed reports. Scanning includes searching for large or unusual items in the accounting records (for example, nonstandard journal entries), as

well as in transaction data (for example, suspense accounts, adjusting journal entries) for indications of misstatements that have occurred. CAATS may assist an auditor in identifying anomalies. Since the auditor tests the items selected by scanning, the auditor obtains audit evidence about those items. The auditor's scanning also may provide some audit evidence about the items not selected since the auditor has used professional judgment to determine that the items not selected are less likely to be misstated.

## Effective Date

**.42** This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

---

## AU Section 9326

# Audit Evidence: Auditing Interpretations of Section 326

### 1. Audit Evidence for an Audit of Interim Financial Statements

**.01 Question**—APB Opinion No. 28 [AC section I73] concluded that certain accounting principles and practices followed for annual reporting purposes may require modification at interim report dates. Paragraph 10 of Opinion No. 28 [AC section I73.103] states that the modifications are needed "so that the reported results for the interim period may better relate to the results of operations for the annual period." The modifications introduce a need for estimates to a greater extent than is necessary for annual financial information. Does this imply a relaxation of the third standard of field work, which requires that sufficient appropriate audit evidence be obtained to afford a reasonable basis for an opinion regarding the financial statements under audit?

**.02 Interpretation**—No. The third standard of field work applies to all engagements leading to an expression of opinion on financial statements or financial information.

**.03** The objective of the independent auditor's engagement is to obtain sufficient appropriate audit evidence to provide him with a reasonable basis for forming an opinion. The auditor develops specific audit objectives in light of assertions by management that are embodied in financial statement components. Section 326.17 states, "the auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks."

**.04** Audit evidence obtained for an audit of annual financial statements may also be useful in an audit of interim financial statements, and audit evidence obtained for an audit of interim financial statements may also be useful in an audit of annual financial statements. Section 318.16 states that "The auditor may perform tests of controls or substantive procedures at an interim date or at period end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters."<sup>[1]</sup>

---

<sup>[1]</sup> [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.05** The introduction by Opinion No. 28 [AC section I73] of a need for additional estimates in measuring certain items for interim financial information may lead to a need for evidence in examining those items that differs from the evidence required in an audit of annual financial information. For example, computing the provision for federal income taxes in interim information involves estimating the effective tax rate expected to be applicable for the full fiscal year, and the auditor should examine evidence as to the basis for estimating that rate. Since the effective tax rate for the full year ordinarily is known at year-end, similar evidence is not usually required in examining annual information.

[Issue Date: February, 1974; Modified: October, 1980; Revised: March, 2006.]

## **2. The Effect of an Inability to Obtain Audit Evidence Relating to Income Tax Accruals**

**.06 Question**—The Internal Revenue Service's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including, "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "Listed Transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

**.07** Concern over IRS access to tax accrual working papers might cause some clients to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements, or to deny the independent auditor access to such information.

**.08** What effect does this situation have on the auditor's opinion on the financial statements?

**.09 Interpretation**—The client is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unqualified opinion on the financial statements. Thus, if the client does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to client personnel responsible for making the judgments and estimates relating to the accrual, the auditor should assess the importance of that inadequacy in the accounting records and the client imposed limitation on his or her ability to form an opinion on the financial statements. Also, if the client has appropriate documentation but denies the auditor access to it and to client personnel who possess the information, the auditor should assess the importance of the client-imposed scope limitation on his or her ability to form an opinion.

**.10** The third standard of field work requires the auditor to obtain sufficient appropriate audit evidence through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, paragraph .76, requires the auditor to obtain sufficient appropriate audit evidence about material financial

statement assertions or else to qualify or disclaim his or her opinion on the statements. Section 508, *Reports on Audited Financial Statements*, paragraph .24, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, section 333 on *Management Representations* requires the auditor to obtain written representations from management. Section 333.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and section 333.08 states that a materiality limit does not apply to that representation. Section 333.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

**.11 Question**—A client may allow the auditor to inspect its tax accrual workpapers, but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The client also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What should the auditor consider in deciding a response to such a request?

**.12 Interpretation**—Section 339, *Audit Documentation*, states that audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation should include sufficient competent evidential matter to afford a reasonable basis for an opinion. In addition, audit documentation should be sufficient to enable an experienced auditor to understand the nature, timing, extent, and results of auditing procedures performed, and the evidence obtained. Section 326, *Evidential Matter*, paragraph .17, states that corroborating information includes information obtained by the auditor from inquiry, observation, inspection, and physical examination. The quantity, type, and content of audit documentation are matters of the auditor's professional judgment (see section 339).

**.13** The auditor's documentation of the results of auditing procedures directed at the tax accounts and related disclosures also should include sufficient competent evidential matter about the significant elements of the client's tax liability contingency analysis. This documentation should include copies of the client's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness of the client's accounting and disclosure of significant tax-related contingency matters. The audit documentation should reflect the procedures performed and conclusions reached by the auditor and, for significant matters, include the client's documentary support for its financial statement amounts and disclosures.

**.14** The audit documentation should include the significant elements of the client's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the documentation should provide the client's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intra-period allocation of income tax expense or benefit to continuing operations and to items other than continuing operations. Where applicable, the documentation also should include the client's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" in APB Opinion No. 23, *Accounting for Income Taxes—Special Areas*, including its specific plans for reinvestment of undistributed foreign earnings.

**.15 Question**—In some situations, a client may furnish its outside legal counsel or in-house legal or tax counsel with information concerning the tax

contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

**.16** In such circumstances, rather than inspecting and obtaining documentary evidence of the client's tax liability contingency analysis and making inquiries of the client, may the auditor consider the counsel as a specialist within the meaning of section 336, *Using the Work of a Specialist*, and rely solely on counsel's opinion as an appropriate procedure for obtaining evidential matter to support his or her opinion on the financial statements?

**.17 Interpretation**—No. The opinion of legal counsel in this situation would not provide sufficient competent evidential matter to afford a reasonable basis for an opinion on the financial statements.

**.18** Section 336.01 defines a specialist as "a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing." It is intended to apply to situations requiring special knowledge of matters about which the auditor does not have adequate technical training and proficiency. The auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

**.19** The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, can be useful to the auditor in forming his or her own opinion. However, the audit of income tax accounts requires a combination of tax expertise and knowledge about the client's business that is accumulated during all aspects of an audit. Therefore, as stated above, it is not appropriate for the auditor to rely solely on such legal opinion.

**.20 Question**—A client may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third party tax advisers? What evidential matter should the auditor obtain and include in the audit documentation?

**.21 Interpretation**—As discussed in paragraphs .17 through .19 above, the auditor cannot accept a client's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the client's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the auditor either disagrees with the position taken by the client, or its advisers, or does not have sufficient competent evidential matter to support his or her opinion.

**.22** If the client's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor should obtain access to the opinion, notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation should include either the actual advice or opinions rendered by an outside adviser, or other sufficient documentation or abstracts supporting both the transactions or facts addressed as well as the analysis and conclusions reached by the client and adviser. Alternatives such as redacted or modified opinions may be considered, but must nonetheless include sufficient content to articulate and document the client's

position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept a client's analysis summarizing an outside adviser's opinion, but the client's analysis must provide sufficient competent evidential matter for the auditor to formulate his or her conclusion. In addition, client representations may be obtained stating that the client has not received any advice or opinions that are contradictory to the client's support for the tax accrual.

**.23** If the auditor is unable to accumulate sufficient competent evidence about whether there is a supported and reasonable basis for the client's position, the auditor should consider the effect of this scope limitation on his or her report.

[Issue Date: March, 1981; Amended: April 9, 2003;  
Revised: December, 2005; Revised: March, 2006.]

### 3. The Auditor's Consideration of the Completeness Assertion

**.24 Question**—Section 326, *Audit Evidence*, paragraphs .14–.19, discusses the use of assertions that are embodied in financial statement components. In obtaining audit evidence about certain assertions such as, existence or occurrence, rights and obligations, valuation or allocation, and presentation and disclosure, the auditor may consider classes of transactions, account balances and disclosures that are included in the financial statements. In contrast, in obtaining audit evidence about the completeness assertion related to classes of transactions, account balances and disclosures, the auditor may consider whether transactions, accounts and disclosures have been improperly excluded from the financial statements. May management's written representations and the auditor's assessment of control risk constitute sufficient audit evidence about the completeness assertion? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.25 Interpretation**—Written representations from management are a part of the audit evidence the auditor may obtain in an audit performed in accordance with generally accepted auditing standards. Management's representations about the completeness assertion, whether considered alone or in combination with the auditor's assessment of control risk, do not constitute sufficient appropriate audit evidence to support that assertion. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.26** In planning audit procedures to obtain evidence about the completeness assertion, the auditor should consider the inherent risk that transactions and accounts have been improperly omitted from the financial statements. When the auditor assesses the inherent risk of omission for a particular account balance or class of transactions to be such that he believes omissions could exist that might be material when aggregated with errors in other balances or classes, he should restrict the audit risk of omission by performing substantive tests designed to obtain evidence about the completeness assertion. Substantive tests designed primarily to obtain evidence about the completeness assertion include analytical procedures and tests of details of *related populations*.<sup>2</sup> [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.27** The extent of substantive tests of completeness may properly vary in relation to the assessed level of control risk. Because of the unique nature of

---

<sup>2</sup> For purposes of this interpretation, a related population is a population other than the recorded account balance or class of transactions being audited that would be expected to contain evidence of whether all accounts or transactions that should be presented in that balance or class are so included.

the completeness assertion, an assessed level of control risk below the maximum may be an effective means for the auditor to obtain evidence about that assertion. Although an assessed level of control risk below the maximum is not required to satisfy the auditor's objectives with respect to the completeness assertion, the auditor should consider that for some transactions (e.g., revenues that are received primarily in cash, such as those of a casino or of some charitable organizations) it may be difficult to limit audit risk for those assertions to an acceptable level without an assessed level of control risk below the maximum. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

[Issue Date: April, 1986; Revised: March, 2006.]

#### **[4.] Applying Auditing Procedures to Segment Disclosures in Financial Statements**

[.28-.41]<sup>[3]</sup> [Deleted March, 2006.]

<sup>[3]</sup> [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

## AU Section 326A

### ***Evidential Matter***

(Supersedes section 330, "Evidential Matter")

Source: SAS No. 31; SAS No. 48; SAS No. 80.

See section 9326A for interpretations of this section.

Issue date, unless otherwise indicated: August, 1980

**.01** The third standard of field work is:

Sufficient competent evidential matter is to be obtained through inspection, observation, inquiries, and confirmations to afford a reasonable basis for an opinion regarding the financial statements under audit.

**.02** Most of the independent auditor's work in forming his or her opinion on financial statements consists of obtaining and evaluating evidential matter<sup>1</sup> concerning the assertions in such financial statements. The measure of the validity of such evidence for audit purposes lies in the judgment of the auditor; in this respect audit evidence differs from legal evidence, which is circumscribed by rigid rules. Evidential matter varies substantially in its influence on the auditor as he or she develops an opinion with respect to financial statements under audit. The pertinence of the evidence, its objectivity, its timeliness, and the existence of other evidential matter corroborating the conclusions to which it leads all bear on its competence.

### **Nature of Assertions**

**.03** Assertions are representations by management that are embodied in financial statement components. They can be either explicit or implicit and can be classified according to the following broad categories:

- Existence or occurrence
- Completeness
- Rights and obligations
- Valuation or allocation
- Presentation and disclosure

**.04** Assertions about existence or occurrence address whether assets or liabilities of the entity exist at a given date and whether recorded transactions have occurred during a given period. For example, management asserts that finished goods inventories in the balance sheet are available for sale. Similarly, management asserts that sales in the income statement represent the exchange of goods or services with customers for cash or other consideration.

---

<sup>1</sup> See section 319, *Consideration of Internal Control in a Financial Statement Audit*, paragraphs .90 through .104, for further guidance on evidential matter. [Footnote added, May 1994, to cross-reference guidance on evidential matter to section 319. Footnote revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.05** Assertions about completeness address whether all transactions and accounts that should be presented in the financial statements are so included. For example, management asserts that all purchases of goods and services are recorded and are included in the financial statements. Similarly, management asserts that notes payable in the balance sheet include all such obligations of the entity.

**.06** Assertions about rights and obligations address whether assets are the rights of the entity and liabilities are the obligations of the entity at a given date. For example, management asserts that amounts capitalized for leases in the balance sheet represent the cost of the entity's rights to leased property and that the corresponding lease liability represents an obligation of the entity.

**.07** Assertions about valuation or allocation address whether asset, liability, equity, revenue, and expense components have been included in the financial statements at appropriate amounts. For example, management asserts that property is recorded at historical cost and that such cost is systematically allocated to appropriate accounting periods. Similarly, management asserts that trade accounts receivable included in the balance sheet are stated at net realizable value. [As amended, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

**.08** Assertions about presentation and disclosure address whether particular components of the financial statements are properly classified, described, and disclosed. For example, management asserts that obligations classified as long-term liabilities in the balance sheet will not mature within one year. Similarly, management asserts that amounts presented as extraordinary items in the income statement are properly classified and described.

## Use of Assertions in Developing Audit Objectives and Designing Substantive Tests

**.09** In obtaining evidential matter in support of financial statement assertions, the auditor develops specific audit objectives in the light of those assertions. In developing the audit objectives of a particular engagement, the auditor should consider the specific circumstances of the entity, including the nature of its economic activity and the accounting practices unique to its industry. For example, one audit objective related to the assertion about completeness that an auditor might develop for inventory balances is that inventory quantities include all products, materials, and supplies on hand.

**.10** There is not necessarily a one-to-one relationship between audit objectives and procedures. Some auditing procedures may relate to more than one objective. On the other hand, a combination of auditing procedures may be needed to achieve a single objective. Paragraph .26 provides illustrative audit objectives for inventories of a manufacturing company for each of the broad categories of assertions listed in paragraph .03 and examples of substantive tests that may achieve those audit objectives.

**.11** In selecting particular substantive tests to achieve the audit objectives he or she has developed, an auditor considers, among other things, the risk of material misstatement of the financial statements, including the assessed levels of control risk, and the expected effectiveness and efficiency of such tests. These considerations include the nature and materiality of the items being tested, the kinds and competence of available evidential matter, and the nature of the audit objective to be achieved. For example, in designing substantive tests to achieve an objective related to the assertion of existence or occurrence,

the auditor selects from items contained in a financial statement amount and searches for relevant evidential matter. On the other hand, in designing procedures to achieve an objective related to the assertion of completeness, the auditor selects from evidential matter indicating that an item should be included in the relevant financial statement amount and investigates whether that item is so included.

.12 The auditor's specific audit objectives do not change whether information is processed manually or electronically. However, the methods of applying audit procedures to gather evidence may be influenced by the method of processing. The auditor may use either manual auditing procedures, information technology-assisted audit techniques, or a combination of both to obtain sufficient competent evidential matter. Because of the growth in the use of computers and other information technology, many entities process significant information electronically. Accordingly, it may be difficult or impossible for the auditor to access certain information for inspection, inquiry, or confirmation without using information technology. [Paragraph added, effective for periods beginning after August 31, 1984, by Statement on Auditing Standards No. 48. As amended, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

.13 The nature, timing, and extent of the procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor, based on the specific circumstances. However, the procedures adopted should be adequate to achieve the auditor's specific objectives and reduce detection risk to a level acceptable to the auditor. The evidential matter obtained should be sufficient for the auditor to form conclusions concerning the validity of the individual assertions embodied in the components of financial statements. The evidential matter provided by the combination of the auditor's assessment of inherent risk and control risk and on substantive tests should provide a reasonable basis for his or her opinion (see section 319, *Consideration of Internal Control in a Financial Statement Audit*, paragraphs .105 through .108). [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. As amended, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80. Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

.14 In entities where significant information is transmitted, processed, maintained, or accessed electronically, the auditor may determine that it is not practical or possible to reduce detection risk to an acceptable level by performing only substantive tests for one or more financial statement assertions. For example, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is produced, maintained, or accessed only in electronic form. In such circumstances, the auditor should perform tests of controls to gather evidential matter to use in assessing control risk,<sup>2</sup> or consider the effect on his or her report (see paragraph .25 of this section). [Paragraph added, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

---

<sup>2</sup> Section 319.107 states that ordinarily the assessed level of control risk cannot be sufficiently low to eliminate the need to perform any substantive tests for significant account balances and transaction classes and, consequently, the auditor should perform substantive tests for such balances and classes regardless of the assessed level of control risk. [Footnote added, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80. Footnote revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

## Nature of Evidential Matter

**.15** Evidential matter supporting the financial statements consists of the underlying accounting data and all corroborating information available to the auditor. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 80, December 1996.]

**.16** The books of original entry, the general and subsidiary ledgers, related accounting manuals, and records such as work sheets and spreadsheets supporting cost allocations, computations, and reconciliations all constitute evidence in support of the financial statements. These accounting data are often in electronic form. Accounting data alone cannot be considered sufficient support for financial statements; on the other hand, without adequate attention to the propriety and accuracy of the underlying accounting data, an opinion on financial statements would not be warranted. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

**.17** Corroborating evidential matter includes both written and electronic information such as checks; records of electronic fund transfers; invoices; contracts; minutes of meetings; confirmations and other written representations by knowledgeable people; information obtained by the auditor from inquiry, observation, inspection, and physical examination; and other information developed by, or available to, the auditor which permits him or her to reach conclusions through valid reasoning. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

**.18** In certain entities, some of the accounting data and corroborating evidential matter are available only in electronic form. Source documents such as purchase orders, bills of lading, invoices, and checks are replaced with electronic messages. For example, entities may use Electronic Data Interchange (EDI) or image processing systems. In EDI, the entity and its customers or suppliers use communication links to transact business electronically. Purchase, shipping, billing, cash receipt, and cash disbursement transactions are often consummated entirely by the exchange of electronic messages between the parties. In image processing systems, documents are scanned and converted into electronic images to facilitate storage and reference, and the source documents may not be retained after conversion. Certain electronic evidence may exist at a certain point in time. However, such evidence may not be retrievable after a specified period of time if files are changed and if backup files do not exist. Therefore, the auditor should consider the time during which information exists or is available in determining the nature, timing, and extent of his or her substantive tests, and, if applicable, tests of controls. [Paragraph added, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

**.19** The auditor tests underlying accounting data by (a) analysis and review, (b) retracing the procedural steps followed in the accounting process and in developing the allocations involved, (c) recalculation, and (d) reconciling related types and applications of the same information. Through the performance of such procedures, the auditor may determine that the accounting records are internally consistent. Such internal consistency ordinarily provides

evidence about the fairness of presentation of the financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

**.20** The pertinent accounting data and corroborating evidential matter to support entries in the accounts and assertions in the financial statements ordinarily are available from the entity's files and accessible to the auditor for examination at certain points or periods in time. Both within the entity's organization and outside it are knowledgeable people to whom the auditor can direct inquiries. Assets having physical existence are available to the auditor for his or her inspection. Activities of the entity's personnel can be observed. Based on observations of these or other conditions or circumstances, the auditor may reach conclusions about the validity of various assertions in the financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

## Competence of Evidential Matter

**.21** To be competent, evidence, regardless of its form, must be both valid and relevant. The validity of evidential matter is so dependent on the circumstances under which it is obtained that generalizations about the reliability of various kinds of evidence are subject to important exceptions. If the possibility of important exceptions is recognized, however, the following presumptions, which are not mutually exclusive, about the validity of evidential matter in auditing have some usefulness:

- a. When evidential matter can be obtained from independent sources outside an entity, it provides greater assurance of reliability for the purposes of an independent audit than that secured solely within the entity.
- b. The more effective the internal control, the more assurance it provides about the reliability of the accounting data and financial statements.
- c. The independent auditor's direct personal knowledge, obtained through physical examination, observation, computation, and inspection, is more persuasive than information obtained indirectly.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

## Sufficiency of Evidential Matter

**.22** The independent auditor's objective is to obtain sufficient competent evidential matter to provide him or her with a reasonable basis for forming an opinion. The amount and kinds of evidential matter required to support an informed opinion are matters for the auditor to determine in the exercise of his or her professional judgment after a careful study of the circumstances in the particular case. However, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing. Both the individual assertions in financial statements and the overall proposition that

the financial statements as a whole are fairly presented are of such a nature that even an experienced auditor is seldom convinced beyond all doubt with respect to all aspects of the statements being audited. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

**.23** An auditor typically works within economic limits; the auditor's opinion, to be economically useful, must be formed within a reasonable length of time and at reasonable cost. The auditor must decide, again exercising professional judgment, whether the evidential matter available to him or her within the limits of time and cost is sufficient to justify expression of an opinion. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 80, December 1996.]

**.24** As a guiding rule, there should be a rational relationship between the cost of obtaining evidence and the usefulness of the information obtained. The matter of difficulty and expense involved in testing a particular item is not in itself a valid basis for omitting the test. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 80, December 1996.]

## Evaluation of Evidential Matter

**.25** In evaluating evidential matter, the auditor considers whether specific audit objectives have been achieved. The independent auditor should be thorough in his or her search for evidential matter and unbiased in its evaluation. In designing audit procedures to obtain competent evidential matter, he or she should recognize the possibility that the financial statements may not be fairly presented in conformity with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles.<sup>3</sup> In developing his or her opinion, the auditor should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements. To the extent the auditor remains in substantial doubt about any assertion of material significance, he or she must refrain from forming an opinion until he or she has obtained sufficient competent evidential matter to remove such substantial doubt, or the auditor must express a qualified opinion or a disclaimer of opinion.<sup>4</sup> [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered and amended, effective for engagements beginning on or after January 1, 1997, by the issuance of Statement on Auditing Standards No. 80.]

---

<sup>3</sup> The term *comprehensive basis of accounting other than generally accepted accounting principles* is defined in section 623, *Special Reports*, paragraph .04. [Footnote added, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

<sup>4</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .20 through .34 and .61 through .63, for further guidance on expression of a qualified opinion or a disclaimer of opinion. [Footnote added, effective for engagements beginning on or after January 1, 1997, by Statement on Auditing Standards No. 80.]

## Appendix

### Financial Statement Assertions, Illustrative Audit Objectives, and Examples of Substantive Tests

#### Illustrations for Inventories of a Manufacturing Company

This Appendix illustrates the use of assertions in developing audit objectives and designing substantive tests. The following examples of substantive tests are not intended to be all-inclusive nor is it expected that all of the procedures would be applied in an audit.

<u>Illustrative Audit Objectives</u>	<u>Examples of Substantive Tests</u>
<u>Existence or Occurrence</u>	
Inventories included in the balance sheet physically exist	<ul style="list-style-type: none"> <li>• Observing physical inventory counts</li> <li>• Obtaining confirmation of inventories at locations outside the entity</li> <li>• Testing of inventory transactions between a preliminary physical inventory date and the balance sheet date.</li> </ul>
Inventories represent items held for sale or use in the normal course of business.	<ul style="list-style-type: none"> <li>• Reviewing perpetual inventory records, production records, and purchasing records for indications of current activity.</li> <li>• Comparing inventories with a current sales catalog and subsequent sales and delivery reports.</li> <li>• Using the work of specialists to corroborate the nature of specialized products.</li> </ul>
<u>Completeness</u>	
Inventory quantities include all products, materials, and supplies on hand	<ul style="list-style-type: none"> <li>• Observing physical inventory counts</li> <li>• Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities.</li> <li>• Testing shipping and receiving cut-off procedures.</li> </ul>
Inventory quantities include all products, materials, and supplies owned by the company that are in transit or stored at outside locations.	<ul style="list-style-type: none"> <li>• Obtaining confirmation of inventories at locations outside the entity.</li> <li>• Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities.</li> <li>• Testing shipping and receiving cut-off procedures.</li> </ul>

Illustrative Audit Objectives

Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.

The entity has legal title or similar rights of ownership to the inventories.

Inventories exclude items billed to customers or owned by others.

Inventories are properly stated at cost (except when market is lower).

Slow-moving, excess, defective, and obsolete items included in inventories are properly identified.

Inventories are reduced, when appropriate, to replacement cost or net realizable value.

Examples of Substantive Tests

- Tracing test counts recorded during the physical inventory observation to the inventory listing.
- Accounting for all inventory tags and count sheets used in recording the physical inventory counts.
- Testing the clerical accuracy of inventory listings.
- Reconciling physical counts to perpetual records and general ledger balances and investigating significant fluctuations.

Rights and Obligations

- Observing physical inventory counts.
- Obtaining confirmation of inventories at locations outside the entity.
- Examining paid vendors' invoices, consignment agreements, and contracts.
- Examining paid vendors' invoices, consignment agreements, and contracts.
- Testing shipping and receiving cut-off procedures.

Valuation or Allocation

- Examining paid vendors' invoices.
- Reviewing direct labor rates.
- Testing the computation of standard overhead rates.
- Examining analyses of purchasing and manufacturing standard cost variances.
- Examining an analysis of inventory turnover.
- Reviewing industry experience and trends.
- Analytically comparing the relationship of inventory balances to anticipated sales volume.
- Touring the plant.
- Inquiring of production and sales personnel concerning possible excess or obsolete inventory items.
- Obtaining current market value quotations.
- Reviewing current production costs.

<u>Illustrative Audit Objectives</u>	<u>Examples of Substantive Tests</u>
<p>Inventories are properly classified in the balance sheet as current assets. The major categories of inventories and their bases of valuation are adequately disclosed in the financial statements.</p> <p>The pledge or assignment of any inventories is appropriately disclosed.</p>	<ul style="list-style-type: none"> <li>● Examining sales after year-end and open purchase order commitments.</li> </ul> <p style="text-align: center;"><u>Presentation and Disclosure</u></p> <ul style="list-style-type: none"> <li>● Reviewing drafts of the financial statements.</li> <li>● Reviewing drafts of the financial statements.</li> <li>● Comparing the disclosures made in the financial statements to the requirements of generally accepted accounting principles.</li> <li>● Obtaining confirmation of inventories pledged under loan agreements.</li> </ul>

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 48, July 1984. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 80, December 1996.]

---

[The next page is 462-21.]

## AU Section 9326A

# ***Evidential Matter: Auditing Interpretations of Section 326A***

### **1. Evidential Matter for an Audit of Interim Financial Statements**

**.01 Question**—APB Opinion No. 28 [AC section I73] concluded that certain accounting principles and practices followed for annual reporting purposes may require modification at interim report dates. Paragraph 10 of Opinion No. 28 [AC section I73.103] states that the modifications are needed "so that the reported results for the interim period may better relate to the results of operations for the annual period." The modifications introduce a need for estimates to a greater extent than is necessary for annual financial information. Does this imply a relaxation of the third standard of field work, which requires that sufficient competent evidential matter be obtained to afford a reasonable basis for an opinion regarding the financial statements under audit?

**.02 Interpretation**—No. The third standard of field work applies to all engagements leading to an expression of opinion on financial statements or financial information.

**.03** The objective of the independent auditor's engagement is to obtain sufficient competent evidential matter to provide him with a reasonable basis for forming an opinion. The auditor develops specific audit objectives in light of assertions by management that are embodied in financial statement components. Section 326A.11 states, "In selecting particular substantive tests to achieve the audit objectives he has developed, an auditor considers, among other things, the risk of material misstatement of the financial statements, including the assessed level of control risk, and the expected effectiveness and efficiency of such tests. His considerations include the nature and materiality of the items being tested, the kinds and competence of available evidential matter, and the nature of the audit objective to be achieved."

**.04** Evidential matter obtained for an audit of annual financial statements may also be useful in an audit of interim financial statements, and evidential matter obtained for an audit of interim financial statements may also be useful in an audit of annual financial statements. Section 313.02 indicates that "Audit testing at interim dates may permit early consideration of significant matters affecting the year-end financial statements (for example, related party transactions, changed conditions, recent accounting pronouncements, and financial statement items likely to require adjustment)" and that "much of the audit planning, including obtaining an understanding of internal control and assessing control risk, and the application of substantive tests to transactions can be conducted prior to the balance-sheet date."<sup>1</sup> [As amended, August 1983, by issuance of Statement on Auditing Standards No. 45.] (See section 313.)

---

<sup>1</sup> See section 313, *Substantive Tests Prior to the Balance-Sheet Date* for guidance on the auditor's considerations before applying substantive tests to the details of asset or liability accounts at interim dates, including the relationship between the assessed level of control risk and such tests, and on extending the audit conclusions from such tests to the balance-sheet date. [Footnote added, August 1983, by issuance of Statement on Auditing Standards No. 45.]

**.05** The introduction by Opinion No. 28 [AC section I73] of a need for additional estimates in measuring certain items for interim financial information may lead to a need for evidence in examining those items that differs from the evidence required in an audit of annual financial information. For example, computing the provision for federal income taxes in interim information involves estimating the effective tax rate expected to be applicable for the full fiscal year, and the auditor should examine evidence as to the basis for estimating that rate. Since the effective tax rate for the full year ordinarily is known at year-end, similar evidence is not usually required in examining annual information.

[Issue Date: February, 1974; Modified: October, 1980.]

## **2. The Effect of an Inability to Obtain Evidential Matter Relating to Income Tax Accruals**

**.06 Question**—The Internal Revenue Service's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including, "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "Listed Transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-.5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

**.07** Concern over IRS access to tax accrual working papers might cause some clients to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements, or to deny the independent auditor access to such information.

**.08** What effect does this situation have on the auditor's opinion on the financial statements?

**.09 Interpretation**—The client is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unqualified opinion on the financial statements. Thus, if the client does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to client personnel responsible for making the judgments and estimates relating to the accrual, the auditor should assess the importance of that inadequacy in the accounting records and the client imposed limitation on his or her ability to form an opinion on the financial statements. Also, if the client has appropriate documentation but denies the auditor access to it and to client personnel who possess the information, the auditor should assess the importance of the client-imposed scope limitation on his or her ability to form an opinion.

**.10** The third standard of field work requires the auditor to obtain sufficient competent evidential matter through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Section 326A, *Evidential Matter*, paragraph .25, requires the auditor to

obtain sufficient competent evidential matter about assertions in the financial statements of material significance or else to qualify or disclaim his or her opinion on the statements. Section 508, *Reports on Audited Financial Statements*, paragraph .24, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, section 333 on *Management Representations* requires the auditor to obtain written representations from management. Section 333.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and section 333.08 states that a materiality limit does not apply to that representation. Section 333.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

**.11 Question**—A client may allow the auditor to inspect its tax accrual workpapers, but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The client also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What should the auditor consider in deciding a response to such a request?

**.12 Interpretation**—Section 339, *Audit Documentation*, states that audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation should include sufficient competent evidential matter to afford a reasonable basis for an opinion. In addition, audit documentation should be sufficient to enable an experienced auditor to understand the nature, timing, extent, and results of auditing procedures performed, and the evidence obtained. Section 326A, *Evidential Matter*, paragraph .17, states that corroborating information includes information obtained by the auditor from inquiry, observation, inspection, and physical examination. The quantity, type, and content of audit documentation are matters of the auditor's professional judgment (see section 339.)

**.13** The auditor's documentation of the results of auditing procedures directed at the tax accounts and related disclosures also should include sufficient competent evidential matter about the significant elements of the client's tax liability contingency analysis. This documentation should include copies of the client's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness of the client's accounting and disclosure of significant tax-related contingency matters. The audit documentation should reflect the procedures performed and conclusions reached by the auditor and, for significant matters, include the client's documentary support for its financial statement amounts and disclosures.

**.14** The audit documentation should include the significant elements of the client's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the documentation should provide the client's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intra-period allocation of income tax expense or benefit to continuing operations and to items other than continuing operations. Where applicable, the documentation also should include the client's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" in APB Opinion No. 23, *Accounting for Income Taxes—Special Areas*, including its specific plans for reinvestment of undistributed foreign earnings.

**.15 Question**—In some situations, a client may furnish its outside legal counsel or in-house legal or tax counsel with information concerning the tax contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

**.16** In such circumstances, rather than inspecting and obtaining documentary evidence of the client's tax liability contingency analysis and making inquiries of the client, may the auditor consider the counsel as a specialist within the meaning of section 336, *Using the Work of a Specialist*, and rely solely on counsel's opinion as an appropriate procedure for obtaining evidential matter to support his or her opinion on the financial statements?

**.17 Interpretation**—No. The opinion of legal counsel in this situation would not provide sufficient competent evidential matter to afford a reasonable basis for an opinion on the financial statements.

**.18** Section 336.01 defines a specialist as "a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing." It is intended to apply to situations requiring special knowledge of matters about which the auditor does not have adequate technical training and proficiency. The auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

**.19** The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, can be useful to the auditor in forming his or her own opinion. However, the audit of income tax accounts requires a combination of tax expertise and knowledge about the client's business that is accumulated during all aspects of an audit. Therefore, as stated above, it is not appropriate for the auditor to rely solely on such legal opinion.

**.20 Question**—A client may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third party tax advisers? What evidential matter should the auditor obtain and include in the audit documentation?

**.21 Interpretation**—As discussed in paragraphs .17 through .19 above, the auditor cannot accept a client's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the client's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the auditor either disagrees with the position taken by the client, or its advisers, or does not have sufficient competent evidential matter to support his or her opinion.

**.22** If the client's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor should obtain access to the opinion, notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation should include either the actual advice or opinions rendered by an outside adviser, or other sufficient documentation or abstracts supporting both the transactions or facts

addressed as well as the analysis and conclusions reached by the client and adviser. Alternatives such as redacted or modified opinions may be considered, but must nonetheless include sufficient content to articulate and document the client's position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept a client's analysis summarizing an outside adviser's opinion, but the client's analysis must provide sufficient competent evidential matter for the auditor to formulate his or her conclusion. In addition, client representations may be obtained stating that the client has not received any advice or opinions that are contradictory to the client's support for the tax accrual.

**.23** If the auditor is unable to accumulate sufficient competent evidence about whether there is a supported and reasonable basis for the client's position, the auditor should consider the effect of this scope limitation on his or her report.

[Issue Date: March, 1981; Amended: April 9, 2003;  
Revised: December, 2005.]

### 3. The Auditor's Consideration of the Completeness Assertion

**.24 Question**—Section 326A, *Evidential Matter*, paragraph .03, identifies five categories of assertions that are embodied in financial statement components. In obtaining audit evidence about four of these categories—existence or occurrence, rights and obligations, valuation or allocation, and presentation and disclosure—the auditor considers transactions and accounts that are included in the financial statements. In contrast, in obtaining audit evidence about the completeness assertion, the auditor considers whether transactions and accounts have been improperly excluded from the financial statements. May management's written representations and the auditor's assessment of control risk constitute sufficient audit evidence about the completeness assertion? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.25 Interpretation**—Written representations from management are a part of the evidential matter the auditor obtains in an audit performed in accordance with generally accepted auditing standards. Management's representations about the completeness assertion, whether considered alone or in combination with the auditor's assessment of control risk, do not constitute sufficient audit evidence to support that assertion. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.26** In planning audit procedures to obtain evidence about the completeness assertion, the auditor should consider the inherent risk that transactions and accounts have been improperly omitted from the financial statements. When the auditor assesses the inherent risk of omission for a particular account balance or class of transactions to be such that he believes omissions could exist that might be material when aggregated with errors in other balances or classes, he should restrict the audit risk of omission by performing substantive tests designed to obtain evidence about the completeness assertion. Substantive tests designed primarily to obtain evidence about the completeness assertion include analytical procedures and tests of details of *related populations*.<sup>2</sup> [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

---

<sup>2</sup> For purposes of this interpretation, a related population is a population other than the recorded account balance or class of transactions being audited that would be expected to contain evidence of whether all accounts or transactions that should be presented in that balance or class are so included.

.27 The extent of substantive tests of completeness may properly vary in relation to the assessed level of control risk. Because of the unique nature of the completeness assertion, an assessed level of control risk below the maximum may be an effective means for the auditor to obtain evidence about that assertion. Although an assessed level of control risk below the maximum is not required to satisfy the auditor's objectives with respect to the completeness assertion, the auditor should consider that for some transactions (e.g., revenues that are received primarily in cash, such as those of a casino or of some charitable organizations) it may be difficult to limit audit risk for those assertions to an acceptable level without an assessed level of control risk below the maximum. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

[Issue Date: April, 1986.]

#### 4. Applying Auditing Procedures to Segment Disclosures in Financial Statements

.28 *Introduction*—Financial Accounting Standards Board (FASB) Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information* [AC section S30], establishes standards for the way that public business enterprises<sup>3</sup> disclose information about segments in annual financial statements and in condensed financial statements of interim periods issued to shareholders. FASB Statement No. 131 [AC section S30] does not apply to nonpublic entities or to not-for-profit organizations, although those entities are encouraged to provide the disclosures described therein. FASB Statement No. 131 [AC section S30] is effective for fiscal years beginning after December 15, 1997. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

.29 FASB Statement No. 131 [AC section S30] requires that public business enterprises report financial and descriptive information about their reportable operating segments including factors used to identify reportable segments; a measure of profit or loss, certain revenue and expense items, and assets of reportable operating segments and the basis of measurement of these items; and reconciliations of these measures and any other significant operating segment items to enterprise totals. FASB Statement No. 131 [AC section S30] requires that the management approach be used to identify operating segments and to measure the financial information disclosed about operating segments. The management approach focuses on the financial information that an entity's chief operating decision maker (chief executive officer, chief operating officer or other individual or group exercising similar decision-making authority) uses internally to evaluate the performance of, and to allocate resources to, segments. FASB Statement No. 131 [AC section S30] also requires that public business enterprises report certain information about products and services, geographic areas, and major customers regardless of whether that information is used by management in assessing segment performance. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

---

<sup>3</sup> FASB Statement No. 131, paragraph 9 [AC section S30.108], states: "Public business enterprises are those business enterprises that have issued debt or equity securities that are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local or regional markets), that are required to file financial statements with the Securities and Exchange Commission, or that provide financial statements for the purpose of issuing any class of securities in a public market."

**.30 Question**—What is the auditor's objective when applying auditing procedures to segment disclosures in an entity's financial statements? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.31 Interpretation**—The auditor performing an audit of financial statements in accordance with generally accepted auditing standards considers segment disclosures, as other informative disclosures, in relation to the financial statements taken as a whole. Accordingly, the auditor is not required to apply procedures as extensive as would be necessary to express an opinion on the segment information taken by itself. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.32 Question**—What should the auditor consider with respect to segment disclosures in planning the audit? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.33 Interpretation**—The auditor should obtain an understanding of who performs the function of the chief operating decision maker (CODM), and how management organizes the entity into operating segments for internal reporting purposes. The auditor also should consider the nature and extent of differences, if any, between the information systems used to generate data that the CODM uses to allocate resources to, and evaluate results of, the operating segments and the information systems that generate data for external reporting purposes. When a different system is used to generate the data underlying segment disclosures, the auditor needs to obtain only a general understanding of that system. Consistent with the management approach to accounting for segments, auditing procedures primarily are directed at obtaining sufficient competent evidential matter to support conclusions that the segment information disclosed is the same information that is used by the CODM; that the basis on which the information was prepared is the basis disclosed and the disclosures are adequate; that aggregation criteria have been appropriately applied, if applicable; and that all significant segment items are reconciled to consolidated totals in the financial statements. The types of procedures needed to obtain such evidence are described in paragraphs .35 and .37 of this Interpretation. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.34 Question**—What procedures should the auditor consider performing to evaluate whether the entity appropriately identified its reportable operating segments in accordance with FASB Statement No. 131 [AC section S30]? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.35 Interpretation**—Procedures that the auditor should consider performing to evaluate whether the entity appropriately identified its reportable operating segments in accordance with FASB Statement No. 131 [AC section S30] include the following:

- a. Inquire of management concerning its methods of identifying operating segments, and consider the reasonableness of those methods in light of the characteristics of operating segments described in FASB Statement No. 131, paragraph 10 [AC section S30.109].
- b. Review corroborating evidence, such as information that the CODM uses to assess performance and allocate resources, material presented to the board of directors, minutes from the meetings of the board of directors, and information that management provides in management's discussion and analysis (MD&A), to financial analysts, and in the chairman's letter to shareholders, for consistency with financial statement disclosures.

- c. If the CODM uses more than one set of segment information for analyzing results of operations, consider whether management's identification of operating segments is in accordance with FASB Statement No. 131, paragraphs 13 through 15 [AC section S30.112-114].
- d. Assess whether the entity has applied aggregation criteria, if applicable, and quantitative thresholds described in FASB Statement No. 131, paragraphs 17 through 24 [AC section S30.116-123], appropriately to determine its reportable operating segments.
- e. Obtain management's written representation that operating segments are appropriately identified and disclosed in accordance with FASB Statement No. 131 [AC section S30].

[Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.36 Question**—What procedures should the auditor consider performing to evaluate the adequacy and completeness of management's disclosures about reportable operating segments and about products and services, geographic areas, and major customers? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.37 Interpretation**—The tests of underlying accounting records normally applied in an audit of financial statements may provide evidence about management's disclosures of information about products and services, geographic areas, and major customers, as well as how management allocates the entity's revenue, expenses, and assets among operating segments. The auditor should consider applying the following procedures to obtain additional evidence about segment disclosures:

- a. Perform analytical procedures on the information about segments to identify and provide a basis for inquiry about relationships and individual items that appear to be unusual and may indicate misstatements. Analytical procedures, for purposes of this Interpretation, consist of comparison of the segment information with comparable information for the immediately preceding year and comparison of the segment information with any available related budgeted information for the current year. In applying these procedures, the auditor should consider the types of matters that in the preceding year have required accounting adjustments of segment information.
- b. Evaluate the adequacy of disclosures with regard to (i) general information; (ii) information about reported segment profit or loss, segment assets, and the basis of measurement; and (iii) reconciliations of the totals of segment revenues, reported profit or loss, assets and other significant items to corresponding enterprise amounts, as required in FASB Statement No. 131, paragraphs 26 through 32 [AC section S30.125-131].
- c. Review the reconciliations (including supporting schedules) of the totals of segment revenues, reported profit or loss, assets, and other significant items to consolidated totals to assess whether significant items are properly disclosed.
- d. If the composition of an entity's reportable segments changes as a result of an entity's reorganization of its internal structure, assess

whether segment information for prior periods has been restated, if practicable, in accordance with FASB Statement No. 131, paragraph 34 [AC section S30.133]. If restatement is not practicable, assess whether the segment information for the current period is stated under both the old basis and the new basis of segmentation in the year in which the change occurs, if practicable, in accordance with FASB Statement No. 131, paragraph 35 [AC section S30.134].

[Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.38 Question**—What are the implications related to segment information for the auditor's report on the financial statements? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.39 Interpretation**—The auditor's standard report on financial statements prepared in conformity with generally accepted accounting principles implicitly applies to segment information included in those statements in the same manner that it applies to other informative disclosures in the financial statements. The auditor's standard report would not refer to segment information unless the audit revealed a misstatement or omission relating to the segment information that is material in relation to the financial statements taken as a whole or the auditor was unable to apply the auditing procedures that he or she considered necessary in the circumstances. The auditor should consider qualitative as well as quantitative factors in evaluating whether such a matter is material to the financial statements taken as a whole. The significance of a matter to a particular entity (for example, a misstatement of the revenue and operating profit of a relatively small segment that is represented by management to be important to the future profitability of the entity), the pervasiveness of a matter (for example, whether it affects the amounts and presentation of numerous items in the segment information), and the impact of a matter (for example, whether it distorts the trends reflected in the segment information) should all be considered in judging whether a matter relating to segment information is material to the financial statements taken as a whole. Accordingly, situations may arise in practice where the auditor will conclude that a matter relating to segment information is qualitatively material even though, in his or her judgment, it is quantitatively immaterial to the financial statements taken as a whole. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.40** If the auditor concludes that an omission or misstatement of segment information is material to the financial statements taken as a whole, he or she should consider the reporting guidance in section 508, *Reports on Audited Financial Statements*, paragraphs .35 through .42, relating to departures from generally accepted accounting principles. If the auditor has been unable to perform auditing procedures on segment information that he or she considers necessary, the auditor should consider the reporting guidance in section 508.22 through .26 relating to scope limitations. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

**.41** Auditors are not required to refer in their audit reports (a) to changes required by the implementation of FASB Statement No. 131 [AC section S30] or (b) to subsequent changes in operating segments, provided that the financial statements clearly disclose that the information presented in segment disclosures for earlier periods has been restated, where applicable. Such disclosure would be similar to that for reclassification of prior-year financial information

made for comparative purposes. In financial statements where segment information for earlier periods has not been restated, auditors are not required to refer in their audit reports to the variance in disclosure between the comparative periods, provided the financial statements clearly disclose why the earlier periods have not been restated. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

[Issue Date: August, 1998; Revised: April, 2003.]

## AU Section 328

# Auditing Fair Value Measurements and Disclosures

Source: SAS No. 101; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after June 15, 2003, unless otherwise indicated.

See section 9328 for interpretations of this section.

### Introduction

**.01** The purpose of this section is to establish standards and provide guidance on auditing fair value measurements and disclosures contained in financial statements. In particular, this section addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. Fair value measurements of assets, liabilities, and components of equity may arise from both the initial recording of transactions and later changes in value. Changes in fair value measurements that occur over time may be treated in different ways under generally accepted accounting principles (GAAP). For example, GAAP may require that some fair value changes be reflected in net income and that other fair value changes be reflected in other comprehensive income and equity.

**.02** While this section provides guidance on auditing fair value measurements and disclosures, evidence obtained from other audit procedures also may provide evidence relevant to the measurement and disclosure of fair values. For example, inspection procedures to verify existence of an asset measured at fair value also may provide relevant evidence about its valuation, such as the physical condition of the asset.

**.03** The auditor should obtain sufficient competent audit evidence to provide reasonable assurance that fair value measurements and disclosures are in conformity with GAAP. GAAP requires that certain items be measured at fair value. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 7, *Using Cash Flow Information and Present Value in Accounting Measurements*, defines the fair value of an asset (liability) as "the amount at which that asset (or liability) could be bought (or incurred) or sold (or settled) in a current transaction between willing parties, that is, other than in a forced or liquidation sale."<sup>1</sup> Although GAAP may not prescribe the

---

<sup>1</sup> Generally accepted accounting principles (GAAP) contain various definitions of fair value. However, all of the definitions reflect the concepts in the definition that appears in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 7, *Using Cash Flow Information and Present Value in Accounting Measurements*. For example, Governmental Accounting Standards Board Statement of Governmental Accounting Standards No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, defines fair value as "the amount at which an investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale."

method for measuring the fair value of an item, it expresses a preference for the use of observable market prices to make that determination. In the absence of observable market prices, GAAP requires fair value to be based on the best information available in the circumstances.

**.04** Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

**.05** Fair value measurements for which observable market prices are not available are inherently imprecise. That is because, among other things, those fair value measurements may be based on assumptions about future conditions, transactions, or events whose outcome is uncertain and will therefore be subject to change over time. The auditor's consideration of such assumptions is based on information available to the auditor at the time of the audit. The auditor is not responsible for predicting future conditions, transactions, or events that, had they been known at the time of the audit, may have had a significant effect on management's actions or management's assumptions underlying the fair value measurements and disclosures.<sup>2</sup>

**.06** Assumptions used in fair value measurements are similar in nature to those required when developing other accounting estimates. However, if observable market prices are not available, GAAP requires that valuation methods incorporate assumptions that marketplace participants would use in their estimates of fair value whenever that information is available without undue cost and effort. If information about market assumptions is not available, an entity may use its own assumptions as long as there are no contrary data indicating that marketplace participants would use different assumptions. These concepts generally are not relevant for accounting estimates made under measurement bases other than fair value. Section 342, *Auditing Accounting Estimates*, provides guidance on auditing accounting estimates in general. This section addresses considerations similar to those in section 342 as well as others in the specific context of fair value measurements and disclosures in accordance with GAAP.

**.07** GAAP requires or permits a variety of fair value measurements and disclosures in financial statements. GAAP also varies in the level of guidance that it provides on measuring fair values and disclosures. While this section provides guidance on auditing fair value measurements and disclosures, it does not address specific types of assets, liabilities, components of equity, transactions, or industry-specific practices.<sup>3</sup>

**.08** The measurement of fair value may be relatively simple for certain assets or liabilities, for example, investments that are bought and sold in active markets that provide readily available and reliable information on the prices at which actual exchanges occur. For those items, the existence of published price quotations in an active market is the best evidence of fair value. The measurement of fair value for other assets or liabilities may be more complex.

---

<sup>2</sup> For purposes of this section, management's assumptions include assumptions developed by management under the guidance of the board of directors and assumptions developed by a specialist engaged or employed by management.

<sup>3</sup> See, for example, section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

A specific asset may not have an observable market price or may possess such characteristics that it becomes necessary for management to estimate its fair value based on the best information available in the circumstances (for example, a complex derivative financial instrument). The estimation of fair value may be achieved through the use of a valuation method (for example, a model premised on discounting of estimated future cash flows).

## Understanding the Entity's Process for Determining Fair Value Measurements and Disclosures and the Relevant Controls, and Assessing Risk

**.09** The auditor should obtain an understanding of the entity's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach.

**.10** Management is responsible for establishing an accounting and financial reporting process for determining fair value measurements. In some cases, the measurement of fair value and therefore the process set up by management to determine fair value may be simple and reliable. For example, management may be able to refer to published price quotations in an active market to determine fair value for marketable securities held by the entity. Some fair value measurements, however, are inherently more complex than others and involve uncertainty about the occurrence of future events or their outcome, and therefore assumptions that may involve the use of judgment need to be made as part of the measurement process.

