### Recent PCAOB Pronouncements and Related Guidance

<table>
<thead>
<tr>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
</table>
| **PCAOB Rule 3526, Communication with Audit Committees Concerning Independence** (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”) | Rule 3526 requires the registered public accounting firm to:
- describe in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence.
- discuss with the audit committee of the issuer the potential effects of any relationships that could affect independence, should they be appointed as the issuer’s auditor.
- document the substance of these discussions. These discussions should occur at least annually.
The board also adjusted the implementation schedule for Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles* (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), as it applies to tax services. |
| **SEC Release 2008-234, Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting** | This press release was provided jointly by the Securities and Exchange Commission (SEC) and FASB staffs and was intended to help preparers, auditors, and investors address fair value measurement questions based on the fair value measurement guidance in FASB Statement No. 157, *Fair Value Measurements*, that have been cited as most urgent in the current environment. More information is available online at [www.sec.gov/news/press/2008/2008-234.htm](http://www.sec.gov/news/press/2008/2008-234.htm). |
| **PCAOB Staff Audit Practice Alert No. 3, Audit Considerations in the Current Economic Environment** (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400.03) | This practice alert is designed to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis. The practice alert addresses the following six main areas: overall audit considerations, auditing fair value measurements, auditing accounting estimates, auditing the adequacy of disclosures, auditor’s consideration of a company’s ability to continue as a going concern, and additional audit considerations for selected financial reporting areas. |

### Form 8-K Requirements for Form 11-K Filers

.135 For an employee benefit plan required to file Form 11-K, the SEC staff has historically expected a change in a plan’s auditor to be reported on Form 8-K; however, plans that filed their financial statements as part of the plan sponsor’s annual report (as provided for in Securities Exchange Act of 1934 Rule 15d-21) have not been expected to report changes in its auditors on Form 8-K. This requirement was discussed at the April 4, 2006, AICPA SEC Regulations Committee meeting, and although the SEC staff unofficially stated that all employee stock purchase, savings, or similar plans that change auditors are not required to file a Form 8-K.
(regardless of whether it files its annual financial statements on Form 11-K or as part of the plan sponsor’s annual report), the committee observed that, under Section 1000.08(m), Notification of the Commission of Resignations and Dismissals from Audit Engagements for Commission Registrants, of the PCAOB Interim Quality Control Standards, an independent registered public accounting firm is required to report the termination of the auditor-client relationship for any SEC registrant, which is defined to include employee benefit plans that file Form 11-K. This communication should be in writing directly to the former client, with a simultaneous copy to the Office of the Chief Accountant (OCA) of the SEC. This letter should be sent by the end of the fifth business day following the firm’s determination that the client-auditor relationship has ended (or it may be faxed to the OCA at (202) 772-9251 with a reference to “PCAOB Letter File”). The SEC staff agreed to discuss its position on Form 8-K reporting by employee benefit plans with the PCAOB staff. Until authoritative guidance is provided by the SEC that provides a specific exemption, public accounting firms should continue to provide these “5-day” letters to comply with PCAOB requirements for a change in auditor of a plan that files a Form 11-K. An employee benefit plan whose financial statements are filed as an amendment to the sponsor’s Form 10-K does not meet the definition of an SEC engagement and would therefore fall outside the scope of Section 1000.08(m).

Preapproval of Employee Benefit Plan Audits

.136 In December 2005, the SEC issued “Current Accounting and Disclosures Issues in the Division of Corporation Finance” to provide guidance regarding the preapproval of audits of employee benefit plans. Section II.R.3 is summarized in the following paragraph. An employee benefit plan may be an affiliate of a registrant as its plan sponsor. The SEC’s independence rules related to preapproval surround services provided to the issuer and the issuer’s subsidiaries but not to services provided to other affiliates of the issuer that are not subsidiaries. Therefore, the independence rules do not require the audit committee of the plan sponsor to preapprove audits of the employee benefit plans, although the audit committee is encouraged to do so. When employee benefit plans are required to file Form 11-K, those plans are separate issuers under the Exchange Act; as a result, those issuers are subject to the preapproval requirements.

.137 This preapproval can be provided by either the audit committee of the plan sponsor or the appropriate entity overseeing the activities of the employee benefit plan, such as the trustee, plan administrator, or responsible party. The SEC’s rules require that all fees, including fees related to audits of employee benefit plans, paid to the principal auditor be included in the company’s fee disclosures, regardless of whether the audit committee of the company preapproved those fees. As part of the exercise to gather the information for the required fee disclosures, the audit committee should be made aware of all fees paid to the principal auditor, including those related to audits of the employee benefit plans. The company may elect to separately indicate in their disclosures those fees paid to the principal auditor that were not subject to the preapproval requirements. Registrants and their auditors are reminded that the financial statements included in Form 11-K must be audited by an independent auditor who is registered with the PCAOB, and the audit report must refer to the standards of the PCAOB rather than GAAS.

Audit Reports—Following Two Sets of Standards

SEC Requirements

.138 The SEC requires employee stock purchase, savings, and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the Securities Exchange Act of 1934. When Form 11-K is filed separately (not as an exhibit to Form 10-K), it must be filed with the SEC within 90 days after the end of the plan’s fiscal year-end; however, if the plan is subject to ERISA, the Form 11-K filing deadline is increased to 180 days after the plan’s fiscal year-end.

Applicable Audit Standards

.139 Plans that are required to file Form 11-K are deemed to be issuers under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB. These plans may also be subject to ERISA and must submit to the DOL an audit
in accordance with GAAS promulgated by the ASB. It is our understanding that the SEC will not accept an audit report that references GAAS, and the DOL will not accept an audit report that does not reference GAAS.

**Performance and Reporting Requirements**

.140 Based on AICPA staff discussions with the SEC and PCAOB staff to seek clarification of the performance and reporting requirements for audits of Form 11-K filers, firms will need to conduct their audits of these Form 11-K plans in accordance with two sets of standards and prepare two separate audit reports: an audit report referencing PCAOB standards for Form 11-K filings with the SEC and a separate audit report referencing GAAS for DOL filings. The PCAOB and SEC staff believe that an opinion issued in accordance with PCAOB Auditing Standard No. 1, *References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)* (www.pcaobus.org/Standards/Standards_and_Related_Rules/Auditing_Standard_No.1.aspx), does not allow a reference to GAAS; therefore, a “dual” standard report is not appropriate and will not be accepted by the SEC.

.141 Any questions regarding performance and reporting requirements of audits of financial statements of Form 11-K filers should be directed to the SEC Division of Corporation Finance, OCA at (202) 551-5300. See paragraph 13.19 of Audit and Accounting Guide *Employee Benefit Plans* for an example of an opinion for a Form 11-K audit.

**Auditing Accounting Estimates**

.142 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as whole. Although this alert has discussed fair value measurements at length, it is important to remember that many types of accounting estimates exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long-lived assets, valuation allowance for deferred tax assets, and actuarial assumptions in pension and other postretirement benefit costs. Given the current economic climate, additional skepticism should be exercised when considering management’s underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors, with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviate from historical patterns, or are particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable. For example, in the current slow market, new patterns may emerge. A key aspect of AU section 342 in this economy is for an auditor to determine the reasonableness of management’s accounting estimates with an extra degree of professional skepticism, given the current economic climate and possible increases of pressure on management to meet earnings. As noted by AU section 316, when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates taken as a whole.

.143 The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches outlined in AU section 342 paragraph .10 in testing that process. In reviewing and testing management’s process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management’s estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor’s report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342.
Management Letter of Representations

.144 As discussed in AU section 333, Management Representations (AICPA, Professional Standards, vol. 1), in some circumstances, audit evidence that can be obtained by the application of auditing procedures other than inquiry is limited; therefore, the auditor obtains written representations to provide additional audit evidence. This may be the case for assumptions used in fair value measurements or the entire measurement or claims around an entity’s ability to continue as a going concern.

.145 According to paragraph .48 of AU section 328, “[t]he auditor should ordinarily obtain written representations from management regarding the reasonableness of significant underlying assumptions, including whether they appropriately reflect management’s intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures.” Additionally, depending on the nature, materiality, and complexity of fair values, representations may be included in regard to the appropriateness of the measurement methods and consistency in the application of these methods, the completeness and adequacy of disclosures related to fair values, and whether subsequent events require adjustment to the fair value measurements and disclosures included in the financial statements. When significant assumptions are used or they are highly subjective, and the items being measured at fair value are material, the auditor considers discussing these items with those charged with governance of the entity.

Accounting Issues and Developments

Unrelated Business Income Tax and FASB Interpretation No. 48

.146 Although qualified benefit plans are not generally subject to taxation, certain activities of a qualified plan may be taxable. In general, unrelated business taxable income (UBTI) of a tax-exempt entity is subject to taxation. UBTI is:

- gross income derived from an unrelated trade or business that is regularly carried on, less
- allowable deductions directly connected with the trade or business.

.147 With respect to qualified retirement plans, unrelated trade or business is defined as any trade or business regularly carried on by the trust or by a partnership of which the trust is a member. This means that a qualified plan can have UBTI due to its investments. For tax-exempt welfare plans, UBTI includes the previous examples. In addition, such plans may be subject to UBTI on their investment income if their assets exceed certain allowable reserves.

.148 Nonleveraged investments, such as government securities, stocks, and debt instruments of noncontrolled corporations, mutual funds, and insurance company annuity contracts, do not typically generate UBTI. However, other nonleveraged investments, such as investments in partnerships, real estate investment trusts, loans or mortgages, and options to buy or sell securities such as short sales or repurchase agreements, may generate UBTI. The most common plans that generate UBTI are health and welfare plans and defined benefit pension plans. However, with the increase of such investments held by DC plans, such plans may begin to be subject to UBTI also.

FASB Interpretation No. 48

.149 FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, clarifies the accounting for uncertainty in income taxes recognized in an enterprise’s financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. See FIN 48 for further guidance.
For public enterprises (including nonpublic consolidated entities of public enterprises that apply GAAP), this interpretation is effective for fiscal years beginning after December 15, 2006. For nonpublic enterprises (as defined in paragraph 289 of FASB Statement No. 109), except for nonpublic consolidated entities of public enterprises that apply U.S. GAAP, this interpretation is effective for annual financial statements for fiscal years beginning after December 15, 2008. See FSP FIN 48-3, Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises, for further guidance on the effective date. Earlier adoption is permitted as of the beginning of an enterprise’s fiscal year.

Considerations for Employee Benefit Plans

FSP FIN 48-3 has generally deferred the effective date of the application of FIN 48 for nonpublic companies to fiscal years commencing after December 15, 2008. However, when applied, the standard will require assessment of uncertainty of income tax positions for all open years. As such, the auditor may wish to consider the implications of this standard during 2008 benefit plan audits.

Because benefit plans are generally exempt from income taxes, few issues exist that may trigger the application of FIN 48. The main concern for all plans is the retention of the plan’s tax-exempt status. For retirement plans, the existence of the IRS’s Employee Plans Compliance Resolution System under Revenue Procedure 2008-50 is generally assumed to meet the conditions of an administrative practice or precedent as defined in FIN 48, which can be relied upon to retain the plan’s exempt status for all but the most egregious of violations. Note that no such relief program exists for welfare benefit plans.

Notwithstanding this general relief for the plan’s tax qualified status, a plan may be faced with issues under FIN 48. These potential issues include, but are not limited to, the following:

- Uncertain tax positions taken by pass-through entities in which the plan has invested that generate material unrelated business income tax to the trust
- The determination of whether a pass-through entity generates unrelated business income to the plan
- The assumptions used in determining the reserves for a welfare benefit plan that is subject to unrelated business income tax due to excess asset accumulations
- The assumptions used by an ESOP of an S corporation to demonstrate satisfaction with the “broadly held” rules of IRC Section 409(p) and the associated exemption from tax on the pass-through income
- The continuation of a welfare benefit plan’s tax exempt status
- Where UBTI is material, all aspects of FASB Statement No. 109, including an analysis of any book or tax differences, is required

FASB Accounting Standards Codification™

FASB is expected to issue FASB ASC as authoritative effective July 1, 2009, at which time it will become the source of authoritative U.S. accounting and reporting standards, in addition to guidance issued by the SEC, for nongovernmental entities. FASB ASC will supersede all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. Once effective, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC will become nonauthoritative. This change will affect accountants and auditors alike.

FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC disassembled and reassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the Emerging Issues Task Force (EITF), and the AICPA) to organize them under approximately 90 topics. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, EITF, AICPA, and related literature. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source.
of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance.

.156 After the effective date of FASB ASC, FASB will no longer consider new standards authoritative in their own right. Instead, new standards will serve only to update FASB ASC and provide the historical basis for conclusions of a new standard.

.157 FASB ASC uses a topical structure in which guidance is organized into areas, topics, subtopics, sections, and subsections. Topics, subtopics, and sections are numerically referenced. The topics of FASB ASC pertaining to employee benefit plans are the following:

- 960, Plan Accounting—Defined Benefit Pension Plans
- 962, Plan Accounting—Defined Contribution Pension Plans
- 965, Plan Accounting—Health and Welfare Benefit Plans

.158 Constituents are encouraged to begin using FASB ASC, which can be accessed at http://asc.fasb.org/home.

.159 The AICPA has published Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating FASB ASC Research System and performing accounting research.
Recent Pronouncements

The following tables present a list of recently issued audit and attestation pronouncements and related guidance as well as a list of accounting pronouncements and related guidance. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. The PCAOB establishes auditing and attestation standards for audits of issuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org, the FASB Web site at www.fasb.org, and the PCAOB Web site at www.pcaob.org. You may also look for announcements of newly issued accounting standards in the CPA Letter and the Journal of Accountancy.

(continued)
Communicating Internal Control Related Matters Identified in an Audit

The ASB issued SAS No. 115, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325), which will become effective for audits of financial statements for periods ending on or after December 15, 2009. SAS No. 115 establishes standards and provides guidance on communicating matters related to a plan’s internal control over financial reporting (internal control) identified in an audit of financial statements. SAS No. 115 supersedes SAS No. 112 of the same title. SAS No. 115 was issued to eliminate differences within the AICPA’s Audit and Attest Standards resulting from the issuance of SSAE No. 15, An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 1, AT sec. 501). SAS No. 115 aligns the definitions and related guidance for evaluating deficiencies in internal control with the definitions and guidance in SSAE No. 15. Specifically, SAS No. 115 does the following:

- Contains revised definitions of the terms material weakness and significant deficiency
- Revises the list of deficiencies in internal control that are indicators of material weaknesses
- No longer includes a list of deficiencies that ordinarily would be considered at least significant deficiencies
- Contains a revised illustrative written communication to management and those charged with governance of material weaknesses and significant deficiencies

Disclosures About Derivative Instruments and Hedging Activities

.162 In March 2008, FASB issued FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity’s financial position, financial performance, and cash flows.

.163 The new standard improves transparency about the location and amounts of derivative instruments in an entity’s financial statements; how derivative instruments and related hedged items are accounted for under FASB Statement No.133, Accounting for Derivative Instruments and Hedging Activities; and how derivative instruments and related hedged items affect financial position, financial performance, and cash flows.

.164 FASB Statement No. 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity’s liquidity by requiring disclosure of derivative features that are credit risk related. Finally, it requires cross-referencing within footnotes to enable financial statement users to locate important information about derivative instruments.

.165 It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged.

\(^1\) At the date of this writing, this guidance has not yet been included in Financial Accounting Standards Board Accounting Standards Codification TM (FASB ASC). Readers are encouraged to visit the FASB ASC Web site at http://asc.fasb.org/home and monitor updates.

\(^2\) See footnote 1.
Other Accounting Pronouncements

.166 In September 2008, FASB issued FSP FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161*. This pronouncement addresses certain matters related to credit default swaps that may be held by large master trusts. Refer to the full text of FSP FAS 133-1 and FIN 45-4 at www.fasb.org/project/recent_effective_dates.shtml for further information.

Regulatory Developments

The DOL Provides Guidance on Fiduciary Duties in Response to Abuses Involving the Madoff Investment Firm

.167 On February 5, 2009, the DOL announced guidance on the duties of employee benefit plan fiduciaries in light of abuses involving Bernard L. Madoff Investment Securities LLC.

.168 This guidance is intended to assist fiduciaries, investment managers, and other investment service providers to plans who believe they may have exposure to losses on investments with entities related to the Madoff firm. The guidance also provides steps that can be taken to assess and protect the interests of plans, participants, and beneficiaries under ERISA.

.169 The guidance is available on EBSA’s Web site at www.dol.gov/ebsa under “Compliance Assistance.”

IRS Enhances Employee Plans Compliance Resolution System

.170 For many years, the IRS has sponsored a program granting plan sponsors a means of retaining a qualified retirement plan’s exempt status in spite of document or operating defects. This is the Employee Plans Compliance Resolution System (EPCRS). This program was updated in the spring of 2008, and announced in Revenue Procedures 2008-50. A complete discussion of the program, as well as some helpful tips, can be found at www.irs.gov/retirement/article/0,,id=96907,00.html.

.171 The 2008 revision to the compliance program continues the pattern of expanding the amount of relief available to plan sponsors. Areas under which correction relief has been enhanced include the following:

- Participant loans
- Failure to implement participant deferral elections
- Failure to recognize right to a catch-up correction
- Correction of an excess employer or employee contributions
- Use of the DOL’s online calculator for measuring lost income, if actual calculation is not feasible
- Disregard for corrections for former participants if $75 or less and costs of processing payment exceed that amount (prior rule was $50 or less)

.172 In addition to these enhancements, there has also been a procedural enhancement for requests for formal relief. Certain types of errors are eligible for a streamlined submission process, which should speed up the time from submission to formal approval.

.173 Familiarity with this program is important for benefit plan auditors as operational defects are frequently discovered during the course of the audit and an assessment must be made of whether corrections, if any, may be material. The full text of the revenue procedure includes a discussion of many common defects and the required correct, along with examples which are helpful in this assessment.
2008 Form 5500 Series

.174 On November 25, 2008, the DOL, IRS, and PBGC published the 2008 Form 5500 and related instructions.

.175 Modifications to Form 5500 for plan year 2008 are described under “Changes to Note” in the 2008 instructions. Significant changes include those covered in the following sections.

Modifications to the Form 5500 Annual Report for 2008

.176 Under the PPA, separate actuarial information schedules were developed for 2008 plan year filings. Single-employer and multiple-employer plans now will use Schedule SB and multiemployer and certain money purchase plans will now use Schedule MB. Schedule B is not a valid schedule to file with a plan’s 2008 Form 5500. Filers required to file an actuarial report cannot use the 2007 forms, including the 2007 Schedule B (Form 5500), to satisfy their 2008 filing requirements.

.177 The PPA requires filers of certain pension plans to provide additional new information beginning with the 2008 plan year. For the 2008 plan year, this new information will be filed as attachments to Schedule R. All multiemployer defined benefit plans are required to file attachments providing the information specified in the Schedule R instructions. In addition, all defined benefit plans (single-employer, multiple-employer, and multiemployer) with 1,000 or more participants are required to provide financial asset breakout information as an attachment to Schedule R.

.178 Under the PPA, a new simplified reporting option that was first available for 2007 plan year filings is also available for eligible plans for 2008 plan year filings for plans with fewer than 25 participants as of the beginning of the plan year. The instructions for “Voluntary Alternative Reporting Option for Certain Plans with Fewer than 25 Participants” on page 9 of the 2008 Instructions for Form 5500 describe this reporting option.

.179 Short 2009 plan year filers whose due date to submit their 2009 filing is before January 1, 2010, will be given an automatic extension to electronically file their complete Form 5500 within 90 days after the 2009 filing system is available on the DOL Web site. See the “When to File” section of the 2008 Instructions for Form 5500 for more information on due dates for short plan year filers.

Modifications to the Form 5500-EZ Annual Report for 2008

.180 Pursuant to the PPA, the filers of Form 5500-EZ are no longer required to file any schedules or attachments with Form 5500-EZ. They must, however, collect and retain a completed Schedule MB or a completed and signed Schedule SB, if applicable.

.181 To satisfy their 2009 Form 5500-EZ filing requirement, short plan year filers can choose to file electronically using what is expected to be an electronic 2009 Form 5500-SF, Short Form Annual Return/Report of Small Benefit Plan. More information is available at the IRS Web site at www.irs.gov.

.182 As with filers of the Form 5500, short 2009 plan year filers whose due date to submit their 2009 filing is before January 1, 2010, will also be given an automatic extension to electronically file their complete Form 5500 within 90 days after the 2009 filing system is available on the DOL Web site.

.183 The official government-printed forms are available by calling (800) TAX-FORM (800-829-3676). In addition, EBSA publications may be ordered by calling (866) 444-EBSA (3272). Information copies of the forms, schedules, and instructions are available on the EBSA’s Web site at www.efast.dol.gov.

.184 Filers should monitor the EFAST Web site for information on approved software vendors when completing 2008 Forms 5500 by computer and for electronic filing options. Filers may contact the EFAST Help Line for general assistance by calling (866) 463-3278.
Electronic Filing of Form 5500 and Changes to the 2009 Form 5500

.185 On November 16, 2007, the EBSA, the IRS, and the PBGC published in the Federal Register revisions to the Form 5500 for plan year 2009, including a deferral for one year of the move to the wholly electronic filing system. Plans and service providers will be required to comply with these changes on the due date for the plan’s 2009 Form 5500.

.186 Other highlights of the changes include the following:

- A new simplified annual reporting form for small plans with secure, easy to value investments with regulated financial institutions. The DOL estimates that approximately 594,000 of the 629,000 small plans required to file an annual report will be eligible to use the new Form 5500-SF, or short form.
- Removal of the IRS-only schedules (Schedules E and SSA) from Form 5500 as a result of the move to the wholly electronic filing system.
- Revision of the Schedule C to clarify the reporting requirements and improve the information plan officials receive regarding amounts being received by plan service providers.
- Replacement of Schedule B with Schedule SB and Schedule MB to reflect the changes in reporting and funding requirements for single and multiemployer defined benefit pension plans under the PPA effective for the 2008 plan year.
- Modification of Schedule R to add questions required by the PPA to gather information on pension plan funding and compliance with minimum funding requirements effective for the 2008 plan year but filed as an attachment rather than as actual schedules. These modifications will be effective in standard format for the 2009 plan year.
- Modification of Schedule R to collect data needed by the PBGC to properly monitor the plans it insures, effective for the 2008 plan year but filed as an attachment rather than as an actual schedule. These modifications will be effective in standard format for the 2009 plan year.
- Miscellaneous changes to the schedules and instructions to improve and clarify reporting effective for the 2009 plan year.
- Improved financial disclosure by the approximately 16,000 tax sheltered 403(b) annuity plans subject to Title I of ERISA by making the reporting rules for those 403(b) plans on par with 401(k) plans. This will involve the completion of Form 5500 as a small or large pension plan, depending on the number of participants eligible to participate in the plan as of the beginning of the plan year. The DOL anticipates that most small 403(b) plans will be eligible to use the new Form 5500-SF, and thus will only have to meet that limited filing obligation.

For large 403(b) plans, however, the new reporting requirements will require not only the completion of the entire Form 5500, but also the engagement of an IQPA to conduct an independent audit of the plan. The DOL intends to fully enforce this new audit requirement in 2009. Accordingly, it is critical that plan auditors educate themselves and their clients about this change and its effects on plan records that will be subject to audit. It is not uncommon for 403(b) plans, under the current reporting model, to have participant records that are difficult to “roll up” into plan-level records. Careful consideration of such situations will be essential in 2008 to ensure that these 403(b) plans will be auditable in 2009.
The 2009 Form 5500 package and the related *Federal Register* notices will be available on the EBSA EFAST Web site at www.efast.dol.gov.

**Help Desk**—In February 2008, the DOL selected a contractor, Vangent, Inc., to develop and build the new EFAST2 processing system. The new, wholly electronic processing system is expected to be operational on January 2, 2010, to process 2009 Form 5500 filings. Plan administrators and service providers are cautioned that the new EFAST2 processing system will not accept paper filings. Any such paper filings are not able to be processed and will be returned to the filer. To help the plan filing community understand the new EFAST2 system, the DOL has scheduled a series of webcasts during 2009.

**Correspondence From EFAST or the DOL OCA**

.188 Plan administrators often receive correspondence from the DOL regarding Form 5500 filed for their pension and welfare benefit plans. These letters are generated by both the EFAST processing center in Lawrence, KS, and the DOL’s OCA in Washington, D.C. Auditors are often asked by their clients to assist in the resolution of issues contained in these government letters.

**Processing-Related Correspondence—Changes are Coming on July 1, 2009**

.189 Since 2000, Form 5500 filings have been filed with the DOL’s EFAST processing center in Lawrence, KS. EFAST uses sophisticated electronic technologies to review each filing before acceptance. The DOL, IRS, and the PBGC have created a variety of edit tests designed to check for things such as completeness, accuracy, timeliness, internal consistency, missing schedules or attachments, and failure to answer mandatory questions.

.190 Since EFAST’s inception, the DOL has sent out “edit test” letters (also known as, the “30 day letters” from Lawrence, KS) addressed to plan administrators when deficiencies or discrepancies have been identified during processing. Plan administrators have been provided this opportunity to voluntarily correct deficiencies in their Form 5500 filings before any enforcement actions are taken by the DOL. At the end of this correspondence period, the data contained in the Form 5500 filings will have been distributed to the respective federal agencies regardless of whether deficiencies identified during processing have been resolved.

.191 Beginning July 1, 2009, the current EFAST processing system will no longer generate written “edit test” correspondence to plan administrators on Form 5500 filings containing deficiencies or discrepancies identified during processing, with one exception—the lack of a valid signature(s) on the Form 5500.

**Correspondence From the OCA**

.192 The DOL’s OCA has the responsibility for enforcing ERISA reporting and disclosure requirements. This includes ensuring that Form 5500 filings are filed timely and correctly, and determining whether plan audits are performed in accordance with professional auditing and regulatory standards. The OCA routinely queries the ERISA database and targets for review Form 5500 filings that satisfy certain criteria, including those filings in which processing errors went uncorrected and those with improperly prepared auditor’s reports. The OCA staff review the Form 5500 filings and also request copies of working papers that support
audit engagements. If the OCA staff identifies problems, a formal enforcement process commences with the issuance of a notice of rejection (NOR) against the plan administrator.

.193 Upon receipt of an NOR, the plan administrator has 45 days to make any necessary corrections to the Form 5500 filing. This may involve the auditors having to correct their audit reports or even perform additional fieldwork in audit areas where work was previously not performed or deemed by the DOL to be insufficient. At the end of the 45-day period, if the Form 5500 filing remains deficient, the DOL issues a notice of intent to assess a penalty (NOI), potentially subjecting the plan administrator to civil penalties of up to $1,100 per day (imposed from the day after the original due date of the filing). As a policy matter, however, most deficiencies are penalized at $150 per day with penalties capped at $50,000.

.194 When plan administrators receive an NOI, they have 35 days to submit to the DOL a statement of reasonable cause, submitted under penalty of perjury, in which they set forth any reasons why the penalty should be abated in part or in full. (It is important to note that traditionally the DOL will not consider abatement of any penalties in cases where deficiencies still exist.) If the plan administrator fails to comply with the requirements of the NOI, the penalty becomes a final agency action, and the plan administrator forfeits all appeal rights.

.195 After the DOL reviews the statement of reasonable cause, the agency issues a notice of determination that contains the final penalty amount assessed against the plan administrator. The plan administrators may choose to pay the penalty amount or, within 35 days as provided for in the letter, file an answer with the administrative law judge, appealing the penalty.

Important Reminders

.196 Given that the EFAST processing center will end its issuance of letters to plan administrators (with the one exception previously noted) on July 1, 2009, plan administrators should make all efforts to file accurate and complete Form 5500. Failure to do so may result in future enforcement correspondence from the DOL, IRS, or PBGC.

.197 Any questions regarding the DOL penalty process should be directed to the OCA at (202) 693-8360.

The EBSA’s Inspection Programs to Assess Plan Audit Quality

.198 The DOL’s EBSA continues its enhanced programs aimed at assessing and improving the quality of employee benefit plan audits. According to the EBSA, 68 public accounting firms audit more than 100 plans that cover approximately 28,000 audits. The remaining 48,000 plan audits are performed by nearly 10,000 different CPA firms, 8,200 of whom perform five or fewer audits. The EBSA utilizes both top-down and bottom-up strategies in selecting and evaluating ERISA audits.

.199 First, the EBSA conducts periodic inspections of firms with substantial ERISA audit practices—those with greater than 200 benefit plan clients. The EBSA staff meets with firm management, review firm policies and procedures that relate to employee benefit plan audits, and conduct on-site reviews of a sample of ERISA audit engagements. This “top-down” and “bottom-up” approach provides the EBSA a more efficient means of evaluating the quality of audit work performed by these large firms and ensuring that findings and recommendations are communicated to those in a position to effect any necessary changes. To date, the EBSA has completed 14 such reviews.

.200 Next, for firms that audit between 100 and 200 employee benefit plans, the EBSA carries out what it refers to as a mini-inspection program. This program is similar to the inspection program for larger firms, except that the work is performed in the EBSA’s Washington, D.C. office. The top-level communications with firm management and personnel are conducted using a firm questionnaire (also used in the larger inspection program) and telephone interviews. A sample of benefit plan engagements is also sampled, and firms are asked to make the audit workpapers available for review in the EBSA’s office. To date, the EBSA has completed mini-inspections of 15 firms.
The “top-down” and “bottom-up” approach utilized in both the inspection and mini-inspection programs provides the EBSA an efficient means of evaluating the quality of audit work performed by these large firms and ensures that findings and recommendations are communicated to those in a position to effect any necessary changes.

Finally, for firms with employee benefit plan audit practices of 50 or less plans, the EBSA focuses its in-house work on reviewing copies of selected audit working papers. When circumstances warrant, the scope of the EBSA’s reviews is expanded to additional audit areas. To date, the EBSA has conducted over 1,600 of these desk reviews.

In instances in which deficient audit work is identified, the related Form 5500 filings are subject to rejection, and auditors potentially face referral to the AICPA’s Professional Ethics Division or State Board of Public Accountancy.

Finally, the EBSA has expanded its enforcement efforts dealing with fiduciary breaches to include determining whether plan auditors may be considered knowing participants. An auditor is considered a knowing participant if at least one of the three following elements is present:

- The plan auditor took affirmative action to further the violation.
- The plan auditor helped conceal the violation.
- The plan auditor failed to act when required to do so by applicable professional standards.

DOL Fiduciary Education Campaign

The Fiduciary Education Campaign, a compliance assistance initiative of the DOL, is designed to improve workers’ health and retirement security by educating employers and service providers about their fiduciary responsibilities under ERISA. Such information and guidance is a cornerstone of the DOL’s mission.

The program emphasizes the obligation of plan sponsors and other fiduciaries to

- understand the terms of their plans;
- select and monitor service providers carefully;
- make timely contributions to fund benefits;
- avoid prohibited transactions; and
- make timely disclosures to workers and their beneficiaries and reports to the government.

The Fiduciary Education Campaign includes nationwide educational seminars and webcasts to help plan sponsors understand rules and meet their responsibilities to workers and retirees, thereby improving their financial security. The DOL’s Web site contains archived versions of these programs. The campaign also includes educational materials on topics such as understanding fees and selecting an auditor.

ERISA Fiduciary Advisor

The DOL has also developed an e-law tool to increase awareness and understanding about basic fiduciary responsibilities when operating a retirement plan. The ERISA Fiduciary Advisor provides information and answers to a variety of questions about who is a fiduciary and his or her responsibilities under ERISA. The advisor includes links to more detailed information that may be useful to the user, such as links to regulatory text, publications, and organizations.

This tool may be found at www.dol.gov/ebsa/fiduciaryeducation.html.
Publications

.210 Included in the DOL’s Fiduciary Education Campaign are the following DOL-issued publications:

.211 **Meeting Your Fiduciary Responsibilities.** To meet their responsibilities as plan sponsors, employers need to understand some basic rules, specifically ERISA, which sets standards of conduct for those who manage an employee benefit plan and its assets (called fiduciaries). This publication provides an overview of the basic fiduciary responsibilities applicable to retirement plans under the law.

.212 **Understanding Retirement Plan Fees And Expenses.** This booklet helps retirement plan sponsors better understand and evaluate their plan’s fees and expenses. Although the focus is on fees and expenses involved with 401(k) plans, many of the principles discussed in the booklet are applicable to all types of retirement plans.

.213 **401(k) Plan Fee Disclosure Tool.** This form provides employers with a handy way to make cost-effective decisions and compare the investment fees and administrative costs of competing providers of plan services.

.214 **Selecting an Auditor for Your Employee Benefit Plan.** Federal law requires employee benefit plans with 100 or more participants to have an audit as part of their obligation to file the Form 5500. This booklet will assist plan administrators in selecting an auditor and reviewing the audit work and report.

.215 **Selecting and Monitoring Pension Consultants: Tips For Plan Fiduciaries.** ERISA requires that fiduciaries of employee benefit plans administer and manage their plans prudently and in the interest of the plan’s participants and beneficiaries. In carrying out these responsibilities, plan fiduciaries often rely heavily on pension consultants and other professionals for help. To encourage the disclosure and review of more and better information about potential conflicts of interest, the DOL and SEC have developed a set of questions to assist plan fiduciaries in evaluating the objectivity of the recommendations provided, or to be provided, by a pension consultant.

.216 **Tips for Selecting and Monitoring Service Providers for Your Employee Benefit Plan.** Business owners are responsible for ensuring that their 401(k) plans comply with federal law and rely on other professionals to assist them with their plan duties. Selecting a service provider is one of the most important responsibilities of a plan sponsor. The EBSA has prepared this set of tips to assist business owners in carrying out these responsibilities.

.217 **Reporting and Disclosure Guide for Employee Benefit Plans.** This guide is intended to be used as a quick reference tool for certain basic reporting and disclosure requirements under ERISA.

**Help Desk**—Further information regarding DOL publications and the dates and locations of upcoming educational programs may be found at www.dol.gov/ebsa/fiduciary education.html.

Delinquent Filer Voluntary Compliance Program

.218 The Delinquent Filer Voluntary Compliance Program (DFVCP) is designed to encourage voluntary compliance with the annual reporting requirements under ERISA. The program gives delinquent plan administrators a way to avoid potentially higher civil penalty assessments by satisfying the program’s requirements and voluntarily paying a reduced penalty amount. To increase incentives for delinquent plan administrators to voluntarily comply, the department has reduced penalties and simplified the rules governing participation in the program.

.219 Address to be used for the DFVCP:
DFVCP Penalty Calculator and Online Payment Option

.220 The DOL provides two Web based options that make participating in the DFVCP easy, quick, and error-free. An online DFVCP penalty calculator is available to help plan administrators accurately calculate the payment needed to participate in the program. In addition, plan administrators who use the online calculator now have the option of paying the penalty electronically over the Internet.

.221 Additional details on the online calculator and online payment option may be found in the DFVCP Frequently Asked Questions (FAQs) at www.dol.gov/ebsa/calculator/dfvcpmain.html.

Program Eligibility

.222 Eligibility in the DFVCP continues to be limited to plan administrators with filing obligations under Title I of ERISA who comply with the provisions of the program and who have not been notified in writing by the DOL of a failure to file a timely annual report under Title I of ERISA. Form 5500-EZ filers and Form 5500 filers for plans without employees (as described in 29 U.S. Code of Federal Regulations [CFR] 2510.3-3[b] and [c]) are not eligible to participate in the DFVCP because such plans are not subject to Title I.

Program Criteria

.223 Participation in the DFVCP is a two-part process. First, plan administrators file with the EBSA a complete Form 5500, including all schedules and attachments, for each year relief is requested. Special simplified rules apply to “top hat” plans and apprenticeship and training plans. Second, plan administrators submit to the DFVCP the required documentation and applicable penalty amount. The plan administrator is personally liable for the applicable penalty amount, and, therefore, amounts paid under the DFVCP shall not be paid from the assets of an employee benefit plan.

Penalty Structure

.224 Per day penalty. The basic penalty under the program is $10 per day for delinquent filings.

.225 Per filing cap. The maximum penalty for a single late annual report is $750 for a small plan (generally a plan with fewer than 100 participants at the beginning of the plan year) and $2,000 for a large plan.

.226 Per plan cap. This cap is designed to encourage reporting compliance by plan administrators who have failed to file an annual report for a plan for multiple years. The per plan cap limits the penalty to $1,500 for a small plan and $4,000 for a large plan, regardless of the number of late annual reports filed for the plan at the same time. No “per administrator” or “per sponsor” cap exists. If the same party is the administrator or sponsor of several plans that are required to file annual reports under Title I of ERISA, the maximum applicable penalty amounts would apply for each plan.

.227 Small plans sponsored by certain tax-exempt organizations. A special per plan cap of $750 applies to a small plan sponsored by an organization that is tax-exempt under IRC Section 501(c)(3). The $750 limitation applies regardless of the number of late annual reports filed for the plan at the same time. It is not available, however,
if as of the date the plan files under the DFVCP a delinquent annual report exists for a plan year during which the plan was a large plan.

.228 Top hat plans and apprenticeship and training plans. The penalty amount for top hat plans and apprenticeship and training plans is $750.

IRS and PBGC Participation

.229 Although the DFVCP does not cover late filing penalties under the IRC or Title IV of ERISA, the IRS and PBGC agreed to provide certain penalty relief for delinquent Form 5500s filed for Title I plans in which the conditions of the DFVCP have been satisfied.

.230 Questions about the DFVCP should be directed to the EBSA by calling (202) 693-8360. For additional information about the Form 5500 series, visit the EFAST Web site at www.efast.dol.gov, or call the EBSA Help Desk toll-free at (866) 463-3278.

Voluntary Fiduciary Correction Program

.231 The Voluntary Fiduciary Correction Program (VFCP) encourages voluntary compliance by self-correcting violations of the law. The program also helps plan officials understand the law and gives immediate relief from payment of excise taxes under a class exemption.

.232 In April 2006, the EBSA expanded and simplified the VFCP to help employers and their professional advisors voluntarily correct violations of the law for employee benefit plans. This update to the VFCP reflects public comments and includes

- expansion and simplification of eligible transactions;
- streamlined documentation and clarified eligibility requirements;
- a model application form;
- clarification of what constitutes under investigation, allowing more entities to qualify for the program; and
- relief from civil penalties for transactions involving health and welfare plans.

.233 Under the VFCP, employers may voluntarily correct specific ERISA violations. Applicants must fully correct any violations, restore to the plan any losses or profits with interest, and distribute any supplemental benefits owed to eligible participants and beneficiaries. A no-action letter is given to plan officials who properly correct violations.

.234 The DOL also provides applicants conditional relief from payment of excise taxes for certain VFCP transactions under a class exemption related to the VFCP. The amended class exemption was also published in the Federal Register in April 2006.

.235 For more information about the VFCP, contact a local EBSA regional office through its toll-free number (866) 444-EBSA (3272) or visit the DOL online at www.dol.gov/ebsa.

DOL Outreach and Customer Service Efforts

.236 The DOL’s EBSA continues to encourage auditors and plan filers to call its Division of Accounting Services at (202) 693-8360 with ERISA-related accounting and auditing questions. Questions concerning the filing requirements and preparation of Form 5500 should be directed to the EBSA’s EFAST Help Desk at its toll-free number, (866) 463-3278.

.237 In addition to handling technical telephone inquiries, the EBSA is involved in numerous outreach efforts designed to provide information to practitioners to help their clients comply with ERISA’s reporting
and disclosure requirements. The agency’s outreach efforts continue to focus on plan audit quality, the current Form 5500, the EFAST Processing System, and other agency-related developments. Questions regarding these outreach efforts should be directed to the OCA at (202) 693-8360. Practitioners and other members of the public may also wish to contact the EBSA at its Web site at www.dol.gov/ebsa. The Web site also provides information on EBSA’s organizational structure, current regulatory activities, and customer service and public outreach efforts.

**Timeliness of Remittance of Participant Contributions Remains an Enforcement Initiative for the EBSA**

.238 The EBSA continues to focus on the timeliness of remittance of participant contributions in contributory employee benefit plans. Participant contributions are plan assets on the earliest date that they can reasonably be segregated from the employer’s general assets, but in no event later than (a) for pension plans, the 15th business day of the month following the month in which the participant contributions are withheld or received by the employer, and (b) for welfare plans, 90 days from the date on which such amounts are withheld or received by the employer.

**Reporting of Late Remittances**

.239 Failure to remit or untimely remittance of participant contributions constitutes a prohibited transaction under ERISA Section 406, regardless of materiality. Such transactions constitute either a use of plan assets for the benefit of the employer or a prohibited extension of credit. In certain circumstances, such transactions may even be considered an embezzlement of plan assets.

.240 Information on all delinquent participant contributions should be reported on line 4a of either Schedule H, Financial Information, or Schedule I, Financial Information—Small Plan, of Form 5500, regardless of the manner in which they have been corrected. In addition, plan administrators should correct the prohibited transaction with the IRS by filing a Form 5330 and paying any applicable excise taxes.

.241 For large plans that are subject to the audit requirement:

- Delinquent participant contributions reported on line 4a that constitute prohibited transactions (excluding those that have been corrected under the VFCP and for which the conditions of Prohibited Transaction Exemption [PTE] 2002-51 have been satisfied, as described in the following) may be reported on a separate supplemental schedule to be attached to Form 5500 and reported on by the IQPA.

- ERISA and DOL regulations require additional information to be disclosed in supplemental schedules. Some of this information is required to be covered by the auditor’s report. AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents* (AICPA, Professional Standards, vol. 1), provides guidance on the form and content of reporting when the auditor submits a document containing information accompanying the basic financial statements. If the auditor concludes that the plan has entered into a prohibited transaction and the transaction has not been properly disclosed in the required supplemental schedule, the auditor should (a) express a qualified opinion or an adverse opinion on the supplemental schedule if the transaction is material to the financial statements or (b) modify his or her report on the supplemental schedule by adding a paragraph to disclose the omitted transaction if the transaction is not material to the financial statements. See chapter 11, “Party in Interest Transactions,” of Audit and Accounting Guide *Employee Benefit Plans* for further discussion of prohibited transactions.

.242 Plan officials faced with remitting delinquent participant contributions should consider applying to the DOL’s VFCP. Plans that fully comply with the program, including satisfaction of the conditions of PTE 2002-51,

- will receive a no-action letter issued by the DOL that provides for no imposition of Section 502(l) penalties;
will receive relief from the excise tax provisions of the IRC;
will continue to report the occurrence and amount of the corrected delinquent remittances on line 4a of either Schedules H or I (but not on line 4d or Schedule G); and
are not required to report such transactions as supplemental information if the plan is required to be audited because the transactions are not considered to be prohibited transactions.

**Reporting of Delinquent Loan Repayments**

.244 Generally speaking, participant loan repayments are not subject to the DOL’s participant contribution regulation (29 CFR 2510.3-102). Accordingly, their delinquent remittance is not reported on line 4a of either Schedules H or I. However, delinquent remittance of participant loan repayments is a prohibited transaction.

.245 In Advisory Opinion 2002-2A, the DOL concluded that, although not subject to the participant contribution regulation, participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the final participant contribution regulation for purposes of determining when such repayments become assets of the plan. Specifically, Advisory Opinion 2002-2A concluded that participant loan repayments paid to or withheld by an employer for purposes of transmittal to the plan become plan assets as of the earliest date on which such repayments can reasonably be segregated from the employer’s general assets.

.246 Accordingly, the DOL will not reject a Form 5500 report based solely on the fact that delinquent forwarding of participant loan repayments is included on line 4a of Schedules H or I. Filers that choose to include such participant loan repayments on line 4a must apply the same supplemental schedule and IQPA disclosure requirements to the loan repayments as apply to delinquent transmittals of participant contributions.

.247 Delinquent forwarding of participant loan repayments is eligible for correction under the VFCP and PTE 2002-51 on terms similar to those that apply to delinquent participant contributions.

**Proposed Safe Harbor for Employee Contributions to Small Pension and Welfare Plans**

.248 On February 29, 2008, the DOL announced a proposed rule to provide greater protection for employee contributions deposited to pension and welfare benefit plans with fewer than 100 participants by proposing a safe harbor period of 7 business days following receipt or withholding by employers. The proposal is designed to protect workers by encouraging employers to deposit participant contributions to small plans in a timely manner. It also will provide employers with a higher degree of compliance certainty.

.249 The proposed regulation may be viewed at the DOL’s Web site at www.dol.gov/ebsa.
The DOL Issues Final Rule on Investment Advice Exemption for 401(k) Plans and Individual Retirement Accounts

.250 On January 21, 2009, the DOL published a final rule to make investment advice more accessible for participants in 401(k) type plans and individual retirement accounts (IRAs). The rule includes a regulation that implements the new statutory exemption for investment advice added to ERISA by the PPA.

.251 The PPA amended ERISA by adding a new prohibited transaction exemption that allows greater flexibility for investment advisers to give advice to participants of 401(k) plans and IRAs. One of the ways in which investment advice may be given under the exemption is through the use of a computer model certified as unbiased; the other way is through an advisor compensated on a level-fee basis. Several other requirements also must be satisfied, including disclosure of fees the advisor is to receive.

.252 The final regulation provides general guidance on the exemption’s requirements, including computer model certification and disclosures by fiduciaries. The regulation also includes a model form to assist advisors in satisfying the exemption’s fee disclosure requirement. In addition, the final rule includes a class exemption expanding the availability of investment advice.

.253 The final rule may be viewed at www.dol.gov/ebsa/pensionreform.html.

New Civil Penalty Rules Regarding Disclosures to Participants (ERISA Section 502[c][4])

.254 On January 2, 2009, the DOL published a final regulation under ERISA Section 502(c)(4), implementing the department’s authority to assess civil penalties against plan administrators who fail to disclose certain documents to participants, beneficiaries, and others as required by ERISA, as amended by the PPA.

.255 The PPA established new disclosure provisions relating to funding-based limits on benefit accruals and certain forms of benefit distributions; plan actuarial and financial reports; withdrawal liability of contributing employers; and participants’ rights and obligations under automatic contribution arrangements. The PPA gives the DOL authority to assess civil monetary penalties of up to $1,000 per day against plan administrators for violations of the new disclosure requirements. The proposed regulation sets forth the administrative procedures for assessing and contesting such penalties and does not address substantive provisions of the new disclosure requirements.

.256 The text of the final regulation is available on the EBSA’s Web site at www.dol.gov/ebsa.

The DOL Issues Final Rule for Distributions to Missing Nonspouse Beneficiaries

.257 On October 7, 2008, the DOL issued a final rule requiring the distribution of 401(k) type benefits for missing nonspouse beneficiaries from terminated plans to be rolled into IRAs.

.258 The PPA amended the IRC to allow the rollover of certain retirement benefits of a deceased participant into a tax-favored inherited IRA created on behalf of a nonspouse beneficiary.

.259 The new rule (and a related class exemption), conforms to the PPA by amending existing distribution requirements for terminated defined contribution plans, including abandoned plans, to require rollovers into inherited IRAs for missing nonspouse beneficiaries.

.260 The final rule and model notices for notifying participants or beneficiaries of the plan’s termination and distribution options may be found at www.dol.gov/ebsa/regs.
The DOL Issues Final Rules on Selecting Annuity Providers for Benefit Distributions From Pension Plans

.261 On October 7, 2008, the DOL published two final rules on selection of annuity providers. One rule limits the application of the “safest available” standard of Interpretative Bulletin 95-1 to defined benefit plans. The rule limits the application of the bulletin to the selection of annuity providers for benefit distributions from defined benefit plans.

.262 The DOL also announced a final regulation to provide guidance, in the form of a safe harbor, for the selection of annuity providers by fiduciaries for benefit distributions from individual account plans, such as 401(k) plans.

.263 The final rules may be viewed at www.dol.gov/ebsa/regs.

The DOL Issues Final Rule on Cross Trading

.264 On October 7, 2008, the DOL published a final rule regarding the new statutory exemption on cross-trading in the PPA.

.265 The rule implements a key provision of the PPA that allows plans to benefit from cross-trading, while ensuring that fair and equitable procedures are in place to protect workers’ retirement assets. Cross-trading is a transaction in which an investment manager uses its authority to sell a security on behalf of one client and to buy that same security on behalf of another client.

.266 The statutory exemption allows investment managers of plans governed by ERISA to execute cross-trades if certain conditions are met, including the adoption of written cross-trading policies and procedures. The rule establishes the requirements for the policies and procedures investment managers must adopt to engage in cross-trades.

.267 The rule may be found at www.dol.gov/ebsa/regs.

The DOL Proposes Regulations to Improve Disclosure of Fees and Expenses to Workers With 401(k)-Type Benefit Plans

.268 On July 23, 2008, the DOL published a proposed rule that will make it easier for workers covered by 401(k)-type plans to make informed retirement savings decisions by providing them with useful summary information, including fee and expense information, for investment options available under their plans.

.269 The centerpiece of the proposed regulation is a requirement to provide investment-related information in a comparative chart or similar format. As part of the proposal, the DOL has developed a model chart for complying with this requirement, while giving plan fiduciaries the flexibility to design their own charts or comparative formats.

.270 The proposal would also require plan fiduciaries to disclose basic information about the plan and its investment options, such as what options are available under the plan, how to give investment instructions, investment returns, fees and expenses, and how to obtain more detailed information. This information would be given to participants on a regular and periodic basis.

.271 The proposed rule and model comparative chart are available at www.dol.gov/ebsa.
The DOL Issues Guidance on Reporting Service Provider Fee and Compensation Information (Schedule C) Reporting for 2009 Form 5500

.272 On July 14, 2008, the DOL published guidance to help plan administrators and service providers comply with the new requirements for reporting service provider fee and compensation information applicable to Form 5500 filed for plan years beginning on or after January 1, 2009.

.273 The EBSA released 40 FAQs developed in response to questions from the employee benefit community on the new Schedule C requirements. The FAQs cover such issues as the alternative reporting option for eligible indirect compensation; electronic disclosure of fee information by service providers; fee reporting for brokerage window options in participant directed plans; and reporting on gifts, entertainment, and other nonmonetary compensation.

.274 In response to concerns expressed by service providers trying to make changes to their recordkeeping and information management systems in order to provide their employee benefit plan clients with fee and compensation information required for 2009 reports, the department is not requiring plan administrators to report service providers on the Schedule C as failing to provide fee and compensation information if the service provider furnishes the plan administrator with a written statement that (a) the service provider made a good faith effort to make any necessary recordkeeping and information system changes in a timely fashion and (b) despite such efforts, the service provider was unable to complete the changes for the 2009 plan year.

.275 The FAQs on Schedule C reporting can be found at www.dol.gov/ebsa.

Multiemployer Plan Notices

The DOL Issues Model Notice for Multiemployer Plans in Critical Status

.276 On March 25, 2008, the DOL published a proposed regulation providing a model notice for use by multiemployer defined benefit pension plans to notify plan participants and others that their plan is in critical funding status. The proposed regulation is the result of the PPA.

.277 The PPA amended ERISA and the IRC to require that sponsors of multiemployer defined benefit pension plans in critical status for a plan year provide notice of this status to participants, beneficiaries, the bargaining parties, the PBGC, and the DOL. The PBGC, created under ERISA to insure defined benefit pension plans, guarantees payment of basic pension benefits of affected workers and retirees.

.278 The notice must inform participants that their plan is in critical status and of the possibility that adjustable benefits may be reduced or even eliminated. The proposed regulation contains a model notice that may be used by plans to satisfy the notice requirement.

.279 The proposed regulation may be found at the DOL Web site at www.dol.gov/ebsa.

Multiemployer Plan Notice

.280 Sections 202 and 212 of the PPA established new funding requirements for multiemployer plans deemed to be in an endangered or critical status. No later than the 90th day of each plan year, an actuary is required to certify to the Treasury and the plan sponsor both of the following:

- Whether or not a plan is in endangered status for the plan year and whether or not the plan is or will be in critical status for the plan year

- In the case of a plan that is in a funding improvement or rehabilitation period, whether or not the plan is making the scheduled progress in meeting the requirements of its funding improvement or rehabilitation plan
Plans in “critical” status must include in the notice additional explanations regarding possible reduction of adjustable benefits.

No later than 30 days after a multiemployer plan is certified to be in endangered or critical status, the plan sponsor must provide notice of the endangered or critical status to participants and beneficiaries, the bargaining parties, the PBGC, IRS, and DOL.

An actuary’s failure to timely certify a plan’s status is equivalent to the plan sponsor having failed to file a Form 5500. This subjects the plan administrator to penalties of up to $1,100 per day pursuant to ERISA Section 502(c)(2). Also, pursuant to ERISA Section 502(c)(8), the plan administrator is subject to penalties of up to $1,100 per day for not adopting a funding or rehabilitation plan.

This requirement is effective for plan years beginning after 2007.

EBSA’s Final Rule on Default Investment Alternatives for Participant-Directed Plans

On October 24, 2007, the DOL published a final rule in the Federal Register establishing qualified default investment alternatives, making it easier for employers to automatically enroll workers in their 401(k) and other defined-contribution plans. The PPA directed the DOL to issue a regulation to assist employers in selecting default investments that best serve the retirement needs of workers who do not direct their own investments.

By facilitating the adoption of automatic enrollment plans, and by encouraging investments appropriate for long-term retirement savings, the DOL estimates the rule will result in between $70 billion and $134 billion in additional retirement savings by 2034.

Overview of the Final Regulation

The final regulation provides the following conditions that must be satisfied in order to obtain safe harbor relief from fiduciary liability for investment outcomes:

- Assets must be invested in a QDIA as defined in the regulation.
- Participants and beneficiaries must have been given an opportunity to provide investment direction, but have not done so.
- A notice generally must be furnished to participants and beneficiaries in advance of the first investment in the QDIA and annually thereafter. The rule describes the information that must be included in the notice.
- Material, such as investment prospectuses, provided to the plan for the QDIA must be furnished to participants and beneficiaries.
- Participants and beneficiaries must have the opportunity to direct investments out of a QDIA as frequently as from other plan investments, but at least quarterly.
- The rule limits the fees that can be imposed on a participant who opts out of participation in the plan or who decides to direct their investments.
- The plan must offer a “broad range of investment alternatives” as defined in the DOL’s regulation under Section 404(c) of ERISA.

The final regulation does not absolve fiduciaries of the duty to prudently select and monitor the QDIAs.
Qualified Default Investment Alternatives

.289 The final regulation does not identify specific investment products—rather, it describes mechanisms for investing participant contributions. The intent is to ensure that an investment qualifying as a QDIA is appropriate as a single investment capable of meeting a worker’s long-term retirement savings needs. The final regulation identifies two individually-based mechanisms and one group-based mechanism—it also provides for a short-term investment for administrative convenience.

.290 The final regulation provides for four types of QDIAs:

- A product with a mix of investments that takes into account the individual’s age or retirement date (an example of such a product could be a life-cycle or targeted-retirement-date fund)
- An investment service that allocates contributions among existing plan options to provide an asset mix that takes into account the individual’s age or retirement date (an example of such a service could be a professionally managed account)
- A product with a mix of investments that takes into account the characteristics of the group of employees as a whole, rather than each individual (an example of such a product could be a balanced fund)
- A capital preservation product for only the first 120 days of participation (an option for plan sponsors wishing to simplify administration if workers opt-out of participation before incurring an additional tax)

.291 A QDIA must either be managed by an investment manager, plan trustee, or plan sponsor who is a named fiduciary, or be an investment company registered under the Investment Company Act of 1940.

.292 A QDIA generally may not invest participant contributions in employer securities.

Other Significant Provisions

.293 Recognizing that some plan sponsors adopted stable value products as their default investment prior to passage of the PPA and this final regulation, the regulation provides a transition rule. The regulation grandfathers these arrangements by providing relief for contributions invested in stable value products prior to the effective date of the final rule. The transition rule does not provide relief for future contributions to stable value products.

.294 The final regulation clarifies that a QDIA may be offered through variable annuity contracts or other pooled investment funds.

.295 The rule provides that ERISA supersedes any state law that would prohibit or restrict automatic contribution arrangements, regardless of whether such automatic contribution arrangements qualify for the safe harbor.

.296 A copy of the regulation and a fact sheet detailing the rule may be found at the DOL’s Web site at www.dol.gov/ebsa/regs.

Civil Penalty Rules For Failure to Provide Diversification Notices (ERISA Section 502[c][7])

.297 On August 10, 2007, the DOL published a direct final rule amending the civil penalty regulation under ERISA Section 502(c)(7) to reflect amendments to this section in the PPA. The final regulation implements the DOL’s authority to assess civil penalties against plan administrators who fail to give employees notice of the right to sell company stock in their pension plan accounts.
.298 The PPA established rights of plan participants and beneficiaries to sell the company stock in their accounts and reinvest the proceeds into other investments available under a plan. It also required plan administrators to notify participants and beneficiaries of this new right and of the importance of diversifying the investment of retirement account assets.

.299 The amendments authorize the DOL to assess civil monetary penalties against plan administrators who fail to give employees notice of the right to sell company stock in their pension plan accounts. These penalties may range as high as $100 per day against plan administrators for each violation of the new notice requirement.

.300 The new rule may be found at the DOL’s Web site at www.dol.gov/ebsa.

Investments Reported as 103-12 Entities as Required by the DOL

.301 For many years, the EBSA has focused attention on the valuation of hard-to-value assets (currently, more commonly referred to as alternative investments). This year, the EBSA is looking at alternative investments held by plans and master trusts where these investments have not been subject to plan audit procedures.

.302 Due to the current economic crisis and the recent developments involving financial frauds in managed investment funds, the agency is expanding its scope to consider the current status of the investments being reviewed. EBSA plans to emphasize its focus on how plan management determines that investments exist and that their values have been adjusted to reflect the current market conditions.

EBSA Technical Guidance

Field Assistance Bulletins

.303 In the course of audits and investigations by EBSA field enforcement staff, difficult legal issues often arise. In an effort to provide the regional office staff with prompt guidance, the EBSA has developed a vehicle for communicating technical guidance from the national office. Field Assistance Bulletins (FABs) ensure that the law is applied consistently across the various regions. They also provide the regulated community with an important source of information about the EBSA’s views on technical applications of ERISA. All the FABs are posted on the EBSA’s Web site and available to the public. Currently, 21 FABs are outstanding. They cover many topics of current interest such as refinancing ESOP loans (FAB 2002-1), ERISA rules on participant loans where securities law might otherwise limit such loans (FAB 2003-1), duties to lost participants in a terminated plan (FAB 2004-2), interaction between IRS rules and DOL provisions for 403(b) plans (FAB 2007-2), and the responsibilities for ERISA fiduciaries to collect delinquent contributions (FAB 2008-1).

Help Desk—The FABs are available at www.dol.gov/ebsa/regs/fabmain.html.

Exempt Transaction Opinions

.304 Auditors are required to perform certain procedures with respect to party-in-interest transactions under chapter 11 of Audit and Accounting Guide Employee Benefit Plans. It is frequently difficult to assess whether a particular transaction is exempt from the prohibited transaction rules of ERISA. EBSA provides some assistance in that area with respect to common transactions through granting class exemptions for specific business relationships between a plan and a party-in-interest. These are referred to as prohibited...
transaction class exemptions (PTCE). A complete, searchable list of such transactions is available on EBSA’s Web site.

**Help Desk**—PTCEs are available at www.dol.gov/ebsa/Regs/ClassExemptions/main.html.

**Advisory Opinions**

.305 EBSA uses the advisory opinion program to provide fairly rapid responses to timely questions that are not part of a regulation project such as the AICPA’s 2002 request for clarification on the treatment of participant loan repayments under the plan asset regulations (DOL Advisory Opinion 2002-2a). Opinions issued since 1999 are summarized on EBSA’s Web site for easy research.

**Help Desk**—Advisory opinions are available at www.dol.gov/ebsa/Regs/AOs/main.html.

**Recent AICPA Independence and Ethics Pronouncements**

.306 Audit Risk Alert *Independence and Ethics Developments—2008* (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

**On the Horizon**

.307 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to employee benefit plans or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.308 The following table lists the various standard setting bodies’ Web sites, through which information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

(continued)
Overhaul Project—AICPA Audit and Accounting Guide Employee Benefit Plans

.309 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide Employee Benefit Plans, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1991. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.310 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards) to apply the clarity drafting conventions and converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board (IAASB). The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the explanatory memorandum “Clarification and Convergence” and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

Auditing Pipeline—Issuers

PCAOB Risk Assessment Standards

.311 In October 2008, the PCAOB proposed seven new auditing standards to update and supersede the current risk assessment standards. The PCAOB chairman noted that the proposals demonstrate the view that the risk of fraud is a central part of the audit process and not a separate consideration. The proposed standards integrate the risk assessment standards with the standard for the audit of internal control over financial reporting. In February 2009, the CAQ issued a comment letter on the proposed standards. Readers can review the full text of the comment letter at http://thecaq.org/newsroom/pdfs/CAQCommentLetter-PCAOBRiskAssessmentAuditStds.pdf. The comment period for these proposed standards ended February 2009. As with any new auditing standard or amendment to a PCAOB standard, after adoption by the PCAOB the standards will be submitted to the SEC for approval.

Engagement Quality Review

.312 In March 2009, the PCAOB reproposed an auditing standard on engagement quality review for public comment. The PCAOB made substantial changes to the proposed auditing standard since it was first proposed.
in February 2008. The proposal would supersede the PCAOB’s current audit quality control standard and would apply to all audit engagements and engagements to review interim financial information conducted pursuant to the standards of the PCAOB. The proposed standard provides a framework for an engagement quality reviewer to objectively evaluate the significant judgments made by the engagement team and the conclusions reached in forming an overall conclusion about the engagement.

Accounting Pipeline

.313 FASB has the following projects underway that may affect employee benefit plans:

- Going concern
- Subsequent events
- Credit crisis projects that include the following:
  - Measuring liabilities under FASB Statement No. 157
  - Embedded credit derivatives scope exceptions
  - Determining when a market for an asset or liability is active or inactive and determining when a transaction is distressed
  - Improving disclosures about fair value measurements
  - Applying fair value to interests in alternative investments
- Phase 2 of the applicability of FIN 48 for private entities (FIN 48 is codified at FASB ASC 740, Income Taxes)
- An amendment to FASB Statement No. 162, The Hierarchy of Generally Accepted Accounting Principles, and approval of FASB ASC
- Disclosure of certain loss contingencies
- Phase 2 of postretirement benefit obligations, including pensions

Employee Benefit Plan Resources

.314 The following are various resources that practitioners engaged in the employee benefit plan industry may find beneficial.

AICPA Employee Benefit Plan Audit Quality Center

.315 The AICPA EBPAQC, a firm-based, voluntary membership center with the goal of promoting quality employee benefit plan audits, celebrated its fifth anniversary in March. An indicator of the EBPAQC’s success comes from the DOL, which is finding through its audit quality monitoring program a demonstrable difference between the quality of audits performed by EBPAQC firms and those audits performed by nonmembers. Reviews performed by the DOL’s EBSA continue to show fewer audit deficiencies in audits performed by EBPAQC member firms. In addition, where deficiencies are noted they tend to be less severe for EBPAQC member firms.

.316 As members of the EBPAQC, firms have available to them tools and resources that are not available from any other source. In addition to providing periodic e-alerts with information about recent developments affecting employee benefit plan audits, the EBPAQC has recently made available to its members

- new resource centers, including a plan investments resource center that includes valuable new tools and resources to help auditors and plan sponsors understand and implement FASB Statement No. 157, and a health and welfare plan resource center that centralizes resources useful to auditors of those plans.

3 See footnote 1.
live forum, member-only conference calls to share important information and answer participant questions on a wide range of technical and practice topics. These calls are free to members, and as an added benefit, the EBPAQC offers a continuing professional education (CPE) option for a small fee.

new tools to help sponsors of 403(b) plans now subject to audit understand what questions they may expect from their plan auditors and what information they might be expected to provide.

a “Topix” primer on alternative investments in employee benefit plans to help members gain a general understanding of these types of investments.

Visit the EBPAQC Web site at www.aicpa.org/ebpaqc to see a complete list of the more than 1,700 EBPAQC members and to preview benefits. For more information, contact the EBPAQC at ebpaqc@aicpa.org.

Resource Central

The following are various resources that practitioners auditing employee benefit plans may find beneficial.

Publications

Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide Employee Benefit Plans (2009) (product no. 012599kk [paperback], WEBXX12 [online], or DEBXX12 [CD-ROM])
- Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XX [online], or DAN-XX [CD-ROM])
- Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (2008) (product no. 012528kk [paperback], WDI-XX [online], or DDI-XX [CD-ROM])
- Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XX [online], or DAS-XX [CD-ROM])
- Audit Guide Service Organizations: Applying SAS No. 70, As Amended (2008) (product no. 012779kk [paperback], WSV-XX [online], or DSV-XX [CD-ROM])
- Audit Risk Alert Current Economic Crisis: Accounting and Auditing Considerations—2009 (product no. 0223308kk [paperback], WGE-XX [online], or DGE-XX [CD-ROM])
- Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XX [online], or DIA-XX [CD-ROM])
- Audit Risk Alert Understanding the New Auditing Standards Related to Risk Assessment (product no. 022526kk [paperback])
- Audit Risk Alert Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115 (product no. 022539 [paperback])
- Checklists and Illustrative Financial Statements for Defined Benefit Pension Plans (product no. 008998kk [paperback] or WDB-CL [online])
- Checklists and Illustrative Financial Statements for Defined Contribution Pension Plans (product no. 009008kk [paperback] or WDC-CL [online])
- Checklists and Illustrative Financial Statements for Health and Welfare Benefit Plans (product no. 009018kk [paperback] or WHW-CL [online])
- Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XX [online])
• Accounting Trends & Techniques—Employee Benefit Plans, 2nd Edition (product no. 006651kk [paperback])
• Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XX [online], or AAM-XX [loose leaf])
• AICPA Audit Practice Aid SAS No. 70 Reports and Employee Benefit Plans (product no. 061061kk [paperback or CD-ROM])

.320 Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

• Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk [paperback])
• Financial Reporting Alert Not-for-Profit Organizations: Accounting Issues and Risks—2008 (product no. 029207kk [paperback])

AICPA reSOURCE: Accounting and Auditing Literature

.321 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides, Audit Risk Alerts, Accounting Trends & Techniques, and more. To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

Continuing Professional Education

.322 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry. Among the many courses, the following are specifically related to employee benefit plans:

• Audits of 401(k) Plans
• Employee Benefit Plans Audit and Accounting Essentials
• Form 5500: Prepare It Fast—File It Right...The 1st Time
• SAS No. 70 Auditing Guidance

.323 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.324 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

.325 To register or learn more, visit www.cpa2biz.com.

Webcasts

.326 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.
In particular, Employee Benefit Plans Strategic Briefing has been archived and is available on demand. This webcast, held on April 22, 2009, was a live interactive AICPA webcast covering all the hot issues currently affecting employee benefit plans. Participants learned about current accounting, auditing, and regulatory developments, including the effect of recently issued pronouncements on both preparers and auditors of employee benefit plans. Speakers included Marcus J. Aron, CPA; Marilee Lau, CPA; and Michele Weldon, CPA.

Member Service Center

To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conferences

The AICPA sponsors an annual Employee Benefit Plans Accounting, Auditing and Regulatory Update Conference in the late fall. This conference is a two-day high level forum that lets you interact with expert auditors and members of the DOL. The 2009 conference will be held December 7–8, 2009.

The AICPA also sponsors an annual National Conference on Employee Benefit Plans each spring. This conference is designed to update attendees on recent developments related to employee benefit plans. The 2010 conference will be held in May 2010. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Industry Expert Panel—Employee Benefit Plans

Appendix B—Definitions of Certain Investments

The following list includes certain investments as defined by the instructions to the Form 5500, Annual Return/Report of Employee Benefit Plan.

**master trust.** A trust for which a regulated financial institution (bank, trust company, or similar financial institution that is regulated, supervised, and subject to periodic examination by a state or federal agency) serves as trustee or custodian and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held.

**common/collective trust (CCT).** A trust maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or a controlled group of corporations.

**pooled separate account (PSA).** An account maintained by an insurance carrier, which is regulated; supervised; and subject to periodic examination by a state agency, for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or a controlled group of corporations.

**103-12 Entity.** An entity that is not a master trust, CCT, or PSA whose underlying assets include plan assets within the meaning of 29 U.S. Code of Federal Regulations 2510.3-101 of 2 or more plans that are not members of a related group of employee benefit plans.

**registered investment company.** An investment firm that is registered with the Securities and Exchange Commission and complies with certain stated legal requirements for the collective investment and reinvestment of assets contributed thereto from investors (employee benefit plans and nonemployee benefit plans).
Appendix C—Auditing Health and Welfare Plans

This section is intended to describe certain audit challenges unique to health and welfare benefit plans and how these challenges cause health and welfare plans to be more complex and expensive to audit than other types of benefit plans. The operations surrounding the administration of health claims payments have always been complex and difficult for auditors to fully understand and document. The requirements for more timely claims processing, appeal decisions, and the privacy requirements under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) have added to the complexity and therefore, the difficulty.

HIPAA Privacy Concerns

HIPAA established standards for the privacy and protection of individually identifiable electronic health information as well as administrative simplification standards. HIPAA includes protection for those who move from one job to another, are self-employed, or have preexisting medical conditions. It places requirements on employer-sponsored group health plans, insurance companies, and health maintenance organizations.

The rules include standards to protect the privacy of individually identifiable health information. The rules (applicable to health plans, health care clearinghouses, and certain health care providers, known collectively as “covered entities”) present standards with respect to the rights of individuals who are the subjects of this information, procedures for the exercise of those rights, and the authorized and required uses and disclosures of this information. These are the first-ever national standards to protect medical records and other personal health information.

Business Associates’ Agreements

HIPAA requires that plan sponsors enter into a business associates’ agreement (BAA) with any of their service providers that have access to any protected health information (PHI). Accordingly, an auditor is considered a business associate and, after entering into a BAA, should be permitted access to the necessary information required by professional standards to opine on a plan’s financial statements. When asked to sign a BAA, auditors need to take special care in reviewing the agreement.

Help Desk—The American Recovery and Reinvestment Act of 2009 (ARRA) includes changes to HIPAA. In the past, HIPAA was only applicable to the use and disclosure of the PHI by covered entities. Vendors who provided administrative services to covered entities (for example, those providing legal, accounting, IT, financial support, or other similar services) were required to sign BAAs, which, by contract, they then agreed to maintain the privacy and security of the PHI. However, under the ARRA, several of the HIPAA security and privacy requirements have been expanded, including business associates being subject to civil and criminal penalties and enforcement proceedings for violations of HIPAA.

For more information on the ARRA’s changes to HIPAA, including data restrictions, disclosure and reporting requirements as well as various applicable effective dates, see www.rules.house.gov/111/legtext/111_hr1_text.pdf.

Nondisclosure Agreements

Sponsors of health and welfare plans frequently hire third party administrators (TPAs) to perform administrative functions for their plans, such as administration of participant claims. Generally, the plan auditor tests a sample of claims processed by the TPA as part of the audit. As a result, confidential information generally is exchanged. Before agreeing to provide this proprietary information and data, TPAs frequently request the plan sponsor or auditor, or both, to sign confidentiality agreements or nondisclosure agreements (NDAs). As
with business associates agreements, auditors need to take special care in reviewing nondisclosure agreements. Often, the auditor may not agree with certain language in the agreement, resulting in delays in the audit until mutually agreeable language is determined.

**Help Desk**—NDAs can take many forms and arise on the audit of all types of plans. For example, some TPAs require the auditor to agree to the terms of an NDA prior to being permitted limited access to electronic databases needed to obtain audit evidence directly from the TPA’s Web site. Acceptance of these terms would constitute an NDA.

**Audit Documentation**

As previously noted, HIPAA requires that plan sponsors enter into a business associates’ agreement with any of their service providers that have access to the PHI. Accordingly, an auditor is considered a business associate and, after entering into a business associates agreement, should be permitted access to the necessary information required by professional standards to opine on a plan’s financial statements. HIPAA regulations allow for the auditors’ working papers to contain the PHI; however, the PHI in working papers obligates the auditing firm to comply with the HIPAA privacy laws and business associates agreement provisions to maintain the privacy of the PHI, which includes

- restricting access to the working papers,
- providing an accounting of disclosures of the PHI, and
- reporting to plan management any misuse of the PHI by the accounting firm.

AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), provides guidance to auditors on documentation requirements. See paragraphs 5.80–.87 of Audit and Accounting Guide Employee Benefit Plans for guidance.

“De-identified” health information is not subject to HIPAA. To be considered de-identified under HIPAA, information in working papers may not contain the following:

- Names
- Dates (such as birth date, admission date, discharge date, and date of death)
- Age, if age 90 or older
- Complete social security numbers¹
- Telephone and fax numbers
- E-mail addresses
- Medical record numbers
- Health plan beneficiary numbers
- Account numbers

**Considerations When Planning a Health and Welfare Plan Audit**

Before performing a health and welfare plan audit, it is critical for the auditor to obtain a clear understanding of the plan. Plan sponsors commonly wrap multiple benefits together into a single plan entity, and don’t always run the contribution and distribution activity for every benefit through a trust (for example, the contributions and premiums associated with insured life benefits are frequently processed through the general assets of the sponsor). In addition, given that many health and welfare plan benefits are negotiated annually, items such as eligibility criteria and benefit coverage can change from year to year. Because the majority of today’s TPAs utilize systems focused on automation and speed, a key element in the claims administration

---

¹ Including complete social security numbers in working papers is not permissible under HIPAA. Auditors should consider blocking out all digits except the last four in a social security number if this information is necessary for identification purposes.
process is the proper accumulation and installation of plan data by the TPA. Plan data includes, but is not limited to, key benefit provisions, participant information, providers (both network and nonnetwork), and rate structure. Once the TPA has compiled the information and has input it into their system, plan management should ensure they have controls in place to review all key plan parameters input into the TPA system.

When planning a health and welfare plan audit, the auditor needs to have a clear understanding of the following:

- Which plan benefits are fully insured versus self-insured
- The identity of the plan’s various benefit providers and the elements of the contractual arrangements between the plan and those providers
- For self-insured claims:
  - How and by whom the various claims are administrated and adjudicated
  - How administrative fees are charged by the provider
  - Whether the benefit payment is accounted for by the provider when the check is written, when the check is presented for payment, or when the check has cleared the bank
- For insured benefits, how the premiums are determined and billed and if the contract requires or provides for premium stabilization reserves or experience-rated adjustments
- The funding arrangements for the plan and which benefits are employer paid versus participant paid, and how associated contributions are calculated, accumulated, and remitted or utilized to pay benefits
- If benefits paid from a trust (like a voluntary employees’ beneficiary association [VEBA] trust or a taxable trust), a 401(h) account, or from the general assets of the plan’s sponsor
- The frequency of benefit payments (daily, monthly, quarterly, or annually)
- Information systems used to support the plan operations and which systems are in-house systems versus outsourced

While gaining their understanding of the preceding, it is recommended that auditors consider the responses with regard to all covered participants. All covered participants include active participants, former employees under the Consolidated Omnibus Budget Reconciliation Act (COBRA), eligible dependents of active and former employees, and retirees. Understanding the various benefits offered, the service providers, the various transaction flows and related control environment is integral to developing the audit approach and the sampling methodology. Standard audit programs for employee benefit plans should be tailored to the unique nature of health and welfare plans.

Unique Health and Welfare Plan Audit Areas

This section is intended to describe certain unique audit areas specific to health and welfare plans and in certain instances to provide examples of audit procedures.

Claims and Potential Problems

When auditing claims, it is not expected that the auditor would have the knowledge of a skilled billing claims specialist or a skilled medical specialist when claims are processed by a third-party administrator. It is important, however, that the auditor has a basic understanding of the terms of the plan and has the skill and knowledge to test that claims are being properly adjudicated. The auditor may want to be aware of any processing problems that the plan is experiencing with claims and discuss what the plan is doing to correct these issues with the plan administrator. Examples of potential problems when processing claims include

- unbundling (charging for performance of multiple procedures when only one procedure was performed or should be billed per American Medical Association guidelines) or upcoding (charging for a higher level of service than the procedure actually performed),
- fictitious services or unnecessary services performed by providers,
• duplicate claims or duplicate coverage,
• kickbacks,
• nontransmittal of rebates and discounts to the plan, and
• improper denial of claims.

When testing health and welfare claims, some errors typically found include the following:

• **Eligibility.** Most problems with eligibility relate to a participant who terminates and whose eligibility ceased before the date of service for which the claim was filed. Note that the testing for eligibility is different from those procedures for a pension or 401(k) plan. In many cases, the person receiving the benefit is different from the actual participant. Audit procedures may include verifying the coverage elected by the participant at the date of service. Many plans allow coverage for a spouse, dependents, or other family members.

• **Wrong individual.** The claim was paid for the wrong person. This occurs when two or more participants have the same or similar names. Claims may also be paid for the wrong family member.

• **Deductibles.** Deductibles are not calculated properly.

• **Accumulators.** Benefits are improperly totaled, which may cause the benefit amount to improperly exceed the maximum benefit.

• **Other errors.** Errors may occur in the diagnosis code, the Current Procedural Terminology or Healthcare Common Procedure Coding System code, or in the information in the claims form.

**Contracts With Benefit Service Providers**

For any contract with a benefit service provider, the auditor may examine the reconciliation of the amounts due to or from the benefit service provider to determine if the amounts are appropriate. Any amounts due from the benefit provider are typically classified as a receivable in the statement of net assets, and amounts due to the provider for benefits paid would normally be shown in the financial statements as a liability on the statement of net assets. If the benefit payment has not been disbursed by any party, then the amount would typically be included with benefit obligations of the plan. The auditor may want to consider the role played by the TPA. Often, the TPA directly pays the claim and then the plan reimburses the TPA. If the TPA pays the claim, then the claim would be recorded as benefits paid and a “due to the TPA” liability may need to be recorded on the statement of net assets.

**Rebates Receivable**

If rebates receivable from a service provider exist, the auditor may examine those rebates to determine if the correct amount for the appropriate period of time has been properly reflected in the financial statements. In addition, the auditor may gain an understanding of the service contracts and apply procedures to determine if all rebates have been received by the plan. These include rebates from prescription drug programs or excess premiums paid over claims incurred under certain contractual arrangements with insurance companies. The auditor would also consider the propriety of the rebate. For example, if the payment vehicle for the claims receiving the rebate was the VEBA trust account, receipt of the rebate by the plan sponsor, and deposit of such rebate into a nontrust account may not be appropriate.

**Accumulated Eligibility Credits**

Many plans cover participants when they are terminated or otherwise unemployed. Single employer plans often cover up to 30 days after employment ends. Multiemployer plans can cover up to 60 days or longer after employment ends. In the construction industry, where work is seasonal, hour banks are often used to provide insurance coverage for the months when the participant does not work. If the plan permits accumulated eligibility credits, there should be an obligation recorded for those credits. The auditor may determine whether the plan provides for accumulated eligibility credits and, if so, if the obligation has been properly calculated.

---

2 Physicians’ Current Procedural Terminology (CPT) is a listing of descriptive terms and identifying five-digit codes for reporting medical services and procedures. The Health Care Financing Administration developed level II and level III codes in its Healthcare Common Procedure Coding System to bill for supplies and services not covered by a CPT code (level I).
Actuarial Data and Census Information

The actuarial data and census information furnished by the health and welfare plan sponsor to the actuary, especially when the plan covers retirees, is as important as the data used in a defined benefit pension plan. The auditor may gain assurance through confirmation or other audit procedures that the actuarial data and census information furnished to the actuary is complete and accurate.

Stop-Loss Coverage

One way for a plan to protect itself against excessive losses is to purchase stop-loss insurance. Stop-loss insurance can be either specific or aggregate. Specific stop-loss insurance protects the plan against claims that exceed a predetermined maximum per person or per family. All claims above the specific stop-loss amount (for example, $100,000) are normally reimbursed to the plan at 100 percent up to a limit contained in the contract. Aggregate stop-loss coverage reimburses the plan when total eligible claims exceed a predetermined aggregate, such as 125 percent of expected claims.

Claims Incurred but Not Reported

Benefit obligations for a self-funded plan should present the amount of claims payable and currently due for active and retired participants, dependents, and beneficiaries, and claims incurred but not reported (IBNR) for active participants. IBNR for retired participants is generally included in the postretirement benefit obligation.

For a self-funded plan, the cost of IBNR should be measured at the present value, as applicable, of the estimated ultimate cost to the plan of settling the claims (including those associated with terminal diseases and catastrophic accidents) beyond the measurement date pursuant to the plan's provisions and regulatory requirements, regardless of employment status. Note that the ultimate cost to the plan may be limited to the maximum coverage specified in the plan document, stop-loss coverage, Medicare, and so on. Auditors will want to consider who calculated the IBNR estimate (calculated by sponsor, an actuary, claims administrator, and so on), the appropriateness of assumptions used, and integrity of underlying data utilized for developing the estimate. In addition, the scope of procedures performed on the IBNR estimate as part of the sponsor's financial statement audit will likely be different than that which is appropriate for the plan. So, caution should be taken when relying on audit work performed during the sponsor entity audit.

Premium Stabilization Reserves

In some fully insured or minimum premium arrangements, an insurance company may require a contract holder to maintain a premium stabilization reserve. Such reserves are usually adjusted by the insurance company at the end of the policy year. The annual adjustment is often the computed difference, or some factor thereof, between actual claims experience of the insurer and premiums paid by the contract holder. Generally, premium stabilization reserves are held in the general assets of the insurance company and are used to pay future premiums of the contract holder. If the premium stabilization reserve is certain to provide future benefits to the plan, the reserve is reported as an asset of the plan. In some cases, the contract holder may liquidate the premium stabilization reserve via cash payment from the insurance company. In other cases, the premium stabilization reserve is forfeited by the contract holder in the event of termination of coverage. Criteria for realization of the reserve are considered when evaluating the existence of the asset.

Health Savings Accounts and Health Reimbursement Arrangements

Individuals enrolled in certain high-deductible health plans (HDHPs) can establish health savings accounts (HSAs) to receive tax-favored contributions (from either the employee or employer). The contribution made to the HSA is distributed on a tax-free basis to pay or reimburse qualifying health expenses. The contribution
may be used for future expenses or may be used (on a taxable basis) for nonhealth purposes. Funds held in
the HSA can be used to pay premiums for long term care insurance and health insurance premiums while
receiving unemployment benefits or continuation benefits under COBRA. The HSA’s funds are required to
be held by an insurance company or trustee (bank). HSAs are not “use-it-or-lose-it” plans, and the participant
owns the account and is responsible for substantiating distributions from their HSA account.

A Health Reimbursement Arrangement (HRA) is similar to an HSA; however, HRAs are funded solely
through employer contributions and may not be funded by the employee through a voluntary salary
reduction agreement. No requirement exists for the arrangement to be part of an HDHP, and the funds can
be held by the employer or a VEBA trust. Employees are reimbursed tax free for qualified medical expenses
up to a maximum dollar amount for a coverage period. Although HRA amounts are not portable, unused
amounts in an HRA can generally be carried over to the next year. The employer is not permitted to refund
any part of the balance to the employee, the account cannot be used for anything other than reimbursements
for qualified medical expenses, and the plan must substantiate distributions made from the HRA account.

Should an HSA or HRA be wrapped into an audited welfare plan, consultation with the plan’s legal counsel
may be needed to determine the appropriate accounting and auditing procedures, and whether the associated
activity should be included in the audited plan’s financial statements. Possible considerations in that
determination might include where the sources of funding come from (for example, employers, participants,
or both), who has legal title to the amounts in these accounts, how the claims are adjudicated (for example,
by employer, self-adjudicated by participant, or other), whether a carry-forward provision exists into the next
plan year for unused amounts, and so on.

In Field Assistance Bulletins 2004-1 and 2006-2, the Department of Labor (DOL) addressed various questions
concerning HSAs, including the issue of whether HSAs established in connection with employment-based
group health plans constitute employee welfare benefit plans for purposes of Title I of ERISA.

**COBRA**

Many health and welfare plans are required to provide continuation of benefits upon termination of
employment through COBRA. This continuation of benefits may be considered a postemployment or
postretirement obligation, depending upon the terms of participation. In accordance with SOP 01-2, the benefit
obligation associated with COBRA would be equal to the actuarial present value of the cost of such benefits,
less the present value of expected participant contributions for such benefits. Many plans require that
participants pay the estimated full cost of health benefits provided under COBRA. In such situations, the net
cost to the plan sponsor for such benefits is zero, thus the plan would not recognize an obligation. If the plan
sponsor subsidizes the cost of health benefits under COBRA, an obligation should be recognized by the plan
to the extent that all criteria required by either Financial Accounting Standards Board (FASB) Statement No.
112, *Employers’ Accounting for Postemployment Benefits—an amendment of FASB Statements No. 5 and 43,* or FASB
Statement No. 106, *Employers’ Accounting for Postretirement Benefits Other Than Pensions,* or both, are satisfied.

In many cases, the collection of COBRA contributions and payment of COBRA benefits are performed by
TPAs. The administration of these benefits needs to be understood, so accounting for all COBRA activity is
included in the financial statements of the plan. In the event that benefits provided by COBRA are self-insured,
the obligation for IBNR claims should include COBRA participants.

Additional detailed information on COBRA continuation health coverage can be found on the DOL’s Web site

**Notices for COBRA Continuation Health Care Coverage**

The DOL has published rules clarifying the requirements for notices under COBRA for employees, employers,
and plan administrators. Under COBRA, most group health plans must give employees and their families the
opportunity to elect a temporary continuation of their group health coverage when coverage would otherwise
be lost for reasons such as termination of employment, divorce, or death. COBRA requires that certain notices
be given before individuals can elect COBRA coverage. The plan administrator must give employees and
spouses a general notice explaining COBRA when the employees and spouses first become covered under the
plan. When an event occurs that would trigger a right to elect COBRA coverage, either the employer or the
employee and his or her family members must notify the plan of the event. Finally, when the plan receives this notice, the plan must notify individuals of their COBRA rights and allow them to elect continuation coverage. Model notices contained in the regulation are available for download from the EBSA’s Web site at www.dol.gov/ebsa.

**Help Desk**—Normally COBRA allows out-of-work employees to keep their former health coverage for up to 18 months by letting them pay their share as well as the amount the employers used to pay, as well as an administrative fee. The ARRA, signed into law on February 17, 2009, includes provisions to directly provide relief to millions on the COBRA plan or ex-employees who need COBRA coverage. This “COBRA stimulus plan” will provide

- a COBRA premium subsidy. People who are currently enrolled in the COBRA plan will get a 65 percent reduction in the amount the employee pays for premium costs (that is, the employee’s out-of-pocket cost without regard to employer paid amounts). Those eligible are employees terminated between September 1, 2008, and December 31, 2009. The subsidy is limited to 9 months and is available only to those without another source of group health insurance. No premium reduction exists for periods of coverage that began prior to February 17, 2009.
- COBRA benefits to ex-employees who are denied coverage. Individuals who lost jobs after September 1, 2008, but who didn’t sign up for COBRA at the time will get a second chance to do so. Employers must send these former workers a notice by mid-April. The former employees will then have 60 days after that date to act.

For more information on COBRA Continuation Coverage Assistance under the ARRA, visit www.dol.gov/ebsa/COBRA.html.
Appendix  D—Resources for Economic Information

The Internet covers a vast amount of information that you may find valuable. Some of the sites not previously mentioned in this alert and links to relevant documents regarding economic information include those shown in the following table:

AAM Section 8070

State and Local Governmental Developments—2009

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of state and local governments with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by a government’s internal management to address areas of audit concern.

This publication is an other auditing publication, as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole CPA, CFE, CFF
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Eric Berman, MSA, CPA
Edward P. Chait, CPA
John Good, CPA
Dan O’Keefe, CPA, CFE

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your state and local governmental audits and also can be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.02 Further, if your state or local government audit is performed under Government Auditing Standards issued by the Comptroller General of the United States of America (also referred to as the Yellow Book or...
generally accepted government auditing standards (GAGAS) or Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations, (referred to as a single audit) you should refer to AICPA Audit Risk Alert Government Auditing Standards and Circular A-133 Audits—2008 (product no. 022458kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Audit Risk

.03 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), audit risk is broadly defined as the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of the risk (both inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and the risk (detection risk) that the auditor will not detect such misstatements.

.04 The auditor’s combined assessment of inherent risk and control risk is described as the risks of material misstatement. The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed.

.05 As set forth in paragraph .12 of AU section 312, the auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures. Furthermore, paragraph .19 of AU section 312 explains that the auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor to express an opinion on the financial statements as a whole at an appropriately low level of audit risk. In the context of a governmental audit, the overall financial statement level would be at the level of the opinion units, as discussed in paragraph 4.32 of the AICPA Audit and Accounting Guide State and Local Governments (product no. 012669kk).

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.06 AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), establishes requirements and provides guidance about implementing the second standard of field work, as follows: “The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.” Obtaining this understanding is further complicated by the rapidly changing economic environment. In accordance with paragraph .04 of AU section 314, the auditor’s primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

.07 The auditor’s understanding of the entity and its environment consists of an understanding of the following:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
• Measurement and review of the entity’s financial performance
• Internal control, which includes the selection and application of accounting policies

.08 In addition to appendix A of AU section 314, paragraph 4.56 of AICPA Audit and Accounting Guide State and Local Governments contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment relating to the categories previously discussed. Understanding the effects of the current economic climate on each specific audit client is a key step in designing the audit plan.

.09 Business risks result from conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies. The setting of inappropriate objectives and strategies also results in business risks. Just as the external environment changes, the handling of the entity’s business also is dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement; however, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements; however, not all business risks give rise to risks of material misstatement.

.10 Additionally, state and local governments may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces). After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding. In the context of a governmental audit, the overall financial statement level would be at the level of the opinion units as discussed in paragraph 4.32 of the AICPA Audit and Accounting Guide State and Local Governments. Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The Current Economic Crisis

.11 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity’s financial statements.

.12 Currently, the U.S. economy continues to experience severe instability. The National Bureau of Economic Research officially declared that, as of December 2007, the United States slid into a recession. The length of the recession and whether the United States will enter into a depression are yet to be determined. Some key occurrences that exhibit the gravity of the economic crisis include the following:

• Federal government intervention in the private sector has increased. Numerous financial institutions and automakers have received bailouts from the government.
• State governments, facing budget shortfalls in the billions of dollars, are looking to the federal government for support.
• Millions of households owe more on their mortgages than their homes are currently worth. The number of residential home foreclosures continues to increase.
• The number of jobless claims continues to increase.
• U.S. real gross domestic product (GDP), the broadest measure of economic activity, continues to decrease at an increasing rate.
The financial markets continue to experience instability—historic lows followed by rallies. In March 2009, the S&P 500 and Dow Jones Industrial Average reached their 12-year lows, and NASDAQ closed at its lowest point since October 2002.

The Federal Reserve has continued to decrease the federal funds interest rate.

The demand for U.S. Treasury bills has increased at a staggering rate, which drove the interest rate for these Treasury bills to less than 1 percent in March 2009.

The Treasuries-Over-Euro-Dollar Spread reached 4.63 percent in October 2008, a historic high, before returning to 1.04 percent in March 2009.

These key economic indicators further illustrate the severity of the recessionary period the United States is experiencing.

**Key Economic Indicators**

.14 The GDP measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to preliminary estimates of the Bureau of Economic Analysis, real GDP decreased at an annual rate of 5.7 percent in the first quarter of 2009. This data indicates a continuation of the slowing of the economy seen in the fourth quarter of 2008, which experienced a decrease of 6.3 percent.

.15 The unemployment rate continues to rise steadily. In April 2009, the unemployment rate was 8.9 percent, representing approximately 13.7 million people. Since April 2008, the number of unemployed persons has increased by about 6.0 million or 3.9 percentage points.

.16 As of March 2009, the Federal Reserve had decreased the target for the federal funds rates more than 5.0 percentage points to less than 0.25 percent. The Federal Reserve noted in its March 18, 2009, press release “that economic conditions are likely to warrant exceptionally low levels of the federal funds rate for an extended period.”

**Government Intervention to Curtail the Economic Crisis**

.17 The U.S. government has taken unprecedented actions to prevent worsening economic conditions, including passing the American Recovery and Reinvestment Act (ARRA) in February 2009 and the Emergency Economic Stabilization Act of 2008 (EESA), facilitating the sale of ailing banks and dramatically increasing the monetary programs available from the Federal Reserve. The results of these actions have not been fully realized to date.

**The American Recovery and Reinvestment Act of 2009**

.18 In February 2009, President Obama signed legislation designed to work hand in hand with the EESA to stimulate the U.S. economy. The ARRA is designed primarily to combat the rising unemployment trends, put more money in the hands of consumers, and reduce the likelihood that state and local governments will need to raise taxes significantly. According to the White House press release, the legislation will do the following:

- Create or save 3.5 million jobs in the next 2 years
- Provide direct tax relief to working and middle class families
- Double the U.S. renewable energy generating capacity over 3 years
- Stimulate private investment in renewable energy through tax credits and loan guarantees
- Invest $150 billion in U.S. infrastructure projects
- Provide funds to U.S. state and local governments to support health and education programs
Many of the provisions of this legislation took effect immediately in an effort to stimulate consumer spending and boost the economy. The total cost of the spending in the ARRA is $787 billion, which is in addition to the $700 billion in the EESA. Many economists are concerned that further financial support may be necessary before an economic recovery is possible. Additionally, the federal government developed the Web site www.recovery.gov to facilitate a transparent process to ensure accountability for the execution of the package.

To monitor these funds on behalf of the federal government, a Recovery Act Accountability and Transparency Board has been created to review management of recovery dollars and provide early warning of problems. The seven member board includes Inspectors General and federal Deputy Cabinet secretaries. The Government Accountability Office (GAO) and the Inspectors General are provided additional funds and access for reviews of the acts funds and spending. The board is responsible for coordinating and conducting oversight of federal spending under the ARRA including, but not limited to, the following:

- Ensuring that funds are awarded and distributed in a prompt, fair, and reasonable manner
- The recipients and uses of all funds are transparent to the public, and the public benefits of these funds are reported clearly, accurately, and in a timely manner
- Funds are used for authorized purposes, and instances of fraud, waste, error, and abuse are mitigated
- Projects funded under the ARRA avoid unnecessary delays and cost overruns
- Program goals are achieved, including specific program outcomes and improved results on broader economic indicators

OMB will provide a supportive role to the board.

OMB has published implementation guidance to the federal agencies on how they should carry out programs and activities enacted by the ARRA. The issuance of this guidance is happening on an as-needed basis; please check www.recovery.gov and www.whitehouse.gov/omb/recovery_default/ for current guidance. On April 3, 2009, OMB published implementation guidance for the ARRA. This is the second installment of detailed government-wide guidance for carrying out programs and activities enacted in the ARRA (Updated Implementing Guidance for the American Recovery and Reinvestment Act of 2009, M-09-15). This updated guidance supplements, amends, and clarifies the initial guidance issued by OMB on February 18, 2009 (Initial Implementing Guidance for the American Recovery and Reinvestment Act of 2009, M-09-10). Updates to the guidance are based on ongoing input received from the public, Congress, state and local government officials, grant and contract recipients, and federal personnel. The initial ARRA implementation guidance can be found at www.whitehouse.gov/omb/assets/memoranda_fy2009/m09-10.pdf, and the supplementary ARRA implementation guidance can be found at www.whitehouse.gov/omb/assets/memoranda_fy2009/m09-15.pdf. Questions and feedback about this memorandum or the guidance document can be addressed to recovery@omb.eop.gov and should have the term guidance feedback in the title of the email. OMB will issue a subsequent memorandum clarifying any updates to the guidance based on feedback received.

ARRA Compliance Requirements

For state and local governments, many new compliance requirements exist in the ARRA related to the receipt and use of funds. As required by Section 1512 of the ARRA, each recipient of federal funds under the ARRA must report the following information 10 days after each calendar quarter, beginning on July 10, 2009:

- The total amount of recovery funds received from each federal agency.
- The amount of recovery funds received that were obligated (encumbered) and expended to projects or activities. This reporting will also include unobligated federal allotment balances to facilitate reconciliations.
- A detailed list of all projects or activities for which recovery funds were obligated and expended, including the following:
— The name of the project or activity
— A description of the project or activity
— An evaluation of the project status of the project or activity
— An estimate of the number of jobs created and the number of jobs created and retained by the project or activity

• For infrastructure investments made by state and local governments, the purpose, total cost, justification for use of ARRA funds, and the name of a contact person
• Detailed information on any subcontracts or subgrants awarded by the recipient, including the data elements required to comply with the Federal Funding Accountability and Transparency Act of 2006 (P.L. 109-282), allowing aggregate reporting on awards below $25,000 or to individuals.

.24 Readers should monitor the OMB Web site, www.whitehouse.gov/omb/, for further developments. For purposes of financial statement audits of state and local governments expending ARRA funds and subject to new compliance requirements, auditors should keep in mind that AU section 317, Illegal Acts by Clients (AICPA, Professional Standards, vol. 1), requires auditors to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of misstatements arising from illegal acts that have a direct and material affect on the determination of financial statement amounts. Chapter 4 of the AICPA Audit and Accounting Guide State and Local Governments further discusses the auditor’s responsibilities under AU section 317 relating to financial statement compliance requirements. Certainly there will also be audit implications for single audits of entities expending ARRA funds. Readers should refer to the AICPA Governmental Audit Quality Center Web site, www.aicpa.org/GAQC, and the 2009 Audit Risk Alert Government Auditing Standards and Circular A-133 Audits, which is expected to be issued later this summer.

Other Government Intervention

.25 The EESA was signed into law in October 2008. As stated in Section 2 of the EESA bill, it “provide[s] authority and facilities that the Secretary of the Treasury can use to restore liquidity and stability to the financial system of the United States” to ensure the economic well-being of Americans. Primary components of the EESA bill include the following:

• An allocation of $700 billion to stabilize the U.S. financial system
• The creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that receive government aid
• An increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion
• A temporary increase of Federal Deposit Insurance Corporation insurance limits
• The creation of a tax modification for Fannie Mae and Freddie Mac stock losses
• The restatement of the Securities and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements, which is codified at FASB Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures
• The requirement of the SEC to conduct a study on the impact of FASB Statement No. 157¹

.26 The EESA authorized the U.S. Treasury to create the Troubled Assets Relief Program (TARP), the original intent of which was to use $700 billion to purchase illiquid mortgage assets from banks. As part of TARP, the Capital Purchase Program (CPP) was intended to inject $250 billion of capital into banks. Half of the CPP funds were distributed to nine of the largest financial institutions in the nation, which held approximately 55 percent of U.S. banking assets. The other half of the funds were allocated for smaller

financial institutions. The clear intent of the CPP was for the participating banks to increase lending; however, many question if the banks have responded accordingly.

.27 In addition to bailout funds targeting financial institutions, a $17.4 billion rescue package for the U.S. automakers was issued in December 2008. The first $13.4 billion was lent to the automakers immediately, and the remaining $4 billion was lent in subsequent months. The U.S. government will continue to work directly with automakers and also will receive nonvoting warrants from automakers that accept taxpayer funding.

.28 The complete effects of the ARRA, as well as the other government interventions, will take time to be felt throughout the economy; however, the primary goal is to increase market confidence and liquidity.

The State of the States’ Economy

.29 The Nelson A. Rockefeller Institute of Government (institute) publishes frequent updates on state fiscal conditions. The institute’s State Revenue Report, dated April 2009, focuses on concerns over a recessionary economy and the likely impact on state government finances and includes the following highlights based on U.S. Census Bureau data:

- State tax revenues for the fourth quarter of 2008, after adjusting for inflation, legislative changes, and known anomalies, declined in 41 states.

- In the final quarter of 2008, total state revenues showed a decline at an overall rate of 4 percent, representing declines in sales tax revenues of 6.1 percent and income tax revenues of 1.1 percent.

- A rise in local property tax collections of 4.6 percent in fourth quarter 2008 was offset by a decrease in sales tax revenues, posting an overall 3.2 percent increase.

- The decline in state revenues is continuing in 2009 with preliminary figures showing a 12 percent decrease as weakening conditions in the economy are reflected in major losses for sales and income taxes relative to a year earlier.

- States can expect personal income tax collections in April to show substantial decreases as a result of the economic downturn in 2008.

.30 The report concludes by pointing out that the overall economy has continued to decline and tax revenues, which lag behind the trend of the economy, will likely follow suit. The full text of this report can be found at www.rockinst.org/pdf/government_finance/state_revenue_report/2009-04-14-(75)-state_revenue_report_sales_tax_decline.pdf.

Local Government Bankruptcies

.31 As a result of declining property tax revenues, contractual salary increases, and unfunded pension obligations, in May 2008, the City of Vallejo, California filed for bankruptcy protection under Chapter 9, Adjustment of Debts of a Municipality, of title 11 of the United States Code (see the discussion of the Government Accounting Standards Board [GASB] project on Chapter 9 in the “On the Horizon” section of this alert). The city determined that after large current and larger projected budget deficits, it would be unable to honor existing union contracts and debt obligations to city employees. The city has asked the court to modify the terms of these agreements.

.32 The purpose of Chapter 9 is to provide a financially-distressed municipality protection from its creditors while it develops and negotiates a plan for adjusting its debts. Reorganization of the debts of a municipality is typically accomplished either by extending debt maturities, reducing the amount of principal or interest, or refinancing the debt by obtaining a new loan. Although similar to other chapters, in some respects, Chapter 9 is significantly different in that there is no provision in the law for liquidation of the assets of the municipality and distribution of the proceeds to creditors.

.33 Only a “municipality” may file for relief under Chapter 9. The term municipality is defined in title 11 of the U.S. Code as a “political subdivision or public agency or instrumentality of a State.” The definition is
broad enough to include cities, counties, townships, school districts, and public improvement districts. It also includes revenue-producing bodies that provide services which are paid for by users rather than by general taxes, such as bridge authorities, highway authorities, and gas authorities. States are not eligible to file under Chapter 9. Also, some states restrict or prohibit bankruptcy filings by municipalities.

.34 Municipal bankruptcy filings are a rare occurrence when compared to other types of bankruptcies. Of more than 55,000 municipal entities, less than 600 have filed under Chapter 9 since 1937. By comparison, in 2008, there were 744,424 filings under Chapter 7 and 10,160 filings under Chapter 11, of which 30,035 and 9,272, respectively, were business filings.

.35 If the City of Vallejo is successful in restructuring its contracts with the unions representing public employees and the court permits its debt obligations to be restructured, there will be a variety of results. The short-term impact is that the city will be relieved of its unfunded obligations for pensions and other postemployment benefits (OPEB) and significantly reduce future payroll related expenses. The long-term impact may be that the city finds itself unable to fill employment vacancies or to borrow money for future capital projects such as building bridges, roads, sewers, or other large scale public projects.

.36 The outcome of this case will be of special interest to other municipalities struggling with huge unfunded pension and OPEB obligations and shrinking revenues and their auditors. See the “Accounting Issues and Developments” section of this alert for a discussion of GASB Statement No. 56, Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards, which includes additional going concern considerations and requirements for governments.

Municipal Securities and Challenges in the Municipal Market

.37 In 2008, nearly $453 billion of municipal bonds and notes were sold to support a variety of public purposes. Additionally, over 10 million municipal trades occurred representing over $5.5 trillion in transactions during 2008. With approximately $2.7 trillion in principal value of securities outstanding and over 50,000 issuers, the municipal market continues to play a vital role in the U.S. economy.

.38 Beginning in late 2007 and throughout 2008, the municipal market experienced several dislocations related to the subprime mortgage crisis and associated turmoil in the credit markets. These included the downgrading of municipal bond insurers and the collapse of the municipal auction rate securities market.

.39 For many years, the credit enhancement provided by AAA-rated bond insurers was a prominent feature of the municipal securities market. As of the beginning of 2008, approximately 50 percent of all long-term municipal bonds were insured. However, credit rating agencies extensively downgraded bond insurers during 2008, primarily as a result of their exposure to subprime mortgage products. Hundreds of thousands of outstanding insured municipal bonds were affected by these downgrades. Use of bond insurance on new issues—something that, in previous years, had been used to help sell about half of all new issues—was used on only 18 percent of new issues during 2008.

.40 Another exceptional event during 2008 was the collapse in the $200 billion market for municipal auction rate securities (ARS). Prior to 2008, municipal auctions for these securities rarely failed. As the subprime mortgage crisis took hold and concerns over the credit quality of the bond insurance used on most ARS increased, auctions began to fail early in the year. Investor confidence in the auction process waned, which in turn, led to more auction failures and the collapse of the ARS market. All but about $78 billion in municipal ARS has now been restructured. However, for those ARS remaining outstanding, most auctions continue to fail, making the securities essentially illiquid.

.41 General conditions in the municipal securities market have improved since the most extreme dislocations and liquidity shortages that occurred in the last quarter of 2008. Attracted by the higher yields, retail demand (particularly for high-grade credits) has been strong and has compensated for the loss of demand by many traditional institutional and leveraged accounts. Notwithstanding this general improvement, imbalances in supply and demand and illiquidity problems remain in certain segments areas of the market as of
the early months of 2009. This is particularly true for lower rated issues and securities in certain market sectors such as housing.

The Credit Crisis and Its Potential Impact on Local Government Credit Ratings

.42 Local governments were put on notice in a recent report, Impact of the Credit Crisis and Recession on Local Governments, from the U.S. Public Finance division of Moody’s Investors Service. The credit experts at Moody’s believe that with the U.S. economic recession intensifying, and the continuing credit crisis limiting access to the credit markets, many local governments will face difficult fiscal choices, and some potentially may experience material stress over the next few years. The downturn in real estate values has heightened the general economy’s impact on municipal governments’ budgets, especially in local governments with a heavy reliance on property tax revenues. Moody’s concludes that with the recession now appearing to have spread to most regions and sectors of the economy, few local governments will escape the difficult choice between raising taxes in the face of local economic stress and cutting services to balance their budgets. However, Moody’s expects that the majority of municipalities will manage successfully through this period with a combination of spending cuts and revenue enhancement plans.

.43 The report concludes that although most municipalities have a reasonable degree of fiscal flexibility and demonstrated an ability to adapt to economic and fiscal cycles in the past, this recession is likely to be deeper and longer lasting than recent ones. As a result, Moody’s said it expects that there will be a higher number of negative rating actions taken than in other recessions of the past 40 years, as some issuers experience disproportionate levels of stress that materially affect creditworthiness. The credit rating agency has said that its ratings actions will focus on municipal governments that experience higher levels of financial stress than comparably rated peers, and that additional downward rating pressure could result if this economic downturn proves exceedingly deep.

.44 Local governments with strong management teams, diverse revenue sources, predictable borrowing costs, and sound liquidity and reserves are expected to fare better than those without these characteristics and conditions. According to Moody’s, generally speaking, the local government leadership’s willingness to make necessary adjustments will be a key factor in maintaining that government’s credit rating. For example, a municipality’s failure to adjust its budget in a timely fashion could be considered a clear indicator of weak fiscal management and could place significant downward pressure on its credit rating.

.45 Auditors should consider whether a risk exists that the government’s credit rating could be lowered and, if so, obtain an understanding of the effects that a reduced credit rating would have on the government’s ability to fund its operations, or if a reduced rating would affect the government’s outstanding debt obligations.

Tax Exempt Debt Issues

.46 The current credit environment has affected the market for debt securities. Although all debt securities may be affected, particular issues affect municipalities, states, cities, and other governments (such as redevelopment agencies, school districts, public universities, airports, and seaports) issuing tax exempt debt. Some examples of these tax exempt debt securities are ARSs and variable rate demand obligations (VRDOs).

.47 Although each situation is different and should be evaluated based on its own specific facts and circumstances, the current situation may raise various accounting and auditing issues pertaining to tax exempt debt including, but not limited to, the following:

- Bond restructurings
- Derivative and hedge accounting implications
- Potential violation of debt covenants
- Classification of the debt on the balance sheet as either a current or noncurrent liability
- Subsequent event disclosures
- Going concern issues
For further information, refer to a nonauthoritative article that the AICPA has posted to its Web site, authored by an ad hoc group of AICPA members, *Tax-Exempt Bonds—Accounting and Auditing Considerations in the Current Environment*. The article can be accessed at www.aicpa.org/download/acctstd/ARS_article14.pdf.

**Postemployment Benefits Other Than Pensions, Including Retiree Health Care**

Costs for postemployment benefits other than pensions, including retiree health care, continue to be an economic issue of major concern for most state and local governments. In its report, *Promises with a Price*, the Pew Charitable Trusts conservatively estimated that state governments will spend approximately $2.73 trillion on pensions, health care, and other postemployment benefits during the next 30 years, of which $381 billion is the price tag for retiree health care and other nonpension benefits. The report cites 8 states whose unfunded actuarial liability for OPEB is greater than its unfunded actuarial liability for its pension plans. The reports indicate that in the state of California alone, annual state and local government retiree health care costs were $4 billion in 2006 and are expected to escalate to $10 billion in 2012 and $27 billion in 2019. With people living longer, the rising cost of health care, and few governments funding these costs as incurred through irrevocable trusts, the unfunded liabilities are likely to grow at an ever-increasing pace. The Pew report is available at www.pewcenteronthestates.org/uploadedfiles/Promises%20with%20a%20Price.pdf.

As the required implementation dates for GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, have arrived for some and are approaching for others, the focus on OPEB, including retiree health benefits for state and local government employees has been increasing. Because many governments previously have not measured or disclosed in their financial statements their obligations to pay OPEB costs, the media, the bond market, and state and local government legislative bodies are starting to focus on the potentially significant sum of those obligations, sometimes in the billions of dollars for an individual state. In addition, a government that does not manage its OPEB liability on a go-forward basis, especially the growth in its liability, could find itself explaining its OPEB and funding policies or lack of a funding policy to credit rating agencies when issuing bonded debt.

Public employee unions and retirement benefit administrators across the country are concerned that a change from the pay-as-you-go accounting approach might lead to a reduction in benefits. Many predict significant changes in OPEB as governing bodies become better informed through actuarial or similar valuations about the amount of the obligations and the effects of not managing them. Some governments have formed task forces to help them identify solutions. Auditors might consider working with the actuarial firms retained by the auditee or, if necessary, retaining actuarial specialists to evaluate auditee valuations; at the same time, auditors might also consider preparing themselves to answer their auditees’ questions about managing those obligations.

Common solutions that have been discussed for managing the OPEB obligation and its growth include restricting new entrants into the plan, raising the employee cost share, lengthening the vesting period, restricting ad hoc benefit increases, and converting a defined benefit plan to a defined contribution plan. Another common solution is to begin to advance-fund the obligation as normally is done with pension obligations, which is a long-term solution that will take years with a well-managed funding program to fully fund the accrued liability. Some governments may even consider discontinuing or reducing benefits for current and retired employees, although that may not be possible because of legal, contractual, or other restraints. Whichever solutions are chosen by the entity, they likely will be difficult to implement.

A recent study and report by the GAO looked into both the current status of state and local government retiree benefit structures and the fiscal outlook for funding their future costs. The report noted that a heightened sense of concern has been raised questioning whether state and local governments offering such benefits will be able to continue to provide the current level of benefits to retirees in the future.

State and local government employees make up approximately 12 percent of the nation’s workforce and are generally provided retiree benefits in two components: pensions and retiree health care. The GAO
report found that significant differences existed between how these two benefit components were structured, managed, and funded.

### Differences Between Pension and Retiree Health Care Systems

<table>
<thead>
<tr>
<th></th>
<th>Pensions</th>
<th>Retiree Health Care</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>How Structured</strong></td>
<td>Mostly as a defined benefit based on a formula; once accrued, cannot be diminished</td>
<td>Varied sharing of premium costs between the government and retiree; benefit plans can change for current and future retirees</td>
</tr>
<tr>
<td><strong>How Managed</strong></td>
<td>As trusts, with board of trustees oversight</td>
<td>As operating expenses managed with other employee benefits</td>
</tr>
<tr>
<td><strong>How Funded</strong></td>
<td>Prefunded, with monies set aside and invested</td>
<td>Pay-as-you-go funded, with annual operating funds used as costs are required to be paid</td>
</tr>
</tbody>
</table>

.55 The GAO study results simulated the outlook for the state and local government sector as a whole and concluded that

1. estimated future pension costs (currently about 9 percent of employee pay) would require an increase in annual government contribution rates of less than 0.5 percent; and

2. estimated future retiree health care costs (currently about 2 percent of employee pay) would more than double by the year 2050 if they continue to be funded on a pay-as-you-go basis.

.56 The GAO did recognize the sensitivity of its estimates to assumed rates of return and projected inflation rates; however, it also recognized that if rates of return were to fall below historical averages, the funding requirement could become even higher. The GAO report concluded that although state and local governments have strategies to manage future pension costs, similar strategies were not in place to manage the escalating costs of retiree health care. The GAO suggested that in future debates on retiree benefits, policy makers, voters, and beneficiaries will need to decide how to control costs, the appropriate level of benefits, and who should pay the costs.

.57 The entire GAO report is available from the GAO Web site as report no. GAO-07-1156 at www.gao.gov.

### Securities Lending Losses

.58 Many governments have invested the collateral received under a securities lending agreement. The values of many of these investments have been affected by the general downturn of the economy. These governments may have lost enough market value on the collateral so that they may be unable to terminate the security lending liability without using the government’s own cash and investments.

.59 The economy has highlighted a common misunderstanding in applying generally accepted accounting principles (GAAP) to securities lending transactions. Most entities understand the concepts of when and how to record the transactions. However, many entities have not booked the adjustments to value the collateral at fair market value.

.60 Accounting for securities lending transactions is outlined in GASB Statement No. 28, *Accounting and Financial Reporting for Securities Lending Transactions*. This standard addresses the accounting and disclosures for securities lent to the broker, the collateral received from the broker, and costs related to these types of transactions.
The securities lent to the broker should be recorded as an asset on the statement of net assets. The government frequently retains ownership of the original securities lent to the broker. These securities will be returned at the termination of the agreement. The government would value these securities using the guidance outlined in GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investment and for External Investment Pools*. This statement generally requires reporting investments at fair value.

The collateral received from the broker requires careful analysis to understand which party is bearing the risk of loss on the collateral. Risk of loss on the collateral is characterized in GASB Statement No. 28 by analyzing the following government’s factors:

- The ability to pledge (that is, promise) the collateral to others without the broker’s default
- The ability to sell the collateral without the broker’s default

Stated more plainly, unless the broker agrees to maintain the risk of loss on the collateral, the government has the risk of loss. The following factors could indicate that the broker has retained the risk of loss:

- An explicit statement in the agreement
- The government’s inability to change the nature of the collateral (that is, sell securities for cash, buy securities with the cash)
- If the collateral lost 100 percent of its value, the government would not be liable to pay back the collateral

Under GASB Statement No. 28, collateral is not recorded as an asset on the government’s statement of net assets if the broker maintains the risk of loss. In addition, the corresponding liability would not exist. If the government has assumed the risk of loss, the government would originally record an asset at fair value upon receipt of collateral and a liability for the amount owed to the broker at the termination of the agreement. The asset booked may be uninvested cash collateral or investments received as collateral or purchased with cash collateral. Investment should be measured according to GASB Statement No. 31, generally measured at fair value. Fair value changes should be reported in investment income. The amount of the corresponding liability (the obligation to return the collateral) would remain the amount due to the broker at termination of the agreement.

It is important for governments participating in external and internal investment pools and their auditors to gain a thorough understanding of the valuation methodology that these pools apply to its investments, the underlying risks involved with each investment type, and the likelihood that the value of the investments will be impaired.

**Electronic Commerce and Privacy of Data Concerns**

In September 2006 American Express, Discover Financial Services, JCB, MasterCard Worldwide, and Visa International jointly announced the formation of the PCI Security Standards Council, which is designed to manage the ongoing evolution of the Payment Card Industry (PCI) Data Security Standard (DSS). PCI DSS focuses on improving payment account security throughout the transaction process with the goal of enhancing protection against data theft and fraud.

The PCI DSS is a multifaceted security standard that includes requirements for security management, policies, procedures, network architecture, software design, and other critical protective measures. This comprehensive standard is intended to help organizations proactively protect customer account data. The core of the PCI DSS is a group of principles and accompanying requirements, around which the specific elements of the DSS are organized:

- Build and maintain a secure network
  - Requirement 1: Install and maintain a firewall configuration to protect cardholder data
- Requirement 2: Do not use vendor-supplied defaults for system passwords and other security parameters

- Protect cardholder data
  - Requirement 3: Protect stored cardholder data
  - Requirement 4: Encrypt transmission of cardholder data across open, public networks

- Maintain a vulnerability management program
  - Requirement 5: Use and regularly update anti-virus software
  - Requirement 6: Develop and maintain secure systems and applications

- Implement strong access control measures
  - Requirement 7: Restrict access to cardholder data by business need-to-know
  - Requirement 8: Assign a unique ID to each person with computer access
  - Requirement 9: Restrict physical access to cardholder data

- Regularly monitor and test networks
  - Requirement 10: Track and monitor all access to network resources and cardholder data
  - Requirement 11: Regularly test security systems and processes

- Maintain an information security policy
  - Requirement 12: Maintain a policy that addresses information security

These requirements extend beyond credit card processing to organizational data security and privacy controls. Qualified security assessors (QSAs) and approved scanning vendors (ASVs) are companies regulated by the PCI Security Standards Council, which monitor and assist governments and merchants with PCI DSS implementation. The volume of transactions processed determines the frequency of the required QSA and ASV certification. Compliance must be updated at least annually, and testing needs to occur at least quarterly or with any major system change.

When PCI DSS is fully implemented by the credit card brands, lack of a PCI certification would prevent the government from collecting revenues electronically. At this point, there is no fixed timetable for governments to initially comply with PCI DSS. The timeframe for compliance varies by the payment card brands (for example, American Express). Many of the brands have already implemented deadlines for compliance, but each payment card brand may have a different deadline. Additional information about PCI DSS can be found at www.pcisecuritystandards.org.

Legislative and Regulatory Developments

Municipal Securities Rulemaking Board Activity

The Municipal Securities Rulemaking Board (MSRB), which develops rules for brokers, dealers, and banks engaged in underwriting, trading, and selling municipal securities, protects investors and ensures the integrity of the municipal market. The MSRB also operates information systems designed to promote transaction price transparency and access to municipal securities issuer disclosure documents.

Electronic Municipal Market Access

One of the MSRB’s top initiatives over the last year has been the development of its Electronic Municipal Market Access (EMMA) Web site, which provides improved disclosure and price transparency in the municipal market. Official statements and advance refunding documents for municipal bonds, real-time and historical trade data, interest rates and auction results for municipal auction rate securities, interest rates...
for variable rate demand obligations, daily market statistics, and educational material about municipal bonds are all available for free on EMMA (www.emma.msrb.org). The EMMA Web site is designed for use by individual investors but is also available to auditors, institutional investors, and municipal issuers so that any user easily can obtain free municipal securities disclosure documents from a single source.

.72 The data on the EMMA Web site comes from a number of sources. The MSRB collects primary market information and trade data for EMMA from underwriters and their agents. Beginning July 1, 2009, the MSRB will collect continuing disclosure documents from municipal issuers around the country and post them for public availability within 15 minutes of receipt. The addition of these documents, and their availability to the public through EMMA, will create a complete repository of municipal bond disclosure documentation in a single location that is free and accessible 24-hours a day.

Continuing Disclosure

.73 Another phase of EMMA’s development incorporates continuing disclosure documents provided by issuers into the integrated document display on EMMA. In December 2008 the SEC approved a proposal from the MSRB, which amends SEC Rule 15c2-12 (Title 17 CFR 240.15c2-12) to allow the expansion of EMMA to include these documents and to make the MSRB the central and only filing venue for these documents, replacing existing document depositories (that is, Nationally Recognized Municipal Securities Information Repositories and State Information Depositories). The change, effective July 1, 2009, has broad industry support because EMMA will provide a far more efficient and cost-effective system of document collection and dissemination. The MSRB is currently creating the necessary framework for issuers and their agents to submit continuing disclosure documents to EMMA in an all-electronic format and working to educate them about the process. Further information is available at www.msrb.org. Also, see chapter 16 of the AICPA Audit and Accounting Guide State and Local Governments for additional information about auditor association with municipal securities filings.

Other EMMA Features

.74 EMMA contains an extensive education center that provides in-depth information to help investors learn about the municipal bond market and better understand disclosure and trade price information provided through EMMA. Investors of all types, from beginners to those with advanced knowledge, can find useful information in the education center and through EMMA’s Frequently Asked Questions (FAQ) section. The education center also includes the MSRB’s industry-standard glossary of municipal securities terms.

Short-Term Obligation Rate Transparency System

.75 In 2009, the MSRB implemented its Short-Term Obligation Rate Transparency (SHORT) system to increase transparency of municipal ARS and VRDOs. The SHORT system is the first centralized system for collection and dissemination of critical market information about ARS and VRDO. Information collected by the SHORT system is made available to the public, free of charge, on the MSRB’s EMMA Web site.

.76 The SHORT system will be implemented in phases. The first phase collects and disseminates interest rate and descriptive information about ARS and VRDO. On January 30, 2009, the SHORT system became operational for ARS and, on April 1, 2009, for VRDO. This “interest rate information” allows market participants to compare ARS and VRDO across issues and track current interest rates. Included in this information is the current interest rate, the length of the interest rate reset period, as well as characteristics of the security such as the identities of broker-dealers associated with the operation of the securities. This system is a useful tool for both auditors and their clients to evaluate, assess, and value relevant securities.

.77 Later phases of this initiative to increase transparency of ARS and VRDO include the collection and dissemination of ARS bidding information. This information will allow market participants to obtain important information about the liquidity of an ARS and greater granularity into the results of the auction process. In addition, the MSRB plans to collect ARS documents that describe auction procedures and interest rate setting mechanisms as well as VRDO documents that describe the provisions of liquidity facilities, such
as letters of credit and standby bond purchase agreements. More information about the SHORT system is available at www.msrb.org/msrb1/whatsnew/2008-49.asp.

**Bank Tying**

.78 On August 14, 2008, the MSRB issued Notice 2008-34, Notice on Bank Tying Arrangements, Underpricing of Credit and Rule G-17 on Fair Dealing. In 2008, there was a major increase in demand for bank letters of credit and bank liquidity facilities by state and local government issuers of VRDOs. Some issuers of outstanding VRDOs were seeking to substitute letters of credit for bond insurance provided by downgraded monoline insurers. Other issuers were seeking to issue VRDOs to refund auction rate securities after auctions began to fail. The MSRB was concerned that, as a result of this increase in demand for letters of credit and liquidity facilities (bank facilities), some banks might consider proposing to issuers that they would receive a bank facility if their securities affiliates were selected as underwriters or remarketing agents for the issuer’s VRDOs. There was also concern that banks might offer to price bank facilities on below market terms in return for underwriting or remarketing business for their securities affiliates. Notice 2008-34 reminded bank-affiliated dealers that there are federal prohibitions on such tying or underpricing arrangements, and that a dealer who aids or abets such arrangements would also violate MSRB Rule G-17, Conduct of Municipal Securities Activities. The full text of the notice is available at www.msrb.org/msrb1/archive/2008/2008-34.asp.

**Restrictions Related to Political Contributions**

.79 MSRB Rule G-37, Political Contributions and Prohibitions on Municipal Securities Business, prohibits any dealer from engaging in municipal securities business with an issuer within two years after any contribution to an official of such issuer is made by (1) the dealer; (2) any municipal finance professional associated with such dealer; or (3) any political action committee controlled by the dealer or any municipal finance professional. If a municipal finance professional makes a political contribution to an issuer official for whom he is not entitled to vote, the dealer is prohibited from engaging in municipal securities business with that issuer for two years.

.80 The only exception to Rule G-37’s absolute prohibition on municipal securities business is for certain contributions made to issuer officials by municipal finance professionals. Contributions by such persons to officials of issuers do not invoke application of the prohibition on business if (1) the municipal finance professional is entitled to vote for such official, and (2) contributions by such municipal finance professional do not exceed, in total, $250 to each official, per election.

.81 Recently, the MSRB has undertaken a full review of Rule G-37, including whether or not Rule G-37 should include certain prohibitions on or require certain disclosures of bond ballot campaign contributions. The full text of Rule G-37 can be found at www.msrb.org/msrb1/rules/ruleg37.htm.

**New IRS Regulation on Required Withholding**

.82 IRS Proposed Regulations REG-158747-06 were published in the Federal Register on December 5, 2008 for new IRC subsection 3402(t). This subsection, created by the Tax Increase Prevention and Reconciliation Act of 2005, originally required that payments by governmental entities for goods or services after December 31, 2010, are subject to 3 percent income tax withholding, with some exceptions. The implementation date has now been changed by the ARRA and applied to payments after December 31, 2011. Although this proposed regulation will not affect audits in 2009, auditors may want to bring the issue to the attention of their clients.

.83 These new withholding requirements would apply to payments greater than $10,000 made by

- the entire U.S. government, including all federal agencies, the executive branch, the legislative branch, and the judicial branch.
- all states, including the District of Columbia (but not including Indian tribal governments).
- all political subdivisions of a state government or every instrumentality of such subdivisions unless the instrumentality makes annual payments for property or services of less than $100 million.
Generally, withholding would be required on all payments to all persons providing property or services to the government, including individuals, trusts, estates, partnerships, associations, and corporations. Withholding would occur at the time of payment and applies to payment in any form (cash, check, credit card, or payment card). If the government entity fails to withhold the tax required under Section 3402(t), it becomes liable for the payment of the tax.

The proposed regulations provide the following exceptions from the withholding requirements:

- Payments otherwise subject to withholding, such as wages.
- Payments for retirement benefits, unemployment compensation, or social security.
- Payments subject to backup withholding, if the required backup withholding is actually performed.
- Payments for real property.
- Payment of interest.
- Payments to other government entities, foreign governments, tax exempt organizations, or Indian tribes.
- Payments made under confidential or classified contracts, as described in IRC 6050M(e)(3).
- Payments made by a political subdivision of a state or instrumentalities of a political subdivision of a state that make annual payments for property of services of less than $100 million.
- Public assistance payments made on the basis of need or income. However, assistance programs based solely on age, such as Medicare, are subject to the requirements.
- Payments to employees in connection with service, such as retirement plan contributions, fringe benefits, and expense reimbursements under an accountable plan.
- Payments received by nonresident aliens and foreign corporations.
- Payments made by Indian tribal governments.
- Payments in emergency or disaster situations.

For more details, please see the proposed regulations, which can be accessed at www.regulations.gov/fdmspublic/component/main?main=DocumentDetail&o=09000064807ce036.

“Red Flags” Rule

In October 2007 the Federal Trade Commission (FTC) issued the “Red Flags” rule for financial institutions and creditors to fight identity theft. The rule sets out how certain businesses and organizations must develop, implement, and administer their identity theft prevention programs. These programs must include the following four basic elements, which together, create a framework to address the threat of identity theft.

1. The program must include reasonable policies and procedures to identify the “red flags” of identity theft that may arise in the day-to-day operation of your business. Red flags are suspicious patterns or practices or specific activities that indicate the possibility of identity theft. For example, if a customer has to provide some form of identification to open an account with an entity, an ID that looks like it might be fictitious would be a “red flag.”

2. The program must be designed to detect the red flags that have been identified. For example, if an entity has identified fake IDs as a red flag, it must have procedures in place to detect possible fake, forged, or altered identification.

3. The program must spell out appropriate actions to take when red flags are detected.

4. The program must address how the program will be reevaluated periodically to reflect new risks from this crime because identity theft is an ever-changing threat.
The program must state who is responsible for implementing and administering it effectively. Because employees have a role to play in preventing and detecting identity theft, the program also must include appropriate staff training. The program also must address the manner in which contractors will be monitored when outsourcing or subcontracting functions of operations that would be covered by the rule.

The Red Flags rule applies to financial institutions and creditors. The rule requires a periodic risk assessment to determine if the entity has covered accounts. A written program needs to be in place only if the entity has covered accounts. It is important to look closely at how the rule defines financial institution and creditor because the terms apply to groups that typically might not use those words to describe themselves. For example, many not-for-profit entities and government agencies are creditors under the rule.

Governments need to implement the Red Flags rule if they defer payment for goods or services. An example would be payment plans for taxes due or student loans for public institutions of higher education. Because of their creditor status in these situations, the Red Flags rule applies.

The FTC suspended enforcement of the new Red Flags rule until May 1, 2009, to give creditors and financial institutions additional time in which to develop and implement written identity theft prevention programs. This deferral by the FTC does not affect other federal agencies’ enforcement of the original November 1, 2008, deadline for institutions subject to their oversight to be in compliance.

More information and a document outlining specific requirements of the Red Flags rule can be found at http://ftc.gov/redflagsrule.

New Guidance Issued on Public Housing Agencies Completion of the Financial Data Schedule and Related Auditor Reporting

In December 2008, the U.S. Department of Housing and Urban Development (HUD) issued guidance titled, Revised SAS 29 Audited Submission Procedure for Public Housing Agencies (PHAs) With Fiscal Year End of June 30, 2008. That guidance explained how PHAs could meet the requirements for preparing the required financial data schedule (FDS), as well as the related auditor reporting, in light of delays in the availability of a revised FDS format.

Since then, HUD has issued another notice to PHAs on its Web site, Un-Audited Financial Submission Procedure for Public Housing Agencies With Fiscal Year Ends of June 30, 2008 Through March 31, 2009, announcing the availability of the previously promised Excel tool version of the updated FDS (the FDS tool) and instructions for submitting it. This guidance contains information for auditors who are issuing the “in relation to” reporting (that is, a SAS 29 opinion) on the FDS.

The new HUD notice instructs PHAs on how to complete and submit electronically the new FDS tool. It also provides an FDS user manual, a full accrual version of the tool, a modified accrual version of the tool, and an FAQ document. In summary, the PHA submission process of the FDS tool will work as follows:

- The PHA will complete the appropriate FDS tool (that is, either accrual or modified accrual); and
- The PHA will make the “unaudited” submission of the FDS tool to HUD using the Comments link contained in the Financial Assessment Subsystem (FASS) online system.

PHAs with fiscal years ending June 30, September 30, or December 31, 2008, had until April 13, 2009 to complete this submission. PHAs with fiscal year ending March 31, 2009, will have until June 30, 2009 to complete their submissions.

HUD considers this submission “unaudited” in that it does not include the upload of the audited financial statements and other required materials or the required agreed-upon procedures engagement comparing the hard copy FDS to the electronic FASS submission. Currently, HUD is continuing to update the FASS to, among other things, add audit system functionality. Once the system update is completed, HUD will communicate how PHAs can make their “audited” submission. At that time, the system will allow for the
required agreed-upon procedures engagement and will include the six tabs for uploading the management’s
discussion and analysis, the financial statements, notes to the financial statements, audit reports, audit
findings, and the corrective action plan. HUD will post another notice to its Web site notifying PHAs when
the next phase is complete and the audited submission can occur.

The Status of the In-Relation-To Reporting Requirement

.98 HUD states in its FAQ document that even though the final “audited” submission to HUD will not be
able to be made by PHAs for several more months, PHAs can use the newly released FDS tool for purposes
of having their auditors issue the required SAS 29 opinion. Accordingly, HUD states that PHAs may print the
completed “unaudited” FDS tool, and the PHA auditor can perform the necessary audit procedures in order
to issue the SAS 29 opinion on the FDS.

Auditor Subsequent Event Considerations

.99 Now that HUD has released the FDS tool, PHAs will likely begin asking their auditors to complete the
necessary procedures in order to issue the SAS 29 opinion on the FDS. Auditors should keep in mind their
potential subsequent event responsibilities under AU section 560, Subsequent Events (AICPA, Professional
Standards, vol. 1), relating to each of the two options that HUD provided for meeting the preparation and
reporting requirements for the FDS. In both cases, the auditor performs the subsequent audit procedures to
ascertain whether there have been any subsequent events that may require adjustment or disclosure to a fair
presentation of the financial statements. Paragraphs .10–.12 of AU section 560 discuss auditing procedures in
a subsequent period in more detail.

.100 More information about the notice and an illustrative report for a SAS 29 opinion are available at the
AICPA Government Audit Quality Center Web site at http://gaqc.aicpa.org/Resources/Archived+GAQC+
Update+Newsletters/GAQC+Alert+No.+104.htm.

Sales Tax on Internet Sales

.101 For years, this alert has discussed the ongoing debate about the taxation of Internet sales. As discussed
in the prior alerts, the Internet Tax Nondiscrimination Act (Public Law [P.L.] 108-357, December 3, 2004) bans
new Internet access taxes and new, multiple, and discriminatory taxes on electronic commerce (e-commerce;
that is, Internet sales) until November 1, 2007. On October 31, 2007, President Bush signed a bill that provided
an extension of the moratorium for another seven years. P.L. 110-108, the Internet Tax Freedom Act Amend-
ments Act of 2007, extended the moratorium to November 1, 2014, makes some changes to the grandfather
clause in the original legislation that protects state and local taxes imposed on Internet access prior to 1998,
and clarifies the definition of Internet access. Some legislators support a permanent ban and, in January 2007,
introduced a resolution, Permanent Internet Tax Freedom Act (H.R. 743).

.102 However, New York State has enacted a law to collect sales taxes on Internet sales from any retailer
that advertises on New York-based Web sites. The law, which became effective on June 1, 2008, equates New
York-based Web sites with having a physical presence in the state. The law applies to companies that don’t
have offices in New York, but have at least one person in the state who works as an online agent, that is,
someone who links to a Web site and receives commissions from sales. Internet retailers sued the State of New
York, arguing that the tax is unconstitutional. The initial rounds of legal action have found in favor of the state,
with the courts saying that the suits had no basis for legal action.

.103 Several states, including Maryland, California, and Hawaii are considering legislation modeled on the
New York law.
Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.104 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients in prior years. Some risks that may affect a government in the current economic environment are as follows:

- Constraints on the availability of capital and credit
- Going concern and liquidity issues
- Marginally achieving explicitly stated budget and strategic objectives
- Special purpose entities, joint ventures, or other complex financing arrangements
- Volatile real estate and business markets
- The credit crisis, which can cause significant measurement uncertainty, including accounting estimates and fair value measurements

.105 Although many of these risks are not new to governments, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, some possible audit responses to a significant risk of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constantly changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still adequately addressed.

.106 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, in this alert, we cover the primary areas of concern given the current economic conditions. Continue to remain alert to economic, legislative, and regulatory developments, as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

Structured Investment Vehicles

.107 Many state and local governments have found themselves invested in structured investment vehicles (SIVs) without a sufficient understanding of their function and risks. A SIV is a fund that borrows money by issuing short-term securities at low interest and then lends that money by buying long-term securities at higher interest, making a profit for investors from the difference. A SIV is a type of relatively large structured credit product and invests in a range of asset-backed securities, as well as some financial corporate bonds. A SIV has an open-ended structure in that it plans to stay in business indefinitely by buying new assets as the old ones mature, and the SIV generally exchanges investments without providing investors transparency.

.108 The risk that arises from the transaction is two-fold. First, the solvency of the SIV may be at risk if the value of the long-term security that the SIV has bought falls below that of the short-term securities that the SIV has sold. Second, there is liquidity risk because the SIV borrows short-term and invests long-term—that is, payouts become due before the pay-ins are collected. To provide financial resources for its activities, a government may find itself needing to terminate its position in a SIV. Unless it can find other resources, the government may be forced to sell its position in a SIV into a depressed market.

.109 The subprime mortgage crisis has caused a widespread liquidity crunch in the markets. Investors have become reluctant to invest as the crisis spreads. A number of SIVs have fallen victim to the lack of liquidity, whereas others received support from a sponsoring bank.

.110 Auditors of state and local government-holding investments in SIVs should obtain a thorough understanding of the investment vehicle and place a particular audit focus on the risks associated with the
investment (collateral). Because of the complexity of these investment instruments, auditors should give due consideration to involving specialists in the audit engagement to assist in this evaluation.

**Pensions, OPEB, and the Use of Specialists**

.111 Upon the effective dates of GASB Statement No. 43, No. 45, and No. 50, *Pension Disclosures—An Amendment of GASB Statements No. 25 and No. 27*, defined benefit OPEB plans, defined benefit pension plans, and certain government employers are required to disclose, among other things, information about the funded status and funding progress of the plans as of the most recent actuarial valuation date in the notes to the financial statements. Such information includes, but is not limited to, the actuarial valuation date, actuarial assumptions, actuarial value of assets, the actuarial accrued liability, the total unfunded actuarial accrued liability, and the annual covered payroll. Most of these governments will use the services of an actuary in the valuation of the OPEB plan and determination of annual required contributions and annual OPEB costs and liabilities. Prior to these new standards, the funded status and funding progress of defined benefit pension plans was reported solely in required supplementary information (RSI). Under professional standards, the auditor has a greater responsibility for information disclosed in the notes to the financial statements than for information reported in RSI. Because auditors may not have actuarial knowledge, they may rely on information provided by plan actuaries. As a result, AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), will have particular importance to the auditor of state and local government financial statements when such government provides pensions and OPEBs and uses actuarial services for determination of financial statement amounts and disclosures. Paragraph .12 of AU section 336 states that, while determining the appropriateness and reasonableness of the methods and assumptions used, and their application is the responsibility of the actuary, the auditor should 

- (a) obtain an understanding of the methods and assumptions used by the specialist,
- (b) make appropriate tests of data (such as census data) provided to the specialist, and
- (c) evaluate whether the specialist’s findings support the related assertions in the financial statements.

.112 The auditor might consider it necessary to retain a specialist to assist in evaluating the work of the plan actuary.

.113 Some example procedures for the auditor’s consideration in meeting the requirements of paragraph .12 of AU section 336 regarding the entity’s use of an actuary could include the following:

- Obtaining an understanding of the actuary’s objectives, scope of work, actuarial methods, actuarial assumptions, and source and calculation methodology of health care cost trends within the acceptable parameters of the GASB statements
- Making appropriate tests of data provided to the actuary by considering the reliability and completeness of the plan census data and source of discount rates used
- Evaluating whether the actuary’s findings support the related assertions in the financial statements by understanding what benefits are included in the substantive plan, the policy for contributions, and how plan investments are valued

**Pollution Remediation**

.114 GASB Statement No. 49, *Accounting and Reporting for Pollution Remediation Obligations*, addresses accounting and financial reporting standards for pollution remediation obligations, which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and clean-ups. It is effective for financial statements for periods beginning after December 15, 2007, with measurement of pollution remediation liabilities required as of the beginning of the period so that the beginning balance of net assets can be restated. Of particular concern to

---

2 In January 2009 the Auditing Standards Board (ASB) issued exposure drafts of proposed Statements on Auditing Standards (SASs) *Other Information in Documents Containing Audited Financial Statements, Other Information in Relation to the Financial Statements as a Whole, and Required Supplementary Information*. These SASs would amend or supersede AU section 550, *Other Information in Documents containing Audited Financial Statements*, AU section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*, and AU section 558, *Required Supplementary Information* (AICPA, *Professional Standards*, vol. 1), respectively, in order to apply the ASB’s clarity drafting conventions. If approved, these SASs would be effective for fiscal years beginning after December 15, 2009.
auditors of state and local government financial statements are the assertions of existence, completeness, and valuation. Because of the difficulty in obtaining sufficient legal letter representations regarding these potential obligations, the auditor should generally consider the existence, completeness, and valuations assertions as possessing a relatively high inherent risk of misstatement when performing risk assessment procedures. Many governments will engage the services of a remediation specialist to estimate potential pollution remediation outlays and the related probabilities. AU section 336, as discussed in the preceding paragraphs, will also have particular importance to the auditor of state and local government financial statements in relation to pollution remediation obligations. See additional discussion of GASB Statement No. 49 in the “Accounting Issues and Developments” section of this alert.

**Information Technology Internal Control Issues**

.115 The implementation of the risk-based auditing standards defined the responsibilities of auditors to document their understanding of internal control surrounding how an entity initiates, authorizes, records, processes, and reports transactions and financial data. Many larger governmental entities have been using complex IT systems for years and, during this time, their systems and transaction flows have been documented for both manual systems and IT-dependent systems. Due to the current economic situation, auditors may want to assess the resources that have been allocated to IT at governmental entities. This would include the quality of documentation as well as the experiences of the resources in addressing the IT issues at the audited entity.

.116 Further, a complex IT environment can exist in any government, regardless of the size of the entity. The government’s use of IT may affect any of the five components of internal control in addition to the government’s operating and business functions. For example, the government may use an IT system that is highly complex and integrated through all functions and services of the entity; these systems may share data and support all aspects of financial reporting. Alternatively, the government may use one application only for the accounts receivable function or for utility billings. The auditor is required to document key elements of internal control surrounding the IT environment. Additionally, AU section 314 states that an auditor may determine that it is necessary to include a specialist to work on the audit team to assist with the determination of the complexities and intricacies of an entity whose use of IT is extensive.

.117 Of particular concern are the risks when there is a lack of segregation of duties over IT functions or over accounting functions in the accounting application. Segregation of duties issues may arise due to a reduction in the IT staff at a larger entity or due to the more limited staff of a smaller entity. Regardless of the reason, the extent and nature of these control risks vary depending on the nature and characteristics of the entity’s information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of an effective control at a single user entry point might compromise the security of the entire database, potentially resulting in unauthorized changes to or destruction of data which could affect the financial statements. The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor’s perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data that such systems process.

.118 Further guidance can be found in the AICPA Information Technology Center at http://infotech.aicpa.org/.

**Auditing Accounting Estimates**

.119 As noted in paragraph .04 of AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1), the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. In the context of a governmental audit, the overall financial statement level would be at the level of the opinion units as discussed in paragraph 4.32 of the AICPA Audit and Accounting Guide *State and Local Governments*. It is important to remember many types of accounting estimates exist in client financial statements. Some examples include the allowance for
uncollectible accounts receivable, impairment analysis and estimated useful lives of long-lived assets, and actuarial assumptions in pension and other postretirement benefit costs.

120 Given the current economic climate, additional skepticism should be exercised when considering management’s underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviate from historical patterns, or are particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable.

121 For example, in the current slow market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet budget, a key aspect of AU section 342 is for an auditor to determine the reasonableness of management’s accounting estimates with an extra degree of professional skepticism. As noted in AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

122 The auditor should obtain an understanding of how management develops estimates and employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management’s process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management’s estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor’s report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342.

Consideration of Fraud in a Financial Statement Audit

123 AU section 316 is the primary source of authoritative guidance about an auditor’s responsibilities concerning the consideration of fraud in a financial statement audit. AU section 316 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, as stated in paragraph .02 of AU section 110, Responsibilities and Functions of the Independent Auditor (AICPA, Professional Standards, vol. 1).

124 The three following conditions generally are present when fraud occurs:

- Management or other employees have an incentive or are under pressure, which provides a reason to commit fraud.
- Circumstances exist (for example, the absence of controls, ineffective controls, or the ability of management to override controls) that provide an opportunity for a fraud to be perpetrated.
- Those involved are able to rationalize committing a fraudulent act.

125 The current economic situation may result in unexpected losses and possibly cause financing or liquidity difficulties for many entities. Additionally, management may be valuing many illiquid securities using inherently subjective methodologies. These situations may provide management additional opportunity and incentive to commit fraud.

126 As seen in the news recently, a number of frauds that include the three previously mentioned conditions allegedly have occurred. One of those frauds is that of Bernard Madoff Investment Securities. Although the details of this fraud are just beginning to be investigated, auditors should ensure that they are properly testing for the existence of assets, such as investments, in this scenario. Additionally, auditors should always gain an understanding of the entity’s business and how profits are made. In the Madoff case, auditors
are being probed about failing to question the strong, consistent annual returns by these investment funds that lacked a clear investment strategy. Because of the characteristics of fraud, the auditor’s exercise of professional skepticism is important when considering the risks of material misstatement due to fraud.

.127 Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor’s belief about management’s honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. AU section 316 provides additional information, including ways for the auditor to respond to the risk of material misstatement due to fraud.

Evaluating the Existence of Assets

.128 The Madoff case, and other alleged frauds, brings to light a number of risks that continually need to be considered and responded to by management and auditors. Due to the nature of securities and other financial instruments, determining and testing the ownership and existence of investments has become more difficult. Often, securities and other investments purchased on behalf of an entity are held in the name of a broker organization, which may or may not be a custodian; and generally, custodians do not obtain a paper document anymore, only an electronic record of the assets.

.129 Some examples of risks inherent in investment transactions that may be relevant when assessing existence are as follows:

- The assets involved may not be readily available to physical inspection.
- There could be a lack of effective, independent, third party oversight.
- The information received from a broker organization, in the form of monthly statements or in response to audit confirmation requests, may require further verification to assess its reliability.
- There may be a lack of experience on the part of the client with these types of transactions and, therefore, controls over existence may be nonexistent or poorly designed.
- The transactions may be complex in nature, making them difficult to understand.

.130 Management has a responsibility to design an internal control system that is responsive to the risk of existence of assets (in addition to the valuation of assets). As part of their risk assessment procedures, auditors need to assess those controls and determine if the controls have been implemented. Depending on the results of those assessments, the auditor should design an audit strategy that takes into consideration the entity’s controls, including testing those controls if those controls are to be relied upon and used as part of the auditor’s audit evidence regarding the existence assertion. If the auditor’s assessment indicates that management’s design or operation of controls are not effective, then those deficiencies should be communicated to those charged with governance if the control deficiency is a significant deficiency or material weakness.

.131 Examples of procedures that management can perform that are designed to assess the existence of assets could include the following:

- Obtaining through site visits (and then documenting) an understanding of existence controls placed in operation by any service organization that is utilized by the entity and periodically reassessing that understanding
- Obtaining evidence, through direct testing or a SAS 70 type 2 report, that the service organization’s existence controls are appropriately designed and operating effectively
- Inspecting other documentation supporting the entity’s interest in the security (for example, correspondence from the broker organization or trustee acknowledging transactions with the fund)
Communication With Those Charged With Governance

.132 In addition to instances in which communication with those charged with governance in other auditing sections is discussed, other select measures are outlined in AU section 380, *The Auditor’s Communication With Those Charged With Governance* (AICPA, Professional Standards, vol. 1), that are specifically relevant during an economic crisis and when measuring fair value. AU section 380 establishes standards and provides guidance on the auditor’s communication with those charged with governance. As noted in paragraph .05 of AU section 380, the auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor’s professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. The auditor should communicate his or her views about the quality of the entity’s significant accounting policies, accounting estimates, and financial statement disclosures. Paragraph .51 of AU section 380 states that the auditor should communicate significant findings from the audit (see paragraphs .34–.35 of AU section 380) in writing when, in the auditor’s professional judgment, oral communication would not be adequate.

.133 AU section 341, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, Professional Standards, vol. 1), expands on the applicability of AU section 380 when the auditor has concluded that substantial doubt exists about the entity’s ability to continue as a going concern. In that case, the auditor should communicate to those charged with governance the nature of the events or conditions identified, the possible effect on the financial statements, the sufficiency of the related disclosures, and the effects on the auditor’s report.

Communicating Internal Control Related Matters Identified in an Audit

.134 In October 2008 the AICPA Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, Professional Standards, vol. 1, AU sec. 325). SAS No. 115 amends SAS No. 112 and further clarifies standards and provides guidance on communicating matters related to an entity’s internal control over financial reporting (internal control) identified in an audit of financial statements.

.135 The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) except when the auditor is performing an integrated audit and will be expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501, *An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, Professional Standards, vol. 1). This new standard is effective for audits of financial statements for periods ending on or after December 15, 2009, with early implementation permitted.

.136 In general, SAS No. 115 retains many of the provisions of SAS No. 112; it provides guidance to (a) enhance the auditor’s ability to identify and evaluate deficiencies in internal control during an audit, and then (b) communicates to management and those charged with governance those deficiencies that the auditor believes are significant deficiencies or material weaknesses.

.137 The key differences between SAS No. 115 and SAS No. 112 lie in the definitions of *material weaknesses* and *significant deficiencies* and the process for making that determination. Under SAS No. 112, the auditor applied criteria of likelihood and magnitude described in that standard to determine if a control deficiency reached the threshold of significant deficiency or material weakness. Under SAS No. 115, the same criteria are used; however, more judgment is allowed for in determining whether a control deficiency is a significant deficiency.

Definitions of Significant Deficiency and Material Weakness

.138 A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable...
possibility exists when the likelihood of the event is either *reasonably possible* or *probable* as those terms are used in FASB Statement No. 5, *Accounting for Contingencies*.  

**.139** A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

### The Evaluation Process

**.140** Although the auditor is not required to perform procedures specifically to identify deficiencies in internal control, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity’s internal control. The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. The severity of a deficiency in internal control depends on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies; and
- whether a reasonable possibility exists that the entity’s controls will fail to prevent or to detect and correct a misstatement of an account balance or disclosure.

**.141** The severity of a deficiency does not depend on whether a misstatement actually occurred. If the auditor identifies a deficiency in internal control but has not identified an actual misstatement related to that deficiency, the auditor cannot automatically conclude that the deficiency is not a significant deficiency or a material weakness. If a misstatement has been identified, the auditor should consider the potential for further misstatement in the financial statements being audited.

**.142** The AICPA published Audit Risk Alert *Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115* (product no. 022539kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

### The Applicability of SAS No. 115 to Yellow Book and Single Audits

**.143** The GAO has issued interim guidance on reporting on internal control over financial reporting, making it permissible for auditors to implement SAS No. 115 on their financial statement audits performed under *Government Auditing Standards*. For the full text of the GAO interim guidance related to SAS No. 115, go to www.gao.gov/govaud/icguidance0811.pdf. This guidance becomes effective concurrently with the auditor’s implementation of SAS No. 115. However, OMB has not provided any guidance to date regarding use of the new guidance and definitions in SAS No. 115 for reporting on internal control over compliance in single audits. Therefore, it would not be appropriate for auditors to use definitions for reporting on internal control over compliance as found in SAS No. 115 until such time that OMB guidance is amended to allow usage of these new definitions. Readers should monitor the OMB Web site for further guidance at www.whitehouse.gov/omb and look to the Governmental Audit Quality Center Web site (www.aicpa.org/GAQC) for additional updates.

