10,300  Sample Quality Control Forms

[The next page is 1.]
Updated as of June 1, 2009, this edition has been substantially revised to

- include 2008 and select 2009 alerts (AAM section 8000).

**Scope of Audit and Accounting Manual**

This publication brings together for continuing reference a set of nonauthoritative audit tools and illustrations prepared by the AICPA staff.

**Arrangement of Material in Audit and Accounting Manual**

The contents of this volume are arranged as follows:

- Introduction
- Compilation and Review
- Engagement Planning and Administration
- Internal Control
- Designing and Performing Further Audit Procedures
- Audit Documentation
- Correspondence, Confirmations, and Representations
- Alerts
- Accountants’ Reports
- Quality Control

AAM Section 1100

Introduction

.01 This manual has been prepared by the staff of the AICPA and issued as a nonauthoritative practice aid. The materials included in it are intended primarily as a reference source for conducting audit, review, and compilation engagements. The objective is to provide practitioners with the tools needed to help plan, perform, and report on their engagements. The manual is not intended to serve as a complete or comprehensive quality control system. The manual, where practicable, offers choices and alternatives rather than particular positions. The use of this or any other practice aid requires the exercise of individual professional judgment. The manual is not a substitute for the authoritative technical literature, and users are urged to refer directly to applicable authoritative pronouncements for the text of technical standards.

.02 This manual is intended to be used in connection with engagements of nonpublic entities and is not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.03 Some sections of the manual include quotations from Statements on Auditing Standards and other authoritative pronouncements. Those quotations are intended only to illustrate certain matters, not to serve as a substitute for careful study of the relevant pronouncements. Users of this practice aid are urged to refer directly to applicable authoritative pronouncements when appropriate. References are made throughout the manual to the original authoritative pronouncements and to their section numbers in AICPA Professional Standards to help users locate those authoritative pronouncements.

.04 The authors hope that the manual will be helpful to practitioners in the conduct of their audit and accounting practice. However, no generalized material, such as that included in this manual, can be a substitute for development and implementation by a firm of a system of quality control, which is appropriately comprehensive and suitably designed in relation to the firm’s organizational structure, its policies, and the nature of its practice.

.05 Explanation of References

AR = Reference to section number in AICPA Professional Standards (vol. 2) for Statements on Standards for Accounting and Review Services
AT = Reference to section number in AICPA Professional Standards (vol. 1) for Statements on Standards for Attestation Engagements
AU = Reference to section number in AICPA Professional Standards (vol. 1) for Statements on Auditing Standards
AUD = Reference to section number in the Auditing and Attestation Statements of Position in AICPA Technical Practice Aids
ET = Reference to section number in AICPA Professional Standards (vol. 2) for the Code of Professional Conduct, Interpretations of Rules of Conduct, and Ethics Rulings
FASB ASC = Reference to the Financial Accounting Standards Board Accounting Standards Codification™
GAAP = Generally accepted accounting principles in the United States

(continued)
This edition of the manual has been modified by the AICPA staff to include certain changes necessary due to the issuance of authoritative pronouncements since the last edition of the manual. Relevant guidance contained in official pronouncements issued through June 1, 2009, has been considered in the development of this edition of the manual. This includes relevant guidance issued up to and including the following:

- Revised interpretations issued through June 1, 2009, including Interpretation No. 1, “Use of Electronic Confirmations,” of AU section 330, *The Confirmation Process* (AICPA, *Professional Standards*, vol. 1, AU sec. 9330 par. .01–.08)
- SSARS No. 18, *Applicability of Statements on Standards for Accounting and Review Services* (AICPA, *Professional Standards*, vol. 2)

Users of this manual should consider guidance issued subsequent to those items in the preceding list to determine its effect on entities covered by this manual. In determining the applicability of a pronouncement, its effective date should also be considered.

**FASB Accounting Standards Codification™**

The accounting guidance in this manual, where such guidance exists, has been conformed to reflect reference to FASB ASC as it existed on June 1, 2009 (through FASB ASC Update 2009-179). Although FASB ASC is not effective at this date, FASB is expected to release it as authoritative July 1, 2009; therefore, this manual has been conformed to FASB ASC to assist you during this transition.

The manual is expected to be updated periodically. Changes will likely arise from three main sources:

1. Comments and suggestions from practitioners. Because this manual is a product of AICPA staff and not of a committee of practitioners, it is particularly important that practitioners advise the staff on any suggestions for material that could be improved or added.
2. Issuance of new official pronouncements.
3. Other additions to or deletions from the manual as a result of continued staff study.

AAM Section 1200

How to Use the Audit and Accounting Manual

Overview

.01 The Audit and Accounting Manual (AAM) is designed to provide practitioners with the tools needed to help plan, perform, and report on audit, review, and compilation engagements. The AAM is not intended to serve as a complete or comprehensive quality control system, and it is not intended to be used in connection with the audits of entities that are required to be audited under standards set by the Public Company Accounting Oversight Board. The AAM comprises the following sections.

<table>
<thead>
<tr>

</tbody>
</table>

Audits

.02 To perform an engagement in accordance with generally accepted auditing standards (GAAS), an auditor must comply with the General Standards, the Standards of Field Work, the Standards of Reporting, and the Quality Control Standards.

.03 The general standards are concerned with the qualifications of the auditor and the qualitative aspect of the work performed. They specifically address the auditor’s training and proficiency, independence, and due care in the performance of work.

.04 The Standards of Field Work address the manner used by the auditor to perform the audit. Each standard begins with the appointment of the auditor and ends with the auditor communicating to those responsible for the oversight of financial reporting of the entity being audited.

.05 The Standards of Reporting are concerned with the opinion the auditor renders on the client’s financial statements.

.06 The AAM will assist the auditor in performing an audit, in accordance with GAAS, in the following ways:

a. AAM section 10,000, Quality Control, includes sample forms that can be used by a firm to document its adherence to the AICPA requirement for a system of quality control for a CPA firm.
b. AAM section 3000, *Engagement Planning and Administration*, provides guidance in the planning stage. Included in this section are various formats of audit assignment controls and engagement letters.

d. AAM section 5000, *Designing and Performing Further Audit Procedures*, explains how the auditor should design and perform tests of controls, substantive procedures, or both, that are responsive to the assessed risks of material misstatement.

e. AAM section 6000, *Audit Documentation*, provides the auditor with a general discussion of the purpose of audit documentation.

f. AAM section 7000, *Correspondence, Confirmations, and Representations*, provides the auditor with numerous examples of confirmations, illustrative inquiries to legal counsel, representation letters, communications with audit committees, and a reliance letter.

g. AAM section 9000, *Accountants’ Reports*, addresses the format of the accountants’ report and provides numerous examples of the auditor’s report.

### Compilation and Review Services

.07 To perform either a review or a compilation engagement in accordance with Statements on Standards for Accounting and Review Services (SSARSs), an accountant must comply with the standards promulgated by the Accounting and Review Services Committee. As of the date of this manual, there have been 18 SSARSs issued. Refer to paragraph .10 of AAM section 2100, *Introduction*, for a complete list of the SSARSs that have been codified in the AICPA’s *Professional Standards*.

.08 The AAM will assist the accountant in performing compilation and review engagements in accordance with SSARS in the following ways:

a. AAM section 2200, *Engagement Planning and Administration*, provides guidance in the planning stage. Addressed are engagement letters, changes in the level of service for the engagement, sample acceptance form, sample information form, and sample engagement letters.

b. AAM section 2300, *Compilation Engagements*, provides sample procedures for compilation engagements, representation letters, and checklists.

c. AAM section 2400, *Review Engagements*, provides sample procedures for review engagements, representation letters, and checklists.

d. AAM section 2500, *Form and Content of Financial Statements*, provides guidance on the statements, notes, supplementary information, and subsequent discovery of facts.

e. AAM section 2600, *Reporting*, provides guidance on the basic reporting fundamentals for compilation and review engagements.

g. AAM section 2700, *Special Areas*, addresses other comprehensive bases of accounting, prescribed forms, and specified elements.

.09 It is suggested that the accountant also review the following areas for additional guidance when performing compilation and review engagements:
• Correspondence, Confirmations, and Representations (AAM section 7000)
• Quality Control (AAM section 10,000)

Alerts

.10 AAM section 8000, Alerts, is intended to provide accountants with an overview of recent economic, professional, and regulatory developments that may affect their engagements.

[The next page is 2001.]
AAM Section 2000
Compilation and Review

This section is a nonauthoritative other compilation and review publication as described in paragraph .07 of AR section 50. As such, the practice aid has no authoritative status; however, it may help an accountant understand and apply the Statements on Standards for Accounting and Review Services (SSARS).

If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. This section has been reviewed by the AICPA Audit and Attest Standards staff and, therefore, is presumed to be appropriate. The exhibits are for illustrative purposes only. They are included as conveniences for users of this manual who may want points of reference when preparing working papers or a report for a compilation or review engagement.

2710 Accountants’ Reports on Prescribed Forms, Specified Elements, Personal Financial Statements, and OCBOA Financial Statements 2710.01-10

[The next page is 2101.]
AAM Section 2100

Introduction*

.01 Statements on Standards for Accounting and Review Services (SSARSs) are issued by the AICPA Accounting and Review Services Committee (ARSC), the senior technical committee of the AICPA designated by its Council to issue pronouncements in connection with unaudited financial statements and other unaudited financial information of nonissuers. (A complete listing of SSARSs and the full text can be found in AICPA Professional Standards, vol. 2.) A nonissuer is defined as all entities except for those defined as issuers. An issuer is defined in Section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), the securities of which are registered under Section 12 of that act (15 U.S.C. 78l), or that is required to file reports under Section 15(d) (15 U.S.C. 78o(d)), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn. Thus, if an entity does not meet any of the definitions in Section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), it is a nonissuer.

Standards for Accounting and Review Services

.02 In accordance with paragraph .01 of AR section 50, Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), an accountant must perform a compilation or review of a nonissuer in accordance with SSARSs issued by the AICPA. SSARSs provide a measure of quality and the objectives to be achieved in both a compilation and review.

.03 The SSARSs are issued by ARSC and provide performance and reporting standards for compilations and reviews.

.04 Rule 202, Compliance With Standards, (AICPA, Professional Standards, vol. 2, ET sec. 202 par. .01), of the AICPA Code of Professional Conduct states that an AICPA member who performs compilations or reviews shall comply with standards promulgated by bodies designated by AICPA Council. Bodies designated by AICPA Council to promulgate technical standards are enumerated in appendix A to Rule 202 and include, among others, ARSC. The ARSC develops and issues standards in the form of SSARSs through a due process that includes deliberations in meetings open to the public, public exposure of proposed SSARSs, and a formal vote. The SSARSs are codified.

.05 The accountant should have sufficient knowledge of the SSARSs to identify those that are applicable to his or her engagement. The nature of the SSARSs requires an accountant to exercise professional judgment in applying them. The accountant should be prepared to justify departures from the SSARSs.

Interpretative Publications

.06 Interpretative publications consist of compilation and review interpretations of the SSARSs, appendixes to the SSARSs, compilation and review guidance included in AICPA Audit and Accounting Guides, and AICPA Statements of Position to the extent that those statements are applicable to compilation and review engagements. Interpretative publications are not standards for accounting and review services. Interpretative publications are recommendations on the application of the SSARSs in specific circumstances, including engagements for entities in specialized industries. An interpretative publication is issued after all ARSC

* In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
members have been provided an opportunity to consider and comment on whether the proposed interpretative publication is consistent with the SSARSs.

.07 The accountant should be aware of and consider interpretative publications applicable to his or her compilation or review. If the accountant does not apply the guidance included in an applicable interpretative publication, the accountant should be prepared to explain how he or she complied with the SSARSs provisions addressed by such guidance.

Other Compilation and Review Publications

.08 Other compilation and review publications include AICPA accounting and review publications not referred to above; AICPA’s annual Compilation and Review Alert; compilation and review articles in the Journal of Accountancy and other professional journals; compilation and review articles in AICPA’s The CPA Letter; continuing professional education programs and other instruction materials, textbooks, guide books, compilation and review programs, and checklists; and other compilation and review publications from state CPA societies, other organizations, and individuals. Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the SSARSs.

.09 If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. In determining whether an other compilation and review publication is appropriate, the accountant may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SSARSs and the degree to which the issuer or author is recognized as an authority in compilation and review matters. Other compilation and review publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

Overview of SSARSs and Interpretations

.10 ARSC has issued 18 SSARSs, which have been codified in the AICPA’s Professional Standards literature. They are as follows.

<table>
<thead>
<tr>
<th>Title</th>
<th>Summary</th>
<th>Professional Standards Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSARS No. 1, Compilation and Review of Financial Statements (December 1978)</td>
<td>Provides guidance to CPAs concerning the standards and procedures applicable to engagements to compile or review financial statements.</td>
<td>AR section 100</td>
</tr>
<tr>
<td>SSARS No. 2, Reporting on Comparative Financial Statements (October 1979)</td>
<td>Establishes standards for reporting on comparative financial statements of a nonissuer when financial statements of one or more periods have been compiled or reviewed in accordance with AR section 100.</td>
<td>AR section 200</td>
</tr>
</tbody>
</table>

1 The accountant is not expected to be aware of the full body of other compilation and review publications.

<td>Not published as a stand-alone section.</td>
</tr>
</tbody>
</table>

In addition to SSARS Nos. 1–18, interpretations are issued by the ARSC to provide timely guidance on applying SSARSs. An interpretation is not as authoritative as a SSARS, but accountants may have to justify departure from an interpretation’s guidance if the quality of their work is questioned. Interpretations of the SSARSs can be found in AR sections 9100, 9200, 9300, 9400, and 9600 of AICPA Professional Standards, volume 2.

**Accounting and Review Services Committee Proposed Revised Framework and Objectives for Performing and Reporting on Compilation and Review Engagements**

The ARSC issued an exposure draft that would revise the standards for compilation and review engagements. The changes would affect the interplay between the standards and independence rules, permitting an accountant to issue a review report on financial statements when the accountant’s independence is impaired by performing nonattest services that were designed to improve the reliability of the client’s financial information.

† SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. Due to the effective date, SSARS No. 18 has not been incorporated into the text of this edition.
The draft includes a trio of proposed standards: Framework and Objectives for Performing and Reporting on Compilation and Review Engagements, Compilation of Financial Statements, and Review of Financial Statements. In drafting the proposed standards, the ARSC considered recommendations from the Private Company Practice Section (PCPS) Reliability Task Force. ARSC and PCPS believe the proposed standards will respond to many concerns of smaller business owners, users of small business financial statements, and CPAs who serve smaller entities.

The PCPS task force recommended ARSC consider revising its standards for situations in which an accountant’s independence is impaired in connection with the performance of a nonattest service relating to the design or operation of an aspect of internal control over financial reporting. These nonattest services help management prepare higher quality or more reliable financial statements.

The proposed standards would also harmonize the AICPA’s review standard with the International Auditing and Assurance Standards Board’s International Standard on Review Engagements No. 2400, Engagements to Review Financial Statements.

Significant proposed changes to the SSARSs include the following:

- The introduction of new terms such as moderate assurance, review evidence, and review risk to the review literature to harmonize with international review standards.
- A discussion of materiality in the context of a review engagement.
- A requirement that an accountant establish an understanding with management regarding the services to be performed through a written communication (that is, an engagement letter).
- The establishment of enhanced documentation requirements for compilation and review engagements.
- Guidance for practitioners who are engaged to perform a compilation or review engagement when they have also been engaged to perform nonattest services. The guidance includes reporting requirements for instances in which the accountant’s independence is impaired due to the performance of these services.
- The ability for an accountant to include a general description in the accountant’s compilation report regarding the reason(s) for an independence impairment.

The proposed effective date is for compilations and reviews of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

The proposed SSARSs are available for download at www.aicpa.org/download/auditstd/ED_Reliability_SSARS.pdf.

**Determining Applicability of AR section 100**

Paragraph .04 of AR section 100 defines a compilation of financial statements and a review of financial statements. A compilation of financial statements is defined as a service, the objective of which is to present, in the form of financial statements, information that is the representation of management (owners) without undertaking to express any assurance on the financial statements. A review of financial statements is defined as a service, the objective of which is to express limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with generally accepted accounting principles (GAAP).

Paragraph .04 of AR section 100 defines management as follows:

The person(s) responsible for achieving the objectives of the entity and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management is responsible for
the financial statements, including designing, implementing, and maintaining effective internal control over financial reporting.

.21 Paragraph .04 of AR section 100 defines those charged with governance as follows:

The person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity’s financial statements (in other cases, management has this responsibility). In some entities, governance is a collective responsibility that may be carried out by a board of directors, a committee of the board of directors, a committee of management, partners, equivalent persons, or some combination thereof. Those charged with governance are specifically excluded from management, unless they perform management functions.

.22 Paragraph .04 of AR section 100 defines a financial statement as follows:

A presentation of financial data, including accompanying notes, derived from accounting records and intended to communicate an entity’s economic resources or obligations at a point in time, or the changes therein for a period of time, in accordance with generally accepted accounting principles (GAAP) or an OCBOA. Reference in the SSARSs to GAAP include, where applicable, an OCBOA. Financial forecasts, projections, and similar presentations, and financial presentations included in tax returns are not financial statements for purposes of this section. The following financial presentations are examples of financial statements and are not meant to be all-inclusive:

Appropriate GAAP financial statement titles:
- Balance sheet
- Statement of income
- Statement of comprehensive income
- Statement of retained earnings
- Statement of cash flows
- Statement of changes in owners’ equity
- Statement of assets and liabilities (with or without owners’ equity accounts)
- Statement on revenues and expenses
- Statement of financial position (condition)
- Statement of activities
- Summary of operations
- Statement of operations by product lines

Appropriate OCBOA financial statement titles:
- Balance sheet—cash basis
- Statement of assets and liabilities arising from cash transactions
- Statement of assets, liabilities, and stockholders’ equity—income tax basis
- Statement of revenue collected and expenses paid
- Statement of revenue and expenses—income tax basis
- Statement of income—statutory basis
- Statement of operations—income tax basis
.23 AR section 100 is applicable whenever an accountant submits unaudited financial statements of a nonissuer to a client or third parties. In accordance with paragraph .04 of AR section 100, submission of financial statements is defined as “presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.”

.24 Two actions are necessary in order to submit financial statements:

- Prepare financial statements, either manually or through the use of computer software, and
- Present the financial statements to a client or third party.

.25 Technical Questions and Answers (TIS) section 9150.25, “Determining Whether Financial Statements Have Been Prepared by the Accountant” (AICPA, Technical Practice Aids), provides additional guidance regarding what factors an accountant considers in determining whether he or she has prepared financial statements when his or her work effort results in or contributes to the existence of financial statements. Due to computer technology, it is often unclear whether existing financial statements have been “prepared” by an accountant or by management. Some factors that an accountant may consider include the following:

- The process used to create the financial statements. If an accountant takes a client’s trial balance and puts the accounts into a format that would represent a financial statement, then an accountant has probably prepared the financial statements. The less an accountant has to do with creating the statements, the less likely an accountant would be deemed to have prepared the statements.
- Whether the client engaged the accountant to prepare financial statements or reasonably expected that as part of the professional services engagement the accountant would prepare financial statements. An accountant may determine that he or she prepared financial statements even when not so engaged if, as part of an accounting or bookkeeping services engagement, in the accountant’s professional judgment, the client reasonably expected that the existing financial statements were prepared as a product of that engagement.
- The extent of work effort that an accountant contributed to the existence of the financial statements. For example, if an accountant is intricately involved in adjusting the general ledger and other accounts that are, in turn, presented in a financial statement format, the more likely an accountant may be viewed as preparing the financial statements. On the other hand, if an accountant is not very involved in the accounting process, the less likely that an accountant would be deemed to have prepared the financial statements.
- Where the underlying accounting information resides. If all the accounting data reside on the accountant’s computer, it is more likely that the accountant is deemed to have prepared the financial statements. However, based on the facts and circumstances of the situation, an accountant may conclude that he or she prepared financial statements through the use of accounting or bookkeeping software utilized by the client.

Considerations such as who printed the financial statements or the location at which an accountant’s services were performed (for example, at the client’s location or the accountant’s location) are generally not factors in determining whether the accountant has prepared financial statements.

.26 The term presenting is also not defined in SSARSs. Again, the accountant will have to use his or her professional judgment to determine if financial statements have been presented to a client. Obviously, physically presenting printed financial statements would meet the definition used here. Other situations, especially those involving electronic presentation (for example, via e-mail) may be carefully considered.

.27 The accountant may wish to address the issue of submission early in engagement planning.
AAM Section 2200

Engagement Planning and Administration

.01 It is important to remember that when engaged to provide compilation or review services, the accountant shall comply with Rules 201, General Standards, and 202, Compliance With Standards (AICPA, Professional Standards, vol. 2, ET sec. 201 par. .01 and ET sec. 202 par. .01, respectively), of the AICPA Code of Professional Conduct. Rule 201 states that an AICPA member shall comply with the following standards and any interpretations thereof by bodies designated by its Council:

- **Professional competence.** Undertake only those professional services that the member or the member’s firm can reasonably expect to be completed with professional competence.
- **Due professional care.** Exercise due professional care in the performance of professional services.
- **Planning and supervision.** Adequately plan and supervise the performance of professional services.
- **Sufficient relevant data.** Obtain sufficient relevant data to afford a reasonable basis for conclusions or recommendations in relation to any professional services performed.

.02 Rule 202 states that an AICPA member who performs compilations or reviews shall comply with standards promulgated by bodies designated by the AICPA Council. Bodies designated by the AICPA Council to promulgate technical standards are enumerated in appendix A to Rule 202 and include, among others, Accounting and Review Services Committee (ARSC). The ARSC develops and issues standards in the form of Statements on Standards for Accounting and Review Services (SSARSs) through a due process that includes deliberations in meetings open to the public, public exposure of proposed SSARSs, and a formal vote. The SSARSs are codified.

Client and Engagement Selection

.03 Prior to accepting an engagement to perform a compilation or review for all prospective or existing clients, the accountant may consider if he or she wishes to be, or continue to be, associated with them. Factors such as the ability of the accountant to adequately serve the client, the fee arrangement, and client integrity may be considered.

.04 The firm’s client acceptance and continuance policies represent a key element in mitigating litigation and business risk. The integrity and reputation of a client’s management could reflect on the reliability of the client’s accounting records and financial representations and, therefore, on the firm’s reputation or involvement in litigation.

.05 The accountant may consider the following elements in determining whether or not to accept a client. Certain of these elements may not be applicable to every engagement. Those elements the accountant might consider include the following:

- Information that might bear on the integrity or competence of management. Is there information that gives reason to doubt the integrity or competence of management?
- Past experience with management. Have past experiences on other engagements been positive?

\* In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
• Independence and objectivity considerations.
• Communication with predecessor accountants or auditors.
• Assessment of management’s commitment to the appropriate application of generally accepted accounting principles. Ask the prospective client about its significant accounting policies.
• Assessment of management’s commitment to implementing and maintaining effective internal control. Ask management about its commitment to implementing and maintaining effective internal control including antifraud programs and controls. Ask about the entity’s control environment, risk assessment process, information and communications systems relevant to financial reporting, and control and monitoring activities that are in place, and any changes that management believes can be made to enhance the effectiveness of the entity’s internal control.
• Assessment of the entity’s financial viability.
• Inquiry of third parties.
• Other considerations. The following listing of other considerations is not intended to be all inclusive, and the accountant may consider whether other conditions are present that may create significantly increased risk, and carefully assess those conditions that are identified:
  — Restrictions on scope of services
  — Entities under common control
  — One-time engagements
  — Business and industry environment

.06 As part of the client acceptance procedures, a firm should consider its ability to provide professional services, based on industry expertise, size of engagement, and personnel available to staff the engagement.

.07 Some of the following procedures may help when evaluating a potential client:
• Gain access to available financial information. Review the prior year’s financials, with emphasis on leverage for debt. Look at the client’s assets and sources of income, as well as the current condition of accounting records.
• Review S&P, Moody’s, or other publications. Many localities provide a local or regional S&P in conjunction with the Daily Journal of Commerce or similar business publication. There is a plethora of available information on the Web. In addition, many firms offer database searches of financial, legal, and operational information, as well as personal information about key executives. Check the court dockets (including the U.S. Bankruptcy and Tax Court dockets) in the area where the client is domiciled.
• Meet with financial persons of the company. Ask for a brief overview of their internal practices and procedures, the business plan, bylaws, staff turnover, and so on. Representatives from other departments may provide information as well.
• Discuss the prospective client with former accountants (after the client provides written authorization).

.08 It is often useful to complete a client acceptance and continuance form to assist in determining whether or not to accept a client. An illustrative client acceptance form can be found in paragraph .65.

Documentation

.09 Whether or not an engagement is accepted or a professional relationship continued, the firm may document its consideration of the elements of the acceptance and continuance process. If the prospective client becomes or is continued as an attest client of the firm, the firm should comply with its document retention policies regarding the client acceptance or continuance consideration. The documentation with respect to prospective clients not accepted need only be retained for purposes of review by the appropriate level of firm management.
When issues have been identified and the firm has decided to accept or continue the client relationship or a specific engagement, the firm should document how the issues were resolved.

### Client Needs

When helping the client decide what level of service is appropriate, the accountant may wish to give special consideration to the issues of independence and the requests of bankers and other creditors on the client.

Several issues for the client to consider in determining the best type of engagement include the following:

- **Needs of third parties.** Does a third party (for example, a bank) need financial statements on a regular basis?

- **Cost-benefit considerations.** Which engagement can be performed at a reasonable cost to the client?

If the client does not need audited financial statements, the client can choose from, among others, the following types of engagements:

- A review (if the accountant is independent)
- A compilation (the minimum level of service required if third parties will use the financial statements)
- Bookkeeping services (available if the procedures do not include the submission of financial statements)

### Compilation Considerations

Paragraph .04 of AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), defines a **compilation** as follows:

A service, the objective of which is to present in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements.

An engagement to compile financial statements does not require the accountant to make inquiries or perform other procedures to verify, corroborate, or review information supplied by management but, simply, to place the information into the form of financial statements. However, the accountant may make inquiries or perform other procedures.

An accountant’s compilation report is required to accompany the compiled financial statements when the financial statements are expected to be used by a third party or the accountant is engaged to report on the financial statements. If the financial statements are not expected to be used by a third-party and the client has not engaged the accountant to report on the compiled financial statements, the accountant may elect to not report on the financial statements provided the accountant has obtained a written understanding of the engagement with the client.

The accountant must perform the engagement in accordance with AR section 100.

If the client does not need compiled financial statements, the client may, instead, choose to have the accountant perform only bookkeeping services. Other than the broad, general ethical guidance available in ET section 201 of the AICPA Code of Professional Conduct, there are no authoritative standards for bookkeeping services. Thus, it is advisable that the accountant establish a written understanding with the client concerning bookkeeping services. This understanding may include the following:

---

1 See paragraph .15 for more information about types of compilations.

AICPA Audit and Accounting Manual
A description of the nature and limitations of the services

A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts

A written engagement letter for a bookkeeping services engagement is important because there are no specific standards to follow for these types of engagements. Other professional engagements, such as audits, reviews, and compilations, include the added benefit of authoritative standards that define the engagement objectives, limitations, communication, and so on.

Independence Issues

If an accountant is not independent, he or she can perform a compilation service (with report modification). If the client needs reviewed or audited financial statements, the nonindependent CPA may refer the client to another CPA. The primary rules governing independence are found in the Independence, Integrity, and Objectivity section of the AICPA Code of Professional Conduct. The independence standards are contained in Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. 01), along with the associated interpretations and ethics rulings. Rule 101 states that “a member in public practice shall be independent in the performance of professional services as required by standards promulgated by bodies designated by Council.”

In the final analysis, independence in mental attitude means objective consideration of facts, unbiased judgments, and honest neutrality on the part of the CPA in forming and expressing conclusions. Independence in mental attitude presumes an undeviating concern for an unbiased conclusion.

The appearance of independence is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests.

Interpretation No. 101-3, “Performance of nonattest services,” of ET section 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. 05), states that a member who performs attest services should not perform management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client’s management in performing its functions and making decisions.) If a member is engaged to perform nonattest services, the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, or experience, or some combination, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed
- Accept responsibility for the results of the services

The member should be satisfied that the client will be able to meet all these criteria and to make an informed judgment on the results of the member’s nonattest services. In assessing whether the designated individual possesses suitable skill, knowledge, or experience, or some combination, the member should be satisfied that the individual understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or re-perform the services. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with suitable skill, knowledge, or experience, or some combination, to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member’s provision of nonattest services would impair independence. Before performing nonattest services, the member should establish and document in writing his or her understanding with the client (board of directors, audit committee, or management, as appropriate in the circumstances) regarding the following:

- Objectives of the engagement
- Services to be performed
• Client’s acceptance of its responsibilities
• Member’s responsibilities
• Any limitations of the engagement

Practice Tip
The documentation requirement does not apply to nonattest services performed prior to the client becoming and attest client.

.25 Interpretation No. 101-3 provides examples of nonattest services and whether performance of those services would impair independence.

.26 As with many rules and standards of the profession, the guidance for independence is continually evolving to meet the developments and pressures facing the profession. Nevertheless, CPAs and their firms should take steps to ensure they meet the independence requirements before performing any review engagement service for a client.

Understanding the Engagement

.27 Paragraph .05 of AR section 100 states that the accountant should establish an understanding with the entity, preferably in writing, regarding the services to be performed. If the engagement is to compile financial statements not expected to be used by a third party, a written communication is required. (See paragraphs .24–.25 of AR section 100.)

Practice Tip
Interpretation No. 31, “Preparation of Financial Statements for Use by an Entity’s Auditors,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. 136–137), indicates that in situations when a client engages an accountant other than its auditor to prepare unaudited financial statements on behalf of management and those financial statements are provided by management to its outside auditor for the purposes of the annual audit, the auditor, who is a third party, is not deemed to be a user of the unaudited financial statements.

Establishing an Understanding With the Client

.28 As noted in the previous paragraph, paragraph .05 of AR section 100 states the CPA should establish an understanding with the client. This understanding should include the following:

   a. A description of the nature and limitations of the services to be performed.
   b. A description of the report, if a report is to be issued.
   c. A statement that the engagement cannot be relied upon to detect errors, fraud, or illegal acts.
   d. A statement that the accountant will inform the appropriate level of management of any material errors and of any evidence or information that comes to the accountant’s attention during the performance of compilation or review procedures that fraud or an illegal act may have occurred.2 The accountant need not report any matters regarding illegal acts that may have occurred that are clearly

---

2 Whether an act is, in fact, fraudulent or illegal is a determination that is normally beyond the accountant’s professional competence. An accountant, in reporting on financial statements, presents himself or herself as one who is proficient in accounting and compilation or review services. The accountant’s training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his or her attention may be fraudulent or illegal. However, the determination as to whether a particular act is fraudulent or illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law.

AICPA Audit and Accounting Manual

AAM §2200.28
inconsequential and may reach agreement in advance with the entity on the nature of any such matters to be communicated.

.29 If the financial statements are not expected to be used by third parties (management-use-only compilation), the documentation of understanding should include the following descriptions or statements, according to paragraph .25 of AR section 100:

- The nature and limitations of the services to be performed.
- A compilation is limited to presenting in the form of financial statements information that is the representation of management.
- The financial statements will not be audited or reviewed.
- No opinion or any other form of assurance on the financial statements will be provided.
- Management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.
- Acknowledgement of management’s representation and agreement that the financial statements are not to be used by third parties.
- The engagement cannot be relied upon to disclose errors, fraud, or illegal acts.

.30 According to paragraph .25 of AR section 100, the documentation of understanding should also address the following additional matters, if applicable:

- Material departures from generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting (OCBOA) may exist, and the effects of those departures, if any, may not be disclosed.
- Substantially all disclosures (and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted.
- Lack of independence.
- Reference to any supplementary information.

.31 A written engagement letter, though not required in a traditional compilation engagement, provides a means of formalizing the understanding between the accountant and the client concerning the services to be rendered. Engagement letters are advantageous for the following reasons:

- They help to avoid client misunderstandings.
- They help to avoid staff misunderstandings.
- They reduce potential legal liability.
- They improve practice management.
- They clarify contractual obligations.

What to Include in an Engagement Letter

.32 The accountant may include the in the engagement letter the following items, which are suggestions only and do not represent authoritative requirements:

- Identification of the client
- Record retention policy
- Description of the services to be provided
- Responses to subpoenas and outside inquiries
- Staffing of the engagement
• Explanation of how fees and costs will be billed
• Description of client responsibilities
• Payment terms
• Designation of client contacts
• Consequences of nonpayment
• Timing of the work
• Alternative dispute resolution
• Consequences of extending completion deadlines
• Withdrawal and termination
• Requests for additional services
• Client signature
• Client communications required by the AICPA
• Provisions to resolve potential ethical conflicts
• Any matter or terms unique to an engagement that are agreed upon in advance of rendering services

Overcoming Client Resistance to an Engagement Letter

.33 If the accountant encounters a situation in which the client exhibits reluctance about or resentment to an engagement letter, presenting the engagement letter face-to-face usually is sufficient to overcome any resistance on the part of the client.

.34 As an alternative to having the client sign an engagement letter, the accountant may consider developing a letter of understanding and mailing it to the client as a confirmation of the oral understanding. If an engagement letter is not obtained, the accountant may prepare a memorandum for the working papers describing the understanding with the client.

.35 Management is not required to sign the engagement letter, but it is preferable and highly advisable. Obtaining management’s signature on the engagement letter helps to ensure that management has read and understands the letter and the engagement. If the engagement letter is mailed to the client, it may be advisable to send the letter by certified mail or another means that would provide proof of receipt. In any case, a copy of the engagement letter is typically included in the working papers.

Engagement Letters for Monthly, Quarterly, or Comparative Statements

.36 One engagement letter can be drafted to cover financial statements issued for a period of time, such as a year, or for comparative financial statements issued for multiple periods. It is also possible to use one engagement letter for all services to be performed (for example, compilation, review, consulting, bookkeeping, and tax services). However, the accountant should carefully evaluate addressing multiple levels of service (for example, compilation and review) in one engagement letter because this can confuse the client.

Minimizing Liability to Third Parties

.37 In certain cases, it may be beneficial to identify in the engagement letter any third parties that the accountant knows will use the compilation or review report to limit the ability of unknown third parties’ use of the financial statements. For example, if the accountant knows at the time of the engagement that the client is negotiating with a bank for a loan of $100,000, the following language might be added to the engagement letter:

We understand that you are negotiating with Last National Bank for a loan of $100,000 and that you will present the compiled [reviewed] financial statements and our report thereon to Last National Bank. We
are not aware of any other persons, entities, or limited groups of persons or entities for whose use our report is intended or contemplated.