**.11** Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of each of the five components of internal control sufficient to assess the risk of material misstatement. In the specific context of this section, the auditor obtains such an understanding related to the determination of the entity's fair value measurements and disclosures in order to plan the nature, timing, and extent of the audit procedures. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

**.12** When obtaining an understanding of the entity's process for determining fair value measurements and disclosures, the auditor considers, for example:

- Controls over the process used to determine fair value measurements, including, for example, controls over data and the segregation of duties between those committing the entity to the underlying transactions and those responsible for undertaking the valuations.
- The expertise and experience of those persons determining the fair value measurements.
- The role that information technology has in the process.
- The types of accounts or transactions requiring fair value measurements or disclosures (for example, whether the accounts arise from the recording of routine and recurring transactions or whether they arise from nonroutine or unusual transactions).
- The extent to which the entity's process relies on a service organization to provide fair value measurements or the data that supports the measurement. When an entity uses a service organization, the auditor considers the requirements of section 324, *Service Organizations*, as amended.

- The extent to which the entity engages or employs specialists in determining fair value measurements and disclosures.
- The significant management assumptions used in determining fair value.
- The documentation supporting management's assumptions.
- The process used to develop and apply management assumptions, including whether management used available market information to develop the assumptions.
- The process used to monitor changes in management's assumptions.
- The integrity of change controls and security procedures for valuation models and relevant information systems, including approval processes.
- The controls over the consistency, timeliness, and reliability of the data used in valuation models.

.13 The auditor uses his or her understanding of the entity's process, including its complexity, and of the controls when assessing the risk of material misstatement. Based on that risk assessment, the auditor determines the nature, timing, and extent of the audit procedures. The risk of material misstatement may increase as the accounting and financial reporting requirements for fair value measurements become more complex.

.14 Section 314 discusses the inherent limitations of internal control. As fair value determinations often involve subjective judgments by management, this may affect the nature of controls that are capable of being implemented, including the possibility of management override of controls (see section 316, *Consideration of Fraud in a Financial Statement Audit*). The auditor considers the inherent limitations of internal control in such circumstances in assessing control risk. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

## Evaluating Conformity of Fair Value Measurements and Disclosures With GAAP

.15 The auditor should evaluate whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP. The auditor's understanding of the requirements of GAAP and knowledge of the business and industry, together with the results of other audit procedures, are used to evaluate the accounting for assets or liabilities requiring fair value measurements, and the disclosures about the basis for the fair value measurements and significant uncertainties related thereto.

.16 The evaluation of the entity's fair value measurements and of the audit evidence depends, in part, on the auditor's knowledge of the nature of the business. This is particularly true where the asset or liability or the valuation method is highly complex. For example, derivative financial instruments may be highly complex, with a risk that differing assumptions used in determining fair values will result in different conclusions. The measurement of the fair value of some items, for example "in process research and development" or intangible assets acquired in a business combination, may involve special considerations that are affected by the nature of the entity and its operations. Also, the auditor's knowledge of the business, together with the results of other audit procedures, may help identify assets for which management should assess the need to recognize an impairment loss under applicable GAAP.

**.17** The auditor should evaluate management's intent to carry out specific courses of action where intent is relevant to the use of fair value measurements, the related requirements involving presentation and disclosures, and how changes in fair values are reported in financial statements. The auditor also should evaluate management's ability to carry out those courses of action. Management often documents plans and intentions relevant to specific assets or liabilities and GAAP may require it to do so. While the extent of evidence to be obtained about management's intent and ability is a matter of professional judgment, the auditor's procedures ordinarily include inquiries of management, with appropriate corroboration of responses, for example, by:

- Considering management's past history of carrying out its stated intentions with respect to assets or liabilities.
- Reviewing written plans and other documentation, including, where applicable, budgets, minutes, and other such items.
- Considering management's stated reasons for choosing a particular course of action.
- Considering management's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its contractual commitments.

**.18** When there are no observable market prices and the entity estimates fair value using a valuation method, the auditor should evaluate whether the entity's method of measurement is appropriate in the circumstances. That evaluation requires the use of professional judgment. It also involves obtaining an understanding of management's rationale for selecting a particular method by discussing with management its reasons for selecting the valuation method. The auditor considers whether:

- a. Management has sufficiently evaluated and appropriately applied the criteria, if any, provided by GAAP to support the selected method.
- b. The valuation method is appropriate in the circumstances given the nature of the item being valued.
- c. The valuation method is appropriate in relation to the business, industry, and environment in which the entity operates.

Management may have determined that different valuation methods result in a range of significantly different fair value measurements. In such cases, the auditor evaluates how the entity has investigated the reasons for these differences in establishing its fair value measurements.

**.19** The auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity, or changes in accounting principles. If management has changed the method for determining fair value, the auditor considers whether management can adequately demonstrate that the method to which it has changed provides a more appropriate basis of measurement or whether the change is supported by a change in the GAAP requirements or a change in circumstances.<sup>4</sup> For example, the introduction of an active market for an equity security may indicate that the use of the discounted cash flows method to estimate the fair value of the security is no longer appropriate.

---

<sup>4</sup> Paragraph 16 of Accounting Principles Board Opinion No. 20, *Accounting Changes*, states that the presumption that an entity should not change an accounting principle may be overcome only if the entity justifies the use of an alternative acceptable accounting principle on the basis that it is preferable.

## Engaging a Specialist

**.20** The auditor should consider whether to engage a specialist and use the work of that specialist as audit evidence in performing substantive tests to evaluate material financial statement assertions. The auditor may have the necessary skill and knowledge to plan and perform audit procedures related to fair values or may decide to use the work of a specialist. If the use of such a specialist is planned, the auditor should consider the guidance in section 336, *Using the Work of a Specialist*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.21** When planning to use the work of a specialist in auditing fair value measurements, the auditor considers whether the specialist's understanding of the definition of fair value and the method that the specialist will use to determine fair value are consistent with those of management and with GAAP. For example, the method used by a specialist for estimating the fair value of real estate or a complex derivative may not be consistent with the measurement principles specified in GAAP. Accordingly, the auditor considers such matters, often through discussions with the specialist or by reading the report of the specialist.

**.22** Section 336 provides that, while the reasonableness of assumptions and the appropriateness of the methods used and their application are the responsibility of the specialist, the auditor obtains an understanding of the assumptions and methods used. However, if the auditor believes the findings are unreasonable, he or she applies additional procedures as required in section 336.

## Testing the Entity's Fair Value Measurements and Disclosures

**.23** Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent. For example, substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data (see paragraphs .26 through .39), (b) developing independent fair value estimates for corroborative purposes (see paragraph .40), or (c) reviewing subsequent events and transactions (see paragraphs .41 and .42).

**.24** Some fair value measurements are inherently more complex than others. This complexity arises either because of the nature of the item being measured at fair value or because of the valuation method used to determine fair value. For example, in the absence of quoted prices in an active market, an estimate of a security's fair value may be based on valuation methods such as the discounted cash flow method or the transactions method. Complex fair value measurements normally are characterized by greater uncertainty regarding the reliability of the measurement process. This greater uncertainty may be a result of:

- The length of the forecast period
- The number of significant and complex assumptions associated with the process

- A higher degree of subjectivity associated with the assumptions and factors used in the process
- A higher degree of uncertainty associated with the future occurrence or outcome of events underlying the assumptions used
- Lack of objective data when highly subjective factors are used

**.25** The auditor uses both the understanding of management's process for determining fair value measurements and his or her assessment of the risk of material misstatement to determine the nature, timing, and extent of the audit procedures. The following are examples of considerations in the development of audit procedures:

- The fair value measurement (for example, a valuation by an independent appraiser) may be made at a date that does not coincide with the date at which the entity is required to measure and report that information in its financial statements. In such cases, the auditor obtains evidence that management has taken into account the effect of events, transactions, and changes in circumstances occurring between the date of the fair value measurement and the reporting date.
- Collateral often is assigned for certain types of investments in debt instruments that either are required to be measured at fair value or are evaluated for possible impairment. If the collateral is an important factor in measuring the fair value of the investment or evaluating its carrying amount, the auditor obtains sufficient competent audit evidence regarding the existence, value, rights, and access to or transferability of such collateral, including consideration of whether all appropriate liens have been filed, and considers whether appropriate disclosures about the collateral have been made.
- In some situations, additional procedures, such as the inspection of an asset by the auditor, may be necessary to obtain sufficient competent audit evidence about the appropriateness of a fair value measurement. For example, inspection of the asset may be necessary to obtain information about the current physical condition of the asset relevant to its fair value, or inspection of a security may reveal a restriction on its marketability that may affect its value.

### **Testing Management's Significant Assumptions, the Valuation Model, and the Underlying Data**

**.26** The auditor's understanding of the reliability of the process used by management to determine fair value is an important element in support of the resulting amounts and therefore affects the nature, timing, and extent of audit procedures. When testing the entity's fair value measurements and disclosures, the auditor evaluates whether:

- a. Management's assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).
- b. The fair value measurement was determined using an appropriate model, if applicable.
- c. Management used relevant information that was reasonably available at the time.

**.27** Estimation methods and assumptions, and the auditor's consideration and comparison of fair value measurements determined in prior periods, if any, to results obtained in the current period, may provide evidence of the reliability of management's processes. However, the auditor also considers whether variances from the prior-period fair value measurements result from changes in market or economic circumstances.

**.28** Where applicable, the auditor should evaluate whether the significant assumptions used by management in measuring fair value, taken individually and as a whole, provide a reasonable basis for the fair value measurements and disclosures in the entity's financial statements.

**.29** Assumptions are integral components of more complex valuation methods, for example, valuation methods that employ a combination of estimates of expected future cash flows together with estimates of the values of assets or liabilities in the future, discounted to the present. Auditors pay particular attention to the significant assumptions underlying a valuation method and evaluate whether such assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).

**.30** Specific assumptions will vary with the characteristics of the item being valued and the valuation approach used (for example, cost, market, or income). For example, where the discounted cash flows method (a method under the income approach) is used, there will be assumptions about the level of cash flows, the period of time used in the analysis, and the discount rate.

**.31** Assumptions ordinarily are supported by differing types of evidence from internal and external sources that provide objective support for the assumptions used. The auditor evaluates the source and reliability of evidence supporting management's assumptions, including consideration of the assumptions in light of historical and market information.

**.32** Audit procedures dealing with management's assumptions are performed in the context of the audit of the entity's financial statements. The objective of the audit procedures is therefore not intended to obtain sufficient competent audit evidence to provide an opinion on the assumptions themselves. Rather, the auditor performs procedures to evaluate whether the assumptions provide a reasonable basis for measuring fair values in the context of an audit of the financial statements taken as a whole.

**.33** Identifying those assumptions that appear to be significant to the fair value measurement requires the exercise of judgment by management. The auditor focuses attention on the significant assumptions that management has identified. Generally, significant assumptions cover matters that materially affect the fair value measurement and may include those that are:

- a. Sensitive to variation or uncertainty in amount or nature. For example, assumptions about short-term interest rates may be less susceptible to significant variation compared to assumptions about long-term interest rates.
- b. Susceptible to misapplication or bias.

**.34** The auditor considers the sensitivity of the valuation to changes in significant assumptions, including market conditions that may affect the value. Where applicable, the auditor encourages management to use techniques such as sensitivity analysis to help identify particularly sensitive assumptions. If management has not identified particularly sensitive assumptions, the auditor considers whether to employ techniques to identify those assumptions.

**.35** The evaluation of whether the assumptions provide a reasonable basis for the fair value measurements relates to the whole set of assumptions as well as to each assumption individually. Assumptions are frequently interdependent and therefore need to be internally consistent. A particular assumption that may appear reasonable when taken in isolation may not be reasonable when used in conjunction with other assumptions. The auditor considers whether management has identified the significant assumptions and factors influencing the measurement of fair value.

**.36** To be reasonable, the assumptions on which the fair value measurements are based (for example, the discount rate used in calculating the present value of future cash flows),<sup>5</sup> individually and taken as a whole, need to be realistic and consistent with:

- a. The general economic environment, the economic environment of the specific industry, and the entity's economic circumstances;
- b. Existing market information;
- c. The plans of the entity, including what management expects will be the outcome of specific objectives and strategies;
- d. Assumptions made in prior periods, if appropriate;
- e. Past experience of, or previous conditions experienced by, the entity to the extent currently applicable;
- f. Other matters relating to the financial statements, for example, assumptions used by management in accounting estimates for financial statement accounts other than those relating to fair value measurements and disclosures; and
- g. The risk associated with cash flows, if applicable, including the potential variability in the amount and timing of the cash flows and the related effect on the discount rate.

Where assumptions are reflective of management's intent and ability to carry out specific courses of action, the auditor considers whether they are consistent with the entity's plans and past experience.

**.37** If management relies on historical financial information in the development of assumptions, the auditor considers the extent to which such reliance is justified. However, historical information might not be representative of future conditions or events, for example, if management intends to engage in new activities or circumstances change.

**.38** For items valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management. Rather, the auditor reviews the model and evaluates whether the assumptions used are reasonable and the model is appropriate considering the entity's circumstances. For example, it may be inappropriate to use discounted cash flows for valuing an equity investment in a start-up enterprise if there are no current revenues on which to base the forecast of future earnings or cash flows.

**.39** The auditor should test the data used to develop the fair value measurements and disclosures and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions. Specifically, the auditor evaluates whether the data on which the fair value

---

<sup>5</sup> The auditor also should consider requirements of GAAP that may influence the selection of assumptions (see FASB Concepts Statement No. 7).

measurements are based, including the data used in the work of a specialist, is accurate, complete, and relevant; and whether fair value measurements have been properly determined using such data and management's assumptions. The auditor's tests also may include, for example, procedures such as verifying the source of the data, mathematical recomputation of inputs, and reviewing of information for internal consistency, including whether such information is consistent with management's intent and ability to carry out specific courses of action discussed in paragraph .17.

## Developing Independent Fair Value Estimates for Corroborative Purposes

.40 The auditor may make an independent estimate of fair value (for example, by using an auditor-developed model) to corroborate the entity's fair value measurement.<sup>6</sup> When developing an independent estimate using management's assumptions, the auditor evaluates those assumptions as discussed in paragraphs .28 to .37. Instead of using management's assumptions, the auditor may develop his or her own assumptions to make a comparison with management's fair value measurements. In that situation, the auditor nevertheless understands management's assumptions. The auditor uses that understanding to ensure that his or her independent estimate takes into consideration all significant variables and to evaluate any significant difference from management's estimate. The auditor also should test the data used to develop the fair value measurements and disclosures as discussed in paragraph .39.

## Reviewing Subsequent Events and Transactions

.41 Events and transactions that occur after the balance-sheet date but before the date of the auditor's report (for example, a sale of an investment shortly after the balance-sheet date) may provide audit evidence regarding management's fair value measurements as of the balance-sheet date.<sup>7</sup> In such circumstances, the audit procedures described in paragraphs .26 through .40 may be minimized or unnecessary because the subsequent event or transaction can be used to substantiate the fair value measurement. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.42 Some subsequent events or transactions may reflect changes in circumstances occurring after the balance-sheet date and thus do not constitute competent evidence of the fair value measurement at the balance-sheet date (for example, the prices of actively traded marketable securities that change after the balance-sheet date). When using a subsequent event or transaction to substantiate a fair value measurement, the auditor considers only those events or transactions that reflect circumstances existing at the balance-sheet date.

## Disclosures About Fair Values

.43 The auditor should evaluate whether the disclosures about fair values made by the entity are in conformity with GAAP.<sup>8</sup> Disclosure of fair value information is an important aspect of financial statements. Often, fair value disclosure is required because of the relevance to users in the evaluation of an

---

<sup>6</sup> See section 329, *Analytical Procedures*.

<sup>7</sup> The auditor's consideration of a subsequent event or transaction, as contemplated in this paragraph, is a substantive test and thus differs from the review of subsequent events performed pursuant to section 560, *Subsequent Events*.

<sup>8</sup> See also section 431, *Adequacy of Disclosure in Financial Statements*.

entity's performance and financial position. In addition to the fair value information required under GAAP, some entities disclose voluntary additional fair value information in the notes to the financial statements.

**.44** When auditing fair value measurements and related disclosures included in the notes to the financial statements, whether required by GAAP or disclosed voluntarily, the auditor ordinarily performs essentially the same types of audit procedures as those employed in auditing a fair value measurement recognized in the financial statements. The auditor obtains sufficient competent audit evidence that the valuation principles are appropriate under GAAP and are being consistently applied, and that the method of estimation and significant assumptions used are adequately disclosed in accordance with GAAP.

**.45** The auditor evaluates whether the entity has made adequate disclosures about fair value information. If an item contains a high degree of measurement uncertainty, the auditor assesses whether the disclosures are sufficient to inform users of such uncertainty.<sup>9</sup>

**.46** When disclosure of fair value information under GAAP is omitted because it is not practicable to determine fair value with sufficient reliability, the auditor evaluates the adequacy of disclosures required in these circumstances. If the entity has not appropriately disclosed fair value information required by GAAP, the auditor evaluates whether the financial statements are materially misstated.

## Evaluating the Results of Audit Procedures

**.47** The auditor should evaluate the sufficiency and competence of the audit evidence obtained from auditing fair value measurements and disclosures as well as the consistency of that evidence with other audit evidence obtained and evaluated during the audit. The auditor's evaluation of whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP is performed in the context of the financial statements taken as a whole (see section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraphs .50 through .61). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

## Management Representations

**.48** Section 333, *Management Representations*, requires that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted auditing standards and provides guidance concerning the representations to be obtained. The auditor ordinarily should obtain written representations from management regarding the reasonableness of significant assumptions, including whether they appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures.

**.49** Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about:

- The appropriateness of the measurement methods, including related assumptions, used by management in determining fair value and the consistency in application of the methods.

---

<sup>9</sup> See Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

- The completeness and adequacy of disclosures related to fair values.
- Whether subsequent events require adjustment to the fair value measurements and disclosures included in the financial statements.

## Communication With Audit Committees

.50 Section 380A, *Communication With Audit Committees*, requires auditors to determine that certain matters related to the conduct of an audit are communicated to audit committees. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. The auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates. For example, the auditor considers communicating the nature of significant assumptions used in fair value measurements, the degree of subjectivity involved in the development of the assumptions, and the relative materiality of the items being measured at fair value to the financial statements as a whole. The auditor considers the guidance contained in section 380A when determining the nature and form of communication.

## Effective Date

.51 This section is effective for audits of financial statements for periods beginning on or after June 15, 2003. Earlier application of the provisions of this section is permitted.

---

## AU Section 9328

# Auditing Fair Value Measurements and Disclosures: Auditing Interpretations of Section 328

### 1. Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value

**.01 Question**—Entities may have interests in trusts held by a third-party trustee. For example, a not-for-profit organization (NPO) may have an interest in a trust established by a donor for the benefit of the NPO. Further, that interest may be required to be reported at fair value because it is a beneficial interest pursuant to paragraph 15 of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 136, *Transfers of Assets to a Not-for-Profit Organization or Charitable Trust That Raises or Holds Contributions for Others*. Further, the fair value of that beneficial interest may be estimated, at least in part, because a readily determinable fair value does not exist. For example, the NPO may have an unconditional right to receive all or a portion of the specified cash flows from a charitable trust that has investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. In such circumstances, the auditor typically would satisfy the existence assertion through confirmation, examination of legal documents, or other means. In confirming the existence, the auditor may request the trustee to indicate or to confirm the trust's fair value, including the fair value of investments held in the trust. In some circumstances, the trustee will not provide management or the auditor detailed information about the basis and method for measuring those investments, nor will they provide information about the specific investments held by the trust. For example, in some circumstances the trustee may inform management or the auditor that investments are held by the trust as follows:

- In aggregate, such as "\$XXX of total investments"
- In aggregate, such as "\$XXX of total investments in private equity securities, \$YYY of total investments in interests in limited partnerships, and \$ZZZ of total investments in debt securities"
- On an investment-by-investment basis, such as "AA shares of common stock of private company A, with a fair value of \$AAA; BB shares of preferred stock of private company B, with a fair value of \$BBB; CC units of limited partnership interest CCC, with a fair value of \$CCC; and real estate property DDD, with a fair value of \$DDDD"

In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments held by a trust, does receiving a confirmation from the trustee, either in aggregate or on an investment-by-investment basis, constitute adequate audit evidence with respect to the existence assertion and auditing fair value measurements in accordance with section 328, *Auditing Fair Value Measurements and Disclosures*?

**.02 Interpretation**—In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments held by a trust, simply receiving a confirmation from the trustee, either in aggregate or on an investment-by-investment basis, does not in and of itself constitute adequate audit evidence with respect to the requirements for auditing the fair value of the interest in the trust under section 328. In addition, receiving confirmation from the trustee for investments in aggregate (illustrated by the first two bullets above) does not constitute adequate audit evidence with respect to the existence assertion. Receiving confirmation from the trustee on an investment-by-investment basis (illustrated by the third bullet above), however, typically would constitute adequate audit evidence with respect to the existence assertion. Also, as noted in section 328.04, in discussing management's responsibility for making fair value measurements:

Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

**.03** In addition, section 328 discusses the auditor's responsibility dealing with:

- Understanding the entity's process for determining fair value measurements and disclosures and the relevant controls, and assessing risk
- Evaluating conformity of fair value measurements and disclosures with GAAP
- Engaging a specialist, where necessary
- Testing the entity's fair value measurements and disclosures
- Disclosures about fair values
- Evaluating the results of audit procedures
- Management representations
- Communication with audit committees

**.04** In circumstances in which the auditor is unable to audit the existence or measurement of interests in trusts at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to either qualify his or her opinion or to disclaim an opinion, as discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .22 to .26.

[Issue Date: July, 2005.]

## AU Section 329

# Analytical Procedures

(Supersedes section 318)

Source: SAS No. 56; SAS No. 96.

**Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.**

**.01** This section provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits.

**.02** Analytical procedures are an important part of the audit process and consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures range from simple comparisons to the use of complex models involving many relationships and elements of data. A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary. Particular conditions that can cause variations in these relationships include, for example, specific unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements.

**.03** Understanding financial relationships is essential in planning and evaluating the results of analytical procedures, and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

**.04** Analytical procedures are used for the following purposes:

- a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures
- b. As a substantive test to obtain audit evidence about particular assertions related to account balances or classes of transactions
- c. As an overall review of the financial information in the final review stage of the audit

Analytical procedures should be applied to some extent for the purposes referred to in (a) and (c) above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives. [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.05** Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible

relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes
- b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data
- c. Relationships among elements of financial information within the period
- d. Information regarding the industry in which the client operates—for example, gross margin information
- e. Relationships of financial information with relevant nonfinancial information

## Analytical Procedures in Planning the Audit

**.06** The purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (a) enhancing the auditor's understanding of the client's business and the transactions and events that have occurred since the last audit date, and (b) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events, and amounts, ratios and trends that might indicate matters that have financial statement and audit planning ramifications. [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.07** Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

**.08** Although analytical procedures used in planning the audit often use only financial data, sometimes relevant nonfinancial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

## Analytical Procedures Used as Substantive Tests

**.09** The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion<sup>1</sup> may be derived from tests of details, from

---

<sup>1</sup> Assertions are representations by management that are embodied in financial statement components. See section 326, *Audit Evidence*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment on the expected effectiveness and efficiency of the available procedures.

**.10** The auditor considers the level of assurance, if any, he wants from substantive testing for a particular audit objective and decides, among other things, which procedure, or combination of procedures, can provide that level of assurance. For some assertions, analytical procedures are effective in providing the appropriate level of assurance. For other assertions, however, analytical procedures may not be as effective or efficient as tests of details in providing the desired level of assurance.

**.11** The expected effectiveness and efficiency of an analytical procedure in identifying potential misstatements depends on, among other things, (a) the nature of the assertion, (b) the plausibility and predictability of the relationship, (c) the availability and reliability of the data used to develop the expectation, and (d) the precision of the expectation.

### **Nature of Assertion**

**.12** Analytical procedures may be effective and efficient tests for assertions in which potential misstatements would not be apparent from an examination of the detailed evidence or in which detailed evidence is not readily available. For example, comparisons of aggregate salaries paid with the number of personnel may indicate unauthorized payments that may not be apparent from testing individual transactions. Differences from expected relationships may also indicate potential omissions when independent evidence that an individual transaction should have been recorded may not be readily available.

### **Plausibility and Predictability of the Relationship**

**.13** It is important for the auditor to understand the reasons that make relationships plausible because data sometimes appear to be related when they are not, which could lead the auditor to erroneous conclusions. In addition, the presence of an unexpected relationship can provide important evidence when appropriately scrutinized.

**.14** As higher levels of assurance are desired from analytical procedures, more predictable relationships are required to develop the expectation. Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment. Relationships involving income statement accounts tend to be more predictable than relationships involving only balance sheet accounts since income statement accounts represent transactions over a period of time, whereas balance sheet accounts represent amounts as of a point in time. Relationships involving transactions subject to management discretion are sometimes less predictable. For example, management may elect to incur maintenance expense rather than replace plant and equipment, or they may delay advertising expenditures.

### **Availability and Reliability of Data**

**.15** Data may or may not be readily available to develop expectations for some assertions. For example, to test the completeness assertion, expected sales for some entities might be developed from production statistics or square feet of selling space. For other entities, data relevant to the assertion of completeness of sales may not be readily available, and it may be more effective or efficient to use the details of shipping records to test that assertion.

**.16** The auditor obtains assurance from analytical procedures based upon the consistency of the recorded amounts with expectations developed from data derived from other sources. The reliability of the data used to develop the expectations should be appropriate for the desired level of assurance from the analytical procedure. The auditor should assess the reliability of the data by considering the source of the data and the conditions under which it was gathered, as well as other knowledge the auditor may have about the data. The following factors influence the auditor's consideration of the reliability of data for purposes of achieving audit objectives:

- Whether the data was obtained from independent sources outside the entity or from sources within the entity
- Whether sources within the entity were independent of those who are responsible for the amount being audited
- Whether the data was developed under a reliable system with adequate controls
- Whether the data was subjected to audit testing in the current or prior year
- Whether the expectations were developed using data from a variety of sources

### **Precision of the Expectation**

**.17** The expectation should be precise enough to provide the desired level of assurance that differences that may be potential material misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate (see paragraph .20). As expectations become more precise, the range of expected differences becomes narrower and, accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. The precision of the expectation depends on, among other things, the auditor's identification and consideration of factors that significantly affect the amount being audited and the level of detail of data used to develop the expectation.

**.18** Many factors can influence financial relationships. For example, sales are affected by prices, volume and product mix. Each of these, in turn, may be affected by a number of factors, and offsetting factors can obscure misstatements. More effective identification of factors that significantly affect the relationship is generally needed as the desired level of assurance from analytical procedures increases.

**.19** Expectations developed at a detailed level generally have a greater chance of detecting misstatement of a given amount than do broad comparisons. Monthly amounts will generally be more effective than annual amounts and comparisons by location or line of business usually will be more effective than company-wide comparisons. The level of detail that is appropriate will be influenced by the nature of the client, its size and its complexity. Generally, the risk that material misstatement could be obscured by offsetting factors increases as a client's operations become more complex and more diversified. Disaggregation helps reduce this risk.

### **Investigation and Evaluation of Significant Differences**

**.20** In planning the analytical procedures as a substantive test, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced

primarily by materiality and should be consistent with the level of assurance desired from the procedures. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balances, or class of transactions, or other balances or classes could aggregate to an unacceptable amount.<sup>2</sup>

**.21** The auditor should evaluate significant unexpected differences. Reconsidering the methods and factors used in developing the expectation and inquiry of management may assist the auditor in this regard. Management responses, however, should ordinarily be corroborated with other audit evidence. In those cases when an explanation for the difference cannot be obtained, the auditor should obtain sufficient evidence about the assertion by performing other audit procedures to satisfy himself as to whether the difference is a likely misstatement.<sup>3</sup> In designing such other procedures, the auditor should consider that unexplained differences may indicate an increased risk of material misstatement. (See section 316, *Consideration of Fraud in a Financial Statement Audit*.) [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Documentation of Substantive Analytical Procedures

**.22** When an analytical procedure is used as the principal substantive test of a significant financial statement assertion, the auditor should document all of the following:

- a. The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- b. Results of the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts
- c. Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

[Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96.]

## Analytical Procedures Used in the Overall Review

**.23** The objective of analytical procedures used in the overall review stage of the audit is to assist the auditor in assessing the conclusions reached and in the evaluation of the overall financial statement presentation. A wide variety of analytical procedures may be useful for this purpose. The overall review would generally include reading the financial statements and notes and considering (a) the adequacy of evidence gathered in response to unusual or unexpected balances identified in planning the audit or in the course of the audit and (b) unusual or unexpected balances or relationships that were not previously identified. Results of an overall review may indicate that additional evidence may be needed. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

---

<sup>2</sup> See section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraphs .24 through .26.

<sup>3</sup> See section 312.35.

## Effective Date

.24 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

## AU Section 330

### *The Confirmation Process*

(Supersedes section 331.03-.08)

Source: SAS No. 67.

Effective for audits of fiscal periods ending after June 15, 1992, unless otherwise indicated.

### Introduction and Applicability

**.01** This section provides guidance about the confirmation process in audits performed in accordance with generally accepted auditing standards. This section—

- Defines the confirmation process (see paragraph .04).
- Discusses the relationship of confirmation procedures to the auditor's assessment of audit risk (see paragraphs .05 through .10).
- Describes certain factors that affect the reliability of confirmations (see paragraphs .16 through .27).
- Provides guidance on performing alternative procedures when responses to confirmation requests are not received (see paragraphs .31 and .32).
- Provides guidance on evaluating the results of confirmation procedures (see paragraph .33).
- Specifically addresses the confirmation of accounts receivable and supersedes section 331, *Inventories*, paragraphs .03–.08 and the portion of section 331.01 that addresses the confirmation of receivables (see paragraphs .34 and .35). This section does not supersede the portion of section 331.01 that addresses the observation of inventories.

**.02** This section does not address the extent or timing of confirmation procedures. Guidance on the extent of audit procedures (that is, considerations involved in determining the number of items to confirm) is found in section 350, *Audit Sampling*, and section 312, *Audit Risk and Materiality in Conducting an Audit*. Guidance on the timing of audit procedures is included in section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 110.]

**.03** In addition, this section does not address matters described in section 336, *Using the Work of a Specialist*, or in section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*.

### Definition of the Confirmation Process

**.04** Confirmation is the process of obtaining and evaluating a direct communication from a third party in response to a request for information

about a particular item affecting financial statement assertions. The process includes—

- Selecting items for which confirmations are to be requested.
- Designing the confirmation request.
- Communicating the confirmation request to the appropriate third party.
- Obtaining the response from the third party.
- Evaluating the information, or lack thereof, provided by the third party about the audit objectives, including the reliability of that information.

## Relationship of Confirmation Procedures to the Auditor's Assessment of Audit Risk

**.05** Section 312 discusses the audit risk model. It describes the concept of assessing inherent and control risks, determining the acceptable level of detection risk, and designing an audit program to achieve an appropriately low level of audit risk. The auditor uses the audit risk assessment in determining the audit procedures to be applied, including whether they should include confirmation.

**.06** Confirmation is undertaken to obtain evidence from third parties about financial statement assertions made by management. Section 326, *Audit Evidence*, states that, in general, it is presumed that "Audit evidence is more reliable when it is obtained from knowledgeable independent sources outside the entity." [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.07** The greater the combined assessed level of inherent and control risk, the greater the assurance that the auditor needs from substantive tests related to a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk increases, the auditor designs substantive tests to obtain more or different evidence about a financial statement assertion. In these situations, the auditor might use confirmation procedures rather than or in conjunction with tests directed toward documents or parties within the entity.

**.08** Unusual or complex transactions may be associated with high levels of inherent risk and control risk. If the entity has entered into an unusual or complex transaction and the combined assessed level of inherent and control risk is high, the auditor should consider confirming the terms of the transaction with the other parties in addition to examining documentation held by the entity. For example, if the combined assessed level of inherent and control risk over the occurrence of revenue related to an unusual, year-end sale is high, the auditor should consider confirming the terms of that sale.

**.09** The auditor should assess whether the evidence provided by confirmations reduces audit risk for the related assertions to an acceptably low level. In making that assessment, the auditor should consider the materiality of the account balance and his or her inherent and control risk assessments. When the auditor concludes that evidence provided by confirmations alone is not sufficient, additional procedures should be performed. For example, to achieve an appropriately low level of audit risk related to the completeness and existence assertions for accounts receivable, an auditor may perform sales cutoff tests in addition to confirming accounts receivable.

.10 The lower the combined assessed level of inherent and control risk, the less assurance the auditor needs from substantive tests to form a conclusion about a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk decreases for a particular assertion, the auditor may modify substantive tests by changing their nature from more effective (but costly) tests to less effective (and less costly) tests. For example, if the combined assessed level of inherent and control risk over the existence of cash is low, the auditor might limit substantive procedures to inspecting client-provided bank statements rather than confirming cash balances.

## Assertions Addressed by Confirmations

.11 For the evidence obtained to be competent, it must be reliable and relevant. Factors affecting the reliability of confirmations are discussed in paragraphs .16 through .27. The relevance of evidence depends on its relationship to the financial statement assertion being addressed. Section 326 classifies financial statement assertions into five categories:

- a. Existence or occurrence
- b. Completeness
- c. Rights and obligations
- d. Valuation or allocation
- e. Presentation and disclosure

.12 Confirmation requests, if properly designed by the auditor, may address any one or more of those assertions. However, confirmations do not address all assertions equally well. Confirmation of goods held on consignment with the consignee would likely be more effective for the existence and the rights-and-obligations assertions than for the valuation assertion. Accounts receivable confirmations are likely to be more effective for the existence assertion than for the completeness and valuation assertions. Thus, when obtaining evidence for assertions not adequately addressed by confirmations, auditors should consider other audit procedures to complement confirmation procedures or to be used instead of confirmation procedures.

.13 Confirmation requests can be designed to elicit evidence that addresses the completeness assertion: that is, if properly designed, confirmations may provide evidence to aid in assessing whether all transactions and accounts that should be included in the financial statements are included. Their effectiveness in addressing the completeness assertion depends, in part, on whether the auditor selects from an appropriate population for testing. For example, when using confirmations to provide evidence about the completeness assertion for accounts payable, the appropriate population might be a list of vendors rather than the amounts recorded in the accounts payable subsidiary ledger.

.14 Some confirmation requests are not designed to elicit evidence regarding the completeness assertion. For example, the AICPA Standard Form to Confirm Account Balance Information With Financial Institutions is designed to substantiate information that is stated on the confirmation request; the form is not designed to provide assurance that information about accounts not listed on the form will be reported.

## The Confirmation Process

.15 The auditor should exercise an appropriate level of professional skepticism throughout the confirmation process (see section 230, *Due Professional*

*Care in the Performance of Work*). Professional skepticism is important in designing the confirmation request, performing the confirmation procedures, and evaluating the results of the confirmation procedures.

## Designing the Confirmation Request

.16 Confirmation requests should be tailored to the specific audit objectives. Thus, when designing the confirmation requests, the auditor should consider the assertion(s) being addressed and the factors that are likely to affect the reliability of the confirmations. Factors such as the form of the confirmation request, prior experience on the audit or similar engagements, the nature of the information being confirmed, and the intended respondent should affect the design of the requests because these factors have a direct effect on the reliability of the evidence obtained through confirmation procedures.

### Form of Confirmation Request

.17 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.18 Positive forms provide audit evidence only when responses are received from the recipients; nonresponses do not provide audit evidence about the financial statement assertions being addressed.

.19 Since there is a risk that recipients of a positive form of confirmation request with the information to be confirmed contained on it may sign and return the confirmation without verifying that the information is correct, blank forms may be used as one way to mitigate this risk. Thus, the use of blank confirmation requests may provide a greater degree of assurance about the information confirmed. However, blank forms might result in lower response rates because additional effort may be required of the recipients; consequently, the auditor may have to perform more alternative procedures.

.20 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (a) the combined assessed level of inherent and control risk is low, (b) a large number of small balances is involved, and (c) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration. For example, in the examination of demand deposit accounts in a financial institution, it may be appropriate for an auditor to include negative confirmation requests with the customers' regular statements when the combined assessed level of inherent and control risk is low and the auditor has no reason to believe that the recipients will not consider the requests. The auditor should consider performing other substantive procedures to supplement the use of negative confirmations.

.21 Negative confirmation requests may generate responses indicating misstatements, and are more likely to do so if the auditor sends a large number of negative confirmation requests and such misstatements are widespread. The auditor should investigate relevant information provided on negative confirmations that have been returned to the auditor to determine the effect such information may have on the audit. If the auditor's investigation

of responses to negative confirmation requests indicates a pattern of misstatements, the auditor should reconsider his or her combined assessed level of inherent and control risk and consider the effect on planned audit procedures.

**.22** Although returned negative confirmations may provide evidence about the financial statement assertions, unreturned negative confirmation requests rarely provide significant evidence concerning financial statement assertions other than certain aspects of the existence assertion. For example, negative confirmations may provide some evidence of the existence of third parties if they are not returned with an indication that the addressees are unknown. However, unreturned negative confirmations do not provide explicit evidence that the intended third parties received the confirmation requests and verified that the information contained on them is correct.

### ***Prior Experience***

**.23** In determining the effectiveness and efficiency of employing confirmation procedures, the auditor may consider information from prior years' audits or audits of similar entities. This information includes response rates, knowledge of misstatements identified during prior years' audits, and any knowledge of inaccurate information on returned confirmations. For example, if the auditor has experienced poor response rates to properly designed confirmation requests in prior audits, the auditor may instead consider obtaining audit evidence from other sources.

### ***Nature of Information Being Confirmed***

**.24** When designing confirmation requests, the auditor should consider the types of information respondents will be readily able to confirm, since the nature of the information being confirmed may directly affect the competence of the evidence obtained as well as the response rate. For example, certain respondents' accounting systems may facilitate the confirmation of single transactions rather than of entire account balances. In addition, respondents may not be able to confirm the balances of their installment loans, but they may be able to confirm whether their payments are up-to-date, the amount of the payment, and the key terms of their loans.

**.25** The auditor's understanding of the client's arrangements and transactions with third parties is key to determining the information to be confirmed. The auditor should obtain an understanding of the substance of such arrangements and transactions to determine the appropriate information to include on the confirmation request. The auditor should consider requesting confirmation of the terms of unusual agreements or transactions, such as bill and hold sales,<sup>1</sup> in addition to the amounts. The auditor also should consider whether there may be oral modifications to agreements, such as unusual payment terms or liberal rights of return. When the auditor believes there is a moderate or high degree of risk that there may be significant oral modifications, he or she should inquire about the existence and details of any such modifications to written agreements. One method of doing so is to confirm both the terms of the agreements and whether any oral modifications exist.

### ***Respondent***

**.26** The auditor should direct the confirmation request to a third party who the auditor believes is knowledgeable about the information to be confirmed.

---

<sup>1</sup> Bill and hold sales are sales of merchandise that are billed to customers before delivery and are held by the entity for the customers.

For example, to confirm a client's oral and written guarantees with a financial institution, the auditor should direct the request to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements.

**.27** If information about the respondent's competence, knowledge, motivation, ability, or willingness to respond, or about the respondent's objectivity and freedom from bias with respect to the audited entity<sup>2</sup> comes to the auditor's attention, the auditor should consider the effects of such information on designing the confirmation request and evaluating the results, including determining whether other procedures are necessary. In addition, there may be circumstances (such as for significant, unusual year-end transactions that have a material effect on the financial statements or where the respondent is the custodian of a material amount of the audited entity's assets) in which the auditor should exercise a heightened degree of professional skepticism relative to these factors about the respondent. In these circumstances, the auditor should consider whether there is sufficient basis for concluding that the confirmation request is being sent to a respondent from whom the auditor can expect the response will provide meaningful and competent evidence.

## Performing Confirmation Procedures

**.28** During the performance of confirmation procedures, the auditor should maintain control over the confirmation requests and responses. Maintaining control<sup>3</sup> means establishing direct communication between the intended recipient and the auditor to minimize the possibility that the results will be biased because of interception and alteration of the confirmation requests or responses.

**.29** There may be situations in which the respondent, because of timeliness or other considerations, responds to a confirmation request other than in a written communication mailed to the auditor. When such responses are received, additional evidence may be required to support their validity. For example, facsimile responses involve risks because of the difficulty of ascertaining the sources of the responses. To restrict the risks associated with facsimile responses and treat the confirmations as valid audit evidence, the auditor should consider taking certain precautions, such as verifying the source and contents of a facsimile response in a telephone call to the purported sender. In addition, the auditor should consider requesting the purported sender to mail the *original* confirmation directly to the auditor. Oral confirmations should be documented in the workpapers. If the information in the oral confirmations is significant, the auditor should request the parties involved to submit written confirmation of the specific information directly to the auditor.

**.30** When using confirmation requests other than the negative form, the auditor should generally follow up with a second and sometimes a third request to those parties from whom replies have not been received.

---

<sup>2</sup> Section 334, *Related Parties*, paragraphs .09 and .10, provide guidance on examining related-party transactions that have been identified by the auditor.

<sup>3</sup> The need to maintain control does not preclude the use of internal auditors in the confirmation process. Section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, provides guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor.

## Alternative Procedures

.31 When the auditor has not received replies to positive confirmation requests, he or she should apply alternative procedures to the nonresponses to obtain the evidence necessary to reduce audit risk to an acceptably low level. However, the omission of alternative procedures may be acceptable (a) when the auditor has not identified unusual qualitative factors or systematic characteristics related to the nonresponses, such as that all nonresponses pertain to year-end transactions, and (b) when testing for overstatement of amounts, the nonresponses in the aggregate, when projected as 100 percent misstatements to the population and added to the sum of all other unadjusted differences, would not affect the auditor's decision about whether the financial statements are materially misstated.

.32 The nature of alternative procedures varies according to the account and assertion in question. In the examination of accounts receivable, for example, alternative procedures may include examination of subsequent cash receipts (including matching such receipts with the actual items being paid), shipping documents, or other client documentation to provide evidence for the existence assertion. In the examination of accounts payable, for example, alternative procedures may include examination of subsequent cash disbursements, correspondence from third parties, or other records to provide evidence for the completeness assertion.

## Evaluating the Results of Confirmation Procedures

.33 After performing any alternative procedures, the auditor should evaluate the combined evidence provided by the confirmations and the alternative procedures to determine whether sufficient evidence has been obtained about all the applicable financial statement assertions. In performing that evaluation, the auditor should consider (a) the reliability of the confirmations and alternative procedures; (b) the nature of any exceptions, including the implications, both quantitative and qualitative, of those exceptions; (c) the evidence provided by other procedures; and (d) whether additional evidence is needed. If the combined evidence provided by the confirmations, alternative procedures, and other procedures is not sufficient, the auditor should request additional confirmations or extend other tests, such as tests of details or analytical procedures.

## Confirmation of Accounts Receivable

.34 For the purpose of this section, *accounts receivable* means—

- a. The entity's claims against customers that have arisen from the sale of goods or services in the normal course of business, and
- b. A financial institution's loans.

Confirmation of accounts receivable is a generally accepted auditing procedure. As discussed in paragraph .06, it is generally presumed that evidence obtained from third parties will provide the auditor with higher-quality audit evidence than is typically available from within the entity. Thus, there is a presumption that the auditor will request the confirmation of accounts receivable during an audit unless one of the following is true:

- Accounts receivable are immaterial to the financial statements.

- The use of confirmations would be ineffective.<sup>4</sup>
- The auditor's combined assessed level of inherent and control risk is low, and the assessed level, in conjunction with the evidence expected to be provided by analytical procedures or other substantive tests of details, is sufficient to reduce audit risk to an acceptably low level for the applicable financial statement assertions. In many situations, both confirmation of accounts receivable and other substantive tests of details are necessary to reduce audit risk to an acceptably low level for the applicable financial statement assertions.

**.35** An auditor who has not requested confirmations in the examination of accounts receivable should document how he or she overcame this presumption.

## Effective Date

**.36** This section is effective for audits of fiscal periods ending after June 15, 1992. Early application of this section is permissible.

---

[The next page is 485.]

---

<sup>4</sup> For example, if, based on prior years' audit experience or on experience with similar engagements, the auditor concludes that response rates to properly designed confirmation requests will be inadequate, or if responses are known or expected to be unreliable, the auditor may determine that the use of confirmations would be ineffective.

## AU Section 331

### *Inventories\**

Source: SAS No. 1, section 331; SAS No. 43; SAS No. 67.

Issue date, unless otherwise indicated: November, 1972.

**.01** Observation of inventories is a generally accepted auditing procedure. The independent auditor who issues an opinion when he has not employed them must bear in mind that he has the burden of justifying the opinion expressed. [As amended, effective for fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.]

**.02** The purpose of this section is to provide guidelines for the independent auditor in observing inventories. This section relates only to observation of inventories and does not deal with other important auditing procedures which generally are required for the independent auditor to satisfy himself as to these assets. [Revised, December 1991, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 67.]

### Receivables

[.03-.08] [Superseded November 1991 by Statement on Auditing Standards No. 67.]<sup>[1-2]</sup>

### Inventories

**.09** When inventory quantities are determined solely by means of a physical count, and all counts are made as of the balance-sheet date or as of a single date within a reasonable time before or after the balance-sheet date, it is ordinarily necessary for the independent auditor to be present at the time of count and, by suitable observation, tests, and inquiries, satisfy himself respecting the effectiveness of the methods of inventory-taking and the measure of reliance which may be placed upon the client's representations about the quantities and physical condition of the inventories.

**.10** When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor's observation procedures usually can be performed either during or after the end of the period under audit.

**.11** In recent years, some companies have developed inventory controls or methods of determining inventories, including statistical sampling, which are highly effective in determining inventory quantities and which are sufficiently reliable to make unnecessary an annual physical count of each item of inventory. In such circumstances, the independent auditor must satisfy himself that

---

\* Title amended, effective for audits of fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.

<sup>[1-2]</sup> [Superseded November 1991, by Statement on Auditing Standards No. 67.]

the client's procedures or methods are sufficiently reliable to produce results substantially the same as those which would be obtained by a count of all items each year. The auditor must be present to observe such counts as he deems necessary and must satisfy himself as to the effectiveness of the counting procedures used. If statistical sampling methods are used by the client in the taking of the physical inventory, the auditor must be satisfied that the sampling plan is reasonable and statistically valid, that it has been properly applied, and that the results are reasonable in the circumstances. [Revised, June 1981, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 39.]

**.12** When the independent auditor has not satisfied himself as to inventories in the possession of the client through the procedures described in paragraphs .09 through .11, tests of the accounting records alone will not be sufficient for him to become satisfied as to quantities; it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions. This should be coupled with inspection of the records of any client's counts and procedures relating to the physical inventory on which the balance-sheet inventory is based.

**.13** The independent auditor may be asked to audit financial statements covering the current period and one or more periods for which he had not observed or made some physical counts of prior inventories. He may, nevertheless, be able to become satisfied as to such prior inventories through appropriate procedures, such as tests of prior transactions, reviews of the records of prior counts, and the application of gross profit tests, provided that he has been able to become satisfied as to the current inventory.

### Inventories Held in Public Warehouses<sup>3</sup>

**.14** If inventories are in the hands of public warehouses or other outside custodians, the auditor ordinarily would obtain direct confirmation in writing from the custodian. If such inventories represent a significant proportion of current or total assets, to obtain reasonable assurance with respect to their existence, the auditor should apply one or more of the following procedures as he considers necessary in the circumstances.

- a. Test the owner's procedures for investigating the warehouseman and evaluating the warehouseman's performance.
- b. Obtain an independent accountant's report on the warehouseman's control procedures relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that information received from the warehouseman is reliable.
- c. Observe physical counts of the goods, if practicable and reasonable.
- d. If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts (on a test basis, if appropriate).

[As amended, effective after August 31, 1982, by Statement on Auditing Standards No. 43.]

---

<sup>3</sup> See section 901 for Special Report of Committee on Auditing Procedure.

## Effect on the Auditor's Report

.15 For a discussion of the circumstances relating to receivables and inventories affecting the independent auditor's report, see sections 508.24 and 508.67. [As amended, effective for periods ending on or after December 31, 1974, by Statement on Auditing Standards No. 2. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, effective after August 1982.]

---

[The next page is 489.]

## **AU Section 9331**

## AU Section 332

# Auditing Derivative Instruments, Hedging Activities, and Investments in Securities<sup>1</sup>

(Supersedes SAS No. 81)

Source: SAS No. 92.

See section 9332 for interpretations of this section.

Effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.

### Applicability

.01 This section provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities<sup>2</sup> that are made in an entity's financial statements.<sup>3</sup> Those assertions<sup>4</sup> are classified according to three broad categories that are discussed in section 326, *Audit Evidence*, paragraphs .14–.19, as follows:

- a. Assertions about classes of transactions and events for the period under audit:
  - i. *Occurrence*. Transactions and events that have been recorded have occurred and pertain to the entity.
  - ii. *Completeness*. All transactions and events that should have been recorded have been recorded.
  - iii. *Accuracy*. Amounts and other data relating to recorded transactions and events have been recorded appropriately.
  - iv. *Cutoff*. Transactions and events have been recorded in the correct accounting period.
  - v. *Classification*. Transactions and events have been recorded in the proper accounts.
- b. Assertions about account balances at the period end:
  - i. *Existence*. Assets, liabilities, and equity interests exist.
  - ii. *Rights and obligations*. The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.

---

<sup>1</sup> The AICPA will issue an Audit Guide section entitled *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (the Guide). The Guide provides practical guidance for implementing this section.

<sup>2</sup> Throughout the remainder of this section, the word *security* or *securities* refers to an entity's investment in a security or securities.

<sup>3</sup> The guidance provided in this section applies to audits of financial statements prepared in accordance with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. Such other bases of accounting are described in section 623, *Special Reports*, paragraph .04. References in this section to generally accepted accounting principles are intended to also refer to other comprehensive bases of accounting when the reference is relevant to the basis of accounting used.

<sup>4</sup> Throughout the remainder of this section, the word *assertion* refers to an assertion made in an entity's financial statements.