---

*The term reasonably possible, as used in the definitions of the term material weakness, has the same meaning as defined in Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*. Paragraph 3 of FASB Statement No. 5 states

When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms probable, reasonably possible, and remote to identify three areas within that range, as follows:

a. Probable. The future event or events are likely to occur.

b. Reasonably possible. The chance of the future event or events occurring is more than remote but less than likely.

c. Remote. The chance of the future event or events occurring is slight.

Therefore, the likelihood of an event is a reasonable possibility when it is reasonably possible or probable.

* At the time of this writing, the FASB *Accounting Standards Codification™* (ASC) had not yet been issued as authoritative. When the FASB ASC is issued as authoritative, the definitions currently found in FASB Statement No. 5 will be located at FASB ASC 450-20-25-1.
Accounting Issues and Developments

GASB Accounting Standards Upcoming Implementation Dates

.144 A number of GASB pronouncements issued prior to 2008 have provisions with effective dates for fiscal periods ending in 2009 and 2010. These pronouncements and applicable implementation provisions are highlighted as follows.

GASB Statement No. 43, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans

.145 This statement establishes standardized financial reporting standards for OPEB plans. The standards in this statement apply for OPEB trust funds included in the financial statements of plan employers, as well as for the outside financial statements of OPEB plans or the employee retirement systems, or other third parties that oversee them. Requirements for reporting of OPEB funds by administrators of multiple-employer OPEB plans is also described in this statement when the fund used to accumulate assets and pay benefits or premiums when due is not a trust fund.

.146 The requirements of GASB Statement No. 43 for an OPEB plan are effective one year prior to the effective date of the related GASB Statement No. 45 for the employer (single-employer plan) or for the largest participating employer in the plan (multiple-employer plan). The requirements of GASB Statement No. 45 are effective in three phases based on a government’s implementation phase for the purpose of GASB Statement No. 34, Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments. (See preceding explanation of phase 1, 2, and 3 governments in the GASB Statement No. 34 discussion.) Plans in which the sole or largest participating employer was a phase 1 government, for the purpose of implementation of GASB Statement No. 34, were required to apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2005. Plans in which the sole or largest participating employer was a phase 2 government, for the purpose of implementation of GASB Statement No. 34, were required to apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2006. Plans in which the sole or largest participating employer was a phase 3 government, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 43 in financial statements for periods beginning after December 15, 2007. Early implementation of GASB Statement No. 43 is encouraged.

GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions

.147 This statement establishes standards of accounting and financial reporting for OPEB expense/expenditures and related liabilities or assets, note disclosures, and RSI in the financial statements of state and local governmental employers.

.148 The requirements of GASB Statement No. 45 are effective in three phases. Governments that were phase 1 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2006. Governments that were phase 2 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2007. Governments that were phase 3 governments, for the purpose of implementation of GASB Statement No. 34, should apply the requirements of GASB Statement No. 45 in financial statements for periods beginning after December 15, 2008. All component units are required to implement the requirements of GASB Statement No. 45 no later than the same year as their primary government.
GASB Statement No. 49, Accounting and Financial Reporting for Pollution Remediation Obligations

.149 This statement addresses accounting and financial reporting standards for pollution remediation obligations, which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities, such as site assessments and clean-ups. Governments are required to assess pollution remediation obligations for recognition when any of five obligating events occurs. Obligations are measured using expected cash flows and generally will be recognized as an expense and liability but may qualify for capitalization if certain criteria are met. Certain types of recoveries affect measurement. The scope of the statement excludes pollution prevention or control obligations with respect to current operations and future pollution remediation activities that are required upon retirement of an asset, such as landfill closure and postclosure care and nuclear power plant decommissioning.

.150 GASB Statement No. 49 is effective for financial statements for periods beginning after December 15, 2007, with measurement of pollution remediation liabilities required at the beginning of that period so that beginning net assets can be restated. However, governments that have sufficient objective and verifiable information to apply the expected cash flow technique to measure the liability in prior periods are required to apply the provisions retroactively for all such prior periods presented.

GASB Statement No. 51, Accounting and Financial Reporting for Intangible Assets

.151 GASB Statement No. 51, issued in June 2007, provides guidance regarding how to identify, account for, and report intangible assets.

.152 This statement requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets. Many different types of assets that may be considered intangible assets, including easements, water rights, timber rights, patents, trademarks, and computer software. Intangible assets and, more specifically, easements, are referred to in the description of capital assets in GASB Statement No. 34. This reference created questions about whether and when intangible assets should be considered capital assets for financial reporting purposes. An absence of sufficiently specific authoritative guidance that addresses these questions has resulted in inconsistencies in the accounting and financial reporting of intangible assets among state and local governments, particularly in the areas of recognition, initial measurement, and amortization. The objective of this statement is to establish accounting and financial reporting requirements for intangible assets to reduce these inconsistencies, thereby enhancing the comparability of the accounting and financial reporting of such assets among state and local governments.

.153 Existing authoritative guidance related to the accounting and financial reporting for capital assets should be applied to these intangible assets, as applicable. This statement also provides authoritative guidance that specifically addresses the nature of these intangible assets. Such guidance should be applied in addition to the existing authoritative guidance for capital assets.

.154 This statement requires that an intangible asset be recognized in the statement of net assets only if it is considered identifiable. Additionally, this statement establishes a specified-conditions approach to recognizing intangible assets that are internally generated. Effectively, outlays associated with the development of such assets should not begin to be capitalized until certain criteria are met. Outlays incurred prior to meeting these criteria should be expensed as incurred. This statement also provides guidance on recognizing internally generated computer software as an intangible asset. This guidance serves as an application of the specified-conditions approach to the development cycle of computer software.

.155 This statement also establishes guidance related to the amortization of intangible assets within its scope. This statement provides guidance on determining the useful life of intangible assets when the length of their life is limited by contractual or legal provisions. If there are no factors that limit the useful life of an intangible asset, the statement provides that the intangible asset be considered to have an indefinite useful life. Intangible assets with indefinite useful lives should not be amortized unless their useful life is subsequently determined to no longer be indefinite due to a change in circumstances.
The requirements of this statement are effective for financial statements for periods beginning after June 15, 2009; early implementation is encouraged. The provisions of this statement generally are required to be applied retroactively. For governments that were classified as phase 1 or phase 2 governments for the purpose of implementing GASB Statement No. 34, retroactive reporting is required for intangible assets acquired in fiscal years ended after June 30, 1980, except for those considered to have indefinite useful lives as of the effective date of this statement and those that would be considered internally generated. Retroactive reporting of intangible assets by phase 3 governments is encouraged but not required. Retroactive reporting is not required but is permitted for intangible assets considered to have indefinite useful lives as of the effective date of this statement and those considered to be internally generated.

**GASB Statement No. 52, Land and Other Real Estate Held as Investments by Endowments**

In November 2007 GASB issued GASB Statement No. 52, which establishes consistent accounting and financial reporting standards for land and other real estate held as investment by endowments, including permanent funds. These investments will likely be encountered more often in colleges and universities and their related foundations than general-purpose governments. Endowments generally exist to invest resources for the purpose of generating income.

This statement requires that land and other real estate held as investments by endowments be reported at fair value and the changes in fair value reported as investment income.

This statement is effective for financial statements for periods beginning after June 15, 2008. Earlier application is encouraged.

**Recently Issued GASB Pronouncements and Related Guidance**

The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA Comprehensive Audit Risk Alert (product no. 022339kk) and other AICPA industry-specific alerts also contain summaries of recent nongovernmental accounting pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

**GASB Statement No. 56, Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards**

GASB Statement No. 56, issued in March 2009, incorporates into GASB authoritative literature certain accounting and financial reporting guidance presented in the AICPA’s SASs. This statement addresses three issues not included in the GASB authoritative accounting literature that establishes accounting principles—related party transactions, going concern considerations, and subsequent events.

Although not intended to change practice, certain provisions of GASB Statement No. 56 differ from the AU sections of AICPA Professional Standards from which they were derived. For example, GASB Statement No. 56 specifies an evaluation by management of a government’s ability to continue as a going concern for a period of 12 months beyond the financial statement date plus any period shortly thereafter about which there is a current doubt. Paragraph .03 of AU section 341 specifies that the auditor should evaluate whether there is substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time.

Other sections of AICPA Professional Standards that are incorporated into this statement are AU section 334, Related Parties (AICPA, Professional Standards, vol. 1), and AU section 560. GASB Statement No. 56 became effective upon issuance.
GASB Statement No. 55, The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments

.164 GASB Statement No. 55, issued in March 2009, incorporates the hierarchy GAAP for state and local governments into GASB authoritative literature. It is intended to make it easier for preparers of state and local government financial statements to identify and apply the GAAP hierarchy, which consists of sources of accounting principles used in the preparation of financial statements so that they are presented in conformity with GAAP and the framework for selecting those principles. Like GASB Statement No. 56, this statement contributes to GASB’s efforts to codify all GAAP for state and local governments so that they derive from a single source.

.165 Prior to the statement, the GAAP hierarchy was set forth in SAS No. 69, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles (AICPA, Professional Standards, vol. 1, AU sec. 411), rather than in the authoritative accounting literature of GASB. GASB Statement No. 55 moves relevant portions of that SAS to GASB literature without substantive changes. GASB does not anticipate that this statement will result in a change in current practice. GASB Statement No. 55 became effective upon issuance.

GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions

.166 GASB Statement No. 54, issued in March 2009, initially distinguishes fund balance between amounts that are considered nonspendable, such as fund balance associated with inventories, and other amounts that are classified as spendable based on the relative strength of the constraints that control the purposes for which specific amounts can be spent. Beginning with the most binding constraints, fund balance amounts will be reported in the following classifications:

- Restricted—Amounts that can be spent only for the specific purposes stipulated by constitution, external resource providers, or through enabling legislation.
- Committed—Amounts that can be used only for the specific purposes determined by a formal action of the government’s highest level of decision-making authority.
- Assigned—Amounts intended to be used by the government for specific purposes but do not meet the criteria to be classified as restricted or committed.
- Unassigned—The residual classification for the government’s general fund and includes all spendable amounts not contained in the other classifications.

.167 The new standards also clarify the definitions of individual governmental fund types. It interprets certain terms within the definition of special revenue fund types as well as further clarifying the debt service and capital projects fund type definitions. The final standard also specifies how economic stabilization or “rainy day” amounts should be reported. Because of the specific nature of these types of accounts, the statement considers stabilization amounts as specific purposes. Stabilization amounts should be reported in the general fund as restricted or committed if they meet the appropriate criteria. Only if the resources in the stabilization arrangement derive from a restricted or committed revenue source could a stabilization fund be reported as a special revenue fund.

.168 The definitions of the general fund, special revenue fund type, capital projects fund type, debt service fund type, and permanent fund type are clarified by the statement. The capital projects fund type was clarified for better alignment with the needs of preparers and users. Definitions are as follows:

**General fund.** Account for and report all financial resources and uses not accounted for and reported in another fund.

**Special revenue funds.** Account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects.

**Capital projects funds.** Account for and report financial resources that are restricted, committed, or assigned to the expenditure for capital outlays, including the acquisition of construction of capital facilities and other capital assets.
Debt service funds. Account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest.

Permanent funds. Account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government’s programs, that is, for the benefit of the government or its citizenry.

.169 For governments that use encumbrance accounting, significant encumbrances should be disclosed in the notes to the basic financial statements by major funds in the aggregate in conjunction with disclosures about other significant commitments. They should not be separately displayed within committed, assigned, or restricted categories.

.170 GASB Statement No. 54 is effective for financial statements for periods beginning after June 15, 2010. Earlier application is encouraged. Fund balance reclassifications made to conform to GASB Statement No. 54 should be retroactively applied by restating fund balance for all prior periods presented.

GASB Statement No. 53, Accounting and Financial Reporting for Derivative Instruments

.171 GASB Statement No. 53, issued in June 2008, addresses the recognition, measurement, and disclosure of information regarding derivative instruments entered into by state and local governments. Derivative instruments are often complex financial arrangements used by governments to manage specific risks or to make investments. By entering into these arrangements, governments receive and make payments based on market prices without actually entering into the related financial or commodity transactions. Derivative instruments associated with changing financial and commodity prices result in changing cash flows and fair values that can be used as effective risk management or investment tools. Derivative instruments, however, also can expose governments to significant risks and liabilities. Common types of derivative instruments used by governments include interest rate and commodity swaps, interest rate locks, options (caps, floors, and collars), swaptions, forward contracts, and futures contracts.

.172 Governments enter into derivative instruments as investments; as hedges of identified financial risks associated with assets or liabilities or expected transactions (that is, hedgeable items); or to lower the costs of borrowings. Governments often enter into derivative instruments with the intention of effectively fixing cash flows or synthetically fixing prices. For example, a government with variable rate debt may enter into a derivative instrument designed to synthetically fix the debt’s interest rate, thereby hedging the risk that rising interest rates will negatively affect cash flows. Governments also enter into derivative instruments to offset the changes in fair value of hedgeable items.

.173 A key provision in this statement is that derivative instruments covered in its scope, with the exception of synthetic guaranteed investment contracts that are fully benefit-responsive, are reported at fair value. For many derivative instruments, historical prices are zero because their terms are developed so that the instruments may be entered into without a payment being received or made. The changes in fair value of derivative instruments that are used for investment purposes or that are reported as investment derivative instruments because of ineffectiveness are reported within the investment revenue classification. Alternatively, the changes in fair value of derivative instruments that are classified as hedging derivative instruments are reported in the statement of net assets as deferrals.

.174 Derivative instruments associated with hedgeable items that are determined to be effective in reducing exposures to identified financial risks are considered hedging derivative instruments. Effectiveness is determined by considering whether the changes in cash flows or fair values of the potential hedging derivative instrument substantially offset the changes in cash flows or fair values of the hedgeable item. In these instances, hedge accounting should be applied. Under hedge accounting, the changes in fair values of the hedging derivative instrument are reported as either deferred inflows or deferred outflows in a government’s statement of net assets.

.175 GASB Statement No. 53 describes the methods of evaluating effectiveness. The consistent critical terms method considers the terms of the potential hedging derivative instrument and the hedgeable item.
relevant terms match, or in certain instances, are similar, a potential hedging derivative instrument is
determined to be effective. The other methods are based on quantitative analyses. The synthetic instrument
method considers whether a fixed rate or price has been established within a prescribed range. The
dollar-offset method evaluates changes in expected cash flows or fair values over time between the potential
hedging derivative instrument and the hedgeable item. The regression analysis method considers the
relationship between changes in the cash flows or fair values of the potential hedging derivative instrument
and the hedgeable item. In these methods, critical and quantitative values are evaluated to determine whether
a potential hedging derivative instrument is effective. Quantitative methods other than those specified in the
statement are permitted, provided that they address whether the changes in cash flows or fair values of the
potential hedging derivative instrument substantially offset the changes in cash flows or fair values of the
hedgeable item.

The disclosures previously required by GASB Technical Bulletin (TB) No. 2003-1, Disclosure Require-
ments for Derivatives Not Reported at Fair Value on the Statement of Net Assets, have been incorporated into GASB
Statement No. 53 and, therefore, GASB TB 2003-1 is superseded upon implementation of GASB Statement No.
53. The objectives, terms, and risks of hedging derivative instruments are required disclosures. Disclosures
also include a summary of derivative instrument activity that provides an indication of the location of fair
value amounts reported on the financial statements. The disclosures for investment derivative instruments are
similar to the disclosures of other investments.

GASB Statement No. 53 is effective for financial statements for periods beginning after June 15, 2009. Earlier
application is encouraged. For potential hedging derivative instruments existing prior to the fiscal
period during which this statement is implemented, the evaluation of effectiveness should be performed as
of the end of the current period. If determined to be effective, hedging derivative instruments are reported
as if they were effective from their inception. If determined to be ineffective, the potential hedging derivative
instrument is then evaluated as of the end of the prior reporting period. A comprehensive implementation
guide to GASB Statement No. 53 was released by GASB in April 2009.

GASB Statement No. 53, Service Efforts and Accomplishments Reporting—an
amendment of GASB Concepts Statement No. 2

GASB Concepts Statement No. 5, issued in November 2008, updates provisions in GASB Concepts
Statement No. 2 in order to reflect developments that have occurred since GASB Concepts Statement No. 2
was issued in 1994. The proposed changes are based on the findings of extensive research by GASB and others
and the results of GASB monitoring of state and local governments that have been using and reporting service
efforts and accomplishments (SEA) performance information.

The revisions to GASB Concepts Statement No. 2 clarify that it is beyond the scope of GASB to
establish the goals and objectives of state and local government services, to develop specific nonfinancial
measures or indicators of service performance, or to set benchmarks for service performance. To emphasize this point, GASB Concepts Statement No. 5 removes the entire section of Concepts Statement No. 2, “Developing Reporting Standards for SEA Information.” GASB Concepts Statement No. 2 also was amended to update terminology and to modify certain provisions to reflect what has taken place over the past 14 years.

**FASB Accounting Standards Codification™**

.182 State and local government auditors should take note of the FASB project to codify its accounting standards. GASB Statement No. 34 states that governmental and business-type activities and proprietary funds should be reported based on all applicable GASB pronouncements, as well as FASB Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins of the Committee on Accounting Procedure issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements. As a result, financial statement preparers have the responsibility to identify which provisions within the FASB pronouncements are applicable to them, while disregarding any amendments to such pronouncements made after that date.

.183 FASB is expected to release FASB Accounting Standards Codification™ (ASC) on July 1, 2009, at which time it will become the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC will supersede all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. Once effective, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC will become nonauthoritative. This change will affect accountants and auditors alike.

.184 FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC disassembled and reassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the Emerging Issues Task Force [EITF], and the AICPA) to organize them under approximately 90 topics. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, EITF, AICPA, and related literature. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance.

.185 FASB ASC is not intended to change U.S. GAAP or any requirements of the SEC; rather, it is part of FASB’s efforts to reduce the complexity of accounting standards and also to facilitate international convergence. Moreover, FASB ASC does not include governmental accounting standards.

.186 Identifying the FASB pronouncements applicable to governments within the codification of the FASB standards will not be possible because the standards are presented in the codification as amended and have been reorganized, together with literature from all levels of the U.S. GAAP hierarchy, including pronouncements and other related literature, which was not made applicable to state and local governments in GASB Statement No. 34. However, the original pronouncements will be available for reference in the archive section on the FASB Web site. GASB has a project on its current technical agenda to codify pre-November 30, 1989 FASB pronouncements that are applicable to governments as part of GASB’s GAAP. See the “Accounting Pipeline” section of this alert for more information about the GASB project.

.187 The AICPA has published Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, and provide case studies on navigating the FASB ASC Research System and performing accounting research.
Recent Pronouncements

.188 AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org, the GASB Web site at www.gasb.org, and the GAO Web site at www.gao.gov. You also may look for announcements of newly issued accounting standards in the CPA Letter and the Journal of Accountancy.

Recent Auditing and Attestation Pronouncements and Related Guidance

Recent AICPA Independence and Ethics Pronouncements

.191 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

On the Horizon

.192 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about ongoing projects that have particular significance to state and local governments or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.193 The following table lists the various standard setting bodies’ Web sites through which information may be obtained on outstanding projects, including downloading exposure drafts. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard setting bodies for further information.

(continued)
In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards) to apply the clarity drafting conventions and converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board (IAASB). The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made and will be amended, should that prove necessary. See the explanatory memorandum, “Clarification and Convergence,” and the discussion paper, Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Attesting+Standards/Improving+the+Clarity+of+ASB+Standards/default.htm.

Compliance Auditing

In January 2009 the ASB issued a proposed SAS, Compliance Auditing. The proposed SAS would supersede SAS No. 74, Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance (AICPA, Professional Standards, vol. 1, AU sec. 801). The proposed SAS was issued as the direct result of the AICPA’s Compliance Auditing Task Force, which was formed as a result of the President’s Council on Integrity and Efficiency (PCIE) report, Report on National Single Audit Sampling Project.

The proposed SAS clarifies its applicability to, and provides more detailed guidance for, compliance audits. As a result, it is expected that the application of the proposed SAS may change the way an auditor performs a compliance audit. However, how significantly the proposed SAS will affect a firm’s compliance audits will depend on how closely the firm has been following the audit guidance in this guide and adapting existing AICPA SASs to compliance audits.

A summary of the potential effects of the proposed SAS on compliance audits are as follows:

- The proposed SAS presents a more detailed description of auditor requirements than SAS No. 74, which should result in a better understanding of the compliance audit requirements.
- The applicability section of the standard includes compliance audits beyond those performed under OMB Circular A-133 Audits of States, Local Governments, and Non-Profits, such as audits performed under certain federal agency audit guides (for example, HUD guide audits).
The proposed SAS includes in its requirements certain compliance auditing considerations that had previously only been discussed in this audit guide. The inclusion of this material in the standard will result in the guidance being applied to all compliance audits covered by the proposed SAS.

The proposed SAS clarifies the applicability of other AU sections to compliance audits, which may result in practice changes depending on how a firm previously interpreted the applicability of other auditing standards to a compliance audit.

The proposed SAS would apply when an auditor is engaged to perform a compliance audit in accordance with all of the following:

- Generally accepted auditing standards (GAAS)
- The standards for financial audits under Government Auditing Standards
- A governmental audit requirement (defined as a governmental requirement established by law, regulation, rule, or provision of contracts or grant agreements requiring that an entity undergo an audit of its compliance with applicable compliance requirements related to one or more government programs that the entity administers)

As mentioned previously, the proposed SAS encompasses compliance audits beyond those performed under Circular A-133; therefore, more compliance audits will be subject to the requirements of the proposed SAS. The proposed SAS does not apply to the financial statement audit component related to a compliance audit.

Readers may obtain a copy of the proposed SAS and track its current status through the Audit and Attest section of the AICPA’s Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/.

Exposure Draft to Revise Standards for Compilation and Review Engagements

The Accounting and Review Services Committee (ARSC) issued an exposure draft that would revise the standards for compilation and review engagements. The changes would affect the interplay between the standards and independence rules, permitting an accountant to issue a review report on financial statements when the accountant’s independence is impaired by performing nonattest services that were designed to improve the reliability of the client’s financial information.

The draft includes a trio of proposed standards: Framework and Objectives for Performing and Reporting on Compilation and Review Engagements; Compilation of Financial Statements; and Review of Financial Statements. In drafting the proposed standards, the ARSC considered recommendations from the Private Company Practice Section (PCPS) Reliability Task Force. The ARSC and PCPS believe the proposed standards will address many concerns of smaller business owners, users of small business financial statements, and CPAs that serve smaller entities.

The PCPS task force recommended that the ARSC consider revising its standards for situations in which an accountant’s independence is impaired in connection with the performance of a nonattest service relating to the design or operation of an aspect of internal control over financial reporting. These nonattest services help management prepare higher quality or more reliable financial statements.

The proposed standards would also harmonize the AICPA’s review standard with the IAASB’s review standard, International Standard on Review Engagements (ISRE) No. 2400, Engagements to Review Financial Statements.

Significant proposed changes to the Statements on Standards for Accounting and Review Services (SSARs) include the following:

- The introduction of new terms such as moderate assurance, review evidence, and review risk to the review literature to harmonize with international review standards.
• A discussion of materiality in the context of a review engagement.
• A requirement that an accountant establish an understanding with management regarding the services to be performed through a written communication, that is, an engagement letter.
• The establishment of enhanced documentation requirements for compilation and review engagements.
• Guidance for practitioners who are engaged to perform a compilation or review engagement when they have also been engaged to perform nonattest services. The guidance includes reporting requirements for instances in which the accountant’s independence is impaired due to the performance of these services.
• The ability for an accountant to include a general description in the accountant’s compilation report regarding the reason(s) for an independence impairment.

.206 The comment deadline is July 31, 2009. The proposed effective date is for compilations and reviews of financial statements for periods beginning on or after December 15, 2010. Early application would be permitted. For further information on this project, visit www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/ARSC+Reliability+Project.htm.

Accounting Pipeline

Current GASB Projects

.207 GASB currently has a variety of projects in process. Some of these projects are as follows:

• Chapter 9 of the United States Bankruptcy Code project, which will provide accounting and financial reporting guidance for governments that have been granted protection from creditors under Chapter 9 of the United States Bankruptcy Code. The project includes an analysis of the financial reporting consequences for governments that have been granted protection under Chapter 9. “Protection” may include modifications to the terms and conditions of certain of the government’s debt issuances and relief from burdensome provisions of certain executory contracts and unexpired lease commitments.

• Codification of Pre-November 30, 1989, FASB pronouncements, to specifically identify provisions in FASB Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins of the AICPA Committee on Accounting Procedure, issued on or before November 30, 1989 (collectively, the FASB pronouncements) as referenced in paragraph 17 of GASB Statement No. 34, that do not conflict with or contradict GASB pronouncements.

• Conceptual Framework—Recognition and Measurement Attributes, which has two primary objectives:
  — The first objective is to develop recognition criteria for whether information should be reported in state and local governmental financial statements and when that information should be reported.
  — The second objective is to consider the measurement attribute or measurement attributes (for example, historical cost or fair value) that, conceptually, should be used in governmental financial statements. This project ultimately will lead to a Concepts Statement.

• Postemployment Benefit Accounting and Financial Reporting, to consider the possibility of improvements to the existing standards of accounting and financial reporting for postemployment benefits—including pension benefits and OPEB—by state and local governmental employers and by the trustees, administrators, or sponsors of pension or OPEB plans. One objective of this project is to improve accountability, or the transparency of financial reporting, in regard to the financial effects of employers’ commitments and actions related to pension benefits and OPEB. This objective would include improving the information provided to help financial report users assess the degree to which interperiod equity has been achieved. The other objective of this project is to improve the usefulness of information for decisions or judgments of relevance to the various users of the general purpose
external financial reports of governmental employers and pension or OPEB plans. This project currently has an outstanding Invitation to Comment at www.gasb.org.

- Certain Implementation Issues Related to OPEB, to consider whether to modify certain requirements related to the measurement of actuarial liabilities for OPEB by agent employers. The issues relate primarily to the interface between the accounting and financial reporting requirements of GASB Statement Nos. 43 and 45 in regard to agent multiple-employer OPEB plans and specifically include consideration of (1) the timing and frequency of the measurement of actuarial liabilities for OPEB by agent employers and (2) the guidelines regarding use of the alternative measurement method by agent employers with small individual OPEB plans.

- Financial Instruments Omnibus, to consider potential revisions to existing standards regarding financial reporting and disclosure requirements that could address significant issues that have been identified in practice since the issuance of GASB Statement No. 31. This project includes five project elements—external investment pools, custodial credit risk of deposits that participate in deposit placement services, unallocated insurance contracts, interest rate risk disclosures for mutual funds, and reporting realized gains and losses. In addition, the existing portions of GASB Statement No. 53 relating to swap terminations, revenue-based contract exclusions, and investor’s initial rate of return will be addressed.

.208 Readers should be alert for the issuance of due process documents. More information about these and other GASB projects can be found at www.gasb.org/project_pages/index.html.

**Comprehensive Implementation Guide Update**

.209 Annually, GASB publishes the annual update to its *Comprehensive Implementation Guide*. The Comprehensive Implementation Guide consolidates and updates previously issued guides for individual standards and provides current guidance on standards for which no standalone guides have been published.

Help Desk—The *Comprehensive Implementation Guide* can be ordered through GASB’s order department at (800) 748-0659 or via its Web site at www.gasb.org.

**Resource Central**

.210 The following are various resources that practitioners engaged in the state and local government environment may find beneficial.

**Publications**

.211 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide *State and Local Governments* (2009) (product no. 012669kk [paperback], WGG-XXkk [online with the associated Audit Risk Alert], or DGG-XXkk [CD-ROM])
- Audit and Accounting Guide *Health Care Entities* (2009) (product no. 012619kk [paperback], WHC-XXkk [online with the associated Audit Risk Alert], or DHC-XXkk [CD-ROM])
- Audit and Accounting Guide Government Auditing Standards and *Circular A-133 Audits* (2008) (product no. 012748kk [paperback], WRF-XXkk [online with the associated Audit Risk Alert], or DRF-XXkk [CD-ROM])
- Audit Guide *Analytical Procedures* (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])

AICPA Audit and Accounting Manual  

AAM §8070.211
The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides, Audit Risk Alerts, Accounting Trends & Techniques, and more. To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.

AICPA Audit Committee Toolkit for Government Entities

Taxpayers and citizens of governmental entities expect a government to be publicly accountable for the services it provides and for how it utilizes its resources to provide those services. An audit committee has the opportunity to assist the governing body with fiscal accountability demonstrated through strong internal controls, budgetary and other legal compliance, accurate and timely financial reporting, sound business practices, and a culture of strong moral and ethical behavior. More specifically, an audit committee with a government organization can help the government achieve the following:

- Improve financial practices and reporting. An audit committee can periodically meet with the government’s chief executive and financial officers to review, monitor, and direct activities and results related to the government’s maintenance of internal controls and preparation of financial reports.
• Enhance the internal audit function. When an internal audit team reports directly to the audit committee, the internal audit team can provide information to the audit committee about whether the government is meeting its financial and compliance responsibilities and recommend changes in practices and internal controls when necessary.

• Enhance the external audit function. An audit committee can meet with the external auditors to get independent observations about management’s efforts to maintain strong internal controls, appropriate financial reporting, and sound business practices.

.214 For governments interested in establishing or enhancing an audit committee, the AICPA Audit Committee Toolkit: Government Organizations (toolkit) provides valuable information and tools that will help a governing body and its officials create an effective audit committee function to help improve fiscal accountability.

.215 These tools inform and educate audit committees about changes in government reporting standards and the government environment as a whole. For governments that already have an audit committee, the toolkit may improve the efficiency and effectiveness of the audit committee. In either situation, the toolkit’s easy-to-use set of checklists, questionnaires, and other useful information can make the audit committee’s job easier to accomplish. The goal of the toolkit is to assist government audit committees in taking a much greater role in providing information to and assisting the governing body with meeting their fiduciary responsibilities. The audit committee tools are available for download from Audit Committee Effectiveness Center of the AICPA Web site at www.aicpa.org/Audcommctr/toolkitsgovt/homepage.htm.

Continuing Professional Education

.216 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs including the following:

• AICPA’s Annual Accounting and Auditing Update Workshop (2009–2010 Edition) (product no. 736185kk [text] or 187193kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

• Internal Control Deficiencies: Assessment and Reporting Under SAS Nos. 112 & 115 (product no. 733292kk [text]). This course focuses on compliance with the standards’ requirements by examining each stage of the decision-making framework using numerous illustrations and practice exercises. The course also applies to managers of nonpublic companies to enable them to decide whether a control deficiency exists and how to correct it.

.217 Among the many courses, the following are specifically related to the state and local governments:

• State & Local Government Strategic Briefing—2008/2009 (product no. 780125kk [online]). This course, based on a webcast, provides participants with a strategic look at what’s important in the governmental accounting and auditing area. The program addresses recently issued GASB pronouncements affecting both preparers and auditors and features highlights of recently issued GAAS and the latest updates to the AICPA Audit and Accounting Guide State and Local Governments.

• Foundations in Governmental Accounting (product no. 731645kk [text]). This course features the fundamental tenets of governmental accounting and reporting in the post-GASB Statement No. 34 environment. Learn more than the buzz words—learn the underlying concepts and how they are applied.

• Governmental Accounting and Auditing Update (2008/2009 Edition) (product no. 736478kk [text] or 186484kk [DVD]). This timely, up-to-the-minute course is designed to provide you with a comprehensive understanding of new developments, so you can provide better services to both clients and the public. For 2008–2009, the course includes coverage of the new Yellow Book, the risk assessment SASs, SAS No. 112, and more.

• Government Accounting and Reporting: Putting It All Together (product no. 732803kk). This course goes deep into the accounting and reporting issues for state and local governments. Learn how to navigate
the complexities of government accounting and reporting in the post-GASB Statement No. 34 environment.

- *Audits of HUD-Assisted Projects* (product no. 730299kk). Gain in-depth, hands-on information regarding the HUD organization, programs, policies, and procedures. Review the professional standards affecting specific federal programs.

- *Frequent Frauds Found in Governments and Not-For-Profits* (product no. 733311kk [text]). Through an informative case study approach, this course illustrates common frauds that make headlines and damage the reputations of government and not-for-profits.

.218 Visit www.cpa2biz.com for a complete list of CPE courses.

**Online CPE**

.219 AICPA CPEExpress, offered exclusively through CPA2Biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics. Some courses on state and local government topics include the following:

- *Government Accounting and Reporting: Preparing the Government-Wide Financial Statements*
- *Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments*
- *Yellow Book: Ethical Principles and General Standards*
- *2008 Annual Update: Government & NPO: GASB Activities*
- *Governmental and NPO Workpaper Techniques: Overall Approach*

.220 To register or learn more, visit www.cpa2biz.com.

**Webcasts**

.221 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM or online.

**Member Service Center**

.222 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

**Hotlines**

**Accounting and Auditing Technical Hotline**

.223 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

**Ethics Hotline**

.224 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the
application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conferences

.225 Governmental Accounting and Auditing Update Conference (GAAC) EAST is held in late summer in Washington, D.C., and its counterpart Governmental Accounting and Auditing Update Conference (GAAC) WEST takes place in Denver, Colorado in early fall. These conferences are designed for CPAs working in federal, state, and local government; public practitioners with government auditees; and regulators who need to be aware of emerging developments. These CPAs should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession—including the standard setters themselves.

.226 AICPA National Governmental and Not-for-Profit Training is scheduled to be held in October in Atlanta, Georgia. Obtain the most up-to-date coverage on current and emerging issues and topics. Standard setters and industry leaders discuss a broad range of topics, including developments in governmental accounting and auditing, advances in financial statement reporting and the latest in proposed regulations, future issues affecting nonprofit organizations, and laws on the local, state, and federal government levels.

.227 AICPA National Health Care Industry Conference is scheduled to be held in September in Scottsdale, Arizona. This conference is an unparalleled opportunity to gain the information and techniques you need to know to stay on top of trends to benefit your practice and your client offerings. With access to some of the nation’s top health care specialists, you’ll get up-to-the-minute information on the latest developments in health care issues.

.228 For further information about the conferences, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA GAQC

.229 The GAQC is a firm-based, voluntary membership center designed to improve the quality of governmental audits, and the value of such audits, to purchasers of governmental audit services. Governmental audits are audits and attestation engagements performed under Government Auditing Standards of federal, state, or local governments; not-for-profit organizations; and certain for-profit organizations, such as housing projects and colleges and universities that participate in governmental programs or receive governmental financial assistance. The GAQC keeps member firms informed about the latest developments, as well as provides tools and information to help them better manage their audit practice. Firms that join demonstrate their commitment to audit quality by agreeing to adhere to certain membership requirements.

.230 The GAQC has been in existence since September 2004. Since its launch, center membership has grown to almost 1200 firms from 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The membership accounts for approximately 83 percent of the total federal expenditures covered in single audits performed by CPA firms in the Federal Audit Clearinghouse database (http://harvester.census.gov/sac/) for the year 2006 (the latest year with complete submission data).

.231 The center’s focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information that they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail alerts with the latest audit and regulatory developments, including information on the ARRA and its impact on your audits
- Exclusive webcasts and teleconferences on compliance auditing and timely topics relevant to governmental and not-for-profit financial statement audits (optional CPE is available for a small fee, and events are archived online.)
• Dedicated GAQC Web site at www.aicpa.org/GAQC with resources, community, events, and products, and a complete listing of GAQC member firms in each state
• Online member discussion forums for sharing best practices and discussing issues firms are facing
• Savings on professional liability insurance

Help Desk—With all of the quality issues being noted in governmental audits (see further discussion in the “Legislative and Regulatory Developments” and “Audit and Attestation Issues and Developments” sections), your firm should consider joining the center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail GAQC staff at GAQC@aicpa.org. To preview member benefits, go to http://gaqc.aicpa.org/Memberships/.

AICPA Industry Expert Panel—State and Local Governments

.232 The State and Local Government Expert Panel is an AICPA volunteer group whose purpose it is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with GASB regulators, such as the GAO and OMB, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

Industry Web Sites

.233 The Internet covers a vast amount of information that may be valuable to auditors of state and local governments, including current industry trends and developments. Some of the more relevant sites for auditors with governmental clients include those shown in the following table:

<table>
<thead>
<tr>
<th>Organization</th>
<th>Web Site</th>

Common Interest Realty Associations Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of common interest realty associations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also is intended to provide accountants with an update on recent practice issues and professional standards that may affect the compilation and review engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards. If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate.

This publication is also an other compilation and review publication as defined in AR section 50, Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2). Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the Statements on Standards for Accounting and Review Services. If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate.

The auditing and compilation and review guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Doug Bowman, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Gayle L. Cagianut, CPA
Steven F. Feldman, CPA
Mitchell H. Frumkin, P.E., R.S.
Monte Kane, CPA
Gary B. Rosen, CPA, CFE
Mark B. Shernicoff, CPA
Clifford J. Treese, CPCU, ARM, CIRMS
How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits of common interest realty associations (CIRAs). This alert also can be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Both alerts can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

Audit Risk

.03 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), audit risk is broadly defined as “the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated.” At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of (a) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (b) the risk (detection risk) that the auditor will not detect such misstatements.

.04 The auditor’s combined assessment of inherent risk and control risk is described as the risks of material misstatement. The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed.

.05 As set forth in paragraph .12 of AU section 312, the auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures. Furthermore, paragraph .19 of AU section 312 states that “[t]he auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements ... as a whole at an appropriately low level of audit risk.”

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.06 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
• Measurement and review of the entity’s financial performance
• Internal control, which includes the five interrelated components identified in paragraph .41 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), and the selection and application of accounting policies, among other significant aspects of internal control relevant to the audit.

.07 The CIRA industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.08 The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.09 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding. Paragraph .106 of AU section 314 states that, “[i]n making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions.” Specific internal control matters pertaining to CIRAs are discussed later in this alert.

.10 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

**Economic and Industry Developments**

**The State of the Economy**

.11 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.

.12 In September 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, acquisitions of several investment and commercial banks (including some that required assistance from federal agencies), and the placement into conservatorship of the Federal National Mortgage Association (nicknamed Fannie Mae) and the Federal Home Mortgage Corporation (nicknamed Freddie Mac). Both Fannie Mae and Freddie Mac are government sponsored enterprises that purchase mortgages from lenders who originate them to either hold in their own portfolio or “securitize” them for sale in the secondary market. Further, several foreign financial institutions received assistance from their national governments or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant publicly-registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short-term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened, and corporations and financial institutions generally recognized as creditworthy
began experiencing difficulty borrowing money in the financial markets for any period of time longer than an overnight basis.

.13 In response, the U.S. Senate and, on October 3, 2008, the U.S. House of Representatives passed a bill, the Emergency Economic Stabilization Act of 2008 (the Act), which was signed into law by the president on that same day. Primary components of this bill include (a) an allocation of $700 billion to stabilize the U.S. financial system; (b) creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that participate; (c) increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion; (d) temporary increase of Federal Deposit Insurance Corporation (FDIC) insurance limits; (e) restatement of the Securities and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, *Fair Value Measurements*; and (f) the requirement of the SEC to conduct a study on the impact and effects of FASB Statement No. 157. The impact of these events on the financial markets in the coming months and years is difficult to predict.

.14 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 third quarter preliminary estimates, real GDP decreased at an annual rate of 0.5 percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

.15 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate has risen. As of November 2008, the unemployment rate was 6.7 percent, representing approximately 10.3 million people.

.16 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates more than 5.0 percentage points to less than .25 percent as of mid December 2008. The Federal Reserve noted in its December press release that since October 2008, labor market conditions have deteriorated and the available data indicate that consumer spending, business investment, and industrial production have declined. Financial markets remain quite strained and credit conditions tight. Overall, the outlook for economic activity has weakened further. Inflationary pressures have diminished appreciably and are expected to continue to moderate. The Federal Open Market Committee anticipates that weak economic conditions are likely to warrant exceptionally low levels of the federal funds rate for some time.

**Industry Trends and Conditions**

*Current Economic Downturn*

.17 Since early 2007, the decline in the residential housing market has sent shockwaves through the entire U.S. economy. The affected parties from the housing market downturn range from homeowners to investment banks to investors in real estate companies. The outlook regarding whether we have hit the bottom yet is not consistent among analysts and experts. However, the overwhelming sentiment is that a further decline is likely. According to the *New York Times*, from 2001 to 2007 domestic financial indebtedness grew from $8.5 trillion to $14.5 trillion, with home mortgage debt responsible for $5.1 billion (or 85 percent) of that change (home mortgage debt increased from $4.9 trillion to $10 trillion). In 2007, the total indebtedness was three times the size of the GDP. This type of scenario has not occurred since the Great Depression. This current situation has arisen from what some experts have described as the perfect storm of circumstances, which include rising home values, historically low interest rates, the loosening of underwriting and lending standards, unprecedented high loan-to-value ratios, and the notion that housing is a fail-safe investment.
The combination of the state of the economy, the failures of and subsequent takeovers of banks, and the actions taken by the U.S. Treasury during 2007 and 2008 are unprecedented. Some of the possible effects on real estate and construction companies include counterparty default risk, concentration on liquidity, shrinking balance sheets due to asset write-downs, contraction of credit availability, increased focus on recourse versus nonrecourse debt, tenant defaults leading to greater allowances for doubtful accounts and write-offs, and a general lack of opportunity for activity and investment in the market place.

The real estate residential market has continued to experience challenging times, with most experts not anticipating a turnaround in the near future. According to the National Association of Realtors (NAR), from May to June 2008 existing home sales fell 2.6 percent and, when compared to June 2007, decreased 15.5 percent. As of the first week in August 2008, mortgage applications decreased 8.1 percent from a month prior and 29.5 percent from the prior year. June 2008 median housing prices also dropped 10 percent when compared to June 2007. Construction starts of buildings with two units or more (for sale, not for rent) during the first two quarters of 2008, compared with construction starts in the first two quarters of 2007, 2006, and 2005, declined 32 percent, 51 percent, and 39 percent, respectively.

Option adjustable rate mortgages (ARMs) became popular during the peak of the residential real estate cycle. The defining characteristics of an option ARM include the ability in the beginning to make minimum payments that do not cover any principal and do not necessarily cover all the interest. Any unpaid interest is added to the loan balance up to a certain dollar threshold. At that point the loan is recast (that is, recalculated) as a standard amortizing principal loan. The interest rates usually increase to typical mortgage rates after the first few months. According to Credit Suisse, by April 2009 monthly option recasts will reach $5 billion and peak around January 2010 with $10 billion in recasts. Of the option ARMs issued in 2006, approximately 13 percent were 60 days delinquent within the first 18 months of issuance. As of June 2008, borrowers with option ARMs number about 1 million. As of mid-2008, only a small amount have been recast, which explains the overwhelming estimates for recasting in 2009 and 2010. Additionally, of the approximately $500 billion of outstanding option ARM loans as of June 2008, 60 percent are attributable to California homeowners.

According to RealtyTrac, foreclosure filings in June 2008 were down 3 percent from May 2008, but up 53 percent from June 2007 for a total of 252,363 properties for the month of June 2008. This is equivalent to 1 out of every 483 U.S. households. However the actual locales of these properties receiving foreclosure filings are highly concentrated in Nevada, with 1 out of every 122 households in foreclosure; in California, with 1 out of every 192 households in foreclosure; and in Arizona, with 1 out of every 201 households in foreclosure. Regions with the fastest and greatest growth during the real estate boom also have fallen the fastest and hardest during this downturn. Many mortgages in trouble are associated with homes located in affordable outskirts of expensive cities.

The causes of the residential real estate downturn are numerous, with the result being larger than the sum of its pieces due to their unique interaction. Speaking about the general real estate market, a PricewaterhouseCoopers June 2008 Global Real Estate Now article noted, “The velocity and froth that accompanied the rush to ‘do deals’ created a highly competitive environment that led both issuers and investors to act in favour of the greater greed rather than the greater good.” With rising real estate values, historically low interest rates, and abundant sources of liquidity, both banks and borrowers entered into riskier than normal mortgages. These mortgages had little to zero money down, high loan-to-value ratios, teaser interest rates, and decreased to nearly nonexistent scrutiny of income verification. Essentially, many borrowers received mortgages they could not really afford and banks took on the additional risk.

As delinquencies began increasing in the residential market, lenders were unable to sell the loans they had already made. In addition, the secondary market dried up due to executives being nervous about the quality of the assets, the riskiness of these investments, and the soundness of the financial institutions. This inhibited banks from being able to sell loans for securitizations, which reduced liquidity and lending activity even further. This is further exacerbated by defaulting homeowners and imminent foreclosures of homes that may not be worth the outstanding loan value. According to a Real Estate Research Corporation survey of investors, the following information was gathered on the availability of capital (on a scale of 1 to 10, with
10 being the highest): 8.7 in the first quarter of 2007, 5.5 in the fourth quarter of 2007, and 4.7 in the first quarter of 2008.

.24 The multifamily housing rental market also has been negatively affected by the residential real estate conditions. According to NAR, vacancy rates are expected to rise to 5.7 percent by the end of 2008, up from 4.8 percent at the end of 2007. An explanation for this trend is that the second half of 2008 will produce an increase in first time home buyers due to declining prices and the recently implemented tax credit for first time home buyers. According to CB Richard Ellis, other factors shifting vacancy upward include job losses and an increase in supply. However, the increase in supply is not only from completed construction of for-rent buildings, but also from previously for-sale condominium units being made available to rent. This phenomenon is only expected to increase as more condominium buildings are completed without a matching increase of demand to buy.

Going Green and Value Engineering

.25 As CIRAs across the country are faced with ongoing increases in the cost of maintenance, energy, and major repairs and replacements, more and more are looking for ways to minimize the effect on monthly assessments. Many CIRAs analyze their budget by examining costs of maintenance, energy, and major repairs and replacements individually. However, an increasingly prevalent approach is being utilized in some areas of the country in which CIRAs are performing a consolidated analysis of all three portions of the budget to take advantage of the cost savings that can be realized as a result of understanding the relationships among all three portions. One way CIRAs are saving money is through green initiatives, specifically through a CIRA's reduced energy consumption as well as the use of alternative energy sources.

.26 Typically, the replacement of a wood deck, for example, is done by installing material and equipment similar to the original components. However, by using an integrated approach referred to as value engineering, the CIRA can perform a comprehensive material and equipment review that includes all associated energy, maintenance, and replacement costs. This analysis may suggest using a different type of material, such as composite decking, which does not require replacement or ongoing maintenance. Although the initial cost of the maintenance-free material might be higher, a net savings is achieved through lower maintenance costs and an extended life span. CIRAs using this approach are in a position to evaluate different options for material and equipment upgrades that often may result in long-term reductions in overall costs for these three budget areas in the aggregate. The auditor should be aware certain replacements may constitute capital improvements that involve other considerations, such as member approval, among other important considerations.

Residential Community Association Demographics

.27 It is estimated that 85 percent to 90 percent of all new for-sale housing is located in one of the three basic types of CIRAs. Between 40 percent and 60 percent of CIRAs are contract managed by specialized community association management companies and the remaining CIRAs are self-managed either solely by volunteers or with association-hired staff. Regardless of management structure, all CIRAs are governed by a volunteer board of directors elected by the membership. Housing cooperative corporations represent approximately 5 percent to 7 percent of all association units. Condominium associations represent 38 percent to 42 percent and planned communities constitute the balance. Despite the continuing growth of CIRA residents, as noted in the following table, this distribution has remained constant over the past few years.

Quick Facts About Residential Community Associations

.28 The following table presents quick facts about residential community associations:

.29 To further put the size of the CIRA industry in perspective, consider that CIRA boards of directors supervise the collection of over $41 billion in annual assessments. For comparison purposes, less than 5 percent of manufacturing industries reported total shipments to customers that exceeded $41 billion, according to the most recent data available on the Bureau of Economic Analysis Web site at www.bea.gov.

Legislative and Regulatory Developments

Select State Developments

.30 States are increasingly imposing financial reporting requirements that include specific information to be presented or disclosed in a CIRA’s financial statements, and such information may be in addition to that required by generally accepted accounting principles (GAAP). For example, in May 2008, Florida passed amendments to Chapter 718, Condominiums, of the Florida Statutes that, among other significant provisions, state that financial statement disclosures must include “at least a summary of the reserves [for future major repairs and replacements], including information as to whether such reserves are being funded at a level sufficient to prevent the need for a special assessment and, if not, the amount of assessments necessary to bring the reserves up to the level necessary to avoid a special assessment.” Also included in the amendments to Chapter 718 were restrictions on the ability of a CIRA to waive certain financial reporting requirements imposed in Chapter 718. The auditor should consider these statutory requirements when auditing a CIRA’s financial statements in addition to the GAAP requirements.

Taxation Developments

80/20 Rule for Cooperative Housing Corporations

.31 The Mortgage Forgiveness Debt Relief Act of 2007 was enacted in December 2007. This act amends subparagraph (D) of section 216(b)(1) of the Internal Revenue Code (IRC) of 1986, which defines cooperative housing corporations. Under IRC section 216 (b)(1), a tenant-stockholder in a cooperative corporation is entitled to deduct his or her proportionate share of the cooperative corporation’s real estate taxes and mortgage interest. Under previous law, this deduction was only available if the cooperative corporation met the 80/20 rule. The 80/20 rule required that 80 percent or more of the cooperative corporation’s revenue must come from the tenant-stockholders.

.32 Under the new legislation, two alternative tests are added to the previous 80 percent test. In order to qualify as a cooperative corporation, only one of the following three tests has to be met:

1. “Eighty percent or more of the [cooperative] corporation’s gross income ... is derived from tenant-stockholders.

2. At all times during [the] year, 80 percent or more of the total square footage of the [cooperative] corporation’s property is used or available for use by the tenant-stockholders for residential purposes or purposes ancillary to such residential use.
Ninety percent or more of the expenditures of the [cooperative] corporation paid or incurred during [the] year are paid or incurred for the acquisition, construction, management, maintenance, or care of the [cooperative] corporation’s property for the benefit the tenant-stockholders.”

Many cooperative corporations that previously struggled to meet the 80/20 rule will be able to meet one of the preceding tests.

Previous regulations required all cooperative corporations, excluding farmers’ cooperatives, to file their income tax returns on Form 1120, “U.S. Corporation Income Tax Return.” Because Form 1120 did not distinguish between Subchapter T cooperatives that meet the requirements of IRC section 6072(d) prior to filing and thus must file by the 15th day of the 3rd month after the end of the tax year and those that do not meet the requirements and thus must file by the 15th day of the 9th month after the end of the tax year, the IRS had difficulty determining which filing deadline applies and deciding whether to assert delinquency and failure to pay penalties in the case of returns filed after the 2½ month deadline.

Final regulations, effective for taxable years ending on or after December 21, 2007, require all cooperative corporations to which Subchapter T applies (Subchapter T cooperatives) to file their returns on Form 1120-C, “U.S. Income Tax Return for Cooperative Associations.” The information that Subchapter T cooperatives will be required to provide on the new Form 1120-C will assist taxpayers and the IRS in determining the appropriate filing deadline. Having that information will reduce the burden on taxpayers and help the IRS avoid asserting penalties in inappropriate cases. Having all Subchapter T cooperatives file their income tax returns on Form 1120-C also will eliminate confusion over which form to file and promote efficiency in addressing income tax issues common to Subchapter T cooperatives.

A significant difference from Form 1120 is the addition of Schedule G that specifically requires the allocation of all income and expense items into patronage and nonpatronage columns for all cooperative corporations with over $250,000 in gross receipts. Previously, such an allocation was only explicitly required for cooperative corporations reporting over $10 million in gross receipts. This allocation always has been required for all cooperative corporations but not physically displayed on Form 1120.

One result of allocating income on Schedule G is that net operating losses stay segregated by patronage and nonpatronage sources. The IRS rules prevent patronage losses from offsetting nonpatronage income. This can result in some pitfalls as a cooperative corporation uses up a net operating loss. In loss years, the loss is normally not allocated to members, resulting in an accumulation of patronage and nonpatronage net operating losses. When the cooperative corporation begins generating a positive net income, it may issue patronage dividends before its patronage net operating loss is used. This can result in a situation where it will not be able to use up its patronage net operating loss and will pay more tax on its nonpatronage income than would be expected by only looking at the overall net operating loss carry-forward.

Special Tax Issue Related to Mixed-Use Projects

The residential real estate industry continues to see the development of numerous mixed-use projects, which contain space for both residential and commercial use. Many of these mixed-use projects contain for-sale units and therefore have a CIRA. To qualify to file Form 1120-H, “U.S. Income Tax Return for Homeowners Associations,” and take advantage of the income tax benefits provided under IRC section 528, “Certain Homeowners Associations,” the CIRA must qualify as a homeowners association, which includes a “substantiality test” prescribed in U.S. Treasury Regulation § 1.528-4. This regulation states in part that, “[i]n order for an organization to be considered a condominium management association or a residential real estate management association (and therefore in order for it to be considered a homeowners association), substantially all of its units, lots or buildings must be used by individuals for residences.” Readers may refer to the TaxAlmanac Web site at www.taxalmanac.org for further guidance.
Other Legislation

.39 In light of the fact that cash and cash equivalents are normally material to a CIRA’s balance sheet, the auditor should be aware that, as part of the previously mentioned Emergency Economic Stabilization Act of 2008, the amount of deposit insurance provided by the FDIC is increased from $100,000 to $250,000, effective as of the date of enactment of the bill (October 3, 2008). This provision remains in effect until December 31, 2009. FDIC insurance covers funds in deposit accounts, including checking and savings accounts, money market deposit accounts, and certificates of deposit. FDIC insurance does not, however, cover other financial products and services that insured banks may offer, such as stocks, bonds, mutual fund shares, life insurance policies, annuities, or municipal securities.

.40 As part of its cash and cash equivalents, a CIRA may have a significant amount of money market holdings. Further protecting a CIRA’s money market funds is the U.S. Treasury Department’s Temporary Guarantee Program for Money Market Funds. Under this program, the U.S. Treasury guarantees the share price of participating money market funds that seek to maintain a stable net asset value of $1.00 per share, subject to certain conditions and limitations, for amounts held in participating money market funds as of the close of business on September 19, 2008. Eligible funds must be regulated under Rule 2a-7 of the Investment Company Act of 1940, must maintain a stable share price of $1.00, and must be publicly offered and registered with the SEC. Both taxable and nontaxable funds are eligible for this program. To participate in the program, eligible funds must pay a fee and complete a guarantee agreement and related documents. President George W. Bush approved the use of existing authorities by U.S. Treasury Secretary Henry M. Paulson, Jr., to make available as necessary the assets of the Exchange Stabilization Fund to support the program.

.41 The program will be in effect for an initial three month term, after which the U.S. Treasury Secretary will review the need and terms for the program and the costs to provide the coverage. The secretary has the option to extend the program up to the close of business on September 18, 2009. In order to maintain coverage, funds would have to renew their participation in the program after each extension. If the secretary chooses not to extend the program at the end of the initial three month period, the program will terminate.

Uniform Common Interest Ownership Act

.42 The Uniform Common Interest Ownership Act (UCIOA) was amended in order to update the 1994 UCIOA, which provides provisions for creating, managing, and terminating condominium, planned community, and other types of real estate cooperative corporations. Uniform acts become laws only to the extent that they are enacted into law by state legislatures. State legislatures do not have to enact the precise language of a uniform act and often enact laws with at least some modifications. See the full text of the amendments at www.law.upenn.edu/bll/archives/ulc/ucioa_bor/2008am_approved.pdf.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.43 As mentioned in “The State of the Economy,” unprecedented events occurred in the financial markets in September 2008, resulting in Congress appropriating up to $700 billion to purchase various asset-backed securities. Generally, many fixed income markets became extraordinarily illiquid in late September 2008, resulting in a substantial increase in risk over the valuation assertion for virtually any kind of fixed income security, of any duration. Also, concerns existed about the possibility of significant redemptions from various types of funds and some reports of certain private funds either placing limits on redemptions, freezing the ability to redeem entirely, or determining to commence an orderly wind-down of operations. Thus, subsequent events reporting considerations, and assessment of the “going concern” status of some entities, take on added importance in the current environment as well.

.44 The AICPA staff has issued Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), addressing the potential accounting and auditing implications
when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle. The question and answer covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things, and can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

.45 Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to economic conditions are as follows:

- CIRA activities that are exposed to rising prices of key inputs, including energy, insurance, and construction costs
- Constraints on the availability of capital and credit
- CIRAs in regions with economic volatility, including employment and housing issues related to oversupply and significantly depressed valuations
- Going concern and liquidity issues
- Increasing level of delinquent assessments and bad debts
- Changing mix of unit owners caused by longer presale holding periods of developer-owned units, which may create a concentration of credit risk for the CIRA
- Increasing move toward debt financing, which is possible in an increasingly tightening credit market, to fund future repairs and replacements, rather than special assessments or aggressive funding plans

.46 Although many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

Delinquent Assessments and Bad Debts

.47 Falling property values, lender foreclosures, adverse economic conditions, and homeowner bankruptcies create a tumultuous operating environment for CIRAs. These factors have led to a sharp increase in the number of homeowners who are behind in paying their association assessments. In turn, delinquencies result in a shortfall in the CIRA’s annual revenue and the cost of operating the CIRA must be spread among the other owners who are paying their assessments.

.48 As a result of the rising delinquencies, the CIRA’s balance sheet may reflect an inadequate reserve for bad debts and receivables for assessments that have aged more than in past years. If provided for by the CIRA’s governing documents or state statute, the CIRA also may have recorded receivables for the assessment of interest, late fees, collection costs, and attorney fees. The net realizable value of a CIRA’s accounts receivable balance is an accounting estimate, the reasonableness of which the auditor is responsible for evaluating in the context of the financial statements taken as a whole. Paragraph .10 of AU section 342, Auditing Accounting Estimates (AICPA, Professional Standards, vol. 1), states that, “[i]n evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate.”

.49 If the auditor believes the estimated amount included in the financial statements is unreasonable, based on the auditor’s review and testing of management’s process to develop the estimate, the auditor’s independently developed estimate, the auditor’s review of events or transactions occurring subsequent to the date of the balance sheet but prior to the date of the auditor’s report, and other procedures performed, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement. AU section 312 establishes requirements for and provides guidance on the auditor’s responsibilities for known and likely misstatements.
Adverse economic conditions may create pressures on CIRAs to compromise the adequacy of the presentation of the required supplementary information (RSI) on future major repairs and replacements. For example, a CIRA already experiencing difficulties in collecting member assessments may be hesitant to update its cost study (hereinafter referred to as reserve study) if it suspects that an updated version might increase the recommended level of funding. Although paragraph .04 of AU section 558, Required Supplementary Information (AICPA, Professional Standards, vol. 1), states that “[t]he auditor has no responsibility to audit information outside the basic financial statements in accordance with generally accepted auditing standards,” the auditor should apply certain limited procedures to RSI and report deficiencies in, or the omission of, such information. These limited procedures ordinarily should include inquiries of management about the methods of preparing RSI, including any significant assumptions or interpretations underlying the measurement or presentation.

Based on these limited procedures performed, auditors may find that the estimates of current or future costs of major repairs and replacements presented as RSI have not been recently updated to adequately reflect the trend of rising construction costs. Paragraph 4.33 of the AICPA Audit and Accounting Guide, Common Interest Realty Associations (the CIRA guide), states that CIRAs should present “[e]stimates of current or future costs of future major repairs and replacements of all existing components.” Outdated reserve studies on which these estimates are based may create substantial doubts about whether RSI conforms to the requirements in the CIRA guide. A complete description of recommended practices for the preparation of a reserve study can be found in the publication “National Reserve Study Standards of the Community Associations Institute” published by the Community Associations Institute (CAI), a multidisciplinary, nonprofit organization serving all stakeholders in community associations for more than 35 years. Readers may refer to the CAI Web site at www.CAIonline.org.

Another factor that may indicate RSI is not measured or presented within guidelines established by the aforementioned National Reserve Study Standards is whether the sources or studies used in the preparation of the estimates of current or future major repairs or replacements were prepared by a reserve specialist, a certification offered by the CAI, or other certified professional, such as an engineer or architect. Although such level of expertise in developing reserve studies is not required by the CIRA guide, it may be required by statute, as it is for certain condominium associations in Florida, and it is a factor to consider when performing the limited procedures required to be applied to RSI as part of a CIRA audit engagement.

When the auditor is unable to resolve these aforementioned substantial doubts, paragraph .08 of AU section 558 explains that the auditor should add an explanatory paragraph to the report on the audited financial statements. However, because RSI is outside the basic financial statements, these circumstances do not affect the auditor’s opinion on the fairness of presentation of such financial statements in conformity with GAAP.

Funding for Future Major Repairs and Replacements

As part of understanding the entity and its environment, the auditor should be knowledgeable of the funding plan applicable to the CIRA and whether it is imposed by the CIRA’s governing documents, a statutory obligation, or other binding requirement, such as a board resolution. The CAI publishes the “National Reserve Study Standards of Community Associations Institute,” which recognizes four types of funding plans—full funding, baseline funding, threshold funding, and statutory funding. All four funding plans are based on the following:

- Component inventory (that is, the list of all physical components of common property) that the CIRA must eventually replace or for which major repair obligations will be incurred
- Repair or replacement costs (either current costs or future costs)
- Remaining useful life until replacement or repair
55 The full funding plan is the most conservative in that it will generate more accumulated funds and the baseline funding plan is the least conservative in that its strategy is to simply keep the accumulated funds above zero. Refer to the “National Reserve Study Standards of Community Associations Institute” for more information on the characteristics and strategies of each type of plan. Note that the use of special assessments and loans also may be a part of a CIRA’s funding plan. A sufficient understanding of the CIRA’s funding policy is necessary for the auditor to evaluate the CIRA’s note disclosures for compliance with the funding policy and for adequacy, including the bases of amounts set forth in the notes, as explained in AU section 431, Adequacy of Disclosure in Financial Statements (AICPA, Professional Standards, vol. 1). See the section of this alert entitled “Certain Note Disclosures.”

56 Adverse economic conditions also may affect the CIRA’s ability to comply with existing funding policies or statutory funding requirements for future major repairs and replacements. Paragraph 4.27 of the CIRA guide states that disclosures about such funding should include, among other items, a description of the CIRA’s funding policy and compliance with that policy. The CIRA guide also states that any special assessments or borrowings to fund major repairs and replacements should be disclosed, including any assessments used for purposes other than those for which they were designated. Additionally, paragraph 4.33 of the CIRA guide states that RSI should include the amount of funds accumulated for each component included in the estimates of current or future major repairs and replacements to the extent designated by the board. If the disclosure about a CIRA’s funding for major repairs and replacements is absent or inadequate, AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), establishes requirements and provides applicable guidance. If the CIRA elects to only partially adopt the funding requirements set forth in the reserve study, or if the CIRA elects to defer all funding of the reserve for future major repairs and replacements, the auditor may refer to the example disclosures presented in the CIRA guide.

Certain Concerns at Inception of the CIRA

57 Generally, when a developer or builder, or both, plans a CIRA, whether it is new construction or a conversion, governing documents are prepared for the CIRA, including the type of CIRA, descriptions of the community, and the initial operating budget, which also may contain the initial reserve study. An engineer’s report and a detailed public offering statement also may be included in the governing documents. These governing documents also include a description of the common elements, which will be the responsibility of the CIRA to maintain and replace, as opposed to those components that are the responsibility of the individual unit owners. At this stage, a number of concerns exist relevant to the audit.

58 When the governing documents are prepared for new construction, in many cases the construction has not yet been completed or even commenced. As is typical with most construction, field changes may occur, such that the as-built community does not match the design drawings. The reserve study may be based on the design drawings so it too may no longer match the as-built community. This may result in underfunding of the future major repairs and replacements. To minimize this concern, it is recommended that the developer or the CIRA have the original reserve study included within the governing documents updated to reflect the as-built community. The replacement costs also should be updated. The auditor is reminded that new construction typically carries certain warranties (statutory and other) that may affect the reserve study.

59 In the situation in which the newly formed CIRA is a conversion from another use and not a newly constructed community, another concern arises. This concern is the fact that the components that constitute the common elements are not new and have reduced useful lives. Although with both new construction and conversions the beginning balance in the reserve account is $0, in the case of the conversion and the reduced useful lives, the replacement costs must be amortized over this reduced life, which subsequently will result in higher annual contributions. A risk exists that the reduced useful lives would not be properly accounted for in the reserve study, resulting in unanticipated replacements and inadequate funds at the time of these replacements. Thus, when a newly formed CIRA is the result of a conversion from another use, the auditor might include additional inquiries of management to help ascertain the reasonableness of the methods used to prepare the RSI.
Auditors are reminded that the interests of the developer and the interests of the future unit owners, as they pertain to the reserve study and funding plan, may be divergent. At the time of the preparation of the initial reserve study and development of the policies related to the funding plan, the developer is still in control. The developer’s objectives may be to keep the assessments as low as possible to induce sales, which may not provide for adequate accumulation of funds for future major repairs and replacements.

**Concentration of Revenue**

The combination of the effects of the current economic downturn and the ongoing housing contraction is slowing the rate at which developers of common interest communities are able to sell new units. Thus, the extended developer holding period may be exposing the CIRA to a greater risk of loss than would otherwise exist if the units were owned by individuals. This concentration of revenue has the potential to severely affect the CIRA’s financial condition in the event the developer encounters a financial hardship or is otherwise unable or unwilling to pay assessments or other amounts owed to the CIRA in accordance with the CIRA’s governing documents and state statutes. Paragraph 4.25 of the guide states that, “[i]f 10 percent or more of a CIRA’s revenues are derived from any one source, [including revenues from a developer,] that fact and the amount of revenue from each source [providing 10 percent or more of the revenue] should be disclosed.”

Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties* (AICPA, Technical Practice Aids, ACC sec. 10,640), requires additional disclosures related to the concentration of revenue if all of the following criteria are met, based on information known to management prior to issuance of the financial statements:

- The concentration exists at the date of the financial statements.
- The concentration makes the enterprise vulnerable to the risk of a near-term severe impact.
- It is at least reasonably possible that the events that could cause the severe impact will occur in the near term.

Disclosure of concentrations meeting the aforementioned criteria should include information that is adequate to inform users of the general nature of the risk associated with the concentration.

**Going Concern**

In a severe economic downturn, more than a nominal number of CIRAs may find themselves unable to meet their financial obligations, particularly those that have outstanding debt. With foreclosures of CIRA units on the rise, so are delinquent CIRA assessments. These conditions, among other factors, are contributing to many CIRAs being cash strapped. Although CIRA bankruptcies or financial collapses have not been very common historically, the negative effects of the previously discussed economic circumstances are creating unprecedented financial troubles for CIRAs. Paragraph .02 of AU section 341, *The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern* (AICPA, Professional Standards, vol. 1), states that “[t]he auditor has a responsibility to evaluate whether there is substantial doubt about the [CIRA’s] ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited.” The following conditions and events may be good indicators of a CIRA’s questionable continuation prospects:

- Negative trends, such as recurring operating losses, working capital deficiencies, and negative cash flows from operating activities
- Internal matters, such as excessively strained relations between the homeowners and the CIRA’s board of directors
- External matters, such as pending litigation, an uninsured or underinsured catastrophe, or the developer’s default on amounts owed to the CIRA
• Other indications of financial difficulties, such as noncompliance with debt covenants, delays in payments to suppliers, and the placement of the CIRA in receivership wherein a court-appointed receiver manages the affairs of the CIRA.

.65 If, after considering the board of director’s plans to address the adverse effects of the conditions and events, the auditor concludes that substantial doubt about the CIRA’s ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph to reflect that conclusion. Also, the auditor should comply with the communication requirements established in paragraph .17 of AU section 341.

Auditing Fair Value Measurements

.66 A CIRA may have diverse investment holdings and other assets, liabilities, and components of equity that may be subject to measurement or disclosure at fair value in the financial statements. It is management’s responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Certain specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1).

.67 The strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor also may identify any possible indicators of impairment. According to paragraph .23 of AU section 328, “[S]ubstantial tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.”

.68 According to paragraph .48 of AU section 328, the auditor ordinarily should add language to the letter of representations from management regarding the reasonableness of significant underlying assumptions. When significant assumptions are used or they are highly subjective, and the items being measured at fair value are material, the auditor considers discussing these items with those charged with governance of the entity.

Fair Values of Securities

.69 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, some items of note exist for the auditor. As noted previously, quoted market prices in active markets are the best available audit evidence to support a fair value. However, when they are unavailable and the valuations of securities are obtained from a broker-dealer or another third party source based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). The auditor also may determine it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157, quoted prices in active markets are considered Level 1 inputs.

.70 When an entity performs its own valuation, value testing procedures to be taken by the auditor include assessing the reasonableness and appropriateness of the model, calculating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether the inputs to the entities’ valuation model are observable or not determines their characterization as Level 2 or Level
The auditor also should evaluate management’s conclusions regarding other than temporary impairment on its securities. Examples of factors that could cause an other than temporary impairment per paragraph .47 of AU section 332 include the following:

- “Fair value is significantly below cost and
  — the decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  — the decline has existed for an extended period of time.
  — management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.”

Additional factors to consider when determining whether a security is other than temporarily impaired, as described in the September 30, 2008 press release by the SEC Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting (SEC and FASB press release), include “[the] the length of the time and the extent to which the market value has been less than cost; [t]he financial condition ... of the issuer; or [t]he intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.” The classification of an entity’s securities is based on management’s intent and ability. The auditor should obtain an understanding of management’s classification process among trading, available-for-sale, or held-to maturity, as well as consider the classifications in light of the entity’s current financial position.

**Pending Litigation**

Although not an emerging type of risk, pending litigation is frequently a major consideration in a CIRA audit. FASB Statement No. 5, *Accounting for Contingencies*, specifically states that pending litigation is an example of a loss contingency. However, absent meeting the conditions for accrual of the loss set forth in paragraph 8 of FASB Statement No. 5, namely that it is probable that a liability had been incurred at the date of the financial statements and the loss is reasonably estimable, the pending litigation should be disclosed rather than accrued. The disclosure should indicate the nature of the contingency and give an estimate of the possible loss or range of loss or state that such an estimate cannot be made.

SOP 94-6, establishes requirements and provides guidance on additional disclosures that may be required for certain significant risks and uncertainties, to the extent that the requirements of SOP 94-6 are not already met by the disclosures required by other pronouncements. The areas of significant risks and uncertainties addressed by SOP 94-6 include the nature of operations, the use of estimates in the preparation of financial statements, certain significant estimates, and current vulnerability due to certain concentrations. An estimate that does not involve a contingency covered by FASB Statement No. 5, such as estimates associated with long-term operating assets and amounts reported under profitable long-term contracts, may still meet the criteria for disclosure set forth in paragraph .13 of SOP 94-6.

SOP 94-6 states that the disclosure should indicate the nature of the uncertainty and include an indication that it is at least reasonably possible that a change in the estimate will occur in the near term. If the estimate involves a loss contingency covered by FASB Statement No. 5, the disclosure also should
include an estimate of the possible loss or range of loss, or state that such an estimate cannot be made. Disclosure of the factors that cause the estimate to be sensitive to change is encouraged but not required.

.76 Using the same preceding example relating to pending litigation, if this same pending litigation met the criteria for disclosure set forth in SOP 94-6, the CIRA would include an additional disclosure to indicate “that it is at least reasonably possible that a change in the company’s estimate of its probable liability could occur in the near term.” Disclosure of the factors that cause the estimate to be sensitive to change is encouraged but not required.

Uninsured and Underinsured Risks

.77 As with pending litigation, uninsured and underinsured risks are not emerging types of risks but continue to be issues that may challenge auditors. These risks may arise in a number of ways, including having inadequate insurance for certain risks or no insurance at all, or coinsurance or deductible clauses in an insurance contract. The absence of insurance, or lack of sufficient insurance, against losses from various hazards or natural disasters constitutes an existing condition involving uncertainty about the amount and timing of any losses that may occur, thus meeting the definition of a contingency. However, as provided in paragraph of 28 of FASB Statement No. 5, “The absence of insurance does not mean that an asset has been impaired or a liability has been incurred at the date of an enterprise’s financial statements.” Furthermore, the conditions for accrual of a loss set forth in paragraph 8 of FASB Statement No. 5 are not satisfied prior to the occurrence of the event because until that time there is no diminution in the value of the property.

.78 If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 of FASB Statement No. 5 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, disclosure of the contingency should be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred. Although not required, FASB does not discourage disclosures related to uninsured or underinsured risks in appropriate circumstances.

.79 The CIRA also may have disclosure requirements if the insurance coverage does not comply with statutory requirements or the requirements of the CIRA’s governing documents. Failure to comply with statutory requirements is an illegal act as defined by AU section 317, *Illegal Acts by Clients* (AICPA, *Professional Standards*, vol. 1). The auditor’s consideration of the possibility of illegal acts is different for illegal acts that have a direct and material effect on the determination of financial statement amounts versus illegal acts related to violations of laws and regulations that relate more to an entity’s operating aspects than to its financial and accounting aspects and for which the financial statement effect is indirect (hereinafter referred to as other illegal acts). Paragraph .05 of AU section 317 states that “[t]he auditor’s responsibility to detect and report misstatements resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for misstatements caused by error or fraud.” According to paragraph .07 of AU section 317, “For other illegal acts, the auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor’s attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred.” Paragraph .15 of AU section 317 states that “[t]he auditor should evaluate the adequacy of disclosure in the financial statements of the potential effects of an illegal act on the entity’s operations.” Readers may refer to AU section 317 for further guidance.

Certain Note Disclosures

.80 CIRA audits require the consideration of many unique issues uncommon to other industries, such as reserve studies, initial operating periods following turnover by the developer, losses from natural disasters, often strained relationships between the board of directors and unit owners, and an exceptionally litigious operating environment, among other issues that are generally not often associated with other industries. As such, the auditor may experience difficulty in determining all the items that require note disclosure in the financial statements. With this in mind, an overview of the current guidance may be helpful. The financial
statements should include any disclosures that would be appropriate to enhance the reader’s understanding. The vast majority, if not the entirety, of the authoritative accounting literature discusses the suggested and required content of note disclosures narrowly in the context of specific accounting requirements. However, paragraph 7 of FASB Concept No. 5, Recognition and Measurement in Financial Statements of Business Enterprises, states that “[i]nformation disclosed in notes or parenthetically on the face of financial statements, such as significant accounting policies or alternative measures for assets or liabilities, amplifies or explains information recognized in the financial statements.” FASB Concept No. 5 also states that note disclosures are essential to understanding the information recognized in financial statements and have long been viewed as an integral part of financial statements prepared in accordance with GAAP.

Paragraph 167 of FASB Concept No. 6, Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2), states that, “[a]lthough items that fail to qualify under the definitions of elements [that is, the broad classes of items that financial statements comprise, such as assets, liabilities, revenues, and expenses] during a period do not raise recognition issues, they may nevertheless raise issues about whether and, if so, how and at what amounts they should be disclosed. For example, contingencies that have not yet, and may never, become assets or liabilities may need to be estimated and disclosed.” The readers should note that FASB Concepts are not authoritative. Rather, they describe concepts and relations that will underlie future financial accounting standards and practices and in due course serve as a basis for evaluating existing standards and practices.

For other general perspectives on note disclosures, the auditing literature is an additional source for guidance and requirements. Paragraph .02 of AU section 431 states that “[t]he presentation of financial statements in conformity with [GAAP] includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their appended notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth. An independent auditor [should consider] whether a particular matter should be disclosed in light of the circumstances and facts of which he [or she] is aware at the time.”

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Website at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You also may look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

<tr>
<th>Section/Issue</th>
<th>Description</th>
</tr>
</thead>
</table>
| TIS sections 8200.05–16 (AICPA, Technical Practice Aids) | These questions and answers in TIS section 8200, Internal Control (AICPA, Technical Practice Aids), were developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111. Some of the topics include the following:  
  - Consideration of internal controls that are less formal or not documented by the client  
  - Whether the auditor may suggest improvements to a client’s internal control  
  - Assessing inherent risk in relation to the consideration of control risk  
  - The frequency of walkthroughs that are used as the basis for the auditor’s understanding of internal control  
  - Considerations in obtaining an understanding of, evaluating, and documenting controls that the auditor believes are nonexistent or ineffective  
  - Assessing control risk at the maximum level  
  - Considerations for developing a substantive audit strategy |
| Issue Date: April and May 2008 (Nonauthoritative) |
| TIS section 9120.08, “Part of an Audit Performed in Accordance With International Standards on Auditing” (AICPA, Technical Practice Aids) | This question and answer discusses the implications to the principal auditor’s report when part of an audit is conducted by other independent auditors in accordance with International Standards on Auditing or another country’s auditing standards. |
| Issue Date: April 2008 (Nonauthoritative) |
| TIS section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditor’s Report” (AICPA, Technical Practice Aids) | This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor’s report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor’s report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that it will sign the representation letter, without exception, on or before the date of the representations. |
| Issue Date: May 2007 (Nonauthoritative) |
| TIS section 8350.01, “Current Year Audit Documentation Contained in the Permanent File” (AICPA, Technical Practice Aids) | This question and answer discusses whether the provisions of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that AU section 339 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year’s audit report. |
| Issue Date: May 2007 (Nonauthoritative) |
| AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, Audit Confirmations (AICPA, Technical Practice Aids, PA sec. 16,240) | This practice alert is a response to practitioners’ current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations, among other topics. |
| Revised: June 2007 (Nonauthoritative) |

Compilation and Review Issues and Developments

.84 The Audit Risk Alert Compilation and Review Developments—2008 (product no. 022309kk) is an important tool, designed to help you plan and perform your compilation and review engagements. That alert discusses recent Standards for Accounting and Review Services (SSARSs) developments, addresses emerging practice issues, points out pitfalls that frequently occur in compilation and review engagements, and provides valuable information regarding current accounting developments.

Rescission of SOP 93-5

.85 As part of the conforming changes to the CIRA guide, updated as of May 1, 2008, the Accounting and Review Services Committee (ARSC) rescinded SOP 93-5, Reporting on Required Supplementary Information Accompanying Compiled or Reviewed Financial Statements of Common Interest Realty Associations. Interpretative guidance previously included in the SOP has been conformed and moved to chapter 8 of the CIRA guide. Topics previously addressed in the SOP that are now reflected in the CIRA guide include the performance and reporting requirements toward the required supplementary information accompanying the basic financial statements.

Issuance of SSARS No. 17

.86 On February 13, 2008, the ARSC issued SSARS No. 17, Omnibus Statement on Standards for Accounting and Review Services—2008 (AICPA, Professional Standards, vol. 2), which amends some of the guidance for compilation and review engagements and is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. Readers may refer to the Audit Risk Alert Compilation and Review Developments—2008 for a detailed discussion of this SSARS. Those provisions that may have significant relevance to CIRAs include the introduction of definitions for management and those charged with governance and the new guidance with respect to an accountant’s consideration of the entity’s ability to continue as a going concern during the performance of compilation or review procedures.

.87 SSARS No. 17 also incorporates guidance with respect to analytical procedures in a review engagement as a nonauthoritative exhibit (exhibit A) to the codification of SSARSs. In addition to exhibit A, “Analytical Procedures in a Review Engagement,” the ARSC has separately issued exhibit B, “Going Concern Considerations,” and exhibit C, “Subsequent Events Considerations,” to provide nonauthoritative accounting guidance to assist practitioners performing compilation and review engagements. These exhibits can be found online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Accounting+and+Review+Services+Committee/Nonauthoritative+Exhibits+to+the+SSARSs+Codification.htm.

Issuance of SSARS No. 16

.88 On December 18, 2007, the ARSC issued SSARS No. 16, Defining Professional Requirements in Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2, AR sec. 20), which defines the terminology that the ARSC will use to describe the degree of responsibility that the requirements
impose on the accountant. The ARSC believes that by defining the levels of responsibilities that accountants have in compilation and review engagements in a fashion similar to Statement on Auditing Standards No. 102, Defining Professional Requirements in Statements on Auditing Standards (AICPA, Professional Standards, vol. 1, AU sec. 120), standards for compilation and review engagements would be clarified, and the imperatives used in such standards would then be consistent with the standards for audit engagements.

**Accounting Issues and Developments**

**Convergence with International Financial Reporting Standards**

.89 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

.90 FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project go to www.fasb.org and www.iasb.org.

**SEC Eases Acceptance of IFRS Financial Statements**

.91 On December 21, 2007, the SEC took a major step toward easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.92 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the U.S. has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, because there currently are approximately 500 foreign private issuers from Canada.

.93 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

**IFRS “Roadmap”**

.94 On November 14, 2008, the SEC released for public comment, in the format of a proposed rule, a roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.
The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016. The 90 day comment period ends on February 19, 2009.

The proposed roadmap sets forth seven milestones that will influence the SEC’s decision to adopt IFRS for all filers. These milestones relate to improvements in accounting standards, the accountability and funding of the International Accounting Standards Committee Foundation, the improvement in the ability to use interactive data for IFRS reporting, education and training relating to IFRS, limited early use of IFRS where this would enhance comparability for U.S. investors, the anticipated timing of future rulemaking by the SEC, and the implementation of the mandatory use of IFRS by U.S. issuers.

Additionally, the roadmap discusses two alternatives for U.S. issuers that elect to use IFRS to disclose U.S. GAAP information. Proposal A suggests a U.S. issuer that elects to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS called for under IFRS 1, First-Time Adoption of International Financial Reporting Standards, in a footnote to its audited financial statements. This information would include the restatement of and reconciliation from prior year’s financial statements and the related disclosures.

Proposal B suggests that U.S. issuers that elect to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS required under IFRS 1 and also would disclose on an annual basis certain unaudited supplemental U.S. GAAP financial information covering a three year period. This unaudited supplemental financial information would be in the form of a reconciliation from IFRS to U.S. GAAP.

The roadmap does not address how the SEC would mandate IFRS; however, it noted an option would be, “for the FASB to continue to be the designated standard setter for purposes of establishing the financial reporting standards in issuer filings with the Commission. In this option our presumption would be that the FASB would incorporate all provisions under IFRS, and all future changes to IFRS, directly into generally accepted accounting principles as used in the United States. This type of approach has been adopted by a significant number of other jurisdictions when they adopted IFRS as the basis of financial reporting in their capital markets.”

AICPA Launches IFRS.com Web Site

The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define the next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

Developed by the AICPA, in partnership with its marketing and technology subsidiary, cpa2biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.
The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, continuing professional education (CPE) courses and live conference training, helpful links, and assistance for audit committee members.

FASB Accounting Standards Codification™

On January 15, 2008, FASB launched the verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the extended verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. On July 1, 2009, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB ASC can be accessed at http://asc.fasb.org/home.

Constituents are encouraged to use FASB’s online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating the FASB ASC Research System and performing accounting research.

Fair Value Measurements

FASB Statement No. 157

As previously mentioned, a CIRA may have diverse investment holdings and other assets, liabilities, and components of equity that may be subject to measurement or disclosure at fair value in the financial statements. In September 2006, FASB issued FASB Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

Prior to this statement, the definitions of fair value differed, and guidance for applying those definitions was dispersed among many accounting pronouncements. Differences in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

In February 2008, FASB issued FASB Staff Position (FSP) FAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13, which amends FASB Statement No. 157 to
exclude FASB Statement No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141, *Business Combinations*, or FASB Statement No. 141 (revised 2007), *Business Combinations*, regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

.112 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. However, in February 2008, FASB also issued FSP FAS-157-2, *Effective Date of FASB Statement No. 157*, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents to consider the various implementation issues associated with FASB Statement No. 157. In October 2008, FASB issued FSP FAS-157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which clarifies FASB Statement No. 157’s application in an inactive market and also amends the standard to include an illustrative example. See the section of this alert entitled “Measurements of Fair Value in Illiquid Markets” for further discussion of FSP FAS-157-3. Readers can access the full text of FASB Statement No. 157 and the previously referenced FSPs on the FASB Web site at [www.fasb.org](http://www.fasb.org).

**Measurements of Fair Value in Illiquid Markets**

.113 Most of the subprime mortgages making headlines were ultimately financed via securitization issuances. As a result of the growing numbers of defaults and foreclosures and uncertainty about the future, potential investors in these securities and potential lenders to issue these securities have become almost nonexistent, causing a liquidity crisis. This has caused significant declines in the values of existing loans and mortgage backed securities held by both lenders and investors, given the lack of demand. This also has spread to a lack of demand for investments in collateralized debt obligations (CDOs), because many CDOs hold securities backed by subprime mortgages, and even the short-term commercial paper market.

.114 Given the state of the market, confusion exists about the use of “market” quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are in actuality distressed sales. To clarify the application of FASB Statement No. 157 in an inactive market, in October 2008, FASB issued FSP FAS-157-3. This FSP also amends FASB Statement No. 157 to include an illustrative example. FSP FAS-157-3 noted the consistency between the guidance provided in it and the guidance provided in the SEC and FASB press release. Readers are encouraged to review the full text of the FSP and the amended standard (inclusive of its recently added illustrative example) on the FASB Web site at [www.fasb.org](http://www.fasb.org). The FSP was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.

.115 FSP FAS-157-3 noted, “Broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset... In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.” As discussed in paragraph 7 of FASB Statement No. 157, “An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).” Low transaction
volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

.116 If transaction volume is too low to provide accurate pricing information and therefore is not a Level 1 input, those observable transactions are to be considered Level 2 inputs or even Level 3 inputs if they are significantly adjusted. The AICPA Center for Audit Quality’s (CAQ) October 2007 white paper on the topic noted some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” In describing an inactive market as well, the SEC and FASB press release noted, “A significant increase in the spread between the amount sellers are ‘asking’ and the price that buyers are ‘bidding,’ or the presence of a relatively small number of ‘bidding’ parties, are indicators that should be considered in determining whether a market is inactive.”

.117 The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “[I]n cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB press release noted, “[I]n some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs it may be appropriate to utilize an estimate based primarily on unobservable inputs.” When significant adjustments are made to an observable input (Level 2), it becomes a Level 3 fair value measurement.

.118 Paragraph C85 of FASB Statement No. 157 states, “[T]he reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transactions or assumptions that are reasonably available without undue cost and effort.

.119 FSP FAS 157-3 concludes, “[T]he use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted, “In some cases, multiple inputs from different sources may collectively provide the best evidence of fair value. In these cases expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.”

.120 The AICPA, in October 2008 (as mentioned in the “Audit Risks Arising From Current Economic Conditions” section), issued a question and answer around liquidity restrictions. TIS section 1100.15 provides useful information to accountants and auditors when an entity’s short-term investments (such as money market funds) have become restricted by the fund (or its trustee). The full question and answer can be obtained from the AICPA’s Web site, www.aicpa.org.

**FASB Statement No. 159**

.121 Subsequent to the issuance of FASB Statement No. 157, FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with FASB’s long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; once the election is made, it is irrevocable. This statement’s objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions.
In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, and FASB Statement No. 157.

FASB Statement No. 159 is effective as of the beginning of an entity’s first fiscal year after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to “be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard.” The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Summary of Recent Accounting Pronouncements and Related Guidance

Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You also may look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

Internal Control Issues and Developments

Overview

.126 CIRAs often find it difficult to establish and maintain an effective internal control structure due to the inherent limitations of their governance structure. Frequently, the CIRA’s board of directors shoulders the responsibility for having effective internal controls because, for many CIRAs, few, if any, paid association management staff have the requisite competence and experience to address such matters. Board members may not have the necessary competence or experience either. When these conditions exist, the auditor is more likely to find that the CIRA’s internal control structure contains deficiencies, which impair the CIRA’s ability to achieve its objectives with regards to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.

.127 For purposes of the following discussion on internal control, the use of the term management also refers to the board of directors, due to the unique governance characteristics common among CIRAs. Generally speaking, members of a CIRA’s board of directors have significant management responsibilities, including the responsibility for the CIRA’s financial administration. If the CIRA utilizes a management company, it is not likely that the agreement transfers the authority for the entirety of the management function, as the term management is defined in AU section 380, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), to the management company, in which case the board of directors would still be responsible for certain key management duties.

Common Internal Control Issues in the CIRA Industry

.128 AU section 314 establishes requirements and provides guidance on the auditor’s understanding of an entity’s internal control. Generally, controls that are relevant to the audit pertain to the entity’s objective of preparing financial statements in conformity with GAAP or other comprehensive basis of accounting (OCBOA), depending on the applicable basis of accounting. The CIRA also will have controls that are not necessarily relevant to the audit, such as operational controls that do not relate to information or data that the auditor may evaluate or use in applying audit procedures.

.129 Of the five interrelated components of internal control defined in paragraph .41 of AU section 314, CIRA’s may struggle with many of them due to their small size and governance by nonexpert volunteers, among other factors. The following list identifies the five interrelated components of internal control and includes potential areas of deficiencies common to CIRAs:

1. Control Environment. The control environment “sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.” Among other important elements, it consists of management’s commitment to competence; the participation of those charged with governance; management’s attitudes and actions toward financial reporting; accounting functions; personnel; and the attitudes, awareness, and actions of those charged with governance concerning the CIRA’s internal control and its importance in achieving reliable financial reporting. A key concept for CIRAs to understand is that the auditor cannot be part of a CIRA’s internal control. An auditor’s response to a CIRA’s control weakness, such as having to draft the financial statements, does not change the fact that a control weakness exists.

The following aspects of the control environment of CIRAs may be particularly susceptible to deficiencies:

a. Management’s philosophy toward business risks and financial reporting, including the frequency with which the reserve study for major repairs and replacements is updated and management’s attitude toward obtaining the opinions of third party professionals for strategic decision making.
b. Management’s philosophy toward the CIRA’s continuing compliance with the CIRA’s funding plan for accumulating the financial resources necessary to fund the estimated current or future costs of future major repairs and replacements

c. Management’s programs and controls to address the risk of fraud, an example of which is the use of closed bids for contracts

d. Management’s programs and controls to determine the existence of related party relationships and the inappropriate use of related parties, an example of which may include disclosure forms that board members must complete

2. The Entity’s Risk Assessment Process. This component is the process for the identification, analysis, and management of risks relevant to the preparation of the financial statements, which include both external and internal events and circumstances that may occur and adversely affect the CIRA’s ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. CIRAs may not have a formal risk assessment process, in which case the auditor should inquire with management about how risks to the business are identified by management and how they are addressed.

The following aspects of the CIRA’s risk assessment process may be particularly susceptible to deficiencies:

a. Management’s consideration and analysis of unrecorded liabilities, such as those potentially related to pending or settled litigation

b. Management’s consideration and analysis of significant estimates applicable to the financial statements, such as the allowance for bad debts

c. Management’s consideration and analysis of changes in the operating environment (for example, the effects of an economic downturn or significant economic indicators like mortgage interest rates, employment, and housing); the effects of changes in laws and regulations (including tax law); and the effects of rising prices of key inputs, including energy, insurance, and construction costs

3. Information and Communication Systems. This component consists of the information system relevant to financial reporting objectives, including the accounting system and the procedures established to initiate, record, process, and report transactions, including those to maintain accountability for the related assets, liabilities, and equity. Also part of this component is the role communication plays in establishing an understanding of individual roles and responsibilities pertaining to internal control relevant to financial reporting.

The following aspects of the CIRA’s information and communication systems may be particularly susceptible to deficiencies:

a. Management’s commitment to provide sufficient resources to address security risks related to information technology, including unauthorized access to information technology systems

b. The procedures implemented to initiate, authorize, record, and process journal entries in the accounting system

c. The procedures implemented to override the automated processing of transactions by the information system

d. The procedures implemented to ensure that information required to be presented and disclosed in the financial statements is accumulated, recorded, processed, summarized, and appropriately reported

4. Control Activities. This component consists of “the policies and procedures that help ensure that management directives are carried out.” Ordinarily, control activities that may be relevant to the
audit include those related to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records.

The following common control activities are normally relevant to the audit of a CIRA and may be particularly susceptible to deficiencies:

a. Performance of monthly bank reconciliations
b. Review and approval of cash disbursements
c. Review and approval of cash transfers between bank accounts
d. Performance of collection procedures for delinquent assessments
e. Review and approval of bad debt write-offs
f. Review and approval of waiving the funding for capital replacement and deferred maintenance items, and compliance with the governing documents and state statutes
g. Periodic review and updating of reserve study on future major repairs and replacements
h. Periodic review and updating of insurance coverage so that exposure to uninsured losses, either in the form of significant deductibles or insufficient coverage, is identified and appropriately considered
i. Review and approval of the annual budget
j. For CIRAs that utilize the services of a management company, for which the terms of the agreement meet the criteria in AU section 324, Service Organizations (AICPA, Professional Standards, vol. 1), to have the management company considered a service organization, the periodic review and testing of the relevant controls at the service organization (for example, the reperformance of selected items processed by the service organization or reconciliation of certain output reports from the service organization to the CIRA’s source documents)
k. Review and approval of the internally prepared financial statements being audited

5. Monitoring of Controls. This component consists of the steps taken by the CIRA to monitor internal control over financial reporting and includes consideration of the sources of the information related to those steps and how those steps are used to initiate corrective actions to its controls. Monitoring is done to ensure that controls, once implemented, continue to operate effectively. Also, for smaller CIRAs, both the amount and detail of their monitoring functions might be increased to compensate for the lack of enough employees to provide for adequate segregation of duties. One example of a monitoring control is management’s review of whether the bank reconciliations are being prepared on a timely basis.

Those CIRAs that utilize management companies that meet the criteria set forth in AU section 324 to have the management company considered a service organization have the same monitoring obligations for the internal control performance of the service organization as management does for the CIRA’s own internal control performance. An effective monitoring activity may include obtaining a service auditor’s report or a service auditor’s agreed-upon procedures report that describes the results of the service auditor’s tests of controls relevant to the CIRA’s internal control as it relates to the audit of the CIRA’s financial statements.

Recent AICPA Independence and Ethics Pronouncements

.130 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.
On the Horizon

.131 You should keep abreast of accounting, auditing, or compilation and review developments and upcoming guidance that may affect your engagements. The following sections present brief information about some ongoing projects that have particular significance to CIRAs or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.132 The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.133 In response to growing concerns about the complexity of standards, the Auditing Standards Board (ASB) has commenced a large-scale “clarity” project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards), to apply the clarity drafting conventions and converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board. The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the Clarity Project Explanatory Memorandum and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.
Compilation and Review Pipeline

The Reliability Framework

.134 A potentially significant development in progress addresses the obstacles to providing reliable financial reports created by the independence rules. At its meeting in April/May 2008, the ARSC, a senior technical committee of the AICPA, approved a project to develop a framework for the performance of compilation and review engagements. Such a framework would permit the expression of limited assurance on reviewed financial statements for an entity, with respect to whom the accountant is not independent due to the performance of certain control activities.

.135 The Reliability Task Force (task force) was formed with the charge of developing a draft SSARS that would expand the applicability of the compilation and review literature to enable an accountant who maintains his or her objectivity to provide limited assurance on an entity’s financial statements, even though the accountant’s independence may be impaired because he or she performed certain control activities for the entity. These types of services are extremely valuable in enhancing financial statement reliability for entities that otherwise would be unable to prepare accurate accounting records and financial statements.

.136 The task force believes that accountants should not be prohibited from expressing some level of limited assurance when an independence impairment has been caused by the performance of a control service that actually improves the reliability of the information. Such a prohibition is not practicable for many smaller entities and not necessarily in the public interest. These issues were discussed with the ARSC at its meeting in August 2008. The ARSC plans to issue a draft document for public comment in the first half of 2009.

Accounting Pipeline

.137 A number of accounting projects and pronouncements are currently in progress. For a summary of significant accounting projects and pronouncements, refer to the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in-progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
- Income tax convergence project
- Leases project
- Reporting discontinued operations project
- Going concern proposed statement
- Subsequent events proposed statement
- Amendments to FASB Interpretation No. 46 (revised December 2003), Consolidation of Variable Interest Entities—an interpretation of ARB No. 51, proposed statement

Proposed FASB Emerging Issues Task Force Issues and Staff Positions

.138 Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.139 Proposed FASB Staff Positions (FSPs). A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

AICPA reSOURCE: Accounting and Auditing Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library.
Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry, including the following:

- **AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)** (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

- **International Versus U.S. Accounting: What in the World is the Difference?** (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

- **The International Financial Reporting Standards: An Overview** (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

AICPA CPEExpress (formerly AICPA InfoBytes), offered exclusively through cpa2biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics.

To register or learn more, visit www.cpa2biz.com.

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

**IFRS Quarterly Webcast Series**

The IFRS Quarterly Webcast Series, brought to you each calendar quarter, is part of a multistep educational process to get practitioners, financial managers, and auditors up to speed on all aspects of IFRS implementation. Over the course of the quarterly series, IFRS standards will be covered in depth. International harmonization is quickly approaching and this series will help both accountants and auditors stay abreast of the developments and the changes they will need to implement.

**CFO Quarterly Roundtable Series**

The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

Member Service Center

.151 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.152 Do you have a complex technical question about GAAP, OCBOA, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.153 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Web Sites

.154 The Internet covers a vast amount of information that may be valuable to auditors of CIRAs, including current industry trends and developments. Some of the more relevant sites for auditors with CIRA clients include those shown in the following table:

Real Estate and Construction Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of real estate and construction entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an *other auditing publication* as defined in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an *other auditing publication*, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Keira A. Lichtenstein, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to Christopher Roemersma, CPA, CFE, CVA, MBA of Beers & Cutler, PLLC, for his essential contributions in creating this publication.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your real estate and construction industry audits. It can also be used by an entity’s internal management to address areas of audit concern. The information herein can assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. This important tool can help you identify the significant risks that may result in the material misstatement of financial statements. Moreover, it delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.
Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.03 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

.04 Real estate and construction entities may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.05 The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.06 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.07 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

.08 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.

.09 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to 2008 third quarter advance estimates, real GDP decreased at an annual rate of 0.3...
percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

.10 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate has risen. As of September 2008, the unemployment rate was 6.1 percent, representing approximately 9.5 million people.

.11 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 4.25 percentage points to 1.0 percent as of the end of October 2008. The Federal Reserve noted in its October press release that the pace of economic activity appears to have slowed markedly, owing importantly to a decline in consumer expenditures. Business equipment spending and industrial production have weakened in recent months, and slowing economic activity in many foreign economies is damping the prospects for U.S. exports. Moreover, the intensification of financial market turmoil is likely to exert additional restraint on spending, partly by further reducing the ability of households and businesses to obtain credit. Inflation has been high, but the Federal Open Market Committee, which sets the nation’s monetary policy, believes that the decline in energy and other commodity prices and the weaker prospects for economic activity have reduced the upside risks to inflation.

Real Estate and Construction Industry Trends and Conditions

.12 As of September 2008, the real estate and construction industries in the U.S. employ approximately 9.2 million people (preliminary figures, seasonally adjusted), according to the Bureau of Labor Statistics. This is comprised of 2.1 million in the real estate industry and 7.1 million in the construction industry.

.13 According to the Bureau of Economic Analysis, the real estate and rental and leasing industry composed 12.6 percent of the country’s GDP in both 2006 and 2007; by contrast, the construction industry was 4.8 percent of the country’s GDP in 2006 and declined to 4.1 percent in 2007.

.14 Since early 2007, the decline in the residential market has sent shockwaves through the entire U.S. economy. The affected parties from the housing market downturn range from homeowners to investment banks to investors in real estate companies. Though analysts and experts disagree about whether we have hit bottom yet, the overwhelming sentiment is that a further decline is likely. According to the New York Times, from 2001 to 2007 domestic financial indebtedness grew from $8.5 trillion to $14.5 trillion, with home mortgage debt responsible for $5.1 billion (or 85 percent), increasing from $4.9 trillion to $10 trillion. In 2007, the total indebtedness was three times the size of GDP. This type of scenario has not occurred since the Great Depression. Some experts have attributed the current situation to the perfect storm of circumstances: rising home values, historically low interest rates, loosening underwriting and lending standards, unprecedented high loan to value ratios, and the notion that housing is a fail-safe investment.

.15 The combination of the state of the economy, the failures and subsequent takeovers of banks, and the actions taken by the U.S. Treasury during 2007 and 2008 is unprecedented. Real estate and construction companies have been and will continue to be affected. Some of the possible effects include counterparty default risk, concentration on liquidity, shrinking balance sheets due to asset write-downs, increased focus on recourse versus nonrecourse debt, tenant defaults leading to greater allowances for doubtful accounts and write-offs, and a general lack of opportunity for activity and investment in the marketplace.

.16 The construction industry has been strongly affected by the real estate market’s slowdown, and its negative effects are projected to continue at least through the latter half of 2009. In addition to the state of the economy, the construction industry must also face rising energy and material costs, which experts estimate will only continue to rise. In September 2008, the U.S. Census Bureau reported that the rate of seasonally adjusted annualized new single family home sales decreased 33.1 percent compared with September 2007. From December 2007 to March 2008, the amount of new home sales decreased monthly by 0.5 percent, 4.2 percent, and 10.3 percent respectively, before increasing between March and April 2008 by 5.7 percent. Sales then decreased 5.0 percent from April to May, and 3.1 percent from May to June.
third quarter of 2008, the amount of new home sales was slightly erratic by increasing 3.6 percent from June to July, decreasing 12.6 percent from July to August, and then increasing 2.6 percent from August to September.

However, select nonresidential construction segments are expected to sustain their 2007 growth through 2008. These segments include power, energy, communication, hospitals, and higher education. An additional offsetting factor to the decrease in the construction of new homes is existing-home renovations by people unable to purchase new homes in this market. Aging baby boomers who want to remain in their homes are also a growing component of the remodeling segment.

Real Estate Industry Segment Conditions

Residential Market Conditions

The real estate residential market has continued to experience challenging times, with most experts not anticipating a turnaround in the near future. According to the National Association of Realtors (NAR), the seasonally adjusted annualized rate of existing home sales increased 5.5 percent from August to September 2008; however, it rose 1.4 percent compared with September 2007. As of mid-October 2008, the number of mortgage applications decreased 26.6 percent from a month prior and 32.8 percent from the prior year’s mortgage applications. September 2008 median existing housing prices also dropped 9 percent compared with the prior year.

Option adjustable rate mortgages (ARMs) became popular during the peak of the residential real estate cycle. The defining characteristics of an option ARM include the ability to make minimum payments in the beginning that do not cover any principal and do not necessarily cover all the interest. Any unpaid interest is added to the loan balance up to a certain dollar threshold. At that point the loan is recast (that is, recalculated) as a standard amortizing principal loan. The interest rates usually increase to typical mortgage rates after the first few months. According to Credit Suisse, by April 2009 monthly option recasts will reach $5 billion and will peak around January 2010 at $10 billion. Of the option ARMs issued in 2006, approximately 13 percent were 60 days delinquent within the first 18 months of issuance. As of mid-2008, 1 million borrowers have option ARMs, and only a small number of those ARMs have been recast, which explains the overwhelming estimates for recasting in 2009 and 2010. Additionally, of the approximately $500 billion of outstanding option ARM loans, 60 percent are attributable to California homeowners.

According to RealtyTrac, a total of 265,968 foreclosures were filed in September 2008, which was 12 percent less than the number of those filed in August 2008, but 21 percent more than those filed a year earlier (in September 2007). This is equivalent to 1 out of every 475 U.S. households. Properties receiving foreclosure filings are highly concentrated in Nevada, where 1 out of every 82 households is in foreclosure, compared to Florida (1 of every 178), and California (1 out of every 189). Regions with the fastest and greatest growth during the real estate boom have also fallen the fastest and hardest during this downturn. Many mortgages in trouble are associated with homes located in affordable outskirts of expensive cities.

The causes of the residential real estate downturn are numerous, with the result being larger than the sum of its pieces due to their unique interaction. Speaking about the general real estate market, a PricewaterhouseCoopers June 2008 Global Real Estate Now article noted, “The velocity and froth that accompanied the rush to ‘do deals’ created a highly competitive environment that led both issuers and investors to act in favor of the greater greed rather than the greater good.” With rising real estate values, historically low interest rates, and abundant sources of liquidity, both banks and borrowers entered into riskier than normal mortgages. These mortgages had little to zero money down, high loan to value ratios, teaser interest rates, and decreased to nearly nonexistent scrutiny of income verification. Essentially many borrowers received mortgages they could not afford, and banks took on additional risk. After years of what some experts identified as a crisis waiting to happen, the real estate bubble burst, and the residential real estate industry is trying to pick up the pieces.
Another market greatly affected by the residential real estate downturn is the securitization market, both residential and commercial. In terms of residential, the biggest market makers of mortgage backed securities are Federal Home Loan Mortgage Corp (Freddie Mac) and Federal National Mortgage Association (Fannie Mae), both of which have implicit government backing. In the early weeks of the third quarter of 2008, concerns began to mount around the capitalization of these two government-sponsored entities (GSEs). To calm market sentiment and inject confidence into the markets, the U.S. Treasury Department and Federal Reserve Bank proposed (and subsequently passed) a bill authorizing the administration to make loans and investments in the two publically traded GSEs (including establishing a line-of-credit and purchasing stock in). In early September 2008, the U.S. Treasury Department exercised this ability and acquired $1 billion of preferred shares in each GSE and pledged to provide the GSEs up to $200 billion to weather the current real estate housing market. These preferred shares are the most senior class of equity and will therefore receive their 10 percent dividend yield first. Additionally, the U.S. Treasury, for a nominal sum, received warrants equivalent to 79.9 percent ownership in each GSE. These plans put the GSEs under a conservatorship. Their regulator, the Federal Housing Finance Agency (FHFA), will control the GSEs until it deems the entities financially healthy. The executives and board of directors of both GSEs are also being replaced. The U.S. Treasury will limit the size of each entity’s mortgage portfolios to $850 billion as of year-end 2009. Immediately following this time, the entities will decrease their mortgage portfolios by approximately 10 percent per annum until they each hold $250 billion. This has changed the perception of the two GSEs from being implicitly government backed to explicitly government backed.

Many banks are also in the business of creating securitizations—even though these securitizations are primarily built on commercial loans. Although securitization is a powerful investment tool that creates liquidity and diversification, it is a highly leveraged vehicle with complicated risks. Not all investors and banks fully understood the risks or the underlying assets (residential mortgages or commercial loans) they were investing in. The cycle perpetuated itself as mortgages were securitized, put into collateralized debt obligations (CDOs) to be securitized again, and purchased by investors. This is partly why the decline has stretched so far and affected so many businesses and investors.

As the situation evolved and delinquencies began increasing in the residential market, lenders were unable to sell the loans they had already made. In addition, the secondary market dried up with executives nervous about the quality of the assets, the riskiness of these investments, and the soundness of the financial institutions. This inhibited banks from being able to sell loans for securitizations, which reduced liquidity and lending activity even more. This is further exacerbated by defaulting homeowners and imminent foreclosures of homes that may not be worth their outstanding loan value. A survey by the Real Estate Research Corporation garnered the following information on the availability of capital: On a scale of 1 to 10 (10 being the highest), those surveyed reported their sentiment on the availability of capital of 8.7 in the first quarter of 2007, 5.5 in the fourth quarter of 2007, and 4.7 in the first quarter of 2008.

Although most experts do not believe the residential market has hit bottom yet, general sentiment is that it will come back and regain the confidence of investors as a strong investment vehicle over time.

The multifamily housing rental market has also been negatively affected by the residential real estate conditions. According to NAR, vacancy rates are expected to rise to 5.7 percent by the end of 2008, up from 4.8 percent at the end of 2007. An explanation for this trend is that the second half of 2008 will produce an increase in first time home buyers due to declining prices and the recently implemented tax credit for first time home buyers. According to CB Richard Ellis (CBRE), other factors shifting vacancy upward include job losses and supply increases. However, the increase in supply is not only from completed construction of for-rent buildings, but also from previously for sale condominiums being made available to rent. This phenomenon is only expected to increase as more condominium buildings are completed without a matching increase of demand to buy. This will continue to push vacancy rates up and encumber rent growth.

As of October 2008, 14 residential apartment Real Estate Investment Trusts (REITs) are in the FTSE National Association of Real Estate Investment Trusts (NAREIT) U.S. Equity REIT Index. As of October 2008, this subsector of the FTSE NAREIT Equity REIT Index had 1 and 3 year compounded annual total returns of –4.15 percent and 8.64 percent, respectively. When comparing these one and three year compounded
annual total returns to the other residential subsectors of the FTSE NAREIT Index, the residential apartment subsector has the best returns. The other residential subsectors include the manufactured homes subsector (1 and 3 year compounded annual total returns of –7.89 percent and 0.05 percent, respectively) and the home financing subsector (1 and 3 year compounded annual total returns of –24.84 percent and –20.58 percent, respectively). Although the positive returns of apartment REITs are not overwhelmingly high, they exhibit the lesser effects suffered by this subsector from the residential downturn.

**Office Market Conditions**

.28 The office market has been affected by the overall negative state of the economy to varying degrees. According to Colliers International, the first quarter of 2008 was the first quarter since 2003 with negative net absorption of approximately 3.7 million square feet. The second quarter of 2008 continued this trend with overall negative net absorption of 1.4 million square feet. Additionally, at the end of the first quarter of 2008, overall office vacancy increased to 12.97 percent and by the end of the second quarter of 2008 rose an additional 27 basis points to 13.24 percent. This marks the third quarterly increase in vacancy rates. Of this second quarter 2008 increase, Class A central business district vacancies rose 60 basis points to 10.17 percent, and Class A suburban vacancies rose 42 basis points to 14.26 percent. A contributing factor to the increases in vacancy rates and the negative net absorption is new office space availability, which is expected to remain at a consistently high level for the next few quarters of 2008 and into 2009.

.29 Despite those circumstances, downtown and suburban rents experienced slight increases consistent with the past two years. Weighted average annual downtown Class A rents are at $50.10 per square foot and suburban Class A rents are at $28.70 per square foot compared with $49.90 and $28.80 in the first quarter of 2008, and $48.60 and $28.68 in the fourth quarter of 2007, respectively. The cities with vacancy rates above 20 percent as of the end of the second quarter 2008 include Fairfield, Pleasanton/Walnut Creek, San Jose/Silicon Valley, and Stockton/San Joaquin County. On the other side of the spectrum are Boise and Charlotte with vacancies under 5 percent.

.30 Office investment activity has been affected more by the economy than the office rental market discussed previously. According to Real Capital Analytics, September 2008 real estate property sales volume (for properties over $5 million) is 57 percent lower than September 2007, and the cumulative year-to-date decrease through September 2008 is 77 percent. The general sentiment for all players in the real estate office market is one of hesitation due to uncertainty of the market—both its current state and future outlook. Two additional contributing factors are (1) buyers and sellers cannot agree on valuations and (2) most owners do not feel pressure to dispose of property for a price they believe to be too low. February 2008 produced the sharpest decline in commercial property prices in the last 15 years according to Standard & Poor’s.

**Industrial Market Conditions**

.31 The industrial real estate market has also not been immune to the economic downturn. The national vacancy rate increased by approximately 60 basis points to 8.52 percent, and negative net absorption equaled 9.6 million square feet in the second quarter of 2008, as opposed to 26.3 million square feet in the last quarter of 2007, according to Colliers International. A contributing factor to this statistic is considerable construction completion despite declining demand. Although these completions are expected to continue in the upcoming quarters of 2008, the amount being completed is expected to decline over the same timeframe due to the downward trend in new development activity. One slight offsetting factor is a weak dollar that has lowered the price of American products to foreigners and, therefore, increased the demand for manufacturing real estate to make these products.

.32 According to Colliers International, 2008 rents through the second quarter have remained relatively stable overall, with a modest 1.3 percent year to date decrease and a 0.8 percent decrease from first to second quarter 2008. When disaggregated by segment for year-to-date 2008 through June, stronger trends emerge with bulk space rents increasing by 11.8 percent, flexible/service space rents decreasing by 3.2 percent, and technology/research and development space rents decreasing by 9.8 percent. According to Real Capital Analytics, industrial real estate property sales volume (for properties over $5 million) has slowed during

.33 According to Colliers International, through the end of the second quarter of 2008, the industrial real estate markets with the lowest square footage of net absorption were Chicago, with negative 4.9 million; San Jose/Silicon Valley, with negative 3.98 million; and Los Angeles, with negative 3.0 million net absorption. The markets with the highest square footage of absorption were Dallas/Ft. Worth, with 5.1 million; Houston, with 3.6 million; and Central New Jersey, with 2.9 million. When analyzed in conjunction with square footage currently under construction in these markets, some consistency was lacking. Chicago, with the worst absorption for the quarter, had the third highest square footage under construction at 11.5 million square feet, which implies a continued downward trend. Additionally, Los Angeles, with the third worst net absorption, is approximately 980,000 square feet above the average amount of square feet currently under construction in a survey of 56 U.S. cities. However, San Jose/Silicon Valley had lower than average square footage currently under construction, which could help this market. The two largest markets for industrial space currently under construction at the end of the second quarter of 2008 are in line with absorption statistics: Los Angeles (Inland Empire) with 15 million and Dallas/Ft. Worth with 12 million.

Retail Market Conditions

.34 The economic slowdown and increase in gas prices have left consumers with less disposable income; therefore, they have been curtailing their retail spending. Two slightly offsetting factors include (1) the economic stimulus checks and tax refunds from the government and (2) increased tourism spending due to the weak dollar. Retailers that have been largely unaffected by the current scenario include grocery stores and general merchandisers (for example, Target) because the items they sell are considered necessities. Additionally, luxury and couture retail brands have not been greatly affected due to the high wealth level of their clientele.

.35 According to Reis, a New York based real estate research company, neighborhood and community shopping center vacancies increased by 90 basis points during the second quarter of 2008 to 8.2 percent. This is the highest vacancy rate since 1995. Regional and super regional mall vacancies increased 70 basis points during the second quarter of 2008 to 6.3 percent, the highest vacancy rate since the first quarter of 2002. In terms of retail space, neighborhood shopping centers typically have up to 150,000 square feet, community centers have between 100,000 and 350,000, regional malls between 400,000 and 800,000, and super regional malls at least 800,000 square feet. However, rents have continued to increase by nominal amounts. Neighborhood and community shopping centers experienced a 0.4 percent increase in asking rent in the second quarter of 2008 compared with 0.5 percent growth in the first quarter of 2008 and 0.8 percent growth in the second quarter of 2007. Regional and super regional malls experienced a 0.2 percent growth in rent in the second quarter of 2008, compared to 0.4 percent growth in the first quarter of 2008, and 0.9 percent in the second quarter of 2007. According to Colliers International, total national shopping center vacancies are not expected to rise past 10 percent. Retail development is led by mixed-use properties for the second year in a row, with traditional neighborhood centers second and lifestyle centers third.

.36 According to Real Capital Analytics, retail real estate property sales volume (for properties over $5 million) has slowed during 2008 with transaction volume down by 78 percent when comparing September 2008 to September 2007 and a 2008 year-to-date decline of 72 percent through September 2008. All parties are hesitant to enter into transactions given the general uncertainty about the economy.

Hospitality Market Conditions

.37 According to Lodging Econometrics, the total construction pipeline at the end of 2008’s second quarter is still strong, with an increase of 9.3 percent or 67,000 rooms over 2007’s fourth quarter for a total of 786,000 rooms in the pipeline. Construction starts increased 35 percent in 2007, and the first quarter of 2008 produced the highest amount of construction starts in the last decade. However, during the second quarter of 2008, the housing crisis affected the hospitality industry with 327 projects cancelled, the highest number since the fourth quarter of 2001 in response to the September 11th terrorist attacks. Second quarter
2008 construction project starts also declined 17 percent from first quarter 2008 to 381 projects started. However, this is still considered a normal level and approximates statistics from the third quarter of 2007. A June 2008 forecast predicts 1,218 hotel openings in 2008 and 1,508 hotel openings in 2009, with 63 percent of these rooms already under construction. Financing is becoming increasingly more difficult to source, and this is expected to result in a decline of projects in the pipeline going forward. The underlying rationale for the overall strength of the hospitality industry, in spite of the recessionary economy, is related to hoteliers’ continued ability to obtain financing albeit at tighter standards. Additionally, the hospitality industry is accustomed to the hotel business cycle of 7-11 years, which goes from downturn (which has begun), transition, and expansion.

September 2008 data released from Smith Travel Research presents the key statistics of North America’s hospitality market’s overall health. Year-to-date key industry measures show occupancy down 3.0 percent at 62.9 percent, average daily rate up 3.7 percent at $107.41, and revenue per available room up 0.6 percent at $67.58 when compared with year-to-date September 2007.

### Real Estate Investment Trusts

Interest and investment in REITs has increased dramatically from the creation of REITs in 1960, and especially over the last 10 years. According to the National Association of Real Estate Investment Trusts (NAREIT), average daily dollar trading volume has significantly increased from $413 million in July 1998 to $892 million in July 2003 to $4.6 billion in July 2008. In the first nine months of 2008, public REITs raised $16.4 billion of capital via secondary equity offerings of $11.2 billion and secondary debt offerings of $5.2 billion. Through September 2008, there have been only two initial public offerings. The table following illustrates the high and low points of REIT initial public offerings since 2002.

Although all types of public REITs have seen decreases in their stock prices, the FTSE NAREIT Mortgage REIT Index has experienced acutely steeper declines when compared with the FTSE NAREIT Equity REIT Index. As of September 2008, there are 19 mortgage REITs (9 home financing and 10 commercial financing) that compose the FTSE NAREIT Mortgage REIT Index. As of September 2008, this index had 1 and 3 year compounded annual total returns of –30.82 percent and –22.07 percent, respectively. When examining 1 and 3 year compounded annual total returns as of September 2008, the best performing REITs were health care specialty REITs (24.46 percent and 18.34 percent, respectively), followed by self storage REITs with (23.38 percent and 13.01 percent, respectively). The FTSE NAREIT All REIT Index price experienced a 28.31 percent gain in 2006, a 21.39 percent decrease in 2007, and a 44.38 percent decrease through mid-October 2008. Based on the state of today’s market, REITs appear poised to continue to face a challenging immediate future.
Construction Industry Conditions

Construction Put in Place

.41 Construction put in place is one of the nation’s key economic indicators as reported by the U.S. Census Bureau and represents the value of construction installed or erected at a construction site during any given period. This includes the cost of materials and labor, the contractor’s profit, costs of architects and engineers, overhead, and all interest and taxes paid. According to August 2008 statistics, on a seasonally adjusted annual rate by the U.S. Census, total construction put in place decreased 5.9 percent from August 2007. Over the same timeframe, private construction put in place decreased 10.5 percent, and public construction put in place increased 7.7 percent.

Rising Construction Sectors

.42 As noted by the Associated General Contractors of America (AGC), nonresidential construction experienced strong growth in 2007, and 2008 is expected to follow this trend. Five types of projects with strong expected spending growth include power, energy, communication, hospitals, and higher education. The power segment includes power plants, wind and solar facilities, and transmission lines. This power spending is coming from a variety of project types, including design stages, upgrades and changes on existing power facilities related to environmentally friendly power production, and experimental projects.

.43 According to AGC, the strength in construction spending on energy is primarily attributed to additions at oil refineries, onshore oil and gas development, biodiesel and renewable diesel plants, and chemical manufacturing. 2008 is expected to bring a 20 percent increase in energy construction spending. Given the tremendous growth in cellular phones and other mobile hand-held devices in addition to the increase of sound and video files transmitted electronically, construction spending on cell-phone towers and data centers are on the rise as well. This trend is expected to continue strong through 2008; however, the state of the economy could stunt this growth.

.44 The fourth expected segment of increased construction spending, according to AGC, is hospitals. Given the ever-evolving health care treatments and increased reliance on technology, hospitals need renovations to accommodate the new equipment, wiring, plumbing, and air handling equipment. Lastly, higher education is also expected to see strong growth in 2008. Many colleges with endowments or capital campaigns are using the money earned from stock market gains and appreciation on construction. These are large projects that will boast this sector’s spending for years to come.

Public & Private Construction

.45 Examining the sectors of public and private construction put in place based on data from the U.S. Census results in the emergence of different patterns. August 2008 data compared to August 2007 data showed similar total nonresidential construction increases in both the public and private sectors, as did the health care, and transportation segments. Other segments were consistently increasing or decreasing, yet they also exhibited percentage differences between the changes in public versus private sectors exceeding 10 percent. The office segment experienced 7.4 percent growth in the private sector and 24.7 percent increase in the public sector; the power segment experienced 31.1 percent growth in the private sector and only a 9.0 percent increase in the public sector. The segments that exhibited different patterns were residential construction and education construction. Compared with the same month of the prior year, August 2008 private residential construction experienced a 28.4 percent decrease, but public residential construction increased 4.2 percent, which is not unexpected given the differing market forces affecting private and public residential construction. Private and public education construction decreased 3.0 percent and increased 8.1 percent in August 2008 compared with the same month of the prior year, respectively. Lastly, in both sectors, the commercial and amusement and recreation segments decreased in August 2008 compared with August 2007.
Regarding segments exclusive to one sector, public construction showed double digit percentage increases in public safety and water supply, and private construction showed double digit increases in manufacturing and lodging. The largest decreases in each sector were residential construction in the private sector and commercial construction in the public sector.

Residential Construction

In September 2008, the U.S. Census reported the following seasonally adjusted annual statistics from September 2007 to September 2008 for new privately-owned residential construction:

- 31.1 percent decrease in new privately owned housing units started
- 17.3 percent decrease in new privately owned housing units under construction
- 20.4 percent decrease in new privately owned housing units completed

This is primarily attributed to the market attempting to correct itself from over-building during 2003–2005, estimates the chief economist at the NAR. Currently there is an over-saturation of new homes on the market and few buyers in sight. Based on population growth estimates and the number of homes demolished annually, approximately 1.6 million new homes are needed each year. During 2003–2005, roughly 1.2 million excess homes were built, which has led to the current state of substantially decreased building. It is estimated the country’s supply will balance out to the average 1.6 million new demands per year by the end of 2009, which will necessitate a sharp increase in building by 2010 to keep up with demand.

Construction Cost Trends

The inputs of construction vary widely depending on the category of construction and are measured by the Bureau of Labor Statistics through producer price indexes (PPI), which show how price changes over time. For example, according to AGC, in 2007 wood products were 14 percent of the PPI for inputs to single unit residential construction and 1 percent of the PPI for highway and street construction. From December 2003 to July 2008, the PPI for construction inputs rose 44.1 percent. This was primarily driven by the price of diesel fuel. The Energy Information Administration noted the October 27, 2008 U.S. price of on highway diesel at $3.576, an increase of $0.501 or 16.3 percent from 1 year earlier. However this is a sharp reduction from the July 2008 peak of $4.703.

Each construction input is anticipating a different trend this year. According to AGC, steel prices are expected to rise 5 percent in 2008. This is attributable to how energy intensive steel is, specifically the crude oil required to create it. The U.S. steel companies have been able to pass along these increased costs as the weak dollar and increased shipping costs inhibit a U.S. domestic purchaser from buying foreign steel. Concrete prices are expected to rise nominally by 2–4 percent. This net increase in price comprises an increase from fuel prices, decreases from less residential building, and an increased supply due to U.S. concrete producers who increased production facilities during the height of the residential real estate market in early 2006. Diverse uses of copper in construction and other products means a steady demand for it. However, the supply of copper is somewhat limited because only a few mines can extract it. Additionally, many of these mines are in countries that experience political and civil unrest, natural disasters, and power shortages. The expectation for 2008 is that the average price of copper will increase at least 10 percent over 2007 prices. Another key input for construction is gypsum, which is used primarily in wallboard and plaster. Once single family construction started declining in early 2006, the price of gypsum fell dramatically. When the residential construction market was booming, the wallboard producers struggled to keep up with demand and began creating additional plants. Now these plants are coming online and adding to the mismatch of supply and demand. Prices are expected to decrease 10 to 20 percent in 2008. When combined, the overall expectation for construction input prices is a 6–8 percent increase over 2008.

It is also important to consider the price of labor, as it typically accounts for half the cost of any given construction project according to AGC. Employment for residential construction has fallen; however, most
construction workers have been absorbed into nonresidential projects. On the whole, construction compensation and, therefore, labor costs are expected to increase to help attract workers to the industry during this shortage.

**Surety Industry Trends**

.51 The largest influence on the surety industry is the state of the economy. In the current environment of minimal residential construction, contractors from that field are flooding the nonresidential market. This has led to increased bidding, lower profit margins for contractors, and increased defaults according to the Surety Information Office. The role of surety companies in this environment becomes more important than ever.

.52 According to the Surety Information Office, 2008 should be a profitable year for surety companies because most contractors will be filling backlogged orders from the booming construction times of prior years. Also, substantial construction in the nonresidential market is expected to taper off by the end of 2010. However, increased risk is expected to surface given the projected future defaults of contractors stemming from the general state of the economy and the residential workforce entering the nonresidential market. Although many residential contractors have successfully transitioned to the nonresidential sector, a substantial portion will show their lack of experience via poor decision making, and surety companies will be forced to remedy the situation. As noted by the Surety Information Office, “New entrants may miss costs that lead to change order requests. Substandard performance may surface. The contractor may be inadequately financed. Experience may be lacking for the scope of work they are attempting. Access to qualified labor may not be available. Material and resource suppliers may not have experience with the new player, leading to material scarcity and difficulty in locking down prices. Additionally, banking relationships may not exist to cover payment terms on larger, or public, projects.”

.53 Surety companies employ long-term management strategies, which may position them well for potential upcoming losses given the success they experienced during the real estate boom of prior years.

**Going Green**

.54 As demands for social responsibility continue to evolve, so does the increase in construction of environmentally friendly, or *green*, buildings. According to the U.S. Green Building Council, buildings are responsible for 38 percent of carbon dioxide emissions, 71 percent of electricity consumption, 39 percent of energy use, 12 percent of water consumption, and 40 percent of nonindustrial waste. This explains the strong push to make them green.

.55 Other contributing factors to the current and projected increase of green buildings include regulatory mandates, government incentives, and recent studies proving the valuable rewards to be gained. This surge in growth has necessitated the emergence of the Leadership in Energy and Environmental Design (LEED) Green Building Rating System. LEED is a third-party certification that designates a building as environmentally responsible, profitable, and a healthy place to live and work. According to Rosenberg Real Estate Equity Funds (RREEF), a business of Deutsche Bank’s Asset Management Division, many cities are even beginning to include LEED standards in their building codes. One of the strongest selling points, financially speaking, of being green is the savings on utility bills. Studies have shown a green building uses an average 30 percent less energy than a conventional building. Additionally, studies show design features of green buildings promote happier, more productive, and healthier workers. This type of data has and will continue to create demand for green buildings.

.56 According to RREEF, the premium for constructing a green building as opposed to a traditional building is nominal if planned properly. Additionally, the numerous incentives for building green more than offset any increase in building costs. Renovating traditional buildings to be green is not as straight-forward regarding the net benefit, given the diversity of characteristics of existing buildings. LEED construction has grown at a compound average rate of 50 percent per annum over the past 3 years and is expected to do so for the next few years. Lastly, government incentives for building green are expected to be replaced by requirements in the upcoming years.
Legislative and Regulatory Developments

Commercial Real Estate Loans

.57 A commercial real estate loan is categorized as a loan to buy an office building or a retail center. It also includes construction loans, land development, and other land loans irrespective of what will be built (even residential construction). These types of commercial loans were securitized in the same fashion as residential mortgages and with the same ferocity. In mid-2007 subprime residential loans started making headlines, and rating agencies announced that underwriting standards of commercial loans had also loosened. Executives started examining what they held in their portfolios and began demanding higher risk premiums for commercial mortgage backed securities (CMBS), which forced the CMBS market to a standstill. However, where the commercial market differs from the residential market is delinquencies. Through the first quarter of 2008, the Fitch U.S. CMBS Loan Delinquency Index was hovering around an all time low. At the beginning of 2008 the index was at 27 basis points and increased to 33 basis points by the end of 2008’s first quarter and to 45 basis points by the end of September 2008. It almost seemed as if the commercial market was guilty by association. According to the Commercial Mortgage Securities Association, in the first 3 quarters of 2008, there were $12.1 billion CMBS issuances compared with $196.9 billion and $130.2 billion for the same time periods of 2007 and 2006, respectively.

.58 However, as 2008 continues, the commercial market is slowly exhibiting signs of defaults and delinquencies, which is expected to continue. Fitch Ratings expects default rates on the collateral behind CMBS to increase towards 80 basis points, which approximates the historical average. Overall, commercial real estate loan performance is also expected to worsen over 2008, particularly due to the drop in residential construction loans. Spreads on CMBS have increased dramatically in recent periods causing sharp decreases in value. For example, according to Commercial Mortgage Securities Association (CMSA), spreads on AAA-rated 10 year CMBS over swaps has increased approximately 250 basis points from 2007 year end to over 300 by September 2008. It is believed that the market based valuations of CMBS do not accurately reflect the underlying strong fundamentals of the commercial real estate market. Fitch Ratings noted, “The recent valuation declines in the CMBS market imply near-catastrophic credit conditions. We do not expect such a severe decline in the credit quality of commercial real estate loans and CMBS-related assets.”

Proposed Taxation Changes

.59 If passed, there are two bills that would greatly affect real estate private equity and hedge fund companies and publicly traded partnerships. Both bills would change how these types of entities would be taxed with a result of greater income tax expense. These bills could change legal structures of new and existing entities in addition to dissuading entities from going public or even causing an entity to delist from an exchange.

.60 The key measure of the first bill, which was approved in June 2008 by the House of Representatives, would be an increase in taxes on private equity firms and hedge fund managers. This increase, along with the other tax increases proposed in the bill, is why the bill is expected to be rejected by republicans in the Senate. The bill proposes to tax the income from carried interest of private equity and hedge fund investment managers at the ordinary rate of 35 percent, as opposed to the 15 percent being paid now given the capital gain classification. The notion of changing the tax rate started gaining press after private equity and hedge fund companies started going public in early 2007.

.61 The second bill was introduced to the Senate in June 2007 and would tax publicly traded partnerships that directly or indirectly earn income as an investment advisor or asset manager as corporations. This would change the tax rate from 15 percent to 35 percent. By introducing this bill, some experts say the initial goal of greater transparency of these types of entities is completely negated because they will be dissuaded from going public. If enacted, the transition period would delay the application of this law for five years.
Withholding Tax on Government Contracts

.62 Starting January 1, 2011, a new law will require federal, state, and local governments to withhold 3 percent from all payments for goods and services as a guard against possible business tax evasion. This far-reaching new requirement was inserted as a last minute revenue raiser into the Tax Reconciliation Act of 2005 that was signed by the president in May 2006 and will affect other industries as well. The law applies to all government payments for products and services made by any federal, state, or local government that has total annual contracts of at least $100 million. A number of construction related organizations are working to have this section of the Tax Reconciliation Act of 2005 repealed.

.63 A key consideration of the repeal contingency is that the 3 percent withholding tax would be on the total contract, as opposed to the true taxable income at the end of the construction project, which is only the profit. This essentially creates a cash flow timing issue that could result in cash flow deficiencies when the construction company pays the government too much in tax upfront and receives it back from the government months later. This is problematic given the nominal margins in the construction industry, which rarely meet or exceed 3 percent according to the AGC.

.64 For example, if a small business contractor holds one government contract estimated to be completed in one year for $10 million, this law requires withholding of $300,000 on that contract. Meanwhile, the contractor expects to net approximately 2.5 percent, or $250,000, after paying for supplies, services, subcontractors, and other ordinary business expenses. The tax on the revenue generated is at most 35 percent, which means the maximum tax owed on the $10 million project is $87,500 (35 percent of $250,000). Ultimately, the government has withheld $300,000 for $87,500 in tax liability.

.65 Additionally, surety companies review cash flow when deciding whether or not to insure a contract. This withholding will force the surety companies to charge higher rates for their coverage, which will hurt the construction industry even more. The Withholding Tax Relief Act of 2007 was introduced in March 2007 to repeal this withholding tax, but no further action has been taken at the time of this writing.

Government Intervention

.66 Due to the gravity of the situation affecting the U.S. economy, on October 3, 2008, Congress passed and the president immediately signed the Emergency Economic Stabilization Act. As stated in section 2 of the bill, it “Provides authority to the Treasury Secretary to restore liquidity and stability to the U.S. financial system and to ensure the economic well-being of Americans.” Primary components of this bill include (a) an allocation of $700 billion to stabilize the U.S. financial system; (b) creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that participate; (c) increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion; (d) temporary increase of Federal Deposit Insurance Corporation (FDIC) insurance limits; (e) restatement of the Securities and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements; and (f) the requirement of the SEC to conduct a study on the impact and effects of FASB Statement No. 157.

.67 The complete effects of this bill will take time to be felt throughout the economy, though the hope is for an increase in market sentiment soon after its placement into legislation. Less than two weeks after this bill was signed into law, the U.S. Treasury announced a proposal to buy preferred equity stakes in numerous financial institutions and thereby inject cash into the credit markets of up to $250 billion. The varying methods the U.S. Treasury will employ to achieve the goal of the Economic Stabilization Act will be seen in the coming months and years.

.68 Additionally, there are several initiatives currently offered and in the pipeline to help homeowners at risk of foreclosure. On July 30, 2008, the president signed a housing bill with numerous key components. The first group of provisions is related to the two GSE’s liquidity concerns. Through the end of 2009, both GSEs will be provided an unlimited line of credit from the Treasury, and the Treasury is authorized to purchase stock in both entities, which occurred in September 2008. Both entities also have an increased...
maximum loan limit and will be required to make annual contributions to a fund used to finance rental units for certain low income families. Lastly, the FHFA was created to supervise both GSEs (and control them under conservatorship until they are financially sound) and the Federal Home Loan Bank System. An example of the supervision measures is that the FHFA will apply corporate governance provisions of the Sarbanes-Oxley Act being to the GSEs. These include the certification of financial statements, codes of ethics, loan prohibitions, and independent audit committees. Secondly, the Federal Housing Administration (FHA) is authorized to guarantee up to $300 billion of new 30 year fixed rate loans to enable borrowers to refinance existing troubled loans. Due to the restrictive qualifications needed to refinance a loan under this program, the Congressional Budget Office estimates that approximately 400,000 homes will be able to participate in this refinancing program, and only $68 billion (of the $300 billion) will actually be used. Any involved lenders must agree to take a sizeable loss by reducing the principal of the loan balance before any refinancing can occur. Third, a tax credit of $7,500 would be created for first time homeowners in an attempt to stimulate housing demand. The tax credit essentially functions as an interest free loan that the homeowner must repay over 15 years. Lastly, the bill would provide $3.9 billion of emergency assistance aid to the hardest economically hit areas of the country.

.69 Some measures in place before the previously referenced bill was passed include FHA Secure and Hope Now. FHA Secure enables homeowners with non-FHA adjustable rate mortgages to refinance into an FHA insured mortgage, subject to certain restrictions. Another initiative, formed at the encouragement of the Department of Treasury, is Hope Now, which is an alliance between credit counselors, homeowners, counselors, mortgage servicers, and mortgage market participants. The alliance reaches out to homeowners to help them keep up with their mortgage payments to prevent foreclosures.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.70 As mentioned previously in the “Government Intervention” section, in September 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, the acquisition of several investment and commercial banks (including some that required assistance from federal agencies), and the placement into conservatorship of Fannie Mae and Freddie Mac. Further, several foreign financial institutions received assistance from their national governments or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant publicly registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short-term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened. Almost overnight, corporations and financial institutions generally recognized as creditworthy began experiencing difficulty borrowing money in the financial markets. The Emergency Economic Stabilization Act was the response to these events.

.71 Generally, many fixed income markets became extraordinarily illiquid in late September 2008, resulting in a substantial increase in risk over the valuation assertion for virtually any kind of fixed income security of any duration. Concerns about the possibility of significant redemptions from various types of funds grew, and reports of certain private funds either placing limits on redemptions, freezing the ability to redeem entirely, or determining to commence an orderly wind-down of operations began circulating. Thus, subsequent events reporting considerations and assessment of some entities’ “going concern” status take on added importance in the current environment.

.72 AICPA staff has issued a new nonauthoritative Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids). It addresses the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short-term investment vehicle. The TPA covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things. The TPA can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.
Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to economic conditions are as follows:

- Constraints on the availability of capital and credit
- Increased costs for materials leading to higher overhead and costs of goods sold
- Going concern and liquidity issues
- Marginally achieving explicitly stated strategic objectives
- Reduced demand for construction, residential real estate, and commercial real estate
- Declining property values
- Use of off-balance-sheet financings, special-purpose entities, and other complex financing arrangements
- Volatile real estate markets and the credit crisis, which result in significant measurement uncertainty, including accounting estimates and fair value measurements
- Changes in the entity’s supply chain, including surcharges on transportation
- Operations that are exposed to volatile markets, which may include oil or currency markets

Although many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

**Consideration of an Entity’s Ability to Continue as a Going Concern**

The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards (GAAS), and is an especially important consideration in the current state of the residential market and the overall economy. It is important to note the time frame for this consideration is one year beyond the date of the financial statements. If the auditor believes there is a substantial doubt on the entity’s ability to continue as a going concern, the next steps are to obtain management’s plans to mitigate the effect of such conditions and then assess the likelihood these plans can be effectively implemented.

Some examples of indicators that there could be substantial doubt about the ability of the entity to continue as a going concern include, but are not limited to, the following:

- Negative trends such as negative cash flows from operating activities, recurring operating losses, or working capital deficiencies (for example, less than 5–10 percent of a construction contract amount) or lack of the ability to obtain additional financing
- Other indications of financial difficulties such as defaults on debt, debt covenants, or both; arrearages in dividends; the need to seek new sources of financing; denial of surety credit or usual trade credit; or the disposal of substantial assets
- Inadequate capitalization, which could inhibit general operations of a construction contractor
- Internal matters such as turnover in key management positions like CEO, CFO, controller, and project manager, or substantial dependence on the success of a particular investment or project
- Entrance into a new market for which the entity might not have the required expertise to successfully compete (for example, new types of projects, new investment strategy, or new geographic areas)
- External matters such as legal matters or market conditions
Increase in job size or number of jobs for construction contractors, which necessitates greater management skills due to the inherent increased complexities.

.77 If an auditor determines there is a substantial doubt about an entity’s ability to continue as a going concern, the auditor should communicate with those charged with governance of the entity in accordance with AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1). AU section 341 provides guidance to an auditor with respect to evaluating whether there is substantial doubt about an entity’s ability to continue as a going concern and what the auditor should do when a going concern exists.

Using the Work of a Specialist

.78 It may be necessary to use a specialist (such as a real estate appraiser, securities valuation expert, or construction engineer) to assist in auditing complex or subjective matters during the audit. Examples of matters where an auditor may engage a specialist are valuation issues, reasonableness determination of amounts derived from specialized techniques or models, assistance in construction job site visits, or implementation of technical requirements, regulations, or legal documents. AU section 336, Using the Work of a Specialist (AICPA, Professional Standards, vol. 1) provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor’s firm participates in the audit, AU section 311, Planning and Supervision (AICPA, Professional Standards, vol. 1) is applicable rather than AU section 336.

.79 When using the work of a specialist, the auditor should evaluate the specialist’s professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist’s findings in the context of the audit and related assertions in the financial statements.

Real Estate Audit and Attestation Issues and Developments

Auditing Fair Value Measurements

.80 Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements. It is management’s responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with generally accepted accounting principles (GAAP), auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1).

.81 The strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor may also identify any possible indicators of impairment. According to paragraph .23 of AU section 328, “[S]ubstantive tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.”
.82 According to paragraph .48 of AU section 328, the auditor ordinarily should add language to the letter of representations from management regarding the reasonableness of significant underlying assumptions. When significant assumptions are used or they are highly subjective, and the items being measured at fair value are material, the auditor considers discussing these items with those charged with governance of the entity.

*Fair Values of Securities*

.83 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As noted previously, quoted market prices in active markets are the best available audit evidence to support a fair value. However, when they are unavailable and the valuations of securities are obtained from a broker-dealer or another third party source based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). The auditor may also determine it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157, quoted prices in active markets are considered level 1 inputs.

.84 When an entity performs its own valuation, value testing procedures to be taken by the auditor include assessing the reasonableness and appropriateness of the model, calculating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether the inputs to the entities’ valuation model are observable or not determines their characterization as level 2 or level 3 inputs, respectively, within FASB Statement No. 157. When there is extensive judgment, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral should also be examined for existence, fair value, transferability, and the investor’s right to the collateral.

.85 The auditor should also evaluate management’s conclusions regarding other than temporary impairment on its securities. Examples of factors that could cause an other than temporary impairment per paragraph .47 of AU section 332 include the following:

- “Fair value is significantly below cost and—
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.”

Additional factors to consider when determining whether a security is other than temporarily impaired, as described in the September 30, 2008, press release by the SEC Office of the Chief Accountant and FASB Staff on Clarifications on Fair Value Accounting (SEC and FASB Press Release), include “length of time and the extent to which the market value has been less than cost; the financial condition of the issuer; and ... the intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.” The classification of an entity’s securities is based on management’s intent and ability. The auditor should obtain an understanding of management’s classification process between trading, available-for-sale, or held-to-maturity, as well as consider the classifications in light of the entity’s current financial position.
Construction Audit and Attestation Issues and Developments

Auditing Construction Contracts

.86 The accounting guidance for construction companies is contained in Accounting Statement of Position (SOP) 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts (AICPA, Technical Practice Aids, ACC sec. 10,330), which is described and interpreted in the AICPA Audit and Accounting Guide Construction Contractors. Another useful construction auditor tool is the AICPA’s Practice Alert (PA) No. 00-3, Auditing Construction Contracts (AICPA, Technical Practice Aids, PA sec. 16,170).

.87 The estimates and assumptions used by the construction contractors are primary focuses of construction company audits. The financial statements are based upon these estimates for each contract in place, given the prominence of the percentage-of-completion accounting method used in the industry. External circumstances in any given year and the area of the country in which the construction entity operates may also affect the auditor’s procedures.

.88 Another significant characteristic particular to the construction industry is the way contracts are won and paid out. A contractor normally bids to win a construction project, and within that bid are the expected costs to complete the project plus the desired profit margin, although this initial price might be renegotiated as the project progresses. Additionally, customers will often hold back a certain percentage of the overall fee until the project is completed and they are satisfied with the end product. This is known as retainage, and it is specified in the construction contract. As the project term increases, so does the risk for error in the original estimates to complete.

.89 According to Practice Alert No. 00-3, auditors should consider selecting any significant or unique contracts for testing. An example of a unique contract would be one where the company is constructing a product outside of its area of expertise. Whether the company can estimate their costs accurately enough to warrant using the percentage-of-completion method for revenue recognition is an important consideration in this instance. Other audit procedures that should be considered specific to the construction industry include understanding the process for managing cash flow during the project, confirming the contract terms plus the billing procedures, visiting construction sites, meeting with project managers, and reviewing the aging of receivables with the related collections.

.90 During audit procedures, it is important to ensure that any incurred losses are recorded immediately. An entity may try to shift costs from an unprofitable contract to a profitable one in an effort to defer losses. A prime situation for this behavior might be when the contractor underbids a project by more than 5–10 percent compared with other bids. Typically the balance sheet result of cost shifting is that underbillings (costs and estimated billings in excess of billings) increase and overbillings (billings in excess of costs and estimated earnings) decrease. Audit procedures to address this issue include:

- testing internal controls over cost coding function,
- performing substantive job cost testing for accuracy,
- comparing actual job costs to original bid documents,
- testing any revised profitability estimates to original bid documents,
- testing subsequent activity by comparison to receivables and estimates at the balance sheet date,
- reviewing allocation of indirect job costs, and
- performing analytics across projects for consistency of specific job cost components (typically 25 percent of total direct costs).

.91 The four main types of construction contracts are fixed-price, unit-price, cost-type, and time-and-materials. The set fee in a fixed-price contract scenario creates a high level of risk for both the contractor and the auditor. To allay the auditor’s fears, he or she can employ the procedures noted earlier, along with estimation procedures discussed in the aforementioned section.
When an auditor reviews loan documents, an important step is to note any loan covenants and the consequences if a covenant is violated. If the violation changes the maturity date of the loan, it is important to ensure the debt is classified correctly as current or noncurrent on the balance sheet. Another consequence to consider is if the violation affects other loans with the same lending institution and the result of that violation on each lending scenario. Given the possible tight cash flow situations of a construction company, a loan violation could devastate the economic health of a project or an entire entity.

The last key items to consider are change orders (approved and unapproved), which carry a fair amount of audit risk. Change orders are common occurrences during the construction project and can change both the scope and price of the work. Change orders must be signed to be executable. When a change order is approved as to the scope of work but not price, it may only be included in the total contract estimate after careful evaluation of all relevant facts and circumstances. However, change orders that are unapproved or in dispute should be evaluated as claims. According to Practice Alert No. 00-3, “If there is no verifiable evidence to support the recognition of revenue on an unapproved change order or claim, it should not be recognized.”

**Auditing Construction Estimates**

The first step in auditing construction estimates is to identify each occurrence and determine which are significant to the overall costs to complete and therefore revenue recognized. When evaluating accounting estimates, the auditor should consider, with an attitude of professional skepticism, both the subjective and objective factors. As discussed in paragraph .09 of AU section 342, key factors and assumptions the auditor normally concentrates on include which estimates are sensitive to variation, deviate from historical patterns, or are particularly subjective and susceptible to misstatement and bias. However, it is important to consider whether historical patterns are still applicable. For example, in a new type of project or in a slow market, new patterns may emerge.

A useful exercise when testing estimates is to obtain an up-to-date cost to complete and compare to estimates used as of the financial statement date. An auditor may analyze completed contracts to both understand the historic trends of the entity and to help identify areas where the entity has incorrectly estimated in the past. This information can help guide an auditor.

The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches in testing that process as outlined in AU section 342 paragraph .10. In reviewing and testing management’s process the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor may develop an estimate and compare it to management’s or even look to subsequent events. For further details on auditing estimates, see AU section 342.

**Fair Value of Retention Receivables and Payables**

As noted in the general discussions of FASB Statement No. 157 and No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—including an amendment of FASB Statement No. 115, an entity now has the ability to choose to measure many financial instruments and certain other items at fair value on an instrument-by-instrument basis and by using a detailed framework to determine fair value. Based on the definitions of a financial asset and financial liability in paragraph 6 of FASB Statement No. 159, retention receivables and payables in construction contracts qualify as such.

The application of these standards could allow a contractor to fair value select retention receivables and payables and record any related loss or income, respectively. As previously noted, AU section 328 establishes standards and provides guidance for auditors around auditing fair value measurements. Because these types of fair value measurements are based on management assumptions, they are inherently imprecise. The auditor’s knowledge of business and industry can help evaluate the accounting for these assets and liabilities requiring fair value measurements. According to AU section 328, “The auditor should evaluate management’s intent to carry out specific courses of action where intent is relevant to the use of
fair value measurements... The auditor should also evaluate management’s ability to carry out those courses of action.” Some examples of ways for the auditor to corroborate management’s intent and ability from AU section 328 include

- considering management’s history of carrying out its stated intentions with respect to assets or liabilities;
- reviewing written plans and other documentation, including, where applicable, budgets, minutes, and other related items;
- considering management’s stated reasons for choosing a particular course of action; and
- considering management’s ability to carry out a particular course of action given the entity’s economic circumstances, including the implications of its contractual commitments.

Auditors are encouraged to read the aforementioned FASB statements and AU section 328 to ensure they have addressed all risks associated with measuring fair value.

