A Firm's System of Quality Control

(Supersedes Statement on Quality Control Standards [SQCS] No. 2, System of Quality Control For a CPA Firm's Accounting and Auditing Practice, as amended; SQCS No. 3, Monitoring a CPA Firm's Accounting and Auditing Practice; SQCS No. 4, Amendment to SQCS No. 2; SQCS No. 5, The Personnel Management Element of a Firm's System of Quality Control—Competencies Required by a Practitioner-in-Charge of an Attest Engagement; and SQCS No. 6, Amendment to SQCS No. 2 [AICPA, Professional Standards, vol. 2].)

Introduction

1. The purpose of this Statement on Quality Control Standards (SQCS) is to establish standards and provide guidance for a CPA firm's responsibilities for its system of quality control for its accounting and auditing practice. This statement describes elements of quality control and other matters essential to the effective design, implementation, and maintenance of the system. This statement is to be read in conjunction with the AICPA Code of Professional Conduct.

2. This statement also sets forth the meaning of certain terms used in SQCSs issued by the Auditing Standards Board in describing the professional requirements imposed on firms and engagement partners.

System of Quality Control

3. The firm must establish a system of quality control designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the firm or engagement partners issue reports that are appropriate in the circumstances. A system of quality control consists of policies designed to achieve these objectives and the procedures necessary to implement and monitor compliance with those policies.

4. The nature of the policies and procedures developed by individual firms to comply with this statement will depend on various factors such as the size and operating characteristics of the firm. The system of quality control should be designed to provide the firm with

reasonable assurance that the segments of the firm's engagements performed by its foreign member firms or offices or by its domestic or foreign affiliates, if any, are performed in accordance with professional standards in the United States when such standards are applicable.

Definitions

5. In this statement, the following terms have the meanings given below:

- a. *Accounting and auditing practice.* A practice that performs engagements covered by this statement, which are audit, attestation, compilation, review and any other services for which standards have been established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct. Although standards for other engagements may be established by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an accounting and auditing practice.
- b. *Engagement documentation.* The record of work performed, results obtained, and conclusions the practitioner reached, also known as *working papers* or *workpapers*.
- c. *Engagement partner.* An individual responsible for supervising engagements covered by this statement and signing or authorizing an individual to sign the report on such engagements, and who, where required, has the appropriate authority from a professional, legal or regulatory body. Firms may use different titles to refer to individuals with this authority.
- d. *Engagement quality control review.* A process designed to provide an objective evaluation, by an individual or individuals who are not members of the engagement team, of the significant judgments the engagement team made and the conclusions they reached in formulating the report.
- e. *Engagement quality control reviewer.* A partner, other person in the firm, qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to perform the engagement quality control review.

- f. *Engagement team.* All personnel performing the engagement, excluding those who perform the engagement quality control review. The engagement team (i) includes all employees and contractors retained by the firm who perform engagement procedures, irrespective of their functional classification (for example, audit, tax, or management consulting services) and (ii) excludes specialists as discussed in AU section 336, *Using the Work of a Specialist*, and individuals who perform only routine clerical functions, such as word processing and photocopying.
- g. *Firm.* A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the American Institute of Certified Public Accountants that is engaged in the practice of public accounting.
- h. *Inspection.* A retrospective evaluation of the adequacy of the firm's quality control policies and procedures, its personnel's understanding of those policies and procedures and the extent of the firm's compliance with them. Inspection is an element of monitoring.
- i. *Monitoring.* A process comprising an ongoing consideration and evaluation of the firm's system of quality control, the objective of which is to enable the firm to obtain reasonable assurance that its system of quality control is designed appropriately and operating effectively.
- j. *Partner.* An individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, partner may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.
- k. *Personnel.* All individuals who perform professional services for which the firm is responsible, whether or not they are CPAs.
- l. *Professional standards.* Standards established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET secs. 201–202) or other standard setting bodies that set auditing and attest standards applicable to the engagement being performed.

- m. *Qualified external person.* An individual outside the firm with the capabilities and competence to act as an engagement partner.
- n. *Reasonable assurance.* In the context of this standard, a high, but not absolute, level of assurance.
- o. *Relevant ethical requirements.* Ethical requirements to which the firm and its personnel are subject, which consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies, which may be more restrictive.
- p. *Staff.* Personnel, other than partners and engagement partners, including any specialists who are employees of the firm.

Professional Requirements

6. SQCSs contain professional requirements together with related guidance in the form of explanatory material. Firms have a responsibility to consider the entire text of an SQCS with regard to their system of quality control and in understanding and applying the professional requirements of the relevant SQCSs.

7. Not every paragraph of an SQCS carries a professional requirement that the firm is expected to fulfill. Rather, the professional requirements are communicated by the language and the meaning of the words used in the SQCSs.

8. SQCSs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on firms, as follows:

- *Unconditional requirements.* The firm is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SQCSs use the words *must* or *is required* to indicate an unconditional requirement.
- *Presumptively mandatory requirements.* The firm is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the firm may depart from a presumptively mandatory requirement provided the practitioner documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of

the presumptively mandatory requirement. SQCSs use the word *should* to indicate a presumptively mandatory requirement.

If an SQCS provides that a procedure or action is one that the firm “should consider,” the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of an SQCS are to be understood and applied in the context of the explanatory material that provides guidance for their application.

Explanatory Material

9. Explanatory material is defined as the text within an SQCS (excluding any related interpretations¹) that may:

- Provide further explanation and guidance on the professional requirements; or
- Identify and describe other procedures or actions relating to the activities of the firm.