- iii. *Completeness.* All assets, liabilities, and equity interests that should have been recorded have been recorded.
- iv. *Valuation and allocation.* Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.
- c. Assertions about presentation and disclosure:
  - i. *Occurrence and rights and obligations.* Disclosed events and transactions have occurred and pertain to the entity.
  - ii. *Completeness.* All disclosures that should have been included in the financial statements have been included.
  - iii. *Classification and understandability.* Financial information is appropriately presented and described and disclosures are clearly expressed.
  - iv. *Accuracy and valuation.* Financial and other information are disclosed fairly and at appropriate amounts.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

## Derivative Instruments and Hedging Activities Included in the Scope of this Section

.02 The guidance in this section applies to derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), of all entities. This section uses the definition of derivative that is in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (Statement) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended [AC section D50] (hereinafter referred to as FASB Statement No. 133). FASB Statement No. 133 addresses the accounting for derivatives that are either freestanding or embedded in contracts or agreements. For purposes of applying the guidance in this section, a derivative is a financial instrument or other contract with all three of the characteristics listed in FASB Statement No. 133, which are the following.

- a. It has (1) one or more underlyings and (2) one or more notional amounts or payment provisions or both. Those terms determine the amount of the settlement or settlements, and, in some cases, whether or not settlement is required.
- b. It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c. Its terms require or permit net settlement, it can readily be settled net by a means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

.03 An entity may enter into a derivative<sup>5</sup> for investment purposes or to designate it as a hedge of exposure to changes in fair value (referred to as a *fair value hedge*), exposure to variability in cash flows (referred to as a *cash flow hedge*), or foreign currency exposure. The guidance in this section applies to hedging activities in which the entity designates a derivative or a nonderivative

---

<sup>5</sup> To simplify the use of terminology, the remainder of this section often uses the term *derivative* to refer to both the derivative and the purpose for which the entity uses it.

financial instrument as a hedge of exposure for which FASB Statement No. 133 permits hedge accounting.

## Securities Included in the Scope of this Section

.04 The guidance in this section applies to all securities. There are two types of securities—debt securities and equity securities. This section uses the definitions of debt security and equity security that are in FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* [AC section I80]. This section applies to debt and equity securities without regard to whether they are subject to the accounting requirements of FASB Statement No. 115. For example, it applies to assertions about securities accounted for under the equity method following the requirements of Accounting Principles Board Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* [AC section I82].

## The Need for Special Skill or Knowledge to Plan and Perform Auditing Procedures

.05 The auditor may need special skill or knowledge to plan and perform auditing procedures for certain assertions about derivatives and securities. Examples of such auditing procedures and the special skill or knowledge required include—

- Obtaining an understanding of an entity's information system for derivatives and securities, including services provided by a service organization, which may require that the auditor have special skill or knowledge with respect to computer applications when significant information about derivatives and securities is transmitted, processed, maintained, or accessed electronically.
- Identifying controls placed in operation by a service organization that provides services to an entity that are part of the entity's information system for derivatives and securities, which may require that the auditor have an understanding of the operating characteristics of entities in a certain industry.
- Understanding the application of generally accepted accounting principles for assertions about derivatives, which might require that the auditor have special knowledge because of the complexity of those principles. In addition, a derivative may have complex features that require the auditor to have special knowledge to evaluate the measurement and disclosure of the derivative in conformity with generally accepted accounting principles. For example, features embedded in contracts or agreements may require separate accounting as a derivative, and complex pricing structures may increase the complexity of the assumptions used in estimating the fair value of a derivative.
- Understanding the determination of the fair values of derivatives and securities, including the appropriateness of various types of valuation models and the reasonableness of key factors and assumptions, which may require knowledge of valuation concepts.
- Assessing inherent risk and control risk for assertions about derivatives used in hedging activities, which may require an understanding of general risk management concepts and typical asset/liability management strategies.

**.06** The auditor may plan to seek the assistance of employees of the auditor's firm, or others outside the firm, with the necessary skill or knowledge. Section 311, *Planning and Supervision*, provides guidance on the use of individuals who serve as members of the audit team and assist the auditor in planning and performing auditing procedures. The auditor also may plan to use the work of a specialist. Section 336, *Using the Work of a Specialist*, provides guidance on the use of the work of specialists as audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Audit Risk and Materiality

**.07** Section 312, *Audit Risk and Materiality in Conducting an Audit*, provides guidance on the auditor's consideration of audit risk and materiality when planning and performing an audit of financial statements in accordance with generally accepted auditing standards. It requires the auditor to design procedures to obtain reasonable assurance of detecting misstatements of assertions about derivatives and securities that, when aggregated with misstatements of other assertions, could cause the financial statements taken as a whole to be materially misstated. When designing such procedures, the auditor should consider the inherent risk and control risk for these assertions. The auditor may also consider the work performed by the entity's internal auditors in designing procedures. Guidance on considering the work performed by internal auditors is found in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

## Inherent Risk Assessment

**.08** The inherent risk for an assertion about a derivative or security is its susceptibility to a material misstatement, assuming there are no related controls. Examples of considerations that might affect the auditor's assessment of inherent risk for assertions about a derivative or security include the following.

- *Management's objectives.* Accounting requirements based on management's objectives may increase the inherent risk for certain assertions. For example, in response to management's objective of minimizing the risk of loss from changes in market conditions, the entity may enter into derivatives as hedges. The use of hedges is subject to the risk that market conditions will change in a manner other than expected when the hedge was implemented so that the hedge is no longer effective. That increases the inherent risk for certain assertions about the derivatives because in such circumstances continued application of hedge accounting would not be in conformity with generally accepted accounting principles.
- *The complexity of the features of the derivative or security.* The complexity of the features of the derivative or security may increase the complexity of measurement and disclosure considerations required by generally accepted accounting principles. For example, interest payments on a structured note may be based on two or more factors, such as one or more interest rates and the market price of certain equity securities. A formula may dictate the interaction of the factors, such as a prescribed interest rate less a multiple of another rate. The number and interaction of the factors may increase the inherent risk for assertions about the fair value of the note.

- *Whether the transaction that gave rise to the derivative or security involved the exchange of cash.* Derivatives that do not involve an initial exchange of cash are subject to an increased risk that they will not be identified for valuation and disclosure considerations. For example, a foreign exchange forward contract that is not recorded at its inception because the entity does not pay cash to enter into the contract is subject to an increased risk that it will not be identified for subsequent adjustment to fair value. Similarly, a stock warrant for a traded security that is donated to an entity is subject to an increased risk that it will not be identified for initial or continuing measurement at fair value.
- *The entity's experience with the derivative or security.* An entity's inexperience with a derivative or security increases the inherent risk for assertions about it. For example, under a new arrangement, an entity may pay a small deposit to enter into a futures contract for foreign currency to pay for purchases from an overseas supplier. The entity's inexperience with such derivatives may lead it to incorrectly account for the deposit, such as treating it as inventory cost, thereby increasing the risk that the contract will not be identified for subsequent adjustment to fair value.
- *Whether a derivative is freestanding or an embedded feature of an agreement.* Embedded derivatives are less likely to be identified by management, which increases the inherent risk for certain assertions. For example, an option to convert the principal outstanding under a loan agreement into equity securities is less likely to be identified for valuation and disclosure considerations if it is a clause in a loan agreement than if it is a freestanding agreement. Similarly, a structured note may include a provision for payments related to changes in a stock index or commodities prices that requires separate accounting.
- *Whether external factors affect the assertion.* Assertions about derivatives and securities may be affected by a variety of risks related to external factors, such as—
  - *Credit risk*, which exposes the entity to the risk of loss as a result of the issuer of a debt security or the counterparty to a derivative failing to meet its obligation.
  - *Market risk*, which exposes the entity to the risk of loss from adverse changes in market factors that affect the fair value of a derivative or security, such as interest rates, foreign exchange rates, and market indexes for equity securities.
  - *Basis risk*, which exposes the entity to the risk of loss from ineffective hedging activities. Basis risk is the difference between the fair value (or cash flows) of the hedged item and the fair value (or cash flows) of the hedging derivative. The entity is subject to the risk that fair values (or cash flows) will change so that the hedge will no longer be effective.
  - *Legal risk*, which exposes the entity to the risk of loss from a legal or regulatory action that invalidates or otherwise precludes performance by one or both parties to the derivative or security.

Following are examples of how changes in external factors can affect assertions about derivatives and securities.

- The increase in credit risk associated with amounts due under debt securities issued by entities that operate in declining

- industries increases the inherent risk for valuation assertions about those securities.
- Significant changes in and the volatility of general interest rates increase the inherent risk for the valuation of derivatives whose value is significantly affected by interest rates.
  - Significant changes in default rates and prepayments increase the inherent risk for the valuation of retained interests in a securitization.
  - The fair value of a foreign currency forward contract will be affected by changes in the exchange rate, and the fair value of a put option for an available-for-sale security will be affected by changes in the fair value of the underlying security.
- *The evolving nature of derivatives and the applicable generally accepted accounting principles.* As new forms of derivatives are developed, interpretive accounting guidance for them may not be issued until after the derivatives are broadly used in the marketplace. In addition, generally accepted accounting principles for derivatives may be subject to frequent interpretation by various standard-setting bodies. Evolving interpretive guidance and its applicability increase the inherent risk for valuation and other assertions about existing forms of derivatives.
  - *Significant reliance on outside parties.* An entity that relies on external expertise may be unable to appropriately challenge the specialist's methodology or assumptions. This may occur, for example, when a valuation specialist values a derivative.
  - *Generally accepted accounting principles may require developing assumptions about future conditions.* As the number and subjectivity of those assumptions increase, the inherent risk of material misstatement increases for certain assertions. For example, the inherent risk for valuation assertions based on assumptions about debt securities whose value fluctuates with changes in prepayments (for example, interest-only strips) increases as the expected holding period lengthens. Similarly, the inherent risk for assertions about cash flow hedges fluctuates with the subjectivity of the assumptions about probability, timing, and amounts of future cash flows.

## Control Risk Assessment

### *Obtaining an Understanding of Internal Control to Plan the Audit*

.09 Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of internal control that will enable the auditor to—

- a. Identify the risk of material misstatement at the assertion level.
- b. Assess the risk of material misstatement at the assertion level.
- c. Evaluate the design of internal controls and determine whether they are implemented.

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

**.10** Controls should be related to management's objectives for financial reporting, operations, and compliance.<sup>6</sup> For example, to achieve its objectives, management of an entity with extensive derivatives transactions may implement controls that call for—

- a. Monitoring by a control staff that is fully independent of derivatives activities.
- b. Derivatives personnel to obtain, prior to exceeding limits, at least oral approval from members of senior management who are independent of derivatives activities.
- c. Senior management to properly address limit excesses and divergences from approved derivatives strategies.
- d. The accurate transmittal of derivatives positions to the risk measurement systems.
- e. The performance of appropriate reconciliations to ensure data integrity across the full range of derivatives, including any new or existing derivatives that may be monitored apart from the main processing networks.
- f. Derivatives traders, risk managers, and senior management to define constraints on derivatives activities and justify identified excesses.
- g. Senior management, an independent group, or an individual that management designates to perform a regular review of the identified controls and financial results of the derivatives activities to determine whether controls are being effectively implemented and the entity's business objectives and strategies are being achieved.
- h. A review of limits in the context of changes in strategy, risk tolerance of the entity, and market conditions.

**.11** The extent of the understanding of internal control over derivatives and securities obtained by the auditor depends on how much information the auditor needs to identify and assess the risk of material misstatement at the assertion level. The understanding obtained may include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements. It may encompass controls placed in operation by the entity and by service organizations whose services are part of the entity's information system. Section 314.81 defines the information system as the procedures, whether automated or manual, and records established by an entity to initiate, authorize, record, process, and report entity transactions and to maintain accountability for the related assets, liabilities, and equity. Following the guidance in section 324, *Service Organizations*, a service organization's services are part of an entity's information system for derivatives and securities if they affect any of the following:

- a. How the entity's derivatives and securities transactions are initiated.
- b. The accounting records, supporting information, and specific accounts in the financial statements involved in the processing and reporting of the entity's derivatives and securities transactions

---

<sup>6</sup> The AICPA issued an Audit Guide concurrent with this section entitled *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (the Guide). Chapter 5 of the Guide, "Control Risk Assessment," provides sample control objectives for derivatives, hedging activities, and securities which may be useful to auditors in assessing control risk for relevant assertions. Additionally, in 1996, The Committee of Sponsoring Organizations of the Treadway Commission (COSO) issued *Internal Control Issues in Derivatives Usage: An Information Tool for Considering the COSO Internal Control—Integrated Framework in Derivatives Applications*. Although the document precedes FASB Statement No. 133, its guidance may be useful to entities in developing controls over derivatives transactions and to auditors in assessing control risk for assertions about those transactions.

- c. The accounting processing involved from the initiation of those transactions to their inclusion in the financial statements, including electronic means (such as computers and electronic data interchange) used to transmit, process, maintain, and access information
- d. The process the entity uses to report information about derivatives and securities transactions in its financial statements, including significant accounting estimates and disclosures

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 106, and No. 109.]

**.12** Examples of a service organization's services that would be part of an entity's information system include—

- The initiation of the purchase or sale of equity securities by a service organization acting as investment adviser or manager.
- Services that are ancillary to holding<sup>7</sup> an entity's securities such as—
  - Collecting dividend and interest income and distributing that income to the entity.
  - Receiving notification of corporate actions.
  - Receiving notification of security purchase and sale transactions.
  - Receiving payments from purchasers and disbursing proceeds to sellers for security purchase and sale transactions.
  - Maintaining records of securities transactions for the entity.
- A pricing service providing fair values of derivatives and securities through paper documents or electronic downloads that the entity uses to value its derivatives and securities for financial statement reporting.

**.13** Examples of a service organization's services that would not be part of an entity's information system are the following:

- The execution by a securities broker of trades that are initiated by either the entity or its investment adviser
- The holding of an entity's securities

**.14** An auditor who needs information about the nature of a service organization's services that are part of an entity's information system for derivatives and securities transactions, or its controls over those services, to plan the audit may be able to gather the information from a variety of sources, such as the following:

- User manuals
- System overviews
- Technical manuals
- The contract between the entity and the service organization
- Reports by auditors,<sup>8</sup> internal auditors, or regulatory authorities on the information system and other controls placed in operation by a service organization

---

<sup>7</sup> In this section, maintaining custody of securities, either in physical or electronic form, is referred to as *holding* securities, and performing ancillary services is referred to as *servicing* securities.

<sup>8</sup> Section 324 provides guidance on auditors' reports on controls placed in operation by a service organization and the operating effectiveness of those controls.

- Inquiry or observation of personnel at the entity or at the service organization

In addition, if the services and the service organization's controls over those services are highly standardized, information about the service organization's services, or its controls over those services, obtained through the auditor's prior experience with the service organization may be helpful in planning the audit.

## Assessing Control Risk

**.15** After obtaining the understanding of internal control over derivatives and securities transactions, the auditor should assess control risk for the related assertions. Guidance on that assessment is found in section 314. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

**.16** If the auditor plans to assess control risk below the maximum for one or more assertions about derivatives and securities, the auditor should identify specific controls relevant to the assertions that are likely to prevent or detect material misstatements and that have been placed in operation by either the entity or the service organization, and gather audit evidence about their operating effectiveness. Audit evidence about the operating effectiveness of a service organization's controls may be gathered through tests performed by the auditor or by an auditor engaged by either the auditor or the service organization—

- a. As part of an engagement in which a service auditor reports on the controls placed in operation by the service organization and the operating effectiveness of those controls, as described in section 324.
- b. An agreed-upon procedures engagement.<sup>9</sup>
- c. To work under the direction of the auditor of the entity's financial statements.

Confirmations of balances or transactions from a service organization do not provide audit evidence about its controls. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.17** The auditor should consider the size of the entity, the entity's organizational structure, the nature of its operations, the types, frequency, and complexity of its derivatives and securities transactions, and its controls over those transactions in designing auditing procedures for assertions about derivatives and securities. For example, if the entity has a variety of derivatives and securities that are reported at fair value estimated using valuation models, the auditor may be able to reduce the substantive procedures for valuation assertions by gathering audit evidence about the controls over the design and use of the models (including the significant assumptions) and evaluating their operating effectiveness. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.18** In some circumstances, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the entity or a service organization and gathering audit evidence about the operating effectiveness of those controls. For example, if the entity has a large number of derivatives or securities transactions, the auditor

---

<sup>9</sup> AT section 201, *Agreed-Upon Procedures Engagements*, provides guidance on applying agreed-upon procedures to controls. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

likely would be unable to reduce audit risk to an acceptable level for assertions about the occurrence of earnings on those securities, including gains and losses from sales, without identifying controls over the authorization, recording, custody, and segregation of duties for those transactions and gathering audit evidence about their operating effectiveness.<sup>10</sup> [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Designing Substantive Procedures Based on Risk Assessments

**.19** The auditor should use the assessed levels of inherent risk and control risk for assertions about derivatives and securities to determine the nature, timing, and extent of the substantive procedures to be performed to detect material misstatements of the financial statement assertions. Some substantive procedures address more than one assertion about a derivative or security. Whether one or a combination of substantive procedures should be used to address an assertion depends on the auditor's assessment of the inherent and control risk associated with it as well as the auditor's judgment about a procedure's effectiveness. Paragraphs .21 through .58 provide examples of substantive procedures that address assertions about derivatives and securities. In addition, the auditor should consider whether the results of other audit procedures conflict with management's assertions about derivatives and securities. The auditor should consider the impact of any such identified matters on management's assertions about derivatives and securities. Additionally, the auditor should consider the impact of such matters on the sufficiency of the audit evidence evaluated by the auditor in support of the assertions. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.20** The provision by a service organization of services that are part of an entity's information system may affect the nature, timing, and extent of the auditor's substantive procedures for assertions about derivatives and securities in a variety of ways. Following are examples of such services and how they may affect the nature, timing, and extent of the auditor's substantive procedures.

- Supporting documentation, such as derivative contracts and securities purchases and sales advices, may be located at the service organization's facilities. As a result, either the auditor of the entity's financial statements, an auditor working under the direction of that auditor, or an auditor engaged by the service organization may need to visit the facilities to inspect the documentation.
- Data processors, investment advisers, holders of securities, record-keepers, and other service organizations may electronically transmit, process, maintain, or access significant information about an entity's securities. In such situations, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the service organization or the entity and gathering audit evidence about the operating effectiveness of those controls.
- Service organizations may initiate securities transactions for an entity and hold and service the securities. In determining the level of detection risk for substantive tests, the auditor should consider whether

---

<sup>10</sup> See footnote 6.

there is a segregation of duties and other controls for the services provided. Examples include—

- When one service organization initiates transactions as an investment adviser and another service organization holds and services those securities, the auditor may corroborate the information provided by the two organizations. For example, the auditor may confirm holdings with the holder of the securities and apply other substantive tests to transactions reported by the entity based on information provided by the investment adviser. Depending on the facts and circumstances, the auditor also may confirm transactions or holdings with the investment adviser and review the reconciliation of differences. Paragraph .24 provides additional guidance on the auditor's considerations.
- If one service organization initiates transactions as an investment adviser and also holds and services the securities, all of the information available to the auditor is based on the service organization's information. The auditor may be unable to sufficiently limit audit risk without obtaining audit evidence about the operating effectiveness of one or more of the service organization's controls. An example of such controls is establishing independent departments that provide the investment advisory services and the holding and servicing of securities, then reconciling the information about the securities that is provided by each department.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Financial Statement Assertions

### *Existence or Occurrence*

.21 Existence assertions address whether the derivatives and securities reported in the financial statements through recognition or disclosure exist at the date of the statement of financial position. Occurrence assertions address whether derivatives and securities transactions reported in the financial statements, as a part of earnings, other comprehensive income, or cash flows or through disclosure, occurred. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for existence or occurrence assertions about derivatives and securities include—

- Confirmation with the issuer of the security.
- Confirmation with the holder of the security, including securities in electronic form, or with the counterparty to the derivative.<sup>11</sup>
- Confirmation of settled transactions with the broker-dealer or counterparty.

---

<sup>11</sup> Section 330, provides guidance to auditors in using confirmations as substantive tests of financial statement assertions. Confirmations may be used as a substantive test of various financial statement assertions about derivatives and securities. For example, a confirmation may be designed to—

- Obtain information about valuation assertions or assumptions underlying valuations.
- Determine whether there are any side agreements that affect assertions about the entity's rights and obligations associated with a transaction, such as an agreement to repurchase securities sold or an agreement to pledge securities as collateral for a loan.
- Determine whether the holder of the entity's securities agrees to deliver the securities reported or their value when required by the entity.

- Confirmation of unsettled transactions with the broker-dealer or counterparty.
- Physical inspection of the security or derivative contract.
- Reading executed partnership or similar agreements.
- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form, for the following:
  - Amounts reported
  - Evidence that would preclude the sales treatment of a transfer
  - Unrecorded repurchase agreements
- Inspecting supporting documentation for subsequent realization or settlement after the end of the reporting period.
- Performing analytical procedures.<sup>12</sup> For example, the absence of a material difference from an expectation that interest income will be a fixed percentage of a debt security based on the effective interest rate determined when the entity purchased the security provides evidence about existence of the security.

### Completeness

.22 Completeness assertions address whether all of the entity's derivatives and securities are reported in the financial statements through recognition or disclosure. They also address whether all derivatives and securities transactions are reported in the financial statements as a part of earnings, other comprehensive income, or cash flows or through disclosure. The extent of substantive procedures for completeness may properly vary in relation to the assessed level of control risk. In addition, the auditor should consider that since derivatives may not involve an initial exchange of tangible consideration, it may be difficult to limit audit risk for assertions about the completeness of derivatives to an acceptable level with an assessed level of control risk at the maximum. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for completeness assertions about derivatives and securities are—

- Requesting the counterparty to a derivative or the holder of a security to provide information about it, such as whether there are any side agreements or agreements to repurchase securities sold.
- Requesting counterparties or holders who are frequently used, but with whom the accounting records indicate there are presently no derivatives or securities, to state whether they are counterparties to derivatives with the entity or holders of its securities.<sup>13</sup>
- Inspecting financial instruments and other agreements to identify embedded derivatives.
- Inspecting documentation in paper or electronic form for activity subsequent to the end of the reporting period.
- Performing analytical procedures. For example, a difference from an expectation that interest expense is a fixed percentage of a note based

<sup>12</sup> Section 329, provides guidance to auditors in using analytical procedures as substantive tests.

<sup>13</sup> Section 330.17 discusses the blank form of positive confirmation in which the auditor does not state the amount or other information but instead asks the respondent to provide information.

on the interest provisions of the underlying agreement may indicate the existence of an interest rate swap agreement.

- Comparing previous and current account detail to identify assets that have been removed from the accounts and testing those items further to determine that the criteria for sales treatment have been met.
- Reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees.

**.23** One of the characteristics of derivatives is that they may involve only a commitment to perform under a contract and not an initial exchange of tangible consideration. Therefore, auditors designing tests related to the completeness assertion should not focus exclusively on evidence relating to cash receipts and disbursements. When testing for completeness, auditors should consider making inquiries, inspecting agreements, and reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees. Auditors should also consider making inquiries about aspects of operating activities that might present risks hedged using derivatives. For example, if the entity conducts business with foreign entities, the auditor should inquire about any arrangements the entity has made for purchasing foreign currency. Similarly, if an entity is in an industry in which commodity contracts are common, the auditor should inquire about any commodity contracts with fixed prices that run for unusual durations or involve unusually large quantities. The auditor also should consider inquiring as to whether the entity has converted interest-bearing debt from fixed to variable, or vice versa, using derivatives.

**.24** Derivatives may not involve an initial exchange of tangible consideration, as discussed in paragraphs .22 and .23. If one or more service organizations provide services that are part of the entity's information system for derivatives, the auditor may be unable to sufficiently limit audit risk for assertions about the completeness of derivatives without obtaining audit evidence about the operating effectiveness of controls at one or more of the service organizations. Since the auditor's concern is that derivatives that do not require an initial exchange of tangible consideration may not have been recorded, testing reconciliations of information provided by two or more of the service organizations as discussed in paragraph .20 of this section may not sufficiently limit audit risk for assertions about the completeness of derivatives. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

### ***Rights and Obligations***

**.25** Assertions about rights and obligations address whether the entity has the rights and obligations associated with derivatives and securities, including pledging arrangements, reported in the financial statements. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for assertions about rights and obligations associated with derivatives and securities are—

- Confirming significant terms with the counterparty to a derivative or the holder of a security, including the absence of any side agreements.
- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form.
- Considering whether the findings of other auditing procedures, such as reviewing minutes of meetings of the board of directors and reading contracts and other agreements, provide evidence about rights and

obligations, such as pledging of securities as collateral or selling securities with a commitment to repurchase them.

### **Valuation**

**.26** Assertions about the valuation of derivatives and securities address whether the amounts reported in the financial statements through measurement or disclosure were determined in conformity with generally accepted accounting principles. Tests of valuation assertions should be designed according to the valuation method used for the measurement or disclosure. Generally accepted accounting principles may require that a derivative or security be valued based on cost, the investee's financial results, or fair value. They also may require disclosures about the value of a derivative or security and specify that impairment losses should be recognized in earnings prior to their realization. Also, generally accepted accounting principles for securities may vary depending on the type of security, the nature of the transaction, management's objectives related to the security, and the type of entity. Procedures for evaluating management's consideration of the need to recognize impairment losses are discussed in paragraphs .47 and .48 of this section.

**.27** *Valuation Based on Cost.* Procedures to obtain evidence about the cost of securities may include inspection of documentation of the purchase price, confirmation with the issuer or holder, and testing discount or premium amortization, either by recomputation or analytical procedures. The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its cost that is other than temporary.

**.28** *Valuation Based on an Investee's Financial Results.* For valuations based on an investee's financial results, including but not limited to the equity method of accounting, the auditor should obtain sufficient evidence in support of the investee's financial results. The auditor should read available financial statements of the investee and the accompanying audit report, if any. Financial statements of the investee that have been audited by an auditor whose report is satisfactory, for this purpose,<sup>14</sup> to the investor's auditor may constitute appropriate audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.29** If in the auditor's judgment additional audit evidence is needed, the auditor should perform procedures to gather such evidence. For example, the auditor may conclude that additional audit evidence is needed because of significant differences in fiscal year-ends, significant differences in accounting principles, changes in ownership, changes in conditions affecting the use of the equity method, or the materiality of the investment to the investor's financial position or results of operations. Examples of procedures the auditor may perform are reviewing information in the investor's files that relates to the investee such as investee minutes and budgets and cash flows information about the investee and making inquiries of investor management about the investee's financial results. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.30** If the investee's financial statements are not audited, or if the investee auditor's report is not satisfactory to the investor's auditor for this purpose, the investor's auditor should apply, or should request that the investor arrange with

---

<sup>14</sup> In determining whether the report of another auditor is satisfactory for this purpose, the auditor may consider performing procedures such as making inquiries as to the professional reputation and standing of the other auditor, visiting the other auditor and discussing the audit procedures followed and the results thereof, and reviewing the audit program and/or working papers of the other auditor.

the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor.

**.31** If the carrying amount of the security reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, the auditor should obtain sufficient evidence in support of these amounts. Paragraphs .35 through .46 of this section provide guidance on audit evidence that may be used to corroborate assertions about the fair value of derivatives and securities, and paragraphs .47 and .48 provide guidance on procedures for evaluating management's consideration of the need to recognize impairment losses.

**.32** There may be a time lag in reporting between the date of the financial statements of the investor and that of the investee. A time lag in reporting should be consistent from period to period. If a time lag between the date of the entity's financial statements and those of the investee has a material effect on the entity's financial statements, the auditor should determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the time lag is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time lag. If a change in time lag occurs that has a material effect on the investor's financial statements, an explanatory paragraph should be added to the auditor's report because of the change in reporting period.<sup>15</sup>

**.33** The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its carrying amount that is other than temporary. In addition, with respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the investor auditor's report, the auditor should read available interim financial statements of the investee and make appropriate inquiries of the investor to identify subsequent events and transactions that are material to the investor's financial statements. Such events or transactions of the type contemplated in section 560, *Subsequent Events*, paragraphs .05-.06), should be disclosed in the notes to the investor's financial statements and (where applicable) labeled as unaudited information. For the purpose of recording the investor's share of the investee's results of operations, recognition should be given to events or transactions of the type contemplated in section 560.03.

**.34** Evidence relating to material transactions between the entity and the investee should be obtained to evaluate (a) the propriety of the elimination of unrealized profits and losses on transactions between the entity and the investee that is required when the equity method of accounting is used to account for an investment under generally accepted accounting principles and (b) the adequacy of disclosures about material related party transactions.

**.35** *Valuation Based on Fair Value.* The auditor should obtain evidence supporting management's assertions about the fair value of derivatives and securities measured or disclosed at fair value. The method for determining fair value may be specified by generally accepted accounting principles and may vary depending on the industry in which the entity operates or the nature of the entity. Such differences may relate to the consideration of price quotations from inactive markets and significant liquidity discounts, control premiums, and commissions and other costs that would be incurred to dispose of the derivative or security. The auditor should determine whether generally

---

<sup>15</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .16-.18.

accepted accounting principles specify the method to be used to determine the fair value of the entity's derivatives and securities and evaluate whether the determination of fair value is consistent with the specified valuation method. Paragraphs .35 through .46 of this section provide guidance on audit evidence that may be used to support assertions about fair value; that guidance should be considered in the context of specific accounting requirements. If the determination of fair value requires the use of estimates, the auditor should consider the guidance in section 342, *Auditing Accounting Estimates*. In addition, section 312.56 provides guidance on considering a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

**.36** Quoted market prices for derivatives and securities listed on national exchanges or over-the-counter markets are available from sources such as financial publications, the exchanges, the National Association of Securities Dealers Automated Quotations System (NASDAQ), or pricing services based on sources such as those. Quoted market prices obtained from those sources are generally considered to provide sufficient evidence of the fair value of the derivatives and securities.

**.37** For certain other derivatives and securities, quoted market prices may be obtained from broker-dealers who are market makers in them or through the National Quotation Bureau. However, using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed. For example, quotations published by the National Quotation Bureau may not be based on recent trades and may only be an indication of interest and not an actual price for which a counterparty will purchase or sell the underlying derivative or security.

**.38** If quoted market prices are not available for the derivative or security, estimates of fair value frequently can be obtained from broker-dealers or other third-party sources based on proprietary valuation models or from the entity based on internally or externally developed valuation models (for example, the Black-Scholes option pricing model). The auditor should understand the method used by the broker-dealer or other third-party source in developing the estimate, for example, whether a pricing model or a cash flow projection was used. The auditor may also determine that it is necessary to obtain estimates from more than one pricing source. For example, this may be appropriate if either of the following occurs.

- The pricing source has a relationship with an entity that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product.
- The valuation is based on assumptions that are highly subjective or particularly sensitive to changes in the underlying circumstances.

**.39** For fair-value estimates obtained from broker-dealers and other third-party sources, the auditor should consider the applicability of the guidance in section 336 or section 324. The auditor's decision about whether such guidance is applicable and which guidance is applicable will depend on the circumstances. The guidance in section 336 may be applicable if the third-party source derives the fair value of the derivative or security by using modeling or similar techniques. If the entity uses a pricing service to obtain prices of securities and derivatives, the guidance in section 324 may be appropriate.

**.40** If the derivative or security is valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management.<sup>16</sup> Examples of valuation models include the present value of expected future cash flows, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis.

The auditor should obtain evidence supporting management's assertions about fair value determined using a model by performing procedures such as—

- Assessing the reasonableness and appropriateness of the model. The auditor should determine whether the valuation model is appropriate for the derivative or security to which it is applied and whether the assumptions used are reasonable and appropriately supported. Estimates of expected future cash flows, for example, to determine the fair value of debt securities should be based on reasonable and supportable assumptions. The evaluation of the appropriateness of valuation models and each of the assumptions used in the models may require considerable judgment and knowledge of valuation techniques, market factors that affect value, and actual and expected market conditions, particularly in relation to similar derivatives and securities that are traded. Accordingly, the auditor may consider it necessary to involve a specialist in assessing the model.
- Calculating the value, for example using a model developed by the auditor or by a specialist engaged by the auditor, to develop an independent expectation to corroborate the reasonableness of the value calculated by the entity.
- Comparing the fair value with subsequent or recent transactions.

However, a valuation model should not be used to determine fair value when generally accepted accounting principles require that the fair value of a security be determined using quoted market prices.

**.41** Evaluating audit evidence for assertions about derivatives and securities may require the auditor to use considerable judgment. That may be because the assertions, especially those about valuation, are based on highly subjective assumptions or are particularly sensitive to changes in the underlying circumstances. Valuation assertions may be based on assumptions about the occurrence of future events for which expectations are difficult to develop or on assumptions about conditions expected to exist over a long period; for example, default rates or prepayment rates. Accordingly, competent persons could reach different conclusions about estimates of fair values or estimates of ranges of fair values. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.42** Considerable judgment may also be required in evaluating audit evidence for assertions based on features of the derivative or security and applicable accounting principles, including underlying criteria such as for hedge accounting, that are extremely complex. For example, determining the fair value of a structured note may require consideration of a variety of features of the

---

<sup>16</sup> Independence Standards Board Interpretation 99-1, *FAS 133 Assistance*, provides guidance to auditors of public companies on services an auditor may provide management to assist with the application of FASB Statement No. 133 that would and would not impair the auditor's independence. Ethics Interpretation 101-3, *Performance of Nonattest Services* [ET section 101.05], provides general guidance to auditors of all entities on the effect of nonattest services on the auditor's independence. [Footnote revised, September 2003, to reflect conforming changes necessary due to the revision of Ethics Interpretation 101-3.]

note that react differently to changes in economic conditions. In addition, one or more other derivatives may be designated to hedge changes in cash flows under the note. Evaluating audit evidence to support the fair value of the note, the determination of whether the hedge is highly effective, and the allocation of changes in fair value to earnings and other comprehensive income may require considerable judgment. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.43** In situations requiring considerable judgment, the auditor should consider the guidance in—

- a. Section 342 on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates.
- b. Section 336 on the use of the work of a specialist in performing substantive procedures.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.44** Negotiable securities, real estate, chattels, or other property is often assigned as collateral for debt securities. If the collateral is an important factor in evaluating the fair value and collectibility of the security, the auditor should obtain evidence regarding the existence, fair value, and transferability of such collateral as well as the investor's rights to the collateral.

**.45** Generally accepted accounting principles may specify how to account for unrealized appreciation and depreciation in the fair value of the entity's derivatives and securities. For example, generally accepted accounting principles require the entity to report a change in the unrealized appreciation or depreciation in the fair value of—

- A derivative that is designated as a fair value hedge in earnings, with disclosure of the ineffective portion of the hedge.
- A derivative that is designated as a cash flow hedge in two components, with the ineffective portion reported in earnings and the effective portion reported in other comprehensive income.
- A derivative that was previously designated as a hedge but is no longer highly effective, or a derivative that is not designated as a hedge, in earnings.
- An available-for-sale security in other comprehensive income.

Generally accepted accounting principles may also require the entity to reclassify amounts from accumulated other comprehensive income to earnings. For example, such reclassifications may be required because a hedged transaction is determined to no longer be probable of occurring, a hedged forecasted transaction affects earnings for the period, or a decline in fair value is determined to be other than temporary.

**.46** The auditor should evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary as discussed in paragraphs .47 and .48 of this section. The auditor should also gather audit evidence to support the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized in earnings or other comprehensive income or that is disclosed because of the ineffectiveness of a hedge. That requires an understanding of the methods used to determine whether the hedge is highly effective and to determine the ineffective portion of the hedge. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.47 Impairment Losses.** Regardless of the valuation method used, generally accepted accounting principles might require recognizing in earnings an impairment loss for a decline in fair value that is other than temporary. Determinations of whether losses are other than temporary often involve estimating the outcome of future events. Accordingly, judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors.

- Fair value is significantly below cost and—
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

**.48** The auditor should evaluate (a) whether management has considered relevant information in determining whether factors such as those listed in paragraph .47 exist and (b) management's conclusions about the need to recognize an impairment loss. That evaluation requires the auditor to obtain evidence about such factors that tend to corroborate or conflict with management's conclusions. When the entity has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the entity has appropriately followed generally accepted accounting principles.

### **Presentation and Disclosure**

**.49** Assertions about presentation and disclosure address whether the classification, description, and disclosure of derivatives and securities in the entity's financial statements are in conformity with generally accepted accounting principles. The auditor should evaluate whether the presentation and disclosure of derivatives and securities are in conformity with generally accepted accounting principles. As noted in section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*, paragraph .04, the auditor's opinion as to whether financial statements are presented in conformity with generally accepted accounting principles should be based on the auditor's judgement as to whether—

- a. The accounting principles selected and applied have general acceptance.
- b. The accounting principles are appropriate in the circumstances.
- c. The financial statements, including the related notes, are informative of matters that may affect their use, understanding, and interpretation.

- d. The information presented in the financial statements is classified and summarized in a reasonable manner, that is, neither too detailed nor too condensed.
- e. The financial statements reflect the underlying transactions and events in a manner that presents the financial position, results of operations, and cash flows stated within a range of acceptable limits, that is, limits that are reasonable and practicable to attain in financial statements.

[Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

**.50** For some derivatives and securities, generally accepted accounting principles may prescribe presentation and disclosure requirements. For example—

- Whether changes in the fair value of derivatives used to hedge risks are required to be reported as a component of earnings or other comprehensive income depends on whether they are intended to hedge the risk of changes in the fair value of assets and liabilities or changes in expected future cash flows and on the degree of effectiveness of the hedge.
- Certain securities are required to be classified into categories according to management's intent and ability, such as held-to-maturity.
- Specific information is required to be disclosed about derivatives and securities.

**.51** In evaluating the adequacy of presentation and disclosure, the auditor should consider the form, arrangement, and content of the financial statements and their notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts reported. The auditor should compare the presentation and disclosure with the requirements of generally accepted accounting principles. However, the auditor should also follow the guidance in section 431, *Adequacy of Disclosure in Financial Statements*, in evaluating the adequacy of disclosure that is not specifically required by generally accepted accounting principles.

## Additional Considerations About Hedging Activities

**.52** To account for a derivative as a hedge, generally accepted accounting principles require management at the inception of the hedge to designate the derivative as a hedge and contemporaneously formally document<sup>17</sup> the hedging relationship, the entity's risk management objective and strategy for undertaking the hedge, and the method of assessing the effectiveness of the hedge. In addition, to qualify for hedge accounting, generally accepted accounting principles require that management have an expectation, both at the inception of the hedge and on an ongoing basis, that the hedging relationship will be highly effective in achieving the hedging strategy.<sup>18</sup>

---

<sup>17</sup> FASB Statement No. 133 requires formal documentation of prescribed aspects of hedging relationships at the inception of the hedge.

<sup>18</sup> FASB Statement No. 133 requires management to periodically reassess the effectiveness of hedging relationships whenever financial statements or earnings are reported, and at least every three months. It also requires that all assessments of effectiveness be consistent with the risk management strategy documented for the particular hedging relationship.

**.53** The auditor should gather audit evidence to determine whether management complied with the hedge accounting requirements of generally accepted accounting principles, including designation and documentation requirements. In addition, the auditor should gather audit evidence to support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by generally accepted accounting principles. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.54** When the entity designates a derivative as a fair value hedge, generally accepted accounting principles require that the entity adjust the carrying amount of the hedged item for the change in the hedged item's fair value that is attributable to the hedged risk. The auditor should gather audit evidence supporting the recorded change in the hedged item's fair value that is attributable to the hedged risk. Additionally, the auditor should gather audit evidence to determine whether management has properly applied generally accepted accounting principles to the hedged item. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.55** For a cash flow hedge of a forecasted transaction, generally accepted accounting principles require management to determine that the forecasted transaction is probable of occurring. Those principles require that the likelihood that the transaction will take place not be based solely on management's intent. Instead, the transaction's probability should be supported by observable facts and the attendant circumstances, such as the following:

- The frequency of similar past transactions
- The financial and operational ability of the entity to carry out the transaction
- The extent of loss that could result if the transaction does not occur
- The likelihood that transactions with substantially different characteristics might be used to achieve the same business purpose

The auditor should evaluate management's determination of whether a forecasted transaction is probable.

## Assertions About Securities Based on Management's Intent and Ability

**.56** Generally accepted accounting principles require that management's intent and ability be considered in valuing certain securities; for example, whether—

- Debt securities are classified as held-to-maturity and reported at their cost depends on management's intent and ability to hold them to their maturity.
- Equity securities are reported using the equity method depends on management's ability to significantly influence the investee.
- Equity securities are classified as trading or available-for-sale depends on management's intent and objectives in investing in the securities.

- .57** In evaluating management's intent and ability, the auditor should—
- a. Obtain an understanding of the process used by management to classify securities as trading, available-for-sale, or held-to-maturity.
  - b. For an investment accounted for using the equity method, inquire of management as to whether the entity has the ability to exercise significant influence over the operating and financial policies of the investee and evaluate the attendant circumstances that serve as a basis for management's conclusions.
  - c. If the entity accounts for the investment contrary to the presumption established by generally accepted accounting principles for use of the equity method, obtain sufficient appropriate audit evidence about whether that presumption has been overcome and whether appropriate disclosure is made regarding the reasons for not accounting for the investment in keeping with that presumption.
  - d. Consider whether management's activities corroborate or conflict with its stated intent. For example, the auditor should evaluate an assertion that management intends to hold debt securities to their maturity by examining evidence such as documentation of management's strategies and sales and other historical activities with respect to those securities and similar securities.
  - e. Determine whether generally accepted accounting principles require management to document its intentions and specify the content and timeliness of that documentation.<sup>19</sup> The auditor should inspect the documentation and obtain audit evidence about its timeliness. Unlike the formal documentation required for hedging activities, audit evidence supporting the classification of debt and equity securities may be more informal.
  - f. Determine whether management's activities, contractual agreements, or the entity's financial condition provide evidence of its ability. Examples follow.
    - (1) The entity's financial position, working capital needs, operating results, debt agreements, guarantees, alternate sources of liquidity, and other relevant contractual obligations, as well as laws and regulations, may provide evidence about an entity's ability to hold debt securities to their maturity.
    - (2) Management's cash flow projections may suggest that it does not have the ability to hold debt securities to their maturity.
    - (3) Management's inability to obtain information from an investee may suggest that it does not have the ability to significantly influence the investee.
    - (4) If the entity asserts that it maintains effective control over securities transferred under a repurchase agreement, the contractual agreement may be such that the entity actually surrendered control over the securities and therefore should account for the transfer as a sale instead of a secured borrowing.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

---

<sup>19</sup> FASB Statement No. 115 requires an investor to document the classification of debt and equity securities into one of three categories—held-to-maturity, available-for-sale, or trading—at their acquisition.

## Management Representations

.58 Section 333, *Management Representations*, provides guidance to auditors in obtaining written representations from management. The auditor ordinarily should obtain written representations from management confirming aspects of management's intent and ability that affect assertions about derivatives and securities, such as its intent and ability to hold a debt security until its maturity or to enter into a forecasted transaction for which hedge accounting is applied. In addition, the auditor should consider obtaining written representations from management confirming other aspects of derivatives and securities transactions that affect assertions about them.<sup>20</sup>

## Effective Date

.59 This section is effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.

[The next page is 498-21.]

---

<sup>20</sup> Section 333.17 provides illustrative representations about derivatives and securities transactions.

## AU Section 9332

# ***Auditing Derivative Instruments, Hedging Activities, and Investments in Securities: Auditing Interpretations of Section 332***

### **1. Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist**

**.01 Question**—Entities may make investments in securities, required by generally accepted accounting principals to be accounted for at fair value, where a readily determinable fair value for those securities does not exist. For example, an entity may have an investment in a hedge fund that it reports at fair value, but for which a readily determinable fair value does not exist. Further, the hedge fund may own interests in investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. As part of an auditor's procedures in accordance with section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, he or she typically would satisfy the existence assertion through either confirmation with the hedge fund, examination of legal documents, or other means as discussed in section 332. In confirming the existence, the auditor may request the hedge fund to indicate or to confirm the fair value of the entity's investment in the hedge fund, including the fair value of investments held by the hedge fund. In some circumstances, the hedge fund will not provide management or the auditor detailed information about the basis and method for measuring the entity's investment in the hedge fund, nor will they provide information about the specific investments held by the hedge fund. For example, in some circumstances the hedge fund may inform management or the auditor that investments are held by the hedge fund as follows:

- In aggregate, such as "\$XXX of total investments"
- In aggregate, such as "\$XXX of total investments in private equity securities, \$YYY of total investments in interests in limited partnerships, and \$ZZZ of total investments in debt securities"
- On an investment-by-investment basis, such as "AA shares of common stock of private company A, with a fair value of \$AAA; BB shares of preferred stock of private company B, with a fair value of \$BBB; CC units of limited partnership interest CCC, with a fair value of \$CCC; and real estate property DDD, with a fair value of \$DDDD"

In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments in securities, does receiving a confirmation from a third party, either in aggregate or on a security-by-security basis, constitute adequate audit evidence with respect to the existence and valuation assertions in section 332?

**.02 Interpretation**—In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments in securities, simply receiving a confirmation from a third party, either in aggregate or on a

security-by-security basis, does not in and of itself constitute adequate audit evidence with respect to the valuation assertion in section 332. In addition, receiving confirmation from a third party for investments in aggregate (illustrated by the first two bullets above) does not constitute adequate audit evidence with respect to the existence assertion under section 332. Receiving confirmation from a third party on a security-by-security basis (illustrated by the third bullet above), however, typically would constitute adequate audit evidence with respect to the existence assertion under section 332. Also, as noted in section 328, *Auditing Fair Value Measurements and Disclosures*, paragraph .04, in discussing management's responsibility for making fair value measurements:

Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

**.03** In addition, section 328 discusses the auditor's responsibility dealing with:

- Understanding the entity's process for determining fair value measurements and disclosures and the relevant controls, and assessing risk
- Evaluating conformity of fair value measurements and disclosures with GAAP
- Engaging a specialist, where necessary
- Testing the entity's fair value measurements and disclosures
- Disclosures about fair values
- Evaluating the results of audit procedures
- Management representations
- Communication with audit committees

**.04** In circumstances in which the auditor is unable to audit the existence or measurement of interests in investments in securities at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to either qualify his or her opinion or to disclaim an opinion, as discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .22 to .26.

[Issue Date: July, 2005]

## AU Section 333

# Management Representations

(Supersedes SAS No. 19)

Source: SAS No. 85; SAS No. 89; SAS No. 99; SAS No. 113.

See section 9333 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after June 30, 1998, unless otherwise indicated.

### Introduction

.01 This section establishes a requirement that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted auditing standards and provides guidance concerning the representations to be obtained.

### Reliance on Management Representations

.02 During an audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries or through the financial statements. Such representations from management are part of the audit evidence the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit. Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>1</sup>

.03 The auditor obtains written representations from management to complement other auditing procedures. In many cases, the auditor applies auditing procedures specifically designed to obtain audit evidence concerning matters that also are the subject of written representations. For example, after the auditor performs the procedures prescribed in section 334, *Related Parties*, even if the results of those procedures indicate that transactions with related parties have been properly disclosed, the auditor should obtain a written representation to document that management has no knowledge of any such transactions that have not been properly disclosed. In some circumstances, audit evidence that can be obtained by the application of auditing procedures other than inquiry is limited; therefore, the auditor obtains written representations to provide additional audit evidence. For example, if an entity plans to

---

<sup>1</sup> Section 230, *Due Professional Care in the Performance of Work*, states, "The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest."

discontinue a line of business and the auditor is not able to obtain sufficient information through other auditing procedures to corroborate the plan or intent, the auditor obtains a written representation to provide evidence of management's intent. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.04** If a representation made by management is contradicted by other audit evidence, the auditor should investigate the circumstances and consider the reliability of the representation made. Based on the circumstances, the auditor should consider whether his or her reliance on management's representations relating to other aspects of the financial statements is appropriate and justified.

## Obtaining Written Representations

**.05** Written representations from management should be obtained for all financial statements and periods covered by the auditor's report.<sup>2</sup> For example, if comparative financial statements are reported on, the written representations obtained at the completion of the most recent audit should address all periods being reported on. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.

**.06** In connection with an audit of financial statements presented in accordance with generally accepted accounting principles, specific representations should relate to the following matters:<sup>3</sup>

### *Financial Statements*

- a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.
- b. Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.

### *Completeness of Information*

- c. Availability of all financial records and related data.
- d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.
- e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
- f. Absence of unrecorded transactions.

### *Recognition, Measurement, and Disclosure*

- g. Management's belief that the effects of any uncorrected financial statement misstatements<sup>4</sup> aggregated by the auditor during the current

<sup>2</sup> An illustrative representation letter from management is contained in Appendix A, "Illustrative Management Representation Letter" [paragraph .16].

<sup>3</sup> Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of presentation of the financial statements being audited.

<sup>4</sup> Section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .04, states that a misstatement can result from errors or fraud, and provides guidance for the auditor's evaluation of audit findings (section 312.34-.40). [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>5</sup> (A summary of such items should be included in or attached to the letter.)<sup>6, 7</sup>

- h. Management's acknowledgment of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.
- i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.<sup>[8]</sup>
- j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
- k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.
- l. Information concerning related-party transactions and amounts receivable from or payable to related parties.<sup>9</sup>
- m. Guarantees, whether written or oral, under which the entity is contingently liable.
- n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.
- o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.<sup>10</sup>
- p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance

---

<sup>5</sup> If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [description of reasons]." [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

<sup>6</sup> Section 312 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

<sup>7</sup> The communication to management of immaterial misstatements aggregated by the auditor does not constitute a communication pursuant to section 317, *Illegal Acts by Clients*, paragraph .17, Section 10A of the Securities Exchange Act of 1934, or section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .38 through .40. The auditor may have additional communication responsibilities pursuant to section 317, Section 10A of the Securities Exchange Act of 1934, or section 316. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>[8]</sup> [Footnote deleted by the issuance of Statement on Auditing Standards No. 99, October 2002.]