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

.100 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.101 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review AICPA Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

### Recent Auditing and Attestation Pronouncements and Related Guidance

<table>
<thead>
<tr>
<th>Pronouncement</th>
<th>Description</th>
</tr>
</thead>
</table>
| **SAS No. 114, The Auditor’s Communication With Those Charged With Governance** *(AICPA, Professional Standards, vol. 1, AU sec. 380)*  
Issue Date: December 2006  
(Applicable to audits conducted in accordance with GAAS) | Replacing SAS No. 61, *Communication With Audit Committees*, this standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, to whom they should be communicated, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006. |
| **SAS No. 113, Omnibus Statement on Auditing Standards—2006** *(AICPA, Professional Standards, vol. 1)*  
Issue Date: November 2006  
(Applicable to audits conducted in accordance with GAAS) | This standard does the following:  
- Revises the terminology used in the 10 standards of AU section 150, *Generally Accepted Auditing Standards*, to reflect terminology in AU section 120, *Defining Professional Requirements in Statements on Auditing Standards* *(AICPA, Professional Standards, vol. 1)*.  
- Adds a footnote to the headings before paragraphs .35 and .46 in AU section 316, *Consideration of Fraud in a Financial Statement Audit* *(AICPA, Professional Standards, vol. 1)*, to provide a clear link between the auditor’s consideration of fraud and the auditor’s assessment of risk and the auditor’s procedures in response to those assessed risks.  
- Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor’s report*.  
- Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor’s report. |
| **SAS Nos. 104–111, the risk assessment standards**  
Issue Date: March 2006  
(Applicable to audits conducted in accordance with GAAS) | The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits; focusing on identifying and assessing the risks of material misstatements; further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels; and improving the linkage between the risks, controls, audit procedures, and conclusions. These eight SASs became effective for audits of financial statements for periods beginning on or after December 15, 2006. |
Issue Date: October 2008 | This statement establishes requirements and provides guidance that applies when a practitioner is engaged to perform an examination of the design and operating effectiveness of an entity’s internal control over financial reporting (examination of internal control) that is integrated with an audit of financial statements (integrated audit). This SSAE is effective for integrated audits for periods ending on or after December 15, 2008. Earlier implementation is permitted. |

| **TIS section 9120.08, “Part of an Audit Performed in Accordance With International Standards on Auditing”** (AICPA, Technical Practice Aids)  
  Issue Date: April 2008  
  (Nonauthoritative) | This question and answer discusses the implications to the principal auditor’s report when part of an audit is conducted by other independent auditors in accordance with International Standards on Auditing or another country’s auditing standards. |
| **TIS section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditor’s Report”** (AICPA, Technical Practice Aids)  
  Issue Date: May 2007  
  (Nonauthoritative) | This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor’s report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor’s report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that it will sign the representation letter, without exception, on or before the date of the representations. |
| **TIS section 8350.01, “Current Year Audit Documentation Contained in the Permanent File”** (AICPA, Technical Practice Aids)  
  Issue Date: May 2007  
  (Nonauthoritative) | This question and answer discusses whether the provisions of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that AU section 339 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year’s audit report. |
| **AICPA Professional Issues Task Force (PITF) Practice Alert (PA) No. 03-1, Audit Confirmations** (AICPA, Technical Practice Aids, PA sec. 16,240)  
  Revised: June 2007  
  (Nonauthoritative) | This practice alert is a response to practitioners’ current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics. |
| **AICPA PITF PA No. 07-1, Dating of the Auditor’s Report and Related Practical Guidance** (AICPA, Technical Practice Aids, PA sec. 16,290)  
  Issue Date: January 2007  
  (Nonauthoritative) | This practice alert provides guidance regarding application of certain provisions of AU section 339, primarily related to dating the auditor’s report. |
| **Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 6, Evaluating Consistency of Financial Statements** (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
  Issue Date: November 15, 2008  
  (Applicable to audits conducted in accordance with PCAOB standards) | This standard and its related amendments update the auditor’s responsibilities to evaluate and report on the consistency of a company’s financial statements and align the auditor’s responsibilities with Financial Accounting Standards Board (FASB) Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3. This standard also improves the auditor reporting requirements by clarifying that the auditor’s report should indicate whether an adjustment to previously issued financial statements results from a change in accounting principles or the correction of a misstatement. |

<td><strong>PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting</strong> <em>(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)</em>&lt;br&gt;<strong>Issue Date: July 2007</strong>&lt;br&gt;(Applicable to audits conducted in accordance with PCAOB standards)</td>
<td>This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client’s audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the Securities and Exchange Commission (SEC) or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm’s independence, and document the substance of the firm’s discussion with the audit committee. These requirements parallel the auditor’s responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524, <em>Audit Committee Pre-approval of Certain Tax Services</em> <em>(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)</em>. This rule is effective for audits of fiscal years ending on or after November 15, 2007.</td>
</tr>
<tr>
<td><strong>PCAOB Conforming Amendments to the Interim Auditing Standards</strong> <em>(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)</em>&lt;br&gt;<strong>Issue Date: July 2007</strong>&lt;br&gt;(Applicable to audits conducted in accordance with PCAOB standards)</td>
<td>In conjunction with the PCAOB’s adoption of Auditing Standard No. 5, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in appendix 3 of PCAOB Release No. 2007-005A at <a href="http://www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf">www.pcaob.org/Rules/Docket_021/2007-06-12_Release_No_2007-005A.pdf</a>. These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.</td>
</tr>
<tr>
<td><strong>PCAOB Release No. 2007-001, Observations on Auditors’ Implementation of PCAOB Standards Relating to Auditors’ Responsibilities With Respect to Fraud</strong> <em>(AICPA, PCAOB Standards and Related Rules, “Selected SEC-Approved PCAOB Releases”)</em>&lt;br&gt;<strong>Issue Date: January 2007</strong>&lt;br&gt;(Applicable to audits conducted in accordance with PCAOB standards)</td>
<td>This release focuses on aspects of the PCAOB’s interim auditing standards that address the auditor’s responsibility with respect to fraud, specifically AU section 316, <em>Consideration of Fraud in a Financial Statement Audit</em> <em>(AICPA, PCAOB Standards and Related Rules)</em>. This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.</td>

Recent Auditing and Attestation Pronouncements and Related Guidance

PCAOB Staff Questions and Answers, Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 100 par. .05)

Issue Date: April 2007
(Applicable to audits conducted in accordance with PCAOB standards)

Topics covered include the following:

- The application of PCAOB Rule 3522(a), Tax Transactions (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm
- Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction
- Whether a registered public accounting firm’s independence is affected by the IRS’s subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in PCAOB Rule 3522(b)
- Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself
- Clarification of the term other change in employment event as it relates to PCAOB Rule 3522(c)

PCAOB Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. .02)

Issue Date: December 2007
(Applicable to audits conducted in accordance with PCAOB standards)

This practice alert highlights certain requirements in the auditing standards related to fair value measurements and disclosures in the financial statements and certain aspects of generally accepted accounting principles that are particularly relevant to the current economic environment.

Accounting Issues and Developments

Convergence With International Financial Reporting Standards

.102 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

.103 FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project go to www.fasb.org and www.iasb.org.

SEC Eases Acceptance of IFRS Financial Statements

.104 On December 21, 2007, the SEC took a major step towards easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an
important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.105 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there are currently approximately 500 foreign private issuers from Canada.

.106 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS “Roadmap”

.107 On August 27, 2008, the SEC voted to publish for public comment a proposed roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

.108 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016.

.109 The 60 day comment period will begin when the proposed roadmap is published in the federal register.

.110 Additionally, in the spotlight section of its Web site, the SEC provides information on the following topics and groups:

- SEC roundtable on IFRS held on August 4, 2008
- SEC roundtable on practical issues surrounding the use of IFRS in the United States in recent years, and the potential expanded use of IFRS in future years
- SEC roundtable on IFRS in the U.S. markets held on December 13, 2007
- Proposed rulemaking and request for public comments
- SEC staff roundtable on IFRS roadmap
- SEC press releases
- Staff review of financial statements prepared in accordance with IFRS
- Speeches and public statements

This information can be accessed at www.sec.gov/spotlight/ifrsroadmap.htm.
AICPA Launches IFRS.com Web Site

.111 The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

.112 To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

.113 Developed by the AICPA, in partnership with its marketing and technology subsidiary, cpa2biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

.114 The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, continuing professional education (CPE) courses and live conference training, helpful links, and assistance for audit committee members.

FASB Accounting Standards Codification™

.115 On January 15, 2008, FASB launched the one-year verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.116 The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the one year verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve FASB ASC in April 2009. FASB ASC can be accessed at http://asc.fasb.org/home.

.117 Constituents are encouraged to use FASB’s online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

.118 The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating FASB ASC Research System and performing accounting research.

Summary of Recent Accounting Pronouncements and Related Guidance

.119 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of
specific significance to the industry are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

Real Estate Accounting Issues and Developments

Fair Value Measurements

FASB Statement No. 157

.121 In September 2006, FASB issued FASB Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.122 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

.123 In February 2008, FASB issued FASB Staff Position (FSP) FAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13, which amends FASB Statement No. 157, to exclude FASB Statement No. 13, Accounting for Leases, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141, Business Combinations or FASB Statement No. 141(R), Business Combinations, regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

.124 FASB Statement No. 157 is effective for financial statements issued after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. However, in February 2008, FASB also issued FSP FAS 157-2, Effective Date of FASB Statement No. 157, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157. In October 2008, FASB issued FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, which clarifies FASB Statement No. 157’s application in an inactive market and also amends the standard to include an illustrative example. See the section of this alert entitled Measurements of Fair Value in Illiquid Markets for further discussion of FSP FAS 157-3. Readers can access the full text of FASB Statement No. 157 and the previously referenced FSPs on the FASB Web site at www.fasb.org.

Measurements of Fair Value in Illiquid Markets

.125 Most of the subprime mortgages making headlines were ultimately financed via securitization issuances. As a result of the growing numbers of defaults and foreclosures and uncertainty about the future, investors in these securities and lenders who issued these securities have almost come to a standstill causing a liquidity crisis. This has caused significant declines in the values of existing loans and mortgage backed securities held by both lenders and investors given the lack of demand. This has also spread to a lack of demand for investments in CDOs, as many hold securities backed by subprime mortgages, and even the short-term commercial paper market.
Given the state of the market, there is confusion around the use of “market” quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are in actuality distressed sales. To clarify the application of FASB Statement No. 157 in an inactive market, in October 2008 FASB issued FSP FAS 157-3. This FSP also amends FASB Statement No. 157 to include an illustrative example. FSP FAS 157-3 noted the consistency between the guidance provided in it and the guidance provided in the SEC and FASB press release. Readers are encouraged to review the full text of the FSP and the amended standard (inclusive of its recently added illustrative example) on the FASB Web site at www.fasb.org. The FSP was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.

FSP FAS 157-3 noted, “Broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset… In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.” As discussed in paragraph 7 of FASB Statement No. 157, “[A]n orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).” Low transaction volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

If transaction volume is too low to provide accurate pricing information and therefore a level 1 input, those observable transactions are to be considered level 2 inputs or even level 3 inputs if they are significantly adjusted. The AICPA Center for Audit Quality’s (CAQ) October 2007 white paper on the topic noted some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” In describing an inactive market as well, the SEC and FASB Press Release noted, “A significant increase in the spread between the amount sellers are ‘asking’ and the price that buyers are ‘bidding’, or the presence of a relatively small number of ‘bidding’ parties, are indicators that should be considered in determining whether a market is inactive.”

The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “[I]n cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB Press Release noted, “[I]n some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs it may be appropriate to utilize an estimate based primarily on unobservable inputs.” When significant adjustments are made to an observable input (level 2), it becomes a level 3 fair value measurement.

Paragraph C85 of FASB Statement No. 157 states, “[T]he reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transaction or assumptions that are reasonably available without undue cost and effort.

The FSP concluded, “[T]he use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted, “[i]n some cases, multiple inputs from different sources
may collectively provide the best evidence of fair value. In these cases expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.”

.132 The AICPA, in October 2008 (as mentioned in the “Audit Risks Arising From Current Economic Conditions” section), issued a nonauthoritative TPA around liquidity restrictions. TIS section 1100.15 provides useful information to accountants and auditors when an entity’s short-term investments (such as money market funds) have become restricted by the fund (or its trustee). The full technical practice aid can be obtained from the AICPA’s Web site, www.aicpa.org.

FASB Statement No. 159

.133 Subsequent to the issuance of FASB Statement No. 157, FASB issued FASB Statement No. 159. This statement is expected to expand the use of fair value measurement, which is consistent with FASB’s long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement’s objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions.

.134 In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, and FASB Statement No. 157.

.135 FASB Statement No. 159 is effective as of the beginning of an entity’s first fiscal year after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically the alert warns auditors to “be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard.” The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

Loan Modifications Within the Scope of Qualifying Special Purpose Entities

.136 When the accounting world began to digest the state of the residential real estate market, a common question surfaced around what activities were permitted by a servicer when loans had been securitized by a qualifying special purpose entity (QSPE) in accordance with FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, and therefore had not been consolidated by the transferor entity. After a series of SEC letters in 2007, the chief accountant of the SEC issued a letter dated January 8, 2008, that finalized the SEC’s position on this matter. The letter can be accessed at sec.gov/info/accountants/staffletters/hanish010808.pdf. The letter describes the issue as follows: “[N]either FAS 140 nor the related interpretative guidance indicates whether it would be appropriate for a servicer to modify a securitized mortgage in a QSPE prior to an actual delinquency or default and, if so, the relevant disclosures that may be necessary when such modifications occur.” For an entity to maintain QSPE status, its activities are restricted by FASB Statement No. 140.

.137 Stating the SEC’s position on the matter, this letter referred to the Streamlined Foreclosure and Loss Avoidance Framework for Securitized Subprime Adjustable Rate Mortgage Loans (ASF Framework) issued by the American Securitization Forum on December 6, 2007, as revised on July 8, 2008, which can be found at
Essentially, the ASF Framework provides guidance to servicers around refinancing and categorizes select subprime residential adjustable rate mortgage loans into three segments. Segment two contains mortgages where default is deemed to be reasonably foreseeable, and these loans have therefore been permitted to be modified before default occurs without invalidating an entity’s QSPE status. It was determined no additional interpretative guidance from FASB was necessary. However, it should be noted this is interim guidance as FASB has been in the process of simplifying the guidance in FASB Statement No. 140 since 2003.

FASB Statement No. 140 Project

.138 The board has undertaken a project to amend and simplify FASB Statement No. 140. The board has issued a proposed exposure draft in the third quarter of 2008 and expects to issue a final document in the fourth quarter of 2008. This project is being performed in conjunction with FASB’s project on FASB Interpretation No. (FIN) 46, Consolidation of Variable Interest Entities. The proposed amendments to FASB Statement No. 140 should be applied in fiscal years beginning after November 15, 2009 (effective date), on a prospective basis. QSPEs that existed prior to the effective date must also apply these amendments. FASB is considering a different effective date for private entities. The proposed amendments include the following:

- Removing the concept of a qualifying special purpose entity from FASB Statement No. 140 and removing the scope exception for QSPEs from FIN 46 (revised 2003), Consolidation of Variable Interest Entities
- Changing the derecognition criteria
- Changing the initial and subsequent measurement of beneficial interests received by the transferor
- Removing the fair value practicability exception
- Changing the exceptions related to guaranteed mortgage securitizations
- Changing the disclosure requirements

.139 FASB has also decided to separately issue a FSP that would require many of the approved disclosures to be made by an entity as soon as possible, that is, before the effective date of the amendments discussed previously. A draft of the proposed FSP, FSP FAS 140-e and FIN 46(R), Disclosures About Transfers of Financial Assets and Interests in Variable Interest Entities, was issued on September 15, 2008, for a 30 day comment period, and a final FSP is expected to be issued in the fourth quarter of 2008. In the proposed FSP, FASB recommends the FSP be effective at the end of the reporting period in which the FSP is issued due to the urgent need to improve transparency. Accountants and auditors are encouraged to follow the status of this proposed FSP on the FASB Web site. Readers should also note the exposure draft of the proposed amendments to FIN 46 (revised December 2003), posted on the FASB Web site in September 2008.

FASB Staff Position FAS 140-3

.140 In February 2008, FASB issued FSP FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions, to provide guidance when a purchase of a financial asset and its financing via repurchase agreement occurs contemporaneously. It is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those years. No early adoption is permitted, and it shall be applied prospectively to initial transfers and repurchase financings that are executed on or after the beginning of the fiscal year in which this FSP is initially applied.

.141 Determining whether the transaction is linked is the first step. To avoid being linked, all of the following criteria must be met:

- The two transactions have a valid and distinct business or economic purpose for being entered into separately.
- The initial transferor does not regain control over the financial asset from the repurchase financing.
- The initial transfer and the repurchase financing are not contractually contingent.
The repurchase financing gives the initial transferor recourse to the initial transferee upon default.

The financial asset is readily obtainable in the marketplace.

The maturity date of the repurchase financing must be prior to the maturity of the financial asset.

.142 If the transaction is deemed linked, it must be evaluated for sale accounting under FASB Statement No. 140. If it does not qualify as a sale, the transaction shall be accounted for based on the overall economics, which typically creates a forward contract to be evaluated for derivative treatment under FASB Statement No. 133, Accounting for Derivatives and Hedging Activities.

Buy-Sell Clauses

.143 In December 2007, FASB ratified the consensus on EITF Issue No. 07-6, “Accounting for the Sale of Real Estate Subject to the Requirements of FASB Statement No. 66 When the Agreement Includes a Buy-Sell Clause.” It will be effective for new arrangements entered into and any assessments performed in fiscal years beginning after December 15, 2007, and any interim periods within those years.

.144 The buy-sell clause is a contractual term that gives both of the investors of the jointly owned entity the ability to offer to buy the other investor’s interest. It is designed to incorporate into the transaction price the natural tension between the interests of both investors in a buy-sell situation and thereby achieve an acceptable outcome for both investors. Furthermore, the buy-sell clause provides investors with an exit strategy for closely held investments. The issue is whether an irrevocable buy-sell clause represents a prohibited form of continuing involvement that would preclude partial sale and profit recognition pursuant to FASB Statement No. 66, Accounting for Sales of Real Estate, assuming all other criteria have been met. EITF Issue No. 07-6 states the aforementioned determination is a matter of judgment and requires consideration of all relevant facts and circumstances of the transaction at the time the real estate is sold into the jointly owned entity. This clause should be evaluated to determine if it gives the buyer an in-substance option to acquire the buyer’s interest in the jointly owned entity (thereby reacquiring the real estate).

Accounting by Lessees for Maintenance Deposits

.145 At the EITF meeting on June 25, 2008, EITF Issue No. 08-3, “Accounting by Lessees for Maintenance Deposits,” was ratified with an effective date for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Earlier application is not permitted. The issue addressed in EITF Issue No. 08-3 is whether lessees of equipment should account for maintenance deposits to the lessor as deposits or as contingent rental expense. These deposits are reimbursed to the lessee for maintenance costs over the term of the lease, but any unused amounts remaining at the end of the lease are nonrefundable. Only deposits with the aforementioned characteristics are within the scope of this issue.

.146 When the equipment lease provides for required maintenance deposits to the lessor, the initial accounting is as a deposit. When the maintenance is performed and reimbursed by the lessor to the lessee, the deposit can either be expensed or capitalized in accordance with the lessee’s maintenance accounting policy. Once it is probable that any remaining deposited amounts will not be used for maintenance activities for the leased equipment, the amount is recognized as an additional expense immediately by the lessee. This issue does not provide revenue recognition guidance for the lessor. Readers can access the complete EITF abstract on the FASB Web site for further details.

Construction Accounting Issues and Developments

Revenue Recognition

.147 As noted previously in this alert, SOP 81-1 provides guidance on revenue recognition for construction contractors. SOP 81-1 requires a contractor to use the percentage-of-completion method for recognizing revenue whenever it can produce reasonably dependable estimates. A rebuttable presumption exists that the percentage-of-completion method will produce reasonably dependable estimates.
The completed-contract method should be used only in instances in which reasonable, dependable estimates of construction costs cannot be made. The completed-contract method may also be used if there are no material differences between that method and the percentage-of-completion method. Situations in which there are no material differences may occur when a contractor performs primarily short-term contracts, for example, a small plumbing contractor whose projects are completed so quickly that the work is somewhat analogous to the manufacture of shelf production items for sale.

The revenue recognition method should be disclosed in the financial statements. If the percentage-of-completion method is used, the financial statements should disclose the method of computing percentage-of-completion (for example, cost-to-cost). If the completed contract method is used, the reason for selecting the method should be indicated.

In December 1999, the SEC, in an attempt to fill the gap in general revenue recognition guidance, released Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*. SAB No. 101 was superseded by SAB No. 104, *Revenue Recognition*, in December 2003. Financial statement preparers and auditors of public construction companies are most directly affected by SAB No. 104. However, auditors of nonpublic companies may also find the information contained in SAB No. 104 useful. The issuance of SAB No. 104 did not affect the guidance for revenue recognition contained in SOP 81-1.

**Recent AICPA Independence and Ethics Pronouncements**

AICPA *Independence and Ethics Developments—2008* (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

**On the Horizon**

Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the real estate and construction industries or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including exposure drafts that may be downloaded. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.154 The Auditing Standards Board (ASB) formed a Clarity Task Force to address concerns over the clarity, length, and complexity of GAAS. In March 2007, the ASB approved for exposure a discussion paper Improving the Clarity of ASB Standards. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards), to apply the clarity drafting conventions and to converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board. The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the Clarity Project Explanatory Memorandum and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

Auditing Pipeline—Issuers

.155 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to the Audit Risk Alert SEC and PCAOB Developments—2008.

Accounting Pipeline

.156 A number of accounting projects and pronouncements are currently in progress. For a summary of significant accounting projects and pronouncements, refer to AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
- Income tax convergence project
- Leases project
- Reporting discontinued operations project
- Going concern proposed statement
Subsequent events proposed statement
Amendments to FIN 46(R) proposed statement

Fair Value

.157 During phase 1 of FASB’s fair value option project, FASB issued FASB Statement No. 159, which was previously discussed. In phase 2 of the project, FASB will consider allowing the fair value option for certain nonfinancial assets and nonfinancial liabilities and deposit liabilities of depository institutions, which are excluded from the scope of FASB Statement No. 159. Deliberations on phase 2 are expected to begin in the first quarter of 2008. Readers should remain alert to developments by visiting the FASB Web site.

Proposed FASB Emerging Issues Task Force Issues and Staff Positions

.158 Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.159 Proposed FASB Staff Positions (FSPs). A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.160 The following are various resources that practitioners engaged in the real estate or construction industries may find beneficial.

Publications

.161 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide Construction Contractors (2008) (product no. 012588kk [paperback], WCC-XXkk [online with the associated Audit Risk Alert], or DCC-XXkk [CD-ROM with the associated Audit Risk Alert])
- Audit and Accounting Guide Investment Companies (2008) (product no. 012628kk [paperback], WIN-XXkk [online with the associated Audit Risk Alert], or DIN-XXkk [CD-ROM with the associated Audit Risk Alert])
- Audit and Accounting Guide Depository and Lending Institutions (2008) (product no. 012738kk [paperback], WDL-XXkk [online with the associated Audit Risk Alert], or DDL-xxkk [CD-ROM with the associated Audit Risk Alert])
- Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])
- Audit Guide Assessing and Responding to Audit Risk in a Financial Statement Audit (2006) (product no. 012456kk [paperback] or WRA-XXkk [online])
- Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (2008) (product no. 012528kk [paperback], WDI-XXkk [online], or DDI-XXkk [CD-ROM])
- Audit Guide Auditing Revenue in Certain Industries (2008) (product no. 012518kk [paperback], WAR-XXkk [online], or DAR-XXkk [CD-ROM])
- Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XXkk [online], or DAS-XXkk [CD-ROM])
- Audit Guide Service Organizations: Applying SAS No. 70, as Amended (2008) (product no. 012778kk [paperback], WSV-XXkk [online], or DSV-XXkk [CD-ROM])
• AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])
• Audit Risk Alert Compilation and Review Developments—2008 (product no. 022309kk [paperback], WCR-XXkk [online], or DCR-XXkk [CD-ROM])
• Audit Risk Alert Depository and Lending Institution Industry Developments—2008 (product no. 022299kk [paperback], WDL-XXkk [online with the associated Audit and Accounting Guide], or DDL-XXkk [CD-ROM with the associated Audit and Accounting Guide])
• Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])
• Audit Risk Alert Investment Companies Industry Developments—2008 (product no. 022369kk [paperback], WIN-XXkk [online with the associated Audit and Accounting Guide], or DIN-XXkk [CD-ROM with the associated Audit and Accounting Guide])
• Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk [paperback])
• Audit Risk Alert Understanding the New Auditing Standards Related to Risk Assessment (product no. 022526kk [paperback])
• Checklist Supplement and Illustrative Financial Statements for Construction Contractors (product no. 008928kk [paperback] or WCS-CLkk [online])
• Checklists and Illustrative Financial Statements for Depository and Lending Institutions (product no. 008918kk [paperback] or WDP-CLkk [online])
• Checklist Supplement and Illustrative Financial Statements for Investment Companies (product no. 008948kk [paperback] or WIS-CLkk [online])
• Checklist Supplement and Illustrative Financial Statements for Real Estate Ventures (product no. 008978kk [paperback] or WRS-CLkk [online])
• Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])
• Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XXkk [online])

Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

• Financial Reporting Alert Current Accounting Issues and Risks—2008 (product no. 029208kk)
• Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk)

AICPA reSOURCE: Accounting and Auditing Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry, including the following:
• AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

• SEC Reporting (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements and gives you examples and tips for ensuring compliance.

• International Versus U.S. Accounting: What in the World is the Difference? (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

• The International Financial Reporting Standards: An Overview (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA board of directors.

.165 Among the many courses, the following are specifically related to the real estate or construction industries:

• Real Estate Accounting and Auditing (product no. 730608kk)

• FIN 46R Variable Interest Entity Consolidation Rules: Not Just a Big Company Issue! (product no. 733212kk)

• Construction Contractors: Accounting, Auditing, and Tax (product no. 736432kk)

• Construction Contractors Advanced Issues (product no. 731994kk)

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.166 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the real estate industry include the following:

• Planning the Audit of a Real Estate Entity’s Financial Statements

• Accounting for Sale-Leasebacks and Nonmonetary Exchanges

• Accounting for the Sale of Real Estate Assets

• Accounting for Rental Operations and Investments in Real Estate Ventures

• Accounting for the Impairment of Completed Real Estate Projects

• Auditing Real Estate Transactions

• Introduction to the Real Estate Valuation Process

.167 Some topics of special interest to the construction industry include the following:

• Construction Contractors: Nature and Significance of the Construction Industry and Cost Allocations

• Construction Contractors: Nature of the Construction Industry

• Construction Contractors: Contract Accounting

• Construction Contractors: Other Auditing Considerations
Construction Contractors: Audit Risks in the Construction Industry

Construction Contractors: Internal Control Issues in the Construction Industry

To register or learn more, visit www.cpa2biz.com.

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.
Industry Conferences

.174 The AICPA offers an annual National Real Estate Conference in the fall. The National Real Estate Conference is a two day conference designed to update attendees on recent developments related to real estate accounting and auditing, tax, and management issues. It delivers solid news about the emerging trends in the real estate market and offers new ideas for the accounting and financial management of the real estate industry.

.175 The AICPA also offers an annual National Construction Industry Conference in the late fall. The National Construction Industry Conference is a two-day conference on the latest industry trends, as well as most recent compliance issues.

.176 For further information about these conferences, call (888) 777-7077 or visit www.cpa2biz.com.

The Center for Audit Quality

.177 The CAQ, which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.178 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit thecaq.aicpa.org.

Industry Web Sites

.179 The Internet covers a vast amount of information that may be valuable to auditors of real estate entities, including current industry trends and developments.

.180 Some of the more relevant sites for auditors with real estate clients include those shown in the following table:

Investment Companies Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of investment companies with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate.

The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Kenneth R. Biser, CPA, MBA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Brian Gallagher, CPA
Albert Goll, CPA
Joseph Grainger, CPA
Richard Grueter, CPA
Timothy Jinks, CPA

Gregory Levy, CPA
Aaron Masek, CPA
Irina Portnoy, CPA
Maryna Tully, CPA

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your investment companies audits. This alert also can be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.
This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk), which can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

**Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement**

An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

The investment companies industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business also is dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

**Economic and Industry Developments**

**The State of the Economy**

When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.
Unprecedented Events in the Financial Markets

.09 During 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, acquisitions of several investment and commercial banks (including some that required assistance from federal agencies), and the placement into conservatorship of Fannie Mae and Freddie Mac. Further, several foreign financial institutions received assistance from their national governments or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant publicly registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened. Corporations and financial institutions generally recognized as creditworthy began experiencing difficulty borrowing money in the financial markets for any period of time longer than an overnight basis.

.10 In response, the U.S. Senate and, on October 3, 2008, the U.S. House of Representatives passed a bill that, among other things, appropriated up to $700 billion to purchase various forms of asset-backed securities and made a number of changes to the Internal Revenue Code (IRC). The repercussions of these events are just beginning to be felt in the wider economy. What impact they will have in 2009 is impossible to predict.

New Audit Risk Alert to Address Current Market Conditions

.11 This industry alert discusses the current economic environment (including basic measures of economic activity) and the economy’s effect on the investment companies industry. In light of the economic situation, the AICPA has developed a dedicated Audit Risk Alert, Current Economic Crisis: Accounting and Auditing Considerations—2009 (product no. 0223308kk), to address common accounting and auditing concerns relative to current market conditions that are affecting all industries. The alert also discusses a number of resources to assist in fair value accounting and its associated audit risks. Please visit www.cpa2biz.com for upcoming AICPA products, including the alert mentioned here, to help navigate this trying time.

Basic Measures of Economic Activity—Gross Domestic Product, Unemployment, and Interest Rates

.12 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 third quarter final estimates, real GDP decreased at an annual rate of 0.5 percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

.13 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate rose dramatically. As of December 2008, the unemployment rate reached its highest level in 2008 at 7.2 percent, representing approximately 11.1 million people.

.14 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates more than 5.0 percentage points to less than 0.25 percent as of mid-December 2008. The Federal Reserve noted in its December press release that since October 2008, labor market conditions have deteriorated, and the available data indicate that consumer spending, business investment, and industrial production have declined. Financial markets remain quite strained and credit conditions tight. Overall, the outlook for economic activity has weakened further. Inflationary pressures have diminished appreciably and are expected to continue to moderate. The Federal Open Market Committee anticipates that weak economic conditions are likely to warrant exceptionally low levels of the federal funds rate for some time.

.16 The EESA is intended to restore financial sector liquidity and stability, protect the value of taxpayer assets (such as homes, savings, and retirement funds), and provide a return to taxpayers. The EESA authorizes the U.S. Treasury secretary to establish the Troubled Asset Relief Program (TARP), whereby the U.S. Treasury can purchase troubled assets from financial institutions, and authorizes $700 billion, as requested by the Treasury secretary for the implementation of TARP. Upon authorization of TARP, up to $350 billion became available for immediate use. The secretary is required to examine the long term viability of an institution in determining whether to directly purchase assets under TARP. Financial institutions participating in TARP will be subject to certain restrictions on executive compensation.

.17 At the time this alert was written, the U.S. Treasury had not acquired any assets under TARP, but the U.S. Treasury had released the terms of its Capital Purchase Program (CPP) and finalized certain transactions under the CPP. Under the CPP, the U.S. Treasury proposed to invest up to $250 billion in senior perpetual preferred stock and warrants in qualifying financial institutions. In November 2008, the U.S. Treasury completed its $125 billion aggregate investment in the 9 banking organizations deemed to be systemically important. An institution’s tier 1 capital will include, without limitation, funds received from the CPP. Other institutions were required to apply to their appropriate federal banking agency by November 14, 2008, for participation in the program. The deadline for nonpublic stock institutions and mutual banks has been extended as the U.S. Treasury develops term sheets applicable to these institutions.

.18 In summary, the primary components of the EESA include (a) an allocation of $700 billion to stabilize the U.S. financial system; (b) the creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that participate; (c) an increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion; (d) a temporary increase of Federal Deposit Insurance Corporation (FDIC) insurance limits; (e) the creation of a tax modification for Fannie Mae and Freddie Mac stock losses; (f) a restatement of the Securities and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements; and (g) the requirement of the SEC to conduct a study on the impact of FASB Statement No. 157. The results of this study are discussed in subsequent sections of this alert.

.19 For additional information on the EESA and its related programs, see http://treasury.gov/initiatives/eesa/. On that Web site, you also may sign up for EESA e-mail alerts to receive notification about current developments.

Industry Trends and Conditions

Continuing Market Stress

.20 The prior year edition of this alert discussed a number of issues in fixed-income markets during the second half of 2007, beginning with effects on subprime mortgage-backed securities and extending to asset-backed commercial paper. During 2008, these markets continued under severe stress, to the extent that they placed significant stress on financial markets in general. A number of major financial institutions significantly exposed to distressed sectors of the markets were hit hard, most dramatically demonstrated by the absorption of Bear Stearns Companies Inc. by JPMorgan Chase & Co.; additional support provided by the federal government to Fannie Mae and Freddie Mac; the FDIC’s seizure of IndyMac Bank, a major mortgage originator, in July 2008; and the failure of Lehman Brothers, AIG, and two smaller banks. Further, several major commercial banks experienced significant financial weakening, and their stock values have fallen by two-thirds or more since December 2007. Many commercial and investment banks have either completed or have stated that they are contemplating stock issuances or asset sales to replenish capital depleted by significant losses.
Additional stress was placed on the markets when the credit ratings of major “monoline” bond insurers, including MBIA Inc. and Ambac Financial Group, Inc., were downgraded by the major rating agencies from their previous AAA levels, due to significant exposure to losses from insurance written on asset-backed securities. Certain less significant insurers experienced rating declines to “below-investment-grade” (or “junk”) status. This, in turn, resulted in the extension of market illiquidity to municipal and other corporate securities, for which bond insurance plays an integral role.

Beginning in February 2008, numerous auctions failed because of the losses and capital reductions incurred by market makers in auction-rate debt and preferred stock and, to a lesser extent, questions about the financial strength of bond insurers who supported the credit of certain auction-rate security issuers. These markets continue to struggle as of the writing of this alert. As a result, some municipal bond issuers paid unusually high interest rates, as required by their bond indentures in the event of failed auctions. Many of those issuers, however, have refinanced their debt with other issues. In addition, many closed-end investment companies also were significant issuers of auction-rate securities. Although they were not forced to pay the same punitive rates as other issuers, a number of fund groups also have refinanced their securities. See the “Legislative and Regulatory Developments” section of this alert for a discussion of tax and regulatory relief granted to those funds as part of their refinancing efforts.

This distress also found its way into the broader corporate loan and bond markets, with financial institutions reducing funds available for lending and tightening lending standards. At times, this resulted in the withdrawal of commitments to provide loans intended for corporate acquisitions and refinancings. Further, defaults among bond issuers generally have increased. Standard & Poor’s reported that, through November 11, 2008, 85 companies worldwide defaulted on their debt, affecting a total of $284 billion. This is a significant increase from the previous 2 years (22 defaults in 2007 and 30 in 2006). Of the 85 companies, 70 are based in the United States.

Finally, significant questions arose regarding the procedures used by bond rating agencies to evaluate asset-backed securities, in particular “AAA” ratings granted to securities, including securities acquired by SEC-registered money market funds (MMFs) that later experienced significant credit-related deterioration. As a result, the SEC has reconsidered the inclusion of specific references to ratings by nationally recognized statistical rating organizations (NRSROs) in its rules and forms out of concern that doing so (as stated in SEC communications) “has, in effect, placed an ‘official seal of approval’ on ratings that could adversely affect the quality of due diligence and investment analysis.” The SEC also has proposed a number of amendments to “reduce undue reliance on credit ratings and result in improvement in the analysis that underlies investment decisions.”

Legislative and Regulatory Developments

SEC Concerns

Disclaimer: A summary of financial statement review comments issued by the SEC staff (the staff) to investment company registrants and other guidance related to issues encountered by SEC registrants follows. These comments were compiled by the AICPA Investment Companies Expert Panel and have not been approved or endorsed by the SEC or its staff. This is not intended to be a comprehensive list.

Fund Marketing Materials

The staff expressed concern about instances when fund marketing materials on the registrant’s Web site are not consistent with information submitted in SEC filings, such as registration or financial statements. In one instance, a closed-end fund had disclosed its distribution rate on its Web site without providing any explanatory context about its composition. This registrant had distributions that related to return of capital and capital gains in the year disclosed. In another instance, a registered fund disclosed expense ratios on its Web site that were calculated based on methods that were not consistent with the instructions provided in Form N-1A or Form N-2 (the forms) or generally accepted accounting principles (GAAP) requirements (for example, expense ratio was based on average total assets rather than average net assets or calculations...
excluded certain expenses, such as interest expense). Registrants should ensure that marketing materials on their Web sites are consistent with information included in SEC filings and that financial information disclosed is consistent with the forms and GAAP.

Disclosures of Credit Support in Financial Statements of Registered Money Market Funds

.27 A number of publicly available no-action letters have been issued over the past year relating to support agreements provided to MMFs that experienced asset deterioration. These letters describe the obligation of an affiliate to guarantee payment of any scheduled principal and interest payments that are not made, including the principal and final interest payment for a security or group of securities that a money market fund is holding. The guarantee may be supported by the sponsor by obtaining a letter of credit from a highly rated financial institution that has a credit rating comparable to other eligible money market investments, if the sponsor itself does not have such a rating. Additionally, the term of the agreements typically is limited to the maximum term permitted (397 days) for an eligible nongovernment security under Rule 2a-7, “Money Market Funds,” under the Investment Company Act of 1940. Under such arrangements, MMFs bear no costs relating to the support agreements. The no-action letters can be accessed at www.sec.gov/divisions/investment/im-noaction.shtml#chron.

.28 Rule 2a-7 of the Investment Company Act of 1940 provides valuation guidance for registered MMFs. The rule places certain investment restrictions on MMFs that would minimize the impact of valuation volatility of their underlying asset portfolios. Accordingly, MMFs generally invest in short term investments, including certificates of deposit, commercial paper, and government securities and pay dividends to shareholders that generally reflect short-term interest rates. Although credit losses in the underlying portfolio of MMFs are possible, MMFs typically are managed with the goal of keeping losses to a minimum.

.29 Some MMFs sought to increase yields by investing in highly rated, short term debt tranches issued by structured investment vehicles (SIVs), which hold higher yielding securities. During the past year, events in the credit markets created situations in which the short term debt issued by certain SIVs could not be reissued due to concerns about some of the assets the SIVs held, causing buyers to be reluctant to purchase new paper. Additionally, in some cases, rating agencies downgraded SIV debt ratings due to asset concerns. The impact of these events left the SIVs in illiquid positions, and, in certain cases, the SIVs defaulted on their short term debt, resulting in further reductions in the market values of the SIVs’ securities. In certain situations, market value decline became so significant that it potentially could have resulted in MMFs’ noncompliance with Rule 2a-7 with respect to certain portfolio securities. Such noncompliance would have required MMFs to convert the valuation methodology followed for such portfolio securities from amortized cost to fair value, which would have caused the net asset value (NAV) per share to fluctuate from $1.00 and most likely fall below $1.00. To prevent the NAV from falling below $1.00, certain sponsors or investment advisors of MMFs intervened and provided some level of financial support to MMFs. This support included, but was not necessarily limited to, capital contributions, guarantees of value of specific investment securities (which may be supported through letters of credit), guarantees of principal of the overall funds, and agreements to purchase troubled securities at a value different than current market value (typically at amortized cost). The prospectuses of MMFs typically indicate that the shareholders in the MMFs are subject to the risk of loss of principal, and the sponsors or advisors of the MMFs do not commit, by contract or otherwise, to financially support the MMFs prior to the occurrence of any valuation event. The decision to provide additional financial support is made on a case-by-case basis when a specific MMF encounters difficulty.

.30 As a result of the credit crisis, during the later part of 2007 and throughout 2008, the SEC’s Division of Investment Management staff received requests from MMF registrants for regulatory relief to the extent the MMFs’ sponsors or advisors were willing to enter into financial arrangements with MMFs that were encountering valuation difficulties. In response, the SEC’s Division of Investment Management staff issued several no-action letters. These no-action letters provided relief to certain MMFs and their sponsors or advisors for situations in which the sponsors or advisors, at no cost to the MMFs, agreed to provide support for the benefit of the MMFs. This relief occurred if specific MMFs’ securities or identified group of securities (“security subject to credit support agreement”) failed to pay principal or interest as due or to the extent the
MMFs would be forced to sell the securities at a value less than amortized cost. The SEC’s Division of Investment Management staff has required that credit support agreements, consistent with Rule 2a-7’s maturity and quality requirements, have a short lifespan and that the credit support agreement providers either have a high credit standing or obtain a letter of credit from a financial institution with a high credit rating.

.31 To the extent an MMF receives some type of support agreement similar to those previously described, the MMF should present securities that are not subject to the credit support agreement(s) (and otherwise comply with the Rule 2a-7 guidelines) at amortized cost. Because the credit support agreement is considered to be a derivative, both the credit support agreement and the securities covered by it should be presented at fair value within the financial statements. Registrants should indicate, within the schedule of investments, which securities are subject to the agreement and that such securities are being carried at fair value. The existence and value of the credit support agreement should be identified separately on both the schedule of investments and the statement of assets and liabilities. Registrants also should refer to the note explaining the agreement.

.32 For the MMFs that have credit support agreements, the SEC staff noted that the fair value of the credit support agreement should offset the decline in fair value of those securities covered by the credit support agreement to ensure the MMF’s shadow priced NAV does not fall below the minimum NAV specified in the credit support agreement. The SEC staff indicated that they would expect to see, in plain English, the following disclosures relating to credit support agreements:

- Date of the agreement
- Entities that are parties to the agreement (including clear identification of any affiliated parties)
- Objectives of the agreement
- Triggering events for payments stipulated in the agreement (for example, sale of the security or determination by a court that full repayment will not occur)
- Terms of “backstop” provisions (that is, provisions requiring, upon maturity of the agreement, that the MMF sell or otherwise dispose of the securities involved, triggering payment under the agreement)
- Specific securities subject to the credit support agreement and their fair value and amortized cost as of reporting date
- Date of termination of the credit support agreement
- Fair value of the credit support agreement at the reporting date
- Credit standing of the counterparty providing the credit support agreement (as noted, the expectation is that this counterparty will have high credit standing)
- Disclosure on the schedule of investments of which securities are carried at fair value (that is, not at amortized cost)
- Disclosure on the schedule of investments of nonincome producing securities and securities that made partial principal or interest payments
- Change in unrealized appreciation or depreciation for the securities subject to the credit support agreement (to be presented in the statement of operations)
- Change in unrealized appreciation or depreciation on the credit support agreement (to be presented as a separate line item on the statement of operations under the caption “change in unrealized appreciation (depreciation) from affiliates”)
- Realized gain or loss, if any, relating to the credit support agreement (to be presented separately on the statement of operations)
Payments received and credit enhancements provided through the credit support arrangements should be presented consistent with the guidance provided in chapter 7 of the 2008 AICPA Audit and Accounting Guide Investment Companies (2008 guide), including disclosure in the financial highlights of the effect on total return of the payment or credit enhancement.

The staff indicated that many of the disclosure requirements previously described were derived from FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, and FASB Statement No. 57, Related Party Disclosures. The staff also indicated that these disclosures should be placed in a separate, readily identifiable, easy-to-understand footnote to the financial statements and should not be placed within another note (such as a valuation policy or related party transactions note). MMFs should avoid copying language directly from the credit support agreement into the notes to the financial statements.

Finally, the staff described additional disclosures that should be considered when an MMF holds securities affected by the credit crisis, even if not covered by a support agreement, no defaults exist, and NAV is not dramatically impaired:

- Disclosures about credit quality required by FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments
- Disclosures relating to risk concentrations of investments in the real estate or affected financial services industries (or in SIVs), as described in FASB Statement No. 107 and Statement of Position (SOP) 94-6, Disclosure of Certain Significant Risks and Uncertainties (AICPA, Technical Practice Aids, ACC sec. 10,640)

For more information, please refer to the AICPA Investment Companies Expert Panel meeting highlights posted on the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco.htm.

Questions Relative to FASB Statement No. 157 and Form N-Q Disclosures

The staff has questioned instances when registered investment companies excluded disclosures required by FASB Statement No. 157 from their Form N-Q, “Quarterly Schedule of Portfolio Holdings of Registered Management Investment Company,” filings. The staff noted that it was appropriate to include all disclosures required by FASB Statement No. 157 that are applicable to interim reporting periods, including the required roll-forward of assets and liabilities valued using unobservable, level 3 inputs when a registered investment company engages in a significant number of transactions in items valued using level 3 inputs or holds a significant number of level 3-valued investments throughout the reporting period. The staff indicated that Form N-Q refers to Rule 12b-20, “Additional Information,” of the Securities and Exchange Act of 1934, which states that a registrant should include additional information to avoid making the schedule misleading.

Seed Financial Statements and Recoupment Plan

The staff noted that a closed-end fund recently restated its seed financial statements because it failed to record a liability to the adviser under a recoupment plan. The staff stated that the note disclosure accompanying the seed financial statements indicated that the adviser will recoup organization costs after a specified period of time. Unlike traditional recoupment plans in which uncertainty exists about whether a fund’s net assets will increase to a level that will permit repayment and not exceed a predefined expense cap, it was probable that the adviser would recoup fees from the fund after a specified period of time.

Business Development Company Accounting for Income Tax Expense

The SEC staff noted that a business development company (BDC) restated its financial statements for improper accounting for income tax expense. Although the BDC elected to qualify under Subchapter M of the IRC, the BDC accrued a deferred tax liability related to the unrealized appreciation of portfolio securities. The deferred tax liability had been recorded by the BDC due to its perceived uncertainty surrounding the
ability to maintain its qualification. Chapter 6 paragraph .04 of the 2008 guide states, “Income tax expense related to net investment income and net realized gains on investments should be recorded when it is probable that an investment company subject to Subchapter M of the IRC will not qualify under that subchapter. Management should consider the need for recording a deferred tax expense if management concludes it is probable that the investment company will not meet its qualification requirements for a period longer than one year.” The SEC staff questioned whether the BDC should have recorded a deferred tax liability given the BDC’s history of qualification under Subchapter M and its intent to continue to qualify under Subchapter M. The BDC ultimately concluded that the deferred tax liability was not appropriate and restated its financial statements to correct the error.

.40 The staff further noted an instance when one open-end fund chose not to comply with Subchapter M of the IRC and, therefore, elected to be taxed as a corporation. However, this registrant did not accrue any deferred tax liabilities on the net unrealized appreciation of portfolio securities, as required under FASB Statement No. 109, Accounting for Income Taxes. The registrant made a correction by recognizing the deferred tax liabilities, in accordance with FASB Statement No. 109.

SEC Developments

Results of SEC Study on Fair Value Accounting

.41 As described in the EESA discussion, the SEC was required to conduct a study on the impact of FASB Statement No. 157, which was released on December 30, 2008. This study helped the SEC determine whether to exercise their right to suspend FASB Statement No. 157, which they decided not to do. The study was focused on the impact of FASB Statement No. 157 on financial institutions’ balance sheets, bank failures in 2008, the quality of financial information available to investors, the process used by FASB in developing accounting standards, and alternative accounting standards to FASB Statement No. 157. As noted in the EESA section requiring this study, the EESA restated the SEC’s right to suspend the application of FASB Statement No. 157. Many constituents communicated with the SEC about this possible suspension, and these responses contained a wide range of opinions on the matter. Additionally, comment letters to the SEC also have been issued on the issuance of FASB Staff Position (FSP) FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active.

.42 The study does recommend improvements to existing practice, including reconsidering the accounting for impairments and the development of additional guidance for determining fair value of investments in inactive markets, including situations in which market prices are not readily available.

.43 The highlights of the report include the following six findings related to the key EESA-mandated topics and eight recommendations by the SEC staff:

- First, in regard to the effect of fair value accounting standards on financial institutions’ balance sheets, the SEC staff observed that fair value measurements were used to measure a minority of the assets and liabilities included in financial institutions’ balance sheets. However, these fair value measurements did significantly affect financial institutions’ reported income.
- Second, in regard to the impact of fair value accounting on bank failures in 2008, the SEC staff observed that fair value accounting did not appear to play a significant role.
- Third, in regard to the impact of fair value accounting on the quality of financial information available to investors, the SEC staff noted investors generally support measurements at fair value. However, many investors also indicated the need for improvements to existing fair value standards.
- Fourth, the report confirmed that FASB, as an independent accounting standard setter, is best positioned to develop neutral accounting guidance. However, steps could be taken to enhance the existing process in terms of timeliness and transparency.
- Fifth, the SEC staff found that suspending FASB Statement No. 157 would lead to a reversion of practice and would likely increase investor uncertainty. Nonetheless, the issuance of additional guidance is advised.
Lastly, the SEC staff provided recommendations on the advisability and feasibility of modifications to existing accounting standards and related financial report requirements.

The eight key recommendations from the report are as follows:

- FASB Statement No. 157 should be improved but not suspended.
- Existing fair value and mark-to-market requirements should not be suspended.
- Additional measures should be taken to improve the application and practice related to existing fair value requirements (particularly as they relate to both level 2 and level 3 estimates).
- Accounting for financial asset impairments should be readdressed.
- Further guidance should be implemented to foster the use of sound judgment.
- Accounting standards should continue to be established to meet the needs of investors.
- Formal measures to address the operation of existing accounting standards in practice should be established.
- Accounting for investments in financial assets should be simplified.

The changes in fair value accounting standards and the FASB standard setting process that could occur due to the results of this report will be seen in the coming months and years. For the full text of the SEC report, visit www.sec.gov/news/studies/2008/marktomarket123008.pdf.

Temporary Exemption for Liquidation of Certain MMFs

On November 20, 2008, the SEC issued an interim final temporary rule with a request for comment. The interim final temporary rule was adopted under the Investment Company Act of 1940 to provide relief for MMFs that are participating in the temporary guaranty program established by the U.S. Treasury. The rule is effective from November 26, 2008, until October 18, 2009, unless terminated at an earlier date, as announced in the Federal Register. Early termination would be in conjunction with the loan guarantee program. The comment period ended December 26, 2008.

For more information on this rule, visit www.sec.gov/rules/final/2008/ic-28487.pdf.

Mutual Funds Regulatory Filings Will Be Available Online

On October 29, 2008, the SEC announced that it has adopted rule revisions that require mutual funds and other companies seeking exemptions under the Investment Company Act of 1940 to submit to file their applications electronically. The rule revisions enable investors to access these filings sooner; allow the SEC to consider them more quickly; and eliminate unnecessary administrative tasks for applicants, including the requirement that certain documents be notarized and that applicants submit a draft notice along with an application.

The rule revisions are effective January 1, 2009, for new or amended applications for orders under the Investment Company Act of 1940. Electronic filing also will become mandatory for Regulation E filings of small business investment companies and BDCs. For more information on this ruling, SEC Release No. 33-8981, visit www.sec.gov/news/press/2008/2008-257.htm.

“Naked” Short Selling Antifraud Rule

In October 2008, the SEC issued a final rule (SEC Release No. 34-58774) adopting an antifraud rule under the Securities Exchange Act of 1934 to address fails to deliver securities that have been associated with “naked” short selling. The rule, which is effective October 17, 2008, will further evidence the liability of short sellers, including broker-dealers acting for their own accounts, who deceive specified persons about their intention or ability to deliver securities in time for settlement (including persons that deceive their
broker-dealer about their locate source or ownership of shares) and that fail to deliver securities by the settlement date. The final rule can be accessed at www.sec.gov/rules/final/2008/34-58774.pdf.

**Disclosure of Short Sales and Short Positions by Institutional Investment Managers**

.51 In October 2008, the SEC released an interim final temporary rule with a request for comments titled “Disclosure of Short Sales and Short Positions by Institutional Investment Managers.” The rule requires certain institutional investment managers to file information on Form SH, “Weekly Report of Short Sales and Short Positions,” concerning their short sales and positions of Section 13(f) securities, excluding options. The rule extends the reporting requirements established by SEC Emergency Orders issued September 18, 2008; September 21, 2008; and October 2, 2008, with some modifications. The effective date is from October 18, 2008, until August 1, 2009. For more information on this rule, visit www.sec.gov/rules/final/2008/34-58785.pdf.

**SEC Proposes Guidance Regarding the Duties and Responsibilities of Investment Company Boards of Directors With Respect to Investment Advisor Portfolio Trading Practices**

.52 On July 30, 2008, the SEC published for comment proposed guidance regarding the duties and responsibilities of investment company boards of directors with respect to investor advisor portfolio trading practices. The focus of the guidance is the role that an investment company board has in overseeing the execution of obligations by the investment advisor hired to invest in securities and other instruments on behalf of the investment company. Comments were due to the SEC by October 1, 2008. For more information, visit www.sec.gov/rules/proposed/2008/34-58264.pdf.

**Proposed Guidance to Fund Boards in Oversight of Investment Adviser Trading and Use of Soft Dollars**

.53 In a July 30, 2008, press release, the SEC proposed guidance to investment company boards of directors “about their investor protection responsibilities in overseeing investment advisers who trade fund portfolio securities and use so-called ‘soft dollars.’” The management of investment companies by investment advisers separate from the funds can present conflicts of interest between the fund and its investment adviser, which can lead to potential opportunities for abuse. These conflicts of interest include the use by advisers of soft dollars, which represent the assets of investors, to purchase research and other brokerage services as part of their obligation to seek best execution when it trades a fund’s securities.

Under the Investment Company Act of 1940 and state law, fund directors have important fiduciary responsibilities to oversee the safety of fund assets and the protection of investors. The SEC’s proposed guidance would help fund boards of directors to analyze whether to limit the adviser’s use of soft dollar arrangements.

“As the protectors of the interests of fund investors, fund boards play a pivotal role in monitoring the conflicts of interest that may arise when an investment adviser trades a fund’s portfolio securities,” said Andrew J. Donohue, Director of the SEC’s Division of Investment Management. “The importance of the board’s responsibilities in this area cannot be overstated. The [SEC’s] proposed guidance would provide directors a flexible framework to work within to ensure that conflicts are being managed and that fund assets are being used in the best interest of the fund and its shareholders.”

The SEC’s proposed guidance does not impose any new requirements on fund directors or investment advisers. Rather, it proposes a flexible framework for directors to use in their oversight of an adviser’s trading activities. Specifically, the guidance suggests information for a fund board to request from an investment adviser in order to determine whether the adviser is managing any conflicts and using fund assets in the best interests of the fund.

**SEC Actions to Rein in the Role of Ratings**

During June and July 2008, the SEC took three distinct actions relative to NRSROs. First, the SEC issued a proposed rule on June 16, 2008 (SEC Release No. 34-57967), to “impose additional requirements on NRSROs in order to address concerns about the integrity of their credit rating procedures and methodologies in the light of the role they played in determining credit ratings for securities collateralized by or linked to subprime residential mortgages.” Second, the SEC issued “a proposal related to structured finance products rating symbology.”

Finally, on July 1, 2008, the SEC issued a proposed rule (SEC Release No. 34-58070 and IC-28327) to amend various rules and forms under the Securities Exchange Act of 1934 that rely on NRSRO ratings. The proposed rule is designed to address concerns that the reference to NRSRO ratings in SEC rules and forms may have contributed to an undue reliance on NRSRO ratings by market participants. This proposal specifically addresses references to rating agencies in the following various rules under the Investment Company Act of 1940 and Investment Advisers Act of 1940:

- Rule 2a-7 is proposed to be significantly amended as follows:
  - The requirement that any security be in the two highest rating agency classifications in order to be deemed to have “minimal credit risk” to be eligible for acquisition by a money market fund is replaced by a determination by the fund’s board of directors of “minimal credit risk”; although credit ratings can be considered in the determination, the assessment must be made independently.
  - A requirement that an adviser promptly notify the board of any information suggesting that a security held by a money market fund may not continue to present “minimal credit risk” and that the board evaluate the continued holding of the security based on that notification, rather than predating the board evaluation on a rating agency downgrade as currently provided in Rule 2a-7.
  - An explicit regulation codifying the SEC staff’s position that a money market fund may not acquire illiquid securities if such acquisition would cause the fund’s illiquid holdings to exceed 10 percent of total assets. If changes in the liquidity status of individual securities or shareholder redemptions caused existing illiquid holdings to exceed the 10 percent level, the rule would require a money market fund to take steps to bring the aggregate amount of illiquid securities back within the 10 percent limitation as soon as reasonably practicable. However, this requirement generally would not force a money market fund to dispose of any portfolio security if such sale would cause the fund to suffer a loss.
  - A requirement that a money market fund promptly inform the SEC when an affiliate of the fund purchases a security that is no longer “eligible,” in accordance with Rule 17a-9, “Purchase of Certain Securities From a Money Market Fund by an Affiliate, or an Affiliate of an Affiliate,” under the Investment Company Act of 1940.

- Rule 3a-7, “Issuers of Asset-Backed Securities,” which is the exemptive rule for certain structured financings under the Investment Company Act of 1940, is proposed to be modified to remove references to ratings downgrades and change the safekeeping provisions.

- Rule 5b-3, “Acquisition of Repurchase Agreement or Refunded Security Treated as Acquisition of Underlying Securities,” of the Investment Company Act of 1940 is proposed to be modified to replace the requirement that repurchase agreements acquired by a fund as investments, if not collateralized by cash or government securities, be fully collateralized by securities rated in the highest rating category by a rating agency with a requirement that the fund’s board determine that the securities are sufficiently liquid that they can be sold at or near their carrying value within a
reasonably short period of time, are subject to minimal credit risk, and are issued by a person who has the highest capacity to meet the fund’s financial obligations.

- Rule 5b-3 also permits a fund to consider the purchase of “refunded” securities to be the acquisition of escrowed government securities for SEC diversification requirements if the securities satisfy certain conditions (for example, independent CPA certification to the escrow agent that the escrowed securities will satisfy all scheduled payments of principal, interest, and applicable premiums on the refunded securities). In the current rule, this certification condition is not required if the refunded security has received a debt rating in the highest rating category from an NRSRO. The proposed modification, however, would eliminate the exception to the certification requirement for securities that have received the highest rating from an NRSRO.

- Rule 10f-3, “Exemption for the Acquisition of Securities During the Existence of an Underwriting or Selling Syndicate,” of the Investment Company Act of 1940 is proposed to be modified to replace the provisions that permit the acquisition of municipal securities from an underwriting syndicate of which an affiliate of the fund is a member, if the security had received an investment grade rating from a rating agency, with a determination that the securities could be resold at or near their fair value within a short period of time and that they have no greater than moderate credit risk. This proposal, however, would place no greater responsibilities on a mutual fund board than it already has to review affiliated transactions under Rule 10f-3.

- Rule 206(3)-3T, “Temporary Rule Regarding Principal Trades with Certain Advisory Clients,” of the Investment Advisers Act of 1940, is proposed to be modified to replace the provisions, paralleling those of the aforementioned Rule 10f-3, that currently permit an adviser registered as a broker-dealer to trade with a client in a principal capacity for any nonconvertible fixed income security (not only municipal securities) rated “investment grade” by a rating agency.

.57 The comment period for this proposal ended September 5, 2008.

Revisions to Mutual Fund Disclosure

.58 In late July 2008, the SEC reopened the public comment period on a previously proposed rule regarding improved mutual fund disclosure (SEC Release No. 33-8949). In November 2007, the SEC proposed rule changes that would require that all mutual fund investors receive a clear, concise summary of key information needed to make an informed investment decision. The rule changes also would encourage funds to harness the power of the Internet to allow investors to choose the format in which they receive more detailed information and provide that information in a more user-friendly format than is available today. The proposed rules are intended to enable investors to use and compare mutual fund information more effectively.

.59 Summary Information at the Front of the Prospectus. The proposal would amend Form N-1A, the form used by mutual funds to register under the Investment Company Act of 1940 and offer securities under the Securities Act of 1933, by requiring every mutual fund to include key information in plain English in a standardized order at the front of the mutual fund statutory prospectus. Like the risk/return summary that is currently included at the front of every mutual fund prospectus, this summary would include a fund’s investment objectives and strategies, risks, performance, and costs. It also would include brief information regarding the top 10 portfolio holdings, investment advisers and portfolio managers, procedures related to the purchase and sale of the fund’s shares and tax information, and financial intermediary compensation. The proposed amendments would require that the summary information be presented separately for each fund covered by a multiple fund prospectus. This requirement is intended to assist investors in finding important information regarding the particular fund in which they are interested.

.60 New Prospectus Delivery Option for Mutual Fund Securities. The proposed rule would permit a person to satisfy the rule’s mutual fund prospectus delivery obligations under the securities laws by sending or giving key information to investors in the form of a “summary prospectus” and providing the summary prospectus, statutory prospectus, shareholder reports, and other information on a Web site in a format that enhances the investors’ ability to effectively use the more detailed information in those documents. In
addition, the statutory prospectus and other information would be provided in paper to any investor who prefers to review more detailed information in that format. The summary prospectus would contain the same information in the same order as the required summary at the front of the statutory prospectus.

The proposed rule would require that the Internet version of the summary prospectus and statutory prospectus be presented in a user-friendly format that permits investors, financial intermediaries, analysts, and other users to easily move back and forth between related information in the summary prospectus and the statutory prospectus. This is intended to allow investors and others to efficiently access the particular information in which they are interested. The proposed rule also would require that persons accessing the Internet information be able to permanently retain an electronic version of the summary prospectus, statutory prospectus, and other information. The proposal is intended to take advantage of technological developments and the expanded use of the Internet in order to provide investors with information that is easier to use and more readily accessible, but still retains the comprehensive quality of the information that is available to investors today.

The SEC reopened the public comment period, which ended August 29, 2008, on this proposal in order to allow comments based on the results of focus group testing and a telephone survey of investors. The full text of the proposed rule is available at www.sec.gov/rules/proposed/2008/33-8949.pdf.

On November 19, 2008, the SEC approved final rules effective February 28, 2009, which require funds to begin complying with the form changes by January 1, 2010. The full text of the final rules has not been issued as of the writing of this alert.

SEC Action to Facilitate Refinancing of Closed-End Auction-Rate Preferred Stock

On June 13, 2008, the SEC issued a no-action letter, and the IRS, in a parallel notice, provided regulatory relief to facilitate the refinancing of auction-rate preferred stock, which had been subject to the failure of the auction markets earlier in the year.

In the SEC no-action letter, an advisor of closed-end investment companies received regulatory relief from the SEC staff for a type of stock called liquidity protected preferred (LPP) shares, which, similar to auction-rate preferred stock, would have its dividend rate reset periodically in a remarketing process. However, unlike auction-rate preferred stock, LPP would be offered with the unconditional obligation of a liquidity provider, with a requisite minimum short term rating, to purchase any LPP subject to sell orders that had not been matched by purchase orders in a remarketing. Additionally, upon failed remarketing, additional terms would take effect, including escalating dividend rates; additional fees to the liquidity provider; and “puts” of the security to the issuing fund or, in the initial LPP offering, the advisor. In their response, the staff of the SEC’s Division of Investment Management agreed not to recommend enforcement action if SEC-registered MMFs purchased LPP, so long as the MMFs otherwise comply with the requirements of Rule 2a-7. The Division of Corporation Finance agreed not to recommend enforcement action if the closed-end funds, the liquidity provider, or any other person reacquired LPP without complying with the tender offer rules under the Securities Exchange Act of 1934. Further, the staff agreed that the liquidity and “put” features of the LPP would not cause the LPP to be classified as a “redeemable security” under Section 2(a)(32) of the Investment Company Act of 1940. The no-action letter is available on the “Investment Management” section of the SEC’s Web site at www.sec.gov/divisions/investment/noaction/2008/eatonvance061308.pdf.

The IRS, in Notice 2008-55, Auction Rate Preferred Stock—Effect of Liquidity Facilities on Equity Character, provided guidance on the effect of adding liquidity facilities to support certain auction-rate preferred stock. Explicitly stating that the notice provided “administrative relief in furtherance of public policy in light of significant liquidity needs in the auction rate securities market as a result of recent significant auction failures in this market,” the IRS noted that it would not challenge the equity characterization of certain auction-rate preferred stock issued by closed-end investment companies and supported by a liquidity facility under the following conditions:
• The preferred stock either must have been outstanding on February 12, 2008, the date on which significant auction failures first occurred, or issued after that date to either directly or indirectly refinance auction-rate preferred stock outstanding on that date. Further, the amount of preferred stock issued under a refinancing cannot exceed the previously outstanding preferred stock’s liquidation preference.

• The liquidity facility must either be an initial facility entered between February 12, 2008, and December 31, 2009, or a facility that replaces, renews, or extends such an initial facility. Additionally, the liquidity facility cannot be “related” to the adjustable-rate preferred issuer.

• The closed-end fund invests predominantly in debt instruments, and other investments are incidental to its business of investing in the debt instruments.

• Dividends paid must be declared and paid out of legally available funds, as provided under applicable state law.

• The obligation of the liquidity provider to repurchase preferred stock is triggered only if an auction or remarketing fails or if an existing liquidity facility is not renewed, replaced, or extended with the same or another provider by a date that occurs at least two auction or remarketing dates before the stated expiration date of the existing facility.

• The right of the liquidity provider to have the preferred stock redeemed cannot be exercisable until the preferred stock has been held by the liquidity provider for at least six months and good-faith efforts have been made to resell the shares in periodic auctions at a price equal to the liquidation preference plus accrued but unpaid dividends. Additionally, any redemption right must comply with any applicable state law restrictions on redemption of the shares.

.67 Finally, in October 2008, a closed-end investment company adviser and 5 funds managed by the adviser received an order of exemptive relief with the SEC under Section 6(c) of the Investment Company Act of 1940. The order permits the adviser, for a period of 2 years immediately following the date of the order, to issue a class of senior securities representing indebtedness and redeem its issued and outstanding auction rate preferred shares. The adviser also may declare dividends or other distributions on its capital stock. The issuance of the senior securities is subject to the 200 percent asset coverage rule. For more information, visit www.sec.gov/rules/ic/2008/ic-28464.pdf.

Interactive Data to Improve Financial Reporting

.68 In December 2008, the SEC voted to require public companies and mutual funds to use interactive data for financial information. Companies will provide their financial statements to the SEC and on their corporate Web sites in interactive data format using the eXtensible Business Reporting Language (XBRL). This will allow investors to use interactive data to receive important information in a fast, more reliable manner at a reduced cost. In the past, companies voluntarily filed SEC financial information in interactive data format.

.69 This approval requires that for public companies other than mutual funds, interactive data financial reporting will occur on a phased-in schedule beginning in 2009. In its December 18, 2008, press release, the SEC stated that the largest companies who file using U.S. GAAP with a public float above $5 billion (approximately 500 companies) will be required to provide interactive data reports starting with their first quarterly report for fiscal periods ending on or after June 15, 2009. The remaining companies who file using U.S. GAAP will be required to file with interactive data on a phased-in schedule over the next 2 years. Companies reporting in International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) will be required to provide their interactive data reports starting with fiscal years ending on or after June 15, 2011. Companies can adopt interactive data earlier than their required start date. All U.S. public companies will have filed interactive data financial information by December 2011 for use by investors.

.70 The SEC further noted in its press release that “[m]utual fund investors will begin reaping the benefits of interactive data starting in 2011. Mutual funds will be required to begin including data tags in their public
filings that supply investors with such information as objectives and strategies, risks, performance, and costs. A mutual fund also would be required to post the interactive data on its Web site, if it maintains one.”

.71 The full text of the SEC’s press release is available at www.sec.gov/news/press/2008/2008-300.htm. At the time of this writing, the final rule was not yet available. The proposed rules, on which the final rule is based, are available on the SEC’s Web site (SEC Release Nos. 33-8924 and 33-8929).

SEC Broadens Opportunities for Small Business Financing

.72 On May 15, 2008, the SEC broadened small business financing opportunities available to BDCs by amending Rule 2a-46, “Certain Issuers as Eligible Portfolio Companies,” under the Investment Company Act of 1940 to increase availability of capital to certain smaller companies that may not have access to public access markets or other forms of conventional financing.

.73 Rule 2a-46 was amended to expand the definition of eligible portfolio company to include any domestic operating company with securities listed on a national securities exchange if the company has a market capitalization of less than $250 million on any day in the 60-day period immediately before the BDC’s acquisition of its securities. The amendment is intended to improve opportunities for investors and small businesses and contribute directly to the nation’s capital markets.

.74 The amendment is effective July 21, 2008. The full text of the release concerning this rule amendment is available at www.sec.gov/rules/final/2008/ic-28266.pdf.

Disclosure of Divestment by Registered Investment Companies in Accordance With the Sudan Accountability and Divestment Act of 2007

.75 The SEC issued a final rule in April 2008 that would amend the forms used under the Securities Exchange Act of 1934 and the Investment Company Act of 1940. The final rule requires disclosure by a registered investment company that divests certain securities in accordance with the Sudan Accountability and Divestment Act of 2007 (SADA).

.76 The SEC final rule requires each registered investment company that divests securities in accordance with the SADA to disclose the divestment on the next Form N-CSR, “Certified Shareholder Report of Registered Management Investment Companies,” or Form N-SAR, “Semi-Annual Report for Registered Investment Companies,” that it files following the divestment. The SEC final rule states the disclosures include the following:

• The issuer’s name
• Exchange ticker symbol
• Committee on Uniform Securities Identification Procedures (CUSIP) number
• Total number of shares or, for debt securities, principal amount divested
• Date the securities were divested

.77 If the registered investment company continues to hold any securities of the divested issuers, it will be required to disclose the exchange ticker symbol; CUSIP number; and total number of shares or, for debt securities, principal amount of such securities, held on the date of the filing. For purposes of determining when a divestment should be reported, if a registered investment company divests its holdings in a particular security in a related series of transactions, the company may deem the divestment to occur at the time of the final transaction in the series. For more information, please visit www.sec.gov/rules/final/2008/34-57711.pdf.
No-Action Letter Related to Consolidation of a Nonregistered Investment Company Subsidiary

.78 In response to a request from the Fidelity Select Portfolio, the SEC staff indicated it would not recommend enforcement action to the SEC against Gold Portfolio, a series of Fidelity Select Portfolio, a registered investment company and business trust organized under the laws of the Commonwealth of Massachusetts, under Rule 6-03(c)(1), “Special Rules of General Application to Registered Investment Companies,” of Regulation S-X with respect to Gold Portfolio’s proposed consolidation of its financial statements with those of its wholly-owned subsidiary, Fidelity Select Gold Cayman Ltd., a Cayman Islands limited company (the subsidiary). Rule 6-03(c)(1) of Regulation S-X is interpreted to mean that a registered investment company may consolidate its financial statements only with a subsidiary that is another registered investment company. The no-action relief request stated that it would be appropriate to consolidate the financial statements of the subsidiary into Gold Portfolio because (1) it would give shareholders a more accurate picture of Gold Portfolio and its financial position, structure, and investment strategies and (2) would more fully reflect the fact that the sole purpose of the subsidiary is to serve as a vehicle through which Gold Portfolio gains exposure to particular commodities.

.79 The subsidiary was established as a nonregistered investment company in response to restrictions placed on registered investment companies to invest in commodities and commodity-linked investments. Section 851(b)(2) of the IRC states, in relevant part, that a corporation shall not be considered a regulated investment company for any taxable year unless, among other things, at least 90 percent of its gross income is derived from “dividends, interest, payments with respect to securities loans (as defined in section 512(a)(5)), and gains from the sale or other disposition of stock or securities (as defined in section 2(a)(36) of the Investment Company Act of 1940, as amended) or foreign currencies or other income (including but not limited to gains from options, futures, or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies” or from net income of certain publicly traded partnerships. In order to gain significant exposure to these instruments, Gold Portfolio obtained a ruling from the IRS that concluded that income arising from investments in certain foreign corporations (that is, corporations that are “controlled foreign corporations” for purposes of the IRC) that invest in commodities and commodities-linked investments constitutes qualifying income.

.80 The SEC staff noted Gold Portfolio formed the subsidiary, which is authorized to invest in commodities, commodities-linked instruments, and derivatives and commodity exchange-traded funds, with the purpose “to serve as a vehicle through which its corresponding Fidelity Fund may gain investment exposure to commodities in a manner consistent with the IRS Ruling. As a result of Gold Portfolio’s investment in Gold Subsidiary, Gold Portfolio could receive income derived from commodities, such as gold, to a greater extent than otherwise permitted by Subchapter M had Gold Portfolio invested in the commodities directly.” The request for no-action relief included a representation that Gold Portfolio would limit its investment in the subsidiary to 25 percent of Gold Portfolio’s assets at the end of each quarter and that the subsidiary would operate in many respects as an investment company, including accounting for the subsidiary’s holdings using the fair value basis of accounting.

.81 The SEC staff further noted that different facts or representations may require a different conclusion and that the no-action letter response expresses the position of the Division of Investment Management on enforcement only and does not purport to express any accounting or legal conclusions on the issues presented. The full text of the SEC no-action letter is available at www.sec.gov/divisions/investment/noaction/2008/fidelity042908.htm.

Commodity Futures Trading Commission Developments

.82 Investment companies that trade commodity futures or options on futures contracts are subject to the regulations of the Commodity Futures Trading Commission (CFTC). Those regulations impose certain financial reporting requirements, including, in some cases, requiring that an entity’s annual financial report be audited. The following section summarizes certain CFTC and other regulatory guidance issued or planned to be issued affecting 2008 financial statements. Any regulation changes will be published in the
Federal Register, and they, along with the following items, can be accessed electronically from the CFTC Web site at www.cftc.gov/.

CFTC Annual “Dear CPO” Letter

.83 On January 16, 2008, the CFTC staff issued its annual letter to commodity pool operators (CPOs) outlining key reporting issues and common reporting deficiencies found in annual financial reports for commodity pools. The CFTC anticipates issuing a similar letter in January 2009. The letter emphasized the CFTC staff’s concerns and, accordingly, may alert the auditor to high risk issues that could affect assertions contained in the financial statements of commodity pools. The CFTC staff suggested that CPOs share the letter with their independent auditors.

.84 The letter addresses the following concerns:

- Due dates of commodity pool financial filings for late filings
- Complex entities
- Requests for limited relief from U.S. GAAP compliance for certain offshore commodity pools
- Initial and final annual reports
- Other filings by CPOs regarding the following:
  - Replacement of an accountant
  - Election of fiscal year
  - Regulation 4.13 exemptions
- Accounting developments, including the following:
  - FASB Statement No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, implementation and its impact on participants’ redemptions
  - Alternative investments and audit considerations
  - AICPA technical guidance regarding offering costs
  - FASB Statement No. 157
- Recent regulatory development affecting CPOs

.86 The CFTC has issued similar letters in prior years, which are available on its Web site. According to the 2008 letter, those letters should be consulted with respect to commodity pool annual financial statements and reporting. Specifically relevant and still applicable information available in such prior letters includes the following:

- Reports for pools for the fiscal year in which an initial claim of exemption under Regulation 4.13 is filed (2006 CPO letter)
- Notice of replacement of accountant (2006 CPO letter)
- Notice regarding election of fiscal year other than calendar year (2006 CPO letter)
- Requests for confidential treatment of commodity pool annual reports (2006 CPO letter)
• AICPA SOP 95-2, Financial Reporting by Nonpublic Investment Partnerships (AICPA, Technical Practice Aids, ACC sec. 10,660), applicability to both required audited and unaudited commodity pool annual financial reports (2004 CPO letter)

.87 In addition, CFTC interpretations and other staff letters that provide written guidance concerning the Commodity Exchange Act and the CFTC’s regulations are available on the CFTC’s Web site. In particular, CFTC Interpretive Letter 94-3, Special Allocations of Investment Partnership Equity, addresses how a CPO should report a special allocation of partnership equity to the general partner or any other special class of participant of an investment partnership in the financial statements of a commodity pool.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.88 As previously discussed, we have experienced unprecedented events in the economy and financial markets in 2008 that will continue in 2009. These events undoubtedly will affect the audits you are performing. Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to economic conditions are as follows:

• Constraints on the availability of capital and credit
• Going concern and liquidity issues
• Marginally achieving explicitly stated strategic objectives
• Use of off-balance-sheet financings, special-purpose entities, and other complex financing arrangements
• Operations that are exposed to volatile markets or in regions with economic volatility, including employment and housing issues
• Volatile real estate markets and the credit crisis, which result in significant measurement uncertainty, including accounting estimates and fair value measurements

.89 Although many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

.90 Generally, many fixed income markets became extraordinarily illiquid in late 2008, resulting in a substantial increase in risk over the valuation assertion for virtually any kind of fixed income security of any duration. Also, concerns arose about the possibility of significant redemptions from various types of funds and reports of certain private funds either placing limits on redemptions, freezing the ability to redeem entirely, or determining to commence an orderly wind-down of operations. Thus, subsequent events, reporting considerations, and assessment of the going concern status of some investment companies take on added importance in the current environment as well. This section of the alert discusses a number of audit issues for you to consider in the current economic environment.

Investment Company Audit Risks Arising From Current Economic Conditions

.91 Auditors should consider the overall effect of risk on an entity’s portfolio of subprime mortgages and related investments (for example, asset-backed commercial paper or high-yield debt or loans). The auditor may consider the entity’s internal controls as well as policies that affect the management and monitoring of these investments. In particular, the auditor may consider the extent to which the entity analyzes the collateral supporting various asset-backed securities and whether the entity has enhanced its monitoring procedures in light of the deterioration in collateral that has been exhibited.
Auditors also should consider the increased difficulty of obtaining reliable valuations for certain types of asset-backed securities, given that the decrease in market liquidity experienced in 2007 and 2008 is likely to continue into 2009. Again, the auditor may consider the entity’s internal controls over valuation, in particular the extent to which the entity monitors valuations obtained from brokers and external pricing services for consistency with its own observations of market conditions. In addition, the auditor may consider the involvement of valuation committees or other internal review groups independent of portfolio managers in assessing the day-to-day reasonableness of security valuations and overriding quotations that appear to be unrepresentative. This is of equal importance for MMFs that are permitted to use the amortized cost valuation method only if the results are not materially different from those obtained by valuing securities using current market quotations.

To the extent either asset-backed or traditional fixed-income securities have experienced credit deterioration, the auditor may consider whether income that has been recognized as receivable on the securities remains collectible. The 2008 guide notes in chapter 2 paragraph .60, “In accordance with the guidance provided in FASB Statement No. 5, [Accounting for Contingencies], accrued interest should be written off when it becomes probable that the interest will not be collected and the amount of uncollectible interest can be reasonably estimated.” The 2008 guide also provides guidance on the accounting for expenditures made in support of defaulted debt securities. The disclosure requirements of FASB Statement No. 107 relating to concentrations of credit risk for all financial instruments also should be considered.

The auditor should consider the existence of financial covenants and the entity’s compliance with those covenants to the extent an investment vehicle has employed leverage. The auditor may obtain an understanding of management’s ongoing compliance monitoring process. If the vehicle is no longer in compliance with the covenants, the auditor should assess the appropriate accounting and reporting implications, including AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1). A more detailed discussion of going concern follows.

The advisers or other sponsors of a number of registered and unregistered MMFs have either purchased distressed securities directly from the funds at their amortized cost (above current market value) or have entered into “credit support agreements” to enable the funds to continue to engage in shareholder transactions at a constant $1.00 per share NAV. Preparers and auditors of investment company financial statements should review chapter 7 paragraphs .56–.58 of the 2008 guide for accounting and disclosure guidance for payments made to an investment fund by affiliates. Additionally, the staff of the SEC Division of Investment Management has indicated their views for appropriate accounting and disclosure by MMFs for credit support agreements provided by affiliates, which are summarized in the “Legislative and Regulatory Developments” section of this alert.

A number of closed-end investment companies that had issued auction-rate securities refinanced those securities during 2008. Preparers and auditors should consider the tax and regulatory guidance summarized in the “Legislative and Regulatory Developments” section of this alert in assessing various financial reporting and auditing considerations. If an investment company has not refinanced its auction-rate securities and auctions continue to fail through the audit date, preparers and auditors should consider not only the direct financial reporting implications of those failures but also the potential implications of continued failures on compliance with the terms of any rating agency requirements and the governing documents under which the auction-rate securities were issued.

Additionally, some investment companies may have acquired as investments (assets) the auction-rate securities of various noninvestment company corporate or municipal issuers. Because the only organized market for transferring the securities was the auction market, it has been extremely difficult to sell or transfer these securities to third parties in recent months. If those securities are not redeemed through refinancing, they may remain in investment company portfolios. Several media reports have indicated that securities, to the extent limited trading has occurred, have traded at potentially significant discounts from the values that would have been received if orderly auctions had continued.
In certain instances, the auditor may need special skills or knowledge to plan and perform auditing procedures for institutions that deal with subprime mortgage-backed and other asset-backed securities. AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1), states that “for some derivatives and securities, [GAAP] may prescribe presentation and disclosure requirements.” Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors also may consider using a specialist when determining how to audit an entity that deals in derivatives. AU section 336, Using the Work of a Specialist (AICPA, Professional Standards, vol. 1), provides guidance on the use of a specialist during an engagement and is discussed in more detail as follows.

Specific Issues as a Result of the Failure of Lehman Brothers

The failure of Lehman Brothers resulted in numerous issues relating to various contracts and deposits that were outstanding at the time of the failure. Auditors should consider the following issues:

- Cash on deposit with Lehman Brothers, certain receivables under derivatives contracts, and certain open securities purchases may not have been recoverable on a timely basis and may now represent claims on the bankruptcy estate of Lehman Brothers. The exact status of those claims may depend on the precise legal entity under which the balance was held or contract was placed. Careful analysis, including, as necessary, consultation with counsel, is required to assess the legal rights of the creditors of Lehman Brothers under the contracts and to estimate their fair value, which often may not be equivalent to their stated value.

- Preliminary contacts suggest that Lehman Brothers is unlikely to respond to requests to confirm, for audit purposes, balances and contracts outstanding and open (and thus subject to bankruptcy claims) as of the date of its bankruptcy. Because these claims in many cases may not be settled prior to an opinion date, auditors may be required to identify and perform alternative procedures to satisfy the existence assertion with respect to Lehman Brothers-related positions.

- As a result of the failure of Lehman Brothers, it was unable to return many securities it had borrowed under securities lending agreements. Accordingly, lenders took control of cash or marketable securities pledged as collateral and purchased identical securities in the market. Generally, for financial reporting purposes, securities lending transactions and actions taken upon default are addressed in FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125. For federal income tax purposes, the IRS issued Revenue Procedure 2008-63 on September 26, 2008, that provided for nonrecognition of gain or loss in a transaction in which a borrower defaults as a result of its bankruptcy and, as soon as commercially practicable but in no event more than 30 days from the default date, the lender applies collateral (or cash generated from sale of the collateral) to the purchase of identical securities.

Auditing Fair Value Measurements

It is management’s responsibility to determine and disclose an entity’s fair value measurements. When auditing these fair values to ensure conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, as previously mentioned.

The strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor also may identify possible indicators of impairment. According to paragraph .23 of AU
section 328, “substantive tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.”

.102 According to paragraph .48 of AU section 328, the auditor ordinarily should add language to the letter of representations from management regarding the reasonableness of significant underlying assumptions. When significant assumptions are used or they are highly subjective and the items being measured at fair value are material, the auditor should consider discussing these items with those charged with governance of the entity.

**Fair Values of Securities**

.103 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, some items are of interest for the auditor. As previously noted, quoted market prices in active markets are the best available audit evidence to support a fair value. However, when they are unavailable and the valuations of securities are obtained from a broker-dealer or another third party source based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances, such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157, quoted prices for identical instruments in active markets are considered level 1 inputs.

.104 When an entity performs its own valuation, testing procedures to be undertaken by the auditor include assessing the reasonableness and appropriateness of the model, estimating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether the inputs to the entities’ valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB Statement No. 157. When an auditor encounters complex or subjective matters that may require special skill or knowledge, the auditor may require using the work of a specialist, in accordance with AU section 336, Auditing Accounting Estimates (AICPA, Professional Standards, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also may be examined for existence, fair value, transferability, and the investor’s right to the collateral.

**PCAOB Staff Audit Practice Alert No. 2**

.105 In December 2007, the Public Company Accounting Oversight Board (PCAOB) issued Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. .02), that is intended to remind auditors of their responsibilities under existing PCAOB standards and is divided into four sections (auditing fair value measurements, classification within the FASB Statement No. 157 valuation hierarchy, using the work of specialists, and use of a pricing service), which are summarized as follows.

**Fair Value Measurements**

.106 The PCAOB Staff Audit Practice Alert No. 2 notes that the auditor should obtain an understanding of the company’s process for determining fair value measurements and disclosures, including relevant controls, and should, among other things,

- evaluate whether management’s assumptions are reasonable and either reflect, or are not inconsistent with, market information.
- consider the extent to which management’s reliance on historical financial information in the development of an assumption is justified.
• evaluate whether the company’s method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the company.

.107 The auditor also should consider the increased risk of management bias and material misstatement if valuation inputs are not observable.

**Classification Within the FASB Statement No. 157 Valuation Hierarchy**

.108 The PCAOB Staff Audit Practice Alert No. 2 notes that “because there are different consequences associated with each of the three levels of the hierarchy, the auditor should be alert for circumstances in which the company may have an incentive to inappropriately classify fair value measurements within the hierarchy.” As examples of incentives, it notes that lower-level classifications permit greater use of management judgment in valuation and that level 3 measurements require more extensive disclosures than other levels.

**Use of Specialists**

.109 The PCAOB Staff Audit Practice Alert No. 2 also reminds auditors that they should evaluate whether they have the necessary skill and knowledge to perform audit procedures related to fair value measurement, considering such factors as significant use of unobservable inputs, complexity of valuation techniques, and materiality of the measurements. It also reminds auditors of their responsibilities when using the work of a specialist, whether engaged by the issuer or auditor.

**Use of a Pricing Service**

.110 The PCAOB Staff Audit Practice Alert No. 2 states that, if a company uses a pricing service, the auditor should determine the nature of the information the pricing service provides (for example, quoted prices from an active market, observable inputs, or model-based measurements) and adjust audit procedures accordingly. If measurements are based on a model, the auditor should obtain an understanding of the model and evaluate the reasonableness of assumptions. It also reminds the auditor to consider whether the prices provided by the service meet the “principal market” or “most advantageous market” criteria of FASB Statement No. 157.

.111 The full text of the PCAOB Staff Audit Practice Alert No. 2 is available at www.pcaob.org/Standards/Staff_Questions_and_Answers/2007/12-10_APAPA_2.pdf.

**Using the Work of a Specialist**

.112 As the PCAOB Staff Audit Practice Alert No. 2 points out, it is important to consider if you require the work of a specialist. It may be necessary to use a specialist to assist in auditing complex or subjective matters during the audit. Examples of matters for which an auditor may engage a specialist are valuation issues; reasonableness determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336 provides guidance to auditors who are using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor’s firm participates in the audit, AU section 311, Planning and Supervision (AICPA, Professional Standards, vol. 1), is applicable rather than AU section 336.

.113 When using the work of a specialist, the auditor should evaluate the specialist’s professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the
specialist, and evaluate the specialist’s findings in the context of the audit and related assertions in the financial statements.

**Liquidity Considerations**

.114 The AICPA staff has issued Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), addressing the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle. The question and answer covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things, and can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

**Consideration of an Entity’s Ability to Continue as a Going Concern**

.115 The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards and is an especially important consideration in the current state of the residential market and the overall economy. It is important to note the time frame for this consideration is one year beyond the date of the financial statements. If the auditor believes there is a substantial doubt about the entity’s ability to continue as a going concern, the next steps are to obtain management’s plans to mitigate the effect of such conditions and then assess the likelihood these plans can be effectively implemented.

.116 If an auditor determines there is a substantial doubt about an entity’s ability to continue as a going concern, the auditor should communicate with those charged with governance of the entity, in accordance with AU section 341. AU section 341 provides guidance to an auditor with respect to evaluating whether there is substantial doubt about an entity’s ability to continue as a going concern and what the auditor should do when a going concern exists.

**Consideration of Fraud**

.117 Auditors should consider the pressures financial institutions are facing when planning and performing the audit engagement. Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Paragraph .32 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), explains that “[w]hen obtaining information about the entity and its environment, the auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud.” Paragraph .33 of AU section 316 lists “three conditions generally present when fraud exists: incentive [or] pressure to perpetrate fraud, an opportunity to carry out the fraud, and attitude [or] rationalization to justify the fraudulent action.”

.118 A recent fraud discussed in the news, which appears to have contained all 3 conditions for fraud to occur, has been that of Bernard L. Madoff Investment Securities. At the time of this writing, the owner of the investment firm, Bernard Madoff, has been charged with paying off earlier investors with money from new investors over an extended period of time. This is reportedly a classic example of a Ponzi scheme, which could no longer be sustained as markets began declining and many investors requested redemptions of their capital. The losses from this fraud are estimated to be approximately $50 billion (including apparently fictitious profits reported to investors). Although the details of this fraud are just beginning to be investigated, the reported circumstances are a clear reminder to auditors to maintain professional skepticism and be alert to potential fraud risk factors.

**Auditing Alternative Investments**

.119 The AICPA’s nonauthoritative practice aid Alternative Investments—Audit Considerations focuses on the existence and valuation assertions associated with alternative investments, but also discusses general
considerations pertaining to auditing alternative investments, management representations, disclosure of certain significant risks and uncertainties, and reporting. As defined in the foreword of the practice aid, alternative investments are “investments for which a readily determinable fair value does not exist ... [including] private investment funds meeting the definition of an investment company ... such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common [or] collective trust funds.” The full text of this practice aid can be found on the AICPA’s Web site at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

.120 The practice aid suggests that when the auditor determines the nature and extent of audit procedures, he or she should include verifying the existence of alternative investments. Confirming investments in aggregate does not constitute adequate audit evidence with respect to the existence assertion. Confirmation of existence of the holdings of the alternative investments on a security-by-security basis may constitute adequate audit evidence. Even if the fund manager confirms all requested information, the auditor may, based on his or her assessment of the risks of material misstatement, perform additional procedures, such as the following:

- Observing management site visits or telephone calls to investee funds (or reviewing documentation of such calls or visits)
- Reviewing executed partnership, trust, limited liability corporation, or similar agreements
- Inspecting other documentation supporting the investor’s interest in the fund (for example, correspondence from the fund or trustee acknowledging transactions with the fund)
- Reviewing periodic statements from the fund reflecting investment activity and comparing activity with amounts reported by the investor
- Vouching relevant cash receipts and disbursements

.121 Using one or more of the preceding approaches or another audit procedure in order to gather sufficient appropriate audit evidence with respect to the existence assertion requires considerable auditor judgment.

Auditing Considerations When Auditing Master-Feeder Funds

.122 Chapter 5 paragraphs .55–.87 of the 2008 guide describe several items that an auditor should consider when auditing feeder funds. The guide states master-feeder structures are capitalized by transferring the investments and related assets and liabilities of an existing fund to a newly organized master fund. In exchange for the assets transferred, the original fund becomes a feeder fund and receives a proportional ownership interest in the master fund. Chapter 5 paragraph .58 of the 2008 guide states that an auditor should consider the following when conducting an audit of master-feeder funds:

- “Fees and expenses incurred by the master fund or feeder funds are in accordance with contractual agreements as disclosed in the registration statement. Advisory and custodian fees are normally incurred only at the master fund; fees and expenses relating to distribution and shareholder servicing are normally incurred at the feeder level.
- Controls and procedures are adequate to ensure that investment valuation and related income components are allocated properly to feeder funds.
- Systems and controls are adequate to record accurately and timely the daily contributions and withdrawals between the feeder funds and the master fund. This is important to determine properly each feeder fund’s proportionate ownership interest for purposes of computing allocations. All [investor] purchases and redemptions are recorded at the feeder level. Assuming that cash is transferred on the same day, after the total daily net sales or redemptions are known for each feeder, contributions and withdrawals in the master fund are recorded to reflect changes in the feeders’ ownership interests (that is, a net redemption at the feeder level will result in a withdrawal from the master fund). All such transactions at the feeder level affect the investment in the master fund.
At the master fund level, the cash movements flow through the partnership equity or net assets account.

- Satisfaction has been obtained as to the accuracy of master fund tax adjustments allocated to the feeder funds.”

.123 It is important for auditors to note, as stated in chapter 5 paragraph .59 of the 2008 guide, that each feeder fund could have a different auditor who may also be different from the master-feeder fund auditor. It is also possible that the master-feeder fund and the feeder funds could have different year-ends. The following list highlights certain issues that may be of use to auditors of master-feeder funds:

- According to chapter 5 paragraph .60, each feeder fund auditor should discuss, with the master-feeder fund’s independent auditor, the most recent audit of the master-feeder fund.

- Chapter 5 paragraph .72 states that through discussions with feeder and master-feeder fund management and review of accounting records, the auditor should consider whether significant transactions of the master-feeder fund have been accounted for properly in the fund’s financial statements.

- The auditor also should consider requesting the master-feeder fund auditor to review or directly reviewing, the analysis and documentation with respect to the master-feeder fund’s investment restrictions compliance, as described in chapter 5 paragraph .74 of the 2008 guide.

.124 Chapter 5 paragraph .61 of the 2008 guide also states auditors “should inquire of feeder fund and master fund management as to any changes in fee structures, affiliated transactions, significant contingencies, results of regulatory reviews, or proposed transactions since the previous feeder fund and master fund audits.”

Illustrative Report on Internal Control Required by the SEC Under Form N-SAR

.125 In December 2007, the AICPA Investment Companies Expert Panel issued a revised version of the report on internal control issued in conjunction with an audit of financial statements of a registered investment company and filed on Form N-SAR, as required by the SEC. The revised version incorporates changes to the definitions of material weakness and deficiency, as described in PCAOB Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”). The revised illustrative report is featured in chapter 11 of the 2008 guide. It also is available at www.aicpa.org/download/members/Div/acctstd/ N-SAR_AS_5_revision_Dec_2007.pdf.

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

.126 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You also may look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+ Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.127 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You also may review Audit Risk Alert SEC AAM §8100.123 Copyright © 2009, American Institute of Certified Public Accountants, Inc.
and PCAOB Developments—2008 (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

Recent Auditing and Attestation Pronouncements and Related Guidance

| Interpretation No. 2, “Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board,” of AU section 534, Reporting on Financial Statements Prepared for Use in Other Countries (AICPA, Professional Standards, vol. 1, AU sec. 9534 par. .05–.08) | This interpretation of AU section 534 addresses the application of AU section 534 in reporting on financial statements prepared in conformity with IFRS. Issue Date: May 2008 (Interpretive publication) |
| Interpretation No. 3, “Financial Statements Audited in Accordance With International Standards on Auditing,” of AU section 534 (AICPA, Professional Standards, vol. 1, AU sec. 9534 par. .09–.11) | This interpretation of AU section 534 addresses the application of AU section 534 in audits of financial statements prepared for use outside the United States. Issue Date: May 2008 (Interpretive publication) |
| Statement of Position (SOP) 07-2, Attestation Engagements That Address Specified Compliance Control Objectives and Related Controls at Entities That Provide Services to Investment Companies, Investment Advisers, or Other Service Providers (AICPA, Technical Practice Aids, AUD sec. 14,430) | This statement addresses the application of SSAEs primarily to examination engagements in which a practitioner reports on the suitability of the design and operating effectiveness of a service provider’s controls in achieving specified compliance control objectives. Examples of the service providers addressed by this SOP are investment advisers, custodians, transfer agents, administrators, and principal underwriters who provide services to investment companies, investment advisers, or other service providers. Issue Date: October 2007 (Interpretive publication) |
| AICPA Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids) | This question and answer discusses auditing and accounting issues related to withdrawal restrictions placed on short term investments by a money market fund or its trustee. Issue Date: October 2008 (Nonauthoritative) |

(continued)
### Recent Auditing and Attestation Pronouncements and Related Guidance

| TIS sections 8200.05–.16 (AICPA, *Technical Practice Aids*) | These questions and answers in TIS section 8200, *Internal Control* (AICPA, *Technical Practice Aids*), were developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111. Some of the topics are as follows:
| Issue Date: April and May 2008 (Nonauthoritative) | • Consideration of internal controls that are less formal or not documented by the client
| | • Whether the auditor may suggest improvements to a client’s internal control
| | • Assessing inherent risk in relation to the consideration of control risk
| | • The frequency of walkthroughs that are used as the basis for the auditor’s understanding of internal control
| | • Considerations in obtaining an understanding of, evaluating, and documenting controls that the auditor believes are nonexistent or ineffective
| | • Assessing control risk at the maximum level
| | • Considerations for developing a substantive audit strategy
|
| TIS section 9120.08, “Part of an Audit Performed in Accordance With International Standards on Auditing” (AICPA, *Technical Practice Aids*) | This question and answer discusses the implications to the principal auditor’s report when part of an audit is conducted by other independent auditors in accordance with International Standards on Auditing or another country’s auditing standards.
| Issue Date: April 2008 (Nonauthoritative) | |
| TIS section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditor’s Report” (AICPA, *Technical Practice Aids*) | This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor’s report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor’s report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that it will sign the representation letter, without exception, on or before the date of the representations.
| Issue Date: May 2007 (Nonauthoritative) | |
| TIS section 8350.01, “Current Year Audit Documentation Contained in the Permanent File” (AICPA, *Technical Practice Aids*) | This question and answer discusses whether the provisions of AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), related to documentation completion and retention apply to current year audit documentation maintained in the permanent file. The question and answer indicates that AU section 339 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current year’s audit report.
| Issue Date: May 2007 (Nonauthoritative) | |

Recent Auditing and Attestation Pronouncements and Related Guidance

PCAOB Rule 3526, Communication with Audit Committees Concerning Independence (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)  
Issue Date: August 2008  
(Applicable to audits conducted in accordance with PCAOB standards)

Rule 3526 requires the registered public accounting firm to
• describe in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence.
• discuss with the audit committee of the issuer the potential effects of any relationships that could affect independence if they are appointed as the issuer’s auditor.
• document the substance of these discussions. These discussions should occur at least annually.

The board also adjusted the implementation schedule for PCAOB Rule 3523, Tax Services for Persons in Financial Reporting Oversight Roles (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), as it applies to tax services. The board agreed not to apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins. The amendments to Rule 3523 became effective August 28, 2008. The remaining provisions of Rule 3526 became effective on September 30, 2008.

PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)  
Issue Date: July 2007  
(Applicable to audits conducted in accordance with PCAOB standards)

This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client’s audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the Securities and Exchange Commission (SEC) or the PCAOB to describe in writing, to the audit committee, the scope of the proposed service; discuss with the audit committee the potential effects of the proposed service on the firm’s independence; and document the substance of the firm’s discussion with the audit committee. These requirements parallel the auditor’s responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524, Audit Committee Pre-approval of Certain Tax Services (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”). This rule is effective for audits of fiscal years ending on or after November 15, 2007.

PCAOB Conforming Amendments to the Interim Auditing Standards (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
Issue Date: September 2008  
(Applicable to audits conducted in accordance with PCAOB standards)

In conjunction with the PCAOB’s adoption of Auditing Standard No. 6, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in appendix 2 of PCAOB Release No. 2008-001 at www.pcaob.org/Rules/Docket_023/PCAOB_Release_No._2008-001_-_Evaluating_Consistency.pdf.  
These amendments became effective November 15, 2008.

Recent Auditing and Attestation Pronouncements and Related Guidance

PCAOB Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. .02)

Issue Date: December 2007
(Applicable to audits conducted in accordance with PCAOB standards)

This practice alert highlights certain requirements in the auditing standards related to fair value measurements and disclosures in the financial statements and certain aspects of generally accepted accounting principles that are particularly relevant to the current economic environment.

Accounting Issues and Developments

Investment Companies TPAs

.128 The AICPA has issued four TIS sections that cover a wide range of investment company related topics. The questions and answers can be found in TIS sections 6910.25–.28 (AICPA, Technical Practice Aids). The following are brief summaries of each TIS section:

- TIS section 6910.26, “Additional Guidance on Determinants of Net Versus Gross Presentation of Security Purchases and Sales/Maturities in the Statement of Cash Flows of a Nonregistered Investment Company,” explains the circumstances, if any, under which an entity may report purchases and sales or maturities in the operating section of the statement of cash flows of a nonregistered investment company on a net, rather than gross, basis.

- TIS section 6910.27, “Treatment of Deferred Fees,” provides guidance on appropriate financial reporting by an investment company if an investment advisor elects to defer payment of its management fee, incentive fee, or both based on the governing documents for offshore funds. TIS section 6910.27 also provides illustrative examples of deferred incentive fee presentation and related disclosures in the financial statements.

- TIS section 6910.28, “Reporting Financial Highlights, Net Asset Value (NAV) Per Share, Shares Outstanding, and Share Transactions When Investors in Unitized Nonregistered Funds Are Issued Individual Classes or Series of Shares,” explains how financial highlights (per share data, ratios, and total return) may be presented in financial statements when unitized funds issue separate series of shares to each individual investor in the fund. The question and answer also covers how each series of shares outstanding at period end and share transactions during the period may be disclosed in the financial statements.

.129 For the entire text of these TPAs visit www.aicpa.org/download/acctstd/TIS6910_25_28.pdf.
Fair Value Measurements

FASB Statement No. 157

.130 In September 2006, FASB issued Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

.131 Prior to this statement, the definitions of fair value differed and guidance for applying those definitions was dispersed among many accounting pronouncements. Differences in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

.132 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. In February 2008, FASB also issued FSP FAS 157-2, Effective Date of FASB Statement No. 157, which was effective upon issuance. The FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years, for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157.

.133 In October 2008, FASB issued FSP FAS 157-3, which clarifies FASB Statement No. 157’s application in an inactive market and also amends the standard to include an illustrative example.

Measurements of Fair Value in Illiquid Markets

.134 Given the state of the market, confusion exists around the use of “market” quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are in actuality distressed sales. On September 30, 2008, while FASB was going through its due process to issue interpretative guidance, the SEC issued a press release, SEC Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting (SEC and FASB press release) in an effort to assist preparers and auditors by providing immediate clarification. Ten days later, FASB issued FSP FAS 157-3. FSP FAS 157-3 also amends FASB Statement No. 157 to include an illustrative example, which is intended to provide a framework for assessing the appropriate fair value of a financial asset in an inactive market. FSP FAS 157-3 noted the consistency between the guidance provided in it and the guidance provided in the SEC and FASB press release.

.135 FSP FAS 157-3 noted the following:

Broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset. ... In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.

.136 Two other factors to consider when considering the reliability of a quote are whether it can be determined that market participants currently are transacting at that price and the appropriateness of the valuation technique employed by the pricing service to arrive at the quoted price.
As discussed in paragraph 7 of FASB Statement No. 157, “[a]n orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).” Low transaction volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. The market would still be considered active as long as the frequency and volume of transactions are sufficient to provide reliable pricing information. Additionally, the size of an entity’s position should not be a factor in this determination. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

If transaction volume is too low to provide accurate pricing information and therefore is not a level 1 input, those observable transactions are to be considered level 2 inputs or even level 3 inputs if they are significantly adjusted. In October 2007, the Center for Audit Quality (CAQ), which is affiliated with the AICPA, issued a white paper on the topic and noted that some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” In describing an inactive market as well, the SEC and FASB press release noted, “A significant increase in the spread between the amount sellers are ‘asking’ and the price that buyers are ‘bidding,’ or the presence of a relatively small number of ‘bidding’ parties, are indicators that should be considered in determining whether a market is inactive.”

The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “[I]n cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB press release noted that “in some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs it may be appropriate to utilize an estimate based primarily on unobservable inputs.” When significant adjustments are made to an observable input (level 2), it becomes a level 3 fair value measurement. The level of activity in the market in which transactions occur (that is, whether the market is active or inactive) is an indicator of the extent to which the entity will have relevant observable market data that will not require a significant adjustment in its determination of fair value.

Paragraph C85 of FASB Statement No. 157 states that “the reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transactions or assumptions that are reasonably available without undue cost and effort.

FSP FAS 157-3 concludes that “the use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted, “In some cases, multiple inputs from different sources may collectively provide the best evidence of fair value. In these cases expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.”

Readers are encouraged to review the full text of FSP FAS 157-3 and the amended standard (inclusive of its recently added illustrative example) on FASB’s Web site at www.fasb.org. FSP FAS 157-3 was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.
Valuation Resource Group

.143 FASB has established the Valuation Resource Group (VRG), which provides FASB staff with information on the existing implementation issues surrounding fair value measurements used for financial statement reporting purposes and the alternative viewpoints associated with those implementation issues. Any authoritative decisions are subject to FASB’s normal open due process. A summary of the VRG’s discussions is available on FASB’s Web site at http://72.3.243.42/project/valuation_resource_group.shtml.

.144 Although the VRG deliberations are not authoritative, one issue contained in this summary is of particular interest to investment companies and other enterprises that invest in investment companies, especially investment companies that do not have daily liquidity. In that issue, titled Issue 2007-10, “Use of Net Asset Value in Fund of Fund Investments,” the FASB staff observed that it would be inconsistent with FASB Statement No. 157 to presume that NAV automatically equals fair value. Further, the staff believes that FASB Statement No. 157 provides reasonable guidance on how to adjust NAV to fair value. Accordingly, the staff is of the view that this specific issue does not warrant any FASB action or further action from the staff at this time.

.145 In addition to the preceding issue, the AICPA Investment Companies Expert Panel also has discussed a number of FASB Statement No. 157 implementation issues, including the following:

- Valuation of in-kind distributions
- Fair value used for transfers in and out of level 3
- Application of FASB Statement No. 157 to newly launched funds
- Evaluation of significant events that occurred after hours but before the end of the fiscal year
- Transaction costs
- Use of broker quotes and pricing services

.146 Refer to the meeting highlights of the AICPA Investment Companies Expert Panel for further detail on these issues at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco_highlights.htm.

Valuation Considerations for Interests in Alternative Investments

.147 As discussed in a meeting of the FASB’s VRG, NAV of an investment in an alternative investment fund may not represent fair value under FASB Statement No. 157. Given the state of the economy, many funds are imposing limitations on redemptions and some are even unwinding. As this occurs, the fair value measurements applied to these investments will fall under increased scrutiny and become even more important.

.148 In January 2009, the Accounting Standards Executive Committee (AcSEC) of the AICPA issued a draft issues paper, FASB Statement No. 157 Valuation Considerations for Interests in Alternative Investments. The draft issues paper discusses how to estimate the fair value of alternative investments (such as interests in hedge funds, private equity funds, or real estate funds) in accordance with the provisions of FASB Statement No. 157. The draft issues paper also discusses the role of NAV in estimating fair value.

.149 AcSEC and the Alternative Investments Task Force, which developed this draft issues paper, are looking for informal feedback. Comments should be received by February 27, 2009. For more information, visit www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/AcSEC-Issues+Draft+Issues+Paper+on+Valuation+of+Interests+in+Alternative+Investments.htm.
FASB Statement No. 159

.150 Subsequent to the issuance of FASB Statement No. 157, FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115. This statement is expected to expand the use of fair value measurement, which is consistent with FASB’s long term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; once the election is made, it is irrevocable. This statement’s objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions. In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons among entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement Nos. 107 and 157.

.151 FASB Statement No. 159 is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to “be alert for circumstances in which an entity proposes to adopt FAS 159 in a manner that is contrary to the principles and objectives outlined in the standard.” The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf.

Disclosures About Derivative Instruments and Hedging Activities

.152 In March 2008, FASB issued FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133. The standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity’s financial position, financial performance, and cash flows.

.153 The standard improves transparency about the location and amounts of derivative instruments in an entity’s financial statements; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133; and how derivative instruments and related hedged items affect the entity’s financial position, financial performance, and cash flows.

.154 FASB Statement No. 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity’s liquidity by requiring disclosure of derivative features that are credit risk related. Finally, it requires cross referencing within footnotes to enable financial statement users to locate important information about derivative instruments.

.155 It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. FASB also has clarified, in FSP FAS 133-1 and FASB Interpretation (FIN) 45-4, Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161, the effectiveness provisions to include annual financial statements, including the final interim period of the year.

.156 In regards to registered investment companies, the staff of the SEC Division of Investment Management has stated informally at industry conferences that it would expect application of FASB Statement No. 161 to either annual or semiannual financial statements issued, which include a semiannual period (but not a quarterly period) beginning after November 15, 2008. Further, the staff indicated that it would expect the provisions of FASB Statement No. 161 to be applied to schedule of investments information.
appearing in Form N-Q for quarterly periods beginning after November 15, 2008, if inclusion of such disclosure would be material to a user’s understanding of the information otherwise required to be reported in the filing.

FSP FAS 140-3

.157 In February 2008, FASB issued FSP FAS 140-3, Accounting for Transfer of Financial Assets and Repurchase Financing Transactions, which was intended to address questions about the accounting for a repurchase agreement relating to a previously transferred financial asset. One question FSP FAS 140-3 specifically addresses is whether circumstances exist that would permit a transferor and transferee to evaluate the accounting for a transfer of a financial asset separately from a repurchase financing under FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125, when the counterparties to the two transactions are the same. FSP FAS 140-3 presumes that an initial transfer and repurchase financing are part of the same arrangement and provides certain criteria that, if met, allow the two transactions to be evaluated separately under FASB Statement No. 140. Among the criteria are the following:

- The two transactions have a valid and distinct business purpose for being entered into separately.
- The initial transfer and repurchase financing are not contractually contingent upon one another, and the pricing and performance of either transaction is not dependent on the terms and execution of the other.
- The repurchase financing provides the initial transferor with recourse to the initial transferee upon default, not solely to the market risk of the transferred asset.
- The financial asset subject to the transactions is readily obtainable in the marketplace, and the transactions are executed at market rates.
- The maturity of the repurchase financing must be before the maturity of the financial asset.

.158 FSP FAS 140-3 is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those years. Refer to the FASB Web site for the full text of FSP FAS 140-3.

Tax Exempt Debt

.159 In May 2008, the AICPA issued a nonauthoritative article, “Tax-Exempt Bonds—Accounting and Auditing Considerations in the Current Environment.” The focus of the article is on debt that is referred to as auction rate securities and variable rate demand obligations. The article provides issuers of tax-exempt debt and their auditors an overview of the accounting and auditing considerations that may be relevant in light of recent market events and entity transactions. Although the current environment presents accounting and auditing issues for investors in that tax-exempt debt, the article focuses on issues facing the issuers of that debt. The article can be accessed at www.aicpa.org/download/acctstd/ARS_article14.pdf.

Convergence With International Financial Reporting Standards

.160 Since the signing of the Norwalk Agreement by FASB and the IASB, the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and IFRS. A common set of high quality, globally accepted standards remains the long term strategic priority of both FASB and the IASB.

.161 FASB and the IASB have undertaken several joint projects that are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project, go to www.fasb.org and www.iasb.org.
SEC Eases Acceptance of IFRS Financial Statements

.162 On December 21, 2007, the SEC took a major step toward easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.163 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS, as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS because approximately 500 foreign private issuers are currently from Canada.

.164 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS “Roadmap”

.165 On November 14, 2008, the SEC released for public comment, in the format of a proposed rule, a roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC will make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

.166 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016. The 90 day comment period ends on February 19, 2009.

.167 The proposed roadmap sets forth seven milestones that will influence the SEC’s decision to adopt IFRS for all filers. These milestones relate to improvements in accounting standards, the accountability and funding of the International Accounting Standards Committee Foundation, the improvement in the ability to use interactive data for IFRS reporting, education and training relating to IFRS, limited early use of IFRS in cases in which it would enhance comparability for U.S. investors, the anticipated timing of future rulemaking by the SEC, and the implementation of the mandatory use of IFRS by U.S. issuers.

.168 Additionally, the roadmap discusses two alternatives for U.S. issuers that elect to use IFRS to disclose U.S. GAAP information. Proposal A suggests that a U.S. issuer that elects to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS called for under IFRS 1, First-Time Adoption of International Financial Reporting Standards, in a footnote to its audited financial statements. This information would include the restatement of, and reconciliation from, prior year’s financial statements and the related disclosures.

.169 Proposal B suggests that U.S. issuers that elect to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS required under IFRS 1 and also would disclose on an annual basis certain unaudited supplemental U.S. GAAP financial information covering a three year period.
This unaudited supplemental financial information would be in the form of a reconciliation from IFRS to U.S. GAAP.

.170 The roadmap does not address how the SEC would mandate IFRS; however, it noted an option would be “for the FASB to continue to be the designated standard setter for purposes of establishing the financial reporting standards in issuer filings with the Commission. In this option our presumption would be that the FASB would incorporate all provisions under IFRS, and all future changes to IFRS, directly into GAAP as used in the United States. This type of approach has been adopted by a significant number of other jurisdictions when they adopted IFRS as the basis of financial reporting in their capital markets.”

.171 Readers of this alert should note that the proposed roadmap excludes from its scope issuers that are investment companies under the Investment Company Act of 1940 and specifically excludes investment companies from the proposed definition of the IFRS issuer.

AICPA Launches IFRS.com Web Site

.173 The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define the next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

.174 To assist in both awareness building and education, the AICPA launched a new Web site, www.i-frs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

.175 Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, www.ifrs.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

.176 The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, continuing professional education (CPE) courses and live conference training, helpful links, and assistance for audit committee members.

FASB Accounting Standards Codification™

.177 On January 15, 2008, FASB launched the verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.178 The purpose of FASB ASC is not to change GAAP but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the extended verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting
standards, other than guidance issued by the SEC. On July 1, 2009, FASB will supersede all then-existing
non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature
not included in the codification will become nonauthoritative. FASB ASC can be accessed at http://
asc.fasb.org/home. FASB ASC includes an industry section for investment companies.

.179 Constituents are encouraged to use FASB’s online FASB ASC Research System free of charge during
the verification period and provide feedback to FASB on the codification.

.180 The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008
(product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of
FASB ASC and outline its structure, as well as provide case studies on navigating the FASB ASC Research
System and performing accounting research.

Summary of Recent Accounting Pronouncements and Related Guidance

.181 Presented in the following table is a list of recently issued accounting pronouncements and related
guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008
(product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of
specific significance to the industry are summarized herein. For information on accounting standards issued
subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB
Web site at www.fasb.org. You also may look for announcements of newly issued standards in the CPA Letter
and Journal of Accountancy.

## Recent Accounting Pronouncements and Related Guidance

<table>
<thead>
<tr>
<th>Statement</th>
<th>Description</th>
</tr>
</thead>
</table>
| **FASB Interpretation No. (FIN) 48** (June 2006) | Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109  
FASB Staff Position (FSP) FIN 48-2, Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises, issued in February 2008, defers the effective date of FIN 48 for certain nonpublic enterprises, as defined in the FSP, to the annual financial statements for fiscal years beginning after December 15, 2007.  
(On December 17, 2008, FASB approved the issuance of an FSP further deferring the effective date of FIN 48 for certain nonpublic enterprises for an additional year. The text of the final FSP is not available as of the writing of this alert.) |
| **FASB Staff Positions (FSPs)** (Various dates) | Go to www.fasb.org/fasb_staff_positions/ for a complete list of FSPs. |
| **AICPA Statement of Position (SOP) 07-1** (AICPA, Technical Practice Aids, ACC sec. 10,930) | Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies  
In February 2008, FASB issued FSP SOP 07-1-1, Effective Date of AICPA Statement of Position 07-1, which indefinitely defers the effective date of SOP 07-1. Entities that early adopted SOP 07-1 before December 15, 2007, are permitted, but not required, to continue to apply the provisions of the SOP. No other entities may adopt the provision of the SOP, subject to the exception in the following sentence: “If a parent entity that early adopted the SOP chooses not to rescind its early adoption, an entity consolidated by the parent entity that is formed or acquired after that parent entity’s adoption of the SOP must apply the provisions of the SOP in its standalone financial statements.” |
| **TIS section 6300.36** (AICPA, Technical Practice Aids) (Nonauthoritative) | This question and answer discusses when an insurance company may change its original policyholder benefit liability assumptions. |
| **TIS section 9150.25** (AICPA, Technical Practice Aids) (Nonauthoritative) | This question and answer discusses considerations when an accountant’s work efforts results in or contributes to the existence of financial statements. |
| **TIS section 1100.15** (AICPA, Technical Practice Aids) (Nonauthoritative) | This question and answer discusses auditing and accounting issues related to withdrawal restrictions placed on short term investments by a money market fund or its trustee. |
| **TIS sections 6910.25–.28** (AICPA, Technical Practice Aids) (Nonauthoritative) | These questions and answers discuss financial statement presentation considerations for investment companies. |

.182 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the investment companies industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The Comprehensive Audit Risk Alert—2008 (product no. 022339kk) and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed in this alert. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

Recent AICPA Independence and Ethics Pronouncements

.183 The Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

AICPA Interpretation No. 501-8

.184 Specifically, auditors should be aware of Interpretation No. 501-8, “Failure to Follow Requirements of Governmental Bodies, Commissions, or Other Regulatory Agencies on Indemnification and Limitation of Liability Provisions in Connection With Audit and Other Attest Services,” under Rule 501, Acts Discreditable (AICPA, Professional Standards, ET sec. 501 par. .09), which was adopted May 2008. This interpretation became effective July 31, 2008. The full text of the interpretation is available at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Exposure+Drafts++Standard+Setting/.

On the Horizon

.185 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the investment companies industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.186 The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed in this alert. Readers should refer to information provided by the various standard-setting bodies for further information.
Auditing Pipeline—Nonissuers

ASB Clarity Project

.187 In response to growing concerns about the complexity of standards, the Auditing Standards Board (ASB) has commenced a large-scale “clarity” project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards) to apply the clarity drafting conventions and converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board (IAASB). The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made and will be amended, if necessary. See the “Clarity Project Explanatory Memorandum” and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Auditing+Standards+-+Clarity+of+ASB+Standards.htm.

Auditing Pipeline—Issuers

.188 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance”. For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk). In addition, we would like to alert you to two PCAOB projects.

.189 In October 2008, the PCAOB proposed seven new auditing standards, which will be available for comment through February 18, 2009, to update and supersede the current risk assessment standards. The PCAOB chairman noted the proposals demonstrate the view that the risk of fraud is a central part of the audit process and not a separate consideration. The proposed standards integrate the risk assessment standards with the standard for the audit of internal control over financial reporting. Many of the IAASB’s risk assessment standards were utilized in creating these proposed standards, and efforts were made to reduce any unnecessary differences. These proposed standards each have a statement of objective for the auditor, which is loosely adapted from the international auditing standards. This is an example of the move in the United States from rules-based to principles-based accounting and auditing standards because these objectives do not state required outcomes. The seven proposed standards are as follows:
Additionally, in February 2008, the PCAOB proposed a new auditing standard on engagement quality review and a conforming amendment to its interim quality control requirements. The proposed standard is risk based and designed to increase the likelihood that engagement deficiencies will be identified and corrected prior to the issuance of the auditor’s report. The proposed standard provides a firmer framework for an engagement quality reviewer to objectively evaluate the significant judgments made by the engagement team and the conclusions reached in forming the overall conclusion on the engagement and preparing the engagement report. The comment period ended May 12, 2008.

These proposed standards can be accessed at www.pcaobus.org/Standards/Proposed_Standards_and_Related_Rules.aspx. Auditors should be alert to further developments, including the issuance of any final standards.

**Accounting Pipeline**

A number of accounting projects and pronouncements are currently in progress. For a summary of significant accounting projects and pronouncements, refer to the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in-progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Transfers of financial assets project and amendments to FIN 46 (revised December 2003), Consolidation of Variable Interest Entities—an interpretation of ARB No. 51, exposure drafts, together with an interim FSP to enhance related disclosures (final FSP FAS 140-4 and FIN 46(R)-8, Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities, issued December 11, 2008)
- Going concern and subsequent events exposure drafts, issued as part of FASB ASC
- Phase 2 of the fair value project
- Earnings per share convergence project
- Income tax convergence project
- Leases project
- Reporting discontinued operations project

**Proposed FASB EITF Issues and Staff Positions**

Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FSPs. A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information. Some proposed FSPs of particular interest to the investment companies industry include the following:
Proposed FSP ARB 43-a, Amendment of the Inventory Provisions of Chapter 4 of ARB No. 43
Proposed FSP FAS 157-c, Measuring Liabilities under FASB Statement No. 157
Proposed FSP FAS 107-a, Disclosures about Certain Financial Assets: An Amendment of FASB Statement No. 107
Proposed FSP FAS 141(R)-a, Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies

Resource Central

The following are various resources that practitioners engaged in the investment companies industry may find beneficial.

Publications

Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM:

- Audit and Accounting Guide Investment Companies (2008) (product no. 012628kk [paperback], WIN-XXkk [online with the associated Audit Risk Alert], or DIN-XXkk [CD-ROM with the associated Audit Risk Alert])
- Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])
- Audit Guide Assessing and Responding to Audit Risk In a Financial Statement Audit (2006) (product no. 012456kk [paperback] or WRA-XXkk [online])
- Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (2008) (product no. 012528kk [paperback], WDI-XXkk [online], or DDI-XXkk [CD-ROM])
- Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XXkk [online], or DAS-XXkk [CD-ROM])
- Audit Guide Service Organizations: Applying SAS No. 70, as Amended (2008) (product no. 012778kk [paperback], WSV-XXkk [online], or DSV-XXkk [CD-ROM])
- Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])
- Audit Risk Alert Compilation and Review Developments—2008 (product no. 022309kk [paperback], WCR-XXkk [online], or DCR-XXkk [CD-ROM])
- Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])
- Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk [paperback])
- Audit Risk Alert Understanding the New Auditing Standards Related to Risk Assessment (product no. 022526kk [paperback])
- Checklists and Illustrative Financial Statements for Investment Companies (product no. 008949kk [paperback] or WIS-CLkk [online])
- Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])
- Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XXkk [online])
Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

- Financial Reporting Alert *Current Accounting Issues and Risks—2008* (product no. 029208kk [paperback])
- Financial Reporting Alert *FASB Codification Developments—2008* (product no. 029209kk [paperback])

AICPA reSOURCE: Accounting and Auditing Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)* (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- *SEC Reporting* (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements and gives you examples and tips for ensuring compliance.
- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.
- *The International Financial Reporting Standards: An Overview* (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics.

To register or learn more, visit www.cpa2biz.com.

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.
CFO Quarterly Roundtable Series

.204 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.205 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

IFRS Quarterly Webcast Series

.206 The IFRS Quarterly Webcast Series, brought to you each calendar quarter, is part of a multistep educational process to get practitioners, financial managers, and auditors up to speed on all aspects of IFRS implementation. Over the course of the quarterly series, IFRS standards will be covered in depth. International harmonization is quickly approaching, and this series will help both accountants and auditors stay abreast of the developments and changes they will need to implement.

Member Service Center

.207 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.208 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours have been extended so that the hotline is now available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.209 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conference

.210 The AICPA sponsors an annual National Conference on the Securities Industry in the fall or winter. The National Conference on the Securities Industry is a two day conference designed to update attendees on recent developments related to the securities industry. Cosponsored by the AICPA and the Financial Management Division of the Securities Industry and Financial Markets Association, it’s the most comprehensive update in accounting, tax, and regulatory matters delivered by key individuals and regulators of
the SEC, the Financial Industry Regulatory Authority, and FASB. This conference is an ideal opportunity to engage in questions and answers with leading industry experts and offers a powerful way to network with peers, speakers, and officials from government agencies. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

The CAQ

.211 The CAQ was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.212 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit, or are interested in auditing, public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Investment Companies

.213 For information about the activities of the AICPA Investment Companies Industry Expert Panel, visit the panel’s Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_investco.htm.

Industry Web Sites

.214 The Internet covers a vast amount of information that may be valuable to auditors of investment companies entities, including current industry trends and developments. Some of the more relevant sites for auditors with investment companies clients include those shown in the following table:

<table>
<thead>
<tr>
<th>Organization</th>

Securities Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of brokers and dealers in securities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. Because securities brokers and dealers often deal in commodity futures or function as commodity pool operators, this Audit Risk Alert expands the discussion of recent developments to include matters that may affect audits of commodity entities as well.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Susan M. Reed, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication: Anthony Anzevino, Ronald Carletta, Al Goll, Dipti Gulati, G. Victor Johnson, Andrew Labadie, Anthony Lucarelli, and Paul Nockels.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your securities industry audits. This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.
Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

The securities industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.

Unprecedented Events in the Financial Markets

During 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, acquisitions of several investment and commercial banks (including some that required...
assistance from federal agencies), and the placement into conservatorship of Fannie Mae and Freddie Mac. Further, several foreign financial institutions received assistance from their national governments, or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant, publicly registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short-term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened. Corporations and financial institutions generally recognized as creditworthy began experiencing difficulty borrowing money in the financial markets for any period of time longer than an overnight basis.

Development of New Alert to Address Current Market Conditions

.10 In light of the economic situation, the AICPA has developed a dedicated alert to address common accounting and auditing concerns relative to current market conditions. The alert, Current Economic Crisis: Accounting and Auditing Considerations—2009, discusses a number of relevant topics and includes resources to assist in fair value accounting and its associated audit risks. Please visit www.cpa2biz.com for upcoming AICPA products, including the alert mentioned here, to help navigate this trying time.

Basic Measures of Economic Activity—Gross Domestic Product, Unemployment, and Interest Rates

.11 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 third quarter final estimates, real GDP decreased at an annual rate of 0.5 percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

.12 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate rose dramatically. As of December 2008, the unemployment rate reached its highest level in 2008 at 7.2 percent, representing approximately 11.1 million people.

.13 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates more than 5.0 percentage points to less than 0.25 percent as of mid-December 2008. The Federal Reserve noted in its December press release that since October 2008, labor market conditions have deteriorated and the available data indicate that consumer spending, business investment, and industrial production have declined. Financial markets remain quite strained and credit conditions tight. Overall, the outlook for economic activity has weakened further. Inflationary pressures have diminished appreciably and are expected to continue to moderate. The Federal Open Market Committee anticipates that weak economic conditions are likely to warrant exceptionally low levels of the federal funds rate for some time.

.15 The EESA is intended to restore financial sector liquidity and stability, protect the value of taxpayer assets (such as homes, savings, and retirement funds), and provide a return to taxpayers. The EESA authorizes the Treasury secretary to establish the Troubled Assets Relief Program (TARP), whereby the U.S. Treasury can purchase troubled assets from financial institutions, and authorizes $700 billion as requested by the Treasury secretary for the implementation of TARP. Upon authorization of TARP, up to $350 billion became available for immediate use. The secretary is required to examine the long-term viability of an
institution in determining whether to directly purchase assets under TARP. Financial institutions participating in TARP will be subject to certain restrictions on executive compensation.

.16 The injection of capital into banks was announced on October 14, 2008, and was named the Capital Purchase Program (CPP). Under the CPP, the Treasury proposed to invest up to $250 billion in senior perpetual preferred stock and warrants in qualifying financial institutions. In November 2008, the Treasury completed its $125 billion aggregate investment in the nine banking organizations deemed to be systemically important. Funds received from the CPP will be includible in an institution’s tier one capital without limitation. Other institutions were required to apply by November 14, 2008, to their appropriate federal banking agency for participation in the program. The deadline for nonpublic stock institutions and mutual banks has been extended as the Treasury develops term sheets applicable to these institutions.

.17 In summary, the primary components of the EESA include (a) an allocation of $700 billion to stabilize the U.S. financial system; (b) creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that participate; (c) increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion; (d) temporary increase of Federal Deposit Insurance Corporation (FDIC) insurance limits; (e) creation of a tax modification for Fannie Mae and Freddie Mac stock losses; (f) restatement of the Security and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements; and (g) the requirement of the SEC to conduct a study on the impact and effects of FASB Statement No. 157.

.18 For additional information on the EESA and its related programs, see http://treasury.gov/initiatives/eesa/. On that Web site, you may also sign up for EESA e-mail alerts to receive notification about current developments.

Industry Trends and Conditions

Continuing Market Stress

.19 As mentioned previously, recent conditions in the financial markets have sent shockwaves through the industry, the country, and global markets. In October, 2008, the U.S. and certain overseas trading markets experienced several record one-day percentage increases and decreases. At the time of this writing the markets continue to be extremely volatile. The financial market turmoil, credit crisis, and resultant federal bailouts are daily headlines as the U.S. government attempts to stabilize the economic situation.

.20 During 2008, fixed-income markets continued under severe stress (beginning with effects of subprime mortgage-backed securities and extending to asset-backed commercial paper) to the extent that they began to place significant stress on financial markets in general. A number of major financial institutions significantly exposed to distressed sectors of the markets were hard-hit, most dramatically demonstrated by the absorption of Bear Stearns Companies by JPMorgan Chase & Co., additional support provided by the federal government to Fannie Mae and Freddie Mac, and the failure of Lehman Brothers and AIG.

.21 Of further importance to the markets, the credit ratings of major “monoline” bond insurers, including MBIA Inc. and Ambac Financial Group, Inc., were downgraded by the major rating agencies from their previous AAA levels, due to significant exposure to losses from insurance written on asset-backed securities. Certain less significant insurers experienced rating declines to “below-investment-grade” (or “junk”) status. This, in turn, resulted in the extension of market illiquidity to municipal and other corporate securities, for which bond insurance plays an integral role.

.22 Because of the losses and capital reductions incurred by market-makers in auction-rate debt and preferred stock, and, to a lesser extent, questions about the financial strength of bond insurers who supported the credit of certain auction-rate security issuers, numerous auctions failed beginning in February 2008. These markets continue to struggle as of the writing of this alert. As a result, some municipal bond
issuers paid unusually high interest rates as required by their bond indentures in the event of failed auctions.

.23 This distress also found its way into the broader corporate loan and bond markets, with financial institutions reducing funds available for lending and tightening lending standards. At times this resulted in the withdrawal of commitments to provide loans intended for corporate acquisitions and refinancings. Further, defaults among bond issuers have generally increased. Standard & Poor’s (S&P) reported that, through November 11, 2008, 85 companies worldwide defaulted on their debt affecting a total of $284 billion. This is a significant increase from the previous two years (22 defaults in 2007 and 30 in 2006). Of the 85 companies, 70 are based in the United States.

.24 Finally, significant questions arose regarding the procedures used by bond rating agencies to evaluate asset-backed securities, in particular “AAA” ratings granted to securities, including securities acquired by SEC-registered money market funds, that later experienced significant credit-related deterioration. As a result, the SEC has reconsidered the inclusion of specific references to ratings by nationally-recognized statistical rating organizations in its rules and forms out of concern that doing so (as stated in SEC communications) “has, in effect, placed an ‘official seal of approval’ on ratings that could adversely affect the quality of due diligence and investment analysis,” and proposed a number of amendments to “reduce undue reliance on credit ratings and result in improvement in the analysis that underlies investment decisions.”

.25 Variations of the financial market turmoil in the United States are being felt in countries around the world. Global markets have experienced similar challenges and conditions as those found in this country, which have highlighted how interdependent the global economy is.

.26 These times present unprecedented challenges for auditors and the companies they audit. The issues and “happenings” change almost daily at this point. Therefore, this section of the alert will focus primarily on actions that can be taken in response to the general situation. Overall, the turmoil in the financial markets and the economy in general warrant increased scrutiny by the auditor to ensure that he or she understands the many issues that could impact the entity under audit. Specific audit considerations are discussed in the “Audit and Attestation Issues and Developments” section of this alert.

The Securities Industry

.27 Record high levels were reached during 2007 in both the Dow Jones Industrial Average (DJIA) and the Standard & Poor’s 500 Index (S&P 500). On October 9, 2007 the DJIA hit a record high level, closing at 14,164.53. Also on that date, the S&P 500 closed at an all time high of 1,565.01.

.28 During the later part of 2007, the DJIA fluctuated somewhat but closed out 2007 at 13,264.82. The first two quarters of 2008 saw the DJIA fluctuating between approximately 11,000 and 13,197.43 (the high for 2008 that was reached on January 3, 2008). The first quarter of 2008 closed at 12,262.89, and the second quarter of 2008 closed at 11,350.01. During September 2008 the DJIA dropped, with an all time record loss of 777.68 points occurring on September 29, 2008. On that date the DJIA closed at 10,365.45. The third quarter closed at 10,850.66 on September 30, 2008.

.29 Between September 29, 2008, and the end of the year, the DJIA fluctuated significantly, with the result being a significant decrease. Record percentage losses and gains occurred during that time period. On October 13, 2008, the largest point gain in history occurred when the DJIA increased by 936.42 points, closing at 9,387.61. Then, on October 15, 2008, a record percentage loss occurred with the DJIA decreasing 7.87 percent, closing at 8,577.91. A low point was reached for the year on November 21, 2008, with the DJIA closing at 7,392.27. The DJIA closed out 2008 at 8,776.39.

.30 The NASDAQ, Inc. (NASDAQ) started out 2008 at 2,652.28 and ended 2008 at 1,577.03. The high for the year occurred on January 3, 2008, when it closed at 2,634.27. The low for the year occurred on November 21, 2008, when the NASDAQ closed at 1,295.48.

What 2009 will bring is as uncertain as the current economy. For more information on the markets, please refer to the Securities Industry and Financial Markets Association (SIFMA) research reports, which can be accessed at www.sifma.org/research/research_reports.html.

The Commodities Industry

Global futures and options contract volume has continued to increase through 2007 and into 2008. In the first 10 months of 2008, volume on U.S. futures exchanges reached 6.1 billion contracts, a 22 percent increase from the same period in 2007. The volume of contracts traded on foreign exchanges increased 13 percent compared to the first 10 months of 2007. Trading volume in interest rate and equity products accounted for more than 70 percent of worldwide trading volume in both periods.

The growth in futures volume and markets is further reflected in increased customer funds held by entities registered with the Commodity Futures Trading Commission (CFTC) as futures commission merchants (FCMs) for trading on U.S. and foreign futures and options exchanges. The total amounts required under CFTC regulations to be held in segregated or secured accounts on behalf of FCM customers increased by $49 billion from approximately $163 billion as of October, 2007, to approximately $212 billion as of October 31, 2008.

The U.S. futures industry, in addition to the increasing volume and customer participation, also has experienced other significant changes in 2008. In 2008, the CME Group enhanced its position as the world’s largest financial exchange by acquiring the New York Mercantile Exchange, creating a company that will dominate the U.S. derivatives sector with control of 98 percent of U.S. listed futures. The CME Group also includes the Chicago Mercantile Exchange (CME) and the Chicago Board of Trade, the two largest contract markets designated by the CFTC. Clearing rules and safeguards will be harmonized as integration of operations proceeds among the merged entities.

Legislative and Regulatory Developments

Regulatory Update—PCAOB

On January 8, 2009, the Public Company Accounting Oversight Board (PCAOB) released a statement that provides information for auditors of nonpublic broker-dealers regarding the PCAOB’s registration process. Registration with the PCAOB of auditors of nonpublic broker-dealers had not been necessary under SEC rules. However, the SEC’s rule governing such registration recently expired. Without new action by the SEC, financial statements of nonpublic broker-dealers for fiscal years ending after December 31, 2008, must be certified by a registered public accounting firm. To apply for registration with the PCAOB, a firm must complete an electronic application form and pay an application fee. Visit www.pcaobus.org/Registration for information. Readers should remain alert to future developments.

Regulatory Update—SEC

SEC Developments

The SEC has taken a number of actions in response to the current financial market’s turmoil and the events leading up to it. This alert will discuss some of the SEC’s actions, but readers should refer to the SEC’s Web site, SEC Actions During Turmoil in Credit Markets, for more information on actions taken during the current crisis (www.sec.gov/news/press/sec-actions.htm.) See the “Accounting Issues and Developments” section for a discussion of the results of the congressionally mandated study on fair value.
Enforcement Actions and Emergency Orders

.38 In a press release dated October 22, 2008, the SEC released fiscal year 2008 enforcement results noting the second highest number of enforcement actions in agency history took place in fiscal year 2008. During that period an increase was noted in the amount of cases related to market manipulation and insider trading. Previously, in September 2008, the SEC announced a sweeping expansion of its ongoing investigation into possible market manipulation in the securities of certain financial institutions. A number of high profile enforcement actions are included on the SEC Actions During Turmoil in Credit Markets Web site. (See the “Consideration of Fraud” section following for an example.) Additionally, the SEC’s 2008 enforcement results are included in its 2008 Performance and Accountability Report at www.sec.gov/about/secpar2008.shtml.

.39 The SEC issued a number of emergency orders to help stabilize financial markets. Many of these emergency orders related to short selling. In addition, the SEC chairman asked the U.S. Congress to provide the statutory authority necessary for government oversight of the credit default swap market. The SEC also entered into a Memorandum of Understanding with the Federal Reserve and the CFTC to make sure that key federal financial regulators share information and coordinate regulatory activities where appropriate.

Financial Statement Disclosures

.40 The SEC also took action in 2008 to further enhance the transparency of financial statement disclosures. In June 2008 the SEC established the 21st Century Disclosure Initiative (initiative). The initiative’s goal is to develop a modernized disclosure system that utilizes technology and better meets the marketplace’s needs. As part of the initiative it will rethink financial disclosures by examining the basic purpose of disclosures from the investor and market point of view and to create a plan to revise the current forms-based disclosure system. Readers can keep up to date with the progress of this initiative by visiting www.sec.gov/spotlight/disclosureinitiative.shtml.

Management’s Discussion and Analysis

.41 In addition to this initiative, to date the SEC has sent three sample letters to certain public companies identifying a number of disclosure issues to consider in preparing management’s discussion and analysis (MD&A) for upcoming annual reports. These sample letters are available at www.sec.gov/news/press/sec-actions.htm, and are as follows:

- Sample Letter Sent to Public Companies That Have Identified Investments in Structured-Investment Vehicles, Conduits or Collateralized Debt Obligation (Off-balance Sheet Entities)—sent December 2007
- Sample Letter Sent to Public Companies on MD&A Disclosure Regarding the Application of FASB Statement No. 157 (Fair Value Measurements)—sent March 2008
- Sample Letter Sent to Public Companies on MD&A Disclosure Regarding the Application of FASB Statement No. 157 (Fair Value Measurements)—updated letter sent September 2008

Consolidated Supervised Entities Program

.42 On September 26, 2008, the SEC announced a decision by the Division of Trading and Markets to end the Consolidated Supervised Entities (CSE) program, created in 2004 as a way for global investment bank conglomerates that lacked a supervisor under the law to voluntarily submit to regulation. Although the SEC had concluded that the CSE program did not work, it also concluded that the program was not needed to fill a regulatory gap: the major investment banks that had been a part of the CSE program have been reconstituted within a bank holding company subject to statutory supervision by the Federal Reserve.
SEC Final Rules

.43 The SEC has issued a number of final rules during 2008; rules specifically related to the securities industry or especially significant are summarized in the following paragraphs. Visit the SEC Web site at www.sec.gov for a complete list and the full content of the rules.

Nonaccelerated Filers Requirement to File Auditor’s Attestation Report on Internal Control Over Financial Reporting

.44 On June 26, 2008, the SEC issued a final rule (SEC Release No. 33-8934, Internal Control Over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers) extending the date on which nonaccelerated filers will be required to file the auditor’s attestation report on internal control over financial reporting when it files an annual report. Under an amendment of the temporary rules, nonaccelerated filers will be required to provide attestation reports in their annual reports for fiscal years ending on or after December 15, 2009.

Short Sales Rules

.45 During October 2008, the SEC issued two final rules related to short sales. The first, “Naked” Short Selling Antifraud Rule (SEC Release No. 34-58774), is an antifraud rule (Rule 10b-21) aimed at short sellers, including brokers and dealers acting for their own accounts who deceive specified persons, such as a broker or dealer, about their intention or ability to deliver securities in time for settlement and who fail to deliver securities by the settlement date. Though abusive “naked” short selling as part of a manipulative scheme is always illegal under the general antifraud provisions of the federal securities laws, this rule further evidences the liability of persons who deceive others about their intention or ability to deliver securities in time for settlement, including persons who deceive their brokers or dealers about their source of borrowable shares for the purpose of complying with Regulation SHO’s locate requirement.

.46 Amendments to Regulation SHO (SEC Release No. 34-58775) was adopted with the intention of further reducing the number of persistent fails to deliver in certain equity securities by eliminating the options market maker exception to the close-out requirement of Regulation SHO.

.47 In addition to the final rules mentioned previously, two interim final temporary rules were issued relating to short sales. The first, Amendments to Regulation SHO (SEC Release No. 34-58773) is intended to address abusive naked short selling in all equity securities by requiring that participants of a clearing agency registered with the SEC deliver securities by the settlement date, or if the participants have not delivered shares by the settlement date, immediately purchase or borrow securities to close out the fail to deliver position by no later than the beginning of regular trading hours on the settlement day following the day the participant incurred the fail to deliver position. This rule is effective from October 17, 2008, through July 31, 2009.

.48 The second interim final temporary rule, Disclosure of Short Sales and Short Positions by Institutional Investment Managers, (SEC Release No. 34-58785) requires certain institutional investment managers to file information on Form SH concerning their short sales and positions of section 13(f) securities other than options. This rule extends the reporting requirements established by earlier emergency orders with some modifications. This rule is effective from October 18, 2008, through August 1, 2009.

Regulatory Update—CFTC

.49 The following summarizes certain amendments to regulations and interpretations of the CFTC and other regulatory guidance issued or that became effective in the latter part of 2007 and in 2008. The amendments affected the financial reporting requirements of registered FCMs, and also of introducing brokers (IBs) that are not guaranteed by FCMs. The amendments and the other items discussed in the following paragraphs can be accessed at the CFTC Web site at www.cftc.gov.
CFTC staff expects to issue for comment proposed rule changes to simplify procedures relating to using other than U.S. generally accepted accounting principles (GAAP) in commodity pools’ audited financial statements, to extend filing dates for funds of funds, and to streamline reporting for multiple class funds. It plans to make the rule changes applicable to 2008 annual reports.

CFTC Reauthorization Act of 2008

In 2008, congress enacted legislation in the CFTC Reauthorization Act of 2008 (Reauthorization Act) that reauthorized the CFTC and gave the agency additional regulatory and enforcement tools necessary to continue to effectively oversee the dynamic futures industry, particularly transactions in energy products and foreign currency. The CFTC legislation includes the following major provisions:

- Reflect the CFTC's recommendation to the U.S. Congress on the need for additional tools to oversee trading on exempt commercial markets (ECMs).
- Provide the agency with essential oversight over contracts trading on ECMs—a type of electronic trading facility offering (among other things) energy derivatives products. Under prior law, ECMs were not subject to full CFTC regulatory authority. The new legislation outlines criteria for when an ECM contract should be considered a significant price discovery contract (SPDC) and gives the CFTC the authority to
  - require large trader position reporting for SPDCs.
  - require an ECM to adopt position limits or accountability levels for SPDCs.
  - require an ECM to exercise self-regulatory responsibility over SPDCs in order to prevent manipulation (among other things).
  - exercise emergency authority regarding SPDC transactions.
- Enhance agency authority over off-exchange retail foreign currency fraud by
  - clarifying that the CFTC’s antifraud authority applies to certain retail off-exchange foreign currency transactions (also known as the “Zelener fix”).
  - creating a new registration category for retail foreign exchange dealers and requiring registration for those who solicit orders, exercise discretionary trading authority, and operate commodity pools with respect to off-exchange retail foreign currency transactions.
  - imposing minimum capital requirements for futures commission merchants and retail foreign exchange dealers that act as counterparties in such transactions.
- Increase civil penalties for manipulation and certain other violations of the Commodity Exchange Act to $1 million per violation.
- Reauthorize the CFTC through the year 2013.
- Require implementation of SPDC provisions:
  - As outlined in the bill, the CFTC will propose a rule regarding the standards for SPDCs within 180 days of enactment and will implement a final rule within 270 days. The CFTC will identify significant price discovery contracts within 180 days after the final rule is in effect.

CFTC Concerns

Auditing Regulatory Supplementary Schedules

CFTC Regulation 1.16(d), Audit objectives, states, “The audit must include all procedures necessary under the circumstances to enable the independent licensed or certified public accountant to express an opinion on the financial statements and schedules.” Auditors should review and test an FCM’s segregation
and capital computations even if the amounts are considered immaterial in relation to the financial statements taken as a whole. Indeed, when Regulation 1.16, *Qualifications and reports of accountants*, was adopted, the CFTC commented that auditors must review such computations as part of a “proper audit.”

### Maintenance of Minimum Financial Requirements and Notification Requirements

.53 CFTC Regulation 1.17, *Minimum financial requirements for futures commission merchants and introducing brokers*, specifies minimum capital requirements and CFTC Regulation 1.12, *Maintenance of minimum financial requirements by futures commission merchants and introducing brokers*, specifies the conditions requiring FCMs to give notice of certain events occurring in a firm’s financial or operational condition, changes or anticipated changes in capital balances, and how and when such notices are to be given. For example, Regulation 1.12(g) requires that an FCM provide written notice of a substantial reduction in capital as compared to that last reported in a financial report filed with the CFTC pursuant to Regulation 1.10, *Financial reports of futures commission merchants and introducing brokers*. If an event or series of events, such as a withdrawal of equity capital, would cause a reduction of excess adjusted net capital of 30 percent or more, notice must be provided at least two days prior to the withdrawal. For any reduction in net capital of 20 percent or more, notice must be provided within two days of the event(s) causing the reduction.

.54 FCMs should establish procedures to ensure that the notices required by CFTC regulations are filed with the CFTC within the established time frames set forth in the regulations. Particularly, it is a violation of CFTC rules for an FCM not to file notice of a withdrawal of equity capital of 30 percent or more or at least two days prior to such withdrawal. Some FCMs have filed the notice after filing the financial statements in which the withdrawal is reflected. Doing that negates the purpose of the rule, which is designed to alert the CFTC to a possible change in an FCM’s financial condition. Notices should be filed promptly when due and provide an explanation for the decrease in net capital.

.55 FCMs should also consider including details in the comments section of the electronically filed financial report affected by reporting when they have made or intend to make the filing required by Regulation 1.12(g).

### Segregation of Customer Funds in Multiple Currencies

.56 FCMs must maintain compliance with CFTC recordkeeping, computation, and segregation requirements applicable to customer funds held in multiple currencies. Regulation 1.20, *Customer funds to be segregated and separately accounted for*, requires that all customer funds be separately accounted for and segregated as belonging to commodity customers and deposited in an account that clearly identifies those funds as such. Regulation 1.32, *Segregated account; daily computation and record*, requires each FCM to compute as of the close of each business day, on a currency-by-currency basis: (1) The total amount of customer funds on deposit in segregated accounts on behalf of commodity and commodity option customers; (2) the amount of such customer funds required to be on deposit in segregated accounts; and (3) the amount of the FCM’s residual interest in such customer funds.

.57 CFTC Regulation 1.49, *Denomination of customer funds and location of depositaries*, specifies the conditions under which the FCM’s obligations to a customer may be denominated in currencies other than the U.S. dollar. The regulation also specifies the geographic locations in which customer funds may be held, and the required qualifications for permissible depositories in those locations.

.58 Some areas of recent focus in regard to these regulations include the treatment of customer-owned securities that are denominated in non-U.S. currencies, and that are held in depositories outside of the U.S.

---

1 “Accountants should be aware that in order to conduct a proper audit under these rules, they must be familiar with the Act and the rules and regulations of the commission. In particular, accountants must be familiar with the segregation requirements, the recordkeeping requirements, and the minimum financial regulations applicable to FCMs. Accountants must assure themselves that the daily computations of the segregation requirements are being made in accordance with such requirements. In addition, accountants must ascertain that the periodic computations of the minimum capital requirements are being done in accordance with §1.17 and are being computed monthly in accordance with §1.18. The commission anticipates that it will selectively review the FCM audits conducted by independent public accountants to monitor compliance with the auditing standard set for in §1.16.” 43 F.R. 39956 (September 8, 1978)
All FCMs should take steps to ensure that such depositories satisfy all of the required criteria set forth in Regulation 1.49(d)(3). FCMs should also ensure that such customer-owned securities are included in the segregation computation for the currency in which they are denominated.

Furthermore, FCMs should ensure that offsets to customer account deficits that are denominated in multiple currencies are computed in accordance with Rule 1.49(e). At the close of each business day, Rule 1.49(e) requires the FCM to maintain in segregated accounts sufficient U.S. dollars, held in the United States, to meet all U.S. dollar obligations, and also sufficient funds in each other currency to meet obligations in such currency, with certain permitted substitutions:

- U.S. dollars held in the United States may be used to meet obligations denominated in any other currency, and
- “Money center” currencies and U.S. dollars held in money center countries may be held to meet obligations denominated in currencies other than the U.S. dollar

Foreign Currency Exchange Transactions

CFTC staff issued an advisory on August 30, 2007, concerning retail off-exchange foreign currency futures or option (forex) transactions. The advisory addresses the following issues: (1) registration requirements for associated persons of firms registered as IBs, commodity trading advisors, and commodity pool operators (CPOs) that are involved in forex transactions; (2) the permissibility of certain unregistered affiliates of an FCM to act as proper counterparties in forex transactions; (3) claims that forex customer funds are segregated; (4) introducing entities acting as FCMs; (5) the applicability of the IB guarantee agreement to forex transactions and prohibiting guaranteed IBs from introducing forex transactions to an FCM that is not its guarantor FCM; (6) prohibition of forex account statements of an FCM’s unregistered affiliate being included in the FCM’s account statements to its customers; and (7) prohibition of retail customers acting as counterparties to each other in forex transactions.

In addition, on May 7, 2007, the CFTC and the North American Securities Administrators Association issued a joint investor alert, which remains relevant, to warn of the dangers facing retail investors who are lured into forex trading frauds. The CFTC also has published on its Web site other information related to fraudulent activity involving off-exchange retail forex transactions.

CFTC Annual “Dear CPO” Letter

On January 16, 2008, CFTC staff issued its annual letter to CPOs outlining key reporting issues and common reporting deficiencies found in annual financial reports for commodity pools. The letter emphasized the CFTC staff’s concerns and, accordingly, may alert the auditor to high-risk issues that could affect assertions contained in the financial statements of commodity pools. CFTC staff suggested that CPOs share the letter with their independent auditors. CFTC staff anticipates issuing a similar letter in January 2009.

The letter addresses the following concerns:

- Due Dates Of Commodity Pool Financial Filings—Late Filings
- Complex Entities
- Requests for Limited Relief From U.S. GAAP Compliance for Certain Offshore Commodity Pools
- Initial Annual Reports and Final Annual Reports
- Other Filings by CPOs Regarding:
  - Replacement of an accountant, Election of fiscal year, and
  - Regulation 4.13 Exemptions
- Accounting Developments:
— FASB Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*, implementation and its impact on participants’ redemptions;
— Alternative Investments, Audit Considerations
— AICPA Technical Guidance Regarding Offering Costs
— FASB Statement No. 157

• Recent Regulatory Developments Affecting CPOs

.64 The CFTC’s Division of Clearing and Intermediary Oversight has issued similar letters in prior years, which are available at the commission’s Web site. Those letters should be consulted with respect to commodity pool annual financial statements and reporting. Specifically relevant and still applicable information available in such prior letters includes

• reports for pools for the fiscal year in which an initial claim of exemption under Regulation 4.13 is filed (2006 CPO letter).
• notice regarding election of fiscal year other than calendar year (2006 CPO letter).
• requests for confidential treatment of commodity pool annual reports (2006 CPO letter).
• AICPA SOP 95-2 applicability to both required audited and unaudited commodity pool annual financial reports (2004 CPO letter).