.38 The use of language such as this in engagement letters varies in practice. Some accountants feel that the language may offend clients or actually increase the likelihood of litigation from the identified third party, or both. Before adding such language, the accountant may wish to consult with legal counsel.

.39 Illustrative engagement letters for compilation engagements are presented in paragraphs .66–.67.

Practice Tip
The accountant should carefully evaluate adding language about additional services to the engagement letter. Also, be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by the accountant on the engagement. The accountant also may ensure that a final engagement letter is always issued in such circumstances.

Change in Engagement Level of Service

.40 Occasionally, during the course of an engagement, the client may request that the accountant change the nature of the engagement. The request may be for a

- step-up—for example, from a compilation to a review.
- step-down—for example, from an audit to a review or compilation.
- step-down—for example, from a review to a compilation.
- change in subject-matter—for example, from a compilation of full disclosure financial statements to a compilation of financial statements that omit substantially all disclosures.
- change in service—for example, from a compilation to bookkeeping services.

Step-Ups

.41 AR section 100 does not specifically address step-ups. Generally, step-ups pose no issues of great concern. The accountant might

- determine what additional procedures and standards are required for the level of service requested.
- determine whether it is possible and practical to perform the procedures and comply with the standards.
- revise the understanding with the client.

.42 If the client prepares financial statements for third-party use, the accountant may compile, review, or audit the financial statements for that client and comply with the reporting requirements in AR section 100. The accountant may do this even if he or she has previously compiled the financial statements for management’s use only.

Practice Tip
The accountant may want to include language in the engagement letter alerting the client to the fact that if it prepares financial statements for third-party use, the accountant may compile, review, or audit the financial statements in a separate engagement.
Step-Downs and Changes in Service

Step-Down From Audit to Review or Compilation

.43 Paragraphs .86–.91 of AR section 100 discuss 3 reasons that might cause a client to request a change from an audit engagement to another type of engagement after an audit has begun. They are as follows:

A change in circumstances affecting the entity’s requirement for an audit

- For example, a bank may no longer require an audit because a line-of-credit is reduced to a level that does not require audited financial statements.
- Generally, a step-down, in this case, is acceptable.

A misunderstanding as to the nature of an audit, review, or compilation

- Generally, a step-down, in this case, is acceptable.
- The accountant may consider explaining all of the options available to the client.

A restriction on the scope of the audit, whether imposed by the client or caused by circumstances

- Carefully consider the implications of a scope restriction
- Paragraph .89 of AR section 100 describes the following 2 circumstances that would preclude a step-down:
  - The client has prohibited the accountant from corresponding with the entity’s legal counsel.
  - The client has refused to provide the accountant with a signed representation letter.

Step-Down From Review to Compilation

.44 Paragraph .86 of AR section 100 lists the following 3 reasons that might cause a client to request a change after a review has begun:

A change in circumstances affecting the entity’s requirement for a review

- For example, a bank may no longer require a review because a line-of-credit is reduced to a level that does not require reviewed financial statements.
- Generally, a step-down, in this case, is acceptable.

A misunderstanding as to the nature of a review or compilation

- Generally, a step-down, in this case, is acceptable.
- The accountant may consider explaining all of the options available to the client.

A restriction on the scope of the inquiries or analytical procedures, whether imposed by the client or caused by circumstances.

- Carefully consider the implications of a scope restriction.
- Client refusal to provide the accountant with a signed representation letter would preclude a step-down.

Change in Subject Matter From Full Disclosure Financial Statements to Financial Statements That Omit Substantially All Disclosures

.45 The accountant can agree to a request to change in subject matter from a compilation with full disclosure financial statements to a compilation with financial statements that omit substantially all disclosures only if, to the best of his or her knowledge, the omission of disclosures is not intended to mislead those who might reasonably be expected to use the statements.
Step-Down From a Compilation to a Bookkeeping Engagement

.46 The accountant can agree to a request to step-down from a management-use-only compilation to bookkeeping services if the accountant feels that the services will not constitute preparing and presenting financial statements to the client or third parties.

Communications Between Predecessor and Successor Accountants

.47 AR section 400, Communications Between Predecessor and Successor Accountants (AICPA, Professional Standards, vol. 2), establishes requirements and guidance regarding communication between predecessor and successor accountants. Unlike AU section 315, Communications Between Predecessor and Successor Auditors (AICPA, Professional Standards, vol. 1), which establishes requirements and guidance regarding communication between predecessor and successor auditors, AR section 400 does not establish requirements for a successor accountant to communicate with a predecessor accountant in connection with acceptance of a compilation or review engagement, but he or she may believe it is beneficial to obtain information that will assist in determining whether to accept the engagement. The successor accountant may consider making inquiries of the predecessor accountant when circumstances such as the following exist:

- Information obtained about the prospective client and its management and principals is limited or requires special attention.
- The change in accountants occurs substantially after the end of the accounting period for which financial statements are to be compiled or reviewed.
- The client has frequently changed accountants.

.48 The successor accountant should bear in mind that the predecessor accountant and the client may have disagreed about accounting principles, procedures applied by the predecessor accountant, or similarly significant matters.

.49 The successor accountant should request permission from the prospective client to make any inquiries of the predecessor accountant. Except as permitted by the AICPA Code of Professional Conduct, an accountant is precluded from disclosing any confidential information obtained in the course of an engagement unless the client specifically consents. Accordingly, if the successor accountant decides to communicate with the predecessor, the successor accountant should request the client to (a) permit the successor accountant to make inquiries of the predecessor accountant and (b) authorize the predecessor accountant to respond fully to those inquiries. If the prospective client refuses to permit the predecessor accountant to respond or limits the response, the successor accountant should inquire about the reasons and consider the implications of that refusal in connection with acceptance of the engagement (see paragraph .04 of AR section 400).

Inquiries Regarding Acceptance of the Engagement

.50 According to paragraph .05 of AR section 400, if a successor accountant decides to communicate with the predecessor accountant, either orally or in writing, the inquiries should be specific and reasonable regarding matters that will assist the successor accountant in determining whether to accept the engagement. Matters subject to inquiry may include the following:

- Information that might bear on the honesty or integrity of management (owners)
- Disagreements with management (owners) about accounting principles or the performance of certain compilation or review procedures or similarly significant matters
- Cooperation from management (owners) when additional or revised information is needed
- Predecessor’s knowledge of any fraud or illegal acts perpetrated within the client
- Predecessor’s understanding of the reason for the change of accountants
.51 Paragraph .06 of AR section 400 states that the predecessor accountant, when authorized by the client, should respond promptly and fully to the inquiries on the basis of known facts. If the predecessor accountant decides, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor accountant should indicate that the response is limited. (Note: Unpaid fees are not considered to be an unusual circumstance for purposes of this paragraph; however, see the following paragraph that discusses paragraph .08 of AR section 400) The successor accountant should consider the reasons and consider the implications of such a response in connection with acceptance of the engagement.

.52 Paragraph .08 of AR section 400 states that the successor accountant may review the predecessor’s working papers. In these circumstances, the successor accountant should request the client to authorize the predecessor accountant to allow access. Ordinarily, the predecessor accountant should make available certain working papers relating to matters of continuing significance and those relating to contingencies. However, valid business reasons may lead the predecessor accountant to decide not to allow access to the working papers. Unpaid fees constitute a valid business reason to deny access to the predecessor accountant’s working papers. The predecessor accountant may decide to reach an understanding with the successor accountant about the use of the working papers. Before permitting access to the working papers, the predecessor accountant may obtain a written communication from the successor accountant regarding the use of the working papers. The appendix to AR section 400 contains an illustrative successor accountant acknowledge-ment letter that is presented for illustrative purposes only and not required by professional standards. In addition, a predecessor accountant is not obligated to make himself or herself or the working papers available to more than one prospective successor accountant.

Materially Misleading Financial Statements

.53 If during the engagement, the successor accountant becomes aware of information that causes him or her to believe that the financial statements reported on by the predecessor accountant may need to be revised, the successor accountant should request the client to communicate the matter to the predecessor accountant. If the client refuses to do so or if the predecessor accountant’s response is inadequate, the successor accountant should evaluate (a) possible implications for the current engagement and (b) whether to resign from the engagement. Furthermore, the successor accountant may decide to consult with legal counsel in determining an appropriate course of further action.

Subsequent Discovery of Facts

.54 After compiling or reviewing a client’s financial statements and issuing a report, the accountant may become aware of facts that lead him or her to believe that information supplied by the entity may have been incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts. Because of the variety of conditions that might be encountered, some of the procedures discussed subsequently are necessarily set out only in general terms; the specific actions to be taken in a particular case may vary with the circumstances. The accountant would be well advised to consult with his or her legal counsel and insurance provider when he or she encounters the circumstances to which this section may apply because of legal implications that may be involved in actions contemplated herein.

.55 As stated in paragraph .78 of AR section 100, after the date of the accountant’s compilation or review report, the accountant has no obligation to perform other compilation or review procedures with respect to the financial statements, unless new information comes to his or her attention. However, when the accountant becomes aware of information that relates to financial statements previously reported on by him or her, but that was not known to the accountant at the date of the report, and that is of such a nature and from such a source that the accountant would have investigated it had it come to his or her attention during the course of the compilation or review, the accountant should, as soon as practicable, undertake to determine whether the information is reliable and whether the facts existed at the date of the report. In this connection, the accountant should discuss the matter with his or her client at whatever management levels the accountant deems appropriate, including the board of directors, and request cooperation in whatever investigation may be necessary. If the nature and effect of the matter are such that (a) the accountant’s report or the financial
statements would have been affected if the information had been known to the accountant at the accountant’s compilation or review report date and had not been reflected in the financial statements and (b) the accountant believes that there are persons currently using or likely to use the financial statements who would attach importance to the information, the accountant should

- in a compilation engagement, obtain additional or revised information.
- in a review engagement, perform the additional procedures deemed necessary to achieve limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with GAAP.

With respect to (b), consideration should be given, among other things, to the time elapsed since the financial statements were issued.

.56 When the accountant has concluded, after considering (a) and (b) in the preceding paragraph as appropriate, that action should be taken to prevent further use of the accountant’s report or the financial statements, the accountant should advise his or her client to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to persons who are known to be currently using or who are likely to use the financial statements. When the client undertakes to make appropriate disclosure, the method used and the disclosure made will depend on the circumstances.

a. If the effect on the accountant’s report or the financial statements of the subsequently discovered information can promptly be determined, disclosure should consist of issuing, as soon as practicable, revised financial statements and, where applicable, the accountant’s report. The reasons for the revision usually should be described in a note to the financial statements and, where applicable, referred to in the accountant’s report. Generally, only the most recently issued, compiled, or reviewed financial statements would need to be revised, even though the revision resulted from events that had occurred in prior years.3

b. When issuance of financial statements for a subsequent period is imminent, so that disclosure is not delayed, appropriate disclosure of the revision can be made in such statements instead of reissuing the earlier statements pursuant to subparagraph (a).4

c. When the effect on the financial statements of the subsequently discovered information cannot be promptly determined, the issuance of revised financial statements would necessarily be delayed. In this circumstance, when it appears that the information will require a revision of the statements, appropriate disclosure would consist of notification by the client to persons who are known to be using or who are likely to use the financial statements that they should not be used, and that revised financial statements will be issued and, where applicable, the accountant’s report will be issued as soon as practicable.

.57 The accountant should take whatever steps he or she deems necessary to satisfy himself or herself that the client has made the disclosures specified in paragraph .80 of AR section 100.

.58 If the client refuses to make the disclosures specified in paragraph .81 of AR section 100, the accountant should notify the appropriate personnel at the highest levels within the entity, such as the manager (owner) or the board of directors, of such refusal and of the fact that, in the absence of disclosure by the client, the accountant will take steps as subsequently outlined to prevent further use of the financial statements and, if applicable, the accountant’s report. The steps that can appropriately be taken will depend upon the degree of certainty of the accountant’s knowledge that there are persons who are currently using or who will use the financial statements and, if applicable, the accountant’s report, and who would attach importance to the information, and the accountant’s ability as a practical matter to communicate with them. Unless the accountant’s attorney recommends a different course of action, the accountant should take the following steps to the extent applicable:

---

3 See paragraphs 7–10 of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 250-10-50 and paragraphs 23 and 28 of FASB ASC 250-10-45 regarding disclosure of adjustments applicable to prior periods.
4 See paragraphs 7–10 of FASB ASC 250-10-50 and paragraphs 23 and 28 of FASB ASC 250-10-45 regarding disclosure of adjustments applicable to prior periods.
a. Notification to the client that the accountant’s report must no longer be associated with the financial statements.

b. Notification to the regulatory agencies having jurisdiction over the client that the accountant’s report should no longer be used.

c. Notification to each person known to the accountant to be using the financial statements that the financial statements and the accountant’s report should no longer be used. In many instances, it will not be practicable for the accountant to give appropriate individual notification to stakeholders whose identities ordinarily are unknown to him or her; notification to a regulatory agency having jurisdiction over the client will usually be the only practicable way for the accountant to provide appropriate disclosure. Such notification should be accompanied by a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.

Although a compilation report does not express a conclusion or an opinion on the financial statements, it would seldom be appropriate for an accountant to conclude, simply because his or her responsibilities were limited to a compilation service, that notification of third party users in the absence of notification by the client is not required when the accountant knows that the financial statements should be revised.

.59 The following guidelines should govern the content of any disclosure made by the accountant in accordance with paragraph .82 of AR section 100 to persons other than his or her client:

a. The disclosure should include a description of the nature of the subsequently acquired information and its effect on the financial statements.

b. The information disclosed should be as precise and factual as possible and should not go beyond that which is reasonably necessary to accomplish the purpose mentioned in the preceding subparagraph (a). Comments concerning the conduct or motives of any person should be avoided.

If the client has not cooperated, the accountant’s disclosure need not detail the specific information, but can merely indicate that information has come to his or her attention which the client has not cooperated in attempting to substantiate and that, if the information is true, the accountant believes that the compilation or review report must no longer be used or associated with the financial statements. No such disclosure should be made unless the accountant believes that the financial statements are likely to be misleading and that the accountant’s compilation or review report should not be used.

Management-Use-Only Financial Statements Distributed to Third Parties

.60 Paragraph .27 of AR section 100 states the following:

If the accountant becomes aware that the financial statements [not intended for third-party use] have been distributed to third parties, the accountant should discuss the situation with the client and request that the client have the statements returned. If the client does not comply with this request within a reasonable period of time, the accountant should notify known third parties that the financial statements are not intended for third-party use, preferably in consultation with his or her attorney.

.61 If the accountant determines that the financial statements were given to a third party unintentionally (for example, the client made a mistake or forgot about the restricted nature of the financial statements), then he or she should discuss with the client the restricted nature of the statements and request that the client retrieve all copies from third parties. If the client complies, then there is no need for further action.

.62 However, if the accountant discovers that the client intentionally disregarded the restriction placed on the use of the financial statements, and if the client refuses to retrieve the financial statements, then he or she should notify known third parties that the financial statements are not intended for third-party use. The accountant also might consider how such an action on the client’s part to intentionally disregard the distribution restriction bears on management’s integrity and, as a result, on the performance of any further services for that client.
Some accountants have suggested that the potential risk of third-party distribution is high and, therefore, report on financial statements not intended for third-party use. However, in our profession, there are other restricted use professional services that are offered (for example, agreed-upon procedures engagements and projections). If the accountant obtains a written engagement letter and places a legend indicating the restricted nature of the presentation on each page of the financial statements, then the risk of third-party distribution will likely be lessened.

Practice Tip
Notification of third parties involves legal matters beyond the scope of this manual. Therefore, the accountant might consider consulting with an attorney before taking any action. In order to minimize the risk of a client distributing management-use-only financial statements to third parties, the accountant may consider including language in the engagement letter alerting the client to the fact that if he or she needs financial statements for third-party use that service can be provided separately (see illustrative engagement letter in paragraph .66 of this section.

When to Consider Withdrawing From an Engagement

The accountant may consider withdrawing from an engagement if any of the following conditions exist:

- He or she determines that he or she does not have and cannot obtain sufficient knowledge of the client’s business or industry.
- The client refuses or is unable to provide additional or revised information when the accountant has become aware that information supplied is incorrect, incomplete, or otherwise unsatisfactory.
- Financial statement disclosures were omitted with the intent to mislead.
- The accountant determines that he or she is not independent with respect to the entity, and reviewed financial statements are required.
- The compiled or reviewed financial statements contain departures from GAAP that the client refuses to correct, and the accountant believes the departures were undertaken with the intention of misleading financial statement users.
- There have been substantial limitations in the scope of the engagement, particularly in a review engagement when management does not provide a client representation letter.
- Information comes to the accountant’s attention that contradicts management’s representation that financial statements compiled for management’s use only will not be used by third parties.
Client Acceptance and Continuance Form—Part I

Client: ________________________________
Financial Statement Date: ________________________________

INSTRUCTIONS:

Part I: This form may be completed for all prospective clients for which audit, review, or compilation services are to be performed. The date on the form is ordinarily completed by the in-charge of the engagement and approved by the engagement partner as a basis for initially accepting the client. Part I is typically updated and reviewed annually as a basis for deciding to retain the client.

Part II: Part II is typically completed by the engagement partner and concurring partner to document the firm’s decision to either accept or reject the client.

CLIENT’S LEGAL NAME: ________________________________
ADDRESS: ________________________________
PHONE: ________________________________ FISCAL YEAR END: ________________________________
FEDERAL I.D. NO.: ________________________________ STATE I.D. NO.: ________________________________

1. Describe the nature of the client’s business (and locations, if other than above address):

--------------------------------------------------------------------------------
--------------------------------------------------------------------------------
--------------------------------------------------------------------------------
--------------------------------------------------------------------------------

2. Identify the type of entity (for example, corporation, proprietorship, partnership, or S corporation):

--------------------------------------------------------------------------------
--------------------------------------------------------------------------------
--------------------------------------------------------------------------------
--------------------------------------------------------------------------------
3. List key owners, officers, and directors of the client:

.66 Illustrative Engagement Letter for a Compilation of Financial Statements Not Intended for Third Party Use

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of my (our) engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

I (We) will compile, from information you provide, the [monthly, quarterly, or other frequency] financial statements of Gowers Drug Stores for the year 20XX.

I (We) will compile the financial statements in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A compilation is limited to presenting, in the form of financial statements, information that is the representation of management. I (We) will not audit or review the financial statements and, accordingly, will not express an opinion or any other form of assurance on them.

The financial statements will not be accompanied by a report. Based upon my (our) discussions with you, these financial statements are for management’s use only and are not intended for third-party use.

Material departures from [disclose the applicable financial reporting framework, for example, generally accepted accounting principles (GAAP) or other comprehensive basis of accounting (OCBOA)] may exist and the effects of those departures, if any, on the financial statements may not be disclosed. In addition, substantially all disclosures required by [the applicable financial reporting framework] may be omitted. [The accountant may wish to identify known departures.] Notwithstanding these limitations, you represent that you have knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements that allows you to place the financial information in the proper context. Further, you represent and agree that the use of the financial statements will be limited to members of management with similar knowledge.

The financial statements are intended solely for the information and use of [include list of specified members of management] and are not intended to be and should not be used by any other party.—[optional]

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, of any evidence or information that comes to my (our) attention during the performance of compilation procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) compilation procedures regarding illegal acts that may have occurred unless they are clearly inconsequential.

We are not independent with respect to [name of entity].—[if applicable]

As part of my (our) engagement, I (we) will also (list any nonattest services to be provided, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and
c. establishing and maintaining internal controls, including monitoring ongoing activities.

The other data accompanying the financial statements are presented only for supplementary analysis purposes and will be compiled from information that is the representation of management, without audit or review, and I (we) will not express an opinion or any other form of assurance on such data.—[if applicable]

Our fees for these services [fill in]

Should you require financial statements for third-party use, I (we) would be pleased to discuss with you the requested level of service. Such engagement would be considered separate and not deemed to be part of the services described in this engagement letter.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.5

Sincerely yours,

[Signature of accountant]

5 Some accountants prefer not to obtain an acknowledgment, in which case their letter would omit the paragraph beginning “If the foregoing . . .” and the spaces for the acknowledgment. The first paragraph of their letter might begin as follows: “This letter sets forth my (our) understanding of the terms and objectives of my (our) engagement . . .”
.67 Illustrative Engagement Letter for a Compilation of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

I (We) will compile, from information you provide, the annual and interim balance sheets and related statements of income, retained earnings, and cash flows of Gowers Drug Stores for the year 20XX.

I (We) will compile the financial statements and issue an accountant’s report thereon in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. A compilation is limited to presenting, in the form of financial statements, information that is the representation of management. I (We) will not audit or review the financial statements and, accordingly, will not express an opinion or any other form of assurance on them.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, and of any evidence or information that comes to our attention during the performance of my (our) compilation procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) compilation procedures regarding illegal acts that may have occurred, unless they are clearly inconsequential.

As part of my (our) engagement, I (we) will also (list any nonattest services to be performed, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for:

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and

e. establishing and maintaining internal controls, including monitoring ongoing activities.

If, for any reason, I (we) am (are) unable to complete the compilation of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

My (Our) fees for these services...

I (We) shall be pleased to discuss this letter with you at any time.

If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to me (us).6

Sincerely yours,

[Signature of accountant]

Illustrative Engagement Letter for a Review of Financial Statements

Mr. Thaddeus Gowers, President
Gowers Drug Stores
1 Main Street
Bedford Falls, New Hampshire 00000

Dear Mr. Gowers:

This letter is to confirm my (our) understanding of the terms and objectives of our engagement and the nature and limitations of the services I (we) will provide. I (We) will perform the following services:

I (We) will review the balance sheet of Gowers Drug Stores as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, and issue an accountant’s report thereon in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. I (We) will not perform an audit of such financial statements, the objective of which is the expression of an opinion regarding the financial statements taken as a whole, and, accordingly, I (we) will not express such an opinion on them.

A review consists primarily of inquiries of company personnel and analytical procedures applied to financial data. A review does not contemplate obtaining an understanding of internal control or assessing control risk, tests of accounting records and responses to inquiries by obtaining corroborating evidential matter, and certain other procedures ordinarily performed during an audit. Thus, a review does not provide assurance that I (we) will become aware of all significant matters that would be disclosed in an audit.

My (Our) engagement cannot be relied upon to disclose errors, fraud, or illegal acts that may exist. However, I (we) will inform the appropriate level of management of any material errors, and of any evidence or information that comes to our attention during the performance of our review procedures, that fraud may have occurred. In addition, I (we) will report to you any evidence or information that comes to my (our) attention during the performance of my (our) review procedures regarding illegal acts that may have occurred, unless they are clearly inconsequential.

As part of my (our) engagement, I (we) will also (list any nonattest services to be provided, if applicable, such as income tax preparation and bookkeeping services).

You are responsible for

a. making all management decisions and performing all management functions;

b. designating an individual who possesses suitable skill, knowledge, and experience, preferably within senior management, to oversee the services;

c. evaluating the adequacy and results of the services performed;

d. accepting responsibility for the results of the services; and

e. establishing and maintaining internal controls, including monitoring ongoing activities.

As part of my (our) review procedures, I (we) will require certain written representations from management about the financial statements and matters related thereto.

If, for any reason, I (we) am (are) unable to complete my (our) review of your financial statements, I (we) will not issue a report on such statements as a result of this engagement.

My (Our) fees for these services...

I (We) shall be pleased to discuss this letter with you at any time.
If the foregoing is in accordance with your understanding, please sign the copy of this letter in the space provided and return it to us.

Sincerely yours,

[Signature of accountant]

AAM Section 2300

Compilation Engagements*

Type of Compilation

.01 Paragraph .04 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2), defines a compilation as follows:

A service, the objective of which is to present in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements.

.02 Compiled financial statements should be accompanied by a report when the accountant has been engaged to compile and report on the financial statements or when the accountant reasonably expects the financial statements to be used by a third party. When the accountant does not reasonably expect the financial statements to be used by a third party, a report is not required.

.03 AR section 100 establishes requirements and provides guidance for the accountant with respect to a compilation engagement

Performance Requirements for a Compilation Engagement

.04 AR section 100 states that in all compilation engagements, the performance standards in paragraph .05 and paragraphs .08–.11 of AR section 100 should be followed.

.05 These performance standards consist of the following:

- Have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.

  The accountant should have a sufficient understanding of his or her client’s industry to know what the financial statements for an entity in that industry should look like and to be aware of any accounting principles or practices that are unique to that industry. The accountant does not have to be an industry expert, and he or she can obtain this general understanding if he or she does not already possess it (for example, through AICPA guides, nonauthoritative industry guides, and trade publications).

- Have or obtain a general understanding of the client’s business.

  The accountant should have a general understanding of the client’s business transactions, form of its accounting records, stated qualifications of accounting personnel, basis of accounting on which the financial statements are to be presented, and form and content of the financial statements, according to the standard. The purpose of this general understanding is to determine whether it will be necessary for the accountant to perform other accounting services (such as bookkeeping and adjustments) in order to compile the financial statements.

* In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
• Obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.

The accountant should never be associated with misleading financial statements.

• Read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

This final reading of the financial statements is sometimes called the smell test. The primary purpose of the smell test requirement is to look for mathematical or clerical errors, presentation errors (for example, incorrect titles on the financial statements), and others.

Limitations of a Compilation Engagement

.06 Paragraph .12 of AR section 100 indicates that a compilation differs significantly from a review or an audit of financial statements. A compilation does not contemplate performing inquiry, analytical procedures, or other procedures performed in a review. Additionally, a compilation does not contemplate obtaining an understanding of the entity’s internal control; assessing fraud risk; tests of accounting records by obtaining sufficient appropriate audit evidence through inspection, observation, confirmation, the examination of source documents (for example, cancelled checks or bank images); or other procedures ordinarily performed in an audit. Therefore, a compilation does not provide a basis for expressing any level of assurance on the financial statements being compiled.

Performance Requirements

.07 In order to perform a compilation, the accountant should

• establish an understanding with the client (see paragraphs .29-.40 of section 2200). If the engagement is to compile financial statements not expected to be used by a third party and the accountant does not report on the financial statements, then the understanding should be documented through the use of an engagement letter.

• have or obtain a general understanding of the accounting principles and practices of the industry in which the client operates.

• have or obtain a general understanding of the client’s business.

• obtain additional or revised information if the information supplied by the client appears to be incorrect, incomplete, or otherwise unsatisfactory.

• read the compiled financial statements and consider whether they appear to be appropriate in form and free of obvious material error.

Reporting Requirements

.08 Paragraphs .13-.23 of AR section 100 establish requirements and provide guidance when the accountant submits financial statements to a client that will be used by a third party or if he or she reasonably expects that they might be used by a third party.

.09 Illustrative reports for compiled financial statements are included in section 2610.

Third Parties

.10 In deciding whether the financial statements are, or reasonably might be, expected to be used by a third party, the accountant may rely on management’s representation without further inquiry; unless information comes to his or her attention that contradicts management’s representation. Paragraph .04 of AR section 100 defines third parties as all persons, including those charged with governance, except for members of management.
.11 This is a definition by exception. In other words, the starting point for determining who is a third party is that all parties are third parties, with the exception of certain members of management. Those certain members of management would be those members who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements. In order to not be considered a third party, the person or persons could meet the following two requirements:

- He or she is a member of management.
- He or she is knowledgeable enough about the business to put the information in the proper context.

.12 In exhibit 2300-1, “Third Parties,” circle C represents all potential users of an entity’s financial statements (banks, bonding companies, creditors, shareholders, vendors, customers, and so on), and circle B represents all members of management. All users in circle C would be considered third parties. In addition, members of management in circle B—those without the requisite knowledge of the client’s business that would allow them to place the information contained in the financial statements in the proper context—also would be considered third parties. Compiled financial statements which do not include a report should be restricted to those parties in circle A—those members of management who have the requisite knowledge of the business.

Exhibit 2300-1—Third Parties

.13 Although some judgment is involved in making this determination, the accountant may rely on management’s representation that they have the necessary knowledge of the business to put the information in the proper context.

.14 This definition does not mean that certain members of management have to be thoroughly knowledgeable about technical accounting principles and procedures. Instead, management might be knowledgeable about the nature of the services the accountant is providing and understand the procedures and assumptions he or she is using. Consider these examples of third parties:

- ABC Company is a small, closely held business, owned and managed by its sole shareholder, John. In this situation, absent evidence to the contrary, John has the requisite knowledge of his business and would not be considered a third party.
- KLM Company is a small, closely held business, managed by one of its ten shareholders, Jane (the other nine shareholders live out of state and are not involved in the management of the business). In this situation, absent evidence to the contrary, Jane has the requisite knowledge of the business and
would not be considered a third party. The other nine shareholders, however, would be considered third parties.

- XYZ Company is a small, closely held business. The management team consists of a president, Joe; controller, Mary; operations manager, Sue; and sales manager, Jim. Joe, Mary, and Sue are all involved in the financial operation of the company and are knowledgeable about the accounting principles and practices being used. Jim, on the other hand, has no finance background and is not involved in the financial operation of the company. In this example, Joe, Mary, and Sue would not be considered third parties. Jim, although he is a member of management, does not have the requisite knowledge of the accounting practices of the business and would be considered a third party.

.15 Note that those members of management that are considered third parties (Jim, in the preceding example) could be “brought into the loop” or removed from third party status. Removing management members from third-party status would occur by educating those members of management about the accounting principles and practices of the business, thereby allowing them to place the information in the proper context. This education could be accomplished by other members of management or by the accountant.

Documentation Requirement

.16 AR section 100 does not discuss documentation for a compilation engagement except in the case of the engagement letter in an engagement to compile financial statements not expected to be used by a third party or when evidence or information comes to the accountant’s attention during the performance of compilation procedures that fraud or an illegal act may have occurred. Although not required, including the type of documentation noted in the following list may be helpful from a risk management and quality control perspective:

- Engagement letter for all compilation engagements
- Trial balance information to bridge the client’s records to the compiled financial statements
- Notes on how incorrect, incomplete, or unsatisfactory matters, if any, were resolved
- If required by firm policy, compilation work program, procedural checklists, and disclosure checklists

Practice Tip

Remember—all relevant information is potentially subject to discovery in a lawsuit, regardless of the storage medium.

<tr>
<td>1. Prepare or update the client acceptance and continuance form.</td>
<td></td>
</tr>
</tbody>
</table>

1 AR section 100, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2), requires documentation of the understanding with the client in the form of a written engagement letter for a management-use-only compilation (if a compilation report is not being issued). See paragraphs .29–.33 of section 2200 for more detailed discussion of matters included in written engagement letters.
### Procedure

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2.</strong> Consider whether the firm is independent. If not independent, the compilation report should be modified to indicate that fact.</td>
<td></td>
</tr>
<tr>
<td><strong>3.</strong> Establish an understanding with the client, preferably in writing, regarding the nature of the services to be performed. Include a copy of the engagement letter or memorandum describing oral arrangements.</td>
<td></td>
</tr>
<tr>
<td><strong>4.</strong> If the engagement was originally intended to be an audit or a review, document the appropriateness of the decision to step-down.</td>
<td></td>
</tr>
<tr>
<td><strong>5.</strong> Acquire the necessary knowledge and understanding of the following:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>a. Accounting principles and practices of the industry</td>
</tr>
<tr>
<td></td>
<td>b. Nature of the client’s business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements</td>
</tr>
<tr>
<td><strong>6.</strong> Consider the necessity to perform any other accounting services to enable compilation of the financial statements.</td>
<td></td>
</tr>
<tr>
<td><strong>7.</strong> If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.</td>
<td></td>
</tr>
<tr>
<td><strong>8.</strong> Draft and read the financial statements and consider whether:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>a. the financial statements include all required disclosures, unless substantially all disclosures are omitted.</td>
</tr>
<tr>
<td></td>
<td>b. financial statements prepared in accordance with an other comprehensive basis of accounting (OCBOA) present proper OCBOA titles and disclose the basis of accounting either in the notes or in the compilation report.</td>
</tr>
<tr>
<td></td>
<td>c. the financial statements are appropriate in form.</td>
</tr>
<tr>
<td></td>
<td>d. the financial statements are free of obvious mathematical or clerical error.</td>
</tr>
<tr>
<td></td>
<td>e. the financial statements are free of obvious measurement departures from generally accepted accounting principles (GAAP) or OCBOA.</td>
</tr>
<tr>
<td><strong>9.</strong> Draft the accountant’s report.</td>
<td></td>
</tr>
<tr>
<td><strong>10.</strong> If the financial statements omit substantially all disclosures required by GAAP or OCBOA, add an additional paragraph to the report disclosing the omission.</td>
<td></td>
</tr>
<tr>
<td><strong>11.</strong> If the financial statements contain a departure from GAAP or OCBOA, including either a measurement or disclosure departure:</td>
<td></td>
</tr>
<tr>
<td></td>
<td>a. Revise the financial statements or modify the report to indicate the departure.</td>
</tr>
<tr>
<td></td>
<td>b. If the financial statements are not revised, consider whether modification of the report is adequate to indicate the deficiencies in the financial statements.</td>
</tr>
<tr>
<td></td>
<td>c. If modification of the report is not considered adequate, consider withdrawing from the engagement.</td>
</tr>
<tr>
<td><strong>12.</strong> If supplementary data accompanies the financial statements, consider referring to the other data in the compilation report or issuing a separate report on the other data.</td>
<td></td>
</tr>
</tbody>
</table>

**Compilation of Financial Statements Flowchart**

.18 During the initial development of Statement on Standards for Accounting and Review Services (SSARS) No. 8, Amendment to Statement on Standards for Accounting and Review Services No. 1 Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2, AR sec. 100), the members of the Accounting and Review Services Committee designed a flowchart to help guide their discussion about the proposed changes in AR section 100. That flowchart, which first appeared in SSARS No. 8, is also currently available in appendix A, “Compilation of Financial Statements,” of AR section 100. We are including it here with the addition of explanatory notes following.
1 **Submission of financial statements.** Presenting to a client or third parties financial statements that the accountant has prepared either manually or through the use of computer software.

2 **Compilation of financial statements.** A service, the object of which is to present in the form of financial statements information that is the representation of management (owners) without undertaking to express any assurance on the financial statements.

3 **Management.** The person(s) responsible for achieving the objectives of the entity and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management is responsible for the financial statements, including designing, implementing, and maintaining effective internal control over financial reporting.

4 **Those charged with governance.** The person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity’s
financial statements (in other cases, management has this responsibility). In some entities, governance is a collective responsibility that may be carried out by a board of directors, a committee of the board of directors, a committee of management, partners, equivalent persons, or some combination thereof. Those charged with governance are specifically excluded from management, unless they perform management functions.