<sup>9</sup> See section 334. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>10</sup> See section 317. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies* [AC section C59].<sup>11</sup>

- q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5 [AC section C59].<sup>12</sup>
- r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.
- s. Compliance with aspects of contractual agreements that may affect the financial statements.

#### *Subsequent Events*

- t. Information concerning subsequent events.<sup>13</sup>

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

**.07** The representation letter ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry.<sup>14</sup> Examples of additional representations that may be appropriate are provided in Appendix B, "Additional Illustrative Representations" [paragraph .17].

**.08** Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements, for example, items (a), (c), (d), and (e) above. In addition, because of the possible effects of fraud on other aspects of the audit, materiality would not apply to item (h) above with respect to management or those employees who have significant roles in internal control.

**.09** The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report. [If the auditor "dual dates" his or her report, the auditor should consider whether obtaining additional representations relating to the subsequent event is appropriate. See section 530, *Dating of the Independent Auditor's Report*,

<sup>11</sup> See section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .05. If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer" (section 9337.15–17). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>12</sup> See section 337.05b. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>13</sup> See section 560, *Subsequent Events*, paragraph .12, section 711, *Filings Under Federal Securities Statutes*, paragraph .10, and section 634, *Letters for Underwriters and Certain Other Requesting Parties*, paragraph .45, footnote 31. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>14</sup> Certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

paragraph .05]. The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

**.10** If current management was not present during all periods covered by the auditor's report, the auditor should nevertheless obtain written representations from current management on all such periods. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. As discussed in paragraph .08, management's representations may be limited to matters that are considered either individually or collectively material to the financial statements.

**.11** In certain circumstances, the auditor may want to obtain written representations from other individuals. For example, he or she may want to obtain written representations about the completeness of the minutes of the meetings of stockholders, directors, and committees of directors from the person responsible for keeping such minutes. Also, if the independent auditor performs an audit of the financial statements of a subsidiary but does not audit those of the parent company, he or she may want to obtain representations from management of the parent company concerning matters that may affect the subsidiary, such as related-party transactions or the parent company's intention to provide continuing financial support to the subsidiary.

**.12** There are circumstances in which an auditor should obtain updating representation letters from management. If a predecessor auditor is requested by a former client to reissue (or consent to the reuse of) his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, the predecessor auditor should obtain an updating representation letter from the management of the former client.<sup>15</sup> Also, when performing subsequent events procedures in connection with filings under the Securities Act of 1933, the auditor should obtain certain written representations.<sup>16</sup> The updating management representation letter should state (a) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest financial statements reported on by the auditor that would require adjustment to or disclosure in those financial statements.<sup>17</sup>

## Scope Limitations

**.13** Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or

---

<sup>15</sup> See section 508, *Reports on Audited Financial Statements*, paragraph .71. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>16</sup> See section 711.10. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>17</sup> An illustrative updating management representation letter is contained in Appendix C, "Illustrative Updating Management Representation Letter" [paragraph .18]. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

withdraw from the engagement.<sup>18</sup> However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

.14 If the auditor is precluded from performing procedures he or she considers necessary in the circumstances with respect to a matter that is material to the financial statements, even though management has given representations concerning the matter, there is a limitation on the scope of the audit, and the auditor should qualify his or her opinion or disclaim an opinion.

## Effective Date

.15 This section is effective for audits of financial statements for periods ending on or after June 30, 1998. Earlier application is permitted.

---

<sup>18</sup> See section 508.22-.34. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

.16

## Appendix A

### Illustrative Management Representation Letter

1. The following letter, which relates to an audit of financial statements prepared in conformity with generally accepted accounting principles, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 19X1 and 19X0, and the related statements of income and retained earnings and cash flows for the years then ended." The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited. (See Appendix B [paragraph .17]).

2. If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred..." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allegation discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

3. The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

4. Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in section 316, and related parties, in section 334, footnote 1. To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

5. The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of this section.

6.

[Date]

To [Independent Auditor]

We are providing this letter in connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [consolidated] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [as of (date of auditor's report),] the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all—
  - a. Financial records and related data.
  - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>1</sup>
6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
  - a. Management,
  - b. Employees who have significant roles in internal control, or
  - c. Others where the fraud could have a material effect on the financial statements.
8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

---

<sup>1</sup> If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [description of reasons]." [Footnote added effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
10. The following have been properly recorded or disclosed in the financial statements:
  - a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
  - b. Guarantees, whether written or oral, under which the company is contingently liable.
  - c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. [Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]
11. There are no—
  - a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
  - b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.<sup>2</sup>
  - c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

*[Add additional representations that are unique to the entity's business or industry. See paragraph .07 and Appendix B [paragraph .17] of this section.]*

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

---

*[Name of Chief Executive Officer and Title]*

---

*[Name of Chief Financial Officer and Title]*

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999 by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

---

<sup>2</sup> In the circumstance discussed in footnote 11 of this section, this representation might be worded as follows: We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

.17

## Appendix B

### Additional Illustrative Representations

1. As discussed in paragraph .07 of this section, representation letters ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. The auditor also should be aware that certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all-inclusive. The auditor also should consider the effects of pronouncements issued subsequent to the issuance of this section.

<i>General</i>	
<i>Condition</i>	<i>Illustrative Example</i>
Unaudited interim information accompanies the financial statements.	The unaudited interim financial information accompanying [ <i>presented in Note X to</i> ] the financial statements for the [ <i>identify all related periods</i> ] has been prepared and presented in conformity with generally accepted accounting principles applicable to interim financial information [ <i>and with Item 302(a) of Regulation S-K</i> ]. The accounting principles used to prepare the unaudited interim financial information are consistent with those used to prepare the audited financial statements.
The impact of a new accounting principle is not known.	We have not completed the process of evaluating the impact that will result from adopting Financial Accounting Standards Board (FASB) Statement No. [XXX, <i>Name</i> ], as discussed in Note [X]. The company is therefore unable to disclose the impact that adopting FASB Statement No. [XXX] will have on its financial position and the results of operations when such Statement is adopted.
There is justification for a change in accounting principles.	We believe that [ <i>describe the newly adopted accounting principle</i> ] is preferable to [ <i>describe the former accounting principle</i> ] because [ <i>describe management's justification for the change in accounting principles</i> ].

<i>Condition</i>	<i>Illustrative Example</i>
<p>Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.</p>	<p>Note [X] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.</p>
<p>The possibility exists that the value of specific significant long-lived assets or certain identifiable intangibles may be impaired.</p>	<p>We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of its assets might not be recoverable and have appropriately recorded the adjustment.</p>
<p>The entity has a variable interest in another entity.</p>	<p>Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with US GAAP.</p>
	<p>We have considered both implicit and explicit variable interests in (a) determining whether potential VIEs should be considered VIEs, (b) calculating expected losses and residual returns, and (c) determining which party, if any, is the primary beneficiary.</p>
	<p>We have provided you with lists of all identified variable interests in (i) VIEs, (ii) potential VIEs that we considered but judged not to be VIEs, and (iii) entities that were afforded the scope exceptions of FASB Interpretation (FIN) No. 46.</p>
	<p>We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FIN No. 46.</p>
	<p>We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents and other entities, including but not limited to, their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements.</p>

*Condition**Illustrative Example*

The information we provided about financial interests and contractual arrangements with related parties, de facto agents and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements.

Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes.

Regarding entities in which the Company has variable interests (implicit and explicit), we have provided all information about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the Company is the primary beneficiary or has a significant variable interest in the entity.

We have made and continue to make exhaustive efforts to obtain information about entities in which the Company has an implicit or explicit interest but that were excluded from complete analysis under FIN No. 46R, *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*, due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the Company is the primary beneficiary, or the accounting required to consolidate the entity.

The work of a specialist has been used by the entity.

We agree with the findings of specialists in evaluating the [*describe assertion*] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values

<i>Condition</i>	<i>Illustrative Example</i>
	or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an impact on the independence or objectivity of the specialists.

<i>Assets</i>	
<i>Condition</i>	<i>Illustrative Examples</i>

**Cash**  
 Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.

Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements have been properly disclosed.

**Financial Instruments**  
 Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.

Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities, to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.

Management considers the decline in value of debt or equity securities to be temporary.

We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.

Management has determined the fair value of significant financial instruments that do not have readily determinable market values.

The methods and significant assumptions used to determine fair values of financial instruments are as follows: *[describe methods and significant assumptions used to determine fair values of financial instruments]*. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.

There are financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk.

The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements:

1. The extent, nature, and terms of financial instruments with off-balance-sheet risk

*Condition**Illustrative Examples**Receivables*

Receivables have been recorded in the financial statements.

*Inventories*

Excess or obsolete inventories exist.

*Investments*

There are unusual considerations involved in determining the application of equity accounting.

*Deferred Charges*

Material expenditures have been deferred.

2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments
3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments

Receivables recorded in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance-sheet date and have been appropriately reduced to their estimated net realizable value.

Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value.

*[For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:]*

- The equity method is used to account for the company's investment in the common stock of [investee] because the company has the ability to exercise significant influence over the investee's operating and financial policies.
- The cost method is used to account for the company's investment in the common stock of [investee] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.

We believe that all material expenditures that have been deferred to future periods will be recoverable.

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Deferred Tax Assets</i></p> <p>A deferred tax asset exists at the balance-sheet date.</p>	<p>The valuation allowance has been determined pursuant to the provisions of FASB Statement No. 109, <i>Accounting for Income Taxes</i>, including the company's estimation of future taxable income, if necessary, and is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized. <i>[Complete with appropriate wording detailing how the entity determined the valuation allowance against the deferred tax asset.]</i></p> <p style="text-align: center;">or</p> <p>A valuation allowance against deferred tax assets at the balance-sheet date is not considered necessary because it is more likely than not the deferred tax asset will be fully realized.</p>

### *Liabilities*

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Debt</i></p> <p>Short-term debt could be refinanced on a long-term basis and management intends to do so.</p>	<p>The company has excluded short-term obligations totaling \$[<i>amount</i>] from current liabilities because it intends to refinance the obligations on a long-term basis. <i>[Complete with appropriate wording detailing how amounts will be refinanced as follows:]</i></p> <ul style="list-style-type: none"> <li>• The company has issued a long-term obligation [<i>debt security</i>] after the date of the balance sheet but prior to the issuance of the financial statements for the purpose of refinancing the short-term obligations on a long-term basis.</li> <li>• The company has the ability to consummate the refinancing, by using the financing agreement referred to in Note [X] to the financial statements.</li> </ul>
<p>Tax-exempt bonds have been issued.</p>	<p>Tax-exempt bonds issued have retained their tax-exempt status.</p>

<i>Condition</i>	<i>Illustrative Examples</i>
<i>Taxes</i> Management intends to reinvest undistributed earnings of a foreign subsidiary.	We intend to reinvest the undistributed earnings of [ <i>name of foreign subsidiary</i> ].
<i>Contingencies</i> Estimates and disclosures have been made of environmental remediation liabilities and related loss contingencies.	Provision has been made for any material loss that is probable from environmental remediation liabilities associated with [ <i>name of site</i> ]. We believe that such estimate is reasonable based on available information and that the liabilities and related loss contingencies and the expected outcome of uncertainties have been adequately described in the company's financial statements.
Agreements may exist to repurchase assets previously sold.	Agreements to repurchase assets previously sold have been properly disclosed.
<i>Pension and Postretirement Benefits</i> An actuary has been used to measure pension liabilities and costs.	We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.
There is involvement with a multi-employer plan.	We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan.
	or
	We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of \$[XX].
Postretirement benefits have been eliminated.	We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits.
	or
	We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of \$[XX].
Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.	Current employee layoffs are intended to be temporary.

<i>Condition</i>	<i>Illustrative Examples</i>
<p>Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.</p>	<p>We plan to continue to make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost.</p> <p style="text-align: center;">or</p> <p>We do not plan to make frequent amendments to its pension or other postretirement benefit plans.</p>

<i>Equity</i>	
<i>Condition</i>	<i>Illustrative Example</i>
<p>There are capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.</p>	<p>Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.</p>

<i>Income Statement</i>	
<i>Condition</i>	<i>Illustrative Example</i>
<p>There may be a loss from sales commitments.</p>	<p>Provisions have been made for losses to be sustained in the fulfillment of or from inability to fulfill any sales commitments.</p>
<p>There may be losses from purchase commitments.</p>	<p>Provisions have been made for losses to be sustained as a result of purchase commitments for inventory quantities in excess of normal requirements or at prices in excess of prevailing market prices.</p>
<p>Nature of the product or industry indicates the possibility of undisclosed sales terms.</p>	<p>We have fully disclosed to you all sales terms, including all rights of return or price adjustments and all warranty provisions.</p>

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of recent guidance on special purpose entity transactions. Revised, January 2006, to reflect conforming changes necessary due to the issuance of FASB Interpretation No. 46 (revised 2003).]

## Appendix C

### Illustrative Updating Management Representation Letter

1. The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of this section. Management need not repeat all of the representations made in the previous representation letter.

2. If matters exist that should be disclosed to the auditor, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

3.

[Date]

To [Auditor]

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

## AU Section 9333

# ***Management Representations: Auditing Interpretations of Section 333***

### **1. Management Representations on Violations and Possible Violations of Laws and Regulations**

**.01 Question**—Section 333, *Management Representations*, lists matters for which the auditor ordinarily obtains written representations from management. One of those matters is: Violations or possible violations of laws or regulations whose effects should be considered for disclosure in financial statements or as a basis for recording a loss contingency.

**.02** Guidance on evaluating the need to disclose litigation, claims, and assessments that may result from possible violations is provided by FASB Statement No. 5, *Accounting for Contingencies* [AC section C59]. Section 317, *Illegal Acts by Clients*, provides guidance on evaluating the materiality of illegal acts. Does the representation regarding "possible violations" include matters beyond those described in FASB Statement No. 5 [AC section C59] and section 317?

**.03 Interpretation**—No. Section 333 did not change the relevant criteria for evaluating the need for disclosure of violations and possible violations of laws or regulations. In requesting the representation on possible violations, the auditor is not asking for management's speculation on all possibilities of legal challenges to its actions.

**.04** The representation concerns matters that have come to management's attention and that are significant enough that they should be considered in determining whether financial statement disclosures are necessary. It recognizes that these are matters of judgment and that the need for disclosure is not always readily apparent.

[Issue Date: March, 1979.]

[The next page is 525.]

## AU Section 334

### *Related Parties*

(Supersedes Statement on Auditing Standards  
No. 6, AICPA, *Professional Standards*,  
vol. 1, AU sec. 335.01-.19)

Source: SAS No. 45.

See section 9334 for interpretations of this section.

Effective for periods ended after September 30, 1983, unless otherwise indicated.

.01 This section provides guidance on procedures that should be considered by the auditor when he is performing an audit of financial statements in accordance with generally accepted auditing standards to identify related party relationships and transactions and to satisfy himself concerning the required financial statement accounting and disclosure.<sup>1</sup> The procedures set forth in this section should not be considered all-inclusive. Also, not all of them may be required in every audit.

### Accounting Considerations

.02 FASB Statement No. 57, *Related Party Disclosures* [AC section R36], gives the requirements for related party disclosures. Certain accounting pronouncements prescribe the accounting treatment when related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from

---

\* This section also withdraws the following auditing interpretations dated March 1976 (AICPA, *Professional Standards*, vol. 1, AU sec. 9335.01-.11):

- Evaluating the Adequacy of Disclosure of Related Party Transactions
- Disclosure of Commonly Controlled Parties
- Definition of "Immediate Family"

<sup>1</sup> Financial Accounting Standards Board Statement No. 57, *Related Party Disclosures*, paragraphs 2 through 4 [AC section R36.102-.104], contains the disclosure requirements for related party relationships and transactions. The glossary of that Statement [AC section R36.406] defines related parties as follows:

Affiliates of the enterprise; entities for which investments are accounted for by the equity method by the enterprise; trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; principal owners of the enterprise; its management; members of the immediate families of principal owners of the enterprise and its management; and other parties with which the enterprise may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

The glossary also gives definitions of the terms "affiliate," "control," "immediate family," "management," and "principal owners" [AC section R36.401-.405]. Paragraph 1 of the FASB Statement [AC section R36.101] gives examples of related party transactions.

that which would be appropriate if the parties were not related. The auditor should view related party transactions within the framework of existing pronouncements, placing primary emphasis on the adequacy of disclosure. In addition, the auditor should be aware that the substance of a particular transaction could be significantly different from its form and that financial statements should recognize the substance of particular transactions rather than merely their legal form.<sup>2</sup>

**.03** Transactions that because of their nature may be indicative of the existence of related parties include<sup>3</sup>—

- a. Borrowing or lending on an interest-free basis or at a rate of interest significantly above or below market rates prevailing at the time of the transaction.
- b. Selling real estate at a price that differs significantly from its appraised value.
- c. Exchanging property for similar property in a nonmonetary transaction.
- d. Making loans with no scheduled terms for when or how the funds will be repaid.

## Audit Procedures

**.04** An audit performed in accordance with generally accepted auditing standards cannot be expected to provide assurance that all related party transactions will be discovered. Nevertheless, during the course of his audit, the auditor should be aware of the possible existence of material related party transactions that could affect the financial statements and of common ownership or management control relationships for which FASB Statement No. 57 [AC section R36] requires disclosure even though there are no transactions. Many of the procedures outlined in the following paragraphs are normally performed in an audit in accordance with generally accepted auditing standards, even if the auditor has no reason to suspect that related party transactions or control relationships exist. Other audit procedures set forth in this section are specifically directed to related party transactions.

**.05** In determining the scope of work to be performed with respect to possible transactions with related parties, the auditor should obtain an understanding of management responsibilities and the relationship of each component to the total entity. He should consider controls over management

---

<sup>2</sup> Some pronouncements specify criteria for determining, presenting, and accounting for the substance of certain transactions and events. Examples include (1) presenting consolidated financial statements instead of separate statements of the component legal entities (Accounting Research Bulletin No. 51 [AC section C51]); (2) capitalizing leases (FASB Statement No. 13 [AC section L10]); and (3) imputing an appropriate interest rate when the face amount of a note does not reasonably represent the present value of the consideration given or received in exchange for it (Accounting Principles Board Opinion No. 21 [AC section I69]; FASB Statement No. 94 [AC section C51]). [Footnote revised, June 1993, to reflect conforming changes necessary due to the issuance of Statement of Position 93-3.]

<sup>3</sup> FASB Statement No. 57, paragraph 1 [AC section R36.101], gives other examples of common types of transactions with related parties, and it states that "transactions between related parties are considered to be related party transactions even though they may not be given accounting recognition."

activities, and he should consider the business purpose served by the various components of the entity. Normally, the business structure and style of operating are based on the abilities of management, tax and legal considerations, product diversification, and geographical location. Experience has shown, however, that business structure and operating style are occasionally deliberately designed to obscure related party transactions.

**.06** In the absence of evidence to the contrary, transactions with related parties should not be assumed to be outside the ordinary course of business. The auditor should, however, be aware of the possibility that transactions with related parties may have been motivated solely, or in large measure, by conditions similar to the following:

- a. Lack of sufficient working capital or credit to continue the business
- b. An urgent desire for a continued favorable earnings record in the hope of supporting the price of the company's stock
- c. An overly optimistic earnings forecast
- d. Dependence on a single or relatively few products, customers, or transactions for the continuing success of the venture
- e. A declining industry characterized by a large number of business failures
- f. Excess capacity
- g. Significant litigation, especially litigation between stockholders and management
- h. Significant obsolescence dangers because the company is in a high-technology industry

## Determining the Existence of Related Parties

**.07** The auditor should place emphasis on testing material transactions with parties he knows are related to the reporting entity. Certain relationships, such as parent-subsidary or investor-investee, may be clearly evident. Determining the existence of others requires the application of specific audit procedures, which may include the following:

- a. Evaluate the company's procedures for identifying and properly accounting for related party transactions.
- b. Request from appropriate management personnel the names of all related parties and inquire whether there were any transactions with these parties during the period.
- c. Review filings by the reporting entity with the Securities and Exchange Commission and other regulatory agencies for the names of related parties and for other businesses in which officers and directors occupy directorship or management positions.
- d. Determine the names of all pension and other trusts established for the benefit of employees and the names of their officers and trustees.<sup>4</sup>

---

<sup>4</sup> According to FASB Statement No. 57, paragraph 24(f) [AC section R36.406] "trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management," are related parties.

- e. Review stockholder listings of closely held companies to identify principal stockholders.
- f. Review prior years' working papers for the names of known related parties.
- g. Inquire of predecessor, principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions.
- h. Review material investment transactions during the period under audit to determine whether the nature and extent of investments during the period create related parties.

## Identifying Transactions With Related Parties

.08 The following procedures are intended to provide guidance for identifying material transactions with parties known to be related and for identifying material transactions that may be indicative of the existence of previously undetermined relationships:

- a. Provide audit personnel performing segments of the audit or auditing and reporting separately on the accounts of related components of the reporting entity with the names of known related parties so that they may become aware of transactions with such parties during their audits.
- b. Review the minutes of meetings of the board of directors and executive or operating committees for information about material transactions authorized or discussed at their meetings.
- c. Review proxy and other material filed with the Securities and Exchange Commission and comparable data filed with other regulatory agencies for information about material transactions with related parties.
- d. Review conflict-of-interests statements obtained by the company from its management.<sup>5</sup>
- e. Review the extent and nature of business transacted with major customers, suppliers, borrowers, and lenders for indications of previously undisclosed relationships.
- f. Consider whether transactions are occurring, but are not being given accounting recognition, such as receiving or providing accounting, management or other services at no charge or a major stockholder absorbing corporate expenses.
- g. Review accounting records for large, unusual, or nonrecurring transactions or balances, paying particular attention to transactions recognized at or near the end of the reporting period.
- h. Review confirmations of compensating balance arrangements for indications that balances are or were maintained for or by related parties.

---

<sup>5</sup> Conflict-of-interests statements are intended to provide the board of directors with information about the existence or nonexistence of relationships between the reporting persons and parties with whom the company transacts business.

- i.* Review invoices from law firms that have performed regular or special services for the company for indications of the existence of related parties or related party transactions.
- j.* Review confirmations of loans receivable and payable for indications of guarantees. When guarantees are indicated, determine their nature and the relationships, if any, of the guarantors to the reporting entity.

## Examining Identified Related Party Transactions

**.09** After identifying related party transactions, the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose, nature, and extent of these transactions and their effect on the financial statements. The procedures should be directed toward obtaining and evaluating sufficient appropriate audit evidence and should extend beyond inquiry of management. Procedures that should be considered include the following:

- a.* Obtain an understanding of the business purpose of the transaction.<sup>6</sup>
- b.* Examine invoices, executed copies of agreements, contracts, and other pertinent documents, such as receiving reports and shipping documents.
- c.* Determine whether the transaction has been approved by the board of directors or other appropriate officials.
- d.* Test for reasonableness the compilation of amounts to be disclosed, or considered for disclosure, in the financial statements.
- e.* Arrange for the audits of intercompany account balances to be performed as of concurrent dates, even if the fiscal years differ, and for the examination of specified, important, and representative related party transactions by the auditors for each of the parties, with appropriate exchange of relevant information.
- f.* Inspect or confirm and obtain satisfaction concerning the transferability and value of collateral.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.10** When necessary to fully understand a particular transaction, the following procedures, which might not otherwise be deemed necessary to comply with generally accepted auditing standards, should be considered.<sup>7</sup>

- a.* Confirm transaction amount and terms, including guarantees and other significant data, with the other party or parties to the transaction.
- b.* Inspect evidence in possession of the other party or parties to the transaction.

---

<sup>6</sup> Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to understand a particular transaction, he should consult with persons who do have the requisite knowledge.

<sup>7</sup> Arrangements for certain procedures should be made or approved in advance by appropriate client officials.

- c. Confirm or discuss significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
- d. Refer to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
- e. With respect to material uncollected balances, guarantees, and other obligations, obtain information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies. The auditor should decide on the degree of assurance required and the extent to which available information provides such assurance.

## Disclosure

.11 For each material related party transaction (or aggregation of similar transactions) or common ownership or management control relationship for which FASB Statement No. 57 [AC section R36] requires disclosure, the auditor should consider whether he has obtained sufficient appropriate audit evidence to understand the relationship of the parties and, for related party transactions, the effects of the transaction on the financial statements. He should then evaluate all the information available to him concerning the related party transaction or control relationship and satisfy himself on the basis of his professional judgment that it is adequately disclosed in the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>8</sup>

.12 Except for routine transactions, it will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related, or assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a transaction was consummated on terms equivalent to those that prevail in arm's-length transactions.<sup>9</sup> If such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality (see section 508.35 and .36).

---

[The next page is 535.]

---

<sup>8</sup> The disclosure standards are contained in FASB Statement No. 57, paragraphs 2 through 4 [AC section R36.102-.104]. Also, see section 431, *Adequacy of Disclosure in Financial Statements*.

<sup>9</sup> FASB Statement No. 57, paragraph 3 [AC section R36.103], states that if representations are made about transactions with related parties, the representations "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated."

## AU Section 9334\*

### ***Related Parties: Auditing Interpretations of Section 334***

#### **[1.] Evaluating the Adequacy of Disclosure of Related Party Transactions**

[.01–.05] [Withdrawn August, 1983, by SAS No. 45.] (See section 334.)

#### **[2.] Disclosure of Commonly Controlled Parties**

[.06–.09] [Withdrawn August, 1983, by SAS No. 45.] (See section 334.)

#### **[3.] Definition of "Immediate Family"**

[.10–.11] [Withdrawn August, 1983, by SAS No. 45.] (See section 334.)

#### **4. Exchange of Information Between the Principal and Other Auditor on Related Parties**

**.12 Question**—Section 334, *Related Parties*, paragraphs .04 and .07, states that "during the course of his audit, the auditor should be aware of the possible existence of material related party transactions," and that determining the existence of related party transactions may require the inquiry of the "principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions." When should that inquiry be made?

**.13 Interpretation**—The principal auditor and the other auditor should each obtain from the other the names of known related parties and the other information referred to above. Ordinarily, that exchange of information should be made at an early stage of the audit.

[Issue Date: April, 1979.]

#### **5. Examination of Identified Related Party Transactions with a Component**

**.14 Question**—According to section 334.09, once related party transactions have been identified, "the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose, nature and extent of these transactions and their effect on the financial statements." When there is a principal auditor-other auditor relationship, how may the auditors obtain that satisfaction regarding transactions that may involve not only the components<sup>1</sup> they are auditing, but also, other components?

---

\* [Section number changed August, 1983, to correspond to section 334, *Related Parties*.]

<sup>1</sup> For the purpose of this interpretation, the entities whose separate financial statements collectively comprise the consolidated or other financial statements are referred to as components.

**.15 Interpretation**—Audit procedures may sometimes have to be applied to records of components being audited by the other. One auditor may arrange to perform those procedures himself, or he may request the other to do so.<sup>2</sup> There may be circumstances when there are unusual or complex related party transactions and an auditor believes that access to relevant portions of the other's work papers is essential to his understanding of the effects of those transactions on the financial statements he is auditing. In those circumstances, access ordinarily should be provided.<sup>3</sup>

[Issue Date: April, 1979.]

## 6. The Nature and Extent of Auditing Procedures for Examining Related Party Transactions

**.16 Question**—Section 334, *Related Parties*, provides general guidance about the types of procedures an auditor might apply to identified related party transactions. How extensive should the auditor's procedures be to examine related party transactions?

**.17 Interpretation**—The auditor's procedures should be sufficient to provide reasonable assurance that related party transactions are adequately disclosed and that identified related party transactions do not contain misstatements that, when aggregated with misstatements in other balances or classes of transactions, could be material to the financial statements taken as a whole. As in examining any other material account balance or class of transactions, the auditor needs to consider audit risk<sup>4</sup> and design and apply appropriate substantive tests to evaluate management's assertions.

**.18** The risk associated with management's assertions about related party transactions is often assessed as higher than for many other types of transactions because of the possibility that the parties to the transaction are motivated by reasons other than those that exist for most business transactions.<sup>5</sup>

**.19** The higher the auditor's assessment of risk regarding related party transactions, the more extensive or effective the audit tests should be. For example, the auditor's tests regarding valuation of a receivable from an entity under common control might be more extensive than for a trade receivable of the same size because the common parent may be motivated to obscure the substance of the transaction. In assessing the risk of the related party transactions the auditor obtains an understanding of the business purpose of the transactions. Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to obtain that understanding for a particular transaction, he should consult with persons who do have the requisite knowledge. In addition, to understand the transaction,

---

<sup>2</sup> In this case, the auditor should follow the guidance in the interpretation titled *Specific Procedures Performed by Other Auditors at the Principal Auditor's Request*, section 9543.01-.03.

<sup>3</sup> There is no intention in this interpretation to modify section 543.12c regarding the principal auditor's consideration of review of the other auditor's workpapers when he decides not to make reference to the other auditor.

<sup>4</sup> Audit risk and its components are described in section 312, *Audit Risk and Materiality in Conducting an Audit*.

<sup>5</sup> See section 334.06.

or obtain evidence regarding it, the auditor may have to refer to audited or unaudited financial statements of the related party, apply procedures at the related party, or in some cases audit the financial statements of the related party.

**.20 Question**—Section 334, *Related Parties*, paragraph .07, states that specific audit procedures should be applied to determine if related parties exist. That paragraph also suggests some specific audit procedures to identify related parties that the auditor should consider. What other audit procedures for determining the existence of related parties should the auditor consider?

**.21 Interpretation**—The auditor should consider obtaining representations from the entity's senior management and its board of directors about whether they or any other related parties engaged in any transactions with the entity during the period.

[Issue Date: May, 1986.]

## **7. Management's and Auditor's Responsibilities With Regard to Related Party Disclosures Prefaced by Terminology Such As "Management Believes That"**

**.22 Question**—Management discloses in its financial statements that a related party transaction was consummated on terms equivalent to those that prevail in arm's length transactions, and prefaces the representation with a phrase such as "Management believes that" or "It is the Company's belief that." Does the use of such terminology change management's responsibility to substantiate the representation?

**.23 Interpretation**—No. FASB Statement No. 57, *Related Party Disclosures*, paragraph 3 [AC section R36.103], states that the representations about a related party transaction "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated." A preface to a disclosure such as "Management believes that" or "It is the Company's belief that" does not change management's responsibility to substantiate the representation. Section 334, *Related Parties*, paragraph .12 (section 334.12), indicates that if such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality.

[Issue Date: May, 2000.]

## AU Section 336

### *Using the Work of a Specialist*

(Supersedes SAS No. 11)

Source: SAS No. 73.

See section 9336 for interpretations of this section.

Effective for audits of periods ending on or after December 15, 1994.

### Introduction and Applicability

.01 The purpose of this section is to provide guidance to the auditor who uses the work of a specialist in performing an audit in accordance with generally accepted auditing standards. For purposes of this section, a specialist is a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing.<sup>1</sup>

.02 Specialists to which this section applies include, but are not limited to, actuaries, appraisers, engineers, environmental consultants, and geologists. This section also applies to attorneys engaged as specialists in situations other than to provide services to a client concerning litigation, claims, or assessments to which section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, applies. For example, attorneys may be engaged by a client or by the auditor as specialists in a variety of other circumstances, including interpreting the provisions of a contractual agreement.

.03 The guidance in this section is applicable when—

- a. Management engages or employs a specialist and the auditor uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.
- b. Management engages a specialist employed by the auditor's firm to provide advisory services<sup>2</sup> and the auditor uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.
- c. The auditor engages a specialist and uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.04 The guidance provided in this section applies to audits of financial statements prepared in conformity with generally accepted accounting principles (GAAP)<sup>3</sup> and to engagements performed under section 623, *Special Reports*, including a comprehensive basis of accounting other than GAAP.

---

<sup>1</sup> In general, the auditor's education, training, and experience enable him or her to be knowledgeable concerning income tax matters and to be competent to assess their presentation in the financial statements.

<sup>2</sup> The auditor should consider the effect, if any, that using the work of a specialist employed by the auditor's firm has on independence.

<sup>3</sup> References in this section to "financial statements" and to "generally accepted accounting principles" include special reports covered under section 623, *Special Reports*.

.05 This section does not apply to situations covered by section 311, *Planning and Supervision*, in which a specialist employed by the auditor's firm participates in the audit.

## Decision to Use the Work of a Specialist

.06 The auditor's education and experience enable him or her to be knowledgeable about business matters in general, but the auditor is not expected to have the expertise of a person trained for or qualified to engage in the practice of another profession or occupation. During the audit, however, an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.07 Examples of the types of matters that the auditor may decide require him or her to consider using the work of a specialist include, but are not limited to, the following:

- a. Valuation (for example, special-purpose inventories, high-technology materials or equipment, pharmaceutical products, complex financial instruments, real estate, restricted securities, works of art, and environmental contingencies)
- b. Determination of physical characteristics relating to quantity on hand or condition (for example, quantity or condition of minerals, mineral reserves, or materials stored in stockpiles)
- c. Determination of amounts derived by using specialized techniques or methods (for example, actuarial determinations for employee benefits obligations and disclosures, and determinations for insurance loss reserves<sup>4</sup>)
- d. Interpretation of technical requirements, regulations, or agreements (for example, the potential significance of contracts or other legal documents or legal title to property)

## Qualifications and Work of a Specialist

.08 The auditor should consider the following to evaluate the professional qualifications of the specialist in determining that the specialist possesses the necessary skill or knowledge in the particular field:

- a. The professional certification, license, or other recognition of the competence of the specialist in his or her field, as appropriate
- b. The reputation and standing of the specialist in the views of peers and others familiar with the specialist's capability or performance
- c. The specialist's experience in the type of work under consideration

.09 The auditor should obtain an understanding of the nature of the work performed or to be performed by the specialist. This understanding should cover the following:

- a. The objectives and scope of the specialist's work

---

<sup>4</sup> In the specific situation involving the audit of an insurance entity's loss reserves, an outside loss reserve specialist—that is, one who is not an employee or officer of the insurance entity—should be used. When the auditor has the requisite knowledge and experience, the auditor may serve as the loss reserve specialist. (See Statement of Position 92-4, *Auditing Insurance Entities' Loss Reserves*.)

- b. The specialist's relationship to the client (see paragraphs .10 and .11)
- c. The methods or assumptions used
- d. A comparison of the methods or assumptions used with those used in the preceding period
- e. The appropriateness of using the specialist's work for the intended purpose<sup>5</sup>
- f. The form and content of the specialist's findings that will enable the auditor to make the evaluation described in paragraph .12

## Relationship of the Specialist to the Client

**.10** The auditor should evaluate the relationship<sup>6</sup> of the specialist to the client, including circumstances that might impair the specialist's objectivity. Such circumstances include situations in which the client has the ability—through employment, ownership, contractual right, family relationship, or otherwise—to directly or indirectly control or significantly influence the specialist.

**.11** When a specialist does not have a relationship with the client, the specialist's work usually will provide the auditor with greater assurance of reliability. However, the work of a specialist who has a relationship with the client may be acceptable under certain circumstances. If the specialist has a relationship with the client, the auditor should assess the risk that the specialist's objectivity might be impaired. If the auditor believes the relationship might impair the specialist's objectivity, the auditor should perform additional procedures with respect to some or all of the specialist's assumptions, methods, or findings to determine that the findings are not unreasonable or should engage another specialist for that purpose.

## Using the Findings of the Specialist

**.12** The appropriateness and reasonableness of methods and assumptions used and their application are the responsibility of the specialist. The auditor should (a) obtain an understanding of the methods and assumptions used by the specialist, (b) make appropriate tests of data provided to the specialist, taking into account the auditor's assessment of control risk, and (c) evaluate whether the specialist's findings support the related assertions in the financial statements. Ordinarily, the auditor would use the work of the specialist unless the auditor's procedures lead him or her to believe the findings are unreasonable in the circumstances. If the auditor believes the findings are unreasonable, he or she should apply additional procedures, which may include obtaining the opinion of another specialist.

## Effect of the Specialist's Work on the Auditor's Report

**.13** If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude

---

<sup>5</sup> In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements.

<sup>6</sup> The term *relationship* includes, but is not limited to, those situations discussed in section 334, *Related Parties*, footnote 1.

that sufficient appropriate audit evidence has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate audit evidence as to an assertion of material significance in the financial statements constitutes a scope limitation. (See section 508, *Reports on Audited Financial Statements*, paragraphs .22 and .23.) [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.14 The auditor may conclude after performing additional procedures, including possibly obtaining the opinion of another specialist, that the assertions in the financial statements are not in conformity with GAAP. In that event, the auditor should express a qualified or adverse opinion. (See section 508.35, .36, and .41.)

## Reference to the Specialist in the Auditor's Report

.15 Except as discussed in paragraph .16, the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.

.16 The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to his or her standard report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.

## Effective Date

.17 This section is effective for audits of periods ending on or after December 15, 1994. Early application of the provisions of this section is encouraged.

---

## AU Section 9336

### ***Using the Work of a Specialist: Auditing Interpretations of Section 336***

#### **1. The Use of Legal Interpretations As Evidential Matter to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140**

.01 *Introduction*—Financial Accounting Standards Board (FASB) Statement No. 140,<sup>1</sup> *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, requires that a transferor of financial assets must surrender control over the financial assets to account for the transfer as a sale. Paragraph 9(a) states one of several conditions that must be met to provide evidence of surrender of control:

The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

Paragraph 27 of FASB Statement No. 140 describes in greater detail the evidence required to support management's assertion that transferred financial assets have been isolated:

The nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law. Derecognition of transferred assets is appropriate only if the available evidence provides reasonable assurance that the transferred assets would be beyond the reach of the powers of a bankruptcy trustee or other receiver for the transferor or any consolidated affiliate of the transferor that is not a special-purpose corporation or other entity designed to make remote the possibility that it would enter bankruptcy or other receivership.

A determination about whether the isolation criterion has been met to support a conclusion regarding surrender of control is largely a matter of law. This aspect of surrender of control, therefore, is assessed primarily from a legal perspective.

---

<sup>1</sup> Financial Accounting Standards Board (FASB) Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, is a replacement of FASB Statement No. 125 and is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after March 31, 2001, except as provided in paragraphs 19–25 of FASB Statement No. 140 as amended by FASB Technical Bulletin (FTB) No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*.

**.02 Effective Date and Applicability**—This interpretation is effective for auditing procedures related to transfers of financial assets that are required to be accounted for under FASB Statement No. 140, as amended by FASB Technical Bulletin (FTB) No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*.<sup>2</sup>

**.03 Question**—What should the auditor consider in determining whether to use the work of a legal specialist<sup>3</sup> to obtain persuasive evidence to support management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140?

**.04 Interpretation**—Section 336, *Using the Work of a Specialist*, paragraph .06, states that "during the audit...an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence."

**.05 Use of a legal specialist** may not be necessary to obtain appropriate audit evidence to support management's assertion that the isolation criterion is met in certain situations, such as when there is a routine transfer of financial assets that does not result in any continuing involvement by the transferor.<sup>4</sup>

**.06 Many transfers of financial assets** involve complex legal structures, continuing involvement by the transferor, or other legal issues that, in the auditor's judgment, make it difficult to determine whether the isolation criterion is met. In these situations, use of a legal specialist usually is necessary. A legal specialist formulating an opinion as to whether a transfer isolates the transferred assets beyond the reach of the transferor and its creditors may consider, among other things, the structure of the transaction taken as a whole, the nature of any continuing involvement, the type of insolvency or other receivership proceedings to which the transferor might become subject, and other factors pertinent under applicable law.

**.07 If a legal opinion is used as evidence to support the accounting conclusion** related to multiple transfers under a single structure, and such transfers occur over an extended period of time under that structure, the auditor should evaluate the need for management to obtain periodic updates of that opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may change the applicability of the previous opinion to such transfers. The auditor also should evaluate the need for management to obtain periodic updates of an opinion to confirm that there have been no

---

<sup>2</sup> FTB No. 01-1 amends FASB Statement No. 140 to change the effective date for paragraphs 9(a), 27, 28, and 80–84 of FASB Statement No. 140 for transfers of financial assets by certain financial institutions. Paragraphs 6–8 of FTB No. 01-1 also provide additional transition time for transfers by financial institutions to certain master trusts.

<sup>3</sup> Client's internal or external attorney who is knowledgeable about relevant sections of the U.S. Bankruptcy Code and other federal, state, or foreign laws, as applicable.

<sup>4</sup> FASB Emerging Issues Task Force Topic No. D-99, *Questions and Answers Related to Servicing Activities in a Qualifying Special-Purpose Entity under FASB Statement No. 140*, characterizes no continuing involvement with the transferred assets as "no servicing responsibilities, no participation in future cash flows, no recourse obligations other than standard representations and warranties that the financial assets transferred met the delivery requirements under the arrangement, no further involvement of any kind."

If a contractual provision (such as a call or removal of accounts provision) gives the transferor the unilateral ability to require the return of specific financial assets, the auditor should consider the effect of paragraph 9(c) of FASB Statement No. 140.

subsequent changes in relevant law or applicable regulations that may affect the conclusions reached in the previous opinion in the case of other transfers (see paragraph 55 of FASB Statement No. 140).

**.08** If management's assertion with respect to a new transaction is that the transaction structure is the same as a prior structure for which a legal opinion that complies with this interpretation was used as evidence to support an assertion that the transfer of assets met the isolation criterion, the auditor should evaluate the need for management to obtain an update of that opinion to confirm that there have been no changes in relevant law, applicable regulations, or in the pertinent facts of the transaction that may affect the applicability of the previous opinion to the new transaction.

**.09 Question**—If the auditor determines that the use of a legal specialist is required, what should he or she consider in assessing the adequacy of the legal opinion?

**.10 Interpretation**—In assessing the adequacy of the legal opinion, the auditor should consider whether the legal specialist has experience with relevant matters, including knowledge of the U.S. Bankruptcy Code, and other federal, state, or foreign law, as applicable, as well as knowledge of the transaction upon which management's assertion is based. For transactions that may be affected by provisions of the Federal Deposit Insurance Act, the auditor should consider whether the legal specialist has experience with the rights and powers of receivers, conservators, and liquidating agents under that Act. The auditor should obtain an understanding of the assumptions that are used by the legal specialist, and make appropriate tests of any information that management provides to the legal specialist and upon which the specialist indicates it relied. For example, testing management's information underlying a legal specialist's assumption regarding the adequacy of consideration received may depend on the nature of the transaction and the relationship of the parties. When the legal specialist's opinion has assumed the adequacy of consideration for transfers from a particular legal entity to its wholly owned subsidiary, changes in the subsidiary's capital accounts plus other consideration generally would be sufficient audit evidence as to the adequacy of consideration. In the case of other transfers, such as those that are not to a wholly owned subsidiary of a particular legal entity that is the transferor, obtaining additional audit evidence may be necessary to evaluate management's assertion with regard to the adequacy of consideration upon which the legal specialist relied, because changes in the transferee's capital accounts do not solely benefit the transferring entity.

**.11** The auditor also should consider the form and content of the documentation that the legal specialist provides and evaluate whether the legal specialist's findings support management's assertions with respect to the isolation criterion. Section 336.13 states that "if the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate audit evidence has been obtained." FASB Statement No. 140's requirement regarding reasonable assurance that the transferred assets would be isolated provides the basis for what auditors should consider in evaluating the work of a legal specialist.

**.12** Findings of a legal specialist that relate to the isolation of transferred financial assets are often in the form of a reasoned legal opinion that is restricted to particular facts and circumstances relevant to the specific transaction. The reasoning of such opinion may rely upon analogy to legal precedents that may not involve facts and circumstances that are comparable to that

specific transaction. The auditor also should consider the effect of any limitations or disclaimers of opinion in assessing the adequacy of any legal opinion.

.13 An example of the conclusions in a legal opinion for an entity that is subject to the U.S. Bankruptcy Code that provides persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in bankruptcy or other receivership, follows:

*"We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become a Debtor, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of the Seller's estate for purposes of [the relevant sections] of the U.S. Bankruptcy Code."*

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist. For example, if a so-called "two-step" structure has been used to achieve isolation, this paragraph usually will be required with respect to the transferee in the first step of such structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

*"Based upon the assumptions of fact and the discussion set forth above, and on a reasoned analysis of analogous case law, we are of the opinion that in a properly presented and argued case, as a legal matter, in a proceeding under the U.S. Bankruptcy Code,<sup>5</sup> in which the Seller is a Debtor, a court would not grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller in a case involving the insolvency of the Seller under the doctrine of substantive consolidation."*

In the case of a transferor that is not entitled to become a debtor under the U.S. Bankruptcy Code, a legal opinion regarding whether the isolation criterion is met would consider whether isolation is satisfactorily achieved under the insolvency or receivership laws that apply to the transferor.

.14 Following are two examples of the conclusions in a legal opinion for an entity that is subject to receivership or conservatorship under provisions of the Federal Deposit Insurance Act. The conclusions in these two examples provide persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in conservatorship or receivership. Insolvency and receivership laws applicable to depository institutions, and how those laws affect the legal isolation criterion, differ depending upon the nature of the depository institution and its

---

<sup>5</sup> For an entity subject to additional regulation (e.g., a broker-dealer subject to the Securities Investor Protection Act), the legal opinion also generally should address the effect of such regulation and the policies of the regulators implementing such regulations (e.g., the Securities Investor Protection Corporation).

chartering authority. Accordingly, legal opinions addressing the legal isolation criterion may be formulated in different ways to accommodate those differences.<sup>6</sup>

Example 1: "*We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become subject to receivership or conservatorship, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of, or subject to repudiation, reclamation, recovery, or recharacterization by, the receiver or conservator appointed with respect to the Seller.*"<sup>7</sup>

Example 2: "The Federal Deposit Insurance Corporation (FDIC) has issued a regulation, 'Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection with a Securitization or Participation,' 12 CFR section 360.6 (the Rule). Based on and subject to the discussion, assumptions, and qualifications herein, it is our opinion that:

- A. Following the appointment of the FDIC as the conservator or receiver for the Bank:
  - (i) The Rule will apply to the Transfers,
  - (ii) Under the Rule, the FDIC acting as conservator or receiver for the Bank could not, by exercise of its authority to disaffirm or repudiate contracts under 12 U.S.C. §1821(e), reclaim or recover the Transferred Assets from the Issuer or recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank,
  - (iii) Neither the FDIC (acting for itself as a creditor or as representative of the Bank or its shareholders or creditors) nor any creditor of the Bank would have the right, under any bankruptcy or insolvency law applicable in the conservatorship or receivership of the Bank, to avoid the Transfers, to recover the Transferred Assets, or to require the Transferred Assets to be turned over to the FDIC or such creditor, and
  - (iv) There is no other power exercisable by the FDIC as conservator or receiver for the Bank that would permit the FDIC as such conservator or receiver to reclaim or recover the Transferred Assets from the Issuer, or to recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank; provided, however, that we offer no opinion as to whether, in receivership, the FDIC or any creditor of the Bank may take any such actions if the Holders [*holders of beneficial interests in the transferred assets*] receive payment of the principal amount of the Interests and the interest earned thereon (at the contractual yield) through the date the Holders are so paid; and

---

<sup>6</sup> For an entity subject to conservatorship or liquidation under the National Credit Union Act, the examples and discussion in this paragraph would be modified to make appropriate references to "liquidation" and "liquidating agent" and additional information relating to rights and regulations of the National Credit Union Administration.

<sup>7</sup> When the opinion indicates that isolation is achieved without reference to a true sale, the opinion also should provide reasonable assurance that the transferred assets are beyond the reach of the transferor and its creditors other than the transferee to the same extent that is provided in Example 2, paragraph B.

- B. Prior to the appointment of the FDIC as conservator or receiver for the Bank, the Bank and its other creditors would not have the right to reclaim or recover the Transferred Assets from the Issuer, except by the exercise of a contractual provision [insert appropriate citation] to require the transfer, or return, of the Transferred Assets that exists solely as a result of the contract between the Bank and the Issuer."<sup>8</sup>

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold or transferred (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist.<sup>9</sup> For example, if a so-called two-step structure has been used to achieve isolation, the following paragraph usually will be required with respect to the transferee in the first step of the structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

"Based upon the assumptions of fact and the discussion set forth above, and on a reasoned analysis of analogous case law, *we are of the opinion that* in a properly presented and argued case, as a legal matter, in a receivership, conservatorship, or liquidation proceeding in respect of the Seller, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller."

Certain powers to repudiate contracts, recover, reclaim, or recharacterize transferred assets as property of a transferor that are exercisable by the FDIC under the Federal Deposit Insurance Act may, as of the date of the transfer, be limited by a regulation that may be repealed or amended only in respect of transfers occurring on or after the effective date of such repeal or amendment.<sup>10</sup> With respect to the powers of a receiver or conservator that may not be exercised under that regulation, it is acceptable for attorneys to rely upon the effectiveness of the limitation on such powers set forth in the applicable regulation, provided that the attorney states, based on reasonable assumptions, that: (1) the affected transfer of financial assets meets all qualification requirements of the regulation, and (2) the regulation had not, as of the date of the opinion, been amended, repealed, or held inapplicable by a court with jurisdiction with respect to such transfer. The opinion should separately address any powers of repudiation, recovery, reclamation, or recharacterization exercisable by a receiver or conservator notwithstanding that regulation (for example, rights, powers, or remedies regarding transfers specifically excluded from the regulation) in a manner that provides the same level of assurance as would be provided in the case of opinions that conform with requirements of paragraph .13, except that such opinion shall address powers arising under the Federal Deposit Insurance Act. The considerations in the immediately preceding three sentences are adequately addressed either by the Example 1 opinion or the Example 2 opinion described in this paragraph or by the variations described in the second paragraph of footnote 8 and in footnote 9.