.65 In addition, CFTC interpretations and other staff letters that provide written guidance concerning the Act and the commission’s regulations are available on the commission’s Web site. In particular, CFTC Interpretative Letter 94-3, *Special Allocations of Investment Partnership Equity*, addresses how a CPO should report a special allocation of partnership equity to the general partner or any other special class of participant of an investment partnership in the financial statements of a commodity pool.

National Futures Association

.66 The National Futures Association (NFA) amended several of its rules governing Forex Dealer Members (FDMs). The Reauthorization Act increases the adjusted net capital requirement for certain forex counterparty FCMs and Retail Foreign Exchange Dealers to $20 million. This increase is to be phased in, with the first increase scheduled to have taken effect 120 days after the enactment or at such later date as the CFTC proposes and finalizes rules regarding retail forex transactions. The CFTC has not, as of this writing, published final rules effectuating the capital requirement and other provisions of the Reauthorization Act. Given that congress recognized the importance of increased capital requirements, however, NFA adopted rules raising the minimum net capital requirement for its FDMs to $20 million to meet the increased requirements set forth in the Reauthorization Act. NFA’s rules phase-in the minimum capital requirement pursuant to the following schedule: $10 million on October 31, 2008; $15 million on January 17, 2009; and $20 million on May 16, 2009.

.67 In addition to the increase in the required minimum capital, NFA Financial Requirements Section 12 regarding the collection of security deposits was revised. Section 12(a) requires that FDMs collect and
maintain minimum security deposits of either 1 percent or 4 percent of the notional value of each forex transaction, depending on the currency. Section 12(b) provides an exemption from this requirement for those members who consistently maintained at least twice the required adjusted net capital. The rule was revised to provide that a FDM that consistently maintains 150 percent of the required adjusted net capital would be exempt from having to collect the prescribed security deposits.

**Regulatory Update—Financial Industry Regulatory Authority**

**Auction Rate Securities**

.68 Due to the current financial market’s turmoil, it is important for auditors to keep abreast of the issues and guidance related to auction rate securities (ARS). Certain information is covered in the following paragraphs; however, auditors should keep current on the issues and related guidance due to changing conditions. Issues related to ARS have been addressed by Financial Industry Regulatory Authority (FINRA) in a number of publications of note during 2008. On March 6, 2008, Regulatory Notice 08-08, FINRA Temporarily Increases Margin Maintenance Requirements on Auction Rate Securities Backed by Fixed Income Products, was issued and temporarily increased the maintenance margin requirements, pursuant to NYSE Rule 431(a)(10) and NASD Rule 2520, on all ARSs that are backed by fixed income products, irrespective of whether or not such securities are deemed to be investment grade. Effective on the date of issuance, the maintenance margin requirement increased to 25 percent.

.69 The notice reminded member firms that auction rate preferred securities (ARPS) issued by closed end funds are not margin eligible under Regulation T, and therefore 100 percent margin maintenance is required on those securities. In addition, the notice reminded member firms that certain NYSE, NASD, and SEC rules require that the amount of any deficiency between the equity in the account and the margin required should be deducted in computing the net capital of the member firm. See Regulatory Notice 08-08 at www.finra.org/Industry/Regulation/Notices/2008/P038096 for more detail.

.70 During April 2008 two related interpretation letters were issued. The April 11, 2008, letter states that, as agreed to by SEC staff, member firms would not be required to apply a charge to their net capital for any margin deficiencies resulting from nonpurpose credit extended on ARPS, or to exclude from the customer reserve formula computation those related nonpurpose loans to customers, provided that the firms met the conditions specified in the letter. The second interpretative letter, dated April 24, 2008, revised the original letter due to firms’ difficulties in meeting one of the original requirements because of market conditions.

.71 Subsequent to the April interpretation letters and based upon recent developments, Regulatory Notice 08-65, Auction Rate Securities, dated November 2008, granted additional relief to those brokers and dealers that have agreed to implement buyback programs for ARSs. This relief is related to the net capital, reserve formula, nonpurpose loan, and maintenance margin requirements applicable to credit extended on ARSs. The relief will be available to member firms only with respect to the accounts of retail customers whose account assets do not exceed $10 million and to any accounts of charitable organizations. In addition, certain conditions must be satisfied with respect to liquidity loans collateralized by ARSs to qualify for the relief.

.72 FINRA also published an investor alert, Auction Rate Securities: When Auctions Fail, which explains what ARSs are and what alternatives are available to investors in anticipation of illiquidity or in response to failed auctions. This publication is available at http://www.finra.org/Investors/ProtectYourself/InvestorAlerts/Bonds/P038207.

**Money Market Mutual Funds**

.73 FINRA issued temporary measures related to certain money market mutual funds that have frozen customer redemptions or whose net asset value has declined below $1.00 per share. Effective October 21, 2008, Regulatory Notice 08-60, Money Market Mutual Funds, announced temporary margin maintenance, net
capital, and reserve formula requirements. The notice is available at the FINRA Web site at www.finra.org/Industry/Regulation/Notices/2008/P117276.

Other FINRA News

.74 FINRA continues to work toward a new consolidated rulebook, which not only consolidates the existing rules, but also considers the evolving nature of the securities industry and the diversity of firms subject to FINRA regulation. To assist with this transition, FINRA has created a Rule Conversion Chart to show how new FINRA rules are related to the NASD and incorporated NYSE rules that they will replace. This information is available on the FINRA Web site at www.finra.org/Industry/Regulation/FINRARules/p085668.

.75 On August 13, 2008, FINRA and NYSE Regulation, Inc., announced an agreement with 10 U.S. exchanges to strengthen surveillance, investigation, and enforcement to prevent insider trading. The agreement assigns responsibility for the detection of insider trading, regardless of where in the country the trading occurs, as follows:

• FINRA is responsible for AMEX- and NASDAQ-listed securities.
• NYSE Regulation is responsible for NYSE and NYSE Arca-listed securities.

.76 This agreement consolidates the individual insider trading programs at each exchange within FINRA and NYSE Regulation. As a result of this new structure, insider traders will likely be more readily identified.

Regulatory Update—Financial Crimes Enforcement Network

.77 Financial Crimes Enforcement Network (FinCEN) issued interpretive guidance on September 10, 2008, to clarify whether a person who conducts transactions in currency or other commodities is a “money services business” for purposes of complying with the Bank Secrecy Act and its regulations. This guidance specifically addresses whether a broker or dealer in currency or other commodities is a “money transmitter” when, in the ordinary course of business, the broker or dealer accepts and transmits funds in order to effect transactions in currency or other commodities for or with a customer. Whether a person is a “money transmitter” and whether a “money transmitter” is required to register with FinCEN is a matter of facts and circumstances. For more information, see FIN-2008-G008, Application of the Definition of Money Transmitter to Brokers and Dealers in Currency and Other Commodities. This and other guidance is available on the FinCEN Web site at www.fincen.gov/statutes_regs/guidance.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.78 As discussed previously, we have experienced unprecedented events in the economy and financial markets in 2008 into 2009. These events will undoubtedly affect the audits you are performing. Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to current economic conditions are as follows:

• Operations that are exposed to volatile markets, which may include oil, agriculture, or currency markets
• Operations in regions with economic volatility, including employment and housing issues
• Constraints on the availability of capital and credit
• Use of off-balance-sheet financings, special-purpose entities, and other complex financing arrangements
- Volatile real estate markets and the credit crisis, which result in significant measurement uncertainty, including accounting estimates and fair value measurements
- ARS—impairment and accounting for settlements
- Accounting for warrants under TARP’s CPP
- Accounting for credit derivatives
- Asset impairment and other than temporary impairment
- Marginal achievement of explicitly stated strategic objectives
- Disclosures (subsequent events and risks and uncertainties)
- Going concern issues
- Liquidity and net capital issues
- Guarantees that may be triggered due to economic conditions
- Adequacy of corporate governance and the oversight of internal controls
- Risks that fraud may occur due to economic pressures

.79 This list is not all inclusive. However, the list of issues that an auditor should consider will likely change frequently in the coming months. It is imperative that the auditor keep abreast of current economic and industry developments and hot topics so that all relevant items are considered in the assessment of risk.

.80 Though many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. This section of the alert discusses a number of audit issues for you to consider given the current economic environment.

### Auditing Auction Rate Securities

.81 The ARS market experienced significant challenges in early 2008, and the demand for that type of investment decreased significantly. The situation provides two challenges for auditors. First, the question of impairment arises. The issue of asset impairment is discussed in paragraph .91. The second issue relates to the accounting for ARS settlements, especially as it relates to settlement agreements. Several large financial institutions entered into settlement agreements with regulators during 2008 regarding the marketing and selling of ARS. For a given entity, the accounting for ARS depends on whether an actual settlement agreement has been signed, and whether that agreement applies to their acquisition of the position.

.82 Prior to a settlement agreement being signed, an auditor should consider whether a contingent liability exists that would require recognition and disclosure as per FASB Statement No. 5, *Accounting for Contingencies*. If it is probable that a contingent loss has been incurred, and if that loss is reasonably estimable, the liability should be accrued and recognized as a charge to current period income. If it is reasonably possible that a contingent loss has been incurred, or if the loss is not reasonably estimable, the nature of the contingency and an estimate of the possible loss (or the range of such loss) should be disclosed.

.83 Once a settlement agreement is signed, any liability is no longer a contingent liability, and the accounting pursuant to FASB Interpretation (FIN) No. 45, *Guarantor’s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others—an interpretation of FASB Statements No. 5, 57, and 107 and rescission of FASB Interpretation No. 34*, should be followed.
Auditing Fair Value Measurements

**PCAOB Staff Audit Practice Alert No. 2**

.84 In December 2007, the PCAOB issued Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Staff Guidance, sec. 400 par. .02). This guidance is intended to remind auditors of their responsibilities under existing PCAOB standards and was divided into four sections, summarized as follows.

*Fair Value Measurements*

.85 PCAOB Staff Audit Practice Alert No. 2 notes that the auditor should obtain an understanding of the company’s process for determining fair value measurements and disclosures, including relevant controls, and should, among other things,

- evaluate whether management’s assumptions are reasonable and either reflect, or are not consistent with, market information.
- consider the extent to which management’s reliance on historical financial information in developing an assumption is justified.
- evaluate whether the company’s method for determining fair value measurements is applied consistently, and also whether such consistency is appropriate in light of the changing environment or changing circumstances affecting the company.

.86 The auditor should also consider the increased risk of management bias and of material misstatement if valuation inputs are not observable.

*Classification Within the FASB Statement No. 157 Valuation Hierarchy*

.87 PCAOB Staff Audit Practice Alert No. 2 notes that, because different consequences are associated with each of the three levels of the hierarchy, auditors should be alert for circumstances in which the company may have an incentive to inappropriately classify fair value measurements within the hierarchy. As examples of incentives, it notes that lower-level classifications permit greater use of management judgment in valuation, and that level 3 measurements require more extensive disclosures than other levels.

*Using the Work of Specialists*

.88 PCAOB Staff Audit Practice Alert No. 2 also reminds auditors that they should evaluate whether they have the necessary skill and knowledge to perform audit procedures related to fair value measurement, considering such factors as significant use of unobservable inputs, complexity of valuation techniques, and the materiality of the measurements. It also reminds auditors of their responsibilities when using the work of a specialist, whether engaged by the issuer or the auditor.

*Use of a Pricing Service*

.89 PCAOB Staff Audit Practice Alert No. 2 states that, if a company uses a pricing service, the auditor should determine the nature of the information the pricing service provides (for example, quoted prices from an active market, observable inputs, or model-based measurements), and adjust audit procedures accordingly. If measurements are based on a model, the auditor should obtain an understanding of the model and evaluate the reasonableness of assumptions. It also reminds the auditor to consider whether the prices provided by the service meet the “principal market” or “most advantageous market” criteria of FASB Statement No. 157.
Asset Impairment and Other Than Temporary Impairment

Asset valuations that are not reported at fair value merit close consideration in the current economic and market environment. Goodwill, intangibles, and fixed assets are examples of items that warrant evaluation. An item that may be affected significantly for a broker-dealer is an exchange membership. Although these particular items are highlighted here, the auditor needs to consider the issue of impairment, including other than temporary impairment, in all aspects of the audit.

Liquidity Considerations

AICPA staff has issued a new nonauthoritative Technical Practice Aid (TPA) Technical Question and Answer (TIS), “Liquidity Restrictions” (AICPA, Technical Practice Aids, TIS sec. 1100.15), addressing the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernemental entity’s ability to withdraw its balance in a money market fund or other short-term investment vehicle. The TPA covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things. The TPA can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

Alternative Investments

Another source of information for auditors is the AICPA’s practice aid Alternative Investments—Audit Considerations. This nonauthoritative practice aid focuses on the existence and valuation assertions associated with alternative investments, but also discusses general considerations pertaining to auditing alternative investments, management representations, disclosure of certain significant risks and uncertainties, and reporting. As defined in the foreword of the practice aid, alternative investments are “investments for which a readily determinable fair value does not exist...including private investment funds meeting the definition of an investment company...such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds.” The full text of this practice aid can be located on the AICPA’s Web site at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

Consideration of an Entity’s Ability to Continue as a Going Concern

The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards (GAAS), and it is an especially important consideration in the current state of the financial markets and the overall economy. The time frame for this consideration is one year beyond the date of the financial statements. If the auditor believes substantial doubt exists about the entity’s ability to continue as a going concern, the next steps are to obtain management’s plans to mitigate the effect of such conditions and then assess the likelihood these plans can be effectively implemented.

The following may indicate substantial doubt about the ability of the entity to continue as a going concern:

- Negative trends such as negative cash flows from operating activities, recurring operating losses or working capital deficiencies, or lack of the ability to obtain additional financing
- Other indications of financial difficulties such as defaults on debt or debt covenants, arrearages in dividends; the need to seek new sources of financing; denial of surety credit or usual trade credit; or the disposal of substantial assets
- Inadequate capitalization
- Internal matters such as turnover in key management positions like CEO, CFO, controller, and project manager, or substantial dependence on the success of a particular investment
• External matters such as loss of key customers or business relationships, or significant counterparty failures
• Entrance into a new market for which the entity might not have the required expertise to successfully compete (for example, new investment strategy or new geographic areas)
• External matters such as legalities or market conditions

.96 If an auditor determines substantial doubt exists about an entity’s ability to continue as a going concern, the auditor should communicate with those charged with governance of the entity in accordance with AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1). AU section 341 provides guidance to an auditor with respect to evaluating whether substantial doubt exists about an entity’s ability to continue as a going concern and what the auditor should do if uncertainty exists about the entity’s viability.

Disclosures

.97 Increased emphasis is being given to disclosures in the current environment. The “SEC Developments” and the “On the Horizon” sections of this alert discuss disclosures and new guidance being developed. The area of subsequent events is one that warrants increased attention. AU section 560, Subsequent Events (AICPA, Professional Standards, vol. 1), provides guidance regarding the reporting of subsequent events, including both events present on the balance sheet date and events that occur subsequent to that date.

.98 SOP 94-6, Disclosure of Certain Significant Risks and Uncertainties (AICPA, Technical Practice Aids, ACC sec. 10,640), starts by stating, “The volatile business and economic environment underscores a need for improved disclosures about the significant risks and uncertainties that face reporting entities.” Although this guidance was written more than 10 years ago, it is certainly pertinent today. The disclosures in SOP 94-6 focus primarily on risks and uncertainties that could significantly affect the amounts reported in the financial statements in the near term and the near-term functioning of the reporting entity. The risks and uncertainties can stem from the nature of the entity’s operations, from the necessary use of estimates in the preparation of the entity’s financial statements, and from significant concentrations in certain aspects of the entity’s operations.

Consideration of Fraud

.99 Auditors should consider the pressures an entity is facing when planning and performing the audit engagement. Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatement, whether caused by error or fraud. Paragraph .32 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), explains that when obtaining information about the entity and its environment, an auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud. Paragraph .33 of AU section 316 lists three conditions generally present when fraud exists: incentive or pressure to perpetrate fraud, an opportunity to carry out the fraud, and attitude or rationalization to justify the fraudulent action.

.100 A recent fraud discussed in the news, which contains all three conditions just mentioned, has been that of Bernard Madoff Investment Securities. At the time of this writing, the owner of the investment firm, Bernard Madoff, has been charged with paying off earlier investors with money from new investors. This is a classic example of a Ponzi scheme, which demonstrated itself as markets began declining and many investors requested redemptions of their capital. The losses from this fraud are estimated at $50 billion. While the details of this fraud are just beginning to be investigated, auditors should ensure they are properly testing for existence of assets, such as investments in this scenario.

.101 PCAOB Staff Audit Practice Alert No. 3, Audit Considerations in the Current Economic Environment (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. 03), also contains a
discussion of the risk of fraud and how to respond to that risk. This PCAOB alert is available at www.pcaobus.org/Standards/Staff_Questions_and_Answers/2008/12-05_APB_3.pdf.

**Summary of Recent Auditing and Attestation Pronouncements and Related Guidance**

.102 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.103 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

Accounting Issues and Developments

Accounting for Warrants Under TARP

.104 As mentioned previously in this alert, the TARP CPP was issued in 2008 as part of the EESA. Under this program, the U.S. Treasury will acquire senior preferred stock and associated warrants in exchange for injecting capital into the qualifying financial institution. More information regarding this program is available on the U.S. Treasury Web site at www.ustreas.gov/initiatives/eesa/.

.105 After the announcement of this plan, practitioners started to consider the accounting implications of these warrants. In general, depending on the terms of warrants, some are accounted for as liabilities as they represent a future obligation. If these warrants were accounted for as liabilities, the intended benefits may be somewhat diminished due to the warrants being accounted for at fair value, thereby possibly increasing earnings volatility and part of the capital proceeds being allocated to the warrants, which resides in the liability section of the balance sheet as opposed to in the equity section.

.106 To address this concern, the SEC and FASB issued a letter on October 24, 2008, that noted, “we would not object if the Warrants...were to be classified as permanent equity under applicable U.S. GAAP [Generally Accepted Accounting Principles], provided that the issuer of such Warrants has sufficient authorized but unissued shares of the class of stock that may be required upon settlement and any other necessary shareholder approvals have been obtained.” The letter went on to state that as long as these approvals were obtained prior to the end of the fiscal quarter in which the warrants were issued, immediate classification as permanent equity would be appropriate as well. Further, the letter explains that if an issuer does not have the required shareholder approval, including shareholder approval for sufficient authorized but unissued shares of the class of stock that may be required for settlement, the previously mentioned treatment would be appropriate provided that the issuer takes the necessary action to secure sufficient approvals prior to the end of the fiscal quarter in which the warrants are issued.

Fair Value Accounting

.107 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, FASB issued FASB Staff Position (FSP) FAS 157-2, Effective Date of FASB Statement No. 157, which was effective upon issuance. The FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157.
Results of the SEC Study on Fair Value Accounting

.108 The EESA, signed into law on October 3, 2008, contains a provision that required the SEC to conduct a study on mark-to-market (fair value) accounting that was to be completed within 90 days. The act mandated that six key issues be addressed by the study:

1. The effects of such accounting standards on a financial institution’s balance sheet
2. The impacts of such accounting on bank failures in 2008
3. The impact of such standards on the quality of financial information available to investors
4. The process used by FASB in developing accounting standards
5. The advisability and feasibility of modifications to such standards
6. Alternative accounting standards to those provided in FASB Statement No. 157

.109 In late December 2008, the SEC released to Congress its EESA-mandated report on fair value accounting standards. This report recommends against the suspension of fair value accounting standards. However, it does recommend improvements to existing practice, including reconsidering the accounting for impairments and the development of additional guidance for determining fair value of investments in inactive markets, including situations where market prices are not readily available.

.110 The highlights of the report include the following findings related to the key EESA mandated topics and eight recommendations by the SEC staff:

a. In regard to the effect of fair value accounting standards on financial institutions’ balance sheets, the SEC staff observed that fair value measurements were used to measure a minority of the assets and liabilities included in financial institutions’ balance sheets. However, these fair value measurements did significantly affect financial institutions’ reported income.

b. In regard to the impact of fair value accounting on bank failures in 2008, the staff observed that it did not appear to play a significant role.

c. In regard to the impact of fair value accounting on the quality of financial information available to investors, the staff noted investors generally support measurements at fair value. However, many investors also indicated the need for improvements to existing fair value standards.

d. The report confirmed that FASB, as an independent accounting standard-setter, is best positioned to develop neutral accounting guidance. However, steps could be taken to enhance the existing process in terms of timeliness and transparency.

e. The staff found that suspending FASB Statement No. 157 would lead to a reversion of practice and would likely increase investor uncertainty. Nonetheless, the issuance of additional guidance is advised.

f. The staff provided recommendations on the advisability and feasibility of modifications to existing accounting standards and related financial report requirements.

.111 The eight key recommendations from the report are as follows:

• FASB Statement No. 157 should be improved, but not suspended.
• Existing fair value and mark-to-market requirements should not be suspended.
• Additional measures should be taken to improve the application and practice related to existing fair value requirements (particularly as they relate to both level 2 and level 3 estimates).
• Accounting for financial asset impairments should be readdressed.
• Further guidance should be implemented to foster the use of sound judgment.
Accounting standards should continue to be established to meet the needs of investors.

Formal measures to address the operation of existing accounting standards in practice should be established.

Accounting for investments in financial assets should be simplified.

.112 The changes in fair value accounting standards and the FASB standard setting process that could occur due to the results of this report will be seen in the coming months and years. The full text of the Report and Recommendations Pursuant to Section 133 of the Emergency Economic Stabilization Act of 2008: Study on Mark-To-Market Accounting can be accessed at the SEC Web site at www.sec.gov/news/studies/2008/marktomarket123008.pdf.

Measurements of Fair Value in Illiquid Markets

.113 In the current economic environment significant issues exist related to fair value measurement in illiquid or inactive markets. To provide guidance regarding these issues, the SEC and FASB issued a joint document, SEC Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting (SEC and FASB Press Release) on September 30, 2008, that contains clarifications on fair value accounting in the current marketplace. This guidance can be found at www.sec.gov/news/press/2008/2008-234.htm.

.114 Given the state of the market, confusion exists regarding the use of market quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are in actuality distressed sales. In October, 2008, FASB issued FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, which clarifies FASB Statements No. 157’s application in an inactive market and also amends the standard to include an illustrative example.

.115 FSP FAS 157-3 noted,

Broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset. In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.

.116 Two other factors to consider when considering the reliability of a quote are whether it can be determined that market participants currently are transacting at that price and the appropriateness of the valuation technique employed by the pricing service to arrive at the quoted price.

.117 As discussed in paragraph 7 of FASB Statement No. 157, “an orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).” Low transaction volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. The market would still be considered active as long as the frequency and volume of transactions are sufficient to provide reliable pricing information. Additionally, the size of an entity’s position should not be a factor in this determination. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

.118 If transaction volume is too low to provide accurate pricing information and therefore not a level 1 input, those observable transactions are to be considered level 2 inputs or even level 3 inputs if they are significantly adjusted. In October 2007, the AICPA Center for Audit Quality (CAQ) issued a white paper, Measurements of Fair Value in Illiquid (or Less Liquid) Markets, as noted in CAQ alert #2007-51. This white paper noted that some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” In describing an inactive market as well, the SEC and FASB Press Release noted, “A significant increase in the spread between the amount sellers are ‘asking’ and the price that buyers are ‘bidding,’ or the presence of a relatively
small number of ‘bidding’ parties, are indicators that should be considered in determining whether a market is inactive.”

.119 The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “[I]n cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB Press Release noted, “in some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs it may be appropriate to utilize an estimate based primarily on unobservable inputs.”

.120 When significant adjustments are made to an observable input (level 2), it becomes a level 3 fair value measurement. The level of activity in the market in which transactions occur (that is, whether the market is active or inactive) is an indicator of the extent to which the entity will have relevant observable market data that will not require a significant adjustment in its determination of fair value.

.121 Paragraph C85 of FASB Statement No. 157 states that “the reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transaction or assumptions that are reasonably available without undue cost and effort.

.122 The FSP concluded, “the use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted, “In some cases, multiple inputs from different sources may collectively provide the best evidence of fair value. In these cases expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.”

.123 Readers are encouraged to review the full text of the FSP and the amended standard (inclusive of its recently added illustrative example) on the FASB Web site at www.fasb.org. The FSP was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.

Valuation Resource Group

.124 FASB has established the Valuation Resource Group (VRG), which provides FASB staff with information on the existing implementation issues surrounding fair value measurements used for financial statement reporting purposes and the alternative viewpoints associated with those implementation issues. Any authoritative decisions are subject to FASB’s normal, open due process. A summary of the VRG’s discussions is available on FASB’s Web site at http://72.3.243.42/project/valuation_resource_group.shtml.

Derivative Instruments and Hedging Activities

Credit Derivatives

.125 Credit derivatives are an investment vehicle that has received quite a bit of press recently, mainly as related to credit default swaps. This investment presents challenges because they are not generally exchange traded or settled and because, by definition, credit derivatives rely on the value of other events or instruments and significant judgment about current and future conditions. The valuation of these
instruments involves assumptions that are highly subjective. In addition, when evaluating credit derivatives, counterparty default risk is an important factor to consider. Due to the issues around credit derivatives, the SEC chairman has asked the U.S. Congress to provide the statutory authority necessary for government oversight of the credit default swap market. Regulators are taking steps to set up a central clearinghouse for the credit derivatives market to assist in this oversight. Readers should remain alert to further developments.

**Derivative Disclosures**

.126 In March 2008, FASB issued FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. The standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity’s financial position, financial performance, and cash flows.

.127 The standard improves transparency about the location and amounts of derivative instruments in an entity’s financial statements; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*; and how derivative instruments and related hedged items affect the entity’s financial position, financial performance, and cash flows.

.128 FASB Statement No. 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity’s liquidity by requiring disclosure of derivative features that are credit risk–related. Finally, it requires cross-referencing within footnotes to enable financial statement users to locate important information about derivative instruments.

.129 It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. FASB has since, in FSP FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161*, clarified the effectiveness provisions to include annual financial statements including the final interim period of the year. The FSP is intended to improve disclosures about credit derivatives by requiring more information about the potential adverse effects of changes in credit risk on the financial position, financial performance, and cash flows of the sellers of credit derivatives.

**Other Recently Issued Guidance**

**FSP FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions**

.130 In February 2008, FASB issued FSP FAS 140-3, which was intended to address questions about the accounting for a repurchase agreement relating to a previously transferred financial asset. Specifically, it addresses whether circumstances existed that would permit a transferor and transferee to evaluate the accounting for a transfer of a financial asset separately from a repurchase financing under FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*, when the counterparties to the two transactions are the same. The FSP presumes that an initial transfer and repurchase financing are part of the same arrangement and provides certain criteria which, if met, allow the two transactions to be evaluated separately under FASB Statement No. 140. Among the criteria are the following:

- The two transactions have a valid and distinct business purpose for being entered into separately.
- The initial transfer and repurchase financing are not contractually contingent upon one another, and the pricing and performance of either transaction is not dependent on the terms and execution of the other.
The repurchase financing provides the initial transferor with recourse to the initial transferee upon default, not solely to the market risk of the transferred asset.

The financial asset subject to the transactions is readily obtainable in the marketplace, and the transactions are executed at market rates.

The maturity of the repurchase financing must be before the maturity of the financial asset.

.131 The FSP is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those years. Refer to the FASB Web site for the full text of this FSP.

**FSP APB 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)**

.132 FSP APB 14-1 was issued on May 9, 2008. This staff position clarifies that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) are not addressed by paragraph 12 of Accounting Principles Board Opinion No. 14, Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants. This guidance also specifies that issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity’s nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. Additionally, this guidance nullifies or amends a number of EITF Issues. The full text of FSP APB 14-1 is available on the FASB Web site at www.fasb.org.

**FSP FAS 140-4 and FIN 46(R)-8, Disclosures by Public Entities (Enterprises) about Transfers of Financial Assets and Interests in Variable Interest Entities**

.133 FASB issued FSP FAS 140-4 and FIN 46(R)-8 in December 2008. The document increases disclosure requirements for public companies for reporting periods that end after December 15, 2008.

.134 The purpose of this FSP is to promptly improve disclosures by public entities and enterprises until the pending amendments to FASB Statement No. 140 and FIN 46(R), Consolidation of Variable Interest Entities (revised December 2003)—an interpretation of ARB No. 51, are finalized and approved by the board. Effective at the end of the first reporting period (interim and annual) after issuance of the FSP for public entities, the FSP amends FASB Statement No. 140 to require public entities to provide additional disclosures about transfers of financial assets and variable interests in qualifying special-purpose entities. It also amends FIN 46(R) to require public enterprises to provide additional disclosures about their involvement with variable interest entities.

.135 See the FASB Web site for complete information.

**Convergence With International Financial Reporting Standards**

.136 Since the signing of the Norwalk Agreement by FASB and International Accounting Standards Board (IASB) the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and IFRS. A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

.137 FASB and the IASB have undertaken several joint projects being conducted simultaneously to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project go to www.fasb.org and www.iasb.org.
SEC Eases Acceptance of IFRS Financial Statements

.138 On December 21, 2007, the SEC took a major step towards easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.139 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

.140 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS Roadmap

.141 On August 27, 2008, the SEC voted to publish for public comment a proposed roadmap (which was released on November 14, 2008) that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

.142 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016. The 90-day comment period ends on February 19, 2009.

.143 The proposed roadmap sets forth seven milestones that will influence the SEC’s decision to adopt IFRS for all filers. These milestones relate to: improvements in accounting standards, the accountability and funding of the International Accounting Standards Committee Foundation, the improvement in the ability to use interactive data for IFRS reporting, education and training relating to IFRS, limited early use of IFRS where this would enhance comparability for U.S. investors, the anticipated timing of future rulemaking by the SEC, and the implementation of the mandatory use of IFRS by U.S. issuers.

.144 Additionally, the roadmap proposes two alternatives for U.S. issuers that elect to use IFRS to disclose U.S. GAAP information. Proposal A suggests a U.S. issuer that elects to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS called for under IFRS 1, First-time Adoption of International Financial Reporting Standards, in a footnote to its audited financial statements. This information would include the restatement of and reconciliation from prior year’s financial statements and the related disclosures.

.145 Proposal B suggests that U.S. issuers that elect to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS required under IFRS 1. They would also disclose on an annual basis certain unaudited supplemental U.S. GAAP financial information covering a three-year
period. This unaudited supplemental financial information would be in the form of a reconciliation from IFRS to U.S. GAAP.

.146 The roadmap does not address how the SEC would mandate IFRS; however, an option noted would be “for the FASB to continue to be the designated standard setter for purposes of establishing the financial reporting standards in issuer filings with the Commission. In this option our presumption would be that the FASB would incorporate all provisions under IFRS, and all future changes to IFRS, directly into GAAP as used in the United States. This type of approach has been adopted by a significant number of other jurisdictions when they adopted IFRS as the basis of financial reporting in their capital markets.”

.148 Readers of this alert should note that the proposed roadmap does not apply to investment companies under the Investment Company Act of 1940, nor to other types of financial reports filed with or furnished to the SEC by regulated entities, such as registered brokers and dealers.

**AICPA Launches IFRS.com Web Site**

.149 The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

.150 To assist in both awareness building and education the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

.151 Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

.152 The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, CPE courses and live conference training, helpful links, and assistance for audit committee members.

**FASB Accounting Standards Codification™**

.153 On January 15, 2008, FASB launched the verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.154 The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the extended verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. On July 1, 2009, FASB will supersede all then-existing
non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB ASC can be accessed at http://asc.fasb.org/home.

.155 Constituents are encouraged to use FASB’s online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

.156 The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating FASB ASC Research System and performing accounting research.

Summary of Recent Accounting Pronouncements and Related Guidance

.157 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

.158 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the securities industry have been briefly explained in this alert. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The Comprehensive Audit Risk Alert—2008 and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

Recent AICPA Independence and Ethics Pronouncements

.159 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.160 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the securities industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards. The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Auditing Pipeline—Nonissuers

ASB Clarity Project

.161 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards) to apply the clarity drafting conventions and to converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board.

.162 The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted standards are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the Clarity Project Explanatory Memorandum and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

Auditing Pipeline—Issuers

.163 In October 2008, the PCAOB proposed seven new auditing standards to update and supersede the current risk assessment standards, which will be available for comment through February 18, 2009. The PCAOB chairman noted the proposals demonstrate the view that the risk of fraud is a central part of the audit process and not a separate consideration. The proposed standards integrate the risk assessment standards with the standard for the audit of internal control over financial reporting. Many of the International Auditing and Assurance Standards Board’s risk assessment standards were utilized in creating these proposed standards and efforts were made to reduce any unnecessary differences.

.164 These proposed standards each have a statement of objective for the auditor, which were loosely adapted from the International Auditing Standards. This is an example of the move in the United States from rules-based to principles-based accounting and auditing standards as these objectives do not state required outcomes. The seven proposed standards are as follows:

- Audit Risk in an Audit of Financial Statements
- Audit Planning and Supervision
- Identifying and Assessing Risks of Material Misstatement
- The Auditor’s Responses to the Risks of Material Misstatement
- Evaluating Audit Results
- Consideration of Materiality in Planning and Performing an Audit
- Audit Evidence

.165 As with any new auditing standard or amendment to a PCAOB standard, after adoption by the PCAOB the standards will be submitted to the SEC for approval.

.166 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk).
Accounting Pipeline

.167 A number of accounting projects and pronouncements are currently in progress. Those specifically related to the securities industry or those related to recent industry conditions are briefly summarized in the following paragraphs. For a summary of additional significant accounting projects and pronouncements, refer to the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
- Income tax convergence project
- Leases project
- Reporting discontinued operations project
- Going concern proposed statement
- Subsequent events proposed statement
- Amendments to FIN 46(R) proposed statement

This alert includes discussion of some of these projects in the following sections.

Going Concern

.168 In October 2008, FASB issued an exposure draft of a proposed statement on going concern. The comment deadline was December 8, 2008. Currently, as discussed in the “Audit and Attestation Issues and Developments” section, the guidance on going concern is covered in AU section 341 and not in accounting literature. As discussed in the exposure draft, “The Board believes that accounting guidance about the going concern assumption should be directed specifically to management of a reporting entity because management is responsible for preparing an entity’s financial statements and evaluating its ability to continue as a going concern.”

.169 This proposed statement would require management to consider all available information about the future when assessing whether a going concern assumption is appropriate. The time horizon for this consideration is defined as at least, but not limited to, 12 months from the end of the reporting period, rather than the current limit of one year beyond the date of the financial statements. The proposal also requires disclosures when substantial doubt exists as to an entity’s ability to continue as a going concern. The AICPA formally commented on this exposure draft and that comment letter can be read at www.fasb.org/ocl/1650-100/53021.pdf. Readers are also encouraged to review the exposure draft of this standard on the FASB Web site.

Subsequent Events

.170 On October 9, 2008, FASB also issued a proposed statement, Subsequent Events. This proposed statement establishes general accounting and disclosure standards for events that occur subsequent to the balance sheet date but before financial statements are issued or available to be issued. It would also require disclosure of the date through which management has evaluated subsequent events. The comment period ended in December.
Transfers and Servicing of Financial Assets and Liabilities

.171 FASB is working on a project to amend FASB Statement No. 140 to simplify the guidance on accounting for transfers of financial assets to improve consistency and transparency in financial reporting. This project is being performed largely in conjunction with the separate project on the reconsideration of FIN 46(R). The combined effect of the amended guidance would result in a restriction of the use of off-balance sheet accounting for securitized debt.

.172 On September 15, 2008, FASB issued two proposed statements. The first, revised exposure draft Accounting for Transfers of Financial Assets—an Amendment of FASB Statement No. 140, would remove the concept of a qualifying special purpose entity (QSPE) and remove the exceptions from applying FIN 46(R) to QSPEs. In addition, FASB Statement No. 140 would be amended to revise and clarify the derecognition requirements for transfers of financial assets and the initial measurement of beneficial interests that are received as proceeds by a transferor in connection with transfers of financial assets. Enhanced disclosure requirements are also included.

.173 In conjunction with the proposed statement discussed in the previous paragraph, FASB issued a second proposed statement, Amendments to FASB Interpretation No. 46(R), which proposes stricter guidelines that would require additional assessments to determine which entity receives the benefits from the assets and would therefore include them in its financial statements.

.174 Both of these proposed statements would be effective as of the beginning of each reporting entity’s first fiscal year beginning after November 15, 2009. Earlier application would be prohibited.

Proposed FSP ARB 43-a

.175 The proposed FSP ARB 43-a, Amendment of the Inventory Provisions of Chapter 4 of ARB No. 43, was issued on May 1, 2008. This proposed staff position would require that inventories included in an entity’s trading activities be initially and subsequently valued at fair value with changes in fair value being recognized in earnings. The comment period ended June 16, 2008, and the final FSP is expected to be issued in the first quarter of 2009. For more information visit www.fasb.org/project/trading_inventory.shtml.

Proposed FASB Emerging Issues Task Force Issues and Staff Positions

.176 Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.177 Proposed FSPs. A number of additional proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.178 The following are various resources that practitioners engaged in the securities industry may find beneficial.

Publications

.179 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide Brokers and Dealers in Securities (2008) (product no. 012708kk [paperback], WBR-XXkk [online with associated Audit Risk Alert], or DBR-XXkk [CD-ROM with the associated Audit Risk Alert])
- Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])

AICPA Audit and Accounting Manual AAM §8110.179
• Audit Guide Assessing and Responding to Audit Risk in a Financial Statement Audit (2006) (product no. 012456kk [paperback] or WRA-XXkk [online])
• Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (2008) (product no. 012528kk [paperback], WDI-XXkk [online], or DDI-XXkk [CD-ROM])
• Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XXkk [online], or DAS-XXkk [CD-ROM])
• Audit Guide Service Organizations: Applying SAS No. 70, as Amended (2008) (product no. 012778kk [paperback], WSV-XXkk [online], or DSV-XXkk [CD-ROM])
• Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])
• Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])
• Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk [paperback])
• Audit Risk Alert Understanding the New Auditing Standards Related to Risk Assessment (product no. 022526kk [paperback])
• Checklists and Illustrative Financial Statements for Corporations (product no. 008939kk [paperback] or WCP-CL [online])
• Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])
• Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XXkk [online])

Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

• Financial Reporting Alert Current Accounting Issues and Risks—2008 (product no. 029208kk)
• Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk)

AICPA reSOURCE: Accounting and Auditing Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

• AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
• SEC Reporting (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.
• Annual Public Company Update: SEC, PCAOB, and AICPA Developments (product no. 731884kk [text]). Identify recent SEC and PCAOB rules and guidance as well as other developments that affect filings or engagements for this reporting cycle.

• International Versus U.S. Accounting: What in the World is the Difference? (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

• The International Financial Reporting Standards: An Overview (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.183 AICPA CPEExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the securities industry include the following:

− FIN 46R—Variable Interest Entity Consolidation Rules
− SEC Reporting
− SEC/PCAOB Quarterly (and Annual) Updates

To register or learn more, visit www.cpa2biz.com.

Webcasts

.184 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

IFRS Quarterly Webcast Series

.185 The IFRS Quarterly Webcast Series, brought to you each calendar quarter is part of a multistep educational process to get practitioners, financial managers, and auditors up to speed on all aspects of IFRS implementation. Over the course of the quarterly series, IFRS standards will be covered in depth. International harmonization is quickly approaching, and this series will help both accountants and auditors stay abreast of the developments and the changes they will need to implement.

CFO Quarterly Roundtable Series

.186 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.
SEC Quarterly Update Series

.187 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.188 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.189 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.190 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conference

.191 The National Securities Industry Conference is held in the fall of each year. Cosponsored by the AICPA and the Financial Management Division of SIFMA, this two-day conference is designed to update attendees on recent developments related to the securities industry and includes accounting, auditing, industry, and regulatory developments. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

The CAQ

.192 The CAQ, which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.193 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit thecaq.aicpa.org.
AICPA Industry Expert Panel—Stockbrokerage and Investment Banking

.194 For information about the activities of the AICPA Stockbrokerage and Investment Banking Industry Expert Panel, visit the panel’s Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_stockbroker_investbank.htm.

Industry Web Sites

.195 The Internet covers a vast amount of information that may be valuable to auditors of securities industry entities, including current industry trends and developments. Some of the more relevant sites for auditors with securities industry clients include those shown in the following table:

<table>
<thead>
<tr>
<th>Organization</th>
<th>Web Site</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commodity Futures Trading Commission (CFTC)</td>
<td><a href="http://www.cftc.gov">www.cftc.gov</a></td>

**AICPA Audit and Accounting Manual**
AAM Section 8120

Not-for-Profit Entities Industry Developments—2009

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of not-for-profit entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform. This Audit Risk Alert also can be used by an entity’s internal management to address areas of audit concern.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Susan Stewart

How This Alert Helps You

01 This Audit Risk Alert (alert) helps you plan and perform your audits of not-for-profit entities (NFPs). This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information
about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

.02 Certain accounting guidance referenced in this alert has been codified into the Financial Accounting Standards Board (FASB) Accounting Standards Codification™ (ASC). FASB is expected to issue FASB ASC as authoritative effective July 1, 2009, at which time it will become the source of authoritative U.S. accounting and reporting standards, in addition to guidance issued by the Securities and Exchange Commission (SEC), for nongovernmental entities. FASB ASC will supersede all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. Once effective, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC will become nonauthoritative. See the discussion of FASB ASC in the “Accounting Issues and Developments” section of this alert.

Audit Risk

.03 It is essential that the auditor understand the meaning of audit risk and the interaction of audit risk with the objective of obtaining sufficient appropriate audit evidence. In AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), audit risk is broadly defined as the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of the risk (both inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and the risk (detection risk) that the auditor will not detect such misstatements.

.04 The auditor’s combined assessment of inherent risk and control risk is described as the risks of material misstatement. The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed.

.05 As set forth in paragraph .12 of AU section 312, the auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures. Furthermore, paragraph .19 of AU section 312 explains that the auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor to express an opinion on the financial statements as a whole at an appropriately low level of audit risk.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.06 AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), establishes requirements and provides guidance about implementing the second standard of field work, as follows: “The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.” Obtaining this understanding is further complicated by the rapidly changing economic environment. In accordance with paragraph .04 of AU section 314, the auditor’s primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

.07 The auditor’s understanding of the entity and its environment consists of an understanding of the following:

- Industry, regulatory, and other external factors
Nature of the entity

Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements

Measurement and review of the entity’s financial performance

Internal control, which includes the selection and application of accounting policies

.08 Appendix A of AU section 314 contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment relating to the categories previously discussed. Understanding the effects of the current economic climate on each specific audit client is a key step in designing the audit plan.

.09 Business risks result from conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies. The setting of inappropriate objectives and strategies also results in business risks. Just as the external environment changes, the handling of the entity’s business also is dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement; however, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements; however, not all business risks give rise to risks of material misstatement.

.10 Additionally, NFPs may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces). Additionally, NFPs exist for a variety of exempt purposes, serve a variety of customers, and operate under a vast array of business models. As a result of the diversity within the NFP community, it is critical that the auditor gain an understanding of the specific entity to be audited and the risks inherent to that entity. After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions (including net asset classifications), account balances, and disclosures based on that understanding. Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The Current Economic Crisis

.11 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on an entity’s financial statements.

.12 Currently, the U.S. economy continues to experience severe instability. The National Bureau of Economic Research officially declared that, as of December 2007, the United States slid into a recession. The length of the recession and whether the United States will enter into a depression are yet to be determined. Some key occurrences that exhibit the gravity of the economic crisis include the following:

- Federal government intervention in the private sector has increased. Numerous financial institutions and automakers have received bailouts from the government.
- Millions of households owe more on their mortgages than their homes are currently worth. The number of residential home foreclosures continues to increase.
- The number of jobless claims continues to increase.

AICPA Audit and Accounting Manual

AAM §8120.12
U.S. real gross domestic product (GDP), the broadest measure of economic activity, continues to decrease at an increasing rate.

The financial markets continue to experience instability—historic lows followed by rallies. In March 2009, both the S&P 500 and the Dow Jones Industrial Average reached their 12-year lows, and the NASDAQ closed at its lowest point since October 2002.

The Federal Reserve has continued to decrease the federal funds interest rate.

The demand for U.S. Treasury bills has increased at a staggering rate, which drove the interest rate for these Treasury bills to less than 1 percent in March 2009.

The Treasuries-Over-Euro-Dollar Spread reached 4.63 percent in October 2008, a historic high, before returning to 1.04 percent in March 2009.

These key economic indicators further illustrate the severity of the recessionary period that the United States is experiencing.

Key Economic Indicators

The GDP measures output of goods and services by labor and property within the United States. It increases as the economy grows or decreases as it slows. According to advance estimates of the Bureau of Economic Analysis, real GDP decreased at an annual rate of 6.1 percent in the first quarter of 2009. This data indicates a continuation of the slowing of the economy seen in the fourth quarter of 2008, which experienced a decrease of 6.3 percent.

The unemployment rate continues to rise steadily. In April 2009, the unemployment rate was 8.9 percent, representing approximately 13.7 million people. Over the past year, since April 2008, the number of unemployed persons has increased by about 6.0 million or 3.9 percentage points.

As of March 2009, the Federal Reserve had decreased the target for the federal funds rates more than 5.0 percentage points to less than 0.25 percent. The Federal Reserve noted in its March 18, 2009 press release that “economic conditions are likely to warrant exceptionally low levels of the federal funds rate for an extended period.”

Government Intervention to Curtail the Economic Crisis

The U.S. government has taken unprecedented actions to prevent worsening economic conditions, including passing the American Recovery and Reinvestment Act (ARRA) in February 2009, and the Emergency Economic Stabilization Act of 2008 (EESA), facilitating the sale of ailing banks and dramatically increasing the monetary programs available from the Federal Reserve. The results of these actions have not been fully realized to date.

The American Recovery and Reinvestment Act of 2009

In February 2009, President Obama signed legislation designed to work hand in hand with the EESA to stimulate the U.S. economy. The ARRA is designed primarily to combat the rising unemployment trends, put more money in the hands of consumers, and reduce the likelihood that state and local governments will need to raise taxes significantly. According to the White House press release, the legislation will do the following:

- Create or save 3.5 million jobs in the next 2 years
- Provide direct tax relief to working and middle class families
- Double the U.S. renewable energy generating capacity over 3 years
- Stimulate private investment in renewable energy through tax credits and loan guarantees
- Invest $150 billion in U.S. infrastructure projects
• Provide funds to U.S. state and local governments to support health and education programs

.19 Many of the provisions of this legislation took effect immediately in an effort to stimulate consumer spending and boost the economy. The total cost of the spending in the ARRA is $787 billion, which is in addition to the $700 billion in the EESA. Many economists are concerned that further financial support may be necessary before an economic recovery is possible. Additionally, the federal government developed the Web site www.recovery.gov to facilitate a transparent process to ensure accountability for the execution of the package.

Other Government Intervention

.20 The EESA, which was signed into law in October 2008, states in Section 2 of the bill, it “provide[s] authority to the Treasury Secretary to restore liquidity and stability to the U.S. financial system and to ensure the economic well-being of Americans.” Primary components of the EESA bill include the following:

• An allocation of $700 billion to stabilize the U.S. financial system
• The creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that receive government aid
• An increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion
• A temporary increase of Federal Deposit Insurance Corporation insurance limits
• The creation of a tax modification for Fannie Mae and Freddie Mac stock losses
• The restatement of the SEC’s authority to suspend the application of FASB Statement No. 157, Fair Value Measurements, which is codified at FASB ASC 820, Fair Value Measurements and Disclosures
• The requirement of the SEC to conduct a study on the impact and effects of FASB Statement No. 157

.21 The EESA authorized the U.S. Treasury to create the Troubled Assets Relief Program (TARP), the original intent of which was to use $700 billion to purchase illiquid mortgage assets from banks. As part of TARP, the Capital Purchase Program (CPP) was intended to inject $250 billion of capital into banks. Half of the CPP funds were distributed to 9 of the largest financial institutions in the nation, which held approximately 55 percent of U.S. banking assets. The other half of the funds were allocated for smaller financial institutions. The clear intent of the CPP was for the participating banks to increase lending; however, many question if the banks have responded accordingly.

.22 In addition to bailout funds targeting financial institutions, a $17.4 billion rescue package for the U.S. automakers was issued in December 2008. The first $13.4 billion was lent to the automakers immediately, and the remaining $4 billion was lent in subsequent months. The U.S. government will continue to work directly with automakers and also will receive nonvoting warrants from automakers that accept taxpayer funding.

.23 The complete effects of the ARRA, as well as the other government interventions, will take time to be felt throughout the economy; however, the primary goal is to increase market confidence and liquidity.

The State of NFPs

.24 The not-for-profit sector continues to play a large role in the world economy. Currently, 1.5 million NFPs are registered with the IRS. Contributions to these entities in 2007 exceeded $306 billion, whereas total revenues in the sector approached $2 trillion, and assets topped $4.1 trillion as of December 2008. According to U.S. Department of Labor (DOL) statistics, 27 percent of the population, or 62 million people in the United States, did volunteer work for NFPs.

---

The Philanthropic Giving Index (PGI), established by the Center on Philanthropy at Indiana University, measures trends and expectations in United States charitable giving. The index showed a 27 percent decline during 2008, which reflects the economic turbulence during that period.

NFPs face daunting challenges during this economic downturn. Although contributions to NFPs are decreasing, demand for the services they provide is increasing. The value of endowments, which some entities rely on for support, may have decreased substantially, in some cases, to a point below historic cost, thereby reducing or eliminating much needed funding. As a result, some NFPs may be forced to reduce their workforce or cut back programs and services. Of particular concern is a lack of availability of affordable lines of credit; increased competition for a smaller pool of contributions; maintaining effective internal controls with a reduced staff; and an increase in delayed or uncollectible pledges, grants, or accounts receivable.

Governance and Accountability

Since the enactment of the Sarbanes-Oxley law in 2002, a number of accounting fraud cases have come to light. Some attribute the increase to improved detection as a result of the stringent internal control testing requirements and other provisions of the law, such as whistle-blower hotlines. Although the whistle-blower and document retention provisions currently apply to both publicly held companies and NFPs, discussions are ongoing regarding transparency and the role of governance in NFPs. One result of these discussions is the focus on disclosure of information about the governing board and policies of NFPs in the redesigned IRS Form 990, Return of Organization Exempt from Income Tax, which is still required to be available for public inspection.

Grant Thornton recently issued their 2008 survey of 652 top level representatives of religious, social and human services, cultural, and health care entities; educational institutions; and trade and professional associations in 42 states and the District of Columbia. According to the survey, 92 percent of NFPs that participated in the survey have made changes to their policies with the goal of improving governance and accountability. The policies that the majority are rewriting or establishing include conflict of interest, investment, code of ethics, records retention, whistle-blower, gift acceptance, review of tax filings, and new board member policies. Most of those surveyed have also developed an accounting policies and procedures manual, established an audit committee to oversee the financial statement audit and monitor internal controls, and included a CPA on their governing board or audit committee.

Corporate Sponsors

Corporate giving increased by almost 1.9 percent in 2007, although it represents only 5.1 percent of the total giving for a total of $15.7 billion. In-kind giving also continues to increase. More than one-third of corporate giving is in-kind. In some circumstances, resources received from corporations are advertising or sponsorship arrangements rather than straightforward monetary contributions, and often, strings are attached to the transfer. Specifically, the corporation may require goods or services in exchange for those funds, such as naming rights, discounted access to services, and advertisement of the company, among others. Because these transactions may be considered exchange transactions, contributions, or both, not-for-profits must be sure that the transactions are properly recorded in their books.

Embedded Giving

Embedded giving, which builds a gift to an NFP into an ordinary consumer purchase, has become a fast growing fundraising practice and an area that has drawn some attention from Congress. Although this practice is effective at raising funds on behalf of charities, issues exist regarding accountability for those funds. NFPs may not be aware that money is being solicited in their name. In addition, they may not know to what portion of the collected funds they are entitled or when they will receive the funds. Consumers may find it difficult to determine whether the money is going to the designated NFP.
Funding Administrative Costs

.31 Foundations, corporations, and individuals may have different priorities when it comes to selecting an NFP to support. Some may consider the entity’s mission, its reputation, the number of people served, or even who else supports it. One factor that frequently receives significant consideration is the percentage of each dollar that is spent on programs. Many donors have the perception that the biggest impact they can make with their contribution is by supporting only programmatic activities. Accordingly, operating expenses such as the accounting department, maintenance and utilities, and the executive management staff often must be supported by unrestricted dollars. Some entities follow policies for cost allocations, charges, assessments, or assignments that result in some amount of program-restricted contributions used for operating expenses. Entities and their auditors should be careful to understand the administrative allocation process and whether overhead costs can be paid for with restricted contributions. In addition, some NFPs are more frequently requesting funding for organizational administration either as a component of or in addition to their requests for program funding. Auditors should develop a full understanding of the terms of these agreements, including whether they result in restrictions on the use of the funds.

Changing Face of Donors

.32 Recently, the desire for control and “a say in” the direction of the mission of entities by young donors has increased. Though no statistics are available, a general belief is that younger, affluent donors want to participate as donors and volunteers to the entities that they support more than their older counterparts. They are more likely to want elements of control as conditions of their gifts. Anonymous giving is also increasing. A study conducted by Indiana University reveals that anonymous gifts greater than $5 million increased from 13 gifts in 2005 to 27 gifts in 2006 and 37 gifts in 2007. Possible reasons for the increase are safety concerns of the donors, adherence to religious principles, a desire to avoid solicitations from other entities, and avoidance of family conflicts. Issues of donor privacy may present unusual problems for auditors as they attempt to confirm the amount and terms of these substantial gifts.

International Giving

.33 The level of international giving by U.S. foundations in 2007 reached a record $5.4 billion. This figure represents a growth rate more than double that of total foundation giving since 2002. Due to the size and missions of these foundations, it is unlikely that the level of giving will decrease despite the current economic situation. An important consideration for auditors is the impact of grant compliance measures related to funding projects in other countries.

Retiring Work Force

.34 The demographic shift in the workplace, as baby boomers near retirement, is affecting the not-for-profit sector. Surveys indicate that 50–70 percent of executive directors plan to leave within 5 years. Many are founders and leaders, closely identified with their entities.

.35 As the sector already suffers from fragile infrastructures, the transitions are expected to be hugely disruptive. Many NFPs devote resources to programmatic functions and do not have executives in training to replace these positions. Succession planning is not seen as a priority.

.36 Auditors may want to consider how the retirement of a key employee, such as the executive director, will affect the NFP’s internal control procedures, its ability to generate revenues and control expenses, and how the entity will address these issues when they arise.

Cyber Donations

.37 The Internet has become the quick and easy means of providing and accessing information. It has also become a tool to expand the audience of NFPs in a way that appeals to younger and more technologically savvy donors. The Internet has thousands of Web sites for NFPs, and most of them provide an opportunity
for a person to contribute. Many of these entities make use of services such as PayPal to permit donors to charge online donations to credit or debit cards. The money is then placed in an account similar to a bank account in the NFP’s name, and a fee is deducted. At some future time, the money is then electronically transferred to another bank account as specified by the NFP. This may be an area that auditors find worthy of attention in that the NFP’s internal controls that are required for these accounts may be different from those for deposit accounts at brick and mortar banks. For example, the entity may have controls regarding who is authorized to sign checks but may not have controls in place to safeguard usernames and passwords for accounts that allow transactions to be initiated through the Internet. One recent twist on both online and embedded giving is the advent of charity gift cards. The recipient of the gift card goes to the card’s Web site and designates which of the listed charities is to receive the donations. Some sites charge an administrative fee at the time of purchase, others when the card is redeemed.

The Independent Sector

.38 In January 2009, the Independent Sector, an advocacy organization for NFPs, released a document, Nonprofit Policy Proposals to Help Strengthen the Ability of Americans to Serve Our Society. The document calls on the Obama Administration and Congress to implement fair and responsible fiscal policies and ensure that government has adequate resources to support vital programs that sustain, protect, and strengthen communities. It also urges Congress to preserve and expand policies such as the Serve America Act and the IRA charitable rollover provision that helps Americans give back to their communities through service opportunities and giving incentives. Additional proposals address the importance of providing nonprofits with the capacity and capital to serve the needs of our communities; increasing the ability of Americans to speak out through NFPs; protecting international charitable activities; and supporting transparency and accountability. The full text of the document can be found at www.independentsector.org/programs/gr/2009_Nonprofit_Platform.htm.

Legislative and Regulatory Developments

IRS Activities

E-Postcard Required for Small Exempt Entities

.39 Beginning in 2008, exempt entities with gross receipts under $25,000 must make an annual electronic filing with the IRS using Form 990-N, Electronic Notification (e-Postcard) For Tax-Exempt Organizations Not Required to File Form 990 or 990–EZ. The e-Postcard is due in 2009 for tax years beginning on or after January 1, 2008. If an entity that is required to file fails to do so for three consecutive years, it will lose its tax exempt status. For more information and a link to the e-Postcard, go to www.irs.gov/charities/article/0,,id=169250,00.html.

Form 990 Redesigned for Tax Year 2008

.40 The IRS issued the final version of Form 990 for tax year 2008 (which will be filed in 2009). The stated goals of the IRS in redesigning Form 990 are enhancing transparency, promoting tax compliance, and minimizing the burden on the filing entity. The basic structure of the new form consists of an 11-page core form, which is to be completed by all filers, and 16 schedules designed by topic (lobbying, related parties, compensation, and so on). A transition period exists for smaller entities, which may allow them to use Form 990-EZ and for certain schedules pertaining to hospitals and tax-exempt bonds. There have also been substantial changes to the amount and type of information that is required on the new Form 990. Some of the more significant changes include the following:

- More questions regarding organizational governance practices
- Disclosure of information from the NFP’s audited financial statements
- Expansion of compensation information disclosures
- Expansion of disclosures regarding programs and activities of the NFP
The IRS issued instructions and a glossary for use with Form 990. More information, an electronic version of Form 990, and the related schedules are available at www.irs.gov/charities/article/0,,id=201398,00.html.

**Department of Treasury and IRS Issue Priority Guidance Plan for 2009**

Fiscal year 2009 priorities are addressed through a flexible and interdisciplinary array of new tools that focus on enforcement of the tax law and improving customer service. Priorities include the following:

- Implementing a voluntary compliance program for delinquent filers
- Addressing the issue of donor control and noncash contributions
- Continuing a variety of compliance projects that focus on areas such as charitable spending initiatives, gifts-in-kind, educational institutions, hospitals, and community foundations.
- Initiatives focused on identifying nonfilers in the gaming, employment tax, and tax-exempt entity areas
- A further focus on transparency and governance by tax exempt entities
- Developing a new compliance guide, known as a *cyber assistant*, and formal guidance on hot topics such as Form 990 revisions

Additional information on these and other topics is available at www.irs.gov/pub/irs-tege/finalannualrptworkplan11_25_08.pdf.

**Exempt Entity Abusive Tax Avoidance Transactions**

Tax-exempt entities, by definition, are exempt from federal income tax under various provisions of the Internal Revenue Code (IRC). However, some are directly involved in Abusive Tax Avoidance Transactions (ATATs). In addition, because they are tax-indifferent, tax-exempt entities are, at times, used by for-profit entities as accommodation parties in these transactions. Identifying and responding to ATATs involving tax-exempt entities is critical to the IRS objective of discouraging and deterring noncompliance within tax-exempt and government entities.

As a result of provisions included in the Tax Increase Prevention and Reconciliation Act (TIPRA) of 2005, the Treasury Department and IRS have issued proposed and temporary regulations under IRC Section 4965, which imposes excise taxes and disclosure requirements with respect to prohibited tax shelter transactions to which tax-exempt entities are parties. The regulations provide (1) rules regarding the form, manner, and timing of disclosure obligations, and (2) return requirements accompanying payment of excise taxes. The deadline for submitting comments on the proposed regulations has passed. IRS guidance addresses the following issues under this legislation:

- Which entities and individuals are subject to excise tax under the new provisions and which taxes and penalties may apply
- Who is a party subject to the new provisions, and the treatment of proceeds of transactions received before the effective date of the new provisions
- Disclosure and filing requirements

Additional information is available at www.irs.gov/charities/article/0,,id=172158,00.html.

**Certain Charitable Contributions Designated as Transactions of Interest Under Reportable Transaction Regulations**

In September 2007, the IRS issued Notice 2007-72, designating certain transactions as having the potential for tax avoidance or evasion and alerting participants to required disclosures and potential penalties.
In the transactions, a taxpayer transfers a membership interest in a limited liability company that directly or indirectly owns real property to a Section 501(c)(3) charitable entity or government entity, claiming a charitable contribution deduction for an amount significantly higher than the original purchase price paid by the taxpayer to acquire the interest. Charitable entities that receive property in these transactions after August 14, 2007 are participants in these transactions for the first year in which their tax returns reflect the acquired interest, which is generally the year of receipt of the interest. For that year, the charity must disclose certain information required by the reportable transaction regulations to the IRS or be subject to penalties as described in the notice. The IRS has begun notifying entities that have participated in these transactions that they have been selected for examination.

Prohibition Against Political Activities

.48 The prohibition against political campaign activity has been in effect for more than half a century and bars certain tax-exempt entities from engaging on behalf of or in opposition to political candidates. However, these entities can engage in advocating for or against issues and, to a limited extent, ballot initiatives or other legislative activities.

.49 The IRS’s goal is to educate the leadership of these entities to help them stay within the legal boundaries. In this regard, IRS Revenue Ruling 2007-41 outlines a number of scenarios to help charities and churches understand the ban on political campaign activity and actions that may arise.

.50 In addition to the revenue ruling, the IRS has other helpful information for churches and charities on its Web site, www.irs.gov/charities/index.html. For example, IRS Publication 1828, “Tax Guide for Churches and Religious Organizations,” contains a discussion of the law affecting political campaign activity by churches and religious institutions.

.51 Violation of the law can result in imposition of an excise tax or, in extreme cases, a loss of tax exempt status.

Employment Taxes and Classifying Workers

.52 In December 2007, the IRS issued Fact Sheet (FS) 2007-27 to help entities better understand their responsibilities regarding employment taxes and classifying workers. To access this guidance, which provides criteria to better understand the regulations, go to www.irs.gov/newsroom/article/0,,id=177092,00.html.

.53 Additionally, in November 2007, FS 2007-25 was issued, which outlines the IRS initiative regarding compliance with employer tax regulations. This initiative includes both IRS and various state workforce agencies that will work together and exchange information to improve taxpayer compliance in this complicated area.

Internet-Based Workshop for Exempt Entities

.54 The IRS has a Web-based version of its popular Exempt Organizations Workshop covering tax compliance issues confronted by small and mid-sized tax exempt entities.

.55 The free online workshop, Stay Exempt—Tax Basics for 501(c)(3)s, consists of five interactive modules on tax compliance topics for exempt entities:

• Tax-Exempt Status—How can you keep your 501(c)(3) exempt?
• Unrelated Business Income—Does your entity generate taxable income?
• Employment Issues—How should you treat your workers for tax purposes?
• Form 990—Would you like to file an error-free return?
• Required Disclosures—To whom do you have to show your records?
Users can access this new training program at www.stayexempt.org. Users can complete the modules in any order and repeat them as many times as they like. The online training Web site does not require registration, and its visitors will remain anonymous.

**Fast Track Settlement Program**

In December 2008, the IRS announced an opportunity for entities with issues under examination by the Tax Exempt and Governmental Entities Division (TE/GE) to use Fast Track Settlement (FTS) to expedite case resolution. The TE/GE FTS will enable TE/GE entities that currently have unresolved issues in at least one open period under examination to work together with TE/GE and the Office of Appeals (Appeals) to resolve outstanding disputed issues while the case is still in TE/GE jurisdiction. TE/GE and Appeals will jointly administer the TE/GE FTS process. TE/GE FTS will be used to resolve factual and legal issues, and it may be initiated at any time after an issue has been fully developed, but before the issuance of a 30-day letter or its equivalent. TE/GE FTS will be available to taxpayers for a pilot period of up to 2 years, beginning in December 2008. Upon completion of the 2-year pilot period, TE/GE and Appeals will evaluate the program, consider necessary adjustments, and determine whether to make the program permanent. More information is available at www.irs.gov/irb/2008-48_IRB/ar14.html#d0e2519.

**Resource Materials—Compliance Initiatives for Tax-Exempt Entities**

The Exempt Organization Division of the IRS has made materials available that were used in or which discuss its compliance initiatives including limited liability company projects, community foundations, bond compliance, hospitals, and executive compensation. You can find this material at www.irs.gov/charities/article/0,,id=162493,00.html.

**Listing of Published Guidance—2009**

Readers should be aware that the IRS Web site contains a digest of published guidance for tax exempt entities issued in 2009 at www.irs.gov/charities/content/0,,id=202419,00.html. The published guidance includes treasury regulations, revenue rulings, revenue procedures and notices, and announcements of recently published issues of interest to tax-exempt entities.

Additionally, the IRS Web site also contains an archive that presents digests of IRS published guidance of interest to tax-exempt entities for the years 1954–2008. The archived guidance can be found at www.irs.gov/charities/article/0,,id=151053,00.html.

**Uniform Prudent Management of Institutional Funds Act**

In July 2006, the National Conference of Commissioners on Uniform State Laws (NCCUSL) approved the Uniform Prudent Management of Institutional Funds Act (UPMIFA) and recommended it for enactment by the legislatures of the various states. UPMIFA is designed to replace the existing Uniform Management of Institutional Funds Act (UMIFA), which was approved by NCCUSL in 1972. The purpose of UMIFA was to provide uniform and fundamental rules for the investment of funds held by charitable institutions and the expenditure of funds donated as “endowments” to those institutions. The principles behind those rules were

- that assets would be invested prudently in diversified investments that sought growth as well as income, and
- that appreciation of assets could prudently be spent for the purposes of any endowment fund held by a charitable institution.

Since its creation, UPMIFA has been enacted in 47 states. In response to the increasing size and complexity of charitable endowments held in investments, UPMIFA was created based on the same principles. As of March 2009, UPMIFA has been enacted in 28 states and the District of Columbia and is pending legislation in 14 additional states.
In August 2008, FASB issued FASB Staff Position (FSP) FAS 117-1, *Endowments of Not-for-Profit Organizations: Net Asset Classification of Funds Subject to an Enacted Version of the Uniform Prudent Management of Institutional Funds Act, and Enhanced Disclosures for All Endowment Funds*, effective for fiscal years ending after December 15, 2008. The FSP

- provides guidance on the net asset classification of donor-restricted endowment funds for NFPs that are subject to an enacted version of UPMIFA. (As of March 15, 2009, 28 states and the District of Columbia had enacted a version of UPMIFA, with legislation pending in several other states.)
- improves disclosures about an NFP’s endowment funds (both donor-restricted and funds functioning as endowment), whether or not the NFP is subject to UPMIFA.

The first, and perhaps most significant question the FSP addresses is how UPMIFA’s elimination of the historic-dollar-value threshold—the amount below which an NFP could not spend under UMIFA—affects net asset classification. The FSP requires an NFP to classify a portion of a donor-restricted endowment fund (other than a term endowment) as permanently restricted net assets. That portion would be equal to the amount of the fund (a) that must be retained permanently in accordance with explicit donor stipulations, or (b) that, in the absence of such stipulations, the NFP’s governing board determines must be retained permanently, if any, under the relevant law. The NFP would be required to disclose its interpretation of the law. We anticipate that discussions among NFPs, accountants, attorneys, and regulators in the various individual states may lead to a consensus in those states determining what must be retained permanently under the law. If a governing board determines that the law requires maintenance of purchasing power of a donor’s gift, the NFP would increase permanently restricted net assets to the extent that the purchasing power of a dollar decreases or decreases permanently restricted net assets to the extent that the purchasing power of a dollar increases. (This would typically be done by adjusting permanently restricted net assets by an appropriate inflationary factor, such as the consumer price index [CPI] or higher education price index [HEPI].)

In contrast, an NFP would not subsequently decrease permanently restricted net assets because of investment losses or organizational spending from the endowment but would, instead, decrease temporarily restricted net assets, if available, or unrestricted net assets. The guidance on investment losses and spending is consistent with the guidance previously provided on investment losses in FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*, paragraph 12. FASB considered, but decided not to, change that guidance, noting that permanently restricted net assets should reflect the amount for which an NFP has a permanent fiduciary duty and not the amount that it has on hand at a financial statement date because of cumulative investment and spending decisions.

The FSP also addresses whether two other provisions in UPMIFA’s endowment spending guidelines impose temporary (time) restrictions on the portion of a donor-restricted endowment fund that would otherwise be considered unrestricted net assets:

- A provision that “[u]nless stated otherwise in the gift instrument, the assets in an endowment fund are donor-restricted assets until appropriated for expenditure by the institution”
- An optional provision for a rebuttable presumption that spending more than 7 percent of endowment market value is imprudent (Some states have included this provision, whereas others have not.)

The FSP requires NFPs to apply the guidance previously provided in Emerging Issues Task Force (EITF) Topic No. D-49, “Classifying Net Appreciation on Investments of a Donor-Restricted Endowment Fund,” included as an appendix to the FSP. EITF Topic No. D-49 stresses that not all legal restrictions on the use of particular assets result in restricted net assets for accounting purposes, only those that extend donor restrictions. An example of the latter would be a requirement to maintain the purchasing power of a donor’s endowment gift. Laws that refer to actions entirely within the purview of a governing board, such as acting to appropriate funds or exercising prudence do not, in and of themselves, extend donor imposed restrictions.

The other key provisions of the FSP focus on improving endowment disclosures both for donor-restricted and board-designated endowment funds. Aiming to improve transparency about endowments in an era of increased public scrutin, the FSP focuses on disclosures in four areas:
• Net asset classification (especially how that is affected by a governing board’s interpretation of relevant law)
• Spending policies
• Investment policies (especially their relationship with spending policies)
• Net asset composition and changes therein (especially the relationship of endowment spending to endowment size and growth)
• Reconciliation of beginning and ending balances of the endowment in total and by asset class

New Filing and Audit Requirements for ERISA-Covered 403(b) Employee Benefit Plans

.69 Beginning in 2009, employee benefit plans sponsored by charitable entities and schools under IRC Section 403(b) and covered under the Employee Retirement Income Security Act (ERISA) will be subject to the same reporting and audit requirements that currently exist for Section 401(k) plans. Section 403(b) plans are also commonly known as tax-shelter annuity plans. Under new U.S. DOL regulations issued in November 2007 amending the filing requirements for Form 5500, Annual Return/Report of Employee Benefit Plan, ERISA-covered 403(b) plans with 100 or more participants generally will be required to file audited financial statements beginning with their 2009 Form 5500 filing. 403(b) plans with fewer than 100 participants will be eligible to use abbreviated reporting forms without audited financial statements. The DOL estimates that approximately 7,000 403(b) plans will be subject to the new audit requirements and another 9,000 403(b) plans will be eligible for the waiver. The DOL regulations were published in the November 16, 2007 Federal Register and are available at www.dol.gov/ebsa/regs/fedreg/final/20071116.pdf. The AICPA Employee Benefit Plan Audit Quality Center (EBPAQC) (www.aicpa.org/EBPAQC) and Expert Panel have formed a joint task force to develop resources to help members with these new audit requirements.

Other Regulatory Activities

.70 The following list provides links to documents of interest for NFPs not discussed elsewhere in this alert. Readers should continue to monitor all activity involving the NFP sector.
• U.S. Department of the Treasury Anti-Terrorist Financing Guidelines: Voluntary Best Practices for U.S.-Based Charities at www.ustreas.gov/offices/enforcement/key-issues/protecting/charities-intro.shtml. This link also contains the Treasury’s response to comments submitted on the original guidelines. The Treasury has also issued a risk matrix to further assist in understanding and implementing these guidelines. The matrix can be found at www.ustreas.gov/offices/enforcement/ofac/policy/charity_risk_matrix.pdf.
• The Honest Leadership and Open Government Act of 2007 (September 2007) requires disclosures related to lobbying and earmarks. The full text of the bill can be found at www.thomas.gov/cgi-bin/bdquery/z?d110:s.00001:.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.71 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients in prior years. Some risks that may affect an entity in the current economic environment are as follows:
• Constraints on the availability of capital and credit
• Going concern and liquidity issues
• Marginally achieving explicitly stated strategic objectives
• Use of off-balance-sheet financing
• Special purpose entities, joint ventures, or other complex financing arrangements
• Volatile real estate markets
• The credit crisis, which results in significant measurement uncertainty, including accounting estimates and fair value measurements
• Operations that are exposed to volatile markets

.72 Although many of these risks are not new to NFPs, consideration of the ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, some possible audit responses to a significant risk of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still adequately addressed.

.73 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements, we cover in this alert the primary areas of concern affected by the current economic conditions. Continue to remain alert to economic, legislative, and regulatory developments as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

Auditor’s Use of Reports on Service Organizations

.74 Many entities use outside service organizations to accomplish tasks that affect the entity’s financial statements. Service organizations provide services ranging from performing a specific task under the direction of an entity to replacing entire organizational units or functions of an entity. Over time, there has been a significant increase in the use of service organizations. Because many of the functions performed by service organizations affect an entity’s financial statements, auditors performing audits of the financial statements of entities utilizing service organizations may need to obtain information about those services, the related service organization controls, and their effects on an entity’s financial statements.

.75 Examples of service organizations that perform functions that may affect other entities’ financial statements are bank trust departments that invest and service assets for employee benefit plans or, for others, lockbox service providers that collect and process payments such as contributions or dues; payroll processing companies that issue payroll checks and remit payroll taxes on behalf of an entity; mortgage bankers that service mortgages for others; and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions.

.76 An auditor may be engaged to issue a report on a service organization’s controls for use by user entities and their auditors. Statement on Auditing Standards (SAS) No. 70, Service Organizations, as amended (AICPA, Professional Standards, vol. 1, AU sec. 324), provides guidance to an auditor performing (1) an audit of a user entity’s financial statements, and (2) procedures at a service organization that will enable the auditor to issue a service auditor’s report on a service organization’s controls that may be part of user entities’ information systems. Although a service auditor’s report may be used by management of a service organization and its user entities, its primary purpose is to provide information to auditors who audit user entities’ financial statements.

.77 AU section 314 states that the auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. In certain situations, an entity’s internal control extends beyond the controls within its physical facility or internal operations. This can happen if an entity uses another organization to perform services that are a part of the entity’s information system. If a user auditor determines that the controls at a service organization are significant when assessing the risks of material misstatement of the user entity, the user
auditor should gain an understanding of the service organization’s controls sufficient to assess the risks of material misstatement.

.78 SAS No. 70, as amended, is not applicable to every control provided by the service organization. It is applicable only if the services provided are part of the user entity’s information system, and the related controls are included in the scope of the auditor’s examination. A service organization’s services are part of the user entity’s information system if they affect any of the following:

- The classes of transactions in the user entity’s operations that are significant to the user entity’s financial statements
- The procedures, both automated and manual, by which the user entity’s transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting the user entity’s transactions
- How the user entity’s information system captures other events and conditions that are significant to the financial statements
- The financial reporting process used to prepare the user entity’s financial statements, including significant accounting estimates and disclosures

.79 The guidance in SAS No. 70, as amended, is not relevant to situations in which

- the services provided are limited to executing the user entity’s transactions that are specifically authorized by the user, such as the processing of checking account transactions by a bank or the execution of securities transactions by a broker.
- the audit of transactions arising from financial interests in partnerships, corporations, and joint ventures, such as working interests in oil and gas ventures, when proprietary interests are accounted for and reported to interest holders.

Types and Content of Independent Service Auditors’ Reports

.80 A SAS No. 70 report is intended to provide information about the controls at a service organization that may be relevant to the user entity’s internal control as it relates to the user entity’s financial statements. A service auditor may provide a service organization with two types of reports:

1. A report on controls placed in operation, which will be referred to as a type 1 report in this alert.
2. A report on controls placed in operation and tests of operating effectiveness, which will be referred to as a type 2 report in this alert.

.81 Paragraph 24 of SAS No. 70 states that the type of engagement to be performed and the related report to be prepared should be established by the service organization. However, when circumstances permit, discussions between the management of the service organization and the managements of the user entities are advisable to determine the services or applications that will be covered by the report and the type of engagement and related report that will be most useful to the user entities and their auditors.

.82 A type 1 report is intended to provide user auditors with information about the controls at a service organization that may be relevant to a user entity’s internal control as it relates to an audit of financial statements. This information, in conjunction with other information about a user entity’s internal control, can assist the user auditor in obtaining a sufficient understanding of the user entity’s internal control to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures, as described in paragraphs .40–.101 of AU section 314. The user auditor obtains this understanding to enable him or her to (1) identify the types of misstatements that may occur in a user entity’s financial statements; (2)
consider the factors that affect the risks of material misstatement; (3) when applicable, design tests of controls; and (4) design substantive procedures. A type 1 report, however, is not intended to provide a user auditor with a basis for reducing his or her assessment of control risk to low or moderate. Paragraph 38 of SAS No. 70, as amended, presents an example of a service auditor’s report for a type 1 engagement.

.83 In a type 2 engagement, the service auditor performs the procedures required for a type 1 engagement and also performs tests of specific controls to evaluate their operating effectiveness in achieving specified control objectives. In accordance with paragraph .42 of AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1), tests of operating effectiveness include obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. The service auditor issues a report that includes the type 1 report opinions and refers the reader to a description of tests of operating effectiveness performed by a service auditor. The report states whether, in the opinion of the service auditor, the controls tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.

.84 If a service organization’s controls (the controls that may affect a user entity’s financial statements) are operating with sufficient effectiveness to achieve the related control objectives, a user auditor may be able to assess control risk low or moderate for relevant financial statement assertions affected by the service organization’s service or processing and, consequently, may be able to reduce the extent of substantive procedures performed for those assertions. To assess control risk low or moderate, a user auditor should consider the operating effectiveness of the relevant service organization controls in conjunction with the user entity’s internal control. In considering the operating effectiveness of the relevant controls at the service organization, the user auditor should read and consider both the service auditor’s

- report on the operating effectiveness of the controls and
- description of the tests of the operating effectiveness of controls that may be relevant to specified assertions in the user entity’s financial statements and the results of those tests.

.85 Under no circumstances can the service auditor’s report (the letter issued by the service auditor) be the only basis for reducing the assessed level of control risk. The user auditor should read and consider both the report and the evidence provided by the tests of operating effectiveness and relate them to the relevant assertions in the user entity’s financial statements. Although a type 2 report may be used to reduce substantive procedures, neither a type 1 report nor a type 2 report is designed to provide a basis for assessing control risk sufficiently low to eliminate the need for performing any substantive tests for all of the assertions relevant to significant account balances or transaction classes. Paragraph .51 of AU section 318 states that regardless of the assessed risks of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. Paragraph 54 of SAS No. 70, as amended, presents an example of a service auditor’s report for a type 2 engagement.

Companion Audit Guide

.86 The AICPA Audit Guide Service Organizations: Applying SAS No. 70, as Amended (product no. 012778kk) is designed to provide guidance to service auditors engaged to issue reports on a service organization’s controls that may be part of a user entity’s information system in the context of an audit of financial statements. It also provides guidance to user auditors engaged to audit the financial statements of entities that use service organizations. The guide can be ordered by calling the AICPA at (888) 777-7077 or going online at www.cpa2biz.com.
Tax Exempt Bonds—Accounting and Auditing Considerations in the Current Environment

.87 The current credit environment has affected the market for debt securities. For example, several entities that insure tax exempt debt have been downgraded by rating agencies, and some investors have avoided certain debt securities. Although each situation is different and should be evaluated based on its own specific facts and circumstances, the current situation may raise various accounting and auditing issues pertaining to tax exempt debt, including, but not limited to, the following:

- Bond restructurings
- Derivative and hedge accounting implications
- Potential violation of debt covenants
- Classification of the debt on the balance sheet as either a current or noncurrent liability
- Subsequent event disclosures
- Going concern issues

.88 An ad hoc AICPA member task force developed a nonauthoritative article to address these issues in more detail. This article can be found at www.aicpa.org/download/acctstd/ARS_article14.pdf.

Liquidity Considerations

.89 Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), addresses potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short-term investment vehicle. This question and answer discusses some considerations for when these restriction events occur, such as determining (a) whether any assets subject to these restrictions qualify as cash equivalents or current assets; (b) whether disclosures about the risks and uncertainties resulting from such restrictions should be made; (c) whether these restrictions may trigger violations of debt covenants and, if so, whether that liability should be classified as current; (d) whether the financial statements need to be adjusted if the occurrence of such restriction occurs between the balance sheet date and the issuance date; and (e) whether the restriction events call into question the entity’s ability to continue as a going concern.

.90 Auditors should consider whether any additional disclosures made by management include forward-looking statements that are not required by generally accepted accounting principles (GAAP) and, therefore, may not be audited. Auditors also should consider whether the inability to withdraw funds can pose significant challenges to the entity’s liquidity and, therefore, affect the entity’s ability to continue as a going concern. Restrictions on liquidity also may be an appropriate matter to communicate to those charged with governance. Finally, the auditor should consider if he or she wishes to emphasize any liquidity restrictions in the auditor’s report. For further details, see the question and answer at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

Alternative Investments

.91 The AICPA practice aid Alternative Investments—Audit Considerations is a useful tool for auditors that focuses on the existence and valuation assertions associated with alternative investments but also discusses general considerations pertaining to auditing alternative investments, management representations, disclosure of certain significant risks and uncertainties, and reporting. As defined in the foreword of the practice aid, alternative investments are investments for which a readily determinable fair value does not exist ... includ[ing] private investment funds meeting the definition of an investment company ... such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds.
Further, as discussed in a meeting of FASB’s Valuation Resource Group, net asset value of a fund may not represent fair value under FASB Statement No. 157. Given the state of the economy, many funds are imposing limitations on redemptions, and some are even unwinding. As this occurs, the fair value measurements applied to these investments will fall under increased scrutiny and become even more important.

Auditing Fair Value Measurements

In addition to understanding the looming questions relative to fair value accounting, auditors should be aware of audit issues involving fair value accounting. Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements, and it is management’s responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1).

In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor also may identify any possible indicators of impairment. According to paragraph .23 of AU section 328, substantive tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data; (b) developing independent fair value estimates for corroborative purposes; or (c) reviewing subsequent events and transactions. Paragraph .26 also notes that when testing the fair value measurements and disclosures, the auditor evaluates whether management’s assumptions are reasonable and reflect or are not inconsistent with market information. In relation to FASB Statement No. 157, this might include whether the market is distressed, whether the transaction was an orderly transaction, the reasonableness of the determination within the fair value hierarchy of inputs, and the reasonableness of the underlying assumptions.

Fair Values of Securities

The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some specific items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value; however, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). These prices also may be based on quoted prices from an active market or other observable inputs that will be a consideration on the auditor’s procedures as well. The process used by the pricing service in measuring fair value should be evaluated to determine the consistency with the specified valuation method (typically, fair value, as defined in FASB Statement No. 157). The auditor also may determine that it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157, quoted prices in active markets are considered level 1 inputs.

When an entity performs its own valuation, value testing procedures include

- assessing the reasonableness,
• comparing the assumptions to industry reports or benchmarks,
• assessing the appropriateness of the model,
• calculating the value using his or her own model, and
• comparing the fair value with subsequent or recent transactions.

.98 Whether or not the inputs to the entity’s valuation model are observable determines their characterization as level 2 or level 3 inputs, respectively, within FASB Statement No. 157. When extensive judgment is needed, consider using a specialist or refer to AU section 342, Auditing Accounting Estimates (AICPA, Professional Standards, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor’s right to the collateral.

.99 Paragraph .19 of AU section 328 also notes that the auditor should evaluate whether the entity’s method for determining fair value measurements is applied consistently and, if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity or changes in accounting principles. The auditor should obtain an understanding of management’s classification process among trading, available-for-sale, and held-to maturity, as well as consider the classifications in light of the entity’s current financial position.

Auditing Accounting Estimates

.100 As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements as a whole. Although this alert has discussed fair value measurements at length, it is important to remember many types of accounting estimates exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long-lived assets, valuation allowance for deferred tax assets, and actuarial assumptions in pension and other postretirement benefit costs.

.101 Given the current economic climate, additional skepticism should be exercised when considering management’s underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider both the subjective and objective factors with professional skepticism. As discussed in paragraph .09 of AU section 342, key factors and assumptions that the auditor normally concentrates on include the assumptions that are significant to the estimate, sensitive to variations, deviations from historical patterns, or are particularly subjective and susceptible to misstatement and bias; however, it is important to consider whether historical patterns are still applicable.

.102 For example, in the current slow market, new patterns may emerge. In this economic climate, with possible increasing pressure on management to meet budgets, a key aspect of AU section 342 is for an auditor to determine the reasonableness of management’s accounting estimates with an extra degree of professional skepticism. As noted by AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates as a whole.

.103 The auditor should obtain an understanding of how management develops estimates and employ one of the approaches outlined in paragraph .10 of AU section 342 in testing that process. In reviewing and testing management’s process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor also may develop an estimate and compare it to management’s estimate. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor’s report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342.
Using the Work of a Specialist

.104 It may be necessary to use a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters. Examples of matters in which an auditor may engage a specialist are valuation issues; reasonableness of determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336, Using the Work of a Specialist (AICPA, Professional Standards, vol. 1), provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor’s firm participates in the audit, AU section 311, Planning and Supervision (AICPA, Professional Standards, vol. 1), is applicable rather than AU section 336.

.105 When using the work of a specialist, the auditor should evaluate the specialist’s professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist’s findings in the context of the audit and related assertions in the financial statements.

Consideration of an Entity’s Ability to Continue as a Going Concern

.106 The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards and is an especially important consideration in the current state of the economy. An entity’s ability to continue as a going concern is affected by many factors related to the current uncertain economy, such as the industry and geographic area in which it operates and the financial health of its donors, customers, and suppliers, and financing sources.

.107 As explained by paragraph .02 of AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1), the auditor’s evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor’s report. Therefore, this is an ongoing evaluation that extends through the date of the auditor’s report.

.108 The auditor has a responsibility to evaluate whether there is a substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time. AU section 341 notes that is a period not to exceed one year beyond the date of the financial statements being audited.

.109 Audit teams may find it useful to have preliminary discussions about going concern considerations during engagement planning meetings; however, as noted in AU section 341, it is not necessary to design audit procedures around specifically identifying the possibility of a going concern because results of typical audit procedures should illuminate any indicators. These procedures may consist of analytical procedures, review of subsequent events, review of compliance with financing agreements, review of board minutes, inquiry of legal counsel, and confirmation with related third parties of the details of arrangements to provide or maintain financial support.

.110 Some risks related to the current state of the economy that may influence an entity’s ability to continue as a going concern include the following:

- Lenders may be looking for ways to withdraw from lending relationships.
- Financial support of a related party may not be a feasible mitigating factor, depending on the financial health of that related party.
- An entity’s financial health could be significantly weakened if their donors or members have been strongly affected by the economic crisis.
- Projections provided by entities based on historical data may not be reliable future predictions.
- Some entities may be hesitant to include informative and transparent going concern disclosures.
If the auditor believes a substantial doubt on the entity’s ability to continue as a going concern exists, the next steps are to obtain management’s plans to mitigate the effect of such conditions and then assess the likelihood that these plans can be effectively implemented. Additionally, auditors may consider posing the following questions to help make their assessment on the likelihood of management’s plans to successfully mitigate their going concern risk:

- What is the strategy for extending lines of credit or refinancing any debt coming due? Have any preliminary agreements or discussions occurred?
- If negative operating trends exist, how does management plan on turning them around?
- If turnover of key personnel has occurred, what actions are being taken to replace these positions?
- What is the plan to maintain or increase the liquidity of your balance sheet?
- Do any restrictions exist that could limit management’s ability to carry out these plans?

If, after considering management’s plan, an auditor determines a substantial doubt about an entity’s ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate with those charged with governance of the entity, in accordance with AU section 341.

In that instance, the auditor also should consider the effects on the entity’s financial statements and the adequacy of the related disclosure, and an explanatory paragraph should be added to the audit report following the opinion paragraph.

Alternatively, if management’s plan mitigates the risk of the entity’s ability to continue as a going concern, the auditor should consider disclosing the primary conditions that gave rise to the initial doubt and management’s plans. These disclosures are especially important for financial statement users to fully comprehend the entity’s financial strength and ability to continue as a going concern.

FASB has undertaken a project that will relocate the guidance related to going concern from the realm of auditing standards to accounting standards. See the “On the Horizon” section of this alert for further details.

### Consideration of Fraud in a Financial Statement Audit

AU section 316 is the primary source of authoritative guidance about an auditor’s responsibilities concerning the consideration of fraud in a financial statement audit. AU section 316 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, as stated in paragraph .02 of AU section 110, Responsibilities and Functions of the Independent Auditor (AICPA, Professional Standards, vol. 1).

Three conditions generally are present when fraud occurs:

- Management or other employees have an incentive or are under pressure, which provides a reason to commit fraud.
- Circumstances exist (for example, the absence of controls, ineffective controls, or the ability of management to override controls) that provide an opportunity for a fraud to be perpetrated.
- Those involved are able to rationalize committing a fraudulent act.

The current economic situation may result in unexpected losses and possibly cause financing or liquidity difficulties for many entities. Additionally, management may be valuing many illiquid securities using inherently subjective methodologies. These situations may provide management additional opportunity and incentive to commit fraud.

Auditors of small NFPs are aware that internal control effectiveness is frequently an issue due to limitations inherent in entities of this size. Lack of segregation of duties, qualified accounting staff, training, and understanding of the purpose and operation of effective internal control contribute to the risk of fraud.
in these entities. Small NFPs often feel that they cannot afford to hire qualified accounting specialists, are unable to adequately separate financial responsibilities among very few staff members, or do not have the resources to create effective controls. As a result, opportunities to commit fraud may exist to a greater extent in small NFPs than in larger, more complex NFP entities.

.120 As seen in the news recently, a number of frauds that include the three previously mentioned conditions allegedly have occurred. One of those frauds is that of Bernard Madoff Investment Securities. Although the details of this fraud are just beginning to be investigated, auditors should ensure they are properly testing for the existence of assets, such as investments, in accordance with AU section 332. Additionally, auditors should always gain an understanding of the entity's business and how profits are made. In the Madoff case, auditors are being probed about failing to question the strong, consistent annual returns by these investment funds that lacked a clear investment strategy. Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud.

.121 Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. AU section 316 provides additional information, including ways for the auditor to respond to the risk of material misstatement due to fraud.

Evaluating the Existence of Assets

.122 The Madoff case, and other alleged frauds, brings to light a number of risks that continually need to be considered and responded to by management and auditors. Due to the nature of securities and other financial instruments, determining and testing the ownership and existence of investments has become more difficult. Often, securities and other investments purchased on behalf of an entity are held in the name of a broker organization, which may or may not be a custodian; and generally, custodians do not obtain a paper document anymore, only an electronic record of the assets.

Some examples of risks inherent in investment transactions that may be relevant when assessing existence are as follows:

- The assets involved may not be readily available to physical inspection.
- There could be a lack of effective, independent, third party oversight.
- The information received from a broker organization, in the form of monthly statements or in response to audit confirmation requests, may require further verification to assess its reliability.
- There may be a lack of experience on the part of the client with these types of transactions and, therefore, controls over existence may be nonexistent or poorly designed.
- The transactions may be complex in nature, making them difficult to understand.

.123 Management has a responsibility to design an internal control system that is responsive to the risk of existence of assets (in addition to the valuation of assets). As part of their risk assessment procedures, auditors need to assess those controls and determine if the controls have been implemented. Depending on the results of those assessments, the auditor should design an audit strategy that takes into consideration the entity's controls, including testing those controls if those controls are to be relied upon and used as part of the auditor's audit evidence regarding the existence assertion. If the auditor's assessment indicates that management's design or operation of controls are not effective, then those deficiencies should be communicated to those charged with governance if the control deficiency is a significant deficiency or material weakness.

.124 Examples of controls at the entity that are designed to assess the existence of assets could include the following:
• Obtaining through site visits and documenting an understanding of existence controls placed in
operation by any service organization that is utilized by the entity and periodically reassessing that
understanding

• Obtaining evidence, through direct testing or a SAS 70 type 2 report that the service organization’s
existence controls are appropriately designed and operating effectively

• Inspecting other documentation supporting the entity’s interest in the security (for example, corre-
spondence from the broker organization or trustee acknowledging transactions with the fund)

Communication With Those Charged With Governance

.125 In addition to instances in which communication with those charged with governance in other
auditing sections is discussed, other select measures are outlined in AU section 380, The Auditor’s Commu-
nication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), that are specifically relevant
during an economic crisis and when measuring fair value. AU section 380 establishes standards and provides
guidance on the auditor’s communication with those charged with governance. As noted in paragraph .05 of
AU section 380, the auditor must communicate with those charged with governance matters related to the
financial statement audit that are, in the auditor’s professional judgment, significant and relevant to the
responsibilities of those charged with governance in overseeing the financial reporting process. The auditor
should communicate his or her views about the quality of the entity’s significant accounting policies,
accounting estimates, and financial statement disclosures.

.126 AU section 341 expands on the applicability of AU section 380 when the auditor has concluded that
substantial doubt exists about the entity’s ability to continue as a going concern. In that case, the auditor
should communicate to those charged with governance the nature of the events or conditions identified, the
possible effect on the financial statements, the sufficiency of the related disclosures, and the effects on the
auditor’s report.

Communicating Internal Control Related Matters Identified in an Audit

.127 In October 2008, the AICPA Auditing Standards Board (ASB) issued SAS No. 115, Communicating
Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325). SAS
No. 115 amends SAS No. 112 and further clarifies standards and provides guidance on communicating matters
related to an entity’s internal control over financial reporting (internal control) identified in an audit of
financial statements.

.128 The new SAS is applicable whenever an auditor expresses an opinion on financial statements
(including a disclaimer of opinion) except when the auditor is performing an integrated audit and will be
expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501,
An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its
Financial Statements (AICPA, Professional Standards, vol. 1). This new standard is effective for audits of financial
statements for periods ending on or after December 15, 2009.

.129 In general, SAS No. 115 retains many of the provisions of SAS No. 112: it provides guidance to (a)
enhance the auditor’s ability to identify and evaluate deficiencies in internal control during an audit, and then
(b) communicate to management and those charged with governance those deficiencies that the auditor
believes are significant deficiencies or material weaknesses.

.130 The key differences between SAS No. 115 and SAS No. 112 lie in the definitions of material weaknesses
and significant deficiencies. Under SAS No. 112, the auditor applied criteria of likelihood and magnitude
described in that standard to determine if a control deficiency reached the threshold of significant deficiency
or material weakness. Under SAS No. 115, the same criteria are used; however, more judgment is allowed for
in determining whether a control deficiency is a significant deficiency.
Definitions of Significant Deficiency and Material Weakness

.131 A material weakness is a deficiency, or combination of deficiencies, in internal control, such that a reasonable possibility exists that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable possibility exists when the likelihood of the event is either reasonably possible or probable because those terms are used in FASB Statement No. 5, Accounting for Contingencies.2

.132 A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

The Evaluation Process

.133 Although the auditor is not required to perform procedures specifically to identify deficiencies in internal control, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity’s internal control. The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. The severity of a deficiency in internal control depends on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies; and
- whether a reasonable possibility exists that the entity’s controls will fail to prevent or to detect and correct a misstatement of an account balance or disclosure.

.134 The severity of a deficiency does not depend on whether a misstatement actually occurred. If the auditor identifies a deficiency in internal control but has not identified an actual misstatement related to that deficiency, the auditor cannot automatically conclude that the deficiency is not a significant deficiency or a material weakness. If a misstatement has been identified, the auditor should consider the potential for further misstatement in the financial statements being audited.

.135 The AICPA published Audit Risk Alert Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115 (product no. 022539kk) to assist in understanding the requirements of this SAS. This Audit Risk Alert provides specific case studies to help determine whether identified control weaknesses would constitute a significant deficiency or material weakness; it can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

Accounting Issues and Developments

.136 Given the current economic crisis, auditors should consider a number of accounting and financial reporting issues, such as the following:

- Fair value, including fair value measurements in illiquid markets
- Impairment
- Liquidity restrictions

---

2 The term reasonably possible as used in the definition of the term material weakness has the same meaning as defined in Financial Accounting Standards Board (FASB) Statement No. 5, Accounting for Contingencies. Paragraph 3 of FASB Statement No. 5 states when a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms probable, reasonably possible, and remote to identify three areas within that range, as follows:

a. Probable. The future event or events are likely to occur.

b. Reasonably possible. The chance of the future event or events occurring is more than remote but less than likely.

c. Remote. The chance of the future event or events occurring is slight.

Therefore, the likelihood of an event is a reasonable possibility when it is reasonably possible or probable.

3 At the time of this writing, the FASB Accounting Standards Codification™ (ASC) had not yet been issued as authoritative. When the FASB ASC is issued as authoritative, the definitions currently found in FASB Statement No. 5 will be located at FASB ASC 450-20-25-1.
Fair Value

.137 Among the causes cited for the economic crisis, FASB Statement No. 157 has received a great deal of attention. FASB Statement No. 157 defines fair value and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity.

.138 FASB Statement No. 157 defines fair value as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” A contention with FASB Statement No. 157 is the lack of guidance in applying fair value in an illiquid or distressed market, such as the current one. A lack of guidance also has the potential to allow inconsistencies in application by accountants and auditors. The areas of FASB Statement No. 157 that relate to measuring fair value in an illiquid market are limited to the following mentions in paragraphs 7, 10, and 17:

• “An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).”

• “Market participants are buyers and sellers in the principal (or most advantageous) market for the asset or liability that are... [w]illing to transact for the asset or liability; that is, they are motivated but not forced or otherwise compelled to do so.”

• “For example, a transaction price might not represent the fair value of an asset or liability at initial recognition if... [t]he transaction occurs under duress or the seller is forced to accept the price in the transaction. For example, that might be the case if the seller is experiencing financial difficulty.”

.139 Both the SEC and FASB took notice of constituents’ desire for further guidance. In September 2008, the SEC issued SEC Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting (SEC and FASB press release) to provide immediate clarifications on fair value in illiquid markets for preparers and auditors until FASB was able to provide additional interpretative guidance.

Determining Whether a Market Is Not Active and a Transaction Is Not Distressed

.140 On April 9, 2009, FASB issued FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. The purpose of this FSP is to provide additional guidance in the application of FASB Statement No. 157; it supersedes FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active. Among other points, the FSP

• affirms that the objective of fair value when the market for an asset is not active is the price that would be received to sell the asset in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions (that is, in the inactive market).

• clarifies and includes additional factors for determining whether there has been a significant decrease in market activity for an asset when the market for that asset is not active.

• eliminates the proposed presumption that all transactions are distressed (not orderly) unless proven otherwise. The FSP will instead require an entity to base its conclusion about whether a transaction was not orderly on the weight of the evidence.

• includes an example that provides additional explanation on estimating fair value when the market activity for an asset has declined significantly.

---

4 At the date of this writing, this guidance has not yet been included in FASB ASC. Readers are encouraged to visit the FASB ASC Web site at http://asc.fasb.org/home and monitor codification updates.
• requires an entity to disclose a change in valuation technique (and the related inputs) resulting from the application of the FSP and to quantify its effects, if practicable, by major category.

• applies to all fair value measurements when appropriate.

.141 This FSP shall be effective for interim and annual reporting periods ending after June 15, 2009, and shall be applied prospectively. Early adoption is permitted for periods ending after March 15, 2009. Earlier adoption for periods ending before March 15, 2009, is not permitted. If a reporting entity elects to adopt early either FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, or FSP FAS 107-1 and Accounting Principles Board (APB) Opinion No. 28-1, Interim Disclosures about Fair Value of Financial Instruments, the reporting entity also is required to adopt early this FSP. Additionally, if the reporting entity elects to adopt this FSP early, FSP FAS 115-2 and FAS 124-2 also must be early adopted. This FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption.

Interim Disclosures About Fair Value of Financial Instruments

.142 On April 9, 2009, FASB released FSP FAS 107-1 and APB Opinion No. 28-1. This FSP relates to fair value disclosures for any financial instruments that are not currently reflected on the balance sheet of companies at fair value. Prior to issuing this FSP, fair values for these assets and liabilities were disclosed only once a year. The FSP requires these disclosures to be made on a quarterly basis, providing qualitative and quantitative information about fair value estimates for all those financial instruments not measured on the balance sheet at fair value. The FSP

• applies to all financial instruments within the scope of FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments.

• applies only to the financial statements of issuers for interim and annual reporting periods.

• requires an entity to disclose the methods and significant assumptions used to estimate the fair value of financial instruments and shall describe changes in methods and significant assumptions, if any, during the period.

.143 This FSP shall be effective for interim reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity may adopt early this FSP only if it also elects to adopt early FSP FAS 157-4 and FSP FAS 115-2, and FAS 124-2. This FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption.

International Accounting Standards Board Fair Value Guidance

.144 In October 2008, the International Accounting Standards Board (IASB) issued the staff summary, “Using judgment to measure the fair value of financial instruments when markets are no longer active,” which accompanies the IASB expert advisory panel report “Measuring and disclosing the fair value of financial instruments in markets that are no longer active.” The summary takes into consideration and is consistent with FSP FAS 157-3 and the SEC and FASB press release. Additionally, the summary notes the consistency between FSP FAS 157-3 and the SEC and FASB press release with International Accounting Standard (IAS) No. 39, Financial Instruments: Recognition and Measurement.

AICPA Guidance on Applying FASB Statement No. 157 to Alternative Investments

.145 The Accounting Standards Executive Committee (AcSEC) of the AICPA has issued a draft issues paper, FASB Statement No. 157 Valuation Considerations for Interests in Alternative Investments. The draft issues paper discusses how to estimate the fair value of alternative investments (such as interests in hedge funds,

\[5\] See footnote 4.

\[6\] See footnote 4.
private equity funds, or real estate funds) in accordance with the provisions of FASB Statement No. 157. Among other things, the draft issues paper discusses the role of net asset value (NAV) in estimating fair value. Information about the status of this issues paper and the full text of the draft issues paper can be found at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/AcSEC+Issues+Draft+Issues+Paper+on+Valuation+of+Interests+in+Alternative+Investments.htm. Readers should be alert for the issuance of the final version of the paper.

**Liquidity Restrictions**

.146 As discussed in the “Audit and Attestation Issues and Developments” section of this alert, TIS section 1100.15 addresses the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle.

**FASB Accounting Standards Codification™**

.147 FASB is expected to issue FASB ASC as authoritative effective July 1, 2009, at which time it will become the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the SEC. FASB ASC will supersede all then-existing, non-SEC accounting and reporting standards for nongovernmental entities. Once effective, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC will become nonauthoritative. This change will affect accountants and auditors alike.

.148 FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC disassembled and reassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the Emerging Issues Task Force [EITF], and the AICPA) to organize them under approximately 90 topics. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, EITF, AICPA, and related literature. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance.

.149 FASB ASC is not intended to change U.S. GAAP or any requirements of the SEC; rather, it is part of FASB’s efforts to reduce the complexity of accounting standards and also to facilitate international convergence. Moreover, FASB ASC does not include governmental accounting standards. The purposes behind the codification project include the following:

- Reduce the amount of time and effort required to solve an accounting research issue
- Mitigate the risk of noncompliance with standards through improved usability of the literature
- Provide accurate information with real-time updates as new standards are released
- Assist FASB with the research and convergence efforts required during the standard setting process
- Become the authoritative source of literature for the completed eXtensible Business Reporting Language (XBRL) taxonomy
- Clarify that guidance not contained in FASB ASC is not considered authoritative

.150 After the effective date of FASB ASC, FASB will no longer consider new standards authoritative in their own right. Instead, new standards will serve only to update FASB ASC and provide the historical basis for conclusions of a new standard.

.151 FASB ASC uses a topical structure in which guidance is organized into areas, topics, subtopics, sections, and subsections. These terms are defined as follows:
Areas are the broadest category in FASB ASC and represent a grouping of topics.

Topics are the broadest categorization of related content and correlate with the IASs and IFRS.

Subtopics represent subsets of a topic and are generally distinguished by type or scope.

Sections indicate the nature of the content, such as recognition, measurement, or disclosure. The sections’ structure correlates with the IASs and IFRS.

Subsections allow further segregation and navigation of content.

Topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard setter or standard from which the content was derived. An example of the numerical referencing is FASB ASC 305-10-05, in which 305 is the Cash and Cash Equivalents topic, 10 represents the “Overall” subtopic, and 05 represents the “Overview and Background” section. Constituents are encouraged to begin using FASB ASC, which can be accessed at http://asc.fasb.org/home. GAAP specific to NFPs can be found at FASB ASC 958, Not-for-Profit Entities.

The AICPA has published Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, and provide case studies on navigating the FASB ASC Research System and performing accounting research.

Convergence With International Financial Reporting Standards

Since the signing of the Norwalk Agreement by FASB and the IASB, the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. The “On the Horizon” section of this alert discusses these joint projects. For more information, visit www.fasb.org and www.iasb.org.

AICPA Launches IFRS.com Web Site

To assist in both awareness building and education, the AICPA launched the new Web site www.ifrs.com in May 2008. The site provides current information about developments in international convergence. Developed by the AICPA, in partnership with its marketing and technology subsidiary CPA2Biz, www.ifrs.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, CPE courses and live conference training, helpful links, and assistance for audit committee members.

Accounting for Losses Due to Fraud

A topic of discussion for management and their auditors is the manner in which losses due to fraud are reflected in the financial statements. Because no accounting standard exists that provides specific guidance on accounting for losses due to fraud, application of professional judgment in this matter can lead to different results. For example, some clients have determined that the losses should be reported in the current period, when the entity became aware of the fraud, whereas others are opting for a restatement of the financial statements for one or more prior periods because they believe the loss in value occurred in a prior period and,
therefore, an adjustment is appropriate. It is important that the auditor understand how the decision was reached, and that proper disclosure be made in the financial statements.

.158 Auditors may also consider whether management has properly disclosed or recognized any liability associated with the potential clawback of distributions received from the perpetrator of Ponzi schemes. In the case of Madoff Investment Securities, a possibility exists that the bankruptcy trustee may file lawsuits to recover funds distributed to investors prior to the discovery of the fraud for the purpose of redistributing the funds. Management, in conjunction with appropriate legal counsel, should determine the probability and result of such a lawsuit and disclose or accrue a potential liability as required by FASB ASC 450, Contingencies.

Recent Pronouncements

.159 AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. For information on pronouncements issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued accounting standards in the CPA Letter and the Journal of Accountancy.

Recent Auditing and Attestation Pronouncements and Related Guidance

Recent Accounting Pronouncements and Related Guidance

TIS section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids)
Issue Date: October 2008
(Nonauthoritative)

This question and answer discusses auditing and accounting issues related to withdrawal restrictions placed on short-term investments by a money market fund or its trustee.

Recent AICPA Independence and Ethics Pronouncements

.162 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert will heighten your awareness of independence and ethics matters likely to affect your practice. Obtain this alert by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com.

On the Horizon

.163 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to NFPs or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.164 The following table lists the various standard setting bodies’ Web sites, through which information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Overhaul Project—AICPA Audit and Accounting Guide Not-for-Profit Entities

.165 The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide Not-for-Profit Entities, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.
Auditing and Attestation Pipeline—Nonissuers

**Auditing Standards Board Clarity Project**

.166 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA’s *Professional Standards*) to apply the clarity drafting conventions and converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board (IAASB). The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the explanatory memorandum “Clariﬁcation and Convergence” and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

.167 Among those standards included in the clarity project that will have early effective dates is the proposed SAS, *Compliance Audits*, which will supersede SAS No. 74, *Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance* (AICPA, *Professional Standards*, vol. 1, AU sec. 801), which, if approved in its current form, will be effective for periods ending after June 15, 2010. More information about this proposed SAS will be available in the Audit Risk Alert Government Audit Standards and Circular A-133 Audits—2009 (product no. 0224509kk).

**Exposure Draft to Revise Standards for Compilation and Review Engagements**

.168 The Accounting and Review Services Committee (ARSC) issued an exposure draft that would revise the standards for compilation and review engagements. The changes would affect the interplay between the standards and independence rules, permitting an accountant to issue a review report on financial statements when the accountant’s independence is impaired by performing nonattest services that were designed to improve the reliability of the client’s financial information.

.169 The draft includes a trio of proposed standards: Framework and Objectives for Performing and Reporting on Compilation and Review Engagements; Compilation of Financial Statements; and Review of Financial Statements. In drafting the proposed standards, the ARSC considered recommendations from the Private Company Practice Section (PCPS) Reliability Task Force. The ARSC and PCPS believe the proposed standards will respond to many concerns of smaller business owners, users of small business financial statements, and CPAs that serve smaller entities.

.170 The PCPS task force recommended that the ARSC consider revising its standards for situations in which an accountant’s independence is impaired in connection with the performance of a nonattest service relating to the design or operation of an aspect of internal control over financial reporting. These nonattest services help management prepare higher quality or more reliable financial statements.

.171 The proposed standards would also harmonize the AICPA’s review standard with the International Auditing and Assurance Standards Board’s (IAASB) review standard International Standard on Review Engagements (ISRE) No. 2400, *Engagements to Review Financial Statements*.

.172 Significant proposed changes to the Statements on Standards for Accounting and Review Services (SSARs) include the following:
• The introduction of new terms such as moderate assurance, review evidence, and review risk to the review literature to harmonize with international review standards.

• A discussion of materiality in the context of a review engagement.

• A requirement that an accountant establish an understanding with management regarding the services to be performed through a written communication, that is, an engagement letter.

• The establishment of enhanced documentation requirements for compilation and review engagements.

• Guidance for practitioners who are engaged to perform a compilation or review engagement when they have also been engaged to perform nonattest services. The guidance includes reporting requirements for instances in which the accountant’s independence is impaired due to the performance of these services.

• The ability for an accountant to include a general description in the accountant’s compilation report regarding the reason(s) for an independence impairment.

.173 The comment deadline is July 31, 2009. The proposed effective date is for compilations and reviews of financial statements for periods beginning on or after December 15, 2010. Early application would be permitted. For further information on this project, visit www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/ARSC+Reliability+Project.htm

Accounting Pipeline

NFP Merger and Acquisition Guidance

.174 At its February 2009 meeting, FASB completed its redeliberations of the October 2006 exposure drafts, Not-for-Profit Organizations: Mergers and Acquisitions, and Not-for-Profit Organizations: Goodwill and Other Intangible Assets Acquired in a Merger or Acquisition. The following conclusions are expected to be included in the final standard:

• The acquisition method should be required for acquisitions by NFPs and decided that acquisitions should be distinguished from mergers. The use of the carryover method of accounting for acquisitions by small NFPs is not permitted. Additionally, to be consistent with FASB Statement No. 141(R), Business Combinations, any noncontrolling interest in an acquiree should be measured at fair value.

• FASB decided that a merger is different from an acquisition and warrants a different accounting treatment. They agreed that the feature that serves to differentiate a merger from an acquisition is control. In a merger, the governing bodies of two or more NFPs cede control of those entities to create a new entity. In an acquisition, one entity obtains control over the net assets of another entity or business. FASB determined that the carryover method of accounting should be retained for mergers of NFPs.

• In relation to the subsequent measurement of goodwill, FASB decided that those NFPs that recognize acquired goodwill should apply the guidance in FASB Statement No. 142, Goodwill and Other Intangible Assets, for subsequent testing and impairment. In addition, the board eliminated the proposed qualitative impairment evaluation approach as a direct result of its decision to require those NFPs predominantly supported by contributions and returns on investments to charge an excess of liabilities assumed and consideration transferred over assets acquired to the statement of activities.

.175 FASB indicated that the final statement will apply to all NFPs for the first fiscal year beginning after December 15, 2009, with no delayed effective date for smaller NFPs. Early adoption of the final statement will be prohibited. At this time, publication of the final statement is expected in April 2009. Additional information is available at the FASB Web site, www.fasb.org.
FASB and IASB Memorandum of Understanding

.176 In September 2008, FASB and the IASB updated their Memorandum of Understanding (MoU), originally published in 2006, to reaffirm their respective commitments to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In developing the original MoU, FASB and the IASB agreed on priorities and established milestones as part of a joint work program to develop new common standards that improve the financial information reported to investors. FASB and the IASB agreed that the goal of joint projects is to produce common, principles-based standards, subject to the required due process. In the MoU, the boards identified the following 11 convergence topics on which to focus:

- Business combinations
- Financial instruments
- Financial statement presentation
- Intangible assets
- Leases
- Liabilities and equity distinctions
- Revenue recognition
- Consolidations
- Derecognition
- Fair value measurement
- Postemployment benefits (including pensions)

.177 Both FASB and the IASB note that their individual and joint efforts are not limited to the preceding items, but they remain committed to the MoU. FASB and the IASB also have several other joint projects in process including the conceptual framework project, emissions trading schemes, insurance contracts, and income taxes.

.178 Readers also are encouraged to monitor developments on the AICPA’s Web site, www.ifrs.com, in addition to the FASB, IASB, and SEC Web sites. The growing acceptance of IFRS as a basis for U.S. financial reporting could represent a fundamental change for the U.S. accounting profession.

Other Accounting Projects

.179 Additionally, FASB has the following projects underway:

- Going concern
- Subsequent events
- Credit crisis projects that include the following:
  - Measuring liabilities under FASB Statement No. 157
  - Embedded credit derivatives scope exceptions
  - Recoveries of other-than-temporary impairments
  - Improving disclosures about fair value measurements
  - Applying fair value to interests in alternative investments
- Phase 2 of the applicability of FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, for private entities (FIN No. 48 is codified at FASB ASC 740, Income Taxes.)
• An amendment to FASB Statement No. 162, The Hierarchy of Generally Accepted Accounting Principles,8 and approval of FASB ASC
• Disclosure of certain loss contingencies
• Reconsideration of FIN No. 46(R), Consolidation of Variable Interest Entities (FIN No. 46 is codified primarily at FASB ASC 810, Consolidation.)
• Transfers of financial assets
• Loan loss disclosures
• Phase two of postretirement benefit obligations including pensions
• Deferred tax assets and liabilities on available-for-sale debt securities that are expected to be held to recovery
• Oil and gas disclosures
• Treatment of base jackpot liabilities of casinos

.180 FASB and the IASB established an advisory group, the Financial Crisis Advisory Group (FCAG), which is composed of senior leaders with international experience in financial markets. The FCAG will advise FASB and the IASB about the standard-setting implications of the global financial crisis as well as changes to the global regulatory environment. Readers should refer to http://fasb.org/fcag/index.shtml for additional information.

Resource Central

.181 The following are various resources that practitioners engaged in the NFP industry may find beneficial.

Publications

.182 Practitioners may find the following publications useful. Choose the format that is best for you—online, print, or CD-ROM.

• Audit and Accounting Guide Not-for-Profit Entities (2009) (product no. 012648kk [paperback], WNP-XXkk [online with the associated Audit Risk Alert], or DNP-XXkk [CD-ROM])
• Audit and Accounting Guide Government Auditing Standards and Circular A-133 Audits (2008) (product no. 012748kk [paperback], WRF-XXkk [online with the associated Audit Risk Alert], or DRF-XXkk [CD-ROM])
• Audit and Accounting Guide Healthcare Entities (2009) (product no. 012619kk [paperback], WHC-XXkk [online with the associated Audit Risk Alert], or DHC-XXkk [CD-ROM])
• Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])
• Audit Guide Assessing and Responding to Audit Risk in a Financial Statement Audit (2006) (product no. 012456kk [paperback] or WRA-XXkk [online])
• Audit Guide Auditing Revenue in Certain Industries (2009) (product no. 012519kk [paperback], WARR-XXkk [online], or DAR-XXkk [CD-ROM])
• Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XXkk [online], or DAS-XXkk [CD-ROM])
• Audit Guide Service Organizations: Applying SAS No. 70, as Amended (2009) (product no. 012779kk [paperback], WSV-XXkk [online], or DSV-XXkk [CD-ROM])

8 See footnote 4.
• Audit Risk Alert Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])

• Audit Risk Alert Current Economic Crisis: Accounting and Auditing Considerations—2009 (product no. 0223308kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])

• Audit Risk Alert Healthcare Industry Developments—2008 (product no. 022349kk [paperback], WHC-XXkk [online with the associated Audit and Accounting Guide], or DHC-XXkk [CD-ROM])

• Audit Risk Alert Government Audit Standards and Circular A-133 Audits—2008 (product no. 022458kk [paperback], WRF-XXkk [online with the associated Audit and Accounting Guide], or DRF-XXkk [CD-ROM])

• Audit Risk Alert Compilation and Review—2008 (product no. 022309kk [paperback], WCR-XXkk [online], or DCR-XXkk [CD-ROM])

• Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])

• Checklists and Illustrative Financial Statements Not-for-Profit Entities (product no. 008989kk [paperback] or WNP-CLkk [online])

• Guide to Fraud in Governmental and Not-for-Profit Environments, Revised Edition (product no. 091032kk [paperback])

• Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XXkk [online])

• Accounting Trends & Techniques—Not-for-Profit Organizations (2005) (product no. 006616kk)

• Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])

• Audit and Accounting Practice Aid Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Standards (product no. 006611kk [paperback])

.183 Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

• Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk [paperback])

• Financial Reporting Alert Not-for-Profit Organizations: Accounting Issues and Risks—2008 (product no. 029207kk [paperback])

AICPA reSOURCE: Accounting and Auditing Literature

.184 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides, Audit Risk Alerts, Accounting Trends & Techniques, and more. To subscribe to this essential online service for accounting professionals, visit www.cpa2biz.com.
Continuing Professional Education

.185 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- **AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)** (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

- **The International Financial Reporting Standards: An Overview** (product no. 157220kk [online] or 739750HSkk [CD-ROM]). This course captures a live presentation on IFRS given to the AICPA board of directors.

.186 Among the many courses, the following are specifically related to the NFP industry:

- **Auditing Nonprofits: Tips and Traps** (product no. 731525kk [text]). This course will help you better understand essential aspects of auditing in this industry to conduct audits in the most effective manner and offer practical tips to guide you through possible traps encountered in auditing a not-for-profit.

- **Nonprofit Auditing and Accounting Update (2008–2009 Edition)** (product no. 732094kk [text] or 182075kk [DVD]). Covering all the latest auditing and accounting developments affecting not-for-profit entities, this course will give you a complete understanding of changes in the not-for-profit environment. For 2008–2009, the course will include coverage of the new Yellow Book, SAS No. 112, and more.

- **Accounting and Reporting Practices of Not-for-Profit Organizations** (product no. 743276kk [text]). Understand and apply the requirements of FASB and AICPA pronouncements to your not-for-profit clients. Consider real world financial statements, cases, and problems faced by CPAs with not-for-profit clients and by executives of NFPs.

- **Frequent Frauds Found in Governments and Not-For-Profits** (product no. 733311kk [text]). Through an informative case study approach, this course illustrates common frauds that make headlines and damage the reputations of government and NFPs.

.187 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.188 AICPA CPExpress, offered exclusively through CPA2Biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to NFPs include the following:

- **Nonprofit Auditing: Unique Auditing for a Unique Entity**

- **Fraud in Exempt Organizations: The Governmental and Not-for-Profit Environments**

- **Nonprofit Accounting: Financial Reporting**

.189 To register or learn more, visit www.cpa2biz.com.

Webcasts

.190 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.
CFO Quarterly Roundtable Series

.191 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful entities employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

IFRS Quarterly Webcast Series

.192 The IFRS Quarterly Webcast Series, brought to you each calendar quarter, is part of a multistep educational process to get practitioners, financial managers, and auditors up to speed on all aspects of IFRS implementation. Over the course of the quarterly series, IFRS standards will be covered in depth. International harmonization is quickly approaching, and this series will help both accountants and auditors stay abreast of the developments and the changes they will need to implement.

Member Service Center

.193 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.194 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. The hotline is available from 9 a.m. to 8 p.m. EST on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.195 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

Industry Conferences

.196 The AICPA offers its annual not-for-profit entities conference in June. The National Not-For-Profit Industry Conference is a comprehensive forum that deals with the challenges facing not-for-profit practitioners and financial executives today. It’s where you’ll find out the latest information on the impact of tax, management, auditing, and accounting issues pertaining to NFPs. You’ll also receive training in operational strategies that are crucial to the well-being of an NFP. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

.197 In November, the AICPA offers its Not-for-Profit Financial Executive Forum in Anaheim, CA. This conference is a unique educational offering focusing on the issues faced by financial executives in NFPs. The objective of the forum is to provide a solutions-based conference that will address a wide variety of relevant topics encountered by the NFP financial executive. The sessions offered will enable increased interaction and the exchange of ideas among the participants and seek to provide clarification on the tough subjects. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.
AICPA Governmental Audit Quality Center

.198 The Governmental Audit Quality Center (GAQC) is a firm-based, voluntary membership center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC’s primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm’s governmental audits.

.199 The mission of the GAQC is to do the following:

• Raise awareness about the importance of governmental audits
• Serve as a comprehensive resource provider on governmental audits for member firms
• Create a community of firms that demonstrates a commitment to governmental audit quality
• Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues
• List member firms to enable purchasers of governmental audit services to identify firms that are members
• Provide information about the center’s activities to other governmental audit stakeholders

.200 For more information about the GAQC, visit gaqc.aicpa.org.

AICPA Industry Expert Panel—Not-for-Profit Entities

.201 For information about the activities of the AICPA Not-for-Profit Entities Industry Expert Panel, visit the panel’s Web page at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Industry Web Sites

.202 The Internet covers a vast amount of information that may be valuable to auditors of NFPs, including current industry trends and developments. Some of the more relevant sites for auditors with not-for-profit clients include those shown in the appendix of this alert.

.203 The Not-for-Profit industry practices of some of the larger CPA firms also may contain industry-specific auditing and accounting information that is helpful to auditors.

* * * *

.204 This Audit Risk Alert replaces Not-for-Profit Organizations Industry Developments—2008.

.205 The Audit Risk Alert Not-for-Profit Entities Industry Developments is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year’s Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert also would be appreciated. You may e-mail these comments to ccole@aicpa.org or write to

Government Auditing Standards and Circular A-133 Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL AND COMPLIANCE REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors who perform audits under Government Auditing Standards or Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Nonprofit Organizations, with an overview of recent technical, regulatory, and professional developments that may affect the audits they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Susan M. Reed, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the following individuals for their essential contributions in creating this publication.

Corey Arvizu, CPA
Eric Berman, CPA
John Good, CPA
Kimberly McCormick, CPA

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your audits conducted in accordance with Government Auditing Standards (GAS or the Yellow Book) or Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations (Circular A-133). This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environment in which your clients operate. Moreover, this alert delivers information about emerging practice issues and current auditing and regulatory developments as it relates to audits performed under GAS and Circular A-133.
.02 It is important that you understand what is happening in the GAS and Circular A-133 arena if you perform these audits. This alert assists you in gaining an understanding of key developments regarding these audits.

.03 Readers may also find the *Comprehensive Audit Risk Alert—2008* (product no. 022339kk) useful. Further, if you are performing a financial statement audit of a state, local government, or nonprofit organization, you may also refer to the following Audit Risk Alerts:

- Audit Risk Alert *State and Local Governmental Developments—2008* (product no. 022438kk)
- Audit Risk Alert *Not-For-Profit Organizations Industry Developments—2008* (product no. 022428kk)
- Audit Risk Alert *Health Care Industry Developments—2008* (product no. 022349kk)

.04 These alerts can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in these alerts.

**Understanding the Entity, Its Federal Programs and Compliance Requirements, Internal Control Over Compliance and Assessing the Risks of Material Noncompliance**

.05 As noted in AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), an auditor should obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. The Audit Risk Alerts titled, *State and Local Governmental Developments—2008*, *Not-For-Profit Organizations Industry Developments—2008*, and *Health Care Industry Developments—2008* further discuss the auditor’s responsibilities in this area for a financial statement audit.

.06 In a GAS or Circular A-133 audit, it is also important to understand the entity subject to audit, its federal programs and compliance requirements, and its internal control over compliance with those compliance requirements. This understanding assists the auditor in assessing the risk of material noncompliance and to design the nature, timing, and extent of further audit procedures.

.07 Further, Circular A-133 states that the auditee should maintain internal control over compliance for federal programs that provides reasonable assurance that the auditee is managing federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a direct and material effect on each of its federal programs. The auditor should perform procedures to obtain an understanding of internal control over federal programs sufficient to plan the audit to support a low assessed level of control risk for major programs. The auditor should understand the assertions relevant to the compliance requirements for each major program. When considering internal control over compliance, the auditor should obtain an understanding of the five elements of internal control (that is, control environment, risk assessment, control activities, information and communication, and monitoring) sufficient to assess the risks of material noncompliance with each direct and material compliance requirement for each major program.

.08 The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to the compliance audit and to determine whether they have been implemented. The auditor should use the information gathered from the risk assessment procedures as audit evidence to support the risk assessment.

.09 Risk assessment procedures are described in paragraph .06 of AU section 314 and may include inquiry of entity personnel, observing the application of a specific control, and inspecting documents and reports. Paragraph .55 of AU section 314 states that inquiry alone is not sufficient to evaluate the design of a control and to determine whether it has been implemented. Chapter 9, “Consideration of Internal Control
Over Compliance for Major Programs” of the Audit Guide Government Auditing Standards and Circular A-133 Audits provides more information related to the auditor’s consideration and testing of internal control over compliance for major programs.

.10 Because Circular A-133 requires the auditor to determine whether the auditee has complied with laws, regulations, and the provisions of contracts or grant agreements that may have a direct and material effect on each of its major federal programs, the auditor should assess not only the risk that noncompliance may cause the financial statements to contain a material misstatement, but also the risk that noncompliance may have a material effect on each of its major programs. Chapter 6, “Planning Considerations of Circular A-133,” of the Audit Guide Government Auditing Standards and Circular A-133 Audits discusses audit risk as it relates to the compliance auditing of major programs.

.11 Finally, one of the auditor’s initial tasks in the planning process of a GAS or Circular A-133 audit is determining whether management has properly defined the entity to be audited. Chapter 6 of the Audit Guide Government Auditing Standards and Circular A-133 Audits provides additional information on defining the entity to be audited, including the option for auditees to meet the requirements of Circular A-133 through a series of audits that cover an auditee’s departments, agencies, and other organizational units that expended or otherwise administered federal awards during a fiscal year.

Economic Developments

The State of the Economy

.12 When planning and performing a financial statement audit, an auditor should understand the economic conditions facing the industry. Economic activities relating to factors such as interest rates, availability of credit, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited. The Audit Risk Alerts State and Local Governmental Developments—2008 (product no. 022437), Not-For-Profit Organizations Industry Developments—2008 (product no. 022428), and Health Care Industry Developments—2008 (product no. 022348) further discuss the state of the economy and the potential impact on financial statement audits of governmental, not-for-profit, and health care organizations.

.13 Although it may appear at first glance that the recent turmoil in the financial markets may not have a direct impact on entities receiving federal funds, that may not be the case. An entity’s overall operations may be affected, which in turn may lead to changes in the services provided by the entity, its administration of federal programs, and its related internal control over compliance. This information may be a consideration for the auditor in planning and performing a Circular A-133 audit when assessing the risks related to the audit.

Legislative and Regulatory Developments

Report on Single Audit Quality

.14 From the standpoint of the federal user, audits conducted under Circular A-133 are a key accountability mechanism for the expenditure of taxpayer dollars. Circular A-133 defines single audit as an audit that includes both the entity’s financial statements and federal awards. In June 2007, the results of a federal study on single audit quality were issued by the President’s Council on Integrity and Efficiency (PCIE) and Executive Council on Integrity and Efficiency. The Report on National Single Audit Sampling Project (the PCIE report), identifies single audit quality deficiencies and shows that improvements are needed. The types of audit quality issues identified in the PCIE report are also consistent with the types of issues found in peer reviews of firms doing single audits and in investigations performed by the AICPA Professional Ethics Division. Appendix A, “Common Deficiencies Identified in the PCIE Report,” summarizes the deficiencies identified in the report.
Consequently, as an auditor who performs single audits, you should review the PCIE report in detail to determine if the audit quality deficiencies cited in the report may affect the planning of your future engagements or your current audit methodologies and documentation practices. This report will have a significant impact on the requirements for and performance of single audits in the future; therefore, it is important for auditors to understand the issues.

The PCIE report proposes a three pronged approach for reducing the deficiencies found and improving the quality of single audits: (1) revise and improve single audit standards, criteria, and guidance; (2) establish minimum continuing professional education (CPE) as a prerequisite for auditors to be eligible to be able to conduct and continue to perform single audits; and (3) review and enhance the disciplinary processes to address unacceptable audits and for not meeting training and CPE requirements. The recommendations in the report are directed at various organizations, including OMB, other federal agencies, the AICPA, and other single audit stakeholders.

Response to the PCIE Report

The AICPA shares the commitment of the federal agencies involved in the project to improve the quality of single audits. The audits reviewed were submitted and accepted for the period April 1, 2003, through March 31, 2004; and the AICPA is hopeful that many endeavors over the last several years (for example, the launch of the Governmental Audit Quality Center [GAQC]) have already begun to address some of the issues raised in the PCIE report.

The AICPA, the GAQC Executive Committee, and GAQC staff are working closely with the federal government to address the PCIE report recommendations. During the course of the past year, since the report was issued, the AICPA and GAQC have taken significant action in response to the PCIE report.

GAQC Director Testifies at Senate Hearing on Single Audit Quality

On October 25, 2007, the director of the AICPA’s GAQC testified before the U.S. Senate Homeland Security and Governmental Affairs Committee’s Subcommittee on Federal Financial Management, Government Information, Federal Services, and International Security.

The purpose of the hearing, “Single Audits: Are They Helping to Safeguard Federal Funds?”, was to discuss the results of the PCIE report and the various roles that oversight organizations have in monitoring single audits to ensure federal funds are safeguarded. Other witnesses included representatives from OMB, Government Accountability Office (GAO), and the Department of Education, which coordinated administration of the PCIE report.

The AICPA testimony emphasized that single audits are important in helping safeguard taxpayer dollars, that poorly performed audits are always unacceptable, and that the AICPA will continue its ongoing efforts to enhance the quality of governmental audits. The testimony provided by the AICPA also noted steps AICPA took, on its own initiative, long before the PCIE report was released to improve audit quality, with a strong emphasis on the establishment of the GAQC, in addition to the steps that are being taken in response to the PCIE report. One of the steps taken in response to the report was to form task forces to examine the findings and recommendations for the AICPA, which is discussed in the next section.

The testimony also included views on the other non-AICPA recommendations in the PCIE report. Furthermore, it was noted that significant improvement in the quality of governmental audits will only occur when all the key single audit stakeholder groups—the auditing profession, the procurers of single audit services, and the federal agencies—are involved in the solution.
The other witnesses also expressed concerns about the quality of single audits and discussed thoughts on how the quality issues might be solved. The written testimony of all witnesses can be accessed via the U.S. Senate subcommittee’s Web site at http://hsgac.senate.gov.

**AICPA and GAQC Single Audit Quality Task Forces**

In response to the PCIE report, the AICPA has formed seven task forces to examine the PCIE report findings and recommendations for the AICPA as follows:

- Sampling and materiality issues in a single audit environment
- Internal control and compliance responsibilities in a single audit environment
- Schedule of Expenditures of Federal Awards (SEFA) reporting issues
- Reporting audit findings in a single audit
- Single audit training needs and CPE evaluation
- Practice monitoring
- Statement on Auditing Standards SAS No. 74 revisions

These task forces have met since October 2007 and are studying the relevant issues. The goal of the task forces is to develop solutions to the detailed findings in the PCIE report that will provide guidance for auditors. These task forces are working with the Auditing Standards Board (ASB), OMB, and other federal agencies as necessary to ensure that all relevant parties are involved. A short summary of the work of each task force follows. Visit the GAQC Web site (www.aicpa.org/GAQC) for further updates and new developments.

**Sampling and Materiality Issues in a Single Audit Environment.** The purpose of this task force is to respond to the audit quality issues in the PCIE report that relate to sampling and materiality. This task force is developing a new chapter for the Audit Guide Government Auditing Standards and Circular A-133 Audits to address the many sampling considerations in a single audit environment. It will work closely with the ASB to ensure that any guidance issued is consistent with current auditing standards, as well as the AICPA Audit Guide Audit Sampling. The current plan is for the new chapter to be added to the 2009 version of the Audit Guide Government Auditing Standards and Circular A-133 Audits.

**Internal Control Over Compliance and Compliance Responsibilities in a Single Audit Environment.** The purpose of this task force is to respond to the audit quality issues in the PCIE report that relate to the auditor’s responsibilities for internal control over compliance—both in gaining an understanding of internal control and for testing internal control—as well as for compliance testing. As a first step, changes were made to both chapter 9 and chapter 10, “Compliance Auditing Applicable to Major Programs,” of the Audit Guide Government Auditing Standards and Circular A-133 Audits to enhance the discussion of the auditor’s responsibilities for both internal control over compliance and compliance. Additionally, this task force is developing illustrative audit documentation to assist auditors in documenting their understanding of internal control over compliance and related testing of both internal control and compliance.

**SEFA Reporting Issues.** The purpose of this task force is to respond to the audit quality issues in the PCIE report that relate to the auditor’s reporting on the SEFA. As a first step, changes were made to chapter 7, “Schedule of Expenditures of Federal Awards,” of the Audit Guide Government Auditing Standards and Circular A-133 Audits to enhance the discussion of the auditor’s responsibilities for testing and reporting on the SEFA. Additionally, this task force is developing an illustrative audit program to assist auditors in documenting the procedures performed on the SEFA and an illustrative checklist to document that the SEFA contains all of the required elements.

**Reporting Audit Findings in a Single Audit.** The purpose of this task force is to respond to the audit quality issues in the PCIE report that relate to the auditor’s reporting of findings. The task force is examining issues related to when audit findings must be reported and the elements to include in presenting findings.
The task force is developing an illustrative findings template to assist auditors in documenting and evaluating their findings and ensuring that their finding write-ups include all required elements.

.30 Single Audit Training Needs and CPE Evaluation. The purpose of this task force is twofold; both objectives are necessary in light of the recommendation in the PCIE report proposing that OMB consider requiring 16–24 hours of single audit training as a prerequisite to performing single audits. The first objective is to develop appropriate best practice training curriculums for auditors performing single audits at various staff levels. The second objective is to evaluate current AICPA CPE offerings relating to single audits from a number of perspectives to ensure high-quality training is available. The task force has developed a white paper summarizing its recommendations relating to single audit training, which it has submitted to OMB for its consideration in determining whether to make a future change to Circular A-133 to add a single audit training requirement.

.31 Practice Monitoring. This task force is studying the results of the PCIE report to determine ways in which the peer review process can aid in enhancing the quality and performance of Circular A-133 audits by member firms. The task force is in the first phase of its work, having recently met with the various federal agencies that perform quality control reviews (QCRs) to help the AICPA better understand the QCR processes across federal agencies and to assist the inspectors general in better understanding the peer review process. The task force anticipates presenting specific recommendations for actions at the peer review board’s early 2009 meeting so that its recommendations can potentially be implemented in the performance of 2009 peer reviews.

.32 SAS No. 74 Revisions. This task force is considering what revisions are needed to SAS No. 74, Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance (AICPA, Professional Standards, vol. 1, AU sec. 801), as a result of the PCIE report. Because this project will result in a number of clarifications and enhancements to SAS No. 74, formal due process is required. An exposure draft is expected to be issued by the end of 2008, with a final standard to be issued in 2009. Upon issuance, any appropriate changes needed to the Audit Guide Government Auditing Standards and Circular A-133 Audits will be made as conforming changes.

GAO Developments

Single Audit Quality—GAO Study

.33 The GAO has also been asked by the same Senate subcommittee that initiated the hearing mentioned previously to do its own separate study of the single audit process. Although the GAO will certainly take into account the results of the PCIE report, its study, most likely, will be broader and will include looking at how the Single Audit Act Amendments of 1996 (Single Audit Act) and Circular A-133 are working and whether changes need to be made. The GAO testimony identified some of the questions it believes need to be considered in addition to the recommendations cited in the PCIE report. The following questions will be contemplated in this study:

- What types of simplified alternatives exist for meeting the accountability objectives of the Single Audit Act for the smallest audits and what would the appropriate cutoff be for a less complex audit requirement?
- Is the current federal oversight structure for single audits adequate and consistent across federal agencies?
- What alternative federal oversight structures could improve overall accountability and oversight in the single audit process?
- Are federal oversight processes adequate and are sufficient resources being dedicated to oversight of single audits?
- What role can the auditing profession play in increasing single audit quality?
- Do the specific requirements in the Single Audit Act and Circular A-133 need to be updated?
Additionally, as part of the study the GAO will also consider the actions taken by the AICPA and OMB since the issuance of the PCIE report. The GAO study is anticipated to be completed by the end of 2008 or sometime early in 2009.

**2007 Revision of GAS**

Auditors are reminded that the GAO issued a complete update to GAS in 2007, which superseded the previous 2003 version. The new Yellow Book is effective for financial audits and attestation engagements for audits of periods beginning on or after January 1, 2008. For performance audits, the standards are effective for audits beginning on or after January 1, 2008. Some of the more significant changes in the 2007 version are as follows:

- Added a new chapter on ethical principles
- Enhanced and clarified the requirements for an audit organization’s system of quality control by specifying the elements of quality that an organization’s policies and procedures collectively address
- Added a requirement that external audit organizations make their most recent peer review report publicly available
- Updated GAS based on recent developments in financial auditing and internal control
- Increased transparency surrounding reporting on restated financial statements
- Revised the performance auditing chapters

Last year’s Audit Risk Alert covered the major changes to GAS in more detail. The 2007 revision of GAS can be accessed at www.gao.gov/govaud/ybk01.htm.

**GAS: Implementation Tool**

The GAO issued a guidance document, Government Auditing Standards: Implementation Tool—Professional Requirements Tool for Use in Implementing Requirements Identified by “Must” and “Should” in the July 2007 Revision of Government Auditing Standards. The professional requirements tool lists the requirements for audit organizations and auditors included in the 2007 revision of GAS.

The tool is divided into four sections. The general requirements section contains entitywide requirements for the audit organization and is intended for use in addition to the specific sections for financial audits, attestation engagements, and performance audits, which contain engagement specific requirements for the auditors conducting the engagement. Audit organizations and auditors should also refer to the complete text of the 2007 revision of GAS to understand the context for those requirements along with related guidance.

The tool was prepared by the GAO’s GAS staff to facilitate audit organizations’ and auditors’ implementation of the standards and to assist auditors with documenting compliance with GAS. It does not represent additional standards or requirements. Instead, it helps auditors quickly identify standards requirements and make decisions about those standards applicable to their audits. The tool is available at www.gao.gov/new.items/d08210g.pdf. (Implementation Tool, GAO-08-210G, December 2007).

**Guidance on Complying With GAS and the Sarbanes-Oxley Act of 2002**

Certain companies subject to the Securities Exchange Act of 1934 may be required to have an audit conducted in accordance with standards issued by both the Public Company Accounting Oversight Board (PCAOB), as required by the Sarbanes-Oxley Act of 2002, and the Comptroller General of the U.S., as contained in GAS. Some examples include lending institutions that participate in federally sponsored loan programs such as housing and education. For such entities, auditors must meet the requirements of both sets of standards in conducting their work.
GAS may be used in conjunction with standards issued by the PCAOB, even though these standards are not incorporated by reference into GAS. GAO recognized that the use of PCAOB’s framework for assessing internal control deficiencies could result in inconsistencies in reporting on internal control under GAS. In order to facilitate reporting under both PCOAB and GAO standards, to ensure consistency of information included in the GAS report on internal control, and to assist auditors in complying with GAS, GAO issued guidance on this subject in December 2007, which can be accessed at www.gao.gov/govaud/gagaspcaob2007.pdf. This guidance provides that

- auditors should include in the GAS report on internal control any material weakness contained in the opinion of the effectiveness of the audited entity’s internal control over financial reporting that was prepared based on PCAOB’s Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”);
- auditors who prepare the GAS report using “material weaknesses” from the PCAOB opinion on the effectiveness of the company’s internal control over financial reporting should also include in their report any other control deficiencies that meet the definitions of “material weakness” or “significant deficiency” as defined in SAS No. 112, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325). Such reporting satisfies the requirements of paragraph 5.11 of GAS;
- auditors should, in the GAS report, clearly state that the PCAOB standards and definition were used, describe the scope of the work performed, and provide appropriate definitions of applicable PCAOB terminology if they elect to include in the GAS report material weaknesses based on the definition provided in PCAOB Auditing Standard No. 5; and
- auditors should comply with all other relevant GAS requirements related to reporting deficiencies in internal control.

Other GAO Developments

In March 2008, David Walker, comptroller general of the U.S. and head of GAO, resigned his position in order to accept the position of president and CEO of the newly established Peter G. Peterson Foundation. Gene Dodaro, GAO’s chief operating officer, is currently serving as acting comptroller general.

OMB Developments

OMB Response to PCIE Report

In response to the PCIE report, the OMB has formed eight work groups to examine the PCIE report findings and recommendations from a federal perspective. The work groups are focusing on the following:

- Revisions to A-133 and AICPA guidelines to report audit findings
- Revisions to A-133, the AICPA Audit Guide, and the OMB Compliance Supplement to document the required compliance testing
- Revisions to A-133 and AICPA guidelines for audit testing and sampling
- Revisions to A-133 to require single audit training (will include development of training curriculum)
- Review of suspension and debarment process and identification of alternative methods to address unacceptable audits
- Coordination with other single audit constituencies for sanctions and punitive actions for substandard audits
- Coordination with PCIE to issue uniform standards on QCRs
- The New and Improved Single Audit Process
The work of one or more of these task forces could result in proposed revisions in Circular A-133 over the course of the next year. Auditors should visit the GAQC Web site (www.aicpa.org/GAQC) for updates on future developments.

**OMB Single Audits and Private Information**

Auditors reporting under Circular A-133 should be aware that personal private information should not be included in audit findings in reports issued under Circular A-133. Findings that involve sensitive information (for example, Social Security numbers) should be summarized in a manner that ensures the requirements found in Circular A-133 section 510(b) are met. However, any detailed personal private information should be omitted from the finding write-up. Auditors should also consider the guidance in sections 5.39–.43 of GAS (2007 revision). If a federal agency wishes to follow up on a finding, the personal information necessary to be communicated can be done so in a subsequent, nonelectronic, private communication to the agency when requested.

**Circular A-133 Compliance Supplement Update**

The Circular A-133 Compliance Supplement, issued annually by OMB, is one of the most important pieces of guidance used by an auditor in a single audit. The supplement identifies the compliance requirements that the federal government expects to be considered as part of an audit required by the Single Audit Act. For the programs it includes, the Compliance Supplement provides a source of information for auditors to understand the federal program’s objectives, procedures, and compliance requirements relevant to the audit, as well as audit objectives and suggested audit procedures for determining compliance with these requirements. Programs not listed in the Compliance Supplement are addressed in part 7, “Guidance for Auditing Programs Not Included in This Compliance Supplement,” which instructs readers to use the types of compliance requirements contained in the Compliance Supplement as a guide to help identify the compliance requirements to test, and to determine the requirements governing the federal program. A review of the provisions of the auditee’s contracts and grant agreements and the laws and regulations referred to in such contracts and grant agreements will assist the auditor in determining the relevant compliance requirements and any other federal requirements.

**Help Desk**—The current year’s Compliance Supplement and two previous years’ versions are available at www.whitehouse.gov/omb/grants/grants_circulars.html.

OMB issued the 2008 Compliance Supplement in May 2008. The 2008 Compliance Supplement is effective for audits of fiscal years beginning after June 30, 2007, and supersedes the 2007 Compliance Supplement issued in March 2007. Appendix V of the supplement, “List of Changes for the 2008 Compliance Supplement,” is a key piece of information to help the auditor identify all of the changes OMB has made to the supplement. Because there are numerous changes to many programs listed, it is important for auditors to review the most current Compliance Supplement as part of audit planning.

The 2008 Compliance Supplement has been updated for the 2007 revision to Circular A-133 and other guidance, links, and references, as appropriate. The more significant changes in the 2008 Compliance Supplement include the following:

- Five new programs were added to part IV, “Agency Program Requirements.”
- Over 40 programs and 2 program clusters (Research & Development and Student Financial Assistance Programs) had significant changes through updates, corrections, or both, in part IV. A number of additional programs had minor changes made to them.
- Significant changes in content, mainly reflecting part IV revisions, were made to part II, “Matrix of Compliance Requirements.”
• Significant changes reflecting the language of Circular A-133 were made to part III, “Allowable Costs/Cost Principles.” Compliance requirement I, “Procurement and Suspension and Debarment,” was also updated.

• Updates were made to appendix VI, “Disaster Waivers and Special Provisions Affecting Single Audits,” as well.

**OMB Web Site and Federal Funding Accountability and Transparency Act**

.49 The OMB Web site at www.USASpending.gov (previously accessed at www.federalspending.gov) provides searchable data on federal grants, contracts, and other spending, allowing taxpayers to see where their federal dollars go and who spends it. The purpose of this Web site is to satisfy the provisions of the Federal Funding Accountability and Transparency Act, which became law in 2006. Users can search by contracts and grants, contractor names, congressional districts, and lawmakers. The data can be sorted by the various column headings and is downloadable. Though the site is still a work in progress, ultimately, OMB plans for agencies to send information directly to this site so it will be available in real time.

**Pending Revision of Federal Financial Report**

.50 OMB is consolidating and replacing four existing financial reporting forms (SF-269, SF-269A, SF-272, and SF-272A) with a single Federal Financial Report (FFR). The purpose of the FFR is to give recipients a standard format for reporting the financial status of their grants and cooperative agreements. Consistent with government-wide streamlining objectives, the FFR will result in the use of standard reporting dates for interim reports. Interim reports (quarterly, semiannual, or annual) will be for the periods ending March 31, June 30, September 30, and December 31, regardless of the grant budget period or project period dates. Interim quarterly and semi-annual reports will be due 30 days after the reporting period end date. Annual and final reports will be due 90 days after the reporting period end date. The termination date of the grant or project is the reporting period end date for purposes of the final report. The new FFR form (SF-425) is available on the OMB Web site at www.whitehouse.gov/omb/grants/grants_forms.html. The revised form will be phased into use by no later than October 1, 2009.

**Federal Audit Clearinghouse Developments**

.51 The Federal Audit Clearinghouse (FAC) operates on behalf of OMB. Its primary purposes are to

- collect single audit and program specific audit information and disseminate it to federal agencies and the public;
- support OMB oversight and assessment of federal award audit requirements;
- assist federal cognizant and oversight agencies in obtaining Circular A-133 data and reporting packages; and
- help auditors and auditees minimize the reporting burden of complying with Circular A-133 audit requirements.

.52 Auditees are responsible for submitting the required reporting package, which includes the audit reports and the data collection form (DCF or Form SF-SAC). Both the auditee and the auditor are responsible for completing certain portions of the DCF before it is submitted with the reporting package.

**Submissions of the 2008–2010 DCF**

.53 Beginning with 2008 fiscal year-end and forward, paper submissions of the DCF (or Form SF-SAC) will not be accepted. One may submit it only online. In addition, while currently you can find the 2008–2010 DCF on the FAC Web site, the link takes you to the Internet Data Entry System (IDES), where the DCF is accessed and submitted electronically. Due to the newly instituted requirement of electronic submission, preparers of the form may need to upgrade their computer capabilities. The instructions for the 2008–2010
DCF ("IDES 2008–2010 Instructions") contain an extensive amount of information about using IDES and submitting the form. They too are available on the FAC Web site under DCF.

.54 The submission method for the single audit reporting package (which includes the DCF) has also changed, with the entire reporting package being submitted online.

.55 A summary of the steps is as follows:

2. Complete the DCF (or Form SF-SAC).
3. Upload the single audit.
4. Certify the submission.
5. Submit the entire single audit reporting package online.

.56 Users may return to their submission multiple times using the same password and report ID. Also, the certifying officials for both the auditee and auditor are required to certify the submission prior to the package’s online submission as a single PDF file. Only one copy of the reporting package is required. (Note that each report ID corresponds to one single audit submission for one fiscal period.) Both the auditee and auditor will receive an e-mail confirming the receipt of the single audit reporting package.

Submission of DCF for Fiscal Years Ending Prior to 2008

Major Programs and the DCF

.58 Among the quality deficiencies discussed in the PCIE report, a matter that was noted in multiple instances was referred to as a “material reporting error.” This deficiency occurred when the Schedule of Findings and Questioned Costs incorrectly identified certain major programs as having been audited when, in fact, they were not audited in that year. This is considered a very serious error as it results in the auditor erroneously expressing a compliance opinion on one or more programs that were not audited. In addition, it has been noted that when filling out the DCF, sometimes the incorrect box is marked indicating a major program when in fact the program is not major.

.59 To assist auditors and organizations in avoiding this type of error, the FAC made revisions to both IDES and the frequently asked questions (FAQ). When a form is being completed using IDES, a pop-up message appears at certain points (including when an entry has been input into part III, item 9g) that states, “Caution! Programs indicated as major must agree with programs identified as major in the summary of auditor’s results and actually tested as major by the auditor.” Also, question 22 in the FAQ has been revised to indicate the same.

DCF and Reporting Package Submission Not Appropriate in Compliance Audits of For-Profits

.60 Some for-profit entities are required by granting agencies through either a grant clause or contract to have a Circular A-133 audit (or an audit that is very similar to a Circular A-133 audit). The FAC has asked that auditors remind their for-profit clients that must undergo such an audit that they are not to send the
DCF and the audit reporting package to the FAC. The package should be sent, however, to the requesting federal or state agency.