10. Explanatory material that provides further explanation and guidance on the professional requirements is intended to be descriptive rather than imperative. That is, it explains the objective of the professional requirements (where not otherwise self-evident); it explains why the firm might consider or employ particular procedures, depending on the circumstances; and it provides additional information for the firm to consider in exercising professional judgment with regard to its system of quality control.

11. Explanatory material that identifies and describes other procedures or actions relating to the activities of the firm is not intended to impose a professional requirement for the firm to perform the suggested procedures or actions. Rather, these procedures or actions require the firm's attention and understanding; how and whether the firm carries out such procedures or actions with regard to its system of quality control depends on the exercise of professional judgment in the circumstances consistent with the objective of the standard. The words *may*, *might*, and *could* are used to describe these actions and procedures.

¹ Interpretive publications differ from explanatory material. Interpretive publications, for example, interpretations of the SQCSs, reside outside of the standards section of an SQCS and are recommendations on the application of the SQCS in specific circumstances. In contrast, explanatory material is always contained within the standards sections of the SQCS and is meant to be more descriptive in nature.

Documentation and Communication of Quality Control Policies and Procedures

12. The firm should document its quality control policies and procedures. The size, structure, and nature of the practice of the firm are important considerations in determining the extent of the documentation of established quality control policies and procedures. For example, documentation of established quality control policies and procedures would generally be expected to be more extensive in a large firm than in a small firm and in a multi-office firm than in a single-office firm.

13. The firm should communicate its quality control policies and procedures to its personnel. Although communication is enhanced if it is in writing, the communication of quality control policies and procedures is not required to be in writing. Effective communication of the firm's quality control policies and procedures:

- Describes the quality control policies and procedures and the objectives they are designed to achieve;
- Includes the message that each individual has a personal responsibility for quality and is expected to be familiar with and to comply with these policies and procedures; and
- Stresses the importance of obtaining feedback on its system of quality control from its personnel and encourages its personnel to communicate their views or concerns on quality control matters.

Elements of a System of Quality Control

14. The firm's system of quality control should include policies and procedures addressing each of the following elements:

- a. Leadership responsibilities for quality within the firm (the "tone at the top")
- b. Relevant ethical requirements
- c. Acceptance and continuance of client relationships and specific engagements
- d. Human resources
- e. Engagement performance
- f. Monitoring

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

15. The firm should promote an internal culture based on the recognition that quality is essential in performing engagements and should establish policies and procedures to support that culture. Such policies and procedures should require the firm's leadership (managing partner or board of managing partners, chief executive officer, or equivalent) to assume ultimate responsibility for the firm's system of quality control.

16. The firm's leadership and the examples it sets significantly influence the internal culture of the firm. The promotion of a quality-oriented internal culture depends on clear, consistent, and frequent actions and messages from all levels of the firm's management that emphasize the firm's quality control policies and procedures, and the requirement to:

- a. Perform work that complies with professional standards and regulatory and legal requirements.
- b. Issue reports that are appropriate in the circumstances.

Such actions and messages encourage a culture that recognizes and rewards quality work. These actions and messages may be communicated by training seminars, meetings, formal or informal dialogue, mission statements, newsletters, or briefing memoranda. They may be incorporated in the firm's internal documentation and training materials, and in partner and staff appraisal procedures such that they will support and reinforce the firm's view on the importance of quality and how, practically, it is to be achieved.

17. Of particular importance in promoting an internal culture based on quality is the need for the firm's leadership to recognize that the firm's business strategy is subject to the overarching requirement for the firm to achieve the objectives of the system of quality control in all the engagements that the firm performs. Accordingly, the firm should establish policies to:

- a. Assign management responsibilities so that commercial considerations do not override the quality of work performed;
- b. Address performance evaluation, compensation, and advancement (including incentive systems) with regard to its personnel, to demonstrate the firm's overarching commitment to the objectives of the system of quality control; and

c. Devote sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.

18. Any person or persons assigned operational responsibility for the firm's quality control system by the firm's leadership should have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.

Relevant Ethical Requirements

19. The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements.

20. The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care
- Scope and nature of services

21. The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in Rule 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and safeguards to mitigate such threats involving matters that are not explicitly addressed in the Code of Professional Conduct, are set forth in the AICPA's Conceptual Framework for AICPA Independence Standards. Such policies and procedures should enable the firm to:

- a. Communicate its independence requirements to its personnel and, where applicable, others subject to them.
- b. Identify and evaluate circumstances and relationships that create threats to independence, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards, or, if effective safeguards cannot be applied, withdrawing from the engagement.

22. Such policies and procedures should require:

- a. The engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.
- b. Personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.
- c. The accumulation and communication of relevant information to appropriate personnel so that:
 - (i) The firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;
 - (ii) The firm can maintain and update information relating to independence; and
 - (iii) The firm and the engagement partner can take appropriate action regarding identified threats to independence.

23. The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements, and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for:

- a. Personnel to promptly notify the firm of independence breaches of which they become aware.
- b. The firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to:
 - (i) The engagement partner who, with the firm, has the responsibility to address the breach; and

- (ii) Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.
- c. Confirmation to the firm by the engagement partner and the other individuals referred to in subparagraph b.(ii) that the required corrective actions have been taken.

24. At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in Rule 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct (AICPA, *Professional Standards*, vol. 2, ET sec. 101) and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

25. The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

26. For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm's policies and procedures should address these requirements.