<sup>8</sup> See the second paragraph of footnote 4.

Paragraph B is not required if the opinion includes both a conclusion, as set forth in Example 1, that the transfer constitutes a "true sale" and the conclusions set forth of Example 2, paragraph A. It is not necessary to include any provision of Example 2 if the opinion is as set forth in Example 1.

<sup>9</sup> An additional substantive consolidation opinion is not required if the opinion states that its conclusion includes the inability to recover the transferred financial assets or recharacterize the transfer by application of the doctrine of "substantive consolidation."

<sup>10</sup> The applicable regulation is 12 CFR section 360.6, effective September 11, 2000.

**.15** A legal letter that includes an inadequate opinion, inappropriate limitations, or a disclaimer of opinion, or that effectively limits the scope of the opinion to facts and circumstances that are not applicable to the transaction, does not provide persuasive evidence to support the entity's assertion that the transferred assets have been put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. Likewise, a legal letter that includes conclusions that are expressed using some of the following language would not provide persuasive evidence that a transfer of financial assets has met the isolation criterion of FASB Statement No. 140 (see paragraphs .20 and .21 of this interpretation):

- "We are unable to express an opinion..."
- "It is our opinion, based upon limited facts..."
- "We are of the view..." or "it appears..."
- "There is a reasonable basis to conclude that..."
- "In our opinion, the transfer would *either* be a sale or a grant of a perfected security interest..."<sup>11</sup>
- "In our opinion, there is a reasonable possibility..."
- "In our opinion, the transfer *should* be considered a sale..."
- "It is our opinion that the company will be able to assert meritorious arguments..."
- "In our opinion, it is more likely than not ..."
- "In our opinion, the transfer would *presumptively* be..."
- "In our opinion, it is probable that..."

Furthermore, conclusions about hypothetical transactions may not be relevant to the transaction that is the subject of management's assertions. Section 326, *Audit Evidence*, paragraph .06, states "The auditor should consider the sufficiency and appropriateness of audit evidence to be obtained when assessing risks and designing further audit procedures." Additionally, conclusions about hypothetical transactions may not contemplate all of the facts and circumstances or the provisions in the agreements of the transaction that is the subject of management's assertions, and generally would not provide persuasive evidence.<sup>12</sup>

**.16 Question**—Are legal opinions that restrict the use of the opinion to the client, or to third parties other than the auditor, acceptable audit evidence?

**.17 Interpretation**—No. Footnote 5 to section 336.09 states: "In some cases, the auditor may decide it is necessary to contact the specialist to determine

<sup>11</sup> Certain transferors are subject only to receivership (and not to proceedings under the U.S. Bankruptcy Code or the Federal Deposit Insurance Act) under laws that do not allow a receiver to reach assets in which a security interest has been granted. In such circumstances, an opinion that concludes that the transfer would either be a sale or a grant of a security interest that puts the transferred assets beyond the reach of such receiver and other creditors would provide persuasive evidence that the isolation criterion is met.

In certain circumstances, a legal specialist may provide an opinion on both steps of a two-step structure. Such language would be acceptable in an opinion for a transfer of assets in the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140 provided that the opinion on the transfer in the first step is consistent with paragraphs .13 or .14 of this interpretation.

<sup>12</sup> For example, a memorandum of law from a legal specialist usually analyzes (and may make conclusions about) a transaction that may be completed subsequently. Such memorandum generally would not provide persuasive evidence unless the conclusions conform with this interpretation and a legal specialist opines that such conclusions apply to a completed transaction that is the subject of management's assertion.

that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements." Given the importance of the legal opinion to the assertion in this case, and the precision that legal specialists use in drafting such opinions, an auditor should not use as evidence a legal opinion that he or she deems otherwise adequate if the letter restricts use of the findings expressed therein to the client or to third parties other than the auditor. In that event, the auditor should request that the client obtain the legal specialist's written permission for the auditor to use the opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140.

**.18** An example of a letter from a legal specialist to a client that adequately communicates permission for the auditor to use the legal specialist's opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140 is as follows:

"Notwithstanding any language to the contrary in our opinions of even date with respect to certain bankruptcy issues relating to the above-referenced transaction, you are authorized to make available to your auditors such opinions solely as audit evidence in support of their evaluation of management's assertion that the transfer of the receivables meets the isolation criterion of FASB Statement No. 140, provided a copy of this letter is furnished to them in connection therewith. In authorizing you to make copies of such opinions available to your auditors for such purpose, we are not undertaking or assuming any duty or obligation to your auditors or establishing any lawyer-client relationship with them. Further, we do not undertake or assume any responsibility with respect to financial statements of you or your affiliates."<sup>13</sup>

**.19** A letter from a legal specialist to a client might authorize the client to make copies of the legal opinion available to the auditor to use in his or her evaluation of management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140, but then state that the auditor is not authorized to rely thereon. Such "use but not rely on" language, or other language that similarly restricts the auditor's use of the legal specialist's opinion, does not adequately communicate permission for the auditor to use the legal specialist's opinion as audit evidence. The auditor may wish to consult with his or her legal counsel in circumstances where it is not clear that the auditor may use the legal specialist's opinion.

**.20 Question**—If the auditor determines that it is appropriate to use the work of a legal specialist, and either the resulting legal response does not provide persuasive evidence that a transfer of assets has met the isolation criterion, or the legal specialist does not grant permission for the auditor to use a legal opinion that is restricted to the client or to third parties other than the auditor, what other steps might an auditor consider?

**.21 Interpretation**—When other relevant audit evidence exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer.<sup>14</sup> However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer

---

<sup>13</sup> This language may appear in the legal specialist's opinion rather than in a separate letter. In that case, the wording would be modified slightly to indicate the context.

<sup>14</sup> See section 336.13 as to additional procedures that may be applied.

has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with section 508, *Reports on Audited Financial Statements*, paragraphs .35 through .60. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with section 508.22-.26 and 508.61-.63.

## AU Section 337

# *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*<sup>1</sup>

Source: SAS No. 12.

See section 9337 for interpretations of this section.

Issue date, unless otherwise indicated: January, 1976.

.01 This section provides guidance on the procedures an independent auditor should consider for identifying litigation, claims, and assessments and for satisfying himself as to the financial accounting and reporting for such matters when he is performing an audit in accordance with generally accepted auditing standards.

### Accounting Considerations

.02 Management is responsible for adopting policies and procedures to identify, evaluate, and account for litigation, claims, and assessments as a basis for the preparation of financial statements in conformity with generally accepted accounting principles.

.03 The standards of financial accounting and reporting for loss contingencies, including those arising from litigation, claims, and assessments, are set forth in Statement of Financial Accounting Standards No. 5 [AC section C59], *Accounting for Contingencies*.<sup>2</sup>

### Auditing Considerations

.04 With respect to litigation, claims, and assessments, the independent auditor should obtain audit evidence relevant to the following factors:

- a. The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments.
- b. The period in which the underlying cause for legal action occurred.
- c. The degree of probability of an unfavorable outcome.
- d. The amount or range of potential loss.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

---

<sup>1</sup> This section supersedes the commentary, "Lawyers' Letters," January 1974 (section 1001), and auditing interpretations of section 560.12 on lawyers' letters, January 1975 (section 9560.01-.26). It amends section 560.12d to read as follows: "Inquire of client's legal counsel concerning litigation, claims, and assessments (see section 337)."

<sup>2</sup> Pertinent portions are reprinted in Exhibit I, section 337B. FASB Statement No. 5 [AC section C59], also describes the standards of financial accounting and reporting for gain contingencies. The auditor's procedures with respect to gain contingencies are parallel to those described in this SAS for loss contingencies.

## Audit Procedures

**.05** Since the events or conditions that should be considered in the financial accounting for and reporting of litigation, claims, and assessments are matters within the direct knowledge and, often, control of management of an entity, management is the primary source of information about such matters. Accordingly, the independent auditor's procedures with respect to litigation, claims, and assessments should include the following:

- a. Inquire of and discuss with management the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments.
- b. Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the date of the balance sheet being reported on, and during the period from the balance sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel, and obtain assurances from management, ordinarily in writing, that they have disclosed all such matters required to be disclosed by Statement of Financial Accounting Standards No. 5 [AC section C59].
- c. Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.
- d. Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59]. Also the auditor, with the client's permission, should inform the lawyer that the client has given the auditor this assurance. This client representation may be communicated by the client in the inquiry letter or by the auditor in a separate letter.<sup>3</sup>

**.06** An auditor ordinarily does not possess legal skills and, therefore, cannot make legal judgments concerning information coming to his attention. Accordingly, the auditor should request the client's management to send a letter of inquiry to those lawyers with whom management consulted concerning litigation, claims, and assessments.

**.07** The audit normally includes certain other procedures undertaken for different purposes that might also disclose litigation, claims, and assessments. Examples of such procedures are as follows:

- a. Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited.
- b. Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents.

---

<sup>3</sup> An example of a separate letter is as follows: We are writing to inform you that (name of company) has represented to us that (except as set forth below and excluding any such matters listed in the letter of audit inquiry) there are no unasserted possible claims that you have advised are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59] in its financial statements at (balance sheet date) and for the (period) then ended. (List unasserted possible claims, if any.) Such a letter should be signed and sent by the auditor.

- c. Obtaining information concerning guarantees from bank confirmation forms.
- d. Inspecting other documents for possible guarantees by the client.

### **Inquiry of a Client's Lawyer<sup>4</sup>**

**.08** A letter of audit inquiry to the client's lawyer is the auditor's primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.<sup>5</sup> Audit evidence obtained from the client's inside general counsel or legal department may provide the auditor with the necessary corroboration. However, audit evidence obtained from inside counsel is not a substitute for information outside counsel refuses to furnish. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.09** The matters that should be covered in a letter of audit inquiry include, but are not limited to, the following:

- a. Identification of the company, including subsidiaries, and the date of the audit.
- b. A list prepared by management (or a request by management that the lawyer prepare a list) that describes and evaluates pending or threatened litigation, claims, and assessments with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- c. A list prepared by management that describes and evaluates unasserted claims and assessments that management considers to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome, with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- d. As to each matter listed in item *b*, a request that the lawyer either furnish the following information or comment on those matters as to which his views may differ from those stated by management, as appropriate:
  - (1) A description of the nature of the matter, the progress of the case to date, and the action the company intends to take (for example, to contest the matter vigorously or to seek an out-of-court settlement).
  - (2) An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.
  - (3) With respect to a list prepared by management, an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

---

<sup>4</sup> An illustrative inquiry letter to legal counsel is contained in the Appendix (section 337A).

<sup>5</sup> It is not intended that the lawyer be requested to undertake a reconsideration of all matters upon which he was consulted during the period under audit for the purpose of determining whether he can form a conclusion regarding the probability of assertion of any possible claim inherent in any of the matters so considered.

- e. As to each matter listed in item *c*, a request that the lawyer comment on those matters as to which his views concerning the description or evaluation of the matter may differ from those stated by management.
- f. A statement by the client that the client understands that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client should disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5 [AC section C59].
- g. A request that the lawyer confirm whether the understanding described in item *f* is correct.
- h. A request that the lawyer specifically identify the nature of and reasons for any limitation on his response.

Inquiry need not be made concerning matters that are not considered material, provided the client and the auditor have reached an understanding on the limits of materiality for this purpose.

**.10** In special circumstances, the auditor may obtain a response concerning matters covered by the audit inquiry letter in a conference, which offers an opportunity for a more detailed discussion and explanation than a written reply. A conference may be appropriate when the evaluation of the need for accounting for or disclosure of litigation, claims, and assessments involves such matters as the evaluation of the effect of legal advice concerning unsettled points of law, the effect of uncorroborated information, or other complex judgments. The auditor should appropriately document conclusions reached concerning the need for accounting for or disclosure of litigation, claims, and assessments.

**.11** In some circumstances, a lawyer may be required by his Code of Professional Responsibility to resign his engagement if his advice concerning financial accounting and reporting for litigation, claims, and assessments is disregarded by the client. When the auditor is aware that a client has changed lawyers or that a lawyer engaged by the client has resigned, the auditor should consider the need for inquiries concerning the reasons the lawyer is no longer associated with the client.

## Limitations on the Scope of a Lawyer's Response<sup>6</sup>

**.12** A lawyer may appropriately limit his response to matters to which he has given substantive attention in the form of legal consultation or representation. Also, a lawyer's response may be limited to matters that are considered

---

<sup>6</sup> The American Bar Association has approved a "Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," which explains the concerns of lawyers and the nature of the limitations an auditor is likely to encounter. That Statement of Policy is reprinted as Exhibit II (section 337C) for the convenience of readers, but is not an integral part of this Statement.

individually or collectively material to the financial statements, provided the lawyer and auditor have reached an understanding on the limits of materiality for this purpose. Such limitations are not limitations on the scope of the audit.

**.13** A lawyer's refusal to furnish the information requested in an inquiry letter either in writing or orally (see paragraphs .09 and .10) would be a limitation on the scope of the audit sufficient to preclude an unqualified opinion (see section 508.22 and .23).<sup>7</sup> A lawyer's response to such an inquiry and the procedures set forth in paragraph .05 provide the auditor with sufficient audit evidence to satisfy himself concerning the accounting for and reporting of pending and threatened litigation, claims and assessments. The auditor obtains sufficient audit evidence to satisfy himself concerning reporting for those unasserted claims and assessments required to be disclosed in financial statements from the foregoing procedures and the lawyer's specific acknowledgement of his responsibility to his client in respect of disclosure obligations (see paragraph .09g). This approach with respect to unasserted claims and assessments is necessitated by the public interest in protecting the confidentiality of lawyer-client communications. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

### **Other Limitations on a Lawyer's Response**

**.14** A lawyer may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss, because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome may sometimes not be within a lawyer's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available; and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, a lawyer may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor ordinarily will conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event which is not susceptible of reasonable estimation, and should look to the guidance in section 508.45 through .49 to determine the effect, if any, of the lawyer's response on the auditor's report. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 79.]

---

[The next page is 591.]

---

<sup>7</sup> A refusal to respond should be distinguished from an inability to form a conclusion with respect to certain matters of judgment (see paragraph .14). Also, lawyers outside the United States sometimes follow practices at variance with those contemplated by this section to the extent that different procedures from those outlined herein may be necessary. In such circumstances, the auditor should exercise judgment in determining whether alternative procedures are adequate to comply with the requirements of this section.

## AU Section 9337

### ***Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337***

#### **1. Specifying Relevant Date in an Audit Inquiry Letter**

**.01 Question**—Should the auditor request the client to specify, in his audit inquiry letter to a lawyer prepared in accordance with section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, the date by which the lawyer's response should be sent to the auditor. Also, should the letter request the lawyer to specify in his response the latest date covered by his review (the "effective date")?

**.02 Interpretation**—Yes. It should be recognized that, to adequately respond to an audit inquiry letter, lawyers will ordinarily employ some internal review procedures which will be facilitated by specifying the earliest acceptable effective date of the response and the latest date by which it should be sent to the auditor. Ordinarily, a two-week period should be allowed between the specified effective date of the lawyer's response and the latest date by which the response should be sent to the auditor. Clearly stating the relevant dates in the letter and specifying these dates to the lawyer in a timely manner will allow the responding lawyer an adequate amount of time to complete his review procedures and assist the auditor in coordinating the timing of the completion of his field work with the latest date covered by the lawyer's review.

**.03** Further, the lawyer should be requested to specify the effective date of his response. If the lawyer's response does not specify an effective date, the auditor can assume that the date of the lawyer's response is the effective date.

[Issue Date: March, 1977.]

#### **2. Relationship Between Date of Lawyer's Response and Auditor's Report**

**.04 Question**—The illustrative form of audit inquiry letter included in the Appendix [section 337A] to section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, requests a response as to matters that existed at the balance sheet date and during the period from that date to the date of the response. What is the relationship between the effective date of the lawyer's response and the date of the auditor's report, which is generally the date of the completion of field work?

**.05 Interpretation**—Section 560.10 through .12 indicates that the auditor is concerned with events, which may require adjustments to, or disclosure in, the financial statements, occurring through the date of his or her report. Therefore, the latest date of the period covered by the lawyer's response (the "effective date") should be as close to the date of the auditor's report as is practicable in the circumstances. Consequently, specifying the effective date of the

lawyer's response to reasonably approximate the expected date of the auditor's report will in most instances obviate the need for an updated response from the lawyer.

[Issue Date: March, 1977; Revised: December, 2005.]

### 3. Form of Audit Inquiry Letter When Client Represents That No Unasserted Claims and Assessments Exist

**.06 Question**—The illustrative audit inquiry letter included in the Appendix [section 337A] to section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, assumes that the client specifies certain unasserted claims and assessments. However, in some cases, clients have stated that there are no such claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome. What appropriate revision to the wording of the letter can be used in such situations?

**.07 Interpretation**—Wording that could be used in an audit inquiry letter, instead of the heading and first paragraph in the section relating to unasserted claims and assessments included in the Appendix [section 337A] to section 337, when the client believes that there are no unasserted claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by FASB Statement No. 5, *Accounting for Contingencies* [AC section C59], is as follows:

*Unasserted claims and assessments*—We have represented to our auditors that there are no unasserted possible claims that you have advised us are probable of assertion and must be disclosed, in accordance with Statement of Financial Accounting Standards No. 5. (The second paragraph in the section relating to unasserted claims and assessments would not be altered.)

[Issue Date: March, 1977.]

### 4. Documents Subject to Lawyer-Client Privilege

**.08 Question**—Section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .05c, states: "Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers." Would this include a review of documents at the client's location considered by the lawyer and the client to be subject to the lawyer-client privilege?

**.09 Interpretation**—No. Although ordinarily an auditor would consider the inability to review information that could have a significant bearing on his audit as a scope restriction, in recognition of the public interest in protecting the confidentiality of lawyer-client communications (see section 337.13), section 337.05c is not intended to require an auditor to examine documents that the client identifies as subject to the lawyer-client privilege. In the event of questions concerning the applicability of this privilege, the auditor may request confirmation from the client's counsel that the information is subject to that privilege and that the information was considered by the lawyer in responding

to the audit inquiry letter or, if the matters are being handled by another lawyer, an identification of such lawyer for the purpose of sending him an audit inquiry letter.

[Issue Date: March, 1977.]

## 5. Alternative Wording of the Illustrative Audit Inquiry Letter to a Client's Lawyer

**.10 Question**—The Appendix [section 337A] of section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, provides an illustrative audit inquiry letter to legal counsel. That inquiry letter is based on the assumptions that (1) management of the company has prepared and furnished to the auditor and has set forth in the audit inquiry letter a description and evaluation of pending or threatened litigation, claims, and assessments and (2) management has identified and specified for comment in the audit inquiry letter unasserted claims or assessments that are probable of assertion and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome. In many engagements, circumstances may render certain portions of the illustrative letter inappropriate. For instance, many clients ask their lawyers to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments rather than have management furnish such information. How can the wording of the inquiry letter be modified to recognize circumstances that differ from those assumed in the illustrative letter and to be more specific regarding the timing of the lawyer's response?

**.11 Interpretation**—Section 337.09, outlines the matters that should be covered in a letter of audit inquiry. Although section 337 provides an illustrative audit inquiry letter to legal counsel, it should be modified, if necessary, to fit the circumstances. The modified illustrative audit inquiry letter that follows is based on a typical situation: management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments, and also represents that there are no unasserted claims or assessments that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by FASB Statement No. 5, *Accounting for Contingencies* [AC section C59]. It also includes a separate response section with language that clarifies the auditor's expectations regarding the timing of the lawyer's response.

"In connection with an audit of our financial statements as of (balance-sheet date) and for the (period) then ended, please furnish our auditors, (name and address of auditors), with the information requested below concerning certain contingencies involving matters with respect to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation." [When a materiality limit has been established based on an understanding between management and the auditor, the following sentence should be added: This request is limited to contingencies amounting to (amount) individually or items involving lesser amounts that exceed (amount) in the aggregate.]

### **.12 Pending or Threatened Litigation, Claims, and Assessments**

"Regarding pending or threatened litigation, claims, and assessments, please include in your response: (1) the nature of each matter, (2) the progress of each matter to date, (3) how the Company is responding or intends to respond

(for example, to contest the case vigorously or seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss."

### .13 Unasserted Claims and Assessments

"We have represented to our auditors that there are no unasserted possible claims or assessments that you have advised us are probable of assertion and must be disclosed in accordance with FASB Statement No. 5 [AC section C59].<sup>1</sup> We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of FASB Statement No. 5 [AC section C59]. Please specifically confirm to our auditors that our understanding is correct."

### .14 Response

"Your response should include matters that existed as of (balance-sheet date) and during the period from that date to the effective date of your response."

"Please specifically identify the nature of and reasons for any limitations on your response."

"Our auditors expect to have the audit completed about (expected completion date). They would appreciate receiving your reply by that date with a specified effective date no earlier than (ordinarily two weeks before expected completion date)."<sup>2</sup>

[Issue Date: June 1983.]

## 6. Client Has Not Consulted a Lawyer

**.15 Question**—Section 337.06 requires an auditor to request that the client's management send a letter of inquiry to those lawyers with whom management has consulted concerning litigation, claims, or assessments. In some instances, management may not have consulted a lawyer. In such circumstances, what should the auditor do to obtain sufficient, appropriate audit evidence regarding litigation, claims, and assessments?

**.16 Interpretation**—Section 337 is expressly limited to inquiry of lawyers with whom management has consulted. If the client has not consulted a lawyer, the auditor normally would rely on the review of internally available information as outlined in section 337.05 and .07, and the written representation

---

<sup>1</sup> A parenthetical statement such as "(excerpts of which can be found in the ABA's *Auditor's Letter Handbook*") might be added here if the auditor believes that it would be helpful to the lawyer's understanding of the requirements of FASB Statement No. 5 [AC section C59]. *The Auditor's Letter Handbook* contains, among other things, a copy of section 337, the ABA's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* [section 337C], and excerpts from FASB Statement No. 5 [AC section C59].

<sup>2</sup> Two auditing interpretations (see sections 9337.01-.05) address relevant dates in an audit inquiry letter and the relationship between the date of the lawyer's response and the audit report date.

of management regarding litigation, claims, and assessments as required by section 333, *Management Representations*, paragraph .06o and p. In those circumstances, the representation regarding litigation, claims, and assessments might be worded as follows:

"We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with FASB Statement No. 5 [AC section C59], and we have not consulted a lawyer concerning litigation, claims, or assessments."

.17 If information comes to the auditor's attention that may indicate potentially material litigation, claims, and assessments, the auditor should discuss with the client its possible need to consult legal counsel so that the client may evaluate its responsibility under FASB Statement No. 5 [AC section C59] to accrue or disclose loss contingencies. Depending on the severity of the matter, refusal by the client to consult legal counsel in those circumstances may result in a scope limitation, and the auditor should consider the effect of such a limitation on his audit report.

[Issue Date: June, 1983; Revised: January, 2004; Revised: March, 2006.]

## 7. Assessment of a Lawyer's Evaluation of the Outcome of Litigation

.18 *Question*—Section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .09d(2), states that a letter of audit inquiry should include a request for the lawyer's evaluation of the likelihood of an unfavorable outcome of pending or threatened litigation, claims, and assessments to which he has devoted substantive attention. However, written responses from lawyers vary considerably and may contain evaluation wording that is vague or ambiguous and, thus, of limited use to the auditor. What constitutes a clear response and what should the auditor do if he considers the response unclear?

.19 *Interpretation*—The American Bar Association's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* (ABA Statement) is reprinted as Exhibit II [section 337C] to section 337. While Paragraph 5 of the ABA Statement [section 337C] states that the lawyer "may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is 'probable' or 'remote'," he is not required to use those terms in communicating his evaluation to the auditor. The auditor may find other wording sufficiently clear as long as the terms can be used to classify the outcome of the uncertainty under one of the three probability classifications established in FASB Statement No. 5, *Accounting for Contingencies* [AC section C59].<sup>3</sup>

.20 Some examples of evaluations concerning litigation that may be considered to provide sufficient clarity that the likelihood of an unfavorable outcome is "remote" even though they do not use that term are:

- "We are of the opinion that this action will not result in any liability to the company."

---

<sup>3</sup> FASB Statement No. 5 [AC section C59] uses the terms "probable," "reasonably possible," and "remote" to describe different degrees of likelihood that future events will confirm a loss or an impairment of an asset or incurrence of a liability, and the accounting standards for accrual and disclosure are based on those terms.

- "It is our opinion that the possible liability to the company in this proceeding is nominal in amount."
- "We believe the company will be able to defend this action successfully."
- "We believe that the plaintiff's case against the company is without merit."
- "Based on the facts known to us, after a full investigation, it is our opinion that no liability will be established against the company in these suits."

**.21** Absent any contradictory information obtained by the auditor either in other parts of the lawyer's letter or otherwise, the auditor need not obtain further clarification of evaluations such as the foregoing.

**.22** Because of inherent uncertainties described in section 337.14 and in the ABA Policy Statement [section 337C], an evaluation furnished by the lawyer may indicate significant uncertainties or stipulations as to whether the client will prevail. The following are examples of lawyers' evaluations that are unclear as to the likelihood of an unfavorable outcome:

- "This action involves unique characteristics wherein authoritative legal precedents do not seem to exist. We believe that the plaintiff will have serious problems establishing the company's liability under the act; nevertheless, if the plaintiff is successful, the award may be substantial."
- "It is our opinion that the company will be able to assert meritorious defenses to this action." (The term "meritorious defenses" indicates that the company's defenses will not be summarily dismissed by the court; it does not necessarily indicate counsel's opinion that the company will prevail.)
- "We believe the action can be settled for less than the damages claimed."
- "We are unable to express an opinion as to the merits of the litigation at this time. The company believes there is absolutely no merit to the litigation." (If client's counsel, with the benefit of all relevant information, is unable to conclude that the likelihood of an unfavorable outcome is "remote," it is unlikely that management would be able to form a judgment to that effect.)
- "In our opinion, the company has a substantial chance of prevailing in this action." (A "substantial chance," a "reasonable opportunity," and similar terms indicate more uncertainty than an opinion that the company will prevail.)

**.23** If the auditor is uncertain as to the meaning of the lawyer's evaluation, he should request clarification either in a follow-up letter or a conference with the lawyer and client, appropriately documented. If the lawyer is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor should look to the guidance in section 508.45 through .49 to determine the effect, if any, of the lawyer's response on the auditor's report.

[Issue Date: June, 1983; Revised: February, 1997.]

## 8. Use of the Client's Inside Counsel in the Evaluation of Litigation, Claims, and Assessments

**.24 Question**—Section 337.06 requires an auditor to request that the client's management send a letter of inquiry to those lawyers with whom management has consulted concerning litigation, claims, and assessments. Sometimes, the client's inside general counsel or legal department (hereinafter referred to as "inside counsel") is handling litigation, claims, and assessments either exclusive of or in conjunction with outside lawyers. In such circumstances, when does inside counsel's response constitute sufficient, appropriate audit evidence regarding litigation, claims, and assessments?

**.25 Interpretation**—Section 337.08 states that "Audit evidence obtained from the client's inside general counsel or legal department may provide the auditor with the necessary corroboration." Inside counsel can range from one lawyer to a large staff, with responsibilities ranging from specific internal matters to a comprehensive coverage of all of the client's legal needs, including litigation with outside parties. Because both inside counsel and outside lawyers are bound by the ABA's Code of Professional Responsibilities, there is no difference in their professional obligations and responsibilities. In some circumstances, outside lawyers, if used at all, may be used only for limited purposes, such as data accumulation or account collection activity. In such circumstances, inside counsel has the primary responsibility for corporate legal matters and is in the best position to know and precisely describe the status of all litigation, claims, and assessments or to corroborate information furnished by management.

**.26** Audit inquiry letters should be sent to those lawyers, which may be either inside counsel or outside lawyers, who have the primary responsibility for, and knowledge about, particular litigation, claims, and assessments. If inside counsel in handling litigation, claims, and assessments exclusively, their evaluation and response ordinarily would be considered adequate. Similarly, if both inside counsel and outside lawyers have been involved in the matters, but inside counsel has assumed the primary responsibility for the matters, inside counsel's evaluation may well be considered adequate.<sup>4</sup> However, there may be circumstances when litigation, claims, or assessments involving substantial overall participation by outside lawyers are of such significance to the financial statements that the auditor should consider obtaining the outside lawyers' response that they have not formulated a substantive conclusion that differs in any material respect from inside counsel's evaluation, even though inside counsel may have primary responsibility.

**.27** If both inside counsel and outside lawyers have devoted substantive attention to a legal matter, but their evaluations of the possible outcome differ, the auditor should discuss the differences with the parties involved. Failure to reach agreement between the lawyers may require the auditor to consider appropriate modification of his audit report.

[Issue Date: June 1983; Revised: March, 2006.]

## 9. Use of Explanatory Language About the Attorney-Client Privilege or the Attorney Work-Product Privilege

**.28 Question**—In some cases, in order to emphasize the preservation of the attorney-client privilege or the attorney work-product privilege, some clients

---

<sup>4</sup> This does not alter the caveat in section 337.08 that "evidential matter obtained from inside counsel is not a substitute for information outside counsel refuses to furnish."

have included the following or substantially similar language in the audit inquiry letter to legal counsel:

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

For the same reason, some lawyers have included the following or substantially similar language in their response letters to auditors:

The Company [OR OTHER DEFINED TERM] has advised us that, by making the request set forth in its letter to us, the Company [OR OTHER DEFINED TERM] does not intend to waive the attorney-client privilege with respect to any information which the Company [OR OTHER DEFINED TERM] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [OR OTHER DEFINED TERM].

Does the explanatory language about the attorney-client privilege or the attorney work-product privilege result in a limitation on the scope of the audit?

**.29 Answer**—No. According to the *Report by the American Bar Association's Subcommittee on Audit Inquiry Responses*, explanatory language similar to the foregoing in the letters of the client or the lawyer is not a limitation on the scope of the lawyer's response. The report states that such language simply makes explicit what has always been implicit, namely, the language states clearly that neither the client nor the lawyer intended a waiver. The report further states that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges. The *Report by the American Bar Association's Subcommittee on Audit Inquiry Responses* is reprinted in paragraph .30.

### **.30 Report of the Subcommittee on Audit Inquiry Responses\***

Because of a recent court case and other judicial decisions involving lawyers' responses to auditors' requests for information, an area of uncertainty or concern has been brought to the Subcommittee's attention and is the subject of the following comment:

This Committee's report does not modify the ABA Statement of Policy, nor does it constitute an interpretation thereof. The Preamble to the ABA Statement of Policy states as follows:

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

---

\* "Excerpted from 'Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information,' *The Business Lawyer*, vol. 31, no. 3, April 1976, copyright 1976 American Bar Association, reprinted by permission of the American Bar Association."

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political, and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and to act in accordance with counsel's advice.

Paragraph (1) of the ABA Statement of Policy provides as follows:

(1) *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5, promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying commentary), to the extent hereinafter set forth, subject to the following:

(a) Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.

(b) In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.

(c) Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.

(d) In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

In order to preserve explicitly the evidentiary privileges, some lawyers have suggested that clients include language in the following or substantially similar form:

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

If client's request letter does not contain language similar to that in the preceding paragraph, the lawyer's statement that the client has so advised him or her may be based upon the fact that the client has in fact so advised the lawyer, in writing or orally, in other communications or in discussions.

For the same reason, the response letter from some lawyers also includes language in the following or substantially similar form:

The Company [OR OTHER DEFINED TERM] has advised us that, by making the request set forth in its letter to us, the Company [OR OTHER DEFINED TERM] does not intend to waive the attorney-client privilege with respect to any information which the Company [OR OTHER DEFINED TERM] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [OR OTHER DEFINED TERM].

We believe that language similar to the foregoing in letters of the client or the lawyer simply makes explicit what has always been implicit, namely, it expressly states clearly that neither the client nor the lawyer intended a waiver. It follows that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges.

On the other hand, the inclusion of such language does not necessarily assure the client that, depending on the facts and circumstances, a waiver may not be found by a court of law to have occurred.

We do not believe that the foregoing types of inclusions cause a negative impact upon the public policy considerations described in the Preamble to the ABA Statement of Policy nor do they intrude upon the arrangements between the legal profession and the accounting profession contemplated by the ABA Statement of Policy. Moreover, we do not believe that such language interferes in any way with the standards and procedures of the accounting profession in the auditing process nor should it be construed as a limitation upon the lawyer's reply to the auditors. We have been informed that the Auditing Standards Board of the AICPA has adopted an interpretation of SAS 12 recognizing the propriety of these statements.

Lawyers, in any case, should be encouraged to have their draft letters to auditors reviewed and approved by the client before releasing them to the auditors and may wish to explain to the client the legal consequences of the client's consent to lawyer's response as contemplated by subparagraph 1(d) of the Statement of Policy.

December 1989

[Issue Date: February, 1990.]

## **10. Use of Explanatory Language Concerning Unasserted Possible Claims or Assessments in Lawyers' Responses to Audit Inquiry Letters**

**.31 Question**—In order to emphasize the preservation of the attorney-client privilege with respect to unasserted possible claims or assessments, some lawyers include the following or substantially similar language in their responses to audit inquiry letters:

"Please be advised that pursuant to clauses (b) and (c) of Paragraph 5 of the ABA Statement of Policy [American Bar Association's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*] and related Commentary referred to in the last paragraph of this letter, it would be

inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the Company. We can only furnish information concerning those unasserted possible claims or assessments upon which the Company has specifically requested in writing that we comment. We also cannot comment upon the adequacy of the Company's listing, if any, of unasserted possible claims or assessments or its assertions concerning the advice, if any, about the need to disclose same."

Does the inclusion of this or similar language result in a limitation on the scope of the audit?

**.32 Interpretation**—No. Additional language similar to the foregoing in a letter of a lawyer is not a limitation on the scope of the audit. However, the ABA Statement of Policy [section 337C] and the understanding between the legal and accounting professions assumes that the lawyer, under certain circumstances, will advise and consult with the client concerning the client's obligation to make financial statement disclosure with respect to unasserted possible claims or assessments.<sup>5</sup> Confirmation of this understanding should be included in the lawyer's response.

[Issue Date: January, 1997.]

---

[The next page is 605.]

---

<sup>5</sup> See Paragraph 6 of the ABA Statement of Policy [section 337C] and its Commentary [section 337C]. In addition, Annex A to the ABA Statement of Policy [section 337C] contains the following illustrative language in the lawyers' response letter to the auditors:

"Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of FASB Statement No. 5, *Accounting for Contingencies* [AC section C59]."

## AU Section 339

### *Audit Documentation*

(Supersedes SAS No. 96)

Source: SAS No. 103.

See section 9339 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2006.

### Introduction

**.01** The purpose of this section is to establish standards and provide guidance on audit documentation. The exercise of professional judgment is integral in applying the provisions of this section. For example, professional judgment is used in determining the quantity, type, and content of audit documentation consistent with this section.

**.02** Other Statement on Auditing Standards contain specific documentation requirements (see the Appendix A [paragraph .36]). Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement.

**.03** The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation:

- a. Provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards.
- b. Provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

**.04** Audit documentation is an essential element of audit quality. Although documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate documentation contributes to the quality of an audit.

**.05** Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. Audit documentation, also known as working papers or workpapers, may be recorded on paper or on electronic or other media. When transferring or copying paper documentation to another media, the auditor should apply procedures to generate a copy that is faithful in form and content to the original paper document.<sup>1</sup>

---

<sup>1</sup> There may be legal, regulatory, or other reasons to retain the original paper document.

**.06** Audit documentation includes, for example, audit programs,<sup>2</sup> analyses, issues memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail) concerning significant findings or issues, and schedules of the work the auditor performed. Abstracts or copies of the entity's records (for example, significant and specific contracts and agreements) should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. The audit documentation for a specific engagement is assembled in an audit file.<sup>3</sup>

**.07** The auditor need not retain in audit documentation superseded drafts of working papers or financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

**.08** In addition to the objectives set out in paragraph .03, audit documentation serves a number of other purposes, including:

- Assisting the audit team to plan and perform the audit;
- Assisting auditors who are new to an engagement and review the prior year's documentation to understand the work performed as an aid in planning and performing the current engagement;
- Assisting members of the audit team responsible for supervision to direct and supervise the audit work, and to review the quality of work performed;
- Demonstrating the accountability of the audit team for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached;
- Retaining a record of matters of continuing significance to future audits of the same entity;
- Assisting quality control reviewers (for example, internal inspectors) who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions;
- Enabling an experienced auditor to conduct inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements; and
- Assisting a successor auditor who reviews a predecessor auditor's audit documentation.

**.09** For the purposes of this section, *experienced auditor* means an individual (whether internal or external to the firm) who possesses the competencies and skills that would have enabled him or her to perform the audit. These competencies and skills include an understanding of (a) audit processes, (b) the SASs and applicable legal and regulatory requirements, (c) the business environment in which the entity operates, and (d) auditing and financial reporting issues relevant to the entity's industry.

---

<sup>2</sup> See paragraph .05 of section 311, *Planning and Supervision*, as amended, for guidance regarding preparation of audit programs.

<sup>3</sup> The audit documentation contained within the audit file may consist of cross-references to documentation for audit engagements with related entities. For example, the documentation for an audit of the financial statements of an employee benefit plan may consist partly of cross-references to the documentation of dual-purpose payroll-related tests performed in connection with the audit of the financial statements of the plan's sponsor.

## Form, Content, and Extent of Audit Documentation

.10 The auditor should prepare audit documentation that enables an experienced auditor, having no previous connection to the audit, to understand:

- a. The nature, timing, and extent of auditing procedures performed to comply with SASs and applicable legal and regulatory requirements;
- b. The results of the audit procedures performed and the audit evidence obtained;
- c. The conclusions reached on significant matters; and
- d. That the accounting records agree or reconcile with the audited financial statements or other audited information.

.11 The form, content, and extent of audit documentation depend on the circumstances of the engagement and the audit methodology and tools used. Oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached but may be used by the auditor to clarify or explain information contained in the audit documentation. It is, however, neither necessary nor practicable to document every matter the auditor considers during the audit.

.12 In determining the form, content, and extent of audit documentation, the auditor should consider the following factors:

- The nature of the auditing procedures to be performed;
- The identified risk of material misstatement associated with the assertion, or account or class of transactions, including related disclosures;
- The extent of judgment involved in performing the work and evaluating the results;
- The significance of the audit evidence obtained to the assertion being tested;
- The nature and extent of exceptions identified; and
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained.

.13 Certain matters, such as auditor independence and staff training, that are not engagement specific, may be documented either centrally within a firm or in the audit documentation for an audit engagement. Documentation of matters specific to a particular engagement should be included in the audit file for the specific engagement.

### Significant Findings or Issues

.14 The auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Judging the significance of a finding or issue requires an objective analysis of the facts and circumstances. Significant findings or issues include, but are not limited to, the following:

- a. Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to (1) accounting for complex or unusual transactions or (2) accounting estimates and uncertainties and, if applicable, the related management assumptions.

- b. Results of audit procedures indicating (1) that the financial information or disclosures could be materially misstated or (2) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- c. Circumstances that cause the auditor significant difficulty in applying auditing procedures the auditor considered necessary,<sup>4</sup> for example, the lack of responsiveness to confirmation or information requests, or the lack of original documents.
- d. Findings that could result in a modification of the auditor's report.
- e. Audit adjustments. For purposes of this section, an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial information.

**.15** The auditor should document discussions of significant findings or issues with management and others on a timely basis, including responses. The audit documentation should include documentation of the significant findings or issues discussed, and when and with whom the discussions took place. It is not limited to documentation prepared by the auditor but may include other appropriate evidence, such as minutes of meetings prepared by the entity's personnel. Others with whom the auditor may discuss significant findings or issues include those charged with governance;<sup>5</sup> those responsible for the oversight of the financial reporting process; other personnel within the entity, for example, internal audit; and external parties, such as persons providing professional services to the entity.

**.16** If the auditor has identified information that contradicts or is inconsistent with the auditor's final conclusions regarding a significant finding or issue, the auditor should document how the auditor addressed the contradiction or inconsistency in forming the conclusion.

**.17** The documentation of how the auditor addressed the contradiction or inconsistency, however, does not imply that the auditor needs to retain documentation that is incorrect or superseded (except as required by paragraph .30). The documentation of the contradiction or inconsistency may include, but is not limited to, procedures performed in response to the information, and records documenting consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

## Identification of Preparer and Reviewer

**.18** In documenting the nature, timing, and extent of audit procedures performed, the auditor should record:

- a. Who performed the audit work and the date such work was completed; and

---

<sup>4</sup> See paragraph .16 of section 380A, *Communication With Audit Committees*, as amended, for guidance regarding communication with the audit committee or the group charged with governance of any serious difficulties encountered in dealing with management related to the performance of the audit.

<sup>5</sup> The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting and disclosure process. In some cases, those charged with governance are responsible for approving the financial statements (in other cases, management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committees* expressed elsewhere in the Statements on Auditing Standards.

- b. Who reviewed specific audit documentation and the date of such review.

.19 The requirement to document who reviewed the audit work performed does not imply a need for each specific working paper to include evidence of review. It should be clear from the audit documentation who reviewed specified elements of the audit work performed and when.

## Documentation of Specific Items Tested

.20 Audit documentation of procedures performed, including tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include the identifying characteristics of the specific items tested.

.21 Recording the identifying characteristics serves a number of purposes. For example, it improves the ability of the auditor to supervise and review the work performed and thus demonstrates the accountability of the audit team for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the subject matter. For example:

- For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over \$25,000 from the journal register).
- For a procedure requiring inquiries of specific entity personnel, the auditor may record the dates of the inquiries, the names and job designations of the entity personnel, and the inquiry made.
- For an observation procedure, the auditor may record the process or subject matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.
- For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point, and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

## Documentation of Departures From Statements on Auditing Standards

.22 As required by paragraph .05 of section 150, *Generally Accepted Auditing Standards*, as amended, when, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

## Revisions to Audit Documentation After the Date of the Auditor's Report

**.23** The auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion. Among other things, sufficient appropriate audit evidence includes evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that it has taken responsibility for them. This will ordinarily result in a report date that is close to the date the auditor grants the entity permission to use the auditor's report in connection with the financial statements (report release date).<sup>6</sup> Delays in releasing the report may require the auditor to perform additional procedures to comply with the requirements of section 560, *Subsequent Events*, as amended.

### Documentation of New Information

**.24** If, as a result of consideration of the procedures performed and the evidence obtained, the auditor concludes that procedures considered necessary at the time of the audit in the circumstances then existing were omitted from the audit of the financial information, the auditor should follow the guidance in section 390, *Consideration of Omitted Procedures After the Report Date*. The audit documentation supporting the auditor's compliance with section 390 should be prepared in accordance with the requirements in this section.

**.25** If the auditor subsequently becomes aware of information relating to financial information previously reported on by him or her, but that was not known to him or her at the date of the report, the auditor should follow the guidance in section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, as amended.

**.26** In the circumstances described in paragraphs .24 and .25, the auditor should make the changes necessary to reflect either the performance of the new audit procedure or the new conclusion reached, including:

- When and by whom such changes were made and (where applicable) reviewed;
- The specific reasons for the changes; and
- The effect, if any, of the changes on the auditor's conclusions.

### Changes Resulting From the Process of Assembling and Completing the Audit File

**.27** The auditor should complete the assembly of the final audit file on a timely basis, but within 60 days following the report release date (documentation completion date). Statutes, regulations, or the audit firm's quality control policies may specify a shorter period of time in which this assembly process should be completed.

---

<sup>6</sup> In many cases, the report release date will be the date the auditor delivers the audit report to the entity.

**.28** At anytime prior to the documentation completion date, the auditor may make changes to the audit documentation to:

- a. Complete the documentation and assembly of audit evidence that the auditor has obtained, discussed, and agreed with relevant members of the audit team prior to the date of the auditor's report;
- b. Perform routine file-assembling procedures such as deleting or discarding superseded documentation and sorting, collating, and cross-referencing final working papers;
- c. Sign off on file completion checklists prior to completing and archiving the audit file; and
- d. Add information received after the date of the auditor's report, for example, an original confirmation that was previously faxed.

**.29** The report release date should be recorded in the audit documentation.

## Changes After the Documentation Completion Date

**.30** After the documentation completion date, the auditor must not delete or discard audit documentation before the end of the specified retention period, as discussed in paragraph .32. When the auditor finds it necessary to make an addition (including amendments) to audit documentation after the documentation completion date, the auditor should document the addition in accordance with paragraph .26.

## Ownership and Confidentiality of Audit Documentation

**.31** Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes. The auditor may make available to the entity at the auditor's discretion copies of the audit documentation, provided such disclosure does not undermine the independence or the validity of the audit process.

**.32** The auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

**.33** The auditor has an ethical and, in some situations, a legal obligation to maintain the confidentiality of client information.<sup>7</sup> Because audit documentation often contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

**.34** Whether audit documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the auditor's knowledge, or could be permanently lost or damaged. Accordingly, the auditor should apply appropriate and reasonable controls for audit documentation to:

- a. Clearly determine when and by whom audit documentation was created, changed, or reviewed;

---

<sup>7</sup> Also, see Rule 301, *Confidential Client Information*.

## 610-2

### The Standards of Field Work

- b.* Protect the integrity of the information at all stages of the audit, especially when the information is shared within the audit team or transmitted to other parties via electronic means;
- c.* Prevent unauthorized changes to the documentation; and
- d.* Allow access to the documentation by the audit team and other authorized parties as necessary to properly discharge their responsibilities.

### Effective Date

**.35** This section is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.

## Appendix A

### Audit Documentation Requirements in Other Statements on Auditing Standards

A1. Documentation requirements are included in other Statements on Auditing Standards (SASs). This section does not change the requirement in:

- a. Paragraph .05 of section 310, *Appointment of the Independent Auditor*, as amended, to document the understanding with the client.
- b. Paragraph .05d of section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, to document in either the audit inquiry letter or a separate letter to the client's lawyer, that the client has assured the auditor that it has disclosed all unasserted claims that the lawyer has advised the client are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*. Also, this section does not change the requirement in paragraph .10 of section 337 to document the conclusions reached as a result of responses obtained in a conference relating to matters covered by the audit inquiry letter.
- c. Paragraph .05 of section 311, *Planning and Supervision*, as amended, to prepare a written audit program (or set of written audit programs) for every audit.
- d. Paragraph .40 of section 312, *Audit Risk and Materiality in Conducting an Audit*, as amended, to document the nature and effect of aggregated misstatements and the auditor's conclusion as to whether the aggregated misstatements cause the financial statements to be materially misstated.
- e. Paragraph .02 of section 534, *Reporting on Financial Statements Prepared for Use in Other Countries*, to obtain written representations from management regarding the purpose and uses of financial statements prepared in conformity with the accounting principles of another country.
- f. Paragraph .17 of section 317, *Illegal Acts by Clients*, to document oral communications to the audit committee or others with equivalent authority and responsibility regarding illegal acts that come to the auditor's attention.
- g. Paragraph .61 of section 319, *Consideration of Internal Control in a Financial Statement Audit*, as amended, to document the understanding of the entity's internal control components obtained to plan the audit. Also, this section does not change the requirement in paragraph .83 of section 319 for the auditor to document his or her conclusions about the assessed level of control risk.
- h. Paragraph .22 of section 329, *Analytical Procedures*, as amended, to document (1) the expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development; (2) the results of

the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts; and (3) any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.

- i. Paragraph .71 of section 508, *Reports on Audited Financial Statements*, as amended, for the predecessor auditor to obtain representation letters from management of the former client and from the successor auditor before reissuing (or consenting to the reissue of) a report previously issued on the financial statements of a prior period.
- j. Paragraph .17 of section 341A, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, as amended, to document (1) the conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern; (2) the work performed in connection with the auditor's evaluation of management's plans; (3) the auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated; and (4) the consideration and effect of that conclusion on the financial statements, disclosures, and the audit report.
- k. Paragraph .03 of section 380, *Communication With Audit Committees*, as amended, to document any oral communications with the audit committee, made pursuant to the section, regarding the scope and results of the audit.
- l. Paragraph .29 of section 330, *The Confirmation Process*, to document oral confirmations. Also, when the auditor has not requested confirmations in the examination of accounts receivable, this section does not change the requirement in paragraph .35 of section 330 to document how the auditor overcame this presumption.
- m. Paragraph .23 of section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*, as amended, to document the oral communications to management and the audit committee or others with equivalent authority and responsibility when the auditor becomes aware during an audit in accordance with generally accepted auditing standards that the entity is subject to an audit requirement that may not be encompassed in the terms of the engagement.
- n. Section 333, *Management Representations*, as amended, to obtain written representations from management.
- o. Section 316, *Consideration of Fraud in a Financial Statement Audit*, to document (1) the discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed; (2) the procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud; (3) specific risks of material misstatement due to fraud that were identified, and a description of the auditor's response to those risks; (4) if the auditor has not identified in a particular circumstance improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion; (5) the results of the procedures performed to further address the risk of management override of controls; (6) other conditions and

analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions; and (7) the nature of the communications about fraud made to management, the audit committee, and others.

- p. Section 722, *Interim Financial Information*, to prepare documentation in connection with a review of interim financial information, the form and content of which should be designed to meet the circumstances of the particular engagement.

[Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

## AU Section 9339

# Audit Documentation: Auditing Interpretations of Section 339

### 1. Providing Access to or Copies of Audit Documentation to a Regulator<sup>1,2</sup>

**.01 Question**—Section 339, *Audit Documentation*, paragraph .33, states that "the auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information. Because audit documentation often contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information." However, auditors are sometimes required by law, regulation or audit contract,<sup>3</sup> to provide a regulator, or a duly appointed representative, access to audit documentation. For example, a regulator may request access to the audit documentation to fulfill a quality review requirement or to assist in establishing the scope of a regulatory examination. Furthermore, as part of the regulator's review of the audit documentation, the regulator may request copies of all or selected portions of the audit documentation during or after the review. The regulator may intend, or decide, to make copies (or information derived from the audit documentation) available to others, including other governmental agencies, for their particular purposes, with or without the knowledge of the auditor or the client. When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation pursuant to law, regulation or audit contract, what steps should the auditor take?