**Using the FAC Database**

.61 Auditors may find it worthwhile to investigate the FAC database. Instructions for its use are on the FAC Web site at http://harvester.census.gov/fac. The FAC expects that the major users of its database will be federal sponsoring agencies. A number of agencies report that they have found it useful, for example, to compare the results of their own programmatic audits with those Circular A-133 audits performed by independent auditors and filed on the database. FAC officials also point out that auditors can benefit from the database. For example, consider the following benefits:

- Auditors and their clients can check on the status of submissions.
- Auditors and their clients can ascertain the status of their subrecipients’ submissions.
- Auditors can perform overall analytical assessments of their organization’s audits to determine, for example, whether there are any problems with the two year look back rule and major program determination.
- Auditors can look at reports or findings related to programs they are auditing to supplement staff training.

**U.S. Department of Housing and Urban Development Update**

**U.S. Department of Housing and Urban Development Consolidated Audit Guide Revisions**

.62 The U.S. Department of Housing and Urban Development (HUD) continues its chapter by chapter update of the Consolidated Audit Guide for Audits of HUD Programs. The following table summarizes the changes issued at the time of this writing.

<table>
<thead>
<tr>
<th>Consolidated Audit Guide for Audits of HUD Programs Chapter</th>
<th>Date Change Was Issued</th>
<th>Change Effective for Audits With Fiscal Years Ending On or After</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chapter 3, “HUD Multifamily Housing Programs”</td>
<td>July 21, 2008</td>
<td>December 31, 2008</td>
</tr>
<tr>
<td>Chapter 4, “HUD Multifamily Hospital Program”</td>
<td>July 21, 2008</td>
<td>Effective upon issuance</td>
</tr>
</tbody>
</table>
Chapter 3 of the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* is the most recent updated chapter released by HUD. It relates to audits of HUD multifamily housing programs (that is, those that do not fall under the requirements of Circular A-133) and becomes effective for audits of fiscal years ending on or after December 31, 2008. If you are performing an audit of a multifamily program that is subject to Circular A-133 (for example, a not-for-profit organization), keep in mind that the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* reiterates that chapter 3 is not intended to be a program-specific audit guide for compliance with Circular A-133 requirements. Instead, it states that if the *Compliance Supplement* includes the program that is being audited, the guidance in the supplement is to be used.

If the *Compliance Supplement* does not include the program that is being audited, part 7 of the supplement provides guidance on how to identify the applicable compliance requirements to test. Paragraph 1d of part 7 states, “If there is any audit guidance issued by the federal agency’s Office of Inspector General (OIG), the auditor may wish to consider this guidance in identifying the program objectives, program procedures, and compliance requirements.” Chapter 3 of the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* should be used only for that purpose.

Auditors should review the transmittals announcing the issuance of each of the revised chapters, including the transmittal for chapter 3, on the HUD OIG Web site at www.hud.gov/offices/oig/reports/auditguide/. Those transmittals provide a summary of the significant revisions made to each chapter. Please also note that HUD has updated the illustrative internal control reporting found in chapter 2 of the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* for the terminology and definitions found in AU section 325, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, Professional Standards, vol. 1). However, the internal control reports on HUD’s Web site have not yet been updated to reflect the impact of recently issued SAS No. 115, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, Professional Standards, vol. 1, AU sec. 325), which supersedes SAS No. 112 of the same title. See the following section, “SAS No. 115 and Implications for Circular A-133 and Other Governmental Audits,” for more information.

The following chapters of the *Consolidated Audit Guide for Audits of HUD Programs* are under revision at the time of this writing:

- Chapter 1 “General Audit Guidance”
- Chapter 2 “Reporting Requirements and Sample Reports”

Auditors should periodically check HUD’s Web site at www.hud.gov/offices/oig/reports/auditguide/ to make certain that they identify and follow the relevant audit guidance. Use this Web link to be sure you access the latest version of the guide. Several other Web links permit you to download the entire guide, but that, unfortunately, may not include the latest chapter revisions.

The GAQC Web site will provide status updates on future HUD revisions to the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* on the newly established HUD information page at http://gaqc.aicpa.org/Resources/.
HUD Proposes an Independent Public Accountant Roster

On February 6, 2008, HUD issued a proposed rule titled “Independent Public Accountant Roster” relating to certain audits performed under the HUD audit guide *Consolidated Audit Guide for Audits of HUD Programs* or audits of governments or not-for-profit organizations that receive HUD funding and are subject to a single audit. The proposed rule would have modified HUD’s existing regulations in 24 Code of Federal Regulations (CFR) part 5 to establish a roster of approved independent public accountants and public accounting firms (IPAs) that would be permitted to perform audits or related services on covered entities. The proposed rule would have also established eligibility, application, and removal procedures for IPAs listed on the IPA Roster. Firms would have to submit an application to HUD and, upon acceptance, agree to adhere to eligibility requirements. HUD then would have had the ability to remove auditors from the roster for various reasons, including failing to maintain compliance with eligibility requirements. Once removed, a firm would no longer be allowed to perform HUD audits. In a recent public meeting, HUD staff announced that they were holding the proposed rule in abeyance in deference to the audit quality efforts underway in response to the PCIE report (see preceding sections “AICPA and GAQC Single Audit Quality Task Forces” and “OMB Response to PCIE Report”). Upon completion of those efforts, HUD will evaluate whether the changes made meet HUD needs and determine whether there is a need to restart efforts relating to a roster.

Audit and Attestation Issues and Developments

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with the *Comprehensive Audit Risk Alert—2008* (product no. 022339kk); therefore, only pronouncements and related guidance of specific significance to GAS and Circular A-133 audits are summarized herein. You can also refer to the industry specific Audit Risk Alerts mentioned previously in this alert for further discussion of the financial statement audit implications of these standards.

For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the *CPA Letter, Journal of Accountancy*, and in the quarterly electronic newsletter, *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. The GAQC Web site at www.aicpa.org/GAQC is also a useful resource.

As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers. The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at for information about its activities.

| **SAS No. 113, Omnibus Statement on Auditing Standards—2006** (AICPA, Professional Standards, vol. 1) | This standard does the following:  
- Revises the terminology used in the 10 standards of AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1), to reflect terminology in AU section 120, Defining Professional Requirements in Statements on Auditing Standards (AICPA, Professional Standards, vol. 1).  
- Adds a footnote to the headings before paragraphs .35 and .46 in AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), to provide a clear link between the auditor’s consideration of fraud and the auditor’s assessment of risk, and the auditor’s procedures in response to those assessed risks.  
- Replaces throughout the auditing standards the term completion of fieldwork with the term date of the auditor’s report.  
- Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor’s report. | November 2006 | (Applicable to audits conducted in accordance with GAAS) |
| **SAS Nos. 104–111, the “Risk Assessment Standards”** | The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits; focusing on identifying and assessing the risks of material misstatements; further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels; and improving the linkage between the risks, controls, audit procedures, and conclusions. These eight SASs became effective for audits of financial statements for periods beginning on or after December 15, 2006. | March 2006 | (Applicable to audits conducted in accordance with GAAS) |

| TIS sections 8200.05–16 (AICPA, Technical Practice Aids) | These questions and answers in TIS section 8200, *Internal Control*, were developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111. Some of the topics include:
- consideration of internal controls that are less formal or not documented by the client.
- whether the auditor may suggest improvements to a client’s internal control.
- assessing inherent risk in relation to the consideration of control risk.
- the frequency of walkthroughs that are used as the basis for the auditor’s understanding of internal control.
- considerations in obtaining an understanding of, evaluating, and documenting controls that the auditor believes are nonexistent or ineffective.
- assessing control risk at the maximum level.
- considerations for developing a substantive audit strategy. |
| Issue Date: April and May 2008 (Nonauthoritative) | |
| TIS section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditor’s Report” (AICPA, Technical Practice Aids) | This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor’s report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor’s report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations. |

Audit Developments

Recently Issued Guidance

.73 The AICPA ASB recently issued SAS No. 115, which supersedes SAS No. 112. Among the changes made by the new SAS are revisions to the definitions of the terms material weakness and significant deficiency that had been previously established in SAS No. 112. SAS No. 115 contains the following revised definitions of the terms material weakness and significant deficiency as they relate to internal control over financial reporting:

- **Material weakness.** A deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. (Note that in SAS No. 115, a reasonable possibility exists when the likelihood of the event is either reasonably possible or probable as those terms are used in Financial Accounting Standards Board Statement No. 5, Accounting for Contingencies.)

- **Significant deficiency.** A deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

.74 Even though the new definitions might appear to allow more flexibility in determining what to report as a significant deficiency, auditors should keep in mind that the new SAS states that the severity of a deficiency depends on (1) the magnitude of the potential misstatement resulting from the deficiency or deficiencies; and (2) whether there is a reasonable possibility that the entity’s controls will fail to prevent, or detect and correct, a misstatement of an account balance or disclosure. These criteria are very similar to the “magnitude” and “likelihood” criteria that were previously “built into” the significant deficiency definition.
SAS No. 115 also revises the list of deficiencies in internal control that are indicators of material weaknesses. The list now consists of:

- identification of fraud, whether or not material, on the part of senior management;
- restatement of previously issued financial statements to reflect the correction of a material misstatement due to error or fraud;
- identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity’s internal control; and
- ineffective oversight of the entity’s financial reporting and internal control by those charged with governance.

Finally, SAS No. 115 no longer includes a list of deficiencies that ordinarily would be considered at least significant deficiencies and contains a revised illustrative written communication to management and those charged with governance of material weaknesses and significant deficiencies.

**SAS No. 115 and Implications for GAS Audits**

As occurred when SAS No. 112 was issued, a ripple effect to other governmental standard-setters and regulators will occur as a result of the issuance of SAS No. 115. As of the writing of this alert, the GAO has already issued interim guidance on complying with GAS in conjunction with SAS No. 115 and SSAE No. 15, which can be accessed at www.gao.gov/govaud/ybk01.htm. The issuance of the GAO interim guidance was necessary because the internal control definitions used in the new AICPA standards differ from the definitions used in the July 2007 revision of GAS (which had been based on SAS No. 112 definitions).

GAO states that the purpose of its guidance is to facilitate reporting of internal control deficiencies identified in engagements performed under GAS and the new AICPA standards and to assist auditors in complying with GAS until the next update of the Yellow Book. The following interim guidance is provided for complying with the internal control reporting requirements of GAS:

- Auditors may satisfy the internal control reporting requirements in GAS paragraph 5.11 by including in the Yellow Book report on internal control all identified material weaknesses and significant deficiencies following the new definitions and requirements from SAS No. 115 and SSAE No. 15, as applicable, providing those definitions, and describing the scope of testing performed on the entity’s internal control over financial reporting.
- Auditors are reminded to comply with all other relevant GAS requirements related to reporting deficiencies in internal control, such as developing findings and providing recommendations for corrective action if findings are sufficiently developed (GAS paragraphs 5.21 and 6.42), obtaining views of responsible officials (GAS paragraphs 5.32–.38 and 6.44–.50), and ensuring appropriate report distribution (GAS paragraphs 5.44 and 6.56).

The GAO guidance becomes effective concurrent with the auditors’ implementation of SAS No. 115 or SSAE No. 15 or both. The GAO guidance does state that the Comptroller General’s Advisory Council on Government Auditing Standards will fully deliberate this issue in conjunction with the next GAS update, at which time the interim guidance may change.

**SAS No. 115 and Implications for Circular A-133 and Other Governmental Audits**

With GAO’s issuance of the previously described interim guidance, it is now permissible for auditors to implement SAS No. 115 on their financial statement audits performed under GAS and on internal control examinations performed under SSAE No. 15. However, auditors should keep in mind that Circular A-133 and other similar federal regulations or audit guides (for example, the U.S. Department of Housing and Urban Development Consolidated Audit Guide) have not yet been updated to reflect new internal control definitions for reporting on internal control over compliance. Therefore, it would not be appropriate for
auditors to use definitions for reporting on internal control over compliance that may be consistent with the definitions found in SAS No. 115 until such time as Circular A-133 or other regulations or guides are amended to allow usage of new updated definitions.

The GAQC staff is in the process of beginning to work with OMB and other federal agencies that require reporting on internal control over compliance to determine the changes needed to their regulations or federal audit guides or both as a result of the new AICPA standards. Visit the GAQC Web site (www.aicpa.org/GAQC) for reports on progress made in this area by OMB and other federal agencies.

**AICPA Updates Audit Guide Government Auditing Standards and Circular A-133 Audits**

The 2008 edition of the AICPA Audit Guide Government Auditing Standards and Circular A-133 Audits is available to provide auditors with more in-depth information on audits subject to GAS and Circular A-133. If you perform audits under either GAS or Circular A-133, this guide is a key resource that should be in your library. It incorporates audit guidance issued up through August 1, 2008 and includes the following:

- Guidance on planning and performing audits under the July 2007 revision of Government Auditing Standards
- Conforming changes for AU section 120, Defining Professional Requirements in Statements on auditing Standards (AICPA, Professional Standards, vol. 1)
- Guidance on the auditor’s responsibilities as found in SAS Nos. 112 and 114, including identifying, evaluating, and reporting deficiencies in internal control related to both financial reporting and compliance, and the auditor’s communication with those charged with governance
- Updated terminology and references to AU sections to be consistent with the AICPA risk assessment standards
- Enhancements to provide additional clarity on certain problem areas noted in the PCIE report, primarily in chapters 7 and 9 relating to the SEFA and internal control over compliance

The guide can be ordered by calling the AICPA at (888)777-7077 or going online at www.cpa2biz.com.

**AICPA Peer Review Checklists—A Tool to Help Improve Audit Quality**

In performing peer reviews, review teams must complete all relevant programs and checklists issued by the AICPA Peer Review Board. (Note that the standards for performing and reporting on peer reviews commencing on or after January 1, 2009, have been revised.) The AICPA updates its Peer Review Checklists annually; the 2008 versions of those checklists (which include checklists on state and local government, health care, and not-for-profit audits; GAS audits; single audits; and HUD audits) are now available. Although intended for use in peer reviews, the various relevant checklists are a helpful tool for firms or audit organizations to use to ensure auditors have not overlooked anything significant before issuing their audit reports. Taking this step may help you improve your audit quality. The various relevant checklists can be accessed through the GAQC at http://gaqc.aicpa.org/Resources/Research+Tools+and+Aids/2008+Peer+Review+Checklists.htm.

**Common Deficiencies Found During Peer Reviews of Audits of Entities Subject to GAS**

Among the deficiencies commonly found during peer reviews of audits of entities subject to GAS and Circular A-133 are the following:

- Failure to document tests of controls and compliance for engagements subject to Circular A-133, perform adequate tests in other key areas, and to test controls over compliance in Single Audit Act engagements
• Failure to adequately design compliance and control tests, including sampling applications, to support the reports issued
• Failure to include proper Circular A-133 reports
• Failure to include proper reports on internal control or compliance
• Failure to disclose reportable conditions (now significant deficiencies) or material noncompliance with GAS
• Failure to refer to reports on controls and compliance in the report on financial statements
• Failure to include required disclosures
• Failure to perform an audit that was required by statute and performing a review instead
• Failure to meet GAS CPE requirements

.85 This list does not contain all the areas of recurring deficiencies. More information is available on the AICPA Web site at www.aicpa.org/download/members/Div/practmon/Revised_Deficiency_Guidance_for_2008-_FINAL.pdf.

Recent AICPA Independence and Ethics Pronouncements

.86 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

.87 The AICPA has compiled a list of violations found as a result of recent ethics investigations. This list contains a number of violations that occur frequently in government and not-for-profit organization engagements. The following is a brief excerpt of that listing:

• Failure to accurately identify and test all major programs in accordance with Circular A-133
• Failure to obtain sufficient competent audit evidence to support the auditor’s report (found in various areas of audits but most frequently found in the work performed auditing major programs)
• Failure to note that the SEFA did not provide total federal awards expended for each individual federal program by Catalog of Federal Domestic Assistance (CFDA) number
• Failure to report audit findings in the Schedule of Findings and Questioned Costs with the required elements of criteria, condition, cause, and effect

Independence Requirements Under AICPA, GAS, and Circular A-133

.88 Auditors who perform audits under GAS (including Circular A-133 audits), should be aware of the independence rules in those standards and regulations, as well as the independence rules of the AICPA. The AICPA’s Professional Ethics Executive Committee proposes and issues ethics interpretations and rulings relating to independence and other ethics matters. You can download recent proposals and rulings from the AICPA Web site at www.aicpa.org/members/div/ethics/index.htm.

Help Desk—In July 2006, the AICPA published a Practice Aid, Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements (product no. 006627kk). This valuable tool contains a series of checklists to help auditors determine their compliance with applicable independence rules. The publication is currently being updated and a new edition will be available in 2009. This practice aid and others can be obtained at www.cpa2biz.com or by calling the AICPA at (888) 777-7077.
For audits conducted in accordance with GAS, auditors and audit organizations also are subject to the GAS independence rules. Those rules, which are, in some cases, very similar to the AICPA independence rules and in other cases more restrictive, specify when personal, external, and organizational impairments to independence exist. The GAO has available on its Web site a question and answer document, Answers to Independence Standard Questions, to address its independence standard.

Finally, auditors should note that section 305(b) of Circular A-133 contains an additional independence requirement. Under Circular A-133, an auditor who prepares the indirect cost proposal or cost allocation plan may not also perform the single audit when indirect costs recovered by the auditee during the prior year, as defined, exceeded $1 million.

On the Horizon

Auditors should keep abreast of auditing, compliance, and accounting developments and upcoming guidance that may affect their engagements. Clearly, with all of the activity described in this alert, particularly the activities in response to the PCIE report, auditors will likely have many developments to keep track of in the next year. Auditors may want to bookmark the GAQC Web site at www.aicpa.org/GAQC and check it regularly for the latest news and developments.

The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Readers should refer to information provided by the various standard setting bodies for further information.

Auditing Pipeline

Proposed Revisions to SAS No. 74

The ASB is continuing its work on revising SAS No. 74. This project was primarily a response to the issuance of the PCIE report and its findings and recommendations. An exposure draft of a revised standard
is expected to be issued in the fourth quarter of 2008, with the revised final statement to be issued during 2009. Auditors should visit the GAQC Web site at www.aicpa.org/GAQC for further developments.

Resource Central

.94 The following are various resources that auditors engaged in GAS and Circular A-133 audits may find beneficial.

AICPA GAQC

.95 The GAQC is a firm-based, voluntary membership center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC’s primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services.

.96 The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits
- Serve as a comprehensive resource provider on governmental audits for member firms
- Create a community of firms that demonstrates a commitment to governmental audit quality
- Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues
- List member firms to enable purchasers of governmental audit services to identify firms that are members
- Provide information about the center’s activities to other governmental audit stakeholders

.97 The GAQC has been in existence since 2004. Since its launch, center membership has grown to over 1,100 firms from 50 states. The center’s focus is to promote the highest quality audits and to save firms time by providing a centralized place to find information they need, when they need it, to maximize quality and practice success. Center resources include the following:

- E-mail news alerts on current audit and regulatory developments that keep member firms informed about the latest developments
- Dedicated center Web site at www.aicpa.org/GAQC with links called Resources, Community, and Events and Products, as well as a complete listing of GAQC members in each state
- Online member discussion forums for sharing best practices and discussing issues firms are facing
- Webcasts and teleconferences, with optional CPE, updating members on a variety of technical, legislative, regulatory, and practice management subjects (note that these activities are archived on the GAQC Web site for GAQC member firms)

Help Desk—With all of the quality issues being noted in governmental audits, as discussed in this alert, your firm should consider joining the center. To enroll or learn more about the GAQC, including details on the membership requirements and fees for membership, go to www.aicpa.org/GAQC or e-mail the GAQC staff at GAQC@aicpa.org. To preview member benefits, go to http://gaqc.aicpa.org/Memberships/.
AICPA State and Local Government Expert Panel

The State and Local Government Expert Panel is an AICPA volunteer group whose purpose is to identify state and local government financial reporting and auditing issues and to work with appropriate bodies for resolutions benefiting the public interest; to conduct liaison activities with the GASB, regulators such as the GAO and OMB, and applicable industry associations; and to advise and assist in the development of AICPA products and services related to state and local government audits. For information about the activities of the State and Local Government Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_government.htm.

AICPA Not-For-Profit Organization Expert Panel

The Not-For-Profit Organization Expert Panel is an AICPA volunteer group whose purpose is to identify financial reporting and auditing issues unique to not-for-profit organizations, to work with appropriate bodies for resolutions benefiting the public interest, to conduct liaison activities with the AICPA Accounting Standards Executive Committee (AcSEC) and Financial Accounting Standards Board (FASB), and to advise and assist in the development of AICPA products and services related to not-for-profit organizations. For information about the activities of the Not-For-Profit Organization Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_notforprofit.htm.

Publications

Accounting Trends and Techniques—Not-For-Profit Organizations (product no. 006616kk [paperback])

AICPA reSOURCE: Accounting and Auditing Literature

.101 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

CPE

.102 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry. Among the many courses, the following may be of specific interest to auditors of organizations subject to GAS and Circular A-133 audits.

- 2007 Revised Yellow Book: Government Auditing Standards (product no. 736117kk [text] or 187107kk [DVD/manual])
- Studies on Single Audit and Yellow Book Deficiencies (product no. 733032kk [text])
- Solving Complex Single Audit Issues for Government and Nonprofit Organizations (product no. 734412kk [text])
- Applying A-133 to Nonprofit and Governmental Organizations (product no. 730299kk [text] or 187209kk [DVD/manual])
- Audits of HUD-Assisted Projects (product no. 730299kk [text])

Visit www.cpa2biz.com for a complete list of CPE courses.
Online CPE

.103 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through cpa2biz.com, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics, including governmental and nonprofit accounting and auditing. Some courses of specific relevance to GAS and Circular A-133 audits include:

- Revised Yellow Book: Government Auditing Standards
- Single Audits: Applying A-133 to Nonprofit and Government
- Single Audits: Solving Complex Single Audit Issues for Government and Nonprofit Organizations
- Single Audits: Studies on Single Audit and Nonprofit Organizations
- HUD Auditing: Advanced

To register or learn more, visit www.cpa2biz.com.

Webcasts

.104 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM. To register or learn more, visit www.cpa2biz.com.

Member Service Center

.105 To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.106 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.107 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.108 The AICPA sponsors four annual conferences that include a focus on GAS and Circular A-133 topics in the summer and fall of each year.
Governmental Accounting and Auditing Update Conference (GAAC) EAST is scheduled to be held August 10–11, 2009, in Washington, D.C., and its counterpart, GAAC WEST, will be held September 21–22, 2009, in Denver, Colorado. These conferences are designed for CPAs working in federal, state, and local government; public practitioners with government clients; and regulators who need to be aware of emerging developments should attend this conference to remain current on the issues. Attending one of these conferences is a great way to receive timely guidance along with practical advice on how to handle new legislation and standards from key government officials and representatives of the accounting profession— including the standard setters themselves.

AICPA National Governmental and Not-for-Profit Training is scheduled to be held October 26–28, 2009, in Atlanta, Georgia. If you need hands-on training and are a CPA in public practice—or a governmental or not-for-profit staffer—then this conference is for you. You’ll hear directly from the standards setters and industry leaders on a variety of topics including developments in governmental accounting and auditing, the latest in proposed regulations and laws on the local, state, and federal government levels, as well as those affecting the not-for-profit sector and more.

Not-for-Profit Industry Conference is scheduled to be held June 11–12, 2009, in Washington, D.C. The conference offers a wide range of topics geared to not-for-profit professionals at every level: tax, management, audit and accounting issues, fundraising, and regulatory issues.

For further information about the conferences, call (888) 777-7077 or visit www.cpa2biz.com.

Industry Web Sites

The Internet covers a vast amount of information that may be valuable to auditors of organizations that are subject to GAS or Circular A-133 audits, including current issues and developments. Some of the more relevant sites are shown in the appendix of this alert. The governmental or not-for-profit audit practice sections of some of the larger CPA firms may also contain specific auditing and accounting information that is helpful to auditors.

This Audit Risk Alert replaces Government Auditing Standards and Circular A-133 Audits—2007/08.

The Audit Risk Alert Government Auditing Standards and Circular A-133 Developments is published annually. As you encounter audit or industry issues that you believe warrant discussion in next year’s Audit Risk Alert, please feel free to share them with us. Any other comments that you have about the Audit Risk Alert would also be appreciated. You may e-mail these comments to sreed@aicpa.org or write to:

Appendix A—Common Deficiencies Identified in the PCIE Report

**materiality.** In single audits, the auditor must consider his or her findings in relation to each major program, which is a significantly lower materiality level than all programs combined. In some of the audits reviewed, the auditor did not document whether he or she considered materiality at the individual major program level.

**internal control.** The report found that in many single audits, auditors are not documenting their understanding of internal control over compliance as required by section .500(c)(1) of Circular A-133 in a manner that addresses the five elements of internal control. Further, the report stated that auditors did not document testing internal control of at least some compliance requirements as required by section .500(c)(2) of Circular A-133.

**compliance.** The report stated that in some audits, auditors are not documenting compliance testing of at least some compliance requirements. For most audits considered unacceptable, the lack of documentary evidence for compliance testing was substantial. They found that the audit documentation did not always include evidence that the auditor tested major program compliance requirements or explain why certain generally applicable requirements identified in the OMB Compliance Supplement were not applicable to the audit.

Also, in some cases the auditor documented that types of compliance requirements identified as generally applicable to the major program in part 2 of the OMB Compliance Supplement were not applicable (by only marking “N/A” next to the item in an audit program) but did not explain why.

**material reporting errors.** Auditors misreported coverage of major programs. This occurred when the Summary of Auditor Results section of the Schedule of Findings and Questioned Costs identified that one or more major programs were audited as a major program when the audit documentation did not include support for all of the programs listed. Though inadvertent, this is a very consequential error because report users may erroneously rely on opinions that major programs have been audited as major.

**sampling.** The PCIE report notes inconsistent numbers of transactions selected for testing of internal control and compliance testing for the Allowable Costs/Cost Principles compliance requirement across the audits that they reviewed. Also, many single audits did not document the number of transactions and the associated dollars of the universe from which the transactions were drawn.

**risk assessments of federal programs.** The report cited the following kinds of deficiencies in risk assessments of federal programs:

- Required risk analyses were not documented at all.
- The basis for the assessments of risk was not documented.
- The documentation indicated that the risk assessment was not performed or not properly performed for reasons including not considering all programs, improperly clustering programs, not clustering programs, or mistakenly categorizing a program as Type A or as Type B.
- The risk assessment decision was not consistent with information in the audit documentation.

**apparent audit findings not reported.** In this scenario, the audit documentation or management letter content included matters that appeared to be audit findings. However, they were not reported as audit findings, and there was no audit documentation explaining why.

**audit finding elements.** A significant percentage of the audits reviewed in both strata did not include all of the required reporting elements in the audit findings.

**Schedule of Expenditures of Federal Awards (SEFA) problems.** For many audits reviewed, one or more of the following required SEFA content items were omitted. The report acknowledges that SEFA preparation is a client responsibility but that the auditor reports on the SEFA in relation to the financial statements and that the information in the SEFA is key to major program determination. Issues were found with the following items:
• Subgrant awards numbers assigned by pass-through entities not included
• Names of pass-through entities missing
• Grantor federal agency names missing
• Grantor federal agency subdivision names missing
• Multiple lines for CFDA numbers shown—total expenditures for CFDA not shown
• Programs that are parts of a cluster not shown as such
• Notes to SEFA missing
• Correct CFDA number omitted
• Research and development programs not identified as such

management representations. For several audits, some or all of the management representations (identified in the AICPA’s Audit Guide Government Auditing Standards and Circular A-133 Audits) were not obtained. In a few other cases, the management representations were obtained several days prior to the dates of the auditor’s reports.

other findings. Numerous other findings were noted by reviewers, primarily caused by a lack of due professional care. They include the following:
• Low-risk auditee determination not documented or incorrect
• Minimum Percentage of Coverage requirement not met
• Audit programs missing or inadequate for part of the single audit
• Part of a major program or a major program cluster not tested
• The Summary of Auditor’s Results section of the Schedule of Findings and Questioned Costs missing some information, or some information was erroneous
• Threshold distinguishing Type A and Type B programs erroneous
• Indications that current compliance requirements not considered

Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to Lisa Snyder, CPA, and Ellen Goria, both of the AICPA Professional Ethics Division, for their significant and valuable contributions to the development of this Audit Risk Alert.

Our special thanks to Catherine Allen who developed and wrote this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) informs you of recent developments in the important areas of independence and ethics for accountants. This alert helps you understand your independence requirements under the AICPA Code of Professional Conduct (Code) and, if applicable, certain other rule-making and standard-setting bodies. We present a section titled “Digest of the AICPA Independence Rules” in plain English at the end of this alert so you can understand and apply the independence rules with greater confidence.

AICPA Independence and Ethics Developments

New and Revised AICPA Independence Rules

Indemnification and Limitation of Liability Provisions in Connection With Audit and Other Attest Services

.02 In September 2006, the Professional Ethics Executive Committee (PEEC) issued Omnibus Exposure Draft—Proposed Interpretations on Indemnification, Limitation of Liability and ADR Clauses in Engagement Letters (proposed Interpretation No. 101-16), Forensic Accounting Services and Tax Compliance Services. Since that time and in light of varied commentary received on that proposal and initiatives underway to address the issues, the PEEC decided to address the indemnification issue outside of the independence rules and to monitor these developments.

This interpretation states that a member who engages in the following activities has committed an act discreditable to the profession under the Code:

- Enters into a contract to perform audit or other attest services that are subject to the requirements of certain regulators when that contract includes an indemnification or limitation of liability provision that would cause the regulated entity or the member to violate such requirements or cause a member to be disqualified from providing the services to the regulated entity
- Directs or knowingly permits another individual to enter into a contract to perform audit or other attest services that are subject to the requirements of certain regulators when that contract includes an indemnification or limitation of liability provision that would cause the regulated entity or the member to violate such requirements or cause a member to be disqualified from providing the services to the regulated entity

Ethics Interpretation No. 501-8, which became effective on July 31, 2008, is available on the AICPA Web site at [www.aicpa.org/about/code/et_500.html#et_501.09](http://www.aicpa.org/about/code/et_500.html#et_501.09).

**New Independence Guidance**

*Independence Impact of Providing FASB Statement No. 141 (revised 2007) Services to an Attest Client*

In August 2008, the staff of the Professional Ethics Division issued nonauthoritative guidance (in the form of a frequently asked question [FAQ]) on the question of whether, under Ethics Interpretation No. 101-3, “Performance of Nonattest Services,” under Rule 101, *Independence* (AICPA, *Professional Standards*, vol. 2, ET sec. 101 par. .05), members could assist an attest client in applying Financial Accounting Standards Board (FASB) Statement No. 141 (revised 2007), *Business Combinations*, or FASB Statement No. 142, *Goodwill and Other Intangible Assets*, while maintaining independence. Specifically, the FAQ addresses whether the following services would be considered to impair independence:

- Providing the client advice on valuation methodologies and assumptions needed to perform the valuation
- Providing advice on valuation templates, software, or other tools that allow the client to determine an appropriate value for acquired assets, goodwill, contingent consideration, and so on

Under the FAQ, performing the valuation for the client (for example, the member provides the client a firm-developed template or software product or inserts amounts into a template or software product and (1) the results of the service would be material to the financial statements and (2) the appraisal or valuation involves a significant degree of subjectivity) impairs independence.
If the requirements of Ethics Interpretation No. 101-3 have been met, the following services would be permitted:

- Advising the client on various valuation methodologies that are available and the assumptions to be made in performing the valuation. The member also may help the client understand the accounting standards and the nature of the necessary accounting adjustments.

- Providing the client generic or standardized templates or software products that have not been developed by the firm to assist the client in performing the valuation. The formulas in generic or standardized products are well established and subject to only minor judgments or interpretations, resulting in valuations that would be expected to be similar to those produced by other vendor’s products.

The FAQ, incorporated as Question 1, “Appraisal, Valuation, and Actuarial Services,” of the FAQ document, is available on the AICPA Professional Ethics Division’s Web site at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Resources+and+Tools/Frequently+Asked+Questions.htm#appraisalvaluation.

Recognition of International Accounting Standards Board as an Accounting Standard Setter

Compliance Reminder Regarding Other Authoritative Bodies

The independence and ethics rules under the Code apply to all members of the AICPA. However, other rule-making and standard-setting bodies, such as the SEC, the Public Company Accounting Oversight Board (PCAOB), the Government Accountability Office (GAO), the U.S. Department of Labor (DOL), state boards of accountancy, and state CPA societies, also have independence and ethics rules with which members must comply, if applicable, in addition to the AICPA rules. The rules of the SEC, PCAOB, and GAO are discussed briefly in this alert. You should refer to the original text of each organization’s rules for full guidance.

SEC Independence Rules

Rule 2-01, Qualifications of Accountants, of Regulation S-X sets forth the SEC’s independence rules. The rule is designed to ensure that auditors are qualified and independent of their audit clients both in fact and appearance. Accordingly, the rule establishes restrictions on financial, employment, and business relationships between an accountant and an audit client and the provisions of certain nonaudit services to an audit client.

Rule 2-01(b) begins with a general standard of auditor independence, which states the following:

The Commission will not recognize an accountant as independent, with respect to an audit client, if the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant’s engagement. In determining whether an accountant is independent, the Commission will consider all relevant circumstances, including all relationships between the accountant and the audit client, and not just those relating to reports filed with the Commission.
.16 The succeeding paragraphs reflect the application of the general standard to particular circumstances. In addition, the second preliminary note to Rule 2-01 states the following:

The rule does not purport to, and the Commission could not, consider all circumstances that raise independence concerns, and these are subject to the general standard in Rule 2-01(b). In considering this standard, the Commission looks in the first instance to whether a relationship or the provision of a service: creates a mutual or conflicting interest between the accountant and the audit client; places the accountant in the position of auditing his or her own work; results in the accountant acting as management or an employee of the audit client; or places the accountant in a position of being an advocate for the audit client.

.17 The rule indicates that the preceding factors are general guidance only and their application may depend on particular facts and circumstances. Thus, Rule 2-01 also provides that

... in determining whether an accountant is independent, the Commission will consider all relevant facts and circumstances. For the same reason, registrants and accountants are encouraged to consult with the Commission’s Office of the Chief Accountant before entering into relationships, including relationships involving the provision of services, that are not explicitly described in the rule.

Recent SEC Independence Information

.18 An employee of the SEC Office of the Chief Accountant who is responsible for auditor independence (SEC staff) presented at the 2007 AICPA National Conference on Current SEC and PCAOB Developments. The SEC staff discussed the following topics: the primary sources of SEC independence information, nine FAQs on independence issued by the SEC staff in 2007, and a few inquiries the SEC staff regularly receives. The areas the SEC staff discussed are summarized as follows:

- Initial Public Offering (IPO). The SEC staff reminded the audience that if their client files an IPO with the SEC, the auditor is required to be independent under the SEC’s rules for all periods included in the filing (“the audit period”). For example, prior to the IPO, the firm may have provided services or had business or fee relationships with the company that violated SEC independence rules. Even though the firm was not subject to SEC rules at the time services were provided or the relationship existed, the firm will be held to the SEC rules for those prior periods. This includes not only nonaudit services, business, and fee relationships that a firm may have had with the client in recent years, but also extends to associated entities of the firm and affiliates of the audit client.

- Accounting Assistance. The SEC staff said it receives many questions about the type of accounting assistance auditors may provide to their clients. The two main threats noted were the threat of self audit and acting as management. The SEC staff suggested sources of suggested guidance, including the following, among others:
  — May 2005 Staff Statement on Management’s Report on Internal Control Over Financial Reporting

- Associated Entities. Another FAQ the staff receives is whether an accounting firm is an associated entity of the auditor. Some factors the staff considers in answering such questions include the following:
  — Does the auditor refer to the other firm in its audit report or take responsibility for the other firm’s work?
  — Do the auditor and the other firm have common ownership, profit-, or cost-sharing arrangements?
— Do the auditor and the other firm share management, a common brand name, resources, or quality controls?

Footnotes 489 and 491 of the November 2000 SEC adopting release Revision of the Commission’s Auditor Independence Requirements provide related guidance. These footnotes refer to several no-action letters issued to firms on this issue, citations to the SEC Codification, and the AICPA rules.

- Consents and Restatements. The SEC staff also discussed the independence requirements for an auditor who is asked to provide a consent relating to his or her previously issued audit opinion or issue an opinion on restated financial statements. First, issuing a consent does not require the auditor to be independent, assuming the professional engagement period has ended (the final report issued). However, if the auditor will issue a restatement and dual-dates the audit opinion, the auditor must be independent for the entire audit and professional engagement period.

PCAOB Rules Regarding Independence and Ethics

.19 The PCAOB has the authority to establish ethics and independence standards in accordance with Section 103(a), “Auditing, Quality Control, and Ethics Standards,” and Section 103(b), “Independence Standards and Rules,” of the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley). Firms that issue audit reports on public companies are required to register with the PCAOB. Failure to do so may result in disciplinary action. Additionally, any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105, Investigations and Disciplinary Proceedings, of Sarbanes-Oxley. Under Section 107, Commission Oversight of the Board, of Sarbanes-Oxley, PCAOB rules become effective only after they are approved by the SEC. The PCAOB independence and ethics rules include the following:

- PCAOB Rule 3100, Compliance with Auditing and Related Professional Practice Standards (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)

.20 The full text of these rules can be found at www.pcaob.org/Rules/Rules_of_the_Board/Section_3.pdf.

.21 PCAOB Rule 3100 generally requires all registered public accounting firms to adhere to the PCAOB’s auditing and related professional practice standards, which encompass auditing, attestation, quality control, ethics, and independence standards, in connection with the preparation or issuance of any audit report for an issuer and in its auditing and related attestation practices. This rule also requires registered public accounting firms and their associated persons to comply with all applicable standards. Accordingly, if the PCAOB’s standards do not apply to an engagement or other activity of the firm, PCAOB Rule 3100, by its own terms, does not apply to that engagement or activity.

Interim Ethics Standards

.22 PCAOB Rule 3500T designates the provisions of the Code on integrity and objectivity as Interim Ethics Standards. Accordingly, in preparing or issuing an audit report, a registered public accounting firm and its associated persons should comply with ethics standards as described in Rule 102, Integrity and Objectivity (AICPA, Professional Standards, vol. 2, ET sec. 102), and interpretations and rulings thereunder, as in existence as of April 16, 2003, to the extent not superseded or amended by the PCAOB.

Interim Independence Standards

.23 PCAOB Rule 3600T designates the provisions of the Code regarding independence and existing standards and interpretations of the ISB as interim independence standards. This rule states that, in
connection with the preparation or issuance of any audit report, a registered public accounting firm and its associated persons shall comply with the following independence standards, to the extent not superseded or amended by the PCAOB:

- Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101), and interpretations and rulings thereunder, as in existence on April 16, 2003
- Interpretation No. 99-1
- ISB Interpretation No. 00-1, The Applicability of ISB Standard No. 1 When “Secondary Auditors” Are Involved in the Audit of a Registrant (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”)
- Interpretation No. 00-2, The Applicability of ISB Standard No. 1 When “Secondary Auditors” Are Involved in the Audit of a Registrant: An Amendment of Interpretation 00-1 (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”)

To the extent that the SEC’s rules are more or less restrictive than the PCAOB’s Interim Independence Standards, registered public accounting firms must comply with the more restrictive requirements.

### PCAOB Inspectors Observe Deficiencies in Independence Compliance and Controls

In October 2007, PCAOB Release 2007-010, Report on the PCAOB’s 2004, 2005, and 2006 Inspections of Domestic Triennially Inspected Firms (the report), discussed audit areas where inspectors observed significant or frequent deficiencies. One such area was independence compliance and quality controls. The following is a summary of the inspector’s observations:

- **Prohibited bookkeeping services.** The most common independence compliance deficiency the PCAOB inspectors observed was the performance of prohibited bookkeeping services. SEC rules prohibit auditors from maintaining or preparing accounting records, preparing source data underlying a company’s financial statements, and preparing the financial statements or footnotes that are filed with the SEC. The report notes that even working on a portion of a company’s financial statements or records impairs independence, including the following:
  - Preparing the tax provision
  - Maintaining the trial balance
  - Classifying items in the general ledger
  - Maintaining the fixed asset ledger
  - Preparing consolidation schedules
  - Preparing or posting journal entries

---

1 International Standards Board (ISB) Standard No. 1, Independence Discussions with Audit Committees (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”); ISB Interpretation No. 00-1, The Applicability of ISB Standard No. 1 When “Secondary Auditors” Are Involved in the Audit of a Registrant (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”); and ISB Interpretation No. 00-2, The Applicability of ISB Standard No. 1 When “Secondary Auditors” Are Involved in the Audit of a Registrant: An Amendment of Interpretation 00-1 (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”), which are included in the following bulleted items, were superseded in August 2008 by PCAOB Rule 3526, Communication with Audit Committees Concerning Independence (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”).
Preparing source data (for example, developing fair values of intangible assets or calculating depreciation expense)

The report recognizes that many smaller companies do not have competent accounting personnel. Nevertheless, the client’s need for assistance does not exempt the auditor from the independence requirements. If the client needs assistance, the firm may consider referring the client to another firm. Note: the entity should not be associated with the accounting firm making the referral. If the audit firm receives a fee for making the referral, paragraph .01(C) of ET section 503, Commissions and Referral Fees (AICPA, Professional Standards, vol. 2), requires disclosure of the fee to the client. Local accountancy board regulations may impose additional requirements.

- Indemnification clauses. Inspectors also observed that some firms were using prohibited indemnification clauses in audit engagement letters. For years, the SEC staff position has been that limiting the auditor’s liability for the audit impairs objectivity. This position is stricter than Ethics Ruling No. 94, which allows the auditor to be indemnified for liability arising as a result of management misconduct, such as lying to, or concealing information from, the auditor.

- Quality control deficiencies. PCAOB Rule 3400T, Interim Quality Control Standards (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”) requires, by reference to the AICPA SEC Practice Section’s Requirements of Membership, that registered public accounting firms have policies and procedures in place to aid their compliance with applicable independence requirements of the AICPA, SEC, and ISB.

- Weak or nonexistent independence quality controls. The report also noted several instances of weak or nonexistent independence quality controls, including the following:
  - Incomplete, inadequate, or nonexistent policies and procedures for confirming firm professionals’ compliance with independence policies
  - Lack of procedures that monitor compliance with personal independence requirements set forth by partners and managers
  - Outdated or incomplete lists of restricted entities (issuer audit clients and their affiliates)
  - Lack of training on auditor independence

Inspectors also noted numerous instances where firms did not have policies and procedures to help ensure that firm professionals make and document their discussions with clients’ audit committees.

**GAO Independence Standard**

.26 CPAs, non-CPAs, government financial auditors, and performance auditors who audit federal, state, and local governments as well as not-for-profit and for-profit recipients of federal (and some state) grant and loan assistance should be familiar with the ethics and independence requirements of the Government Auditing Standards (GAS, also referred to as the Yellow Book). The GAO independence rules are in some cases very similar to the AICPA independence rules; however, in other cases, the GAO independence rules are more restrictive.

.27 Certain companies (issuers) subject to the Securities Exchange Act of 1934 may have an audit conducted in accordance with standards issued by both the PCAOB, as required by Sarbanes-Oxley, and the Comptroller General of the United States, as contained in GAS (for example, a bank that participates in federally-sponsored loan programs). For such entities, auditors must satisfy both sets of standards in conducting their work.

.28 In July 2007, the Comptroller General of the United States issued the 2007 revision of the Yellow Book, which superseded the 2003 edition. Chapters 23 of the Yellow Book address professional ethics and independence. In issuing the new Yellow Book, the GAO did not revise the substance of the independence and ethics rules.
The new Yellow Book is effective for (1) financial statement audits and attest engagements for periods beginning on or after January 1, 2008, and (2) performance audits beginning on or after January 1, 2008. The distinction between (1) and (2) is that (1) applies to the period under audit, whereas (2) applies to the engagement start date. Thus, an audit of financial statements for the period ended December 31, 2007 would be subject to the old (2003) Yellow Book, even though the audit is performed in 2008, whereas a performance audit would be subject to the new Yellow Book regardless of the period under audit.

The independence rules, in substance, are unchanged. For nonaudit services, they continue to require the auditor to observe two overarching principles to enable performance of such services. The revised Yellow Book has summarized the guidance into three distinct categories of nonaudit services. The categories and examples of each follow:

- **Nonaudit services that do not impair independence and do not require compliance with the supplemental safeguards.** Examples of these services include services that are considered to be “routine advice” as they typically are performed in conjunction with the audit (for example, limited advice on the implementation of internal controls or new accounting standards).

- **Nonaudit services that would not impair independence provided the auditor complies with the supplemental safeguards.** Examples of these services include certain limited bookkeeping, information technology or human resource assistance, or preparation of routine tax filings.

- **Nonaudit services that impair independence; compliance with supplemental safeguards will not overcome this impairment.** Examples of these services include posting entries to the general ledger, processing payroll that is material to the financial statements, or designing a financial reporting system. (Note: by their nature, these services violate one or both of the overarching principles discussed in the Yellow Book.)

On February 25, 2008, the Advisory Council on Government Auditing Standards met with the GAO staff in Washington, D.C., to discuss a possible project to revise its independence guidance. The GAO staff sought input on the following:

- Whether the GAO independence standards should be based on a risk-based conceptual framework (instead of a traditional rules-based model)
- Whether the GAO should clarify the meaning of personal, external, and organizational independence
- What should be done with the FAQs
- Independence impairments and governmental mandates

The July 2007 Yellow Book is available at www.gao.gov/govaud/ybk01.htm. Valuable guidance on applying the GAO independence rules is available in Answers to Independence Standard Questions in the form of FAQs, at www.gao.gov/govaud/d02870g.pdf. The FAQs remain in full effect with the issuance of the 2007 Yellow Book. The paragraph references in the FAQs are based on Amendment No. 3, Independence, of the June 2004 Government Auditing Standards (GAO-02-388G). In July 2007, the GAO issued Government Auditing Standards, July 2007 Revision (GAO-07-731G), which provides corresponding paragraph references to the 2007 version of the Yellow Book.

**On the Horizon**

**Proposed AICPA Ethics Interpretations and Rulings**

On August 13, 2007, the PEEC issued proposed Ethics Interpretation No. 101-17, “Networks and Network Firms,” under Rule 101, a proposal addressing the concept of a network firm. Under the proposal, an association of accounting firms is a network (and the firms within the network are network firms) if the firms in the association share one or more specified characteristics, such as profit sharing, common control, or the use of a common brand name in the firm name. Under a proposed, related interpretation, network firms would be required to maintain independence of certain attest clients of all firms in the network.
proposal is the PEEC’s latest effort to harmonize its ethics rules with those of the International Federation of Accountants (IFAC), which adopted a similar definition in 2006. Comments were due November 15, 2007. The exposure draft may be obtained at www.aicpa.org/download/ethics/August_13_2007_Exposure_Draft.pdf.

Among other things, some of the comments expressed the opinion that the use of a common brand name as part of the firm name should not, if that is the only condition satisfied, result in a firm being considered a network firm. The PEEC is considering whether in that situation any safeguards, such as inclusion of specific disclosures on a firm’s letterhead or Web site explaining the nature of the firm’s relationship to an association, could mitigate the appearance that a network exists. At this time, the PEEC continues to assess certain other issues related to the proposal (for example, description of what constitutes an “association”). The PEEC also may issue proposed revisions to a related ethics ruling, such as Ethics Ruling No. 179, “Practice of Public Accounting Under Name of Association or Group,” of ET section 591, Ethics Rulings on Other Responsibilities and Practices (AICPA, Professional Standards, vol. 2, ET sec. 591 par. .357–.358).

On May 15, 2007, the PEEC proposed Ethics Interpretation No. 102-7, “Other Considerations: Meeting the Objectives of the Fundamental Principles,” under Rule 102. In connection with that proposal, the PEEC also issued Proposed Framework for Meeting the Objectives of the Fundamental Principles. If adopted, the proposed framework would provide guidance to AICPA members who encounter situations that are not explicitly addressed by the Code. The framework is consistent with the IFAC Code of Ethics for Professional Accountants (the IFAC Code) and brings the AICPA Code closer to convergence with international standards. Similar to ET section 100.01, Conceptual Framework for AICPA Independence Standards (AICPA, Professional Standards, vol. 2), members would consider specific threats to complying with the rules of conduct, such as integrity and due care. As needed, the member would apply appropriate safeguards to eliminate or reduce those threats to an acceptable level. Comments on the proposal were due August 15, 2007. A PEEC task force made significant revisions to the draft framework based on the comments received, which also have been discussed by the PEEC in its open meetings this past year. The PEEC continues to consider the proposal at this time.

Other AICPA Projects

Immediate Family Member’s Participation in Retirement or Savings Plans

The PEEC formed a task force to consider whether existing independence guidance appropriately addresses the following scenario: a covered member’s immediate family member (for example, a spouse) participates in a retirement or savings plan that is an attest client or is sponsored by an attest client. The spouse’s employment with the client is permitted under the independence rules if the covered member is not a member of the attest team or able to influence the attest engagement. The task force has reached some tentative conclusions, discussed them with the PEEC, and is expected to recommend proposed changes to Ethics Interpretation No. 101-1, “Interpretation of Rule 101,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .02), and Ethics Ruling No. 107, “Participation in Health and Welfare Plan Sponsored by Client,” of ET section 191, Ethics Rulings on Independence, Integrity, and Objectivity (AICPA, Professional Standards, vol. 2, ET sec. 191 par. .214–.215), at a future meeting.

XBRL and IFRS Task Forces

The PEEC formed a task force that will consider revising Ethics Interpretation No. 101-3 for two types of nonattest services that are expected to become more prevalent in the next several years: assisting clients with their adoption of Extensible Business Reporting Language (XBRL) and transitioning financial reporting from U.S. GAAP to IFRS. In the first phase, the task force will work jointly with members of the XBRL Assurance Task Force to consider whether to provide independence guidance to members assisting clients with XBRL-related services. In the second phase, the task force will examine how the rules apply when members help clients with tasks related to their adoption of IFRS.
International Ethics Convergence and Monitoring

38 The visibility of the IFAC Code in the U.S. has grown in recent years as business has become increasingly global and as the AICPA has begun the process of converging its Code with the IFAC guidance. Consequently, CPA firms of all sizes are being asked to confirm their compliance with global standards.

39 The following scenarios illustrate these points:

- A three-partner firm in Albany, N.Y., is the auditor for a beverage manufacturer. In a major acquisition, a Canadian company purchases the manufacturer. The new parent’s auditor asks the U.S. firm to confirm that it is independent of the new owner under international standards.

- A local firm is part of a global accounting association that is deemed, under international standards, to be a network. All firms in the network must be independent of the other firms’ audit and review clients in accordance with those standards. In fact, the network requires its members to meet global ethics standards for all multinational assurance engagements.

- A regional firm in southern California serves as auditor of a small Los Angeles-based software developer that acquires a company in Bangalore, India. The client’s significant vendors and its lenders expect to rely on the California firm’s audit report and, thus, expect the firm to meet global standards.

- A small firm’s client expands its business by opening a branch office in China. Lessors, vendors, and lenders in China ask the firm to audit the client’s financial information in accordance with international auditing standards, which will call for the firm to comply with international ethics standards.

40 In January 2008, the International Ethics Standards Board for Accountants (IESBA) approved its revised independence standard (Independence I project), which included a final definition of a public interest entity (PIE). The approved definition of a PIE is (1) a listed entity and (2) any other entity that a regulator or legislation has designated as a PIE or for which an audit is required (by law or regulation) to be conducted in compliance with the same independence requirements as listed entities (for example, in the U.S., this would include certain privately-owned financial institutions). In addition, firms and member bodies are encouraged to consider whether additional entities also should be treated as PIEs because they have a large number and wide range of stakeholders. The IESBA also approved an exception for partner rotation for firms who have “only a few people with the necessary knowledge and experience to serve as a key audit partner” of a PIE if (a) an independent regulator in the relevant jurisdiction provides an exemption from partner rotation in such circumstances and (b) the regulator has specified alternative safeguards, which are required to be applied.

41 In the U.S., this exception would cover certain small firms that audit SEC registrants and are subject to PCAOB inspection. As stated in the preceding paragraphs, the PEEC has undertaken a project to determine whether changes may be necessary to converge the AICPA and IESBA PIE definitions.

42 The IESBA proposed additional revisions to Section 290 of the IFAC Code, Independence—Audit and Review Engagements, and proposed Section 291, Independence—Other Assurance Engagements, in July 2007. The proposal expanded the guidance on internal audit services, the impact of significant fees to an accounting firm, and contingent fees. In May 2008, the IESBA re-exposed two elements of the draft proposal: (1) proposed requirements when a practitioner provides internal audit services to a public interest audit client and (2) safeguards required when the fees from a public interest audit client exceed 15 percent of the total fees of the firm. Comments on the second proposal were due August 31, 2007.

43 In July 2008, the IESBA issued another proposal intended to clarify the language of the IFAC Code (for example, use of “should” versus “must”). Comments on this proposal were due October 15, 2008. The IESBA has declared that it will not put forth any more proposals for a period of at least two years. This “quiet period” will allow member bodies (such as the AICPA) time to adapt their national codes to the new IFAC Code, which is expected to be issued in June 2009. If the new IFAC Code is released then, it would become
effective December 31, 2010, with earlier application encouraged. Certain transition provisions will be incorporated where requirements have been tightened.

**Three-Year Project Agenda**

.44 Other topics the PEEC has added to its agenda include contingent fees in tax matters, inadvertent violations, public interest entities, confidential client information, and client affiliates. In addition, the PEEC plans to develop the objectives and overall strategies to codify the Code and related guidance.

.45 The AICPA Professional Ethics Division maintains a three-year project agenda on its Web site that lists all current and future PEEC projects. The agenda can be found at www.aicpa.org/download/ethics/PEEC_Project_Agenda.pdf.

**New and Revised PCAOB Independence Rules**

.46 In August 2008, the SEC approved new PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence* (AICPA, *PCAOB Standards and Related Rules, Rules of the Board, “Rules”*), which supersedes the PCAOB’s existing interim standard, ISB Standard No. 1 and its interpretations. Auditors must comply with PCAOB Rule 3526, which builds on ISB Standard No. 1, before accepting a new audit engagement (this is a new requirement) and annually thereafter. The auditor must describe in writing to the audit committee all relationships between the auditor and the client (including affiliates of both) that reasonably could be thought to bear on independence, discuss these matters with the audit committee, and document the substance of that discussion. The new rule went into effect on September 30, 2008.

.47 The SEC also approved a revision to PCAOB Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles* (AICPA, *PCAOB Standards and Related Rules, Rules of the Board, “Rules”*), which permits an auditor to cease performing tax services for persons associated with a prospective audit client (that normally would be proscribed under PCAOB Rule 3523) prior to the beginning of the professional engagement period and still be considered independent. The revision became effective upon its approval by the SEC on August 22, 2008.

**Status of DOL Request for Comments on Independence Rules Pertaining to Employee Benefit Plan Audits**

.48 On September 11, 2006, the DOL issued a request for information (RFI) seeking public comment on the advisability of the DOL amending the auditor independence rules for employee benefit plan audits subject to the Employee Retirement Income Security Act of 1974 (ERISA). This is the first time the DOL has considered its independence requirements since DOL Interpretive Bulletin 75-9 (29 CFR 2509.75-9), *Independence of Employee Benefit Plan Accountants*, was issued in 1975. The DOL RFI notes that the current DOL requirements conflict with AICPA and SEC independence requirements and have caused confusion among practitioners. The comment period closed on December 11, 2006. To date, the DOL has not issued a response to the feedback it received regarding its RFI.

.49 The DOL’s RFI can be found at http://ebpaqc.aicpa.org/NR/rdonlyres/7EA13B14-C1AE-42EF-9FD1-B1B1353A962F/0/DOL_Auditor_Independence_RFI.pdf. The comment letters received by the DOL can be found at www.dol.gov/ebsa/regs/cmt-IndPlanAccountants.html.
Resource Central

Publications

.50 Practitioners may find the following publications useful when considering independence and ethics issues:

- *Independence Compliance: Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006627kk)
- *Independence Compliance: Checklists and Tools for Complying with AICPA, SEC, and PCAOB Independence Requirements* (product no. 006630kk)

AICPA reSOURCE: Accounting and Auditing Literature

.51 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest *Professional Standards, Technical Practice Aids, Audit and Accounting Guides* (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.52 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs. Among the available titles, the following courses pertain to independence and ethics:

- *Ethics for Tax Practice Professionals: Circular 230 and the SSTSs* (product no. 738702HSkk [CD-ROM], 158700kk [online])
- *Ethics: Non-Attest Services, Integrity and Objectivity* (product no. 739412HSkk [CD-ROM], 159412kk [online])
- *Independence* (product no. 739178HSkk [CD-ROM], 159178kk [online])
- *Selected Topics in Professional Ethics* (product no. 738383HSkk [CD-ROM], 158383kk [online])
- *Professional Ethics: 2008 Update* (product no. 739430HSkk [CD-ROM], 159430kk [online])
- *Professional Ethics: AICPA’s Comprehensive Course* (product no. 738392HSkk [CD-ROM], 732311kk [text])
- *Professional Ethics: Complying With the GAO Rules* (product no. 739440HSkk [CD-ROM], 159440kk [online])
- *Professional Ethics for CPAs in Business & Industry* (product no. 738900HSkk [CD-ROM], 158900kk [online])
- *Real World Business Ethics for CPAs in A&A: How Will You React?* (product no. 7336010kk [text])
- *Real World Business Ethics for CPAs in Business & Industry: How Will You React?* (product no. 733591kk [text])

.53 The AICPA interactive CD-ROM course on independence, titled *Independence*, teaches the AICPA and SEC independence rules and qualifies for eight hours of CPE credits. See www.cpa2biz.com/AST/Main/CPA2BIZ_Primary/Ethics/PRDOVR~PC-739155HS/PC-739155HS.jsp.

.54 Visit www.cpa2biz.com for a complete list of CPE courses.
Online CPE

.55 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA's flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1- and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics that address ethics and independence issues include the following:

- 2008 Annual A&A Update—Various Issues Affecting Auditors
- Ethics: AA&C LLP—Accounting Firm Practice Development Committee
- Ethics: BAN&K Advisory Services LLC—You are the Audit Partner
- Ethics: Department of Enforcement—You are the Accounting Investigator
- Ethics: Forensic Review Services LLC—You are the Forensic Auditor
- Ethics: Incisive Lasers Corporation—You are the Outside Counselor
- Ethics: Megatron Corp.—You are the Corporate Controller
- Ethics: Military Communications Corp.—You are the Outside Tax Advisor
- Ethics: Pointer Electronics, Inc.—You are the Audit Partner
- Ethics: Precious Mining Inc.—You are the Audit Committee Chair
- Ethics: Radar One, LLP—You are the Amended Return Preparer
- Ethics: Scrap Metal Aggregators, Inc.—You are the Tax Return Preparer
- Ethics: Superlative Software, Corp.—You are the CFO
- In a CPA’s Professionalism We Must Trust
- Yellow Book: Ethical Principles and General Standards

.56 To register or learn more, visit www.cpa2biz.com.

Webcasts

.57 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.58 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.59 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.60 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.
Hotlines

Ethics Hotline

.61 The AICPA offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code. You can reach the Ethics Hotline at (888) 777-7077. Send e-mail inquiries to ethics@aicpa.org.

Accounting and Auditing Technical Hotline

.62 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

AICPA Governmental Audit Quality Center

.63 The Governmental Audit Quality Center (GAQC) is a firm-based, voluntary membership center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC’s primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm’s governmental audits.

.64 The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits
- Serve as a comprehensive resource provider on governmental audits for member firms
- Create a community of firms that demonstrates a commitment to governmental audit quality
- Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues
- List member firms to enable purchasers of governmental audit services to identify firms that are members
- Provide information about the center’s activities to other governmental audit stakeholders

.65 For more information about the GAQC visit http://gaqc.aicpa.org.

The Center for Audit Quality

.66 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.67 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.
AICPA Employee Benefit Plan Audit Quality Center

.68 The AICPA Employee Benefit Plan Audit Quality Center (EBPAQC) is a firm-based, voluntary membership organization for firms that perform or are interested in performing ERISA employee benefit plan audits. The EBPAQC was established to promote the quality of employee benefit plan audits.

.69 To achieve this goal, the EBPAQC has created a community of firms that demonstrate a commitment to employee benefit audit quality, and supports those firms by doing the following:

- Providing members with timely communication of regulatory developments, best practices guidance, and technical updates
- Providing members with an online community forum for sharing best practices as well as discussions on audit, accounting, and regulatory issues
- Maintaining relationships with, and acting as a liaison to, the DOL on behalf of member firms
- Providing center members with a marketing toolkit to facilitate promotion of their membership in the center
- Providing information about the center’s activities to other employee benefit plan stakeholders

.70 The increasing complexity of employee benefit plan auditing and increased scrutiny by the DOL have resulted in a significant number of changes and issues for auditing firms and CPAs in general. Firms and CPAs will benefit from the assistance of the center as a resource for improving employee benefit plan audit quality.

.71 For more information about the EBPAQC, visit http://ebpaqc.aicpa.org.

Industry Web Sites

Durham, NC 27707-8110
Appendix—Digest of the AICPA Independence Rules

A plain-English description of the AICPA independence rules follows. The purpose of this section is to help you to understand independence requirements under the AICPA Code of Professional Conduct (Code) and, if applicable, other rule-making and standard-setting bodies. Independence generally implies one's ability to act with integrity and exercise objectivity and professional skepticism. The AICPA and other rule-making bodies have developed rules that establish and interpret independence requirements for the accounting profession. We use the term rules broadly to also mean standards, interpretations, rulings, laws, regulations, opinions, policies, or positions. This guide discusses in plain English the independence requirements of the principal rule-making bodies in the United States so you can understand and apply them with greater confidence and ease.

This section of the alert is intentionally concise, so it does not cover all the rules, some of which are complex, nor does it cover every aspect of the rules herein. Nonetheless, this guide should help you identify independence issues that may require further consideration. Therefore, you should always refer to the rules directly, in addition to your firm’s policies on independence, for complete information.

Conventions and Key Terms Used

The following are some of the conventions used in this section of the alert:

- The word Note in boldface italics emphasizes important points, highlights applicable government regulations, or indicates that a rule change may soon occur.

We describe the rules of the Securities and Exchange Commission (SEC) and Public Company Accounting Oversight Board (PCAOB)—that is, those that apply to audits of public companies—in boxed text (like this one) and provide citations to specific rules. Generally, we provide these descriptions where the SEC or PCAOB impose additional requirements, or where the SEC and PCAOB rules otherwise differ from the AICPA rules.

This section uses the following key terms:

- **Client (or attest client).** An entity with respect to which independence is required.

- **Firm.** A form of organization permitted by law or regulation (whose characteristics conform to the resolutions of the AICPA Council) that is engaged in the practice of public accounting.

What Is Independence?

Independence is defined in ET section 100.01, Conceptual Framework for AICPA Independence Standards (AICPA, Professional Standards, vol. 2), referred to herein as the conceptual framework, as follows:

**Independence of mind.** The state of mind that permits the performance of an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism.

**Independence in appearance.** The avoidance of circumstances that would cause a reasonable and informed third party, having knowledge of all relevant information, including safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or a member of the attest engagement team had been compromised.

These definitions reflect the longstanding professional requirement that members who provide services to entities for which independence is required be independent both in fact (that is, “of mind”) and in appearance.
What Should I Do If No Specific Guidance Exists on My Particular Independence Issue?

The “Other Considerations” section of Interpretation No. 101-1 “Interpretation of Rule 101,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par .02), recognizes that it is impossible for the Code to identify all circumstances in which the appearance of independence might be questioned. The conceptual framework is referred to in Interpretation No. 101-1 of the Code.

Specifically, Interpretation No. 101-1 requires that members use the risk-based approach described in the conceptual framework when making independence decisions involving matters that are not specifically addressed in the independence interpretations and rulings in the Code. Where threats to independence are not at an acceptable level, safeguards must be applied to eliminate the threats or reduce them to an acceptable level. In cases where threats to independence are not at an acceptable level, thereby requiring the application of safeguards, the threats identified and the safeguards applied to eliminate the threats or reduce them to an acceptable level must be documented.

The conceptual framework provides a valuable tool to help you comply with the requirement in the “Other Considerations” section to evaluate whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to your independence.

When Is Independence Required, and Who Sets the Rules?

AICPA Professional Standards require your firm, including the firm’s partners and professional employees, to be independent in accordance with Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101), of the Code whenever your firm performs an attest service for a client. Attest services include the following:

- Financial statement audits
- Financial statement reviews
- Other attest services as defined in the Statements on Standards for Attestation Engagements

Performing a compilation of a client’s financial statements does not require independence. However, if a nonindependent firm issues such a compilation report, the report must state, “I am (we are) not independent with respect to XYZ Company.”

You and your firm are not required to be independent to perform services that are not attest services (for example, tax preparation or advice, or consulting services, such as personal financial planning) if they are the only services your firm provides to a particular client.

Note: You should familiarize yourself with your firm’s independence policies, quality control systems, and list or database of attest clients.

In Addition to the AICPA, Who Else Sets Independence Rules?

Many clients are subject to oversight and regulation by governmental agencies. For example, the Government Accountability Office (GAO) sets independence rules that apply to entities audited under Government Auditing Standards (also referred to as the Yellow Book). For these clients (and others, such as those subject to regulation by the SEC or Department of Labor [DOL]), you and your firm also must comply with the independence rules established by those agencies.

The SEC regulates public companies and establishes the qualifications of independent auditors. This section refers to these independence rules as SEC rules.

The PCAOB, a private standards-setting body whose activities are overseen by the SEC, is authorized to set auditing, attestation, quality control, ethics, and independence standards for accounting firms that audit

---

1 See paragraph .19 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2).

2 This includes companies that are registered with or are otherwise regulated by the United States Securities and Exchange Commission (SEC) or companies that file audited financial statements with the SEC, including foreign filers.
public companies. The PCAOB adopted interim ethics standards based on the following provisions of the Code: Rule 102, Integrity and Objectivity (AICPA, Professional Standards, vol. 2, ET sec. 102); Ethics Rule 101; and interpretations and rulings under those rules as of April 16, 2003. It also adopted International Standards Board (ISB) Standards. To the extent that the SEC’s rules are more or less restrictive than the PCAOB’s interim independence standards, registered public accounting firms must comply with the more restrictive requirements.

In addition to its detailed rules, the SEC looks to its general standard of independence and four basic principles to determine whether independence is impaired. The general standard is an appearance standard that considers whether a reasonable investor with knowledge of all relevant facts and circumstances would conclude that an accountant is independent.

Under the four basic principles, an auditor cannot
1. function in the role of management,
2. audit his or her own work,
3. serve in an advocacy role for the client, or
4. have a mutual or conflicting role with the client.

Other organizations that establish independence requirements that may be applicable to you and your firm include the following:
- State boards of accountancy
- State CPA societies
- Federal and state agencies

You should contact these organizations directly for further information.

Note: Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule.

Once you determine that your firm provides attest services to a client and which rules apply, the next step is to determine how the rules apply to you.

Applying the Rules—Covered Members and Other Firm Professionals

How Do the Independence Rules Apply to Me?

Whenever you are a covered member, you become subject to the full range of independence rules with regards to a specific client. You are a covered member if you are
1. an individual on the client’s attest engagement team;
2. an individual in a position to influence the client’s attest engagement;
3. a partner or manager who provides more than 10 hours of nonattest services to the attest client;
4. a partner in the office in which the lead attest engagement partner primarily practices in connection with the client’s attest engagement;
5. the firm, including the firm’s employee benefit plans; or
6. an entity whose operating, financial, or accounting policies can be controlled\(^3\) by any of the individuals or entities described in items 1–5 or by two or more such individuals or entities if they act together.

The SEC uses the term *covered person*\(^4\) to describe the individuals in a firm who are subject to SEC independence rules. This term is largely consistent with the AICPA’s term *covered member*. The only difference between the two definitions is that of classification. The AICPA considers consultants to be in a position to influence the engagement (the SEC uses the term *chain of command*), whereas the SEC considers these persons to be on the attest engagement team. Overall, the definitions are the same.

*Note:* This alert uses the term *covered member* (and *covered person* with respect to SEC rules) extensively in explaining the *personal* independence rules (for example, rules that apply to you and your family’s loans, investments, and employment). Therefore, it is important that you understand these terms before proceeding. Also, remember to check your firm’s policies to determine whether they are more restrictive than the AICPA or SEC rules.

**Do Any of the Rules Apply to Me If I Am Not a Covered Member?**

Yes, these rules apply in certain circumstances, even if you are not a covered member. Due to their magnitude, two categories of relationships with a client impair independence even if you are not a covered member. These relationships are defined as follows:

- Director, officer, or employee (or in any capacity equivalent to a member of management) of the client, promoter, underwriter, voting trustee of the client, or trustee of any of the client’s employee benefit plans
- Owner of more than 5 percent of an attest client’s outstanding equity securities (or other ownership interests)

The independence rules prohibit these relationships if you are a partner or professional employee in a public accounting firm.

**What If I Was Formerly Employed by a Client or I Was a Member of the Client’s Board of Directors?**

You must be aware of a number of things, including the following:

1. You may not participate in the client’s attest engagement, or be in a position to influence the engagement, for any periods covering the time that you were associated with the client. So, for example, if you worked for the client in 2007, you would be prohibited from serving on the client’s audit engagement for the fiscal year 2007 financial statements. You also could not serve in a position that would allow you to influence the fiscal 2007 engagement. For example, you could not directly or indirectly supervise the audit engagement partner.

2. Before becoming a covered member, you must
   
   a. terminate any relationships with the client as described in Ethics Interpretation No. 101-1,\(^5\)
   b. dispose of all financial interests\(^6\) in the client,

---

\(^3\) As defined by generally accepted accounting principles for consolidation purposes.

\(^4\) See Rule 2-01(f)(11). Also see *Discussion of Rule 2-01, Covered persons in the firm*, in the SEC’s Final Rule Release (Section IV [H][9]).

\(^5\) This includes the director, officer, employee, or in any capacity equivalent to that of a member of management, promoter, underwriter, or voting trustee, or trustee for the entity’s pension and profit-sharing trust.

\(^6\) See the “When Do My (or My Family’s) Financial Interests Impair Independence?” section in this alert.
c. collect and repay all loans to or from the client (except those specifically permitted or grandfathered),

7
d. cease active participation in the client’s employee benefit plans (except for benefits under the Consolidated Omnibus Budget Reconciliation Act of 1985), and

e. liquidate or transfer any vested benefits in the client’s retirement plans.

What Rules Apply If I Am Considering Employment With an Attest Client?

If an attest client offers you employment, or you seek employment with an attest client, you may need to take certain actions. If you are on that client’s attest engagement team or can otherwise influence the engagement, you must promptly report any employment negotiations with the client to the appropriate person in your firm. You cannot participate in the engagement until your negotiations with the client end.

What If I Accept Employment or a Board Position With an Attest Client?

Being employed by a client or a member of the client’s board of directors impairs independence. However, even if you leave your firm to take a position with a client, independence still may be affected. This would be the case if you accept a key position with the client, which means that you prepare financial statements or accounting records or are otherwise able to influence the client’s statements or records. A few examples of “key positions” are controller, chief financial officer, or treasurer. Remember that the substance, and not only the position title, determines whether a position is considered key or not.

If you meet the following conditions, having a key position with a client will not impair your firm’s independence:

• The amounts the firm owes you (capital balance or retirement benefits) are based on a fixed formula and are not material to the firm.

• You cannot influence the firm’s operations or financial policies.

• You do not participate or appear to participate in the firm’s business or professional activities.

Your firm must consider whether it should apply additional procedures to ensure that your transition to the client has not compromised the firm’s independence and that independence will be maintained going forward. Some things the firm should consider are

• whether you served on the engagement team and for how long,

• positions you held with the firm and your status,

• your position and status with the client, and

• the amount of time that has passed since you left the firm.

Based on these factors, the firm may decide to

• adjust the audit plan to reduce the risk that your knowledge of the plan could lessen the audit’s effectiveness,

• reconsider the successor engagement team to ensure it has sufficient stature and experience to deal effectively with you in your new position, or

• perform an internal technical review of the next attest engagement to determine whether engagement personnel exercised the appropriate level of professional skepticism in evaluating your work and representations. 8

---

8 An objective professional with the appropriate stature and expertise should perform this review and the firm should take any recommendation(s) that result from the review.
Under SEC rules, if a former partner will be in an “accounting role” or “financial reporting oversight role” with an SEC audit client, he or she may not have the following:

- A capital balance with the firm
- A financial arrangement with the firm (for example, retirement benefits) that is not fully funded by the firm
- Influence over the firm’s operations or financial policies

The SEC uses the terms accounting role and financial reporting oversight role in its rules; taken together, these terms are consistent with the AICPA term key position. The SEC also requires a one-year “cooling-off period” for members of the audit engagement team who assume a financial reporting oversight role with that client. In other words, if an engagement team member who participated on the audit of the current (or immediately preceding) fiscal year goes to work for a client, the firm’s independence would be impaired.

Only members who have provided fewer than 10 hours of audit, review, or other attest services to the client (and did not serve as either the lead or concurring partner for the client) are not considered to be members of the audit engagement team for purposes of this rule.

This rule applies to the audit client and its consolidated entities.

Applying the Rules—Family Members

When Is My Family Subject to the Rules?

If you are a covered member with respect to a client, members of your immediate family (your spouse—or equivalent—and your dependents) generally must follow the same rules as you. For example, your spouse’s investments must be investments that you could own under the rules. This rule applies even if your spouse keeps the investments in his or her own name or with a different broker.

This general rule has two exceptions:

1. Your immediate family member’s employment with a client would not impair your firm’s independence, provided he or she is not in a key position.

2. Immediate family members of certain covered members may invest in a client through an employee benefit plan (for example, retirement or savings account), provided the plan is offered equitably to all similar employees. The covered members whose families may invest in this way are the following:
   - Partners and managers who provide only nonattest services to the client
   - Partners who are covered members only because they practice in the same office where the client’s lead attest partner practices in connection with the engagement

In other words, immediate family of individuals on the attest engagement team or of those who can influence the attest engagement team may not invest in a client under any circumstances.

Under SEC rules, the immediate family of certain covered persons may have financial interests in SEC audit clients only if such interests are an unavoidable consequence of their participation in an employee compensation or benefit plan. This means that if nonclient investments are available through the plan, the immediate family member must choose those investments.

---

9 Accounting role or financial reporting role means a role in which a person is in a position to or does (1) exercise more than minimal influence over the contents of the accounting records or anyone who prepares them or (2) exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of a board of directors or similar management or governing body, chief executive officer, president, chief financial officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, vice president of marketing, or any equivalent position.
What About My Other Close Relatives?

The close relatives (siblings, parents, and nondependent children) of covered members are subject to some employment and financial restrictions. Your close relative’s employment by a client in a key position impairs independence, except for covered members who provide only nonattest services to a client.

Rules pertaining to your close relative’s financial interests differ depending on why you are considered a covered member:

- If you are a covered member because you participate on the client’s attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either
  - was material to your relative’s net worth, or
  - enables the relative to exercise significant influence over the client.

- If you are a covered member because you are able to influence the client’s attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that
  - is material to your relative’s net worth, and
  - enables your relative to exercise significant influence over the client.

Under SEC rules, your close family members include your spouse (or equivalent), dependents, parents, nondependent children, and siblings. If you are a covered person, your independence is affected if your close family member

- has an accounting role or financial reporting oversight role with the client (for example, the family member is a treasurer, chief financial officer, accounting supervisor, or controller), or
- owns more than 5 percent of a client’s equity securities or controls the client.

In addition, independence is considered to be impaired if any partner’s close family member controls a client.

Financial Relationships

When Do My (or My Family’s) Financial Interests Impair Independence?

This section discusses various types of financial relationships and how they affect independence. Although this section focuses on how these rules apply to you and your family, keep in mind that your firm also is subject to the financial relationship rules because firms are included in the AICPA definition of covered member.

As a covered member, you (and your spouse—or equivalent—and dependents) are not permitted to have the following:

- A direct financial interest in that client, regardless of how immaterial it would be to your net worth
- A material indirect financial interest in that client

Note: The Code does not define or otherwise provide guidance on determining materiality. In determining materiality, you should apply professional judgment to all relevant facts and circumstances and refer to applicable guidance in the professional literature. Both qualitative and quantitative factors should be considered.
In addition, if you commit to acquire a direct financial interest in a client, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

Examples of financial interests include shares of stock, mutual fund shares, debt security issued by an entity, partnership units, stock rights, options or warrants to acquire an interest in a client, or rights of participation, such as puts, calls, or straddles.

Direct financial interests are financial interests that are

1. owned by you directly;
2. under your control; or
3. beneficially owned\(^\text{10}\) by you through an investment vehicle, estate, trust, or other intermediary if you can either
   a. control the intermediary, or
   b. have the authority to supervise or participate in the intermediary’s investment decisions.

For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest not only in the 401(k) plan but also in the investments held in your account.

You also have a direct financial interest in a client if you have a financial interest in a client through one of the following:

- A partnership, if you are a general partner
- A Section 529 savings plan, if you are the account owner
- An estate, if you serve as an executor and meet certain other criteria
- A trust, if you serve as the trustee and meet certain other criteria

For example, suppose you are a covered member with respect to ABC Co. and you are also a general partner of XYZ Partnership. XYZ Partnership owns shares in ABC Co. Under the independence rules, you would be deemed to have a direct financial interest in ABC, which would impair your independence, regardless of materiality.

An indirect financial interest arises if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary and you can neither control the intermediary nor have the authority to supervise or participate in the intermediary’s investment decisions.

For example, if you invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan’s investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments, in addition to a direct financial interest.

\textit{Note}: Ethics Interpretation No. 101-15, “Financial Relationships,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. 17), of the Code (effective December 31, 2005), provides extensive examples of various types of financial interests and whether they should be considered to be direct or indirect financial interests, including investments in mutual funds, retirement and savings plans, Section 529 plans, trusts, partnerships, and insurance products.

\(^{10}\) A financial interest is beneficially owned if an individual or entity is not the record owner of the interest, but has a right to some or all of the underlying benefits of ownership. These benefits include the authority to direct the voting or the disposition of the interest or to receive the economic benefits of the ownership of the interest.
The SEC classifies your investment in a client held through another entity (the intermediary) as direct if either of the following is true:
- You participate in the intermediary’s investment decisions or have control over them.
- The investment in the client by the intermediary (which is not a diversified mutual fund) represents 20 percent or more of the value of its total investments.

If neither of the preceding applies, your investment in a client through another entity would normally be considered to be an indirect financial interest in that client.

**What If My Immediate Family or I Receive a Financial Interest as a Result of an Inheritance or a Gift?**

If, due to an unexpected event, you or members of your immediate family receive a financial interest in an attest client that would impair your independence, you may qualify under an exemption in the rules if you meet the following criteria:
- The financial interest was unsolicited.
- You dispose of the interest as soon as practicable— but no later than 30 days after you become aware of it and have the right to dispose of it.
- If you do not have the right to dispose of the interest (for example, as in the case of stock options or restricted stock), you do not participate in the attest engagement for the client.

**What Are the Rules That Apply to My Mutual Fund Investments (and Those of My Family) If My Firm Audits Those Mutual Funds?**

If you are a covered member with respect to a mutual fund attest client of your firm, and you or your immediate family own shares in the fund, you have a direct financial interest in the fund client.

The SEC rules also prohibit the firm and covered persons and their immediate family members from having any financial interest in an entity (even one that is not a client) that is part of an investment company complex that includes an audit client.

**Which Rules Pertain to My Mutual Fund Investments (and Those of My Family) If My Firm Audits Companies Held in Those Mutual Funds?**

Financial interests that you and your immediate family have in clients through a mutual fund are considered to be indirect financial interests in those clients unless the fund is a diversified mutual fund.

If a mutual fund is diversified, and you or your immediate family, or both, own 5 or fewer percent of its outstanding shares, the fund’s holdings in clients for which you are a covered person will not be considered material indirect financial interests in those clients. Thus, you would be relieved of the burden of having to monitor whether, and to what degree, the fund invests in audit clients for which you are a covered person.

If the fund is not diversified, or you or your family, or both, own more than 5 percent of the fund’s equity, you should treat the fund’s holdings as indirect financial interests.

For example, suppose ABC Mutual Fund, a nondiversified mutual fund, owns shares in a client, XYZ, and
- ABC Mutual Fund’s net assets are $10,000,000;
- your shares in ABC Mutual Fund are worth $50,000;
- ABC Mutual Fund has 10 percent of its assets invested in XYZ; and
- your indirect financial interest in XYZ is $5,000 ($50,000 x .10).
If $5,000 is material to your net worth, independence would be considered to be impaired.

**May I Have a Joint Closely Held Investment With a Client?**

As a covered member, if you or the client, individually or collectively, control an investment, that investment is considered to be a joint closely held investment. If this joint closely held investment is material to your net worth, independence would be considered to be impaired. In this rule, *client* includes certain persons associated with the client, such as officers, directors, or owners who are able to exercise significant influence over the client.

The SEC rules prohibit you and your immediate family from having a joint business venture with a client or with persons associated with the client in a decision-making capacity (meaning officers, directors, or substantial shareholders) regardless of whether or not the venture is material to your net worth. The SEC believes that these joint ventures, whether material or not, cause the client and the audit firm to have mutuality of interests, which impairs independence.

**May My Family or I Borrow Money From or Lend Money to a Client?**

If you are a covered member with respect to an attest client, you and your immediate family may not have a loan to or from the following:

- The client
- An officer or director of the client
- An individual holding 10 percent or more of the client’s outstanding equity securities (or other ownership interests)

This rule has certain exceptions. First, covered members are permitted to have specific loans from financial institution attest clients. They include the following:

- Car loans and leases collateralized by the vehicle
- Credit card and overdraft reserve account balances that are kept current and do not exceed $10,000 (by payment due date, including any grace period)
- Passbook loans fully collateralized by cash deposits at the same financial institution
- Loans fully collateralized by an insurance policy

In addition, if you have a loan from a client financial institution (a bank, for example) that meets certain criteria, your loan may be “grandfathered” (that is, you may be allowed to keep it). For your loan to be grandfathered, you must have obtained it under normal lending procedures, terms, and requirements. The following loans may be grandfathered:

- Home mortgages
- Other secured loans
- Unsecured loans that are immaterial to your net worth

Generally speaking, a loan may be grandfathered if you obtained it before

- you became a covered member with respect to the client,
- the financial institution became a client, or
- the client acquired the loan.

To maintain your loan’s grandfathered status, you must keep the loan current (make timely payments according to the loan agreement). Also, you cannot renew or renegotiate the terms of the loan (for example,
the interest rate or formula) unless the change was part of the original agreement (for example, an adjustable rate mortgage).

The SEC rules differ from the AICPA rules in that secured loans (other than a mortgage on your primary residence) and immaterial unsecured loans may not be grandfathered.

May I Have a Brokerage Account With a Client?

The AICPA rules indicate that for independence to be maintained, a covered member whose assets are held by a broker-dealer client must not receive any preferential treatment or terms, and any assets that are subject to risk of loss must be immaterial to the covered member’s net worth. In addition, margin accounts may be subject to the loan rules.\(^\text{11}\)

Under the SEC rules, you may have a brokerage account with a client if your account (1) only holds cash or securities and (2) is fully insured by the Securities Investor Protection Corporation.

May I Have a Bank Account With a Client?

As a covered member, you may have a bank account with a client financial institution (for example, checking, savings, or money market accounts and certificates of deposit) if your deposits are fully insured by state or federal deposit insurance agencies or uninsured amounts are not material to your net worth.\(^\text{12}\)

The SEC prohibits covered persons and their immediate families from having bank account balances in excess of Federal Deposit Insurance Corporation (FDIC) insurance limits; that is, deposits in excess of FDIC limits are considered to impair independence, even if immaterial to you and your family.\(^\text{13}\)

May I Have an Insurance Policy With a Client?

The AICPA rules indicate that in order to maintain independence, a covered member must not receive any preferential treatment or terms when purchasing an insurance policy from a client. If the policy has an investment option, the financial interest rules must be applied.

The SEC prohibits covered persons and their immediate family members from owning an individual insurance policy issued by a client unless both of the following criteria are met:

- He or she obtained the policy before the professional became a covered person.
- The likelihood of the insurer becoming insolvent is remote.

---

\(^\text{11}\) See the preceding question “May My Family or I Borrow Money From or Lend Money to a Client?” in the section titled “Financial Relationships.”

\(^\text{12}\) Both AICPA and SEC rules permit a practical exception for firms that maintain deposits exceeding insured limits when the likelihood of the financial institution experiencing financial difficulties is considered remote.

\(^\text{13}\) The SEC treats money market funds (as opposed to money market accounts) as mutual funds for the purposes of their rules. Also, see Rule 2-01(c)(1)(B).
May I Give or Accept Gifts or Entertainment to or From a Client?

An ethics ruling addresses the exchange of gifts and entertainment among covered members, the attest client, and certain persons associated with the client (for example, persons in key positions and persons owning 10 percent or more of the client’s outstanding equity securities or other ownership interests).

Independence is impaired if the firm, a member of the attest engagement team, or a person able to influence the engagement accepts a gift that is not clearly insignificant.

A covered member may give a gift to persons associated with the client and not impair independence if the gift is reasonable in the circumstances. In addition, covered members may give or receive entertainment, provided it was reasonable in the circumstances.

Another ethics ruling addresses the broader issue of integrity and objectivity when partners, professionals, or their firms exchange gifts or entertainment with clients or persons associated with clients. Generally, gifts are differentiated from entertainment by whether the client participates in the activity with the firm member (for example, giving tickets to a sporting event for the client to use would be considered a gift versus attending the event with the client, which would be considered entertainment).

Relevant factors in determining reasonableness include the event or occasion (if any) giving rise to the gift or entertainment, cost or value, frequency, whether business was conducted, and who participated.

Business Relationships

Which Business Relationships With a Client Impair Independence?

As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as any of the following:

- Employee, director, officer, or in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client’s pension or profit-sharing trust

In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client’s operations or business affairs, independence is impaired.

Your independence is considered impaired even if you were a volunteer board member because you would be part of the client’s governing body and, therefore, would be able to participate in the client’s management decisions.

This rule has two possible exceptions:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may serve that client without impairing your independence if
   a. your position is purely honorary,
   b. you do not vote or participate in managing the organization, or
   c. your position is clearly identified as honorary in any internal and external correspondence.

---

2. In addition, you also are permitted to serve on a client’s advisory board, provided all of the following criteria are met:
   a. The advisory board’s function is purely advisory.\textsuperscript{17}
   b. The advisory board does not appear to make decisions for the client.
   c. The advisory board and any decision-making boards are separate and distinct bodies.
   d. Common membership between the advisory board and any decision-making groups is minimal.

When evaluating your independence under this rule, you should examine the applicable board or committee charter to determine whether it is consistent with this ethics ruling.

The SEC prohibits direct or material indirect business relationships with a client (or persons associated with a client), except when the firm is acting as a consumer in the ordinary course of business (for example, purchasing goods or services from a client at normal commercial terms where these goods or services will be consumed by the firm). Examples of prohibited business relationships are joint business ventures, limited partnership agreements, and certain leasing interests.

Nonattest Services

Which Rules Describe the Nonattest Services That My Firm and I May or May Not Provide to Attest Clients?

The term \textit{nonattest services} includes accounting and consulting services that are not part of an attest engagement.\textsuperscript{18} The following nonattest services are specifically addressed in the rules:

- Bookkeeping services
- Nontax disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax compliance services
- Corporate finance consulting or advisory services
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration
- Forensic accounting services

\textsuperscript{17} When evaluating your independence under this rule, you should examine the applicable board or committee charter to determine whether it is consistent with this ethics ruling.

\textsuperscript{18} Defined in the AICPA Code of Professional Conduct, an attest engagement is one that requires independence under AICPA Professional Standards; for example, audits and reviews of financial statements or agreed-upon procedures performed under the attestation standards are considered attest engagements.
In addition to considering the general standard and four guiding principals, the SEC and PCAOB rules generally prohibit a CPA from providing the following services to an issuer contemporaneously with an audit:

- Bookkeeping and other services related to the client’s accounting records or financial statements
- Financial information systems design and implementation
- Appraisal or valuation services
- Actuarial services
- Internal audit outsourcing
- Management functions
- Human resources
- Broker-dealer, investment adviser, or investment banking
- Legal services
- Expert services unrelated to the audit
- Aggressive or confidential tax transactions (PCAOB)
- Personal tax services provided to persons in financial reporting oversight roles (PCAOB)

If your firm performs nonattest services for an attest client, the independence rules impose limits on the nature and scope of the services your firm may provide. In other words, the extent to which your firm may perform certain activities for the client will be limited by the rules. Further, certain services will be prohibited in total (for example, serving as a client’s general counsel). These rules apply during the period of the professional engagement and the period covered by the financial statements (to which the attest services relate). In November 2007, the AICPA staff issued frequently asked questions (FAQs) clarifying how the rules apply to nonattest services provided to a new attest client prior to the time the member was engaged to provide attest services.

In August 2007, the SEC staff updated its FAQ document entitled, Office of the Chief Accountant: Application of the Commissions Rules on Auditor Independence Frequently Asked Questions. FAQ 7 under “Prohibited and Non-audit Services” addressed the question of whether a successor auditor who performed one of the preceding services during the audit period (period covered by the financial statements) would be independent of the client. The FAQ states that if the services (a) relate solely to the prior period audited by the predecessor auditor and (b) were performed before the successor auditor was engaged to audit the current audit period, independence would not be impaired.

This section does not discuss each of these services, but rather focuses on a few for purposes of illustration. To see the full context of the rules, see Ethics Interpretation No. 101-3, “Performance of Nonattest Services,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .05), and SEC Rule 2-01(c)(4), “Non-audit services.” You also are encouraged to review the Nonattest Services FAQ developed by the Professional Ethics Division.
The AICPA rules require a member to comply with more restrictive independence provisions, if applicable, of certain regulators, such as state boards of accountancy, the SEC, GAO, and DOL.

SEC and PCAOB rules require independence of the client and various affiliated entities.¹⁹

**Note:** SEC rules also require a client’s audit committee (or equivalent) to preapprove all audit and nonaudit services provided by the firm to the audit client and the client’s consolidated entities. Proposals to provide tax or internal control-related services are subject to more extensive audit committee preapproval requirements under PCAOB Rule 3524, Audit Committee Pre-approval of Certain Tax Services (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), and PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), respectively.

The SEC approved new PCAOB Rule 3526, Communication with Audit Committees Concerning Independence (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), which supersedes the PCAOB’s existing interim standard, ISB Standard No. 1, Independence Discussions with Audit Committees (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”), and its interpretations. Before accepting a new audit engagement and annually thereafter, the auditor must describe in writing to the audit committee all relationships between the auditor and the client (including affiliates of both) that could reasonably be thought to bear on independence, discuss these matters with the audit committee, and document the substance of that discussion (effective September 30, 2008).

**AICPA General Requirements**

**General Requirement 1**

The following is one of the key principles underlying the AICPA rules on nonattest services: You may not serve—or even appear to serve—as a member of a client’s management. For example, you may not

1. make operational or financial decisions for the client,
2. perform management functions for the client, or
3. report to the board of directors on behalf of management.

In addition, the following are examples of the types of activities that impair independence:

1. Authorizing or executing a transaction on behalf of a client
2. Preparing the client’s source documents (for example, purchase orders)
3. Having custody of a client’s assets
4. Establishing or maintaining internal controls, including monitoring ongoing activities

**General Requirement 2**

To help ensure compliance with General Requirement 1, the second requirement states that the client must agree to assume certain responsibilities related to the nonattest services engagement. So, prior to agreeing to perform any nonattest services for the client, the firm must obtain the client’s agreement to

1. make all management decisions and perform all management functions;
2. designate an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

¹⁹ See Rule 2-01(f)(4) and (6).
3. evaluate the adequacy and results of the services performed; and
4. accept responsibility for the results of the services.

With regards to the preceding Item 2, the firm should be satisfied that the client’s designee sufficiently understands the services to be performed in order to oversee them. This does not mean that the individual must be able to perform or reperform the services, but he or she should be able to understand and agree to the nature, objectives, and scope of the services; make all significant judgments; evaluate the adequacy and results of the service; accept responsibility for the service results; and ensure that the resulting work product meets the agreed-upon specifications. The client also must be willing to commit the time and resources needed for the designee to fulfill these duties.

**General Requirement 3**

Before performing nonattest services, the firm should establish and document its understanding with the client regarding the following:

1. Objectives of the engagement
2. Services to be performed
3. Client’s acceptance of its responsibilities
4. Member’s responsibilities
5. Any limitations of the engagement

The firm should document the understanding in the engagement letter, audit planning memo, or other internal firm file.

*Note:* Routine activities (for example, assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements) that are part of the normal auditor-client relationship are exempt from the second and third general requirements.

**What Are the Rules Concerning Performing Bookkeeping Services for a Client?**

The AICPA independence rules prohibit members from acting as client management in all circumstances. Accordingly, a member may provide bookkeeping services if the client oversees the services and, among other things, performs all management functions and makes all management decisions in connection with the services. For example, if a member is engaged to provide bookkeeping services that will result in a set of financial statements, the client must

- approve all account classifications,
- provide source documents to the member so that the member can prepare journal entries, and
- take responsibility for the results of the member’s services (for example, financial statements).

*Note:* Proposing adjusting entries to a client’s financial statements as a part of the member’s audit, review, or compilation services is a normal part of those engagements and would not be considered the performance of a nonattest service subject to the general provisions of Ethics Interpretation No. 101-3, provided the client reviews these entries, understands the impact on its financial statements, and records any adjustments identified by the member.
Because of self-audit concerns, performing any type of bookkeeping service for a client (or affiliate of a client) is considered to impair independence under SEC rules, unless it is reasonable to expect that the results of the auditor’s services will not be subject to the firm’s audit procedures. The SEC considers there to be a rebuttable presumption that the results of these services would be subject to audit procedures and, therefore, the firm must overcome the presumption to perform the service.

This presumption of self-audit also applies to the following:

- Financial information design and implementation
- Appraisals, valuations, fairness opinions, or contribution-in-kind reports
- Actuarial-related advisory services
- Internal audit outsourcing

**May My Firm Provide Internal Audit Assistance to a Client?**

To perform internal audit assistance for a client and maintain independence, your firm may not act—or appear to act—as a member of the client’s management. For example, you and your firm may not

- make decisions on the client’s behalf, or
- report to the client’s governing body.

To maintain independence, the client must

- designate an individual or individuals who possess suitable skill, knowledge, and experience to oversee the internal audit function;
- determine the scope, risk, and frequency of internal audit activities;
- evaluate the findings and results of internal audit activities; and
- evaluate the adequacy of the audit procedures performed and related findings.

**May My Firm Provide Valuation, Appraisal, or Actuarial Services to a Client?**

Your firm may not provide valuation, appraisal, or actuarial services for a client if

- the results of the service would be material to the client’s financial statements, and
- the service involves a significant amount of subjectivity.

For instance, your firm may not perform a valuation in connection with a business combination that would have a material effect on a client’s financial statements because that service involves significant subjectivity (for example, setting the assumptions and selecting and applying the valuation methodology).

This rule has two limited exceptions. Valuation, appraisal, or actuarial services performed for nonfinancial statement purposes may be provided if they otherwise meet the rule’s general requirements (for example, the client assigns an individual to oversee the service who is in a position to make an informed judgment on and accept responsibility for the results of the service). Also, your firm may provide an actuarial valuation service.
of a client’s pension or postretirement liabilities because the results of the valuation would be reasonably consistent regardless of who performs the valuation.

The SEC prohibits your firm from providing valuation, appraisal, or any service involving a fairness opinion or contribution-in-kind report20 to clients unless it is reasonable to expect that your firm would not audit the results of those services.

In August 2008, the staff of the Professional Ethics Division issued nonauthoritative guidance (in the form of an FAQ) on the question of whether, under Ethics Interpretation No. 101-3, members could assist an attest client in applying Financial Accounting Standards Board (FASB) Statement No. 141 (revised 2007), Business Combinations, or FASB Statement No. 142, Goodwill and Other Intangible Assets, while maintaining independence. Specifically, the FAQ addresses whether the following services would be considered to impair independence:

- Providing the client advice on valuation methodologies and assumptions needed to perform the valuation
- Providing advice on valuation templates, software or other tools that allow the client to determine an appropriate value for acquired assets, goodwill, contingent consideration, and so on

May My Firm Provide Investment Advisory Services to a Client?

Here are examples of what you and your firm may do under the AICPA rules:

- Make recommendations to a client about the allocation of funds to various asset classes
- Analyze investment performance

However, the AICPA rules also indicate that you and your firm may not

- make investment decisions for the client,
- execute investment transactions, or
- take custody of a client’s assets.

May My Firm Design or Implement an Information System for a Client?

Your firm may not design or develop a client’s financial information system or make more than insignificant modifications to the source code underlying such a system. In addition, operating a client’s local area network is prohibited.

Your firm may install an accounting software package for a client, including helping the client set up a chart of accounts and financial statement format. Your firm also may provide training to the client’s employees on how to use an information system. Your firm may not, however, supervise the client’s employees in their day-to-day use of the system because that activity is a management function.

Your firm is not precluded from designing, implementing, integrating, or installing an information system that is unrelated to the client’s financial reporting process.21

---

20 Per the SEC, fairness opinions and contribution-in-kind reports are opinions and reports in which your firm provides its opinion on the adequacy of consideration in a transaction.

21 Frequently Asked Questions (FAQ) to assist members in understanding and implementing the new information technology services provisions may be obtained at www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+Ethics/Resources+and+Tools/Frequently+Asked+Questions.htm.
SEC rules prohibit your firm from providing any service related to a client’s financial information system design or implementation unless the results of your firm’s services would not be subject to audit procedures during an audit of the client’s financial statements. Your firm may either

- evaluate internal controls of a financial information system as it is being designed, implemented, or operated for the client by another service provider, or
- make recommendations on internal control matters to management in connection with a system design and implementation project being performed by another service provider.

Note: Effective for audits of fiscal years ending on or after November 15, 2007, your firm must obtain preapproval for these and other internal control-related services in accordance with PCAOB Rule 3525.

Fee Issues

What Types of Fee Arrangements Between My Firm and a Client Are Prohibited?

Two types of fee arrangements, contingent fees and commissions, are prohibited if the arrangement involves certain attest clients, even though the fee is not related to an attest service.

A contingent fee is an arrangement whereby (1) no fee is charged unless a specified result is attained or (2) the amount of the fee depends on the results of your firm’s services. Some examples of contingent fees are the following:

- Your firm receives a finder’s fee for helping a client locate a buyer for one of the client’s assets.
- Your firm performs a consulting engagement to decrease a client’s operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

The following are exceptions:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies

A commission is any compensation paid to you or your firm for (1) recommending or referring a third party’s product or service to a client or (2) recommending or referring a client’s product or service to a third party.

Examples of commissions are if you or your firm

- refers a client to a financial planning firm that pays you a commission for the referral,
- sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company, or
- refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

Commissions or contingent fee arrangements with a client are not allowed if your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements
- A compilation of financial statements if a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence
- An examination of prospective financial statements
You may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not an attest client). For example, you may receive a commission from a nonclient insurer if you refer an officer of an attest client to the insurer and the officer purchases a policy. Even though this situation is permitted, you are still required to tell the officer that you received a commission for making the referral.

Note: State boards of accountancy and state societies also may have more restrictive regulations regarding fee arrangements, as well as specific disclosure requirements.

When Are Referral Fees Permitted?
The AICPA rule provides an exception for referral fees for recommending or referring a CPA’s services to another person or entity. That is, you may (1) receive a fee for referring a CPA’s services to any person or entity or (2) if you are a CPA, you may pay a fee to obtain a client. You must inform the client if you receive or pay a referral fee.

Is Independence Affected When a Client Owes the Firm Fees for Professional Services the Firm Has Already Provided?
If a client owes your firm fees for services rendered more than one year ago, your firm’s independence is considered impaired. It does not matter if the fees are related to attest services; what matters is that the client has an outstanding debt with the firm. This is the case even if the client has given you a note receivable for these fees.

The SEC generally expects payment of past-due fees before an engagement has begun, although a short-term payment plan may be accepted if the client has committed to pay the balance in full before the current year report is issued.22

---

22 The exception generally has been applied only to engagements to audit a clients financial statements included in its annual report, not in a registration statement.
Does Being Compensated for Selling Certain Services to Clients Affect My Independence?

The AICPA rules do not specifically address this issue.

The SEC prohibits audit partners from being directly compensated for selling nonattest services to audit clients. The SEC believes that such financial incentives could threaten an audit partner’s objectivity and that the appearance of independence could be affected by such compensation arrangements. The rule does not prevent an audit partner from sharing in profits of the audit practice or the overall firm. Nor does it preclude the firm from evaluating a partner based on factors related to the sale of nonaudit services to clients (for example, the complexity of engagements or overall management of audit or nonaudit engagements).

Does It Matter If a Significant Proportion of My Firm’s Fees Come From a Particular Client?

The conceptual framework states that a financial self-interest threat may exist due to “excessive reliance on revenue from a single attest client.” In addition, Ethics Rule 102 and ET section 55, Article IV—Objectivity and Independence (AICPA, Professional Standards, vol. 2), discuss in broad terms that members should be alert for relationships that could diminish their objectivity and independence in performing attest services. The significance of a client to a member (or his or her firm)—measured in terms of fees, status, or other factors—may diminish a member’s ability to be objective and maintain independence when performing attest services.

To address this issue, firms should consider implementing the following policies and procedures to identify and monitor significant clients to help mitigate possible threats to a member’s objectivity and independence:

1. Policies and procedures for identifying and monitoring significant client relationships include
   a. considering client significance in the planning stage of the engagement.
   b. basing the consideration of client significance on firm-specific criteria or factors that are applied on a facts-and-circumstances basis (see the following section entitled “Factors to Consider in Identifying Significant Clients”).
   c. periodically monitoring the relationship. What constitutes periodic is a matter of judgment, but assessments of client significance that are performed at least annually can be effective in monitoring the relationship. During the course of such a review, a client previously deemed to be significant may cease to be significant. Likewise, clients not identified as significant could become significant whenever factors the firm considers relevant for identifying significant clients arise (for example, additional services are contemplated).

2. Policies and procedures to help mitigate possible threats to independence and objectivity by
   a. assigning a second (or concurring) review partner who is not otherwise associated with the engagement and practices in an office other than those that perform the attest engagement,
   b. subjecting the assignment of engagement personnel to approval by another partner or manager,
   c. periodically rotating engagement partners,
   d. subjecting significant client attest engagements to internal firm monitoring procedures, and
   e. subjecting significant client attest engagements to preissuance or postissuance reviews or the firm’s external peer review process.

23 Accounting firms with 10 or fewer partners and 5 or fewer audit clients that are issuers, as defined by the SEC, are exempt from this rule.
The most effective safeguards a firm can employ will vary significantly depending on the size of the firm, the way the firm is structured (for example, whether highly centralized or departmentalized), and other factors. For example, smaller firms (particularly those with one office) tend to be simpler and less departmentalized than larger firms. Generally, their processes will be less formal and involve fewer people than those of larger firms. Further, their managing partners may engage in frequent and direct communications with the firm’s partners and professional staff on client matters and be personally involved in staff assignments. Larger firms draw from a sizeable and diverse talent pool. In those firms, partners who are not affiliated with the engagement (or the client service office or business unit) can choose second (or concurring) review partners from outside the office performing the attest engagement. Midsized—or regional—firms may have aspects of both their smaller and larger counterparts, such as combining the ability to choose second-review partners from an office other than the client service office, while maintaining a relatively close connection to specific client relationships.

**Factors to Consider in Identifying Significant Clients**

Both qualitative and quantitative factors can reveal a significant client, including the following:

- The size of the client in terms of the percentage of fees or the dollar amount of fees versus total revenue of the engagement partner, office, or practice unit of the firm.
- The significance of the client to the engagement partner, office, or practice unit of the firm in light of the following:
  - Amount of time the partner, office, or practice unit devotes to the engagement
  - Effect on the partner’s stature within the firm due to his or her relationships with the client
  - Manner in which the partner, office, or practice unit is compensated
  - Effect that losing the client would have on the partner, office, or practice unit
- The importance of the client to the firm’s growth strategies (for example, the firm is trying to gain entry into a particular industry)
- The stature of the client, which may enhance the firm’s stature (for example, the firm is trying to gain entry into a particular industry)
- Whether the firm also provides services to related parties (for example, also provides professional services to affiliates or owners of the client)
- Whether the engagement is recurring or not

Judgment is necessary to determine whether a client is significant to the firm, office, practice unit, or partner of the firm. Firms will vary considerably in terms of the degree to which they consider some factors to be more pertinent than others. Gauges that relate to each relevant level within a firm (for example, firm, geographic region, office, or practice unit) may be useful but likely will be different for various levels within the firm.

According to SEC guidance, in general, if a firm derives more than 15 percent of its total revenues from one client or group of related clients, independence may be impaired because this may cause the firm to be overly dependent on the client or group of related clients.

---

24 Assessing client significance at the business or practice unit level may be a more meaningful measure for firms that structure their practices along industry lines (such as healthcare or financial services).
Further Assistance

Where Can I Find Further Assistance With My Independence Questions?

The AICPA Plain English Guide to Independence does not address many subjects included in the AICPA rules. Readers are encouraged to view the online version of the Code at www.aicpa.org/about/code/index.html.

In addition, readers should refer to ET section 100.01 in evaluating whether a specific circumstance that is not addressed in the Code would pose an unacceptable threat to independence.

As specific services and situations arise in practice, refer to the independence literature and consult with those responsible for independence in your firm. If you need further assistance researching your question, contact one of the following organizations for guidance.

The AICPA has a variety of resources for practitioners:

- The Web site address for information about the AICPA’s ethics standard-setting activities is www.aicpa.org/Professional+Resources/Professional+Ethics/Code+of+Professional+Conduct/Professional+Ethics/Exposure+Drafts+-+Standard+Setting/.
- For resources related to understanding and applying nonattest services rules, see www.aicpa.org/Professional+Resources/Professional+Ethics/Code+of+Professional+Conduct/Professional+Ethics/Resources+and+Tools/.
- For the Background and Basis for Conclusions document for nonattest services, see www.aicpa.org/download/ethics/Basis_for_Conclusions_Non_Attest_Services.pdf.
- For independence inquiries by phone, call (888) 777-7077. Send e-mail inquiries to ethics@aicpa.org.
- The AICPA interactive CD-ROM course on independence, titled Independence, teaches the AICPA and SEC independence rules and qualifies for eight hours of Continuing Professional Education credits. See www.cpa2biz.com/AST/Main/CPA2BIZ_Primary/Ethics/PRDOVR~PC-739155HS/PC-739155HS.jsp.

SEC and PCAOB Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert provides auditors and accountants practicing in business and industry with a detailed overview of recent developments at the Securities and Exchange Commission and Public Company Accounting Oversight Board with respect to financial reporting and auditing matters.

This document has not been approved, disapproved, or otherwise acted upon by a senior technical committee of the AICPA.

Technical Manager
Accounting and Auditing Publications

Securities and Exchange Commission Developments

.01 The summaries that follow are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rule or development. In addition, the information presented in the following does not encompass all of the recent issuances and activities of the U.S. Securities and Exchange Commission (SEC). See the SEC Web site at www.sec.gov for complete information.

SEC Final Rules

Extension Granted Involving Internal Control Over Financial Reporting

.02 On June 26, 2008, the SEC released the final rule Internal Control Over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers, which amends a temporary rule. The final rule extends the time period that a nonaccelerated filer would be required to provide the auditor’s attestation report on internal control over financial reporting in an annual report filed for fiscal years ending on or after December 15, 2009. The temporary rule had originally set a requirement of December 15, 2008. This amendment therefore extends that requirement one year. The full text of this rule can be found at www.sec.gov/rules/final/2008/33-8934.pdf.

SEC Eases Acceptance of International Financial Reporting Standards Financial Statements

.03 On December 21, 2007, the SEC took a major step toward easing the acceptance of International Financial Reporting Standards (IFRS) financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB) without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.04 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers.
that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

.05 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

Smaller Reporting Company Regulatory Relief and Simplification

.06 On December 19, 2007, the SEC adopted amendments to its disclosure and reporting requirements under the Securities Act of 1933 and the Securities Exchange Act of 1934 to expand the number of companies that qualify for its scaled disclosure requirements for smaller reporting companies. Companies that have less than $75 million in public equity float will qualify for the scaled disclosure requirements under the amendments. Companies without a calculable public equity float will qualify if their revenues were under $50 million in the previous year. To streamline and simplify regulation, the amendments move the scaled disclosure requirements from Regulation S-B into Regulation S-K of the Securities Act of 1933. The rule became effective February 4, 2008, except for Title 17 U.S. Code of Federal Regulations (CFR) Part 249.308b Form 10-QSB, which will be removed effective October 31, 2008, and 17 CFR 228 and 249.310b Form 10-KSB, which will both be removed effective March 15, 2009. The full text of this rule as well as detailed compliance information and dates can be found at www.sec.gov/rules/final/2007/33-8876.pdf.

Electronic Filing and Revision of Form D

.07 On February 6, 2008, the SEC adopted rule amendments mandating the electronic filing, via the Internet, of information required by the Securities Act of 1933 Form D. The SEC also adopted revisions to Form D and to Regulation D in connection with the electronic filing requirement. The revisions simplify and restructure Form D and update and revise its information requirements. The information required by Form D will be filed with the SEC electronically through a new online filing system that will be accessible from any computer with Internet access. The data filed will be available on the SEC Web site and will be interactive and searchable. This rule is effective September 15, 2008, except for amendments to 17 CFR 232.101(c)(6) and 232.201(a) that are effective March 28, 2008, 17 CFR 232.101(a)(1)(xiii) that is effective March 16, 2009, and 17 CFR 230.503T, 232.101(b)(10), and 239.500T that are effective from September 15, 2008 to March 16, 2009. The full text of this rule can be found at www.sec.gov/rules/final/2008/33-8891.pdf.

.08 This rule is another step toward streamlining the filing process with the SEC and moving toward eXtensible Business Reporting Language (XBRL) filing. The Center for Audit Quality (CAQ), which is affiliated with the AICPA, commented on this rule and recommended that all Form D information be filed in the standard XBRL format. The full text of the comment letter can be found at www.thecaq.org/members/pdfs/CAQ_Letter%201_071307.pdf. In addition, there is a separate section of this alert, “Interactive Data and XBRL Initiatives,” that provides further information on XBRL.

SEC Interpretive Releases

.09 On August 1, 2008, the SEC issued an interpretive release that provides guidance on the use of company Web sites under the Securities Exchange Act of 1934 and the antifraud provisions of federal securities laws. The SEC is soliciting comments on issues relating to the use of company technology to provide information to investors. The full text of the release can be found at www.sec.gov/rules/interp/2008/34-58288.pdf.

1 The 2008 version of Title 17, Commodity and Securities Exchanges, of U.S. Code of Federal Regulations can be found at www.access.gpo.gov/cgi-bin/cfrassemble.cgi?title=200817.
SEC No-Action and Exemptive Orders

.10 To respond to an inquiry from a public company, the SEC issues Securities Exchange Act of 1934 no-action and exemptive orders, as needed. Exemptive orders are similar to no-action letters because they grant permission from the SEC to move forward on a new initiative. Exemptive orders are issued by or on behalf of the SEC and may exempt a certain type of transaction or situation from designated provisions of the securities laws. No-action letters are issued by SEC staff and indicate whether the staff would recommend that the SEC pursue an enforcement action if the person or entity requesting the letter takes, or omits to take, certain actions. Recently issued no-action and exemptive orders can be found at www.sec.gov/interps/noaction.shtml.

SEC Proposed Rules

Modernization of the Oil and Gas Reporting Requirements

.11 On June 26, 2008, the SEC proposed revisions to its oil and gas reporting requirements, which currently exist under Regulations S-K and S-X, as well as Securities Act Industry Guide 2, “Disclosure of Oil and Gas Operations.” The revisions are intended to provide investors with a more meaningful and comprehensive understanding of oil and gas reserves, which should help investors evaluate the relative value of oil and gas companies. The SEC adopted the current reporting requirements for oil and gas reserves between 1978 and 1982, and since then, there have been significant changes in the oil and gas industry. The proposed amendments are designed to modernize and update the oil and gas disclosure requirements to align them with current practices and changes in technology. The SEC is also proposing to codify Industry Guide 2 in Regulation S-K, with several additions to, and deletions of, current industry guide items. These changes would further harmonize oil and gas disclosures by foreign private issuers with the proposed disclosures for domestic issuers. The full text of the proposal can be found at www.sec.gov/rules/proposed/2008/33-8935.pdf.

Interactive Data to Improve Financial Reporting

.12 On May 30, 2008, the SEC proposed amendments to require companies to provide their financial statements to the SEC in interactive data format using XBRL with a proposed three year phase-in schedule. The proposed rules would apply to both domestic and foreign companies using U.S. GAAP and eventually to foreign private issuers using IFRS. The full text of this proposal can be found at www.sec.gov/rules/proposed/2008/33-8924.pdf.

.13 In addition, on June 10, 2008, the SEC released proposed rules requiring mutual funds to provide risk-return summary information in a format that would improve its usefulness to investors. Mutual funds would be required to provide the risk-return summary section of their prospectuses to the SEC using XBRL. The interactive data would be provided as an exhibit to registration statements. The SEC is also proposing to permit investment companies to submit portfolio holdings information in the SEC’s interactive data voluntary program without being required to submit other financial information. The full text of the proposal can be found at www.sec.gov/rules/proposed/2008/33-8929.pdf.

Foreign Issuer Reporting Enhancements

.14 On February 29, 2008, the SEC proposed a number of changes to its rules relating to foreign private issuers that are intended to improve the accessibility of the U.S. public capital markets to these issuers, as well as to enhance the information that is available to investors. The SEC has proposed amendments that would enable foreign issuers to test their qualification to use the forms and rules available to foreign private issuers once a year, rather than continuously. The SEC also proposed amendments to change the deadline for annual reports filed by foreign private issuers and to eliminate an option under which foreign private issuers are permitted to omit segment data from their U.S. GAAP financial statements. The SEC is also proposing an amendment to the rule pertaining to going-private transactions to reflect the new termination of reporting and deregistration rules for foreign private issuers. In addition, the SEC is soliciting comments...
on proposals that would revise the annual report and registration statement forms used by foreign private issuers to improve certain disclosures provided in these forms. The full text of the proposal can be found at www.sec.gov/rules/proposed/2008/33-8900.pdf.

**SEC Staff Accounting Bulletins**

SEC Staff Accounting Bulletins (SABs) reflect SEC staff views regarding accounting-related disclosure practices. They represent interpretations and policies followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of federal securities laws. There have been two new SABs published since the publication of the previous edition of this alert, as discussed in the following sections.

**SAB No. 110, Topic 14, Share-Based Payment, Staff Views Regarding the “Simplified” Method, as Discussed in SAB No. 107, Topic 14**

On December 21, 2007, the SEC released SAB No. 110. This SAB expresses the views of the staff regarding the use of a “simplified” method, as discussed in SAB No. 107, in developing an estimate of the expected term of “plain vanilla” share options in accordance with Financial Accounting Standards Board (FASB) Statement No. 123 (revised 2004), *Share-Based Payment*. In particular, the staff indicated in SAB No. 107 that it will accept a company’s election to use the simplified method, regardless of whether the company has sufficient information to make more refined estimates of expected term. At the time SAB No. 107 was issued, the staff believed that more detailed external information about employee exercise behavior (for example, employee exercise patterns by industry or other categories of companies) would, over time, become readily available to companies. Therefore, the staff stated in SAB No. 107 that it would not expect a company to use the simplified method for share option grants after December 31, 2007. The staff understands that such detailed information about employee exercise behavior may not be widely available by December 31, 2007. Accordingly, the staff will continue to accept, under certain circumstances, the use of the simplified method beyond December 31, 2007. The full text can be found at www.sec.gov/interp/account/sab110.htm.

**SAB No. 109, Topic 5, Miscellaneous Accounting, Staff Views on Written Loan Commitments That Are Accounted For at Fair Value Through Earnings Under GAAP**

On November 5, 2007, the SEC released SAB No. 109. This SAB expresses the views of the staff regarding written loan commitments that are accounted for at fair value through earnings under GAAP. SAB No. 105, *Application of Accounting Principles to Loan Commitments*, provided the views of the staff regarding derivative loan commitments that are accounted for at fair value through earnings pursuant to FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*. SAB No. 105 stated that in measuring the fair value of a derivative loan commitment, the staff believed it would be inappropriate to incorporate the expected net future cash flows related to the associated servicing of the loan. This SAB supersedes SAB No. 105 and expresses the current view of the staff that, consistent with the guidance in FASB Statement No. 156, *Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140*, and FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*, the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SAB No. 105 also indicated that the staff believed that internally developed intangible assets (such as customer relationship intangible assets) should not be recorded as part of the fair value of a derivative loan commitment. This SAB retains that staff view and broadens its application to all written loan commitments that are accounted for at fair value through earnings.

The staff expects registrants to apply the views in question 1 of SAB No. 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The full text of this SAB can be found at www.sec.gov/interp/account/sab109.htm.
SEC Office of the Chief Accountant: Staff Letters to Industry

Readers should be aware of the following staff letters to industry that provide helpful guidance and clarification regarding the SEC staff’s interpretation of certain accounting issues and their application under U.S. GAAP.

Letter From SEC Chief Accountant Concerning the American Securitization Forum’s Streamlined Foreclosure and Loss Avoidance Framework for Securitized Subprime Adjustable Rate Mortgage Loans

This letter, sent January 8, 2008 to Arnold Hanish, chairman of the Committee on Corporate Reporting, and Sam Ranzilla, chairman of the Professional Practice Executive Committee for the AICPA’s Center for Audit Quality, addresses whether modifications of Segment 2 subprime adjustable rate mortgage loans that occur pursuant to the American Securitization Forum framework would result in a change in the status of a transferee as a qualifying special-purpose-entity under paragraph 55 of FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extin guishments of Liabilities—a replacement of FASB Statement No. 125. The full text of the letter can be found at www.sec.gov/info/accountants/staffletters/hanish010808.pdf.

Letter From SEC Chief Accountant Concerning the Use of Employee Stock Appreciation Rights Securities to Value Employee Share-Based Payment Awards Under FASB Statement No. 123R

This letter, sent October 17, 2007 to Zions Bancorporation, provides guidance concerning if the price obtained for employee stock appreciation rights securities from Zions’s auction could be used as an estimate of fair value, in accordance with FASB Statement No. 123(R). The full text of the letter can be accessed at www.sec.gov/info/accountants/staffletters/zions101707.pdf.

Recent Guidance Provided by the SEC’s Division of Corporation Finance

Accounting Guidance to Certain Registrants in the Form of Sample Letters

In February 2005, the staff of the Division of Corporation Finance publicly posted sample letters sent to certain registrants to promote widespread awareness of certain accounting issues and to provide examples of comments that other registrants should consider as they prepare future SEC filings, as applicable. Since the last edition of this alert, the following two letters that have been posted.

Sample Letter to Public Companies on Management Discussion and Analysis Disclosure Regarding the Application of FASB Statement No. 157, Fair Value Measurements

In March 2008, the Division of Corporation Finance sent an illustrative letter to certain public companies identifying a number of fair value disclosure issues they may wish to consider in preparing the Management’s Discussion and Analysis (MD&A) sections of their upcoming quarterly reports on Form 10-Q. The sample letter can be found at www.sec.gov/divisions/corpfin/guidance/fairvaluelt0308.htm.

Sample Letter Sent to Public Companies That Have Identified Investments in Structured Investment Vehicles, Conduits, or Collateralized Debt Obligations

In December 2007, the Division of Corporation Finance sent an illustrative letter to certain public companies identifying a number of off-balance sheet disclosure issues they may wish to consider in preparing the MD&A sections of their upcoming annual reports on Form 10-K or Form 20-F. The sample letter can be accessed at www.sec.gov/divisions/corpfin/guidance/cfoffbalanceltr1207.htm.
Additional Comments and Guidance From the Staff of the Division of Corporation Finance

Staff Comments on Annual Reports Containing Financial Statements Prepared For the First Time on the Basis of IFRS

.25 In 2006, the SEC staff reviewed the annual reports of more than 100 foreign private issuers containing financial statements prepared for the first time on the basis of IFRS. The staff comments include the following topics:

- Assertion of compliance with IFRS
- Manner of presentation
- Topical areas, including revenue recognition, intangible assets and goodwill, impairment of long-lived assets, leases, contingent liabilities, and financial instruments

.26 The SEC staff also recently posted the company responses to their comments, which can be found at www.sec.gov/divisions/corpfin/ifrs_reviews.htm.

SEC Smaller Company Reporting Initiatives

.27 As discussed in the “SEC Final Rules” section of this alert, the SEC released a final rule that extends the time period that a nonaccelerated filer would be required to provide the auditor’s attestation report on internal control over financial reporting. Since introduction of the requirement for management and auditor attest reports on internal control over financial reporting, the SEC has focused on providing guidance to small businesses and related issues. Some of the more recent initiatives are highlighted in the following.

Sarbanes-Oxley Section 404, A Guide for Small Business

.28 On December 4, 2007, the SEC issued the brochure Sarbanes-Oxley Section 404—A Guide for Small Businesses in preparation for the upcoming effective date of Section 404 of the Sarbanes-Oxley Act of 2002 for smaller public companies’ management assessment of internal control over financial reporting. The brochure is intended to assist smaller companies with their first time assessment under Section 404 of Sarbanes-Oxley by outlining applicable guidance and providing tips for performing management’s assessment. The brochure outlines three key steps for small businesses in beginning this evaluation, including the following:

- Identifying financial reporting risks and controls that address those risks
- Assessing whether internal controls work in practice
- Reporting conclusions on overall effectiveness and deficiencies

.29 There is also guidance included on what types of records small businesses need to keep to ensure they are in compliance with the SEC rules. The brochure can be found at www.sec.gov/info/smallbus/404guide.shtml.

Small Reporting Company Compliance and Disclosure Interpretations

.30 Since the adoption of the SEC’s smaller reporting company rules in Release No. 33-8876, Smaller Reporting Company Regulatory Relief and Simplification, on December 19, 2007 (as discussed in the “SEC Final Rules” section of this alert), the Division of Corporation Finance posted Smaller Reporting Company Compliance and Disclosure Interpretations. These interpretations address the following questions:

1. Do all current reporting companies have an opportunity to determine if they qualify for treatment as a smaller reporting company applying the $75 million public float test as of the end of the second quarter in the fiscal year next ending after December 15, 2007, or the alternative $50 million annual revenue test for companies that cannot calculate their public float?
2. Could a company with a fiscal year ended December 31, 2007 be both a smaller reporting company and an accelerated filer for 2008, if it was an accelerated filer with respect to filings due in 2007 and had a public float of $60 million on the last business day of its second fiscal quarter of 2007?

3. Will a company that does not qualify as a smaller reporting company this year be able to qualify as a smaller reporting company if its public float falls below $75 million at the end of its second fiscal quarter in a future fiscal year?

4. The version of the adopting release on smaller reporting company regulatory relief and simplification currently posted on the SEC’s Web site states the SEC added Item 407(g) to Regulation S-K to provide that smaller reporting companies are not “required to provide an Audit Committee [Financial Expert] Report until the first annual report after their initial registration statement is filed with the Commission and becomes effective.” An asterisked footnote indicates that the bracketed language was inadvertently omitted from the release when initially published. The initial version of the release indicated that smaller reporting companies were not required to provide an audit committee report under the circumstances described. Are smaller reporting companies required to provide an audit committee report?

5. Do the new disclosure requirements available to smaller reporting companies apply to the Schedule 14A disclosure requirements that refer registrants to specific paragraphs of items in Regulation S-K?

6. Is a smaller reporting company required to describe its policies and procedures for review, approval, or ratification of transactions with related persons as specified by Item 404(b) of Regulation S-K if a schedule or form being used for a filing requires the company to furnish the information required by Item 404(b)?

The full text of the questions and answers regarding smaller company reporting requirements can be found at www.sec.gov/info/smallbus/src-cdinterps.htm.

Changeover to the SEC’s Smaller Reporting Company System by Small Business Issuers and Non-Accelerated Filer Companies: A Small Entity Compliance Guide

On January 25, 2008, the SEC issued a compliance guide that, according to the guide’s introduction, “explains how current small business issuers and other smaller companies newly eligible to use the SEC’s scaled disclosure rules, primarily ‘non-accelerated filer’ companies, can make the changeover to the new rules with minimal effort and expense.” This guide is divided into the following sections:

- Qualifying as a “Smaller Reporting Company”
- Compliance Date Guidance for Current Small Business Issuers
- Transition to Non-SB Forms—Guidance for Current Small Business Issuers
- Guidance for Newly Eligible Smaller Reporting Companies
- Chart of Scaled Item Requirements in Regulation S-K for Smaller Reporting Companies

You can access the complete compliance guide at http://sec.gov/info/smallbus/secg/smrepcosysguid.pdf.

Nonaccelerated Filers, Small Business Issuers, and Smaller Reporting Companies

The SEC has issued several proposals and adopted final rules related to nonaccelerated filers, small business issuers, and smaller reporting companies in the past year. Because some practitioners may find this terminology confusing, this alert outlines the definitions of each and the recent changes to the Securities Exchange Act of 1934 due to the adoption of SEC Release No. 33-8876, which became effective February 4, 2008. In many situations, a company will have to determine whether it is an accelerated filer, nonaccelerated filer, or smaller reporting company. A company’s status as an accelerated or nonaccelerated filer may determine such issues as when the company must file its Form 10-K and Form 10-Q and when audit
Attestation reports under Section 404(b) of Sarbanes-Oxley are required to be filed. A company that qualifies as a smaller reporting company has the choice of using the standard disclosure requirements in Regulation S-K or the scaled disclosure requirements available to smaller reporting companies in Regulation S-K. Although the scaled disclosure requirements are similar to the standard disclosure requirements, there are some differences, including the number of years of financial statements to be provided and the new Article 8 of Regulation S-X for smaller reporting companies.

Nonaccelerated Filer

.35 Although the term nonaccelerated filer is not defined specifically in the SEC rules, the SEC uses the term to refer to a reporting company that does not meet the Securities Exchange Act of 1934 Rule 12b-2 (17 CFR 240.12b-2) definition of either an accelerated filer, large accelerated filer, or smaller reporting company.

Small Business Issuer

.36 Prior to the issuance of the SEC Release No. 33-8876, Rule 12b-2 defined a small business issuer as an entity that meets the following criteria:

- Revenues of less than $25 million
- U.S. or Canadian issuer
- Not an investment company and not an asset-backed issuer; and if a majority owned subsidiary, the parent corporation is also a small business issuer
- Public float of less than $25 million

.37 Currently, the small business issuer definition is being phased out and is expected to be completely removed by March 15, 2009.

Smaller Reporting Company

.38 The smaller reporting company amendments recently adopted by the SEC, which became effective February 4, 2008, were intended to give smaller companies faster and easier access to capital when they need it or when market conditions are favorable. Specifically, the former small business issuer and nonaccelerated filer categories, to the extent feasible, were combined to create a new category called smaller reporting company. Companies that have less than $75 million in public float will now qualify as smaller reporting companies. Companies without a calculable public equity float will qualify if their revenues were less than $50 million in the last fiscal year. The definition of smaller reporting company effectively expands the number of companies that qualify for the scaled disclosure requirements previously available to small business issuers. At the date of this writing, the Federal Register provides the following definition of the new term smaller reporting company:

- An issuer that is not an investment company, an asset-backed issuer, or a majority-owned subsidiary of a parent that is not a smaller reporting company
- An issuer with public float of less than $75 million as of the last business day of its most recently completed second fiscal quarter
- An issuer that, in the case of an initial registration statement, had a public float of less than $75 million as of a date within 30 days of the date of filing the registration statement
- An issuer that, in the case where it does not have any public float, has annual revenues of less than $50 million during the most recently completed fiscal year for which audited financial statements are available

2 See footnote 1 in paragraph .06.
.39 Although there is considerable overlap between the definitions of a smaller reporting company and a nonaccelerated filer, the terms are not synonymous. For example, a company that has publicly issued a class of debt securities, but does not have a class of equity securities outstanding would be a nonaccelerated filer even though it may not meet the definition of a smaller reporting company. Many companies that are debt-only issuers, however, are subsidiaries of larger public companies that meet the definition of accelerated filer or large accelerated filer. Therefore, the SEC did not think it was necessary to make a distinction between these two categories for purposes of their latest rule, Internal Control Over Financial Reporting in Exchange Act Periodic Reports of Non-Accelerated Filers.

.40 It is also important to note that whether or not an issuer is a smaller reporting company is determined on an annual basis. It is therefore possible that a company’s status as a small reporting company could change from year to year. The SEC recently issued some questions and answers (Q&As) dealing with this particular issue, especially in light of current market conditions. These Q&As can be accessed at www.sec.gov/info/smallbus/src-cdinterps.htm. You can also access all of the definitions described in the preceding in the Federal Register.3

Government-Business Forum on Small Business Capital Formation

.41 The SEC hosts an annual forum that focuses on the capital formation concerns of small businesses. Called the SEC Government-Business Forum on Small Business Capital Formation, this gathering has assembled annually since 1982, as mandated by the Small Business Investment Incentive Act of 1980. A major purpose of the forum is to provide a platform for small businesses to highlight perceived unnecessary impediments to the capital-raising process. The SEC plans to host its 2008 Government-Business Forum on Small Business Capital Formation in the fall of 2008. Further information will be made available as plans are finalized, and can be found at www.sec.gov/info/smallbus/sbforum.shtml.

SEC Comment Letters

.42 The following are a list of common themes found in the latest SEC comment letters:

- Fair value—consideration of illiquidity in credit markets, as well as methodology and assumptions
- Hedge accounting—the shortcut method, as well as having adequate documentation at inception
- Impairments—methods and assumptions used, timing of the charge, and disclosures
- Contingencies—lack of disclosures
- Non-GAAP financial measures—a full income statement eliminating FASB Statement No. 123(R) effects
- Statement of cash flows—materiality and classification
- Business combinations—purchase price allocations
- Segment reporting—number of segments, as well as changes in segments
- Taxes—uncertain tax position disclosures, reasonable possible exposures within the next 12 months
- Purchase price allocations—identification of all intangible assets
- Earnings per share (EPS)—securities that could potentially dilute EPS
- MD&A—more transparent analysis needed
- Asset retirement obligations—details needed concerning why estimates could not be made
- Emerging Issues Task Force (EITF) Issue No. 00-19, “Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company’s Own Stock”—lack of disclosure of terms and its affect on accounting

3 See footnote 1 in paragraph .06.
• Critical accounting estimates
• Revenue policy disclosures—footnotes not consistent with other parts of the filing
• Pro forma disclosures—forecasts should not be included in pro forma information

Updates and further explanation of current SEC comment letters are discussed in the AICPA’s SEC Quarterly Update Webcast Series. Information on all SEC webcasts can be found at www.sec.gov/news/webcasts.shtml. Further information on these webcasts can be found in the “Resource Central” section near the end of this alert.

Interactive Data and XBRL Initiative

XBRL is an extensible markup language (XML) used to communicate financial and business data electronically. XBRL is being developed by an international nonprofit consortium with more than 450 member organizations, including accounting firms, software providers, financial intermediaries, academics, and technologists.

XBRL is used to “tag” financial statements so that the information in those statements is machine readable, thereby allowing users to analyze financial information more easily and quickly. To assist with the tagging process, XBRL US has currently developed more than 11,000 financial concepts that essentially represent a dictionary of U.S. GAAP and other financial reporting requirements.

On January 11, 2008, the SEC Advisory Committee on Improvement to Financial Reporting proposed that the SEC adopt a mandatory phase-in of XBRL for a specified time period, starting with the largest 500 domestic public reporting companies. On May 30, 2008, the SEC proposed amendments to require companies to provide their financial statements to the SEC in interactive data format using XBRL with a proposed three year phase-in schedule. The proposed rules would apply to both domestic and foreign companies using U.S. GAAP and then eventually apply to foreign private issuers using IFRS. Be sure to check the SEC’s Interactive Data link at www.sec.gov to view the current status of the project.

SEC Advisory Committee on Improvements to Financial Reporting

In June 2007, the SEC established the Advisory Committee on Improvements to Financial Reporting. This committee held its first meeting on August 2, 2007. The SEC has appointed 17 members representing investors, companies, and other entities within the securities markets. Five other people serve as official observers of the advisory committee, representing FASB, the Public Company Accounting Oversight Board (PCAOB), the U.S. Department of Treasury, IASB, and federal banking regulators. The advisory committee is examining the U.S. financial reporting system and providing recommendations about how to improve its usefulness for investors and reduce the unnecessary complexities for U.S. companies. More specifically, the advisory committee is exploring ways to redesign the financial reporting system to take advantage of interactive data and XBRL for financial reporting.

The SEC’s charter identifies the following more specific areas of inquiry for the advisory committee:
• The current approach to setting financial accounting and reporting standards, including (a) the principles-based versus rules-based standards; (b) the inclusion within standards of exceptions, bright lines, and safe harbors; and (c) the process for providing timely guidance on implementation issues and emerging issues
• The current process of regulating compliance with accounting and reporting standards
• The current system for delivering financial information to investors and accessing that information
• Other environmental factors that drive unnecessary complexity, including the possibility of being second-guessed, the structuring of transactions to achieve an accounting result, and whether there is hesitation by professionals to exercise professional judgment in the absence of detailed rules
• Whether there are current accounting and reporting standards that do not result in useful information to investors or impose costs that outweigh the resulting benefits
• Whether the growing use of international accounting standards has an effect on the relevant issues relating to complexity of U.S. accounting and reporting standards and the usefulness of the U.S. financial reporting system

.49 The advisory committee has held five meetings so far in 2008 and issued a draft final report in July 2008. In chapter 1 of the draft report, the committee discussed its work in the area of substantive complexity; namely, its proposals related to industry-specific guidance, alternative accounting policies, and approaches regarding the use of bright lines and the mixed attribute model.

.50 The committee is also welcoming feedback on its work from investors, registrants, auditors, and others. Comments can be submitted and additional information can be found at the committee’s Web site: www.sec.gov/about/offices/oca/acifr.shtml.

The SEC’s IFRS “Roadmap”

.51 The SEC has outlined several initiatives concerning the possible use of IFRS in the United States in the spotlight section of its Web site. This section provides information on the following topics and groups:
• SEC roundtable on IFRS held on August 4, 2008
• SEC roundtable on practical issues surrounding the use of IFRS in the United States in recent years, and the potential expanded use of IFRS in future years
• SEC roundtable on IFRS in the U.S. markets held on December 13, 2007
• Proposed rulemaking and request for public comments
• SEC staff roundtable on IFRS roadmap
• SEC press releases
• Staff review of financial statements prepared in accordance with IFRS
• Speeches and public statements

.52 This information can be accessed at www.sec.gov/spotlight/ifrsroadmap.htm.

PCAOB Developments

.53 The summaries that follow are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable rule or development. In addition, the information presented in this section does not encompass all of the recent issuances and activities of the PCAOB. See the PCAOB Web site at www.pcaob.org for complete information.

PCAOB Approved Rules and Standards

Rules for Succeeding to Registration Status of Predecessor Firm

.54 On July 29, 2008, the PCAOB adopted rules and a corresponding form that govern when a firm would be allowed to succeed to the registration status of a predecessor firm following a merger or other change in the registered firm’s legal form.

.55 Under Section 102(a) of Sarbanes-Oxley and PCAOB rules, a public accounting firm must be registered with the PCAOB in order to prepare or issue audit reports for public companies or to play a substantial role in the preparation or furnishing of such audit reports. To become registered, a public accounting firm files an application for registration on PCAOB Form 1, which the PCAOB may approve or
disapprove. The rules and form (PCAOB Form 4) adopted in July identify the circumstances in which the registration status of a registered firm may continue in effect even after the firm’s legal form has changed or the firm has combined with another firm, without the new legal entity needing to apply for registration on Form 1. The PCAOB release, along with the text of the rules and the instructions to Form 4, can be found at www.pcaob.org/Rules/Docket_020/index.aspx.

**PCAOB Auditing Standard No. 6, Evaluating Consistency of Financial Statements**

.56 In January 2008, the PCAOB adopted PCAOB Auditing Standard No. 6, which will become effective 60 days after SEC approval. This standard and its related amendments update the auditor’s responsibilities to evaluate and report on the consistency of a company’s financial statements and align the auditor’s responsibilities with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3. This standard also improves the auditor reporting requirements by requiring the auditor’s report to recognize a company’s correction of a material misstatement, regardless of whether it involves the application of an accounting principle. This standard also clarifies that the auditor’s report should indicate whether an adjustment to previously issued financial statements results from a change in accounting principle or the correction of a misstatement.

.57 The standard clarifies that the periods covered in the auditor’s evaluation of consistency depend on the periods covered by the auditor’s report on the financial statements. When the auditor reports only on the current period, he or she should evaluate whether the current period financial statements are consistent with those of the preceding period. When the auditor reports on two or more periods, he or she should evaluate consistency between such periods and the consistency of such periods with the period prior thereto if such prior period is presented within the financial statements being reported upon.4

.58 The standard also states that the auditor should evaluate and report on a change in accounting estimate affected by a change in accounting principle like other changes in accounting principle. In addition, the auditor should recognize a change in the reporting entity by including an explanatory paragraph in the auditor’s report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require recognition in the auditor’s report.

.59 The auditor should evaluate a change in accounting principle to determine whether

- the newly adopted accounting principle is GAAP.
- the method of accounting for the effect of the change is in conformity with GAAP.
- the disclosures related to the accounting change are adequate.
- the company has justified that the alternative accounting principle is preferable.

.60 The PCAOB also clarified that a change in classification in previously issued financial statements does not require recognition in the auditor’s report, unless the change represents the correction of a material misstatement or a change in accounting principle.

.61 In the same release, the PCAOB adopted several amendments to its interim standards relating to standards and interpretations of AU section 328, Auditing Fair Value Measurements and Disclosures; AU section 400, The First, Second, and Third Standards of Reporting; AU section 508, Reports on Audited Financial Statements; and AU section 561, Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended).

---

4 For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate the consistency between the two years on which he or she reports and between those years and the earliest year presented.
In these amendments, the PCAOB removed the GAAP hierarchy from its standards as it believes the hierarchy is more appropriately located in the accounting standards. These amendments do not change the principles in AU section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles* (AICPA, *PCAOB Standards and Related Rules*, PCAOB Standards, As Amended), for evaluating fair presentation of the financial statements in conformity with GAAP. FASB has issued FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, which has an effective date of 60 days following the SEC’s approval of the PCAOB amendments to AU section 411. The AICPA Auditing Standards Board (ASB) will coordinate the provisions and effective date of its associated exposure draft with the effective date of the FASB statement.

For more information on the status of this adopted standard and its associated amendments, please visit www.pcaob.org.

**Rules on Periodic Reporting by Registered Accounting Firms**

On June 10, 2008, the PCAOB adopted rules for annual and special reporting of information and events by accounting firms that are registered with the PCAOB. The reporting framework includes two types of reporting obligations. First, each registered firm must annually provide basic information about the firm and the firm’s issuer-related practice during the most recent 12 month period. Information to be reported annually includes, among other things, information about audit reports issued by the firm during the year, certain disciplinary history information about persons who have joined the firm, and information about fees billed to issuer audit clients, in various categories of services, as a percentage of the firm’s total fees billed.

Second, the rules and forms adopted by the PCAOB identify certain events that, if they occur with respect to a registered firm, must be reported by the firm within 30 days. These reportable events range from such things as a change in the firm’s name or contact information to the institution of certain types of legal, administrative, or disciplinary proceedings against a firm or certain categories of individuals.

The PCAOB will make each firm’s annual and special reports available to the public on the PCAOB’s Web site, subject to exceptions for information that satisfies specified criteria for confidential treatment.

The PCAOB has submitted the rules to the SEC for approval. The rules will take effect 60 days after SEC approval. Beginning then, firms will be subject to the special reporting obligations, with the earliest potential special reporting deadline for any firm being 90 days after SEC approval. For all firms, the first annual report will be due by June 30, 2009, for the 12 month period ending March 31, 2009. The full text of the rule, as well as copies of the new reporting forms, can be found at www.pcaobus.org/News_and_Events/News/2008/06-10.aspx.

**PCAOB Proposed Rules and Standards**

**Engagement Quality Review**

On February 26, 2008, the PCAOB proposed a new auditing standard that would supersede its interim concurring partner review requirement, and a conforming amendment to the PCAOB’s interim quality control standards. The proposed standard would apply to all engagements performed in accordance with the standards of the PCAOB.

In addition to requiring certain specified procedures, the proposed standard requires the engagement quality reviewer to assess whether there are areas within the engagement that pose a higher risk that the engagement team failed (1) to obtain sufficient competent evidence or (2) to reach an appropriate conclusion. In such areas, an engagement quality reviewer should evaluate whether the engagement team responded appropriately to the assessed risks, the judgments made were reasonable, and the results of the procedures performed support the engagement team’s overall conclusions.
In addition, the proposed standard includes a new requirement that the engagement quality reviewer must satisfy before providing concurring approval of issuance. Under the proposed standard, the reviewer must not provide concurring approval of issuance if he or she knows, or should know based upon the requirements of the standard, that the engagement team failed to obtain sufficient competent evidence, the engagement team’s overall conclusion or report is inappropriate, or the firm is not independent of its client. Concurring approval of issuance would be required before the firm could grant the client permission to use the engagement report (or communicate a conclusion to a client if no report is issued). The full text of the proposal can be found at www.pcaob.org/Rules/Docket_025/2008-02-26_Release_No_2008-002.pdf.

PCAOB Standing Advisory Group

The PCAOB Standing Advisory Group (SAG) is currently a 36 person panel representing the auditing profession, public companies, investors, and others charged with advising the PCAOB on the establishment of auditing and related professional practice standards. The SAG was established in April 2004 and meets approximately three times a year. Six organizations have been granted observer status at these meetings and include the following:

- FASB
- U.S. Government Accountability Office (GAO)
- International Auditing and Assurance Standards Board (IAASB)
- SEC
- U.S. Department of Labor
- AICPA ASB

The SAG meetings can be heard via webcast, and briefing papers can be accessed at www.pcaob.org/Standards/Standing_Advisory_Group/index.aspx. The following are summaries of the most recent meetings.

February 2008 SAG Meeting

On February 27, 2008, the SAG met to discuss the SEC’s proposal relating to judgments made by financial statement preparers and auditors, accounting firms and auditors’ responsibility to supervise, and global quality control practices. Additional details on each topic are noted in the following list:

- The SAG panel discussed the proposal of the SEC’s Advisory Committee on Improvements to Financial Reporting relating to accounting and auditing judgments. The panel discussed the objectives and elements of the proposal, as well as whether the SEC’s adoption of such a framework would have an effect on public companies’ audits and, if so, what effect.

- Accounting firms and auditors’ responsibility to supervise was also a focus of the group. SAG members were asked to consider whether the current auditing, quality control, and related professional practice standards include sufficient direction concerning the supervision of audit work.

- The SAG also held a panel discussion on global quality control practices. A panel of representatives from global audit networks discussed their quality control practices, including practices in the audits of financial statements prepared in accordance with IFRS. The main purpose of the panel was to foster discussion about global audit networks and their quality control practices to help determine what changes might be needed to be made to SEC Practice Section (SECPS) 1000.45, Appendix K—SECPS Member Firms With Foreign Associated Firms That Audit SEC Registrants (AICPA, PCAOB Standards and Related Rules), or other quality control standards.
October 2007 SAG Meeting

On October 18, 2007, the SAG met to discuss proposed standards setting activities and audit implications of IFRS in U.S. SEC filings. The SAG also heard a working paper presentation from the Office of Research and Analysis. A summary of the meeting is included in the following:

- The Office of the Chief Auditor (OCA) presented the PCAOB’s standards setting priorities. Topics include internal control, independence and principles of reporting, engagement quality review, risk assessment (which includes fraud risk assessment), fair value, the auditor’s use of specialists, related parties, confirmations, and an action plan for review of the PCAOB interim standards. The OCA noted that some of these topics will result in either proposed or final adopted standards or rules in the next 12 months.
- The SAG discussed both the SEC concept release and proposal related to the acceptance of financial statements prepared in accordance with IFRS.
- The working paper discussed was Changes in Market Responses to Financial Statement Restatement Announcements in the Sarbanes-Oxley Era. Specifically, the working paper addressed whether market responses have been different since the enactment of Sarbanes-Oxley, and if so, what were the changes.

The next SAG meeting will be held on October 22–23, 2008. Updated information related to this meeting, including an agenda, will be available at www.pcaob.org/Standards/Standing_Advisory_Group/index.aspx.

PCAOB Staff Audit Practice Alert on Fair Value

On December 10, 2007, the PCAOB issued Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. .02). The purpose of this practice alert is to remind auditors of their responsibilities for auditing fair value measurements of financial instruments and the use of the work of specialists under the existing standards of the PCAOB. The practice alert focuses on specific matters that are likely to increase audit risk related to the fair value of financial instruments in a rapidly changing economic environment. Although this practice alert focuses on fair value in general, it also draws the auditor’s attention to certain areas of the new fair value accounting standard, FASB Statement No. 157. It also addresses the auditor’s responsibilities when using the work of specialists. The practice alert is divided into four main sections:

- Auditing fair value measurements
- Classification within the fair value hierarchy under FASB Statement No. 157
- Using the work of specialists
- Use of a pricing service

The full text of the practice alert can be accessed at www.pcaob.org/Standards/Staff_Questions_and_Answers/2007/12-10_APA_2.pdf.

PCAOB Inspections

Inspection Frequency Rule

Section 404 of Sarbanes-Oxley requires the PCAOB to conduct inspections of registered public accounting firms. In the inspections, the PCAOB assesses compliance with Sarbanes-Oxley, the rules of the PCAOB, and the rules of the SEC and professional standards in connection with the firm’s performance of audits, issuance of audit reports, and related matters involving issuers. Sarbanes-Oxley requires the PCAOB to conduct those inspections annually for firms that provide audit reports for more than 100 issuers and at least triennially for firms that provide audit reports for fewer than 100 issuers.
The PCAOB makes portions of the inspection reports public, and they can be accessed at www.pcaob.org/Inspections/Public_Reports/index.aspx.

Guidance Regarding Implementation of PCAOB Rule 4012

On December 5, 2007, the PCAOB requested public comment on the proposed policy statement Guidance Regarding Implementation of PCAOB Rule 4012. Rule 4012, Inspections of Foreign Registered Public Accounting Firms, permits the PCAOB to rely on independent audit oversight entities located in the home countries of registered non-U.S. audit firms in connection with required inspections and identifies five broad principles that guide the PCAOB in making a reliance determination. Due to the evolution of auditor oversight throughout the world, the PCAOB is proposing to issue this policy statement, which would permit the PCAOB to place full reliance on the inspection programs of non-U.S. auditor oversight entities. The full text of the release can be found at www.pcaob.org/Inspections/Other/2007/12-05_Release_2007-011.pdf. In addition, all comments received to date regarding this release can be accessed at www.pcaob.org/Inspections/Other/2008/PCAOB_Rule_Comments.pdf.

Report on the PCAOB’s 2004, 2005, and 2006 Inspections of Domestic Triennially Inspected Firms

On October 27, 2007, the PCAOB issued a report discussing observations identified in the course of the PCAOB’s 2004, 2005, and 2006 inspections of registered U.S. firms that were subject to triennial PCAOB inspections. The report discusses areas of the audit where PCAOB inspectors have observed significant or frequent deficiencies in the first PCAOB inspections of triennial firms. The major areas where deficiencies were identified include the following:

- **Revenue.** Firms were found to have not performed any or adequate substantive procedures to test the existence, completeness, and valuation of revenue. They also failed to review representative contracts or appropriately evaluate the specific terms and provisions included in significant contracts. In addition, the PCAOB found issues with firms not testing whether revenue was recognized in the appropriate period. In some instances, the PCAOB also found firms relying on management representations with regards to revenue recognition without obtaining corroboration of those representations. Some firms also failed to address specific accounting pronouncements related to revenue recognition, including EITF Issue No. 99-19, “Reporting Revenue Gross as a Principal versus Net as an Agent”; FASB Statement No. 45, Accounting for Franchise Fee Revenue; and Statement of Position 97-2, Software Revenue Recognition (AICPA, Technical Practice Aids, ACC sec. 10,700).

- **Related party transactions.** Inspection teams have observed deficiencies related to firms’ failures to identify and address the lack of disclosure of related party transactions. They have also identified deficiencies relating to the effectiveness of firms’ testing of the nature, economic substance, and business purpose of transactions with related parties.

- **Equity transactions.** The most common deficiencies in this area relate to the failure of firms to evaluate whether issuer clients had appropriately determined the fair values assigned to equity-based transactions.

- **Business combinations and impairment of assets.** Inspection teams encountered numerous instances of firms’ failure to perform adequate audit procedures to test the allocation of the purchase price and the reasonableness of the estimated fair values assigned to the assets acquired. They also identified instances where firms failed to challenge issuers’ incorrect accounting, and performed inadequate procedures with regards to goodwill and other long-lived assets.