5 Third parties. All persons, including those charged with governance, except for members of management parties except for management who are generally knowledgeable and understand the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements.

6 The engagement letter should include the following matters:

- A description of the nature and limitations of the services to be performed
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management
- A statement that the financial statements have not been audited or reviewed
- A statement that no opinion or any other form of assurance on the financial statements will be provided
- An acknowledgement that management has knowledge about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of the financial statements
- An acknowledgement of management’s representation and agreement that the financial statements will not be used by third parties
- A statement that the engagement cannot be relied upon to disclose errors, fraud, or illegal acts

The engagement letter should also include the following additional matters, if applicable:

- A statement that material departures from generally accepted accounting principles (GAAP) or an other comprehensive basis of accounting (OCBOA) may exist and the effects of those departures on the financial statements may not be disclosed
- A statement that substantially all disclosures (and the statement of comprehensive income and statement of cash flows, if applicable) required by GAAP or OCBOA may be omitted
- A statement that the accountant is not independent
- A reference to any supplementary information that may be included

</tr>
</tbody>
</table>

4. If the engagement was originally intended to be another type of engagement, document the appropriateness of the decision to change the engagement.

5. Acquire the necessary knowledge and understanding of the following:
   a. Accounting principles and practices of the industry
   b. Nature of the client’s business transactions, form of accounting records, stated qualifications of the accounting personnel, accounting basis to be used, and form and content of the financial statements

6. Consider the necessity to perform any other accounting services to enable compilation of the financial statements.

7. If there is any indication that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory, obtain additional or revised information.

8. Draft and read the financial statements and consider whether
   a. the financial statements are appropriate in form.
   b. the financial statements are free of obvious mathematical or clerical error.

9. Include a legend on each page of the financial statements and supplementary data indicating the restricted nature of the presentation.

10. Document any other procedures performed or unusual problems and their resolution.

11. Determine that all required forms and checklists have been completed.

12. Determine that all questions, exceptions, or notes, if any, posed during the work have been followed up and resolved, and review notes and “to do” lists have been removed from the working papers.
AAM Section 2400

Review Engagements*

Overview

.01 Paragraph .04 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2), defines a review of financial statements as follows:

A service, the objective of which is to express limited assurance that there are no material modifications necessary that should be made to the financial statements in order for the statements to be in conformity with generally accepted accounting principles (GAAP).

.02 The following performance requirements are applicable to a review engagement:

• Establish an understanding with the entity, preferably in writing, regarding the nature and limitations of the services to be performed and a description of the report the accountant expects to render (See paragraphs .29–.40 of section 2200 for a discussion of engagement letters).

• Have, or obtain, knowledge of the accounting principles and practices of the entity’s industry and a general understanding of certain matters related to the entity’s business.

• Apply analytical procedures to the financial statements to identify and provide a basis for other review procedures and inquiry about the relationships and individual items that appear to be unusual and that may indicate a material misstatement.

• Take certain actions when the accountant becomes aware that information supplied by the entity is incorrect, incomplete, or otherwise unsatisfactory and consider the effect of these matters on his or her review report.

• Obtain a representation letter from management.

• Document certain items in accordance with the requirements and guidance provided in paragraphs .43–.45 of AR section 100.

Knowledge of Accounting Principles and Practices of the Industry

.03 AR section 100 states that the accountant should have knowledge of the accounting principles and practices of the industry in which the entity operates.

.04 The purpose of having that knowledge in a review is to assist the accountant in constructing inquiries and analytical procedures adequate to provide a reasonable basis for expressing limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with GAAP.

.05 AR section 100 states that the accountant should possess or obtain certain knowledge about the entity whose financial statements are under review.

* In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
The accountant who performs a review should have a general understanding of the following:

- Entity’s organization
- Operating characteristics of that organization
- Nature of the entity’s assets and liabilities
- Nature of the entity’s revenues and expenses

In order to obtain this understanding, the accountant would need a general knowledge of the entity’s

- products and services.
- production, distribution, and compensation methods.
- operating locations.
- material transactions with related parties.

Inquiries and Analytical Procedures

In order to obtain a reasonable basis for the expression of limited assurance, the accountant must apply analytical procedures to the financial statements and make inquiries of management and, when deemed appropriate, other company personnel. The accountant performs these procedures to obtain a basis for concluding that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP. The specific inquiries made and the analytical and other procedures performed should be tailored to the engagement based on the accountant’s knowledge of the entity’s business. For example, if the accountant becomes aware of a significant change in the entity’s operations, the accountant may consider making additional inquiries, employing additional analytical procedures, or both. Professional literature does not indicate how many procedures have to be performed in a given engagement to achieve its reporting objective. That is a matter of professional judgment. The extent of the total knowledge the accountant possesses about an entity and the industry in which it operates is the basis for planning the extent of procedures to be performed.

Analytical Procedures

Paragraph .31 of AR section 100 states that the accountant must apply analytical procedures to the financial statements. The purpose of analytical procedures is to identify and provide a basis for inquiry about the relationships and individual items that appear to be unusual and that may indicate a material misstatement. Analytical procedures include the following:

- Developing expectations by identifying and using plausible relationships that are reasonably expected to exist based on the accountant’s understanding of the entity and the industry in which the entity operates
- Comparing recorded amounts, or ratios developed from recorded amounts, to expectations developed by the accountant

Appendix I of AR section 100 contains examples of analytical procedures an accountant may consider performing when conducting a review of financial statements.

A list of examples of analytical procedures for a review engagement is included in paragraph .46 that follows in this section of the manual.

Expectations developed by the accountant in performing analytical procedures in connection with a review of financial statements ordinarily are less encompassing than those developed in an audit. Also in a review, the accountant ordinarily is not required to corroborate management’s responses with other evidence. However, the accountant should consider the reasonableness and consistency of management’s responses in
light of the results of other review procedures and the accountant’s knowledge of the entity’s business and the industry in which it operates.

.13 A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue to exist in the absence of known conditions to the contrary.

.14 In applying analytical procedures in a review engagement, the accountant may achieve both effectiveness and efficiency by using the following approach:

• Identify immaterial account balances or classes of transactions. Apply analytical procedures to them, if needed.
• Identify account balances or classes of transactions to which other accounting services (bookkeeping or payroll services, for example) have been applied. Consider the evidence that has been gathered and whether any material errors are likely to remain. If there is already sufficient evidence for those account balances or classes of transactions to reduce the risk of material misstatement to a moderate level, consider whether applying analytical procedures is needed.
• For the remaining account balances and classes of transactions, develop expectations (for example, using historical trends adjusted for known changes) for them. Note, however, that AR section 100 does not require a formal process of developing and documenting expectations.
• Consider how close the existing account balance or class of transaction comes to the expectation developed in the previous step. If the differences are small, no additional evidence may be needed.
• If the differences are not in accordance with the accountant’s expectations, material errors could exist. Inquire about valid business reasons for the difference. If the results of inquiry are plausible and agree with other evidence, no additional evidence may be needed.
• If additional evidence is needed, apply other analytical procedures or obtain other suitable evidence.

Inquiries and Other Review Procedures

.15 The following are inquiries the accountant should consider making and other review procedures the accountant should consider performing when conducting a review of financial statements:

a. Inquiries to members of management who have responsibility for financial and accounting matters concerning (see appendix B of AR section 100):

(1) Whether the financial statements have been prepared in conformity with generally accepted accounting principles consistently applied
(2) The entity’s accounting principles and practices and the methods followed in applying them and procedures for recording, classifying, and summarizing transactions, and accumulating information for disclosure in the financial statements
(3) Unusual or complex situations that may have an effect on the financial statements
(4) Significant transactions occurring or recognized near the end of the reporting period
(5) The status of uncorrected misstatements identified during the previous engagement
(6) Questions that have arisen in the course of applying the review procedures
(7) Events subsequent to the date of the financial statements that could have a material effect on the financial statements
(8) Their knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, for example, communications received from employees, former employees, or others
(9) Significant journal entries and other adjustments
(10) Communications from regulatory agencies

b. Inquiries concerning actions taken at meetings of shareholders, board of directors, committees of the board of directors, or comparable meetings that may affect the financial statements
c. Reading the financial statements to consider, on the basis of information coming to the accountant’s attention, whether the financial statements appear to conform with GAAP
d. Obtaining reports from other accountants, if any, who have been engaged to audit or review the financial statements of significant components of the reporting entity, its subsidiaries, and other investees

.16 Appendix B of AR section 100 contains illustrative inquiries for a review engagement. However, these illustrative inquiries are not intended to serve as a program or checklist in the conduct of a review. The inquiries to be made in a review engagement are a matter of the accountant’s professional judgment. Specific inquiries should be tailored to the client, based on the accountant’s understanding of the client’s business and the industry in which it operates. Appendix B of AR section 100 is included in paragraph .46 of this section.

.17 Overall, the purpose of the inquiries and analytical procedures is to provide the accountant with sufficient evidence to support the accountant’s conclusion that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with the applicable financial reporting framework. AR section 100 does not specify the extent of procedures that have to be performed in order for the accountant to have accumulated sufficient evidence. The extent and type of procedures performed is a matter of professional judgment.

.18 Paragraph .42 of AR section 100 allows modification of inquiry and analytical procedures. For example, the accountant may have acquired knowledge about the entity in the performance of audits of the entity’s financial statements, compilation of the entity’s financial statements, or other accounting services (such as bookkeeping services). This acquired knowledge may be sufficient to reduce the extent of inquiries and analytical procedures, although the accountant would still have the same degree of responsibility with respect to the financial statements (concluding that no material modifications should be made to the financial statements).

Analytical Procedures in Initial Review Engagements

.19 Accountants often question how to apply analytical procedures on initial review engagements. For example, how can the accountant evaluate the results of procedures applied for the current year if he or she is unsure whether amounts are comparable with prior years or if the company is newly formed? As stated in the previous section, paragraph .42 of AR section 100 states:

Knowledge acquired in the performance of audits of the entity’s financial statements, compilation of the financial statements, or other accounting services may result in modification of the review procedures described. However, such modification would not reduce the degree of responsibility the accountant assumes with respect to the reviewed financial statements.

.20 This allows the accountant to modify his or her inquiries and analytical procedures based on knowledge acquired in the performance of other services. Although AR section 100 does not cite initial engagements as a situation in which the accountant may choose to modify his or her inquiries and analytical procedures, it is reasonable to assume that these procedures could be modified in initial engagements.

---

1 The financial statements of the reporting entity ordinarily include an accounting for all significant components, such as unconsolidated subsidiaries and investees. If other accountants are engaged to audit or review the financial statements of such components, the accountant will require reports from the other accountants as a basis, in part, for the accountant’s review report with respect to the review of the financial statements of the reporting entity. The accountant may decide to make reference to the work of other accountants in the accountant’s review report on the financial statements. If such reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants.
In initial review engagements, the accountant may have to rely on other sources of evidence. For example, the accountant may have to rely on making additional inquiries. Or, the accountant may have already compiled the financial statements, or may have provided other accounting or bookkeeping services for the client. In these cases, the accountant may rely on knowledge gained from these other services to supplement the analytical procedures that can be performed because of insufficient history. Also, the accountant’s analytical procedures may also consist of comparisons with results for similar clients or to industry statistics, and of analysis of the interrelationships between accounts in these circumstances.

When the Results of Analytical Procedures Are Not In Accordance With the Accountant’s Expectations

When results of analytical procedures are not in accordance with the accountant’s expectations, paragraph .31 of AR section 100 states that the accountant should perform additional procedures deemed necessary to achieve limited assurance that no material modifications are necessary to conform the financial statements to GAAP. Sometimes inquiries and analytical procedures are sufficient. However, in many cases, the accountant combines additional inquiry or analytical procedures with preparing other accounting schedules or analyses to explain fluctuations.

An illustrative ratio analysis worksheet is included in paragraph .45 that follows in this section of the manual, and an illustrative analytical procedures comparative report is included in paragraph .46.

Awareness Concerning Information Supplied

Paragraph .31 of AR section 100 states that during the performance of the review procedures, “…the accountant may become aware that information coming to his or her attention is incorrect, incomplete, or otherwise unsatisfactory or that fraud or an illegal act may have occurred. The accountant should request that management consider the effect of the matter on the financial statements. Additionally, the accountant should consider the effect of these matters on his or her review report. In circumstances where the accountant believes the financial statements are materially misstated, the accountant should perform additional procedures deemed necessary to achieve limited assurance...”

If the accountant is unable to perform the inquiry and analytical procedures he or she considers necessary to achieve limited assurance contemplated by a review, the accountant’s review will be incomplete. Under these circumstances, the accountant will not have attained the objective of the review and accordingly cannot conclude as to whether the financial statements are not materially misstated.

Paragraph .51 of AR section 100 also states that “when an accountant is unable to perform the inquiry and analytical procedures he or she considers necessary ... the review will be incomplete.” A review that is incomplete is not an adequate basis for issuing a review report. In such a situation, the accountant should also consider whether it is appropriate to issue a compilation report on the financial statements.

Representation Letters

Written representations are required from management for all financial statements and periods covered by the accountant’s review report. The specific written representations obtained by the accountant will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. In connection with the review of the financial statements presented in accordance with GAAP, specific representations should relate to the following matters:

- Management’s acknowledgement of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP

2 Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of representation of the financial statements being reviewed.
• Management’s belief that the financial statements are fairly presented in conformity with generally accepted accounting principles
• Management’s acknowledgement of its responsibility to prevent and detect fraud
• Knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, including any communications received from employees, former employees, or others
• Management’s full and truthful response to all inquiries
• Completeness of information
• Information concerning subsequent events

.28 Like the inquiries and analytical procedures in a review engagement, the management representation letter ordinarily should be tailored to the client based on the accountant’s knowledge of the client’s business and the industry in which it operates. Additional representations may be added to the letter, especially if the client operates in a specialized industry (for example, construction contractors, homeowners associations, and not-for-profit organizations). These additional representations may be found in AICPA Industry Audit and Accounting Guides which can be obtained by contacting AICPA Service Center Operations at (888) 777-7077.

.29 The management representation letter should be addressed to the accountant. Management’s representations set forth in the management representation letter should be made as of the date of the accountant’s review report because the accountant is concerned with events occurring through the date of the report that may require adjustments to or disclosure in the financial statements. The letter should be signed by those members of management whom the accountant believes are responsible for and knowledgeable, directly or through others in the organization, about the matters covered in the representation letter. Normally the CEO and CFO or others with equivalent positions in the entity should sign the representation letter. If the current management was not present during all the periods covered by the accountant’s report, the accountant should, nevertheless, obtain written representations from current management on all such periods.

.30 An illustrative management representation letter is provided in appendix F of AR section 100 and is included in paragraph .44 that follows in this section of the manual.

.31 There are circumstances in which an accountant should consider obtaining an updating representation letter from management (for example, the accountant obtains a management representation letter after completion of inquiry and analytical review procedures but does not issue his or her review report for a significant period of time thereafter, or a material subsequent event occurs after the completion of inquiry and analytical review procedures, including obtaining the original management representation letter, but before the issuance of the report on the reviewed financial statements). In addition, if a predecessor accountant is requested by a former client to reissue his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with reviewed financial statements of a subsequent period, the predecessor accountant should obtain an updating representation letter from the management of the former client. The updating management representation letter should state (a) whether any information has come to management’s attention that would cause management to believe that any of the previous representations should be modified and (b) whether any events have occurred subsequent to the balance sheet date of the latest financial statements reported on by the accountant that would require adjustment to or disclosure in those financial statements.

.32 An illustrative updating management representation letter is provided in appendix G of AR section 100 and is included in paragraph .48 that follows in this section of the manual.

Documentation

.33 The accountant should prepare documentation in connection with a review of financial statements, the form and content of which should be designed to meet the circumstances of the particular engagement.
Documentation is the principal record of the review procedures performed and the conclusions reached by the accountant in performing the review. However, an accountant would not be precluded from supporting his or her review report by other means in addition to the review documentation. Such other means might include written documentation contained in other engagement (for example, compilation) files or quality control files (for example, consultation files) and in limited situations, oral explanations. Oral explanations should be limited to those situations where the accountant finds it necessary to supplement or clarify information contained in the documentation. Oral explanations should not be the principal support for the work performed or the conclusions reached.

.34 Paragraph .44 of AR section 100 states that it is not possible to specify the form or content of the documentation the accountant should prepare because of the different circumstances in individual engagements. However, the documentation should include any findings or issues that in the accountant’s judgment are significant, for example, the results of review procedures that indicate the financial statements could be materially misstated, including actions taken to address such findings, and the basis for the final conclusions reached.

.35 Paragraph .45 of AR section 100 states that the documentation of the inquiry and analytical procedures should include the following:

- The matters covered in the accountant’s inquiry procedures
- The analytical procedures performed
- The expectations as discussed in paragraph .36 of AR section 100, where significant expectations are not otherwise readily determinable from the documentation of the work performed, and factors considered in the development of those expectations
- Results of the comparison of the expectations to the recorded amounts or ratios developed from recorded amounts
- Any additional procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures
- Unusual matters that the accountant considered during the performance of the review procedures, including their disposition
- Communications, whether oral or written, to the appropriate level of management regarding fraud or illegal acts that come to the accountant’s attention
- The representation letter

.36 In addition, many accountants include some or all of the following in their working papers:

- Engagement letter
- Checklist or memorandum describing the accountant’s knowledge of the client’s business and industry
- Checklist, work program, and results of analytical procedures in support of inquiries and analytical procedures, including names of persons responding to inquiries
- Support for data in the notes to the financial statements
- Discussion of unusual matters encountered
- Compilation working papers, if the financial statements required compilation prior to review
- Copies of reports from other accountants who have audited or reviewed a subsidiary
- Reasons for a step-down from an audit, if applicable
Additional Guidance

.37 AR exhibit A, Analytical Procedures in a Review Engagement (AICPA, Professional Standards, vol. 2), provides guidance for accountants that may help them understand certain requirements related to the use of analytical procedures in review engagements and how the use of analytical procedures can be documented in those engagements.

.38 Accountants may also refer to the AICPA Practice Aid Review Engagements—New and Expanded Guidance on Analytical Procedures and Inquiries and Other Procedures (product no. 006618). The practice aid clarifies certain existing Statements on Standards for Accounting and Review Services (SSARSs), suggests ways of implementing existing and new standards in special circumstances, and provides practical guidance to help implement the changes to AR section 100.

Analytical Procedures the Accountant May Consider Performing When Conducting a Review of Financial Statements

Analytical procedures are designed to identify relationships and individual items that appear to be unusual and that may reflect a material misstatement of the financial statements. The analytical procedures performed in a review of financial statements are a matter of the accountant’s professional judgment. In determining the appropriate analytical procedures, an accountant may consider (a) the nature and materiality of the items reflected in the financial statements, (b) the likelihood of a misstatement in the financial statements, (c) knowledge obtained during current and previous engagements, (d) the stated qualifications of the entity’s accounting personnel, (e) the extent to which a particular item is affected by management’s judgment, and (f) inadequacies in the entity’s underlying financial data.

The following list of analytical procedures is for illustrative purposes only. These analytical procedures will not necessarily be applicable in every review engagement, nor are these analytical procedures meant to be all-inclusive. These illustrative analytical procedures are not intended to serve as a program or checklist to be utilized in performing a review engagement. Examples of analytical procedures an accountant may consider performing in a review of financial statements include the following:

- Comparing financial statements with statements for comparable prior period(s).
- Comparing current financial information with anticipated results, such as budgets or forecasts (for example, comparing tax balances and the relationship between the provision for income taxes and pretax income in the current financial information with corresponding information in (a) budgets, using expected rates, and (b) financial information for prior periods).
- Comparing current financial information with relevant nonfinancial information.
- Comparing ratios and indicators for the current period with expectations based on prior periods, for example, performing gross profit analysis by product line and operating segment using elements of the current financial information and comparing the results with corresponding information for prior periods. Examples of key ratios and indicators are the current ratio, receivables turnover or days’ sales outstanding, inventory turnover, depreciation to average fixed assets, debt to equity, gross profit percentage, net income percentage, and plant operating rates.
- Comparing ratios and indicators for the current period with those of entities in the same industry.
- Comparing relationships among elements in the current financial information with corresponding relationships in the financial information of prior periods, for example, expense by type as a percentage of sales, assets by type as a percentage of total assets, and percentage of change in sales to percentage of change in receivables.

Analytical procedures may include such statistical techniques as trend analysis or regression analysis and may be performed manually or with the use of computer-assisted techniques.

In addition, the accountant may find the guidance in AU section 329, Analytical Procedures (AICPA, Professional Standards, vol. 1), useful in conducting a review of financial statements.

Review of Financial Statements—Illustrative Representation Letter

A review of financial statements consists principally of inquiries of company personnel and analytical procedures applied to financial data. As part of a review of financial statements, the accountant is required to obtain a written representation from his or her client to confirm the oral representations made to the accountant. The introductory paragraph should specify the financial statements and periods covered by the accountant’s review report. If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. The following representation letter is included for illustrative purposes only. The accountant may decide, based on the circumstances

---

3 The accountant should exercise caution when comparing and evaluating current financial information with budgets, forecasts, or other anticipated results because of the inherent lack of precision in estimating the future and the susceptibility of such information to manipulation and misstatement by management to reflect desired results.
of the review engagement or the industry in which the entity operates, that other matters should be specifically included in the letter and that some of the representations included in the illustrative letter are not necessary.

(Date \(^4\))

(To the Accountant)

We are providing this letter in connection with your review of the (identification of financial statements) of (name of entity) as of (dates) and for the (periods of review) for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements in order for them to be in conformity with generally accepted accounting principles.

We confirm that we are responsible for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person using the information would be changed or influenced by the omission or misstatement.\(^5\)

We confirm, to the best of our knowledge and belief (as of [the date of the accountant’s review report]), the following representations made to you during your review.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.

2. We have made available to you all:
   a. financial records and related data.
   b. minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.

3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.

4. We acknowledge our responsibility to prevent and detect fraud.

5. We have no knowledge of any fraud or suspected fraud affecting the entity involving management or others where the fraud could have a material effect on the financial statements, including any communications received from employees, former employees, or others.

6. We have no plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities.

7. There are no material losses (such as from obsolete inventory or purchase or sales commitments) that have not been properly accrued or disclosed in the financial statements.

8. There are no:
   a. violations or possible violations of laws or regulations, whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
   b. unasserted claims or assessments that our lawyer has advised us are probable of assertion that must be disclosed in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 450, Contingencies.\(^6\)

\(^4\) This date should be the date that the letter is presented and signed by the client. In no event should the letter be presented and signed prior to the date of the accountant’s review report.

\(^5\) The qualitative discussion of materiality used in this letter is adapted from Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 2, Qualitative Characteristics of Accounting Information.

\(^6\) If management has not consulted a lawyer regarding litigation, claims, and assessments, the representation might be worded as follows:
c. other material liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

9. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets, nor has any asset been pledged as collateral, except as disclosed to you and reported in the financial statements.

10. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

11. The following have been properly recorded or disclosed in the financial statements:
   a. Related party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
   b. Guarantees, whether written or oral, under which the company is contingently liable.
   c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with FASB ASC 275, Risks and Uncertainties. [Significant estimates are estimates at the balance sheet date that could change materially with the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]
   [Add additional representations that are unique to the entity's business or industry. See below for additional illustrative representations.]

12. We are in agreement with the adjusting journal entry you have recommended, and they have been posted to the company’s account. (if applicable)

13. To the best of our knowledge and belief, no events have occurred subsequent to the balance sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.7

14. We have responded fully and truthfully to all inquiries made to us by you during your review.

(Name of Owner or Chief Executive Officer and Title)

(Name of Chief Financial Officer and Title, where applicable)

Representation letters ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity’s business or industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all inclusive. The accountant should consider the effects of pronouncements issued subsequent to the issuance of this section.

<table>
<thead>
<tr>
<th>General</th>
<th>Illustrative Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Condition</td>
<td></td>
</tr>
</tbody>
</table>

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with FASB Accounting Standards Codification (ASC) 450, Contingencies, and we have not consulted a lawyer concerning litigation, claims, or assessments.

7 If the accountant “dual dates” his or her report, the accountant should consider whether obtaining additional representations relating to the subsequent event is appropriate.
<table>
<thead>
<tr>
<th>The impact of a new accounting principle is not known.</th>
<th>We have not completed the process of evaluating the impact that will result from adopting Financial Accounting Standards Board (FASB) Statement No. [XXX, Name], as discussed in Note [X]. The company is therefore unable to disclose the impact that adopting FASB Statement No. [XXX] will have on its financial position and the results of operations when such statement is adopted.</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is justification for a change in accounting principles.</td>
<td>We believe that [describe the newly adopted accounting principle] is preferable to [describe the former accounting principle] because [describe management's justification for the change in accounting principles].</td>
</tr>
<tr>
<td>Financial circumstances are strained, with disclosure of management’s intentions and the entity’s ability to continue as a going concern.</td>
<td>Note [X] to the financial statements discloses all of the matters of which we are aware that are relevant to the company’s ability to continue as a going concern, including significant conditions and events, and management’s plans.</td>
</tr>
<tr>
<td>The possibility exists that the value of specific significant long lived assets or certain identifiable intangibles may be impaired.</td>
<td>We have reviewed long lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of its assets might not be recoverable and have appropriately recorded the adjustment.</td>
</tr>
<tr>
<td>The entity has a variable interest in another entity.</td>
<td>Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with GAAP. We have considered both implicit and explicit variable interests in (a) determining whether potential VIEs should be considered VIEs, (b) calculating expected losses and residual returns, and (c) determining which party, if any, is the primary beneficiary. We have provided you with lists of all identified variable interests in (a) VIEs, (b) potential VIEs that we considered but judged not to be VIEs, and (c) entities that were afforded the scope exceptions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, Consolidation. We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FASB ASC 810. We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents, and other entities, including but not limited to their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements.</td>
</tr>
</tbody>
</table>

(continued)
The information we provided about financial interests and contractual arrangements with related parties, de facto agents, and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements.

Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes.

Regarding entities in which the Company has variable interests (implicit and explicit), we have provided all information about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the Company is the primary beneficiary or has a significant variable interest in the entity.

We have made and continue to make exhaustive efforts to obtain information about entities in which the Company has an implicit or explicit interest but that were excluded from complete analysis under FASB ASC 810 due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the Company is the primary beneficiary, or what accounting is required to consolidate the entity.

The work of a specialist has been used by the entity.

We agree with the findings of specialists in evaluating the [describe assertion] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an impact on the independence or objectivity of the specialists.

### Assets

<table>

<tbody>
<tr>
<td>Cash</td>
<td>Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.</td>
</tr>
<tr>
<td>Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.</td>
<td></td>
</tr>
<tr>
<td>Financial Instruments</td>
<td>Debt securities that have been classified as held-to-maturity have been so classified due to the company’s intent to hold such securities to maturity and the company’s ability to do so. All other debt securities have been classified as available-for-sale or trading.</td>
</tr>
<tr>
<td>Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.</td>
<td></td>
</tr>
<tr>
<td>Management considers the decline in value of debt or equity securities to be temporary.</td>
<td>We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.</td>
</tr>
</tbody>
</table>
Management has determined the fair value of significant financial instruments that do not have readily determinable market values. The methods and significant assumptions used to determine fair values of financial instruments are as follows: [describe methods and significant assumptions used to determine fair values of financial instruments]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.

There are financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk. The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements:

1. The extent, nature, and terms of financial instruments with off-balance-sheet risk
2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments
3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments

Receivables
Receivables have been recorded in the financial statements. Receivables recorded in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance sheet date and have been appropriately reduced to their estimated net realizable value.

Inventories
Excess or obsolete inventories exist. Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value.

Investments
There are unusual considerations involved in determining the application of equity accounting. [For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:]

- The equity method is used to account for the company’s investment in the common stock of [investee] because the company has the ability to exercise significant influence over the investee’s operating and financial policies.
- The cost method is used to account for the company’s investment in the common stock of [investee] because the company does not have the ability to exercise significant influence over the investee’s operating and financial policies.

Deferred Charges
Material expenditures have been deferred. We believe that all material expenditures that have been deferred to future periods will be recoverable.

(continued)
### Deferred Tax Assets

A deferred tax asset exists at the balance sheet date.

The valuation allowance has been determined pursuant to the provisions of FASB ASC 740, *Income Taxes*, including the company’s estimation of future taxable income, if necessary, and is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized.  *Complete with appropriate wording detailing how the entity determined the valuation allowance against the deferred tax asset.*

or

A valuation allowance against deferred tax assets at the balance sheet date is not considered necessary because it is more likely than not the deferred tax asset will be fully realized.

### Liabilities

.45 Review of Financial Statements—Illustrative Updating Representation Letter

Management need not repeat all of the representations made in the previous representation letter. If matters exist that should be disclosed to the accountant, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the accountant’s review report is disclosed in the financial statements, the final paragraph could be modified as follows: “To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred...”

[Date]

To [Accountant]

In connection with your review(s) of the identification of financial statements of [name of entity] as of [dates] and for the periods of review for the purpose of expressing limited assurance that there are no material modifications that should be made to the statements for them to be in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the accountant or date of previous representation letter] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

.46 Review of Financial Statements—Illustrative Inquiries

The inquiries to be made in a review of financial statements are a matter of the accountant’s professional judgment. In determining the appropriate inquiries, an accountant may consider (a) the nature and materiality of the items reflected in the financial statements, (b) the likelihood of a misstatement in the financial statements, (c) knowledge obtained during current and previous engagements, (d) the stated qualifications of the entity’s accounting personnel, (e) the extent to which a particular item is affected by management’s judgment, and (f) inadequacies in the entity’s underlying financial data. The inquiries should generally be made of members of management with financial reporting and accounting responsibilities.

The following list of inquiries is for illustrative purposes only. These inquiries will not necessarily be applicable in every review engagement, nor are these inquiries meant to be all-inclusive. These illustrative inquiries are not intended to serve as a program or checklist to be utilized in performing a review engagement; rather, they address general areas where inquiries might be made in a review engagement. These sample inquiries can also be found in appendix B of AR section 100. Also, the accountant may feel it necessary to make several inquiries in an effort to answer questions related to the issues addressed in these illustrative inquiries.

1. General
   a. Have there been any changes in the entity’s business activities?
   b. Are there any unusual or complex situations that may have an effect on the financial statements (for example, business combinations, restructuring plans, or litigation)?

---

8 The accountant has two methods available for dating the report when a subsequent event requiring disclosure occurs after the completion of the review but before issuance of the report on the related financial statements. The accountant may use “dual dating,” for example, “February 16, 20XX, except for Note Y, as to which the date is March 1, 20XX,” or may date the report as of the later date.
c. What procedures are in place related to recording, classifying, and summarizing transactions and accumulating information related to financial statement disclosures?

d. Have the financial statements been prepared in conformity with generally accepted accounting principles or, if appropriate, a comprehensive basis of accounting other than generally accepted accounting principles? Have there been any changes in accounting principles and methods of applying those principles? Have voluntary changes in accounting principles been reflected in the financial statements through retrospective application of the new principle in comparative financial statements?

e. Have there been any instances of fraud or illegal acts within the entity?

f. Have there been any allegations or suspicions that fraud or illegal acts might have occurred or might be occurring within the entity? If so, where and how?

g. Are any entities, other than the reporting entity, commonly controlled by the owners? If so, has an evaluation been performed to determine whether those other entities should be consolidated into the financial statements of the reporting entity?

h. Are there any entities other than the reporting entity in which the owners have significant investments (for example, variable interest entities)? If so, has an evaluation been performed to determine whether the reporting entity is the primary beneficiary related to the activities of these other entities?

i. Is the reporting entity a general partner in a limited partnership arrangement? If so, has an evaluation been performed to determine whether the limited partnership should be consolidated into the financial statements of the reporting entity?

j. Is the reporting entity a controlling partner in a general partnership agreement? If so, has an evaluation been performed to determine whether the partnership should be consolidated into the financial statements of the controlling partner?

k. Have any significant transactions occurred or been recognized near the end of the reporting period?

2. Cash and cash equivalents

a. Is the entity’s policy regarding the composition of cash and cash equivalents in accordance with FASB ASC 230-10-45, FASB ASC 230-10-50-1, and FASB ASC glossary terms cash and cash equivalents? Has the policy been applied on a consistent basis? Have there been any changes to withdrawal restrictions related to short term investments that could affect the description and classification of cash equivalents?

b. Are all cash and cash equivalents accounts on a timely basis?

c. Have old or unusual reconciling items between bank balances and book balances been reviewed and adjustments made where necessary?

d. Has there been a proper cutoff of cash receipts and disbursements?

e. Has a reconciliation of intercompany transfers been prepared?

f. Have checks written but not mailed as of the financial statement date been properly reclassified into the liability section of the balance sheet?

g. Have material bank overdrafts been properly reclassified into the liability section of the balance sheet?

---

9 Cash and cash equivalents include all cash and highly liquid investments that are both (a) readily convertible to cash and (b) so near to maturity that they present insignificant risk of changes in value because of changes in interest rates, in accordance with FASB ASC glossary terms cash and cash equivalents.
h. Are there compensating balances or other restrictions on the availability of cash and cash equivalents balances? If so, has consideration been given to reclassifying these amounts as noncurrent assets?

i. Have cash funds been counted and reconciled with control accounts?

3. Receivables

a. Has an adequate allowance for doubtful accounts been properly reflected in the financial statements?

b. Have uncollectible receivables been written off through a charge against the allowance account or earnings? Are there any customer bankruptcy or liquidity issues that would have a material effect on the financial statements?

c. Has interest earned on receivables been properly reflected in the financial statements?

d. Has there been a proper cutoff of sales transactions?

e. Have there been any changes in major contracts with customers that may impact the classification or valuation of receivables?

f. Are there receivables from employees or other related parties? Have receivables from owners been evaluated to determine if they should be reflected in the equity section (rather than the asset section) of the balance sheet?

g. Are any receivables pledged, discounted, or factored? Are recourse provisions properly reflected in the financial statements?

h. Have receivables been properly classified between current and noncurrent?

i. Have there been significant numbers of sales returns or credit memoranda issued subsequent to the balance sheet date?

j. Is the accounts receivable subsidiary ledger reconciled to the general ledger account balance on a regular basis?