Acceptance and Continuance of Client Relationships and Specific Engagements

27. The firm should establish policies and procedures for the acceptance and continuance of client relationships and specific engagements, designed to provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where the firm:

- a. Has considered the integrity of the client, including the identity and business reputation of the client's principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
- b. Is competent to perform the engagement and has the capabilities and resources to do so; and

c. Can comply with legal and ethical requirements.

The firm should obtain such information as it considers necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client.

28. To minimize the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed, policies and procedures should provide for obtaining an understanding with the client regarding those services. Professional standards may provide guidance in deciding whether the understanding should be oral or written.

29. When issues have been identified, and the firm has decided to accept or continue the client relationship or a specific engagement, the firm should document how the issues were resolved.

30. Factors to consider regarding the integrity of a client include:

- The nature of the client's operations, including its business practices.
- Information concerning the attitude of the client's principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting.

The extent of knowledge a firm will have regarding the integrity of a client will generally grow within the context of an ongoing relationship with that client.

31. Matters to consider in accepting or continuing the client engagement include whether:

- Firm personnel have knowledge of relevant industries or subject matters or the ability to effectively gain the necessary knowledge;
- Firm personnel have experience with relevant regulatory or reporting requirements, or the ability to effectively gain the necessary competencies;
- The firm has sufficient personnel with the necessary capabilities and competence;
- Specialists are available, if needed;

- Individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, where applicable; and
- The firm is able to complete the engagement within the reporting deadline.

32. If a potential conflict of interest is identified in accepting an engagement from a new or an existing client, the firm should determine whether it is appropriate to accept the engagement. Where the engagement is accepted, the firm should consider any ethical requirements that exist under AICPA Interpretation No. 102-2, “Conflicts of Interest,” under Rule 102, *Integrity and Objectivity* (AICPA, *Professional Standards*, vol. 2, ET sec. 102), such as disclosure of the relationship to the client and other appropriate parties.

33. Deciding whether to continue a client relationship includes consideration of significant issues that have arisen during the current or previous engagements, and their implications for continuing the relationship.

34. If the firm obtains information that would have caused it to decline an engagement if that information had been available earlier, policies and procedures on the continuance of the engagement and the client relationship should include consideration of the professional and legal responsibilities that apply to the circumstances, and the possibility of withdrawing from the engagement or from both the engagement and the client relationship.

35. Policies and procedures on withdrawal from an engagement or from both the engagement and the client relationship should include documenting significant issues, consultations, conclusions, and the basis for the conclusions. Policies and procedures may include:

- Discussing with the appropriate level of the client’s management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances.
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place, or for the firm to report the withdrawal from the engagement or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities.

- If the firm determines that it is appropriate to withdraw, discussing with the appropriate level of the client's management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship.

36. In certain situations, the auditor may be appointed by statutory procedures or required by law or regulation to perform the engagement. Accordingly, certain of the considerations regarding the acceptance and continuance of client relationships and specific engagements, as set out in paragraphs 27–35, may not be relevant. Nonetheless, establishing policies and procedures as described may provide valuable information to public sector auditors in performing risk assessments and in carrying out reporting responsibilities.

Human Resources

37. The firm should establish policies and procedures designed to provide it with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary to

- a. Perform its engagements in accordance with professional standards and regulatory and legal requirements, and
- b. Enable the firm to issue reports that are appropriate in the circumstances.

38. Such policies and procedures should address the following:

- Recruitment and hiring, if applicable;
- Determining capabilities and competencies;
- Assigning personnel to engagements, if applicable;
- Professional development; and
- Performance evaluation, compensation, and advancement.

Recruitment and Hiring

39. Effective recruitment processes and procedures help the firm select individuals of integrity, who have the capacity to develop the capabilities and competence necessary to perform the firm's work, and possess the appropriate characteristics to enable them to perform competently. Examples of such characteristics may include meeting minimum academic requirements established by the firm, maturity, integrity, and leadership traits.

Determining Capabilities and Competencies

40. Capabilities and competencies are the knowledge, skills, and abilities that qualify personnel to perform an engagement covered by this statement. Capabilities and competencies are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of this section, a measure of overall competency is qualitative rather than quantitative.

41. Capabilities and competence are developed through a variety of methods; for example:

- Professional education
- Continuing professional development, including training
- Work experience
- Mentoring by more experienced staff; for example, other members of the engagement team

Competencies of Engagement Partner

42. A firm's quality control policies and procedures should provide reasonable assurance that an engagement partner possesses the competencies necessary to fulfill his or her engagement responsibilities.

43. In most cases, an engagement partner will have gained the necessary competencies through relevant and appropriate experience in engagements covered by this statement. In some cases, however, an engagement partner may have obtained the necessary competencies through disciplines other than the practice of public accounting, such as in relevant industry, governmental, and academic positions. When necessary, the experience of the engagement partner may be supplemented by continuing professional education (CPE) and consultation. The following are examples.

- An engagement partner whose recent experience has consisted primarily in providing tax services may acquire the competencies necessary in the circumstances to perform a compilation or review engagement by obtaining relevant CPE.
- An engagement partner whose experience consists of performing review and compilation engagements may be able to obtain the

necessary competencies to perform an audit by becoming familiar with the industry in which the client operates, obtaining CPE relating to auditing, using consulting sources during the course of performing the audit engagement, or any combination of these.

- A person in academia might obtain the necessary competencies to perform engagements covered by this statement by (a) obtaining specialized knowledge through teaching or authorship of research projects or similar papers and (b) performing a rigorous self-study program, or by engaging a consultant to assist on such engagements.