- **Going concern considerations.** The teams observed that some firms failed to perform, or perform adequately, audit procedures related to the entity’s ability to continue as a going concern. Some of these firms failed to identify or evaluate the significance of conditions that indicated an entity may not have been able to continue as a going concern, such as cumulative losses since inception, accumulated capital deficits, and negative working capital. Other firms identified conditions that could affect the issuer’s ability to continue as a going concern, but failed to evaluate management’s
plans to mitigate the effects of such conditions, or failed to obtain information about the likelihood that such plans could be implemented effectively. In addition, some firms failed to evaluate the adequacy of an entity’s disclosure of the going concern conditions and management’s plans to mitigate them.

- **Loans and accounts receivable (including allowance accounts).** In some cases, inspection teams noted that firms failed to circulate confirmation requests or obtain other evidence to assess the existence of accounts receivable. In other instances, firms circulated confirmation requests, but failed to perform sufficient, alternative procedures to address nonresponses or responses with exceptions. There were also instances where firms failed to perform sufficient procedures to conclude whether the allowance for loan losses was reasonable.

- **Service organizations.** The inspection teams observed deficiencies related to firms’ reliance on controls over the information provided by service organizations as well as firms’ use of information produced or processed by service organizations.

- **Use of other auditors.** Deficiencies in this area included firms reporting on the financial statements as principal auditor when their participation was not sufficient to enable them to serve in that capacity, as well as insufficient planning, supervision, review, and addressing of significant audit areas by the firms when other auditors were used as assistants.

- **Using the work of specialists.** Inspectors found instances where the firms failed to perform the necessary procedures with regard to specialists. These include (a) the failure to evaluate the relationship of the specialist to the issuer in circumstances where the specialist has other business relationships with the issuer or otherwise has a relationship that may have a bearing on the specialist’s objectivity; (b) the failure to obtain an understanding of the specialist’s methods and assumptions; or (c) the failure to make appropriate tests of the data the issuer provided to the specialist.

- **Independence.** Inspection teams found several ways in which firms have failed to comply with the SEC and PCAOB independence requirements. There were many instances where a firm’s system of quality control did not appear to provide sufficient assurances that the firm would make or document all required independence communications to its issuer audit client’s audit committee. In addition, the PCAOB found that some agreements between an auditor and its issuer client provided certain types of limits on the auditor’s potential liability, which impair auditor independence under the SEC rules.

- **Concurring partner review.** Some firms failed to ensure their concurring partner reviews were effective.

**PCAOB Accounting Support Fee and Funding Process**

.83 On April 28, 2008, the PCAOB updated its frequently asked questions (FAQs) regarding the accounting support fee and funding process. The statements contained in these FAQs are not rules of the PCAOB, nor have they been approved by the PCAOB. The entire release can be accessed at www.pcaob.org/Support_Fees/SupportFeeFAQ.pdf.

.84 The PCAOB also publishes a list of issuers with no outstanding or past due share of the accounting support fee. This list can be found at www.pcaob.org/Support_Fees/Issuers_Paid.pdf.

**PCAOB Independence Guidance**

*Ethics and Independence Rule 3526*

.85 On April 22, 2008, the PCAOB adopted Ethics and Independence Rule 3526, *Communication with Audit Committees Concerning Independence*, which, if approved by the SEC, would supersede the PCAOB’s interim
independence requirement, Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees, and two related interpretations. This rule requires a registered public accounting firm, before accepting an initial engagement, to describe in writing to the audit committee all relationships between the firm or any of its affiliates and the issuer that may reasonably be thought to bear on the firm’s independence. The PCAOB also adopted an amendment to Rule 3523, Tax Services for Persons in Financial Oversight Reporting Roles (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), to exclude from the scope of the rule tax services provided during the portion of the audit period that precedes the beginning of the professional engagement period. The full text of the rule can be found at www.pcaob.org/Rules/Docket_017/2008-04-22_Release_2008-003.pdf.

PCAOB Small Business Initiatives

Forum on Auditing in the Small Business Environment

.86 The series of forums on auditing in the small business environment is a program for registered accounting firms and public companies in the small business community to learn more about the work of the PCAOB, specifically the PCAOB inspections process and the effect of new auditing standards. The PCAOB began holding small business forums in 2004. Invited participants are auditors from smaller registered public accounting firms and directors and financial executives of smaller public companies. The program is limited to those groups in the small business environment that are most directly affected by the PCAOB’s oversight responsibilities. The goal of such a format is to ensure that there is ample opportunity for discussion of PCAOB issues facing small business communities between representatives of this sector and PCAOB members and its staff.

.87 The 2008 agenda will include a discussion of practical quality control policies and procedures, and evolving accounting and auditing issues. The discussions will also address the application of certain auditing standards and observations from the PCAOB’s disciplinary orders. In addition, the 2008 agenda will include a discussion of the implementation of PCAOB Auditing Standard No. 5, An Audit of Internal Control over Financial Reporting That is Integrated with an Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”). The next forum will be held in Chicago September 30–October 1, 2008.

Staff Guidance—Auditing Internal Control Over Financial Reporting for Smaller Public Companies

.88 On October 17, 2007, the PCAOB published for public comment staff guidance on internal control over financial reporting in smaller public companies. This guidance is a key component in the PCAOB’s effort to support the successful implementation of PCAOB Auditing Standard No. 5. The guidance demonstrates how auditors can apply the principles described in the standard and provides examples of approaches to particular audit issues that might arise in audits of smaller, less complex companies. Topics discussed in the staff guidance include the following:

• Entity-level controls
• Risk of management override
• Segregation of duties and alternative controls
• IT controls
• Financial reporting competencies
• Testing controls with less formal documentation

.89 The full text of the preliminary staff views can be found at www.pcaob.org/Standards/Standards_and_Related_Rules/AS5/Guidance.pdf. The CAQ also commented on the proposals and proposed some changes. For a copy of the CAQ comment letter, see http://thecaq.org/newsroom/pdfs/CAQ%20Comment%20Letter%20-%20PCAOB%20Small%20Audit%20Guidance.pdf.
Other PCAOB Initiatives

Implementing PCAOB Auditing Standard No. 5

.90 On March 31, 2008, a PCAOB board member gave a speech on the implementation of PCAOB Auditing Standard No. 5. This speech reiterated the four basic objectives of the standard, as follows:

- Focus auditors on controls that present the greatest risk that a material misstatement will not be prevented or detected
- Eliminate unnecessary procedures
- Make the audit scalable to the size and the complexity of the company
- Rewrite the standard to be shorter and more principles based

.91 The speech also emphasized the critical role that the 2008 inspection process will play in ensuring that PCAOB Auditing Standard No. 5 is being applied as intended by the standard. The inspection process is critical in determining how PCAOB Auditing Standard No. 5 translates into practice. In the speech, the board member stressed he does not want the inspection process to communicate the wrong message, and inspections leadership will therefore be implementing a sophisticated internal controls process to monitor concerns about internal control over financial reporting audits and to make sure that any comments issued to the firms are clear and consistent with the objectives of PCAOB Auditing Standard No. 5. In addition, the PCAOB board member reminded the audience that part of the switch from PCAOB Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements, to PCAOB Auditing Standard No. 5 was due to concern about restoring the balance between costs and benefits. Therefore, if auditors don’t take advantage of the opportunities for efficiency and the risk-focus in the new standard, the result is likely to be “needless cost and frustration for both companies and auditors.” The full text of the speech can be accessed at www.pcaob.org/News_and_Events/Events/2008/Speech/03-31_Goelzer.aspx.

SEC Speech at the AICPA National Conference on Current SEC and PCAOB Developments

.92 The chief auditor and director of professional standards of the PCAOB gave a speech at the annual AICPA conference on current SEC and PCAOB developments on December 10, 2007. The speech opened with a remark on the “death” of PCAOB Auditing Standard No. 2, and adoption of PCAOB Auditing Standard No. 5, as well as the anticipated benefits of the new standard. In addition, the speech addressed the globalization of professional standards and noted that in the coming year, the PCAOB will consider and seek additional views on whether there is a need for a set of globally accepted auditing standards, how the PCAOB should interact with other auditing standards setters, and how this should fit within the PCAOB’s other priorities. He pointed out that as a result of the standards setting process, there will likely be differences between the standards set by the PCAOB and the equivalent International Standards on Auditing (ISAs) set by the IAASB.

.93 The speech noted the importance of inspections and enforcement activities pointing out that the inspections of the implementation of PCAOB Auditing Standard No. 2 gave the PCAOB valuable information in the development of PCAOB Auditing Standard No. 5. During 2007, the PCAOB published three general reports concerning the procedures, findings, and results of its various inspections. The first report, issued in January 2007, contains observations about auditors’ implementation of auditing standards related to the auditor’s responsibility with regard to the consideration of fraud. The second report, issued in April 2007, contains observations on the second year implementation of PCAOB Auditing Standard No. 2. The final report, issued in October 2007, discusses observations identified in the first three years of inspecting U.S. registered public accounting firms that audit 100 or fewer issuers. The full text of the speech can be accessed at www.pcaob.org/News_and_Events/Events/2007/Speech/12-10_Ray.aspx.
Other Related Developments and Resources

Committee for Sponsoring Organizations of the Treadway Commission

.94 In June 2008, the Committee for Sponsoring Organizations of the Treadway Commission released a draft of its exposure document Guidance on Monitoring Internal Control Systems. The guidance is designed to help organizations monitor the quality of their internal control systems. The comment period for the exposure draft ended August 15, 2008. Further information can be found at www.coso.org/guidance.htm.

CAQ Developments and Alert Highlights

.95 The following are developments of the CAQ since the last edition of this alert. Additional information about the CAQ can be found in the “Resource Central” section of this alert.

U.S. Department of Treasury Study Analyzing the Increase in Public Company Restatements Between 1997 and 2006

.96 The U.S. Department of Treasury commissioned a study in October 2007 called The Changing Nature and Consequences of Public Company Financial Restatements, which was released April 9, 2008. The study examined the characteristics and consequences of financial statement restatements from violations of U.S. GAAP from 1997 to 2006. The study analyzed 6,633 restatements of financial results announced during the study period.

.97 In October 2007, the Treasury issued a press release announcing that numerous studies have pointed to a significant increase in the number of financial restatements during the past few years. Many of these studies attribute the growing number of misstatements to increased management and auditor focus on accurate financial reporting due to the mandates imposed by Sarbanes-Oxley, as well as greater enforcement and review by regulators. Some studies suggest that although some restatements are material, immaterial restatements might pose significant and unwarranted challenges to the capital markets.

.98 As a result, the Treasury commissioned a study to examine the factors triggering public company financial restatements, describe public company financial restatements, analyze the effect of public company financial restatements on investors and capital markets, and evaluate the significance of public company financial restatements.

.99 The following are some highlights of the study findings:

- Restatements during the study period grew nearly 18 fold from 90 in 1997 to 1,577 in 2006. The increase in restatements during this period was driven primarily by companies that do not trade on the major stock exchanges (New York Stock Exchange, American Stock Exchange, and NASDAQ). Nonexchange-listed companies accounted for only 23 percent of all restatements in 1997, but this figure increased to 62 percent by 2006.

- Restatement frequencies began to accelerate in 2001 due, in part, to the economic downturn at that time.

- On average, market reaction to restatements is negative throughout the study period, but, beginning in 2001, the magnitude of market reactions declined notably, which coincided with the number of restatements from 2001 to 2006.

- In certain years during the study period, restatement frequencies and market reactions were associated with several disparate factors, including overall market returns and volatility, regulatory activities, and changes in the mix of underlying accounting issues. With regard to shifts in underlying accounting issues, the study found that
— restatements related to fraud and those affecting revenue tended to have more negative market reactions. However, the percentages of both fraud and revenue restatements declined throughout the decade. Fraud is a factor in 29 percent of all 1997 restatements, but only 2 percent of 2006 restatements. The proportion of revenue restatements also decreased from 41 percent in 1997 to 11 percent in 2006.

— restatements related to accounting for nonoperating expenses, nonrecurring events, and reclassifications typically did not have discernibly negative market reactions. Together, these groups represent about 24 percent of all 1997 restatements, increasing to nearly half of all restatements by the end of the study period.

- During the study period, the average restating company increased in size, but remained similar to a comparison group of nonrestating companies. Companies of differing sizes tended to restate for different accounting issues, and several of the distinctions were consistent with expected variations in the activities of larger versus smaller companies.

- Restating companies were typically unprofitable even before the restatement. In the year prior to announcing a restatement, more than half of the restating companies reported a net loss.

**CAQ Briefing to Discuss Treasury Advisory Committee’s Recommendations for the Auditing Profession**

.101 The Treasury established the Advisory Committee on the Auditing Profession in 2007 to examine the sustainability of a strong and vibrant audit profession. The advisory committee has been holding public meetings since October 2007. More information on the advisory committee, as well as meeting agendas and minutes, can be found at www.treas.gov/offices/domestic-finance/acap/.

.102 On May 21, 2008, the CAQ presented a webinar to discuss its recommendations for the auditing profession. During the 90 minute live Web conference, speakers

- provided an overview and analysis of the Treasury advisory committee’s recommendations in the areas of human capital, firm structure and finances, and concentration and competition.

- explained how citizens can make their views known by submitting a comment to the committee.

- answered questions from the participants.

.103 Comments were due back to the committee by June 13, 2008. You can view the comments received at http://comments.treas.gov/index.cfm?FuseAction=Home.ViewList.

**Highlights of the GAO’s Updated Study on Consolidation and Competition of Public Accounting Firms**

.104 In January 2008, the GAO issued a report entitled Audits of Public Companies Continued Concentration in Audit Market for Large Public Companies Does Not Call for Immediate Action. This report is an update of the GAO’s initial report on the consolidation of public accounting firms, which was a study mandated by Congress under Section 701 of Sarbanes-Oxley. The GAO updated its study in its latest issuance of this report as part of a continued effort to assist Congress in reviewing concentration in the market for public company audits.

.105 The GAO concluded in its updated report that in light of limited evidence that the currently concentrated market for large public company audits has created significant adverse effects and the general lack of any proposals that were clearly seen as effective in addressing the risks of concentration or challenges facing smaller firms without serious drawbacks, they found no compelling need to take action. As a result, the report does not contain any recommendations.

Resource Central

.107 The following are various resources that practitioners may find beneficial.

Publications

.108 Practitioners may find the following publications useful with respect to accounting and auditing of public companies. Choose the format best for you—online, print, or CD ROM.

- **AICPA Comprehensive Audit Risk Alert—2008** (product no. 022339kk [paperback], WGE-XX [online], or DGE-XX [CD ROM])
- **Audit Risk Alert Independence and Ethics—2008** (product no. 022479kk [paperback], WIA-XX [online], or DIA-XX [CD ROM])
- **Audit and Accounting Manual** (2008) (product no. 005138kk [paperback], WAM-XX [online], or AAM-XX [loose leaf])
- **Accounting Trends & Techniques, 62nd Edition** (product no. 009900kk [paperback] or WAT-XX [online])
- **PCAOB Standards and Related Rules** (product no. 057208kk [paperback] or WPC-BX [online])

.109 Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

- **Financial Reporting Alert Current Accounting Issues and Risks—2008** (product no. 029208kk)
- **Financial Reporting Alert Not-for-Profit Organizations—Accounting Issues and Risks—2008** (product no. 029207kk)
- **Financial Reporting Alert FASB Codification Developments—2008** (product no. 029209kk)

AICPA reSOURCE: Accounting and Auditing Literature

.110 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.111 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- **AICPA’s Annual Accounting and Auditing Update Workshop** (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- **SEC Reporting** (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.
- **Annual Public Company Update: SEC, PCAOB, and AICPA Developments** (product no. 731884kk [text]). Identify recent SEC and PCAOB rules and guidance as well as other developments that affect filings or engagements for this reporting cycle.
With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

- The International Financial Reporting Standards: An Overview (product no. 157220 [online] or 739750HS [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

.112 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.113 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA’s flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some courses currently available related to SEC and PCAOB developments are the following:

- Current SEC and PCAOB Developments—Second Quarter 2008 (course ID kjj)
- SEC Reporting: The SEC and the Laws It Administers (course ID fge)
- SEC Reporting: The Key Rule (course ID fgc)
- 2008 Annual Update—Accounting & Auditing: On the Horizon—Issues for Audits of Public Entities (course ID kep)

.114 To register or learn more, visit www.cpa2biz.com.

Webcasts

.115 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.116 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting and budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.117 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.118 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.
Hotlines

Accounting and Auditing Technical Hotline

.119 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing+Accounting+Auditing+Technical+Help/.

Ethics Hotline

.120 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Annual Conference

.121 The AICPA sponsors an annual National Conference on Current SEC and PCAOB Developments in December each year. The three-day conference is designed to provide comprehensive SEC and PCAOB updates directly from the regulators. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Launches IFRS.com Web Site

.122 In May 2008, the AICPA launched a new Web site, www.ifrs.com, to provide current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

.123 Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

.124 The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, FAQs, articles, textbooks, CPE courses and live conference training, helpful links, and assistance for audit committee members.

SEC Research

.125 The SEC has posted two useful guides to its Web site. The first guide provides an overview of how to research the federal securities laws through the SEC Web site and has been provided by the SEC as a service to investors and members of the public. This guide can be accessed at www.sec.gov/investor/pubs/securitieslaws.htm. The second guide provides information on how to research public companies through Electronic Data Gathering Analysis and Retrieval (EDGAR) on the SEC Web site by providing tips and answers to FAQs. EDGAR provides free public access to corporate information and SEC filings. The guide states that to use EDGAR effectively, you should know which categories of information appear in which SEC filings and which search methods would work best. In addition, you should also understand the limitations of EDGAR, which this guide can help explain. This guide can be accessed at www.sec.gov/investor/pubs/edgarguide.htm.
The Center for Audit Quality

.126 The CAQ, which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.127 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

The CAQ SEC Regulations Committee

.128 The CAQ SEC Regulations Committee meets periodically with the staff of the SEC to discuss emerging technical accounting and reporting issues related to SEC rules and regulations. The mission of the SEC Regulations Committee is to protect investors by improving the quality of public company financial reporting by identifying, discussing, and facilitating resolution of issues relating to the promulgation, interpretation, and application of SEC rules, regulations, and policies with the assistance of the SEC staff, and communicating those matters publicly on a timely basis. You can view meeting agendas, highlights, and discussion documents at http://thecaq.org/resources/secregs.htm.

The International Practices Task Force

.129 The International Practices Task Force (IPTF) is a task force of the CAQ SEC Regulations Committee. IPTF also meets periodically with the staff of the SEC to discuss and focus on international emerging technical accounting and reporting issues related to SEC rules and regulations. The mission of the IPTF is to protect investors by improving the quality of public company financial reporting by identifying, discussing, and facilitating resolution of issues relating to the promulgation, interpretation, and application of SEC rules, regulations, and policies with the assistance of the SEC staff, and communicating those matters publicly on a timely basis. Meeting highlights, agendas, and discussion papers can be accessed at http://thecaq.org/resources/iptf.htm.

Understanding the New Auditing Standards Related to Risk Assessment

NOTICE TO READERS
UNDERSTANDING THE NEW AUDITING STANDARDS RELATED TO RISK ASSESSMENT

This Audit Risk Alert is intended to provide auditors with an overview of the new risk assessment standards to be used in the planning and performance of a financial statement audit.

This publication is an Other Auditing Publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an Other Auditing Publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Written by Michael J. Ramos, CPA
Edited by Lori L. Pombo, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA Accounting and Auditing Publications staff express our special thanks to Hiram Hasty, CPA, who made extensive contributions to this publication. His knowledge of the risk assessment standards and auditing in general was invaluable. In addition, the staff expresses our thanks to Chuck Landes, CPA, for his indispensable review of this publication and to Lyn Graham, CPA, for working closely with the author on key aspects of the risk assessment standards.

Introduction

.01 This audit Alert provides a summary of eight Statements on Auditing Standards (SASs) that provide extensive guidance on how you should apply the audit risk model in the planning and performance of a financial statement audit. These SASs were issued in March 2006 and become effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted. While the time period between the issuance and effective date of the standards may seem long, you should not underestimate the standards’ significance and the far-reaching effect they will have on your audits.

.02 The eight SASs consist of:

1 Statements on Auditing Standards issued by the Auditing Standard Board are applicable to audits of privately held entities and other nonissuers. The term issuer means entities that are subject to the rules and regulations of the U.S. Securities and Exchange Commission and the Sarbanes-Oxley Act of 2002.
The Auditing Standards Board (ASB) believes that the SASs represent a significant strengthening of auditing standards that will improve the quality and effectiveness of audits. The primary objective of the SASs is to enhance your application of the audit risk model in practice by requiring, among other things:

- A more in-depth understanding of your audit client and its environment, including its internal control. This knowledge will be used to identify the risk of material misstatement in the financial statements (whether caused by error or fraud) and what the client is doing to mitigate them.
- A more rigorous assessment of the risk of material misstatement of the financial statements based on that understanding.
- Improved linkage between the assessed risks and the nature, timing, and extent of audit procedures performed in response to those risks.

The development of these SASs was undertaken in response to recommendations to the ASB made by the former Public Oversight Board’s Panel on Audit Effectiveness. In addition, the major corporate failures of the past several years have undermined the public’s confidence in the effectiveness of audits and led to an intense scrutiny of the work of auditors, and the development of the SASs also have been influenced by these events.

How the Risk Assessment Standards Affect Current Practice

The SASs incorporate many of the underlying concepts and detailed performance requirements that exist in the current standards. However, the SASs do create significant new requirements for auditors.

In most cases, implementation of the SASs will result in an overall increased work effort by the audit team. It also is anticipated that, to implement the SASs appropriately, many firms will have to make significant revisions to their audit methodologies and train their personnel accordingly. To ease the implementation process, it is recommended that firms adopt at least some of the provisions of the standards in advance of the required implementation date.

How This Alert Is Organized

This Alert is organized into three different parts.

- Part One: Key Provisions of the SASs and How They Differ From Current Standards. This part provides a summary of some of the key provisions of the SASs and how they differ, if at all, from current audit standards.
Part One: Key Provisions of the SASs and How They Differ From Current Standards

This section discusses the key provisions of each of the SASs and provides a summary of how each of the SASs differs, if at all, from the current AICPA generally accepted audit standards.

SAS No. 104, Amendment to Statement on Auditing Standards No. 1, Codification of Auditing Standards and Procedures (“Due Professional Care in the Performance of Work”)

SAS No. 105, Amendment to Statement on Auditing Standards No. 95, Generally Accepted Auditing Standards

<table>
<thead>
<tr>
<th>Key Provisions</th>
<th>How the SAS Differs From Current Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>• SAS No. 104 defines reasonable assurance as a “high level of assurance.”</td>
<td>• SAS No. 104 clarifies the meaning of reasonable assurance.</td>
</tr>
</tbody>
</table>

• Previous guidance considered the understanding of the entity to be a part of audit planning, and emphasized that the understanding of internal control also was primarily part of audit planning.

• By stating that the purpose of your understanding of the entity and its internal control is part of assessing the risk of material misstatement, SAS No. 105 essentially considers this understanding to provide audit evidence that ultimately supports your opinion on the financial statements.

• The new standard emphasizes the link between understanding the entity, assessing risks, and the design of further audit procedures. It is anticipated that “generic” audit programs will not be an appropriate response for all engagements because risks vary between entities.
Key Provisions | How the SAS Differs From Current Standards
--- | ---
| The term *further audit procedures*, which consists of test of controls and substantive tests, replaces the term *tests to be performed* in recognition that risk assessment procedures are also performed.
| The term *audit evidence* replaces the term *evidential matter*.

SAS No. 106, *Audit Evidence* .11

<table>
<thead>
<tr>
<th>Key Provisions</th>
<th>How the SAS Differs From Current Standards</th>
</tr>
</thead>
</table>
| SAS No. 106 defines *audit evidence* as “all the information used by the auditor in arriving at the conclusions on which the audit opinion is based.” | Previous guidance did not define audit evidence.
SAS No. 106 also describes basic concepts of audit evidence.
The term *sufficient, appropriate audit evidence*, defined in SAS No. 106, replaces the term *sufficient, competent evidence*.
| SAS No. 106 recategorizes assertions by classes of transactions, account balances, and presentation and disclosure; expands the guidance related to presentation and disclosure; and describes how the auditor uses relevant assertions to assess risk and design audit procedures. | SAS No. 106 recategorizes assertions to add clarity.
*Assertion relating to presentation and disclosure* has been expanded and includes a new assertion that information in disclosures should be “expressed clearly” (understandability).
| SAS No. 106 defines *relevant assertions* as those assertions that have a meaningful bearing on whether the account is fairly stated. | The term *relevant assertions* is new, and it is used repeatedly throughout SAS No. 106.
| SAS No. 106 provides additional guidance on the reliability of various kinds of audit evidence. | The previous standard included a discussion of the competence of evidential matter and how different types of audit evidence may provide more or less valid evidence. SAS No. 106 expands on this guidance.
| SAS No. 106 identifies “risk assessment procedures” as audit procedures performed on all audits to obtain an understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement at the financial statement and relevant assertion levels. | SAS No. 106 introduces the concept of risk assessment procedures, which are necessary to provide a basis for assessing the risk of material misstatement. The results of risk assessment procedures, along with the results of further audit procedures, provide audit evidence that ultimately supports the auditor’s opinion on the financial statements.
| SAS No. 106 provides that evidence obtained by performing risk assessment procedures, as well as that obtained by performing tests of controls and substantive procedures, is part of the... | (continued)
Key Provisions | How the SAS Differs From Current Standards

evidence the auditor obtains to draw reasonable conclusions on which to base the audit opinion, although such evidence is not sufficient in and of itself to support the audit opinion. | • Risk assessment procedures include:
--- |
| SAS No. 106 describes the types of audit procedures that the auditor may use alone or in combination as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor. | • Inquiries of management and others within the entity
--- |
| SAS No. 106 includes guidance on the uses and limitations of inquiry as an audit procedure. | • Observation and inspection
--- |

SAS No. 106, *Audit Risk and Materiality in Conducting an Audit*

| Key Provisions | How the SAS Differs From Current Standards
--- | ---
• The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of: 1. Determining the extent and nature of risk assessment procedures. 2. Identifying and assessing the risk of material misstatement. 3. Determining the nature, timing, and extent of further audit procedures. 4. Evaluating whether the financial statements taken as a whole are presented fairly, in conformity with generally accepted accounting principles. | • Previous guidance said that auditors “should consider” audit risk and materiality for certain specified purposes. SASs state that the auditor “must” consider.
--- |
• Combined assessment of inherent and control risks is termed the risk of material misstatement. | • New guidance explicitly states that audit risk and materiality are used to identify and assess the risk of material misstatement.
--- |
• The auditor should assess the risk of material misstatement as a basis for further audit procedures. Although that risk assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. | • SAS No. 107 consistently uses the term *risks of material misstatement*, which often is described as a combined assessment of inherent and control risk. However, auditors may make separate assessment of inherent risk and control risks.
--- |
• SAS No. 107 states that the auditor should have and document an appropriate basis for the audit approach.
--- |
• These two provisions of the risk assessment standards effectively eliminate the ability of the auditor to assess control risk “at the maximum”
Key Provisions | How the SAS Differs From Current Standards
---|---
• Assessed risks and the basis for those assessments should be documented. | without having a basis for that assessment. In other words, you can no longer “default” to maximum control risk.

• The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management. | • SAS No. 107 provides additional guidance on communicating misstatements to management.
• SAS No. 107 provides additional specific guidance on how to determine this threshold.

• The auditor should request management to respond appropriately when misstatements (known or likely) are identified during the audit. | • SAS No. 107 provides specific guidance regarding the appropriate auditor’s responses to the types of misstatements (known or likely) identified by the auditor.

**SAS No. 108, Planning and Supervision**

</thead>
<tbody>
<tr>
<td>● SAS No. 111 provides guidance relating to the auditor’s judgment about establishing tolerable misstatement for a specific audit procedure and on the application of sampling to tests of controls.</td>
<td>● SAS No. 111 provides enhanced guidance on tolerable misstatement. In general, tolerable misstatement in an account should be less than materiality to allow for aggregation in final assessment.</td>
</tr>
</tbody>
</table>

Part Two: Fundamental Concepts

The SASs describe a process for applying the audit risk model to gather audit evidence and form an opinion about your client’s financial statements. To apply this process appropriately, you will need to have a working knowledge of the key concepts upon which it is built. Those concepts include the following.

● The meaning of reasonable assurance
● Audit risk and the risk of material misstatement
● Materiality and tolerable misstatement
● Financial statement assertions
● Internal control
● Information technology
● Audit evidence

This part of the Alert provides a summary of these key concepts and a description of how they are used.

Reasonable Assurance

The auditing standards make numerous references to your responsibility for obtaining “reasonable assurance.” For example, your audit opinion states that generally accepted auditing standards require you to “obtain reasonable assurance about whether the financial statements are free of material misstatement.” “Reasonable assurance” is the fundamental threshold you use to design and perform your audit procedures. For this reason, it is important that you have a working knowledge of the term.
SAS No. 104 clarifies that reasonable assurance is a high, but not absolute, level of assurance. Put another way, you must plan and perform your audit in such a way to obtain sufficient appropriate audit evidence to reduce audit risk to a low level. Although “reasonable assurance” is a high level of assurance, it is not absolute assurance. Absolute level of assurance is not attainable because an auditor does not examine 100 percent of the entity’s transactions or events and because of the limitations of the entity’s internal control.

Audit Risk and the Risk of Material Misstatement

Audit risk (AR) is the risk that the financial statements are materially misstated and you fail to detect such a misstatement or appropriately modify your opinion. You should perform your audit to reduce audit risk to a low level. You need to consider audit risk at all stages of your audit.

Audit risk is a function of two components:

1. Risk of material misstatement (RMM), which is the risk that an account or disclosure item contains a material misstatement. The risk of material misstatement is a combination of inherent and control risk.
2. Detection risk, which is the risk that you will not detect such misstatements in an account or disclosure item.

Reducing audit risk to a low level requires you to:

1. Assess the risk of material misstatement.
2. Based on that assessment, design and perform further audit procedures to reduce audit risk to an appropriate low level.

Assessing the Risk of Material Misstatement

The risk of material misstatement exists independently of detection risk. Many factors affect the risk of material misstatement, including the following.

- The client’s industry, its regulatory environment, and other external factors
- The nature of the entity, for example, its operations, ownership, and financing
- The client’s objectives, strategies, and related business risks
- How client management measures and reviews the company’s financial performance
- The client’s internal control, which includes the selection and application of accounting policies

Thus, the first step in assessing the risk of material misstatement is to gather information and gain an understanding of these and other items that create risks. Part Three of this Alert describes an audit process that begins with your gaining an understanding of these matters.

The risk of material misstatement may reside at either the financial statement level or the assertion level.

- Financial statement-level risks potentially affect many different assertions. For example, a lack of qualified personnel in financial reporting roles (an element of the client’s control environment) may affect many different accounts and several assertions.
- Assertion-level risks are limited to a single assertion, for example, the valuation of inventory or the occurrence of sales.
Your response to assessed risks will differ depending on whether they reside at the financial statement or assertion level.

- Financial statement-level risks typically require an overall response, such as providing more supervision to the engagement team or incorporating additional elements of unpredictability in the selection of your audit procedures.
- Assertion-level risks are addressed by the nature, timing, and extent of further audit procedures.

For this reason, you should assess the risk of material misstatement at both the financial statement and the assertion level.

Your assessment of the risk of material misstatement (at both the financial statement and the assertion level) should be directly linked to the design and performance of further audit procedures. For example, if your understanding of the client, its environment, and its internal control lead you to assess that there is a high inherent risk that inventory quantities could be misstated, you would design tailored further audit procedures to specifically respond to that risk.

To perform audit procedures that are appropriately responsive to your assessed risks, you should define these risks in a way that incorporates the unique circumstances at the client. Generic checklists and standard audit programs may serve as a starting point for helping you to understand and assess risk, but to be truly effective, these generic audit tools need to be tailored to the specific circumstances of your client.

The process for applying the audit risk model, which is summarized in Part Three of this Alert, describes in more detail how you should link your assessment of risk to the design and performance of further audit procedures.

Risks of Material Misstatement at the Assertion Level. At the assertion level, the risk of material misstatement consists of two components:

- Inherent risk (IR), which is the susceptibility of an assertion to a material misstatement, assuming that there are no related controls. Inherent risk is greater for some assertions and related account balances, classes of transactions, and disclosures than for others.
- Control risk (CR), which is the risk that a material misstatement that could occur in an assertion will not be prevented or detected on a timely basis by the client’s internal control. Control risk is a function of the effectiveness of the design and operation of the client’s internal control.

Detection Risk

Detection risk is the risk that you will not detect a material misstatement that exists in an assertion. It is a function of the nature, timing, and effectiveness of audit procedures and how you apply them.

Detection risk relates to your substantive audit procedures and is managed by how you respond to the risk of material misstatement at both the financial statement and the assertion level.

- Financial statement-level risks. Your responses to financial statement-level risks may include assignment of more experienced personnel to the engagement team, emphasizing of the application of professional skepticism, and providing more supervision and review of the audit work performed. Appropriate choices related to these matters will help you mitigate the risks that you might select an inappropriate audit procedure, misapply audit procedures, or misinterpret the results.
- Assertion-level risks. In response to assertion-level risks you will determine the nature, timing, and extent of your further audit procedures that are appropriate to respond to the assessed risk.

Thus, the effectiveness of further audit procedures depends on whether you have:
1. Acquired a sufficient depth and breadth of understanding of your client to make an informed assessment of the risk of material misstatements.

2. Used your assessment of the risks of material misstatement to drive the nature, timing, and extent of your further audit procedures.

An Inverse Relationship Between the Risk of Material Misstatement and Detection Risk. At the assertion level, detection risk has an inverse relationship to the risk of material misstatement. The greater the risk of material misstatement, the less the detection risk that you should be willing to accept. Put another way, the greater the risk of material misstatement, the more reliable your substantive tests should be.

Conversely, when the risk of material misstatement is low, you can accept a greater level of detection risk. However, you are always required to perform substantive tests on all relevant assertions related to each material account balance, class of transactions, and disclosure, regardless of your assessment of the risk of material misstatement.

The model AR = RMM x DR expresses the general relationship of audit risk and its components. You may find this model useful when planning appropriate risk levels for your audit procedures, keeping in mind your overall desire to reduce audit risk to an appropriate low level.

Materiality and Tolerable Misstatement

The Concept of Materiality

The concept of materiality recognizes that some matters are more important for the fair presentation of the financial statements than are others. In performing your audit, you are concerned with matters that could be material to the financial statements. Your responsibility is to plan and perform the audit to obtain reasonable assurance that material misstatements, whether caused by error or fraud, are detected.

Financial Accounting Standards Board Statement of Financial Accounting Concepts No. 2, Qualitative Characteristics of Accounting Information, defines materiality as “the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed by the omission or misstatement.” Thus, materiality is influenced by your perception of the needs of financial statement users who will rely on the financial statements to make judgments about your client’s financial position and results of operations.

How Materiality Is Used in Your Audit

Though defined by the accounting literature, materiality also is an audit concept of critical importance. Audit materiality represents the maximum amount that you believe the financial statements could be misstated and still fairly present the client’s financial position and results of operations. Audit materiality affects:

1. The nature, timing, and extent of audit procedures. During audit planning, you should determine a materiality level for the financial statements taken as a whole. This initial determination of materiality will help you:
   — Make judgments when identifying and assessing the risk of material misstatement
   — Determine the nature, timing, and extent of your further audit procedures
2. The evaluation of audit findings. To form an opinion about the financial statements, you must evaluate audit findings and determine whether the misstatements that are not corrected by the client, individually or in the aggregate, are material to the financial statements.

Quantitative and Qualitative Considerations

.39 Although materiality commonly is expressed in quantitative terms, your determination of materiality is a matter of professional judgment that includes both quantitative and qualitative considerations. During the course of your audit, you should be alert for misstatements that could be qualitatively material. However, it ordinarily is not practical to design audit procedures to detect misstatements that qualitatively are material, and for that reason, materiality used for planning purposes considers primarily quantitative matters.

Tolerable Misstatement

.40 During audit planning you must determine an initial level of materiality for the purposes of designing and performing your audit procedures. This initial determination of materiality is determined for the financial statements taken as a whole. However, in designing your audit procedures, you should take into account the possibility that several misstatements of amounts less than financial statement materiality could—in the aggregate—result in a material misstatement of the financial statements. That is, errors in an account or disclosure may still exist and your audit procedures may fail to detect them. For that reason, you need to allow for these undetected misstatements that may exist. You build this allowance into the overall audit strategy process by setting tolerable misstatement.

.41 Tolerable misstatement (also referred to as tolerable error) is defined as the maximum error in a population (for example, the class of transactions or account balance) that you are willing to accept. Tolerable misstatement normally is lower than materiality for the financial statements as a whole. For each class of transactions, account balance, and disclosure, you should determine at least one level of tolerable misstatement.

.42 For example, if for planning purposes you determined materiality to be $100,000, you could set tolerable misstatement at $60,000. Then, you would use this tolerable misstatement level to determine the nature, timing, and extent of your further audit procedures. You could use different levels of tolerable misstatement for other account balances, classes of transactions, or assertions. See AU section 350, Audit Sampling, of volume 1 of the AICPA Professional Standards for more guidance about tolerable misstatement.

Financial Statement Assertions

Why Financial Statement Assertions Are Important

.43 Your audit results in an opinion of the financial statements taken as a whole. However, to reach this opinion of the financial statements, most of your audit procedures should be directed at a much more detailed level, the assertion level.

.44 Assertions are management’s implicit or explicit representations regarding the recognition, measurement, presentation, and disclosure of information in the financial statements and related disclosures. Assertions fall into three categories: (1) classes of transactions, (2) account balances, and (3) presentation and disclosure.

.45 For example, by presenting the information “Cash . . . $XXX” in the financial statements, management implies that:
- The cash truly exists and company has the right to use it.
- The amount presented represents all the company’s cash.
- The amount presented is accurate.

.46 Many of your audit procedures are performed not on the financial statements taken as a whole nor even at the account or disclosure level, but rather, they are directed at individual assertions.

.47 Relating identified risks of material misstatement to misstatements that might occur at the assertion level is necessary for you to properly link assessed risks to further audit procedures.

.48 The table titled “Categories of Assertions” provides a summary of how assertions might be grouped into various categories. You may express these assertions differently, as long as your descriptions encompass all the aspects described in the table.

<table>
<thead>
<tr>
<th>Categories of Assertions</th>
<th>Description of Assertions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Classes of Transactions and Events During the Period</td>
<td>Account Balances at the End of the Period</td>
</tr>
<tr>
<td>Occurrence/Existence</td>
<td>Transactions and events that have been recorded have occurred and pertain to the entity.</td>
</tr>
<tr>
<td>Rights and Obligations</td>
<td>—</td>
</tr>
<tr>
<td>Completeness</td>
<td>All transactions and events that should have been recorded have been recorded.</td>
</tr>
<tr>
<td>Accuracy/Valuation and Allocation</td>
<td>Amounts and other data relating to recorded transactions and events have been recorded appropriately.</td>
</tr>
<tr>
<td>Cut-off</td>
<td>Transactions and events have been recorded in the correct accounting period.</td>
</tr>
<tr>
<td>Classification and Understandability</td>
<td>Transactions and events have been recorded in the proper accounts.</td>
</tr>
</tbody>
</table>

**How You Use Assertions in Your Audit**

.49 Most of your tests of controls and substantive audit procedures are directed at specific assertions. For example, confirmation of receivables provides strong, direct evidence about the existence of those receivables.
and it may provide some evidence about accuracy of the gross balance. However, confirmations alone are not sufficient appropriate audit evidence to test the valuation of receivables, and the auditor should perform other appropriate procedures, such as looking at subsequent cash receipts and applying analytical procedures in testing the allowance for doubtful accounts. For this reason, to establish a clear link between your assessment of the risk of material misstatement and further audit procedures, your risk assessment procedures should be performed at the assertion level as well.

Internal Control

Definition and Description of Internal Control

.50 Internal control is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity’s objectives. These objectives fall into three categories: financial reporting, operations, and compliance with laws and regulations. In general, when performing a financial statement audit, you are most concerned with the client’s financial reporting objectives, which relate to the preparation of audited financial statements.

.51 In trying to achieve its objectives, your client faces certain risks. Internal control helps the entity achieve its objectives by mitigating the risk of “what can go wrong” in the pursuit of its objectives. Thus, there is a direct link between the entity’s objectives, the risks to achieving those objectives, and internal control. Your assessment of internal control is a consideration of whether the controls mitigate financial reporting risks.

.52 Internal control consists of five interrelated components:

1. Control environment sets the tone of an organization, influencing the control-consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

2. Entity’s risk assessment is the entity’s identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.

3. Information and communication systems support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.

4. Control activities are the policies and procedures that help ensure that management directives are carried out.

5. Monitoring is a process that assesses the quality of internal control performance over time.

.53 This division of internal control into five components provides a useful framework for you to consider how different aspects of your client’s internal control may affect your audit. You are not required to classify controls into a particular component. Rather, your understanding of internal control involves determining whether and how a specific control may prevent or detect and correct material misstatements.

Controls May Be Pervasive to the Entity or Restricted to an Account or Assertion

.54 Your client’s financial reporting risks (and therefore its controls) may relate to one of the following:

1. To specific classes of transactions, account balances, and disclosures

2. More pervasively to the financial statements taken as a whole (And potentially the risks may affect many assertions.)
For example, a weak control environment potentially affects many assertions and therefore is considered to operate at the financial statement level. In contrast, a control to ensure that all valid purchases are captured and recorded is restricted to specific accounts and classes of transactions and thus operates at the assertion level.

Understanding whether a control is restricted to specific classes of transactions, account balances, or disclosures or pertains pervasively to the financial statements will help you:

1. Design appropriate audit procedures to obtain information about the design of the control and whether it has been placed in operation
2. Assess the risk of material misstatement in the financial statements
3. Design substantive audit procedures
4. Assess the results of the tests of operating effectiveness of controls, if any

**Control Design**

The evaluation of internal control design involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements.

On every audit you should evaluate the design of internal control and determine whether controls have been implemented over all relevant assertions related to each material account balance, class of transactions, or disclosures.

**Control Operations**

The concept of the effective operation of controls is different from their design and implementation. The operating effectiveness of controls involves the consideration of:

- How controls were applied during the audit period
- The consistency with which they were applied
- By whom they were applied

To assess the operating effectiveness of controls, you should perform tests of controls. Unlike the evaluation of control design, tests of controls are not required on every audit, only on those audits where the auditor’s risk assessment procedures includes an expectation that the controls will be effective or when substantive procedures alone do not provide sufficient audit evidence at the assertion level.

**Information Technology**

Your understanding of the client and its environment, including its internal control, includes an understanding of how it uses information technology (IT). A client’s use of IT may affect any of the five components of internal control relevant to the achievement of the entity’s financial reporting, operations, compliance objectives, and its operating units or business functions. Examples in which IT affects the entity and its environment are as follows.

- *External factors.* For example, technological innovations may have lowered the barriers to entry into the client’s industry, which in turn increases competition not only for customers, but perhaps also for raw materials or qualified personnel.
• **Client operations.** For example, your client’s manufacturing process may rely more on manual processes and less on technology than its competitors. Consequently, your client’s financial and nonfinancial ratios will differ from others in the industry.

• **Objectives, strategies, and business risks.** For example, your not-for-profit client’s innovative use of technology may allow it to raise contributions from groups of supporters who otherwise would not contribute to the organization.

• **Measurement and review of the client’s financial performance.** For example, management frequently relies on information produced by the company’s IT processing system to measure and review the company’s financial performance. Management’s ability to make decisions appropriately may rely on the accuracy, availability, and timeliness of the information processed by the IT system.

.62 The way in which IT is deployed may vary among entities. For example, your client may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, other entities in the same industry may have complex, highly integrated systems that share data and that are used to support all aspects of the company.

**Implications of IT on Your Understanding of Internal Control**

.63 The nature and characteristics of your client’s use of IT in its financial information system affect its internal control. For example:

• Multiple users may access a common database of information. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data.

• When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This breakdown could result in unauthorized transactions or changes to programs or data that affect the financial statements.

.64 **General vs. IT Application Controls.** IT general computer controls are polices and procedures that relate to many applications and support the effective functioning and continued proper operation of information systems. For example, your client’s administration of passwords can potentially affect many applications. If passwords for a given user can be stored on that person’s computer, the effectiveness of internal control may be compromised because anyone who gained access to the computer could inappropriately gain access to the application, the related data, or both.

.65 Other IT controls are applied only to specific applications, for example accounts payable, payroll, or the general accounting application. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and performing manual follow-ups of exception reports.

**How the Client’s Use of IT Affects Audit Planning**

.66 The use of professionals possessing IT skills is a significant aspect of many audit engagements. An IT professional may help:

• Determine the effect of IT on the audit

• Identify and assess IT risks
- Understand IT controls
- Design and perform tests of IT controls or substantive procedures

.67 In determining whether an IT professional is needed on the audit team, you should consider factors such as the following:

- The complexity of the entity’s systems and IT controls and the manner in which they are used in conducting the entity’s business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity’s participation in electronic commerce
- The entity’s use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.68 Audit procedures that you may assign to a professional possessing IT skills include:

- Inquiring of the client’s IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed
- Inspecting systems documentation
- Observing the operation of IT controls
- Planning and performing tests of IT controls

.69 If the use of an IT professional is planned, you should determine whether that professional is effectively functioning as a member of the audit team. If such a professional is part of your audit team, your responsibilities with respect to that professional are equivalent to those for other assistants. In such circumstances, you should have sufficient knowledge of IT matters to:

1. Communicate the objectives of the IT professional’s work
2. Evaluate whether the specified audit procedures will meet your objectives
3. Evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures

Audit Evidence

The Nature of Audit Evidence

.70 Audit evidence is all the information you use to arrive at the conclusions that support your audit opinion. Audit evidence is cumulative in nature. For example, your evidence regarding payables begins with you performing risk assessment procedures relating to the client and its environment, including its internal control. These risk assessment procedures provide audit evidence to support your conclusion about the risk of material misstatement for payables. Based on this risk assessment, you then perform further audit procedures, which include substantive tests and may include tests of controls. The results of these further audit procedures provide audit evidence that, when considered in conjunction with the evidence from risk
assessment procedures, allow you to form a supportable conclusion about payables. You then repeat this process for other accounts, classes of transactions, and disclosures, and the aggregation of your conclusions provides a basis for your opinion on the financial statements taken as a whole.

.71 The procedures that you perform on your audit provide audit evidence, but they are not the only source of audit evidence. For example, previous audits and your firm’s client acceptance and continuance procedures also may be sources of audit evidence.

.72 To determine whether you have obtained persuasive audit evidence, you should consider:

- The consistency of that evidence
- Whether the evidence was obtained from different sources or the performance of procedures that were of a different nature

.73 A lack of consistency among individual items of audit evidence may indicate that one of the items is not reliable. For example, in a not-for-profit entity, the board of trustees' minutes reported that all of the contributions received during the year were unrestricted, but some of the donor agreements examined by you stated that the contributions are temporarily restricted. When audit evidence obtained from one source is inconsistent with that obtained from another, you should determine what additional audit procedures are necessary to resolve the inconsistency.

.74 Ordinarily, you obtain more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of evidence considered individually. For example, reading minutes of the board and other documentation and making inquiries of several individuals about matters included in disclosures usually provide more reliable evidence than does making inquiries of one individual.

The Sufficiency and Appropriateness of Audit Evidence

.75 Sufficiency of Audit Evidence. The sufficiency of audit evidence relates to its quantity. For example, the auditor who tests eight of the twelve monthly reconciliations between a general ledger control account and the related subsidiary ledger will obtain more evidence about the operating effectiveness of the control than the auditor who tests only two of the twelve reconciliations.

.76 The sufficiency of audit evidence you need to support your conclusion is affected by:

- The risk of misstatement. The greater the risk, the more audit evidence likely to be required to support a conclusion
- The quality of the audit evidence obtained. The higher the quality of the evidence, the less that will be required.

.77 Appropriateness of Audit Evidence. The appropriateness of audit evidence relates to its quality. The quality of audit evidence is a function of its relevance and its reliability in providing support, or detecting misstatements, in the accounts, classes of transactions, or assertions.

- Relevance of audit evidence. The results of your audit procedures may provide audit evidence that is relevant to certain assertions but not others. For example, tests of controls related to the proper authorization of a transaction will provide evidence about the occurrence assertion but not about the completeness assertion. Obtaining audit evidence relating to a particular assertion, in this example, the occurrence of a transaction, is not a substitute for obtaining audit evidence regarding another assertion, in this example, completeness.
- Reliability of audit evidence. The reliability of audit evidence is influenced by its source and by its nature. Reliability also depends on the individual circumstances under which it is obtained, including its timing.
Generalizations about the reliability of various kinds of audit evidence can be made; however, when considering such generalizations keep in mind that they are subject to important exceptions. Even when audit evidence is obtained from sources external to the client, circumstances may exist that could affect the reliability of the information obtained. For example, audit evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. While recognizing that exceptions may exist, the following generalizations about the reliability of audit evidence may be useful.

- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence is more reliable when it exists in documentary form (whether paper, electronic, or other medium). For example, minutes of an audit committee meeting are more reliable than a subsequent oral representation of the matters discussed at the meeting.
- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles.

Typically, you obtain more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. For example, if the company lacks documentation to support its intent with regard to equity securities (which affect how those securities are classified and presented in the financial statements), you may have no choice but to rely on management’s representations regarding their intent. Management’s representations may be less reliable than a written record, but if you obtain representations from several sources (for example, from different members of management) and these representations are consistent with the client’s past history of selling equity investments, then you may find the consistency of the evidence from different sources to be persuasive.

An increased quantity of audit evidence may compensate for less reliable audit evidence, it cannot compensate for audit evidence that lacks relevancy. For example, a confirmation of an accounts receivable balance is not relevant to the valuation of the allowance account. Increasing the number of receivables confirmations will not provide you with any additional evidence relating to the allowance for doubtful accounts.

Determining Whether You Have Obtained Sufficient, Appropriate Audit Evidence. You may find it necessary to rely on audit evidence that is persuasive rather than conclusive. However, to obtain the reasonable assurance required to support an opinion about the financial statements, you must not be satisfied with audit evidence that is less than persuasive.

Part Three: Applying the Audit Risk Model

This part of the Alert provides a summary of the audit process. Even though some requirements and guidance are presented in a way that suggests a sequential process, audit fieldwork involves a continuous process of gathering, updating, and analyzing information throughout the audit.

The following is an overview of how an auditor should apply the audit risk model in practice.

- Gather information about the entity and its environment, including internal control. Your first step in the process is to gather information about those aspects of the client and its environment that will allow you to identify and assess risks. Evaluating the design of the client’s controls and determining whether they have been implemented are an integral part of this process.
• Understand the entity and its environment, including its internal control. Based on the information
gathered, you should be able to identify what could go wrong in specific relevant assertions related
to each account balance, class of transactions, or disclosures.

• Assess the risk of material misstatement. Next, you will use your understanding of the client and its
environment, including its internal control, to assess the risk of material misstatement that relate to
both financial statement level and specific assertions. To assess risks you will need to:
  — Identify the risk of material misstatement
  — Describe the identified risks in terms of what can go wrong in specific assertions
  — Consider the significance and likelihood of material misstatement for each identified risk

• Design overall responses and further audit procedures. You should address the risk of material misstate-
ment at both the financial statement and the relevant assertion level.
  — The risk of material misstatement at the financial statement level has a more pervasive effect on
the financial statements and affects many assertions. In addition to developing assertion-specific
responses, financial statement-level risks may require you to develop an overall, audit-wide
response, such as assigning more experienced audit team members.
  — Assertion-level risks pertain to a single assertion and should be considered when you design and
subsequently perform further audit procedures. Depending on the results of your risk assessment
procedures, further audit procedures may encompass a combined approach using both tests of
controls and substantive procedures or a substantive audit approach. Either approach is directed
at relevant assertions related to each material account balance, class of transactions, and disclo-
sures. However, regardless of your assessment of risks, you need to perform substantive audit
procedures on all relevant assertions related to each material account balance, class of transaction,
or disclosure.

Information Gathering

Information Needed About the Client and Its Environment to Identify and Assess the Risk
of Material Misstatement

.84 Obtaining an understanding of your client and its environment is an essential part of every audit.
Not only does this understanding allow you to identify and assess the risk of material misstatement, it also
allows you to exercise informed judgment about other audit matters such as:

• Materiality
• Whether the client’s selection and application of accounting policies are appropriate and financial
  statement disclosures are adequate
• Areas where special audit consideration may be necessary, for example, related party transactions
• The expectation of recorded amounts that you develop for performing analytical procedures
• The design and performance of further audit procedures
• The evaluation of audit evidence

.85 Not all information about a client or its environment is relevant for your audit. In general, the
information you should gather about your client is that which allows you to assess the risk that specific
assertions could be materially misstated. The following table summarizes the various categories of informa-
tion you should obtain about your client.
On every audit you are required to gather information and obtain an understanding of the client and its environment. This understanding consists of the following aspects.

- **External factors**, including
  - Industry factors such as the competitive environment, supplier and customer relationships, and technological developments.
  - The regulatory environment, which includes relevant accounting pronouncements, the legal and political environment, and environmental requirements that affect the industry.
  - Other matters such as general economic conditions.

- **Nature of the client**, which includes its operations, its ownership, governance, the types of investments it makes and plans to make, how it is financed, and how it is structured.

- **Objectives and strategies and related business risks**, which may result in material misstatement of the financial statements taken as a whole or individual assertions.

- **Measurement and review of the client’s financial performance**, which tells you which aspects of the client’s performance that management considers to be important.

- **Internal control**, which consists of five components: the control environment, risk assessment, information and communication, control activities, and monitoring. These components may operate at the entity level or the individual transaction level. To obtain an appropriate understanding of internal control will require you to understand and evaluate the design of all five components of internal control and to determine whether the controls are in use by the client.

### Risk Assessment Procedures

.86 The audit procedures you perform to obtain an understanding of the entity and its internal control are referred to as *risk assessment procedures*. Some of the information you obtain by performing risk assessment procedures you will use to support your assessments of the risks of material misstatement. Risk assessment procedures include:

1. Inquiries of management and others at the client
2. Analytical procedures
3. Observation and inspection

.87 You need to gather audit evidence to support your assessment of the risk of material misstatement. It is not acceptable to simply deem control risk to be “at the maximum” without support. Your risk assessment procedures provide the audit evidence necessary to support your risk assessments, which in turn, support your determination of the nature, timing, and extent of further audit procedures. Thus, the results of your risk assessment procedures are an integral part of the audit evidence you obtain to support your opinion on the financial statements.

.88 *A Mix of Procedures*. Except for internal control, you are not required to perform all the procedures for each of the five aspects of the client and its environment discussed previously. However, in the course of gathering information about the client, you should perform all the risk assessment procedures.

.89 With regard to obtaining an understanding about the design of internal control and determining whether they have been implemented, inquiry alone is not sufficient. Thus, for these purposes, you should supplement your inquiries with other risk assessment procedures.
.90 Other Procedures That Provide Relevant Information About the Client. Following include some procedures you might consider.

- Assessing the Risk of Material Misstatement Due to Fraud. AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), directs you to perform certain audit procedures to assess the risk of material misstatement due to fraud. Some of these procedures also may help gather information about the entity and its environment, particularly its internal control. For this reason, you should:
  - Coordinate the procedures you perform to assess the risk of material misstatement due to fraud with your other risk assessment procedures
  - Consider the results of your assessment of fraud risk when identifying the risk of material misstatement

- Other Information. When relevant to the audit, you also should consider other knowledge you have of the client that can help you assess risk. This other information may include:
  - Information obtained from your client acceptance or continuance process
  - Experience gained on other engagements performed for the entity

.91 Updating Information From Prior Periods. If certain conditions are met, you may use information about the client you obtained in prior periods as audit evidence in the current period audit. However, when you intend to use information from prior periods in the current period audit, you should determine whether changes have occurred that may affect the relevance of the information for the current audit. To make this determination, you should make inquiries and perform other appropriate audit procedures, such as walkthroughs of systems.

Gaining an Understanding of the Client and Its Environment

.92 The gathering of information, by itself, does not provide you with the understanding of the client that is necessary for you to assess risk. For you to assess the risk of material misstatement and perform further audit procedures, you need to synthesize the information gathered to determine how it might affect the financial statements. For example:

- Information about the client’s industry may allow you to identify characteristics of the industry that could give rise to specific misstatements. For example, if your client is a construction contractor that uses long-term contract accounting, your understanding of the client should be sufficient to allow you to recognize that the significant estimates of revenues and costs create a risk of material misstatement.

- Information about the ownership of your client, how it is structured, and other elements of its nature will help you identify related party transactions that, if not properly accounted for and adequately disclosed, could lead to a material misstatement.

- Your identification and understanding of the business risks facing your client increase the chance that you will identify financial reporting risks. For example, your client may face a risk that a new company may enter its market, and that new entrant could have certain business advantages (for example, economies of scale or greater brand recognition). The potential risk of material misstatement of the financial statements related to this business risk might be obsolescence or overproduction of inventory that could only be sold at a discount.

- Information about the performance measures used by client management may lead you to identify pressures or incentives that could motivate client personnel to misstate the financial statements.

- Information about the design and implementation of internal control may lead you to identify deficiencies in control design, which increase the risk of material misstatement.

Evaluating the Design of Internal Control

.93 A sufficient understanding of internal control is one that allows you to evaluate the design of internal control and to determine whether controls have been placed in operation. This threshold describes a substantial understanding of internal control.

Requirements for Evaluating Control Design

.94 On every audit, you should obtain an understanding of internal control that is of sufficient depth to enable you to:

1. Assess the risks of material misstatement of the financial statements, whether due to error or fraud
2. Design the nature, timing, and extent of further audit procedures

.95 To meet this threshold of sufficiency, at both the entity and relevant assertion level, you should:

1. Evaluate the design of controls that are relevant to the audit and determine whether the control—either individually or in combination—is capable of effectively preventing or detecting and correcting material misstatements.
2. Determine that the control has been implemented, that is, that the control exists and that the entity is using it.

.96 Your evaluation of internal control design and the determination of whether controls have been implemented are critical to your assessment of the risks of material misstatement. It is not possible to develop a reliable assessment of the risk of material misstatement absent a sufficient understanding of internal control. For this reason, you are required to perform risk assessment procedures to gather information and form an understanding of internal control on every audit. Even if your initial audit strategy contemplates performing only substantive procedures for all relevant assertions related to material transactions, account balances, and disclosures, you still need to evaluate the design of your client’s internal control.

.97 How to Evaluate Control Design. In evaluating control design, it is helpful to consider:

- Whether control objectives that are specific to the unique circumstances of the client have been considered for all relevant assertions for all significant accounts and disclosures

- Whether the control or combination of controls would—if operated as designed—meet the control objective

- Whether all controls necessary to meet the control objective are in place

Determining If the Control Has Been Implemented

.98 It may be possible that the way in which a control is applied by an entity differs from the description of the control in a policy manual or from one individual’s understanding of how the control is applied. For example, your client’s accounting policy manual may state that physical inventory accounts are performed annually. However, because of increases in the volume of transactions, the client deviates from this stated policy and counts some inventory items twice a year. This practice is not reflected in the policy manual and is not known by all individuals in the company. Determining whether a control has been implemented is important because it confirms your understanding of control design.

.99 The determination of whether a control has been put in place and is in use involves obtaining evidence about whether those individuals responsible for performing the prescribed procedures have:
• An awareness of the existence of the procedure and their responsibility for its performance
• A working knowledge of how the procedure should be performed

.100 Determining whether the control has been implemented does not require you to determine whether the control was performed properly throughout the audit period.

.101 Distinguishing Between Evaluation of Design and Tests of Controls. Obtaining an understanding of the design and implementation of internal control is different from testing its operating effectiveness.

• Understanding design and implementation is required on every audit as part of the process of assessing the risks of material misstatement.
• Testing the operating effectiveness builds on your understanding of internal control design and implementation and is necessary only where the auditor’s risk assessment procedures include an expectation that the controls will be effective or when substantive procedures alone do not provide you with sufficient audit evidence at the assertion level.

.102 The procedures necessary to understand the design and implementation of controls do provide some limited evidence regarding the operation of the control.2

.103 However, the procedures necessary to understand the design and implementation of controls generally are not sufficient to serve as a test of their operating effectiveness for the purpose of placing significant reliance on their operation. For example, obtaining audit evidence about the implementation of a manually operated control at a point in time does not provide audit evidence about the operating effectiveness of control at other times during the period under audit.

.104 Examples of situations where the procedures you perform to understand the design and implementation of controls may provide sufficient audit evidence about their operating effectiveness include:

• Controls that are automated to the degree that they can be performed consistently provided that IT general controls over those automated controls operated effectively during the period.
• Controls that operate only at a point in time rather than continuously throughout the period. For example, if the client performs an annual physical inventory count, your observation of that count and other procedures to evaluate its design and implementation provide you with evidence that you consider in the design of your substantive procedures.

.105 Evaluating Design and Implementation in the Absence of Control Documentation. For smaller companies, the company’s evidence supporting the design and implementation of some elements of internal control may not be available in documentary form. For example, the entity may lack:

• A written code of conduct that describes management’s commitment to ethical values
• A formal risk assessment process

.106 Without adequate documentation of controls, the risk assessment procedures available to you to understand control design are limited to inquiry and observation. As risk assessment procedures, both inquiry and observation have limitations, and accordingly, absent adequate documentation, you should consider whether the information you have gathered about internal control is sufficient to evaluate its design.

---

2 For example, a walkthrough that traces a transaction from its inception through its recording is considered a test of one transaction. Examination of several documents evidencing the operation of a control at a key control point may also be considered as a test. Generally, the evidence required to rely on the operation of the control will be greater than that required to simply assess whether it has been placed in operation.
Inadequate documentation of the components of internal control also may be a control deficiency. For example, the lack of appropriate documentation may impair management’s ability to communicate control procedures to those responsible for their performance or to monitor control performance effectively.

**Discussion Among the Audit Team**

The members of the audit team should discuss the susceptibility of the client’s financial statements to material misstatement. This discussion will allow team members to exchange information and create a shared understanding of the client and its environment, which in turn will enable each team member to:

- Gain a better understanding of the potential for material misstatement resulting from fraud or error in the assertions that are relevant to the areas assigned to them
- Understand how the results of the audit procedures that they perform may affect other aspects of the audit.

This discussion among the audit team could be held at the same time as the discussion among the team related to fraud, which is required by AU section 316.

**Assessing the Risk of Material Misstatement**

**Considerations at the Financial Statement Level**

You should use your understanding of the client and its environment—which includes your evaluation of the design and implementation of internal control—to assess the risk of material misstatement. To make this assessment, you should:

1. Identify risks throughout the process of obtaining an understanding of the entity, its internal control, and its environment.
2. Relate the identified risks to what can go wrong at the relevant assertion level.
3. Consider whether the risks could result in a material misstatement to the financial statements.
4. Consider the likelihood that the risks could result in a material misstatement of the financial statements.

**Financial Statement-Level and Assertion-Level Risks.** You should identify and assess the risks of material misstatement at both the financial statement level and the relevant assertion level.

1. **Financial statement-level risks.** Some risks of material misstatement relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. These risks at the financial statement level may be identifiable with specific assertions at the class of transaction, account balance, or disclosure level.

2. **Relevant assertion-level risks.** Other risks of material misstatement relate to specific classes of transactions, account balances, and disclosures at the assertion level. Your assessment of risks at the assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures.

Risks that exist at the financial statement level, for example, those that pertain to a weak control environment or to management’s process for making significant accounting estimates, should be related to specific assertions. For example, risks related to the client’s process for making accounting estimates would affect those assertions where an accounting estimate was necessary (for example, the valuation of assets).
In other instances, it may not be possible for you to relate your financial statement-level risks to a particular assertion or group of assertions. For example, it may not be possible for you to determine which assertions will or will not be affected by a weak control environment. Financial statement-level assertions that can not be related to specific assertions will require you to make an overall response, such as the way in which the audit is staffed or supervised.

How to Consider Internal Control When Assessing Risks. Your evaluation of internal control design and the determination of whether controls have been implemented are integral components of the risk assessment process. When making risk assessments, you should identify the controls that are likely to either prevent or detect and correct material misstatements in specific assertions. For example, procedures relating to the client’s physical inventory count may relate specifically to the existence or completeness of inventory.

Individual controls often do not address a risk completely in themselves. Often, only multiple control activities, together with other components of internal control (for example, the control environment, risk assessment, information and communication, or monitoring), will be sufficient to address a risk. For this reason, when determining whether identified controls are likely to prevent or detect and correct material misstatements, you generally organize your risk assessment procedures according to significant transactions and accounting processes (for example, sales, cash receipts, or payroll), rather than general ledger accounts.

Identification of Significant Risks. As part of your risk assessment, you should identify significant risks, which are defined as those risks that require special audit consideration. For example, if your client is named as a defendant in a patent infringement lawsuit that may threaten the viability of its principal product, you could consider as significant risks, the risks that the lawsuit (1) would not be appropriately recorded or disclosed in accordance with generally accepted accounting principles or (2) may affect the entity’s ability to continue as a going concern.

Significant risks arise on most audits. When you determine that a risk is a significant risk, your audit procedures should include (but not be limited to):

- Obtaining an understanding of internal control, including relevant control activities, related specifically to those significant risks.
- If you plan to rely on the operating effectiveness of controls related to significant risks, testing the operating effectiveness of those controls in the current period. That is, using evidence about operating effectiveness that you obtained in prior periods is not appropriate.
- Substantive procedures specifically designed to address the significant risk.

Significant risks should be distinguished from transactions or events that have a high inherent risk, which could be mitigated by the client’s internal controls. For example, because of the nature of your client and the industry in which it operates, you might assess a high inherent risk on revenue recognition. However, the client may have controls over revenue recognition; you would then obtain an understanding of such controls and determine whether they are implemented and, if appropriate, test their operating effectiveness. This circumstance may not warrant special audit consideration and thus may not be a significant risk.

The determination of whether a transaction or event is a significant risk is a matter for your professional judgment.

Considerations at the Assertion Level

Part Two of this Alert provides a definition of audit risk (AR) in which:

AR = RMM x DR

where RMM is the risk of material misstatement and DR is detection risk
The risk of material misstatement is described as “the entity’s risk,” which means that it is independent of your audit. You can control detection risk by changing the nature, timing, and extent of your audit procedures. For example, to decrease the planned level of detection risk, you could perform more extensive substantive tests.

.120 You cannot control the risk of material misstatement as you can detection risk because RMM exists independently from your audit procedures. However, to properly gauge the detection risk you are willing to accept, you need to assess the risks of material misstatement. The risk assessment process described in the SASs is designed to allow you to gather information and assess the risks of material misstatement so you can design further audit procedures that reduce audit risk to an acceptably low level.

Determining Materiality and Tolerable Misstatement

.121 You should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. The determination of materiality will assist you in (1) making judgments when identifying and assessing the risk of material misstatement and (2) determining the nature, timing, and extent of your further audit procedures. In determining financial statement materiality, you will often apply percentages to benchmarks. The determination of materiality, including the selection of the appropriate benchmark and percentages, is a matter of your professional judgment and depends on the nature and circumstances of your audit.

.122 In addition to the quantitative considerations, you should be alert for misstatements that could be qualitatively material, for example, misstatements that may change a loss into income or vice versa, may potentially affect loan covenants, or may increase management’s compensation.

.123 After you determine the financial statement materiality, you should set a tolerable misstatement, which is the adjustment of the financial statement materiality to the assertion level. Tolerable misstatement will assist you in assessing the risk of material misstatement and in designing and performing further audit procedures.

.124 Because the entity’s circumstances may change as the audit progresses, you should reassess the financial statement materiality and tolerable misstatement levels initially determined. Failure to do so may result in you failing to obtain sufficient audit evidence to support your opinion.

Responding to Assessed Risks

Linking Assessed Risks to Further Audit Procedures

.125 The risk assessment process culminates with your articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur. This assessment of risk relates identified risks to what can go wrong at the assertion level and the way in which misstatements are likely to occur. Your risk assessment provides the basis for designing and performing further audit procedures.

.126 You can think of your assessment of risks as having two dimensions: direction and amplitude. Direction relates to where misstatements can occur, that is, the specific assertions related to an account, class of transactions, or disclosure. Amplitude relates to the possible magnitude of the misstatement that could occur. Magnitude is a function of two variables: the potential significance of the misstatement (for example, whether it is material) and the likelihood of a misstatement occurring (for example, remote, likely). Your evaluation of the design and implementation of internal control affects all elements of your risk assessment process.
Further Audit Procedures

.127 You perform further audit procedures to obtain the audit evidence necessary to support your audit opinion. Further audit procedures consist of either tests of controls or substantive tests. Often, a combined approach using both tests of controls and substantive procedures is an effective approach. You are not precluded from adapting a substantive audit approach provided that you have and document an appropriate basis for this approach.

.128 In determining the nature, timing, and extent of further audit procedures, you should design and perform further procedures whose nature, timing, and extent are responsive to the assessed risk of material misstatement at the relevant assertion level. You should provide and document a clear linkage between your assessment of the risk of material misstatement and the nature, timing, and extent of the further audit procedures.

.129 Audit procedures performed in previous audits and example procedures provided by illustrative audit programs may help you understand the types of further audit procedures that are possible for you to perform. However, prior year procedures and example audit programs do not provide a sufficient basis for determining the nature, timing, and extent of audit procedures to perform in the current audit. Your assessment of the risk of material misstatement in the current period is the primary basis for designing further audit procedures in the current period.

Evaluating Audit Findings

.130 In evaluating whether the financial statements are presented fairly, you must consider the effects, both individually and in the aggregate, of misstatements (known and likely) identified by you that are not corrected by the client.

.131 Your consideration and aggregation of misstatements should include both of the following:

- Known misstatements, which are the amount of misstatements specifically identified
- Likely misstatements, which include (1) projected misstatements in the account balances or classes of transactions that you have examined and (2) differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate.

.132 Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

.133 Before considering the aggregate effect of identified uncorrected misstatements, the auditor should consider each misstatement separately to evaluate:

1. Its effect in relation to the relevant individual classes of transactions, account balances, or disclosures, including qualitative considerations.
2. Whether, in considering the effect of the individual misstatement on the financial statements taken as a whole, it is appropriate to offset misstatements. For example, it may be appropriate to offset misstatements of items within the same account balance in the financial statements.
3. The effect of misstatements related to prior periods. In prior periods, misstatements may not have been corrected by the entity because they did not cause the financial statements for those periods to be materially misstated. Those misstatements might also affect the current period's financial statements.
.134 In aggregating misstatements, you should include the effect on the current period’s financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, you should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.135 There are quantitative and qualitative materiality considerations, and you should consider both when evaluating audit results. Because of qualitative considerations, misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

Evaluating Whether the Financial Statements Taken as a Whole Are Free of Material Misstatement

.136 You must evaluate whether the financial statements taken as a whole are free of material misstatement. In making this evaluation, you should consider the evaluation of the uncorrected (known and likely) misstatements you identified during the audit. When concluding about whether the effect of misstatements, individually or in the aggregate, is material, you should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit. For example, an amount that is material to the financial statements of one entity may not be material to the financial statements of another entity of a different size or nature. Also, what is material to the financial statements of a particular entity might change from one period to another.

.137 If you believe that the financial statements taken as a whole are materially misstated, you should request management to make the necessary corrections. If management refuses to make the corrections, you must determine the implications for the auditor’s report.

.138 If you conclude that the effects of uncorrected misstatements are not material, you should consider that the financial statements themselves could still be materially misstated because of additional misstatements that you did not detect. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases. Accordingly, you should consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

The Iterative Nature of Auditing

.139 An audit of financial statements is a cumulative and iterative process. As you perform planned audit procedures—whether they be risk assessment procedures, substantive tests, or tests of controls—the audit evidence you obtain may cause you to modify the nature, timing, or extent of other planned audit procedures. Information may come to your attention that differs significantly from the information on which the risk assessments were based.

.140 For example, the extent of misstatements that you detect by performing substantive procedures may alter your judgment about the risk assessments and may indicate a material weakness in internal control. Or, analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement. In such circumstances, you should reevaluate the planned audit procedures based on the revised consideration of assessed risks.

Audit Documentation

General Documentation Requirements

.141 In general, you should document certain matters pertaining to each step in the risk assessment process. This audit documentation should provide a clear understanding of the work performed, the source of the information, and the conclusions reached.
.142 The form and content of audit documentation are for you to determine using professional judgment. AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), provides general guidance regarding the purpose, content, ownership, and confidentiality of audit documentation. Examples of common documentation techniques include narrative descriptions, questionnaires, checklists, and flowcharts. These techniques may be used alone or in combination.

.143 The form and extent of your documentation are influenced by the following:

- The nature, size, and complexity of the entity and its environment
- The availability of information from the entity
- The specific audit methodology and technology used in the course of the audit

.144 For example, documentation of the understanding of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed, documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity and its environment, and the more extensive the audit procedures performed by the auditor, the more extensive your documentation should be. The specific audit methodology and technology used in the course of the audit will also affect the form and extent of documentation.

Specific Documentation Requirements

.145 The SASs require you to document the following matters.

- The levels of materiality and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.
- The discussion among the audit team regarding the susceptibility of the entity’s financial statements to material misstatement due to error or fraud, including how and when the discussion occurred, the subject matter discussed, the audit team members who participated, and significant decisions reached concerning planned responses at the financial statement and relevant assertion levels.
- Key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control, to assess the risks of material misstatement of the financial statements, the sources of information from which the understanding was obtained, and the risk assessment procedures.
- The assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment.
- The significant risks identified and related controls evaluated.
- The overall responses to address the assessed risks of misstatement at the financial statement level.
- The nature, timing, and extent of the further audit procedures.
- The linkage of those procedures with the assessed risks at the relevant assertion level.
- The results of the audit procedures.
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit.
- A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.
- Your conclusion about whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.
Uncorrected misstatements should be documented in a manner that allows the auditor to:

- Separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods.
- Consider the aggregate effect of misstatements on the financial statements.
- Consider the qualitative factors that are relevant to the auditor’s consideration of whether misstatements are material.

**Resource Central**

The AICPA will offer continuing professional education courses, including a self-study course as well as a group study course. In addition, the new risk assessment standards will be a topic of discussion in various AICPA conferences in which AICPA presenters will further explain the standards.

**On the Bookshelf**

**Future AICPA Audit Guide on Risk Assessment and Internal Control**

The AICPA is currently developing an Audit Guide to aid in implementing the new risk assessment standards. In addition, the AICPA is revamping its existing Audit Guide titled *Consideration of Internal Control in a Financial Statement Audit*. The current development plan envisions combining these two guides into one audit guide. This audit guide should be available by mid-2006 and can be purchased by contacting the AICPA/CPA2Biz Service Center at (888) 777-7077 or online at www.cpa2biz.com.

**AICPA’s ressource Online Accounting and Auditing Literature**

Get access—anytime, anywhere—to the AICPA’s latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides*, *Audit and Accounting Guides*, *Audit Risk Alerts*, and *Accounting Trends & Techniques*. To subscribe to this essential service, go to www.cpa2biz.com.

**resoURCE CD-ROM**

The AICPA is currently offering a CD-ROM product entitled *resource: AICPA’s Accounting and Auditing Literature*. This CD-ROM enables subscription access to AICPA Professional Literature products in a Windows format, namely, *Professional Standards*, *Technical Practice Aids*, and *Audit and Accounting Guides* (available for purchase as a set or as individual publications). This dynamic product allows you to purchase the specific titles you need and includes hypertext links to references within and between all products.

**AICPA/CPA2Biz Service Center**

To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA/CPA2Biz Service Center at (888) 777-7077. The best times to call are 8:30 A.M. to 11:30 A.M. and 2:00 P.M. to 7:30 P.M., Eastern Standard Time. You can also order AICPA products from the Service Center by fax at (800) 362-5066 or visit www.cpa2biz.com to obtain product information and place online orders.

**Hotlines**

**Accounting and Auditing Technical Hotline**

The AICPA Technical Hotline answers members’ inquiries about accounting, auditing, attestation, compilation, and review services. Call (888) 777-7077.
Ethics Hotline

.153 Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. Call (888) 777-7077.

Web Sites

AICPA Online and CPA2Biz

.154 AICPA Online (www.aicpa.org) offers CPAs the unique opportunity to stay abreast of matters relevant to the CPA profession. AICPA Online informs you of developments in the accounting and auditing world as well as developments in congressional and political affairs affecting CPAs. In addition, www.cpa2biz.com offers all the latest AICPA products, including the Audit and Accounting Guides, Professional Standards, CPE courses, Practice Aids, and Audit Risk Alerts.

Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115

COMPANION TO SAS NO. 115, COMMUNICATING INTERNAL CONTROL RELATED MATTERS IDENTIFIED IN AN AUDIT

Notice to Readers

This Audit Risk Alert is intended to help auditors understand and implement the requirements of Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325), which supersedes SAS No. 112 of the same name.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards. Other Auditing Publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both appropriate and relevant to the circumstances of his or her audit. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Christopher Cole, CPA, CFE, CFF
Technical Manager
Accounting and Auditing Publications

Introduction

.01 In October 2008, the AICPA Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325). SAS No. 115 amends SAS No. 112 and further clarifies standards and provides guidance on communicating matters related to an entity’s internal control over financial reporting (internal control) identified in an audit of financial statements.

.02 The new SAS is applicable whenever an auditor expresses an opinion on financial statements (including a disclaimer of opinion) except when the auditor is performing an integrated audit and will be expressing an opinion on the effectiveness of internal control over financial reporting under AT section 501 (AICPA, Professional Standards, vol. 1). This new standard is effective for audits of financial statements for periods ending on or after December 15, 2009. This Audit Risk Alert provides an overview of the requirements of SAS No. 115 as well as case studies that illustrate how deficiencies in internal control may be evaluated for severity.

Why SAS No. 115 Was Issued

.03 The Sarbanes-Oxley Act of 2002 and the issuance of Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements, which has since been superseded by PCAOB Auditing
Standard No. 5, An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), created considerable interest in management’s responsibility for internal control and the auditor’s responsibility for bringing certain internal control related matters to management’s attention in an audit of financial statements. This renewed interest in an auditor’s responsibility to report internal control deficiencies identified in an audit in conjunction with the goal of the ASB to converge definitions with Auditing Standard No. 2 led the ASB to issue SAS No. 112. By issuing SAS No. 115, the ASB revised SAS No. 112 maintain the uniformity of the definitions of the various kinds of deficiencies in internal control and the related guidance for evaluating such deficiencies with the definitions and guidance in Auditing Standard No. 5.

Overview of the Standard

.04 In general, SAS No. 115 retains many of the provisions of SAS No. 112; it provides guidance to enhance the auditor’s ability to identify and evaluate deficiencies in internal control during an audit, and then communicate to management and those charged with governance those deficiencies that the auditor believes are significant deficiencies or material weaknesses.

.05 The key differences between SAS No. 115 and SAS No. 112 lie in the definitions of material weaknesses and significant deficiencies and the process for making that determination. Under SAS No. 112, the auditor applied criteria of likelihood and magnitude described in that standard to determine if a control deficiency reached the threshold of significant deficiency or material weakness. Under SAS No. 115, the same criteria are used; however, more judgment is allowed for in determining whether a control deficiency is a significant deficiency.

Identifying Deficiencies in Internal Control

.06 A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis:
  
  - A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if it operates as designed, the control objective would not be met.
  - A deficiency in operation exists when (a) a properly designed control does not operate as designed or (b) when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

The Auditor’s Responsibility for Identifying Deficiencies in Internal Control

.07 When conducting an audit of financial statements, the auditor is not required to perform procedures to identify deficiencies in internal control. However, during the course of the audit, the auditor may become aware of deficiencies in the design or operation of the entity’s internal control. The auditor may identify deficiencies in internal control at any point in the audit, for example, while
  
  - obtaining an understanding of the entity and its environment, including its internal control,
  - assessing the risks of material misstatement of the financial statements, due to error or fraud,
  - performing further audit procedures to respond to assessed risks, or
  - communicating with management or others (for example, internal auditors or governmental authorities).

.08 The awareness of deficiencies in internal control will vary with each audit and will be influenced by the nature, timing, and extent of audit procedures performed, as well as other factors. The results of substantive procedures may result in the need to reevaluate the earlier assessment of internal control.
Evaluating Deficiencies in Internal Control

A deficiency in internal control may be considered just a deficiency. More severe deficiencies are significant deficiencies, and the most severe deficiencies are material weaknesses.

Definitions of Significant Deficiency and Material Weakness

A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. For the purpose of this definition, a reasonable possibility exists when the likelihood of the event is either reasonably possible or probable as those terms are used in Financial Accounting Standards Board (FASB) Statement No. 5, Accounting for Contingencies.1 2

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

The Evaluation Process

The auditor should evaluate the severity of each deficiency in internal control identified during the audit and determine whether the deficiency, individually or in combination with other deficiencies in internal control, rise to the level of significant deficiencies or material weaknesses. The severity of a deficiency in internal control depends on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies; and
- whether there is a reasonable possibility that the entity’s controls will fail to prevent or to detect and correct a misstatement of an account balance or disclosure.

The severity of a deficiency does not depend on whether a misstatement actually occurred. If the auditor identifies a deficiency in internal control but has not identified an actual misstatement related to that deficiency, the auditor cannot automatically conclude that the deficiency is not a significant deficiency or a material weakness. If a misstatement has been identified, the auditor should consider the potential for further misstatement in the financial statements being audited.

Magnitude

Magnitude refers to the extent of the misstatement that could have occurred, or that actually occurred, because misstatements include both potential and actual misstatements. In evaluating the magnitude of the potential misstatement, the maximum amount by which an account balance or total of transactions can be overstated generally is the recorded amount, whereas understatements could be larger. For example, if a control deficiency exists over the completeness of accounts payable, and the recorded amount is $200,000, the most the amount could be overstated is $200,000. But the most the amount could be understated cannot be known.

---

1 The term reasonable possibility as used in the definitions of the term material weakness has the same meaning as defined in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 5, Accounting for Contingencies. Paragraph 3 of FASB Statement No. 5 states:

When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This statement uses the terms probable, reasonably possible, and remote to identify three areas within that range, as follows:

a. Probable. The future event or events are likely to occur.
b. Reasonably possible. The chance of the future event or events occurring is more than remote but less than likely.
c. Remote. The chance of the future event or events occurring is slight.

Therefore, the likelihood of an event is a reasonable possibility when it is reasonably possible or probable.

2 At the time of this writing, the FASB Accounting Standards Codification (ASC) had not yet been issued as authoritative. When the FASB ASC is issued as authoritative, the definitions currently found in FASB Statement No. 5 will be located at FASB ASC 450-20-25-1.
Factors that affect the magnitude of a misstatement that might result from a deficiency or deficiencies include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity (in the current period or expected in future periods) in the account or class of transactions exposed to the deficiency

**Probability of Occurrence**

Probability of occurrence refers to the likelihood that a control, or combination of controls, could have failed to prevent or detect a misstatement in the financial statements being audited. The evaluation of whether a deficiency presents a reasonable possibility of misstatement may be made without quantifying the probability of occurrence as a specific percentage or range. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

Risk factors affect whether a reasonable possibility exists that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following:

- The nature of the financial statement accounts, classes of transactions, disclosures, and assertions involved
- The susceptibility of the related asset or liability to loss or fraud
- The subjectivity, complexity, or extent of judgment required to determine the amount involved
- The interaction or relationship of the control with other controls
- The interaction among the deficiencies
- The possible future consequences of the deficiency

The following table summarizes the consideration of the severity of a deficiency to determine whether it is a deficiency in internal control, a significant deficiency, or a material weakness.

<table>
<thead>
<tr>
<th>Magnitude of misstatement that occurred, or could have occurred</th>
<th>Probability of misstatement</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Reasonably Possible</td>
</tr>
<tr>
<td>Quantitatively or qualitatively material</td>
<td>Material weakness</td>
</tr>
<tr>
<td>Less than material</td>
<td>Deficiency in internal control that could be a significant deficiency but not a material weakness</td>
</tr>
</tbody>
</table>

As shown in the preceding table, a deficiency in internal control that is less than material, less than reasonably possible, or both, could be considered a significant deficiency if it is determined by the auditor’s professional judgment to merit the attention of those charged with governance.

The following are examples of deficiencies in internal control and how their magnitude and probability of occurrence might be considered:

- A deficiency in controls over revenue transactions that results in a financial statement misstatement. In this case, the auditor assesses the probability of a control preventing or detecting and correcting the misstatement.
Because the misstatement actually occurred, the auditor assesses the probability as reasonably possible. The auditor then considers the potential magnitude of the misstatement. If the amounts are greater than materiality, the control deficiency would be classified as a material weakness. If the amounts are less than material, the auditor would apply his or her professional judgment as to whether this deficiency is important enough to merit the attention of those charged with governance.

- **Failure to obtain required authorization for a valid disbursement.** In this situation, the auditor again assesses the probability of the control failing and the magnitude of the misstatement that could result from recording an unauthorized disbursement, using the factors listed previously.

**Multiple Deficiencies in Internal Control**

.21 Multiple deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control increase the likelihood of material misstatement and may, in combination, constitute a significant deficiency or a material weakness, even though such deficiencies individually may be less severe. Therefore, the auditor should determine whether deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a significant deficiency or a material weakness.

**Mitigating Effects of Compensating Controls**

.22 When a deficiency in internal control has been identified, management may inform the auditor, or the auditor may otherwise become aware of the existence of compensating controls that, if effective, may limit the severity of the deficiency in internal control and prevent it from being a significant deficiency or material weakness. In these circumstances, although the auditor is not required to consider the effects of compensating controls for purposes of this standard, the auditor may rely on the operating effectiveness of compensating controls related to a deficiency in operation provided the auditor has tested the compensating controls for operating effectiveness as part of the financial statement audit. Compensating controls can limit the severity of the deficiency, but they do not eliminate the deficiency.

.23 For example, consider a situation in which there is a lack of segregation of duties within the accounts payable function in an owner-managed entity. As a compensating control, the owner reviews the supporting documentation for all disbursements exceeding $1,000. As part of the audit, the auditor could test this compensating control and determine whether it operates effectively for the purpose of mitigating the effects of the deficiency in internal control (lack of segregation of duties) in the accounts payable function. Although the deficiency in internal control still exists—the review does not eliminate the lack of segregation of duties—the significance of the deficiency may be mitigated by the compensating control so that it is not a significant deficiency or a material weakness.

**The Prudent Official Test**

.24 If the auditor determines that a deficiency, or a combination of deficiencies, is not a material weakness, the auditor should consider whether prudent officials, having knowledge of the same facts and circumstances, would likely reach the same conclusion. Although the term **prudent official** is not defined in the standard, the concept is that an auditor should “stand back” and take another objective look at the severity of the deficiency as would a regulator or someone from an oversight agency. The auditor should consider whether a **prudent official** (having the auditor’s knowledge about the facts and circumstances, the magnitude and probability of occurrence of the potential misstatement, and the other controls that were tested) would agree with the auditor’s conclusion that a deficiency is not a material weakness. Because a prudent official is cautious, the prudent official test is used only to increase the severity of a deficiency in internal control and not to justify a decrease in the severity.
Communication Requirements

Form of Communication

.25 The auditor should communicate in writing to management and those charged with governance.

Content of Communication

.26 Deficiencies identified during the audit that upon evaluation are considered significant deficiencies or material weaknesses under this section should be communicated, in writing, to management and those charged with governance as a part of each audit, including significant deficiencies and material weaknesses that were communicated to management and those charged with governance in previous audits and have not yet been remediated. Significant deficiencies and material weaknesses that previously were communicated and have not yet been remediated may be communicated, in writing, by referring to the previously issued written communication and the date of that communication.

.27 The written communication regarding significant deficiencies and material weaknesses identified during the audit of financial statements should include

- a statement that indicates the purpose of the auditor’s consideration of internal control was to express an opinion on the financial statements, but not to express an opinion on the effectiveness of the entity’s internal control.
- a statement that indicates the auditor is not expressing an opinion on the effectiveness of internal control.
- a statement that indicates that the auditor’s consideration of internal control was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses.
- the definition of the term material weakness and, where relevant, the definition of the term significant deficiency.
- identification of the matters that are considered to be significant deficiencies and those that are considered to be material weaknesses.
- a statement that indicates the communication is intended solely for the information and use of management, those charged with governance, and others within the organization and is not intended to be and should not be used by anyone other than these specified parties. If an entity is required to furnish such auditor communications to a governmental authority, specific reference to such governmental authorities may be made.

.28 The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit. Such a communication could be misinterpreted as providing a higher level of assurance than it actually represents.

.29 Paragraph .28 of SAS No. 115 contains an illustrative communication that encompasses the requirements of the standard. In addition, SAS No. 115 contains an illustrative communication that may be used when the auditor has been requested to advise management and those charged with governance of the fact that no material weaknesses were identified. Also illustrated is a paragraph to be added to the auditor’s communication when, for the benefit of a regulator, management’s response to the auditor’s communication of significant deficiencies and material weaknesses is included in a document with the auditor’s written communication.

Communicating Other Matters

.30 Nothing in SAS No. 115 precludes the auditor from communicating to management and those charged with governance other matters related to an entity’s internal control. For example, the auditor may
communicate matters the auditor believes to be of potential benefit to the entity, such as recommendations for operational or administrative efficiency, or for improving controls. The auditor may also communicate deficiencies that are not significant deficiencies or material weaknesses. When other matters are communicated orally, the auditor should document the communication.

**Timing of Communication**

.31 Best practice is to issue the written communication by the report release date. The auditor should issue the written communication no later than 60 days following the report release date.

.32 For some matters, early communication to management or those charged with governance may be important because of their relative significance and the urgency for corrective follow-up action. Accordingly, the auditor may decide to communicate certain matters during the audit. These matters need not be communicated in writing during the audit, but significant deficiencies and material weaknesses should ultimately be included in a written communication even if such significant deficiencies or material weaknesses were remediated during the audit.

**How the Revisions Will Affect Practice**

.33 As the auditor gains a better understanding of the entity’s system of internal control over financial reporting, he or she may identify more deficiencies in internal control that are

- identified as significant deficiencies and material weaknesses, and
- communicated to management and those charged with governance.

**Discussions With Management and Others**

.34 The requirements of SAS No. 112 and now SAS No. 115 may change perceptions of the auditor’s role in the client’s internal control. The auditor may have to explain to clients that the auditor cannot be a part of their internal control. How an auditor responds to a client’s internal control weakness, in terms of designing and carrying out further auditing procedures, does not affect or mitigate a client’s internal control weakness. Just as an auditor’s response to detection risk is independent of the client’s control risk, so too the auditor’s response to a control weakness does not change the control weakness. Only the client—not the auditor—can correct deficiencies in internal control. However, a CPA firm other than the auditor can be part of a client’s internal control. This may raise new questions regarding the role of outsourcing in achieving management’s internal control objectives.

.35 The auditor may need to hold discussions with management and other users who ask how it is possible to express an unqualified opinion on the financial statements when material weaknesses in internal control were present. The auditor may wish to explain that the audit was designed to provide reasonable assurance that the financial statements are free from material misstatements. Internal control should be designed to prevent or detect material misstatements. As previously stated, the auditor cannot be part of a client’s internal control. The auditor can express an unqualified opinion on the financial statements even though material weaknesses in internal control are present, by performing sufficient procedures and obtaining appropriate audit evidence to afford reasonable assurance that the financial statements are free from material misstatement. However, these procedures do not correct deficiencies in internal control; the deficiencies in internal control could still result in a material misstatement not being prevented or detected by the client.

**Issues for Audits of Smaller Entities**

.36 One issue that may arise in audits of smaller entities is the possibility of increased costs as a result of the auditor’s time spent documenting his or her evaluation of internal control and evaluating identified deficiencies in internal control.
Another issue that may cause concern is the extent to which the auditor may be involved in the drafting of an entity’s financial statements. It is a strong indication of material weakness in internal control if the audit client has ineffective controls over the preparation of their financial statements such that client controls are absent or controls are not effective in preventing or detecting material misstatements in the preparation of financial statements, including the related footnotes. Although the auditor can propose adjustments and assist in assembling or drafting the financial statements, the auditor cannot establish or maintain the client’s controls, including monitoring ongoing activities, because doing so would impair independence.3

Opportunities to Expand Client Services

The requirements of SAS No. 112 and now SAS No. 115 introduce possible opportunities to educate the client in ways that will improve their internal control. Auditors can help clients evaluate the cost/benefit implications of improving their internal control; including training their personnel to be more knowledgeable about accounting, financial statement presentation, and internal control design. Additionally, auditors can teach clients how to develop a risk assessment approach to designing internal control.

Examples

Deficiencies in Internal Control, Significant Deficiencies, or Material Weaknesses

Exhibit B in SAS No. 115 provides examples of circumstances that may be deficiencies in internal control, significant deficiencies, or material weaknesses. This appendix includes one example in addition to those contained in the appendix to SAS No. 112. The following are the items included in the appendix within AU section 325 paragraph .29.

- Deficiencies in the design of controls
  - Inadequate design of controls over the preparation of the financial statements being audited.
  - Inadequate design of controls over a significant account or process.
  - Inadequate documentation of the components of internal control.
  - Insufficient control consciousness within the organization; for example, the tone at the top and the control environment.
  - Absent or inadequate segregation of duties within a significant account or process.
  - Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
  - Inadequate design of IT general and application controls that prevent the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
  - Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles (GAAP), the person responsible for the accounting and reporting function lacks the skills and knowledge to apply GAAP in recording the entity’s financial transactions or preparing its financial statements.
  - Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity’s internal control over time.

The absence of an internal process to report deficiencies in internal control to management on a timely basis.

- Failures in the operation of internal control
  - Failure in the operation of effectively designed controls over a significant account or process; for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
  - Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy; for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements.
  - Failure of controls designed to safeguard assets from loss, damage, or misappropriation.
  - Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
  - Undue bias or lack of objectivity by those responsible for accounting decisions; for example, consistent understatement of expenses or overstatement of allowances at the direction of management.
  - Misrepresentation by entity personnel to the auditor (an indicator of fraud).
  - Management override of controls.
  - Failure of an application control caused by a deficiency in the design or operation of an IT general control.
  - An observed deviation rate that exceeds the number of deviations expected by the auditor in a test of the operating effectiveness of a control. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because, based on the results of the auditor’s test of the sample, the desired level of confidence was not obtained.

.40 Note that the third circumstance in the preceding list, failure of controls designed to safeguard assets from loss, damage, or misappropriation, may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely.

.41 Therefore, given that the definitions of material weakness and significant deficiency relate to the likelihood of misstatement of the financial statements, the failure of a preventive control such as inventory tags will not result in a significant deficiency or material weakness if the detective control (physical inventory) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent or detect a material misstatement of the financial statements.

**Significant Deficiencies**

.42 Some examples of deficiencies that might indicate the existence of significant deficiencies in internal control:

- Controls over the selection and application of accounting principles that are in conformity with GAAP; having sufficient expertise in selecting and applying accounting principles is an aspect of such controls
- Antifraud programs and controls
• Controls over nonroutine and nonsystematic transactions

• Controls over the period-end financial reporting process, including controls over procedures used to enter transaction totals into the general ledger; initiate, authorize, record, and process journal entries into the general ledger; and record recurring and nonrecurring adjustments to the financial statements

Material Weaknesses

.43 Some examples of circumstances that indicate a deficiency in internal control that could be regarded as material weaknesses in internal control are

• identification of fraud, whether or not material, on the part of senior management;
• restatement of previously issued financial statements to reflect the correction of a material misstatement due to error or fraud;
• identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity’s internal control; and
• ineffective oversight of the entity’s financial reporting and internal control by those charged with governance.

Evaluation Questions

.44 When evaluating the severity of a deficiency in internal control, the first step is to determine whether the deficiency is a material weakness. Some questions to consider when making this determination include the following:

• Is the probability that a misstatement of any magnitude could occur and not be detected and corrected on a timely basis by the client’s controls reasonably possible?
• Is the magnitude of a potential misstatement material to the financial statements? A misstatement is material, either individually or when aggregated with other misstatements, would cause the entity’s financial statements to be materially misstated.

.45 If the answer to both questions is yes, then the deficiency is a material weakness. After that determination is made, the auditor may consider additional factors that could mitigate the affect of deficiency in internal control to the point where it can be classified as a deficiency in internal control or significant deficiency in internal control. Consider the answers to the following questions:

• Are there complementary or redundant controls that were tested and evaluated that achieve the same control objective?
• Are there compensating controls that were tested and evaluated that limit the magnitude of a misstatement of the financial statements to less than material?

.46 If the answer to either question is yes, the auditor may evaluate whether the deficiency in internal control is sufficiently mitigated to classify it as less severe than a material weakness in internal control. Before concluding that the control deficiency is not a material weakness, the auditor should consider whether prudent officials, having knowledge of the same facts and circumstances, would likely reach the same conclusion. Deficiencies considered less severe than material weaknesses but important enough to merit the attention of those charged with governance would be classified as significant deficiencies.
Case Studies

This section contains case studies that highlight a particular deficiency in internal control. Each case study contains a description of the deficiencies in internal control, and an analysis of the assessment of the severity of the deficiency. The deficiencies in internal control discussed are as follows:

- Lack of segregation of duties
- Lack of client expertise in financial accounting and reporting
- Inventory-related deficiencies in internal control
- Failure to review modifications of standard sales contracts to evaluate their effect on the timing and amount of revenue recognition
- Fraud involving cash
- Control testing exceptions

Deficiency in Internal Control 1: Lack of Segregation of Duties

Situation 1

Your client is a small nonprofit organization that has only one person in charge of the accounting and reporting functions. Through your understanding of controls over cash disbursements, you observe a lack of segregation of duties, which is a deficiency in internal control. In assessing the severity of the deficiency in internal control, you consider whether complementary, redundant, or compensating controls exist.

Additional Facts. Through obtaining your understanding of internal control, you’ve learned that a board member signs all checks, reviewing invoices that support the disbursement before signing. The signed checks are returned to the client to be mailed. The bank sends the bank statement directly to the board member, who reviews the bank statement and returned checks. The bank statement is then given to the client for reconciliation.

Discussion. Your assessment of the severity of this deficiency in internal control would be based on the effectiveness of the compensating controls performed by the board members. The compensating controls do not eliminate the deficiency but may mitigate the effects of the deficiency in internal control.

If the board member does not perform a review of the bank statement and the returned checks, verifying that all the checks have the appropriate signature and that the check payee and amount have not been altered, you might determine that the compensating control over disbursements is not effective in achieving the control objective and, therefore, a material weakness exists.

If the board member reviews only returned checks over a certain dollar amount, you might conclude that the compensating control is effective in preventing or detecting a material misstatement of cash and, therefore, this may be considered a significant deficiency because the magnitude of the reasonably possible misstatement is less than material.

However, if the board member examines the returned checks for the appropriate signature and alterations, you might conclude that the compensating control is effective in preventing or detecting an unauthorized disbursement, making the likelihood of a misstatement remote; therefore, this is only a deficiency in internal control and not a significant deficiency or material weakness.

Situation 2

Your client is a small business that has only one person in charge of the accounting and reporting functions. The bookkeeper has been with the company for many years. It is common for the owner to leave
signed, blank checks with the bookkeeper, “in case of emergencies” when the owner is gone. The owner does not perform any oversight procedures. The owner has you, the auditor, perform quarterly interim procedures. The owner believes the auditors are a substitute for his lack of oversight. One of the auditor’s quarterly procedures is to review the bank reconciliation, which is prepared by the bookkeeper.

.55 Discussion. Because the auditor cannot be part of the client’s internal control, your interim procedures, including your review of the bank reconciliations, are not compensating controls. Should the bookkeeper betray the owner’s trust, the magnitude of a potential misstatement could reasonably be expected to be material. In your professional judgment, you believe that a reasonable person would conclude that there is a reasonable possibility that a misstatement could occur and not be caught by the owner. Thus, the lack of segregation of duties and the lack of oversight would be considered material weaknesses.

Deficiency in Internal Control 2: Lack of Client Expertise in Financial Accounting and Reporting

.56 In situations 3, 4, and 5, you provide assistance to your client in the drafting of the financial statements but, as the auditor, remain independent under Ethics Interpretation 101-3, Performance of Nonattest Services, under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101par. .05). That is, you post client-approved adjusting entries to the trial balance and assist in the drafting of the financial statements from the trial balance. You are not responsible for approving adjusting entries.

Situation 3

.57 Your client’s controller is fairly skilled and is able to perform most of the functions necessary to prepare the financial statements. However, the company does not maintain a fixed asset ledger. Rather, you maintain a fixed asset ledger for them on your computer using “off-the-shelf” fixed asset software. From this software package, you are able to print for the controller a projected depreciation schedule, a gain and loss calculation report based on cost, and sales information provided to you by the controller and a final depreciation and fixed asset listing at year-end. The controller provides adequate supervision of the depreciation calculation to ensure that no conflict with Interpretation 101-3 exists. The book and tax depreciation calculation affects depreciation expense for book purposes and also the calculation of deferred taxes. The client could purchase a depreciation program but has concluded it is more cost effective to rely on you for these records.

.58 In most years, the controller provides you with a year-end adjustment if adjustments hadn’t already been made to the general ledger. However, in this particular year, the controller has been preoccupied with other tasks and asks you to calculate the year-end depreciation adjustment and gain or loss on sale adjustment. The adjustment is a material adjustment. Because you propose the adjustment, you need to consider whether a deficiency in internal control exists.

.59 Discussion. In this situation, you would begin by considering whether there is a reasonable possibility that a misstatement would not be detected. Because the auditor cannot be part of a client’s internal controls, the controls that exist in your CPA firm to perform the calculations cannot be taken into account in considering whether the client has a deficiency in internal control. Instead, you should consider what controls the client has to detect a misstatement. Based on only these facts, your judgment is that the client has the competency to perform the accounting function but has chosen not to perform these depreciation closing procedures this year.

.60 However, as long as the client reviews the depreciation and related calculations, and you believe such review procedures would prevent, detect, and correct potential misstatements, you may determine that there is not a deficiency in internal control. If the client’ procedures or controls are not able to prevent, detect, and correct a misstatement, then you would determine that there is a deficiency in internal control.
Situation 4

.61 This client has an accounting manager who requests that you assist in drafting the financial statements and notes to the financial statements. However, prior to signing the representation letter, the accounting manager obtains the financial statement grouping schedules and the schedules documenting the calculation of amounts included in the notes to the financial statements, and reviews and approves these schedules. In addition, the accounting manager obtains a current disclosure checklist from the AICPA and reviews and answers the checklist to ensure propriety and completeness of the footnotes. The financial statements are also read, revised, and approved by both the accounting manager and the owner.

.62 Discussion. Based only on the facts presented, no deficiencies in internal control were observed. You would need to further understand whether the client’s controls are designed appropriately and operating effectively, and that would be dependent on the competence and expertise of the client’s accounting manager.

.63 In assessing this situation, you would first consider whether a reasonable possibility exists that a material misstatement in the presentation and disclosure of the financial statements, including the related footnotes, could occur without being detected by the accounting manager. If you determine that the accounting manager and owner lack the necessary accounting expertise to detect a misstatement, then that would represent a deficiency in internal control that would need to be evaluated.

.64 However, you might conclude that, despite the accounting manager asking you to assist in drafting the financial statements and footnotes, they (the accounting manager and owner) do possess the necessary accounting expertise to perform effective controls to prevent, detect, and correct a potential misstatement in the financial statements or notes; therefore, you would not have a deficiency in internal control.

Situation 5

.65 At this client, you taught the bookkeeper to record cash receipts and disbursements as well as the adjusting journal entries needed to record accounts receivable and payable at year-end. The bookkeeper follows your directions and prepares a draft of the year-end financial statements from a format you provided, including relevant recurring disclosures.

.66 During your audit, you notice that the owner acquired a new delivery truck that cost $50,000—an amount that is material to the company’s financial statements—and financed the acquisition through the dealer’s finance company. You determine that the financing lease should be capitalized. The bookkeeper has recorded the monthly cash payments for the truck to the dealership but has not recorded the initial fixed asset and related liability (the owner had told her that he was leasing the truck). In discussing the new truck with the bookkeeper, you further discover that the owner was involved in a collision on the last day of the year while driving the truck, and the company’s insurance covered only a small portion of the damages. The financial statements do not reflect the capital lease and the related liability, nor does it reflect the expense and liability for the damages in excess of the company’s insurance.

.67 Discussion. Based only on these facts, you determine that a deficiency in internal control exists because the internal control system did not detect, prevent, or correct the misstatements in the client’s drafted financial statements. Because you caught this error, your judgment is that it is reasonably possible that the financial statements would be misstated, and the magnitude of the misstatement is material. Because you are the auditor, you cannot be part of the company’s internal control. The company did not have anyone on staff with sufficient expertise to properly analyze the lease and record the fixed asset acquisition, and the bookkeeper was not sufficiently knowledgeable to know that she needed help in recording these events. In this case, the quality of the financial statements was not a result of the company’s internal control. As such, you determine that the entity has a material weakness.
.68 If the bookkeeper had called you for guidance about how to account for these events, before recording them, your conclusion may have been different. A discussion with the client about a technical issue is not, in and of itself, an indication of a weakness in the company’s internal control. The client’s ability to exercise controls to detect a potential misstatement and to gain the necessary competence is a factor you would consider in your understanding of the entity’s internal control.

**Deficiency in Internal Control 3: Inventory-Related Deficiencies in Internal Control**

**Situation 6**

.69 Your client is a large car dealership. There is a lack of good controls over tracking inventory quantities of dealership parts, but a physical inventory is taken at the end of every quarter. A parts manager was selling dealership parts, not recording the sales, and keeping the receipts. Although the amount of the writedown needed to reflect actual inventory was not material to the financial statements, management became aware of the fraud when the parts manager confessed under questioning.

.70 **Discussion.** The purpose of your evaluation is to assess the probability and potential magnitude of a financial statement misstatement, not the likelihood and potential magnitude of a loss due to fraud. Because the preventive controls tracking inventory quantities are weak, the client is relying on detective controls—physical inventory—to catch any potential misstatement. From a design perspective, detective controls are seldom as effective as preventive controls, as evidenced by the fact that the client suffered a loss as a result of the weak preventive controls. However, the physical inventory was effective at detecting the loss, so that the financial statements were not materially misstated. Because you would consider the effect of compensating controls in your assessment of the severity of the deficiency in internal control, you would conclude that the preventive control weakness is mitigated by the detection control to the extent that neither a significant deficiency nor a material weakness in internal control over financial reporting exists.

.71 Although the fraud did not result in a material misstatement of the financial statements, the fraud is evidence of a deficiency in internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition. AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), requires that whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Therefore, you may wish to include this misappropriation (and other risks of fraud that you have identified) in your written communication of significant deficiencies and material weaknesses.

**Deficiency in Internal Control 4: Failure to Review Modifications of Standard Sales Contracts to Evaluate Their Effect on the Timing and Amount of Revenue Recognition**

**Situation 7**

.72 Your client uses a standard sales contract for most transactions. Individual sales transactions are not material. Sales personnel are permitted to modify the terms of the sales contract, including shipping terms. Accounting personnel review the terms of the sales contracts for significant or unusual modifications but do not review changes in the standard shipping terms. The changes in the standard shipping terms could cause a delay in the timing of revenue recognition. Management reviews gross margins on a monthly basis and investigates any significant or unusual relationships. In addition, management reviews the reasonableness of inventory levels at the end of each accounting period. There have been a limited number of instances in which revenue was inappropriately recorded, but the related amounts have not been material.

.73 **Discussion.** Based on only these facts, you determine that a deficiency in internal control exists in the design of the entity’s controls because no controls are in place to monitor a sales person’s ability to modify the standard sales contract. In evaluating the severity of this deficiency in internal control, you consider the
probability and potential magnitude of a financial statement misstatement resulting from this deficiency. The magnitude could reasonably be expected to be less than material, because individual sales transactions are not material and the compensating controls that mitigate the deficiency, which operate monthly and at the end of each financial reporting period, increase the probability that a material misstatement will be detected. Furthermore, the risk of material misstatement is limited to revenue recognition errors related to shipping terms, as opposed to broader sources of error in revenue recognition.

.74 However, the compensating controls are designed to detect only material misstatements. The controls do not effectively address the detection of misstatements that are less than material, as evidenced by situations in which transactions that were not material were improperly recorded. Therefore, there it is reasonably possible a misstatement that is less than material could occur. If you determined that this deficiency was important enough to merit the attention of management or those charged with governance, you would conclude that this deficiency is a significant deficiency.

Situation 8

.75 Your client has a standard sales contract, but sales personnel frequently modify the terms of the contract. Certain modifications can affect the timing and amount of revenue recognized. Individual sales transactions frequently are material to the entity, and the gross margin can vary significantly for each transaction.

.76 Through your understanding of internal control necessary to plan the audit, you determine that the entity has a design deficiency in that the entity does not have procedures in place for accounting personnel to regularly review modifications to the terms of sales contracts. Although management reviews gross margins on a monthly basis, the significant differences in gross margins for individual transactions make it difficult for management to identify potential misstatements. Improper revenue recognition has occurred in the past, and the amounts have been material.

.77 Discussion. The magnitude of a financial statement misstatement resulting from this deficiency in internal control would reasonably be expected to be material because individual sales transactions are frequently material, and gross margin can vary significantly with each transaction (which would make compensating controls based on a reasonableness review ineffective). Additionally, improper revenue recognition has occurred, and the amounts have been material. Therefore, the likelihood of material misstatements occurring is reasonably possible. Because, taken together, the magnitude and probability of misstatement of the financial statements resulting from this internal deficiency in internal control is material, you determine that this deficiency is a material weakness.

Situation 9

.78 The entity has a standard sales contract; however, sales personnel frequently modify the terms of the contract. Sales personnel frequently grant unauthorized and unrecorded sales discounts to customers without the knowledge of the accounting department. These discounts are taken by customers, deducted from the amount paid, and recorded as outstanding balances in the accounts receivable aging. Although the amounts of these discounts are individually insignificant, they are material in the aggregate and have occurred consistently during the past few years.

.79 Discussion. The magnitude of a financial statement misstatement resulting from this deficiency would reasonably be expected to be material, because the frequency of occurrence allows insignificant amounts to become material in the aggregate. It is reasonably possible that a material misstatement of the financial statements would result from this deficiency in internal control (even if the client fully reserved for the uncollectible accounts) due to the probability of material misstatement of the gross accounts receivable balance. Therefore, your judgment is that this deficiency represents a material weakness.
Deficiency in Internal Control 5: Fraud Involving Cash

Situation 10

.80 Your client is a small not-for-profit organization that receives most donations by check from corporate donors. Some donations are made in cash. Cash donations are not material to the financial statements. As a result of your understanding of internal control, you notice that internal control over cash receipts is inadequate. In planning your audit, you identify this as a fraud risk and you perform additional auditing procedures relative to cash receipts. Through inquiry, you learn that someone may be stealing cash. You notify management and as a result of performing certain audit tests you discover evidence that indicates that an employee was pocketing the cash and that cash donations were not being recorded.

.81 Discussion. Your judgment is that it is reasonably possible that a misstatement exists because the fraud has already occurred. The magnitude of the potential financial statement misstatement resulting from this deficiency would reasonably be expected to be less than material, as total cash sales are less than material. At a minimum, you determine that the matter is important enough that it merits the attention of those charged with governance. Thus, this deficiency is at least a significant deficiency. However, because your client is a not-for-profit organization and cash is a sensitive area, and because fraud is involved, you step back and try to look at this situation from a prudent official’s perspective. You consider how a regulator may view this, how a donor may view this, and how others in the nonprofit community may view this. In doing that, your judgment is that a prudent official would probably view an absence of controls over cash receipts as a material weakness. Therefore, you conclude that this is a material weakness.

Deficiency in Internal Control 6: Control Testing Exceptions

Situation 11

.82 In performing tests of controls during the audit, you identify an exception. You determined that the exception was one of numerous internal control exceptions that occurred during the two weeks that the controller was on vacation. Controls operated effectively before he left and after he returned to work. No misstatements in the financial statements were identified relating to that period of time.

.83 Discussion. You first need to determine whether the control testing exception is a deficiency in internal control before considering the severity of that deficiency in internal control. Effective internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting. Because effective internal control over financial reporting cannot and does not provide absolute assurance of achieving financial reporting objectives, any individual control does not necessarily have to operate perfectly, all the time, to be considered effective. You may want to gather additional evidence, beyond what you had initially planned and beyond inquiry, to support your conclusion that the exception does not represent a deficiency in internal control.

.84 You cannot use the lack of actual misstatements to lessen the severity of the deficiency in internal control in your determination, because you have to consider potential misstatements of any magnitude. Factors to consider in making your determination would include complementary, redundant, or compensating controls, which could include the monitoring activities undertaken by the controller upon returning from vacation.

Resource Central

.85 The following resources may be beneficial to practitioners and their clients.

Publications

.86 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.
AICPA reSOURCE: Accounting and Auditing Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- **Internal Control and IT: Reliable Reporting and Fraud Prevention**, a CPE course that provides an overview of the key auditing standards, conceptual frameworks, IT infrastructures, and auditing issues you are likely to face on medium to small company engagements. (Product no. 732553)

- **Internal Control Essentials for Financial Managers, Accountants and Auditors**, a basic course designed to give participants a solid understanding of systems and control documentation at the significant process level. This course will benefit controllers, managers, and internal auditors in businesses as well as auditors and consultants to public and private companies who need a review. (Product no. 731853kk)

Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics including

- **Internal Controls: Risk Assessment and Fraud - An In-Depth Review**
- **Internal Controls: Controls for Smaller Entities**
- **Internal Controls: The Control Environment - An In-Depth Review**

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading
experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

**CFO Quarterly Roundtable Series**

.91 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

**SEC Quarterly Update Series**

.92 The Securities and Exchange Commission (SEC) Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

**Member Service Center**

.93 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

**Hotlines**

**Accounting and Auditing Technical Hotline**

.94 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help.

**Ethics Hotline**

.95 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077 or by e-mail at ethics@aicpa.org.

**AICPA Governmental Audit Quality Center**

.96 The Governmental Audit Quality Center (GAQC) is a firm-based, voluntary membership center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC’s primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm’s governmental audits.

.97 The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits
- Serve as a comprehensive resource provider on governmental audits for member firms
• Create a community of firms that demonstrates a commitment to governmental audit quality
• Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues
• List member firms to enable purchasers of governmental audit services to identify firms that are members
• Provide information about the center’s activities to other governmental audit stakeholders

For more information about the GAQC, visit http://gaqc.aicpa.org.

The Center for Audit Quality

.98 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.99 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Employee Benefit Plan Audit Quality Center

.100 The AICPA Employee Benefit Plan Audit Quality Center is a firm-based, voluntary membership center created in March 2003 with the goal of promoting quality employee benefit plan audits. The center now has more than 1,500 members in all 50 states, the District of Columbia, the U.S. Virgin Islands, and Puerto Rico.

.101 Reviews performed by the U.S. Department of Labor’s Employee Benefits Security Administration continue to show a difference in the quality of Employee Retirement Income Security Act audits performed by center member firms compared with those performed by nonmember firms. As members of the center, firms have tools and resources that are not available from any other source. In addition to providing periodic e-alerts with information about recent developments affecting employee benefit plan audits, the center has recently made available to its members

• “Live Forum” and “Roundtable Discussion” conference calls to share important information and answer participant questions on a wide range of technical and practice topics. As an added benefit, the center now offers a CPE option for most calls.
• two new “Topix” primers on cash balance plans and Section 403(b) plans to help members gain a general understanding of these types of plans.
• three new “Plan Advisories” for members to share with plan stakeholders about issues of importance for plan auditors, including the plan sponsor and trustees’ responsibility for monitoring their TPAs, the importance of internal controls, and the plan sponsor’s responsibility for valuing plan investments.

.102 Visit the center Web site at www.aicpa.org/ebpaqc to see a complete list of center members and to preview center benefits. For more information, contact the center at ebpaqc@aicpa.org.
Antifraud/Forensic Accounting Resource Center

.103 The AICPA’s Antifraud/Forensic Accounting Resource Center may be found at www.aicpa.org/antifraud/. The center contains a variety of tools for auditors, financial managers and those charged with governance. Topics covered in the resource center include identifying internal control risk factors and fraud prevention, detection and investigation in a variety of practical formats including checklists, guides, and case studies.

Audit Committee Effectiveness Center

.104 Realizing that financial statement integrity and reliability depends upon balancing the pressures of multiple stakeholders, including management, regulators, investors, and the public interest, this center provides guidance and tools to make audit committee best practices actionable. Several audit committee toolkits are offered through this center, including those for public companies, not-for-profits, and governments.

Audit Committee Matching System

.105 The Audit Committee Matching System was designed to provide members with opportunities to serve on boards of directors and as a public service to provide a list of qualified, credentialed candidates to serve on boards of directors and presumably the audit committees of those boards. The AICPA’s Audit Committee Effectiveness Center Web page at www.aicpa.org/audcommctr/homepage.htm also contains a link to the Audit Committee Matching System.

These examples are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of departure when drafting reports to meet their individual needs. This manual is a nonauthoritative kit of practice aids and, accordingly, does not include extensive explanation or discussion of authoritative pronouncements. Please refer directly to applicable authoritative pronouncements when appropriate.

These examples illustrate the body of various reports. For comment on addressing and dating of the report, see AAM section 9100.

Examples that are assembled from illustrative reporting language set forth in Statements on Auditing Standards (SASs) and Statements on Standards for Accounting and Review Services include citation of the particular source and its location in AICPA Professional Standards.

References to Professional Standards. When referring to the professional standards, this manual cites the applicable sections as codified in the AICPA Professional Standards and not the numbered statements, as appropriate. For example, SAS No. 54, Illegal Acts by Clients, is referred to as AU section 317 of the AICPA Professional Standards. All references to AU sections may be found in AICPA Professional Standards, volume 1.

AAM Section 9100

Format of Accountants’ Reports

Report Preparation

.01 Firms usually develop standard policies and procedures for preparing and issuing reports. The following are some suggested report preparation policies that the auditor may consider:

- **Letterhead.** The report is typically presented on firm letterhead.

- **Addressee.** The report may be addressed to the board of directors, stockholders, partners, general partners, proprietors, or to the company whose financial statements are being audited. If the firm was engaged by others, the report may be addressed thereto.

  The Board of Directors  
  XYZ Credit Union  
  City, State Zip Code

- **Salutation.** A salutation is not typically included on the report.

- **Report signing.** The firm name is usually manually signed by the engagement partner. The words “Certified Public Accountants” may be excluded from the signature if they are a normal part of the firm’s letterhead.

- **Report dating.** Audit reports should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion.
  
  — The date is typically presented at the bottom of the page along with the city and state, if it is not included in firm letterhead, as follows:

    City, State  
    April 5, 20XX

  — When a subsequent event disclosed in the financial statements occurs after the original date of the auditor’s report but before the issuance of the related financial statements, the auditor may use dual dating or date the report as of the later date. The following illustrates dual dating:

    City, State  
    February 26, 20XX, except for Note X as to which the date is April 5, 20XX

- **Level of service.** The level of service performed and the nature of the report are typically outlined in the engagement letter. The letter should be revised for any significant changes from the original understanding with the client, such as in the event of a step-up or step-down in the level of service.
  
  — The partner typically approves any step-up or step-down in level of service. A step-up in level of service may occur after obtaining a revised understanding with the client. The auditor may consider a step-down in level of service only after carefully evaluating the reasons for the change because the reasons for the change may also affect the report on lower levels of service. Limitations on the scope of an audit, for example, may also preclude issuing a review or compilation report.

  — If more than one level of service is performed for financial statements of the same period (for example, compilation and audit), the financial statements need only be accompanied by the report on the highest level of service performed.
Reports on Audited Financial Statements

.02 Generally accepted auditing standards (GAAS) establish reporting responsibilities. Following are the four standards of reporting\(^1\) stated in paragraph .02 of AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1):

a. The auditor must state in the auditor’s report whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).\(^2\)

b. The auditor must identify in the auditor’s report those circumstances in which GAAP has not been consistently applied in the current period in relation to the preceding period.

c. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor’s report.

d. The auditor must either express an opinion regarding the financial statements taken as a whole or state that an opinion cannot be expressed in the auditor’s report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor’s report. In all cases where an auditor’s name is associated with financial statements, the auditor should clearly indicate the character of the auditor’s work, if any, and the degree of responsibility the auditor is taking in the auditor’s report.

Standard Report

.03 The standard auditor’s report prescribed by AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), may be used when the auditor has formed an opinion, based on the application of GAAS,\(^3\) that the financial statements present fairly, in all material respects, an entity’s financial position, results of operations, and cash flows in accordance with GAAP. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. GAAP). It should state that the financial statements identified in the report were audited. A standard auditor’s report for the presentation of comparative financial statements is illustrated in paragraph .01 of AAM section 9210.

Modifications of the Standard Auditor’s Report

.04 AU section 508 describes situations that may require auditors to modify the standard report and also provides illustrations of the appropriate modifying language. These modifications, which are discussed in greater depth subsequently, are as follows:

- **Explanatory language.** A wide variety of situations may arise that require a modification of the standard auditor’s report, without affecting the expression of an unqualified opinion. Some of the more common of such situations are going-concern problems, part of the financial statements have been audited by another auditor, or a significant change in accounting principles. The explanatory paragraph for situations that do not affect the auditor’s opinion may precede or follow the opinion paragraph, unless otherwise required by AU section 508.

- **Qualified opinion.** Qualified opinions result from two general categories of situations: scope limitations and departures from GAAP. A scope limitation arises when the auditor has been unable to perform all of the auditing procedures he or she believes are necessary to express an unqualified opinion on

---

\(^1\) The reporting standards apply only when the auditor issues a report.

\(^2\) When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), the first standard of reporting is satisfied by stating in the auditor’s report that the basis of presentation is a comprehensive basis of accounting other than GAAP and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

\(^3\) Paragraph .08 of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), indicates that one of the basic elements of the standard report is an identification of the United States of America as the country of origin of those standards (for example, auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards [GAAS]).
the financial statements. Financial statements containing a material departure from GAAP, including inadequate disclosures in the financial statements, may lead the auditor to qualify his or her opinion. Both situations require an explanatory paragraph to be included, preceding the opinion paragraph, describing the nature of the scope limitation or the departure from GAAP.

- **Disclaimer of opinion.** A disclaimer of opinion is appropriate when
  
  - the scope of the audit has been restricted so significantly that the auditor does not have a basis for forming an opinion on the financial statements. In this case, an explanatory paragraph, preceding the disclaimer paragraph, should be included in the auditor’s report to explain all significant reasons for the disclaimer.
  
  - the auditor is not independent, in which case a one paragraph disclaimer is issued (applies for issuers only). A compilation report with a lack of independence noted should be issued for nonissuers entities.

- **Adverse opinion.** An adverse opinion is expressed on financial statements that do not present fairly the entity’s financial position, results of operations, or cash flows in conformity with GAAP. In other words, the auditor concludes that the financial statements are not fairly presented in accordance with GAAP. When the auditor expresses an adverse opinion, he or she should disclose in a separate explanatory paragraph, preceding the opinion paragraph, all of the substantive reasons for the adverse opinion and, if practical, the effects of the subject matter of the adverse opinion on the financial statements.

### Scope Limitations

.05 Restrictions on the scope of an audit, whether imposed by the client or by circumstances such as the timing of the auditor’s work, the inability to obtain sufficient competent audit evidence, or an inadequacy in the client's accounting records, may require a qualified opinion or a disclaimer of opinion. Deciding whether to qualify or disclaim is a matter of judgment, and generally the primary factor in this decision is the materiality of the financial statement items affected. However, other factors may be considered, such as the pervasiveness of the effects of the omitted auditing procedures and the nature of the financial statement items affected.

### Departures From GAAP

.06 **Unacceptable Principles.** When financial statements are materially affected by a departure from GAAP, the auditor should express either a qualified or adverse opinion. Choosing between a qualified or adverse opinion depends on the magnitude of the departure. While the materiality of the effects of the departure is a primary consideration, the auditor may also consider the pervasiveness of the departure (such as the number of financial statement items affected), the importance of the departure to the organization’s activities and its ability to obtain funding, and the dollar effect of the departure on individual financial statement items as well as the statements as a whole.

.07 For both qualified and adverse opinions, an explanatory paragraph should be included, preceding the opinion paragraph, that describes all of the substantive reasons for the auditor’s opinion and the effects on the financial statements, if readily determinable. If it is not practical to determine the effects of the departure, the explanatory paragraph should contain a statement to that effect. If information about the effects of the departure is described in the notes, the explanatory paragraph may be shortened by referring to the note.

.08 **Inadequate Disclosure.** Departures from GAAP include not just inappropriate application of accounting principles, but also omitted or inadequate disclosures in the financial statements. In such situations, the auditor should add an explanatory paragraph, preceding the opinion paragraph, that describes the nature of the inadequate or omitted disclosure and, if practical, the information that should have been disclosed. The significance of the omitted or inadequate disclosure will determine whether a qualified or adverse opinion is appropriate.
.09 Report Modification. The opinion paragraph for a qualified opinion due to a departure from GAAP should include the words except or exception and a reference to the explanatory paragraph that describes that departure. Adverse opinions should include language such as “do not present fairly” and should also include a reference to the explanatory paragraph. A qualified opinion indicating a departure from GAAP is presented in paragraph .02 of AAM section 9240. An adverse opinion indicating a departure from GAAP is presented in paragraph .01 of AAM section 9220.

Errors, Fraud, and Illegal Acts

.10 If the financial statements are materially affected by an error, fraud, or illegal act that has not been properly accounted for and disclosed, a qualified or adverse opinion may be considered. If the auditor is precluded from applying necessary procedures or from obtaining sufficient information to conclude whether an error, fraud, or illegal act that could be material to the financial statements has occurred, a qualified or disclaimer of opinion may be issued. All such matters could be discussed immediately with the engagement partner.

.11 If a client will not accept modification of the report under the circumstances above, the firm may wish to consider withdrawing from the engagement and consulting with legal counsel.

Consistency Exceptions

.12 Accounting changes affecting consistency include the following:

- A change from one generally accepted accounting principle to another method, practice or principle that is different from the one previously used
- A change from an unacceptable to an acceptable principle (correction of an error)
- A change in financial statement classification that significantly affects financial position or results of operations (for example, classification of an item in earnings from operations as other income or expense)
- A change in reporting entity

.13 Accounting changes that do not normally affect consistency include the following:

- Initial adoption of an existing accounting principle for a new event or transaction
- Insignificant reclassification
- Correction of errors not involving a principle
- Changes in accounting estimates

.14 The nature of the accounting change will determine whether prior periods should be restated or a cumulative adjustment should be included in current activities. In either event, the change should be disclosed in the notes to the financial statements and in the auditor’s report in a separate paragraph following the opinion paragraph. The auditor’s concurrence with a change is implicit unless he or she takes exception to the change. The opinion paragraph would be standard unless the change is to an unacceptable principle or method, the change is not justified, or a prospective change of a principle requiring retroactive adjustment is not discussed. In such situations, either a qualified or adverse opinion should be issued.

Uncertainties

.15 Uncertainties are significant circumstances, events, or transactions affecting the financial statements, the outcome of which cannot be reasonably estimated. Uncertainties are a particularly complex area because they can result in a qualified or adverse opinion due to a departure from GAAP, a qualified opinion, or disclaimer due to a scope limitation. Uncertainties include, but are not limited to, contingencies covered by
Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 450, Contingencies, and matters related to estimates covered by FASB ASC 275, Risks and Uncertainties.

.16 Uncertainties Not Requiring Modification of the Opinion. Paragraph .30 of AU section 508 states that when the auditor has concluded that sufficient audit evidence supports management’s assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate.

.17 Scope Limitations. If the auditor is unable to obtain sufficient audit evidence to support management’s assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. In some ways, information about uncertainties may always be considered insufficient because it is dependent on future, unknown events. However, if the auditor determines that audit evidence did or does exist, but it is unavailable to him or her (for example, because the information was destroyed or management will not allow the auditor to have access to it), the auditor may consider modifying the report for a scope limitation.

.18 Departures From GAAP. Paragraph .45 of AU section 508 describes three categories of departures from GAAP involving risks or uncertainties:

- Inadequate disclosure
- Inappropriate accounting principles
- Unreasonable accounting estimates

.19 If the auditor concludes that a matter involving a risk or uncertainty is not adequately disclosed in the financial statements in conformity with GAAP, the auditor should express a qualified or adverse opinion.

.20 Also, a departure from GAAP may exist if management has made inappropriate estimates of future events in applying accounting principles (such as the use of unreasonable expected lives of depreciable assets for calculating depreciation) or in making other accounting estimates.

.21 Going-Concern Uncertainties. If the auditor concludes that there is substantial doubt about the organization’s ability to continue as a going concern, the situation should be described in an explanatory paragraph, following the opinion paragraph. The explanatory paragraph may describe the principal events and conditions related to the going concern, their possible effects on the financial statements, management’s plans for corrective actions, and the auditor’s conclusion that substantial doubt exists. Paragraphs .12-.13 of AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1), imposes the additional requirement that the explanatory paragraph include the terms substantial doubt and going concern. The auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity’s ability to continue as a going concern in the going concern explanatory paragraph.

.22 If financial statement disclosures about the uncertainty are inadequate, a departure from GAAP exists and either a qualified or adverse opinion may be necessary.

Reporting on Supplementary Information

.23 Supplementary information includes detailed schedules of other data that are not necessary for a fair presentation of the basic financial statements. Whenever supplementary information is included in an auditor submitted document, the auditor has a responsibility to report on all of the information included in the document. A separate report on the supplementary information or a separate paragraph in the report on the basic financial statements may be used to report on supplementary information. If a separate report is issued, it may be on the firm’s letterhead and should be signed. The report date should be the same as for the basic financial statements.
.24 Reports on supplementary information should express or disclaim audit assurance. The nature of the engagement and the extent and results of testing of supplementary information will determine the firm’s responsibility in each circumstance. If a separate report on the supplemental information is issued, the first sentence of that report may refer to the report on the basic financial statements.

Reporting on a Single Statement

.25 In certain circumstances, an engagement to audit a single financial statement may be accepted. Generally these engagements, called limited reporting engagements, are a result of the client needing a single financial statement to fulfill a contractual requirement, such as an organization that must provide its landlord with an audited income statement for purposes of calculating rent. Also, entities that have never been audited often request an audit of the statement of financial position only for the first year, with the intention of having audits of the entire financial statements in the future. Generally such engagements are accepted as long as there is a legitimate reason for the limited engagement and provided that there are no restrictions on access to information underlying the financial statements or on the scope of the procedures the auditor needs to perform. In such engagements, an unqualified opinion may be expressed on the financial statement the auditor was engaged to audit. If the other financial statements are presented, a disclaimer of opinion may be issued on those statements. An unqualified opinion on a single statement audit is presented in paragraph .03 of AAM section 9210.

Relying on the Work of a Specialist

.26 The firm may engage specialists to perform certain work supporting representations in the financial statements. AU section 336, Using the Work of a Specialist (AICPA, Professional Standards, vol. 1), indicates that if a review of the specialist’s work finds it satisfactory, and if no report modification is necessary because of the specialist’s findings, the auditor should not refer to the specialist’s work.

.27 If the specialist’s work is not adequate to support the financial statement representations, a qualification or disclaimer of opinion because of a scope limitation may be appropriate. Findings of the specialist that indicate the financial statements are not in accordance with GAAP may necessitate a qualified or adverse opinion.

Lack of Independence

.28 For issuers, whenever the auditor is not independent with respect to a client whose financial statements have been audited, a disclaimer of opinion should be issued. The Public Company Accounting Oversight Board (PCAOB), through PCAOB Rule 3600T, Interim Independence Standards (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), has provisionally designated Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .01), of the AICPA Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003. Independence Standards Board (ISB) Standard No. 2, Certain Independence Implications of Audits of Mutual Funds and Related Entities, ISB Standard No. 3, Employment with Audit Clients and ISB Interpretation 99-1, Impact on Auditor Independence of Assisting Clients in the Implementation of FAS 133 (Derivatives) (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended, “Independence Standards Board”), provide interim independence standards for registered public accounting firms performing audits of issuers. The PCAOB’s interim independence rules do not supersede the independence rules of the Securities and Exchange Commission (SEC). Therefore, to the extent that a provision of the SEC’s rule or policy is more restrictive—or less restrictive—than the PCAOB’s interim independence standards, a registered public accounting firm must comply with the more restrictive requirement. For nonissuers, the firm may only issue a compilation report that includes a statement that the firm is not independent.

.29 PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), provides guidance related to the auditor’s responsibilities when seeking audit committee preapproval of internal
control related nonaudit services. The rule is intended to ensure that audit committees are provided relevant information for them to make an informed decision on how the performance of internal control-related services may affect independence. Specifically, the public accounting firm shall describe, in writing, the scope of the service and submit to the audit committee, as well as discuss with the audit committee the potential effects of the service on the firm’s independence. Issuers are also required to document the substance of such discussions in writing. The full text of this rule can be found at www.pcaob.org/Rules/Rules_of_the_Board/Rule_3525.pdf.

.30 PCAOB Rule 3526, Communication with Audit Committees Concerning Independence (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), which builds on ISB Standard No. 1, provides that before accepting a new audit engagement and annually thereafter the auditor must describe in writing to the audit committee all relationships between the auditor and the client (including affiliates of both) that reasonably could be thought to bear on independence. The auditor must also discuss these matters with the audit committee, and document the substance of that discussion. The full text of this rule can be found at www.pcaobus.org/Rules/Docket_017/2008-04-22_Release_2008-003.pdf.

Reissuance of Audit Reports as Predecessors

.31 If the auditor is asked by a former client to reissue its report on prior-period financial statements, he or she should inform the client of the procedures necessary to comply with that request. If the client agrees to perform these procedures, and pay the fee for these services, the auditor would ordinarily agree to reissue the report.

.32 Before reissuing a report, the auditor should consider whether the previous opinion on those prior period statements is still appropriate. Differences in the current form and presentation of the financial statements for the prior period, or the possibility of material subsequent events affecting those financial statements, could make the previous opinion inappropriate. The auditor should perform at least the following procedures:

- Read the financial statements of the current period.
- Compare the prior-period financial statements with the financial statements to be presented in comparative format by the successor.
- Obtain a letter of representation from the management of the former client and successor auditor. The representation letter from management of the former client should state (a) whether any information has come to management’s attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance sheet date of the latest prior period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements. The successor should represent that his or her audit has not revealed any matters that may have a material effect on the prior period financial statements.

.33 If the firm reissues its report without change, the previous report date should be used. If the financial statements or the report of the prior period are revised, the report should be dual dated as to the event or matter causing the revision. There should be no reference to the report or the work of the successor auditor.

---

Reissuance of the Audit Report Subsequent to the Date of Original Issue

.34 Occasionally the firm may be requested by a client to furnish additional copies of a previously issued report. Approval of the engagement partner may be necessary to reissue a previously issued report. In such situations, the engagement partner may prepare a memo stating the reasons for the reissuance and that he or she is not aware of any circumstances occurring since the original report date that would require adjustment to or disclosure in the financial statements.

.35 Use of the original report date removes any implication that records, transactions, or events after that date have been audited or reviewed. Although the auditor has no responsibility to make further investigation or inquiry as to subsequent events, the engagement partner may consider a brief discussion with the client’s chief financial or executive officer before reissuing his or her report.

Subsequent Discovery of Facts Existing at Report Date

.36 Although the auditor has no obligation to make any continuing inquiries or perform other procedures after issuing his or her report, the auditor may become aware of information that affects the financial statements upon which he or she has previously reported. When becoming aware of such information, the auditor should determine the reliability of the information and whether such information existed at the date of the report. The auditor should make inquiries of client management in this regard.

.37 If the information is reliable and did exist at the date of the report, if the report would have been affected if the information had been known at the report date, and if there are persons relying on the financial statements who would attach importance to the information, the auditor should take action to prevent future reliance on the report. If the engagement partner concludes that action should be taken to prevent future reliance on the report, he or she should advise the client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to the persons known to be, or likely to be, relying on the financial statements and related report. Disclosures may be made in one of the following ways:

- If the effects of subsequent facts can be promptly determined, disclosure should include reissuing revised financial statements and a revised report. The reasons for the revision usually should be described in a note to the financial statements and referred to in the auditor’s report.

- If the current financial statements have not been released, appropriate disclosure of the revision of the prior period financial statements can be included therein.

- When the effects of subsequent facts cannot be readily determined, revisions of financial statements and reports may be delayed. In this case, persons known to be, or likely to be, relying on the financial statements should be notified by the client that the financial statements and related reports should not be relied on, and that revised financial statements and report will be forthcoming.

.38 If the client refuses to make the disclosures discussed in the preceding paragraph, the auditor may wish to contact legal counsel. He or she should also notify all members of the board of directors of such refusal. The firm will take the following steps to prevent future reliance on its report:

- Notify the client that the auditor’s report must no longer be associated with the financial statements.

- Notify any applicable regulatory agencies that the report should no longer be relied upon.

- Notify each person known to be relying on the financial statements that the report should no longer be relied upon.

---

5 The AICPA Auditing Standards Board Interpretation No. 1, “Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report,” of AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1, AU sec. 9341 par. .01–.02), provides guidance regarding situations when a previously issued report contains a going-concern explanatory paragraph, and the situation that gave rise to the going-concern has been resolved.
.39 If the auditor’s investigation of the subsequently discovered information is satisfactory, and he or she has determined that the information is reliable, the notifications in paragraph .36 should include a description of the effects of the information on the financial statements. If the client has not cooperated and, as a result, the auditor has been unable to conduct a satisfactory investigation, the auditor does not need to indicate the details of the information. Instead, the auditor can merely indicate that information has come to his or her attention that his or her client has not cooperated in attempting to substantiate, and that, if the information is true, the auditor believes that his or her report must no longer be relied upon nor should the auditor be associated with the financial statements.

Unqualified Opinions

.01 Auditor’s Standard Report—Comparative Financial Statements

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.02 Auditor’s Standard Report—Single Year Financial Statements

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

.03 Report on a Single Statement Audit (Balance Sheet Only Presented) [Assuming the auditor is able to satisfy himself or herself regarding the consistency of application of accounting principles]

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX. This financial statement is the responsibility of the Company’s management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

[Source: Paragraph .34 of AU section 508]

Note: If reporting on a single statement (for example, balance sheet only) when other financial statements are also presented, the following paragraph may be added after the opinion paragraph:

Because we were not engaged to audit the statements of income, retained earnings, and cash flows, we did not extend our auditing procedures to enable us to express an opinion on the results of operations and cash flows for the year ended December 31, 20XX. Accordingly, we express no opinion on them.
.04 Reference to Other Auditors—Successor Auditor’s Report When Predecessor’s Report (Unqualified) Is Not Presented

Independent Auditor’s Report

Addressee:

We have audited the balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Practice Tip

(1) The successor auditor should not name the predecessor auditor in his report; however, the successor auditor may name the predecessor auditor if the predecessor auditor’s practice was acquired by, or merged with, that of the successor auditor.

[Source: Paragraph .74 footnote 29 of AU section 508]
Reference to Other Auditors in Report

Independent Auditor’s Report

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of $_______ and $________ as of December 31, 20X2 and 20X1, respectively, and total revenues of $_______ and $_______ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

¹ This paragraph may be added to the report when the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments.
.08 Reference to Other Auditors—Prior Year Financial Statements Restated Following a Pooling of Interests

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We previously audited and reported on the consolidated statements of income and cash flows of XYZ Company and subsidiaries for the year ended December 31, 19X1, prior to their restatement for the 19X2 pooling of interests. The contribution of XYZ Company and subsidiaries to revenues and net income represented . . . . . percent and . . . . . percent of the respective restated totals. Separate financial statements of the other companies included in the 19X1 restated consolidated statements of income and cash flows were audited and reported on separately by other auditors. We also audited the combination of the accompanying consolidated statements of income and cash flows for the year ended December 31, 19X1, after restatement for the 19X2 pooling of interests; in our opinion, such consolidated statements have been properly combined on the basis described in Note A of notes to consolidated financial statements.

² This paragraph may be added to the report when the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments.
Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We have conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The 20X1 financial statements were reviewed by other accountants who have ceased operations, and their report thereon, dated March 1, 20X2, stated they were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

.12 Reference to Other Accountants—Report on Nonpublic Entity Presented With Prior Period
Financial Statements Compiled by a Predecessor Accountant Who Has Ceased Operations

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X2, and the related
statements of income, retained earnings, and cash flows for the year then ended. These financial statements
are the responsibility of the Company’s management. Our responsibility is to express an opinion on these
financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of
America. Those standards require that we plan and perform the audit to obtain reasonable assurance about
whether the financial statements are free of material misstatement. An audit includes examining, on a test
basis, evidence supporting the amounts and disclosure in the financial statements. An audit also includes
assessing the accounting principles used and significant estimates made by managements, as well as
evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis
for our opinion.

In our opinion, the 20X2 financial statements referred to above present fairly, in all material respects, the
financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows
for the year then ended in conformity with accounting principles generally accepted in the United States of
America.

The 20X1 financial statements were compiled by other accountants who have ceased operations, and their
report thereon, dated February 1, 20X2, stated that they did not audit or review those financial statements and,
accordingly, express no opinion or any other form of assurance on them.

.14 Going Concern—Uncertainty

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management’s plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[Source: Paragraph .08 of AU section 508 and paragraph .13 of AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1)]

Note: In a going-concern explanatory paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity’s ability to continue as a going concern.
.15 Liquidation Basis of Accounting—Single Year Financial Statements

Independent Auditor’s Report

Addressee:

We have audited the statement of net assets in liquidation of XYZ Company as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. In addition, we have audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets in liquidation of XYZ Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph.

.16 Liquidation Basis of Accounting—Comparative Financial Statements

Independent Auditor’s Report

Addressee:

We have audited the balance sheet of XYZ Company as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. In addition, we have audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph.

.17 Comparative Financial Statements—Unqualified Opinion on the Current Year’s Financial Statements With Disclaimer of Opinion on the Prior Year’s Statements of Income, Retained Earnings, and Cash Flows

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

In our opinion, the balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

Note: This report assumes that the independent auditor has been able to satisfy himself as to the consistency of application of generally accepted accounting principles.
.18 Comparator Financial Statements—Subsequent Restatement of Prior-Period Financial Statements to Conform With Generally Accepted Accounting Principles

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The 20X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

Notes: The preceding report illustrates a disclaimer of opinion as described in paragraphs .05 and .17 of AU section 504 when the financial statements are those of a public entity. For a nonpublic entity, see paragraphs .19–.20 in this section.

When unaudited financial statements are presented in comparative form with audited financial statements, the unaudited financial statements should be clearly marked to indicate their status.
Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 20XX and the related statements of income, retained earnings, and cash flows for the year then ended which, as described in Note X, have been prepared on the basis of accounting principles generally accepted in [name of country]. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (and in [name of country]). U.S. standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of International Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in [name of country].

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheet of International Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note X to the financial statements, the Company has recorded fixed assets in excess of historical cost using appraised value as the basis for adjustment in accordance with accounting principles generally accepted in [name of country]. If the fixed assets had been recorded at historical cost, fixed assets and retained earnings would be decreased by $XXX,XXX and $XXX,XXX respectively, as of December 31, 20XX, and net income and earnings per share would be increased by $X,XXX and $X.XX respectively for the year then ended.

In our opinion, except for the effects of recording the fixed assets in excess of historical costs, discussed in the preceding paragraph, the financial statements present fairly, in all material respects, the financial position of International Company as of December 31, 20XX, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

(Optional Paragraph)

In our opinion, the financial statements referred to above present fairly the financial position of the International Company at December 31, 20XX, and the results of its operations and its cash flows for the year then ended, in conformity with accounting principles generally accepted in [name of country].

[Signature]

Note: This report does not apply to reports on financial statements of U.S. subsidiaries of foreign registrants presented in Securities and Exchange Commission (SEC) filings of foreign parent companies where the subsidiaries’ financial statements have been prepared on the basis of accounting used by the parent company.
.24 Correction of an Error, Not Involving an Accounting Principle

**Independent Auditor’s Report**

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, certain errors resulting in an understatement of previously reported expenses for the years ended December 31, 20X1 and 20X0 were discovered by the Company’s management during the current year. Accordingly, the 20X1 financial statements have been restated and an adjustment has been made to retained earnings as of January 1, 20X1 to correct the errors.

Note: This report would be used when the issuance of financial statements accompanied by the auditor’s report for a subsequent period is imminent so that disclosure is not delayed (paragraph .06b) of AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report* [AICPA, Professional Standards, vol. 1)].
.25 Subsequent Event Prior to Issuance of Auditor’s Report

Independent Auditor’s Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note X to the financial statements, on March 1, 20X3, the Company entered into an agreement to sell Subsidiary A. This Subsidiary represents X percent of the Company’s total assets and X percent of its revenues.

[Signature]

.26 Reissued Report Due to Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report

Independent Auditor’s Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 10 to the financial statements, the Company’s 20X2 [specify account corrected] previously reported as $XX,XXX should have been $X,XXX. This discovery was made subsequent to the issuance of the financial statements. The financial statements have been restated to reflect this correction.

.27 Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of XYZ Company as of December 31, 20X4, and the related statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

Note: The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.
.28 Reference to Public Company Accounting Oversight Board Standards in an Audit Report on a Nonissuer

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of XYZ Company as of December 31, 20X4, and the related statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards as established by the Auditing Standards Board (United States) and in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]
[Date]

[Source: Paragraph .92 of Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report on a Nonissuer,” of AU section 508 (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .89–.92)]

Note: This example includes the illustrative language from paragraph .88 of AU section 9508. Because the Public Company Accounting Oversight Board’s (PCAOB) Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting that is Integrated With An Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), requires an audit of internal control for those entities that are subject to Section 404(a) of the act, an audit of a nonissuer performed under PCAOB auditing standards does not require an audit of internal control unless otherwise required by a regulator with jurisdiction over the nonissuer. The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.

AAM Section 9220

Adverse Opinions

.01 Departures from GAAP

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased $_______ and $_______ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at $_______ and $_______ in excess of an amount based on the cost to the Company; and deferred income taxes of $_______ and $_______ have not been recorded; resulting in an increase of $_______ and $_______ in retained earnings and in appraisal surplus of $_______ and $_______, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased $_______ and $_______, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of $_______ and $_______ have not been provided, resulting in an increase in net income of $_______ and $_______, respectively.
In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended.

Disclaimers of Opinion

.01 Beginning Inventory Not Observed (First Examination)

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.¹

Except as discussed in the following paragraph, we conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Because we were not engaged as auditors until after December 31, 20X1, we were not present to observe the physical inventory taken at that date and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities. Accordingly, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the accompanying statements of income, retained earnings and cash flows for the year ended December 31, 20X2.

In our opinion, the balance sheet referred to above presents fairly, in all material respects, the financial position of X Company as of December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: Paragraph .26 of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1)]

¹ Although the introductory paragraph of the standard disclaimer of opinion begins with “We were engaged to audit ...” and the scope paragraph of the report is omitted, paragraph .67 of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), shows that the introductory paragraph does not need to be modified nor does the scope paragraph need to be omitted when the disclaimed financial statements are with audited financial statements.
.02 Inability to Obtain Sufficient Competent Evidential Matter Due to a Scope Limitation

Independent Auditor’s Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management.²

[Second paragraph of standard report should be omitted]

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_______ as of December 31, 20X2, and at $_______ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company’s records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[Signature]
[Date]

[Source: Paragraph .63 of AU section 508]

² The wording in the first paragraph of the auditor’s standard report is changed in a disclaimer of opinion because of a scope limitation. The first sentence now states that “we were engaged to audit” rather than “we have audited” since, because of the scope limitation, the auditor was not able to perform an audit in accordance with generally accepted auditing standards. In addition, the last sentence of the first paragraph is also deleted, because of the scope limitation, to eliminate the reference to the auditor’s responsibility to express an opinion.
Independent Auditor’s Report

Addressee:

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at $_______ as of December 31, 20X2, and at $_______ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company’s records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[Signature]

AAM Section 9240

Qualified Opinions

.01 Scope Limitation—Investment in Foreign Affiliate (Assuming Effects Are Such That Qualification Rather Than Disclaimer Is Appropriate)

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company’s investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Independent Auditor’s Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.03 Departure From GAAP—Leases Not Capitalized—Pertinent Facts Disclosed in Note

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

.04 Inadequate Disclosure—Omission of Disclosures

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The Company’s financial statements do not disclose [describe the nature of the omitted information that it is not practicable to present in the auditor’s report]. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: Paragraph .42 of AU section 508]

Note:

This report assumes the effects are such that the auditor has concluded an adverse opinion is not appropriate.
.05 Inadequate Disclosure—Omission of Statement of Cash Flows

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income and retained earnings for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company’s operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Source: Paragraph .44 of AU section 508]
.06 Change in Accounting Principle Without Reasonable Justification

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification for making this change as required by those principles.

In our opinion, except for the change in accounting principle discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: Paragraph .52 of AU section 508]

Note:

If the change was from an accounting principle that is not generally accepted to one that is generally accepted it would be a correction of an error and would require recognition in the auditor’s report as to consistency. However, because the middle paragraph contains all of the information required in an explanatory paragraph (following the opinion paragraph) as required by paragraph .16–.18 of AU section 508, an explanatory paragraph is not required in this instance.
Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The company previously recorded its land at cost but adjusted the amounts to appraised values during the year, with a corresponding increase in stockholders’ equity in the amount of $_____. In our opinion, the new basis on which land is recorded is not in conformity with accounting principles generally accepted in the United States of America.