4. Inventory

a. Are physical inventory counts performed on a regular basis, including at the end of the reporting period? Are the count procedures adequate to ensure an appropriate count? If not, how have amounts related to inventories been determined for purposes of financial statement presentation? If so, what procedures were used to take the latest physical inventory and what date was that inventory taken?

b. Have general ledger control accounts been adjusted to agree with the physical inventory count? If so, were the adjustments significant?

c. If the physical inventory counts were taken at a date other than the balance sheet date, what procedures were used to determine changes in inventory between the date of the physical inventory counts and the balance sheet date?

d. Were consignments in or out considered in taking physical inventories?

e. What is the basis of valuing inventory for purposes of financial statement presentation?

f. Does inventory cost include material, labor, and overhead where applicable?

g. Has inventory been reviewed for obsolescence or cost in excess of net realizable value? If so, how are these costs reflected in the financial statements?

h. Have proper cutoffs of purchases, goods in transit, and returned goods been made?
i. Are there any inventory encumbrances?

j. Is scrap inventoried and controlled?

k. Have abnormal costs related to inventory been expensed as incurred?

5. Prepaid expenses

a. What is the nature of the amounts included in prepaid expenses?

b. How are these amounts being amortized?

6. Investments

a. What is the basis of accounting for investments reported in the financial statements (for example, securities, joint ventures, or closely held businesses)?

b. Are derivative instruments properly measured and disclosed in the financial statements? If those derivatives are utilized in hedge transactions, have the documentation or assessment requirements related to hedge accounting been met?

c. Are investments in marketable debt and equity securities properly classified as trading, available-for-sale, and held-to-maturity?

d. How were fair values of the reported investments determined? Have unrealized gains and losses been properly reported in the financial statements?

e. If the fair values of marketable debt and equity securities are less than cost, have the declines in value been evaluated to determine whether the declines are other-than-temporary?

f. For any debt securities classified as held-to-maturity, does management have the positive ability and intent to hold the securities until they mature? If so, have those debt securities been properly measured?

g. Have gains and losses related to disposal of investments been properly reflected in the financial statements?

h. How was investment income determined? Is investment income properly reflected in the financial statements?

i. Has appropriate consideration been given to the classification of investments between current and noncurrent?

j. For investments made by the reporting entity, have consolidation, equity, or cost method accounting requirements been considered?

k. Are any investments encumbered?

7. Property and equipment

a. Are property and equipment items properly stated at depreciated cost or other proper value?

b. When was the last time a physical inventory of property and equipment was taken?

c. Are all items reflected in property and equipment held for use? If not, have items that are held for sale been properly reclassified from property and equipment?

d. Have gains or losses on disposal of property or equipment been properly reflected in the financial statements?

e. What are the criteria for capitalization of property and equipment? Have the criteria been consistently and appropriately applied?
f. Are repairs and maintenance costs properly reflected as an expense in the income statement?

g. What depreciation methods and rates are utilized in the financial statements? Are these methods and rates appropriate and applied on a consistent basis?

h. Are there any unrecorded additions, retirements, abandonments, sales, or trade-ins?

i. Does the entity have any material lease agreements? If so, have those agreements been properly evaluated for financial statement presentation purposes?

j. Are there any asset retirement obligations associated with tangible long-lived assets? If so, has the recorded amount of the related asset been increased because of the obligation and is the liability properly reflected in the liability section of the balance sheet?

k. Has the entity constructed any of its property and equipment items? If so, have all components of cost been reflected in measuring these items for purposes of financial statement presentation, including, but not limited to, capitalized interest?

l. Has there been any significant impairment in value of property and equipment items? If so, has any impairment loss been properly reflected in the financial statements?

m. Are any property or equipment items mortgaged or otherwise encumbered? If so, are these mortgages and encumbrances properly reflected in the financial statements?

8. Intangibles and other assets

a. What is the nature of the amounts included in other assets?

b. Do these assets represent costs that will benefit future periods? What is the amortization policy related to these assets? Is this policy appropriate?

c. Have other assets been properly classified between current and noncurrent?

d. Are intangible assets with finite lives being appropriately amortized?

e. Are the costs associated with computer software properly reflected as intangible assets (rather than property and equipment) in the financial statements?

f. Are the costs associated with goodwill (and other intangible assets with indefinite lives) properly reflected as intangible assets in the financial statements? Has amortization ceased related to these assets?

g. Has there been any significant impairment in value of these assets? If so, has any impairment loss been properly reflected in the financial statements?

h. Are any of these assets mortgaged or otherwise encumbered?
f. Are any liabilities collateralized or subordinated? If so, are those liabilities disclosed in the financial statements?

g. Are there any payables to employees or related parties?

10. Long-term liabilities

a. Are the terms and other provisions of long-term liability agreements properly disclosed in the financial statements?

b. Have liabilities been properly classified between current and noncurrent?

c. Has interest expense been properly accrued and reflected in the financial statements?

d. Is the company in compliance with loan covenants and agreements? If not, is the noncompliance properly disclosed in the financial statements?

e. Are any long-term liabilities collateralized or subordinated? If so, are these facts disclosed in the financial statements?

f. Are there any obligations that, by their terms, are due on demand within one year from the balance sheet date? If so, have these obligations been properly reclassified into the current liability section of the balance sheet?

11. Income and other taxes

a. Do the financial statements reflect an appropriate provision for current and prior-year income taxes payable?

b. Have any assessments or reassessments been received? Are there tax authority examinations in process?

c. Are there any temporary differences between book and tax amounts? If so, have deferred taxes on these differences been properly reflected in the financial statements?

d. Do the financial statements reflect an appropriate provision for taxes other than income taxes (for example, franchise, sales)?

e. Have all required tax payments been made on a timely basis?

f. Has the entity assessed uncertain tax positions and related disclosures in accordance with FASB ASC 740, *Income Taxes*?

12. Other liabilities, contingencies, and commitments

a. What is the nature of the amounts included in other liabilities?

b. Have other liabilities been properly classified between current and noncurrent?

c. Are there any guarantees, whether written or verbal, whereby the entity must stand ready to perform or is contingently liable related to the guarantee? If so, are these guarantees properly reflected in the financial statements?

d. Are there any contingent liabilities (for example, discounted notes, drafts, endorsements, warranties, litigation, and unsettled asserted claims)? Are there any potential unasserted claims? Are these contingent liabilities, claims, and assessments properly measured and disclosed in the financial statements?

e. Are there any material, contractual obligations for construction or purchase of property and equipment or any commitments or options to purchase or sell company securities? If so, are these facts clearly disclosed in the financial statements?
f. Is the entity responsible for any environmental remediation liability? If so, is this liability properly measured and disclosed in the financial statements?

g. Does the entity have any agreement to repurchase items that previously were sold? If so, have the repurchase agreements been taken into account in determining the appropriate measurements and disclosures in the financial statements?

h. Does the entity have any sales commitments at prices expected to result in a loss at the consummation of the sale? If so, are these commitments properly reflected in the financial statements?

i. Are there any violations, or possible violations, of laws or regulations the effects of which should be considered for financial statement accrual or disclosure?

13. Equity

a. What is the nature of any changes in equity accounts during each reporting period?

b. What classes of stock (other ownership interests) have been authorized?

c. What is the par or stated value of the various classes of stock (other ownership interests)?

d. Do amounts of outstanding shares of stock (other ownership interests) agree with subsidiary records?

e. Have pertinent rights and privileges of ownership interests been properly disclosed in the financial statements?

f. Does the entity have any mandatorily redeemable ownership interests? If so, have these ownership interests been evaluated so that a proper determination has been made related to whether these ownership interests should be measured and reclassified to the liability section of the balance sheet? Are redemption features associated with ownership interests clearly disclosed in the financial statements?

g. Have dividend (distribution) and liquidation preferences related to ownership interests been properly disclosed in the financial statements?

h. Do disclosures related to ownership interests include any applicable call provisions (prices and dates), conversion provisions (prices and rates), unusual voting rights, significant terms of contracts to issue additional ownership interests, or any other unusual features associated with the ownership interests?

i. Are syndication fees properly reflected in the financial statements as a reduction of equity (rather than an asset)?

j. Have any stock options or other stock compensation awards been granted to employees or others? If so, are these options or awards properly measured and disclosed in the financial statements?

k. Has the entity made any acquisitions of its own stock? If so, are the amounts associated with these reacquired shares properly reflected in the financial statements as a reduction in equity? Is the presentation in accordance with applicable state laws?

l. Are there any restrictions or appropriations on retained earnings or other capital accounts? If so, are these restrictions or appropriations properly reflected in the financial statements?

14. Revenue and expenses

a. What is the entity’s revenue recognition policy? Is the policy appropriate? Has the policy been consistently applied and appropriately disclosed?
b. Are revenues from sales of products and rendering of services recognized in the appropriate reporting period (that is, when the products have been delivered and when the services have been performed)?

c. Were any sales recorded under a “bill and hold” arrangement? If yes, have the criteria been met to record the transaction as a sale?

d. Are purchases and expenses recognized in the appropriate reporting period (that is, matched against revenue) and properly classified in the financial statements?

e. Do the financial statements include discontinued operations or items that might be considered extraordinary, or both? If so, are amounts associated with discontinued operations, extraordinary items, or both properly displayed in the income statement?

f. Does the entity have any gains or losses that would necessitate the display of comprehensive income (for example, gains or losses on available-for-sale securities or cash flow hedge derivatives)? If so, have these items been properly displayed within comprehensive income (rather than included in the determination of net income)?

15. Other

a. Have events occurred subsequent to the balance sheet date that would require adjustment to, or disclosure in, the financial statements?

b. Has the entity considered whether declines in market values subsequent to the balance sheet date may be permanent or caused the entity to no longer be in compliance with its loan covenants?

c. Have actions taken at stockholders, directors, committees of directors, or comparable meetings that affect the financial statements been reflected in the financial statements?

d. Are significant estimates and material concentrations (for example, customers or suppliers) properly disclosed in the financial statements?

e. Are there plans or intentions that may materially affect the carrying amounts or classification of assets and liabilities reflected in the financial statements?

f. Have there been material transactions between or among related parties (for example, sales, purchases, loans, or leasing arrangements)? If so, are these transactions properly disclosed in the financial statements?

g. Are there uncertainties that could have a material impact on the financial statements? Is there any change in the status of previously disclosed material uncertainties? Are all uncertainties, including going concern matters, that could have a material impact on the financial statements, properly disclosed in the financial statements?

h. Are barter or other nonmonetary transactions properly recorded and disclosed? Have nonmonetary asset exchanges involving commercial substance been reflected in the financial statements at fair value? Have nonmonetary asset exchanges not involving commercial substance been reflected in the financial statements at carrying value?

AAM Section 2500

Form and Content of Financial Statements

.01 Preparing financial statements is both an art and a science, normally learned by trial and error or by word of mouth. The process is an art in that financial statements are typically presented in a format that has eye appeal, is understandable, conveys the company’s financial picture, and can be produced economically. Preparing financial statements is a science in that a mastery of a complex array of authoritative standards for measurement, presentation, and disclosure is needed.

Title Page

.02 A title page is recommended for all financial statement presentations. The title page typically contains the name of the entity, the title of the financial statements, and the date or period covered.

Name of the Entity

.03 The name of the entity is ordinarily presented exactly as it is listed in the charter, partnership agreement, or other appropriate legal document. When the entity is not a regular corporation, the type of entity may be disclosed. Examples of appropriate presentations are as follows:

- Corporation
- XYZ, Ltd.
- Jones Nursery
- The Estate of John Doe
- Mr. and Mrs. John Q. Public
- Jane Doe Testamentary Trust

Title of Financial Statements

.04 If the presentation includes more than one type of financial statement (for example, Balance Sheet and Income Statement), the term financial statements is the most practical method of communicating what is included in the presentation. When only one type of statement is presented, it is more appropriate to use the exact title of the statement. When consolidated or combined statements are presented, the title page includes the words consolidated or combined. When financial statements include supplementary information, the title is modified. Some accountants add a description of the service performed to the title of the financial statements on the title page.

Date or Period Covered

.05 When both a balance sheet and income statement are presented, the period covered by the statement is typically shown, with the period ending date. When only a balance sheet is presented, the date is the balance sheet date, alone.

* In February 2009, the Accounting and Review Services Committee issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
Presentation of the Accountant’s Report

.06 This section discusses presentation and format of the accountant’s report. Section 2600 discusses the wording of the report and other considerations that affect the degree of responsibility assumed by the accountant.

Letterhead

.07 There is no requirement that the accountant’s report be printed on the firm’s letterhead (nor is there any requirement that the report be manually signed—for example, the signature could be manual, stamped, electronic, or typed—or that the financial statements be bound).

Heading of the Accountant’s Report

.08 No heading is needed for an accountant’s report, although some accountants prefer to use one. This avoids any misunderstanding about the type of report. Examples of appropriate report headings would be as follows:

- Accountant’s Report
- Accountant’s Report on Financial Statements
- Accountant’s Report on Supplementary Information

Address

.09 Generally, the accountant’s report is addressed to the board of directors, stockholders, or both. Reports are not intended as letters. Accordingly, addresses that include street names or zip codes are not appropriate. Examples of appropriate addresses are as follows:

- To the Board of Directors; XYZ Corporation; Greenville, SC
- To the Stockholders; XYZ Corporation
- To the Board of Directors and Shareholders; XYZ Corporation; Greenville, SC
- For small, closely held companies: Mr. John Doe; Small Manufacturing, Inc; Greenville, SC
- For personal financial statements: Mr. And Mrs. John Doe; Greenville, SC
- For partnerships: To the Managing Partner; ABC Company; Greenville, SC or Mrs. Jane Doe; General Partner, XYZ Ltd. Partnership
- For proprietorship: Mr. John Jones; Jones Transportation; Columbia, SC
- For trusts: Mr. John Smith; Trustee; Jane Doe Testamentary Trust; Myrtle Beach, SC
- For estates: Mr. John Doe; Executor; Estate of John Smith; Hilton Head Island, SC

Salutations

.10 Common practice in the profession is to exclude such salutations as “Dear Sirs” or “Gentlemen” from the report.

Signature

.11 The compilation or review report should contain a signature of the accounting firm or the accountant as appropriate. (For example, the signature could be manual, stamped, electronic, or typed.) Some state boards and certain regulatory agencies require an individual’s signature on the report.
Date of Report

.12 The dating of the report affects the responsibility assumed by the accountant and is discussed in more detail in section 2600. The format of the date is rather straightforward. Firms with multiple offices often precede the date of the report with the office’s location.

Basic Financial Statements

.13 The basic financial statements included in a generally accepted accounting principles (GAAP) financial statement presentation are as follows (basic financial statements for an other comprehensive basis of accounting [OCBOA] presentation are discussed in section 2700):

- Balance sheet
- Income statement
- Statement of retained earnings or Changes in stockholders’ equity
- Statement of cash flows

Heading

.14 The heading of each financial statement typically contains the name of the entity, the title of specific statement, and the date or period covered.

Reference on Financial Statements

.15 The following examples demonstrate how the type of reference or legend on the financial statements depends upon the type of engagement:

- If the financial statements are reviewed, each page of the financial statements should contain a reference, such as: See Accountant’s Review Report.

- If the financial statements are compiled for general-use (that is, not restricted), each page of the financial statements should contain a reference, such as: See Accountant’s Compilation Report.

- If the financial statements are not intended to be used by a third party, each page of the financial statements should contain a reference to the restricted nature of the financial statements, such as the following:
  - Restricted for Management’s Use Only, or
  - Solely for the information of and use by the management of XYZ Company and not intended to be and should not be used by any other party.

- If the financial statements are compiled and included in certain prescribed forms (according to AR section 300, Compilation Reports on Financial Statements Included in Certain Prescribed Forms [AICPA, Professional Standards, vol. 2]), each page of the form should include a reference, such as: See Accountant’s Compilation Report.

- If the financial statements are personal financial statements prepared for inclusion in a personal financial plan (AR section 600, Reporting on Personal Financial Statements Included in Written Personal Financial Plans [AICPA, Professional Standards, vol. 2]), each of the personal financial statements should contain a reference to the report, such as: See Accountant’s Report.

.16 Note that, in all cases, these requirements extend to the notes (because the notes are part of the financial statements). However, there is diversity in practice as to how to meet this requirement for notes. Some accountants place the reference on each page of the notes, and others place the reference only on the first page.

---

1 The accounting literature does not require the statement of retained earnings and the statement of comprehensive income to be presented. If the statement of retained earnings and the statement of comprehensive income are not presented, then the information in those statements must be presented in other financial statements.
of the notes. Still others place a statement on each page of the financial statements that “the notes are an integral part of the financial statements” and, therefore, do not place the reference on the note pages. Any of these approaches is acceptable.

.17 Also, the previous references are examples given in Statements on Standards for Accounting and Review Services (SSARSs), and the accountant may modify the wording of the reference. AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2), states that the accountant refer to the report—not that he or she state the type of report (level of service) in the reference. Therefore, the reference “See Accountant’s Report” would be sufficient in all engagements that contain a report. However, most accountants follow the wording given in the examples. Accountants may place the reference on the financial statements by installing footers in the financial statement software, by using a rubber stamp, by manually writing the reference, or by any other method that is practical to use.

Use of the Term Unaudited

.18 Some accountants follow the financial statement title with the term unaudited. This practice is not required by SSARSs and may be misleading.

Supplementary Information

.19 Financial statements of nonpublic companies often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as the following:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
- Selling expenses
- General and administrative expenses
- Details of marketable securities
- Property and equipment schedule
- Aging analysis of accounts receivable
- Details of sales by product line, territory, or salesman

Presentation

.20 Normally, supplementary information is segregated from the basic financial statements, after a title page marked “Supplementary Information.” If a separate report on the supplementary information is presented, it typically follows the title page.

Reporting

.21 The accountant should describe in the report on the financial statements, or in a separate report, the degree of responsibility, if any, he or she takes with regard to the supplementary information. See section 2600 for information on suggested wording for compilation and review reports.

Headings

.22 Each schedule is typically headed with a descriptive title that distinguishes it from the basic financial statements. Normally, supplementary schedules are not referred to as statements to avoid confusing them with basic financial statements.
Reference to Report

.23 Each supplementary schedule may contain a reference to the report. Although not specifically addressed in SSARSs, the reference is advisable because the report describes the degree of responsibility the accountant takes with regard to the schedules.

Disclosures

.24 In general, all financial statements should include adequate disclosures (notes). However, there are situations in which the financial statements may not include one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

.25 If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures and statements were included in the financial statements, they might influence the user’s conclusions about the company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.26 Note that if the financial statements are presented in accordance with an OCBOA (for example, income tax basis), this extra paragraph would be worded as follows:

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the company’s assets, liabilities, equity, revenues, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.27 This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they typically are not labeled as “Notes to the Financial Statements” (this title implies full disclosure). Instead, an appropriate title would be “Selected Information—Substantially All Disclosures Required by GAAP Are Not Included.”

Referencing Notes

.28 Although there is no requirement that individual notes be referenced to specific items in the financial statements, each page of the financial statements generally contains a general reference to the notes. If selected information rather than all notes is presented in a compilation, a reference to the selected information is ordinarily included.

[The next page is 2551.]
AAM Section 2600

Reporting *

Reporting Obligation

.01 AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2) discusses the accountant’s reporting obligation for compilation and review engagements. In summary, it says the following:

- A compilation is the minimum level of service that an accountant can provide if the accountant submits unaudited financial statements of a nonissuer to a client or others (paragraph .01 of AR section 100)
- The accountant should not consent to the use of his or her name in a document or written communication containing unaudited financial statements of a nonissuer unless (a) the accountant has compiled or reviewed the financial statements in compliance with the provisions of AR section 100, or (b) the financial statements are accompanied by an indication that the accountant has not compiled or reviewed the financial statements, and that the accountant assumes no responsibility for them. For example, according to paragraph .03 of AR section 100, the indication may be worded as follows:

  *The accompanying balance sheet of X Company as of December 31, 20X1, the related statements of income, and cash flows for the year then ended were not audited, reviewed, or compiled by us and, accordingly, we do not express an opinion or any other form of assurance on them.*

- The accountant should issue a report prepared in accordance with Statements on Standards for Accounting and Review Services (SSARSs) whenever he or she is engaged to compile financial statements of a nonissuer, or submits financial statements that are reasonably expected to be used by a third party (paragraph .13 of AR section 100)
- The accountant should issue a report prepared in accordance with SSARSs whenever he or she is engaged to review financial statements of a nonissuer (paragraph .46 of AR section 100)

.02 The first item in the bulleted list above is addressed in paragraph .01 of AR section 100. Whenever the accountant prepares financial statements (manually or using a computer) and presents them to a client or third parties, he or she has submitted financial statements.

.03 The second item in the bulleted list in paragraph .01 of this section of the manual is aimed at situations when a client includes the accountant’s name in a loan proposal, prospectus, or other written communication that includes client prepared financial statements.

.04 The third and fourth items addressed in the bulleted list in paragraph .01 of this section of the manual are discussed in more detail in the following sections.

*In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.*

AICPA Audit and Accounting Manual

AAM §2600.04
Basic Compilation Reports

.05 The basic elements of a report on compiled financial statements are as follows:

- A statement that a compilation has been performed in accordance with SSARSs, issued by the AICPA
- A statement that a compilation is limited to presenting in the form of financial statements information that is the representation of management (owners)
- A statement that the financial statements have not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on them
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the compilation report (The date of completion of the compilation should be used as the date of the accountant’s report.)

.06 The report should not refer to any other procedures that the accountant may have performed before or during the compilation engagement. To do so might lead the reader to conclude that the accountant is, in fact, offering some form of assurance.

Basic Review Reports

.07 The basic elements of a report on financial statements reviewed by an accountant are as follows:

- A statement that a review has been performed in accordance with SSARS, issued by the AICPA
- A statement that all information included in the financial statements is the representation of management (owners) of the entity
- A statement that a review consists principally of inquiries of company personnel and analytical procedures applied to financial data
- A statement that a review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements taken as a whole and, accordingly, no such opinion is expressed
- A statement that the accountant is not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with the applicable financial reporting framework (for example, generally accepted accounting principles [GAAP]), other than those modifications, if any, indicated in the report
- A signature of the accounting firm or the accountant as appropriate (For example, the signature could be manual, stamped, electronic, or typed.)
- The date of the review report (The date of the completion of the accountant’s review procedures should be used as the date of the accountant’s report.)

.08 Any other procedures that the accountant may have performed before or during the review engagement, including those performed in connection with a compilation of the financial statements, should not be described in the report.

Reporting When Not Independent

.09 An accountant is precluded from issuing a review report on the financial statements of an entity with respect to which he is not independent. He or she may, however, issue a compilation report.

---

1 In making a judgment about whether he or she is independent, the accountant should be guided by the AICPA Code of Professional Conduct.

AAM §2600.05 Copyright © 2009, American Institute of Certified Public Accountants, Inc.
The compilation report should specifically disclose the lack of independence. However, the reason for lack of independence should not be described. When the accountant is not independent, he or she should include the following as the last paragraph of the compilation report:

I am (we are) not independent with respect to XYZ Company.

Reporting on Financial Statements That Omit Disclosures

In general, financial statements should include adequate disclosures (notes). However, there are situations in which management may elect to omit one or more disclosures. Depending upon the situation, the compilation report may have to be modified.

If all disclosures are omitted, then add an extra paragraph to the compilation report, as follows:

Management has elected to omit substantially all of the disclosures (and the statement of comprehensive income and the statement of cash flows) required by generally accepted accounting principles. If the omitted disclosures and statements were included in the financial statements, they might influence the user’s conclusions about the company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Note that if the financial statements are presented on a basis of accounting other than GAAP (for example, income tax basis), this extra paragraph would be worded as follows:

Management has elected to omit substantially all of the disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the company’s assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

This additional paragraph is appropriate if all, or substantially all, disclosures are omitted. The additional paragraph is not appropriate if substantially all disclosures are included (most, but not all disclosures). If selected disclosures are included they typically are not labeled as “Notes to the Financial Statements” (this title implies full disclosure). Instead, an appropriate title would be “Selected Information—Substantially All Disclosures Required by GAAP Are Not Included.”

Interpretation No. 1, “Omission of Disclosures in Reviewed Financial Statements,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. 01–02) indicates that the previously mentioned modification for compiled financial statements is not appropriate for reviewed financial statements. Because the omission of substantially all disclosures is a departure from GAAP, the review report should include the omitted disclosures.

When the financial statements include substantially all disclosures, the guidance above is not appropriate. Rather, the omission of a single disclosure or a few disclosures should be treated in a compilation or review report like any other departure from GAAP, and the accountant should disclose the nature of the departure and its effects, if known.

Reporting on Financial Statements With Departures From GAAP

Although compiled financial statements may omit substantially all disclosures required by GAAP, the omission of disclosures that are material to reviewed financial statements is a GAAP departure that should be disclosed in the accountant’s review report. As discussed previously, the accountant should include in the review report all of the omitted disclosures or, if the details to be disclosed have not been determined, the specific nature of the omitted disclosures. If, in the course of a compilation or review engagement, the accountant becomes aware of departures from GAAP that are material to the financial statements, he or she has the following three alternatives:
• Persuade the client to revise the financial statements to conform to GAAP
• Refer to the departure in the report
• Withdraw from the engagement

.18 If modification of the report is appropriate, the nature of the departure from GAAP should be disclosed in a separate paragraph, and the effects (that is, the dollar amount) of the departure should be disclosed, if known. If the effects are not known, the accountant is not required to determine them, provided the accountant states in his report that no determination of the effects of the departure has been made.

Reporting When There Are Significant Departures From GAAP

.19 According to Interpretation No. 7, “Reporting When There Are Significant Departures From GAAP,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .23–.26) an accountant cannot modify a compilation or review report to indicate that the financial statements are not fairly presented in accordance with GAAP. Thus, an adverse opinion is not appropriate in a compilation or review engagement.

.20 Interpretation No. 7 of AR section 100 indicates that the accountant may wish to emphasize the limitations of financial statements having significant GAAP departures in a separate paragraph in the report. This paragraph is in addition to the one that describes the departure. Suggested wording for such a paragraph follows:

Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the financial statements taken as a whole, users of these financial statements should recognize that they might reach different conclusions about the company’s financial position, results of operations, and cash flows if they had access to revised financial statements prepared in conformity with generally accepted accounting principles.

Date of Reports

.21 The date of the completion of the accountant’s review procedures should be used as the date of his or her report on reviewed financial statements. The date of completion of the compilation should be used as the date of his or her report on compiled financial statements.

Highest Level of Service

.22 If the accountant provides more than one level of service on the same financial statements (for example, compilation and review or review and audit), the financial statements should be accompanied by a report that is appropriate for the highest level of service provided. This does not preclude the accountant from using procedures that go beyond those required for the level of service.

.23 Interpretation No. 3, “Reporting on the Highest Level of Service,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .06–.12) provides guidance on the type of report to be issued when the accountant performs procedures that go beyond those required. It states that simply performing procedures (for example, analytical procedures in a compilation engagement) do not require the issuance of the higher report.

.24 Interpretation No. 13, “Additional Procedures,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .46–.49) addresses whether an accountant can perform audit procedures in a compilation or review engagement and still issue a compilation or review report. It states that SSARSs do not preclude the accountant from performing procedures that he deems necessary or that his client requests.

.25 Both interpretations stress the importance of the understanding with the client.
.26 An exception to the highest level of service rule is indicated in paragraph .53 of AR section 100. If the accountant is engaged to perform an audit or a review, but finds that he or she is not independent, the auditor may issue a compilation report provided that he or she complies with the compilation standards.

.27 AR section 300, Compilation Reports on Financial Statements Included in Certain Prescribed Forms (AICPA, Professional Standards, vol. 2), permits another exception to the highest level of service rule. It allows an accountant who has reviewed financial statements to issue a compilation report on financial statements for the same period included in a prescribed form.

Performing a Lower Level of Service

.28 Accountants may be asked to perform a lower level of service from the one they previously performed on financial statements covering the same period, depending on the situation. Examples are as follows:

- The client requests the accountant to compile financial statements that omit substantially all disclosures, even though the accountant has already compiled, reviewed, or audited full disclosure financial statements for the same period.
- The client requests the accountant to compile a balance sheet that omits substantially all disclosures, even though the accountant has already compiled, reviewed, or audited the complete financial statements for the same period.

.29 Because professional standards are silent on this issue, practice varies. Many accountants will consent to providing the compilation as long as they are satisfied that the client has a valid business reason for the request and is not attempting to mislead anyone. However, questions frequently arise about the form of the report. The most common question is whether the report should refer to the prior level of service performed on the statements. Again, the professional standards are silent.

Reporting When the Statement of Cash Flows or Comprehensive Income Information Is Omitted, or Both

.30 Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 230, Statement of Cash Flows, requires that a statement of cash flows be presented for each period for which an income statement is presented. Thus, omitting the statement of cash flows constitutes a departure from GAAP. Like other departures from GAAP, the accountant should disclose the departure in a separate paragraph of his report. An example wording of the separate paragraph follows:

A statement of cash flows for the year ended December 31, 20XX, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

.31 According to FASB ASC 220, Comprehensive Income, all business entities that have any component of comprehensive income must display information about comprehensive income in a financial statement having the same prominence as the other basic financial statements. The primary components of other comprehensive income include the following:

- Unrealized gains and losses arising from investments in marketable securities classified as “available for sale” (FASB ASC 320, Investments—Debt and Equity Securities)
- Foreign currency translation adjustments and gains and losses from certain foreign currency transactions (FASB ASC 830, Foreign Currency Matters)
- Minimum pension liability adjustments (FASB ASC 960, Plan Accounting—Defined Benefit Pension Plans)
- Unrealized gains and losses arising from certain derivative transactions (FASB ASC 815, Derivative and Hedging)
If an entity does not have components of other comprehensive income, FASB ASC 220 does not apply. As a result, most small business clients do not have to apply FASB ASC 220. The requirements of FASB ASC 220 do not apply to not-for-profit organizations that are required to follow the provisions of FASB ASC 958, Not-for-Profit Entities.

FASB ASC 220 does not specify a format for presenting comprehensive income, although it provides three examples:

- Presenting the information in the income statement (after net income)
- Presenting the information in the statement of changes in equity
- Presenting the information in a separate statement of comprehensive income

The wording of the introductory paragraph of the compilation or review report may have to be modified depending on how the accountant chooses to report comprehensive income. If comprehensive income is reported in the income statement, then the title of the statement will need to be modified (Statement of Income and Comprehensive Income). If comprehensive income is reported in a separate statement, then an additional statement will need to be referenced in the report. If comprehensive income is reported in the statement of changes in equity, then no modification to the report is necessary.

However, in compiled financial statements, the presentation of comprehensive income may be omitted by identifying the omission (in much the same way that a statement of cash flows is omitted). Depending on the type of engagement, the omission is identified in the report accompanying the financial statements or in the engagement letter (financial statements not intended for third party use).

Reporting When Supplementary Information Is Included

The following are two common questions that arise when supplementary information is included with the basic financial statements:

- What is considered supplementary information, and where is it placed in the presentation?
- Does the accountant have to modify the standard compilation or review report if supplementary information is included?

The term supplementary information is not defined in SSARSs. Paragraph .03 of AU section 551, Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents (AICPA, Professional Standards, vol. 1), defines this type of information as

- additional details of items in, or related to, the basic financial statements, unless the information has been identified as being part of the basic financial statements.
- consolidating information.
- historical summaries of items extracted from basic financial statements, including graphs prepared on a computer.
- statistical data.
- other material, some of which may be from sources outside the accounting system or outside the entity.

Financial statements often include detailed schedules, summaries, comparisons, or statistical information that are not part of the basic financial statements, such as the following:

- Budgets for an expired period
- Cost of goods sold schedule
- Manufacturing expenses schedule
• Selling expenses
• General and administrative expenses
• Details of marketable securities
• Property and equipment schedule
• Aging analysis of accounts receivable
• Details of sales by product line, territory, or salesman

.39 Normally, supplementary information is separated from the basic financial statements. Most entities present supplementary information on separate pages after the basic financial statements (and notes, if included). It is also a good idea to separate the supplementary information from the basic financial statements by including a title page marked, “Supplementary Information.” If the accountant presents a separate report on the supplementary information, it typically follows the title page.

.40 Paragraph .83 of AR section 100 states that the accountant should clearly indicate the degree of responsibility, if any, he or she is taking with respect to the supplementary information that accompanies the basic financial statements.

.41 When the accountant has compiled both the basic financial statements and other data presented only for supplementary analysis purposes, the compilation report should refer to the other data, or the accountant can issue a separate report on the other data. If a separate report is issued, the report should state that the other data accompanying the financial statements are presented only for supplementary analysis purposes and that the information has been compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data. If the basic financial statements are compiled, then the compilation report can be modified as follows:

We have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings and cash flows for the year then ended, and the accompanying supplementary information contained in schedules A and B, which are presented only for supplementary analysis purposes, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants.

A compilation is limited to presenting in the form of financial statements and supplementary schedules information that is the representation of management. We have not audited or reviewed the accompanying financial statements and supplementary schedules and, accordingly, do not express an opinion or any other form of assurance on them.

.42 If the basic financial statements are reviewed, an explanation should be included in the review report or in a separate report on the other data. The report should state that the review has been made for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with GAAP, and either

• the other data accompanying the financial statements are presented only for supplementary analysis purposes and have been subjected to the inquiry and analytical procedures applied in the review of the basic financial statements, and the accountant did not become aware of any material modifications that should be made to such data (that is, the accountant is stating that he or she also reviewed the supplementary information), or

• the other data accompanying the financial statements are presented only for supplementary analysis purposes and have not been subjected to the inquiry and analytical procedures applied in the review of the basic financial statements, but were compiled from information that is the representation of management, without audit or review, and the accountant does not express an opinion or any other form of assurance on such data (that is, the accountant is stating that he or she reviewed the financial statements but only compiled the supplementary information).
In any case, the important point to remember is to clearly indicate the degree of responsibility the accountant is taking for any information accompanying the basic financial statements.

**Client Prepared Supplementary Information**

When the supplementary information is prepared or presented solely by the client, the reporting responsibility may not be as obvious as when the accountant assembled or assisted in assembling the information. Client prepared supplementary information is normally included with compiled or reviewed financial statements in one of the following ways:

- The financial statements and the client prepared information are bound by the accountant in his or her firm’s report cover (or typed on the accountant’s letterhead and stapled to the financial statements).
- After the accountant submits the financial statements to the client, the client, in turn, attaches (in some manner) supplementary information and distributes the package to third parties.

**Client Prepared Supplementary Information Bound in the Accountant’s Report Cover**

When the client prepared supplementary information is bound in the accountant’s report cover, a third party would normally conclude that the accountant has some responsibility for the information. Thus, in such a situation, being silent about the accountant’s responsibility for the client prepared supplementary information is not a valid alternative. Paragraph .83 of AR section 100 states, “When the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility, if any, he is taking with respect to such information.”