**.02 Interpretation**—When a regulator requests access to audit documentation pursuant to law, regulation or audit contract, the auditor should take the following steps:

- a. Consider advising the client that the regulator has requested access to (and possibly copies of) the audit documentation and that the auditor intends to comply with such request.<sup>4</sup>

<sup>1</sup> The term "regulator(s)" includes federal, state and local government officials with legal oversight authority over the entity. Examples of regulators who may request access to audit documentation include, but are not limited to, state insurance and utility regulators, various health care authorities, and federal agencies such as the Federal Deposit Insurance Corporation, the Office of Thrift Supervision, the Department of Housing and Urban Development, the Department of Labor, and the Rural Electrification Administration.

<sup>2</sup> The guidance in this Interpretation does not apply to requests from the Internal Revenue Service, firm practice-monitoring programs to comply with AICPA or state professional requirements such as peer or quality reviews, proceedings relating to alleged ethics violations, or subpoenas.

<sup>3</sup> For situations in which the auditor is not required by law, regulation or audit contract to provide a regulator access to the audit documentation, reference should be made to the guidance in paragraphs .11–.15 of this Interpretation.

<sup>4</sup> The auditor may wish (and in some cases may be required by law, regulation, or audit contract) to confirm in writing with the client that the auditor may be required to provide a regulator access to the audit documentation. Sample language that may be used follows:

"The audit documentation for this engagement is the property of (*name of auditor*) and constitutes confidential information. However, we may be requested to make certain audit documentation available to (*name of regulator*) pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of (*name of auditor*) personnel. Furthermore, upon request, we may provide copies of selected audit documentation to (*name of regulator*). The (*name of regulator*) may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies."

- b. Make appropriate arrangements with the regulator for the review.
- c. Maintain control over the audit documentation, and
- d. Consider submitting the letter described in paragraph .05 of this Interpretation to the regulator.

**.03** The auditor should make appropriate arrangements with the regulator. These arrangements ordinarily would include the specific details such as the date, time and location of the review. The audit documentation may be made available to a regulator at the offices of the client, the auditor, or a mutually agreed-upon location, so long as the auditor maintains control. Furthermore, the auditor should take appropriate steps to maintain control of the audit documentation. For example, the auditor (or his or her representative) should consider being present when the audit documentation is reviewed by the regulator. Maintaining control of audit documentation is necessary to ensure the continued integrity of the audit documentation and to ensure confidentiality of client information.

**.04** Ordinarily, the auditor should not agree to transfer ownership of the audit documentation to a regulator. Furthermore, the auditor should not agree, without client authorization, that the information contained therein about the client may be communicated to or made available to any other party. In this regard, the action of an auditor providing access to, or copies of, the audit documentation shall not constitute transfer of ownership or authorization to make them available to any other party.

**.05** An audit performed in accordance with generally accepted auditing standards is not intended to, and does not, satisfy a regulator's oversight responsibilities. To avoid any misunderstanding, prior to allowing a regulator access to the audit documentation, the auditor should consider submitting a letter to the regulator that:

- a. Sets forth the auditor's understanding of the purpose for which access is being requested
- b. Describes the audit process and the limitations inherent in a financial statement audit
- c. Explains the purpose for which the audit documentation was prepared, and that any individual conclusions must be read in the context of the auditor's report on the financial statements
- d. States, except when not applicable, that the audit was not planned or conducted in contemplation of the purpose for which access is being granted or to assess the entity's compliance with laws and regulations
- e. States that the audit and the audit documentation should not supplant other inquiries and procedures that should be undertaken by the regulator for its purposes
- f. Requests confidential treatment under the Freedom of Information Act or similar laws and regulations,<sup>5</sup> when a request for the audit documentation is made, and that written notice be given to the auditor before transmitting any information contained in the audit documentation to others, including other governmental agencies, except when such transfer is required by law or regulation, and

---

<sup>5</sup> The auditor may need to consult the regulations of individual agencies and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

- g. States that if any copies are to be provided, they will be identified as "Confidential Treatment Requested by (*name of auditor, address, telephone number*)."

The auditor may wish to obtain a signed acknowledgment copy of the letter as evidence of the regulator's receipt of the letter.

.06 An example of a letter containing the elements described in paragraph .05 of this Interpretation is presented below:

Illustrative Letter to Regulator<sup>6</sup>

(Date)

(Name and Address of Regulatory Agency)

Your representatives have requested access to our audit documentation in connection with our audit of the December 31, 20XX financial statements of (name of client). It is our understanding that the purpose of your request is (*state purpose: for example, "to facilitate your regulatory examination"*).<sup>7</sup>

Our audit of (*name of client*) December 31, 20XX financial statements was conducted in accordance with auditing standards generally accepted in the United States of America,<sup>8</sup> the objective<sup>9</sup> of which is to form an opinion as to whether the financial statements, which are the responsibility and representations of management, present fairly, in all material respects, the financial position, results of operations and cash flows in conformity with generally accepted accounting principles.<sup>10</sup> Under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to design our audit to provide reasonable assurance that errors and fraud that have a material effect on the financial statements will be detected, and to exercise due care in the conduct of our audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and as to the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Thus, our audit, based on the concept of selective testing, is subject to the inherent risk that material errors or fraud, if they exist, would not be detected. In addition, an audit does not address the possibility that material errors or fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may have existed that would have been assessed differently by you.

---

<sup>6</sup> The auditor should appropriately modify this letter when the audit has been performed in accordance with generally accepted auditing standards and also in accordance with additional auditing requirements specified by a regulatory agency (for example, the requirements specified in *Government Auditing Standards* issued by the Comptroller General of the United States).

<sup>7</sup> If the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation but otherwise intends to provide such access (see paragraphs .11–.15 of this Interpretation), the letter should include a statement that: "Management of (*name of client*) has authorized us to provide you access to our audit documentation for (*state purpose*)."

<sup>8</sup> Refer to footnote 6.

<sup>9</sup> In an audit performed in accordance with the *Single Audit Act of 1984*, and certain other federal audit requirements, an additional objective of the audit is to assess compliance with laws and regulations applicable to federal financial assistance. Accordingly, in these situations, the above letter should be modified to include the additional objective.

<sup>10</sup> If the financial statements have been prepared in conformity with regulatory accounting practices, the phrase "financial position, results of operations and cash flows in conformity with generally accepted accounting principles" should be replaced with appropriate wording such as, in the case of an insurance company, the "admitted assets, liabilities... of the XYZ Insurance Company in conformity with accounting practices prescribed or permitted by the state of... insurance department."

The audit documentation was prepared for the purpose of providing the principal support for our report on (*name of client*) December 31, 20XX financial statements and to aid in the conduct and supervision of our audit. The audit documentation is the principal record of auditing procedures performed, evidence obtained and conclusions reached in the engagement. The auditing procedures that we performed were limited to those we considered necessary under generally accepted auditing standards<sup>11</sup> to enable us to formulate and express an opinion on the financial statements<sup>12</sup> taken as a whole. Accordingly, we make no representation as to the sufficiency or appropriateness, for your purposes, of either the information contained in our audit documentation or our auditing procedures. In addition, any notations, comments, and individual conclusions appearing on any of the audit documents do not stand alone, and should not be read as an opinion on any individual amounts, accounts, balances or transactions.

Our audit of (*name of client*) December 31, 20XX financial statements was performed for the purpose stated above and has not been planned or conducted in contemplation of your (*state purpose: for example, "regulatory examination"*) or for the purpose of assessing (*name of client*) compliance with laws and regulations.<sup>13</sup> Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our audit and the audit documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the (*name of regulatory agency*) for the purpose of monitoring and regulating the financial affairs of the (*name of client*). In addition, we have not audited any financial statements of (*name of client*) since (*date of audited balance sheet referred to in the first paragraph above*) nor have we performed any auditing procedures since (*date*), the date of our auditor's report, and significant events or circumstances may have occurred since that date.

The audit documentation constitutes and reflects work performed or evidence obtained by (*name of auditor*) in its capacity as independent auditor for (*name of client*). The documents contain trade secrets and confidential commercial and financial information of our firm and (*name of client*) that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations<sup>14</sup> when requests are made for the audit documentation or information contained therein or any documents created by the (*name of regulatory agency*) containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the audit documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.

*[If it is expected that copies will be requested, add:*

Any copies of our audit documentation we agree to provide you will be identified as "Confidential Treatment Requested by (*name of auditor, address, telephone number*)."]

Firm signature

---

<sup>11</sup> Refer to footnote 6.

<sup>12</sup> Refer to footnote 9.

<sup>13</sup> Refer to footnote 9.

<sup>14</sup> This illustrative paragraph may not in and of itself be sufficient to gain confidential treatment under the rules and regulations of certain regulatory agencies. The auditor should consider tailoring this paragraph to the circumstances after consulting the regulations of each applicable regulatory agency and, if necessary, consult with legal counsel regarding the specific procedures and requirements to gain confidential treatment.

**.07 Question**—A regulator may request access to the audit documentation before the audit has been completed and the report released. May the auditor allow access in such circumstances?

**.08 Interpretation**—When the audit has not been completed, the audit documentation is necessarily incomplete because (a) additional information may be added as a result of further tests and review by supervisory personnel and (b) any audit results and conclusions reflected in the incomplete audit documentation may change. Accordingly, it is preferable that access be delayed until all auditing procedures have been completed and all internal reviews have been performed. If access is provided prior to completion of the audit, the auditor should consider issuing the letter referred to in paragraph .05 of this Interpretation, appropriately modified, and including additional language along the following lines:

"We have been engaged to audit in accordance with auditing standards generally accepted in the United States of America the December 31, 20XX, financial statements of XYZ Company, but have not as yet completed our audit. Accordingly, at this time we do not express any opinion on the Company's financial statements. Furthermore, the contents of the audit documentation may change as a result of additional auditing procedures and review of the audit documentation by supervisory personnel of our firm. Accordingly, our audit documentation is incomplete."

Because the audit documentation may change prior to completion of the audit, the auditor ordinarily should not provide copies of the audit documentation until the audit has been completed.

**.09 Question**—Some regulators may engage an independent party, such as another independent public accountant, to perform the audit documentation review on behalf of the regulatory agency. Are there any special precautions the auditor should observe in these circumstances?

**.10 Interpretation**—The auditor should be satisfied that the party engaged by the regulator is subject to the same confidentiality restrictions as the regulatory agency itself. This can be accomplished by obtaining acknowledgment, preferably in writing, from the regulator stating that the third party is acting on behalf of the regulator and agreement from the third party that he or she is subject to the same restrictions on disclosure and use of audit documentation and the information contained therein as the regulator.

**.11 Question**—When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation and the auditor is not otherwise required by law, regulation or audit contract to provide such access, what steps should the auditor take?

**.12 Interpretation**—The auditor should obtain an understanding of the reasons for the regulator's request for access to the audit documentation and may wish to consider consulting with legal counsel regarding the request. If the auditor decides to provide such access, the auditor should obtain the client's consent, preferably in writing, to provide the regulator access to the audit documentation.

**.13** Following is an example of language that may be used in the written communication to the client:

"The audit documentation for this engagement is the property of (name of auditor) and constitutes confidential information. However, we have been requested to make certain audit documentation available to (name of regulator)

for (*describe the regulator's basis for its request*). Access to such audit documentation will be provided under the supervision of (*name of auditor*) personnel. Furthermore, upon request, we may provide copies of selected audit documentation to (*name of regulator*).

"You have authorized (*name of auditor*) to allow (*name of regulator*) access to the audit documentation in the manner discussed above. Please confirm your agreement to the above by signing below and returning to (*name of auditor, address*)."

Firm signature

---

Agreed and acknowledged:

---

(*Name and title*)

---

(*Date*)

**.14** If the client requests to review the audit documentation before allowing the regulator access, the auditor may provide the client with the opportunity to obtain an understanding of the nature of the information about its financial statements contained in the audit documentation that is being made available to the regulator. When a client reviews the audit documentation, the auditor should maintain control of the audit documentation as discussed in paragraph .03 of this Interpretation.

**.15** The auditor should also refer to the guidance in paragraphs .03–.10 of this Interpretation which provide guidance on making arrangements with the regulator for access to the audit documentation, maintaining control over the audit documentation and submitting a letter describing various matters to the regulator.

## AU Section 341

# *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

(Supersedes section 340)

Source: SAS No. 59; SAS No. 64; SAS No. 77; SAS No. 96;  
SAS No. 113; SAS No. 114.

See section 9341 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance to the auditor in conducting an audit of financial statements in accordance with generally accepted auditing standards with respect to evaluating whether there is substantial doubt about the entity's ability to continue as a going concern.<sup>1,2</sup> Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions.

## The Auditor's Responsibility

.02 The auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited (hereinafter referred to as a *reasonable period of time*). The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report. Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited, as described in section 326, *Audit Evidence*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106. As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

---

<sup>1</sup> This section does not apply to an audit of financial statements based on the assumption of liquidation (for example, when [a] an entity is in the process of liquidation, [b] the owners have decided to commence dissolution or liquidation, or [c] legal proceedings, including bankruptcy, have reached a point at which dissolution or liquidation is probable). See Auditing Interpretation, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting" (section 9508.33-38).

<sup>2</sup> The guidance provided in this section applies to audits of financial statements prepared either in accordance with generally accepted accounting principles or in accordance with a comprehensive basis of accounting other than generally accepted accounting principles. References in this section to generally accepted accounting principles are intended to include a comprehensive basis of accounting other than generally accepted accounting principles (excluding liquidation basis).

**.03** The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

- a. The auditor considers whether the results of his procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. It may be necessary to obtain additional information about such conditions and events, as well as the appropriate audit evidence to support information that mitigates the auditor's doubt.
- b. If the auditor believes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, he should (1) obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and (2) assess the likelihood that such plans can be effectively implemented.
- c. After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph (following the opinion paragraph) in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.04** The auditor is not responsible for predicting future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of reference to substantial doubt in an auditor's report should not be viewed as providing assurance as to an entity's ability to continue as a going concern.

## Audit Procedures

**.05** It is not necessary to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose. The following are examples of procedures that may identify such conditions and events:

- Analytical procedures
- Review of subsequent events
- Review of compliance with the terms of debt and loan agreements
- Reading of minutes of meetings of stockholders, board of directors, and important committees of the board

- Inquiry of an entity's legal counsel about litigation, claims, and assessments
- Confirmation with related and third parties of the details of arrangements to provide or maintain financial support

## Consideration of Conditions and Events

.06 In performing audit procedures such as those presented in paragraph .05, the auditor may identify information about certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The significance of such conditions and events will depend on the circumstances, and some may have significance only when viewed in conjunction with others. The following are examples of such conditions and events:

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood

## Consideration of Management's Plans

.07 If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he should consider management's plans for dealing with the adverse effects of the conditions and events. The auditor should obtain information about the plans and consider whether it is likely the adverse effects will be mitigated for a reasonable period of time and that such plans can be effectively implemented. The auditor's considerations relating to management plans may include the following:

- Plans to dispose of assets
  - Restrictions on disposal of assets, such as covenants limiting such transactions in loan or similar agreements or encumbrances against assets
  - Apparent marketability of assets that management plans to sell
  - Possible direct or indirect effects of disposal of assets

- Plans to borrow money or restructure debt
  - Availability of debt financing, including existing or committed credit arrangements, such as lines of credit or arrangements for factoring receivables or sale-leaseback of assets
  - Existing or committed arrangements to restructure or subordinate debt or to guarantee loans to the entity
  - Possible effects on management's borrowing plans of existing restrictions on additional borrowing or the sufficiency of available collateral
- Plans to reduce or delay expenditures
  - Apparent feasibility of plans to reduce overhead or administrative expenditures, to postpone maintenance or research and development projects, or to lease rather than purchase assets
  - Possible direct or indirect effects of reduced or delayed expenditures
- Plans to increase ownership equity
  - Apparent feasibility of plans to increase ownership equity, including existing or committed arrangements to raise additional capital
  - Existing or committed arrangements to reduce current dividend requirements or to accelerate cash distributions from affiliates or other investors

**.08** When evaluating management's plans, the auditor should identify those elements that are particularly significant to overcoming the adverse effects of the conditions and events and should plan and perform auditing procedures to obtain audit evidence about them. For example, the auditor should consider the adequacy of support regarding the ability to obtain additional financing or the planned disposal of assets. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.09** When prospective financial information is particularly significant to management's plans, the auditor should request management to provide that information and should consider the adequacy of support for significant assumptions underlying that information. The auditor should give particular attention to assumptions that are—

- Material to the prospective financial information.
- Especially sensitive or susceptible to change.
- Inconsistent with historical trends.

The auditor's consideration should be based on knowledge of the entity, its business, and its management and should include (a) reading of the prospective financial information and the underlying assumptions and (b) comparing prospective financial information in prior periods with actual results and comparing prospective information for the current period with results achieved to date. If the auditor becomes aware of factors, the effects of which are not reflected in such prospective financial information, he should discuss those factors with management and, if necessary, request revision of the prospective financial information.

## Consideration of Financial Statement Effects

**.10** When, after considering management's plans, the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider the possible effects on the financial statements and the adequacy of the related disclosure. Some of the information that might be disclosed includes—

- Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- The possible effects of such conditions and events.
- Management's evaluation of the significance of those conditions and events and any mitigating factors.
- Possible discontinuance of operations.
- Management's plans (including relevant prospective financial information).<sup>3</sup>
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities.

.11 When, primarily because of the auditor's consideration of management's plans, he concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time is alleviated, he should consider the need for disclosure of the principal conditions and events that initially caused him to believe there was substantial doubt. The auditor's consideration of disclosure should include the possible effects of such conditions and events, and any mitigating factors, including management's plans.

## Consideration of the Effects on the Auditor's Report

.12 If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion.<sup>4</sup> The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt and going concern] as illustrated in paragraph .13. [As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

.13 An example follows of an explanatory paragraph (following the opinion paragraph) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time.<sup>5</sup>

---

<sup>3</sup> It is not intended that such prospective financial information constitute prospective financial statements meeting the minimum presentation guidelines set forth in AT section 301, *Financial Forecasts and Projections*, nor that the inclusion of such information require any consideration beyond that normally required by generally accepted auditing standards. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

<sup>4</sup> The inclusion of an explanatory paragraph (following the opinion paragraph) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (see paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (see section 508, *Reports on Audited Financial Statements*).

<sup>5</sup> In a going-concern explanatory paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern. Examples of inappropriate wording in the explanatory paragraph would be, "If the Company continues to suffer recurring losses from operations and continues to have a net capital deficiency, there may be substantial doubt about its ability to continue as a going concern" or "The Company has been unable to renegotiate its expiring credit agreements. Unless the Company is able to obtain financial support, there is substantial doubt about its ability to continue as a going concern." [Footnote added, effective for reports issued after December 15, 1995, by Statement on Auditing Standards No. 77.]

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

**.14** If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in section 508, *Reports on Audited Financial Statements*.

**.15** Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, should not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. When financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period, reporting guidance is provided in section 508.

**.16** If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis, and that doubt has been removed in the current period, the explanatory paragraph included in the auditor's report (following the opinion paragraph) on the financial statements of the prior period should not be repeated.

## Communication With Those Charged With Governance

**.17** If, after considering identified conditions and events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate with those charged with governance:

- a. The nature of the events or conditions identified.
- b. The possible effect on the financial statements and the adequacy of related disclosures in the financial statements.
- c. The effects on the auditor's report.

[Paragraph added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 114.]

## Documentation

**.18** As stated in paragraph .03 of this section, the auditor considers whether the results of the auditing procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If, after considering the identified conditions and events in the aggregate, the auditor believes there is

substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he or she follows the guidance in paragraphs .07 through .16. In connection with that guidance, the auditor should document all of the following:

- a. The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- b. The elements of management's plans that the auditor considered to be particularly significant to overcoming the adverse effects of the conditions or events.
- c. The auditing procedures performed and evidence obtained to evaluate the significant elements of management's plans.
- d. The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated. If substantial doubt remains, the auditor also should document the possible effects of the conditions or events on the financial statements and the adequacy of the related disclosures. If substantial doubt is alleviated, the auditor also should document the conclusion as to the need for disclosure of the principal conditions and events that initially caused him or her to believe there was substantial doubt.
- e. The auditor's conclusion as to whether he or she should include an explanatory paragraph in the audit report. If disclosures with respect to an entity's ability to continue as a going concern are inadequate, the auditor also should document the conclusion as to whether to express a qualified or adverse opinion for the resultant departure from generally accepted accounting principles.

[Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 114, December 2006.]

## Effective Date

**.19** This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 114, December 2006.]

## AU Section 9341

### ***The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern: Auditing Interpretations of Section 341***

#### **1. Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report**

**.01 Question**—An auditor may be asked to reissue his or her report on financial statements and eliminate the going-concern explanatory paragraph that appeared in the original report. Such requests ordinarily occur after the conditions that gave rise to substantial doubt about the entity's ability to continue as a going concern have been resolved. For example, subsequent to the date of the auditor's original report, an entity might obtain needed financing. In such circumstances, may the auditor reissue his or her report and eliminate the going-concern explanatory paragraph that appeared in the original report?

**.02 Interpretation**—An auditor has no obligation to reissue his or her report.<sup>1</sup> However, if the auditor decides to reissue the report,<sup>2</sup> the auditor should perform the following procedures when determining whether to reissue the report without the going-concern explanatory paragraph that appeared in the original report:

- Audit the event or transaction that prompted the request to reissue the report without the going-concern explanatory paragraph.
- Perform the procedures listed in section 560, *Subsequent Events*, paragraph .12, at or near the date of reissuance.
- Consider the factors described in section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, paragraphs .06 through .11, based on the conditions and circumstances at the date of reissuance.

The auditor may perform any other procedures that he or she deems necessary in the circumstances. Based on the information that the auditor becomes aware of as a result of performing the procedures mentioned above, the auditor should reassess the going-concern status of the entity.

[Issue Date: August, 1995.]

#### **[2.] Effect of the Year 2000 Issue on the Auditor's Consideration of an Entity's Ability to Continue as a Going Concern**

[.03–.27] [Withdrawn July, 2000 by the Audit Issues Task Force.]

---

[The next page is 633.]

---

<sup>1</sup> If the auditor decides not to reissue his or her report, the auditor may agree to be engaged to audit the financial statements for a period subsequent to that covered by the original report. This might be the case, for example, if the entity is experiencing profitable operations.

<sup>2</sup> Section 530, *Dating of the Independent Auditor's Report*, paragraph .05, states that an auditor may either "dual-date" or "later-date" his or her reissued report.

## AU Section 341A

# *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

(Supersedes section 340)

Source: SAS No. 59; SAS No. 64; SAS No. 77; SAS No. 96; SAS No. 113.

See section 9341A for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance to the auditor in conducting an audit of financial statements in accordance with generally accepted auditing standards with respect to evaluating whether there is substantial doubt about the entity's ability to continue as a going concern.<sup>1,2</sup> Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions.

## The Auditor's Responsibility

.02 The auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited (hereinafter referred to as *a reasonable period of time*). The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report. Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited, as described in section 326, *Audit Evidence*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106. As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

---

<sup>1</sup> This section does not apply to an audit of financial statements based on the assumption of liquidation (for example, when [a] an entity is in the process of liquidation, [b] the owners have decided to commence dissolution or liquidation, or [c] legal proceedings, including bankruptcy, have reached a point at which dissolution or liquidation is probable). See Auditing Interpretation, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting" (section 9508.33-.38).

<sup>2</sup> The guidance provided in this section applies to audits of financial statements prepared either in accordance with generally accepted accounting principles or in accordance with a comprehensive basis of accounting other than generally accepted accounting principles. References in this section to generally accepted accounting principles are intended to include a comprehensive basis of accounting other than generally accepted accounting principles (excluding liquidation basis).

**.03** The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

- a. The auditor considers whether the results of his procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. It may be necessary to obtain additional information about such conditions and events, as well as the appropriate audit evidence to support information that mitigates the auditor's doubt.
- b. If the auditor believes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, he should (1) obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and (2) assess the likelihood that such plans can be effectively implemented.
- c. After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph (following the opinion paragraph) in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.04** The auditor is not responsible for predicting future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of reference to substantial doubt in an auditor's report should not be viewed as providing assurance as to an entity's ability to continue as a going concern.

## Audit Procedures

**.05** It is not necessary to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose. The following are examples of procedures that may identify such conditions and events:

- Analytical procedures
- Review of subsequent events
- Review of compliance with the terms of debt and loan agreements
- Reading of minutes of meetings of stockholders, board of directors, and important committees of the board

- Inquiry of an entity's legal counsel about litigation, claims, and assessments
- Confirmation with related and third parties of the details of arrangements to provide or maintain financial support

## Consideration of Conditions and Events

.06 In performing audit procedures such as those presented in paragraph .05, the auditor may identify information about certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The significance of such conditions and events will depend on the circumstances, and some may have significance only when viewed in conjunction with others. The following are examples of such conditions and events:

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood

## Consideration of Management's Plans

.07 If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he should consider management's plans for dealing with the adverse effects of the conditions and events. The auditor should obtain information about the plans and consider whether it is likely the adverse effects will be mitigated for a reasonable period of time and that such plans can be effectively implemented. The auditor's considerations relating to management plans may include the following:

- Plans to dispose of assets
  - Restrictions on disposal of assets, such as covenants limiting such transactions in loan or similar agreements or encumbrances against assets
  - Apparent marketability of assets that management plans to sell
  - Possible direct or indirect effects of disposal of assets

- Plans to borrow money or restructure debt
  - Availability of debt financing, including existing or committed credit arrangements, such as lines of credit or arrangements for factoring receivables or sale-leaseback of assets
  - Existing or committed arrangements to restructure or subordinate debt or to guarantee loans to the entity
  - Possible effects on management's borrowing plans of existing restrictions on additional borrowing or the sufficiency of available collateral
- Plans to reduce or delay expenditures
  - Apparent feasibility of plans to reduce overhead or administrative expenditures, to postpone maintenance or research and development projects, or to lease rather than purchase assets
  - Possible direct or indirect effects of reduced or delayed expenditures
- Plans to increase ownership equity
  - Apparent feasibility of plans to increase ownership equity, including existing or committed arrangements to raise additional capital
  - Existing or committed arrangements to reduce current dividend requirements or to accelerate cash distributions from affiliates or other investors

**.08** When evaluating management's plans, the auditor should identify those elements that are particularly significant to overcoming the adverse effects of the conditions and events and should plan and perform auditing procedures to obtain audit evidence about them. For example, the auditor should consider the adequacy of support regarding the ability to obtain additional financing or the planned disposal of assets. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.09** When prospective financial information is particularly significant to management's plans, the auditor should request management to provide that information and should consider the adequacy of support for significant assumptions underlying that information. The auditor should give particular attention to assumptions that are—

- Material to the prospective financial information.
- Especially sensitive or susceptible to change.
- Inconsistent with historical trends.

The auditor's consideration should be based on knowledge of the entity, its business, and its management and should include (a) reading of the prospective financial information and the underlying assumptions and (b) comparing prospective financial information in prior periods with actual results and comparing prospective information for the current period with results achieved to date. If the auditor becomes aware of factors, the effects of which are not reflected in such prospective financial information, he should discuss those factors with management and, if necessary, request revision of the prospective financial information.

## Consideration of Financial Statement Effects

**.10** When, after considering management's plans, the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider the possible effects on the financial statements and the adequacy of the related disclosure. Some of the information that might be disclosed includes—

- Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- The possible effects of such conditions and events.
- Management's evaluation of the significance of those conditions and events and any mitigating factors.
- Possible discontinuance of operations.
- Management's plans (including relevant prospective financial information).<sup>3</sup>
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities.

.11 When, primarily because of the auditor's consideration of management's plans, he concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time is alleviated, he should consider the need for disclosure of the principal conditions and events that initially caused him to believe there was substantial doubt. The auditor's consideration of disclosure should include the possible effects of such conditions and events, and any mitigating factors, including management's plans.

## Consideration of the Effects on the Auditor's Report

.12 If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion.<sup>4</sup> The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt *and* going concern] as illustrated in paragraph .13. [As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

.13 An example follows of an explanatory paragraph (following the opinion paragraph) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time.<sup>5</sup>

---

<sup>3</sup> It is not intended that such prospective financial information constitute prospective financial statements meeting the minimum presentation guidelines set forth in AT section 301, *Financial Forecasts and Projections*, nor that the inclusion of such information require any consideration beyond that normally required by generally accepted auditing standards. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

<sup>4</sup> The inclusion of an explanatory paragraph (following the opinion paragraph) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (see paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (see section 508, *Reports on Audited Financial Statements*).

<sup>5</sup> In a going-concern explanatory paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern. Examples of inappropriate wording in the explanatory paragraph would be, "If the Company continues to suffer recurring losses from operations and continues to have a net capital deficiency, there may be substantial doubt about its ability to continue as a going concern" or "The Company has been unable to renegotiate its expiring credit agreements. Unless the Company is able to obtain financial support, there is substantial doubt about its ability to continue as a going concern." [Footnote added, effective for reports issued after December 15, 1995, by Statement on Auditing Standards No. 77.]

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

**.14** If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in section 508, *Reports on Audited Financial Statements*.

**.15** Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, should not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. When financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period, reporting guidance is provided in section 508.

**.16** If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis, and that doubt has been removed in the current period, the explanatory paragraph included in the auditor's report (following the opinion paragraph) on the financial statements of the prior period should not be repeated.

## Documentation

**.17** As stated in paragraph .03 of this section, the auditor considers whether the results of the auditing procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he or she follows the guidance in paragraphs .07 through .16. In connection with that guidance, the auditor should document all of the following:

- a. The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- b. The elements of management's plans that the auditor considered to be particularly significant to overcoming the adverse effects of the conditions or events.
- c. The auditing procedures performed and evidence obtained to evaluate the significant elements of management's plans.

- d. The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated. If substantial doubt remains, the auditor also should document the possible effects of the conditions or events on the financial statements and the adequacy of the related disclosures. If substantial doubt is alleviated, the auditor also should document the conclusion as to the need for disclosure of the principal conditions and events that initially caused him or her to believe there was substantial doubt.
- e. The auditor's conclusion as to whether he or she should include an explanatory paragraph in the audit report. If disclosures with respect to an entity's ability to continue as a going concern are inadequate, the auditor also should document the conclusion as to whether to express a qualified or adverse opinion for the resultant departure from generally accepted accounting principles.

[Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Effective Date

.18 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

## AU Section 9341A

### ***The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern: Auditing Interpretations of Section 341A***

#### **1. Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report**

**.01 Question**—An auditor may be asked to reissue his or her report on financial statements and eliminate the going-concern explanatory paragraph that appeared in the original report. Such requests ordinarily occur after the conditions that gave rise to substantial doubt about the entity's ability to continue as a going concern have been resolved. For example, subsequent to the date of the auditor's original report, an entity might obtain needed financing. In such circumstances, may the auditor reissue his or her report and eliminate the going-concern explanatory paragraph that appeared in the original report?

**.02 Interpretation**—An auditor has no obligation to reissue his or her report.<sup>1</sup> However, if the auditor decides to reissue the report,<sup>2</sup> the auditor should perform the following procedures when determining whether to reissue the report without the going-concern explanatory paragraph that appeared in the original report:

- Audit the event or transaction that prompted the request to reissue the report without the going-concern explanatory paragraph.
- Perform the procedures listed in section 560, *Subsequent Events*, paragraph .12, at or near the date of reissuance.
- Consider the factors described in section 341A, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, paragraphs .06 through .11, based on the conditions and circumstances at the date of reissuance.

The auditor may perform any other procedures that he or she deems necessary in the circumstances. Based on the information that the auditor becomes aware of as a result of performing the procedures mentioned above, the auditor should reassess the going-concern status of the entity.

[Issue Date: August, 1995.]

#### **[2.] Effect of the Year 2000 Issue on the Auditor's Consideration of an Entity's Ability to Continue as a Going Concern**

[.03--.27] [Withdrawn July, 2000 by the Audit Issues Task Force.]

---

[The next page is 635.]

<sup>1</sup> If the auditor decides not to reissue his or her report, the auditor may agree to be engaged to audit the financial statements for a period subsequent to that covered by the original report. This might be the case, for example, if the entity is experiencing profitable operations.

<sup>2</sup> Section 530, *Dating of the Independent Auditor's Report*, paragraph .05, states that an auditor may either "dual-date" or "later-date" his or her reissued report.

## AU Section 342

### *Auditing Accounting Estimates*

Source: SAS No. 57; SAS No. 113.

See section 9342 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance to auditors on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements in accordance with generally accepted auditing standards. For purposes of this section, an *accounting estimate* is an approximation of a financial statement element, item, or account. Accounting estimates are often included in historical financial statements because—

- a. The measurement of some amounts or the valuation of some accounts is uncertain, pending the outcome of future events.
- b. Relevant data concerning events that have already occurred cannot be accumulated on a timely, cost-effective basis.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.02 Accounting estimates in historical financial statements measure the effects of past business transactions or events, or the present status of an asset or liability. Examples of accounting estimates include net realizable values of inventory and accounts receivable, property and casualty insurance loss reserves, revenues from contracts accounted for by the percentage-of-completion method, and pension and warranty expenses.<sup>1</sup>

.03 Management is responsible for making the accounting estimates included in the financial statements. Estimates are based on subjective as well as objective factors and, as a result, judgment is required to estimate an amount at the date of the financial statements. Management's judgment is normally based on its knowledge and experience about past and current events and its assumptions about conditions it expects to exist and courses of action it expects to take.

.04 The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. As estimates are based on subjective as well as objective factors, it may be difficult for management to establish controls over them. Even when management's estimation process involves competent personnel using relevant and reliable data, there is potential for bias in the subjective factors. Accordingly, when planning and performing procedures to evaluate accounting estimates, the auditor should consider, with an attitude of professional skepticism, both the subjective and objective factors.

---

<sup>1</sup> Additional examples of accounting estimates included in historical financial statements are presented in paragraph .16.

## Developing Accounting Estimates

**.05** Management is responsible for establishing a process for preparing accounting estimates. Although the process may not be documented or formally applied, it normally consists of—

- a. Identifying situations for which accounting estimates are required.
- b. Identifying the relevant factors that may affect the accounting estimate.
- c. Accumulating relevant, sufficient, and reliable data on which to base the estimate.
- d. Developing assumptions that represent management's judgment of the most likely circumstances and events with respect to the relevant factors.
- e. Determining the estimated amount based on the assumptions and other relevant factors.
- f. Determining that the accounting estimate is presented in conformity with applicable accounting principles and that disclosure is adequate.

The risk of material misstatement of accounting estimates normally varies with the complexity and subjectivity associated with the process, the availability and reliability of relevant data, the number and significance of assumptions that are made, and the degree of uncertainty associated with the assumptions.

## Internal Control Related to Accounting Estimates

**.06** An entity's internal control may reduce the likelihood of material misstatements of accounting estimates. Specific relevant aspects of internal control include the following:

- a. Management communication of the need for proper accounting estimates
- b. Accumulation of relevant, sufficient, and reliable data on which to base an accounting estimate
- c. Preparation of the accounting estimate by qualified personnel
- d. Adequate review and approval of the accounting estimates by appropriate levels of authority, including—
  1. Review of sources of relevant factors
  2. Review of development of assumptions
  3. Review of reasonableness of assumptions and resulting estimates
  4. Consideration of the need to use the work of specialists
  5. Consideration of changes in previously established methods to arrive at accounting estimates
- e. Comparison of prior accounting estimates with subsequent results to assess the reliability of the process used to develop estimates
- f. Consideration by management of whether the resulting accounting estimate is consistent with the operational plans of the entity.

## Evaluating Accounting Estimates

**.07** The auditor's objective when evaluating accounting estimates is to obtain sufficient appropriate audit evidence to provide reasonable assurance that—

- a. All accounting estimates that could be material to the financial statements have been developed.
- b. Those accounting estimates are reasonable in the circumstances.
- c. The accounting estimates are presented in conformity with applicable accounting principles<sup>2</sup> and are properly disclosed.<sup>3</sup>

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Identifying Circumstances That Require Accounting Estimates

**.08** In evaluating whether management has identified all accounting estimates that could be material to the financial statements, the auditor considers the circumstances of the industry or industries in which the entity operates, its methods of conducting business, new accounting pronouncements, and other external factors. The auditor should consider performing the following procedures:

- a. Consider assertions embodied in the financial statements to determine the need for estimates. (See paragraph .16 for examples of accounting estimates included in financial statements.)
- b. Evaluate information obtained in performing other procedures, such as—
  1. Information about changes made or planned in the entity's business, including changes in operating strategy, and the industry in which the entity operates that may indicate the need to make an accounting estimate (section 311, *Planning and Supervision*).
  2. Changes in the methods of accumulating information.
  3. Information concerning identified litigation, claims, and assessments (section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*), and other contingencies.
  4. Information from reading available minutes of meetings of stockholders, directors, and appropriate committees.
  5. Information contained in regulatory or examination reports, supervisory correspondence, and similar materials from applicable regulatory agencies.
- c. Inquire of management about the existence of circumstances that may indicate the need to make an accounting estimate.

## Evaluating Reasonableness

**.09** In evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are—

- a. Significant to the accounting estimate.
- b. Sensitive to variations.
- c. Deviations from historical patterns.
- d. Subjective and susceptible to misstatement and bias.

---

<sup>2</sup> Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, discusses the auditor's responsibility for evaluating conformity with generally accepted accounting principles. [Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

<sup>3</sup> Section 431, *Adequacy of Disclosure in Financial Statements*, discusses the auditor's responsibility to consider whether the financial statements include adequate disclosures of material matters in light of the circumstances and facts of which he is aware.

The auditor normally should consider the historical experience of the entity in making past estimates as well as the auditor's experience in the industry. However, changes in facts, circumstances, or entity's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.<sup>4</sup>

**.10** In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate. Based on that understanding, the auditor should use one or a combination of the following approaches:

- a. Review and test the process used by management to develop the estimate.
- b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
- c. Review subsequent events or transactions occurring prior to the date of the auditor's report.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

**.11** Review and test management's process. In many situations, the auditor assesses the reasonableness of an accounting estimate by performing procedures to test the process used by management to make the estimate. The following are procedures the auditor may consider performing when using this approach:

- a. Identify whether there are controls over the preparation of accounting estimates and supporting data that may be useful in the evaluation.
- b. Identify the sources of data and factors that management used in forming the assumptions, and consider whether such data and factors are relevant, reliable, and sufficient for the purpose based on information gathered in other audit tests.
- c. Consider whether there are additional key factors or alternative assumptions about the factors.
- d. Evaluate whether the assumptions are consistent with each other, the supporting data, relevant historical data, and industry data.
- e. Analyze historical data used in developing the assumptions to assess whether the data is comparable and consistent with data of the period under audit, and consider whether such data is sufficiently reliable for the purpose.
- f. Consider whether changes in the business or industry may cause other factors to become significant to the assumptions.
- g. Review available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the entity, as well as consider their relationship to the assumptions.
- h. Consider using the work of a specialist regarding certain assumptions (section 336, *Using the Work of a Specialist*).
- i. Test the calculations used by management to translate the assumptions and key factors into the accounting estimate.

---

<sup>4</sup> In addition to other evidential matter about the estimate, in certain instances, the auditor may wish to obtain written representation from management regarding the key factors and assumptions.

**.12 *Develop an expectation.*** Based on the auditor's understanding of the facts and circumstances, he may independently develop an expectation as to the estimate by using other key factors or alternative assumptions about those factors.

**.13 *Review subsequent events or transactions.*** Events or transactions sometimes occur subsequent to the date of the balance sheet, but prior to the date of the auditor's report, that are important in identifying and evaluating the reasonableness of accounting estimates or key factors or assumptions used in the preparation of the estimate. In such circumstances, an evaluation of the estimate or of a key factor or assumption may be minimized or unnecessary as the event or transaction can be used by the auditor in evaluating their reasonableness. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

**.14** As discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .56, the auditor evaluates the reasonableness of accounting estimates in relationship to the financial statements taken as a whole:

Because no one accounting estimate can be considered accurate with certainty, the auditor may determine that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may not be significant, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

## **Effective Date**

**.15** This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible.

.16

## Appendix

### Examples of Accounting Estimates

The following are examples of accounting estimates that are included in financial statements. The list is presented for information only. It should not be considered all-inclusive.

#### Receivables:

- Uncollectible receivables
- Allowance for loan losses
- Uncollectible pledges

#### Inventories:

- Obsolete inventory
- Net realizable value of inventories where future selling prices and future costs are involved
- Losses on purchase commitments

#### Financial instruments:

- Valuation of securities
- Trading versus investment security classification
- Probability of high correlation of a hedge
- Sales of securities with puts and calls

#### Productive facilities, natural resources and intangibles:

- Useful lives and residual values
- Depreciation and amortization methods
- Recoverability of costs
- Recoverable reserves

#### Accruals:

- Property and casualty insurance company loss reserves
- Compensation in stock option plans and deferred plans
- Warranty claims
- Taxes on real and personal property
- Renegotiation refunds
- Actuarial assumptions in pension costs

#### Revenues:

- Airline passenger revenue
- Subscription income
- Freight and cargo revenue
- Dues income
- Losses on sales contracts

#### Contracts:

- Revenue to be earned
- Costs to be incurred
- Percent of completion

#### Leases:

- Initial direct costs
- Executory costs
- Residual values

#### Litigation:

- Probability of loss
- Amount of loss

#### Rates:

- Annual effective tax rate in interim reporting
- Imputed interest rates on receivables and payables
- Gross profit rates under program method of accounting

#### Other:

- Losses and net realizable value on disposal of segment or restructuring of a business
- Fair values in nonmonetary exchanges
- Interim period costs in interim reporting
- Current values in personal financial statements

---

[The next page is 645.]

## AU Section 9342

# Auditing Accounting Estimates: Auditing Interpretations of Section 342

### 1. Performance and Reporting Guidance Related to Fair Value Disclosures

**.01 Question**—In December 1991, the Financial Accounting Standards Board (FASB) issued Statement No. 107, *Disclosures about Fair Value of Financial Instruments* [AC section F25], which requires all entities to disclose the fair value of certain financial instruments for which it is practicable to estimate fair value. Some entities may disclose the information required by FASB Statement No. 107 and also disclose voluntarily the fair value of assets and liabilities not encompassed by FASB Statement No. 107. What are the auditor's responsibilities in situations in which entities are disclosing required or both required and voluntary fair value financial information?

**.02 Interpretation**—The auditor should determine whether the fair value disclosures represent only those required by FASB Statement No. 107 or whether additional voluntary fair value information has been disclosed by the entity. When auditing management's estimate of both required and voluntary fair value information, the auditor should obtain sufficient appropriate audit evidence to reasonably assure that—

- the valuation principles are acceptable, are being consistently applied, and are supported by the underlying documentation, and
- the method of estimation and significant assumptions used are properly disclosed.

If such assurance cannot be obtained, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

**.03 Required Information Presented**—When an entity discloses in its basic financial statements only information required by FASB Statement No. 107, the auditor may issue a standard unqualified opinion (assuming no other report modifications are necessary). The auditor may add an emphasis-of-matter paragraph describing the nature and possible range of such fair value information especially when management's best estimate of value is used in the absence of quoted market values (FASB Statement No. 107, paragraph 11 [AC section F25.115D]) and the range of possible values is significant. If the entity has not disclosed required fair value information, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

**.04 Required and Voluntary Information Presented**—When voluntary information is presented in addition to required information the auditor may audit the voluntary information only if both the following conditions exist:

- the measurement and disclosure criteria used to prepare the fair value financial information are reasonable
- competent persons using the measurement and disclosure criteria would ordinarily obtain materially similar measurements or disclosures.

In applying this guidance to fair value disclosures, the intention is that another auditor would reach similar conclusions regarding the reasonableness of the valuation or estimation techniques and methods used by the entity.

**.05** Voluntary disclosures may supplement required disclosures in such a fashion as to constitute either a complete balance sheet (the fair value of all material items in the balance sheet) or a presentation of less than a complete balance sheet.

**.06** When the audited disclosures constitute a complete balance sheet presentation, the auditor should add a paragraph to the report, similar to the following:

We have also audited in accordance with auditing standards generally accepted in the United States of America the supplemental fair value balance sheet of ABC Company as of December 31, 20XX. As described in Note X, the supplemental fair value balance sheet has been prepared by management to present relevant financial information that is not provided by the historical-cost balance sheets and is not intended to be a presentation in conformity with generally accepted accounting principles. In addition, the supplemental fair value balance sheet does not purport to present the net realizable, liquidation, or market value of ABC Company as a whole. Furthermore, amounts ultimately realized by ABC Company from the disposal of assets may vary significantly from the fair values presented. In our opinion, the supplemental fair value balance sheet referred to above presents fairly, in all material respects, the information set forth therein as described in Note X.

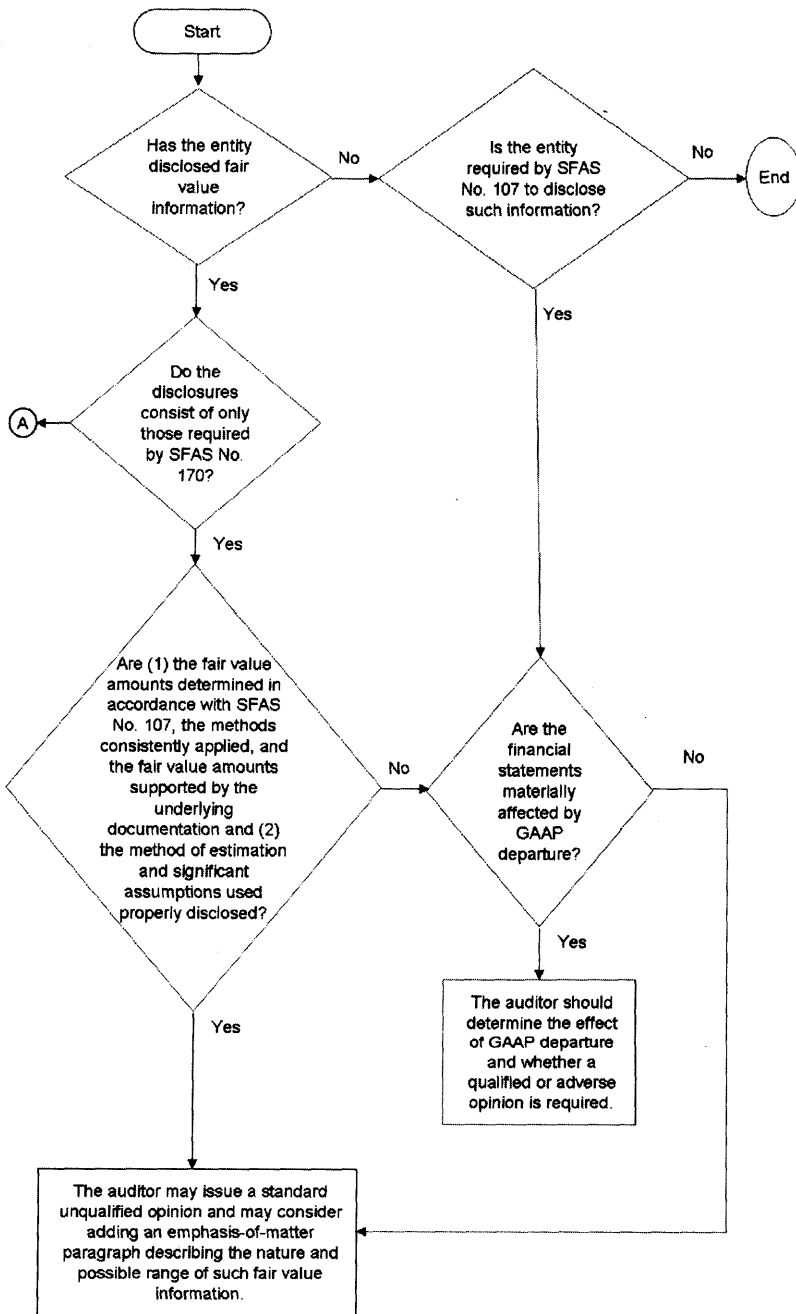

**.07** When the audited disclosures do not constitute a complete balance sheet presentation and are located on the face of the financial statements or in the footnotes, the auditor may issue a standard unqualified opinion and need not mention the disclosures in the report. When the audited disclosures do not constitute a complete balance sheet presentation and are included in a supplemental schedule or exhibit, the auditor should add an additional paragraph to the report as discussed in section 551, *Reporting on Information Accompanying the Basic Financial Statements in the Auditor-Submitted Documents*, paragraph .12.

**.08** In some situations, the auditor may not be engaged to audit the voluntary information or may be unable to audit it because it does not meet both conditions in paragraph .04 of this interpretation. When the unaudited voluntary disclosures are included in an auditor-submitted document and located on the face of the financial statements, the footnotes, or in a supplemental schedule to the basic financial statements, the voluntary disclosures should be labelled "unaudited" and the auditor should disclaim an opinion on the unaudited information as discussed in section 551.13.

**.09** When the unaudited voluntary disclosures are included in a client-prepared document and are located on the face of the financial statements, the footnotes, or in a supplemental schedule, the voluntary disclosures should be labelled "unaudited." When such unaudited information is not presented on the face of the financial statements, the footnotes, or in a supplemental schedule, the auditor should consider the guidance in section 550, *Other Information in Documents Containing Audited Financial Statements*.