In our opinion, except for the change to recording appraised values as described above, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: Paragraph .55 of AU section 508]
More than One Reason—Qualified Opinion on Prior Year’s Financial Statements With the Current Year Qualified for the Same Reason and an Additional Reason

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as discussed in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company’s investment in a foreign affiliate stated at $_______ and $_______ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of $_______ and $_______, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2, which in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $____, long-term debt by $____, and retained earnings by $____, as of December 31, 20X2. Additionally, net income would be increased (decreased) by $____ and earnings per share would be increased (decreased) by $____ for the year then ended.

In our opinion, except for the effects on the 20X2 and 20X1 financial statements of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, and except for the effects of the 20X2 financial statements of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to in the first paragraph above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Information Accompanying Audited Financial Statements

.01 Omission of Supplementary Information Required by the Financial Accounting Standards Board (FASB)

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The Company has not presented [describe the supplementary information required by generally accepted accounting principles (GAAP)¹] that accounting principles generally accepted in the United States has determined is necessary to supplement, although not required to be part of, the basic financial statements.

[Signature]

[Date]

[Source: Paragraph .08 of AU section 558, Required Supplementary Information (AICPA, Professional Standards, vol. 1)]

¹ The auditor may identify the body requiring the information, such as the Financial Accounting Standards Board (FASB) in this example.
Independent Auditor’s Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City’s basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example’s management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The City of Example, Any State, has not presented [describe the supplementary information required by GAAP] that accounting principles generally accepted in the United States of America require to supplement, although not to be part of, the basic financial statements.

.03 Material Departures From FASB Guidelines for Required Supplementary Information

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [specifically identify the supplementary information] on page XX is not required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. As result of such limited procedures, we believe that the [specifically identify the supplementary information] is not in conformity with accounting principles generally accepted in the United States because [describe the material departure(s) from the GAAP4 guidelines].

[Signature]
[Date]

[Source: Paragraph .08 of AU section 558]

Note: Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by GAAP. However, management may choose not to place the required supplementary information outside the basic financial statements. In such circumstances, unless it is audited as part of the basic financial statements, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor’s report on the audited financial statements should be expanded to include a disclaimer on the supplementary information.

4 The auditor may identify the body requiring the information, such as the FASB in this example.
.04 Material Departures From GASB Guidelines for Required Supplementary Information

Independent Auditor's Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City’s basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example’s management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [specifically identify the supplementary information] on pages XX through XX and XX through XX are not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. As a result of such limited procedures, we believe that the [specifically identify the supplementary information] is not in conformity with accounting principles generally accepted in the United States because [describe the material departure(s) from GAAP].

[Signature]

[Date]

[Sources: Paragraph .08 of AU section 558; AICPA Audit and Accounting Guide State and Local Governments, updated as of March 1, 2009, paragraph 14.79 (appendix A example A-1)]

Note: GASB standards require the management’s discussion and analysis, which is required supplementary information (RSI), to precede the basic financial statements and most other RSI to be presented immediately following the notes to the financial statements. Although paragraph .11 of AU section 558 discusses alternative placement of RSI provided it is clearly marked as unaudited, that alternative is not available for GASB-required supplementary information given the GASB’s specific requirements for placement. If a government does not place GASB-required supplementary information in

---

5 This optional wording may be added in accordance with Interpretation No. 17 of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

6 The auditor may identify the body requiring the information, such as the GASB in this example.
its financial report as required by GASB standards, the auditor should consider the effect of the placement on his or her report. Specifically, the auditor should consider whether to report that the RSI placement constitutes a presentation that departs materially from prescribed guidelines.

.05 Prescribed Procedures Not Completed Regarding Supplementary Information Required by the FASB

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [specifically identify the supplementary information] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. Further, we were unable to apply to the information certain procedures prescribed by professional standards because [state the reasons].

[Signature]
[Date]

[Source: Paragraph .08 of AU section 558]

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on a basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report. [Source: Paragraph .08 of AU section 558]

Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by GAAP. However, management may choose not to place the required supplementary information outside of the basic financial statements. In such circumstances, unless it is audited as part of the basic financial statements, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor’s report should be expanded to include a disclaimer on the supplementary information. [Source: Paragraph .11 of AU section 558] (See paragraph .10 in this section.)
Independent Auditor’s Report

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City’s basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example’s management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [specifically identify the supplementary information] on pages XX through XX and XX through XX are not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. Further, we were unable to apply to the information certain procedures prescribed by professional standards because [state the reasons].

Notes: Even though the auditor is unable to complete the prescribed procedures, if, on the basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report. [Source: Paragraph .08 of AU section 558]

GASB standards require the management’s discussion and analysis, which is RSI, to precede the basic financial statements and most other RSI to be presented immediately following the notes to the financial statements. Although paragraph .11 of AU section 558 discusses alternative placement of RSI

---

7 This optional wording may be added in accordance with Interpretation No. 17 of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.
provided it is clearly marked as unaudited, that alternative is not available for GASB-required supplementary information given the GASB’s specific requirements for placement. If a government does not place GASB-required supplementary information in its financial report as required by GASB standards, the auditor should consider the effect of the placement on his or her report. Specifically, the auditor should consider whether to report that the RSI placement constitutes a presentation that departs materially from prescribed guidelines. [Source: AICPA Audit and Accounting Guide State and Local Governments, updated as of March 1, 2009, paragraph 2.59]
.07 Unresolved Doubts About Adherence to Guidelines Regarding Supplementary Information Required by FASB

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [specifically identify the supplementary information] on page XX is not a required part of the basic financial statements, and we did not audit and do not express an opinion on such information. However, we have applied certain limited procedures prescribed by professional standards that raised doubts that we were unable to resolve regarding whether material modifications should be made to the information for it to conform with guidelines established by accounting principles generally accepted in the United States. [The auditor should consider including in the report the reason(s) he or she was unable to resolve his or her substantial doubts.]

[Signature]
[Date]

[Source: Paragraph .08 of AU section 558]

Note: Even though the auditor is unable to complete the prescribed procedures, if, on the basis of facts known to him or her, the auditor concludes that the supplementary information has not been measured or presented within prescribed guidelines, he or she should suggest appropriate revision; failing that, he or she should describe the nature of any material departure(s) in the report.

[Source: Paragraph .08 of AU section 558]

Ordinarily, the required supplementary information should be distinct from the audited financial statements and distinguished from other information outside the financial statements that is not required by GAAP. However, management may choose not to place the required supplementary information outside of the basic financial statements. In such circumstances, unless it is audited as part of the basic financial statements, the information should be clearly marked as unaudited. If the information is not clearly marked as unaudited, the auditor’s report should be expanded to include a disclaimer on the supplementary information.

.09 Report on Accompanying Information

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The wording of the disclaimer will vary according to the circumstances.

[Source: Paragraph .13 of AU section 551]
.12 Qualification on Basic Financial Statements and Accompanying Information (Departure From GAAP)

Independent Auditor’s Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by $_______ and $_______, long-term debt by $_______ and $_______, and retained earnings by $_______ and $_______ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by $_______ and $_______ and earnings per share would be increased (decreased) by $_______ and $_______, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules of property and related depreciation (page X), and long-term debt with related interest (page Y), as of December 31, 20X2, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The information in such schedules has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, except for the effects on the schedule of property of not capitalizing certain lease obligations as explained in the third paragraph of this report, such information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.13 Supplementary Information Required by the FASB Included in Auditor-Submitted Document

Independent Auditor's Report

Addressee:

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The [identify the supplementary information] on page XX is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

[Signature]

[Date]

[Source: Paragraph .15 of AU section 551]

Notes: The report on the accompanying information may be added to the auditor’s standard report on the basic financial statements or may appear separately in the auditor-submitted document. [Source: Paragraph .06 of AU section 551]

When supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (a) express an opinion on the information if the auditor has been engaged to examine the information, (b) report on the information using the guidance in paragraphs .12 and .14 of AU section 551, provided such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, or (c) disclaim an opinion on the information. [Source: Paragraph .15 of AU section 551]

In certain circumstances, the auditor’s report should be expanded in accordance with paragraphs .08–.09 of AU section 558. The illustrative reports at paragraphs .01–.08 in this section are assembled from illustrative reporting language in paragraph .08 of AU section 558.

* The auditor may identify the body requiring the information, such as the FASB in this example.
.14 Supplementary Information Required by the GASB Included in Auditor-Submitted Documents

**Independent Auditor's Report**

Addressee:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of and for the year ended June 30, 20X1, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Example’s management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Example, Any State, as of June 30, 20X1, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The [identify accompanying required supplementary information] on pages XX through XX and XX through XX are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

**Notes:** The report on the accompanying information may be added to the auditor’s standard report on the basic financial statements or may appear separately in auditor-submitted documents. [Source: Paragraph .06 of AU section 551]

When supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (a) express an opinion on the information if the auditor has been engaged to examine the information, (b) report on the information using the guidance in paragraphs .12 and .14 of AU section 551), provided such information has been

---

10 This optional wording may be added in accordance with Interpretation No. 17 of AU section 508, which provides reporting guidance for audits of nonissuers. If this optional wording is added, the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

11 The auditor may identify the body requiring the information, such as the GASB in this example.
subjected to the auditing procedures applied in the audit of the basic financial statements, or (c) disclaim an opinion on the information.

In certain circumstances, the auditor’s report should be expanded in accordance with paragraphs .08–.09 of AU section 558. The illustrative reports at paragraphs .01–.08 in this section are assembled from illustrative reporting language in paragraph .08 of AU section 558 and the AICPA Audit and Accounting Guide *State and Local Governments*, updated as of March 1, 2009.
.15 Consolidating Information Not Separately Audited

Independent Auditor’s Report

Addressee:

We have audited the accompanying consolidated balance sheets of X Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company and subsidiaries as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations, and cash flows of the individual companies. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

[Signature]

[Date]

[Source: Paragraph .18 of AU section 551]

Notes: The report on the consolidating information may be added to the auditor’s standard report on the basic financial statements or may appear separately in the auditor-submitted document.

When the auditor is engaged to express an opinion only on the consolidated financial statements and consolidating information is also included, the auditor should be satisfied that the consolidating information is suitably identified. For example, when the consolidated financial statements include columns of information about the components of the consolidated group, the balance sheets might be titled, “Consolidated Balance Sheet-December 31, 20X1, with Consolidating Information,” and the columns including the consolidating information might be marked, “Consolidating Information.” When the consolidating information is presented in separate schedules, the schedules presenting balance sheet information of the components might be titled, for example, “Consolidating Schedule, Balance Sheet Information, December 31, 20X1.”

[Source: Paragraph .18 of AU section 551]
Independent Auditor’s Report

Addressee:

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the ABC Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of income, retained earnings, and cash flows for the years ended December 31, 20X2, and 20X1 (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

.01 Auditor’s Report When Expressing an Unqualified Opinion Directly on an Entity’s Internal Control Over Financial Reporting as of a Specified Date

Independent Auditor’s Report

We have examined W Company’s internal control over financial reporting as of December 31, 20XX, based on [identify criteria].1 W Company’s management is responsible for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management’s report]. Our responsibility is to express an opinion on W Company’s internal control over financial reporting based on our examination.

We conducted our examination in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our examination included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our examination also included performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America]. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America], and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.2

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the

---

1 For example, “criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).”

2 When the auditor has been engaged to examine and report on the internal control over financial reporting for an insured depository institution that is a bank (which is not subject to Section 404 of the Sarbanes-Oxley Act of 2002) that has elected to report on controls for purposes of Section 112 of the Federal Deposit Insurance Corporation Improvement Act at the bank holding company level, the following wording may replace the standard definition paragraph wording:

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. Because management’s assessment and our examination were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), our examination of [Holding Company’s] internal control over financial reporting included controls over the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America and with the instructions to the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.
risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [identify criteria].

We also have audited, in accordance with auditing standards generally accepted in the United States of America, the [identify financial statements] of W Company and our report dated [date of report, which should be the same as the date of the report on the examination of internal control] expressed [include nature of opinion].

[Date]

.02 Auditor’s Report When Expressing an Unqualified Opinion on a Written Assertion About an Entity’s Internal Control Over Financial Reporting as of a Specified Date

Independent Auditor’s Report

We have examined management’s assertion, included in the accompanying [title of management report], that W Company maintained effective internal control over financial reporting as of December 31, 20XX based on [identify criteria]. W Company’s management is responsible for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management report]. Our responsibility is to express an opinion on management’s assertion based on our examination.

We conducted our examination in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our examination included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our examination also included performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America]. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America], and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

---

3 For example, “criteria established in Internal Control—Integrated Framework issued by COSO.”
In our opinion, management’s assertion that W Company maintained effective internal control over financial reporting as of December 31, 20XX is fairly stated, in all material respects, based on [identify criteria].

We also have audited, in accordance with auditing standards generally accepted in the United States of America, the [identify financial statements] of W Company and our report dated [date of report, which should be the same as the date of the report on the examination of internal control] expressed [include nature of opinion].

.03 Adverse Opinion on Internal Control When a Material Weakness in Internal Control Exists as of a Specified Date

Independent Auditor’s Report

We have examined W Company’s internal control over financial reporting as of December 31, 20XX, based on [identify criteria]. W Company’s management is responsible for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management’s report]. Our responsibility is to express an opinion on W Company’s internal control over financial reporting based on our examination.

We conducted our examination in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our examination included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our examination also included performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America]. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America], and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. The following material weakness has been identified and included in the accompanying [title of management’s report].

---

4 For example, “criteria established in Internal Control—Integrated Framework issued by COSO.”

AICPA Audit and Accounting Manual
In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, W Company has not maintained effective internal control over financial reporting as of December 31, 20XX, based on [identify criteria].

We also have audited, in accordance with auditing standards generally accepted in the United States of America, the [identify financial statements] of W Company. We considered the material weakness identified above in determining the nature, timing, and extent of audit tests applied in our audit of the 20XX financial statements, and this report does not affect our report dated [date of report, which should be the same as the date of the report on the examination of internal control], which expressed [include nature of opinion].

.04 Disclaimer of Opinion When Restrictions That Significantly Limit the Scope of the Examination Are Imposed by the Client or the Responsible Party

Independent Auditor’s Report

We were engaged to examine W Company’s internal control over financial reporting as of December 31, 20XX, based on [identify criteria]. W Company’s management is responsible for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management’s report].

[Paragraph that describes the substantive reasons for the scope limitation] Accordingly, we were unable to perform auditing procedures necessary to form an opinion on W Company’s internal control over financial reporting as of December 31, 20XX.

Because of the limitation on the scope of our audit described in the paragraph above, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the effectiveness of the W Company’s internal control over financial reporting.

.05 Disclaimer of Opinion When Restrictions That Significantly Limit the Scope of the Examination Are Imposed by the Client or the Responsible Party and the Limited Procedures Performed by the Auditor Caused the Auditor to Conclude That One or More Material Weaknesses Exist

Independent Auditor’s Report

We were engaged to examine W Company’s internal control over financial reporting as of December 31, 20XX, based on [identify criteria]. W Company’s management is responsible for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management’s report].

---

5 The auditor’s report need only refer to the material weaknesses described in management’s report and need not include a description of each material weakness, provided each material weakness is included and fairly presented in all material respects in management’s report. Paragraphs .111–.114 of AT section 501, An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance regarding reporting adverse opinions.

6 For example, “criteria established in Internal Control—Integrated Framework issued by COSO.”

7 For example, “criteria established in Internal Control—Integrated Framework issued by COSO.”
Accordingly, we were unable to perform auditing procedures necessary to form an opinion on W Company’s internal control over financial reporting as of December 31, 20XX.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America]. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with [applicable financial reporting framework, such as accounting principles generally accepted in the United States of America], and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected on a timely basis. The following material weakness has been identified and included in the accompanying [title of management’s report].

[Identify the material weakness described in management’s report and include a description of the material weaknesses, including its nature and its actual and potential effect on the presentation of the entity’s financial statements issued during the existence of the material weakness]

Because of the limitation on the scope of our audit described in the paragraph above, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the effectiveness of the W Company’s internal control over financial reporting.

We have audited, in accordance with auditing standards generally accepted in the United States of America, the [identify financial statements] of W Company and our report dated [date of report] expressed [include nature of opinion]. We considered the material weakness identified above in determining the nature, timing, and extent of audit tests applied in our audit of the 20XX financial statements, and this report does not affect such report on the financial statements.

[Source: Paragraphs .118–.119 and example 4 in paragraph .169 of AT section 501]
effectiveness of internal control over financial reporting of B Company, a wholly owned subsidiary, whose financial statements reflect total assets and revenues constituting 20 percent and 30 percent, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 20XX. The effectiveness of B Company’s internal control over financial reporting was examined by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the effectiveness of B Company’s internal control over financial reporting, is based solely on the report of the other auditors.

We conducted our examination in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our examination included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our examination also included performing such other procedures as we considered necessary in the circumstances. We believe that our examination and the report of the other auditors provide a reasonable basis for our opinion.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with applicable financial reporting framework, such as accounting principles generally accepted in the United States of America. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable financial reporting framework, such as accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, based on our examination and the report of the other auditors, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [identify criteria].

We also have audited, in accordance with auditing standards generally accepted in the United States of America, the [identify financial statements] of W Company and our report dated [date of report, which should be the same as the date of the report on the examination of internal control] expressed [include nature of opinion].

.07 Unqualified Opinion About the Suitability of Design of the Entity’s Internal Control

Independent Auditor’s Report

We have examined the suitability of W Company’s design of internal control over financial reporting to prevent or detect and correct material misstatements in its financial statements on a timely basis as of December 31, 20XX, based on [identify criteria]. W Company’s management is responsible for the suitable

9 Whether the other practitioner’s opinion is expressed on the responsible party’s assertion or on the effectiveness of internal control does not affect the determination of whether the principal practitioner’s opinion is expressed on the assertion or on the subject matter itself.
Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, evaluating the design of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. We were not engaged to examine and report on the operating effectiveness of W Company’s internal control over financial reporting as of December 31, 20XX, and, accordingly, we express no opinion on operating effectiveness.

Because of its inherent, internal control, over financial reporting may not prevent or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, W Company’s internal control over financial reporting was suitably designed, in all material respects, to prevent or detect and correct material misstatements in the financial statements on a timely basis as of December 31, 20XX, based on [identify criteria].

[Signature]

[Date]

Notes:

This report assumes that the control criteria of the regulatory agency are both suitable and available to users as discussed in paragraphs .23–.34 of AT section 101. Therefore, there is no restriction on the use of this report.

.08 Auditor’s Combined Report When Expressing an Unqualified Opinion on an Entity’s Internal Control and on the Financial Statements as of a Specified Date

Independent Auditor’s Report

We have audited the accompanying balance sheet of W Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. We also have audited W Company’s internal control over financial reporting as of December 31, 20XX, based on [identify criteria].11 W Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assertion of the effectiveness of internal control over financial reporting, included in the accompanying [title of management’s report]. Our responsibility is to express an opinion on these financial statements and an opinion on W Company’s internal control over financial reporting based on our audits.

We conducted our audit of the financial statements in accordance with auditing standards generally accepted in the United States of America and our audit of internal control over financial reporting in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial

10 Because the examination of internal control is integrated with the audit of the financial statements and an examination provides the same level of assurance as an audit, the auditor may refer to the examination of internal control as an audit in his or her report or other communications.

11 For example, “criteria established in Internal Control—Integrated Framework issued by COSO.”
statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

An entity’s internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with applicable financial reporting framework, such as accounting principles generally accepted in the United States of America. An entity’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable financial reporting framework, such as accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of W Company as of December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20XX, based on [identify criteria].

[Signature]

[Date]

[Source: Example 6 in paragraph .169 of AT section 501]

.09 Communication of Significant Deficiencies and Material Weaknesses

In connection with our audit of W Company’s (the “Company”) financial statements as of December 31, 20XX and for the year then ended, and our audit of the Company’s internal control over financial reporting as of December 31, 20XX (“integrated audit”), the standards established by the American Institute of Certified Public Accountants require that we advise you of the following internal control matters identified during our integrated audit.

Our responsibility is to plan and perform our integrated audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, and whether effective internal control over financial reporting was maintained in all material respects (that is, whether material weaknesses exist as of the date specified in management’s assertion). The integrated audit is not designed to detect deficiencies that, individually or in combination, are less severe than a material weakness. However, we are responsible for communicating to management and those charged with governance significant deficiencies and material weaknesses identified during the integrated audit. We are also responsible for communicating to management deficiencies that are of a lesser magnitude than a significant deficiency, unless previously communicated, and inform those charged with governance when such a communication was made.

A deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. [A material weakness is a deficiency, or a combination of
deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company’s financial statements will not be prevented, or detected and corrected on a timely basis. We believe the following deficiencies constitute material weaknesses:

[Describe the material weaknesses that were identified during the integrated audit. The auditor may separately identify those material weaknesses that exist as of the date of management’s assertion by referring to the auditor’s report.]

[A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies to be significant deficiencies:]

[Describe the significant deficiencies that were identified during the integrated audit.]

This communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the organization, and [identify any specified governmental authorities] and is not intended to be and should not be used by anyone other than these specified parties.

.10 Communication of Internal Control Matters Noted in an Audit

Addressee:

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company’s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies [and other deficiencies that we consider to be material weaknesses].

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control. We consider the following deficiencies to be significant deficiencies in internal control:

[Describe the significant deficiencies that were identified.]

[A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity’s internal control. We believe that the following deficiencies constitute material weaknesses.]

[Describe the material weaknesses that were identified.]

This communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the organization, and [identify any specified governmental authorities] and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]
[Date]

The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

[Source: Paragraphs .26 and .29 of AU section 325A, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1)]

.11 Communication of Internal Control Related Matters Noted in an Audit When the Auditor Has Not Identified Any Material Weaknesses and Wishes to Communicate That to Management and Those Charged With Governance

Addressee:

In planning and performing our audit of the financial statements of ABC Company as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered ABC Company’s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity’s internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the organization, and [identify any specified governmental authorities] and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]

[Date]

The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

---

12 In October 2008, the Auditing Standards Board issued Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325). SAS No. 115 supersedes SAS No. 112, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325A), and revises the information in AU section 325A. SAS No. 115 was issued to eliminate differences within the AICPA’s Audit and Attest Standards resulting from the issuance of Statement on Standards for Attestation Engagements No. 15, An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 1, AT sec. 301). SAS No. 115 is effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier application is permitted. Due to the issuance of SAS No. 115, extant AU section 325 has been moved to AU section 325A of the Professional Standards until the effective date of SAS No. 115. This manual references the “A” sections as appropriate because the changes due to SAS No. 115 has not been incorporated into this edition. See AAM section 8300, “Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115,” for further guidance.
Notes:

If one or more significant deficiencies have been identified, the auditor may add the following sentence to the fourth paragraph of the communication:

However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [date].

.12 Report on Controls Placed in Operation at a Service Organization

To XYZ Service Organization:

We have examined the accompanying description of controls related to the application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization’s controls that may be relevant to a user organization’s internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and (3) such controls had been placed in operation as of ___. The control objectives were specified by ___. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization’s controls, individually or in the aggregate.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization’s controls that had been placed in operation as of ___. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

The description of controls at XYZ Service Organization is as of ___ and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers ___.

[Source: Paragraph .38 of AU section 324, Service Organizations (AICPA, Professional Standards, vol. 1)]

Notes:

This report should have an attachment containing a description of the service organization’s controls that may be relevant to a user organization’s internal control.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

---

13 See footnote 12.

14 If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor’s report should be modified to include the phrase “and user organizations applied the controls contemplated in the design of XYZ Service Organization’s controls” following the words “complied with satisfactorily” in the scope and opinion paragraphs.
Paragraph .39 of AU section 324 provides, an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

Paragraph .40 of AU section 324 provides, an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are significant deficiencies in the design or operation of the service organization’s controls.

.13 Report on Controls Placed in Operation at a Service Organization and Tests of Operating Effectiveness

To XYZ Service Organization:

We have examined the accompanying description of controls related to the ___ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization’s controls that may be relevant to a user organization’s internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and (3) such controls had been placed in operation as of ___. The control objectives were specified by ___. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization’s controls that had been placed in operation as of ___. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X, to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from __ to __. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from __ to __. [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.]

The relative effectiveness and significance of specific controls at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at XYZ Service Organization is as of ___, and information about tests of the operating effectiveness of specific controls covers the period from __ to ___. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent

---

15 If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor’s report should be modified to include the phrase “and user organizations applied the controls contemplated in the design of XYZ Service Organization’s controls” following the words “complied with satisfactorily” in the scope and opinion paragraphs.

16 This sentence should be added when all of the control objectives listed in the description of controls placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of controls placed in operation are included in the tests of operating effectiveness.
limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

[Source: Paragraph .54 of AU section 324]

Notes:

This report should have two attachments: (a) a description of the service organization’s controls that may be relevant to a user organization’s internal control as it relates to an audit of financial statements and (b) a description of controls for which tests of operating effectiveness were performed, the control objectives the controls were intended to achieve, the tests applied, and the results of these tests.

This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

Paragraph .55 of AU section 324 provides an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors.

Paragraph .56 of AU section 324 provides an example explanatory paragraph and modification to the opinion paragraph when the service auditor concludes that there are sufficient deficiencies in the design or operation of the service organization’s controls.

.14 Reports on Internal Control Required by SEC Rule 17a-5

The following is an illustration of the independent auditor’s report on internal control required by Securities and Exchange Commission (SEC) Rule 17a-5(g)(1).

Board of Directors

Standard Stockbrokerage Co., Inc.

In planning and performing our audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] (the Company), as of and for the year ended December 31, 20X8, in accordance with auditing standards generally accepted in the United States of America, we considered the Company’s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [consolidated] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control.

17 For audits conducted in accordance with Public Company Accounting Oversight Board (PCAOB) standards, PCAOB Auditing Standard No. 1, References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), replaces this sentence with the following sentence: “We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States).” On May 14, 2004, the SEC issued an interpretive release to help with the implementation of PCAOB Auditing Standard No. 1. See Release No. 33-8422 for more information. The release specifies that effective May 14, 2004, references in SEC rules and staff guidance and in the federal securities laws to GAAS or to specific standards under GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB, plus any applicable rules of the SEC. The guidance in this release is applicable only to auditors’ engagements that are governed by PCAOB rules. The PCAOB, for example, has not established particular auditing standards for nonissuer broker-dealers or investment advisers. This release is not applicable to such engagements and related filings.

The staff of the PCAOB published a series of questions and answers on PCAOB Auditing Standard No. 1. See the PCAOB Web site at www.pcaobus.org for more information.

In June 2004, the Auditing Standards Board (ASB) issued Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report of a Nonissuer,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. 89–92), which provides reporting guidance for audits of nonissuers. Interpretation No. 18 in AU section 9508 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both GAAS and PCAOB auditing standards. The ASB also is revising AU section 508 (AICPA, Professional Standards, vol. 1) in light of the International Auditing and Assurance Standards Board’s recently exposed International Standard on Auditing, The Independent Auditor’s Report on a Complete Set of General Purpose Financial Statements, and PCAOB Auditing Standard No. 1. See the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards for more information.

AICPA Audit and Accounting Manual AAM §9250.14
Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study
of the practices and procedures followed by the Company, including consideration of control activities for
safeguarding securities. This study included tests of compliance with such practices and procedures that we
considered relevant to the objectives stated in Rule 17a-5(g), in the following:

1. Making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital
under Rule 17a-3(a)(11) and the reserve required by Rule 15c3-3(e)
2. Making the quarterly securities examinations, counts, verifications, and comparisons, and the
recordation of differences required by Rule 17a-13
3. Complying with the requirements for prompt payment for securities under Section 8 of Federal
Reserve Regulation T of the Board of Governors of the Federal Reserve System
4. Obtaining and maintaining physical possession or control of all fully paid and excess margin
securities of customers as required by Rule 15c3-3

The management of the Company is responsible for establishing and maintaining internal control and the
practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and
judgments by management are required to assess the expected benefits and related costs of controls, and of
the practices and procedures referred to in the preceding paragraph, and to assess whether those practices and
procedures can be expected to achieve the SEC’s above-mentioned objectives. Two of the objectives of internal
control and the practices and procedures are to provide management with reasonable but not absolute
assurance that assets for which the Company has responsibility are safeguarded against loss from unautho-
rized use or disposition, and that transactions are executed in accordance with management’s authorization
and recorded properly to permit the preparation of financial statements in conformity with generally accepted
accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the
preceding paragraph.

Because of inherent limitations in internal control and the practices and procedures referred to above, error
or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject
to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their
design and operation may deteriorate.

A control deficiency exists when the design or operation of a control does not allow management or employees,
in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely
basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely
affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance
with generally accepted accounting principles such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented or detected by the entity’s internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more
than a remote likelihood that a material misstatement of the financial statements will not be prevented or
detected by the entity’s internal control.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs
and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We
did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.\(^{19}\)

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company’s practices and procedures, as described in the second paragraph of this report, were adequate at December 31, 20X8, to meet the SEC’s objectives.\(^{20}\)

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [Designated self-regulatory organization], and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and is not intended to be and should not be used by anyone other than these specified parties.

Accounting Firm

Note:
AAM section 9650 illustrates the auditor’s reports on the financial statements of brokers and dealers in securities.

\section{.15 Report on Internal Control Required by SEC Rule 17a-5 (g) (1) for a Broker-Dealer Claiming an Exemption From SEC Rule 15c3-3}

The following is an illustration of an independent auditor’s report on internal control of a broker-dealer claiming an exemption from Securities and Exchange Commission (SEC) Rule 15c3-3.\(^ {22, 23} \)

\(^{19}\) If significant deficiencies are identified, this paragraph can be modified by inserting, “However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [date].” Paragraph 29 of AU section 325A states that the auditor should not issue a written communication stating that no significant deficiencies were identified because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor’s attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of this paragraph of the report should be modified as follows:

However, we identified the following deficiencies in [internal control or control activities for safeguarding securities] that we consider to be material weaknesses, as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures performed in our audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] as of and for the year ended December 31, 20X8, and this report does not affect our report thereon dated February 15, 20X9. [A description of the material weaknesses that have come to the auditor’s attention and corrective action.]

\(^{20}\) Whenever inadequacies are described, the last sentence of this paragraph should be modified as per footnote 19. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period, unless management already has reported them to the SEC.

\(^{21}\) See footnote 12.

\(^{22}\) For audits conducted in accordance with Public Company Accounting Oversight Board (PCAOB) standards, PCAOB Auditing Standard No. 1, References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), replaces this sentence with the following sentence: “We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States).” On May 14, 2004, the Securities and Exchange Commission (SEC) issued an interpretive release to help with the implementation of PCAOB Auditing Standard No. 1. See Release No. 33-8422 for more information. The release specifies that effective May 14, 2004, references in SEC rules and staff guidance and in the federal securities laws to generally accepted auditing standards (GAAS) or to specific standards under GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB, plus any applicable rules of the SEC. The guidance in this release is applicable only to auditors’ engagements that are governed by PCAOB rules. The PCAOB, for example, has not established particular auditing standards for nonissuer broker-dealers or investment advisers. This release is not applicable to such engagements and related filings.

The staff of the PCAOB published a series of questions and answers (Q&As) on PCAOB Auditing Standard No. 1. See the PCAOB Web site at www.pcaobus.org for more information.

\(^{23}\) In June 2004, the Auditing Standards Board (ASB) issued Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report of a Nonissuer,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. 89–92), which provides reporting guidance for audits of nonissuers. Interpretation No. 18 provides guidance on the appropriate referencing of
In planning and performing our audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. and Subsidiaries (the Company), as of and for the year ended December 31, 20X8 in accordance with auditing standards generally accepted in the United States of America, we considered the Company’s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [consolidated] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company including consideration of control activities for safeguarding securities. This study included tests of such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g) in making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under Rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of Rule 15c3-3. Because the Company does not carry securities accounts for customers or perform custodial functions relating to customer securities, we did not review the practices and procedures followed by the Company in any of the following:

1. Making quarterly securities examinations, counts, verifications, and comparisons and recordation of differences required by Rule 17a-13

2. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls and of the practices and procedures referred to in the preceding paragraph and to assess whether those practices and procedures can be expected to achieve the SEC’s above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management’s authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control.  

PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both GAAS and PCAOB auditing standards. The ASB also is revising AU section 508 in light of the International Auditing and Assurance Standards Board’s recently exposed International Standard on Auditing The Independent Auditor’s Report on a Complete Set of General Purpose Financial Statements and PCAOB Auditing Standard No. 1. See the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards for more information.

23 There are different types of exemptions under SEC Rule 15c3-3-k(1),k(2)(i), and k(2)(ii). Other formats of this letter will be required depending on the type of exemption filed.

24 See footnote 18.
A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity’s internal control.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.\(^{25}\)

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company’s practices and procedures, as described in the second paragraph of this report, were adequate at December 31, 20X8, to meet the SEC’s objectives.\(^{26}\)

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [Designated self-regulatory organization], and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and is not intended to be and should not be used by anyone other than these specified parties.

**Note:**

AAM section 9650 illustrates the auditor’s reports on the financial statements of brokers and dealers in securities.

.16 **Letter to SEC When the Broker-Dealer Has Not Made the Required Notification**

The following report is appropriate if the broker-dealer has not made the required notification of material inadequacy or if the auditor does not agree with the statements therein. Modification of this letter may be required based on the facts and circumstances of the particular situation.

Securities and Exchange Commission  
Washington D.C., and [Appropriate regional office]  
Designated Examining Authority

Dear Sirs:

\(^{25}\) If significant deficiencies are identified, this paragraph can be modified by inserting “However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [date].” AU section 325A paragraph .29 states that the auditor should not issue a written communication stating that no significant deficiencies were identified because of the potential for misinterpretation of the limited degree of assurance provided by such a communication.

If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor’s attention and may state that these weaknesses do not affect the report on the financial statements. The last sentence of this paragraph of the report should be modified as follows:

However, we identified the following deficiencies in [internal control or control activities for safeguarding securities] that we consider to be material weaknesses, as defined above. These conditions were considered in determining the nature, timing, and extent of the procedures performed in our audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] as of and for the year ended December 31, 2007, and this report does not affect our report thereon dated February 15, 20X8. [A description of the material weaknesses that have come to the auditor’s attention and corrective action.]

\(^{26}\) Whenever inadequacies are described, the last sentence of this paragraph should be modified as per footnote 25. The report should also describe material inadequacies that the auditor becomes aware of that existed during the period but were corrected prior to the end of the period, unless management already has reported them to the SEC.

\(^{27}\) See footnote 21.

AICPA Audit and Accounting Manual
Our most recent audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] (the Company), was as of December 31, 20X7, and for the year then ended, which we reported on under date of February 15, 20X8. We have not audited any financial statements of the Company as of any date or for any period subsequent to December 31, 20X7. Although we are presently performing certain procedures as part of our audit of the [consolidated] financial statements of the Company as of December 31, 20X8, and for the year then ending, these procedures do not constitute all the procedures necessary in an audit conducted in accordance with auditing standards generally accepted in the United States of America or all the procedures necessary to (1) consider the Company’s internal control as required by generally accepted auditing standards or (2) study the Company’s practices and procedures relevant to the objectives stated in Rule 17a-5(g) of the Securities and Exchange Commission as required by Rule 17a-5.

The management of the Company is responsible for establishing and maintaining internal control. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls. The objectives of internal control are to provide management with reasonable but not absolute assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management’s authorization and are recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Because of inherent limitations in internal control, error or fraud may occur and not be detected. Also, projection of any evaluation of internal control to future periods is subject to the risk that controls may become inadequate because of changes in conditions or that the effectiveness of the design and operation of controls may deteriorate.

The purpose of performing certain procedures prior to the date of the financial statements is to facilitate the expression of an opinion on the Company’s financial statements. It must be understood that the procedures performed would not necessarily identify all material weaknesses in internal control and control activities for safeguarding securities.

However, pursuant to the requirements of Rule 17a-5(h)(2), we are to call to the attention of the chief financial officer any weaknesses that we believe to be material and that were disclosed during the course of interim work. We have made such notification to the chief financial officer of Standard Stockbrokerage Co., Inc., and we believe the following additional information is required pursuant to the requirements of the rule.

[List and describe all instances where the independent auditor did not agree with the notification of the broker or dealer or where the required notification was not made.]

Accounting Firm

Note:

AAM section 9650 illustrates the auditor’s reports on the financial statements of brokers and dealers in securities.

.17 Report on Internal Control Required by CFTC Regulation 1.16 and SEC Rule 17a-5(g)(1)

The following is an illustration of the independent auditor’s report on internal control required by CFTC Regulation 1.16 and SEC Rule 17a-5(g)(1).28

Board of Directors
Standard Stockbrokerage Co., Inc.:
In planning and performing our audit of the [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] (the Company) as of and for the year ended December 31, 20X8, in accordance with auditing standards generally accepted in the United States of America, we considered the Company’s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the [consolidated] financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the Company’s internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding securities. This study included tests of compliance with such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g), in the following:

1. Making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under Rule 17a-3(a)(11) and the reserve required by Rule 15c3-3(e)
2. Making the quarterly securities examinations, counts, verifications, and comparisons, and the recordation of differences required by Rule 17a-13
3. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System
4. Obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by Rule 15c3-3.

In addition, as required by Regulation 1.16 of the Commodity Futures Trading Commission (CFTC), we have made a study of the practices and procedures followed by the Company including consideration of control activities for safeguarding customer and firm assets. This study included tests of such practices and procedures that we considered relevant to the objectives stated in Regulation 1.16, in making the following:

1. The periodic computations of minimum financial requirements pursuant to Regulation 1.17
2. The daily computations of the segregation requirements of Section 4d(a)(2) of the Commodity Exchange Act and the regulations thereunder, and the segregation of funds based on such computations
3. The daily computations of the foreign futures and foreign options secured amount requirements pursuant to Regulation 30.7 of the CFTC.

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraphs. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls and of the practices and procedures referred to in the preceding paragraphs and to assess whether those practices and procedures can be expected to achieve the SEC’s and the CFTC’s above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management’s authorization and recorded properly to permit preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) and Regulation 1.16(d)(2) list additional objectives of the practices and procedures listed in the preceding paragraphs.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely
basis. A significant deficiency\(^{29}\) is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity’s internal control.

Our consideration of internal control was for the limited purpose described in the first, second and third paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities and certain regulated commodity customer and firm assets that we consider to be material weaknesses, as defined above.\(^{30}\)

We understand that practices and procedures that accomplish the objectives referred to in the second and third paragraphs of this report are considered by the SEC and CFTC to be adequate for their purposes in accordance with the Securities Exchange Act of 1934, the Commodity Exchange Act, and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company’s practices and procedures, as described in the second and third paragraphs of this report, were adequate at December 31, 20X8, to meet the SEC’s and CFTC’s objectives.\(^{31}\)

This report is intended solely for the information and use of the Board of Directors, management, the SEC, the CFTC, [Designated Self-Regulatory Organization] and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 or Regulation 1.16 of the CFTC or both in their regulation of registered broker-dealers and futures commission merchants, and is not intended to be and should not be used by anyone other than these specified parties.

AAM Section 9260

Special Reports

.01 Cash Basis Statements

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of assets and liabilities arising from cash transactions of XYZ Company as of December 31, 20X2 and 20X1, and the related statements of revenue collected and expenses paid for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of cash receipts and disbursements, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities arising from cash transactions of XYZ Company as of December 31, 20X2 and 20X1, and its revenue collected and expenses paid during the years then ended, on the basis of accounting described in Note X.

.02 Income Tax Basis Statements

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of assets, liabilities, and capital—income tax basis of ABC Partnership as of December 31, 20X2 and 20X1, and the related statements of revenue and expenses—income tax basis and of changes in partners’ capital accounts—income tax basis for the years then ended. These financial statements are the responsibility of the Partnership’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared on the basis of accounting the Partnership uses for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and capital of ABC Partnership as of December 31, 20X2 and 20X1, and its revenue and expenses and changes in partners’ capital accounts for the years then ended, on the basis of accounting described in Note X.

Regulatory (Statutory) Basis Statements

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of admitted assets, liabilities, and surplus—statutory basis of XYZ Insurance Company as of December 31, 20X2 and 20X1, and the related statements of income and cash flows—statutory basis and changes in surplus—statutory basis for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements were prepared in conformity with the accounting practices prescribed or permitted by the Insurance Department of [State], which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of XYZ Insurance Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the board of directors and management of XYZ Insurance Company and [name of regulatory agency] and is not intended to be and should not be used by anyone other than these specified parties.

.04 Report Relating to Amount of Sales for the Purpose of Computing Rental

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor’s Report

Addressee:

We have audited the accompanying schedule of gross sales (as defined in the lease agreement dated March 4, 20XX, between ABC Company, as lessor, and XYZ Stores Corporation, as lessee) of XYZ Stores Corporation at its Main Street store, [City], [State], for the year ended December 31, 20X2. This schedule is the responsibility of XYZ Stores Corporation’s management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of gross sales is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule of gross sales. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the schedule of gross sales referred to above presents fairly, in all material respects, the gross sales of XYZ Stores Corporation at its Main Street store, [City], [State], for the year ended December 31, 20X2, as defined in the lease agreement referred to in the first paragraph.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Stores Corporation and ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]

[Date]

[Source: Paragraph .18 of AU section 623]
.05 Royalties

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor’s Report

Addressee:

We have audited the accompanying schedule of royalties applicable to engine production of the Q Division of XYZ Corporation for the year ended December 31, 20X2, under the terms of a license agreement dated May 14, 20XX, between ABC Company and XYZ Corporation. This schedule is the responsibility of XYZ Corporation’s management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of royalties is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule of royalties. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that, under XYZ Corporation’s interpretation of the agreement referred to in the first paragraph, royalties were based on the number of engines produced after giving effect to a reduction for production retirements that were scrapped, but without a reduction for field returns that were scrapped, even though the field returns were replaced with new engines without charge to customers.

In our opinion, the schedule of royalties referred to above presents fairly, in all material respects, the number of engines produced by the Q Division of XYZ Corporation during the year ended December 31, 20X2, and the amount of royalties applicable thereto, under the license agreement referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Corporation and ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

.06 Profit Participation

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor’s Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company for the year ended December 31, 20X1, and have issued our report thereon dated March 10, 20X2. We have also audited XYZ Company’s schedule of John Smith’s profit participation for the year ended December 31, 20X1. This schedule is the responsibility of the Company’s management. Our responsibility is to express an opinion on this schedule based on our audit.

We conducted our audit of the schedule in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of profit participation is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

We have been informed that the documents that govern the determination of John Smith’s profit participation are (a) the employment agreement between John Smith and XYZ Company dated February 1, 20X0, (b) the production and distribution agreement between XYZ Company and Television Network Incorporated dated March 1, 20X0, and (c) the studio facilities agreement between XYZ Company and QRX Studios dated April 1, 20X0, as amended November 1, 20X0.

In our opinion, the schedule of profit participation referred to above presents fairly, in all material respects, John Smith’s participation in the profits of XYZ Company for the year ended December 31, 20X1, in accordance with the provisions of the agreements referred to above.

This report is intended solely for the information and use of the boards of directors and managements of XYZ Company and John Smith and is not intended to be and should not be used by anyone other than these specified parties.

If a specified element, account, or item is, or is based upon, an entity’s net income or stockholders’ equity or the equivalent thereof, the auditor should have audited the complete financial statements to express an opinion on the specified element, account, or item.
.07 Report on Federal and State Income Taxes Included in Financial Statements

(Report on one or more specified elements, accounts, or items of a financial statement)

Independent Auditor’s Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company, Inc., for the year ended June 30, 20XX, and have issued our report thereon dated August 15, 20XX. We have also audited the current and deferred provision for the Company’s federal and state income taxes for the year ended June 30, 20XX, included in those financial statements, and the related asset and liability tax accounts as of June 30, 20XX. This income tax information is the responsibility of the Company’s management. Our responsibility is to express an opinion on it based on our audit.

We conducted our audit of the income tax information in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the federal and state income tax accounts are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures related to the federal and state income tax accounts. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the federal and state income tax accounts. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the Company has paid or, in all material respects, made adequate provision in the financial statements referred to above for the payment of all federal and state income taxes and for related deferred income taxes that could be reasonably estimated at the time of our audit of the financial statements of XYZ Company, Inc., for the year ended June 30, 20XX.

.08 Report in Connection With a Proposed Acquisition

Independent Accountant’s Report
on Applying Agreed-Upon Procedures

To the Board of Directors and Management of X Company:

We have performed the procedures enumerated below, which were agreed to by the Board of Directors and Management of X Company, solely to assist you in connection with the proposed acquisition of Y Company as of December 31, 20XX. Y Company is responsible for its cash and accounts receivable records. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and the associated findings are as follows:

Cash

1. We obtained confirmation of the cash on deposit from the following banks, and we agreed the confirmed balance to the amount shown on the bank reconciliations maintained by Y Company. We mathematically checked the bank reconciliations and compared the resultant cash balances per book to the respective general ledger account balances.

<table>
<thead>
<tr>
<th>Bank</th>
<th>General Ledger Account Balances as of December 31, 20XX</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABC National Bank</td>
<td>$5,000</td>
</tr>
<tr>
<td>DEF State Bank</td>
<td>3,776</td>
</tr>
<tr>
<td>XYZ Trust Company regular</td>
<td>86,912</td>
</tr>
<tr>
<td>XYZ Trust Company payroll</td>
<td>5,000</td>
</tr>
<tr>
<td></td>
<td><strong>$110,688</strong></td>
</tr>
</tbody>
</table>

We found no exceptions as a result of the procedures.

Accounts Receivable

2. We added the individual customer account balances shown in an aged trial balance of accounts receivable (identified as exhibit A) and compared the resultant total with the balance in the general ledger account.

We found no difference.

3. We compared the individual customer account balances shown in the aged trial balance of accounts receivable (exhibit A) as of December 31, 19XX, to the balances shown in the accounts receivable subsidiary ledger.

We found no exceptions as a result of the comparisons.

4. We traced the aging (according to invoice dates) for 50 customer account balances shown in exhibit A to the details of outstanding invoices in the accounts receivable subsidiary ledger. The balances selected for tracing were determined by starting at the eighth item and selecting every fifteenth item thereafter.

We found no exceptions in the aging of the amounts of the 50 customer account balances selected. The sample size traced was 9.8 percent of the aggregate amount of the customer account balances.
5. We mailed confirmations directly to the customers representing the 150 largest customer account balances selected from the accounts receivable trial balance, and we received responses as indicated below. We also traced the items constituting the outstanding customer account balance to invoices and supporting shipping documents for customers from which there was no reply. As agreed, any individual differences in a customer account balance of less than $300 were to be considered minor, and no further procedures were performed.

Of the 150 customer balances confirmed, we received responses from 140 customers; 10 customers did not reply. No exceptions were identified in 120 of the confirmations received. The differences disclosed in the remaining 20 confirmation replies were either minor in amount (as defined above) or were reconciled to the customer account balance without proposed adjustment thereto. A summary of the confirmation results according to the respective aging categories is as follows.

<table>
<thead>
<tr>

</tbody>
</table>

We were not engaged to and did not conduct an audit, the objective of which would be the expression of an opinion on cash and accounts receivable. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the board of directors and management of X Company and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]

[Date]

[Source: Paragraph .48 of AT section 201, Agreed-Upon Procedures Engagements (AICPA, Professional Standards, vol. 1)]
To the Trustee of XYZ Company:

We have performed the procedures described below, which were agreed to by the Trustee of XYZ Company, with respect to the claims of creditors solely to assist you in determining the validity of claims of XYZ Company as of May 31, 20XX, as set forth in the accompanying Schedule A. XYZ Company is responsible for maintaining records of claims submitted by creditors of XYZ Company. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the party specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and associated findings are as follows:

1. Compare the total of the trial balance of accounts payable at May 31, 20XX, prepared by XYZ Company, to the balance in the related general ledger account.

   The total of the accounts payable trial balance agreed with the balance in the related general ledger account.

2. Compare the amounts for claims received from creditors (as shown in claim documents provided by XYZ Company) to the respective amounts shown in the trial balance of accounts payable. Using the data included in the claims documents and in XYZ Company’s accounts payable detail records, reconcile any differences found to the accounts payable trial balance.

   All differences noted are presented in column 3 of Schedule A. Except for those amounts shown in column 4 of Schedule A, all such differences were reconciled.

3. Obtain the documentation submitted by creditors in support of the amounts claimed and compare it to the following documentation in XYZ Company’s files: invoices, receiving reports, and other evidence of receipt of goods or services.

   No exceptions were found as a result of these comparisons.

We were not engaged to and did not conduct an audit, the objective of which would be the expression of an opinion on the claims of creditors set forth in the accompanying Schedule A. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the Trustee of XYZ Company and is not intended to be and should not be used by anyone other than this specified party.

.10 Reporting on the Subject Matter

Independent Accountant’s Report

We have examined the accompanying XBRL Instance Document of XYZ Company, which reflects the data presented in the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended [optional to include the location of the financial statements, such as “included in the Company’s Form 10-K for the year ended December 31, 20XX”]. XYZ Company’s management is responsible for the XBRL Instance Document. Our responsibility is to express an opinion based on our examination.

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended, and in our report dated [Month] XX, 20XX, we expressed an unqualified opinion on those financial statements.4, 5

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the XBRL Instance Document and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, the XBRL Instance Document of XYZ Company referred to above accurately reflects, in all material respects, the data presented in the financial statements in conformity with [identify the criteria—for example, specific XBRL taxonomy, such as the “XBRL U.S. Consumer and Industrial Taxonomy,” and where applicable, the company extension taxonomy, such as “XYZ Company’s extension taxonomy,” and the XBRL International Technical Specifications 2.0].

[Signature]

[Date]

---

3 Financial information includes data presented in audited or reviewed financial statements or other financial information (for example, Management Discussion and Analysis).

4 If the financial statements have been reviewed, the sentence would read: “We have also reviewed, in accordance with [standards established by the American Institute of Certified Public Accountants] [Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants], the financial statements of XYZ Company as of March 31, 20XX, and for the three months then ended, the objective of which was the expression of limited assurance on such financial statements, and issued our report thereon dated [Month] XX, 20XX, [describe any modifications of such report].”

5 If the financial information has not been audited or reviewed, no reference to a report is required. The sentence would read: “We were not engaged to and did not conduct an audit or review of the [identify information], the objectives of which would have been the expression of an opinion or limited assurance on such [identify information]. Accordingly, we do not express an opinion or any other assurance on [it] [them].”

5 If the audit opinion on the related financial statements is other than unqualified, the practitioner should disclose that fact, and any substantive reasons therefore.
.11 Reporting on Management’s Assertions

Independent Accountant’s Report on Attest Engagements on Financial Information
Included in XBRL Instance Documents

We have examined management’s assertion that [identify the assertion—for example, the accompanying XBRL Instance Document accurately reflects the data presented in the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended in conformity with (identify the criteria—for example, specific XBRL taxonomy, such as the “XBRL U.S. Consumer and Industrial Taxonomy,” and where applicable, the company extension taxonomy, such as “XYZ Company’s extension taxonomy,” and the XBRL International Technical Specifications 2.0)]. XYZ Company’s management is responsible for the assertion. Our responsibility is to express an opinion on the assertion based on our examination.

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of XYZ Company as of December 31, 20XX, and for the year then ended, and in our report dated [Month] XX, 20XX, we expressed an unqualified opinion on those financial statements.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the XBRL Instance Document and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, management’s assertion referred to above is fairly stated, in all material respects, in conformity with [identify the criteria—for example, specific XBRL taxonomy, such as the “XBRL U.S. Consumer and Industrial Taxonomy,” and where applicable, the company extension taxonomy, such as “XYZ Company’s extension taxonomy,” and the XBRL International Technical Specifications 2.0]].

6 Financial information includes data presented in audited or reviewed financial statements or other financial information (for example, Management Discussion and Analysis).
.12 Report on Compliance With Contractual Provisions (Given in a Separate Report)

Independent Auditor’s Report

We have audited, in accordance with auditing standards generally accepted in the United States of America, the balance sheet of XYZ Company as of December 31, 20X2, and the related statement of income, retained earnings, and cash flows for the year then ended, and have issued our report thereon dated February 16, 20X3.

In connection with our audit, nothing came to our attention that caused us to believe that the Company failed to comply with the terms, covenants, provisions, or conditions of sections XX to XX, inclusive, of the Indenture dated July 21, 20X0, with ABC Bank insofar as they relate to accounting matters. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance.

This report is intended solely for the information and use of the boards of directors and management of XYZ Company and ABC Bank and is not intended to be and should not be used by anyone other than these specified parties.

[Source: Paragraph .21 of AU section 623]

Note:

When this report is included in the auditor’s standard report accompanying financial statements, the last two paragraphs are examples of the paragraphs that should follow the opinion paragraph of the auditor’s report on the financial statements.
.13 Report on Financial Statements Prepared Pursuant to Loan Agreements That Results in a Presentation Not in Conformity With Generally Accepted Accounting Principles or an Other Comprehensive Basis of Accounting

Independent Auditor’s Report

Addressee:

We have audited the special-purpose statement of assets and liabilities of ABC Company as of December 31, 20X2 and 20X1, and the related special-purpose statements of revenues and expenses and of cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of complying with Section 4 of a loan agreement between DEF Bank and the Company as discussed in Note X, and are not intended to be a presentation in conformity with generally accepted accounting principles.

In our opinion, the special-purpose financial statements referred to above present fairly, in all material respects, the assets and liabilities of ABC Company at December 31, 20X2 and 20X1, and the revenues, expenses and cash flows for the years then ended, on the basis of accounting described in Note X.

This report is intended solely for the information and use of the boards of directors and management of ABC Company and DEF Bank and is not intended to be and should not be used by anyone other than these specified parties.

.14 Report on a Schedule of Gross Income and Certain Expenses to Meet Regulatory Requirements and
to be Included in a Document Distributed to the General Public

Independent Auditor’s Report

Addressee:

We have audited the accompanying Historical Summaries of Gross Income and Direct Operating Expenses of ABC Apartments, City, State (Historical Summaries), for each of the three years in the period ended December 31, 20XX. These Historical Summaries are the responsibility of the Apartments’ management. Our responsibility is to express an opinion on the Historical Summaries based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Historical Summaries are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Historical Summaries. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Historical Summaries. We believe that our audits provide a reasonable basis for our opinion.

The accompanying Historical Summaries were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission (for inclusion in the registration statement on Form S-11 of DEF Corporation) as described in Note X and are not intended to be a complete presentation of the Apartments’ revenues and expenses.

In our opinion, the Historical Summaries referred to above present fairly, in all material respects, the gross income and direct operating expenses described in Note X of ABC Apartments for each of the three years in the period ended December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

.15 Report on a Statement of Assets Sold and Liabilities Transferred to Comply With a Contractual Agreement

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of net assets sold of ABC Company as of June 8, 20XX. This statement of net assets sold is the responsibility of ABC Company’s management. Our responsibility is to express an opinion on the statement of net assets sold based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of net assets sold is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the statement of net assets sold. We believe that our audit provides a reasonable basis for our opinion.

The accompanying statement was prepared to present the net assets of ABC Company sold to XYZ Corporation pursuant to the purchase agreement described in Note X, and is not intended to be a complete presentation of ABC Company’s assets and liabilities.

In our opinion, the accompanying statement of net assets sold presents fairly, in all material respects, the net assets of ABC Company as of June 8, 20XX sold pursuant to the purchase agreement referred to in Note X, in conformity with accounting principles generally accepted in the United States of America.

This report is intended solely for the information and use of the boards of directors and managements of ABC Company and XYZ Corporation and is not intended to be and should not be used by anyone other than these specified parties.

.16 Report on the Application of Accounting Principles

Introduction

We have been engaged to report on the appropriate application of accounting principles generally accepted in [country of origin of such principles] to the specific transaction described below. This report is being issued to ABC Company for assistance in evaluating accounting principles for the described specific transaction. Our engagement has been conducted in accordance with standards established by the American Institute of Certified Public Accountants.

Description of Transaction

The facts, circumstances, and assumptions relevant to the specific transaction as provided to us by the management of ABC Company are as follows:

Appropriate Accounting Principles

[Text discussing generally accepted accounting principles]

Concluding Comments

The ultimate responsibility for the decision on the appropriate application of accounting principles generally accepted in [country of origin of such principles] for an actual transaction rests with the preparers of financial statements, who should consult with their continuing accountant. Our judgment on the appropriate application of accounting principles generally accepted in [country of origin of such principles] for the described specific transaction is based solely on the facts provided to us as described above; should these facts and circumstances differ, our conclusion may change.

Restricted Use

This report is intended solely for the information and use of the board of directors and management of ABC Company and is not intended to be and should not be used by anyone other than these specified parties.

[Source: Paragraph .11 of AU section 625, Reports on the Application of Accounting Principles (AICPA, Professional Standards, vol. 1)]

Notes:

This illustrative report is intended for a reporting accountant either in connection with a proposal to obtain a new client or otherwise, should apply when preparing a written report on (1) The application of accounting principles to specified transactions, either completed or proposed, involving facts and circumstances of a specific entity (“specific transactions”), or (2) The type of opinion that may be rendered on a specific entity’s financial statements.

[Source: Paragraph .03 of AU section 625]

Because of the nature of a transaction not involving facts or circumstances of a specific entity (“hypothetical transaction”), a reporting accountant cannot know, for example, whether the continuing accountant has reached a different conclusion on the application of accounting principles for the same or similar transaction, or how the specific entity has accounted for similar transactions in the past. Therefore an accountant should not undertake an engagement to provide a written report on the application of accounting principles to a hypothetical transaction.

Independent Auditor’s Report

To the Board of Directors
ABC Property and Liability Company

We have audited the accompanying statutory statements of admitted assets, liabilities, and surplus of ABC Property and Liability Company as of December 31, 20X2 and 20X1, and the related statutory statements of income and changes in surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America.7 Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described more fully in Note X to the financial statements, the Company prepared these financial statements using accounting practices prescribed or permitted by the Insurance Department of the State of [State of domicile], which practices differ from accounting principles generally accepted in the United States of America. The effects on the financial statements of the variances between these statutory accounting practices and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material.

In our opinion, because of the effects of the matter discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of ABC Property and Liability Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows8 for the years then ended.

In our opinion, the financial statements referred to above present fairly, in all material respects, the admitted assets, liabilities, and surplus of ABC Property and Liability Company as of December 31, 20X2 and 20X1, and

---

7 For audits conducted in accordance with PCAOB standards, PCAOB Auditing Standard No. 1, References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), replaces this sentence with the following sentence: “We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States).”

Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report on a Nonissuer,” of AU section 508, Reports on Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .89–.92), provides reporting guidance for audits of nonissuers. Interpretation No. 18 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance with both generally accepted auditing standards and PCAOB auditing standards. The Auditing Standards Board also has undertaken a project to determine what amendments, if any, should be made to AU section 508. See the AICPA Web site at www.aicpa.org/members/div/auditstd/index.htm for more information.

This optional wording may be added in accordance with Interpretation No. 17, “Clarification in the Audit Report of the Extent of Testing Internal Control Over Financial Reporting With Generally Accepted Auditing Standards,” of AU section 508 (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .85–.88), which provides reporting guidance for audits of nonissuers. Interpretation No. 17 addresses how auditors may expand their independent audit report to explain that their consideration of internal control was sufficient to provide the auditor sufficient understanding to plan the audit and determine the nature, timing and extent of tests to be performed, but was not sufficient to express an opinion on the effectiveness of the internal control. If this optional language is added, then the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

8 Reference to cash flows would not be needed if the entity, under generally accepted accounting principles, is not required to present a statement of cash flows.
the results of its operations and its cash flows for the years then ended, on the basis of accounting described in Note X.

Unaudited Financial Statements of a Public Entity

.01 Disclaimer

(When an accountant is associated with the financial statements but has not audited or reviewed such statements)

Addressee:

The accompanying balance sheet of X Company as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[Signature]

[Date]

[Source: Paragraph .05 of AU section 504, Association With Financial Statements (AICPA, Professional Standards, vol. 1)]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a nonissuer, this example is not appropriate. See AAM sections 2610 and 2620.
.02 Current Period Financial Statements Unaudited—Prior Period Financial Statements Audited

Addressee:

The accompanying balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

The financial statements for the year ended December 31, 20X1, were audited by us (other accountants) and we (they) expressed an unqualified opinion on them in our (their) report dated March 1, 20X2, but we (they) have not performed any auditing procedures since that date.

[Signature]

[Date]

[Source: Paragraphs .05 and .16 of AU section 504]

Notes: The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a nonissuer, this example is not appropriate. See AAM sections 2610 and 2620.
.03 Disclaimer—Cash Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of assets and liabilities resulting from cash transactions of XYZ Corporation as of December 31, 19X1, and the related statement of revenues collected and expenses paid during the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[Signature]

[Date]

[Source: Paragraph .07 of AU section 504]

Notes: A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited.

If the unaudited financial statements are those of a nonissuer, this example is not appropriate. See AAM sections 2610 and 2620.
04 Disclaimer—Regulatory (Statutory) Basis Statements

(When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles)

Addressee:

The accompanying statement of admitted assets, liabilities, and surplus—statutory basis of XYZ Insurance Company as of December 31, 20XX, and the related statements of income—statutory basis, cash flows—statutory basis, and changes in surplus—statutory basis for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

AAM Section 9280

Lack of Independence

.01 Disclaimer

Addressee:

We are not independent with respect to XYZ Company, and the accompanying balance sheet as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

[Signature]
[Date]

[Source: Paragraph .10 of AU section 504, Association With Financial Statements (AICPA, Professional Standards, vol. 1)]

Notes: When an accountant is not independent, any procedures he or she might perform would not be in accordance with generally accepted auditing standards and he or she would be precluded from expressing an opinion on the financial statements. Accordingly, he or she should disclaim an opinion with respect to the financial statements and state specifically that he or she is not independent. The accountant should not include in his or her disclaimer the reasons for the lack of independence or any description of the procedures he or she has performed; including such matters might confuse readers concerning the importance of the lack of independence.

If the financial statements are those of a nonissuer, the accountant must consider the guidance in Statements on Standards for Accounting and Review Services. (See paragraph .03 of AAM section 2610.)

AAM Section 9300

Review of Interim Financial Information

.01 Independent Accountant’s Report

Independent Accountant’s Report

Addressee:

We have reviewed the accompanying [describe the interim financial information or statements reviewed] of ABC Company and consolidated subsidiaries as of September 30, 20X1, and for the three-month and nine-month periods then ended. This (These) interim financial information (statements) is (are) the responsibility of the company’s management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial information (statements) for it (them) to be in conformity with accounting principles generally accepted in the United States of America.

[Signature]
[Date]

Note:  AU section 722A establishes standards and provides guidance on the nature, timing, and extent of the procedures to be performed by an independent accountant when conducting a review of interim financial information, as that term is defined in paragraph .02 of AU section 722A.

AAM Section 9400

Accountants’ Reports on Condensed Financial Statements and Selected Financial Data

.01 Unqualified Opinion on Condensed Financial Statements

Independent Auditor’s Report

Addressee:

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[Signature]

[Date]

[Source: Paragraph .06 of AU section 552, Reporting on Condensed Financial Statements and Selected Financial Data (AICPA, Professional Standards, vol. 1)]
.02 Adverse Opinion on Condensed Financial Statements Due to Inadequate Disclosure

Independent Auditor's Report

Addressee:

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America.

In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended.

[Signature]
[Date]

Note: The above report is used when expressing an adverse opinion on condensed financial statements with inadequate disclosures that are included in a client-prepared document and the client is a nonissuer.

[Source: Footnote 6 in paragraph .07 of AU section 552]
Addressee:

We have reviewed the condensed consolidated balance sheet of ABC Company and subsidiaries as of March 31, 20X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0. These financial statements are the responsibility of the company’s management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of ABC Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

[Signature]

[Date]

Note: This is an illustrative review report on a condensed balance sheet as of March 31, 20X1, and the related condensed statements of income and cash flows for the three-month periods ended March 31, 20X1 and 20X0, and a condensed balance sheet derived from audited financial statements as of December 31, 20X0, that were included in Form 10-Q.

.02 Audit Report—Statement of Financial Condition Only

Independent Auditor’s Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [date]. This financial statement is the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on this financial statement based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement of financial condition. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall presentation of the statement of financial condition. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

In my (our) opinion, the financial statement referred to above presents fairly, in all material respects, the financial condition of James and Jane Person as of [date] in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[Source: AICPA Personal Financial Statements Guide, updated as of May 1, 2008, paragraph 5.21]
.03 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Adverse Opinion

Independent Auditor’s Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [date] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion those procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, because of the effects of the matters discussed in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial condition of James and Jane Person as of [date], or the changes in their net worth for the [period] then ended.

[Signature]
[Date]

.04 Audit Report—Departure From GAAP—Inappropriate Valuation Methods—Qualified Opinion

Independent Auditor’s Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As discussed in Note X to the financial statements, assets amounting to $XX,XXX (XX percent of total assets) as of [date] have been valued at estimated current value as determined by James Person. I (We) have reviewed the procedures applied by James Person in valuing the assets and have inspected the underlying documentation. In my (our) opinion, these procedures are not appropriate to determine the estimated current values of the assets in conformity with generally accepted accounting principles. The effects on the financial statements of not applying appropriate procedures to determine the estimated current values of the assets are not reasonably determinable.

In my (our) opinion, except for the effects of the valuation of assets determined by James Person as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial condition of James and Jane Person as of [date], and the changes in their net worth for the [period] then ended in conformity with accounting principles generally accepted in the United States of America.

.05 Audit Report—Disclaim Opinion Because of Scope Limitation—Inadequate Records

Independent Auditor’s Report

Addressee:

I (We) were engaged to audit the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended. These financial statements are the responsibility of James and Jane Person.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

Since James and Jane Person do not maintain certain accounting records and supporting documentation and I was (we were) unable to apply adequate auditing procedures regarding the recording of transactions, the scope of my (our) work was not sufficient to enable me (us) to express, and I (we) do not express, an opinion on these financial statements.

[Signature]

[Date]

[Source: AICPA Personal Financial Statements Guide, updated as of May 1, 2008, paragraph 5.17]
.06 Audit Report—Scope Limitation—Inadequate Records

Independent Auditor’s Report

Addressee:

I (We) have audited the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

Except as discussed in the following paragraph, I (we) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

James and Jane Person do not maintain accounting records sufficient to assure that all transactions are recorded. Accordingly, it was not practicable for me (us) to extend my (our) auditing procedures sufficiently to determine that all of their assets and liabilities and the changes in their net worth are recorded in the financial statements referred to above.

In my (our) opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had I (we) been able to determine that all assets and liabilities and changes in net worth were recorded in the financial statements, the financial statements referred to above present fairly, in all material respects, the financial condition of James and Jane Person as of [date], and the changes in their net worth for the [period] then ended in conformity with accounting principles generally accepted in the United States of America.

.07 Audit Report—Income Tax Basis

Independent Auditor's Report

Addressee:

I (We) have audited the accompanying statement of assets and liabilities—income tax basis of James and Jane Person as of [date], and the related statement of changes in net worth—income tax basis for the [period] then ended. These financial statements are the responsibility of James and Jane Person. My (Our) responsibility is to express an opinion on these financial statements based on my (our) audit.

I (We) conducted my (our) audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I (we) plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by James and Jane Person, as well as evaluating the overall financial statement presentation. I (We) believe that my (our) audit provides a reasonable basis for my (our) opinion.

As described in Note X, these financial statements were prepared on the basis of accounting James and Jane Person use for income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In my (our) opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities of James and Jane Person as of [date], and the changes in their net worth for the [period] then ended on the basis of accounting described in Note X.

.10 Compilation Report—Omission of Substantially All Disclosures

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

James and Jane Person have elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the financial condition of James and Jane Person and changes in their net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[Signature]

[Date]

[Source: AICPA Personal Financial Statements Guide, updated as of May 1, 2008, paragraph 5.05]

Note: When personal financial statements omit substantially all disclosures and do not disclose that the assets are presented at their estimated current values and that the liabilities are presented at their estimated current amounts, the accountant should include the following sentence at the end of the first paragraph of his or her report:

The financial statements are intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

.11 Compilation Report—GAAP Departure—Material Assets at Cost

Addressee:

I (We) have compiled the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that assets be presented at their estimated current values and that liabilities be presented at their estimated current amounts. James and Jane Person have informed me (us) that their investment in ABC Company is stated in the accompanying financial statements at cost and that the effects of this departure from generally accepted accounting principles on their financial condition and the changes in their net worth have not been determined.

.12 Compilation Report—Income Tax Basis

Addressee:

I (We) have compiled the accompanying statement of assets and liabilities—income tax basis of James and Jane Person as of [date], and the related statement of changes in net assets—income tax basis for the [period] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

[Signature]

.13 Compilation Report—Financial Statements Included in a Prescribed Form

Addressee:

I (We) have compiled the [identification of financial statements, including period covered and name of individual(s)] included in the accompanying prescribed form, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

My (Our) compilation was limited to presenting in the form prescribed by [name of body] information that is the representation of the individuals whose financial statements are presented. I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements of [name of body], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.14 Accountant’s Standard Review Report

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James and Jane Person as of [date], and the related statement of changes in net worth for the [period] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James and Jane Person.

A review consists principally of inquiries of the individuals whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

.16 Review Report—GAAP Departure—Failure to Include a Provision for Estimated Income Taxes on the Differences Between the Estimated Current Values of Assets and the Estimated Current Amounts of Liabilities and Their Tax Bases

Addressee:

I (We) have reviewed the accompanying statement of financial condition of James Person as of [date], and the related statement of changes in net worth for the [period] then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of James Person.

A review of personal financial statements consists principally of inquiries of the individual whose financial statements are presented and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and the estimated current amounts of liabilities and their tax bases. The accompanying financial statements do not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

AAM Section 9600

Reports on Employee Benefit Plans

Practice Tip
Audits of 11-K Filers—Performance and Reporting Requirements

SEC Requirements
The Securities and Exchange Commission (SEC) requires employee stock purchase, savings and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the Securities Exchange Act of 1934. Reports on Form 11-K must be filed within the SEC within 90 days after the end of the fiscal year of the plan, provided that plans subject to the Employee Retirement Income Security Act of 1974 (ERISA) file the plan financial statements within 180 days after the plan’s fiscal year end.

Applicable Audit Standards
Plans that are required to file Form 11-Ks are deemed to be issuers under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the Public Company Accounting Oversight Board (PCAOB).

Performance and Reporting Requirements
Based on AICPA staff discussions with the SEC and PCAOB staff to seek clarification of the performance and reporting requirements for audits of 11-K filers, firms will need to conduct their audits of these 11-K plans in accordance with two sets of standards and prepare two separate audit reports; an audit report referencing PCAOB standards for Form 11-K filings with the SEC and a separate audit report referencing generally accepted auditing standards (GAAS) for Department of Labor (DOL) filings. The PCAOB and SEC staff believe that an opinion issued in accordance with PCAOB Auditing Standard No. 1, References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), does not allow a reference to GAAS, hence a “dual” standard report is not appropriate and will not be accepted by the SEC.

Any questions regarding performance and reporting requirements of audits of financial statements of Form 11-K filers should be directed to the SEC Division of Corporation Finance, Office of the Chief Accountant at (202) 942-2960.
.01 Unqualified Opinion—Defined Benefit Plan Assuming End-of-Year Benefit Information Date

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits and of accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 20X2 and 20X1, and the changes in its financial status for the year ended December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

[Signature of Firm]

[City and State]

[Date]

[Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.04]

Note: Section 2520.103-1 of Title 29 U.S. Code of Federal Regulations (CFR) Part 2520.C requires the accountant’s report to be dated, manually signed, indicate the city and state where issued and identify the financial statements and schedules covered by the report.

---

1 This optional language may be added to the auditor’s standard report to clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the Sarbanes-Oxley Act is applicable. If this optional language is added then the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

.02 Unqualified Opinion—Defined Benefit Plan Assuming Beginning-of-Year Benefit Information Date

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of December 31, 20X1, and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. Accordingly, we express no such opinion.]\(^2\) An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan’s net assets available for benefits as of December 31, 20X2, and changes therein for the year then ended and its financial status as of December 31, 20X1, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We believe that our audits provide a reasonable basis for our opinion.

See Interpretation No. 17 of AU section 508.
.04 Unqualified Opinion—Employee Health and Welfare Benefit Plans

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits and of plan benefit obligations of Allied Industries Benefit Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in benefits obligations for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. .05 Unqualified Opinion—Supplemental Schedules Required by ERISA and DOL Regulations

Independent Auditor’s Report

Addressee:

Our audits were performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[Signature of Firm]

[City and State]

[Date]

[Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.11]

Notes: This paragraph can be shown separately in the auditor-submitted document or as a separate paragraph, after the opinion paragraph, of the auditor’s standard report, when the auditor’s report covers additional information and the auditor has applied auditing procedures and is expressing an opinion on the additional information.

Examples of paragraphs that should be added to the standard auditor’s report when the report on the supplemental schedules is modified because of omitted information or an omitted schedule required by DOL regulations are presented in paragraphs .07-.08 and .18.
.06 Unqualified Opinion—Defined Benefit Pension Plan Prepared on the Modified Cash Basis

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits (modified cash basis) of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits (modified cash basis) for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note X, these financial statements and supplemental schedules were prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than GAAP.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the changes in net assets available for benefits for the year ended December 20X2, on the basis of accounting described in Note X.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules (modified cash basis) of [identify titles of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[Date]

[Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.22]
Note: When reporting on financial statements prepared in conformity with a basis of accounting other than generally accepted accounting principles (GAAP), the auditor should consider whether the financial statements and notes thereto include all informative disclosures that are appropriate for the basis of accounting used. Interpretation No. 14, “Evaluating the Adequacy of Disclosure and Presentation in Financial Statements Prepared in Conformity With an Other Comprehensive Basis of Accounting (OCBOA),” of AU section 623, Special Reports (AICPA, Professional Standards, vol. 1, AU sec. 9623 par. .90–.95), states that if cash, modified cash, or income tax basis financial statements contain elements, accounts, or items for which GAAP would require disclosure, the statements should either provide the relevant disclosure that would be required for those items in a GAAP presentation or provide information that communicates the substance of that disclosure. That may result in substituting qualitative information for some of the quantitative information required for GAAP presentations. Regardless of the basis of accounting used (GAAP or OCBOA), accumulated plan benefits disclosures should be made. If such disclosures are not made, the auditor should comment in his or her report on the lack of such disclosures and should express a qualified or adverse opinion on the financial statements. [Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.23]
.07 Modified Report—Omitted Information or Omitted Schedule Required Under DOL Regulations

Following are examples of paragraphs added to the auditor’s report when the auditor modifies his or her report on the supplemental schedules because of omitted information or an omitted schedule which is required under DOL regulations:

Independent Auditor’s Report

Addressee:

[Same first, second, and third paragraphs as the standard report. See paragraphs .01–.03 in this section.]

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2 that accompanies the Plan’s financial statements does not disclose the historical cost of certain nonparticipant directed plan assets held by the Plan trustee [or custodian]. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

or

The Plan has not presented the supplemental Schedule H, line 4j—Schedule of Reportable Transactions for the year ended December 31, 20X2. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.08 Qualified Opinion—Omitted or Incomplete Schedule or Material Inconsistency

The following are examples of paragraphs that have been added to the auditor’s report when the auditor qualifies his or her opinion on the supplemental schedules because a schedule, or information thereon, was omitted (when the schedules are not covered by a trustee’s certification as to completeness and accuracy), or because information in a required schedule is materially inconsistent with the financial statements.

Independent Auditor’s Report

Addressee:

[Same first, second, and third paragraphs as the standard report. See paragraphs .01-.03 in this section.]

The supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2 that accompanies the Plan’s financial statements does not disclose that the Plan had loans to participants which are considered assets held for investment purposes. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.09 Qualified Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted

The following are examples of paragraphs that have been added to the auditor’s report on the plan’s financial statements when the auditor qualifies his or her opinion on the supplemental schedules because disclosure of a material prohibited transaction with a party in interest is omitted.

Independent Auditor’s Report

Addressee:

[Same first, second, and third paragraphs as the standard report. See paragraphs .01–.03 in this section.]

The supplemental Schedule G, Part III—Schedule of Nonexempt Transactions that accompanies the plan’s financial statements does not disclose that the Plan [describe prohibited transaction]. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.10 Adverse Opinion—Disclosure of Material Prohibited Transaction With Party in Interest Omitted

The following are examples of paragraphs that have been added to the auditor’s report on the plan’s financial statements when the auditor decides that an adverse opinion should be expressed on the supplemental schedules because disclosure of a material prohibited transaction with a party in interest is omitted.

Independent Auditor’s Report

Addressee:

Same first, second, and third paragraphs as the standard report. See paragraphs .01–.03 in this section.

Schedule G, Part III—Schedule of Nonexempt Transactions that accompanies the plan’s financial statements does not disclose that the Plan [describe prohibited transaction]. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, because of the omission of the information discussed in the preceding paragraph are not fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.11 Modified Report—Disclosure of Immaterial Prohibited Transaction With Party in Interest Omitted

The following are examples of paragraphs that have been added to the auditor’s report on the plan’s financial statements when the auditor decides to modify his or her report on the supplemental schedules because disclosure of a prohibited transaction with a party in interest that is not material to the financial statements has been omitted.

Independent Auditor’s Report

Addressee:

[Same first, second, and third paragraphs as the standard report. See paragraphs .01–.03 in this section.]

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Schedule G, Part III—Schedule of Nonexempt Transactions that accompanies the plan’s financial statements does not disclose that the Plan [describe prohibited transaction]. Disclosure of this information, which is not considered material to the financial statements taken as a whole, is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Independent Auditor’s Report

Addressee:

We have audited the accompanying statement of net assets available for benefits of XYZ Company Profit-Sharing Plan as of December 31, 20X1 and 20X0, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X1. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The Plan’s financial statements do not disclose that the Plan [describe related-party transaction]. Disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 20X1 and 20X0, and the changes in net assets available for benefits for the year ended December 31, 20X1 in conformity with accounting principles generally accepted in the United States of America.

Schedule G, Part III—Schedule of Nonexempt Transactions that accompanies the plan’s financial statements does not disclose that the plan [describe prohibited transaction]. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audits of the basic financial statements and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Limited-Scope Audits Under DOL Regulations

Independent Auditor's Report

Addressee:

We were engaged to audit the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2 and the supplemental schedules of (1) Schedule H, line 4i-Schedule of Assets Held (At End of Year), and (2) Schedule H, line 4j-Schedule of Reportable Transactions as of or for the year ended December 31, 20X2. These financial statements and supplemental schedules are the responsibility of the Plan’s management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan’s investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of December 31, 20X2 and 20X1 and for the year ended December 31, 20X2, that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee or custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Note: If the plan’s financial statements are prepared on the cash basis or a modified cash basis of accounting, the auditor’s report should also include a paragraph stating the basis of presentation and that cash basis is a comprehensive basis of accounting other than GAAP (see paragraph 13.21 of the AICPA Audit and Accounting Guide Employee Benefit Plans, for wording of such a paragraph). [Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.26 footnote 6]
.14 Limited-Scope Audit in Prior Year

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2, and the statements of accumulated plan benefits as of December 31, 20X2 and 20X1, and the related statement of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

Except as explained in the following paragraph, we conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provide a reasonable basis for our opinion.

As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, investment assets held by ABC Bank, the trustee (or custodian) of the Plan, and transactions in those assets were excluded from the scope of our audit of the Plan’s 20X1 financial statements, except for comparing the information provided by the trustee (or custodian), which is summarized in Note X, with the related information included in the financial statements.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the Plan’s financial statements as of December 31, 20X1. The form and content of the information included in the 20X1 financial statements, other than that derived from the information certified by the trustee (or custodian), have been audited by us and, in our opinion, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

In our opinion, the financial statements, referred to above, of XYZ Pension Plan as of December 31, 20X2, and for the year then ended present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X2, and changes in its financial status for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit of the Plan’s financial statements as of and for the year ended December 31, 20X2, was made for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules of [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. The supplemental schedules have been subjected to the auditing procedures applied in the audit of the basic
financial statements for the year ended December 31, 20X2, and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Limited-Scope Audit in Current Year

Independent Auditor’s Report

Addressee:

We were engaged to audit the accompanying statement of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2 and the supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets Held (At End of Year), (2) Schedule H, line 4j—Schedule of Reportable Transactions as of or for the year ended December 31, 20X2. These financial statements and supplemental schedules are the responsibility of the Plan’s management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note X, which was certified by ABC Bank, the trustee (or custodian) of the Plan, except for comparing the information with the related information included in the 20X2 financial statements and the supplemental schedules. We have been informed by the plan administrator that the trustee (or custodian) holds the Plan’s investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee (or custodian) as of and for the year ended December 31, 20X2, that the information provided to the plan administrator by the trustee (or custodian) is complete and accurate.

Because of the significance of the information in the Plan’s 20X2 financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules as of or for the year ended December 31, 20X2. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee (or custodian), have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

We have audited the statement of net assets available for benefits of XYZ Pension Plan as of December 31, 20X1, and in our report dated May 20, 20X2, we expressed our opinion that such financial statement presents fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X1, in conformity with accounting principles generally accepted in the United States of America.

.16 Initial Limited-Scope Audit in Current Year, Prior Year Limited-Scope Audit Performed by Other Auditors

**Report of Independent Certified Public Accountants**

**Addressee:**

We were engaged to audit the accompanying statement of net assets available for benefits of ABC Company Profit-Sharing Plan (the “Plan”) as of December 31, 20X2, and the related statement of changes in net assets available for benefits for the year ended December 31, 20X2 and the supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2. These financial statements and supplemental schedule are the responsibility of the Plan’s management. The financial statements of the plan as of December 31, 20X1 were audited by other auditors. As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (“ERISA”), the Plan administrator instructed the other auditors not to perform and they did not perform, any auditing procedures with respect to the information certified by the Trustee. Their report, dated May 20, 20X2, indicated that (a) because of the significance of the information that they did not audit, they were unable to, and did not, express an opinion on the financial statements taken as a whole and (b) the form and content of the information included in the financial statements other than that derived from the information certified by the Trustee, were presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA.

As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in note E, which was certified by Bank & Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the 20X2 financial statements and supplemental schedule. We have been informed by the Plan administrator that the trustee holds the Plan’s investment assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee as of and for the year ended December 31, 20X2, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information in the Plan’s 20X2 financial statements and supplemental schedule that we did not audit, we are unable to, and do not, express an opinion on the accompanying 20X2 financial statements and supplemental schedule taken as a whole. The form and content of the information included in the 20X2 financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.17 Limited Scope Audit—Change in Trustee

Report of Independent Certified Public Accountants

Addressee:

We were engaged to audit the accompanying statements of net assets available for benefits and of accumulated plan benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2, and the supplemental schedules of (1) Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2, and (2) Schedule H, line 4j—Schedule of Reportable Transactions for the year ended December 31, 20X2. These financial statements and schedules are the responsibility of the Plan’s management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note X, which was certified by the ABC Bank and XYZ Trust Company, the trustees of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that XYZ Trust Company held the Plan’s investment assets and executed investment transactions from July 1, 20X2 to December 31, 20X2, and that ABC Bank held the Plan’s investment assets and executed investment transactions as of December 31, 20X1 and for the period January 1, 20X1 to June 30, 20X2. The plan administrator has obtained certifications from the trustees as of and for the years ended December 31, 20X2 and 20X1, that the information provided to the plan administrator by the trustees is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the investment information certified by the trustees, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.18 Audit of Multiemployer Defined Benefit Pension Plan With Scope Limitation

Independent Auditor’s Report

Addressee:

We were engaged to audit the statements of XYZ Multiemployer Pension Plan as of December 31, 20X2 and 20X1, and for the years then ended. These financial statements are the responsibility of the Plan’s management.

The Plan’s records and procedures are not adequate to assure the completeness of participants’ data on which contributions and benefit payments are determined, and the Board of Trustees did not engage us to perform, and we did not perform, any other auditing procedures with respect to participants’ data maintained by the sponsor companies or individual participants.

Because of the significance of the information that we did not audit, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

.19 Modified Report—Omitted Information or Omitted Schedule Required Under DOL Regulations in a Limited Scope Engagement

Independent Auditor’s Report

Addressee:

[Same first and second paragraphs as the limited-scope report. See paragraph .13 in this section.]

The supplemental Schedule H, line 4i—Schedule of Assets (Held at End of Year) as of December 31, 20X2 that accompanies the Plan’s financial statements does not disclose the historical cost of certain nonparticipant directed plan assets held by the Plan trustee [or custodian]. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

or

The Plan has not presented the supplemental Schedule H, line 4j—Schedule of Reportable Transactions for the year ended December 31, 20X2. Disclosure of this information is required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, except for the omission of the information discussed in the preceding paragraph, are presented in compliance with the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

.20 Trust Established Under an Employee Benefit Plan

Independent Auditor’s Report

Addressee:

We have audited the accompanying statement of net assets of ABC Pension Trust as of December 31, 20X2, and the related statement of changes in net assets and trust balance for the year then ended. These financial statements are the responsibility of the Trust’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets of ABC Pension Trust as of December 31, 20X2, and the changes in its net assets and trust balance for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying statements are those of ABC Pension Trust, which is established under XYZ Pension Plan; the statements do not purport to present the financial status of XYZ Pension Plan. The statements do not contain certain information on accumulated plan benefits and other disclosures necessary for a fair presentation of the financial status of XYZ Pension Plan in conformity with accounting principles generally accepted in the United States of America. Furthermore, these statements do not purport to satisfy the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 relating to the financial statements of employee benefit plans.

.21 Defined Benefit Plan Assuming Inadequate Procedures to Value Investments

Independent Auditor’s Report

Addressee:

We have audited the accompanying statements of net assets available for benefits of XYZ Pension Plan as of December 31, 20X2 and 20X1 and of accumulated Plan benefits as of December 31, 20X2, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 20X2. These financial statements are the responsibility of the Plan’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. Accordingly, we express no such opinion.] An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note X, investments amounting to $______ (__ percent of net assets available for benefits) as of December 31, 20X2, have been valued at estimated fair value as determined by the Board of Trustees. We have reviewed the procedures applied by the trustees in valuing the securities and have inspected the underlying documentation. In our opinion, those procedures are not adequate to determine the fair value of the investments in conformity with accounting principles generally accepted in the United States of America. The effect on the financial statements and supplemental schedules of not applying adequate procedures to determine the fair value of the securities is not determinable.

In our opinion, except for the effects of the procedures used by the Board of Trustees to determine the valuation of investments as described in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial status of XYZ Pension Plan as of December 31, 20X2 and information regarding the Plan’s net assets available for benefits as of December 31, 20X1, and the changes in its financial status for the year ended December 31, 20X2 in conformity with accounting principles generally accepted in the United States of America.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The supplemental schedules [identify title of schedules and period covered] are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor’s Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These supplemental schedules are the responsibility of the Plan’s management. That additional information has been subjected to the auditing procedures applied in the audit of the basic financial statements for the year ended December 31, 20X2; and in our opinion, except for the effects of the valuation of investments, as described above, the additional information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[Source: AICPA Audit and Accounting Guide Employee Benefit Plans, updated as of March 1, 2009, paragraph 13.19]

Note: Reporting Considerations for Nonaccelerated Filer Audit Reports. In an audit of a nonaccelerated filer that has determined it is not required to obtain, nor did it request the auditor to perform, an audit of internal control over financial reporting (under Section 404(b) of the Sarbanes-Oxley Act of 2002 and Item 308(b) of SEC Regulation S-K), firms may wish to consider expanding their audit report to include a statement that the purpose and extent of the auditor’s consideration of internal control over financial reporting were to determine that the nature, timing, and extent of tests to be performed are appropriate in the circumstances but were not sufficient to express an opinion on the effectiveness of internal control over financial reporting. Firms are not required to expand their audit report to include this statement. However, the SEC staff has indicated that if a firm chooses to expand its report to clarify this point, the language in Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report on a Nonissuer,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .89–.92), provides appropriate language to consider in an audit conducted in accordance with PCAOB standards. Accordingly, the scope section of the auditor’s report might be modified as follows:

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes
examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As an alternative to the first additional sentence suggested by Interpretation 18 of AU section 508, a firm also might consider the following: A second alternative would be to use language from Auditing Interpretation No. 2, “Reports by Management on Internal Control Over Financial Reporting,” of AU section 550, Other Information in Documents Containing Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9550 par. .07–.11). Paragraph .10 of Interpretation No. 2 of AU section 550 states, “Although not required, the auditor may consider adding the following paragraph to the standard auditor’s report:

We were not engaged to examine management’s assertion about the effectiveness of [name of entity’s] internal control over financial reporting as of [date] included in the accompanying [title of management’s report] and accordingly, we do not express an opinion thereon.

[This information is from the Center for Audit Quality (CAQ)—CAQ Alert #2007-66—December 19, 2007.]

AAM §9650

Reports on Financial Statements of Brokers and Dealers in Securities

.01 Unqualified Opinion on Financial Statements and Supplementary Schedules Required by the SEC

Independent Auditor’s Report

Addressee:

We have audited the accompanying [consolidated] statement of financial condition of Standard Stockbrokerage Co., Inc., [and Subsidiaries] (the Company) as of December 31, 20X8, and the related [consolidated] statements of income, changes in stockholders’ equity, changes in liabilities subordinated to claims of general creditors, and cash flows for the year then ended that you are filing pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America.1 Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. [Optional: An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.]2 An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

1 For audits conducted in accordance with Public Company Accounting Oversight Board (PCAOB) standards, PCAOB Auditing Standard No. 1, “References in Auditors’ Reports to the Standards of the Public Company Accounting Oversight Board (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”), replaces this sentence with the following sentence: “We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States).” On May 14, 2004, the Securities and Exchange Commission (SEC) issued an interpretive release to help with the implementation of PCAOB Auditing Standard No. 1. See Release No. 33-8422 for more information. The release specifies that effective May 14, 2004, references in SEC rules and staff guidance and in the federal securities laws to generally accepted auditing standards (GAAS) or to specific standards under GAAS, as they relate to issuers, should be understood to mean the standards of the PCAOB, plus any applicable rules of the SEC. The guidance in this release is applicable only to auditors’ engagements that are governed by PCAOB rules. The PCAOB, for example, has not established particular auditing standards for nonissuer broker-dealers or investment advisers. This release is not applicable to such engagements and related filings.

The staff of the PCAOB published a series of questions and answers (Q&As) on PCAOB Auditing Standard No. 1. See the PCAOB Web site at www.pcaobus.org for more information.

In June 2004, the Auditing Standards Board (ASB) issued Interpretation No. 18, “Reference to PCAOB Standards in an Audit Report of a Nonissuer,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. 89–92), which provides reporting guidance for audits of nonissuers. Interpretation No. 18 provides guidance on the appropriate referencing of PCAOB auditing standards in audit reports when an auditor is engaged to perform the audit in accordance both with GAAS and PCAOB auditing standards. The ASB also is revising AU section 508 in light of the International Auditing and Assurance Standards Board’s recently exposed International Standard on Auditing The Independent Auditor’s Report on a Complete Set of General Purpose Financial Statements and PCAOB Auditing Standard No. 1. See the AICPA Web site at www.aicpa.org/Professional/Resources/Accounting+ and+Auditing/Audit+and+Attest+Standards for more information.

2 This optional wording may be added in accordance with Interpretation No. 17, “Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards,” of AU section 508 (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. 85–88), which was issued by the ASB in June 2004 and provides reporting guidance for audits of nonissuers. Interpretation No. 17 addresses how auditors may expand their independent audit report to explain that their consideration of internal control was sufficient to provide the auditor sufficient understanding to plan the audit and determine the nature, timing and extent of tests to be performed, but was not sufficient to express an opinion on the effectiveness of the internal control. If this optional language is added, then the remainder of the paragraph would read as follows:

An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

AICPA Audit and Accounting Manual
In our opinion, the [consolidated] financial statements referred to above present fairly, in all material respects, the financial position of Standard Stockbrokerage Co., Inc. [and Subsidiaries] as of December 31, 20X8, and the results of its [their] operations and its [their] cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Rule 17a-5 under the Securities Exchange Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Notes: SEC Regulation S-X Section 210.2-02 (17 CFR 210.2–.02) requires the accountant’s report to be dated, signed manually, indicate the city and state where issued, and identify without detailed enumeration the financial statements covered by the report.

Paragraphs .15–.16 of AAM section 9250 contain illustrative reports on internal control required by SEC Rule 17a-5.

* Paragraph .23 of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), states that the auditor’s report should be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion on the financial statements.
.02 Separate Report on Supplementary Schedules

Independent Auditor’s Report on Supplementary Information
Required by Rule 17a-5 of the Securities and Exchange Commission

Addressee:

We have audited the accompanying [consolidated] financial statements of Standard Stockbrokerage Co., Inc. [and Subsidiaries] as of and for the year ended December 31, 20X8, and have issued our report thereon dated February 15, 20X9. Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, III, and IV is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Rule 17a-5 under the Securities Exchange Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Reports for Investment Companies

.01 Unqualified Opinion on the Financial Statements of a Registered Investment Company

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company, including the schedule of investments, as of December 31, 20X4, and the related statements of operations and cash flows1 for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended.2 These financial statements and financial highlights are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 20X4, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

.02 Unqualified Opinion on the Financial Statements for a Multicolumnar Presentation of the Portfolios Constituting the Series

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the statements of assets and liabilities, including the schedules of investments, of XYZ Series Investment Company comprising the Foreign, Domestic Common Stock, Long-Term Bond, and Convertible Preferred Portfolios as of December 31, 20X4, and the related statements of operations and cash flows\(^3\) for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the portfolios constituting the XYZ Series Investment Company, as of December 31, 20X4, the results of their operations and cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended, and their financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

.03 Unqualified Opinion on the Financial Statements Presenting One of the Portfolios or Entities Constituting the Series

Report of Independent Registered Public Accounting Firm

Addressee:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments, of the Convertible Preferred Portfolio (one of the portfolios constituting the XYZ Series Investment Company [the Company]) as of December 31, 20X4, and the related statements of operations and cash flows for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 20X4, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Convertible Preferred Portfolio of the XYZ Series Investment Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

.04 Unqualified Opinion on the Financial Statements of a Nonregistered Investment Company

Independent Auditor's Report

Addressee:

We have audited the accompanying statement of assets and liabilities of XYZ Investment Company (the Company), including the schedule of investments, as of December 31, 20X4, and the related statements of operations, cash flows\(^5\) and changes in net assets, and the financial highlights for the year then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America.\(^6\) Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of XYZ Investment Company as of December 31, 20X4, the results of its operations, its cash flows, changes in its net assets, and its financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

\(^5\) See footnote 1.

\(^6\) AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), states that a basic element of the auditor's report is a statement that the audit was conducted in accordance with generally accepted auditing standards and an identification of the United States of America as the country of origin of those standards. Interpretation No. 14, "Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing," of AU section 508 (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .56–.59) states that if the audit also was conducted in accordance with the International Standards on Auditing, in their entirety, the auditor may so indicate in the auditor's report. This can be done by modifying this sentence as follows (new language is shown in italics): We conducted our audit in accordance with auditing standards generally accepted in the United States of America and in accordance with International Standards on Auditing.

AAM Section 10,100

Quality Control—General

AICPA Requirements

.01 ET section 57, Article VI—Scope and Nature of Services (AICPA, Professional Standards, vol. 2), of the AICPA’s Code of Professional Conduct states that “members should practice in firms that have in place internal quality-control procedures to ensure that services are competently delivered and adequately supervised.” A firm must establish a system of quality control designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements and that the firm or engagement partners issue reports that are appropriate in the circumstances. A system of quality control consists of policies designed to achieve these objectives and the procedures necessary to implement and monitor compliance with those policies.

.02 The AICPA issues Statements on Quality Control Standards (SQCSs) to establish standards and provide guidance to firms on establishing and maintaining a quality control system for their accounting and auditing practices. In October 2007, the AICPA issued SQCS No. 7, A Firm’s System of Quality Control (AICPA, Professional Standards, vol. 2, QC sec. 10). SQCS No. 7 was effective as of January 1, 2009, and superseded all extant SQCSs.

.03 Presented in AAM section 10,200 is Practice Aid for Establishing and Maintaining a System of Quality Control for a CPA Firm’s Accounting and Auditing Practice—Revised for the Issuance of Statement on Quality Control Standards No. 7, A Firm’s System of Quality Control. Following the practice aid in AAM section 10,300 are sample quality control forms to aid practitioners in implementing a quality control system.

[The next page is 10,201.]
AAM Section 10,200

Practice Aid for Establishing and Maintaining a System of Quality Control for a CPA Firm’s Accounting and Auditing Practice—Revised for the Issuance of Statement on Quality Control Standards No. 7, A Firm’s System of Quality Control

NOTICE TO READERS

This AICPA Audit and Accounting Practice Aid updates Establishing and Maintaining a System of Quality Control for a CPA Firm’s Accounting and Auditing Practice, which was issued in 2004. This practice aid is intended to help practitioners better understand and apply Statement on Quality Control Standards (SQCS) No. 7 issued by the AICPA. That standard is included in appendix A of this practice aid. This version of the practice aid, prepared by the Quality Control Standards Task Force, has been revised to incorporate new policies and procedures that a firm should consider including in its system of quality control to be responsive to the issuance of SQCS No. 7. The policies and procedures presented in this practice aid are illustrative, and firms are encouraged to consider them in designing and maintaining a system of quality control that is appropriate for their accounting and auditing practices. Some of the policies and procedures presented in this practice aid are not required by the SQCSs; however, they represent the views of the task force regarding best practices for a quality control system. Although this practice aid has been reviewed by the AICPA Audit and Attest Standards staff, it has not been approved, disapproved, or otherwise acted upon by any senior technical committee of the AICPA and has no official or authoritative status.

The Sarbanes-Oxley Act of 2002 (Act) created the Public Company Accounting Oversight Board (PCAOB) and charged it with overseeing audits of issuers,1 as defined by the act. Under the act, the PCAOB’s duties include, among other things, establishing auditing, quality control, ethics, independence, and other standards relating to audits of issuers. This practice aid does not address the quality control requirements of the act, nor does it address the quality control requirements of PCAOB standards that must be followed by auditors of issuers. Auditors of issuers should follow these other standards and make changes to their firm’s quality control systems as necessary. Auditors of nonissuers who are engaged to report on audit engagements in accordance with PCAOB auditing standards also must report on those engagements in accordance with generally accepted auditing standards (GAAS). Interpretations No. 17, “Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards,” and No. 18, “Reference to PCAOB Standards in an Audit Report on a Nonissuer,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .85–.88 and par. .89–.92, respectively), provide reporting guidance for audits of nonissuers when the auditor is asked to report in accordance with GAAS and PCAOB auditing standards.

Additional information about the PCAOB and the act can be obtained at the PCAOB Web site at www.pcaobus.org.

1 Paragraph 7 of Section 2, “Definitions,” of the Sarbanes-Oxley Act of 2002 states, “The term issuer means an issuer (as defined in section 3 of the Securities Exchange Act of 1934 [15 U.S.C. 78c]), the securities of which are registered under section 12 of that act [15 U.S.C. 78l], or that is required to file reports under section 15(d) [15 U.S.C. 78o(d)], or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 [15 U.S.C. 77a et seq.], and that it has not withdrawn.”

Chapter 1:
Overview of Statements on Quality Control Standards

1.01 The objectives of a system of quality control are to provide a CPA firm with reasonable assurance\(^1\) that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the firm or engagement partners issue reports that are appropriate in the circumstances. SQCS No. 7, *A Firm’s System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10), was issued by the Auditing Standards Board (ASB) of the AICPA in October 2007 and is effective for a firm’s accounting and auditing practice as of January 1, 2009. This standard supersedes all previously issued SQCSs.

1.02 A system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The nature, extent, and formality of a firm’s quality control policies and procedures will depend on various factors such as the firm’s size; the number and operating characteristics of its offices; the degree of authority allowed to, and the knowledge and experience possessed by, firm personnel; and the nature and complexity of the firm’s practice.

Communication of Quality Control Policies and Procedures

1.03 The firm should communicate its quality control policies and procedures to its personnel. Most firms will find it appropriate to communicate their policies and procedures in writing and distribute, or make available electronically, them to all professional personnel.

1.04 Effective communication includes the following:
- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality
- A requirement for each individual to be familiar with and to comply with these policies and procedures

Effective communication also includes procedures for personnel to communicate their views or concerns on quality control matters to the firm’s management.

Elements of a System of Quality Control

1.05 A firm’s system of quality control should include policies and procedures that address each of the following elements of quality control identified in SQCS No. 7:
- Leadership responsibilities for quality within the firm (the “tone at the top”)
- Relevant ethical requirements
- Acceptance and continuance of client relationships and specific engagements
- Human resources
- Engagement performance
- Monitoring

1.06 The elements of quality control are interrelated. For example, a firm continually assesses client relationships to comply with relevant ethical requirements, including independence, integrity, and objectivity, and policies and procedures related to the acceptance and continuance of client relationships and specific engagements. Similarly, the human resources element of quality control encompasses criteria related to

---

\(^1\) The term *reasonable assurance*, which is defined as a high, but not absolute, level of assurance, is used because absolute assurance cannot be attained. *Statement on Quality Control Standards* (SQCS) No. 7, *A Firm’s System of Quality Control* (AICPA, *Professional Standards*, vol. 2, QC sec. 10), states, “Any system of quality control has inherent limitations that can reduce its effectiveness.”

AICPA Audit and Accounting Manual

AAM §10,200 1.06
professional development, hiring, advancement, and assignment of firm personnel to engagements, all of which affect policies and procedures related to engagement performance. In addition, policies and procedures related to the monitoring element of quality control enable a firm to evaluate whether its policies and procedures for each of the other five elements of quality control are suitably designed and effectively applied.

1.07 If a firm merges, acquires, sells, or otherwise changes a portion of its practice, the surviving firm evaluates and, as necessary, revises, implements, and maintains firm-wide quality control policies and procedures that are appropriate for the changed circumstances.

Leadership Responsibilities for Quality Within the Firm (the “Tone at the Top”)

1.08 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. The firm should establish and maintain the following policies and procedures to satisfy this objective:

- Require the firm’s leadership (managing partner, board of managing partners or CEO, or equivalent) to assume ultimate responsibility for the firm’s system of quality control.
- Assign management responsibilities so that commercial considerations do not override the quality of the work performed.
- Assign operational responsibility for the firm’s quality control system to personnel who have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.
- Design policies and procedures addressing performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel to demonstrate the firm’s overarching commitment to the objectives of the system of quality control.
- Devote sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.

Relevant Ethical Requirements

1.09 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Establishing and maintaining policies such as the following ordinarily would satisfy this objective:

- Require that personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the U.S. Government Accountability Office (GAO), and any other applicable regulators.
- Establish procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them.
- Establish procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards.
- Require that the firm withdraw from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied.
• Require written confirmation, at least annually, of compliance with the firm’s policies and procedures on independence from all firm personnel required to be independent by relevant requirements.

• Establish procedures for confirming the independence of another firm or firm personnel in associated member firms who perform part of the engagement. This would apply to national firm personnel, foreign firm personnel, and foreign-associated firms.\(^2\)

• Require the rotation of personnel for audit or attest engagements where regulatory or other authorities require such rotation after a specified period.

Acceptance and Continuance of Client Relationships and Specific Engagements

1.10 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm’s client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client’s management could reflect the reliability of the client’s accounting records and financial representations and, therefore, affect the firm’s reputation or involvement in litigation. A firm’s policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

• has considered the integrity of the client, including the identity and business reputation of the client’s principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;

• is competent to perform the engagement and has the capabilities and resources to do so;

• can comply with legal and ethical requirements; and

• has reached an understanding with the client regarding the services to be performed.

1.11 This objective ordinarily should be satisfied before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client by establishing and maintaining policies such as the following:

• Evaluate factors that have a bearing on management’s integrity and consider the risk associated with providing professional services in particular circumstances.\(^3\)

• Evaluate whether the engagement can be completed with professional competence; undertake only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluate, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued.

• Obtain an understanding, preferably in writing, with the client regarding the services to be performed.

• Establish procedures on withdrawal from an engagement or from both the engagement and the client relationship, including procedures for dealing with information that would have caused the firm to decline an engagement if the information had been available earlier.

• Require documentation of how issues relating to acceptance or continuance of client relationships and specific engagements were resolved.

\(^2\) A foreign-associated firm is a firm domiciled outside of the United States and its territories that is a member of, correspondent with, or similarly associated with an international firm or international association of firms.

\(^3\) Such considerations would include the risk of providing professional services to significant clients or to other clients for which the practitioner’s objectivity or the appearance of independence may be impaired. In broad terms, the significance of a client to a member or a firm refers to relationships that could diminish a practitioner’s objectivity and independence in performing attest services. Examples of factors to consider in determining the significance of a client to an engagement partner, office, or practice unit include (a) the amount of time the partner, office, or practice unit devotes to the engagement, (b) the effect on the partner’s stature within the firm as a result of his or her service to the client, (c) the manner in which the partner, office, or practice unit is compensated, or (d) the effect that losing the client would have on the partner, office, or practice unit.
Human Resources

1.12 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (a) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (b) to enable the firm to issue reports that are appropriate in the circumstances. Establishing and maintaining policies such as the following ordinarily would satisfy this objective:

- Recruit and hire personnel of integrity who possess the characteristics that enable them to perform competently.
- Determine capabilities and competencies required for an engagement, especially for the engagement partner, based on the characteristics of the particular client, industry, and kind of service being performed. Specific competencies necessary for an engagement partner are discussed in paragraph 45 of SQCS No. 7.
- Determine the capabilities and competencies possessed by personnel.
- Assign the responsibility for each engagement to an engagement partner.
- Assign personnel based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed.
- Have personnel participate in general and industry-specific continuing professional education and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable continuing professional education requirements of the AICPA, state boards of accountancy, and other regulators.
- Select for advancement only those individuals who have the qualifications necessary to fulfill the responsibilities they will be called on to assume.

Engagement Performance

1.13 The objectives of the engagement performance element of quality control are to provide the firm with reasonable assurance (a) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (b) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed.

1.14 The objectives of the engagement performance element of quality control ordinarily would be satisfied by establishing and maintaining policies such as the following:

- Plan all engagements to meet professional, regulatory, and the firm’s requirements.
- Perform work and issue reports and other communications that meet professional, regulatory, and the firm’s requirements.
- Require that work performed by other team members be reviewed by qualified engagement team members, which may include the engagement partner, on a timely basis.
- Require the engagement team to complete the assembly of final engagement files on a timely basis.
- Establish procedures to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.
- Require the retention of engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations.
• Require that
  — consultation take place when appropriate (for example, when dealing with complex, unusual, unfamiliar, difficult, or contentious issues);
  — sufficient and appropriate resources be available to enable appropriate consultation to take place;
  — all the relevant facts known to the engagement team be provided to those consulted;
  — the nature, scope, and conclusions of such consultations be documented; and
  — the conclusions resulting from such consultations be implemented.

• Require that
  — differences of opinion be dealt with and resolved;
  — conclusions reached are documented and implemented; and
  — the report not be released until the matter is resolved.

• Require that
  — all engagements be evaluated against the criteria for determining whether an engagement quality control review should be performed;
  — an engagement quality control review be performed for all engagements that meet the criteria; and
  — the review be completed before the report is released.

• Establish procedures addressing the nature, timing, extent, and documentation of the engagement quality control review.

• Establish criteria for the eligibility of engagement quality control reviewers.

**Monitoring**

1.15 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm’s quality control system, and a firm’s compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

• Adherence to professional standards and regulatory and legal requirements
• Whether the quality control system has been appropriately designed and effectively implemented
• Whether the firm’s quality control policies and procedures have been operating effectively so that reports issued by the firm are appropriate in the circumstances

1.16 The objective of the monitoring element of quality control ordinarily would be satisfied by establishing and maintaining policies such as the following:

• Assign responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.
• Assign performance of the monitoring process to competent individuals.
• Require the performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm’s quality control policies and procedures. Monitoring procedures consist of the following:
— Review of selected administrative and personnel records pertaining to the quality control elements
— Review of engagement working papers, reports, and clients’ financial statements
— Summarization of the findings from the monitoring procedures, at least annually, and consideration of the systemic causes of findings that indicate that improvements are needed
— Determination of any corrective actions to be taken or improvements to be made with respect to the specific engagements reviewed or the firm’s quality control policies and procedures
— Communication of the identified findings to appropriate firm management personnel
— Consideration of findings by appropriate firm management personnel who should also determine that any actions necessary, including necessary modifications to the quality control system, are taken on a timely basis
— Assessment of
  a. The appropriateness of the firm’s guidance materials and any practice aids;
  b. New developments in professional standards and regulatory and legal requirements and how they are reflected in the firm’s policies and procedures where appropriate;
  c. Compliance with policies and procedures on independence;
  d. The effectiveness of continuing professional development, including training;
  e. Decisions related to acceptance and continuance of client relationships and specific engagements; and
  f. Firm personnel’s understanding of the firm’s quality control policies and procedures and implementation thereof.

• Communicate at least annually, to relevant engagement partners and other appropriate personnel, deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.
• Communicate the results of the monitoring of its quality control system process to relevant firm personnel at least annually.
• Establish procedures designed to provide the firm with reasonable assurance that it deals appropriately with the following. This includes establishing clearly defined channels for firm personnel to raise any concerns in a manner that enables them to come forward without fear of reprisal and documenting complaints and allegations and the responses to them:
  — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  — Allegations of noncompliance with the firm’s system of quality control
  — Deficiencies in the design or operation of the firm’s quality control policies and procedures, or noncompliance with the firm’s system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
• Require appropriate documentation to provide evidence of the operation of each element of its system of quality control. The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including the following, for example:
  — The size of the firm and the number of offices
  — The nature and complexity of the firm’s practice and organization
• Require retention of documentation providing evidence of the operation of the system of quality control for a period of time sufficient to permit those performing monitoring procedures and peer review to evaluate the firm’s compliance with its system of quality control, or for a longer period if required by law or regulation.

1.17 Some of the monitoring procedures discussed in the previous list may be accomplished through the performance of the following:

• Engagement quality control review
• Postissuance review of engagement working papers, reports, and clients’ financial statements for selected engagements
• Inspection procedures

Documentation of Quality Control Policies and Procedures

1.18 The firm should document each element of its system of quality control. The extent of the documentation will depend on the size, structure, and nature of the firm’s practice. Documentation may be as simple as a checklist of the firm’s policies and procedures or as extensive as practice manuals.

Applying the Quality Control Standards to Four Hypothetical Firms

1.19 Subsequent chapters in this practice aid present four different hypothetical firms and the quality control policies and procedures each firm implements to address each of the quality control elements. Following is a description of those firms and their characteristics:

• Multioffice CPA Firm has 10 offices in 3 states and is centrally managed. It has approximately 15 partners and 100 professionals. Its accounting and auditing practice has a concentration of financial institution clients for which it performs audit and attest services. Multioffice CPA Firm has no issuer clients. (chapter 2)

• Single office CPA Firm has 1 office, 3 partners, and 10 professionals. Its accounting and auditing practice has a concentration of employee benefit plan audits. Single office CPA Firm has no issuer clients. (chapter 3)

• Sole Practitioner, CPA, is a sole owner who has no professional staff and occasionally hires per diem professionals. Her accounting practice consists only of engagements subject to Statements on Standards for Accounting and Review Services (SSARSs). (chapter 4) (Note: Sole practitioners who perform audit and attest engagements should refer to chapter 3)

• Closely Aligned CPA Firm and Non-CPA-Owned Entity are organized in an alternative practice structure, which is a nontraditional structure in the practice of public accounting consisting of an attest and a nonattest portion of the practice. The attest portion is conducted through a firm, Closely Aligned CPA Firm, owned and controlled by CPAs. The nonattest portion is conducted through a separate entity, Non-CPA-owned Entity, owned and controlled by individuals who are not CPAs. (chapter 5)

1.20 The policies and procedures described in each chapter are those that a firm of a similar size and type may consider establishing and maintaining. The policies and procedures used by an actual firm need not necessarily include nor be limited to all those used by the illustrative firms.

---

4 Inspections is a retrospective evaluation of the adequacy of the firm’s quality control policies and procedures, its personnel’s understanding of those policies and procedures, and the extent of the firm’s compliance with them. Although monitoring procedures are meant to be ongoing, they may include inspection procedures performed at a fixed point in time. Monitoring is a broad concept; inspection is one specific type of monitoring procedure.
Chapter 2:
System of Quality Control for a CPA Firm’s Accounting and Auditing Practice—Firm With Multiple Offices

2.01 This chapter describes how a CPA firm that has multiple offices (Multioffice CPA Firm) implements each element of quality control in its accounting and auditing practice. Multioffice CPA Firm is a hypothetical firm that has 10 offices in 3 states and is centrally managed. Multioffice CPA Firm has 15 partners, 100 professionals, and a concentration of financial institution clients for which it performs audit and attest services. The firm uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. These practice aids are supplemented by oral and written communications from the firm’s partners. It has no issuer clients.¹

Quality Control Policies and Procedures

2.02 The firm’s system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The policies and procedures are required to be documented. Multioffice CPA Firm documents its system of quality control by preparing a document that comprehensively describes policies and procedures established and maintained for each element of quality control. Multioffice CPA Firm reviews the documentation at least annually and updates it as necessary.

2.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

2.04 Multioffice CPA Firm communicates these policies and procedures in writing and makes the documentation available electronically to all professional personnel. Multioffice CPA Firm requires each individual to be familiar with and to comply with these policies and procedures. Multioffice CPA Firm also includes procedures for personnel to communicate their views or concerns on quality control matters to partners.

Leadership Responsibilities for Quality Within the Firm (the “Tone at the Top”)

2.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.06–10.

2.06 Policy 1: The firm’s managing partner assumes ultimate responsibility for the firm’s system of quality control. Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner accept overall responsibility for the firm’s system of quality control and promoting a quality-oriented culture by sending clear, consistent, and frequent messages through e-mails, letters, and recordings
- Having a mission statement that includes the firm’s core values and the importance of quality
- Informing personnel that failure to adhere to the firm’s policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action

¹ If Multioffice CPA Firm were to be engaged to perform audit services for an issuer, it might need to revise its quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.
2.07 Policy 2: The firm assigns management responsibilities so that commercial considerations do not override the quality of the work performed. Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner continually evaluate client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control
- Emphasizing to all personnel that fee considerations and scope of services should not infringe upon quality work

2.08 Policy 3: The firm assigns operational responsibility for the firm’s quality control system to personnel who have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures. Multioffice CPA Firm implements this policy through the following procedures:

- Designating a quality control partner with overall operational responsibility for developing and implementing appropriate policies and procedures for the firm’s quality control system
- Designating a quality control individual for each office

2.09 Policy 4: The firm designs procedures addressing performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel to demonstrate the firm’s overarching commitment to the objectives of the system of quality control. Multioffice CPA Firm implements this policy through the following procedures:

- Designing and implementing performance evaluation and advancement systems that (a) reward partners and staff involved in the accounting and auditing practice for the quality of their work and their compliance with professional standards and (b) include partner performance peer evaluations
- Establishing a compensation system that provides incentives to accounting and auditing partners and senior-level employees for the quality of their accounting and auditing work. The compensation system does the following:
  - Takes into consideration firm feedback based on monitoring results and peer reviews of the work performed
  - Rewards partners and personnel for timely (a) identification of significant and emerging accounting and auditing issues and (b) consultation with firm experts

2.10 Policy 5: The firm devotes sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures. Multioffice CPA Firm implements this policy through the following procedures:

- Providing the designated quality control partner with sufficient time, authority, and resources to develop, implement, and maintain the firm’s quality control policies and procedures
- Providing the firm’s quality control documentation to personnel when they are initially hired and reviewing the documentation with them
- Reviewing the firm’s quality control policies and procedures with personnel at firm training sessions at least annually

Relevant Ethical Requirements

2.11 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.12–.18.
2.12 Policy 1: Personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators. Multioffice CPA Firm implements this policy through the following procedures:

- Assigning one of its partners the responsibility of responding to questions, resolving matters, and determining the circumstances for which consultation with sources outside the firm is required for matters related to independence, integrity, and objectivity
- Identifying circumstances for which documentation of the resolution of matters is appropriate
- Maintaining a current list of (a) all entities with which firm personnel are prohibited from having a financial or business relationship and (b) all activities in which the firm is prohibited from engaging, as defined in the firm’s independence policies
- Establishing clear and concise written independence guidance covering relationships and activities that impair independence, including but not limited to investments, loans, brokerage accounts, business relationships, employment relationships, and fee arrangements

2.13 Policy 2: The firm establishes procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them. Multioffice CPA Firm implements this policy through the following procedures:

- Having the managing partner (through e-mails, letters, or recordings) emphasize the concepts of independence, integrity, and objectivity in the firm’s professional development meetings, in the acceptance and continuance of clients and engagements, and in the performance of engagements. Because Multioffice CPA Firm has a concentration of financial institution clients, this also includes discussing the applicability of these concepts to engagements for financial institutions, such as the prohibition against any member of the engagement team having a “nongrandfathered” loan with the institution, and the types of nonattest services that could affect independence.
- Requiring periodic independence and ethics training for all professional personnel. Such training covers the firm’s independence and ethics policies and the independence and ethics requirements of all applicable regulators.
- Providing frequent reminders of professional responsibilities to personnel, such as avoiding behavior that might be perceived as impairing their independence or objectivity.
- Informing personnel on a timely basis of those entities to which independence policies apply by doing the following:
  - Preparing and maintaining a list of entities with which firm personnel are prohibited from having a financial or business relationship
  - Making the list available to personnel so they may evaluate their independence (including personnel new to the firm or an office)
  - Notifying personnel of changes in the list

2.14 Policy 3: The firm establishes procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards. Multioffice CPA Firm implements this policy through the following procedures:

- Assigning a partner who is not otherwise associated with the engagement, or who practices in an office other than the office that performs the attest engagement, to review the engagement
- Requiring approval of the assignment of engagement personnel by another partner or manager
- Rotating engagement partners periodically

---

2 Examples of prohibited activities include providing certain valuation and information technology services to an audit client. See the rules of specific standard-setters to determine the extent and relevance of any prohibition.
• Establishing additional procedures that provide safeguards when the firm performs audit or other attest work for (a) significant clients or (b) clients at which partners or other senior personnel are offered key management positions, or accept offers of employment, by utilizing the procedures contained in the AICPA Code of Professional Conduct, paragraphs .01 and .04 of ET section 100, Conceptual Framework for AICPA Independence Standards (AICPA, Professional Standards, vol. 2)

• Designating a senior-level partner to be responsible for overseeing the adequate functioning of the firm’s independence policies

• Implementing a system to identify investment holdings of partners and managers that might impair independence

• Requiring all professionals to report, on a timely basis when identified, apparent violations of independence, integrity, or objectivity policies involving themselves, their spouses, or their dependents and the corrective actions taken or proposed to be taken

• Establishing a requirement for all professional personnel to notify the managing partner in each office of any potential activities that might impair independence or violate ethics rules, including services provided to entities with which firm personnel are prohibited from having a business relationship

• Establishing a program that protects professional personnel who report potential ethics or independence violations to the proper parties in compliance with firm policy

• Requiring the managing partner in each office, or a person designated by the managing partner, to periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm’s independence

• Developing guidance that sets forth the consequences for professional personnel who violate the firm’s independence policies and procedures, including engaging in activities with entities with which firm personnel are prohibited from having a business relationship

• Requiring all professional personnel to review the list of entities with which firm personnel are prohibited from having a business relationship before a professional or the spouse or dependent of a professional obtains a security or financial interest in an entity

• Establishing criteria that determine the need for safeguards for engagements where monitoring procedures or peer review have identified weaknesses in previous years or the same senior personnel have been used for five years or more on an audit or attestation engagement

• Documenting any safeguards applied to eliminate threats to independence or reduce them to an acceptable level

• Promptly communicating identified breaches of these policies and procedures, and the required corrective actions, to (a) the engagement partner who, with the firm, needs to address the breach and (b) other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action

• Obtaining confirmation from the engagement partner and other relevant personnel that the required corrective actions have been taken

2.15 Policy 4: The firm withdraws from engagements if effective safeguards to reduce threats to independence to an acceptable level cannot be applied. Multioffice CPA Firm implements this policy through the following procedures:

• Consulting within the firm and, if necessary, with legal counsel and other parties when the firm believes that effective safeguards to reduce threats to independence to an acceptable level cannot be applied

• Withdrawing from engagements when effective safeguards to reduce threats to independence to an acceptable level cannot be applied
2.16 Policy 5: The firm obtains written confirmation, at least annually, of compliance with its policies and procedures on independence from all firm personnel required to be independent by relevant requirements. Multioffice CPA Firm implements this policy through the following procedures:

- Obtaining written representations from personnel, upon hire and on an annual basis, stating that they have read the firm’s independence, integrity, and objectivity policies, understand the applicability of those policies to their activities, and have complied with the requirements of those policies since their last representation (such written representations are accompanied by the most current list of all entities with which firm personnel are prohibited from having a financial or business relationship)
- Assigning responsibility to the firm’s quality-control partner for obtaining such written representations, reviewing independence compliance files for completeness, and resolving reported exceptions
- Requiring the engagement partner to sign a step in the engagement program attesting to compliance with independence requirements that apply to the engagement

2.17 Policy 6: The firm establishes procedures for confirming the independence of another firm or firm personnel in associated member firms who perform part of an engagement. Multioffice CPA Firm implements this policy through the following procedures:

- Describing in its policies and procedures manual the form and content of independence representations, and frequency with which they are to be obtained
- Requiring that such representations be documented

2.18 Policy 7: The firm rotates personnel for audit or attest engagements where regulatory or other authorities require such rotation after a specified period. Multioffice CPA Firm implements this policy by having the quality control partner monitor regulatory requirements for financial institutions and other entities and notifying partners of the need for rotation. Multioffice CPA Firm has decided to rotate partners assigned to audit financial institutions every five years.

Acceptance and Continuance of Client Relationships and Specific Engagements

2.19 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm’s client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client’s management could reflect the reliability of the client’s accounting records and financial representations and, therefore, affect the firm’s reputation or involvement in litigation. A firm’s policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

- has considered the integrity of the client, including the identity and business reputation of the client’s principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
- is competent to perform the engagement and has the capabilities and resources to do so;
- can comply with legal and ethical requirements; and
- has reached an understanding with the client regarding the services to be performed.

2.20 Multioffice CPA Firm satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 2.21–25.
2.21 Policy 1: The firm evaluates factors that have a bearing on management’s integrity and considers the risk associated with providing professional services in particular circumstances. Multioffice CPA Firm implements this policy through the following procedures:

- Developing and maintaining a manual that contains policies and procedures related to the acceptance of prospective clients and the continuance of existing clients. Such policies and procedures state that the firm’s clients should not present undue risks to the firm, including damage to the firm’s reputation.
- Advising professional personnel that they are expected to be familiar with the firm’s policies and procedures for the acceptance and continuance of clients.
- Obtaining and evaluating relevant information before accepting or continuing any client. The following are examples of such information:
  - The nature and purpose of the services to be provided and management’s understanding thereof.
  - The identity of the client’s principal owners, key management, related parties, and those charged with its governance.
  - The nature of the client’s operations, including its business practices, from sources such as annual reports, interim financial statements, reports to regulators, enforcement actions by regulators, and income tax returns.
  - Information obtained from inquiries of third parties about the client, its principal owners, key management, and those charged with governance that may have a bearing on evaluating the client. Examples of such third parties are bankers, factors, legal counsel, credit services, investment bankers, underwriters, and other members of the financial or business community who may have applicable knowledge. Inquiries also might be made regarding management’s attitude toward compliance with regulators or legislative requirements and the presence of control deficiencies, especially those that management is unwilling to correct.
- Communicating with the predecessor accountant or auditor when required or recommended by professional standards. This communication also includes inquiries regarding the nature of any disagreements and whether there is evidence of opinion shopping.
- Assessing management’s commitment to implementing and maintaining effective internal control.
- Assessing management’s commitment to the appropriate application of generally accepted accounting principles (GAAP).
- Conducting a background check of the business, its officers, and the person(s) in question by using an investigative firm and evaluating the information obtained regarding management’s integrity. Background checks are conducted when the firm is unable to obtain sufficient information about the prospective client after completing the steps listed previously, or when there is an indication that management or someone affiliated with the prospective client may be less than reputable.
- Evaluating the risk of providing services to significant clients or to other clients for which the firm’s independence or the appearance of independence may be impaired. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner’s objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (a) the amount of time the partner devotes to the engagement, (b) the effect on the partner’s stature within the firm as a result of his or her service to the client, (c) the manner in which the partner is compensated, and (d) the effect that losing the client would have on the partner and the firm.

2.22 Policy 2: The firm evaluates whether the engagement can be completed with professional competence; undertakes only those engagements for which the firm has the capabilities, resources, and professional competence to
complete; and evaluates, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued. Multioffice CPA Firm implements this policy through the following procedures:

- Evaluating whether the following are in place:
  - The practice office has sufficient personnel who have obtained or can reasonably expect to obtain the knowledge and expertise necessary to perform the engagement, including relevant regulatory or reporting requirements.
  - Specialists are available if needed, through, for example, the resources of another practice office or alternative source.
  - The firm is able to complete the engagement within the reporting deadline.

- Defining high-risk engagements.

- Specifying conditions that trigger the requirement between annual audits to reevaluate a client or engagement. The following are examples of such conditions:
  - Significant changes in the client, such as a major change in ownership, senior client personnel, directors, advisers, the nature of the business, or its financial stability.
  - Changes in the nature or scope of the engagement, such as an initial public offering or a request to step down from an audit to a review engagement.
  - Changes in the composition or strategic focus of the firm, such as the inability to replace the loss of key personnel who are particularly knowledgeable about a specialized industry or a decision by Multioffice CPA firm to discontinue services to clients in a particular industry.
  - The existence of conditions that would have caused the firm to reject the engagement had such conditions existed at the time of the initial acceptance, such as aggressive earnings management, unreliable processes for developing accounting estimates, questionable estimates by management, questions regarding the entity’s ability to continue as a going concern, and other factors that may increase the risk of being associated with the client.
  - The client’s delinquency in paying fees. (This may also affect the firm’s independence.)
  - Engagements for entities operating in highly specialized or regulated industries, such as financial institutions, governmental entities, and employee benefit plans.
  - Engagements for entities in the development stage.
  - Engagements in which the client has ignored prior recommendations, such as recommendations that address deficiencies in internal control.

- Obtaining relevant information to determine whether the relationship should be continued and establishing the frequency with which client continuance evaluations should be made.

- Evaluating the information obtained regarding acceptance or continuance of a client or engagement through the following activities:
  - The engagement partner assesses the information obtained about the client or the specific engagement, including information about the significance of the client to the firm, and makes a recommendation about whether the client or engagement should be accepted or continued.
  - The engagement partner completes a client acceptance form and submits it to the managing partner of the practice office for approval.
  - The engagement partner signs a step in the planning program noting that he or she has considered whether the client should be continued, and if conditions exist that trigger the requirement between annual audits to reevaluate a client or engagement, prepares a form documenting his or her rationale and conclusion regarding client continuance.
— The partner responsible for the quality control function assesses and approves the recommendation made by the engagement partner. In certain defined circumstances, such as high-risk engagements, acceptance or continuance decisions also may require approval of the firm’s managing partner.

- Establishing procedures for dealing with information that would have caused the firm to decline the engagement if the information had been available earlier.

2.23 Policy 3: The firm obtains an understanding with the client regarding the services to be performed. Multioffice CPA Firm implements this policy by requiring that for all engagements, the firm prepare a written engagement letter documenting the understanding with the client and obtain the client’s signature on that letter, thus minimizing the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed.

2.24 Policy 4: The firm establishes procedures on withdrawal from an engagement or from both the engagement and the client relationship. Multioffice CPA Firm implements this policy through the following procedures:

- Discussing with the appropriate level of the client’s management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place or for the firm to report to regulatory authorities the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal
- Discussing with the appropriate level of the client’s management and those charged with its governance withdrawal from the engagement, or from both the engagement and the client relationship, if the firm determines that it is appropriate to withdraw

2.25 Policy 5: The firm documents how issues relating to acceptance or continuance of client relationships and specific engagements were resolved. Multioffice CPA Firm implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

2.26 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (a) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (b) to enable the firm to issue reports that are appropriate in the circumstances. Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.27–33.

2.27 Policy 1: Personnel who are hired possess the characteristics that enable them to perform competently. Multioffice CPA Firm implements this policy by maintaining firm-wide hiring standards and evaluating the firm’s personnel needs, including the following:

- Designating a partner or other qualified individual in each office to be responsible for evaluating the overall personnel needs in that practice office and establishing hiring objectives based on factors such as existing clientele, anticipated growth, personnel turnover, and individual advancement
- Developing and maintaining personnel policies and procedures that identify attributes, achievements, and experiences desired in entry-level and experienced personnel
- Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
- Establishing guidelines for the additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions
• Preparing budgets that identify personnel needs at all levels
• Identifying sources of employment candidates such as universities and executive recruiters
• Selecting and training the individuals who will be interviewing candidates or otherwise participating in the hiring process
• Summarizing and evaluating the results of the hiring process for each candidate, including approval by the managing partner, or a person designated by the managing partner, of all hiring decisions

2.28 Policy 2: The firm determines capabilities and competencies required for an engagement, including those required of the engagement partner. Multioffice CPA Firm implements this policy by specifying the competencies that the engagement partner for an accounting, auditing, or attest engagement (or other person responsible for supervising and signing or authorizing someone to sign the firm’s report on such engagements) should possess. Such competencies include having an understanding of the following:

• The role of the firm’s system of quality control and the AICPA Code of Professional Conduct, both of which play critical roles in ensuring the integrity of the accounting, auditing, and attest function to users of reports.
• The performance, supervision, and reporting aspects of the engagement, which ordinarily are gained through training or participation in similar engagements.
• The industry in which the client operates, including its organization and operating characteristics, sufficient to identify areas of high or unusual risk associated with the engagement and to evaluate the reasonableness of industry-specific estimates.
• The professional standards applicable to the engagement being performed and to the industry in which the client operates. Such standards include accounting, auditing, and attestation standards, as well as rules and regulations issued by applicable regulators.
• The skills that contribute to sound professional judgment, including the ability to exercise professional skepticism.
• How the organization uses information technology and the manner in which information systems are used to record and maintain financial information.

2.29 Policy 3: The firm determines the capabilities and competencies possessed by personnel. Multioffice CPA Firm implements this policy through the following procedures:

• Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
• Evaluating personnel at least annually to determine their capabilities and competencies

2.30 Policy 4: The firm assigns responsibility for each engagement to an engagement partner. Multioffice CPA Firm implements this policy through the following procedures:

• Assigning the responsibility for each engagement to an engagement partner who has the appropriate capabilities, competence, authority, and time to perform the role
• Clearly defining and communicating the responsibilities of the partner to the engagement partner
• Communicating the identity and role of the partner to management and those charged with governance
• Developing and maintaining systems to monitor the workload and availability of engagement partners to enable these individuals to have sufficient time to adequately discharge their responsibilities

2.31 Policy 5: The firm assigns personnel (including partners) based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed. Multioffice CPA Firm implements this policy through the following procedures:
• Designating an appropriate person(s) in each office to be responsible for assigning personnel to engagements based on such factors as the following:
  — Engagement type, size, significance, complexity, and risk profile
  — Specialized experience or expertise required and competencies gained through previous experience or education
  — Need for and availability of staff and supervisors
  — Timing of the work to be performed
  — Continuity and rotation of personnel
  — Opportunities for on-the-job training
  — Situations for which independence or objectivity concerns exist

• Designating a partner to be responsible for partner and manager assignments

• Requiring approval of partner and manager assignments from the industry partner or the quality assurance partner in the case of high-risk or significant client engagements

• Establishing a policy for monitoring the continuation and rotation of engagement partners

2.32 Policy 6: Personnel participate in general and industry-specific continuing professional education (CPE) and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other applicable regulators. Multioffice CPA Firm implements this policy through the following procedures:

• Designating a partner to oversee the development of firm requirements and materials for a professional development program covering subjects relevant to the firm’s clients and services. Such responsibilities include the following:
  — Encouraging personnel to pass the Uniform CPA Examination
  — Establishing guidelines for participation by personnel in professional development programs and considering the requirements of the AICPA, state boards of accountancy, and applicable regulators in establishing the firm’s CPE requirements
  — Maintaining appropriate documentation evidencing that personnel have met the professional education requirements of the firm, the AICPA, state boards of accountancy, and other applicable regulators
  — Providing an orientation program and training for new personnel to inform them of their professional responsibilities and firm policies
  — Preparing and providing publications and programs to inform personnel of their responsibilities and opportunities
  — Developing in-house staff training programs that focus on general and industry-specific accounting and auditing subjects, including audits of financial institutions

• Communicating and distributing to personnel changes in accounting, auditing, attestation, and quality control standards, as well as independence, integrity, and objectivity requirements and the firm’s guidance with respect to those standards and requirements

• Encouraging professional personnel at each level in the firm to participate in external professional development activities such as the following:
  — CPE courses
  — Meetings of professional organizations
  — Serving on professional committees
  — Writing for professional publications
2.33 Policy 7: Personnel selected for advancement have the qualifications necessary to fulfill the responsibilities they will be called on to assume. Multioffice CPA Firm implements this policy through the following procedures:

- Appointing a director of human resources to identify and communicate, in the firm’s policies and procedures manual, the qualifications necessary to accomplish responsibilities at each professional level in the firm. This includes the following:
  - Establishing criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility. Such criteria give recognition and reward to the development and maintenance of competence and commitment to ethical principles.
  - Developing evaluation forms for each professional staff classification, including partners. Such forms include evaluation of performance quality and adherence to ethical principals.
  - Informing personnel that failure to adhere to the firm’s policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action.

- Assigning responsibility to a partner for making advancement and termination decisions for staff and recommendations to the firm’s management committee for manager and partner-level advancement and termination. Such responsibilities include the following:
  - Identifying responsibilities and requirements for evaluation at each level and indicating who will prepare these evaluations and when they will be prepared.
  - Reviewing evaluations on a timely basis with the individual being evaluated.

- Advising personnel regarding their progress and career opportunities through the following procedures:
  - Evaluating employees annually and at the end of each assignment exceeding three weeks to provide feedback on performance.
  - Summarizing and reviewing with personnel their performance evaluations, including assessing their progress with the firm, at least annually. Considerations include past performance, future objectives of the firm and the individual, assignment preferences, and career opportunities.
  - Evaluating partners periodically by means of performance reviews, peer evaluations, or self-appraisals, as appropriate, to provide feedback and to determine whether they continue to have the qualifications to accomplish their assigned responsibilities and to assume additional responsibilities.

Engagement Performance

2.34 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (a) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (b) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Multioffice CPA Firm satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 2.35–.45.
Policy 1: Planning for engagements meets professional, regulatory, and the firm’s requirements. Multioffice CPA Firm implements this policy by developing, maintaining, and providing personnel with the firm’s policies and procedures manual that delineates the factors the engagement team should consider in the planning process and the extent of documentation of these considerations. Planning considerations may vary depending on the size and complexity of the engagement. Planning generally includes the following activities:

- Assigning responsibility to the engagement partner for planning the engagement and assigning responsibilities to appropriate personnel during the planning phase
- Developing or updating background information about the client
- Considering client significance to the firm
- Requiring, for all initial audit clients designated as high risk by the firm, an independent review of planning considerations by either the engagement quality control reviewer or another partner
- Requiring planning documentation that includes the following:
  - Proposed work programs tailored to the specific engagement
  - Staffing requirements, including the need for personnel with specialized knowledge who may have to be obtained from other practice offices
  - Consideration of the economic conditions affecting the client and its industry and their potential effect on the conduct of the engagement
  - Consideration of risks and how they may affect the procedures to be performed
  - A budget that allocates sufficient time for the engagement to be performed in accordance with professional standards and the firm’s quality control policies and procedures
  - Evidence of review of planning by an independent review partner

Policy 2: The engagement is performed, supervised, reviewed, documented, and reported (or communicated) in accordance with the requirements of professional standards, applicable regulators, and the firm. Multioffice CPA Firm implements this policy by requiring personnel to comply with the firm’s policies and procedures manual, which prescribes the following:

- How engagement teams are supervised during the course of an engagement, including briefing the engagement team on the objectives of their work
- The form and content of documentation of the work performed and conclusions reached, including forms, checklists, and questionnaires to be used in performing engagements
- The form in which instructions are to be given to other offices or other auditors performing part of an engagement and the extent to which such work is to be reviewed and documented
- The extent of overall engagement review required, at all professional levels, to ensure that the financial statements meet professional and firm presentation and disclosure requirements
- The extent of review to be performed of required communications to management and the board of directors

Policy 3: Qualified engagement team members review work performed by other team members on a timely basis. Multioffice CPA Firm implements this policy through the following procedures:

- Adhering to the following firm guidelines regarding review of documentation of the work performed and conclusions reached, the financial statements, and reports and documentation of the review process:
  - All reviewers are to possess appropriate experience, competence, authority, and responsibility and are to be given access to the firm’s reference material and other resources.
— For each engagement, there is to be appropriate documentation evidencing review of the
documentation of the work performed and conclusions reached, the financial statements,
and the report.

• Assigning responsibility for the review of all reports, financial statements, and documentation of
the work performed and conclusions reached to an appropriate reviewer in accordance with
procedures outlined in the firm’s manual to obtain reasonable assurance of the following:

— The nature, timing, and extent of procedures performed are consistent with risk assess-
ments and the approach described in the planning documentation. Exceptions are
appropriately investigated. The appropriateness of planned procedures should be recons-
sidered if significant changes in risk factors occur or are identified between the planning
phase of the engagement and the execution of procedures.

— Firm-prescribed forms, checklists, and questionnaires, tailored as appropriate, are used in
performing and reporting on the engagement.

• Requiring a second review, by a partner or manager, of the report, financial statements, and selected
documentation of the work performed and conclusions reached, as prescribed in the firm’s policies
and procedures manual. The extent of review varies based on the type of engagement. For example,
engagements for financial institutions, high-risk engagements, and those performed for significant
clients, as defined by the firm, receive an engagement quality control review.

• Reviewing engagement documentation to determine whether the following has occurred:

— The work has been performed in accordance with professional standards and regulatory
and legal requirements.

— Significant findings and issues have been raised for further consideration.

— Appropriate consultations have taken place, and the resulting conclusions have been
documented and implemented.

— The nature, timing, and extent of work performed are appropriate and do not need
revision.

— The work performed supports the conclusions reached and is appropriately documented.

— The evidence obtained is sufficient and appropriate to support the report.

— The objectives of the engagement procedures have been achieved.

2.38 Policy 4: Engagement teams complete the assembly of final engagement files on a timely basis. Multioffice
CPA Firm implements this policy by completing the assembly of final engagement files in accordance with
professional standards and applicable regulatory requirements, if any.

2.39 Policy 5: The firm maintains the confidentiality, safe custody, integrity, accessibility, and retrievability of
engagement documentation. Multioffice CPA Firm implements this policy through the following procedures:

• Establishing and applying controls to accomplish the following:

— Clearly determine when and by whom engagement documentation was prepared and
reviewed.

— Protect the integrity of the information at all stages of the engagement, especially when
the information is shared within the engagement team or transmitted to other parties via
electronic means.

— Prevent unauthorized changes to the engagement documentation.

— Allow access to the engagement documentation by the engagement team and other
authorized parties as necessary to properly discharge their responsibilities.
• Requiring the use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users

• Implementing appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement

• Implementing procedures for properly distributing engagement documentation materials to the team members at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement

• Implementing procedures for restricting access to, and enabling proper distribution and confidential storage of, hardcopy engagement documentation

• Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
  — Generate scanned copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
  — Integrate the scanned copies into the engagement files, including indexing and signing off on the copies as necessary.
  — Enable the scanned copies to be retrieved and printed as necessary.

2.40 Policy 6: The firm retains engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations. Multioffice CPA Firm implements this policy through the following procedures:

• Establishing procedures that accomplish the following:
  — Enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time.
  — Provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
  — Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

• Retaining documentation for a specific period of time as appropriate for the nature of the engagement

2.41 Policy 7: The firm requires that consultation take place when appropriate; that sufficient and appropriate resources are available to enable appropriate consultation to take place; that all the relevant facts known to the engagement team are provided to those consulted; that the nature, scope, and conclusions of such consultations are documented; and that conclusions resulting from such consultations are implemented. Multioffice CPA Firm implements this policy through the following procedures:

• Providing personnel with the firm’s policies and procedures manual that specifies the firm’s consultation policies and procedures. Areas or specialized situations for which the firm requires consultation include the following:
  — Application of newly issued technical pronouncements.
  — Industries with special accounting, auditing, or reporting requirements.
  — Emerging practice problems.
  — Choices among alternative GAAP upon initial adoption or when an accounting change is made.
  — Reissuance of a report, consideration of omitted procedures after a report has been issued, or subsequent discovery of facts that existed at the date a report was issued.
— Filing requirements of regulators.
— Meetings with regulators at which the firm is to be called upon to support the application of GAAP or GAAS that have been questioned.
— Designating individuals within the firm as consultants in certain areas. Personnel are to consult with the designated individual when issues arise. If differences arise between the engagement partner and the consultant, the matter is to be resolved by the partner(s) responsible for the quality control function.

- Maintaining or providing access to adequate and up-to-date references, which includes materials related to specific industries, specialties, and regulatory requirements, in each office.
- Requiring that documentation of consultation include all relevant facts and circumstances, the sections of the professional literature used in making a determination, the conclusion reached, how the conclusions were implemented, and the signatures of the engagement partner and consultant. This documentation is to be retained with the engagement documentation of the work performed and conclusions reached. At the discretion of the consultant, the documentation may be entered in a retrievable database to promote efficiencies in the consultation process and consistency in the resolution of similar issues.

2.42 Policy 8: The firm deals with and resolves differences of opinion, documents and implements conclusions reached, and does not release the report until the matter is resolved. Multioffice CPA Firm implements this policy through the following procedures:

- Requiring that all differences of professional judgment within an engagement team be resolved by the engagement and quality control partners, and the managing partner if necessary, and that the report not be released until the matter is resolved.
- Requiring that the resolution of the differences be appropriately documented. If members of the engagement team continue to disagree with the resolution, they may disassociate themselves from the resolution of the matter and may document that a disagreement continues to exist.

2.43 Policy 9: The firm has criteria for determining whether an engagement quality control review should be performed; evaluates all engagements against the criteria; performs an engagement quality control review for all engagements that meet the criteria; and completes the review before the report is released. Multioffice CPA Firm implements this policy by defining high-risk engagements and requiring that an engagement quality control review be performed for all high-risk engagements, engagements for financial institutions, and engagements performed for significant clients.

2.44 Policy 10: The firm establishes procedures addressing the nature, timing, extent, and documentation of the engagement quality control review. Multioffice CPA Firm implements this policy through the following procedures:

- Implementing procedures addressing the timing of the review. The firm has concluded that performing an engagement quality control review is not necessary to obtain sufficient appropriate audit evidence for audit engagements; therefore, the engagement quality control review does not need to be completed before the date of the auditor’s report but is required to be completed before the report is released. When the engagement quality control review results in additional audit procedures being performed, the date of the auditor’s report is changed to the date by which sufficient appropriate audit evidence has been obtained.
- Implementing procedures addressing the nature and extent of the review. The firm’s procedures for audit and attestation engagements require that the engagement quality control reviewer do the following:
  — Discuss significant accounting, auditing, and financial reporting issues with the engagement partner, including matters for which there has been consultation.
— Discuss with the engagement partner the engagement team’s identification and audit of high-risk assertions, transactions, and account balances.

— Review selected working papers relating to the significant judgments the engagement team made and the conclusions they reached.

— Review documentation of the resolution of significant accounting, auditing, and financial reporting issues, including documentation of consultation with firm personnel or external sources.

— Review the summary of uncorrected misstatements that are related to known and likely misstatements.

— Review additional engagement documentation to the extent considered necessary.

— Read the financial statements and report and consider whether the report is appropriate.

— Confirm with the engagement partner that there are no significant unresolved issues.

— Complete the review before the release of the report.

— Determine whether the issues raised in the review indicate a need to change the auditor’s report date.

• Resolving conflicting opinions between the engagement partner and the engagement quality control reviewer regarding significant matters. The policy requires documentation of the resolution of conflicting opinions before the release of the audit report.

• Implementing procedures addressing documentation by the engagement quality control reviewer. The firm’s procedures require documentation of the following:

  — That the procedures required by the firm’s policies on engagement quality control review have been performed

  — That the engagement quality control review has been completed before the report is released

  — That no matters have come to the attention of the engagement quality control reviewer that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate

2.45 Policy 11: The firm establishes criteria for the eligibility of engagement quality control reviewers. Multioffice CPA Firm implements this policy by establishing the following criteria for an engagement quality control reviewer:

• Is not selected by the engagement partner

• Has sufficient technical expertise and experience

• Carries out his or her responsibilities with objectivity and due professional care without regard to the relative positions of the engagement partner and the engagement quality control reviewer

• Does not assume any of the responsibilities of the engagement partner or have responsibility for the audit of any significant subsidiaries, divisions, benefit plans, or affiliated or related entities

• Meets the independence requirements relating to the engagements reviewed, even though the engagement quality control reviewer is not a member of the engagement team

• Does not make decisions for the engagement team or participate in the performance of the engagement, except that the engagement partner may consult the engagement quality control reviewer at any stage during the engagement
Monitoring

2.46 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm’s quality control system, and a firm’s compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

• Adherence to professional standards and regulatory and legal requirements
• Whether the quality control system has been appropriately designed and effectively implemented
• Whether the firm’s quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

2.47 Multioffice CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 2.48–51.

2.48 Policy 1: The firm assigns responsibility for the monitoring process to a partner and assigns performance of the monitoring process to competent individuals. Multioffice CPA Firm implements this policy through the following procedures:

• Designating a partner with appropriate authority to be responsible for quality assurance, including ensuring that the firm’s quality control policies and procedures and its methodologies remain relevant and adequate. Factors to be considered include the following:
  — Mergers and divestitures of portions of the practice
  — Changes in professional standards and other regulatory requirements applicable to the firm’s practice
  — Results of inspections and peer reviews
  — Reviews of litigation and regulatory enforcement actions against the firm and others
  — Changes in applicable AICPA membership requirements
• Preparing inspection checklists and guidance materials or using materials prepared by the AICPA for performing inspection procedures.
• Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm’s standards of quality in performing their duties.
• Identifying the need to take the following actions:
  — Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed
  — Improve compliance with firm policies and procedures related to the other elements of quality control
• Assigning performance of the monitoring process to the designated quality control individual for each practice office.

2.49 Policy 2: The firm performs monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm’s quality control policies and procedures. Multioffice CPA Firm implements this policy through the following procedures:

• Developing and performing the firm’s inspection program to obtain feedback about the effectiveness of the firm’s policies and procedures.
• Reviewing the resolution of matters reported by professional personnel on independence-confirmation forms to determine that matters have been appropriately considered and resolved.

• Interviewing personnel at all professional management and staff levels to obtain information about operating procedures in practice offices, whether personnel are knowledgeable about firm policies and procedures, and whether such policies and procedures are being effectively communicated.

• Reviewing the following documentation to determine compliance with firm policies and procedures:
  — Personnel evaluations, including documentation of hiring and advancement decisions
  — Documentation of client acceptance and continuance decisions
  — Participants’ evaluations of practice office training programs
  — Professional development records of personnel
  — Correspondence regarding the resolution of independence matters within the practice office

• Developing a plan to test a sample of engagements for compliance with the firm’s policies and procedures. Such a review may be preissuance or postissuance.

• Reviewing a cross-section of engagements from selected practice offices using the following criteria for inclusion in the sample selected:
  — Engagements involving all partners and managers who have significant accounting and auditing responsibilities in the selected offices
  — Engagements for financial institutions
  — First-year engagements
  — Significant client engagements
  — Specialized industries, with emphasis given to high-risk industries
  — Level of service performed (audit, review, compilation, and attestation)
  — Level of attestation services performed (examination, review, and agreed-upon procedures)
  — Engagements for which there have been complaints or allegations that the work performed by the firm fails to comply with professional standards, regulatory requirements, or the firm’s system of quality control
  — Engagements in which there were significant disagreements between the quality review partner and the engagement partner

• Periodically reviewing the process for personnel evaluation and counseling to ascertain the following:
  — Procedures for evaluation and documentation are being followed on a timely basis
  — Personnel who have been promoted have achieved the applicable requirements for advancement
  — Personnel decisions are consistent with evaluations
  — Recognition is given to outstanding performance

• Designating a partner or qualified individual in each office to review the summary of the evaluations of in-house training programs to determine whether the programs are achieving their objectives.
Designating a partner or qualified individual in each office to review summaries of CPE records for that office’s professional staff to determine that the office has established a means of tracking each individual’s compliance with the requirements of the AICPA and other applicable regulators.

• Interviewing selected professional personnel regarding the effectiveness of training programs.
• Considering the results of the firm’s inspection as they relate to the effectiveness of the firm’s professional development program.
• Ascertaining whether inquiries received by individuals consulted within the firm indicate the need for additional CPE programs.
• Reviewing and updating firm practice aids, such as audit programs, forms, and checklists, to reflect new or revised professional pronouncements.
• Issuing guidance regarding new professional standards, regulatory requirements, and related changes to firm policy.
• Soliciting comments from partners and managers as to the effectiveness of practice aids and tools.