**Supplementary Information Attached by the Client**

The accountant’s reporting responsibility for client prepared supplementary information attached to the financial statements after they are delivered to the client is not directly addressed by SSARSs. Realistically, the accountant has little control over the client’s actions once he or she delivers the report. However, situations do occur when the client clearly communicates to the accountant that the financial statements will be combined with other client prepared information and submitted by the client to third parties, for example, to a bank as part of a loan proposal package. Guidance for these situations can be inferred from AR section 100 and AR section 200, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*, vol. 2), that discusses client prepared financial statements included in a client prepared document along with compiled or reviewed financial statements. Basically, this guidance says the client prepared financial statements of some periods that have not been audited, reviewed, or compiled may be presented on separate pages of a document that also contains financial statements of other periods on which the accountant has reported if they are accompanied by a statement that they were not prepared by the accounting firm and the accounting firm assumes no responsibility for them. Absent such a statement, the accountant is advised to consult with his or her attorney to consider what other actions are appropriate. In such situations, the accountant may ask the client to disclose (preferably on a page immediately preceding the data) a statement such as the following:

The supplementary information on pages ____ to ____ has not been audited, reviewed, or compiled by ABC Firm, and ABC Firm assumes no responsibility for this information.

Alternately, the accountant may add the following paragraph to the compilation or review report:

All other information that may be included with (or attached to) the financial statements (and supplementary information) identified in the preceding paragraph has not been audited, reviewed, or compiled by us (me) and, accordingly, we (I) assume no responsibility for it.

**Forecast or Projection Included With Historical Financial Statements**

SSARSs do not apply to any type of prospective information. The accountant is required to report separately on prospective information included with historical financial statements following the reporting
rules in the Statements on Standards for Attestation Engagements. Generally, the accountant will either compile, examine, or apply agreed upon procedures to the prospective information.

.49 An exception to this rule occurs for expired forecasts or projections, that is, presentations that are no longer prospective in nature because the prospective period has expired. An example would be prior year historical financial statements presented alongside the prior year budget. Expired prospective information presented for comparative purposes meets the definition of supplementary information; therefore, AR section 100 applies.

**Pro Forma Information**

.50 The objective of pro forma financial information is to show what the significant direct effects on historical information might have been had a consummated or proposed transaction or event occurred at an earlier date. Pro forma financial information usually is presented by applying certain pro forma adjustments to amounts in the historical financial statements. Such information is frequently used to show the effects of the following:

- Business combinations
- Changes in capitalization
- Dispositions of a significant part of a business
- Changes in the form of business organization
- Proposed sale of securities and application of the proceeds

.51 Although such future or hypothetical transactions may appear prospective in nature, pro forma presentations are essentially historical financial statements that have been recast.

.52 According to paragraph .05 of AR section 120, *Compilation of Pro Forma Financial Information* (AICPA, *Professional Standards*, vol. 2), pro forma financial information should be labeled as such to distinguish it from historical financial information. This presentation should describe the transaction (or event) that is reflected in the pro forma financial information, the source of the historical financial information on which it is based, the significant assumptions used in developing the pro forma adjustments, and any significant uncertainties about those assumptions. The presentation should also indicate that the pro forma financial information should be read in conjunction with the related historical financial information and that the pro forma financial information is not necessarily indicative of the results (such as financial position and results of operations, as applicable) that would have been attained had the transaction (or event) actually taken place earlier.

.53 If an accountant prepares or assists a client in preparing pro forma financial information, the accountant should consider how the presentation of pro forma financial information will be used. The accountant should also consider the potential of being associated with pro forma financial information and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.54 An engagement to compile pro forma financial information may be undertaken as a separate engagement or in conjunction with a compilation of financial statements. The accountant may agree to compile pro forma financial information if the document that contains the pro forma financial information includes (or incorporates by reference) complete historical financial statements of the entity for the most recent year (or for the preceding year if financial statements for the most recent year are not yet available) and, if pro forma financial information is presented for an interim period, the document also includes (or incorporates by reference) historical interim financial information for that period (which may be presented in condensed form). In the case of a business combination, the document should include (or incorporate by reference) the appropriate historical financial information for the significant constituent parts of the combined entity.
.55 Additionally, the historical financial statements of the entity (or, in the case of a business combination, of each significant constituent part of the combined entity) on which the pro forma financial information is based must have been compiled, reviewed, or audited. The accountant’s compilation or review report or the auditor’s report on the historical financial statements should be included (or incorporated by reference) in the document containing the pro forma financial information.

.56 Before issuance of a compilation report on pro forma financial information, the accountant should read such compiled pro forma financial information, including the summary of significant assumptions, and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term error refers to mistakes in the compilation of the pro forma financial information, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented. The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. If the accountant reports on compiled pro forma financial information when management elects to omit substantially all disclosures, then the accountant should follow the guidance in paragraph .19 of AR section 100.

.57 When the accountant is engaged to compile or issues a compilation report on pro forma financial information, the basic elements of the report are as follows:

a. An identification of the pro forma financial information.

b. A statement that the compilation was performed in accordance with SSARSs issued by the American Institute of Certified Public Accountants.

c. A reference to the financial statements from which the historical financial information is derived and a statement on whether such financial statements were compiled, reviewed, or audited. (The report on pro forma financial information should refer to any modifications in the accountant’s or auditor’s report on historical financial statements.)

d. A statement that the pro forma financial information was compiled. If the compilation was performed in conjunction with a compilation of the company’s financial statements, the paragraph should so state and indicate the date of the accountant’s compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the pro forma financial information.

e. A description of the basis on which the pro forma financial information is presented if that basis is not GAAP and a statement that that basis of presentation is a comprehensive basis of accounting other than GAAP.

f. A statement that a compilation is limited to presenting pro forma financial information that is the representation of management (owners).

g. A statement that the pro forma financial information has not been audited or reviewed and, accordingly, the accountant does not express an opinion or any other form of assurance on it.

h. A separate paragraph explaining the objective of pro forma financial information and its limitations.

i. A signature of the accounting firm or the accountant as appropriate. (The signature could be manual, stamped, electronic, or typed.)

j. The date of the compilation report. (The date of completion of the compilation should be used as the date of the accountant’s report.)

.58 Each page of the compiled pro forma financial information should include a reference, such as “See Accountant’s Compilation Report.”

---

2 The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented. Nothing in this statement should be interpreted to preclude the accountant from reporting on compiled pro forma financial information when management elects to omit substantially all disclosures. In that situation, the accountant should follow the guidance in paragraphs .19–.22 of AR section 100.
Reporting on Charts and Graphs

General

.59 Common examples of charts and graphs prepared for clients include the following:

- Number of days sales in accounts receivable
- Sales by product line
- Operating expenses by plant
- Line of credit usage versus owned inventory

Charts and Graphs That Accompany Financial Statements

.60 When the basic financial statements are accompanied by information in the form of a chart or graph, such information may be considered supplementary information. The accountant may consider the following basic issues:

- Accountants ordinarily should check for consistency if the same information is presented numerically in the basic financial statements and graphically in supplementary information.
- Accountants ordinarily should consider whether the information is presented in a way that is obviously misleading.
- Each chart or graph ordinarily includes a reference to the accountant’s report.

Emphasis Paragraphs

.61 In accordance with paragraph .54 of AR section 100, an accountant may emphasize, in any report on financial statements, a matter disclosed in the financial statements. Such explanatory information should be presented in a separate paragraph of the accountant’s report. Emphasis paragraphs are never required; they may be added solely at the accountant’s discretion. Examples of matters the accountant may wish to emphasize are as follows:

- Uncertainties
- That the entity is a component of a larger business enterprise
- That the entity has had significant transactions with related parties
- Unusually important subsequent events\(^3\)
- Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period

.62 Because an emphasis of matter paragraph should not be used in lieu of management disclosures, an accountant should not include an emphasis paragraph in a compilation report on financial statements that

---

\(^3\) In May 2009, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 165, *Subsequent Events*, which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This statement sets forth

1. the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements.
2. the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements.
3. the disclosures that an entity should make about events or transactions that occurred after the balance sheet date.

FASB Statement No. 165 introduces the concept of financial statements being *available to be issued*. It also requires disclosure of the date through which an entity has evaluated subsequent events and the basis for that date (that is, whether that date represents the date the financial statements were issued or were available for issue).

FASB Statement No. 165 is effective for interim or annual financial periods ending after June 15, 2009. For additional information please visit the FASB Web site at www.fasb.org.
omit substantially all disclosures unless the matter is disclosed in the financial statements. For example, the accountant may include an emphasis paragraph on a matter when management has presented selected information, even though substantially, all disclosures have been omitted, as long as the matter discussed in the emphasis paragraph is disclosed in the selected information. The accountant should refer to paragraph .19 of AR section 100 if he or she believes that a disclosure is necessary to keep the financial statements from being misleading.

Going Concern Issues

Full Disclosure Financial Statements

.63 As stated in footnote 30 in paragraph .57 of AR section 100, “Normally, neither an uncertainty, including an uncertainty about an entity’s ability to continue as a going concern, nor an inconsistency in the application of accounting principles would cause the accountant to modify the standard report provided the financial statements appropriately disclose such matters.” According to Interpretation No. 29, “Reporting on an Uncertainty, Including an Uncertainty About an Entity’s Ability to Continue as a Going Concern,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .120–.129), continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. If, during the performance of compilation or review procedures, evidence or information comes to the accountant’s attention that there may be an uncertainty about the entity’s ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being compiled or reviewed, the accountant should request that management consider the possible effects of the going concern uncertainty on the financial statements, including the need for related disclosure. After management communicates to the accountant the results of its consideration of the possible effects on the financial statements, the accountant should consider the reasonableness of management’s conclusions including the adequacy of the related disclosures, if applicable. If management has not disclosed the matter or the accountant is concerned about the adequacy of management’s disclosure, the accountant should consider whether there is a reasonable possibility that third-party users or other readers of the compiled or reviewed financial statements would be misled into assuming the continuation of the entity. If the accountant determines that the disclosure of the uncertainty regarding the entity’s ability to continue as a going concern is not adequate, he or she should follow the guidance in paragraphs .56–.58 of AR section 100 with respect to departures from GAAP.

.64 If the accountant concludes that management’s disclosure of the uncertainty regarding the entity’s ability to continue as a going concern is adequate, but further decides to include an emphasis of a matter paragraph with respect to the uncertainty in the accountant’s compilation or review report, he or she may use the following language:

As discussed in Note X, certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the company be unable to continue as a going concern.

Omission of Substantially All Disclosures

.65 The accountant may compile financial statements for a client that omit substantially all disclosures required by GAAP or an other comprehensive basis of accounting, provided that the omission is clearly indicated in the report and is not, to the accountant’s knowledge, undertaken with the intention of misleading those who might reasonably be expected to use such financial statements.4

.66 Because the user is alerted that substantially all disclosures have been omitted from the financial statements (by adding a paragraph to the compilation report to explain the omission), going concern disclosures would not be required.

---

4 The accountant cannot review financial statements that omit substantially all disclosures.
Although not required, the going concern matter can be disclosed. In this case, however, the disclosure might be made in the financial statements. Keep in mind that emphasis paragraphs emphasize a matter that is already disclosed in the financial statements. If the going concern matter is the only disclosure included in the financial statements, it should be labeled as “Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included,” rather than “Notes to the Financial Statements.” Once disclosed in the financial statements, the matter can then be emphasized in a separate paragraph of the report.

Subsequent Events

Full Disclosure Financial Statements

Events or transactions sometimes occur subsequent to the balance sheet date, but prior to management’s issuance of financial statements that have a material effect on the financial statements, and therefore require adjustment to or disclosure in the statements. These occurrences are referred to as subsequent events. Evidence or information that a subsequent event that has a material effect on the compiled or reviewed financial statements has occurred may come to the accountant’s attention in the following ways:

- During the performance of compilation or review procedures
- Subsequent to the date of the accountant’s compilation or review report but prior to the release of the report

In either case, the accountant should request that management consider the possible effects on the financial statements including the adequacy of any related disclosure, if applicable. If the accountant determines that the disclosure of the subsequent event in the financial statements or notes is not adequate, he or she should follow the guidance in paragraphs .56–.58 of AR section 100 with respect to departures from GAAP.

Occasionally, a subsequent event has such a material impact on the entity that the accountant may wish to include in his or her compilation or review report an explanatory paragraph directing the reader’s attention to the event and its effects. Such an emphasis of matter paragraph may be added, at the accountant’s discretion, provided that the matter is disclosed in the financial statements. See paragraphs .65–.66 in this section of the manual for additional discussion regarding emphasis of matter paragraphs.

Omission of Substantially All Disclosures

The accountant may compile financial statements for a client that omit substantially all disclosures required by GAAP or an other comprehensive basis of accounting, provided that the omission is clearly indicated in the report and is not, to the accountant’s knowledge, undertaken with the intention of misleading those who might reasonably be expected to use such financial statements.

Because the user is alerted that substantially all disclosures have been omitted from the financial statements (by adding a paragraph to the compilation report to explain the omission), subsequent event disclosures would not be required in the accountant’s report.

Although not required, a subsequent event can be disclosed. In this case, however, the disclosure might be made in the financial statements. Keep in mind that emphasis paragraphs emphasize a matter that is already disclosed in the financial statements. If the subsequent event matter is the only disclosure included in the financial statements, it should be labeled as “Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included,” rather than “Notes to the Financial Statements.” Once disclosed in the financial statements, the matter can then be emphasized in a separate paragraph of the report.

5 See footnote 3.
6 See footnote 4.
Reporting When There Is a Scope Limitation

.73 Scope limitations occur in audit engagements when the auditor is prevented from applying generally accepted auditing standards because of limitations imposed by the client or caused by other circumstances. When an auditor encounters a scope limitation, he or she issues an “except for” opinion or disclaimer of opinion. However, AR section 100 does not permit such reporting.

.74 Scope limitations can occur in SSAR5 engagements, especially in initial review engagements. In those cases, it is not unusual for the accountant to raise questions about the reasonableness of amounts included in the financial statements. Often, due to the timing of the engagement or inadequate accounting records, he or she may also be unable to apply analytical procedures to obtain limited assurance. Paragraph .51 of AR section 100 notes that when an accountant is unable to perform inquiry and analytical procedures necessary for a review or when the client does not provide the accountant with a representation letter, the review will be incomplete, and a review report cannot be issued. In this situation, the accountant should consider whether the scope limitation also precludes him or her from issuing a compilation report.

.75 In considering the limitations of the scope limitation, the accountant should evaluate the possibility that the information affected by the scope limitation is incorrect, incomplete, or otherwise unsatisfactory. This evaluation is a matter of professional judgment. If the client is unable to provide additional or revised information due to factors beyond his or her control, a step-down to a compilation is acceptable. The accountant may consider the following:

- Whether the reason for the scope limitation seems logical
- Whether the scope restriction significantly impairs the usefulness of the financial statements

.76 In deciding whether it would be appropriate to issue a compilation report when a scope restriction precludes a review report, the accountant should determine if the scope restriction is client imposed. Paragraph .10 of AR section 100 states that the accountant should withdraw from the engagement if the client refuses to provide additional or revised information. A scope restriction resulting from inadequate accounting records is considered a client imposed restriction. Although the restriction may be unintentional, the maintenance of adequate accounting records is within the client’s control. Situations when the client is unable to provide additional or revised information are rare. One such situation may be when accounting records have been destroyed.

.77 When there has been a scope restriction that precludes a review report, and the accountant decides to issue a compilation report, paragraph .91 of AR section 100 indicates he or she should issue an appropriate compilation report without any reference to the scope restriction.

.78 If the accountant is unable to obtain the limited assurance required for a review and decides it would not be appropriate to issue a compilation report, he or she can try to provide other accounting information to the client, short of submitting financial statements. For example, a working trial balance may satisfy the client’s needs.

Reporting on Financial Statements Included in Management Consulting Services Reports

General

.79 Unaudited financial statements are often included in reports on findings in management consulting services engagements (MCS reports). A question often arises as to what reporting responsibility the accountant has on those historical financial statements.

.80 The accountant should not submit unaudited financial statements of a nonissuer to his or her client or a third party unless, at a minimum, he or she complies with the provisions of AR section 100 applicable to
a compilation engagement. This requirement extends to unaudited financial statements included in MCS reports.

Financial Statements Compiled or Reviewed by Another Accountant

.81 As discussed in paragraph .17 of AR section 200, when the financial statements of a prior period have been compiled or reviewed by a predecessor whose report is not presented, and the successor has not compiled or reviewed those financial statements, the successor should make reference in an additional paragraph(s) of his report on the current period financial statements to the predecessor’s report on the prior period financial statements. This reference should include the following matters:

a. A statement that the financial statements of the prior period were compiled or reviewed by another accountant (other accountants). The successor accountant should not disclose the name of the other accountant in his or her report; however, the successor accountant may name the predecessor accountant if the predecessor accountant’s practice was acquired by or merged with that of the successor accountant

b. The date of his (their) report

c. A description of the standard form of disclaimer or limited assurance, as applicable, included in the report

d. A description or a quotation of any modifications of the standard compilation or review report and of any paragraphs emphasizing a matter regarding the financial statements

.82 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard compilation report on the financial statements follows:

The 20X1 financial statements of XYZ Company were compiled by other accountants, whose report dated February 1, 20X2 stated that they did not express an opinion or any other form of assurance on those statements.

.83 An example of a paragraph that might be added to the MCS report when the other accountant issued a standard review report on the financial statements follows:

The 20X1 financial statements of XYZ Company were reviewed by other accountants, whose report dated February 1, 20X2, stated that they were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles.

Client Prepared Financial Statements

.84 If the MCS report contains client prepared financial statements, the accountant is not required to compile and report in those statements. In that case, professional standards do not require that the accountant mention those statements in the MCS report at all. However, many accountants compile and report on such statements because they are included in a document (MCS report) that bears their name and because a compilation is the lowest level of service with which they would want to be associated. If the accountant decides not to compile the statements, he or she may add a statement to the MCS report to clarify his or her responsibility for the financial statements. Such a statement might be worded as follows:

We have not compiled, reviewed, or audited the financial statements presented on pages ___ to ___ and, accordingly, we assume no responsibility for them.

Reporting When Only One Financial Statement Is Presented

.85 An accountant may issue a compilation or review report on a single financial statement, such as a balance sheet. Engagements to report on a single financial statement are limited reporting engagements, not scope restrictions.
Reporting on Comparative Financial Statements

.86 AR section 200 establishes standards for reporting on comparative financial statements of a nonissuer when financial statements of one or more periods presented have been compiled and reported on or reviewed in accordance with AR section 100. Reporting is simple unless a change of accountants has occurred, the level of service (compilation or review) differs from period to period, or a change in the nonissuer status of the entity has occurred. In these situations, the accountant may face some rather complex reporting decisions. Because the accountant may not face these complexities often, applying the guidance in AR section 200 can be daunting.

.87 The following definitions from paragraph .07 of AR section 200 may facilitate reporting on comparative financial statements:

updated report. A continuing accountant issues this kind of report, which considers new information from the current engagement and re-expresses the previous conclusions or expresses different conclusions on the prior period financial statements as of the current report date.

reissued report. Issued subsequent to the date of the original report but bears the same date as the original report; a reissued report may need to be revised and dual dated for the effects of specific events.

General

.88 When comparative financial statements of a nonissuer are presented, the accountant should issue a report covering each period presented. If the accountant becomes aware that financial statements of other periods that have not been audited, reviewed, or compiled are presented in comparative form in a document containing financial statements that he or she has reported on, and the accountant’s name or report is used, the accountant should advise the client that the use of his or her name or report is inappropriate. The accountant may also wish to consult with an attorney.

.89 The accountant should not report on comparative statements when statements for one or more of the periods, but not all, omit substantially all disclosures.

Practice Tip

Financial statements in columnar form with disclosures are comparative; financial statements that omit substantially all disclosures are comparative; but financial statements with disclosures are not comparative to financial statements without disclosures.

Continuing Accountant’s Standard Report

.90 A continuing accountant who performs the same or higher level of service on the current period financial statements should update his or her report on the prior period financial statements.

.91 A continuing accountant who performs a lower level of service (20X2 compiled, 20X1 reviewed) should either

- include a separate paragraph in the report describing the responsibility for the prior period financial statements.
- reissue the report on the prior period financial statements.

.92 If the first option indicated in the paragraph above is selected, the description should include the original date of the report and should state that no review procedures were performed after that date.

.93 If the second option is selected, the report may be
• a combined compilation and reissued review report. (The combined report should state that no review procedures were performed after the date of the review report.)
• presented separately.

Continuing Accountant’s Changed Reference to GAAP

.94 The accountant should consider the effects on the prior period report of circumstances or events that came to his or her attention. When the accountant’s report contains a changed reference to a GAAP departure, the report should include a separate paragraph indicating the following:
• Date of previous report
• Circumstances or events that caused the change
• If applicable, that the prior period financial statements have been changed

Predecessor’s Compilation or Review Report

.95 A predecessor accountant is not required to, but may choose to reissue his or her report. If the predecessor’s compilation or review report is not presented, the successor should either
• make reference to the predecessor’s report in accordance with the provisions of paragraphs .17–.19 of AR section 200.
• perform a compilation, review, or audit of the prior period financial statements and report thereon.

.96 If “reference to the predecessor’s report” option is selected, the successor’s reference should include
• a statement that the prior period financial statements were compiled or reviewed by another accountant(s) (without identifying the predecessor by name).\(^7\)
• the date of prior accountant’s report.
• a description of the disclaimer or limited assurance report.
• a description or quotation of any report modification or emphasis paragraphs.

.97 According to paragraph .20 of AR section 200, if the predecessor report is to be reissued, before reissuing, the predecessor should consider
• the current form and presentation of the prior period financial statements.
• subsequent events not previously known.
• changes in the financial statements that alter modifications to the report.

.98 The predecessor should also perform the following procedures:
• Read the current period financial statements and the successor’s report.
• Compare the prior period financial statements (\(a\)) with those previously issued and (\(b\)) with the current period.
• Obtain a letter from the successor indicating whether he or she is aware of any matter that affects the prior period financial statements. The predecessor should not refer in his reissued report to this letter or the report of the successor.

.99 If the predecessor becomes aware of any matter that affects the prior period financial statements, he or she should

\(^7\) The successor accountant should not name the predecessor accountant in his or her report; however, the successor accountant may name the predecessor accountant if the predecessor accountant’s practice was acquired by, or merged with that of the successor accountant.
make inquiries or perform analytical procedures similar to those that would have been applied to the information if it had been known at the report date.

perform other procedures considered necessary such as discussing the matter with the successor or reviewing the successor’s working papers.

.100 When reissuing the report, the predecessor should use the date of the previous report. However, if the financial statements are revised, the report should be dual dated. Also, if the financial statements are revised, the predecessor should obtain a written statement from the former client describing the new information and its effect on the prior period financial statements.

.101 If the predecessor is unable to complete the reissue procedures described above, he or she should not reissue the report and may wish to consult with an attorney.

Restated Prior Period Financial Statements

.102 When prior period financial statements have been restated, the predecessor accountant would normally reissue his or her report following the guidance in paragraph .22 of AR section 200. If the predecessor decides not to reissue his or her report, the successor accountant may be engaged to report on the financial statements for the prior year. If the predecessor accountant does not reissue his or her report and the successor accountant is not engaged to report on the prior year financial statements, the successor accountant should indicate in the introductory paragraph of his or her compilation or review report that a predecessor accountant reported on the financial statements of the prior period before restatement. In addition, if the successor accountant is engaged to compile or review the restatement adjustment(s), he or she may also indicate in the accountant’s report that he or she compiled or reviewed the adjustment(s) that was (were) applied to restate prior year financial statements.

Reporting When Prior Period Is Audited

.103 The accountant should issue a compilation or review report on the current period financial statements and either

• reissue the audit report on the prior period or

• add a separate paragraph to the current period report that includes the following information:
  — The financial statements of the prior period were audited.
  — The date of the previous audit report.
  — The type of opinion expressed previously.
  — Substantive reasons for other than unqualified opinion.
  — No audit procedures were performed after the date of the previous audit report.

Reporting on Financial Statements That Previously Did Not Omit Substantially All Disclosures

.104 The accountant may report on comparative financial statements that omit substantially all disclosures even if the prior period statements were originally compiled, reviewed, or audited (with disclosures) provided that his or her report includes an additional paragraph stating the nature of the previous service and the date of the previous report.

---

8 Paragraphs .10–.11 of AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*, vol. 2), establish requirements and provide guidance regarding communication to the predecessor accountant with respect to information that leads the successor accountant to believe that the financial statements reported on by the predecessor accountant may require revision.
Change of Accountants—Reporting Following a Merger or Purchase of a Firm

.105 When there has been a merger or purchase of a firm, the new firm or purchaser should report as a successor accountant and apply the guidance in AR section 200. Basically, it permits the successor to (a) make reference to the old or acquired firm’s report or (b) assume compilation, review, or audit responsibility for the prior period financial statements. The successor accountant may name the predecessor accountant if the predecessor accountant’s practice was acquired by or merged with that of the successor accountant.

Change of Accountants—Predecessor Accountant Has Ceased Operations

.106 If the prior period financial statements were compiled or reviewed and have not been restated, the notice states that the successor accountant should add a paragraph to the report on the current year financial statements that includes the following:

- A statement that the prior period financial statements were compiled or reviewed by another accountant who has ceased operations
- The date of the predecessor accountant’s report
- A description of the standard form of disclaimer or limited assurance, as applicable, included in the report
- A description or quotation of any modifications of the standard report and any paragraphs emphasizing a matter regarding the financial statements

.107 If the prior period financial statements were audited and have not been restated, the successor accountant should add a paragraph to the report on the current period financial statements that indicates the following:

- That the prior period financial statements were audited by another firm
- The date of the predecessor’s report
- The type of opinion issued by the predecessor
- If the opinion was other than unqualified, the substantive reasons therefore
- That no auditing procedures were performed after the date of the predecessor’s report

.108 If the prior period financial statements have been restated, the successor accountant may be engaged to report on the financial statements for the prior year. If the successor accountant is not engaged to report on the financial statements for the prior year, the successor accountant should indicate in the introductory paragraph of his compilation or review report that a predecessor accountant reported on the financial statements of the prior period before restatement. In addition, if the successor accountant is engaged to compile or review the restatement adjustment(s), he or she may also indicate in the accountant’s report that he or she compiled or reviewed the adjustment(s) that was (were) applied to restate prior year financial statements.

AR Section 200 Summary

.109 AR section 200 may be rather complex for some accountants. The following summary decision aid helps simplify the report decision process in AR section 200. The comparative statements are for years 20X5 and 20X6.

1. If 20X6 is audited, SASs apply.
2. For continuing accountant:
   a. If 20X6 level of service is equal to or higher than 20X5, update report.
   b. If 20X6 is lower level of service, either refer to or reissue prior report.
3. For successor accountant:
   
   a. If predecessor does not reissue, refer to report of predecessor or perform review or compilation of 20X5.
   
   b. If financial statements are restated because of an error and predecessor doesn’t report on restated financials, perform review or compilation of 20X5.

**Reporting When Other Accountants Have Audited or Reviewed a Component**

.110 If other accountants are engaged to audit or review the financial statements of a division, branch, subsidiary, or other investee, the accountant may request reports from the other accountants as a basis, in part, for his or her review report on the financial statements of the reporting entity. The accountant may decide to refer to the work of the other accountants in the review report. If such a reference is made, the report should indicate the magnitude of the portion of the financial statements audited or reviewed by the other accountants.

**Preliminary Financial Statement Drafts**

.111 Interpretation No. 17, “Submitting Draft Financial Statements,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .61–.62) states that an accountant can submit draft financial statements without attaching a compilation or review report as long as

- he or she intends to submit final financial statements, and
- he or she labels each page of the draft financial statements with words such as Draft, Preliminary Draft, Draft—Subject to Change, or Working Draft.

.112 In the rare circumstances where the accountant submits drafts but never issues the final statements, the interpretation suggests that the accountant document the reasons why. The interpretation reinforces the fact that preliminary drafts should not be used as a means of circumventing the reporting standards of SSARSs.

AAM Section 2610

Accountants’ Reports on Compilation of Financial Statements of a Nonissuer*

.01 Accountants’ Standard Report

Stockholders and Board of Directors

[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[Signature of CPA]

[Source: Paragraph .16 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2)]

---

1 In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.

2 If the statement of comprehensive income is included, the first paragraph of the report should also refer to this statement.

1 Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 505, Equity, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.
Stockholders and Board of Directors

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures (and the statement of cash flows) required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the Company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X7

[Signature of CPA]

[Source: Paragraph .21 of AR section 100]

---

3 If the statement of cash flows is omitted, the first and third paragraphs of the report should be modified accordingly.

.03 Accountants Not Independent

Stockholders and Board of Directors

[Company]

[Address]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings,\(^5\) and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

I am (We are) not independent with respect to [Company].

January 28, 20X7

[Signature of CPA]

[Source: Paragraphs .16 and .23 of AR section 100]

---

\(^4\) If the statement of comprehensive income is included, the first paragraph of the report should also refer to this statement.

\(^5\) FASB ASC 505 requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the compilation report is not needed.
.04 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors

[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when the financial statements purport to present financial position and results of operations.

January 28, 20X7

[Signature of CPA]

[Source: Paragraph .57 of AR section 100]
.05 Departure From GAAP—Accounting Principles Not Generally Accepted

Stockholders and Board of Directors

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management [owners]. I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed me (us) that the company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders’ equity would have been decreased by $500,000.

.06 Compilation Report With Departure From GAAP and Omission of Substantially All Disclosures

Stockholders and Board of Directors

[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (the owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them. However, I (We) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

Generally accepted accounting principles require that [describe requirement]. Management has informed me (us) that the company has [describe departure], which is not in accordance with generally accepted accounting principles. Management has not determined the effect of the departure from generally accepted accounting principles on the accompanying balance sheet. The accompanying statements of income, retained earnings, and cash flows would not be affected by the departure.

Management has elected to omit substantially all disclosures required by GAAP. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the Company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.15 Compilation Report on Pro Forma Financial Information

Stockholders and Board of Directors

[Company]

I (we) have compiled the accompanying pro forma financial information as of and for the year ended December 31, 20X6, reflecting the business combination of the Company and ABC Company in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. The historical condensed financial statements are derived from the historical unaudited financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were compiled by another (other) accountant(s).8

A compilation is limited to presenting pro forma financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying pro forma financial information and, accordingly, do not express an opinion or any other form of assurance on it.

The objective of this pro forma financial information is to show what the significant effects on the historical financial information might have been had the transaction (or event) occurred at an earlier date. However, the pro forma financial information is not necessarily indicative of the results of operations or related effects on financial position that would have been attained had the above mentioned transaction (or event) actually occurred earlier.

[If the presentation does not include all applicable disclosures, the following paragraph should be added.]9

Management has elected to omit all of the disclosures ordinarily included in pro forma financial information. The omitted disclosures might have added significant information regarding the company’s pro forma financial position and results of operations. Accordingly, this pro forma financial information is not designed for those who are not informed about such matters.

---

8 Where one set of historical financial statements is audited or reviewed and the other is audited, reviewed, or compiled, wording similar to the following would be appropriate:

The historical condensed financial statements are derived from the historical financial statements of XYZ Company, which were compiled by me (us), and of ABC Company, which were reviewed by another (other) accountant(s), appearing elsewhere herein (or incorporated by reference).

If either accountant’s review report or auditor’s report includes an explanatory paragraph or is modified, that fact should be referred to within this report.

9 The accountant may not report on compiled pro forma financial information if the summary of significant assumptions is not presented.
Compilation and Review—Emphasis of a Going Concern Uncertainty

Stockholders and Board of Directors

[Company]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

As discussed in Note [Number], certain conditions indicate that the company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments to the financial statements that might be necessary should the company be unable to continue as a going concern.

AAM Section 2620

Accountants’ Reports on Review of Financial Statements of a Nonissuer

.01 Accountants’ Standard Report

Stockholders and Board of Directors

[Company]

I (We) have reviewed the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. All information included in these financial statements is the representation of the management (owners) of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

January 28, 20X7

[Signature of CPA]

[Source: Paragraph .49 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2)]

---

1 In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.

2 If the statement of comprehensive income is included, the first paragraph of the report should also refer to this statement.

---

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 505, Equity, requires the disclosure of a change in capital. This can be accomplished by the preparation of a separate statement, in the notes to the financial statements, or as part of another basic statement. If the accountant does not include a statement of retained earnings as a separate statement, reference in the review report is not needed.
.02 Departure From GAAP

Stockholders and Board of Directors

[Company]

I (we) have reviewed the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. All information included in these financial statements is the representation of the management (owners) of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

As disclosed in Note X to the financial statements, generally accepted accounting principles require investments in marketable equity securities be reported at fair value. Management has informed us that the Company has stated these investments at cost, which is not in accordance with generally accepted accounting principles. If generally accepted accounting principles had been followed, the investment in marketable equity securities and stockholders’ equity would have decreased by $70,000.

January 28, 20X7

.03 Departure From GAAP—Omission of Statement of Cash Flows

Stockholders and Board of Directors

[Company]

I (we) have reviewed the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income and retained earnings for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. All information included in these financial statements is the representation of the management (owners) of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, with the exception of the matter described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

A statement of cash flows for the year ended December 31, 20X6, has not been presented. Generally accepted accounting principles require that such a statement be presented when financial statements purport to present financial position and results of operations.

[The next page is 2661.]
Other Comprehensive Bases of Accounting

.01 Paragraph .04 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2), defines other comprehensive basis of accounting (OCBOA) as a definite set of criteria, other than generally accepted accounting principles (GAAP), having substantial support underlying the preparation of financial statements prepared pursuant to that basis. Paragraph .04 of AR section 100 recognizes the following as OCBOA:

- The basis of accounting the reporting entity uses to comply with the requirements or financial reporting provisions of a governmental regulatory agency which has jurisdiction over the entity. An example is a basis of accounting insurance companies use pursuant to the rules of a state insurance commission.
- The basis of accounting the reporting entity uses or expects to use to file its income tax return for the period covered by the financial statements.
- The cash basis of accounting and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets). Ordinarily, a modification would have substantial support if the method is equivalent to the accrual basis of accounting for that item and if the method is not illogical. If modifications to the cash basis of accounting do not have substantial support, the accountant should appropriately modify his or her report in accordance with the guidance in paragraphs .56–.58 of AR section 100. If the modifications are so extensive that the modified “cash basis” statements are, in the accountant’s judgment, equivalent to financial statements on the accrual basis, the statements should be considered GAAP basis. The accountant may use the standard form of report, modified as appropriate, because of the departures from generally accepted accounting principles.