44. The characteristics of a particular client, industry, and the kind of service being provided determine the nature and extent of competencies established by a firm that are expected of the engagement partner for an engagement. For example:

- The competencies expected of an engagement partner for an engagement to compile financial statements would be different than those expected of a practitioner engaged to review or audit financial statements.
- Supervising engagements and signing or authorizing others to sign reports for clients in certain industries or engagements, such as financial services, governmental, or employee benefit plan engagements, would require different competencies than those expected in performing attest services for clients in other industries.
- The engagement partner for an attestation engagement to examine management's assertion about the effectiveness of an entity's internal control over financial reporting would be expected to have technical proficiency in understanding and evaluating the effectiveness of controls, while an engagement partner for an attestation engagement to examine investment performance statistics would be expected to have different competencies, including an understanding of the subject matter of the underlying assertion.

45. In practice, the competency requirements necessary for the engagement partner are broad and varied in both their nature and number. Required competencies include the following, as well as other competencies as necessary in the circumstances.

- *Understanding of the role of a system of quality control and the Code of Professional Conduct.* An understanding of the role of a firm's system of quality control and the AICPA's Code of Professional Conduct, both of which play critical roles in assuring the integrity of the various kinds of reports.
- *Understanding of the service to be performed.* An understanding of the performance, supervision, and reporting aspects of the engagement. This understanding is usually gained through actual participation under appropriate supervision in that type of engagement.
- *Technical proficiency.* An understanding of the applicable professional standards including those standards directly related to the industry in which a client operates and the kinds of transactions in which a client engages.
- *Familiarity with the industry.* An understanding of the industry in which a client operates, to the extent required by professional standards applicable to the kind of service being performed. In performing an audit or review of financial statements, this understanding would include an industry's organization and operating characteristics sufficient to identify areas of high or unusual risk associated with an engagement and to evaluate the reasonableness of industry-specific estimates.
- *Professional judgment.* Skills that indicate sound professional judgment. In performing engagements covered by this statement, such skills would typically include the ability to exercise professional skepticism and identify areas requiring special consideration including, for example, the evaluation of the reasonableness of estimates and representations made by management and the determination of the kind of report appropriate in the circumstances.
- *Understanding the organization's information technology systems.* A sufficient understanding of how the organization is dependent on or enabled by information technologies and the manner in which the information systems are used to record and maintain financial information, to determine when involvement of an IT professional is necessary for an audit engagement.

Interrelationship of Competencies and Other Elements of a Firm's System of Quality Control

46. The competencies listed above are interrelated and gaining one particular competency may be related to achieving another. For example, familiarity with the client's industry interrelates with a practitioner's ability to make professional judgments relating to the client.

47. In establishing policies and procedures related to the nature of competencies needed by the engagement partner for an engagement, a firm may consider the requirements of policies and procedures established for other elements of quality control. For example, a firm might consider its requirements related to engagement performance in determining the nature of competency requirements that describe the degree of technical proficiency necessary in a given set of circumstances.

The Relationship of the Competency Requirement of the Uniform Accountancy Act to the Human Resource Element of Quality Control

48. CPAs are required to follow the accountancy laws of the individual licensing jurisdictions in the United States that govern the practice of public accounting. These jurisdictions may have adopted, in whole or in part, the Uniform Accountancy Act (UAA), which is a model legislative statute and related administrative rules designed by the AICPA and the National Association of State Boards of Accountancy (NASBA) to provide a uniform approach to the regulation of the accounting profession. The UAA provides that "any individual licensee who is responsible for supervising attest or compilation services and signs or authorizes someone to sign the accountant's report on the financial statements on behalf of the firm shall meet the competency requirements set out in the professional standards for such services." A firm's compliance with this statement is intended to enable a practitioner who performs the services described in the preceding sentence on the firm's behalf to meet the competency requirement referred to in the UAA.

Assignment of Engagement Teams

49. The firm should assign responsibility for each engagement to an engagement partner and should establish policies and procedures requiring that

- a. The identity and role of the engagement partner are communicated to management and those charged with governance;
- b. The engagement partner has the appropriate capabilities, competence, authority, and time to perform the role; and
- c. The responsibilities of the engagement partner are clearly defined and communicated to that individual.

50. Policies and procedures may include systems to monitor the workload and availability of engagement partners so as to enable these individuals to have sufficient time to adequately discharge their responsibilities.

51. The firm should establish policies and procedures to assign appropriate staff with the necessary capabilities, competence, and time to

- a. Perform engagements in accordance with professional standards and regulatory and legal requirements; and
- b. Enable the firm or engagement partners to issue reports that are appropriate in the circumstances.

52. When assigning engagement teams, and in determining the level of supervision required, the firm might consider factors such as the engagement team's

- Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation.
- Understanding of professional standards and regulatory and legal requirements.
- Technical knowledge and expertise, including knowledge of relevant information technology.
- Knowledge of relevant industries in which the client operates.
- Ability to apply professional judgment.
- Understanding of the firm's quality control policies and procedures.

Generally, as the ability and experience levels of assigned staff increase, the need for direct supervision decreases.

53. Appropriate teamwork and training assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

Professional Development

54. The continuing competence of the firm's personnel depends to a significant extent on an appropriate level of continuing professional development so that personnel maintain their knowledge and capabilities. Effective policies and procedures emphasize the need for all levels of firm personnel to participate in general and industry-specific continuing professional education and other professional development activities that enable them to fulfill responsibilities assigned, and to satisfy applicable continuing professional education requirements of the AICPA and regulatory agencies. Effective policies and procedures also place importance on passing the Uniform CPA Examination. The firm may provide the necessary training resources and assistance to enable personnel to develop and maintain the required capabilities and competence. The firm may use an external source that is qualified for that purpose if internal technical and training resources are unavailable, or for any other reason.