Policy 3: The firm communicates at least annually (a) deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action to relevant engagement partners and other appropriate personnel and (b) the results of the monitoring of its quality control system process to relevant firm personnel. Multioffice CPA Firm implements this policy through the following procedures:

• Preparing a summary monitoring report for the firm’s senior management that evaluates the overall results of the inspection and other monitoring procedures and reaches final conclusions as to whether the firm as a whole needs to improve compliance with the firm’s policies and procedures and whether revisions to the firm’s quality control policies and procedures are necessary.
• Communicating findings to practice office personnel and determining the corrective actions to be taken for the engagements reviewed. These findings are discussed and communicated in a report issued to each office. The practice office responds regarding the specific corrective actions or steps to be taken to improve compliance with the firm’s policies and procedures and professional standards.
• Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s).
• Communicating in partner-manager meetings and firm policy correspondence the need for changes in the system of quality control.
• Communicating in training programs, partner-manager meetings, and firm policy correspondence the need for improved compliance with the system of quality control.

Policy 4: The firm deals appropriately with complaints and allegations. Multioffice CPA Firm implements this policy through the following procedures:

• Establishing procedures for concerns to be brought to the attention of the ethics committee in a confidential manner
• Having the firm’s ethics committee (excluding any members who are otherwise involved in the engagement under investigation) investigate the following:
  — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  — Allegations of noncompliance with the firm’s system of quality control
  — Deficiencies in the design or operation of the firm’s quality control policies and procedures, or noncompliance with the firm’s system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
• Consulting with legal counsel as necessary
• Documenting complaints and allegations and the responses to them

2.52 Policy 5: The firm prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control. Multioffice CPA Firm implements this policy by designing its summary monitoring report to provide evidence of the operation of each element of its system of quality control, including the following:

• Monitoring procedures, including the procedure for selecting completed engagements to be inspected

• A record of the evaluation of the following:
  — Adherence to professional standards and regulatory and legal requirements
  — Whether the quality control system has been appropriately designed and effectively implemented
  — Whether the firm’s quality control policies and procedures have been appropriately applied

• Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

2.53 Policy 6: The firm retains documentation providing evidence of the operation of the system of quality control for an appropriate period of time. Multioffice CPA Firm implements this policy by requiring retention of the summary monitoring report for a period of time sufficient to meet the firm’s peer review or other regulatory requirements.
Chapter 3:

System of Quality Control for a CPA Firm’s Accounting and Auditing Practice—Firm With a Single Office

3.01 This chapter describes how a CPA firm that has a single office (Single office CPA Firm) implements each element of quality control in its accounting and auditing practice. Single office CPA Firm is a hypothetical firm with 1 office, 3 partners, and a total of 10 professionals. Its accounting and auditing practice has a concentration of employee benefit plans, and the firm has no issuer clients. The firm uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. These practice aids are supplemented by oral and written communications from the firm’s partners.

Quality Control Policies and Procedures

3.02 The firm’s system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The policies and procedures are required to be documented. Single office CPA Firm documents its system of quality control by preparing a document that comprehensively describes the policies and procedures for each element of quality control. Single office CPA Firm reviews the documentation at least annually and updates it as necessary.

3.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

3.04 Single office CPA Firm communicates these policies and procedures in writing and makes the documentation available electronically to all professional personnel. Single office CPA Firm requires each individual to be familiar with and to comply with these policies and procedures. Single office CPA Firm encourages its personnel to communicate their views or concerns about quality control matters to partners.

Leadership Responsibilities for Quality Within the Firm (the “Tone at the Top”)

3.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.06–10.

3.06 Policy 1: The firm’s managing partner assumes ultimate responsibility for the firm’s system of quality control. Single office CPA Firm implements this policy through the following procedures:

- Having the managing partner accept ultimate responsibility for the firm’s system of quality control and for setting a tone that emphasizes the importance of quality and of following the firm’s system of quality control
- Informing personnel that failure to adhere to the firm’s policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action

3.07 Policy 2: Commercial considerations do not override the quality of the work performed. Single office CPA Firm implements this policy through the following procedures:

---

1 If Single office CPA Firm were to be engaged to perform audit services for an issuer, it might need to revise its quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.
• Having the managing partner continually evaluate client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control

• Emphasizing to all personnel that fee considerations and scope of services should not infringe upon quality work

3.08 Policy 3: Responsibility for developing, implementing, and operating the firm’s quality control system is assigned to personnel with sufficient and appropriate experience, authority, and ability. Single office CPA Firm implements this policy by having the managing partner designate a quality control partner who is responsible for designing, implementing, and monitoring the firm’s quality control system.

3.09 Policy 4: Performance evaluation, compensation, and advancement (including incentive systems) with regard to personnel demonstrate the firm’s overarching commitment to the objectives of the system of quality control. Single office CPA Firm implements this policy through the following procedures:

• Designing and implementing performance evaluation and advancement systems that reward partners and staff involved in the accounting and auditing practice for the quality of their work and their compliance with professional standards.

• Establishing a compensation system that provides incentives to accounting and auditing partners and senior-level employees for the quality of their accounting and auditing work. The compensation system does the following:
  — Takes into consideration firm feedback based on monitoring results and peer reviews of the work performed
  — Rewards partners and personnel for timely (a) identification of significant and emerging accounting and auditing issues and (b) consultation with firm experts

3.10 Policy 5: The firm devotes sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures. Single office CPA Firm implements this policy through the following procedures:

• Providing the designated quality control partner with sufficient time, authority, and resources to develop, implement, and maintain the firm’s quality control policies and procedures

• Providing the firm’s quality control documentation to personnel when they are initially hired and reviewing the documentation with them

• Reviewing the firm’s quality control policies and procedures with personnel at firm training sessions at least annually

Relevant Ethical Requirements

3.11 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.12–17.

3.12 Policy 1: Personnel adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators. Single office CPA Firm implements this policy through the following procedures:

• Designating a quality assurance partner to review relevant pronouncements relating to independence, integrity, and objectivity; answer questions; determine the circumstances for which consultation with sources outside the firm is required; and resolve matters

• Providing personnel with access to the AICPA Professional Standards service
• Establishing a system for identifying all services performed for each client and evaluating whether any of those services might impair independence

3.13 Policy 2: The firm establishes procedures to communicate independence requirements to firm personnel and, where applicable, others subject to them. Single office CPA Firm implements this policy through the following procedures:

• Informing personnel of those entities to which independence policies apply by doing the following on a timely basis:
  — Preparing and maintaining a list of entities with which firm personnel are prohibited from having a financial or business relationship
  — Making the list available to personnel so they may evaluate their independence (including personnel new to the firm)
  — Notifying personnel of changes in the list

• Providing frequent reminders of professional responsibilities to personnel, such as avoiding behavior that might be perceived as impairing their independence or objectivity

3.14 Policy 3: The firm establishes procedures to identify and evaluate possible threats to independence and objectivity, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards. Single office CPA Firm implements this policy through the following procedures:

• Requiring the engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall impact, if any, on independence requirements

• Accumulating and communicating relevant information to appropriate personnel so that the following can occur:
  — The firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements.
  — The firm can maintain and update information relating to independence.
  — The firm and the engagement partner can take appropriate action regarding identified threats to independence.

• Requiring personnel to promptly report circumstances and relationships that create a threat to independence, and independence breaches of which they become aware, so that appropriate action can be taken

• Establishing criteria to determine the need for safeguards for engagements where the following have taken place:
  — Monitoring procedures or peer review has identified weaknesses in previous years.
  — The same senior personnel have been used for five years or more on an audit or attestation engagement.

• Promptly communicating identified breaches of these policies and procedures, and the required corrective actions, to the following personnel:
  — The engagement partner who, with the firm, needs to address the breach
  — Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action

• Requiring the engagement partner and the other individuals referred to in the previous list to confirm to the firm that the required corrective actions have been taken
• Having a partner, or an individual designated by the partner, periodically review unpaid fees from clients to ascertain whether any outstanding amounts impair the firm’s independence

• Establishing additional procedures that provide safeguards when the firm performs audit or other attest work for (a) significant clients or (b) clients at which partners or other senior personnel are offered key management positions or have accepted offers of employment

3.15 Policy 4: The firm withdraws from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied. Single office CPA Firm implements this policy through the following procedures:

• Consulting within the firm, and with legal counsel and other parties if necessary, when the firm believes that effective safeguards to reduce threats to independence to an acceptable level cannot be applied

• Withdrawing from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied

3.16 Policy 5: The firm obtains written confirmation, at least annually, of compliance with its policies and procedures on independence from all firm personnel required to be independent by relevant requirements. Single office CPA Firm implements this policy through the following procedures:

• Obtaining written representations from personnel, upon hire and on an annual basis, stating that they have read the firm’s independence, integrity, and objectivity policies, understand the applicability of those policies to their activities, and have complied with the requirements of those policies since their last representation. (Such written representations are accompanied by the most current list of all entities with which firm personnel are prohibited from having a business relationship.)

• Reviewing these independence representations for completeness and resolving reported exceptions.

• Requiring the engagement partner to sign a step in the engagement program attesting to compliance with independence requirements that apply to the engagement.

3.17 Policy 6: The firm establishes procedures for confirming the independence of another firm that performs part of the engagement. Single office CPA Firm implements this policy through the following procedures:

• Using practice aids that prescribe the form and content of independence representations, and frequency with which they are to be obtained

• Requiring that such representations be documented

Acceptance and Continuance of Client Relationships and Specific Engagements

3.18 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm’s client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client’s management could reflect the reliability of the client’s accounting records and financial representations and, therefore, affect the firm’s reputation or involvement in litigation. A firm’s policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

• has considered the integrity of the client, including the identity and business reputation of the client’s principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
is competent to perform the engagement and has the capabilities and resources to do so;
• can comply with legal and ethical requirements; and
• has reached an understanding with the client regarding the services to be performed.

3.19 Single office CPA Firm satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 3.20–24.

3.20 Policy 1: The firm evaluates factors that have a bearing on management’s integrity and considers the risk associated with providing professional services in particular circumstances. Single office CPA Firm implements this policy through the following procedures:
• Informing personnel of the firm’s policies and procedures for accepting and continuing clients, including those outlined in the firm’s practice aids.
• Obtaining and evaluating relevant information such as the following before accepting or continuing a client:
  — The nature and purpose of the services to be provided and management’s understanding thereof
  — The identity of the client’s principal owners, key management, related parties, and those charged with its governance
  — Information obtained from inquiries of the client’s bankers, factors, attorneys, credit services, and others who have business relationships with the entity
  — The nature of the client’s operations, including its business practices, from sources such as annual reports, interim financial statements, reports to and from regulators, income tax returns, and credit reports
  — Information concerning the attitude of the client’s principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting
• Evaluating the risk of providing services for the following engagements:
  — Engagements for entities operating in highly specialized or regulated industries, including financial institutions, governmental entities, and employee benefit plans
  — Engagements that require an inordinate amount of time to complete relative to the available resources of the firm
• Communicating with the predecessor accountant or auditor when required or recommended by professional standards. This communication also includes inquiries regarding the nature of any disagreements and whether there is evidence of opinion-shopping.
• Conducting a background check of the business, its officers, and the person(s) in question by using the services of an investigative company and evaluating the information obtained regarding management’s integrity. Background checks are conducted when the firm is unable to obtain sufficient information about the prospective client after taking the steps described previously, or there is an indication that management or someone affiliated with the prospective client may be less than reputable.
• Evaluating the risk of providing services to significant clients or to other clients for which the firm’s objectivity or the appearance of independence may be impaired. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner’s objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (a) the amount of time the partner devotes to the engagement, (b) the effect on the partner’s stature within the firm as a result of his or her service to the client, (c) the manner in which
the partner is compensated, and (d) the effect that losing the client would have on the partner and the firm.

3.21 **Policy 2:** The firm evaluates whether the engagement can be completed with professional competence; undertakes only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluates, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued. Single office CPA Firm implements this policy through the following procedures:

- Evaluating whether the firm has obtained or can reasonably expect to obtain the knowledge and expertise necessary to perform the engagement, including relevant regulatory or reporting requirements.
- Evaluating whether the following are in place:
  - The firm has sufficient personnel with the necessary capabilities and competence.
  - Specialists are available if needed.
  - Individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, when needed.
  - The firm is able to complete the engagement within the reporting deadline.
- Specifying conditions that trigger the requirement to reevaluate a specific client or engagement. The following are examples of such conditions:
  - Significant changes in the client, such as a major change in senior client personnel, ownership, advisers, the nature of its business, or the financial stability of the client.
  - Changes in the nature or scope of the engagement, including requests for additional services.
  - Changes in the composition of the firm, such as the loss of and inability to replace key personnel who are particularly knowledgeable about a specialized industry.
  - The decision to discontinue services to clients in a particular industry.
  - The existence of conditions that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance.
  - The client’s delinquency in paying fees. (This may also affect the firm’s independence.)
  - Engagements for entities operating in highly specialized or regulated industries, such as financial institutions, governmental entities, and employee benefit plans.
  - Engagements for entities in which there may be substantial doubt about the entity’s ability to continue as a going concern.
  - Engagements in which the client has ignored prior recommendations, such as those that address deficiencies in internal control.
- Obtaining relevant information to determine whether the relationship should be continued and establishing a frequency for evaluations (for example, continuance decisions are made at least annually).
- Evaluating the information obtained regarding acceptance or continuance of the client or engagement through the following activities:
  - The engagement partner assesses the information obtained about the client or the specific engagement, including information about the significance of the client to the firm, and makes a recommendation about whether the client or engagement should be accepted or continued.
  - The engagement partner completes a client acceptance form and submits it to the managing partner for approval.
c. The engagement partner signs a step in the planning program noting consideration of client continuance and completes a form documenting the rationale and conclusion regarding client continuance if conditions exist that trigger the requirement to reevaluate a client or engagement between annual audits.

d. The managing partner assesses and approves the recommendation made by the engagement partner. If the managing partner recommends not accepting a client or discontinuing a client relationship, the managing partner discusses his or her reasons for the acceptance or continuance decision with the other partners.

- Establishing procedures for dealing with information that would have caused the firm to decline the engagement if the information had been available earlier.

3.22 Policy 3: The firm obtains an understanding with the client regarding the services to be performed. Single office CPA Firm implements this policy by requiring that, for all engagements, the firm prepare a written engagement letter documenting the understanding with the client and obtain the client’s signature on that letter, thus minimizing the risk of misunderstanding regarding the nature, scope, and limitations of the services to be performed.

3.23 Policy 4: The firm establishes procedures on withdrawal from an engagement or from both the engagement and the client relationship. Single office CPA Firm implements this policy through the following procedures:

- Discussing with the appropriate level of the client’s management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place or for the firm to report to regulatory authorities the withdrawal from the engagement, or from both the engagement and the client relationship, together with the reasons for the withdrawal
- Discussing with the appropriate level of the client’s management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship if the firm determines that it is appropriate to withdraw

3.24 Policy 5: The firm documents how issues relating to acceptance or continuance of client relationships and specific engagements were resolved. Single office CPA Firm implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

3.25 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (a) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (b) to enable the firm to issue reports that are appropriate in the circumstances. Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.26–3.22.

3.26 Policy 1: Personnel who are hired possess the characteristics that enable them to perform competently. Single office CPA Firm implements this policy through the following procedures:

- Designating an individual in the firm to be responsible for the following activities:
  — Managing the human resources function
  — Evaluating the firm’s personnel needs by considering factors such as existing clientele, anticipated growth, personnel turnover, and individual advancement
  — Developing criteria for determining which individuals will be involved in the interviewing and hiring process
Establishing an understanding among the partners about the attributes, achievements, and experiences desired in entry-level and experienced personnel

Setting guidelines for the additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions

3.27 Policy 2: The firm determines capabilities and competencies required for an engagement, including those required of the engagement partner. Single office CPA Firm implements this policy by specifying the competencies that the engagement partners of the firm’s accounting, auditing, and attestation engagements (or other persons responsible for supervising and signing or authorizing someone to sign the firm’s report on such engagements) should possess. These competencies include having an understanding of the following:

- The role of the firm’s system of quality control and the AICPA Code of Professional Conduct in ensuring the integrity of the accounting, auditing, and attest functions to users of reports.
- The performance, supervision, and reporting aspects of the engagement, which ordinarily are gained through training or participation in similar engagements.
- The industry in which the client operates, including its organization and operating characteristics, sufficient to identify areas of high or unusual risk associated with the engagement and to evaluate the reasonableness of industry-specific estimates.
- The professional standards applicable to the engagement and the industry in which the client operates. Such standards include accounting, auditing, and attestation standards, as well as rules and regulations issued by applicable regulators.
- The skills that contribute to sound professional judgment, including the ability to exercise professional skepticism.
- How the organization uses information technology and the manner in which information systems are used to record and maintain financial information.

3.28 Policy 3: The firm determines the capabilities and competencies possessed by personnel. Single office CPA Firm implements this policy through the following procedures:

- Establishing criteria for evaluating personal characteristics such as integrity, competence, and motivation
- Evaluating personnel at least annually to determine their capabilities and competencies

3.29 Policy 4: The firm assigns the responsibility for each engagement to an engagement partner. Single office CPA Firm implements this policy through the following procedures:

- Assigning responsibility for each engagement to an engagement partner who has the appropriate capabilities, competence, authority, and time to perform the role
- Clearly defining and communicating the responsibilities of the partner to the engagement partner
- Communicating the identity and role of the partner to management and those charged with governance
- Monitoring the workload and availability of engagement partners to enable these individuals to have sufficient time to adequately discharge their responsibilities

3.30 Policy 5: The firm assigns personnel (including partners) based on the knowledge, skills, and abilities required in the circumstances and the nature and extent of supervision needed. Single office CPA Firm implements this policy through the following procedures:

- Designating an appropriate person to be responsible for assigning personnel to engagements based on such factors as the following:
  - Engagement type, size, significance, complexity, and risk profile
— Specialized experience and expertise required for the engagement and competencies gained through prior experience
— Personnel availability
— Timing of the work to be performed
— Continuity and rotation of personnel
— Opportunities for on-the-job training
— Situations for which independence or objectivity concerns exist

• Designating a partner to be responsible for partner and manager assignments
• Requiring approval of partner and manager assignments from the managing partner or other partner in the case of high-risk or significant client engagements

3.31 Policy 6: Personnel participate in general and industry-specific continuing professional education (CPE) and professional development activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other regulators. Single office CPA Firm implements this policy through the following procedures:

• Encouraging personnel to pass the Uniform CPA Examination
• Assigning responsibility to a partner to maintain a professional development program that does the following:
  — Requires personnel to participate in professional development programs in accordance with firm guidelines and in subjects that are relevant to their responsibilities
  — Takes into account the requirements of the AICPA, state boards of accountancy, and other regulatory agencies in establishing the firm’s CPE requirements
  — Provides CPE course materials to, and maintains records of completed CPE for, professional personnel
  — Provides an orientation and training program for new hires
• Encouraging participation by personnel at each level in the firm in other professional development activities such as completing external professional development programs, including graduate-level and self-study courses, becoming members of professional organizations, serving on professional committees, writing for professional publications, and speaking to professional groups
• Communicating and distributing to personnel, when applicable, changes in accounting, auditing, attestation, and quality control standards, as well as independence requirements and the firm’s guidance with respect to those standards and requirements

3.32 Policy 7: Personnel selected for advancement have the qualifications to fulfill the responsibilities they will be called on to assume. Single office CPA Firm implements this policy through the following procedures:

• Assigning responsibility to the three partners to jointly make advancement and termination decisions. Such responsibilities include the following:
  — Establishing criteria for evaluating personnel at each professional level and for advancement to the next higher level of responsibility. Such criteria give recognition and reward to the development and maintenance of competence and commitment to ethical principles.
  — Informing firm personnel about the criteria for advancement to the next higher level of responsibility.
  — Designating personnel responsible for preparing evaluations and determining when they should be prepared.
Informing personnel that failure to adhere to the firm’s policies and procedures regarding performance quality and commitment to ethical principles may result in disciplinary action.

Using forms that include the applicable qualifications when evaluating the performance of personnel. Such forms include qualifications related to performance quality and adherence to ethical principles.

Reviewing evaluations on a timely basis with the individual being evaluated.

• Counseling personnel regarding their progress and career opportunities by doing the following:
  — Evaluating employees annually and at the end of each assignment lasting four weeks or longer to provide feedback on performance.
  — Summarizing and reviewing with personnel annually the evaluation of their performance, including an assessment of their progress with the firm. Considerations include past performance, future objectives of the individual and the firm, the individual’s assignment preferences, and career opportunities.
  — Evaluating partners periodically by means of counseling, peer evaluation, or self-appraisal, as appropriate.

### Engagement Performance

3.33 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (a) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (b) that the firm or the engagement partner issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Single office CPA Firm satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 3.34–.44.

3.34 Policy 1: Planning for engagements meets professional, regulatory, and the firm’s requirements. Single office CPA Firm implements this policy by maintaining and providing personnel with the firm’s practice aids that prescribe the factors the engagement team should consider in the planning process and the extent of documentation of those considerations. Planning considerations may vary depending on the size and complexity of the engagement. Planning generally includes the following activities:

• Assigning responsibilities to appropriate personnel during the planning phase
• Developing or updating background information on the client and the engagement
• Considering client significance to the firm
• Developing a planning document that includes the following:
  — Proposed work programs tailored to the specific engagement
  — Staffing requirements and the need for specialized knowledge
  — Consideration of the economic conditions affecting the client and its industry and their potential effect on the conduct of the engagement
  — The risks, including fraud considerations, affecting the client and the engagement and how the risks may affect the procedures performed
  — A budget that allocates sufficient time for the engagement to be performed in accordance with professional standards and the firm’s quality control policies and procedures
3.35 Policy 2: The engagement is performed, supervised, documented, and reported (or communicated) in accordance with the requirements of professional standards, applicable regulators, and the firm. Single office CPA Firm implements this policy through the following procedures:

- Providing adequate supervision during the course of an engagement, including briefing the engagement team on the objectives of their work. The training, ability, and experience of the personnel are considered when assigning supervisors to the engagement.
- Requiring that a written work program be used in all engagements.
- Addressing significant issues arising during the engagement, considering their significance, and appropriately modifying the planned approach.
- Adhering to the guidelines set forth by the firm for the form and content of documentation of the work performed and conclusions reached. Such documentation includes standardized forms, checklists, and questionnaires used in the performance of engagements and explanations, when required, of how the firm integrates such aids into engagements.
- Requiring engagement documentation in accordance with professional standards, applicable regulatory requirements, and the firm’s policies.

3.36 Policy 3: Qualified engagement team members review work performed by other team members on a timely basis. Single office CPA Firm implements this policy by adhering to the following guidelines established by the firm regarding review of the documentation of the work performed and conclusions reached, the financial statements and reports, and documentation of the review process:

- All reviewers are to have appropriate experience, competence, and responsibility.
- For each engagement, there is to be evidence of appropriate review of documentation of the work performed and conclusions reached, the financial statements, and the report.
- Engagement documentation is reviewed to determine whether the following have occurred:
  - The work has been performed in accordance with professional standards and regulatory and legal requirements.
  - Significant findings and issues have been raised for further consideration.
  - Appropriate consultations have taken place, and the resulting conclusions have been documented and implemented.
  - The nature, timing, and extent of work performed are appropriate and do not need revision.
  - The work performed supports the conclusions reached and is appropriately documented.
  - The evidence obtained is sufficient and appropriate to support the report.
  - The objectives of the engagement procedures have been achieved.

3.37 Policy 4: Engagement teams complete the assembly of final engagement files on a timely basis. Single office CPA Firm implements this policy by completing the assembly of final engagement files in accordance with professional standards and applicable regulatory requirements, if any.

3.38 Policy 5: The firm maintains the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation. Single office CPA Firm implements this policy through the following procedures:

- Establishing and applying controls to accomplish the following:
  - Clearly determine when and by whom engagement documentation was prepared and reviewed.
— Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means.

— Prevent unauthorized changes to the engagement documentation.

— Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

• Implementing procedures for properly distributing engagement documentation materials to engagement teams at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement

• Implementing procedures to restrict access to, and enable proper distribution and confidential storage of, hardcopy engagement documentation

• Requiring the use of passwords by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users

• Implementing appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement

• Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
  — Generate copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
  — Integrate the copies into the engagement files, including indexing and signing off on the copies as necessary.
  — Enable the copies to be retrieved and printed as necessary.

3.39 Policy 6: The firm retains engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations. Single office CPA Firm implements this policy through the following procedures:

• Retaining engagement documentation for a period of time sufficient to meet the requirements of the state board of accountancy and applicable professional standards

• Establishing procedures that
  — enable the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time;
  — provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed; and
  — enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

3.40 Policy 7: The firm requires that consultation take place when appropriate; that sufficient and appropriate resources are available to enable appropriate consultation to take place; that all the relevant facts known to the engagement team are provided to those consulted; that the nature, scope, and conclusions of such consultations are documented; and that conclusions resulting from such consultations are implemented. Single office CPA Firm implements this policy through the following procedures:

• Consulting with those having appropriate knowledge, authority, and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical, and other matters. Single office CPA firm uses advisory services provided by other firms, professional and regulatory bodies, and commercial organizations that provide relevant quality control services. Before using such services, the firm evaluates whether the external provider is qualified for that purpose.
Informing personnel of the firm’s consultation policies and procedures.

Requiring sufficiently experienced engagement team members to identify matters for consultation or consideration during the engagement.

Requiring consultation in specialized areas or situations with appropriate individuals within and outside the firm when matters such as the following arise:
   — The application of newly issued technical pronouncements
   — Industries with special accounting, auditing, or reporting requirements, including unusually complex employee benefit plans
   — Emerging practice problems
   — Choices among alternative generally accepted accounting principles upon initial adoption or when an accounting change is made
   — Reissuance of a report, consideration of omitted procedures after a report has been issued, or subsequent discovery of facts that existed at the date a report was issued
   — Filing requirements of regulators
   — Meetings with regulators at which the firm is to be called on to support the application of generally accepted accounting principles or generally accepted auditing standards that have been questioned

Providing all professional personnel with access to adequate and current reference materials.

Including all relevant facts, circumstances, the professional literature used, and conclusions reached in the engagement documentation of the work performed and conclusions reached.

Documenting the issue on which consultation was sought and the results of the consultation, including any decisions taken, the basis for those decisions, and how they were implemented. If there is an unresolved disagreement, an outside source may be consulted to assist in determining the appropriate application of accounting principles.

3.41 Policy 8: The firm deals with and resolves differences of opinion, documents and implements conclusions reached, and does not release the report until the matter is resolved. Single office CPA Firm implements this policy through the following procedures:

- Requiring that all differences of professional judgment among members of an engagement team be resolved by the engagement and the quality control partners, and the managing partner if necessary, and that the report not be released until the matter is resolved.

- Requiring that conclusions reached be appropriately documented. If members of the team continue to disagree with the resolution, they may disassociate themselves from the resolution of the matter and may document that a disagreement continues to exist.

3.42 Policy 9: The firm has criteria for determining whether an engagement quality control review should be performed, evaluates all engagements against the criteria, performs an engagement quality control review for all engagements that meet the criteria, and completes the review before the report is released. Single office CPA Firm implements this policy through the following procedures:

- Establishing criteria such as the following:
  — The identification of unusual circumstances or risks in an engagement or class of engagements as determined by the engagement partner or quality control partner
  — An engagement quality control review is required by law or regulation

- Evaluating all engagements against the criteria

- Performing an engagement quality control review for all engagements that meet the criteria
3.43 Policy 10: The firm establishes procedures addressing the nature, timing, extent, and documentation of the engagement quality control review. Single office CPA Firm implements this policy through the following procedures:

- Implementing procedures addressing the nature, timing, and extent of the review. The firm has concluded that performing an engagement quality control review is not necessary to obtain sufficient appropriate audit evidence for audit engagements; therefore, the engagement quality control review does not need to be completed before the date of the auditor’s report. When the engagement quality control review results in additional audit procedures being performed, the date of the auditor’s report is changed to the date by which sufficient appropriate audit evidence has been obtained. The firm’s procedures require that for audit and attestation engagements, the engagement quality control reviewer do the following:
  
  — Discuss significant accounting, auditing, and financial reporting issues with the engagement partner, including matters for which there has been consultation.
  
  — Discuss with the engagement partner the engagement team’s identification and audit of high-risk assertions, transactions and account balances.
  
  — Confirm with the engagement partner that there are no significant unresolved issues.
  
  — Review selected working papers relating to the significant judgments the engagement team made and the conclusions they reached.
  
  — Review documentation of the resolution of significant accounting, auditing, or financial reporting issues, including documentation of consultation with firm personnel or external sources.
  
  — Review the summary of uncorrected misstatements related to known and likely mis-statements.
  
  — Review additional engagement documentation to the extent considered necessary.
  
  — Read the financial statements and the report and consider whether the report is appropriate.
  
  — Complete the review before the release of the report. The review may be conducted at appropriate stages during the engagement.
  
  — Determine whether the issues raised in the review indicate a need to change the auditor’s report date.

- Resolving conflicting opinions between the engagement partner and the engagement quality control reviewer regarding significant matters. The policy requires documentation of the resolution of conflicting opinions before the release of the audit report.

- Implementing procedures addressing documentation by the engagement quality control reviewer. The firm’s procedures require documentation of the following:
  
  — The procedures required by the firm’s policies on engagement quality control review have been performed.
  
  — The engagement quality control review has been completed before the report is released.
  
  — No matters have come to the attention of the engagement quality control reviewer that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

3.44 Policy 11: The firm establishes criteria for the eligibility of engagement quality control reviewers. Single office CPA Firm implements this policy by establishing the following criteria for an engagement quality control reviewer:

- Is selected by the quality control partner or the managing partner
• Has sufficient technical expertise and experience
• Carries out his or her responsibilities with objectivity and due professional care without regard to the relative positions of the audit engagement partner and the engagement quality control reviewer
• Meets the independence requirements relating to the engagements reviewed, even though the engagement quality control reviewer is not a member of the engagement team
• Does not make decisions for the engagement team or participate in the performance of the engagement except that the engagement partner may consult the engagement quality control reviewer at any stage during the engagement

When the firm does not have suitably qualified personnel to perform the engagement quality control review, the firm contracts with a suitably qualified external person to perform the engagement quality control review.

Monitoring

3.45 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm’s quality control system, and a firm’s compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

• Adherence to professional standards and regulatory and legal requirements
• Whether the quality control system has been appropriately designed and effectively implemented
• Whether the firm’s quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

3.46 Single office CPA Firm satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 3.47–.56.

3.47 Policy 1: The firm assigns responsibility for the monitoring process, including performance, to a partner or competent individual. Single office CPA Firm implements this policy through the following procedures:

• Designating a partner or senior personnel to be responsible for quality assurance, including ensuring that the firm’s quality control policies and procedures and its methodologies remain relevant and adequate. Factors to be considered include the following:
  — Mergers and divestitures of portions of the practice
  — Changes in professional standards or other regulatory requirements applicable to the firm’s practice
  — Results of inspections and peer reviews
  — Review of litigation and regulatory enforcement actions against the firm and its personnel
  — Changes in applicable AICPA membership requirements
• Determining whether personnel have been appropriately informed of their responsibilities for maintaining the firm’s standards of quality in performing their duties.
• Identifying the need to do the following:
  — Revise policies and procedures related to the other elements of quality control because they are ineffective or inappropriately designed.
  — Improve compliance with firm policies and procedures related to the other elements of quality control.
Policy 2: The firm performs monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and the firm’s quality control policies and procedures.

For purposes of illustrating Policy 2, two scenarios are described. Scenario 1 illustrates how Single office CPA Firm would satisfy the objective of Policy 2 by reviewing engagements throughout the year. Scenario 2 illustrates how Single office CPA Firm would implement Policy 2 by performing an annual inspection, thereby reviewing engagements during a designated period in the year.

Scenario 1: Monitoring by Reviewing Engagements Throughout the Year. Single office CPA Firm implements Policy 2 through the following procedures:

- Designating a partner or management-level individual not previously associated with the engagement to perform either a preissuance or postissuance review of the engagement.
- Establishing the approach for performing preissuance or postissuance reviews, for example, the comprehensiveness of the review and the frequency for summarizing findings (such as monthly or quarterly). The comprehensiveness of the review of selected engagements is similar to that performed in an inspection or peer review.
- Designating the forms and checklists to be used during the engagement and functional element reviews and the extent of the documentation required. (Examples of functional elements are the human resources function and the firm’s library.)
- Selecting a cross-section of engagements at the beginning of the monitoring year for preissuance or postissuance review and reevaluating that selection throughout the year as circumstances dictate. Criteria used for selecting engagements include the following:
  - Significant specialized industries with emphasis on high-risk engagements
  - Audits of the financial statements of employee benefit plans
  - First-year engagements
  - Significant client engagements
  - Level of service performed (that is, audit and attest, review, or compilation)
  - Engagements performed by all partners and other management-level personnel having accounting and auditing responsibilities
  - Engagements performed under Government Auditing Standards (Yellow Book engagements)
  - Engagements for which there have been complaints or allegations from firm personnel, clients, or other third parties that the work performed by the firm failed to comply with professional standards, regulatory requirements, or the firm’s system of quality control
  - Engagements in which there were significant disagreements between the review partner and the engagement partner
- Reviewing the selected engagements. Deficiencies identified as a result of this process are summarized and evaluated to determine whether the following are necessary:
  - Additional emphasis on specific areas or industries in future engagements
  - Modifications to existing policies and procedures to prevent the deficiencies noted from recurring
- Reviewing other engagement files at least annually for compliance with the firm’s quality control policies and procedures including reviewing correspondence regarding consultation on independence, integrity, and objectivity matters (for example, assessments of significant clients) and acceptance and continuance decisions.
Reviewing the resolution of matters reported by professional personnel regarding independence to determine that matters have been appropriately considered and resolved.

Preparing a summary of the deficiencies noted resulting from the preissuance and postissuance reviews so that the partner may incorporate any recommended changes into the firm’s policies and procedures.

Communicating to all professional personnel the deficiencies noted and related changes in quality control procedures.

Following up on planned corrective actions to determine whether the actions were taken as planned and whether they achieved the intended objectives.

3.51 Scenario 2: Monitoring by Inspecting a Sample of Engagements During a Designated Period of the Year.

Single office CPA Firm implements Policy 2 through the following procedures:

Designating a partner to be responsible for performing an annual inspection using guidance prepared by the AICPA for performing inspection procedures. These procedures include reviewing a cross-section of engagements using the following criteria in selecting engagements:

- Significant specialized industries with emphasis on high-risk engagements
- Audits of the financial statements of employee benefit plans
- First-year engagements
- Significant client engagements
- Level of service performed (that is, audit and attest, review, or compilation)
- Engagements performed by all partners and other management-level personnel having accounting and auditing responsibilities
- Engagements performed under Government Auditing Standards (Yellow Book engagements)
- Engagements for which there have been complaints or allegations from firm personnel, clients, or other third parties that the work performed by the firm failed to comply with professional standards, regulatory requirements, or the firm’s system of quality control
- Engagements in which there were significant disagreements between the quality review partner and the engagement partner

Establishing an approach and timetable for performing the inspection procedures and determining the forms and checklists to be used during the inspection and the extent of documentation required.

Deciding how long to retain detailed inspection documentation (as opposed to summaries).

Reviewing correspondence regarding consultation on independence, integrity, and objectivity matters and acceptance and continuance decisions.

Reviewing the resolution of matters reported by professional personnel regarding independence to determine that matters have been appropriately considered and resolved.

Selecting a sample of engagements for review to determine compliance with the firm’s quality control policies and procedures, reevaluating that selection throughout the process, and reviewing the selected engagements.

Preparing a summary inspection report for the partner or management group that evaluates the overall results of the inspection and sets forth any recommended changes that should be made to the firm’s policies and procedures.

Reviewing the recommended corrective actions and reaching final conclusions about the actions to be taken.

Communicating inspection findings and quality control changes to all professional personnel.
• Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s).

3.52 In addition to the procedures described under Scenarios 1 or 2, Single office CPA Firm also implements Policy 2 through the following procedures:

• Reviewing and evaluating firm practice aids, such as audit programs, forms, and checklists, and considering whether they reflect recent professional pronouncements

• Providing information during staff meetings regarding new professional standards, regulatory requirements, and the related changes that should be made to firm practice aids

• Reviewing, or designating a management-level individual to be responsible for reviewing, the professional development policies and procedures to determine whether they are appropriate, effective, and meet the needs of the firm

• Reviewing, or designating a management-level individual to review summaries of the CPE records of the firm’s professional personnel to evaluate each individual’s compliance with the requirements of the AICPA and other applicable regulators

• Reviewing other administrative and personnel records pertaining to the quality control elements

• Soliciting information from the firm’s personnel during staff meetings regarding the effectiveness of training programs

3.53 Policy 3: The firm communicates (a) deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action to relevant engagement partners and other appropriate personnel and (b) the results of the monitoring of its quality control system process to relevant firm personnel at least annually. Single office CPA Firm implements this policy through the following procedures:

• Preparing a summary report for the partners that evaluates the overall results of the monitoring and sets forth any recommended changes that should be made to the firm’s policies and procedures

• Reviewing the recommended corrective actions and reaching final conclusions as to the actions to be taken

• Communicating to all professional personnel the deficiencies noted and the related changes in quality control procedures

• Following up on planned corrective actions to determine whether those actions were taken and whether they achieved the intended objective(s)

3.54 Policy 4: The firm deals appropriately with complaints and allegations. Single office CPA Firm implements this policy through the following procedures:

• Having the managing partner inform personnel that they may raise any concerns regarding complaints or allegations about noncompliance with professional standards, regulatory and legal requirements, or the firm’s system of quality control with any partner without fear of reprisals.

• Having a partner who is not otherwise involved in the engagement investigate the following:
  — Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  — Allegations of noncompliance with the firm’s system of quality control
  — Deficiencies in the design or operation of the firm’s quality control policies and procedures, or noncompliance with the firm’s system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations

• Documenting complaints and allegations and the responses to them.
3.55 Policy 5: The firm prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control. Single office CPA Firm implements this policy by designing its summary monitoring report to provide evidence of the operation of each element of its system of quality control, including the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be inspected
- A record of the evaluation of the following:
  - Adherence to professional standards and regulatory and legal requirements
  - Whether the quality control system has been appropriately designed and effectively implemented
  - Whether the firm’s quality control policies and procedures have been appropriately applied so that reports that are issued by the firm or engagement partners are appropriate in the circumstances
- Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

3.56 Policy 6: The firm retains documentation providing evidence of the operation of the system of quality control for an appropriate period of time. Single office CPA Firm implements this policy by requiring retention of the summary monitoring report for a period of time sufficient to meet the firm’s peer review or other regulatory requirements.
Chapter 4:
System of Quality Control for a CPA Firm’s Accounting Practice—Sole Practitioner

4.01 This chapter describes how a sole practitioner (Sole Practitioner, CPA) implements each element of quality control in her accounting practice. Sole Practitioner, CPA, is a hypothetical firm of which Sole Practitioner, CPA, is the sole owner. The firm has no professional staff; however, on occasion Sole Practitioner, CPA, hires per-diem professionals. Her accounting practice consists only of engagements subject to SSARs. She uses practice aids that have been subjected to peer review in accordance with standards established by the AICPA. Sole Practitioner, CPA, uses per-diem personnel to assist her and recognizes that her policies and procedures would have to change if she were to perform audit or attest engagements or hire full-time or part-time professional staff.

Quality Control Policies and Procedures

4.02 The firm’s system of quality control consists of policies designed to achieve the objectives of the system and the procedures necessary to implement and monitor compliance with those policies. The policies and procedures are required to be documented. Sole Practitioner, CPA, documents her system of quality control by filling out checklists and questionnaires such as those included in the AICPA Peer Review Program Manual. Sole Practitioner, CPA, reviews the documentation at least annually and updates it as necessary.

4.03 The firm should communicate its quality control policies and procedures to its personnel. Effective communication includes the following:

- A description of quality control policies and procedures and the objectives they are designed to achieve
- The message that each individual has a personal responsibility for quality

4.04 Sole Practitioner, CPA, meets this requirement with regard to herself by annually reviewing the checklists and questionnaires used to document each element of her system of quality control. Sole Practitioner, CPA, communicates her policies and procedures to per-diem professionals when they are initially contracted for an engagement by holding a discussion with them and follows up on individual engagements. Sole Practitioner, CPA, requires per-diem personnel to be familiar with and to comply with these policies and procedures.

Leadership Responsibilities for Quality Within the Firm (the “Tone at the Top”)

4.05 The objective of the leadership responsibilities element of a system of quality control is to promote an internal culture based on the recognition that quality is essential in performing engagements. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.06–.08.

4.06 Policy 1: I am ultimately responsible for the firm’s system of quality control. Sole Practitioner, CPA, implements this policy through the following procedures:

- Accepting responsibility for the firm’s system of quality control
- Educating herself about requirements for a system of quality control
- Designing and implementing policies and procedures required for her firm’s system of quality control

4.07 Policy 2: Commercial considerations do not override the quality of the work performed. Sole Practitioner, CPA, implements this policy by continually evaluating client relationships and specific engagements so that commercial considerations do not override the objectives of the system of quality control.

AICPA Audit and Accounting Manual

AAM §10,200 4.07
4.08 Policy 3: I devote sufficient and appropriate resources for the development, communication, and support of the firm’s quality control policies and procedures. Sole Practitioner, CPA, implements this policy by reviewing and updating the quality control policies, procedures, and documentation on an annual basis.

Relevant Ethical Requirements

4.09 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.10–13.

4.10 Policy 1: I adhere to relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators. Sole Practitioner, CPA, implements this policy through the following procedures:

- Subscribing to the AICPA Professional Standards service.
- Consulting the AICPA Web site for information about changes in professional ethics and independence standards.
- Reviewing unpaid client fees to ascertain whether any outstanding amounts impair the firm’s independence.
- Reviewing relevant pronouncements published in the Journal of Accountancy relating to independence, integrity, and objectivity and retaining relevant issues of the Journal of Accountancy.
- Attending periodic professional training in ethics and independence.
- Complying with SSARSs by disclosing in the accountant’s compilation report instances in which the firm is not independent.
- Considering the significance of each client to the firm. In broad terms, the significance of a client to a firm refers to relationships that could diminish a practitioner’s objectivity and independence in performing attest services. In determining the significance of a client, the firm considers (a) the amount of time the partner devotes to the engagement and (b) the effect that losing the client would have on the firm.

4.11 Policy 2: I communicate independence requirements to per-diem professionals. Sole Practitioner, CPA, implements this policy by making per-diem personnel aware of financial, family, business, and other relationships that may be prohibited by applicable requirements.

4.12 Policy 3: I establish procedures to identify and evaluate possible threats to independence and objectivity and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards. I withdraw from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied. Sole Practitioner, CPA, implements this policy through the following procedures:

- Considering relevant information about client engagements, including the scope of services, to enable her to evaluate the overall impact on independence
- Consulting with AICPA Ethics Hotline with concerns about possible threats to independence
- Accumulating and communicating relevant information to per-diem personnel as appropriate so that the following can occur:
  - Sole Practitioner, CPA, and per-diem personnel can readily determine whether they satisfy independence requirements.
  - Sole Practitioner, CPA, can maintain and update information relating to independence.
  - Sole Practitioner, CPA, can take appropriate action regarding identified threats to independence.
• Requiring per-diem personnel to promptly notify her of independence breaches of which they become aware, and circumstances and relationships that create a threat to independence, so that appropriate action can be taken

• Documenting any safeguards applied to eliminate threats to independence or reduce them to an acceptable level

• Withdrawing from the engagement if effective safeguards to reduce threats to independence to an acceptable level cannot be applied

4.13 Policy 4: I confirm, in writing, my compliance with policies and procedures on independence and require written confirmation from all per-diem professionals required to be independent by relevant requirements. Sole Practitioner, CPA, implements this policy by signing a step on each engagement program attesting to her independence and requiring per-diem personnel to do the same.

Acceptance and Continuance of Client Relationships and Specific Engagements

4.14 The objective of the quality control element that addresses acceptance and continuance of client relationships and specific engagements is to establish criteria for deciding whether to accept or continue a client relationship and whether to perform a specific engagement for a client. A firm’s client acceptance and continuance policies represent a key element in mitigating litigation and business risk. Accordingly, it is important that a firm be aware that the integrity and reputation of a client’s management could reflect the reliability of the client’s accounting records and financial representations and, therefore, affect the firm’s reputation or involvement in litigation. A firm’s policies and procedures related to the acceptance and continuance of client relationships and specific engagements should provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where it

• has considered the integrity of the client, including the identity and business reputation of the client’s principal owners, key management, related parties and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;

• is competent to perform the engagement and has the capabilities and resources to do so;

• can comply with legal and ethical requirements; and

• has reached an understanding with the client regarding the services to be performed.

4.15 Sole Practitioner, CPA, satisfies this objective, both with respect to the initial period for which the firm is performing its service and for subsequent periods, by establishing and maintaining the policies and procedures described in paragraphs 4.16–.20.

4.16 Policy 1: I evaluate factors that have a bearing on management’s integrity and consider the risk associated with providing professional services in particular circumstances. Sole Practitioner, CPA, implements this policy through the following procedures:

• Obtaining information such as the following before accepting or continuing a client:
  — The nature and purpose of the services to be provided
  — The identity of the client’s principal owners, key management, related parties, and those charged with its governance
  — The nature of the client’s operations, including its business practices, from sources such as prior-year reports, internally generated financial statements (if applicable), income tax returns, and credit reports
  — Information concerning the attitude of the client’s principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting

• Inquiring of third parties such as bankers, factors, and legal counsel about management’s business reputation and integrity.
• Communicating with the predecessor accountant when required or suggested by professional standards.\(^1\)

• Evaluating the information obtained regarding management’s integrity.

• Evaluating the risk of providing review services to significant clients or to other clients for which Sole Practitioner’s, CPA, objectivity or the appearance of independence may be impaired. In determining the significance of a client, Sole Practitioner, CPA, considers the amount of time she devotes to the engagement and the effect that losing the client would have on her practice.

4.17 Policy 2: I evaluate whether the engagement can be completed with professional competence; undertake only those engagements for which the firm has the capabilities, resources, and professional competence to complete; and evaluate, at the end of specific periods or upon occurrence of certain events, whether the relationship should be continued. Sole Practitioner, CPA, implements this policy through the following procedures:

• Establishing a cut-off date by which evaluations of engagements should be performed, for example, before work on the current-year engagement begins

• Considering conditions, such as the following, that require reevaluation of a client or specific engagement and obtaining the relevant information to determine whether the relationship should be continued:
  — Significant changes in the client, for example, a major change in ownership, senior client personnel, directors, advisers, the nature of the business, or the financial stability of the client.
  — Changes in the nature or scope of the engagement, including requests for additional services.
  — Client significance.
  — Matters that would have caused the firm to reject the client or engagement had such conditions existed at the time of the initial acceptance. If such matters exist, Sole Practitioner, CPA, considers the professional and legal responsibilities that apply to the circumstances and the possibility of withdrawing from the engagement or both the engagement and the client relationship.
  — The client’s delinquency in paying fees. (This also may affect the firm’s independence.)

• Determining if she has, or can reasonably obtain, the knowledge and expertise to perform the engagement

• Evaluating the information obtained regarding the engagement, making the acceptance or continuance decision, and documenting her evaluation or conclusion in a memorandum or by signing off next to the relevant item in a practice aid

4.18 Policy 3: I obtain an understanding with the client regarding the services to be performed. Sole Practitioner, CPA, implements this policy through the following procedures:

• Adhering to all requirements set forth in professional standards regarding obtaining an understanding with the client

• Requiring that the understanding with the client be documented either through an engagement letter or in a memorandum

\(^1\) AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, Professional Standards, vol. 2), provides guidance on communications between a predecessor and successor accountant when the successor accountant decides to communicate with the predecessor accountant. It also requires a successor accountant who becomes aware of information that leads him or her to believe the financial statements reported on by the predecessor accountant may require revision to request that the client communicate this information to the predecessor accountant.
4.19 Policy 4: I follow established procedures on withdrawal from an engagement or from both the engagement and the client relationship. Sole Practitioner, CPA, implements this policy by discussing the issues and her conclusion with the appropriate level of the client’s management and those charged with its governance. If she considers it necessary, she also discusses her decision with her attorney.

4.20 Policy 5: I document how issues relating to acceptance or continuance of client relationships and specific engagements were resolved. Sole Practitioner, CPA, implements this policy by documenting, in a memorandum to the engagement files, significant issues, consultations, conclusions, and the basis for the conclusions relating to acceptance or continuance of client relationships and specific engagements.

Human Resources

4.21 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (a) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (b) to enable the firm to issue reports that are appropriate in the circumstances. Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.22–23.

4.22 Policy 1: I hire per-diem personnel of integrity who possess the characteristics that enable them to perform competently. Sole Practitioner, CPA, implements this policy by setting criteria, regarding such factors as education, certification or licensure, and experience, that per-diem personnel must meet to be hired.

4.23 Policy 2: I maintain the knowledge, skills, and abilities required in the circumstances by participating in general and industry-specific continuing professional education (CPE) and professional development activities that enable me to accomplish my responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state boards of accountancy, and other applicable regulators. I also monitor the compliance of per-diem employees with CPE requirements. Sole Practitioner, CPA, implements this policy through the following procedures:

- Maintaining the competencies necessary to accomplish responsibilities related to each of the firm’s engagements
- Establishing a professional development program that takes into account the requirements of the AICPA and state boards of accountancy
- Participating in external professional development programs, including graduate-level and self-study courses
- Joining and becoming an active member of professional organizations
- Serving on professional committees, writing for professional publications on topics she is knowledgeable about, and participating in other professional activities
- Considering changes in the applicable professional standards when determining her professional development program
- Setting criteria that per-diem personnel must meet to competently perform engagements, such as the following examples:
  - Determining that per-diem personnel are in compliance with the applicable professional education requirements of the AICPA, state boards of accountancy, and state CPA societies
  - Obtaining and retaining documentation of such compliance
- Evaluating the knowledge and expertise required to perform an engagement prior to accepting the client or engagement
- Reading professional publications, such as state society journals, to keep abreast of changes in accounting standards and any industry-specific pronouncements that affect the client
- Consulting the AICPA Web site for information about changes in professional standards
Engagement Performance

4.24 The objective of the engagement performance element of quality control is to provide the firm with reasonable assurance (a) that engagements are consistently performed in accordance with applicable professional standards and regulatory and legal requirements and (b) that the firm or the practitioner-in-charge issues reports that are appropriate in the circumstances. Policies and procedures for engagement performance should address all phases of the design and execution of the engagement, including engagement performance, supervision responsibilities, and review responsibilities. Policies and procedures also should require that consultation takes place when appropriate. In addition, a policy should establish criteria against which all engagements are to be evaluated to determine whether an engagement quality control review should be performed. Sole Practitioner, CPA, satisfies these objectives by establishing and maintaining the policies and procedures described in paragraphs 4.25–32.

4.25 Policy 1: I plan engagements to meet professional standards, regulatory requirements, and the firm’s requirements. Sole Practitioner, CPA, implements this policy by adhering to professional standards regarding the planning process and the extent of documentation of the planning, if applicable. Engagement planning considerations may include the following:

- Developing or updating client information.
- Assessing the significance of the client to her firm.
- Obtaining an engagement letter for engagements performed under SSARSs. AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2), requires the accountant to either issue a compilation report or document an understanding with the entity through the use of an engagement letter when the accountant submits financial statements to a client that are not expected to be used by a third party.
- Reviewing prior financial statements and accountants’ reports.
- Using work programs and applicable reporting and disclosure checklists.

4.26 Policy 2: I perform, supervise, review, document, and report (or communicate) in accordance with the requirements of professional standards. Sole Practitioner, CPA, implements this policy through the following procedures:

- Requiring the use of appropriate practice aids in all engagements
- Maintaining the availability of current practice aids and AICPA professional standards
- Briefing per-diem personnel on the engagement so that they understand the objectives of their work
- Documenting the work performed in accordance with professional standards and the firm’s policy
- Supervising per-diem personnel as appropriate based on the following:
  - Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation
  - Understanding of professional standards and regulatory and legal requirements
  - Technical knowledge, including knowledge of relevant information technology
  - Knowledge of relevant industries in which the client operates
  - Ability to apply professional judgment
  - Understanding of the firm’s quality control policies and procedures
  - Experience level
- Reviewing and initialing all engagement documentation prepared by per-diem personnel
4.27 Policy 3: I complete the assembly of final engagement files on a timely basis. Sole Practitioner, CPA, implements this policy by completing the assembly of final engagement files on a timely basis in accordance with professional standards and applicable regulatory requirements, if any.

4.28 Policy 4: I maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation. Sole Practitioner, CPA, implements this policy through the following procedures:

- Establishing and applying controls to do the following:
  - Clearly determine when and by whom engagement documentation was prepared and reviewed.
  - Protect the integrity of the information at all stages of the engagement.
  - Prevent unauthorized changes to the engagement documentation.
  - Allow access to the engagement documentation by per-diem personnel and other authorized parties as necessary to properly discharge their responsibilities.
- Tracking the distribution of engagement documentation materials to the per-diem personnel at the start of the engagement, preparing engagement documentation during the engagement, and assembling final documentation at the end of the engagement
- Restricting access to, and enabling proper distribution and confidential storage of, hardcopy engagement documentation
- Using passwords or data encryption, or both, to restrict access to electronic engagement documentation to authorized users
- Using appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement
- Implementing procedures regarding original paper documents that have been electronically scanned or otherwise copied to another media that accomplish the following:
  - Generate copies that contain the entire content of the original paper documentation, including manual signatures, cross-references, and annotations.
  - Integrate the copies into the engagement files, including indexing and signing off on the copies as necessary.
  - Enable the copies to be retrieved and printed as necessary.

4.29 Policy 5: I retain engagement documentation for a period of time sufficient to meet the needs of the firm, professional standards, laws, and regulations. Sole Practitioner, CPA, implements this policy through the following procedures:

- Retaining engagement documentation for a period of time sufficient to meet the requirements of the state board of accountancy and applicable professional standards
- Enabling the retrieval of, and access to, the engagement documentation during the retention period, particularly in the case of electronic documentation because the underlying technology may be upgraded or changed over time
- Providing, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed
- Enabling authorized external parties to access and review specific engagement documentation for quality control or other purposes

4.30 Policy 6: I require that consultation take place when appropriate; I make sufficient and appropriate resources available to enable appropriate consultation to take place; I provide to those consulted all the relevant facts known to me; I document the nature, scope, and conclusions of such consultations; and I implement conclusions resulting from such consultations. Sole Practitioner, CPA, implements this policy through the following procedures:
• Maintaining current technical references to assist in resolving practice problems
• Referring to the AICPA’s Technical Hotline or other qualified individuals if a practice problem arises for which the firm needs additional expertise
• Requiring that documentation of consultation include the following:
  — All relevant facts and circumstances about the issue on which consultation was sought.
  — References to professional literature used in the analysis of the matter.
  — The results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented. This documentation is retained with the engagement documentation.

4.31 Policy 7: I deal with and resolve differences of opinion; I document and implement the conclusions reached; and I do not release the report until the matter is resolved. Sole Practitioner, CPA, implements this policy by (a) evaluating issues of professional judgment when differences of opinion arise with per-diem personnel, with those consulted, or with an external reviewer and (b) resolving the matter before releasing the report. If persons involved in the engagement continue to disagree with the resolution, they may disassociate themselves from the resolution of the matter and document that a disagreement continues to exist.

4.32 Policy 8: I have criteria for determining whether an engagement quality control review should be performed; I evaluate all engagements against the criteria before I accept the engagement; I contract with a qualified external person to perform the engagement quality control review; and I do not release the report until the review is completed. Sole Practitioner, CPA, implements this policy through the following procedures:
• Establishing the following criteria for determining whether an engagement quality control review should be performed:
  — The engagement is subject to Statements on Auditing Standards or Statements on Standards for Attestation Engagements.
  — An initial engagement for a client is in a specialized industry in which Sole Practitioner, CPA, has had no previous experience.
  — An engagement quality control review is required by law or regulation.
• Evaluating all engagements against the criteria
• Contracting with a qualified external person to perform the engagement quality control review
• Not releasing the report until the review is completed

Monitoring

4.33 The objective of the monitoring element of a system of quality control is to provide the firm with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm’s quality control system, and a firm’s compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:
• Adherence to professional standards and regulatory and legal requirements
• Whether the quality control system has been appropriately designed and effectively implemented
• Whether the firm’s quality control policies and procedures have been operating effectively so that reports that are issued by the firm are appropriate in the circumstances

4.34 Sole Practitioner, CPA, satisfies this objective by establishing and maintaining the policies and procedures described in paragraphs 4.35–39.
4.35 Policy 1: I perform monitoring procedures that are sufficiently comprehensive to enable me to assess compliance with all applicable professional standards and the firm’s quality control policies and procedures. Sole Practitioner, CPA, implements this policy through the following procedures:

- Performing a postissuance review of selected engagements at least annually\(^2\)
- Summarizing the findings from the firm’s monitoring procedures at least annually and considering the systemic causes of findings that indicate improvements are needed
- Determining any corrective actions or improvements to be made with respect to the specific engagements reviewed or the firm’s quality control policies and procedures and taking those actions, including necessary modifications to the quality control system, on a timely basis
- Reviewing compliance with the firm’s policies and procedures related to relevant ethical responsibilities, including independence, human resources, acceptance, and continuance of client relationships and specific engagements, and engagement performance
- Reviewing all policies and procedures and revising those affected by changes in professional standards or the nature of her practice
- Reviewing and determining that the firm’s practice aids are current and reflect recent professional pronouncements and changes in her practice
- Reviewing CPE records to determine whether the classroom training and self-study programs she uses are appropriate for the firm’s practice
- Reviewing CPE records to determine compliance with the requirements of the AICPA and other applicable regulatory agencies

4.36 Policy 2: I deal appropriately with complaints and allegations. Sole Practitioner, CPA, implements this policy through the following procedures:

- Investigating the following:
  - Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
  - Allegations of noncompliance with the firm’s system of quality control
  - Deficiencies in the design or operation of the firm’s quality control policies and procedures, or noncompliance with the firm’s system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations
- Documenting complaints and allegations and the responses to them

4.37 Policy 3: I prepare appropriate documentation to provide evidence of the operation of each element of the firm’s system of quality control. Sole Practitioner, CPA, implements this policy by documenting evidence of the operation of each element of the firm’s system of quality control by preparing a memorandum of the following:

- Monitoring procedures, including the procedure for selecting completed engagements to be subject to postissuance review
- A record of the evaluation of the following:
  - Adherence to professional standards and regulatory and legal requirements
  - Whether the quality control system has been appropriately designed and effectively implemented

\(^2\) A postissuance review may be performed as part of an inspection. A sole proprietor may consider engaging another CPA to perform the inspection to obtain a fresh look at the engagement. See paragraph 3.32, “Scenario 2: Monitoring by Inspecting a Sample of Engagements During a Designated Period of the Year,” for a description of how a firm considers and evaluates, on an ongoing basis, compliance with a firm’s policies and procedures by performing an annual inspection. Note that a preissuance review by the sole proprietor does not satisfy the monitoring requirements.
Whether the firm’s quality control policies and procedures have been appropriately applied so that reports that are issued by the firm are appropriate in the circumstances

- Identification of the deficiencies noted, an evaluation of their effects, and the basis for determining whether further action is necessary and what that action should be

4.38 Although the form and content of that documentation is a matter of judgment, the illustration in table 1 in this chapter is an example of such documentation.

4.39 Policy 4: I retain documentation of evidence of the operation of the system of quality control for an appropriate period of time. Sole Practitioner, CPA, implements this policy by requiring retention of the summary report for a period of time sufficient to meet the firm’s peer review or other regulatory requirements.

Chapter 5:
System of Quality Control for an Alternative Practice Structure

5.01 An alternative practice structure, as referred to in this practice aid, is a nontraditional structure in the practice of public accounting that contains an attest and a nonattest portion. The attest portion is conducted through a firm owned and controlled by CPAs (a closely aligned CPA firm). The nonattest portion is conducted through a separate issuer or nonissuer firm owned and controlled by individuals who are not CPAs (a non-CPA-owned entity\(^1\)). The non-CPA-owned entity may be an issuer or a nonissuer. Alternative practice structures are described in Interpretation 101-14, “The effect of alternative practice structures on the applicability of independence rules,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .16), which is included as appendix B of this practice aid.

5.02 The quality control policies and procedures established by a closely aligned CPA firm that may or may not perform audit services are illustrated in chapters 2–3, as applicable. Additional quality control policies and procedures relevant to alternative practice structures may be necessary when certain portions of the CPA firm’s system of quality control (a) reside at the non-CPA-owned entity or (b) operate in conjunction with the system of quality control of the non-CPA-owned entity.

5.03 Elements of quality control that might reside in a non-CPA-owned entity include the following:
- Relevant ethical requirements
- Human resources
- Monitoring of relevant ethical requirements and human resources

For example, the non-CPA-owned entity may be responsible for hiring personnel for both firms.

5.04 This chapter describes how Non-CPA-Owned Entity and Closely Aligned CPA Firm, hypothetical firms that are organized in an alternative practice structure, implement incremental quality control policies and procedures to address the previously mentioned elements of quality control that reside at Non-CPA-Owned Entity. Closely Aligned CPA Firm has no issuer clients\(^2\) and implements the policies and procedures described in chapter 2 of this practice aid.

Quality Control Policies and Procedures

5.05 Policy 1: The top-tier company\(^3\) maintains a system of quality control. Non-CPA-Owned Entity implements this policy through the following procedures:
- Designating a qualified individual to be responsible for the following:
  - Designing and directing the quality control activities at the top-tier company
  - Disseminating information to all subsidiaries and affiliated entities, all subsidiaries associated with CPA firms, and all CPA firms closely aligned with company subsidiaries
- Providing all company personnel and indirect superiors\(^4\) with access to the company’s quality control policies and procedures

---

\(^1\) A non-CPA-owned entity is an entity that is closely aligned to a CPA firm through common employment; leasing of employees, equipment, or facilities; or other similar arrangements. In addition to one or more professional service subsidiaries or divisions that offer nonattest professional services (for example, tax, personal financial planning, and management consulting), a non-CPA-owned entity may have subsidiaries or divisions such as a bank, insurance company, or broker-dealer.

\(^2\) If the closely aligned CPA firm were to be engaged to perform audit services for an issuer, the non-CPA-owned entity or its affiliated companies might need to revise their quality control policies and procedures to comply with Public Company Accounting Oversight Board (PCAOB) standards and to reflect Securities and Exchange Commission (SEC) requirements applicable to audits of issuers.

\(^3\) The top-tier company is the parent company of the non-CPA-owned entity, which may be an issuer.

\(^4\) Indirect superiors may be involved in regional management of direct superiors; thus, they may need to adhere to requirements.
Relevant Ethical Requirements

5.06 The objective of the relevant ethical requirements element of a system of quality control is to provide the firm with reasonable assurance that the firm and its personnel comply with relevant ethical requirements when discharging professional responsibilities. Relevant ethical requirements include independence, integrity, and objectivity. Closely Aligned CPA Firm satisfies this objective by ensuring that Non-CPA-Owned Entity establishes and maintains the policies and procedures described in paragraphs 5.07–.09.

5.07 Policy 1: Non-CPA-Owned Entity adheres to applicable relevant ethical requirements such as those in regulations, interpretations, and rules of the AICPA, state CPA societies, state boards of accountancy, state statutes, the GAO, and any other applicable regulators. Non-CPA-Owned Entity implements this policy through the following procedures:

- Developing policies and procedures to ensure the independence of Closely Aligned CPA Firm as required by the applicable aforementioned regulators. (Non-CPA-Owned Entity is required to be independent only in the context of its alignment with the CPA firm; it does not perform any attest functions, so its independence is not relevant.)
- Designating an officer to be responsible for providing guidance, answering questions, monitoring compliance, and resolving matters concerning independence, integrity, and objectivity of Closely Aligned CPA Firm.
- Determining when consultation with outside sources regarding independence, integrity, and objectivity matters is required.
- Reviewing written representations from direct superiors and indirect superiors and others as applicable and resolving potential independence, integrity, and objectivity matters.
- Maintaining documentation of the resolution of independence, integrity, and objectivity matters.
- Requiring entity personnel to obtain sufficient training and education to accomplish their responsibilities with respect to independence, integrity, and objectivity.
- Obtaining from Closely Aligned CPA Firm a current list of all entities with which firm personnel are prohibited from having a financial or business relationship.
- Obtaining written representations from personnel of Non-CPA-Owned Entity, upon hire and on an annual basis, stating that they are familiar with and in compliance with Non-CPA-Owned Entity’s policies and procedures regarding independence, integrity, and objectivity.

5.08 Policy 2: Personnel of Non-CPA-Owned Entity are familiar with policies and procedures regarding relevant ethical requirements. Non-CPA-Owned Entity implements this policy through the following procedures:

- Providing all of its personnel with access to its policies and procedures and guidance materials related to independence, integrity, and objectivity, such as manuals, memoranda, and databases containing professional and regulatory literature
- Advising personnel of Non-CPA-Owned Entity of the financial or other relationships, circumstances, or activities involving either individuals or entities that may be prohibited, as in the following examples:

---

5 Direct superiors are defined to include those persons so closely associated with a partner or manager who is a covered member that such persons can directly control the activities of such partner or manager. For this purpose, a person who can directly control is the immediate superior of the partner or manager who has the power to direct the activities of that person so as to be able to directly or indirectly (for example, through another entity over which the direct superior can exercise significant influence) derive a benefit from that person’s activities. Examples would be the person who has day-to-day responsibility for the activities of the partner or manager and is in a position to recommend promotions and compensation levels. Indirect superiors are those persons who are one or more levels above direct superiors. Generally, this would start with persons in an organization structure to whom direct superiors report and go up the line from there.

6 Examples of business relationships prohibited by independence standard-setting bodies such as the AICPA, the Government Accountability Office, and the U.S. Department of Labor because they might impair independence include being an investor in a joint venture with a client that is material or serving as a board member on the board of an audit client.
— Business relationships with Closely Aligned CPA Firm’s clients or with nonclients that have investor or investee relationships with Closely Aligned CPA Firm’s clients
— Loans to and from Closely Aligned CPA Firm’s clients, including loans from Closely Aligned CPA Firm’s financial institution clients
— Family members who are employed by Closely Aligned CPA Firm’s clients or who serve as director, officer, manager, or in other audit-sensitive positions with clients of Closely Aligned CPA Firm, including not-for-profit organizations
— Past due fees from Closely Aligned CPA Firm’s clients
— Services in which the service provider assumes some of the responsibilities of client management
— Performing certain bookkeeping services for governmental entities that are clients of Closely Aligned CPA Firm
— Client relationships with Non-CPA-Owned Entity in which Closely Aligned CPA Firm leases employees, facilities, and so on
— Situations in which personnel of Non-CPA-Owned Entity act as promoters, underwriters, voting trustees, directors, or officers of Closely Aligned CPA Firm’s clients
— Direct and material indirect financial interests in clients of Closely Aligned CPA Firm
— Material investments by Closely Aligned CPA Firm’s clients in Non-CPA-Owned Entity that allow the clients to exercise significant influence over Non-CPA-Owned Entity

• Advising personnel of Non-CPA-Owned Entity of the following:
  — All direct superiors with whom, and all activities in which, Non-CPA-Owned Entity is prohibited from engaging, as defined in Non-CPA-Owned Entity’s independence policies and procedures
  — All indirect superiors with whom, and all activities in which, Non-CPA-Owned Entity is prohibited from engaging, as defined by Non-CPA-Owned Entity’s policies and procedures

• Obtaining client lists from Closely Aligned CPA Firm to inform all personnel, on a timely basis, of Closely Aligned CPA Firm client’s to which independence policies apply

• Obtaining documented representations from all Non-CPA-Owned Entity personnel (including those defined as direct and indirect superiors or supervisors of affiliated issuers),7 on an annual basis thereafter, stating that they are familiar with and in compliance with policies and procedures regarding relevant ethical requirements

5.09 Policy 3: Non-CPA-Owned Entity identifies and evaluates possible threats to independence and objectivity and takes appropriate action to eliminate those threats or reduce them to an appropriate level by applying safeguards. Non-CPA-Owned Entity implements this policy through the following procedures:

• Assigning responsibility for obtaining, maintaining, and reviewing documented representations from all Non-CPA-Owned Entity personnel (see paragraph 5.08) for completeness and resolving reported exceptions with Non-CPA-Owned Entity’s chief executive

• Requiring the chief executive of Non-CPA-Owned Entity to review or to designate an appropriate individual to review unpaid fees from clients of Closely Aligned CPA Firm to ascertain whether any outstanding amounts impair Closely Aligned CPA Firm’s independence

• Requiring all professionals to report, on a timely basis when identified, circumstances and relationships that form a threat to independence so that appropriate action can be taken

7 Affiliated issuers include the top-tier company and all entities consolidated in the top-tier company’s financial statements. Individuals in these entities are not in situations in which a direct superior can exercise significant influence.
- Requiring all professionals to report, on a timely basis when identified, apparent violations of independence, integrity, or objectivity policies involving themselves, their spouses, or their dependents and the corrective actions taken or proposed to be taken

Human Resources

5.10 The objective of the human resources element of a system of quality control is to provide the firm with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary (a) to perform its engagements in accordance with professional standards and regulatory and legal requirements and (b) to enable the firm to issue reports that are appropriate in the circumstances. Closely Aligned CPA Firm satisfies this objective by ensuring that Non-CPA-Owned Entity establishes and maintains the policies and procedures comparable to those that are described in paragraphs 5.11–.13 with regard to its leased or per-diem personnel.

5.11 Policy 1: Leased or per-diem personnel possess characteristics that enable them to competently perform and review engagements. Non-CPA-Owned Entity implements this policy by having knowledge and experience equivalent to that of Closely Aligned CPA Firm to make the following decisions:

- Designating an individual from Closely Aligned CPA Firm to be responsible for hiring and managing human resources within Non-CPA-Owned Entity on behalf of Closely Aligned CPA Firm.
- Reviewing Closely Aligned CPA Firm’s personnel requirements for attest engagements to ensure that sufficient and capable staff persons are available to perform those engagements.
- Involving members of Closely Aligned CPA Firm in the process of hiring professionals on behalf of Closely Aligned CPA Firm that include establishing the attributes, achievements, and experiences desired in entry-level and experienced personnel. Such criteria assist in evaluating (a) the personal characteristics of professionals, such as integrity, competence, and motivation, and (b) whether professionals can competently perform responsibilities within Closely Aligned CPA Firm.
- Establishing guidelines for additional procedures to be performed when hiring experienced personnel, such as performing background checks and inquiring about any outstanding regulatory actions.
- Establishing criteria for determining which individuals will be involved in interviewing and hiring personnel on behalf of Closely Aligned CPA Firm.

5.12 Policy 2: Leased or per-diem personnel participate in general and industry-specific continuing professional education (CPE) and other professional activities that enable them to accomplish assigned responsibilities and satisfy applicable CPE requirements of the AICPA, state CPA societies, state accountancy boards, and other regulatory agencies. Non-CPA-Owned Entity implements this policy through the following procedures:

- Designating an individual to be responsible for CPE and professional development activities, including maintaining appropriate documentation evidencing that leased and per-diem personnel have met the professional education requirements of the AICPA, state boards of accountancy, and other applicable regulators
- Establishing policies that require individuals performing audits, reviews, compilations, or attestation engagements for Closely Aligned CPA Firm to participate in CPE related to accounting and auditing
- Establishing policies requiring all leased or per-diem personnel to be in compliance with the professional education requirements of the boards of accountancy in states where they are licensed and with the AICPA, state societies, and other regulatory agencies, as applicable
- Establishing an orientation and training policy for new hires who will perform audits, reviews, compilations, or attestation engagements for Closely Aligned CPA Firm or who will have partner- or manager-level responsibility for the overall supervision or review of such engagements
• Ensuring that leased or per-diem personnel are informed about changes in accounting and auditing standards, independence, integrity, and objectivity requirements, and Closely Aligned CPA Firm’s technical policies and procedures that are relevant to them

• Encouraging leased or per-diem personnel to participate in other professional activities, such as graduate-level courses, membership in professional organizations, and serving on professional committees

5.13 Policy 3: Leased or per-diem personnel who are selected for advancement have the qualifications to accomplish the responsibilities they will be called upon to assume. Factors to consider include the degree of technical training and proficiency required in the circumstances and the nature and extent of supervision of assignments relating to audits, reviews, compilations, or attestation engagements performed by Closely Aligned CPA Firm. Non-CPA-Owned Entity implements this policy through the following procedures:

• Establishing a system for providing information to Closely Aligned CPA Firm so that it can make appropriate personnel decisions, such as assignments for audits, reviews, compilations, and attestation engagements.

• Designating an individual to be responsible for the following:
  — Establishing criteria for the evaluation and advancement of leased or per-diem personnel, including appropriate documentation
  — Making advancement and termination decisions, including identifying responsibilities and requirements for evaluation, at each professional level and deciding who will prepare those evaluations
  — Developing appropriate evaluation forms
  — Reviewing performance evaluations with personnel, discussing future objectives of Closely Aligned CPA Firm and the individual, and discussing assignment preferences
  — Periodically evaluating owners of Closely Aligned CPA Firm by means of peer evaluation or self-appraisal
  — Counseling leased or per-diem personnel regarding their progress and career opportunities

• Establishing an arrangement with Closely Aligned CPA Firm in which a supervisory-level individual of Closely Aligned CPA Firm is responsible for assisting Non-CPA-Owned Entity in making advancement and termination decisions concerning leased or per-diem personnel. This would include evaluating personnel needs, establishing hiring objectives, and providing final approval.

• Developing a system for evaluating the performance of leased or per-diem personnel and advising them of their progress.

Monitoring

5.14 The objective of the monitoring element of a system of quality control is to provide the firm and its engagement partners with reasonable assurance that the policies and procedures related to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Monitoring involves an ongoing consideration and evaluation of the appropriateness of the design, the effectiveness of the operation of a firm’s quality control system, and a firm’s compliance with its quality control policies and procedures. The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of the following:

• Adherence to professional standards and regulatory and legal requirements
• Whether the quality control system has been appropriately designed and effectively implemented
• Whether the firm’s quality control policies and procedures have been operating effectively so that reports that are issued by the CPA firm are appropriate in the circumstances
5.15 A CPA firm that is closely aligned with a non-CPA-owned entity satisfies this objective by ensuring that the non-CPA-owned entity establishes and maintains the policies and procedures described in paragraphs 5.16–19.

5.16 Policy 1: Non-CPA-Owned Entity considers and evaluates, on an ongoing basis, the relevance and adequacy of its policies and procedures related to relevant ethical requirements that are applicable to all its personnel and its personnel management policies and procedures that are applicable to leased or per-diem personnel. Non-CPA-Owned Entity implements this policy by designating qualified individuals to be responsible for monitoring quality assurance, including ensuring that Non-CPA-Owned Entity’s quality control guidance is regularly updated to reflect changes in professional standards related to independence, CPE, and other regulatory requirements through the following procedures:

- Implementing a system of ongoing monitoring of the effectiveness and appropriateness of policies and procedures related to independence, objectivity, and integrity as applicable to all personnel of Non-CPA-Owned Entity and compliance with those policies and procedures
- Ensuring, on an ongoing basis, that guidance materials and any practice aids Non-CPA-Owned Entity provides to Closely Aligned CPA Firm are appropriately designed to assist Closely Aligned CPA Firm in adhering to quality control standards
- Maintaining a system to ensure that the practice aids regarding independence and other technical matters provided by Non-CPA-Owned Entity are updated to reflect current professional standards and regulatory requirements and are relevant to and effective for Closely Aligned CPA Firm’s practice
- Ensuring that Non-CPA-Owned Entity informs and provides guidance to leased or per-diem personnel regarding new professional standards, regulatory requirements, and related changes to relevant Closely Aligned CPA Firm policies or practice aids

5.17 Policy 2: Non-CPA-Owned Entity considers and evaluates, on an ongoing basis, compliance with its policies and procedures related to relevant ethical requirements that are applicable to all of its personnel and personnel management policies and procedures that are applicable to leased or per-diem personnel. Non-CPA-Owned Entity implements this policy by considering and evaluating, on an ongoing basis, compliance with policies and procedures related to independence, integrity, and objectivity, as applicable to all of its personnel, through the following procedures:

- Performing timely monitoring of policies and procedures, on an ongoing basis, related to independence, integrity, and objectivity to evaluate compliance with those policies and procedures. The monitoring policies and procedures could include an internal audit function, ongoing review by senior management, or engaging an independent CPA to examine and report on compliance.
- Summarizing and communicating the results of the monitoring to all of its personnel and communicating any suggested changes to policies and procedures to the appropriate levels of personnel in Non-CPA-Owned Entity.
- Correcting noted deficiencies based on the results of the monitoring to ensure compliance with policies and procedures.

5.18 Policy 3: Non-CPA-Owned Entity deals appropriately with complaints and allegations. Non-CPA-Owned Entity implements this policy through the following procedures:

- Performing timely monitoring of policies and procedures, on an ongoing basis, related to independence, integrity, and objectivity to evaluate compliance with those policies and procedures. The monitoring policies and procedures could include an internal audit function, ongoing review by senior management, or engaging an independent CPA to examine and report on compliance.
- Having the firm’s ethics committee (excluding any members who are otherwise involved in the engagement under investigation) investigate the following:
— Complaints and allegations that the work performed by the firm fails to comply with professional standards and regulatory and legal requirements
— Allegations of noncompliance with the firm’s system of quality control
— Deficiencies in the design or operation of the firm’s quality control policies and procedures, or noncompliance with the firm’s system of quality control by an individual or individuals, as identified during the investigations into complaints and allegations

• Documenting complaints and allegations and the responses to them.

5.19 Policy 4: Non-CPA-Owned Entity prepares appropriate documentation to provide evidence of the operation of each element of its system of quality control. Non-CPA-Owned Entity implements this policy by preparing and retaining documentation that provides evidence of the operation of the system of quality control for a period of time sufficient to permit those performing monitoring procedures to evaluate the firm’s compliance with its system of quality control.
Appendix A:

Statement on Quality Control Standards (SQCS) No. 7,
A Firm’s System of Quality Control

Supersedes SQCSs Nos. 2–6. SQCS No. 1 was previously superseded by SQCS No. 2.

Source: SQCS No. 7.

Effective date: Applicable to a CPA firm’s system of quality control for its accounting and auditing practice as of January 1, 2009.

Introduction

.01 The purpose of this section is to establish standards and provide guidance for a CPA firm’s responsibilities for its system of quality control for its accounting and auditing practice. This section describes elements of quality control and other matters essential to the effective design, implementation, and maintenance of the system. This section is to be read in conjunction with the AICPA Code of Professional Conduct.

.02 This section also sets forth the meaning of certain terms used in SQCSs issued by the Auditing Standards Board in describing the professional requirements imposed on firms and engagement partners.

System of Quality Control

.03 The firm must establish a system of quality control designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable regulatory and legal requirements, and that the firm or engagement partners issue reports that are appropriate in the circumstances. A system of quality control consists of policies designed to achieve these objectives and the procedures necessary to implement and monitor compliance with those policies.

.04 The nature of the policies and procedures developed by individual firms to comply with this section will depend on various factors such as the size and operating characteristics of the firm. The system of quality control should be designed to provide the firm with reasonable assurance that the segments of the firm’s engagements performed by its foreign member firms or offices or by its domestic or foreign affiliates,
if any, are performed in accordance with professional standards in the United States when such standards are applicable.

Definitions

.05 In this section, the following terms have the meanings given:

a. **Accounting and auditing practice.** A practice that performs engagements covered by this section, which are audit, attestation, compilation, review and any other services for which standards have been established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct (ET sections 201–202). Although standards for other engagements may be established by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an accounting and auditing practice.

b. **Engagement documentation.** The record of work performed, results obtained, and conclusions the practitioner reached, also known as working papers or workpapers.

c. **Engagement partner.** An individual responsible for supervising engagements covered by this section and signing or authorizing an individual to sign the report on such engagements, and who, where required, has the appropriate authority from a professional, legal or regulatory body. Firms may use different titles to refer to individuals with this authority.

d. **Engagement quality control review.** A process designed to provide an objective evaluation, by an individual or individuals who are not members of the engagement team, of the significant judgments the engagement team made and the conclusions they reached in formulating the report.

e. **Engagement quality control reviewer.** A partner, other person in the firm, qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to perform the engagement quality control review.

f. **Engagement team.** All personnel performing the engagement, excluding those who perform the engagement quality control review. The engagement team (i) includes all employees and contractors retained by the firm who perform engagement procedures, irrespective of their functional classification (for example, audit, tax, or management consulting services) and (ii) excludes specialists as discussed in AU section 336, *Using the Work of a Specialist*, and individuals who perform only routine clerical functions, such as word processing and photocopying.

g. **Firm.** A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the American Institute of Certified Public Accountants that is engaged in the practice of public accounting.

h. **Inspection.** A retrospective evaluation of the adequacy of the firm’s quality control policies and procedures, its personnel’s understanding of those policies and procedures and the extent of the firm’s compliance with them. Inspection is an element of monitoring.

i. **Monitoring.** A process comprising an ongoing consideration and evaluation of the firm’s system of quality control, the objective of which is to enable the firm to obtain reasonable assurance that its system of quality control is designed appropriately and operating effectively.

j. **Partner.** An individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, partner may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

k. **Personnel.** All individuals who perform professional services for which the firm is responsible, whether or not they are CPAs.
Professional standards. Standards established by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rules 201 or 202 of the AICPA Code of Professional Conduct or other standard setting bodies that set auditing and attest standards applicable to the engagement being performed.

Qualified external person. An individual outside the firm with the capabilities and competence to act as an engagement partner.

Reasonable assurance. In the context of this standard, a high, but not absolute, level of assurance.

Relevant ethical requirements. Ethical requirements to which the firm and its personnel are subject, which consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies, which may be more restrictive.

Staff. Personnel, other than partners and engagement partners, including any specialists who are employees of the firm.

Professional Requirements

SQCSs contain professional requirements together with related guidance in the form of explanatory material. Firms have a responsibility to consider the entire text of an SQCS with regard to their system of quality control and in understanding and applying the professional requirements of the relevant SQCSs.

Not every paragraph of an SQCS carries a professional requirement that the firm is expected to fulfill. Rather, the professional requirements are communicated by the language and the meaning of the words used in the SQCSs.

SQCSs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on firms, as follows:

- Unconditional requirements. The firm is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SQCSs use the words must or is required to indicate an unconditional requirement.

- Presumptively mandatory requirements. The firm is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the firm may depart from a presumptively mandatory requirement provided the practitioner documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SQCSs use the word should to indicate a presumptively mandatory requirement.

If an SQCS provides that a procedure or action is one that the firm “should consider,” the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of an SQCS are to be understood and applied in the context of the explanatory material that provides guidance for their application.

Explanatory Material

Explanatory material is defined as the text within an SQCS (excluding any related interpretations) that may:

- Provide further explanation and guidance on the professional requirements; or
- Identify and describe other procedures or actions relating to the activities of the firm.

---

1 Interpretive publications differ from explanatory material. Interpretive publications, for example, interpretations of the SQCSs, reside outside of the standards section of an SQCS and are recommendations on the application of the SQCS in specific circumstances. In contrast, explanatory material is always contained within the standards sections of the SQCS and is meant to be more descriptive in nature.
Explanatory material that provides further explanation and guidance on the professional requirements is intended to be descriptive rather than imperative. That is, it explains the objective of the professional requirements (where not otherwise self-evident); it explains why the firm might consider or employ particular procedures, depending on the circumstances; and it provides additional information for the firm to consider in exercising professional judgment with regard to its system of quality control.

Explanatory material that identifies and describes other procedures or actions relating to the activities of the firm is not intended to impose a professional requirement for the firm to perform the suggested procedures or actions. Rather, these procedures or actions require the firm’s attention and understanding; how and whether the firm carries out such procedures or actions with regard to its system of quality control depends on the exercise of professional judgment in the circumstances consistent with the objective of the standard. The words may, might, and could are used to describe these actions and procedures.

Documentation and Communication of Quality Control Policies and Procedures

The firm should document its quality control policies and procedures. The size, structure, and nature of the practice of the firm are important considerations in determining the extent of the documentation of established quality control policies and procedures. For example, documentation of established quality control policies and procedures would generally be expected to be more extensive in a large firm than in a small firm and in a multi-office firm than in a single-office firm.

The firm should communicate its quality control policies and procedures to its personnel. Although communication is enhanced if it is in writing, the communication of quality control policies and procedures is not required to be in writing. Effective communication of the firm’s quality control policies and procedures:

- Describes the quality control policies and procedures and the objectives they are designed to achieve;
- Includes the message that each individual has a personal responsibility for quality and is expected to be familiar with and to comply with these policies and procedures; and
- Stresses the importance of obtaining feedback on its system of quality control from its personnel and encourages its personnel to communicate their views or concerns on quality control matters.

Elements of a System of Quality Control

The firm’s system of quality control should include policies and procedures addressing each of the following elements:

a. Leadership responsibilities for quality within the firm (the "tone at the top")
b. Relevant ethical requirements
c. Acceptance and continuance of client relationships and specific engagements
d. Human resources
e. Engagement performance
f. Monitoring

Leadership Responsibilities for Quality Within the Firm (the "Tone at the Top")

The firm should promote an internal culture based on the recognition that quality is essential in performing engagements and should establish policies and procedures to support that culture. Such policies...
and procedures should require the firm’s leadership (managing partner or board of managing partners, chief executive officer, or equivalent) to assume ultimate responsibility for the firm’s system of quality control.

.16 The firm’s leadership and the examples it sets significantly influence the internal culture of the firm. The promotion of a quality-oriented internal culture depends on clear, consistent, and frequent actions and messages from all levels of the firm’s management that emphasize the firm’s quality control policies and procedures, and the requirement to:

a. Perform work that complies with professional standards and regulatory and legal requirements.

b. Issue reports that are appropriate in the circumstances.

Such actions and messages encourage a culture that recognizes and rewards quality work. These actions and messages may be communicated by training seminars, meetings, formal or informal dialogue, mission statements, newsletters, or briefing memoranda. They may be incorporated in the firm’s internal documentation and training materials, and in partner and staff appraisal procedures such that they will support and reinforce the firm’s view on the importance of quality and how, practically, it is to be achieved.

.17 Of particular importance in promoting an internal culture based on quality is the need for the firm’s leadership to recognize that the firm’s business strategy is subject to the overarching requirement for the firm to achieve the objectives of the system of quality control in all the engagements that the firm performs. Accordingly, the firm should establish policies to:

a. Assign management responsibilities so that commercial considerations do not override the quality of work performed;

b. Address performance evaluation, compensation, and advancement (including incentive systems) with regard to its personnel, to demonstrate the firm’s overarching commitment to the objectives of the system of quality control; and

c. Devote sufficient and appropriate resources for the development, communication, and support of its quality control policies and procedures.

.18 Any person or persons assigned operational responsibility for the firm’s quality control system by the firm’s leadership should have sufficient and appropriate experience and ability to identify and understand quality control issues and to develop appropriate policies and procedures, as well as the necessary authority to implement those policies and procedures.

Relevant Ethical Requirements

.19 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements.

.20 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care
- Scope and nature of services

.21 The firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in Rule 101 (ET section 101) and its
related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time, and safeguards to mitigate such threats involving matters that are not explicitly addressed in the Code of Professional Conduct, are set forth in the AICPA’s Conceptual Framework for AICPA Independence Standards. Such policies and procedures should enable the firm to:

a. Communicate its independence requirements to its personnel and, where applicable, others subject to them.

b. Identify and evaluate circumstances and relationships that create threats to independence, and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards, or, if effective safeguards cannot be applied, withdrawing from the engagement.\(^2\)

.22 Such policies and procedures should require:

a. The engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.

b. Personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.

c. The accumulation and communication of relevant information to appropriate personnel so that:

(i) The firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;

(ii) The firm can maintain and update information relating to independence; and

(iii) The firm and the engagement partner can take appropriate action regarding identified threats to independence.

.23 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements, and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for:

a. Personnel to promptly notify the firm of independence breaches of which they become aware.

b. The firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to:

(i) The engagement partner who, with the firm, has the responsibility to address the breach; and

(ii) Other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.

c. Confirmation to the firm by the engagement partner and the other individuals referred to in subparagraph b.(ii) that the required corrective actions have been taken.

.24 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in Rule 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

\(^2\) An accountant is not precluded from issuing a report with respect to a compilation of financial statements for an entity with respect to which the accountant is not independent. If the accountant is not independent, disclosure of the accountant’s lack of independence is the appropriate response.
.25 The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

.26 For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm’s policies and procedures should address these requirements.

Acceptance and Continuance of Client Relationships and Specific Engagements

.27 The firm should establish policies and procedures for the acceptance and continuance of client relationships and specific engagements, designed to provide the firm with reasonable assurance that it will undertake or continue relationships and engagements only where the firm:

a. Has considered the integrity of the client, including the identity and business reputation of the client’s principal owners, key management, related parties, and those charged with its governance, and the risks associated with providing professional services in the particular circumstances;
b. Is competent to perform the engagement and has the capabilities and resources to do so; and
c. Can comply with legal and ethical requirements.

The firm should obtain such information as it considers necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when considering acceptance of a new engagement with an existing client.

.28 To minimize the risk of misunderstandings regarding the nature, scope, and limitations of the services to be performed, policies and procedures should provide for obtaining an understanding with the client regarding those services. Professional standards may provide guidance in deciding whether the understanding should be oral or written.

.29 When issues have been identified, and the firm has decided to accept or continue the client relationship or a specific engagement, the firm should document how the issues were resolved.

.30 Factors to consider regarding the integrity of a client include:

- The nature of the client’s operations, including its business practices.
- Information concerning the attitude of the client’s principal owners, key management, and those charged with its governance toward such matters as aggressive interpretation of accounting standards and internal control over financial reporting.

The extent of knowledge a firm will have regarding the integrity of a client will generally grow within the context of an ongoing relationship with that client.

.31 Matters to consider in accepting or continuing the client engagement include whether:

- Firm personnel have knowledge of relevant industries or subject matters or the ability to effectively gain the necessary knowledge;
- Firm personnel have experience with relevant regulatory or reporting requirements, or the ability to effectively gain the necessary competencies;
- The firm has sufficient personnel with the necessary capabilities and competence;
- Specialists are available, if needed;
- Individuals meeting the criteria and eligibility requirements to perform an engagement quality control review are available, where applicable; and
- The firm is able to complete the engagement within the reporting deadline.
.32 If a potential conflict of interest is identified in accepting an engagement from a new or an existing client, the firm should determine whether it is appropriate to accept the engagement. Where the engagement is accepted, the firm should consider any ethical requirements that exist under AICPA Interpretation No. 102-2, “Conflicts of Interest,” under Rule 102, Integrity and Objectivity (ET section 102), such as disclosure of the relationship to the client and other appropriate parties.

.33 Deciding whether to continue a client relationship includes consideration of significant issues that have arisen during the current or previous engagements, and their implications for continuing the relationship.

.34 If the firm obtains information that would have caused it to decline an engagement if that information had been available earlier, policies and procedures on the continuance of the engagement and the client relationship should include consideration of the professional and legal responsibilities that apply to the circumstances, and the possibility of withdrawing from the engagement or from both the engagement and the client relationship.

.35 Policies and procedures on withdrawal from an engagement or from both the engagement and the client relationship should include documenting significant issues, consultations, conclusions, and the basis for the conclusions. Policies and procedures may include:

- Discussing with the appropriate level of the client’s management and those charged with its governance the appropriate action that the firm might take based on the relevant facts and circumstances.
- Considering whether there is a professional, regulatory, or legal requirement for the firm to remain in place, or for the firm to report the withdrawal from the engagement or from both the engagement and the client relationship, together with the reasons for the withdrawal, to regulatory authorities.
- If the firm determines that it is appropriate to withdraw, discussing with the appropriate level of the client’s management and those charged with its governance withdrawal from the engagement or from both the engagement and the client relationship.

.36 In certain situations, the auditor may be appointed by statutory procedures or required by law or regulation to perform the engagement. Accordingly, certain of the considerations regarding the acceptance and continuance of client relationships and specific engagements, as set out in paragraphs .27–.35, may not be relevant. Nonetheless, establishing policies and procedures as described may provide valuable information to public sector auditors in performing risk assessments and in carrying out reporting responsibilities.

**Human Resources**

.37 The firm should establish policies and procedures designed to provide it with reasonable assurance that it has sufficient personnel with the capabilities, competence, and commitment to ethical principles necessary to:

- Perform its engagements in accordance with professional standards and regulatory and legal requirements, and
- Enable the firm to issue reports that are appropriate in the circumstances.

.38 Such policies and procedures should address the following:

- Recruitment and hiring, if applicable;
- Determining capabilities and competencies;
- Assigning personnel to engagements, if applicable;
- Professional development; and
• Performance evaluation, compensation, and advancement.

Recruitment and Hiring

.39 Effective recruitment processes and procedures help the firm select individuals of integrity, who have the capacity to develop the capabilities and competence necessary to perform the firm’s work, and possess the appropriate characteristics to enable them to perform competently. Examples of such characteristics may include meeting minimum academic requirements established by the firm, maturity, integrity, and leadership traits.

Determining Capabilities and Competencies

.40 Capabilities and competencies are the knowledge, skills, and abilities that qualify personnel to perform an engagement covered by this section. Capabilities and competencies are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of this section, a measure of overall competency is qualitative rather than quantitative.

.41 Capabilities and competence are developed through a variety of methods; for example:

• Professional education
• Continuing professional development, including training
• Work experience
• Mentoring by more experienced staff; for example, other members of the engagement team

Competencies of Engagement Partner

.42 A firm’s quality control policies and procedures should provide reasonable assurance that an engagement partner possesses the competencies necessary to fulfill his or her engagement responsibilities.

.43 In most cases, an engagement partner will have gained the necessary competencies through relevant and appropriate experience in engagements covered by this section. In some cases, however, an engagement partner may have obtained the necessary competencies through disciplines other than the practice of public accounting, such as in relevant industry, governmental, and academic positions. When necessary, the experience of the engagement partner may be supplemented by continuing professional education (CPE) and consultation. The following are examples.

• An engagement partner whose recent experience has consisted primarily in providing tax services may acquire the competencies necessary in the circumstances to perform a compilation or review engagement by obtaining relevant CPE.
• An engagement partner whose experience consists of performing review and compilation engagements may be able to obtain the necessary competencies to perform an audit by becoming familiar with the industry in which the client operates, obtaining CPE relating to auditing, using consulting sources during the course of performing the audit engagement, or any combination of these.
• A person in academia might obtain the necessary competencies to perform engagements covered by this section by (a) obtaining specialized knowledge through teaching or authorship of research projects or similar papers and (b) performing a rigorous self-study program, or by engaging a consultant to assist on such engagements.

.44 The characteristics of a particular client, industry, and the kind of service being provided determine the nature and extent of competencies established by a firm that are expected of the engagement partner for an engagement. For example:
• The competencies expected of an engagement partner for an engagement to compile financial statements would be different than those expected of a practitioner engaged to review or audit financial statements.

• Supervising engagements and signing or authorizing others to sign reports for clients in certain industries or engagements, such as financial services, governmental, or employee benefit plan engagements, would require different competencies than those expected in performing attest services for clients in other industries.

• The engagement partner for an attestation engagement to examine management’s assertion about the effectiveness of an entity’s internal control over financial reporting would be expected to have technical proficiency in understanding and evaluating the effectiveness of controls, while an engagement partner for an attestation engagement to examine investment performance statistics would be expected to have different competencies, including an understanding of the subject matter of the underlying assertion.

In practice, the competency requirements necessary for the engagement partner are broad and varied in both their nature and number. Required competencies include the following, as well as other competencies as necessary in the circumstances.

• Understanding of the role of a system of quality control and the Code of Professional Conduct. An understanding of the role of a firm’s system of quality control and the AICPA’s Code of Professional Conduct, both of which play critical roles in assuring the integrity of the various kinds of reports.

• Understanding of the service to be performed. An understanding of the performance, supervision, and reporting aspects of the engagement. This understanding is usually gained through actual participation under appropriate supervision in that type of engagement.

• Technical proficiency. An understanding of the applicable professional standards including those standards directly related to the industry in which a client operates and the kinds of transactions in which a client engages.

• Familiarity with the industry. An understanding of the industry in which a client operates, to the extent required by professional standards applicable to the kind of service being performed. In performing an audit or review of financial statements, this understanding would include an industry’s organization and operating characteristics sufficient to identify areas of high or unusual risk associated with an engagement and to evaluate the reasonableness of industry-specific estimates.

• Professional judgment. Skills that indicate sound professional judgment. In performing engagements covered by this section, such skills would typically include the ability to exercise professional skepticism and identify areas requiring special consideration including, for example, the evaluation of the reasonableness of estimates and representations made by management and the determination of the kind of report appropriate in the circumstances.

• Understanding the organization’s information technology systems. A sufficient understanding of how the organization is dependent on or enabled by information technologies and the manner in which the information systems are used to record and maintain financial information, to determine when involvement of an IT professional is necessary for an audit engagement.

Interrelationship of Competencies and Other Elements of a Firm’s System of Quality Control

The competencies listed above are interrelated and gaining one particular competency may be related to achieving another. For example, familiarity with the client’s industry interrelates with a practitioner’s ability to make professional judgments relating to the client.

In establishing policies and procedures related to the nature of competencies needed by the engagement partner for an engagement, a firm may consider the requirements of policies and procedures established for other elements of quality control. For example, a firm might consider its requirements related...
to engagement performance in determining the nature of competency requirements that describe the degree of technical proficiency necessary in a given set of circumstances.

The Relationship of the Competency Requirement of the Uniform Accountancy Act to the Human Resource Element of Quality Control

.48 CPAs are required to follow the accountancy laws of the individual licensing jurisdictions in the United States that govern the practice of public accounting. These jurisdictions may have adopted, in whole or in part, the Uniform Accountancy Act (UAA), which is a model legislative statute and related administrative rules designed by the AICPA and the National Association of State Boards of Accountancy (NASBA) to provide a uniform approach to the regulation of the accounting profession. The UAA provides that “any individual licensee who is responsible for supervising attest or compilation services and signs or authorizes someone to sign the accountant’s report on the financial statements on behalf of the firm shall meet the competency requirements set out in the professional standards for such services.” A firm’s compliance with this section is intended to enable a practitioner who performs the services described in the preceding sentence on the firm’s behalf to meet the competency requirement referred to in the UAA.

Assignment of Engagement Teams

.49 The firm should assign responsibility for each engagement to an engagement partner and should establish policies and procedures requiring that:

a. The identity and role of the engagement partner are communicated to management and those charged with governance;

b. The engagement partner has the appropriate capabilities, competence, authority, and time to perform the role; and

c. The responsibilities of the engagement partner are clearly defined and communicated to that individual.

.50 Policies and procedures may include systems to monitor the workload and availability of engagement partners so as to enable these individuals to have sufficient time to adequately discharge their responsibilities.

.51 The firm should establish policies and procedures to assign appropriate staff with the necessary capabilities, competence, and time to:

a. Perform engagements in accordance with professional standards and regulatory and legal requirements; and

b. Enable the firm or engagement partners to issue reports that are appropriate in the circumstances.

.52 When assigning engagement teams, and in determining the level of supervision required, the firm might consider factors such as the engagement team’s:

• Understanding of, and practical experience with, engagements of a similar nature and complexity through appropriate training and participation.

• Understanding of professional standards and regulatory and legal requirements.

• Technical knowledge and expertise, including knowledge of relevant information technology.

• Knowledge of relevant industries in which the client operates.

• Ability to apply professional judgment.

• Understanding of the firm’s quality control policies and procedures.
Generally, as the ability and experience levels of assigned staff increase, the need for direct supervision decreases.

.53 Appropriate teamwork and training assist less experienced members of the engagement team to clearly understand the objectives of the assigned work.

Professional Development

.54 The continuing competence of the firm’s personnel depends to a significant extent on an appropriate level of continuing professional development so that personnel maintain their knowledge and capabilities. Effective policies and procedures emphasize the need for all levels of firm personnel to participate in general and industry-specific continuing professional education and other professional development activities that enable them to fulfill responsibilities assigned, and to satisfy applicable continuing professional education requirements of the AICPA and regulatory agencies. Effective policies and procedures also place importance on passing the Uniform CPA Examination. The firm may provide the necessary training resources and assistance to enable personnel to develop and maintain the required capabilities and competence. The firm may use an external source that is qualified for that purpose if internal technical and training resources are unavailable, or for any other reason.

Performance Evaluation, Compensation, and Advancement

.55 The firm’s policies and procedures should provide that personnel selected for advancement have the qualifications necessary for fulfillment of the responsibilities they will be called on to assume.

.56 Effective performance evaluation, compensation, and advancement procedures give due recognition and reward to the development and maintenance of competence and commitment to ethical principles. Steps a firm may take in developing and maintaining competence and commitment to ethical principles include:

* Making personnel aware of the firm’s expectations regarding performance and ethical principles;
* Providing personnel with evaluation of, and counseling on, performance, progress, and career development; and
* Helping personnel understand that their compensation and advancement to positions of greater responsibility depend upon, among other things, performance quality and adherence to ethical principles, and that failure to comply with the firm’s policies and procedures may result in disciplinary action.

The size and circumstances of the firm are important considerations in determining the structure of the firm’s performance evaluation process. Smaller firms, in particular, may employ less formal methods of evaluating the performance of their personnel.

Engagement Performance

.57 The firm should establish policies and procedures designed to provide it with reasonable assurance that engagements are consistently performed in accordance with professional standards and regulatory and legal requirements, and that the firm or the engagement partner issues reports that are appropriate in the circumstances. Required policies and procedures should address:

a. Engagement performance,

b. Supervision responsibilities, and

c. Review responsibilities.

.58 Effective policies and procedures facilitate consistency in the quality of engagement performance. This may be accomplished through written or electronic manuals, software tools or other forms of
standardized documentation, and industry- or subject-matter-specific guidance materials. The firm might address, for example:

- How engagement teams are briefed on the engagement to obtain an understanding of the objectives of their work,
- Processes for complying with applicable engagement standards,
- Processes of engagement supervision, staff training, and mentoring,
- Methods of reviewing the work performed, the significant judgments made, and the type of report being issued,
- Appropriate documentation of the work performed and of the timing and extent of the review,
- Appropriate communication of the results of each engagement, and
- Processes to keep all policies and procedures current.

.59 Policies and procedures for engagement supervision might include:

- Tracking the progress of the engagement;
- Considering the capabilities and competence of individual members of the engagement team, whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the engagement;
- Addressing significant issues arising during the engagement, considering their significance, and appropriately modifying the planned approach; and
- Identifying matters for consultation or consideration by more-experienced engagement team members during the engagement.

.60 Review responsibility policies and procedures should be determined on the basis that qualified engagement team members, which may include the engagement partner, review work performed by other team members on a timely basis.

.61 A review may include consideration of whether, for example:

- The work has been performed in accordance with professional standards and regulatory and legal requirements;
- Significant findings and issues have been raised for further consideration;
- Appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- The nature, timing, and extent of work performed is appropriate and without need for revision;
- The work performed supports the conclusions reached and is appropriately documented;
- The evidence obtained is sufficient and appropriate to support the report; and
- The objectives of the engagement procedures have been achieved.

.62 The firm should establish policies and procedures for engagement teams to complete the assembly of final engagement files on a timely basis, as appropriate for the nature of the engagement, after the engagement reports have been released. Professional standards, laws, or regulations may prescribe the time limits by which the assembly of final engagement files for specific types of engagements is to be completed.
Confidentiality, Safe Custody, Integrity, Accessibility, and Retrievability of Engagement Documentation

.63 The firm should establish policies and procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation.

.64 Relevant ethical requirements establish an obligation for the firm’s personnel to observe at all times the confidentiality of information contained in engagement documentation, unless specific client authority has been given to disclose information or there is a legal or professional duty to do so. Specific laws or regulations may impose additional obligations on the firm’s personnel to maintain client confidentiality, particularly where data of a personal nature are concerned.

.65 Whether engagement documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the firm’s knowledge, or could be permanently lost or damaged. Appropriate and reasonable controls for engagement documentation may include those that:

- Clearly determine when and by whom engagement documentation was prepared or reviewed;
- Protect the integrity of the information at all stages of the engagement, especially when the information is shared within the engagement team or transmitted to other parties via electronic means;
- Prevent unauthorized changes to the engagement documentation; and
- Allow access to the engagement documentation by the engagement team and other authorized parties as necessary to properly discharge their responsibilities.

.66 Controls that the firm may design and implement to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation may include, for example:

- The use of a password by engagement team members and data encryption to restrict access to electronic engagement documentation to authorized users;
- Appropriate back-up routines for electronic engagement documentation at appropriate stages during the engagement;
- Procedures for properly distributing engagement documentation to the team members at the start of the engagement, processing it during the engagement, and collating it at the end of the engagement; and
- Procedures for restricting access to and enabling proper distribution and confidential storage of hardcopy engagement documentation.

.67 For practical reasons, original paper documentation may be electronically scanned or otherwise copied to another media for inclusion in engagement files. In that case, the firm should establish procedures designed to maintain the integrity, accessibility, and retrievability of the documentation.

.68 These procedures may include, for example:

- Generating scanned copies that reflect the entire content of the original paper documentation, including manual signatures, cross-references and annotations;
- Integrating the scanned copies into the engagement files, including indexing and signing off on the copies as necessary; and
- Enabling the scanned copies to be retrieved and printed as necessary.

There may be legal, regulatory, or other reasons to retain original paper documentation.
Retention of Engagement Documentation

.69 The firm should establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations.

.70 In determining the needs of the firm for retention of engagement documentation and the period of such retention, the firm may consider the nature of the engagement and the firm’s circumstances; for example, whether the engagement documentation is needed to provide a record of matters of continuing significance to future engagements. The retention period may also depend on other factors, such as whether professional standards, laws, or regulations prescribe specific retention periods for certain types of engagements, or whether there are generally accepted retention periods in the absence of specific legal or regulatory requirements.

.71 Procedures that the firm may adopt for retention of engagement documentation include those that:

- Enable the retrieval of and access to the engagement documentation during the retention period, particularly in the case of electronic documentation, as the underlying technology may be upgraded or changed over time.
- Provide, where necessary, a record of changes made to engagement documentation after the assembly of engagement files has been completed.
- Enable authorized external parties to access and review specific engagement documentation for quality control or other purposes.

Consultation

.72 The firm should establish policies and procedures designed to provide it with reasonable assurance that:

a. Consultation takes place when appropriate (for example, when dealing with complex, unusual, unfamiliar, difficult, or contentious issues);

b. Sufficient and appropriate resources are available to enable appropriate consultation to take place;

c. All the relevant facts known to the engagement team are provided to those consulted;

d. The nature and scope of such consultations are documented, and are understood by both the individual seeking consultation and the individual consulted; and

e. The conclusions resulting from such consultations are documented and implemented.

.73 Consultation includes discussion, at the appropriate professional level, with individuals within or outside the firm who have relevant specialized expertise.

.74 Consultation uses appropriate research resources as well as the collective experience and technical expertise of the firm. Consultation helps to promote quality and improves the application of professional judgment. Appropriate recognition of consultation in the firm’s policies and procedures helps to promote a culture in which consultation is recognized as a strength and encourages personnel to consult on complex, unusual, unfamiliar, difficult, or contentious issues.

.75 The firm’s consultation procedures should provide for consultation with those having appropriate knowledge, seniority, and experience within the firm (or, where applicable, outside the firm) on significant technical, ethical, and other matters, and for appropriate documentation and implementation of conclusions resulting from consultations.

.76 A firm needing to consult externally may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control
services. Before using such services, the firm should evaluate whether the external provider is qualified for that purpose.

.77 Documentation of consultations with other professionals that involve complex, unusual, unfamiliar, difficult, or contentious matters that is sufficiently complete and detailed contributes to an understanding of:

- The issue on which consultation was sought; and
- The results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

**Differences of Opinion**

.78 The firm should establish policies and procedures for dealing with and resolving differences of opinion within the engagement team, with those consulted, and, where applicable, between the engagement partner and the engagement quality control reviewer (including a qualified external person). Such policies and procedures should require that:

a. Conclusions reached be documented and implemented; and

b. The report not be released until the matter is resolved.

.79 Effective procedures encourage identification of differences of opinion at an early stage, provide clear guidelines about the successive steps to be taken thereafter, and require documentation regarding the resolution of the differences and the implementation of the conclusions reached. Procedures to resolve such differences may include consulting with another practitioner or firm, or a professional or regulatory body.

**Engagement Quality Control Review**

.80 The firm should establish criteria against which all engagements covered by this section are to be evaluated to determine whether an engagement quality control review should be performed.

.81 The firm’s policies and procedures should require that if an engagement meets the criteria established, an engagement quality control review be performed for that engagement, and that the review be completed before the report is released.

.82 The firm’s policies and procedures should require the engagement partner to remain responsible for the engagement and its performance, notwithstanding involvement of the engagement quality control reviewer.

.83 The structure and nature of the firm’s practice are important considerations in establishing criteria to consider when determining which engagements are to be subject to an engagement quality control review. Such criteria may include:

- The nature of the engagement, including the extent to which it involves a matter of public interest;
- The identification of unusual circumstances or risks in an engagement or class of engagements; and
- Whether laws or regulations require an engagement quality control review.

.84 If the firm has no engagements that meet the criteria, paragraphs .85–.99 do not apply.

**Nature, Timing, and Extent of the Engagement Quality Control Review**

.85 The engagement quality control review procedures should include an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report.
The engagement quality control review should include reading the financial statements or other subject matter information and the report and considering whether the report is appropriate.

An engagement quality control review also should include a review of selected engagement documentation relating to the significant judgments the engagement team made and the conclusions they reached, and should include a discussion with the engagement partner regarding significant findings and issues. The extent of the engagement quality control review may depend upon, among other things, the complexity of the engagement and the risk that the report might not be appropriate in the circumstances.

An engagement quality control review may include consideration of the following:

- The engagement team’s evaluation of the firm’s independence in relation to the specific engagement;
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the conclusions arising from those consultations; and
- Whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.

Significant judgments made by the engagement team may include, for example:

- Significant risks identified during the engagement and the responses to those risks.
- Judgments made, particularly with respect to materiality and significant risks.
- The significance and disposition of corrected and uncorrected misstatements identified during the engagement.
- The matters to be communicated to management and those charged with governance and, where applicable, other parties such as regulatory bodies.

The firm’s policies and procedures should require the engagement quality control reviewer to conduct the review in a timely manner so that significant issues may be promptly resolved to the reviewer’s satisfaction before the report is released. The review may be conducted at appropriate stages during the engagement.

When the engagement quality control reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer’s satisfaction, the firm’s procedures for dealing with differences of opinion apply (see paragraphs .78–.79).

Criteria for the Eligibility of Engagement Quality Control Reviewers

The firm should establish policies and procedures addressing

a. The appointment of engagement quality control reviewers; and
b. The technical qualifications required to perform the role, including the necessary experience and authority.

The firm’s policies and procedures on the technical qualifications of engagement quality control reviewers may address the technical expertise, experience, and authority necessary to fulfill the role. What constitutes sufficient and appropriate technical expertise, experience, and authority depends on the circumstances of the engagement.

The firm should establish policies and procedures designed to maintain the objectivity of the engagement quality control reviewer. Such policies and procedures should provide that while the engagement quality control reviewer is not a member of the engagement team, the engagement quality control reviewer should satisfy the independence requirements relating to the engagements reviewed.
Policies and procedures designed to maintain the objectivity of the engagement quality control reviewer may include a requirement, where practicable, that the engagement quality control reviewer is not selected by the engagement partner, and requirements that the engagement quality control reviewer not:

a. Participate in the performance of the engagement except as discussed in paragraph .96 or

b. Make decisions for the engagement team.

It may not be practicable, in the case of firms with few partners, for the engagement partner not to be involved in selecting the engagement quality control reviewer.

The engagement partner may consult the engagement quality control reviewer at any stage during the engagement, for example, to establish that a judgment made by the engagement partner will be acceptable to the engagement quality control reviewer. Such consultation need not impair the engagement quality control reviewer’s eligibility to perform the role. However, when the nature and extent of the consultations become significant, the reviewer’s objectivity may be impaired unless both the engagement team and the reviewer are careful to maintain the reviewer’s objectivity.

The firm’s policies and procedures should provide for the replacement of the engagement quality control reviewer when the reviewer’s ability to perform an objective review has been impaired.

Qualified external persons may be contracted when sole practitioners or small firms identify engagements requiring engagement quality control reviews. Alternatively, some sole practitioners or small firms may wish to use other firms to facilitate engagement quality control reviews. When the firm contracts qualified external persons or other firms, the requirements and guidance in paragraphs .85–.97 apply.

Documentation of the Engagement Quality Control Review

The firm should establish policies and procedures that provide for appropriate documentation of the engagement quality control review, including documentation that:

a. The procedures required by the firm’s policies on engagement quality control review have been performed;

b. The engagement quality control review has been completed before the report is released; and

c. The reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.

Monitoring

The firm should establish policies and procedures designed to provide the firm and its engagement partners with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, operating effectively, and complied with in practice. Such policies and procedures should:

a. Include an ongoing consideration and evaluation of the firm’s system of quality control to determine

(i) The appropriateness of the design and

(ii) The effectiveness of the operation of the system of quality control.

b. Assign responsibility for the monitoring process to a partner or partners or other persons with sufficient and appropriate experience and authority in the firm to assume that responsibility.

c. Assign performance of monitoring of the firm’s system of quality control to qualified individuals.
The purpose of monitoring compliance with quality control policies and procedures is to provide an evaluation of:

- Adherence to professional standards and regulatory and legal requirements;
- Whether the quality control system has been appropriately designed and effectively implemented; and
- Whether the firm’s quality control policies and procedures have been operating effectively, so that reports that are issued by the firm are appropriate in the circumstances.

The evaluation may identify circumstances that necessitate changes to, or the need to improve compliance with, the firm’s policies and procedures to provide the firm with reasonable assurance that its system of quality control is effective.

The firm’s policies should require the performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and regulatory requirements, and the firm’s quality control policies and procedures. Monitoring procedures include:

- Review of selected administrative and personnel records pertaining to the quality control elements.
- Review of engagement working papers, reports, and clients’ financial statements.
- Discussions with the firm’s personnel.
- Summarization of the findings from the monitoring procedures, at least annually, and consideration of the systemic causes of findings that indicate improvements are needed.
- Determination of any corrective actions to be taken or improvements to be made with respect to the specific engagements reviewed or the firm’s quality control policies and procedures.
- Communication of the identified findings to appropriate firm management personnel.
- Consideration of findings by appropriate firm management personnel who should also determine that any actions necessary, including necessary modifications to the quality control system, are taken on a timely basis.

Monitoring procedures also include an assessment of:

- The appropriateness of the firm’s guidance materials and any practice aids;
- New developments in professional standards and regulatory and legal requirements, and how they are reflected in the firm’s policies and procedures where appropriate;
- Compliance with policies and procedures on independence;
- The effectiveness of continuing professional development, including training;
- Decisions related to acceptance and continuance of client relationships and specific engagements; and
- Firm personnel’s understanding of the firm’s quality control policies and procedures, and implementation thereof.

Some of the monitoring procedures discussed above may be accomplished through the performance of:

- Engagement quality control review.
- Postissuance review of engagement working papers, reports, and clients’ financial statements for selected engagements.
- Inspection procedures.
The need for and extent of inspection procedures depends in part on the existence and effectiveness of the other monitoring procedures. The nature of inspection procedures varies based on the firm’s quality control policies and procedures and the effectiveness and results of other monitoring procedures.

The inspection of a selection of completed engagements may be performed on a cyclical basis. For example, engagements selected for inspection may include at least one engagement for each engagement partner over an inspection cycle that spans three years. The manner in which the inspection cycle is organized, including the timing of selection of individual engagements, depends on many factors, including the following:

- The size of the firm.
- The number and geographical location of offices.
- The results of previous monitoring procedures.
- The degree of authority both personnel and offices have (for example, whether individual offices are authorized to conduct their own inspections or whether only the head office may conduct them).
- The nature and complexity of the firm’s practice and organization.
- The risks associated with the firm’s clients and specific engagements.

The inspection process involves the selection of individual engagements, some of which may be selected without prior notification to the engagement team. In determining the scope of the inspections, the firm may take into account the scope or conclusions of a peer review or regulatory inspections. (See paragraph .119.)

Inspection procedures with respect to the engagement performance element of a quality control system are particularly appropriate in a firm with more than a limited number of management-level individuals responsible for the conduct of its accounting and auditing practice.

In small firms with a limited number of persons with sufficient and appropriate experience and authority in the firm, monitoring procedures may need to be performed by some of the same individuals who are responsible for compliance with the firm’s quality control policies and procedures. This includes postissuance review of engagement working papers, reports, and clients’ financial statements by the person with final responsibility for the engagement. To effectively monitor one’s own compliance with the firm’s policies and procedures, it is necessary that an individual be able to critically review his or her own performance, assess his or her own strengths and weaknesses, and maintain an attitude of continual improvement. Changes in conditions and in the environment within the firm (such as obtaining clients in an industry not previously serviced or significantly changing the size of the firm) may indicate the need to have quality control policies and procedures monitored by another qualified individual.

Having an individual inspect his or her own compliance with a quality control system may be less effective than having such compliance inspected by another qualified individual. When one individual inspects his or her own compliance, the firm has a higher risk that noncompliance with policies and procedures will not be detected. Accordingly, a firm with a limited number of persons with sufficient and appropriate experience and authority in the firm may find it beneficial to engage a qualified individual from outside the firm to perform inspection procedures.

Any system of quality control has inherent limitations that can reduce its effectiveness. Deficiencies in individual engagements covered by this section do not, in and of themselves, indicate that the firm’s system of quality control is insufficient to provide it with reasonable assurance that its personnel comply with applicable professional standards. The firm should evaluate the effect of deficiencies noted as a result of the monitoring process and determine whether they require prompt corrective action.

Deficiencies identified during the monitoring process may be
.113 The firm should communicate to relevant engagement partners and other appropriate personnel deficiencies noted as a result of the monitoring process and recommendations for appropriate remedial action.

.114 The firm’s evaluation of each type of deficiency should result in recommendations for one or more of the following:

a. Taking appropriate remedial action in relation to an individual engagement or member of personnel.

b. The communication of the findings to those responsible for training and professional development.

c. Changes to the quality control policies and procedures.

d. Disciplinary action against those who fail to comply with the policies and procedures of the firm, especially those who do so repeatedly.

.115 When the results of the monitoring procedures indicate that a report may be inappropriate or that procedures were omitted during the performance of the engagement, the firm should determine what further action is appropriate to comply with relevant professional standards and regulatory and legal requirements. The firm may also consider obtaining legal advice.

.116 At least annually, the firm should communicate the results of the monitoring of its quality control system process to relevant engagement partners and other appropriate individuals within the firm, including the firm’s leadership. Such communication should enable the firm and these individuals to take prompt and appropriate action where necessary in accordance with their defined roles and responsibilities and provide a basis for them to rely on the firm’s system of quality control. Information communicated should include the following:

a. A description of the monitoring procedures performed.

b. The conclusions drawn from the monitoring procedures.

c. Where relevant, a description of systemic, repetitive, or other significant deficiencies and of the actions taken to resolve or amend those deficiencies.

.117 The reporting of identified deficiencies to individuals other than the relevant engagement partner need not include an identification of the specific engagements concerned, unless such identification is necessary for the proper discharge of the responsibilities of the individuals other than the engagement partner.

.118 The firm should establish policies and procedures requiring appropriate documentation of monitoring (see paragraph .125). Appropriate documentation relating to monitoring includes:

a. Monitoring procedures, including the procedure for selecting completed engagements to be inspected;

b. A record of the evaluation of:

(i) Adherence to professional standards and regulatory and legal requirements;
(ii) Whether the quality control system has been appropriately designed and effectively imple-
mented; and

(iii) Whether the firm’s quality control policies and procedures have been operating effectively,
so that reports that are issued by the firm or engagement partners are appropriate in the
circumstances; and

c. Identification of the deficiencies noted, an evaluation of their effect, and the basis for determining
whether and what further action is necessary.

The Relationship of Peer Review to Monitoring

.119 A peer review does not substitute for all monitoring procedures. However, since the objective of a
peer review is similar to that of inspection procedures, a firm’s quality control policies and procedures may
provide that a peer review conducted under standards established by the AICPA may substitute for the
inspection of engagement working papers, reports, and clients’ financial statements for some or all
engagements for the period covered by the peer review.

Complaints and Allegations

.120 The firm should establish policies and procedures designed to provide it with reasonable assurance
that it deals appropriately with:

a. Complaints and allegations that the work performed by the firm fails to comply with professional
standards and regulatory and legal requirements; and

b. Allegations of noncompliance with the firm’s system of quality control; and

c. Deficiencies in the design or operation of the firm’s quality control policies and procedures, or
noncompliance with the firm’s system of quality control by an individual or individuals, as
identified during the investigations into complaints and allegations.

.121 As part of this process, the firm should establish clearly defined channels for firm personnel to raise
any concerns in a manner that enables them to come forward without fear of reprisals.

.122 Complaints and allegations of noncompliance with the firm’s system of quality control (which do
not include those that are clearly frivolous) may originate from within or outside the firm. They may be
made by firm personnel, clients, state boards of accountancy, other regulators, or other third parties. They
may be received by engagement team members or other firm personnel.

.123 The firm should require that investigations of such complaints and allegations in accordance with
established policies and procedures be supervised by a person with sufficient and appropriate experience
and authority who is not otherwise involved in the engagement. The firm’s policies and procedures may
require involving legal counsel in the investigation. Small firms and sole practitioners may use the services
of a qualified external person or another firm to carry out the investigation.

.124 The firm should establish policies and procedures requiring documentation of complaints and
allegations, and the responses to them.

Documentation of Operation of Quality Control Policies and Procedures

.125 The firm should establish policies and procedures requiring appropriate documentation to provide
evidence of the operation of each element of its system of quality control.
The form and content of documentation evidencing the operation of each of the elements of the system of quality control is a matter of judgment and depends on a number of factors, including, for example:

- The size of the firm and the number of offices.
- The nature and complexity of the firm’s practice and organization.

For example, large firms may use electronic databases to document matters such as independence confirmations, performance evaluations and the results of monitoring inspections. Smaller firms may use more informal methods such as manual notes, checklists, and forms.

The firm should establish policies and procedures that require retention of documentation for a period of time sufficient to permit those performing monitoring procedures and peer review to evaluate the firm’s compliance with its system of quality control, or for a longer period if required by law or regulation.

Effective Date

The provisions of this section are applicable to a CPA firm’s system of quality control for its accounting and auditing practice as of January 1, 2009.
Appendix B:

Interpretation No. 101-14 of Rule 101

Interpretation No. 101-14, “The effect of alternative practice structures on the applicability of independence rules”

Because of changes in the manner in which members are structuring their practices, the AICPA’s professional ethics executive committee (PEEC) studied various alternatives to “traditional structures” to determine whether additional independence requirements are necessary to ensure the protection of the public interest.

In many “nontraditional structures,” a substantial (the nonattest) portion of a member’s practice is conducted under public or private ownership, and the attest portion of the practice is conducted through a separate firm owned and controlled by the member. All such structures must comply with applicable laws, regulations, and Rule 505, Form of Organization and Name [ET section 505.01]. In complying with laws, regulations, and rule 505 [ET section 505.01], many elements of quality control are required to ensure that the public interest is adequately protected. For example, all services performed by members and persons over whom they have control must comply with standards promulgated by AICPA Council-designated bodies, and, for all other firms providing attest services, enrollment is required in an AICPA-approved practice-monitoring program.

Finally, and importantly, the members are responsible, financially and otherwise, for all the attest work performed. Considering the extent of such measures, PEEC believes that the additional independence rules set forth in this interpretation are sufficient to ensure that attest services can be performed with objectivity and, therefore, the additional rules satisfactorily protect the public interest.

Rule 505 [ET section 505.01] and the following independence rules for an alternative practice structure (APS) are intended to be conceptual and applicable to all structures where the “traditional firm” engaged in attest services is closely aligned with another organization, public or private, that performs other professional services. The following paragraph and the chart below provide an example of a structure in use at the time this interpretation was developed. Many of the references in this interpretation are to the example. PEEC intends that the concepts expressed herein be applied, in spirit and in substance, to variations of the example structure as they develop.

The example APS in this interpretation is one where an existing CPA practice (“Oldfirm”) is sold by its owners to another (possibly public) entity (“PublicCo”). PublicCo has subsidiaries or divisions such as a bank, insurance company or broker-dealer, and it also has one or more professional service subsidiaries or divisions that offer to clients nonattest professional services (e.g., tax, personal financial planning, and management consulting). The owners and employees of Oldfirm become employees of one of PublicCo’s subsidiaries or divisions and may provide those nonattest services. In addition, the owners of Oldfirm form a new CPA firm (“Newfirm”) to provide attest services. CPAs, including the former owners of Oldfirm, own a majority of Newfirm (as to vote and financial interests). Attest services are performed by Newfirm and are supervised by its owners. The arrangement between Newfirm and PublicCo (or one of its subsidiaries or divisions) includes the lease of employees, office space and equipment; the performance of back-office functions such as billing and collections; and advertising. Newfirm pays a negotiated amount for these services.

APS Independence Rules for Covered Members

The term covered member in an APS includes both employed and leased individuals. The firm in such definition would be Newfirm in the example APS. All covered members, including the firm, are subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety. For example, no covered member may have, among other things, a direct financial interest in or a loan to or from an attest client of Newfirm.

Partners of one Newfirm generally would not be considered partners of another Newfirm except in situations where those partners perform services for the other Newfirm or where there are significant shared economic interests between partners of more than one Newfirm. If, for example, partners of Newfirm 1 perform services in Newfirm 2, such owners would be considered to be partners of both Newfirms for purposes of applying the independence rules.

* Terms shown in boldface type upon first usage in this interpretation are defined in ET section 92, Definitions.

AICPA Audit and Accounting Manual

AAM §10,200 App B
APS Independence Rules for Persons and Entities Other Than Covered Members

As stated above, the independence rules normally extend only to those persons and entities included in the definition of covered member. This normally would include only the “traditional firm” (Newfirm in the example APS), those covered members who own or are employed or leased by Newfirm, and entities controlled by one or more of such persons. Because of the close alignment in many APSs between persons and entities included in covered member and other persons and entities, to ensure the protection of the public interest, PEEC believes it appropriate to require restrictions in addition to those required in a traditional firm structure. Those restrictions are divided into two groups:

1. Direct Superiors. Direct Superiors are defined to include those persons so closely associated with a partner or manager who is a covered member, that such persons can directly control the activities of such partner or manager. For this purpose, a person who can directly control is the immediate superior of the partner or manager who has the power to direct the activities of that person so as to be able to directly or indirectly (e.g. through another entity over which the Direct Superior can exercise significant influence\(^1\)) derive a benefit from that person’s activities. Examples would be the person who has day-to-day responsibility for the activities of the partner or manager and is in a position to recommend promotions and compensation levels. This group of persons is, in the view of PEEC, so closely aligned through direct reporting relationships with such persons that their interests would seem to be inseparable. Consequently, persons considered Direct Superiors, and entities within the APS over which such persons can exercise significant influence\(^2\) are subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety.

2. Indirect Superiors and Other PublicCo Entities. Indirect Superiors are those persons who are one or more levels above persons included in Direct Superior. Generally, this would start with persons in an organization structure to whom Direct Superiors report and go up the line from there. PEEC believes that certain restrictions must be placed on Indirect Superiors, but also believes that such persons are sufficiently removed from partners and managers who are covered persons to permit a somewhat less restrictive standard. Indirect Superiors are not connected with partners and managers who are covered members through direct reporting relationships; there always is a level in between. The PEEC also believes that, for purposes of the following, the definition of Indirect Superior also includes the immediate family of the Indirect Superior.

PEEC carefully considered the risk that an Indirect Superior, through a Direct Superior, might attempt to influence the decisions made during the engagement for a Newfirm attest client. PEEC believes that this risk is reduced to a sufficiently low level by prohibiting certain relationships between Indirect Superiors and Newfirm attest clients and by applying a materiality concept with respect to financial relationships. If the financial relationship is not material to the Indirect Superior, PEEC believes that he or she would not be sufficiently financially motivated to attempt such influence particularly with sufficient effort to overcome the presumed integrity, objectivity and strength of character of individuals involved in the engagement.

---

\(^1\) For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section 82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

\(^2\) For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section 82] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.
Similar standards also are appropriate for Other PublicCo Entities. These entities are defined to include PublicCo and all entities consolidated in the PublicCo financial statements that are not subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety.

The rules for Indirect Superiors and Other PublicCo Entities are as follows:

A. Indirect Superiors and Other PublicCo Entities may not have a relationship contemplated by interpretation 101-1.A [ET section 101.02] (e.g., investments, loans, etc.) with an attest client of Newfirm that is material. In making the test for materiality for financial relationships of an Indirect Superior, all the financial relationships with an attest client held by such person should be aggregated and, to determine materiality, assessed in relation to the person’s net worth. In making the materiality test for financial relationships of Other PublicCo Entities, all the financial relationships with an attest client held by such entities should be aggregated and, to determine materiality, assessed in relation to the consolidated financial statements of PublicCo. In addition, any Other PublicCo Entity over which an Indirect Superior has direct responsibility cannot have a financial relationship with an attest client that is material in relation to the Other PublicCo Entity’s financial statements.

B. Further, financial relationships of Indirect Superiors or Other PublicCo Entities should not allow such persons or entities to exercise significant influence over the attest client. In making the test for significant influence, financial relationships of all Indirect Superiors and Other PublicCo Entities should be aggregated.

C. Neither Other PublicCo Entities nor any of their employees may be connected with an attest client of Newfirm as a promoter, underwriter, voting trustee, director or officer.

D. Except as noted in C above, Indirect Superiors and Other PublicCo Entities may provide services to an attest client of Newfirm that would impair independence if performed by Newfirm. For example, trustee and asset custodial services in the ordinary course of business by a bank subsidiary of PublicCo would be acceptable as long as the bank was not subject to rule 101 [ET section 101.01] and its interpretations and rulings in their entirety.

Other Matters

1. An example, using the chart below, of the application of the concept of Direct and Indirect Superiors would be as follows: The chief executive of the local office of the Professional Services Subsidiary (PSS), where the partners of Newfirm are employed, would be a Direct Superior. The chief executive of PSS itself would be an Indirect Superior, and there may be Indirect Superiors in between such as a regional chief executive of all PSS offices within a geographic area.

2. PEEC has concluded that Newfirm (and its partners and employees) may not perform an attest engagement for PublicCo or any of its subsidiaries or divisions.

3. PEEC has concluded that independence would be considered to be impaired with respect to an attest client of Newfirm if such attest client holds an investment in PublicCo that is material to the attest client or allows the attest client to exercise significant influence over PublicCo.

---

3 For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section 182] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.

4 For purposes of this Interpretation, significant influence means having the ability to exercise significant influence over the financial, operating or accounting policies of the entity, for example by (1) being connected with the entity as a promoter, underwriter, voting trustee, general partner or director, (2) being in a policy-making position such as chief executive officer, chief operating officer, chief financial officer or chief accounting officer, or (3) meeting the criteria in Accounting Principles Board Opinion No. 18 [AC section 182] and its interpretations to determine the ability of an investor to exercise such influence with respect to an entity. The foregoing examples are not necessarily all-inclusive.
4. When making referrals of services between Newfirm and any of the entities within PublicCo, a member should consider the provisions of Interpretation 102-2, *Conflicts of Interest* [ET section 102.03].

Statement on Quality Control Standards

Statements on Quality Control Standards (SQCSs) are issued by the Auditing Standards Board. Firms that are enrolled in an AICPA approved practice-monitoring program are obligated to adhere to quality control standards established by the AICPA.

Statement on Quality Control Standards No. 7, A Firm’s System of Quality Control (QC section 10)

Supersedes SQCSs Nos. 2–6. SQCS No. 1 was previously superseded by SQCS No. 2.

Effective date: Applicable to a CPA firm’s system of quality control for its accounting and auditing practice as of January 1, 2009.

### .14 Performance Evaluation

*To be completed after each engagement of 40 hours or more.*

<table>
<thead>
<tr>
<th>Name ______________________________</th>
<th>Classification ____________________________</th>
</tr>
</thead>
<tbody>
<tr>
<td>Client ___________________________</td>
<td>From ____________ To ____________</td>
</tr>
<tr>
<td>Describe work assigned: ____________________________________________________</td>
<td></td>
</tr>
</tbody>
</table>

In your opinion based on the staff member’s classification, should this assignment be considered:

- Demanding □
- Routine □

This individual is □ is not □ ready for increased responsibility. Explain ____________________________________________

#### Rating:

Enter comments which describe the staff member’s performance on this engagement. Rate the staff member on each of the items below as Outstanding (O), Very High (VH), Good (G), Below Normal (BN), or Not Applicable (NA).

[Support each caption with specific incidents or remarks.]

**Technical Knowledge:** Did the staff member possess adequate knowledge to function effectively at the level assigned? Did this knowledge encompass accounting principles, auditing standards, and tax accounting? Has the staff member kept current on recent developments and new pronouncements on professional practice matters as they affected this engagement?

<table>
<thead>
<tr>
<th>Rating:</th>
<th>O VH G BN NA</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ □ □ □ □</td>
<td></td>
</tr>
</tbody>
</table>

**Analytical Ability and Judgment:** How well did the staff member recognize problems, develop relevant facts, formulate alternative solutions, and decide on appropriate conclusions? Did the staff member distinguish between material and immaterial items? Was the staff member practical in adapting theory and experience to the individual circumstances of this client?

<table>
<thead>
<tr>
<th>Rating:</th>
<th>O VH G BN NA</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ □ □ □ □</td>
<td></td>
</tr>
</tbody>
</table>

**Written and Oral Expression:** Evaluate the effectiveness of the staff member’s letters, memoranda, and other forms of written communication. In conversation, did the staff member communicate intentions effectively? Were instructions understood the first time? Did the staff member sell ideas, obtain acceptance and action?

<table>
<thead>
<tr>
<th>Rating:</th>
<th>O VH G BN NA</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ □ □ □ □</td>
<td></td>
</tr>
</tbody>
</table>

---

AICPA Audit and Accounting Manual

AAM §10,300.14
Performance: Can you depend on the staff member for sustained, productive work? Were assignments organized and completed accurately in a reasonable amount of time? Did the staff member readily assume responsibility? Did the staff member meet time estimates and document work papers properly?
Rating: □ □ □ □ □

Development of Personnel: In assigning work, did the in-charge member make the most effective use of available talent in terms of getting the work done and in terms of developing staff members performing the work? Did the in-charge staff member tend to make assignments which were either too easy or too hard for his subordinates? Was the staff member readily accepted as a leader? Was the staff member effective in on-the-job coaching?
Rating: □ □ □ □ □

Client Relations: How well did the staff member relate to this client and gain his acceptance? How well did the staff member recognize and take advantage of practice development opportunities, through extension of services to this client?
Rating: □ □ □ □ □

Attitude: Did the staff member demonstrate a positive and professional approach to the assignment? Was this demonstrated by sustained effort in completing work? Was the assignment undertaken with enthusiasm and zest? Did the staff member respond in a positive way to suggestions and guidance from superiors? To what degree did the staff member make personal sacrifices to meet client requirements? Was the staff member a helpful member of the team? Did the staff member go out of his way to help an associate?
Rating: □ □ □ □ □

Personal Characteristics: Did the staff member possess self-confidence and was this confidence projected in an acceptable way? Were positive impressions created with this client and with associates? Did the staff member have a keen sense of what to do or say (tact)? Were clothes appropriate to professional work? Was the staff member well groomed?
Rating: □ □ □ □ □

## JOB EVALUATION REPORT

[For Assignments of Thirty (30) Hours or More]

| Name _______________________________________________________________ |
| Location ____________________________________________________________ |
| Engagement ________________________________________________________ |
| Assistant _____________________________ In-Charge ______________________ |

### A. PERFORMANCE ON THE JOB

1. **Technical Ability Demonstrated**
   - a) The purpose of the audit procedures planned was understood
   - b) Materiality was neither underestimated nor overestimated
   - c) Accounting theory and current releases of the profession were applied correctly
   - d) Federal and state income tax regulations were applied correctly

2. **Working Paper Evidence**
   - a) Documentation of work performance, including adequate indexing and cross referencing
   - b) Sound explanations and conclusions
   - c) Use of standard work papers
   - d) Legibility
   - e) Accuracy — absence of mathematical errors

3. **Completing This Job**
   - a) Meeting planned time estimates
   - b) Completing reports and tax returns
   - c) Following up the reviewer’s comments and making the necessary changes

4. **Client Reaction on This Job**
   - a) Getting along with the client’s employees
   - b) Interest in the client’s business

### B. ENGAGEMENT ADMINISTRATION — (For In-Charge Accountants Only)

1. **Effectiveness of Proper Planning**
   - a) Extent that the scope of the work related to internal control
   - b) Developing the work program

2. **Utilizing Staff Effectively and Efficiently**
   - a) Advance planning to minimize crises
   - b) Efficient use of staff on the job
   - c) On-the-job training of assistants

3. **Meeting Deadlines**
   - a) Completing the engagement in the planned time
   - b) Delivering completed pencil copies of the report and tax returns to the supervisor as agreed

4. **The Product**
   - a) Quality of report preparation, including adequate and informative disclosures
   - b) Quality of the management advice recommendations

5. **Practice Management**
   - a) Extending service
   - b) Ease of collecting for services performed

Review the following questions before answering them, using the following criteria:

- A *yes* answer should be considered for possible mention as a “strength.” If so, refer to it on the first page of this evaluation.
- A *no* answer should be considered for possible mention as a “development need.” If so, refer to it on the first page of this evaluation.

All answers should be considered in arriving at an overall rating on having met job requirements.

.18 Client/Engagement Acceptance and Continuation Checklist

Note: Acceptance of a new client normally is of critical importance to a small firm. Depending on the type of industry and the services to be provided, accepting a new client can affect nearly all aspects of a firm’s quality control system: Are the firm’s library and practice aids adequate? Do personnel have appropriate CPE? Does the firm need an outside consultant? The best time to document the acceptance decision is when a new audit or attestation client or engagement is signed, using a form such as the one below.

Name of prospective client: ____________________________________________________________________
Address and Phone No.: _____________________________________________________________________
__________________________________________________________________________________________
Name and title of contact at prospective client: ________________________________________________
__________________________________________________________________________________________
Form completed by: ___________________________________________ Date: ______________

Instructions
This form provides for information necessary to assess whether to accept a prospective client. The information should be obtained from discussions with the prospective client’s management, bankers, attorneys, credit services, and if applicable current or former independent CPA, from reviewing the client’s financial statements, regulatory agency reports, credit reports, and tax returns, and from other sources such as industry or accounting journals, etc. As much information as possible should be obtained before visiting the potential client. Depending on the type of engagement involved, some information requested on this form may not be applicable, or additional information may be necessary and should be attached.

Services and Reports Required

1. Describe the service and reports requested. _________________________________________________
   __________________________________________________________________________________________

2. Describe the reason the service is needed, including any regulatory requirements or third parties for which the service or report is intended. ______________________________________________________________________
   __________________________________________________________________________________________

3. What is the required completion date? ______________________________________________________
   __________________________________________________________________________________________

4. Describe any other services not requested for which there appears to be a need. __________________
   __________________________________________________________________________________________

5. What is the preliminary estimate of hours to complete the engagement? _________________________
   __________________________________________________________________________________________

6. Has the client imposed any restrictions on the scope of the engagement that might preclude expression of an unqualified report? ____________________________________________
   __________________________________________________________________________________________

7. Do we have the necessary expertise and staff to perform the engagement? (If not, how will we overcome this problem?) ________________________________
   __________________________________________________________________________________________

1 Certain items in this checklist have been reprinted from the Journal of Accountancy, Copyright © 1997 by AICPA.
Industry Practices and Conditions

8. In what industry does the company operate?_________________________________________________
   ____________________________________________________________________________________

9. Describe any specialized tax or accounting practices applicable to the industry._________________
   ____________________________________________________________________________________
   ____________________________________________________________________________________
   ____________________________________________________________________________________

10. Describe any economic, technological or competitive conditions or other recent developments in the
    industry that may affect the company’s operations._________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

11. Describe any special regulatory requirements applicable to the industry.______________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

12. Is the company in the development stage?_________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

Organization and Personnel

13. Company’s Legal Name: ______________________________________ Fiscal Year End: _____________
    ____________________________________________________________________________________

14. Type of legal entity (Corporation, S Corporation, partnership, proprietorship, etc.): ____________
    ____________________________________________________________________________________

15. List the major stockholders (partners or owners) of the company and their percentage of ownership. If
    applicable, obtain and attach a copy of the company’s organization chart.
    Name and (if applicable) Title % Ownership
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

16. List the principal members of management.
    Name and Title Stated Qualifications (education, training, and experience)
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

17. Briefly describe any existing or contemplated employee bonus arrangement (individual, title, method
    of computation), stock option, or pension (profit sharing) plans that may affect the engagement.
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________

18. List each location maintained by the company (including foreign locations, if any), the nature of the
    activity performed at each, and the approximate number of employees at each, i.e., plant, sales office,
    executive offices, etc.
    Location Activity No. of Employees
    ____________________________________________________________________________________
    ____________________________________________________________________________________
    ____________________________________________________________________________________
19. Inquire about possible transactions with related parties that may affect the engagement.

<table>
<thead>
<tr>
<th>Name of Related Party</th>
<th>Relationship</th>
<th>Type of Transaction</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Operations

20. Describe the nature of the company’s major assets and liabilities.

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

21. What are the company’s sources of revenue and marketing methods? Describe major products, customers, etc.).

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

22. If the company is economically dependent on a major customer, name the customer and approximate percentage of total revenue generated by this customer.

________________________________________________________________________________________
________________________________________________________________________________________

23. Describe the components of cost of goods sold and the company’s production process.

________________________________________________________________________________________
________________________________________________________________________________________

24. What are the major expenses of the company other than cost of goods sold?

________________________________________________________________________________________
________________________________________________________________________________________

25. Describe the company’s compensation methods, i.e., salary, hourly wage, commissions, piece work, union scale, etc.

________________________________________________________________________________________
________________________________________________________________________________________

26. What are the company’s major sources of financing, i.e., working capital loans, long term debt, leasing, equity, etc. Describe restrictive covenants on any loan agreements.

________________________________________________________________________________________
________________________________________________________________________________________

27. Is management sufficiently knowledgeable about its activities and financial condition?

________________________________________________________________________________________
________________________________________________________________________________________

28. Does it appear that the entity’s activities or resources are heavily concentrated in one or a few high-risk areas?

________________________________________________________________________________________
________________________________________________________________________________________
Accounting

29. Does the company maintain the following items? [Attach description, if appropriate.]
   a. Accounting manual? 
   b. Budget? 
   c. Cost accounting system? 
   d. Information technology? (indicate type of equipment and software) 
   e. Written credit policy? 

30. Briefly describe the accounting system and accounting responsibilities.

<table>

</tbody>
</table>

31. Describe the company’s completeness procedures and methods to insure that accounting transactions enter into the accounting system, i.e., that all shipments or services are invoiced, that all cash sales are recorded, and that all disbursements are recorded.

32. Describe any unusual features of the accounting system.
33. Are sufficient records available to perform the engagement?

________________________________________________________________________________________

________________________________________________________________________________________

34. Is management sufficiently knowledgeable about applicable accounting principles?

________________________________________________________________________________________

________________________________________________________________________________________

35. Does management understand accounting matters adequately to assume responsibility for proper valuation, presentation, and disclosure?

________________________________________________________________________________________

________________________________________________________________________________________

Tax Matters

36. Who prepares the tax returns?

________________________________________________________________________________________

37. Describe major differences between book and tax income, unusual tax elections, carry forwards or IRS examinations in process. If possible, review copies of the most recent 3 years of tax returns and attach them to this form.

________________________________________________________________________________________

________________________________________________________________________________________

Other Matters

38. Describe any significant problems that could affect the engagement, such as litigation or other contingencies, unusual agreements, and plans to acquire or dispose of significant assets, merge with another entity, enter a new area of business, convert to or expand use of information technology, etc.

________________________________________________________________________________________

________________________________________________________________________________________

39. Give the name of a current or former independent CPA.

________________________________________________________________________________________

a. Describe any disputes over accounting matters.

________________________________________________________________________________________

________________________________________________________________________________________

40. Describe any apparent problems or areas for improvement that were noted where our firm could provide additional service or recommendations.

________________________________________________________________________________________

________________________________________________________________________________________

41. Is the client relatively free from controversy and media coverage?

________________________________________________________________________________________

________________________________________________________________________________________

Independence

42. Would service to this client cause problems of independence or conflicts of interest because of relationships with other clients or members of the staff?

________________________________________________________________________________________

________________________________________________________________________________________

Fees

43. Based on inquiries with a current or former independent CPA, if applicable, indicate the amount of any unpaid fees and the reason for nonpayment.

________________________________________________________________________________________

________________________________________________________________________________________
44. If possible indicate the amount of fees charged by an existing or former independent CPA for the service being proposed. (The CPA or the potential client may be willing to furnish this information, or it might be obtainable from the financial statements or tax return.)

45. Describe any other indications that our firm might have a problem billing or collecting our fees.

46. Does the prospective fee justify pursuing this engagement?

Management Integrity

47. Have any of the following sources raised any concerns about management's integrity?
   a. Difficulty in obtaining information from management, or evasive, guarded or glib responses to inquiries.

48. If management is changing accountants, why is the change being made, and is the reason for the change acceptable?

49. Is there any reason to suspect that management would be uncooperative, unreasonable or otherwise unpleasant to work with?

50. Does the general integrity of the client seem satisfactory?

Other Comments or Observations

51. Give any other comments or observations that might affect our decision whether to prepare a proposal letter or its contents. Add attachments to this form, if necessary.

Conclusion

52. Should we accept/continue this client/engagement?

.20 Summary Monitoring/Inspection Report

I. Planning the Inspection

A. Inspection period

B. Composition of Inspection Team:
   1. Captain Position
   2. Team Member Position
   3. Team Member Position

C. Indicate matters that may require additional emphasis in the inspection and explain why.

D. Development of Inspection Program:
   1. Describe programs used and indicate any deviations therefrom.

D. Development of Inspection Program:
   2. Describe basis for selection of engagements:

E. Timing of Inspection:
   Commencement
   Completion of work
   Issuance of report

II. Scope of Work Performed

A. Indicate elements of quality control not addressed and give reasons.
### B. Engagements Reviewed:

________________________________________________________________________________
________________________________________________________________________________

III. Engagement Conclusions

A. Did the inspection disclose any situation that led the reviewers to conclude that the firm or office should consider:

1. Taking action to prevent future reliance on a previously issued report, pursuant to SAS No. 1 (AICPA, Professional Standards, vol. 1, AU sec. 561)?

   Yes ____________  No ____________

2. Performing additional auditing procedures to provide a satisfactory basis for a previously expressed opinion, pursuant to SAS No. 46 (AICPA, Professional Standards, vol. 1, AU sec. 390)?

   Yes ____________  No ____________

B. Did the inspection team conclude in any instances that the firm or office lacked a reasonable basis under the standards for accounting and review services for the report issued?

   Yes ____________  No ____________

If any of the answers above are yes, attach a description of such situations, including actions the firm or office has taken or plans to take.

IV. Findings and Recommendations:

Attach a copy of any reports issued, including a summary of any inspection findings and recommendations for improvement or list such findings and recommendations below.

Date ____________________________

---

2 Includes only audits conducted pursuant to the Government Auditing Standards, issued by the Comptroller General of the United States ("Yellow Book").
**Note:** A firm should make the analysis and assessment of the relevance of new professional pronouncements that can affect its practice, and consequently its quality control system, an ongoing activity. The AICPA’s *Journal of Accountancy* publishes many of the new pronouncements in its Official Releases column. Thus, a practitioner can review the new pronouncements monthly (or after tax season for the first three months of the year) and record that review on a checklist similar to the one below.

<table>

AICPA RESOURCE: Accounting & Auditing Literature

The AICPA has created a unique online research tool by combining the power and speed of the Web with comprehensive accounting and auditing standards. AICPA RESOURCE includes the AICPA, FASB and GASB libraries. You’ll find subscriptions to these titles:

- AICPA Professional Standards
- AICPA Technical Practice Aids
- AICPA’s Accounting Trends & Techniques
- AICPA Audit and Accounting Guides
- AICPA Audit Risk Alerts
- AICPA Financial Statement Preparation Manual
- AICPA Audit & Accounting Manual
- FASB Original Pronouncements
- FASB Current Text
- EITF Abstracts
- FASB Implementation Guides
- FASB’s Comprehensive Topical Index
- GASB Original Pronouncements
- Codification of Governmental Accounting and Financial Reporting Standards
- GASB Implementation Guides
- GASB’s Comprehensive Topical Index

Search for pertinent information from both databases by keyword and get the results ranked by relevancy. Print out important AICPA RESOURCE segments and integrate the literature into your engagements and financial statements. Available from anywhere you have Internet access, this comprehensive reference library is packed with the A & A guidance you need — and use — the most. All libraries are updated with the latest standards and conforming changes.

AICPA, FASB and GASB Libraries, No. WGLBY12

AICPA and FASB Libraries, No. WFLBY12

AICPA Library, No. WALBY12