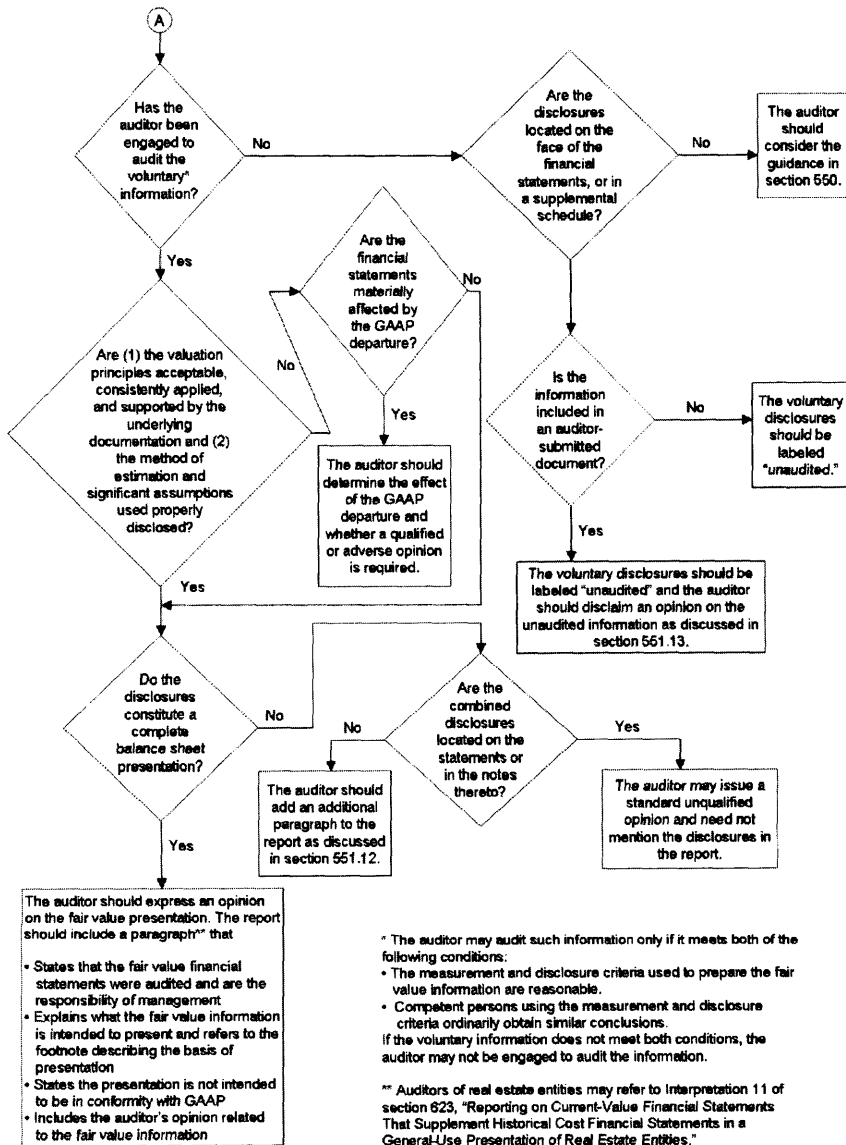

**.10** The auditing guidance related to each of these alternatives is presented in the following flowcharts:

# AUDITING GUIDANCE FOR FAIR VALUE INFORMATION Required\* Information Only

## AU Section 350

# Audit Sampling

(Supersedes SAS No. 1, sections 320A and 320B)

Source: SAS No. 39; SAS No. 43; SAS No. 45; SAS No. 111.

See section 9350 for interpretations of this section.

Effective for periods ended on or after June 25, 1983, unless otherwise indicated.

**.01** Audit sampling is the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.<sup>1</sup> This section provides guidance for planning, performing, and evaluating audit samples.

**.02** The auditor often is aware of account balances and transactions that may be more likely to contain misstatements.<sup>2</sup> He considers this knowledge in planning his procedures, including audit sampling. The auditor usually will have no special knowledge about other account balances and transactions that, in his judgment, will need to be tested to fulfill his audit objectives. Audit sampling is especially useful in these cases.

**.03** There are two general approaches to audit sampling: nonstatistical and statistical. Both approaches require that the auditor use professional judgment in planning, performing, and evaluating a sample and in relating the audit evidence produced by the sample to other audit evidence when forming a conclusion about the related account balance or class of transactions. The guidance in this section applies equally to nonstatistical and statistical sampling. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.04** The third standard of field work states, "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit." Either approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.05** The sufficiency of audit evidence is related to the design and size of an audit sample, among other factors. The size of a sample necessary to provide sufficient audit evidence depends on both the objectives and the efficiency of the sample. For a given objective, the efficiency of the sample relates to its design; one sample is more efficient than another if it can achieve the same objectives with a smaller sample size. In general, careful design can produce more efficient

---

<sup>1</sup> There may be other reasons for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For example, an auditor may examine only a few transactions from an account balance or class of transactions to (a) gain an understanding of the nature of an entity's operations or (b) clarify his understanding of the entity's internal control. In such cases, the guidance in this statement is not applicable.

<sup>2</sup> For purposes of this section the use of the term misstatement can include both errors and fraud as appropriate for the design of the sampling application. Errors and fraud are discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*.

samples. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.06** Evaluating the appropriateness of audit evidence is solely a matter of auditing judgment and is not determined by the design and evaluation of an audit sample. In a strict sense, the sample evaluation relates only to the likelihood that existing monetary misstatements or deviations from prescribed controls are proportionately included in the sample, not to the auditor's treatment of such items. Thus, the choice of nonstatistical or statistical sampling does not directly affect the auditor's decisions about the auditing procedures to be applied, the appropriateness of the audit evidence obtained with respect to individual items in the sample, or the actions that might be taken in light of the nature and cause of particular misstatements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Uncertainty and Audit Sampling

**.07** Some degree of uncertainty is implicit in the concept of "a reasonable basis for an opinion" referred to in the third standard of field work. The justification for accepting some uncertainty arises from the relationship between such factors as the cost and time required to examine all of the data and the adverse consequences of possible erroneous decisions based on the conclusions resulting from examining only a sample of the data. If these factors do not justify the acceptance of some uncertainty, the only alternative is to examine all of the data. Since this is seldom the case, the basic concept of sampling is well established in auditing practice.

**.08** The uncertainty inherent in applying audit procedures is referred to as audit risk. Audit risk includes both uncertainties due to sampling and uncertainties due to factors other than sampling. These aspects of audit risk are sampling risk and nonsampling risk, respectively.<sup>3</sup> [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**[.09]** [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. Paragraph deleted by the issuance of Statement on Auditing Standards No. 111, March 2006.]

**.10** Sampling risk arises from the possibility that, when a test of controls or a substantive test is restricted to a sample, the auditor's conclusions may be different from the conclusions he would reach if the test were applied in the same way to all items in the account balance or class of transactions. That is, a particular sample may contain proportionately more or less monetary misstatements or deviations from prescribed controls than exist in the balance or class as a whole. For a sample of a specific design, sampling risk varies inversely with sample size: the smaller the sample size, the greater the sampling risk.

**.11** Nonsampling risk includes all the aspects of audit risk that are not due to sampling. An auditor may apply a procedure to all transactions or balances and still fail to detect a material misstatement. Nonsampling risk includes the possibility of selecting audit procedures that are not appropriate to achieve the

---

<sup>3</sup> See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for definition of risk of material misstatement. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

specific objective. For example, confirming recorded receivables cannot be relied on to reveal unrecorded receivables. Nonsampling risk also arises because the auditor may fail to recognize misstatements included in documents that he examines, which would make that procedure ineffective even if he were to examine all items. Nonsampling risk can be reduced to a negligible level through such factors as adequate planning and supervision (see section 311, *Planning and Supervision*) and proper conduct of a firm's audit practice (see section 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*). [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45.]

## Sampling Risk

**.12** The auditor should apply professional judgment in assessing sampling risk. In performing substantive tests of details the auditor is concerned with two aspects of sampling risk:

- *The risk of incorrect acceptance* is the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.
- *The risk of incorrect rejection* is the risk that the sample supports the conclusion that the recorded account balance is materially misstated when it is not materially misstated.

The auditor is also concerned with two aspects of sampling risk in performing tests of controls when sampling is used:

- *The risk of assessing control risk too low* is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control.
- *The risk of assessing control risk too high* is the risk that the assessed level of control risk based on the sample is greater than the true operating effectiveness of the control.

**.13** The risk of incorrect rejection and the risk of assessing control risk too high relate to the efficiency of the audit. For example, if the auditor's evaluation of an audit sample leads him to the initial erroneous conclusion that a balance is materially misstated when it is not, the application of additional audit procedures and consideration of other audit evidence would ordinarily lead the auditor to the correct conclusion. Similarly, if the auditor's evaluation of a sample leads him to unnecessarily assess control risk too high for an assertion, he would ordinarily increase the scope of substantive tests to compensate for the perceived ineffectiveness of the controls. Although the audit may be less efficient in these circumstances, the audit is, nevertheless, effective.

**.14** The risk of incorrect acceptance and the risk of assessing control risk too low relate to the effectiveness of an audit in detecting an existing material misstatement. These risks are discussed in the following paragraphs.

## Sampling in Substantive Tests of Details

### Planning Samples

**.15** Planning involves developing a strategy for conducting an audit of financial statements. For general guidance on planning, see section 311, *Planning and Supervision*.

**.16** When planning a particular sample for a substantive test of details, the auditor should consider

- The relationship of the sample to the relevant audit objective (see section 326, *Audit Evidence*).
- Preliminary judgments about materiality levels.
- The auditor's allowable risk of incorrect acceptance.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

**.17** When planning a particular sample, the auditor should consider the specific audit objective to be achieved and should determine that the audit procedure, or combination of procedures, to be applied will achieve that objective. The auditor should determine that the population from which he draws the sample is appropriate for the specific audit objective. For example, an auditor would not be able to detect understatements of an account due to omitted items by sampling the recorded items. An appropriate sampling plan for detecting such understatements would involve selecting from a source in which the omitted items are included. To illustrate, subsequent cash disbursements might be sampled to test recorded accounts payable for understatement because of omitted purchases, or shipping documents might be sampled for understatement of sales due to shipments made but not recorded as sales.

**.18** Evaluation in monetary terms of the results of a sample for a test of details contributes directly to the auditor's purpose, since such an evaluation can be related to the auditor's judgment of the monetary amount of misstatements that would be material for the test. When planning a sample for a test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions may exist when combined with misstatements that may be found in other tests without causing the financial statements to be materially misstated. This maximum monetary misstatement that the auditor is willing to accept for the balance or class is called tolerable misstatement for the sample. Tolerable misstatement is a planning concept and is related to the auditor's determination of materiality for planning the financial statement audit in such a way that tolerable misstatement, combined for all of the tests in the entire audit, does not exceed materiality for the financial statements. This means that auditors should normally set tolerable misstatement for a specific audit procedure at less than financial statement materiality so that when the results of the audit procedures are aggregated, the required overall assurance is attained. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**.19** The second standard of field work states, "The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." After assessing and considering the levels of inherent and control risks, the auditor performs substantive tests to restrict detection risk to an acceptable level. As the assessed levels of inherent risk, control risk, and detection risk for other substantive procedures directed toward the same specific audit objective decreases, the auditor's allowable risk

of incorrect acceptance for the substantive tests of details increases and, thus, the smaller the required sample size for the substantive tests of details. For example, if inherent and control risks are assessed at the maximum, and no other substantive tests directed toward the same specific audit objectives are performed, the auditor should allow for a low risk of incorrect acceptance for the substantive tests of details.<sup>4</sup> Thus, the auditor would select a larger sample size for the tests of details than if he allowed a higher risk of incorrect acceptance. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.20** The auditor planning a statistical or nonstatistical sample may use the model in paragraph .26 of section 312, *Audit Risk and Materiality in Conducting an Audit*, to assist in planning the allowable risk of incorrect acceptance for a specific test of details. To do so, the auditor should determine an acceptable audit risk and subjectively quantify his or her judgment of the risk of material misstatement (consisting of inherent risk and control risk), and the risk that substantive analytical procedures and other relevant substantive procedures would fail to detect misstatements that could occur in an assertion equal to tolerable misstatement, given that such misstatements occur and are not detected by the entity's controls. Some levels of these risks are implicit in evaluating audit evidence and reaching conclusions. Auditors using the model might prefer to evaluate these judgment risks explicitly. The relationships between these risks are illustrated in Table 1 of the Appendix [paragraph .48]. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**.21** As discussed in section 326, the sufficiency of tests of details for a particular account balance or class of transactions is related to the individual importance of the items examined as well as to the potential for material misstatement. When planning a sample for a substantive test of details, the auditor uses his judgment to determine which items, if any, in an account balance or class of transactions should be individually examined and which items, if any, should be subject to sampling. The auditor should examine those items for which, in his judgment, acceptance of some sampling risk is not justified. For example, these may include items for which potential misstatements could individually equal or exceed the tolerable misstatement. Any items that the auditor has decided to examine 100 percent are not part of the items subject to sampling. Other items that, in the auditor's judgment, need to be tested to fulfill the audit objective but need not be examined 100 percent, would be subject to sampling.

**.22** The auditor may be able to reduce the required sample size by separating items subject to sampling into relatively homogeneous groups on the basis of some characteristic related to the specific audit objective. For example, common bases for such groupings are the recorded or book value of the items, the nature of controls related to processing the items, and special considerations associated with certain items. An appropriate number of items is then selected from each group.

---

<sup>4</sup> Some auditors prefer to think of risk levels in quantitative terms. For example, in the circumstances described, an auditor might think in terms of a 5 percent risk of incorrect acceptance for the substantive test of details. Risk levels used in sampling applications in other fields are not necessarily relevant in determining appropriate levels for applications in auditing because an audit includes many interrelated tests and sources of evidence. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

.23 To determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risk of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.<sup>5</sup> Table 2 in the Appendix [paragraph .48] illustrates the effect these factors may have on sample size. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

## Sample Selection

.24 Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. For example, haphazard and random-based selection of items represents two means of obtaining such samples.<sup>6</sup>

## Performance and Evaluation

.25 Audit procedures that are appropriate to the particular audit objective should be applied to each sample item. In some circumstances the auditor may not be able to apply the planned audit procedures to selected sample items because, for example, the entity might not be able to locate supporting documentation. The auditor's treatment of unexamined items will depend on their effect on his or her evaluation of the sample. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion. The auditor should also consider whether the reasons for his or her inability to examine the items have implications in relation to assessing risks of material misstatement due to fraud,<sup>7</sup> the assessed level of control risk that he or she expects to be supported, or the degree of reliance on management representations. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

---

<sup>5</sup> This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

<sup>6</sup> Random-based selection includes, for example, random sampling, stratified random sampling, sampling with probability proportional to size, and systematic sampling (for example, every hundredth item) with one or more random starts. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

<sup>7</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**.26** The auditor should project the misstatement results of the sample to the items from which the sample was selected.<sup>8,9</sup> There are several acceptable ways to project misstatements from a sample. For example, an auditor may have selected a sample of every twentieth item (50 items) from a population containing one thousand items. If he discovered overstatements of \$3,000 in that sample, the auditor could project a \$60,000 overstatement by dividing the amount of misstatement in the sample by the fraction of total items from the population included in the sample. The auditor should add that projection to the misstatements discovered in any items examined 100 percent. This total projected misstatement should be compared with the tolerable misstatement for the account balance or class of transactions, and appropriate consideration should be given to sampling risk. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds tolerable misstatement. For example, if the tolerable misstatement in an account balance of \$1 million is \$50,000 and the total projected misstatement based on an appropriate sample (see paragraph .23) is \$10,000, he may be reasonably assured that there is an acceptably low sampling risk that the true monetary misstatement for the population exceeds tolerable misstatement. On the other hand, if the total projected misstatement is close to the tolerable misstatement, the auditor may conclude that there is an unacceptably high risk that the actual misstatements in the population exceed the tolerable misstatement. An auditor uses professional judgment in making such evaluations.

**.27** In addition to the evaluation of the frequency and amounts of monetary misstatements, consideration should be given to the qualitative aspects of the misstatements. These include (a) the nature and cause of misstatements, such as whether they are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (b) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.

**.28** If the sample results suggest that the auditor's planning assumptions were incorrect, he should take appropriate action. For example, if monetary misstatements are discovered in a substantive test of details in amounts or frequency that is greater than is consistent with the assessed levels of inherent and control risk, the auditor should alter his risk assessments. The auditor should also consider whether to modify the other audit tests that were designed based upon the inherent and control risk assessments. For example, a large number of misstatements discovered in confirmation of receivables may indicate the need to reconsider the control risk assessment related to the assertions that impacted the design of substantive tests of sales or cash receipts.

**.29** The auditor should relate the evaluation of the sample to other relevant audit evidence when forming a conclusion about the related account balance or class of transactions.

---

<sup>8</sup> If the auditor has separated the items subject to sampling into relatively homogeneous groups (see paragraph .22), he separately projects the misstatement results of each group and sums them. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

<sup>9</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs 75–78, for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. This section provides specific guidance on the auditor's consideration of an audit adjustment that is, or may be, fraud. [Footnote revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99. Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

**.30** Projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

## Sampling in Tests of Controls

### Planning Samples

**.31** When planning a particular audit sample for a test of controls, the auditor should consider

- The relationship of the sample to the objective of the test of controls.
- The maximum rate of deviations from prescribed controls that would support his planned assessed level of control risk.
- The auditor's allowable risk of assessing control risk too low.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

**.32** Sampling applies when the auditor needs to decide whether the rate of deviation from a prescribed procedure is no greater than a tolerable rate, for example in testing a matching process or an approval process. However, risk assessment procedures performed to obtain an understanding of internal control do not involve sampling.<sup>10</sup> Sampling concepts also do not apply for some tests of controls. Tests of automated application controls are generally tested only once or a few times when effective (IT) general controls are present, and thus do not rely on the concepts of risk and tolerable deviation as applied in other sampling procedures. Sampling generally is not applicable to analyses of controls for determining the appropriate segregation of duties or other analyses that do not examine documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls or to analyses of the effectiveness of security and access controls. Sampling also may not apply to some tests directed toward obtaining audit evidence about the operation of the control environment or the accounting system, for example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control, or when examining the actions of those charged with governance<sup>11</sup> for assessing their effectiveness. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**.33** When designing samples for tests of controls the auditor ordinarily should plan to evaluate operating effectiveness in terms of deviations from prescribed controls, as to either the rate of such deviations or the monetary amount of the related transactions.<sup>12</sup> In this context, pertinent controls are

---

<sup>10</sup> The auditor often plans to perform tests of controls concurrently with obtaining an understanding of internal control (see section 319.85) for the purpose of estimating the rate of deviation from the prescribed controls, as to either the rate of such deviations or monetary amount of the related transactions. Sampling, as defined in this section, applies to such tests of controls. [Footnote revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

<sup>11</sup> See footnote 4 in section 311, *Planning and Supervision*, for the definition of those charged with governance. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

<sup>12</sup> For simplicity the remainder of this section will refer to only the rate of deviations. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

ones that, had they not been included in the design of internal control would have adversely affected the auditor's planned assessed level of control risk. The auditor's overall assessment of control risk for a particular assertion involves combining judgments about the prescribed controls, the deviations from prescribed controls, and the degree of assurance provided by the sample and other tests of controls.

**.34** The auditor should determine the maximum rate of deviations from the prescribed control that he would be willing to accept without altering his planned assessed level of control risk. This is the *tolerable rate*. In determining the tolerable rate, the auditor should consider (a) the planned assessed level of control risk, and (b) the degree of assurance desired by the audit evidence in the sample. For example, if the auditor plans to assess control risk at a low level, and he desires a high degree of assurance from the audit evidence provided by the sample for tests of controls (i.e., not perform other tests of controls for the assertion), he might decide that a tolerable rate of 5 percent or possibly less would be reasonable. If the auditor either plans to assess control risk at a higher level, or he desires assurance from other tests of controls along with that provided by the sample (such as inquiries of appropriate entity personnel or observation of the application of the policy or procedure), the auditor might decide that a tolerable rate of 10 percent or more is reasonable. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.35** In assessing the tolerable rate of deviations, the auditor should consider that, while deviations from pertinent controls increase the risk of material misstatements in the accounting records, such deviations do not necessarily result in misstatements. For example, a recorded disbursement that does not show evidence of required approval may nevertheless be a transaction that is properly authorized and recorded. Deviations would result in misstatements in the accounting records only if the deviations and the misstatements occurred on the same transactions. Deviations from pertinent controls at a given rate ordinarily would be expected to result in misstatements at a lower rate.

**.36** In some situations, the risk of material misstatement for an assertion may be related to a combination of controls. If a combination of two or more controls is necessary to affect the risk of material misstatement for an assertion, those controls should be regarded as a single procedure, and deviations from any controls in combination should be evaluated on that basis.

**.37** Samples taken to test the operating effectiveness of controls are intended to provide a basis for the auditor to conclude whether the controls are being applied as prescribed. When the degree of assurance desired by the audit evidence in the sample is high, the auditor should allow for a low level of sampling risk (that is, the risk of assessing control risk too low). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>13</sup>

**.38** To determine the number of items to be selected for a particular sample for a test of controls, the auditor should consider the tolerable rate of deviation from the controls being tested, the likely rate of deviations, and the allowable risk of assessing control risk too low. An auditor applies professional judgment to relate these factors in determining the appropriate sample size.

---

<sup>13</sup> The auditor who prefers to think of risk levels in quantitative terms might consider, for example, a 5 percent to 10 percent risk of assessing control risk too low. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

## Sample Selection

**.39** Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. Random-based selection of items represents one means of obtaining such samples. Ideally, the auditor should use a selection method that has the potential for selecting items from the entire period under audit. Section 319.99 provides guidance applicable to the auditor's use of sampling during interim and remaining periods. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

## Performance and Evaluation

**.40** Auditing procedures that are appropriate to achieve the objective of the test of controls should be applied to each sample item. If the auditor is not able to apply the planned audit procedures or appropriate alternative procedures to selected items, he should consider the reasons for this limitation, and he should ordinarily consider those selected items to be deviations from the prescribed policy or procedure for the purpose of evaluating the sample.

**.41** The deviation rate in the sample is the auditor's best estimate of the deviation rate in the population from which it was selected. If the estimated deviation rate is less than the tolerable rate for the population, the auditor should consider the risk that such a result might be obtained even though the true deviation rate for the population exceeds the tolerable rate for the population. For example, if the tolerable rate for a population is 5 percent and no deviations are found in a sample of 60 items, the auditor may conclude that there is an acceptably low sampling risk that the true deviation rate in the population exceeds the tolerable rate of 5 percent. On the other hand, if the sample includes, for example, two or more deviations, the auditor may conclude that there is an unacceptably high sampling risk that the rate of deviations in the population exceeds the tolerable rate of 5 percent. An auditor applies professional judgment in making such an evaluation.

**.42** In addition to the evaluation of the frequency of deviations from pertinent procedures, consideration should be given to the qualitative aspects of the deviations. These include (a) the nature and cause of the deviations, such as whether they are due to error or fraud, and (b) the possible relationship of the deviations to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

**.43** If the auditor concludes that the sample results do not support the planned assessed level of control risk for an assertion, he should re-evaluate the nature, timing, and extent of substantive procedures based on a revised consideration of the assessed level of control risk for the relevant financial statement assertions.

## Dual-Purpose Samples

**.44** In some circumstances the auditor may design a sample that will be used for dual purposes: testing the operating effectiveness of an identified control and testing whether the recorded monetary amount of transactions is

correct.<sup>14</sup> In general, an auditor planning to use a dual-purpose sample would have made a preliminary assessment that there is an acceptably low risk that the rate of deviations from the prescribed control in the population exceeds the tolerable rate. For example, an auditor designing a test of control over entries in the voucher register may plan a related substantive procedure at a risk level that anticipates a particular assessed level of control risk. The size of a sample designed for dual purposes should be the larger of the samples that would otherwise have been designed for the two separate purposes.<sup>15</sup> In evaluating such tests, deviations from the prescribed control and monetary misstatements should be evaluated separately using the risk levels applicable for the respective purposes. The absence of monetary misstatements detected in a sample does not necessarily imply that related controls are effective; however, misstatements that the auditor detects by performing substantive procedures should be considered by the auditor as a possible indication of a control failure when assessing the operating effectiveness of related controls. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

## Selecting a Sampling Approach

.45 As discussed in paragraph .04, either a nonstatistical or statistical approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.46 Statistical sampling helps the auditor (a) to design an efficient sample, (b) to measure the sufficiency of the audit evidence obtained, and (c) to evaluate the sample results. By using statistical theory, the auditor can quantify sampling risk to assist himself in limiting it to a level he considers acceptable. However, statistical sampling involves additional costs of training auditors, designing individual samples to meet the statistical requirements, and selecting the items to be examined. Because either nonstatistical or statistical sampling can provide sufficient audit evidence, the auditor chooses between them after considering their relative cost and effectiveness in the circumstances. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Effective Date

.47 This section is effective for audits of financial statements for periods ended on or after June 25, 1983. Earlier application is encouraged. [As amended, effective retroactively to June 25, 1982, by Statement on Auditing Standards No. 43.]

---

<sup>14</sup> Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, discusses dual-purpose tests in paragraph .33. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

<sup>15</sup> The test requiring the smaller sample size may be selected as a subset of the larger sample. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

## Appendix

### Relating the Risk of Incorrect Acceptance for a Substantive Test of Details to Other Sources of Audit Assurance

In Table 1 it is assumed, for illustrative purposes, that the auditor has chosen an audit risk (AR) of 5 percent for an assertion. Table 1 incorporates the premise that internal control cannot be expected to be completely effective in detecting aggregate misstatements equal to tolerable misstatement that might occur. The table also illustrates the fact that the risk level for substantive procedures for particular assertions is not an isolated decision. Rather, it is a direct consequence of the auditor's assessments of the risk of material misstatement (RMM) (combined assessments of inherent and control risks), and judgments about the effectiveness of substantive analytical procedures (AP) and other relevant tests of details (TD), and it cannot be properly considered out of this context.<sup>[1]</sup>

### Table 1

**Allowable Risk of Incorrect Acceptance (TD)  
for Various Assessments of RMM and AP; for AR = .05**

Auditor's subjective assessment of risk of material misstatement.	Auditor's subjective assessment of risk that substantive analytical proce- dures and other relevant substantive procedures might fail to detect aggre- gate misstatements equal to tolerable misstatement.			
	RMM	AP		
	10%	30%	50%	100%
		TD		
10%	*	*	*	50%
30%	*	55%	33%	16%
50%	*	33%	20%	10%
100%	50%	16%	10%	5%

\* The allowable level of AR of 5 percent exceeds the product of RMM and AP, and thus, the planned test of details may not be necessary unless specified by regulation or other Standards (e.g., confirmation or inventory observation procedures).

**Note:** The table entries for TD are computed from the illustrated model: TD equals  $AR/(RMM \times AP)$ . For example, for RMM = .50, AP = .30, TD =  $.05/ (.50 \times .30)$  or .33 (equals 33%).

<sup>[1]</sup> As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. Footnote deleted by the issuance of Statement on Auditing Standards No. 111, March 2006.]

**Table 2**

**Factors Influencing Sample Sizes for a Test of Details in Sample Planning**

<i>Factor</i>	<i>Conditions leading to</i>		<i>Related factor for substantive sample planning</i>
	<i>Smaller sample size</i>	<i>Larger sample size</i>	
a. Assessment of inherent risk.	Low assessed level of inherent risk.	High assessed level of inherent risk.	Allowable risk of incorrect acceptance.
b. Assessment of control risk.	Low assessed level of control risk.	High assessed level of control risk.	Allowable risk of incorrect acceptance.
c. Assessment of risk for other substantive procedures related to the same assertion (including substantive analytical procedures and other relevant substantive procedures).	Low assessment of risk associated with other relevant substantive procedures.	High assessment of risk associated with other relevant substantive procedures.	Allowable risk of incorrect acceptance.
d. Measure of tolerable misstatement for a specific account.	Larger measure of tolerable misstatement.	Smaller measure of tolerable misstatement.	Tolerable misstatement.
e. Expected size and frequency of misstatements.	Smaller misstatements or lower frequency.	Larger misstatements or higher frequency.	Assessment of population characteristics.
f. Number of items in the population.	Virtually no effect on sample size unless population is very small.		
g. Choice between statistical and nonstatistical sampling	Ordinarily, sample sizes are comparable.		

As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

## AU Section 9350

# Audit Sampling: Auditing Interpretations of Section 350

### 1. Applicability

**.01 Question**—Section 350, *Audit Sampling*, paragraph .01, footnote 1, states that there may be reasons other than sampling for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For what reasons might an auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions not be considered audit sampling?

**.02 Interpretation**—The auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions would not be considered to be an audit sampling application under the following circumstances.

- a. *It is not the auditor's intent to extend the conclusion that he reaches by examining the items to the remainder of the items in the account balance or class.* Audit sampling is defined as the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class. Thus, if the purpose of the auditor's application of an auditing procedure to less than 100 percent of the items in an account balance or class of transactions is something other than evaluating a trait of the entire balance or class, he is not using audit sampling.

For example, an auditor might trace several transactions through an entity's accounting system to gain an understanding of the nature of the entity's operations or clarify his understanding of the design of the entity's internal control. In such cases the auditor's intent is to gain a general understanding of the accounting system or other relevant parts of the internal control, rather than the evaluation of a characteristic of all transactions processed. As a result, the auditor is not using audit sampling.

Occasionally auditors perform procedures such as checking arithmetical calculations or tracing journal entries into ledger accounts on a test basis. When such procedures are applied to less than 100 percent of the arithmetical calculations or ledger postings that affect the financial statements, audit sampling may not be involved if the procedure is not a test to evaluate a characteristic of an account balance or class of transactions, but is intended only to provide limited knowledge that supplements the auditor's other audit evidence regarding a financial statement assertion.

- b. *Although he might not be examining all the items in an account balance or class of transactions, the auditor might be examining 100 percent of the items in a given population.* A "population" for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. For example, in some circumstances, an auditor might

examine all of the items that comprise an account balance or class of transactions that exceed a given amount or that have an unusual characteristic and either apply other auditing procedures (e.g., analytical procedures) to those items that do not exceed the given amount or possess the unusual characteristic or apply no auditing procedures to them because of their insignificance. Again, the auditor is not using audit sampling. Rather, he has broken the account balance or class of transactions into two groups. One group is tested 100 percent, the other group is either tested by analytical procedures or considered insignificant. The auditor would be using audit sampling only if he applied an auditing procedure to less than all of the items in the second group to form a conclusion about that group. For the same reason, cutoff tests often do not involve audit sampling applications. In performing cutoff tests auditors often examine all significant transactions for a period surrounding the cutoff date and, as a result, such tests do not involve the application of audit sampling.

- c. *The auditor is testing controls that are not documented.* Auditors choose from a variety of methods including inquiry, observation, and examination of documentary evidence in testing controls. For example, observation of a client's physical inventory count procedures is a test that is performed primarily through the auditor's observation of controls over such things as inventory movement, counting procedures and other procedures used by the client to control the count of the inventory. The procedures that the auditor uses to observe the client's physical inventory count generally do not require use of audit sampling. However, audit sampling may be used in certain tests of controls or substantive tests of details of inventory, for example, in tracing selected test counts into inventory records.
- d. *The auditor is not performing a substantive test of details.* Substantive tests consist of tests of details of transactions and balances, analytical review and or from a combination of both. In performing substantive tests, audit sampling is generally used only in testing details of transactions and balances.

## AU Section 350A

### **Audit Sampling** §

(Supersedes SAS No. 1, sections 320A and 320B)

Source: SAS No. 39; SAS No. 43; SAS No. 45.

See section 9350A for interpretations of this section.

Effective for periods ended on or after June 25, 1983, unless otherwise indicated.

**.01** Audit sampling is the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.<sup>1</sup> This section provides guidance for planning, performing, and evaluating audit samples.

**.02** The auditor often is aware of account balances and transactions that may be more likely to contain misstatements.<sup>2</sup> He considers this knowledge in planning his procedures, including audit sampling. The auditor usually will have no special knowledge about other account balances and transactions that, in his judgment, will need to be tested to fulfill his audit objectives. Audit sampling is especially useful in these cases.

**.03** There are two general approaches to audit sampling: nonstatistical and statistical. Both approaches require that the auditor use professional judgment in planning, performing, and evaluating a sample and in relating the audit evidence produced by the sample to other audit evidence when forming a conclusion about the related account balance or class of transactions. The guidance in this section applies equally to nonstatistical and statistical sampling. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.04** The third standard of field work states, "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit." Either approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.05** The sufficiency of audit evidence is related to the design and size of an audit sample, among other factors. The size of a sample necessary to provide sufficient audit evidence depends on both the objectives and the efficiency of the

---

§ This section has been amended by Statement on Auditing Standards No. 111, *Amendment to Statement on Auditing Standards No. 39, Audit Sampling*. This section will be amended closer to the effective date of Statement on Auditing Standards No. 111, which is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted. Statement on Auditing Standards No. 111 is included in the "AU Risk Assessment Standards: SAS No. 104—SAS No. 111" section, following the "AU Section 900—Special Reports of the Committee on Auditing Procedure" section, of this publication.

<sup>1</sup> There may be other reasons for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For example, an auditor may examine only a few transactions from an account balance or class of transactions to (a) gain an understanding of the nature of an entity's operations or (b) clarify his understanding of the entity's internal control. In such cases, the guidance in this statement is not applicable.

<sup>2</sup> For purposes of this section the use of the term misstatement can include both errors and fraud as appropriate for the design of the sampling application. Errors and fraud are discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*.

sample. For a given objective, the efficiency of the sample relates to its design; one sample is more efficient than another if it can achieve the same objectives with a smaller sample size. In general, careful design can produce more efficient samples. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.06** Evaluating the appropriateness of audit evidence is solely a matter of auditing judgment and is not determined by the design and evaluation of an audit sample. In a strict sense, the sample evaluation relates only to the likelihood that existing monetary misstatements or deviations from prescribed controls are proportionately included in the sample, not to the auditor's treatment of such items. Thus, the choice of nonstatistical or statistical sampling does not directly affect the auditor's decisions about the auditing procedures to be applied, the appropriateness of the audit evidence obtained with respect to individual items in the sample, or the actions that might be taken in light of the nature and cause of particular misstatements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Uncertainty and Audit Sampling

**.07** Some degree of uncertainty is implicit in the concept of "a reasonable basis for an opinion" referred to in the third standard of field work. The justification for accepting some uncertainty arises from the relationship between such factors as the cost and time required to examine all of the data and the adverse consequences of possible erroneous decisions based on the conclusions resulting from examining only a sample of the data. If these factors do not justify the acceptance of some uncertainty, the only alternative is to examine all of the data. Since this is seldom the case, the basic concept of sampling is well established in auditing practice.

**.08** The uncertainty inherent in applying audit procedures is referred to as audit risk. Audit risk consists of (a) the risk (consisting of inherent risk and control risk) that the balance or class and related assertions contain misstatements that could be material to the financial statements when aggregated with misstatements in other balances or classes and (b) the risk (detection risk) that the auditor will not detect such misstatement. The risk of these adverse events occurring jointly can be viewed as a function of the respective individual risks. Using professional judgment, the auditor evaluates numerous factors to assess inherent risk and control risk (assessing control risk at less than the maximum level involves performing tests of controls), and performs substantive tests (analytical procedures and test of details of account balances or classes of transactions) to restrict detection risk.

**.09** Audit risk includes both uncertainties due to sampling and uncertainties due to factors other than sampling. These aspects of audit risk are sampling risk and nonsampling risk, respectively. [As amended August, 1983, by Statement on Auditing Standards No. 45.] (See section 313.)

**.10** Sampling risk arises from the possibility that, when a test of controls or a substantive test is restricted to a sample, the auditor's conclusions may be different from the conclusions he would reach if the test were applied in the same way to all items in the account balance or class of transactions. That is, a particular sample may contain proportionately more or less monetary misstatements or deviations from prescribed controls than exist in the balance or class as a whole. For a sample of a specific design, sampling risk varies inversely with sample size: the smaller the sample size, the greater the sampling risk.

**.11** Nonsampling risk includes all the aspects of audit risk that are not due to sampling. An auditor may apply a procedure to all transactions or balances

and still fail to detect a material misstatement. Nonsampling risk includes the possibility of selecting audit procedures that are not appropriate to achieve the specific objective. For example, confirming recorded receivables cannot be relied on to reveal unrecorded receivables. Nonsampling risk also arises because the auditor may fail to recognize misstatements included in documents that he examines, which would make that procedure ineffective even if he were to examine all items. Nonsampling risk can be reduced to a negligible level through such factors as adequate planning and supervision (see section 311, *Planning and Supervision*) and proper conduct of a firm's audit practice (see section 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*). [As amended August, 1983, by Statement on Auditing Standards No. 45.] (See section 313.)

## Sampling Risk

.12 The auditor should apply professional judgment in assessing sampling risk. In performing substantive tests of details the auditor is concerned with two aspects of sampling risk:

- *The risk of incorrect acceptance* is the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.
- *The risk of incorrect rejection* is the risk that the sample supports the conclusion that the recorded account balance is materially misstated when it is not materially misstated.

The auditor is also concerned with two aspects of sampling risk in performing tests of controls when sampling is used:

- *The risk of assessing control risk too low* is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control.
- *The risk of assessing control risk too high* is the risk that the assessed level of control risk based on the sample is greater than the true operating effectiveness of the control.

.13 The risk of incorrect rejection and the risk of assessing control risk too high relate to the efficiency of the audit. For example, if the auditor's evaluation of an audit sample leads him to the initial erroneous conclusion that a balance is materially misstated when it is not, the application of additional audit procedures and consideration of other audit evidence would ordinarily lead the auditor to the correct conclusion. Similarly, if the auditor's evaluation of a sample leads him to unnecessarily assess control risk too high for an assertion, he would ordinarily increase the scope of substantive tests to compensate for the perceived ineffectiveness of the controls. Although the audit may be less efficient in these circumstances, the audit is, nevertheless, effective.

.14 The risk of incorrect acceptance and the risk of assessing control risk too low relate to the effectiveness of an audit in detecting an existing material misstatement. These risks are discussed in the following paragraphs.

## Sampling in Substantive Tests of Details

### Planning Samples

.15 Planning involves developing a strategy for conducting an audit of financial statements. For general guidance on planning, see section 311, *Planning and Supervision*.

.16 When planning a particular sample for a substantive test of details, the auditor should consider

- The relationship of the sample to the relevant audit objective (see section 326, *Audit Evidence*).
- Preliminary judgments about materiality levels.
- The auditor's allowable risk of incorrect acceptance.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.17 When planning a particular sample, the auditor should consider the specific audit objective to be achieved and should determine that the audit procedure, or combination of procedures, to be applied will achieve that objective. The auditor should determine that the population from which he draws the sample is appropriate for the specific audit objective. For example, an auditor would not be able to detect understatements of an account due to omitted items by sampling the recorded items. An appropriate sampling plan for detecting such understatements would involve selecting from a source in which the omitted items are included. To illustrate, subsequent cash disbursements might be sampled to test recorded accounts payable for understatement because of omitted purchases, or shipping documents might be sampled for understatement of sales due to shipments made but not recorded as sales.

.18 Evaluation in monetary terms of the results of a sample for a substantive test of details contributes directly to the auditor's purpose, since such an evaluation can be related to his judgment of the monetary amount of misstatements that would be material. When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions may exist without causing the financial statements to be materially misstated. This maximum monetary misstatement for the balance or class is called *tolerable misstatement* for the sample. Tolerable misstatement is a planning concept and is related to the auditor's preliminary judgments about materiality levels in such a way that tolerable misstatement, combined for the entire audit plan, does not exceed those estimates.

.19 The second standard of field work states, "The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." After assessing and considering the levels of inherent and control risks, the auditor performs substantive tests to restrict detection risk to an acceptable level. As the assessed levels of inherent risk, control risk, and detection risk for other substantive procedures directed toward the same specific audit objective decreases, the auditor's allowable risk of incorrect acceptance for the substantive tests of details increases and, thus, the smaller the required sample size for the substantive tests of details. For example, if inherent and control risks are assessed at the maximum, and no other substantive tests directed toward the same specific audit objectives are performed, the auditor should allow for a low risk of incorrect acceptance for the substantive tests of details.<sup>3</sup> Thus, the auditor would select a larger sample

---

<sup>3</sup> Some auditors prefer to think of risk levels in quantitative terms. For example, in the circumstances described, an auditor might think in terms of a 5 percent risk of incorrect acceptance for the substantive test of details. Risk levels used in sampling applications in other fields are not necessarily relevant in determining appropriate levels for applications in auditing because an audit includes many interrelated tests and sources of evidence.

size for the tests of details than if he allowed a higher risk of incorrect acceptance. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.20** The Appendix illustrates how the auditor may relate the risk of incorrect acceptance for a particular substantive test of details to his assessments of inherent risk, control risk, and the risk that analytical procedures and other relevant substantive tests would fail to detect material misstatement.

**.21** As discussed in section 326A, the sufficiency of tests of details for a particular account balance or class of transactions is related to the individual importance of the items examined as well as to the potential for material misstatement. When planning a sample for a substantive test of details, the auditor uses his judgment to determine which items, if any, in an account balance or class of transactions should be individually examined and which items, if any, should be subject to sampling. The auditor should examine those items for which, in his judgment, acceptance of some sampling risk is not justified. For example, these may include items for which potential misstatements could individually equal or exceed the tolerable misstatement. Any items that the auditor has decided to examine 100 percent are not part of the items subject to sampling. Other items that, in the auditor's judgment, need to be tested to fulfill the audit objective but need not be examined 100 percent, would be subject to sampling.

**.22** The auditor may be able to reduce the required sample size by separating items subject to sampling into relatively homogeneous groups on the basis of some characteristic related to the specific audit objective. For example, common bases for such groupings are the recorded or book value of the items, the nature of controls related to processing the items, and special considerations associated with certain items. An appropriate number of items is then selected from each group.

**.23** To determine the number of items to be selected in a sample for a particular substantive test of details, the auditor should consider the tolerable misstatement, the allowable risk of incorrect acceptance, and the characteristics of the population. An auditor applies professional judgment to relate these factors in determining the appropriate sample size. The Appendix illustrates the effect these factors may have on sample size.

## Sample Selection

**.24** Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. For example, haphazard and random-based selection of items represents two means of obtaining such samples.<sup>4</sup>

## Performance and Evaluation

**.25** Auditing procedures that are appropriate to the particular audit objective should be applied to each sample item. In some circumstances the auditor may not be able to apply the planned audit procedures to selected sample items because, for example, supporting documentation may be missing. The auditor's treatment of unexamined items will depend on their effect on his evaluation

---

<sup>4</sup> Random-based selection includes, for example, random sampling, stratified random sampling, sampling with probability proportional to size, and systematic sampling (for example, every hundredth item) with one or more random starts.

of the sample. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative procedures that would provide him with sufficient evidence to form a conclusion. The auditor should also consider whether the reasons for his inability to examine the items have implications in relation to his planned assessed level of control risk or his degree of reliance on management representations.

**.26** The auditor should project the misstatement results of the sample to the items from which the sample was selected.<sup>5, 6</sup> There are several acceptable ways to project misstatements from a sample. For example, an auditor may have selected a sample of every twentieth item (50 items) from a population containing one thousand items. If he discovered overstatements of \$3,000 in that sample, the auditor could project a \$60,000 overstatement by dividing the amount of misstatement in the sample by the fraction of total items from the population included in the sample. The auditor should add that projection to the misstatements discovered in any items examined 100 percent. This total projected misstatement should be compared with the tolerable misstatement for the account balance or class of transactions, and appropriate consideration should be given to sampling risk. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds tolerable misstatement. For example, if the tolerable misstatement in an account balance of \$1 million is \$50,000 and the total projected misstatement based on an appropriate sample (see paragraph .23) is \$10,000, he may be reasonably assured that there is an acceptably low sampling risk that the true monetary misstatement for the population exceeds tolerable misstatement. On the other hand, if the total projected misstatement is close to the tolerable misstatement, the auditor may conclude that there is an unacceptably high risk that the actual misstatements in the population exceed the tolerable misstatement. An auditor uses professional judgment in making such evaluations.

**.27** In addition to the evaluation of the frequency and amounts of monetary misstatements, consideration should be given to the qualitative aspects of the misstatements. These include (a) the nature and cause of misstatements, such as whether they are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (b) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.

**.28** If the sample results suggest that the auditor's planning assumptions were incorrect, he should take appropriate action. For example, if monetary misstatements are discovered in a substantive test of details in amounts or frequency that is greater than is consistent with the assessed levels of inherent and control risk, the auditor should alter his risk assessments. The auditor should also consider whether to modify the other audit tests that were designed based

---

<sup>5</sup> If the auditor has separated the items subject to sampling into relatively homogeneous groups (see paragraph .22), he separately projects the misstatement results of each group and sums them.

<sup>6</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .75–.78, for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. This section provides specific guidance on the auditor's consideration of an audit adjustment that is, or may be, fraud. [Footnote revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

upon the inherent and control risk assessments. For example, a large number of misstatements discovered in confirmation of receivables may indicate the need to reconsider the control risk assessment related to the assertions that impacted the design of substantive tests of sales or cash receipts.

**.29** The auditor should relate the evaluation of the sample to other relevant audit evidence when forming a conclusion about the related account balance or class of transactions.

**.30** Projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

## Sampling in Tests of Controls

### Planning Samples

**.31** When planning a particular audit sample for a test of controls, the auditor should consider

- The relationship of the sample to the objective of the test of controls.
- The maximum rate of deviations from prescribed controls that would support his planned assessed level of control risk.
- The auditor's allowable risk of assessing control risk too low.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

**.32** For many tests of controls, sampling does not apply. Procedures performed to obtain an understanding of internal control sufficient to plan an audit do not involve sampling.<sup>7</sup> Sampling generally is not applicable to tests of controls that depend primarily on appropriate segregation of duties or that otherwise provide no documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls. Sampling may not apply to tests directed toward obtaining evidence about the design or operation of the control environment or the accounting system. For example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control.

**.33** When designing samples for tests of controls the auditor ordinarily should plan to evaluate operating effectiveness in terms of deviations from prescribed controls, as to either the rate of such deviations or the monetary amount of the related transactions.<sup>8</sup> In this context, pertinent controls are ones that, had they not been included in the design of internal control would have adversely affected the auditor's planned assessed level of control risk. The auditor's overall assessment of control risk for a particular assertion involves combining judgments about the prescribed controls, the deviations from prescribed controls, and the degree of assurance provided by the sample and other tests of controls.

---

<sup>7</sup> The auditor often plans to perform tests of controls concurrently with obtaining an understanding of internal control (see section 319.85) for the purpose of estimating the rate of deviation from the prescribed controls, as to either the rate of such deviations or monetary amount of the related transactions. Sampling, as defined in this section, applies to such tests of controls. [Footnote revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

<sup>8</sup> For simplicity the remainder of this section will refer to only the rate of deviations.

**.34** The auditor should determine the maximum rate of deviations from the prescribed control that he would be willing to accept without altering his planned assessed level of control risk. This is the *tolerable rate*. In determining the tolerable rate, the auditor should consider (a) the planned assessed level of control risk, and (b) the degree of assurance desired by the audit evidence in the sample. For example, if the auditor plans to assess control risk at a low level, and he desires a high degree of assurance from the audit evidence provided by the sample for tests of controls (i.e., not perform other tests of controls for the assertion), he might decide that a tolerable rate of 5 percent or possibly less would be reasonable. If the auditor either plans to assess control risk at a higher level, or he desires assurance from other tests of controls along with that provided by the sample (such as inquiries of appropriate entity personnel or observation of the application of the policy or procedure), the auditor might decide that a tolerable rate of 10 percent or more is reasonable. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.35** In assessing the tolerable rate of deviations, the auditor should consider that, while deviations from pertinent controls increase the risk of material misstatements in the accounting records, such deviations do not necessarily result in misstatements. For example, a recorded disbursement that does not show evidence of required approval may nevertheless be a transaction that is properly authorized and recorded. Deviations would result in misstatements in the accounting records only if the deviations and the misstatements occurred on the same transactions. Deviations from pertinent controls at a given rate ordinarily would be expected to result in misstatements at a lower rate.

**.36** In some situations, the risk of material misstatement for an assertion may be related to a combination of controls. If a combination of two or more controls is necessary to affect the risk of material misstatement for an assertion, those controls should be regarded as a single procedure, and deviations from any controls in combination should be evaluated on that basis.

**.37** Samples taken to test the operating effectiveness of controls are intended to provide a basis for the auditor to conclude whether the controls are being applied as prescribed. When the degree of assurance desired by the audit evidence in the sample is high, the auditor should allow for a low level of sampling risk (that is, the risk of assessing control risk too low). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]<sup>9</sup>

**.38** To determine the number of items to be selected for a particular sample for a test of controls, the auditor should consider the tolerable rate of deviation from the controls being tested, the likely rate of deviations, and the allowable risk of assessing control risk too low. An auditor applies professional judgment to relate these factors in determining the appropriate sample size.

## Sample Selection

**.39** Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. Random-based selection of items represents one means of obtaining such samples. Ideally, the auditor should use a selection method that has the potential for selecting items from the entire period under audit. Section 319.99 provides guidance applicable to the

---

<sup>9</sup> The auditor who prefers to think of risk levels in quantitative terms might consider, for example, a 5 percent to 10 percent risk of assessing control risk too low.

auditor's use of sampling during interim and remaining periods. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

## Performance and Evaluation

.40 Auditing procedures that are appropriate to achieve the objective of the test of controls should be applied to each sample item. If the auditor is not able to apply the planned audit procedures or appropriate alternative procedures to selected items, he should consider the reasons for this limitation, and he should ordinarily consider those selected items to be deviations from the prescribed policy or procedure for the purpose of evaluating the sample.