Performance Evaluation, Compensation, and Advancement

55. The firm's policies and procedures should provide that personnel selected for advancement have the qualifications necessary for fulfillment of the responsibilities they will be called on to assume.

56. Effective performance evaluation, compensation, and advancement procedures give due recognition and reward to the development and maintenance of competence and commitment to ethical principles. Steps a firm may take in developing and maintaining competence and commitment to ethical principles include:

- Making personnel aware of the firm's expectations regarding performance and ethical principles;
- Providing personnel with evaluation of, and counseling on, performance, progress, and career development; and
- Helping personnel understand that their compensation and advancement to positions of greater responsibility depend upon, among other things, performance quality and adherence to ethical principles, and that failure to comply with the firm's policies and procedures may result in disciplinary action.

The size and circumstances of the firm are important considerations in determining the structure of the firm's performance evaluation process. Smaller firms, in particular, may employ less formal methods of evaluating the performance of their personnel.

Engagement Performance

57. The firm should establish policies and procedures designed to provide it with reasonable assurance that engagements are consistently performed in accordance with professional standards and regulatory and legal requirements, and that the firm or the engagement partner issues reports that are appropriate in the circumstances. Required policies and procedures should address

- a. Engagement performance,
- b. Supervision responsibilities, and
- c. Review responsibilities.

58. Effective policies and procedures facilitate consistency in the quality of engagement performance. This may be accomplished through written or electronic manuals, software tools or other forms of standardized documentation, and industry- or subject-matter-specific guidance materials. The firm might address, for example:

- How engagement teams are briefed on the engagement to obtain an understanding of the objectives of their work,
- Processes for complying with applicable engagement standards,
- Processes of engagement supervision, staff training, and mentoring,
- Methods of reviewing the work performed, the significant judgments made, and the type of report being issued,
- Appropriate documentation of the work performed and of the timing and extent of the review,
- Appropriate communication of the results of each engagement, and
- Processes to keep all policies and procedures current.

59. Policies and procedures for engagement supervision might include

- Tracking the progress of the engagement;

- Considering the capabilities and competence of individual members of the engagement team, whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the engagement;
- Addressing significant issues arising during the engagement, considering their significance, and appropriately modifying the planned approach; and
- Identifying matters for consultation or consideration by more-experienced engagement team members during the engagement.

60. Review responsibility policies and procedures should be determined on the basis that qualified engagement team members, which may include the engagement partner, review work performed by other team members on a timely basis.

61. A review may include consideration of whether, for example:

- The work has been performed in accordance with professional standards and regulatory and legal requirements;
- Significant findings and issues have been raised for further consideration;
- Appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- The nature, timing, and extent of work performed is appropriate and without need for revision;
- The work performed supports the conclusions reached and is appropriately documented;
- The evidence obtained is sufficient and appropriate to support the report; and
- The objectives of the engagement procedures have been achieved.

62. The firm should establish policies and procedures for engagement teams to complete the assembly of final engagement files on a timely basis, as appropriate for the nature of the engagement, after the engagement reports have been released. Professional standards, laws, or regulations may prescribe the time limits by which the assembly of final engagement files for specific types of engagements is to be completed.

Confidentiality, Safe Custody, Integrity, Accessibility, and Retrievability of Engagement Documentation

63. The firm should establish policies and procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.

64. Relevant ethical requirements establish an obligation for the firm's personnel to observe at all times the confidentiality of information contained in engagement documentation, unless specific client authority has been given to disclose information or there is a legal or professional duty to do so. Specific laws or regulations may impose additional obligations on the firm's personnel to maintain client confidentiality, particularly where data of a personal nature are concerned.

65. Whether engagement documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the firm's knowledge, or could be permanently lost or damaged. Appropriate and reasonable controls for engagement documentation may include those that

- Clearly determine when and by whom engagement documentation was prepared or reviewed;
- Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means;
- Prevent unauthorized changes to the engagement documentation; and
- Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

66. Controls that the firm may design and implement to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation may include, for example:

- The use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users;

- Appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement;
- Procedures for properly distributing engagement documentation to the team members at the start of the engagement, processing it during the engagement, and collating it at the end of the engagement; and
- Procedures for restricting access to and enabling proper distribution and confidential storage of hardcopy engagement documentation.

67. For practical reasons, original paper documentation may be electronically scanned or otherwise copied to another media for inclusion in engagement files. In that case, the firm should establish procedures designed to maintain the integrity, accessibility, and retrievability of the documentation.

68. These procedures may include, for example:

- Generating scanned copies that reflect the entire content of the original paper documentation, including manual signatures, cross-references and annotations;
- Integrating the scanned copies into the engagement files, including indexing and signing off on the copies as necessary; and
- Enabling the scanned copies to be retrieved and printed as necessary.

There may be legal, regulatory, or other reasons to retain original paper documentation.

Retention of Engagement Documentation

69. The firm should establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations.

70. In determining the needs of the firm for retention of engagement documentation and the period of such retention, the firm may consider the nature of the engagement and the firm's circumstances; for example, whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements. The retention period may also depend on other factors, such as whether professional standards, laws, or regulations

prescribe specific retention periods for certain types of engagements, or whether there are generally accepted retention periods in the absence of specific legal or regulatory requirements.