Deciding When to Use an OCBOA

.02 OCBOA financial statements are beneficial to clients for many reasons. Among them is the idea that the client does not need to consider the measurement requirements of GAAP for OCBOA financial statements.

.03 The client might consider the following characteristics when deciding whether to prepare cash or tax basis financial statements:

- There are no third party users of financial statements (for example, the entity is closely held with no third party debt).
- The entity’s debt is secured rather than unsecured.
- The entity’s creditors do not require GAAP financial statements.
- The cost of complying with GAAP would exceed the benefits.
- The owners and managers are closely involved in the day-to-day operations of the business and have a fairly accurate picture of the entity’s financial position.

* In February 2009, the Accounting and Review Services Committee (ARSC) issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
• The business’s owners are primarily interested in cash flows.
• The owners are primarily interested in the tax implications of transactions.
• Capital expenditures and long-term financing are not significant.
• Internal Revenue Code rules do not require the entity to prepare its tax return on the accrual basis.

.04 The client might consider the following issues:
• Does the entity have inventory? If so, the pure cash basis may not be helpful.
• What basis of accounting does the entity use in preparing its income tax return? If the accrual basis is used, preparing financial statements on the same basis makes sense.
• Is the entity highly leveraged? Lenders may require GAAP financial statements.
• Are there outside investors? GAAP financial statements may provide information required by such users.
• Does the entity’s cash flow parallel its income and expenses? The pure cash basis may be appropriate.
• Does the entity anticipate going public? If so, the entity will need a history of GAAP financial statements.
• Was the entity formed for tax purposes? If yes, the owners are probably interested in the tax effects of transactions, and the income tax basis would be appropriate.
• Is the entity subject to bonding requirements? Most bonding companies will only accept GAAP financial statements.

Basic Financial Statements

.05 In an OCBOA presentation, the basic financial statements typically present financial position and results of operations as measured under the OCBOA, descriptions of accounting policies, and notes to the financial statements. However, an exception to this presentation exists for entities that use the pure cash basis of accounting. Under the pure cash basis of accounting, a statement of assets, liabilities, and equity would not be prepared because the cash balance would be the only item that would appear. Consequently, entities using the pure cash basis of accounting present a single statement titled “Statement of Cash Receipts and Disbursements.”

Statement Titles

.06 Titles of OCBOA financial statements differ from titles of similar statements prepared in accordance with GAAP. The following table lists some suggested titles for OCBOA financial statements.

<table>
<thead>
<tr>
<th>Generally Accepted Accounting Principles</th>
<th>Cash Basis</th>
<th>Tax Basis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balance Sheet</td>
<td>Statement of Assets, Liabilities, and Equity—Cash Basis</td>
<td>Statement of Assets, Liabilities, and Equity—Income Tax Basis</td>
</tr>
<tr>
<td>Statement of Income</td>
<td>Statement of Revenues and Expenses—Cash Basis</td>
<td>Statement of Revenues and Expenses—Income Tax Basis</td>
</tr>
<tr>
<td>Statement of Income &amp; Retained Earnings</td>
<td>Statement of Revenues, Expenses, and Retained Earnings—Cash Basis</td>
<td>Statement of Revenues, Expenses, and Retained Earnings—Income Tax Basis</td>
</tr>
</tbody>
</table>
Generally Accepted Accounting Principles

<table>
<thead>
<tr>
<th></th>
<th>Cash Basis</th>
<th>Tax Basis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statement of Changes in Equity</td>
<td>Statement of Changes in Equity—Cash Basis</td>
<td>Statement of Changes in Equity—Income Tax Basis</td>
</tr>
</tbody>
</table>

Notes:

- These titles are only suggestions.
- The pure cash basis has a single asset and no liabilities. Accordingly, only a single statement titled "Statement of Cash Receipts and Disbursements" is normally presented.
- Although Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 230, Statement of Cash Flows, does not require a statement of cash flows for OCBOA financial statements, if a cash flow statement is presented, it is suggested that the basis of accounting used be added to the statement title.

Disclosures

.07 Authoritative accounting literature does not address OCBOA or the disclosures necessary in such presentations. However, disclosures should be included in OCBOA financial statements that are similar to those that would be included in a GAAP presentation. As a best practice, cash, modified cash, and income tax basis financial statements ordinarily should be informative of matters that may affect their use, understanding, and interpretation. For example:

- The financial statements could include a brief summary of significant accounting policies that discusses the basis of presentation and describes how the basis differs from GAAP.
- When financial statements contain items the same as, or similar to, those in GAAP financial statements, similar disclosures may be appropriate (for example, depreciation or long-term debt).
- The entity may also consider disclosing matters not specifically identified on the face of the statements, such as related party transactions, restrictions on assets and owners' equity, subsequent events, and uncertainties.
- If GAAP sets forth requirements that apply to the presentation of financial statements, cash, modified cash, and income tax basis statements ordinarily should either comply with those requirements or provide information that communicates the substance of those requirements.

Cash Basis of Accounting

Pure Cash Basis

.08 Under the cash receipts and disbursements basis of accounting (pure cash basis), only transactions that increase or decrease cash and cash equivalents are reflected in the financial statement. The pure cash basis recognizes all cash disbursements as expenses and all cash receipts as revenues. In practice, the pure cash basis of accounting is rare.

.09 Entities that use the pure cash basis of accounting would include, for example, school activity funds, civic ventures, trusts and estates, political action committees and political campaigns. Typically, those types of entities have the following characteristics:

- They are not-for-profit entities.
- Their operations are simple.
- Their accounting and finance functions are unsophisticated.
• There is only one major activity.
• Capital expenditures and long-term debt are not significant.

Modified Cash Basis

.10 The modified cash basis of accounting is described as the pure cash basis incorporating modifications having substantial support. These modifications generally include the recognition of certain transactions having substantial support, such as recording depreciation on fixed assets or accruing income taxes, as entities would recognize them under GAAP. The appropriate modifications and the extent of those modifications are not clearly defined in the literature, however.

.11 Generally, entities that use the modified cash basis of accounting, such as professional association of doctors, lawyers, or CPAs, might include the following characteristics:

• They are for-profit entities.
• They distribute profits as collected (for example, through bonuses and retirement plan contributions).
• They have significant inventory and credit arrangements with vendors.
• They make material capital expenditures or incur material amounts of debt.
• Their operations are somewhat sophisticated, and accounting, for them, may become complex.

Income Tax Basis of Accounting

.12 The income tax basis of accounting typically is based on federal income tax laws that generally do not address financial statement presentation or disclosure considerations, however.

.13 Typically, entities that use the tax basis of accounting are one of the following:

• For-profit enterprises (such as small, closely held companies for which conversion to GAAP would be costly)
• Partnerships whose partnership agreements require the use of the tax basis of accounting
• Not-for-profit organizations seeking relief from the requirements of FASB ASC 720-25 and FASB ASC 958, Not-for-Profit Entities.

Nontaxed Entities

.14 The income tax basis of accounting is defined as the basis an entity uses or expects to use to file its income tax return. There is not any additional guidance on what is meant by the phrase income tax return. If taken literally, nontaxed-entities would not be able to use the income tax basis. However, many practitioners believe that not-for-profit organizations using the accounting principles followed in filing Form 990 may issue income tax basis financial statements.

Other Bases of Accounting

.15 Although less common, entities may present their financial statements on a basis of accounting other than cash, tax, or GAAP. For example, insurance companies present financial statements on a regulatory basis. In addition, entities generally may use other comprehensive bases if they have substantial support and are applied consistently to all items in the financial statements.

Disclosure of Basis of Accounting

.16 AR section 100 states that when the accountant reports on compiled financial statements that omit substantially all disclosures, he or she should disclose the basis of accounting in the compilation report if it is not disclosed in the financial statements.
Other Disclosures

.17 Financial statements prepared on an OCBOA require notes and other disclosures. If the statements are compiled, management may elect to omit substantially all disclosures. However, this option is not available if the statements are reviewed.

Reporting

.18 In general, the only report modification necessary when financial statements are prepared using a comprehensive basis of accounting other than GAAP is the identification of the financial statements. Because financial statements prepared using an OCBOA contain modified titles (for example, “Statement of Assets, Liabilities, and Equity—Income Tax Basis” instead of “Balance Sheet”), the compilation or review report should refer to the modified titles actually used on the statements (for example, “We have compiled the accompanying statement of assets, liabilities, and equity—income tax basis.”). However, when the accountant compiles OCBOA financial statements that omit substantially all disclosures, paragraph .20 of AR section 100 states that the basis of accounting should be disclosed. This disclosure may be in a note to the financial statements. If disclosure is not made as part of the financial statements, the basis should be disclosed in the accountant’s report.

.19 When financial statements that the accountant has compiled omit substantially all disclosures with no reference to basis, but are otherwise in conformity with an OCBOA, the following paragraph may be added to the standard report. For illustrative purposes, the example is of a compilation of income tax basis financial statements.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the company’s assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Prescribed Forms

Background

.20 AR section 300, Compilation Reports on Financial Statements Included in Certain Prescribed Forms (AICPA, Professional Standards, vol. 2), provides for an alternative form of standard compilation report when the prescribed form or related instructions call for departures from GAAP.

Provisions of AR Section 300

.21 Any standard, preprinted form designed or adopted by the body to which it is to be submitted is a prescribed form. Examples include forms used by industry trade associations, credit agencies, banks, and governmental and regulatory bodies other than those concerned with the sale or trading of securities.

.22 According to paragraph .03 of AR section 300, the following alternative form of compilation report is appropriate when the financial statements are included in a prescribed form that calls for a departure from GAAP:

I (We) have compiled the (identification of financial statements, including period covered and name of entity) included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

My (Our) compilation was limited to presenting in the form prescribed by (name of body) information that is the representation of management (the owners). I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them.
These financial statements (including related disclosures) are presented in accordance with the requirements of (name of body), which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.23 Note that the first two paragraphs are similar to the standard compilation report of AR section 100. The main differences are the references to the following:

- The prescribed form
- The body that prescribed the form
- The third paragraph, which indicates that the basis of accounting and disclosures required by the form are different from GAAP and cautions the reader about the limits of the financial statements.

Departures From GAAP or From the Prescribed Form

.24 The accountant is concerned with the following three types of departures in an engagement to compile financial statements to be included in a prescribed form:

- Departures from GAAP required by the prescribed form. This type of departure does not require disclosure in the AR section 300 report.
- Departures from GAAP not required by the prescribed form. Such departures should be disclosed following the guidance in AR section 100.
- Departures from the requirements of the prescribed form. These departures also should be disclosed following the guidance in AR section 100.

.25 For the items in the second and third bullets in the preceding paragraph, the accountant should modify the compilation report to identify, in a separate paragraph, the departures, including the effects, if known. If not known, the accountant should include a statement that the effects have not been determined.

Signing a Preprinted Report Form

.26 Paragraph .05 of AR section 300 states that the accountant should not sign a preprinted report form unless the language in it conforms to the guidance in AR section 300 or AR section 100. If the preprinted report is not suitable, the accountant should attach an appropriate report to the prescribed form and type “See Accountant’s Report” in the prescribed form signature block.

Determining When AR Section 300 Is Applicable

.27 Questions involving the applicability of AR section 300 might pertain to the definition of a prescribed form, the type of service involved or clarification of how a form calls for a departure from GAAP. These issues are discussed in the following questions.

.28 Does AR section 300 establish different standards for compiling a prescribed form? No. The reporting standards of AR section 100 require issuing a report whenever the accountant compiles or reviews financial statements included in a prescribed form. AR section 300 merely provides an alternative form of standard compilation report. It does not expand the accountant’s reporting responsibility, nor does it change the performance standards of AR section 100.

.29 Is AR section 300 applicable to review engagements? No. AR section 300 makes no provision for an alternative review report. A review report should conform to the standards of AR section 100 or AR section 200. The report should describe any departures from GAAP (even if the departures are called for by the form). The review report should also describe each GAAP disclosure that is omitted.

.30 Is a tax return a prescribed form? No. AR section 300 refers to financial statements, and thus excludes financial presentations included in tax returns. Interpretation No. 10, “Reporting on Tax Returns,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .31–.32) points out that an accountant may
attach a report to tax or information returns. This report should follow the guidance in AR section 100 because the tax return will be submitted to a user that did not design the form.

.31 Does a comprehensive set of instructions constitute a prescribed form? No. The definition of a prescribed form in AR section 300 specifically includes the words standard preprinted form.

.32 Is AR section 300 applicable to a prescribed form that does not call for departures from GAAP? No. If the form does not call for departures from GAAP, the AR section 300 alternative report is not appropriate.

.33 How does a prescribed form call for departures from GAAP? AR section 300 indicates that a form calls for a departure from GAAP by either:
   • specifying a measurement principle not in conformity with GAAP; or
   • failing to request disclosures required by GAAP.

.34 Can an AR section 100 report be issued even if AR section 300 applies? Yes. The accountant should, however, comply with AR section 100 regarding departures from GAAP.

.35 Is the AR section 300 report appropriate when a prescribed form is presented to other third parties? No. The AR section 300 alternative report presumes that the information required by a prescribed form is sufficient to meet the needs of the body that designed or adopted the form.

.36 What does an accountant do when financial statements presented on an OCBOA are included in the prescribed form and uses, for example, the terms Balance Sheet or Income Statement? In practice, the titles usually are not changed, and the report on the statements use the preprinted titles.

.37 What if the accountant is not independent? An accountant who is not independent can issue an AR section 300 report on financial statements included in a prescribed form. He or she should, however, comply with AR section 100 and include the following as the last paragraph of the report:

   I am (We are) not independent with respect to XYZ Company.

.38 Should each page of the prescribed form be marked with “See Accountant’s Report”? Yes. AR section 300 does not change that requirement.

Personal Financial Statements

.39 The term personal financial statements refers to financial statements that present the personal assets and liabilities of an individual or group of related individuals.

.40 AICPA Statement of Position (SOP) 82-1, Accounting and Financial Reporting for Personal Financial Statements (AICPA, Technical Practice Aids, ACC sec. 10,350), is the principle source of guidance in dealing with personal financial statements. This SOP establishes the current value basis of accounting as GAAP for personal financial statements. The AICPA Audit Guide Personal Financial Statements contains guidance on the scope of work and form of report for audits, reviews, and compilations of personal financial statements.

Personal Financial Statements Engagements

.41 Using the estimated current value basis of accounting in personal financial statements creates some unique considerations for accountants engaged to compile or review such statements.

Acceptance of Clients

.42 Before accepting the engagement, the accountant typically considers his or her independence, the client’s integrity, and circumstances that present unusual business risks.
Personal financial statement engagements usually require a greater degree of client participation than do other engagements. In many cases, client interviews and telephone inquiries are an integral part of the process. Therefore, it is especially important to consider a potential client’s ability and willingness to provide sufficient data and reliable estimates of current value.

Engagement Letters

Both AR section 100 and the Audit Guide *Personal Financial Statements* recommend, but do not require, written engagement letters. Engagement letters are especially important in personal financial statement engagements to

- dispel any notion that the accountant is responsible for estimates of current value.
- link the client’s cooperation to the fee because the cooperation of the client is vital to developing adequate accounting information.

Client Representation Letters

Although AR section 100 only requires that a representation letter be obtained from the client in engagements to review personal financial statements, the Audit Guide *Personal Financial Statements* recommends obtaining written representations on all personal financial statement engagements because of the following:

- The informal nature of personal financial records usually requires that accountants place greater reliance on the client’s representation to ensure completeness of the statements.
- The estimated current values and amounts of assets and liabilities provided by the client have a significant effect on the statements.
- A client representation letter can help to clarify that responsibility for the estimates of current value, even if developed by the accountant, rests with the client.

Compilation of Personal Financial Statements

Standards for compilation of financial statements prescribed by AR section 100 are applicable to the compilation of personal financial statements in the same manner as to the compilation of other financial statements. There is an exception for personal financial statements contained in written financial plans, if certain criteria are met (see the subsequent heading in this section of the manual, “Exception for Personal Financial Statements Included in Written Financial Plans”).

First, the accountant should have knowledge of the accounting principles and practices applicable to personal financial statements. For instance, the accountant should understand the provisions of SOP 82-1.

Second, the accountant ordinarily should possess a general understanding of the following:

- The nature of the individual’s transactions
- The form of available accounting records
- The stated qualifications of accounting personnel, if any
- The basis of accounting on which the financial statements are to be presented
- The form and content of the financial statements
- The methods used for determining estimated current values of significant assets and estimated current amounts of significant liabilities, and be able to consider whether the methods are appropriate in light of the nature of each asset or liability

Third, the accountant should read the financial statements and consider whether they appear to be appropriate in form and free of obvious material errors.
The standards prescribed by SSARSs do not require an accountant to verify the reasonableness of information supplied to him or her in a compilation engagement. Accordingly, he or she can compile personal financial statements based on the client’s estimate of current values and amounts.

However, the Audit Guide *Personal Financial Statements* warns that other factors may prevent the acceptance of the client’s estimate. The guide states that, at a minimum, the accountant should obtain an understanding of the methods by which the individual determined the estimated current values and amounts and consider whether the methods are appropriate for the asset or liability.

With the exception of compiled personal financial statements that omit substantially all disclosures, the financial statements, including the notes, ordinarily should disclose the method used to determine the estimated current values and amounts, even when such values or amounts are based on the individual’s estimate.

In many situations, particularly when the individual is unsophisticated in financial matters, the accountant will assist the client in developing the estimated current values and amounts. In such situations, the accountant ordinarily should obtain the individual’s approval and acceptance of responsibility for the values, preferably in writing.

**Review of Personal Financial Statements**

Standards for the review of financial statements prescribed by AR section 100 are applicable to the review of personal financial statements in the same manner as the review of other financial statements. Accordingly, to review personal financial statements, the accountant should meet the following general requirements.

The accountant should possess *(a)* a level of knowledge of the accounting principles and practices applicable to personal financial statements and *(b)* an understanding of the individual’s financial activities and financial position that will provide him, through the performance of inquiry and analytical procedures, with a reasonable basis for expressing limited assurance that no material modifications are necessary to the financial statements for them to conform to GAAP. Knowledge of accounting principles and practices implies that the accountant should be thoroughly familiar with the requirements of SOP 82-1.

AR section 100 requires accountants to obtain a representation letter in all review engagements.

**Reporting**

In general, the only report modifications necessary when presenting personal financial statements are the identification of the financial statements and identification of the reporting entity. For example:

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20XX, and the related statement of changes in net worth for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

However, when the accountant compiles personal financial statements that omit substantially all disclosures, the Audit Guide *Personal Financial Statements* indicates that he or she disclose that assets are presented at their estimated current values, and liabilities are presented at their estimated current amount. This disclosure may be in a note to the financial statements. If disclosure is not made as part of the financial statements, modification of the compilation report would be required. For example, the following sentence could be added to the first paragraph of the standard compilation report:
The financial statement(s) is (are) intended to present the assets of James and Jane Person at estimated current values and their liabilities at estimated current amounts.

.59 In addition, if substantially all disclosures have been omitted, the accountant should communicate this fact in the compilation report, by adding the following paragraph:

The individuals whose financial statements are presented have elected to omit substantially all disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the individuals’ assets, liabilities, and net worth. Accordingly, these financial statements are not designed for those who are not informed about such matters.

Exception for Personal Financial Statements Included in Written Financial Plans

.60 Paragraph .03 of AR section 600, Reporting on Personal Financial Statements Included in Written Personal Financial Plans (AICPA, Professional Standards, vol. 2), provides an exemption from AR section 100 for personal financial statements included in written personal financial plans when the following conditions exist:

- The accountant establishes an understanding with the client, preferably in writing, that the financial statements (1) will be used solely to assist the client and the client’s advisers to develop the client’s personal financial goals and objectives and (2) will not be used to obtain credit or for any purpose other than developing the financial plan.
- Nothing comes to the accountant’s attention during the engagement that would cause him to believe that the financial statements will be used to obtain credit or for any purpose other than developing the client’s financial goals and objectives.

.61 If both conditions exist, the accountant is exempt from both the performance and reporting standards in AR section 100. Absent both of these conditions, AR section 100 would apply.

.62 As long as those same conditions are met, Interpretation No. 1, “Submitting a Personal Financial Plan to a Client’s Advisers,” of AR section 600 (AICPA, Professional Standards, vol. 2, AR sec. 9600 par. .01–.03) clarifies that the same exception applies when an accountant submits a written personal financial plan containing the financial statements for use by a client’s advisers to help the client implement the personal financial plan. Implementing the plan includes, for example, use of the plan by an insurance broker who will recommend specific insurance products to the client, an investment adviser who will provide specific recommendations about the investment portfolio, and an attorney who will draft a will or trust document.

The Accountant’s Report

.63 AR section 600 prescribes the following language when the conditions of the AR section 100 exemption are met:

The accompanying statement of financial condition of John Doe, as of December 31, 20XX, was prepared solely to help you develop your personal financial plan. Accordingly, it may be incomplete or contain departures from generally accepted accounting principles and should not be used to obtain credit or for any other purposes other than developing your personal financial plan. We have not audited, reviewed, or compiled the statement.

.64 AR section 600 does not require the accountant to identify specific measurement or disclosure departures in the report. A notation such as “See Accountant’s Report” should be included on each financial statement page.
Specified Elements, Accounts, or Items of a Financial Statement

.65 A compilation of one or more specified elements, accounts, or items of a financial statement is limited to presenting financial information that is the representation of management (owners) without undertaking to express any assurance on that information. (The accountant might consider it necessary to perform other accounting services to compile the financial information.)

.66 Examples of specified elements, accounts, or items of a financial statement that an accountant may compile include schedules of rentals, royalties, profit participation, or provision for income taxes.

.67 In accordance with paragraph .04 of AR section 110, Compilation of Specified Elements, Accounts, or Items of a Financial Statement (AICPA, Professional Standards, vol. 2), if an accountant prepares or assists a client in preparing a schedule of one or more specified elements, accounts, or items of a financial statement, the accountant should consider how such a presentation of specified elements, accounts, or items will be used. If the specified element, account, or item of a financial statement is included as accompanying information to the basic financial statements, the accountant should consider the guidance in paragraph .83 of AR section 100. The accountant should also consider the potential of being associated with the schedule and the likelihood that the user may inappropriately infer, through that association, an unintended level of assurance. If the accountant believes that he or she will be associated with the information, the accountant should consider issuing a compilation report so a user will not infer a level of assurance that does not exist.

.68 An engagement to compile one or more specified elements, accounts, or items of a financial statement may be undertaken as a separate engagement or in conjunction with a compilation of financial statements.

.69 Before issuance of a compilation report on one or more specified elements, accounts, or items of a financial statement, the accountant should read such compiled specified elements, accounts, or items of a financial statement and consider whether the information appears to be appropriate in form and free of obvious material errors. In this context, the term error refers to mistakes in the compilation of the specified elements, accounts, or items of a financial statement, including arithmetical or clerical mistakes, and mistakes in the application of accounting principles, including disclosures, if presented.

.70 When the accountant is engaged to compile or issues a compilation report on one or more specified elements, accounts, or items of a financial statement, the basic elements of the report, in addition to the basic elements described in paragraph .05 of section 2600 of this manual are as follows:

a. A statement that the specified element(s), account(s), or item(s) identified in the report were compiled. If the compilation was performed in conjunction with a compilation of the company’s financial statements, the paragraph should so state and indicate the date of the accountant’s compilation report on those financial statements. Furthermore, any departure from the standard report on those statements should also be disclosed if considered relevant to the presentation of the specified element(s), account(s), or item(s).

b. A description of the basis on which the specified element(s), account(s), or item(s) are presented if that basis is not generally accepted accounting principles and a statement that that basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles.

.71 Each page of the compiled specified elements, accounts, or items of a financial statement should include a reference, such as “See Accountant’s Compilation Report.”

.72 Following are illustrations of accountant’s compilation reports on specified elements, accounts, or items of a financial statement.

Report Related to Accounts Receivable

I (we) have compiled the accompanying schedule of accounts receivable of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.
A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of accounts receivable and, accordingly, do not express an opinion or any other form of assurance on it.

Report Related to the Schedule of Depreciation—Income Tax Basis

I (we) have compiled the accompanying schedule of depreciation—income tax basis of XYZ Company as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. The schedule of depreciation—income tax basis has been prepared on the accounting basis used by the company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting financial information that is the representation of management (owners). I (we) have not audited or reviewed the accompanying schedule of depreciation—income tax basis and, accordingly, do not express an opinion or any other form of assurance on it.

Relationship of Statements on Standards for Accounting and Review Services to Quality Control Standards

.73 Paragraphs .93–.95 of AR section 100 states that an accountant is responsible for compliance with SSARSs in a review or compilation engagement. Rule 202, Compliance With Standards (AICPA, Professional Standards, vol. 2, ET sec. 202 par. .01), of the AICPA Code of Professional Conduct requires members to comply with such standards when associated with reviewed or compiled financial statements.

.74 An accountant has the responsibility to adopt a system of quality control in conducting an accounting practice. Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with SSARSs in its review and compilation engagements. The nature and extent of a firm’s quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations.

.75 SSARSs relate to the conduct on individual review and compilation engagements; Statements on Quality Control Standards (SQCSs) relate to the conduct of a firm’s accounting practice. Thus, SSARSs and SQCSs are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of an individual engagement and the firm’s accounting practice as a whole. However, deficiencies in or instances of noncompliance with a firm’s quality control policies and procedures do not, in and of themselves, indicate that a particular review or compilation engagement was not performed in accordance with SSARSs.

AAM Section 2710

Accountants’ Reports on Prescribed Forms, Specified Elements, Personal Financial Statements, and OCBOA Financial Statements *

.01 Compilation Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[Company]

I (We) have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [Company] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

January 28, 20X7

[Signature of CPA]

[Source: Derived from paragraph .16 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2)]

* In February 2009, the Accounting and Review Services Committee issued Statement on Standards for Accounting and Review Services (SSARS) No. 18, Applicability of Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which amends paragraph .01 of AR section 100, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2). SSARS No. 18 revises the applicability of the SSARSs so that SSARSs do not apply when the provisions of AU section 722, Interim Financial Information (AICPA, Professional Standards, vol. 1), apply. SSARS No. 18 is effective for compilations and reviews of financial statements for periods beginning after December 15, 2009, with early application permitted. This manual will be updated for SSARS No. 18 in the next edition.
.02 Compilation Report—Cash Basis Statements; Omission of Substantially All Disclosures, Including Disclosure of Basis

Stockholders and Board of Directors

[Company]

[Address]

I (We) have compiled the accompanying statement of assets, liabilities, and equity—modified cash basis of [Company] as of December 31, 20X6, and the related statement of revenues and expenses—modified cash basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. The financial statements have been prepared on the modified cash basis of accounting, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the modified cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the Company’s assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

January 28, 20X7

.04 Compilation Report—Tax Basis Statements; Omission of Substantially All Disclosures, Including Disclosure of Basis

Stockholders and Board of Directors
[Company]
[Address]

I (We) have compiled the accompanying statement of assets, liabilities, and equity—income tax basis of [Company] as of December 31, 20X6, and the related statement of revenues and expenses—income tax basis for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. The financial statements have been prepared on the accounting basis used by the company for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles.

A compilation is limited to presenting in the form of financial statements information that is the representation of management (owners). I (We) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management has elected to omit substantially all disclosures ordinarily included in financial statements prepared on the income tax basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user’s conclusions about the Company’s assets, liabilities, equity, revenue, and expenses. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.05 Review Report—Cash Basis Statements; Full Disclosure

Stockholders and Board of Directors
[Company]
[Address]

I (We) have reviewed the accompanying statement of assets, liabilities, and equity—cash basis of [Company] as of December 31, 20X6, and the related statement of cash receipts and disbursements for the year then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA. All information included in these financial statements is the representation of the management (owners) of [Company].

A review consists principally of inquiries of company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, I (we) do not express such an opinion.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash basis of accounting, as described in Note [Number].

.07 Financial Statements Included in Certain Prescribed Forms

[Name], President

[Company]

[Address]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related
statements of income, retained earnings, and cash flows for the year then ended included in the accompanying
prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by
the AICPA.

My (our) compilation was limited to presenting in the form prescribed by the [Name of Bank or Other Entity]
information that is the representation of management (owners). I (We) have not audited or reviewed the
financial statements referred to above and, accordingly, do not express an opinion or any other form of
assurance on them.

These financial statements (including related disclosures) are presented in accordance with the requirements
of the [Name of Bank or Other Entity], which differ from generally accepted accounting principles. Accordingly,
these financial statements are not designed for those who are not informed about such differences.

.08 Financial Statements Included in Certain Prescribed Forms—Departure From GAAP Not Called for by the Prescribed Form

[Name], President
[Company]
[Address]

I (We) have compiled the accompanying balance sheet of [Company] as of December 31, 20X6, and the related statements of income, retained earnings, and cash flows for the year then ended included in the accompanying prescribed form in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

My (our) compilation was limited to presenting in the form prescribed by the [Name of Bank or Other Entity] information that is the representation of management (owners) . I (We) have not audited or reviewed the financial statements referred to above and, accordingly, do not express an opinion or any other form of assurance on them. However, I (we) did become aware of a departure from generally accepted accounting principles that is not called for by the form or related instructions prescribed by the [Name of Bank or Other Entity] that is described in the following paragraph.

The instructions that accompany the prescribed form require that [describe requirement]. Management has (Owners have) informed us that the company [describe deviation]. Management has (Owners have) not determined the effect of the departure on the accompanying financial statements.

These financial statements (including related disclosures) are presented in accordance with the requirements of the [Name of Bank or Other Entity], which differ from generally accepted accounting principles. Accordingly, these financial statements are not designed for those who are not informed about such differences.

.10 Compilation Report—Personal Financial Statements; GAAP Basis With GAAP Departure for Omission of Provision for Income Taxes

[Name]
[Address]

I (we) have compiled the accompanying statement of financial condition of James and Jane Person as of December 31, 20X6, in accordance with Statements on Standards for Accounting and Review Services issued by the AICPA.

A compilation is limited to presenting in the form of financial statements information that is the representation of the individuals whose financial statements are presented. I (we) have not audited or reviewed the accompanying statement of financial condition and, accordingly, do not express an opinion or any other form of assurance on it. However, I (we) did become aware of a departure from generally accepted accounting principles that is described in the following paragraph.

As disclosed in Note X to the statement of financial condition, generally accepted accounting principles require that personal financial statements include a provision for estimated income taxes on the differences between the estimated current values of assets and estimated current amounts of liabilities and their tax bases. The accompanying statement of financial condition does not include such a provision and the effect of this departure from generally accepted accounting principles has not been determined.

[The next page is 3001.]
Sections 3160 and 3165 include illustrative audit assignment control forms and engagement letters that can be used by an accountant in the planning phase of an audit engagement.

Various formats of audit assignment controls and engagement letters are in use; nevertheless, inclusion of the formats in this section in no way means that they are preferable. Refer directly to authoritative pronouncements when appropriate.

Illustrative formats of audit assignment controls and engagement letters are often helpful in developing a consistent style within a firm. However, no set of illustrative formats can cover all the situations that are likely to be encountered in practice because the circumstances of engagements vary widely.

Readers should consider other sources of illustrative presentations, such as those in authoritative pronouncements and AICPA Audit and Accounting Guides.

**References to Professional Standards**. When referring to the professional standards, this manual cites the applicable sections as codified in the AICPA Professional Standards and not the numbered statements, as appropriate. For example, Statement on Auditing Standards No. 54, *Illegal Acts by Clients*, is referred to as AU section 317 of the AICPA Professional Standards. All references to AU sections may be found in AICPA Professional Standards, volume 1.

AAM Section 3100

Planning the Engagement

General

.01 The planning phase is an important part of every engagement. During this phase, the partner and the staff obtain an understanding of the entity and its environment, including its internal control, then develop an overall strategy for the expected conduct and scope of the engagement.

.02 The need for planning is highlighted in Rule 201, General Standards (AICPA, Professional Standards, vol. 1, ET sec. 201 par. .01), of the AICPA Code of Professional Conduct, which states: “A member shall adequately plan and supervise the performance of professional services.”

.03 The first standard of fieldwork of generally accepted auditing standards (GAAS) states: “The auditor must adequately plan the work and must properly supervise any assistants.” AU section 311, Planning and Supervision (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance to the independent auditor conducting an audit in accordance with GAAS on the considerations and activities applicable to planning and supervision.

.04 Proper planning also enhances the productivity of engagement personnel and may result in a more profitable engagement.

.05 The nature, timing, and extent of planning vary with the size and complexity of the entity and with the auditor’s experience with the entity and understanding of the entity and its environment, including its internal control. The auditor must plan the audit so that it is responsive to the assessment of the risk of material misstatement based on the auditor’s understanding of the entity and its environment, including its internal control (see AAM sections 3120 and 3125).

Audit Planning

.06 Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures, the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy.

Appointment of the Independent Auditor

.07 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date. Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion.

---

1 Paragraph .03 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risks of material misstatement of the financial statements.
Establishing an Understanding With the Client and Preparing an Engagement Letter

.08 The auditor should establish an understanding with the client regarding the services to be performed for each engagement. The understanding should include the objectives of the engagement, management’s responsibilities, the auditor’s responsibilities, and limitations of the engagement. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. The understanding could also include matters such as the timing of field work, report deadlines, and methods of fee determination and payment.

.09 AU section 311 states that the auditor should document the understanding through a written communication with the client in the form of an engagement letter. An engagement letter helps to prevent misunderstandings between the client and the auditor regarding the services to be provided, including the limitations. The engagement letter also sets forth the responsibilities of the client and, in most states, it becomes a legally binding contract on both parties. There are other good reasons to obtain an engagement letter, including the following:

- Reduce the risk of litigation and avoid misunderstandings with the client. In today’s litigious environment an engagement letter is needed for both old and new clients. To avoid misunderstandings, the engagement letter generally describes in detail the services to be rendered, the fee, and other terms and conditions of the engagement. Oral agreements may result in differences of recollection or understanding between the auditor and the client.
- Avoid misunderstandings by the staff. It is necessary for the members of the staff working on the engagement to have a complete understanding of what is required of them. A copy of the engagement letter in the working papers provides them with an authoritative reference to supplement their oral instructions.

.10 Often, entities that have never been audited resist signing a client representation letter. To avoid client resistance at the end of the audit, many firms notify the client in the engagement letter that they will be asked to sign a client representation letter.

.11 If the auditor has reason to believe the client may publish all or a portion of an audit report, he may advise the client (preferably in the engagement letter) that firm policy is to read printer’s proofs of the report and any other accompanying material. This precaution protects both the client and the auditor against condensation of financial statements, omission of footnotes, erroneous layout, and other errors such as misstatement of figures used in a president’s letter, other narrative, or statistics.

