outclassed in earnings by those who changed jobs within the past two, three and five years. It is also interesting to note that out of thirty-two with over five years of total experience, twenty-five changed jobs within the past five years; undoubtedly for reasons of advancement as a result of the manpower shortage. Six entered the accounting profession within the past five years. Seven are old-timers (over five years) on their present jobs and rate 3, 6, 8, 10, 20, 24 and 33 in order of earnings.

Responsibility for financial statements and income tax reports seems to have no influence on earnings. As for educational background, there is no consistency that would indicate a preferred course. University, business college and correspondence school training are represented in high, medium and lower earnings.

As for opportunities, judging from the positions held, the smaller firms more often accept women in positions of responsibility. However, where size of organization re-

quires departmental arrangement, women department heads receive larger salaries than do those employed in the smaller offices.

### BOND-A-MONTH PLAN

Accountants should need no more than a reminder of the plan which the Treasury Department has launched to encourage the purchase each month, through payroll or bank account, of a United States savings bond.

Every accountant understands the advantages of systematic saving. Some of us do not use our knowledge to our own advantage. Let's plan our personal financial programs with the same shrewdness we apply to the problems of others.

\* \* \*

Ideas come but rarely to one who merely waits for an inspiration. They must be pursued, wrestled with, and dragged home.

—RICHARD ARMOUR