71. Procedures that the firm may adopt for retention of engagement documentation include those that

- Enable the retrieval of and access to the engagement documentation during the retention period, particularly in the case of electronic documentation, as the underlying technology may be upgraded or changed over time.
- Provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
- Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

Consultation

72. The firm should establish policies and procedures designed to provide it with reasonable assurance that

- a. Consultation takes place when appropriate (for example, when dealing with complex, unusual, unfamiliar, difficult, or contentious issues);
- b. Sufficient and appropriate resources are available to enable appropriate consultation to take place;
- c. All the relevant facts known to the engagement team are provided to those consulted;
- d. The nature and scope of such consultations are documented, and are understood by both the individual seeking consultation and the individual consulted; and
- e. The conclusions resulting from such consultations are documented and implemented.

73. Consultation includes discussion, at the appropriate professional level, with individuals within or outside the firm who have relevant specialized expertise.

74. Consultation uses appropriate research resources as well as the collective experience and technical expertise of the firm. Consultation helps to promote quality and improves the application

of professional judgment. Appropriate recognition of consultation in the firm's policies and procedures helps to promote a culture in which consultation is recognized as a strength and encourages personnel to consult on complex, unusual, unfamiliar, difficult, or contentious issues.

75. The firm's consultation procedures should provide for consultation with those having appropriate knowledge, seniority, and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical, and other matters, and for appropriate documentation and implementation of conclusions resulting from consultations.

76. A firm needing to consult externally may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control services. Before using such services, the firm should evaluate whether the external provider is qualified for that purpose.

77. Documentation of consultations with other professionals that involve complex, unusual, unfamiliar, difficult, or contentious matters that is sufficiently complete and detailed contributes to an understanding of

- The issue on which consultation was sought; and
- The results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

Differences of Opinion

78. The firm should establish policies and procedures for dealing with and resolving differences of opinion within the engagement team, with those consulted, and, where applicable, between the engagement partner and the engagement quality control reviewer (including a qualified external person). Such policies and procedures should require that

- a. Conclusions reached be documented and implemented; and
- b. The report not be released until the matter is resolved.

79. Effective procedures encourage identification of differences of opinion at an early stage, provide clear guidelines about the successive steps to be taken thereafter, and require documentation regarding the resolution of the differences and the implementation

of the conclusions reached. Procedures to resolve such differences may include consulting with another practitioner or firm, or a professional or regulatory body.

Engagement Quality Control Review

80. The firm should establish criteria against which all engagements covered by this statement are to be evaluated to determine whether an engagement quality control review should be performed.

81. The firm's policies and procedures should require that if an engagement meets the criteria established, an engagement quality control review be performed for that engagement, and that the review be completed before the report is released.

82. The firm's policies and procedures should require the engagement partner to remain responsible for the engagement and its performance, notwithstanding involvement of the engagement quality control reviewer.

83. The structure and nature of the firm's practice are important considerations in establishing criteria to consider when determining which engagements are to be subject to an engagement quality control review. Such criteria may include

- The nature of the engagement, including the extent to which it involves a matter of public interest;
- The identification of unusual circumstances or risks in an engagement or class of engagements; and
- Whether laws or regulations require an engagement quality control review.

84. If the firm has no engagements that meet the criteria, paragraphs 85–99 do not apply.

Nature, Timing, and Extent of the Engagement Quality Control Review

85. The engagement quality control review procedures should include an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report.

86. The engagement quality control review should include reading the financial statements or other subject matter information and the report and considering whether the report is appropriate.

87. An engagement quality control review also should include a review of selected engagement documentation relating to the significant judgments the engagement team made and the conclusions they reached, and should include a discussion with the engagement partner regarding significant findings and issues. The extent of the engagement quality control review may depend upon, among other things, the complexity of the engagement and the risk that the report might not be appropriate in the circumstances.

88. An engagement quality control review may include consideration of the following:

- The engagement team's evaluation of the firm's independence in relation to the specific engagement;
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the conclusions arising from those consultations; and
- Whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.

89. Significant judgments made by the engagement team may include, for example:

- Significant risks identified during the engagement and the responses to those risks.
- Judgments made, particularly with respect to materiality and significant risks.
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement.
- The matters to be communicated to management and those charged with governance and, where applicable, other parties such as regulatory bodies.

90. The firm's policies and procedures should require the engagement quality control reviewer to conduct the review in a timely manner so that significant issues may be promptly resolved to

the reviewer's satisfaction before the report is released. The review may be conducted at appropriate stages during the engagement.

91. When the engagement quality control reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the firm's procedures for dealing with differences of opinion apply (see paragraphs 78–79).

Criteria for the Eligibility of Engagement Quality Control Reviewers

92. The firm should establish policies and procedures addressing

- a. The appointment of engagement quality control reviewers; and
- b. The technical qualifications required to perform the role, including the necessary experience and authority.

93. The firm's policies and procedures on the technical qualifications of engagement quality control reviewers may address the technical expertise, experience, and authority necessary to fulfill the role. What constitutes sufficient and appropriate technical expertise, experience, and authority depends on the circumstances of the engagement.

94. The firm should establish policies and procedures designed to maintain the objectivity of the engagement quality control reviewer. Such policies and procedures should provide that while the engagement quality control reviewer is not a member of the engagement team, the engagement quality control reviewer should satisfy the independence requirements relating to the engagements reviewed.

95. Policies and procedures designed to maintain the objectivity of the engagement quality control reviewer may include a requirement, where practicable, that the engagement quality control reviewer is not selected by the engagement partner, and requirements that the engagement quality control reviewer not

- a. Participate in the performance of the engagement except as discussed in paragraph 96 or
- b. Make decisions for the engagement team.