.41 The deviation rate in the sample is the auditor's best estimate of the deviation rate in the population from which it was selected. If the estimated deviation rate is less than the tolerable rate for the population, the auditor should consider the risk that such a result might be obtained even though the true deviation rate for the population exceeds the tolerable rate for the population. For example, if the tolerable rate for a population is 5 percent and no deviations are found in a sample of 60 items, the auditor may conclude that there is an acceptably low sampling risk that the true deviation rate in the population exceeds the tolerable rate of 5 percent. On the other hand, if the sample includes, for example, two or more deviations, the auditor may conclude that there is an unacceptably high sampling risk that the rate of deviations in the population exceeds the tolerable rate of 5 percent. An auditor applies professional judgment in making such an evaluation.

.42 In addition to the evaluation of the frequency of deviations from pertinent procedures, consideration should be given to the qualitative aspects of the deviations. These include (a) the nature and cause of the deviations, such as whether they are errors or irregularities or are due to misunderstanding of instructions or to carelessness, and (b) the possible relationship of the deviations to other phases of the audit. The discovery of an irregularity ordinarily requires a broader consideration of possible implications than does the discovery of an error.

.43 If the auditor concludes that the sample results do not support the planned assessed level of control risk for an assertion, he should re-evaluate the nature, timing, and extent of substantive procedures based on a revised consideration of the assessed level of control risk for the relevant financial statement assertions.

## Dual-Purpose Samples

.44 In some circumstances the auditor may design a sample that will be used for dual purposes: assessing control risk and testing whether the recorded monetary amount of transactions is correct. In general, an auditor planning to use a dual-purpose sample would have made a preliminary assessment that there is an acceptably low risk that the rate of deviations from the prescribed control in the population exceeds the tolerable rate. For example, an auditor designing a test of a control procedure over entries in the voucher register may plan a related substantive test at a risk level that anticipates an assessment level of control risk below the maximum. The size of a sample designed for dual purposes should be the larger of the samples that would otherwise have been designed for the two separate purposes. In evaluating such tests, deviations from pertinent procedures and monetary misstatements should be evaluated separately using the risk levels applicable for the respective purposes.

## Selecting a Sampling Approach

**.45** As discussed in paragraph .04, either a nonstatistical or statistical approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

**.46** Statistical sampling helps the auditor (*a*) to design an efficient sample, (*b*) to measure the sufficiency of the audit evidence obtained, and (*c*) to evaluate the sample results. By using statistical theory, the auditor can quantify sampling risk to assist himself in limiting it to a level he considers acceptable. However, statistical sampling involves additional costs of training auditors, designing individual samples to meet the statistical requirements, and selecting the items to be examined. Because either nonstatistical or statistical sampling can provide sufficient audit evidence, the auditor chooses between them after considering their relative cost and effectiveness in the circumstances. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

## Effective Date

**.47** This section is effective for audits of financial statements for periods ended on or after June 25, 1983. Earlier application is encouraged. [As amended, effective retroactively to June 25, 1982, by Statement on Auditing Standards No. 43.]

## Appendix

### Relating the Risk of Incorrect Acceptance for a Substantive Test of Details to Other Sources of Audit Assurance

1. Audit risk, with respect to a particular account balance or class of transactions, is the risk that there is a monetary misstatement greater than tolerable misstatement affecting an assertion in an account balance or class of transactions that the auditor fails to detect. The auditor uses professional judgment in determining the allowable risk for a particular audit after he consider such factors as the risk of material misstatement in the financial statements, the cost to reduce the risk, and the effect of the potential misstatements on the use and understanding of the financial statements.

2. An auditor assesses inherent and control risk, and plans and performs substantive tests (analytical procedures and substantive tests of details) in whatever combination to reduce audit risk to an appropriate level. However, the second standard of field work contemplates that ordinarily the assessed level of control risk cannot be sufficiently low to eliminate the need to perform any substantive tests to restrict detection risk for all of the assertions relevant to significant account balances or transactions classes.

3. The sufficiency of audit sample sizes, whether nonstatistical or statistical, is influenced by several factors. Table 1 illustrates how several of these factors may affect sample sizes for a substantive test of details. Factors *a*, *b* and *c* in table 1 should be considered together (see paragraph .08). For example, high inherent risk, the lack of effective controls, and the absence of other substantive tests related to the same audit objective ordinarily require larger sample sizes for related substantive tests of details than if there were other sources to provide the basis for assessing inherent or control risks below the maximum, or if other substantive tests related to the same objective were performed. Alternatively, low inherent risk, effective controls, or effective analytical procedures and other relevant substantive tests may lead the auditor to conclude that the sample, if any, needed for an additional test of details can be small.

4. The following model expresses the general relationship of the risks associated with the auditor's assessment of inherent and control risks, and the effectiveness of analytical procedures (including other relevant substantive tests) and substantive tests of details. The model is not intended to be a mathematical formula including all factors that may influence the determination of individual risk components; however, some auditors find such a model to be useful when planning appropriate risk levels for audit procedures to achieve the auditor's desired audit risk.

$$AR = IR \times CR \times AP \times TD$$

An auditor might use this model to obtain an understanding of an appropriate risk of incorrect acceptance for a substantive test of details as follows:

$$TD = AR / (IR \times CR \times AP)$$

AR = The allowable audit risk that monetary misstatements equal to tolerable misstatement might remain undetected for the account balance or class of transactions and related assertions after the

auditor has completed all audit procedures deemed necessary.<sup>1</sup> The auditor uses his professional judgment to determine the allowable audit risk after considering factors such as those discussed in paragraph 1 of this appendix.

IR = Inherent risk is the susceptibility of an assertion to a material misstatement assuming there are no related internal control structure policies or procedures.

CR = Control risk is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the entity's controls. The auditor may assess control risk at the maximum, or assess control risk below the maximum based on the sufficiency of audit evidence obtained to support the effectiveness of controls. The quantification for this model relates to the auditor's evaluation of the overall effectiveness of those controls that would prevent or detect material misstatements equal to tolerable misstatement in the related account balance or class of transactions. For example, if the auditor believes that pertinent controls would prevent or detect misstatements equal to tolerable misstatement about half the time, he would assess this risk as 50 percent. (CR is not the same as the risk of assessing control risk too low.)

AP = The auditor's assessment of the risk that analytical procedures and other relevant substantive tests would fail to detect misstatements that could occur in an assertion equal to tolerable misstatement, given that such misstatements occur and are not detected by the internal control structure.

TD = The allowable risk of incorrect acceptance for the substantive test of details, given that misstatements equal to tolerable misstatement occur in an assertion and are not detected by internal control or analytical procedures and other relevant substantive tests.

5. The auditor planning a statistical sample can use the relationship in paragraph 4 of this Appendix to assist in planning his allowable risk of incorrect acceptance for a specific substantive test of details. To do so, he selects an acceptable audit risk (AR), and substantively quantifies his judgment of risks IR, CR and AP. Some levels of these risks are implicit in evaluating audit evidence and reaching conclusions. Auditors using the relationship prefer to evaluate these judgment risks explicitly.

6. The relationships between these independent risks are illustrated in table 2. In table 2 it is assumed, for illustrative purposes, that the auditor has chosen an audit risk of 5 percent for an assertion where inherent risk has been assessed at the maximum. Table 2 incorporates the premise that no internal control can be expected to be completely effective in detecting aggregate misstatements equal to tolerable misstatement that might occur. The table also illustrates the fact that the risk level for substantive tests for particular assertions is not an isolated decision. Rather, it is a direct consequence of the auditor's assessments of inherent and control risks, and judgments about the effectiveness of analytical procedures and other relevant substantive tests, and it cannot be properly considered out of this context. [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45.]

---

<sup>1</sup> For purposes of this Appendix, the nonsampling risk aspect of audit risk is assumed to be negligible, based on the level of quality controls in effect. [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45.]

**Table 1****Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning**

<i>Factor</i>	<i>Conditions leading to</i>		<i>Related factor for substantive sample planning</i>
	<i>Smaller sample size</i>	<i>Larger sample size</i>	
<i>a.</i> Assessment of inherent risk.	Low assessed level of inherent risk.	High assessed level of inherent risk.	Allowable risk of incorrect acceptance.
<i>b.</i> Assessment of control risk.	Low assessed level of control risk.	High assessed level of control risk.	Allowable risk of incorrect acceptance.
<i>c.</i> Assessment of risk for other substantive tests related to the same assertion (including analytical procedures and other relevant substantive tests).	Low assessment of risk associated with other relevant substantive tests.	High assessment of risk associated with other relevant substantive tests.	Allowable risk of incorrect acceptance.
<i>d.</i> Measure of tolerable misstatement for a specific account.	Larger measure of tolerable misstatement.	Smaller measure of tolerable misstatement.	Tolerable misstatement.
<i>e.</i> Expected size and frequency of misstatements.	Smaller misstatements or lower frequency.	Larger misstatements or higher frequency.	Assessment of population characteristics.
<i>f.</i> Number of items in the population.	Virtually no effect on sample size unless population is very small.		

**Table 2**

**Allowable Risk of Incorrect Acceptance (TD)  
for Various Assessments of CR and AP; for AR = .05 and IR = 1.0**

Auditor's subjective assessment control risk.	Auditor's subjective assessment of risk that analytical procedures and other relevant substantive tests might fail to detect aggregate misstatements equal to tolerable misstatement.			
	<i>CR</i>	<i>AP</i>		
	<i>10%</i>	<i>30%</i>	<i>50%</i>	<i>100%</i>
	<i>TD</i>			
10%	*	*	*	50%
30%	*	55%	33%	16%
50%	*	33%	20%	10%
100%	50%	16%	10%	5%

\* The allowable level of AR of 5 percent exceeds the product of IR, CR, and AP, and thus, the planned substantive test of details may not be necessary.

**Note:** The table entries for TD are computed from the illustrated model: TD equals  $AR/(IR \times CR \times AP)$ . For example, for  $IR = 1.0$ ,  $CR = .50$ ,  $AP = .30$ ,  $TD = .05/(1.0 \times .50 \times .30)$  or .33 (equals 33%).

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105 and No. 110.]

## AU Section 9350A

# Audit Sampling: Auditing Interpretations of Section 350A

### 1. Applicability

**.01 Question**—Section 350A, *Audit Sampling*, paragraph .01, footnote 1, states that there may be reasons other than sampling for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For what reasons might an auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions *not* be considered audit sampling?

**.02 Interpretation**—The auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions would not be considered to be an audit sampling application under the following circumstances.

- a. *It is not the auditor's intent to extend the conclusion that he reaches by examining the items to the remainder of the items in the account balance or class.* Audit sampling is defined as the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class. Thus, if the purpose of the auditor's application of an auditing procedure to less than 100 percent of the items in an account balance or class of transactions is something other than evaluating a trait of the entire balance or class, he is not using audit sampling.

For example, an auditor might trace several transactions through an entity's accounting system to gain an understanding of the nature of the entity's operations or clarify his understanding of the design of the entity's internal control. In such cases the auditor's intent is to gain a general understanding of the accounting system or other relevant parts of the internal control, rather than the evaluation of a characteristic of all transactions processed. As a result, the auditor is not using audit sampling.

Occasionally auditors perform procedures such as checking arithmetical calculations or tracing journal entries into ledger accounts on a test basis. When such procedures are applied to less than 100 percent of the arithmetical calculations or ledger postings that affect the financial statements, audit sampling may not be involved if the procedure is not a test to evaluate a characteristic of an account balance or class of transactions, but is intended only to provide limited knowledge that supplements the auditor's other audit evidence regarding a financial statement assertion.

- b. *Although he might not be examining all the items in an account balance or class of transactions, the auditor might be examining 100 percent of the items in a given population.* A "population" for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. For example, in some circumstances, an auditor might

examine all of the items that comprise an account balance or class of transactions that exceed a given amount or that have an unusual characteristic and either apply other auditing procedures (e.g., analytical procedures) to those items that do not exceed the given amount or possess the unusual characteristic or apply no auditing procedures to them because of their insignificance. Again, the auditor is not using audit sampling. Rather, he has broken the account balance or class of transactions into two groups. One group is tested 100 percent, the other group is either tested by analytical procedures or considered insignificant. The auditor would be using audit sampling only if he applied an auditing procedure to less than all of the items in the second group to form a conclusion about that group. For the same reason, cutoff tests often do not involve audit sampling applications. In performing cutoff tests auditors often examine all significant transactions for a period surrounding the cutoff date and, as a result, such tests do not involve the application of audit sampling.

- c. *The auditor is testing controls that are not documented.* Auditors choose from a variety of methods including inquiry, observation, and examination of documentary evidence in testing controls. For example, observation of a client's physical inventory count procedures is a test that is performed primarily through the auditor's observation of controls over such things as inventory movement, counting procedures and other procedures used by the client to control the count of the inventory. The procedures that the auditor uses to observe the client's physical inventory count generally do not require use of audit sampling. However, audit sampling may be used in certain tests of controls or substantive tests of details of inventory, for example, in tracing selected test counts into inventory records.
- d. *The auditor is not performing a substantive test of details.* Substantive tests consist of tests of details of transactions and balances, analytical review and or from a combination of both. In performing substantive tests, audit sampling is generally used only in testing details of transactions and balances.

## AU Section 380

# *The Auditor's Communication With Those Charged With Governance*

(Supersedes SAS No. 61)

Source: SAS No. 114.

Effective for audits of financial statements for periods beginning on or after December 15, 2006.

**.01** This section establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements.<sup>1</sup> Although this section applies regardless of an entity's governance structure or size, particular considerations apply where all of those charged with governance are involved in managing an entity. This section does not establish requirements regarding the auditor's communication with an entity's management or owners unless they are also charged with a governance role.

**.02** This section has been drafted in terms of an audit of financial statements, but may also be applied, adapted as necessary in the circumstances, to audits of other historical financial information when those charged with governance have a responsibility to oversee the preparation and presentation of the other historical financial information.

**.03** For purposes of this section:

- a. *Those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards.
- b. *Management* means the person(s) responsible for achieving the objectives of the entity and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management is responsible for the financial statements, including designing, implementing, and maintaining effective internal control over financial reporting.

**.04** Recognizing the importance of effective two-way communication to the audit, this section provides a framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated with them. Additional matters to be communicated are identified

---

<sup>1</sup> The provisions of this section apply to audits of financial statements prepared either in accordance with generally accepted accounting principles or in accordance with a comprehensive basis of accounting other than generally accepted accounting principles. References in this section to generally accepted accounting principles are intended to also refer to other comprehensive bases of accounting when the reference is relevant to the basis of accounting used.

in other Statements on Auditing Standards (see Appendix A [paragraph .66]). Further matters may be communicated by agreement with those charged with governance or management, or in accordance with external requirements.

**.05** The auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process.

**.06** Clear communication of specific matters in accordance with this section is an integral part of every audit. However, the auditor is not required to perform procedures specifically to identify other significant matters to communicate with those charged with governance.

## The Role of Communication

**.07** The principal purposes of communication with those charged with governance are to:

- a. Communicate clearly with those charged with governance the responsibilities of the auditor in relation to the financial statement audit, and an overview of the scope and timing of the audit.
- b. Obtain from those charged with governance information relevant to the audit.
- c. Provide those charged with governance with timely observations arising from the audit that are relevant to their responsibilities in overseeing the financial reporting process.

**.08** This section focuses primarily on communications from the auditor to those charged with governance. However, effective two-way communication is also very important in assisting:

- a. The auditor and those charged with governance in understanding matters related to the audit in context, and in developing a constructive working relationship. This relationship is developed while maintaining the auditor's independence and objectivity.
- b. The auditor in obtaining from those charged with governance information relevant to the audit. For example, those charged with governance may assist the auditor in understanding the entity and its environment, in identifying appropriate sources of audit evidence, and in providing information about specific transactions or events.
- c. Those charged with governance in fulfilling their responsibility to oversee the financial reporting process, thereby reducing the risks of material misstatement of the financial statements.

**.09** Although the auditor is responsible for communicating specific matters in accordance with this section, management also has a responsibility to communicate matters of governance interest to those charged with governance. Communication by the auditor does not relieve management of this responsibility.

## Legal Considerations

**.10** In certain circumstances, the auditor may be required to report to a regulatory or enforcement body certain matters communicated with those charged with governance. For example, governmental auditing standards require auditors to report fraud, illegal acts, violations of provisions of contracts or grant

agreements, and abuse directly to parties outside the audited entity in certain circumstances.

.11 In rare circumstances, laws or regulations may prevent the auditor from communicating certain matters with those charged with governance, or others within the entity. For example, laws or regulations may specifically prohibit a communication, or other action, that might prejudice an investigation by an appropriate authority into an actual or suspected illegal act. In such circumstances, it may be appropriate for the auditor to seek legal advice.

## Those Charged With Governance

.12 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated.

.13 Governance structures vary by entity, reflecting influences such as size and ownership characteristics. For example:

- In some entities, those charged with governance hold positions that are an integral part of the entity's legal structure, for example, company directors. For other entities, a body that is not part of the entity may be charged with governance, as with some government agencies.
- In some cases, some or all of those charged with governance also have management responsibilities. In others, those charged with governance and management are different people.

.14 In most entities, governance is the collective responsibility of a governing body, such as a board of directors, a supervisory board, partners, proprietors, a committee of management, trustees, or equivalent persons. In some smaller entities, however, one person may be charged with governance, such as the owner-manager where there are no other owners, or a sole trustee. When governance is a collective responsibility, a subgroup, such as an audit committee or even an individual, may be charged with specific tasks to assist the governing body in meeting its responsibilities.

.15 Such diversity means that it is not possible for this section to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Also, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, is relevant in deciding with whom to communicate matters.

.16 When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate. When the entity being audited is a component<sup>2</sup> of a group,<sup>3</sup> the appropriate person(s) with whom to communicate is dependent on the nature of the matter to be communicated and the terms of the engagement.

---

<sup>2</sup> *Component* means a head office, parent, division, branch, subsidiary, joint venture, associated company, equity investee, or other entity whose financial information is or should be included in the consolidated financial statements of a group.

<sup>3</sup> *Group* means an entity whose consolidated financial statements include or should include financial information of more than one component.

## Communication With the Audit Committee or Other Subgroup of Those Charged With Governance

.17 Audit committees (or similar subgroups with different names) exist in many entities. Although their specific authority and functions may differ, communication with the audit committee, where one exists, is a key element in the auditor's communication with those charged with governance. Good governance principles suggest that:

- The auditor has access to the audit committee as necessary.
- The chair of the audit committee and, when relevant, the other members of the audit committee, meet with the auditor periodically.
- The audit committee meets with the auditor without management present at least annually.

.18 The auditor should evaluate whether communication with a subgroup of those charged with governance, such as the audit committee or an individual, adequately fulfills the auditor's responsibility to communicate with those charged with governance. When considering communicating with a subgroup of those charged with governance, the auditor may take into account such matters as:

- The respective responsibilities of the subgroup and the governing body.
- The nature of the matter to be communicated.
- Relevant legal or regulatory requirements.
- Whether the subgroup (*a*) has the authority to take action in relation to the information communicated and (*b*) can provide further information and explanations the auditor may need.
- Whether the auditor is aware of potential conflicts of interest between the subgroup and other members of the governing body.
- Whether there is also a need to communicate the information, in full or in summary form, to the governing body. This decision may be influenced by the auditor's assessment of how effectively and appropriately the subgroup communicates relevant information with the governing body. The auditor retains the right to communicate with the governing body, a fact the auditor may make explicit in the terms of the engagement.

## Communication With Management

.19 Many matters may be discussed with management in the ordinary course of an audit, including matters to be communicated with those charged with governance in accordance with this section. Such discussions recognize management's executive responsibility for the conduct of the entity's operations and, in particular, management's responsibility for the financial statements.

.20 Before communicating matters with those charged with governance, the auditor may discuss them with management unless that is inappropriate. For example, it may not be appropriate to discuss with management questions of management's competence or integrity. In addition to recognizing management's responsibility, these initial discussions may clarify facts and issues, and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor may discuss matters with the internal auditor before communicating with those charged with governance.

## When All of Those Charged With Governance Are Involved in Managing the Entity

**.21** In some cases, all of those charged with governance are involved in managing the entity. In these cases, if matters required by this section are communicated with person(s) with management responsibilities, and those person(s) also have governance responsibilities, the matters need not be communicated again with those same person(s) in their governance role.

**.22** When all of those charged with governance are involved in managing the entity, the auditor should consider whether communication with person(s) with financial reporting responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity. (See paragraphs .12 and .18.)

## Matters to Be Communicated

**.23** The auditor should communicate with those charged with governance:

- a. The auditor's responsibilities under generally accepted auditing standards (see paragraphs .26 through .28);
- b. An overview of the planned scope and timing of the audit (see paragraphs .29 through .33); and
- c. Significant findings from the audit (see paragraphs .34 through .44).

**.24** Management's communication of these matters to those charged with governance does not relieve the auditor of the responsibility to also communicate them. However, communication of these matters by management may affect the form or timing of the auditor's communication.

**.25** Nothing in this section precludes the auditor from communicating any other matters to those charged with governance.

## The Auditor's Responsibilities Under Generally Accepted Auditing Standards

**.26** The auditor should communicate with those charged with governance the auditor's responsibilities under generally accepted auditing standards, including that:

- a. The auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with the oversight of those charged with governance are presented fairly, in all material respects, in conformity with generally accepted accounting principles.
- b. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

These responsibilities may be communicated through the engagement letter, or other form of contract that records the terms of the engagement, if that letter or contract is provided to those charged with governance.

**.27** The auditor may also communicate that:

- a. The auditor is responsible for performing the audit in accordance with generally accepted auditing standards and that the audit is designed to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement.

- b. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting.
- c. The auditor is responsible for communicating significant matters related to the financial statement audit that are, in the auditor's professional judgment, relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. Generally accepted auditing standards do not require the auditor to design procedures for the purpose of identifying other matters to communicate with those charged with governance.
- d. When applicable, the auditor is also responsible for communicating particular matters required by laws or regulations, by agreement with the entity or by additional requirements applicable to the engagement.

**.28** Section 550, *Other Information in Documents Containing Audited Financial Statements*, establishes the auditor's responsibility for information prepared by management that accompanies the audited financial statements.<sup>4</sup> If the entity includes other information in documents containing audited financial statements, the auditor should communicate with those charged with governance the auditor's responsibility with respect to such other information, any procedures performed relating to the other information, and the results.

## Planned Scope and Timing of the Audit

**.29** The auditor should communicate with those charged with governance an overview of the planned scope and timing of the audit. However, it is important for the auditor not to compromise the effectiveness of the audit, particularly where some or all of those charged with governance are involved in managing the entity. For example, communicating the nature and timing of detailed audit procedures may reduce the effectiveness of those procedures by making them too predictable. Certain factors described in paragraph .53 may be relevant in determining the nature and extent of this communication.

**.30** Communication regarding the planned scope and timing of the audit may:

- a. Assist those charged with governance in understanding better the consequences of the auditor's work for their oversight activities, discussing with the auditor issues of risk and materiality, and identifying any areas in which they may request the auditor to undertake additional procedures; and
- b. Assist the auditor to understand better the entity and its environment.

**.31** Matters communicated may include the following:

- How the auditor proposes to address the significant risks of material misstatement, whether due to fraud or error.
- The auditor's approach to internal control relevant to the audit, including, when applicable, whether the auditor will express an opinion on the effectiveness of internal control over financial reporting.

---

<sup>4</sup> Guidance on the auditor's consideration of other information is also provided by section 558, *Required Supplementary Information*, and section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*.

- The concept of materiality in planning and executing the audit, focusing on the factors considered rather than on specific thresholds or amounts.
  - Where the entity has an internal audit function, the extent to which the auditor will use the work of internal audit, and how the external and internal auditors can best work together.
- .32** Other planning matters that the auditor may consider discussing with those charged with governance include:
- The views of those charged with governance about:
    - The appropriate person(s) in the entity's governance structure with whom to communicate.
    - The allocation of responsibilities between those charged with governance and management.
    - The entity's objectives and strategies, and the related business risks that may result in material misstatements.
    - Matters those charged with governance consider warrant particular attention during the audit, and any areas where they request additional procedures to be undertaken.
    - Significant communications with regulators.
    - Other matters those charged with governance believe are relevant to the audit of the financial statements.
  - The attitudes, awareness, and actions of those charged with governance concerning (a) the entity's internal control and its importance in the entity, including how those charged with governance oversee the effectiveness of internal control and (b) the detection or the possibility of fraud.
  - The actions of those charged with governance in response to developments in financial reporting, laws, accounting standards, corporate governance practices, and other related matters.
  - The actions of those charged with governance in response to previous communications with the auditor.
- .33** While communication with those charged with governance may assist the auditor in planning the scope and timing of the audit, it does not change the auditor's sole responsibility to determine the overall audit strategy and the audit plan, including the nature, timing, and extent of procedures necessary to obtain sufficient appropriate audit evidence.

## Significant Findings From the Audit

**.34** The auditor should communicate with those charged with governance the following matters:

- a. The auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures (see paragraphs .37 and .38).
- b. Significant difficulties, if any, encountered during the audit (see paragraph .39).
- c. Uncorrected misstatements, other than those the auditor believes are trivial, if any (see paragraphs .40 and .41).
- d. Disagreements with management, if any, (see paragraph .42).

- e. Other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process.

**.35** Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate:

- a. Material, corrected misstatements that were brought to the attention of management as a result of audit procedures. The auditor also may communicate other corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.
- b. Representations the auditor is requesting from management. The auditor may provide those charged with governance with a copy of management's written representations.
- c. Management's consultations with other accountants (see paragraph .43).
- d. Significant issues, if any, arising from the audit that were discussed, or the subject of correspondence, with management (see paragraph .44).

**.36** The communication of significant findings from the audit may include requesting further information from those charged with governance in order to complete the audit evidence obtained. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to specific transactions or events.

### ***Qualitative Aspects of the Entity's Significant Accounting Practices***

**.37** Generally accepted accounting principles provide for the entity to make accounting estimates and judgments about accounting policies and financial statement disclosures. Open and constructive communication about qualitative aspects of the entity's significant accounting practices may include comment on the acceptability of significant accounting practices. Appendix B [paragraph .67] provides guidance on the matters that may be included in this communication.

**.38** The auditor should explain to those charged with governance why the auditor considers a significant accounting practice not to be appropriate and, when considered necessary, request changes. If requested changes are not made, the auditor should inform those charged with governance that the auditor will consider the effect of this on the financial statements of the current and future years, and on the auditor's report.

### ***Significant Difficulties Encountered During the Audit***

**.39** The auditor should inform those charged with governance of any significant difficulties encountered in dealing with management related to the performance of the audit. Significant difficulties encountered during the audit may include such matters as:

- Significant delays in management providing required information.
- An unnecessarily brief time within which to complete the audit.
- Extensive unexpected effort required to obtain sufficient appropriate audit evidence.
- The unavailability of expected information.

- Restrictions imposed on the auditors by management.
- Management's unwillingness to provide information about management's plans for dealing with the adverse effects of the conditions or events that lead the auditor to believe there is substantial doubt about the entity's ability to continue as a going concern.

In some circumstances, such difficulties may constitute a scope limitation that leads to a modification of the auditor's opinion.

### ***Uncorrected Misstatements***

.40 Section 312, *Audit Risk and Materiality in Conducting an Audit*, requires the auditor to accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management. The auditor should communicate with those charged with governance uncorrected misstatements and the effect that they may have on the opinion in the auditor's report, and request their correction. In communicating the effect that material uncorrected misstatements may have on the opinion in the auditor's report, the auditor should communicate them individually. Where there are a large number of small uncorrected misstatements, the auditor may communicate the number and overall monetary effect of the misstatements, rather than the details of each individual misstatement.

.41 The auditor should discuss with those charged with governance the implications of a failure to correct known and likely misstatements, if any, considering qualitative as well as quantitative considerations, including possible implications in relation to future financial statements. The auditor should also communicate with those charged with governance the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

### ***Disagreements With Management***

.42 The auditor should discuss with those charged with governance any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the entity's financial statements or the auditor's report. Disagreements with management may occasionally arise over, among other things, the application of accounting principles to the entity's specific transactions and events and the basis for management's judgments about accounting estimates. Disagreements may also arise regarding the scope of the audit, disclosures to be included in the entity's financial statements, and the wording of the auditor's report. For purposes of this section, disagreements do not include differences of opinion based on incomplete facts or preliminary information that are later resolved.

### ***Management's Consultations With Other Accountants***

.43 In some cases, management may decide to consult with other accountants about auditing and accounting matters. When the auditor is aware that such consultation has occurred, the auditor should discuss with those charged with governance his or her views about significant matters that were the subject of such consultation.<sup>5</sup>

---

<sup>5</sup> Circumstances in which the auditor should be informed of such consultations are described in paragraph .07 of section 625, *Reports on the Application of Accounting Principles*.

### ***Significant Issues Discussed, or Subject to Correspondence, With Management***

.44 The auditor should communicate with those charged with governance any significant issues that were discussed or were the subject of correspondence with management. Significant issues may include such matters as:

- Business conditions affecting the entity, and business plans and strategies that may affect the risks of material misstatement.
- Discussions or correspondence in connection with the initial or recurring retention of the auditor including, among other matters, any discussions or correspondence regarding the application of accounting principles and auditing standards.

### **Independence**

.45 Generally accepted auditing standards require independence for all audits. Relevant matters to consider in reaching a conclusion about independence include circumstances or relationships that create threats to auditor independence and the related safeguards that have been applied to eliminate those threats or reduce them to an acceptable level.<sup>6</sup>

.46 Although the auditor's report affirms the auditor's independence, in certain situations, particularly for public interest entities,<sup>7</sup> the auditor may determine that it is appropriate to communicate with those charged with governance circumstances or relationships (for example, financial interests, business or family relationships, or nonaudit services provided or expected to be provided) that in the auditor's professional judgment may reasonably be thought to bear on independence and that the auditor gave significant consideration to in reaching the conclusion that independence has not been impaired.

.47 The form and timing of communications regarding independence may be affected by the entity's governance structure and whether a formal subgroup such as an audit committee exists. In situations where all of those charged with governance are involved in managing the entity, the auditor may determine that those charged with governance have been informed of relevant facts regarding the auditor's independence through their management activities or through other means, such as the engagement letter. This is particularly likely where the entity is owner-managed, and the auditor's firm has little involvement with the entity beyond a financial statement audit.

---

<sup>6</sup> Comprehensive guidance on threats to independence and safeguards, including application to specific situations, is set forth in the AICPA's *Conceptual Framework for AICPA Independence Standards* [ET section 100.01].

<sup>7</sup> In addition to entities subject to Securities and Exchange Commission reporting requirements, the *Conceptual Framework for AICPA Independence Standards* [ET section 100.01] considers the following entities to be *public interest entities*: (1) employee benefit and health and welfare plans subject to Employee Retirement Income Security Act audit requirements; (2) governmental retirement plans; (3) entities or programs (including for-profit entities) subject to Single Audit Act OMB Circular A-133 audit requirements and entities or programs subject to similar program oversight; and (4) financial institutions, credit unions, and insurance companies. These entities are public interest entities because their audited financial statements are directly relied upon by significant numbers of stakeholders to make investment, credit, or similar decisions or indirectly relied upon through regulatory oversight (for example, in the case of pension plans, banks, and insurance companies) and, therefore, the potential extent of harm to the public from an audit failure involving one of these entities would generally be significant.

## The Communication Process

### Establishing a Mutual Understanding

**.48** The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. Clear communication of the auditor's responsibilities (paragraphs .26 through .28), an overview of the planned scope and timing of the audit (paragraphs .29 through .33), and the expected general content of communications helps establish the basis for effective two-way communication.

**.49** Matters that may also contribute to effective two-way communication include discussion of:

- The purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form in which communications will be made.
- The person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- The auditor's expectation that communication will be two way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; the suspicion or the detection of fraud; or concerns about the integrity or competence of senior management.
- The process for taking action and reporting back on matters communicated by the auditor.
- The process for taking action and reporting back on matters communicated by those charged with governance.

**.50** The communication process will vary with the circumstances, including the size and governance structure of the entity, how those charged with governance operate, and the auditor's view of the significance of matters to be communicated. Difficulty in establishing effective two-way communication may indicate that the communication between the auditor and those charged with governance is not adequate for the purpose of the audit (see paragraph .60).

### Forms of Communication

**.51** The auditor should communicate in writing with those charged with governance significant findings from the audit (see paragraphs .34 and .35) when, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. Other communications may be oral or in writing.

**.52** Effective communication may involve formal presentations and written reports as well as less formal communications, including discussions. Written communications may include an engagement letter that is provided to those charged with governance.

**.53** In addition to the significance of a particular matter, the form of communication (for example, whether to communicate orally or in writing, the

extent of detail or summarization in the communication, and whether to communicate in a formal or informal manner) may be affected by such factors as:

- Whether the matter has been satisfactorily resolved.
- Whether management has previously communicated the matter.
- The size, operating structure, control environment, and legal structure of the entity being audited.
- Legal or regulatory requirements that may require a written communication with those charged with governance.
- The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- The amount of ongoing contact and dialogue the auditor has with those charged with governance.
- Whether there have been significant changes in the membership of a governing body.
- In the case of a special purpose financial statement audit, whether the auditor also audits the entity's general purpose financial statements.

**.54** When a significant matter is discussed with an individual member of those charged with governance, for example, the chair of an audit committee, it may be appropriate for the auditor to summarize the matter in later communications so that all of those charged with governance have full and balanced information.

**.55** When the auditor communicates matters in accordance with this section in writing, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management and is not intended to be and should not be used by anyone other than these specified parties.

## Timing of Communications

**.56** The auditor should communicate with those charged with governance on a sufficiently timely basis to enable those charged with governance to take appropriate action.

**.57** The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, and the action expected to be taken by those charged with governance. The auditor may consider communicating:

- Planning matters early in the audit engagement and, for an initial engagement, as part of the terms of the engagement.
- Significant difficulties encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor to overcome the difficulties, or if the difficulties are likely to lead to a modified opinion.

**.58** Other factors that may be relevant to the timing of communications include:

- The size, operating structure, control environment, and legal structure of the entity being audited.
- Any legal obligation to communicate certain matters within a specified timeframe.

- The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- The time at which the auditor identifies certain matters, for example, timely communication of a material weakness to enable appropriate remedial action to be taken.
- Whether the auditor is auditing both general purpose and special purpose financial statements.

## Adequacy of the Communication Process

**.59** The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should take appropriate action to address the effectiveness of the communication process. (See paragraph .62.)

**.60** As discussed in paragraph .08, effective two-way communication assists both the auditor and those charged with governance. Further, section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, identifies participation by those charged with governance, including their interaction with internal audit, if any, and external auditors, as an element of the entity's control environment. Inadequate two-way communication may indicate an unsatisfactory control environment, which will influence the auditor's assessment of the risks of material misstatements.

**.61** The auditor need not design specific procedures to support the evaluation required by paragraph .59. Rather, that evaluation may be based on observations resulting from audit procedures performed for other purposes. Such observations may include:

- The appropriateness and timeliness of actions taken by those charged with governance in response to matters communicated by the auditor.
- The apparent openness of those charged with governance in their communications with the auditor.
- The willingness and capacity of those charged with governance to meet with the auditor without management present.
- The apparent ability of those charged with governance to fully comprehend matters communicated by the auditor, such as the extent to which those charged with governance probe issues and question recommendations made to them.
- Difficulty in establishing with those charged with governance a mutual understanding of the form, timing, and expected general content of communications.
- Where all or some of those charged with governance are involved in managing the entity, their apparent awareness of how matters discussed with the auditor affect their broader governance responsibilities, as well as their management responsibilities.

**.62** If, in the auditor's judgment, the two-way communication between the auditor and those charged with governance is not adequate, there is a risk the auditor may not have obtained all the audit evidence required to form an opinion on the financial statements. The auditor should consider the effect, if any, on the auditor's assessment of the risks of material misstatements.

.63 The auditor may discuss the situation with those charged with governance. If the situation cannot be resolved, the auditor may take such actions as:

- Modifying the auditor's opinion on the basis of a scope limitation.
- Obtaining legal advice about the consequences of different courses of action.
- Communicating with third parties (for example, a regulator), or a higher authority in the governance structure that is outside the entity, such as the owners of a business (for example, shareholders in a general meeting), or the responsible government agency for certain governmental entities.
- Withdrawing from the engagement.

## Documentation

.64 When matters required to be communicated by this section have been communicated orally, the auditor should document them.<sup>8</sup> When matters have been communicated in writing, the auditor should retain a copy of the communication. Documentation of oral communication may include a copy of minutes prepared by the entity if those minutes are an appropriate record of the communication.

## Effective Date

.65 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006.

---

<sup>8</sup> Section 339, *Audit Documentation*, requires the auditor to document discussions of significant findings or issues with management and others (including those charged with governance) on a timely basis, including responses. That section also requires that the audit documentation include documentation of the significant findings or issues discussed, and when and with whom the discussions took place.

.66

## Appendix A

### Requirements to Communicate With Those Charged With Governance in Other Statements on Auditing Standards

A1. Requirements for the auditor to communicate with those charged with governance are included in other Statements on Auditing Standards. This section does not change the requirements in:

- a. Paragraph .17 of section 317, *Illegal Acts by Clients*, to communicate with the audit committee or others with equivalent authority and responsibility illegal acts that come to the auditor's attention.
- b. Paragraph .22 of section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*, to communicate to management and the audit committee or others with equivalent authority and responsibility when the auditor becomes aware during an audit in accordance with generally accepted auditing standards that the entity is subject to an audit requirement that may not be encompassed in the terms of the engagement, and that an audit in accordance with generally accepted auditing standards may not satisfy the relevant legal, regulatory, or contractual requirements.
- c. Paragraph .22 of section 316, *Consideration of Fraud in a Financial Statement Audit*, to inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity.
- d. Paragraph .79 of section 316, *Consideration of Fraud in a Financial Statement Audit*, to communicate with those charged with governance fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with those charged with governance about misappropriations perpetrated by lower-level employees.
- e. Paragraph .20 of section 325, *Communicating Internal Control Related Matters Identified in an Audit*, to communicate in writing to management and those charged with governance control deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses.

## Appendix B

### Qualitative Aspects of Accounting Practices

The communication in accordance with paragraph .34a of this section, and discussed in paragraphs .37 and .38, may include such matters as the following:

#### *Accounting Policies*

- The appropriateness of the accounting policies to the particular circumstances of the entity, considering the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements. Where acceptable alternative accounting policies exist, the communication may include identification of the financial statement items that are affected by the choice of significant policies as well as information on accounting policies used by similar entities.
- The initial selection of, and changes in, significant accounting policies, including the application of new accounting pronouncements. The communication may include the effect of the timing and method of adoption of a change in accounting policy on the current and future earnings of the entity; and the timing of a change in accounting policies in relation to expected new accounting pronouncements.
- The effect of significant accounting policies in controversial or emerging areas (or those unique to an industry, particularly when there is a lack of authoritative guidance or consensus).
- The effect of the timing of transactions in relation to the period in which they are recorded.

#### *Accounting Estimates*

- For items for which estimates are significant, issues discussed in section 342, *Auditing Accounting Estimates*, and section 328, *Auditing Fair Value Measurements and Disclosures*, including, for example:
  - Management's identification of accounting estimates.
  - Management's process for making accounting estimates.
  - Risks of material misstatement.
  - Indicators of possible management bias.
  - Disclosure of estimation uncertainty in the financial statements.

#### *Financial Statement Disclosures*

- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures (for example, disclosures related to revenue recognition, going concern, subsequent events, and contingency issues).
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements.

#### *Related Matters*

- The potential effect on the financial statements of significant risks and exposures, and uncertainties, such as pending litigation, that are disclosed in the financial statements.

- The extent to which the financial statements are affected by unusual transactions including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements.
- The factors affecting asset and liability carrying values, including the entity's bases for determining useful lives assigned to tangible and intangible assets. The communication may explain how factors affecting carrying values were selected and how alternative selections would have affected the financial statements.
- The selective correction of misstatements, for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings.

## Appendix C

### Amendment to "An Entity's Ability to Continue as a Going Concern" of Section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

C1. This amendment to section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, adds a requirement that the auditor communicate with those charged with governance events or conditions that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

C2. Paragraph .17 of section 341 is inserted as follows, and subsequent paragraphs in section 341 are renumbered accordingly:

#### **Communication With Those Charged With Governance**

*.17 If, after considering identified conditions and events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate with those charged with governance:*

- a. *The nature of the events or conditions identified.*
- b. *The possible effect on the financial statements and the adequacy of related disclosures in the financial statements.*
- c. *The effects on the auditor's report.*

### Amendment to "Communications With Those Charged With Governance and Management" of Section 311, *Planning and Supervision*

C3. This amendment to section 311, *Planning and Supervision*, is to conform to the requirements of this section.

C4. Paragraph .25 of section 311 is amended as follows:

#### **Communications With Those Charged With Governance and Management**

*.25 Section 380, The Auditor's Communication With Those Charged With Governance, requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit. The auditor may discuss elements of planning with those charged with governance and the entity's management. These discussions may be a part of overall communications made to those charged with governance of the entity or may be made to improve the effectiveness and efficiency of the audit. Discussions with those charged with governance ordinarily include the overall audit strategy and timing of the audit, including any limitations thereon, or any additional requirements. Discussions with management often occur to facilitate the conduct and management of the audit engagement (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility.*

~~When discussions with those charged with governance or with the entity's management of matters included in the overall audit strategy or audit plan occur, the auditor should be careful to not compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management might compromise the effectiveness of the audit by making the audit procedures too predictable.~~

---

## AU Section 380A

### Communication With Audit Committees

Source: SAS No. 61; SAS No. 89; SAS No. 90.

See section 9380A for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

**.01** This section establishes a requirement for the auditor to determine that certain matters related to the conduct of an audit are communicated to those who have responsibility for oversight of the financial reporting process.<sup>1</sup> For purposes of this document, the recipient of the communications is referred to as the *audit committee*. The communications required by this section are applicable to (1) entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee) and (2) all Securities and Exchange Commission (SEC) engagements.<sup>2</sup>

**.02** This section requires the auditor to ensure that the audit committee receives additional information regarding the scope and results of the audit that may assist the audit committee in overseeing the financial reporting and

---

<sup>1</sup> Communication with the audit committee by the independent auditor on certain specified matters when they arise in the conduct of an audit is required by other standards, including—

- Section 316, *Consideration of Fraud in a Financial Statement Audit*.
- Section 317, *Illegal Acts by Clients*.
- Section 801, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance*.

Section 325, *Communicating Internal Control Related Matters Identified in an Audit*, requires the auditor to communicate significant deficiencies and material weaknesses in internal control, identified in the audit, to management and those charged with governance.

In addition, section 722, *Interim Financial Information*, requires that certain information be communicated to audit committees as a result of performing a review of interim financial information. [Footnote revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 100. Footnote revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

<sup>2</sup> For purposes of this section, an SEC engagement is defined as one that involves the audit of the financial statements of—

1. An issuer making an initial filing, including amendments, under the Securities Act of 1933 and the Securities Exchange Act of 1934.
2. A registrant that files periodic reports with the SEC under the Investment Company Act of 1940 or the Securities Exchange Act of 1934 (except a broker or dealer registered only because of section 15(a) of the 1934 Act).
3. A bank or other lending institution that files periodic reports with the Comptroller of the Currency, the Federal Reserve System, the Federal Deposit Insurance Corporation, or the Federal Home Loan Bank Board because the powers, functions, and duties of the SEC to enforce its periodic reporting provisions are vested, pursuant to section 12(i) of the 1934 Act, in those agencies. (Section 12(g) of the Securities Exchange Act of 1934 provides an exemption from periodic reporting to the SEC to [1] entities with less than \$5 million in total assets on the last day of each of the entity's three most recent fiscal years and fewer than 500 shareholders and [2] entities with fewer than 300 shareholders. Accordingly, such entities are not encompassed within the scope of this definition.)
4. A company whose financial statements appear in the annual report or proxy statement of any investment fund because it is a sponsor or manager of such a fund, but which is not itself a registrant required to file periodic reports under the 1940 Act or section 13 or 15(d) of the Securities Exchange Act of 1934.

disclosure process for which management is responsible. This section does not require communications with management; however, it does not *preclude* communications with management or other individuals within the entity who may, in the auditor's judgment, benefit from the communications.

**.03** The communications may be oral or written. If information is communicated orally, the auditor should document the communication by appropriate memoranda or notations in the working papers.<sup>3</sup> When the auditor communicates in writing, the report should indicate that it is intended solely for the information and use of the audit committee or the board of directors and, if appropriate, management, and is not intended to be and should not be used by anyone other than these specified parties.

**.04** The communications specified by this section are incidental to the audit. Accordingly, they are not required to occur before the issuance of the auditor's report on the entity's financial statements so long as the communications occur on a timely basis. There may be occasions, however, when discussion of certain of the matters (specified by paragraphs .06 through .14 below) with the audit committee prior to the issuance of the report may, in the auditor's judgment, be desirable.

**.05** It may be appropriate for management to communicate to the audit committee certain of the matters specified in this section. In such circumstances, the auditor should be satisfied that such communications have, in fact, occurred. Generally, it is not necessary to repeat the communication of recurring matters each year. Periodically, however, the auditor should consider whether, because of changes in the audit committee or simply because of the passage of time, it is appropriate and timely to report such matters. Finally, this section is not intended to restrict the communication of other matters.

## Matters to Be Communicated

### The Auditor's Responsibility Under Generally Accepted Auditing Standards

**.06** An audit performed in accordance with generally accepted auditing standards may address many matters of interest to an audit committee. For example, an audit committee is usually interested in internal control and in whether the financial statements are free of material misstatement. In order for the audit committee to understand the nature of the assurance provided by an audit, the auditor should communicate the level of responsibility assumed for these matters under generally accepted auditing standards. It is also important for the audit committee to understand that an audit conducted in accordance with generally accepted auditing standards is designed to obtain reasonable, rather than absolute, assurance about the financial statements.

### Significant Accounting Policies

**.07** The auditor should determine that the audit committee is informed about the initial selection of and changes in significant accounting policies

---

<sup>3</sup> The auditor may wish to review the minutes, if any, prepared by the audit committee for consistency with the auditor's understanding of the communications. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2000, by Statement on Auditing Standards No. 90.]

or their application. The auditor should also determine that the audit committee is informed about the methods used to account for significant unusual transactions and the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus. For example, significant accounting issues may exist in areas such as revenue recognition, off-balance-sheet financing, and accounting for equity investments.

## Management Judgments and Accounting Estimates

**.08** Accounting estimates are an integral part of the financial statements prepared by management and are based upon management's current judgments. Those judgments are normally based on knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. The auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.

## Audit Adjustments

**.09** The auditor should inform the audit committee about adjustments arising from the audit that could, in his judgment, either individually or in the aggregate, have a significant effect on the entity's financial reporting process. For purposes of this section, an audit adjustment, whether or not recorded by the entity, is a proposed correction of the financial statements that, in the auditor's judgment, may not have been detected except through the auditing procedures performed. Matters underlying adjustments proposed by the auditor but not recorded by the entity could potentially cause future financial statements to be materially misstated, even though the auditor has concluded that the adjustments are not material to the current financial statements. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

**.10** The auditor also should inform the audit committee<sup>4</sup> about uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>5</sup> [Paragraph added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

---

<sup>4</sup> The presentation to the audit committee should be similar to the summary of uncorrected misstatements included in or attached to the management representation letter. See footnote 6 of section 333, *Management Representations*. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

<sup>5</sup> The communication to management and the audit committee of immaterial misstatements aggregated by the auditor does not constitute a communication pursuant to section 317.17, Section 10A of the Securities Exchange Act of 1934, or section 316.79–82. The auditor may have additional communication responsibilities pursuant to section 317, Section 10A of the Securities Exchange Act of 1934, or section 316. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. Footnote revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99.]

## Auditor's Judgments About the Quality of the Entity's Accounting Principles

.11 In connection with each SEC engagement (see paragraph .01), the auditor should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the entity's accounting principles as applied in its financial reporting. Since the primary responsibility for establishing an entity's accounting principles rests with management, the discussion generally would include management as an active participant. The discussion should be open and frank and generally should include such matters as the consistency of the entity's accounting policies and their application, and the clarity and completeness of the entity's financial statements, which include related disclosures. The discussion should also include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.<sup>6</sup> Examples of items that may have such an impact are the following:

- Selection of new or changes to accounting policies
- Estimates, judgments, and uncertainties
- Unusual transactions
- Accounting policies relating to significant financial statement items, including the timing of transactions and the period in which they are recorded

Objective criteria have not been developed to aid in the consistent evaluation of the quality of an entity's accounting principles as applied in its financial statements. The discussion should be tailored to the entity's specific circumstances, including accounting applications and practices not explicitly addressed in the accounting literature, for example, those that may be unique to an industry. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 2000, by Statement on Auditing Standards No. 90.]

## Other Information in Documents Containing Audited Financial Statements

.12 The audit committee often considers information prepared by management that accompanies the entity's financial statements. An example of information of this nature would be the "Management's Discussion and Analysis of Financial Condition and Results of Operations" that certain entities that file reports with the SEC are required to present in annual reports to shareholders. Section 550, *Other Information in Documents Containing Audited Financial Statements*, establishes the auditor's responsibility for such information.<sup>7</sup> The auditor should discuss with the audit committee his responsibility for other

---

<sup>6</sup> These characteristics of accounting information are discussed in the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*. FASB Concepts Statement No. 2 notes that consistently understating results or overly optimistic estimates of realization are inconsistent with these characteristics. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2000, by Statement on Auditing Standards No. 90.]

<sup>7</sup> Guidance on the auditor's consideration of other information is also provided by section 558, *Required Supplementary Information*; section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*; and section 711, *Filings Under Federal Securities Statutes*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 90, December 1999.]

information in documents containing audited financial statements, any procedures performed, and the results. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 90, December 1999.]

## Disagreements With Management