.12 Generally, the auditor establishes the understanding with the client and prepares the engagement letter before any significant work takes place on the engagement. The partner may personally present the letter to the client to ensure that a complete understanding has been achieved. The understanding or a signed copy of the engagement letter may be filed with the engagement’s current working papers and permanent file.

Practice Tip

Be careful when using a proposal or preliminary engagement letter for a client. If the letter describes additional services that are not finally agreed upon, it may be used in litigation as an indication of inadequate performance by you on the engagement. It is a best practice to always make sure that a final engagement letter is issued in such circumstances.

.13 If the nature of an engagement changes during its progress, or if the firm is engaged for additional services during the year, a new engagement letter is generally prepared. A step-down to a compilation or review engagement, or a special engagement for preparing a forecast, are examples of changes that could necessitate a new engagement letter. Such changes are ordinarily made by the engagement partner after...
careful consideration of the reasons justifying the change. For example, the reasons justifying a step-down from an audit to a compilation or review may prevent the firm from reporting on the lower level of service.

**Special Considerations**

.14 The following matters may be considered while preparing an engagement letter:

- Whether the circumstances preclude an unqualified opinion, as in these examples:
  - The auditor is retained after the beginning of the client’s fiscal year, did not observe inventories or confirm receivables at the beginning of the year and was unable to gain satisfaction through application of alternative procedures.
  - The client imposes restrictions on the scope of the audit. (AU section 508, *Reports on Audited Financial Statements* [AICPA, *Professional Standards*, vol. 1]).
  - Significant litigation or other matters exist which may affect the opinion.
- Whether the fee should be stated as a range, in hourly rates, as standard per diem charges for the engagement, or as a maximum or flat fee
- The person or persons to whom reports should be addressed
- The number of copies needed of the report and the people to whom they are to be distributed
- Deadlines for reports or analyses
- Out-of-pocket costs
- Additional work not contemplated in the original engagement
- The condition of records or circumstances other than those contemplated in the engagement letter (for example, deficient internal controls)
- A retainer
- One time engagements
- Start up costs when the client changes auditors
- Underwriters’ requirements in connection with public offerings
- The part of the work to be done by other auditors

**Fee Issues**

.15 Two types of fee arrangements, contingent fees and commissions, are prohibited when the arrangement involves certain attest clients (see paragraph .36 following in this section of the manual for details), even though the fee is not related to an attest service.

.16 A contingent fee is an arrangement whereby (1) no fee is charged unless a specified result is attained or (2) the amount of the fee otherwise depends on the results of your firm’s services. Some examples of contingent fees are the following:

- Your firm receives a finder’s fee for helping a client locate a buyer for one of the client’s assets.
- Your firm performs a consulting engagement to decrease a client’s operating costs. The fee is based on a percentage of the cost reduction that the client achieves as a result of your service.

The following are exceptions:

- Fees fixed by a court or other public authority
- In tax matters, fees based on the results of judicial proceedings or the findings of governmental agencies
A commission is any compensation paid to you or your firm for (1) recommending or referring a third party’s product or service to a client or (2) recommending or referring a client’s product or service to a third party. Permitted commissions shall be disclosed to the person or entity you recommend or refer a product or service to.

Examples of commissions are if you or your firm

- refers a client to a financial planning firm that pays you a commission for the referral.
- sells accounting software to a client and receives a percentage of the sales price (a commission) from a software company.
- refers a nonclient to an insurance company client, which pays you a percentage of any premiums subsequently received (a commission) from the nonclient.

The AICPA rule provides an exception for referral fees for recommending or referring a CPA’s services to another entity person or entity. That is, you may (1) receive a fee for referring the services of a CPA to any person or entity or (2) if you are a CPA, pay a fee to obtain a client provided you disclose such receipt or payment to the client. Referral fees are not considered commissions under these specific circumstances. You must inform the client if you receive or pay a referral fee.

You and your firm may not have commission or contingent fee arrangements with a client when your firm also provides one of the following services to a client:

- An audit of financial statements
- A review of financial statements
- A compilation of financial statements when a third party (for example, a bank or investor) will rely on the financial statements and the report does not disclose a lack of independence
- An examination of prospective financial statements

You and your firm may have commission and contingent fee arrangements with persons associated with a client—such as officers, directors, and principal shareholders—or with a benefit plan that is sponsored by a client (that is, the plan itself is not a client). For example, you or your firm may receive a commission from a nonclient insurer if you refer an officer of an attest client to the insurer and the officer purchases a policy. Even when permitted, the existence of a commission arrangement must be disclosed to the person (or entity) to whom the commission relates.

Contents of Engagement Letters

An understanding with the client and an engagement letter regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity’s financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.

---

• Management is responsible for making all financial records and related information available to the auditor.

• At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.

• The auditor is responsible for conducting the audit in accordance with GAAS. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

• An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.

• Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

.23 The engagement letter is generally addressed to those charged with governance, the chief executive, or whoever retained the firm. If the engagement letter also serves as the method of communicating the auditor’s responsibilities under AU section 380, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), the addressee should include those persons charged with governance. See further discussion in paragraph .29 in this section of this manual. The engagement partner may sign the letter on behalf of the firm. The client representative responsible for the engagement signs the letter denoting agreement with the contract. The original letter may be maintained in the engagement documentation. A copy of the letter is given to the client.

.24 An understanding with the client and an engagement letter may include other matters, such as the following:

• The overall audit strategy.

• Involvement of specialists or internal auditors, if applicable.

• Involvement of a predecessor auditor.

• Fees and billing. Estimates of fees are usually based on conservative, carefully prepared estimates. It may be useful to describe the expected billing methods and payment periods.

• Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators, such as the Securities and Exchange Commission, may restrict or prohibit such liability limitation arrangements).

• Conditions under which access to the auditor’s documentation may be granted to others.

• Additional services to be provided relating to regulatory requirements.

• Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Interpretation No. 101-3, “Performance of nonattest services,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .05).
The client assistance schedule is usually tailored to each specific engagement. The following is a list of analyses, schedules and other items that are often requested from the client prior to the start of an audit engagement:

- The general ledger.
- A reconciliation for each bank account.
- A trade accounts receivable aging.
- Accounts receivable confirmation letters, using drafts to be provided by the auditor.
- A schedule of accounts receivable from officers and employees.
- A schedule of bad debts written off during the year.
- A schedule of notes receivable. The notes should be available for inspection.
- A schedule of transactions with affiliated enterprises.
- An inventory listing.
- An analysis of transactions affecting marketable securities.
- An insurance schedule. The policies should be available for inspection.
- A schedule of property and equipment additions and retirements.
- A depreciation schedule.
- A schedule of life insurance for officers.
- A schedule of accounts payable. The creditor’s regular monthly statements for [date] should be retained and made available.
- A schedule of notes payable.
- The corporate stock book and minutes should be up to date and available for inspection.
- A schedule of all transactions to partners’ capital and drawing accounts.
- A copy of the partnership agreement or corporate charter should be available for inspection.
- Copies of all leases, including equipment rental contracts, should be available for inspection.
- Copies of employment contracts with salesmen or executives should be available for inspection.
- Copies of pension, profit sharing, deferred compensation, stock option agreements, and letters of acceptance from the Treasury Department, should be available for inspection.
- A schedule of repairs in excess of $________.
- A schedule of each officer’s salary and expense account payments.
- A schedule of contributions.
- A schedule of tax expense.
- A schedule of professional fees.

Following is a list of common engagement letter deficiencies:

- Reference in the letter to audit of the books and records rather than to audit of financial statements
- Adverse comments about other firms
- Failure to specify in detail the services to be rendered when a maximum fee is quoted
- Inclusion of a review of internal control as one of the services when what is really intended is an understanding of internal control as required by auditing standards
• Failure to identify accounting or other problems that may have an effect on the opinion
• Failure to change, in writing, the terms of the engagement when conditions are found to be different (such as the inability to express an opinion without extensive additional auditing because internal control was found deficient)
• Failure to include fee basis and payment terms
• Failure to identify subsidiaries
• Failure to identify specific tax returns to be prepared
• Failure to document the scope of the engagement

**Investigatory Procedures for Individuals**

.27 When credit information is requested about individuals who are new clients, the investigative procedures are subject to the Fair Credit Reporting Act.

.28 Under the Fair Credit Reporting Act, an individual is informed in writing that an investigative consumer report, including information about the individual’s character, general reputation, personal characteristics, and mode of living is being made. The individual is also advised, within three days of the time the report is requested, that he or she may, within a reasonable time, by written request, be furnished disclosure of the nature and scope of the investigation.

**Sample Engagement Letters**

.29 See AAM section 3165 for sample engagement letters.

**Preliminary Engagement Activities**

.30 In addition to the procedures mentioned previously, at the beginning of the audit engagement the auditor should (1) perform procedures regarding the continuance of the client relationship and the specific audit engagement and (2) evaluate the auditor’s compliance with ethical requirements, including independence. The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect the auditor’s ability to plan and perform the audit engagement to reduce audit risk to an acceptably low level or may pose an unacceptable level of risk to the auditor.

**The Overall Audit Strategy**

.31 In establishing the overall audit strategy, the auditor should (1) determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry specific reporting requirements, and the locations of the entity; (2) ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and (3) consider the important factors that will determine the focus of the audit team’s efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity specific, industry, financial reporting, or other relevant developments. The appendix to AU section 311 provides examples of matters the auditor may consider in establishing the overall audit strategy.

**The Audit Plan**

.32 The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level. The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be
performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures. The audit plan should include the following:

- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1). The plan for further audit procedures reflects the auditor’s decision whether to test the operating effectiveness of controls and the nature, timing, and extent of planned substantive procedures.

- A description of other audit procedures to be carried out for the engagement in order to comply with GAAS (for example, seeking direct communication with the entity’s lawyers).

**Determining the Extent of Involvement of Professionals Possessing Specialized Skills**

.33 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor’s staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. If such a professional is part of the audit team, the auditor’s responsibilities for supervising that professional are equivalent to those for other assistants. In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional’s work; to evaluate whether the specified audit procedures will meet the auditor’s objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

.34 The use of professionals possessing IT skills to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor should consider such factors as the following:

- The complexity of the entity’s systems and IT controls and the manner in which they are used in conducting the entity’s business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity’s participation in electronic commerce
- The entity’s use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.35 Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity’s IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls.
Communications With Those Charged With Governance and Management

.36 Paragraph .23 of AU section 380 explains that, among other matters, the auditor should communicate with those charged with governance (1) the auditor’s responsibilities under GAAS and (2) an overview of the planned scope and timing of the audit.

Additional Considerations in Initial Audit Engagements

.37 Before starting an initial audit, the auditor should perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see Statement on Quality Control Standards No. 7, A Firm’s System of Quality Control [AICPA, Professional Standards, vol. 2, QC sec. 10]) and communicate with the previous auditor, where there has been a change of auditors (see AU section 315, Communication Between Predecessor and Successor Auditors [AICPA, Professional Standards, vol. 1]). The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not have the previous experience with the entity that is considered when planning recurring engagements. Paragraph .27 of AU section 311 provides additional matters the auditor should consider in developing the overall audit strategy and audit plan for an initial audit.

AAM Section 3105

Understanding the Assignment

.01 The auditor may (a) meet with the client to understand the type, scope, and timing of the engagement; (b) understand if reports on compliance, internal control, or segments of the entity are required; (c) understand the client’s expectations, both stated and implied; and (d) review the expectations of both the owners and managers.

.02 To obtain an adequate understanding of any assignment, the auditor should be familiar with generally accepted accounting principles (GAAP), which includes specialized AICPA industry guides as well as Emerging Issues Task Force (EITF) consensuses. The auditor should also be familiar with generally accepted auditing standards (GAAS), which are promulgated by the AICPA and must be followed.

.04 On July 1, 2009, the Financial Accounting Standards Board (FASB) formally approved the FASB *Accounting Standards Codification™* (ASC) as the source of authoritative GAAP to be applied by nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission. The FASB ASC eliminates the GAAP hierarchy for nongovernmental entities by integrating U.S. GAAP into a single authoritative codification. The FASB ASC includes all accounting standards issued by a standard-setter within levels A–D of the former U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. The codification does not change GAAP; instead it reorganizes the thousands of U.S. GAAP pronouncements into roughly 90 accounting topics and displays all topics using a consistent structure. Financial accounting and reporting literature is either authoritative (in the FASB ASC) or nonauthoritative (not in the FASB ASC). Additional information is available in the AICPA Financial Reporting Alert, *FASB Codification Developments—2008* (product no. 029209), which includes screen shots and detailed instructions on using the ASC or through the FASB ASC Research System at http://asc.fasb.org.

Generally Accepted Auditing Standards

.05 An independent auditor plans, conducts, and reports the results of an audit in accordance with GAAS. Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

.06 AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*, vol. 1), provides a framework of GAAS.

.07 The general, field work, and reporting standards (the 10 standards) are as follows:

*General Standards*

1. The auditor must have adequate technical training and proficiency to perform the audit.
2. The auditor must maintain independence in mental attitude in all matters relating to the audit.
3. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.
Standards of Fieldwork

1. The auditor must adequately plan the work and must properly supervise any assistants.

2. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.

3. The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

Standards of Reporting

1. The auditor must state in the auditor’s report whether the financial statements are presented in accordance with GAAP.

2. The auditor must identify in the auditor’s report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

3. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor’s report.

4. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor’s report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor’s report. In all cases where an auditor’s name is associated with financial statements, the auditor should clearly indicate the character of the auditor’s work, if any, and the degree of responsibility the auditor is taking, in the auditor’s report.

.08 Rule 202, Compliance With Standards (AICPA, Professional Standards, vol. 2, ET sec. 202 par. .01), of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the Auditing Standards Board (ASB). The ASB develops and issues standards in the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.09 The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting. The auditor should be prepared to justify departures from the SASs. When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

.10 Interpretive publications consist of auditing interpretations of the SASs, appendixes to the SASs, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of

1 See paragraph .06 of AU section 326, Audit Evidence (AICPA, Professional Standards, vol. 1), for the definition of the term appropriate.

2 The reporting standards apply only when the auditor issues a report.

3 When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by stating in the auditor’s report that the basis of presentation is a comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used.

4 See AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1).

5 Appendixes to the Statements on Auditing Standards (SASs) referred to in paragraph .05 of AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1), do not include previously issued appendixes to original pronouncements that when adopted modified other SASs.
Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs.

The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he complied with the SAS provisions addressed by such auditing guidance.

Other auditing publications include the following:

- AICPA auditing publications not referred to previously
- Auditing articles in the *Journal of Accountancy* and other professional journals
- Auditing articles in the AICPA *CPA Letter*
- Continuing professional education programs and other instructional materials, textbooks, guide books, audit programs and checklists; and other auditing publications from state CPA societies, other organizations and individuals.

Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

If an auditor applies the auditing guidance included in an other auditing publication, he should be satisfied that, in his judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.

---

6 Auditing interpretations of the SASs are included in the codified version of the SASs. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in AU appendix D, "AICPA Audit and Accounting Guides and Statements of Position" (AICPA, *Professional Standards*, vol. 1).

7 The auditor is not expected to be aware of the full body of other auditing publications.

8 Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff as listed in AU appendix F, "Other Auditing Publications" (AICPA, *Professional Standards*, vol. 1).
AAM Section 3110

Assigning Personnel to the Engagement and Supervision

General Comments

.01 Engagement planning includes procedures for assigning personnel to the engagement. Having procedures established provides the firm with reasonable assurance that work will be performed by persons having the degree of technical training and proficiency required in the circumstances. Generally, the more able and experienced the personnel assigned to a particular engagement, the less need for direct supervision.

.02 Some procedures regarding assignment of personnel to the engagement are discussed in this section. The specific procedures adopted by a firm would not necessarily include all the procedures or be limited to those discussed. Overall firm guidance for assigning personnel to engagements is addressed in the practice aid Establishing and Maintaining a System of Quality Control for a CPA Firm’s Accounting and Auditing Practice (product no. 006636), and in “A Firm’s System of Quality Control” in AAM section 10,200. Sample quality control forms are available at AAM section 10,300, which are helpful in assigning personnel to engagements.

Engagement Planning Procedures

.03 A time budget for the engagement is prepared to determine manpower requirements and to schedule field work. The engagement partner may approve the time budget prior to the beginning of field work. A time budget may have columns for budgeted time (in hours) for preliminary and final field work. Time budget forms differ depending upon firm preference and needs. Some firms use separate forms for the time budget report and the job progress report or analysis (see paragraph .01 of AAM section 3160 for “Audit Time Budget—Sample A’”), whereas others combine these reports into one form (see paragraph .02 of AAM section 3160 for “Audit Time Budget—Sample B”).

.04 Other alternatives include longer, more detailed sets of forms. These forms combine the features of a time budget, a source document for staff scheduling, and a job progress report that compares each assigned person’s actual daily hours against the budget. Some firms use a shorter, less detailed form for jobs of less than a predetermined number of staff hours (for example, 100 hours; see paragraph .03 of AAM section 3160 for “Audit Time Analysis—Short Form”) and a longer form for jobs requiring more time (see paragraph .04 of AAM section 3160 for “Audit Time Analysis—Long Form”). Some firms use a weekly (or daily) progress report (see paragraph .05 of AAM section 3160, for example). This report, submitted by the auditor in charge, shows the time actually spent in relation to the estimate, the estimated additional time required, and the estimated variance from the original estimate.

.05 When the combined time budget and progress report form (sample B) is used, it is kept current as the assignment progresses. This form is carried in the working papers file and is filled in daily by the auditor in charge for all persons applying time on the engagement. This procedure is vital to identify and control time because it is applied so that it can be compared to the budgeted time for that phase of the engagement.

.06 The following factors may be considered in achieving a balance of engagement manpower requirements, personnel skills, individual development, and utilization:

a. Engagement size and complexity
b. Personnel availability  
c. Special expertise  
d. Timing of the work to be performed  
e. Continuity and periodic rotation of personnel  
f. Opportunities for on-the-job training  

The scheduling and staffing of the engagement is approved by the partner with final responsibility for the engagement so that the partner can consider the qualifications, experience, and training of personnel to be assigned. The experience and training of the engagement personnel is considered in relation to the complexity or other requirements of the engagement and the extent of supervision to be provided.

It is recommended that the auditor document all procedures discussed in this section in the auditor’s working papers.

Supervision

Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client’s business and industry.

The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity’s financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.

In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity’s business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor’s report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor’s report.

---

1 For further guidance on the discussion among the audit team, see paragraphs .14–.18 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), and paragraphs .14–.20 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1).
.13 Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor’s report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

AAM Section 3115

Independence

General Comments

.01 In accordance with Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .01), of the AICPA Code of Professional Conduct, a member in public practice shall be independent in the performance of professional services, as required by standards promulgated by bodies designated by council, which includes but is not limited to attest engagements.¹ Attest engagements are those in which your firm attests—or affirms—that a client’s financial or other information is reasonably stated. Examples of attest services are

- financial statement audits,
- financial statement reviews, and
- other attest services as defined in the Statements on Standards for Attestation Engagements.

.02 Third parties—investors, creditors, and others—rely on your firm’s attestations about a client’s financial information when making various business decisions. Therefore, attest services have value for third parties only if an independent firm renders the services. Accordingly, AICPA Professional Standards states that the auditor must maintain independence in mental attitude in all matters relating to the audit; therefore, your firm may perform attest services for a client only when it is independent of that client. Independence is not required to perform the following services, if these are the only services your firm provides to a client:

1. Tax preparation and advice
2. Consulting services (such as tax consulting or personal financial planning)

.03 One other service—a compilation of a client’s financial statements—does not require independence. If a nonindependent firm issues a compilation report, the following should be included as the last paragraph of the report, “I am (we are) not independent with respect to XYZ Company.”²

.04 Engagement planning includes procedures to provide the firm with reasonable assurance that all persons required to maintain independence, to the extent required by the AICPA Code of Professional Conduct and the regulations of other organizations, as applicable (for example, the Securities and Exchange Commission [SEC], and the Department of Labor), do so. The interpretations and rulings under Ethics Rule 101 of the AICPA Code of Professional Conduct contain examples of instances wherein a firm’s independence will be considered to be impaired.

.05 As stated in the following text, audit firms that perform audits of or perform other attest services for public companies or other SEC registrants should consult the independence rules of the SEC and the Public Company Accounting Oversight Board (PCAOB).

.06 Other organizations that have established other independence requirements that a member should consult if applicable include the following:

- State boards of accountancy
- State CPA societies
- Federal and state agencies, such as the Governmental Accountability Office (GAO)

¹ There are additional requirements for public companies and companies subject to other governmental oversight.
Generally, the AICPA independence rules will apply to you in all situations involving an attest client. If an additional set of rules governing an engagement also applies, you should comply with the most restrictive rule or the most restrictive portions of each rule. The AICPA’s Practice Aids, *Independence Compliance—Checklists and Tools for Complying With AICPA and GAO Independence Requirements* (product no. 006661), and *Independence Compliance: Checklists and Tools for Complying with AICPA, SEC, and PCAOB Independence Requirements* (product no. 006660), are valuable resources for helping practitioners observe applicable independence rules. The practice aids can be obtained at [www.cpa2biz.com](http://www.cpa2biz.com) or by calling (888) 777-7077.

**Maintaining Your Independence**

Maintaining your independence is your responsibility, not your firm’s. As part of its quality control system, the firm is often required to address independence matters; however, ultimately it is up to you to follow firm policies and the independence rules. Many firms require you to certify your independence on a regular basis. The following are some suggestions that will help you to complete and sign that certification in good faith.

**Gain an understanding of the independence rules and firm policies.** As a prerequisite to establishing and maintaining the independence, a good, working understanding of the basic independence rules is essential. At a minimum, it is important to be aware of the circumstances in which you and your immediate family meet the definition of a covered member (discussed in the following section in greater detail) and of the types of relationships you may have with the firm’s clients that could impair independence. If you have any questions about independence matters, you may consult with someone in your firm who is knowledgeable about such matters, or you may seek the advice of the AICPA (ethics@aicpa.org). If your firm performs audits and other attest services for SEC registrants, you should also familiarize yourself with rules promulgated by the SEC and the PCAOB.

**Covered Member**

Know when you meet the definition of a covered member. Whenever you are a covered member with respect to a particular attest client, you become subject to the highest possible level of independence restrictions (for example, restrictions on financial and business interests, and your family’s employment). According to paragraph .06 of ET section 92, *Definitions* (AICPA, *Professional Standards*, vol. 2), you are a covered member with respect to a client if you are

1. an individual on the attest engagement team;
2. an individual in a position to influence the attest engagement;
3. a partner or manager who provides more than ten hours of nonattest services to the attest client;
4. a partner in the office in which the lead attest engagement partner primarily practices in connection with the attest engagement;
5. the firm, including the firm’s employee benefit plans; or
6. an entity whose operating, financial, or accounting policies can be controlled (as defined by generally accepted accounting principles [GAAP] for consolidation purposes) by any of the individuals or entities described in (1)–(5) or by two or more such individuals or entities if they act together.

However, due to their magnitude, two relationships with a client impair independence even when you are not a covered member.

The following rules apply to partners and professional employees of a firm who are not covered members:

---

3 The staff of the AICPA Professional Ethics Division prepared a plain-English digest of the AICPA independence rules to help you understand independence requirements under the AICPA Code of Professional Conduct and, if applicable, other rule-making and standard-setting bodies. This digest of the AICPA independence rules is available on the AICPA Professional Ethics Division’s Web site at [www.aicpa.org](http://www.aicpa.org).
• No partner or professional employee may be simultaneously associated with an attest client during the period covered by the financial statements or during the period of the professional engagement as a
  — director, officer, or employee (or in any capacity equivalent to a member of management),
  — promoter, underwriter, or voting trustee, or
  — trustee of any of the client’s pension or profit-sharing trust.

• No partner or professional employee, his or her immediate family, or any group of such persons acting together may own more than 5 percent of an attest client’s outstanding equity securities (or other ownership interests).

Family Members

.12 The investments and employment of certain family members may impair your independence. Know which of your family members meet the definition of immediate family and which ones meet the definition of close relative as defined in ET section 92.

.13 If you are a covered member with respect to a client, members of your immediate family (your spouse, spousal equivalent, or dependents [whether related or not]) should follow the same rules as you. So, for example, your spouse’s investments should be investments that you could own under the rules. This would be the case even if your spouse keeps the investments in his or her own name or with a different broker.

.14 There are two exceptions to this general rule.

1. Your immediate family member’s employment with a client would not impair your firm’s independence provided he or she is not in a key position. A key position is one in which your family member
   • has primary responsibility for significant accounting functions that support material components of the financial statements or the preparation of the financial statements;
   • has primary responsibility for preparing the financial statements; or
   • has the ability to exercise influence over the contents of the financial statements, including when the individual is a member of the board of directors or similar governing body, CEO, president, CFO, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

2. Immediate family members of certain covered members may have a financial interest in a client through an employee benefit plan (for example, retirement or savings account) provided the plan is offered equitably to all similar employees. The covered members whose families may have such interests are the following:
   • Partners and managers who provide ten or more hours of nonattest services to the client
   • Partners who are in the same office where the client’s lead attest partner practices in connection with the engagement

.15 Also note that immediate family of individuals on the attest engagement team or of those who can influence the attest engagement team may not apply this exception.

.16 The close relatives of certain covered members will be subject to some employment and financial restrictions. These covered members are
   • persons on the attest engagement team,
   • persons who can influence the attest engagement, and
   • any partners in the office where the client’s lead partner the attest engagement.
Close relatives are your
• nondependent children,
• siblings, or
• parents.

So, as a covered member, your close relative’s employment by a client would impair independence if your relative had a key position with the client.

Rules pertaining to your close relatives’ financial interests differ depending on why you are considered a covered member:
• If you are a covered member because you participate on the client’s attest engagement team, your independence would be considered to be impaired if you are aware that your close relative has a financial interest in the client that either
  — was material to your relative’s net worth and of which you have knowledge or
  — enables the relative to exercise significant influence over the client.
• If you are a covered member because you are able to influence the client’s attest engagement or are a partner in the office in which the lead attest engagement partner practices in connection with the engagement, your independence will be impaired if you are aware that your close relative has a financial interest in the client that
  — is material to your relative’s net worth and of which you or the partner have knowledge and
  — enables your relative to exercise significant influence over the client.

Financial Relationships

There are various types of financial interests and some of those interests affect independence. Although your firm and its employee benefit plans are also subject to the financial interest provisions of the independence rules (firms are included in the definition of covered member), here we focus on their application to individuals.

As a covered member with respect to a particular client, you (and your spouse, or equivalent, and dependents) may not have a
• direct financial interest in that client, regardless of how immaterial it would be to your net worth.
• material indirect financial interest in that client.

In addition, if you commit to acquire a financial interest in a client with respect to which you are a covered member, your independence would be impaired. For example, if you sign a stock subscription agreement with the client, your independence would be considered impaired as soon as you sign the agreement.

According to paragraph .17 of ET section 101, Independence (AICPA, Professional Standards, vol. 2), a financial interest is an ownership interest in an equity or a debt security issued by an entity, including rights and obligations to acquire such an interest and derivatives directly related to such interest. Examples of financial interests include shares of stock; mutual fund shares; partnership units; stock rights; options or warrants to acquire an interest in a client; or rights of participation, such as puts, calls, or straddles.

Direct financial interests are financial interests that are
• owned by you directly;
• under your control; or
beneficially owned by you through an investment vehicle, estate, trust, or other intermediary if you can either

— control the intermediary, or

— have the authority to supervise or participate in the intermediary’s investment decisions.

For example, if you invest in a participant directed 401(k) plan, whereby you are able to select the investments held in your account or are able to select from investment alternatives offered by the plan, you would be considered to have a direct financial interest in the investments held in your account.

.25 You also have a direct financial interest in a client when you have a financial interest in a client through one of the following:

- A partnership, if you are a general partner.
- A Section 529 savings plan, if you are the account owner.
- An estate, if you serve as an executor and meet certain other criteria.
- A trust, if you serve as the trustee and meet certain other criteria.

.26 Indirect financial interests arise if you have a financial interest that is beneficially owned through an investment vehicle, estate, trust, or other intermediary when you can neither control the intermediary nor have the authority to supervise or participate in the intermediary’s investment decisions. For example, if you invest in a defined contribution plan that is not participant directed and you have no authority to supervise or participate in the plan’s investment decisions, you would be considered to have an indirect financial interest in the underlying plan investments, in addition to a direct financial interest in the plan.

Business Relationships

.27 As a partner or professional employee of your firm, independence would be considered to be impaired if you entered into certain business relationships with an attest client of the firm. Accordingly, you may not serve a client as any of the following:

- Director, officer, employee, or in any management capacity
- Promoter, underwriter, or voting trustee
- Stock transfer or escrow agent
- General counsel (or equivalent)
- Trustee for a client’s pension or profit-sharing trust

.28 In essence, any time you are able to make management decisions on behalf of a client or exercise authority over a client’s operations or business affairs, independence is considered impaired.

.29 Your independence is considered impaired even if you were a volunteer board member because you would be part of the client’s governing body and therefore would be able to participate in the client’s management decisions.

.30 This rule has two possible exceptions:

1. If you are an honorary director or trustee for a client that is a nonprofit charitable, civic, or religious organization, you may hold such position with a client if
   a. your position is purely honorary.
   b. you do not vote or participate in managing the organization.
   c. your position is clearly identified as honorary in any internal or external correspondence.
2. In addition, you may serve on a client’s advisory board provided all the following criteria are met:
   a. The advisory board’s function is purely advisory.
   b. The advisory board does not appear to make decisions for the client.
   c. The advisory board and any decision making boards are separate and distinct bodies.
   d. Common membership between the advisory board and any decision making groups is minimal.

Practice Tip
Before accepting an invitation to serve on a client’s advisory board, a covered member may ask to review
the advisory board’s governing document to verify that the advisory board’s function is indeed purely
advisor and that the advisory board indeed does not make decisions for the client.

Unpaid Fees

.31 If a client of the member’s firm has not paid fees for previously rendered professional services, then
independence is considered to be impaired if, when the report on the client’s current year is issued, billed or
unbilled fees, or a note receivable arising from such fees, remain unpaid for any professional services provided
more than one year prior to the date of the report.

Restricted Entities

.32 Be familiar with the firm’s restricted entities. Restricted entities are those entities for whom the firm
provides attest services. Many firms maintain a formal list or database of these clients. If yours is one of these
firms, you should know how to access the list.

.33 Maintain the integrity of the restricted entity list. If you perform attest services, then you need to make
sure that those clients are identified as restricted entities of the firm. Certain entities that are related to your
clients (for example, subsidiaries) also will be considered restricted entities, even if they are not clients of the
firm.

.34 Consult the restricted entities list regularly. Get into the habit of referring to the firm’s restricted entity
list whenever you are considering changes in circumstances that could affect your independence. For example,
you may consult the restricted entity list prior to
   • making an investment or acquiring a financial interest in an entity.
   • entering into a business relationship.
   • obtaining a loan or refinancing an existing loan.
   • having an immediate family member change employers or assume new responsibilities at an existing
     job.

Nonattest Services

.35 Be aware of the rules relating to the performance of nonattest services. If you provide nonattest services
to restricted entities, you should be familiar with Interpretation No. 101-3, “Performance of nonattest
services,” of ET section 101 (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .05) that establishes standards
and provides guidance regarding the performance of nonattest services. Interpretation No. 101-3 discusses the
services that are permitted and prohibited under the ruling, as well as the member’s responsibilities for
establishing an understanding of the engagement with your client and documenting various aspects of the

---

4 The staff of the Professional Ethics Division issued nonauthoritative guidance in the form of a frequently asked question (FAQ)
regarding performance of nonattest services. The FAQ document, is available on the AICPA Professional Ethics Division’s Web site at
www.aicpa.org/Professional+Resources/Professional+Ethics+Code+of+Professional+Conduct/Professional+
Ethics/Resources+and+Tools/Frequently+Asked+Questions.htm#appraisalvaluation.
engagement. If your clients are SEC registrants, you should be aware of the more restrictive SEC rules in this area. Certain other regulators (for example, the GAO) may have more restrictive rules concerning nonattest services, which should be reviewed depending upon the circumstances of the engagement.

.36 The term nonattest services includes accounting and consulting services that are not part of an attest engagement. Nonattest services specifically addressed in the rules are as follows:

- Bookkeeping services
- Nontax disbursement services
- Internal audit assistance
- Benefit plan administration
- Investment advisory or management services
- Tax compliance services
- Corporate finance consulting or advisory
- Appraisal, valuation, or actuarial services
- Executive or employee search services
- Business risk consulting
- Information systems design, installation, or integration
- Forensic accounting services

.37 Interpretation No. 101-3 lists three general requirements in order to maintain independence when performing permitted nonattest services.

.38 The first of the three general requirements of Interpretation No. 101-3 states that a member should not perform—or even appear to perform—management functions or make management decisions for an attest client. (However, the member may provide advice, research materials, and recommendations to assist the client’s management in performing its functions and making decisions.)

.39 The second general requirement is that the client must agree to perform the following functions in connection with the engagement:

- Make all management decisions and perform all management functions
- Designate an individual who possesses suitable skill, knowledge, or experience, preferably within senior management, to oversee the services
- Evaluate the adequacy and results of the services performed; and
- Accept responsibility for the results of the services

The member should be satisfied that the client will be able to meet all of these criteria and to make an informed judgment on the results of the member’s nonattest services. In assessing whether the designated individual possesses suitable skill, knowledge, or experience, the member should be satisfied that the individual understands the services to be performed sufficiently to oversee them. However, the individual is not required to possess the expertise to perform or reperform the services. In cases where the client is unable or unwilling to assume these responsibilities (for example, the client does not have an individual with suitable skill, knowledge, or experience to oversee the nonattest services provided, or is unwilling to perform such functions due to lack of time or desire), the member’s provision of these services would impair independence.

---

[5] As defined in the Code of Professional Conduct, an attest engagement is one that requires independence under AICPA Professional Standards; for example, audits and reviews of financial statements or agreed upon procedures performed under the attestation standards.
The third general requirement is that before performing nonattest services, the member should establish and document in writing his or her understanding with the client (for example, the board of directors, audit committee, or management, as appropriate in the circumstances) regarding the following:

- Objectives of the engagement
- Services to be performed
- Client’s acceptance of its responsibilities
- Member’s responsibilities
- Any limitations of the engagement

The understanding might be documented in a separate engagement letter, in the working papers, or in an internal memo, or it might be included in an engagement letter obtained in conjunction with an attest engagement.