It may not be practicable, in the case of firms with few partners, for the engagement partner not to be involved in selecting the engagement quality control reviewer.

96. The engagement partner may consult the engagement quality control reviewer at any stage during the engagement, for example, to establish that a judgment made by the engagement partner will be acceptable to the engagement quality control reviewer. Such consultation need not impair the engagement quality control reviewer's eligibility to perform the role. However, when the nature and extent of the consultations become significant, the reviewer's objectivity may be impaired unless both the engagement team and the reviewer are careful to maintain the reviewer's objectivity.

97. The firm's policies and procedures should provide for the replacement of the engagement quality control reviewer when the reviewer's ability to perform an objective review has been impaired.

98. Qualified external persons may be contracted when sole practitioners or small firms identify engagements requiring engagement quality control reviews. Alternatively, some sole practitioners or small firms may wish to use other firms to facilitate engagement quality control reviews. When the firm contracts qualified external persons or other firms, the requirements and guidance in paragraphs 85-97 apply.

Documentation of the Engagement Quality Control Review

99. The firm should establish policies and procedures that provide for appropriate documentation of the engagement quality control review, including documentation that

- a. The procedures required by the firm's policies on engagement quality control review have been performed;
- b. The engagement quality control review has been completed before the report is released; and
- c. The reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

Monitoring

100. The firm should establish policies and procedures designed to provide the firm and its engagement partners with reasonable assurance that the policies and procedures relating to the system of

quality control are relevant, adequate, operating effectively, and complied with in practice. Such policies and procedures should

- a. Include an ongoing consideration and evaluation of the firm's system of quality control to determine
 - (i) The appropriateness of the design and
 - (ii) The effectiveness of the operation of the system of quality control.
- b. Assign responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.
- c. Assign performance of monitoring of the firm's system of quality control to qualified individuals.

101. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of

- Adherence to professional standards and regulatory and legal requirements;
- Whether the quality control system has been appropriately designed and effectively implemented; and
- Whether the firm's quality control policies and procedures have been operating effectively, so that reports that are issued by the firm are appropriate in the circumstances.

The evaluation may identify circumstances that necessitate changes to, or the need to improve compliance with, the firm's policies and procedures to provide the firm with reasonable assurance that its system of quality control is effective.

102. The firm's policies should require the performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and regulatory requirements, and the firm's quality control policies and procedures. Monitoring procedures include

- Review of selected administrative and personnel records pertaining to the quality control elements.
- Review of engagement working papers, reports, and clients' financial statements.
- Discussions with the firm's personnel.

- Summarization of the findings from the monitoring procedures, at least annually, and consideration of the systemic causes of findings that indicate improvements are needed.
- Determination of any corrective actions to be taken or improvements to be made with respect to the specific engagements reviewed or the firm's quality control policies and procedures.
- Communication of the identified findings to appropriate firm management personnel.
- Consideration of findings by appropriate firm management personnel who should also determine that any actions necessary, including necessary modifications to the quality control system, are taken on a timely basis.

103. Monitoring procedures also include an assessment of

- The appropriateness of the firm's guidance materials and any practice aids;
- New developments in professional standards and regulatory and legal requirements, and how they are reflected in the firm's policies and procedures where appropriate;
- Compliance with policies and procedures on independence;
- The effectiveness of continuing professional development, including training;
- Decisions related to acceptance and continuance of client relationships and specific engagements; and
- Firm personnel's understanding of the firm's quality control policies and procedures, and implementation thereof.

104. Some of the monitoring procedures discussed above may be accomplished through the performance of

- Engagement quality control review.
- Post-issuance review of engagement working papers, reports, and clients' financial statements for selected engagements.
- Inspection procedures.

105. The need for and extent of inspection procedures depends in part on the existence and effectiveness of the other monitoring procedures. The nature of inspection procedures varies based on the firm's quality control policies and procedures and the effectiveness and results of other monitoring procedures.

106. The inspection of a selection of completed engagements may be performed on a cyclical basis. For example, engagements selected for inspection may include at least one engagement for each engagement partner over an inspection cycle that spans three years. The manner in which the inspection cycle is organized, including the timing of selection of individual engagements, depends on many factors, including the following:

- The size of the firm.
- The number and geographical location of offices.
- The results of previous monitoring procedures.
- The degree of authority both personnel and offices have (for example, whether individual offices are authorized to conduct their own inspections or whether only the head office may conduct them).
- The nature and complexity of the firm's practice and organization.
- The risks associated with the firm's clients and specific engagements.

107. The inspection process involves the selection of individual engagements, some of which may be selected without prior notification to the engagement team. In determining the scope of the inspections, the firm may take into account the scope or conclusions of a peer review or regulatory inspections. (See paragraph 119.)

108. Inspection procedures with respect to the engagement performance element of a quality control system are particularly appropriate in a firm with more than a limited number of management-level individuals responsible for the conduct of its accounting and auditing practice.

109. In small firms with a limited number of persons with sufficient and appropriate experience and authority in the firm, monitoring procedures may need to be performed by some of the same individuals who are responsible for compliance with the firm's quality control policies and procedures. This includes post-issuance review of engagement working papers, reports, and clients' financial statements by the person with final responsibility for the engagement. To effectively monitor one's own compliance with the firm's policies and procedures, it is necessary that an individual be able to critically review his or her own performance, assess his or her own

strengths and weaknesses, and maintain an attitude of continual improvement. Changes in conditions and in the environment within the firm (such as obtaining clients in an industry not previously serviced or significantly changing the size of the firm) may indicate the need to have quality control policies and procedures monitored by another qualified individual.

110. Having an individual inspect his or her own compliance with a quality control system may be less effective than having such compliance inspected by another qualified individual. When one individual inspects his or her own compliance, the firm has a higher risk that noncompliance with policies and procedures will not be detected. Accordingly, a firm with a limited number of persons with sufficient and appropriate experience and authority in the firm may find it beneficial to engage a qualified individual from outside the firm to perform inspection procedures.

111. Any system of quality control has inherent limitations that can reduce its effectiveness. Deficiencies in individual engagements covered by this statement do not, in and of themselves, indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. The firm should evaluate the effect of deficiencies noted as a result of the monitoring process and determine whether they require prompt corrective action.

112. Deficiencies identified during the monitoring process may be

- a. Instances that do not necessarily indicate that the firm's system of quality control is insufficient to provide it with reasonable assurance that it complies with professional standards and regulatory and legal requirements, and that the reports issued by the firm or engagement partners are appropriate in the circumstances; or
- b. Systemic, repetitive or other significant deficiencies that require prompt corrective action.

113. The firm should communicate to relevant engagement partners and other appropriate personnel deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.

114. The firm's evaluation of each type of deficiency should result in recommendations for one or more of the following:

- a. Taking appropriate remedial action in relation to an individual engagement or member of personnel.
- b. The communication of the findings to those responsible for training and professional development.
- c. Changes to the quality control policies and procedures.
- d. Disciplinary action against those who fail to comply with the policies and procedures of the firm, especially those who do so repeatedly.

115. When the results of the monitoring procedures indicate that a report may be inappropriate or that procedures were omitted during the performance of the engagement, the firm should determine what further action is appropriate to comply with relevant professional standards and regulatory and legal requirements. The firm may also consider obtaining legal advice.

116. At least annually, the firm should communicate the results of the monitoring of its quality control system process to relevant engagement partners and other appropriate individuals within the firm, including the firm's leadership. Such communication should enable the firm and these individuals to take prompt and appropriate action where necessary in accordance with their defined roles and responsibilities and provide a basis for them to rely on the firm's system of quality control. Information communicated should include the following:

- a. A description of the monitoring procedures performed.
- b. The conclusions drawn from the monitoring procedures.
- c. Where relevant, a description of systemic, repetitive, or other significant deficiencies and of the actions taken to resolve or amend those deficiencies.

117. The reporting of identified deficiencies to individuals other than the relevant engagement partner need not include an identification of the specific engagements concerned, unless such identification is necessary for the proper discharge of the responsibilities of the individuals other than the engagement partner.

118. The firm should establish policies and procedures requiring appropriate documentation of monitoring (see paragraph 125). Appropriate documentation relating to monitoring includes:

- a. Monitoring procedures, including the procedure for selecting completed engagements to be inspected;
- b. A record of the evaluation of:
 - (i) Adherence to professional standards and regulatory and legal requirements;
 - (ii) Whether the quality control system has been appropriately designed and effectively implemented; and
 - (iii) Whether the firm's quality control policies and procedures have been operating effectively, so that reports that are issued by the firm or engagement partners are appropriate in the circumstances; and
- c. Identification of the deficiencies noted, an evaluation of their effect, and the basis for determining whether and what further action is necessary.

The Relationship of Peer Review to Monitoring

119. A peer review does not substitute for all monitoring procedures. However, since the objective of a peer review is similar to that of inspection procedures, a firm's quality control policies and procedures may provide that a peer review conducted under standards established by the AICPA may substitute for the inspection of engagement working papers, reports, and clients' financial statements for some or all engagements for the period covered by the peer review.

Complaints and Allegations

120. The firm should establish policies and procedures designed to provide it with reasonable assurance that it deals appropriately with

- a. Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements; and
- b. Allegations of noncompliance with the firm's system of quality control; and

c. Deficiencies in the design or operation of the firm's quality control policies and procedures, or noncompliance with the firm's system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations.

121. As part of this process, the firm should establish clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisals.

122. Complaints and allegations of noncompliance with the firm's system of quality control (which do not include those that are clearly frivolous) may originate from within or outside the firm. They may be made by firm personnel, clients, state boards of accountancy, other regulators, or other third parties. They may be received by engagement team members or other firm personnel.

123. The firm should require that investigations of such complaints and allegations in accordance with established policies and procedures be supervised by a person with sufficient and appropriate experience and authority who is not otherwise involved in the engagement. The firm's policies and procedures may require involving legal counsel in the investigation. Small firms and sole practitioners may use the services of a qualified external person or another firm to carry out the investigation.

124. The firm should establish policies and procedures requiring documentation of complaints and allegations, and the responses to them.

Documentation of Operation of Quality Control Policies and Procedures

125. The firm should establish policies and procedures requiring appropriate documentation to provide evidence of the operation of each element of its system of quality control.

126. The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including, for example:

- The size of the firm and the number of offices.
- The nature and complexity of the firm's practice and organization.

For example, large firms may use electronic databases to document matters such as independence confirmations, performance evaluations and the results of monitoring inspections. Smaller firms may use more informal methods such as manual notes, checklists, and forms.

127. The firm should establish policies and procedures that require retention of documentation for a period of time sufficient to permit those performing monitoring procedures and peer review to evaluate the firm's compliance with its system of quality control, or for a longer period if required by law or regulation.

Effective Date

128. The provisions of this statement are applicable to a CPA firm's system of quality control for its accounting and auditing practice as of January 1, 2009.

This Statement titled A Firm's System of Quality Control was unanimously adopted by the assenting votes of the 19 members of the board.