The second and third general requirements do not apply to certain routine activities performed by the member, such as, assisting clients with technical accounting questions, advising on internal controls, or providing periodic training on new pronouncements that are part of the normal client-member relationship.

In addition, the following are examples of the types of activities that impair independence:

- Authorizing, executing, or consummating a transaction, or otherwise exercising authority on behalf of a client or having the authority to do so
- Preparing source documents, in electronic or other form, evidencing the occurrence of a transaction
- Having custody of client assets
- Supervising client employees in the performance of their normal recurring activities.
- Determining which recommendations of the member should be implemented.
- Reporting to the board of directors on behalf of management.
- Serving as a client’s stock transfer or escrow agent, registrar, general counsel, or its equivalent.
- Establishing and maintaining internal controls, including performing ongoing monitoring activities for a client

Additionally, Interpretation No. 101-3 requires you comply with more restrictive independence provisions, if applicable, of certain regulators such as state boards of accountancy, the SEC, and the GAO.

Report any apparent violations. If you become aware of any apparent violations of the independence rules, you should report these immediately to the person in your firm responsible for independence matters.

The procedures employed at the engagement level should be designed to ascertain whether the firm and its partners and employees have complied with all applicable independence rules. Overall firm requirements for independence are addressed in Statement on Quality Control Standards (SQCS) No. 7, A Firm’s System of Quality Control (AICPA, Professional Standards, vol. 2, QC sec. 10).

Independence Quality Controls

Paragraph .21 of SQCS No. 7 states that the firm should establish policies and procedures designed to provide it with reasonable assurance that the firm, its personnel, and, where applicable, others subject to independence requirements, maintain independence where required. Independence requirements are set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Guidance on threats to independence, including the familiarity threat that may be created by using the same senior personnel on an audit or attest engagement over a long period of time and safeguards to mitigate such threats involving
matters that are not explicitly addressed in the AICPA Code of Professional Conduct are set forth in ET section 100, *Conceptual Framework for AICPA Independence Standards* (AICPA, *Professional Standards*, vol. 2). Such policies and procedures should enable the firm to

- communicate its independence requirements to its personnel and, where applicable, others subject to them.
- identify and evaluate circumstances and relationships that create threats to independence and to take appropriate action to eliminate those threats or reduce them to an acceptable level by applying safeguards, or, if effective safeguards cannot be applied, withdrawing from the engagement.

.47 Such policies and procedures should require

- the engagement partner to consider relevant information about client engagements, including the scope of services, to enable him or her to evaluate the overall effect, if any, on independence requirements.
- personnel to promptly notify the engagement partner and the firm of circumstances and relationships that create a threat to independence so that appropriate action can be taken.
- the accumulation and communication of relevant information to appropriate personnel so that
  1. the firm, the engagement partner, and other firm personnel can readily determine whether they satisfy independence requirements;
  2. the firm can maintain and update information relating to independence; and
  3. the firm and the engagement partner can take appropriate action regarding identified threats to independence.

.48 The firm should establish policies and procedures designed to provide it with reasonable assurance that it is notified of breaches of independence requirements and to enable it to take appropriate actions to resolve such situations. The policies and procedures should include requirements for

- personnel to promptly notify the firm of independence breaches of which they become aware.
- the firm to promptly communicate identified breaches of these policies and procedures and the required corrective actions to
  1. the engagement partner who, with the firm, has the responsibility to address the breach; and
  2. other relevant personnel in the firm and those subject to the independence requirements who need to take appropriate action.
- confirmation to the firm by the engagement partner and the other individuals referred to previously in subparagraph (b[2]) that the required corrective actions have been taken.

.49 At least annually, the firm should obtain written confirmation of compliance with its policies and procedures on independence from all firm personnel required to be independent by the requirements set forth in ET section 101 and its related interpretations and rulings of the AICPA Code of Professional Conduct and the rules of state boards of accountancy and applicable regulatory agencies. Written confirmation may be in paper or electronic form.

.50 The purpose of obtaining confirmation and taking appropriate action on information indicating noncompliance is to demonstrate the importance that the firm attaches to independence and keep the issue current for and visible to its personnel.

.51 For all audit or attestation engagements where regulatory or other authorities require the rotation of personnel after a specified period, the firm’s policies and procedures should address these requirements.
Additional Guidance

.52 It is recommended that the auditor document all procedures discussed in this section in his or her working papers.

.53 International independence standards are established by the International Federation of Accountants’ (IFAC) International Ethics Standards Board for Accountants and can be found in section 290, Independence—Audit and Review Engagements, and section 291, Independence—Other Assurance Engagements, of the IFAC’s Code of Professional Ethics for Professional Accountants. The IFAC’s Code of Professional Ethics for Professional Accountants can be found at www.ifac.org/Guidance/EXD-Details.php?EDID=0116.

.54 For additional guidance practitioners may refer to the AICPA Audit Risk Alert Independence and Ethics Developments (AAM section 8240). This annual alert informs you of recent developments in the area of independence and ethics for members, including developments in international independence standards discussed previously in paragraph .52. Moreover, the alert helps you understand your independence requirements under the AICPA Code and, if applicable, certain other rule making and standard setting bodies. Also, the alert contains the AICPA Plain English Guide to Independence, which discusses the independence rules of the principal standard setting bodies in plain, straightforward English so you can understand and apply them with greater confidence and ease.

[The next page is 3181.]
AAM Section 3120

Understanding the Entity and Its Environment

General

.01 In accordance with the second standard of field work, “the auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.” Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example, when

- establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses;
- considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures;
- identifying areas where special audit consideration may be necessary, for example, related party transactions, the appropriateness of management’s use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions;
- developing expectations for use when performing analytical procedures;
- designing and performing further audit procedures to reduce audit risk to an appropriately low level; and
- evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management’s assumptions and of management’s oral and written representations.

.02 The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its internal control. The auditor’s primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

.03 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1). See further discussion in AAM section 3145.

Risk Assessment Procedures

.04 Audit procedures performed to obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels are referred to as risk assessment procedures. The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels.
The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

a. Inquiries of management and others within the entity

b. Analytical procedures

c. Observation and inspection

Risk assessment procedures are designed to gather and evaluate information about the client and are not specifically designed as substantive procedures or as tests of controls. Nevertheless, in performing risk assessment procedures, the auditor may obtain evidence about relevant assertions or the effectiveness of controls.

Inquiry of Management and Others

Although much of the information obtained by inquiry can be obtained from management, accounting personnel, and others involved in the financial reporting process, it is often helpful to direct inquiries to others within the entity. For example, people who work in production, sales, or internal audit, as well as individuals employed at different levels within the organization can provide a different perspective that helps identify risks of material misstatement. Inquiries of others can also help corroborate or provide additional details to the statements and representations made by management and accounting personnel. The following table provides examples of other individuals within the entity who might be able to help the auditor identify and assess the risk of material misstatement.

Examples of Inquires of Others Within the Entity

<table>
<thead>
<tr>
<th>Inquiries of these individuals (outside of management or the financial reporting process, or both)</th>
<th>May help the auditor understand</th>
</tr>
</thead>
</table>
| Those charged with governance | • the environment in which the financial statements are prepared.  
• whether they have knowledge of any fraud or suspected fraud.  
• how they exercise oversight of the entity’s programs and controls that address fraud.  
• their views on where the company is most vulnerable to fraud.  
• how financial statements are used. |
| Internal audit personnel | • the design and operating effectiveness of internal control.  
• internal audit activities related to internal control over financial reporting.  
• whether management has responded satisfactorily to internal audit findings.  
• their views on where the company is most vulnerable to fraud. |
| Employees involved in the initiation, processing, or recording of complex or unusual transactions | • the controls over the selection and application of accounting policies related to those transactions.  
• the business rationale for those transactions. |
### Analytical Procedures

.09 AU section 329, *Analytical Procedures* (AICPA, *Professional Standards*, vol. 1), specifies that the auditor should apply analytical procedures in planning the audit. The objective of these procedures is to help the auditor understand the client and its environment and, ultimately, to assess the risk of material misstatement. As such, the auditor may consider the analytical procedures performed during audit planning to be a risk assessment procedure that provides some broad audit evidence to support the opinion on the financial statements.

.10 Refer to paragraphs .06–.08 of AU section 329 for additional guidance on the performance of analytical procedures in planning the audit.

.11 The results of analytical procedures may help the auditor obtain an understanding of the entity. For example, analytical procedures may be helpful in identifying:

- the existence of unusual transactions or events, which may indicate the presence of significant risks, and
- amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. For example, an unexpected amount, ratio, or trend may be the result of a misstatement that was not prevented or detected and corrected by the client’s system of internal control.
Observations and Inspection of Documents

.12 The auditor may use observation and the inspection of documents to support the responses received to the inquiries of management and others. Additionally, the observations and inspections will provide the auditor with further information about the entity and its environment that might not otherwise be obtained.

.13 The procedures performed to observe activities and inspect documents typically include the following:
- Observation of client activities and operations
- Visits to the client’s premises and plant facilities
- Inspection of documents, records, and internal control manuals
- Reading reports prepared by management (such as quarterly management reports and interim financial statements)
- Reading minutes of board of directors’ meetings and other documents prepared by those charged with governance and internal audit
- Tracing transactions through the financial reporting information system (walkthroughs)

A Mix of Procedures

.14 The auditor is not required to perform all the risk assessment procedures described previously for each aspect of the understanding described in the following section. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

Discussion Among the Audit Team

.15 The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity’s financial statements to material misstatements. The objectives of this discussion are for team members to
- gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and
- understand how the results of the audit procedures they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

.16 This discussion could be held concurrently with the discussion among the audit team that is specified by AU section 316 to discuss the susceptibility of the entity’s financial statements to material misstatement due to fraud. See AAM section 3145 for further discussion on fraud.

.17 Topics for audit team discussion include the following:
- Areas of significant audit risk
- Unusual accounting procedures used by the client
- Important control systems
- Significant IT applications and how the client’s use of IT may affect the audit
- Areas susceptible to management override of controls
- Materiality at the financial level and at the account level and tolerable misstatement
- How materiality will be used to determine the extent of testing
- The application of generally accepted accounting principles to the client’s facts and circumstances and in light of the entity’s accounting policies
The need to
- exercise professional skepticism throughout the engagement
- remain alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred
- follow up rigorously on any indications of a material misstatement

.18 The auditor should exercise professional judgment to determine logistical matters relating to the audit discussion, such as who should participate, how and when the discussion should occur, and its extent. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion.

.19 When considering who should participate in the discussion, the auditor also may determine that an IT specialist or other individual possessing specialized skills is needed on the audit team and, therefore, include that individual in the discussion.

Understanding Specified Aspects of the Entity and Its Environment

.20 The auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

a. Industry, regulatory, and other external factors

b. Nature of the entity

c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements

d. Measurement and review of the entity’s financial performance

e. Internal control, which includes the selection and application of accounting policies

.21 The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor’s experience with it. In addition, identifying significant changes in any of the previously mentioned aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

Industry, Regulatory, and Other External Factors

.22 The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.

.23 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements. Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.
Nature of the Entity

.24 The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity’s operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

Objectives and Strategies and Related Business Risks

.25 The auditor should obtain an understanding of the entity’s objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity’s management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic and the entity’s strategies and objectives change over time.

.26 Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .76–.80 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1).

Measurement and Review of the Entity’s Financial Performance

.27 The auditor should obtain an understanding of the measurement and review of the entity’s financial performance. Performance measures and their review indicate to the auditor aspects of the entity’s performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity’s performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

.28 Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity’s performance with that of competitors. External parties may also measure and review the entity’s financial performance. For example, external information, such as analysts’ reports and credit rating agency reports, may provide information useful to the auditor’s understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from Web sites.

Internal Control

.29 Refer to AAM section 3125 for the discussion of internal control.

Documentation

.30 The auditor should document the key elements of the understanding obtained regarding each of the aspects of the entity and its environment, including each of the components of internal control (discussed in AAM section 3125) to assess the risks of material misstatement of the financial statements; the sources of
information from which the understanding was obtained; and the risk assessment procedures. See AAM section 6000 for additional discussion on audit documentation.

[The next page is 3201.]
AAM Section 3125

Understanding of Internal Control

Introduction

.01 Internal control is broadly defined as a process designed to provide reasonable assurance regarding the achievement of the entity’s objectives in the following categories: (a) reliability of financial reporting, (b) effectiveness and efficiency of operations, and (c) compliance with applicable laws and regulations. Internal control is effected by those charged with governance, management, and other personnel.

.02 The previous definition reflects certain fundamental concepts that follow:

A process. Internal control is a process. It is not one event or circumstance, but a series of actions that permeate an entity’s activities. These actions are pervasive, and are inherent in the way management runs the business.

People. Internal control is effected by people. It is not accomplished by policy manuals and forms, but the people of an organization, what they do and say. People need to know their responsibilities and limits of authority.

Reasonable assurance. Internal control, no matter how well designed and operated, can provide only reasonable assurance to management and the board of directors regarding achievement of an entity’s objectives.

Achievement of objectives. Internal control is geared to the achievement of entity objectives. The definition of these objectives provides auditors with a useful framework for understanding and analyzing internal controls.

.03 Auditors should obtain an understanding of their client’s internal control during the planning phase of every audit. Paragraph .40 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), states the following:

The auditor should obtain an understanding of the five components of internal control sufficient to assess the risk of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures.

.04 As a practical matter, the previous requirement raises the following questions:

• What constitutes a sufficient understanding? That is, what should an auditor know about the client’s internal control?

• How should an auditor obtain this understanding?

.05 This section provides answers to each of the previous questions.

What Auditors Should Understand About Internal Control

.06 A sufficient understanding of internal control means the following:

• The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented.
• This understanding is ordinarily limited to controls that pertain to the entity’s objective of preparing reliable financial statements for external purposes.

• That one objective can be broken into five components, and an auditor should obtain an understanding of each of the five components.

.07 Obtaining an understanding of controls is different from testing the operating effectiveness of controls. Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. In contrast, the objective of testing the operating effectiveness of controls is to determine whether the controls, as designed, prevent or detect a material misstatement. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

.08 The Jones family owns and operates several neighborhood grocery stores in Anytown. On a monthly basis, the controller of Jones Grocery performs bank reconciliations for all the bank accounts. For planning purposes, the auditor of Jones Grocery should determine whether this control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements and determine whether the controller actually performs the reconciliations. Not testing, but identifying controls are a key part of audit planning.

.09 AU section 314 provides a framework to help auditors obtain their understanding of internal control. That framework is built on two basic concepts: objectives and components.

.10 Internal control is a process designed to provide reasonable assurance regarding the achievement of entity objectives. Entities generally have the following three objectives:

Financial reporting. This objective relates to the preparation of reliable published financial statements.

Operations. This objective relates to effective and efficient use of the entity’s resources.

Compliance. This objective relates to the entity’s compliance with applicable laws and regulations.

.11 The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the financial reporting objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they stock-out. This control activity is part of the operations objective. Each store also has a small deli that prepares sandwiches and hot entrees. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the entity’s compliance objective.

.12 Ordinarily, relevant controls for an audit relate to the financial reporting objective. Controls relating to operations and compliance objectives that are not relevant to an effective audit need not be considered. It is a matter of the auditor’s professional judgment, as to the controls or combination of controls that may be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity’s related controls, including relevant control activities and determine whether they have been implemented.

.13 The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery, but ordinarily will not relate to the audit of the company’s financial statement. The auditor of Jones may wish to inquire and document these controls for client service or other purposes, but because these controls are not relevant to the audit, he or she is not required to do so.
However, if controls relating to operations and compliance objectives pertain to information the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she may consider obtaining an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting information about those transactions are entered into and flow through the financial reporting system
- The files that are processed
- The nature of processing involved in producing the report

Controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

Controls designed to prevent or detect misappropriations of assets may include controls relating to financial reporting and operations objectives. For example, use of a lockbox system for collecting cash or access controls, such as passwords that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, controls to prevent the excess use of materials in production generally are not relevant to a financial statement audit. An auditor’s responsibility to understand internal control is generally limited to those controls relevant to the reliability of financial reporting.

An objective is what an entity strives to achieve. But what is needed to achieve that objective?

AU section 314 provides a framework that separates each financial reporting objective into five components. These components represent what is needed to achieve the entity’s objectives. The components of internal control are briefly described as follows:

**Control environment.** The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

**Risk assessment.** An entity’s risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

**Control activities.** Control activities are the policies and procedures that help ensure that management directives are carried out; for example, that necessary actions are taken to address risks that threaten the achievement of the entity’s objectives.

**Information and communication systems.** The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system generated information affects management’s ability to make appropriate decisions in controlling the entity’s activities and to prepare reliable financial reports. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

**Monitoring.** Monitoring is a process that assesses the quality of internal control performance over time.
Some control components, for example the control environment, will have a pervasive effect on the entity’s activities. Other components, for example control activities, will be directed primarily toward the achievement of one or more of the three objectives described in paragraph .10 in this section. Auditors are generally interested only in those components of internal control that have a pervasive effect on the entity and those that are directly related to the reliability of financial reporting.

This internal control framework, the relationship between an entity’s objectives and internal control components, is discussed in more detail in AAM section 4200.

The internal control framework described here and in AAM section 4200 is only a means to help auditors consider the effect of an entity’s internal control in an audit. An auditor’s primary concern is not the classification of a specific control into any particular component and related objective. Rather, an auditor’s primary concern is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the five components.

Andrea Auditor audits Jones Grocery. As on all audits, she should obtain an understanding of internal control sufficient to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures. To achieve this, she organizes her inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objective. As a result of performing her procedures, she discovers the client’s bank reconciliation procedures. Should a bank reconciliation be considered a control activity? What about the fact that someone follows up and investigates old or unusual reconciling items. Is that considered monitoring activity?

The issue of how to classify a particular control is irrelevant for Andrea’s purposes. As an auditor, her primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.

How an Auditor Obtains an Understanding of Internal Control

The auditor should obtain a sufficient understanding of internal control by performing risk assessment procedures (inquiries of management and others within the entity, analytical procedures, and observation and inspection) to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

Auditors might consider the types of misstatements that occurred in prior audits (for example, whether they were associated with accounting estimates, whether they were routine errors that resulted from a lack of control consciousness, or whether they resulted from lack of sufficient personnel). This knowledge of prior misstatements can help an auditor focus his or her inquiries on those areas and whether changes have been made to internal control to prevent those misstatements in the future.

In a continuing audit, the auditor may already have significant experience with and documentation of internal control. In these situations, this knowledge from previous audits allows the auditor to focus on system changes.

Jones Grocery purchased a commercially available software package for independent grocers. During 20X1, Jones installed the general ledger system and the cash receipts/disbursements and accounts payable modules. As part of performing her 20X1 audit, Andrea Auditor obtained an understanding of the software package and the modules that
were installed. For her 20X2 audit, Andrea should focus on changes made to the system since 20X1. For example, she might inquire about the installation of other modules (such as inventory) or updated versions of the software package.

.29 Some controls are documented in policy and procedure manuals, flowcharts, source documents, journals, and ledgers. In these cases, inspection of the documentation and inquiries of entity personnel may provide a sufficient understanding to assess the risks of material misstatement and design the nature, timing, and extent of further audit procedures.

.30 When Jones Grocery receives a bill, it is input directly into the accounts payable module of their software package. The computer generates an accounts payable aging and a cash requirements report that indicates when each bill should be paid. The accounts payable module interfaces with the general ledger system to automatically post and update the appropriate general ledger account whenever bills are received or paid. To obtain her understanding of the accounts payable system, Andrea performed a “walk-through.” She made inquiries of Jones personnel and obtained copies of bills and the reports generated by the computer. She “walked through” the example bills to see how they were included in the computer reports and how totals from those reports were posted to the general ledger. She also made inquiries related to the completeness assertion, that is, how does Jones ensure that all bills are entered into the system? Andrea observed the Jones employee performing those control procedures.

.31 Documentation may not be available for some controls. For example, the understanding of certain aspects of the control environment, such as management integrity, may be obtained through previous experience updated by inquiries of management and observation of their actions. Although documentation may not be available, the auditor is still responsible for documenting his or her understanding of the components of internal control.

Documenting the Understanding

.32 The auditor should document the key elements of the understanding obtained regarding each of the components of internal control, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures. The form and extent of this documentation is influenced by the nature and complexity of the entity’s controls. For example, documentation of the understanding of internal control of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity’s internal control and the more extensive the procedures performed by the auditor, the more extensive the auditor should document his or her work.

AAM Section 3130

Assessing the Risks of Material Misstatement

General

.01 Knowledge an auditor acquires about a client encompasses a broad range of information, including the following:

- Industry, regulatory, and other external factors affecting the client
- The nature of the client, including its operations and organizational structure
- The client’s objectives, strategies, and related business risks, some of which will give rise to risks affecting the financial statements
- How management measures and reviews the company’s financial performance
- An understanding of the internal controls that are in use at the entity, including an understanding of the use of IT and the controls designed and used within the IT system

This knowledge of a client forms the basis for identifying risks and evaluating how these risks could result in financial statement misstatements.

.02 The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should

- identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- relate the identified risks to what can go wrong at the relevant assertion level.
- consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- consider the likelihood that the risks could result in a material misstatement of the financial statements.

.03 The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1).

.04 The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions.
Financial Statement Assertions

.05 Paragraphs .14–.19 of AU section 326, Audit Evidence (AICPA, Professional Standards, vol. 1), discuss the use of assertions in obtaining audit evidence. In representing that the financial statements are fairly presented in accordance with generally accepted accounting procedures, management implicitly or explicitly makes assertions regarding the recognition, measurement, and disclosure of information in the financial statements and related disclosures. Assertions used by the auditor fall into the following categories:
<table>
<thead>
<tr>
<th>Categories of Assertions</th>
<th>Description of Assertions</th>
<th>Classes of transactions and events during the period</th>
<th>Occurrence/Existence</th>
<th>Rights and Obligations</th>
<th>Completeness</th>
<th>Accuracy/valuation and allocation</th>
<th>Cut-off</th>
<th>Classification and understandability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cut-off</td>
<td>Transactions and events have been recorded in the correct accounting period.</td>
<td>Transactions and events have been recorded in the correct accounting period.</td>
<td>Transactions and events have been recorded.</td>
<td>All transactions and events that should have been recorded have been recorded.</td>
<td>Amounts and other data relating to recorded transactions and events have been recorded appropriately.</td>
<td>Financial and other information disclosed fairly and at appropriate amounts.</td>
<td>Financial information is appropriately presented and described, and information in disclosures is expressed clearly.</td>
<td>Financial information is appropriately presented and described, and information in disclosures is expressed clearly.</td>
</tr>
</tbody>
</table>
The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

Assessing Risks at the Financial Statement Level

Risks of material misstatement at the financial statement level are those risks that relate pervasively to the financial statements and potentially affect many individual assertions. Risks at the financial statement level may derive in particular from a weak control environment. The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management’s lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- **Financial statement level risks can affect many assertions.** By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.

- **Assessing financial statement level risks requires significant judgment.** Ultimately, the auditor should relate identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor’s professional judgment to determine the following:
  - The accounts and relevant assertions that could be affected
  - The likelihood that a financial statement misstatement will result from the increased risk
  - The significance of any misstatement

- **Risks at the financial statement level may not be identifiable with specific assertions.** Control weaknesses at the financial statement level can render well designed activity level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult, and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed, IT general controls may allow many unauthorized personnel the opportunity to access and inappropriately change the data and the well designed input controls will be rendered ineffective. Also, strengths in financial statement level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and therefore the assessment of the risks of material misstatement) is subjective and may vary from client to client.
Assessing Risks at the Assertion Level

.09 In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often, only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

.10 Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.11 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager’s review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks That Require Special Audit Consideration

.12 As part of the assessment of the risks of material misstatement, the auditor should determine which of the risks identified are, in the auditor’s judgment, risks that require special audit consideration (such risks are defined as significant risks). One or more significant risks normally arise on most audits. In exercising this judgment, the auditor should consider inherent risk to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity’s controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented. Paragraphs .45 and .53 of AU section 318 describe the consequences for further audit procedures of identifying risks as significant.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.13 As part of the risk assessment previously described in paragraph .12, the auditor should evaluate the design and determine the implementation of the entity’s controls, including relevant control activities, over those risks for which, in the auditor’s judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph .24 of AU section 318.

Revision of Risk Assessment

.14 The auditor’s assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In
performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor’s risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs .70 and .74 of AU section 318 for further guidance.

Documentation

.15 The auditor should document (a) the assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level and the basis for the assessment and (b) the risks identified and related controls evaluated as a result of the requirements for significant risks.

AAM Section 3140

Audit Risk and Materiality

General

.01 Audit risk and materiality, among other matters, need to be considered together in determining the nature, timing, and extent of auditing procedures and in evaluating the results of those procedures. The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor. Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected. Audit risk is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated. In other words, audit risk is the risk that the auditor will issue an unqualified opinion on financial statements that are materially incorrect.

.02 Financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, are important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP). Materiality is the criterion used by auditors to distinguish between unimportant and important matters. The auditor’s consideration of materiality is a matter of professional judgment and is influenced by a perception of the needs of users of the financial statements. The perceived needs of users are recognized in the discussion of materiality in FASB Concepts Statement No. 2, Qualitative Characteristics of Accounting Information, which defines materiality as

The magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement.

Nature and Causes of Misstatements

.03 The representation in the auditor’s standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor’s belief that the financial statements, taken as a whole, are not materially misstated. Misstatements can result from errors or fraud.1 and may consist of any of the following:

a. An inaccuracy in gathering or processing data from which financial statements are prepared

b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under GAAP

c. The omission of a financial statement element, account, or item

d. A financial statement disclosure that is not presented in conformity with GAAP

e. The omission of information required to be disclosed in conformity with GAAP

f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts

g. Management’s judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate

1 The auditor’s consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in AU section 317, Illegal Acts by Clients (AICPA, Professional Standards, vol. 1). See AAM section 3150, Illegal Acts. For those illegal acts that are defined in that statement as having a direct and material effect on the determination of financial statement amounts, the auditor’s responsibility to detect misstatements resulting from such illegal acts if the same as that for errors or fraud.
Misstatements may be of two types: known and likely, defined as follows:

**Known misstatements.** These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.

**Likely misstatements.** These are misstatements that

- arise from differences between management’s and the auditor’s judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).
- the auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample to the entire population from which the sample was drawn).

The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor’s consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets. These two types of misstatements are further described in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, Professional Standards, vol. 1).

See AAM section 3145 for a further discussion on fraud.

Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor’s response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

**Considerations at the Financial Statements Level**

The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of

- determining the extent and nature of risk assessment procedures.
- identifying and assessing the risks of material misstatement.
- determining the nature, timing, and extent of further audit procedures.
- evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with GAAP.

Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels. The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.
.10 The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor’s professional judgment, appropriate for expressing an opinion on the financial statements. Audit risk may be assessed in quantitative or nonquantitative terms.

.11 The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor’s experience with and knowledge of the entity and its environment, including its internal control. As discussed in the following heading, “Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level,” certain entity related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

.12 In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity’s control environment and are not necessarily identifiable with specific relevant assertions at the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor’s consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

.13 In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole.

.14 The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. The auditor should seek to reduce audit risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk.

.15 At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk consists of (a) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (b) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as high, medium, or low risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor’s approach or methodology.

.16 Inherent risk is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks also influence inherent risk. For example, technological developments might make a particular product
obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.17 Control risk is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity’s internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity’s objectives relevant to preparation of the entity’s financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.18 Inherent risk and control risk are the entity’s risks, that is, they exist independently of the audit of financial statements. AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), and other AU sections describe the risk of material misstatement as the auditor’s combined assessment of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risk of material misstatement in different ways as long as they achieve the same result.

.19 The auditor should assess the risk of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

.20 Detection risk is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure; misapply an appropriate audit procedure; or misinterpret the audit results. These other factors might be addressed through adequate planning; proper assignment of personnel to the engagement team; the application of professional skepticism, supervision, and review of the audit work performed; and supervision and conduct of a firm’s audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk and substantive analytical procedures risk.

.21 Detection risk relates to the substantive audit procedures and is managed by the auditor’s response to risk of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risk of material misstatement at the relevant assertion level. The greater the risk of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risk of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

Materiality

.22 The auditor’s consideration of materiality is a matter of professional judgment and is influenced by the auditor’s perception of the needs of users of financial statements. Materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.
Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

.23 The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit. Determining a materiality level for the financial statements taken as a whole helps guide the auditor’s judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor’s report thereon.

.24 The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as the following:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in GAAP (for example, financial position, financial performance, and cash flows), or other specific requirements
- Whether there are financial statement items on which, for the particular entity, users’ attention tends to be focused (for example, for the purpose of evaluating financial performance)
- The nature of the entity and the industry in which it operates
- The size of the entity, nature of its ownership, and the way it is financed

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity’s earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

.25 When determining materiality, the auditor should consider prior periods’ financial results and financial positions, the period-to-date financial results and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity’s circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates.

.26 Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited.

Tolerable Misstatement

.27 The initial determination of materiality is made for the financial statement taken as a whole. However, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels could, in the aggregate, result in a material misstatement of the financial statements. To do so, the auditor should determine one or more levels of tolerable misstatement. Tolerable misstatement (or tolerable error) is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. Such levels of tolerable misstatement are normally lower than the materiality levels.

Qualitative Aspects of Materiality

.28 As indicated previously, judgments about materiality include both quantitative and qualitative information. As a result of the interaction of quantitative and qualitative considerations in materiality judgments,
misstatements of relatively small amounts that come to the auditor’s attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

.29 Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Paragraph .60 of AU section 312 provides qualitative factors that the auditor may consider relevant in determining whether misstatements are material.

Considerations as the Audit Progresses

.30 Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor’s judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings.

.31 If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures. The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.

.32 If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

Quantifying Materiality

.33 Although no authoritative body has established specific guidelines for materiality, there are certain rules of thumb that can be used in making a preliminary assessment of materiality.

.34 Generally, materiality guidelines are relative rather than absolute. In other words, materiality is usually set as a percentage rather than as an absolute amount. For example, an absolute amount such as $100,000 may be immaterial to a large, multinational corporation but very material to a small, closely held company. To apply percentage guidelines, auditors determine what base to use. Generally, auditors select a base that is relatively stable and predictable. Bases commonly used include income before taxes, revenues, and total assets. Generally, misstatements become material to income before they become material to the balance sheet. As a consequence, net income before taxes is often selected as the base.

.35 In small business audits, auditors sometimes make a number of significant audit adjustments. Thus, income before taxes may vary too much to be useful as a base. When income before taxes is not used as a base, auditors sometimes use either total revenue or an average of net income for several prior periods.

Example

.36 A common rule of thumb for materiality is 5 percent to 10 percent of pretax income (for profit-orientated entities). Some auditors apply this rule of thumb so that items less than 5 percent of normal pretax income are considered immaterial, whereas items that are more than 10 percent are material. For items between 5 percent to 10 percent, judgment is applied. For example, when unusual factors exist (perhaps the company is about to be sold for a multiple of audited earnings) auditors would tend to classify items between 5 percent and 10 percent as material. Others use 1 percent or 1.5 percent of the larger of total assets or revenues. (See exhibit 1 for a sample planning materiality worksheet.) Note that a percentage of pretax income may not be an appropriate benchmark for the determination of materiality when, for example, the entity’s earnings are
volatile, when the entity is a not-for-profit entity, or when the owner takes much of the pretax income out of the business in the form of remuneration.

Client Name
Planning Materiality Worksheet
Balance Sheet Date

1. Unaudited total assets at balance sheet date
2. Unaudited total revenues at balance sheet date
3. Select the larger of line 1 or line 2
4. Select a multiplier if audit risk is normal, or, if better than normal, select .01
5. Multiply line 3 by line 4
6. Unaudited pretax income (or equivalent if not a for-profit entity)
7. Select a multiplier if audit risk is normal, or, if better than normal, select .1
8. Multiply line 6 by line 7
9. Evaluate line 5 and line 8 along with other relevant factors and determine materiality for audit planning purposes

.37 Consideration of which base to use may include such factors as income variability and the nature of the client’s business and industry. For a not-for-profit organization, for example, the auditor would probably use total assets or revenues as a base because pretax income is not meaningful.

**SEC Staff Bulletin on Materiality for SEC Registrants**

.38 Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 99, *Materiality*, addresses the application of materiality thresholds to the preparation and audit of financial statements filed with the SEC. The SAB does not create new standards or definitions for materiality, but reaffirms the concepts of materiality as expressed in the accounting and auditing literature, as well as in long standing case law.

.39 SAB No. 99 states that registrants and the auditors of their financial statements cannot rely exclusively on quantitative benchmarks to determine whether an item is material to the financial statements. Equally important is a consideration of whether, in light of the surrounding circumstances, a reasonable investor would consider the item to be important. The SAB also states that management should not make intentional immaterial errors in a registrant’s financial statements to “manage” earnings. It further reminds registrants of their legal responsibility to make and keep books, records, and accounts that, in reasonable detail, accurately and fairly reflect transactions and the disposition of assets. The SAB reminds auditors of their obligations to inform management and, in some cases, audit committees of illegal acts that come to the auditor’s attention. The full text of the SAB can be viewed at the SEC Web site at www.sec.gov/interp/account/sab99.htm.
Communication of Misstatements to Management

.40 The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,2 and communicate them to the appropriate level of management. This communication should occur on a timely basis.

.41 When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements. The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement, other than those that the auditor believes are trivial.

.42 If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management’s reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity’s accounting practices and the implications for the auditor’s report.

Evaluating Audit Findings

.43 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with GAAP, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole.

.44 In aggregating misstatements, the auditor should include the effect on the current period’s financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.45 In evaluating the effects of misstatements, the auditor should include both qualitative and quantitative materiality considerations (see paragraphs .59–.60 of AU section 312). Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material.

Likely Misstatements

.46 The auditor’s best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined is referred to as likely misstatements.

.47 When the auditor tests an account balance or a class of transactions and related assertions by an analytical procedure, he or she might not specifically identify misstatements but would only obtain an indication of whether a misstatement might exist in the balance or class and possibly its approximate magnitude. If the analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor should request management to investigate and, if necessary, should expand his or her audit procedures to enable him or her to determine whether a misstatement exists in the account balance or class or transactions.

.48 When an auditor uses audit sampling to test an assertion for an account balance or a class of transactions, he or she projects the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. For example, if a $1,000 loan receivable misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $10,000.

---

2 Matters that are “trivial” are amounts designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.
projected misstatement, along with the results of other substantive procedures, contributes to the auditor’s assessment of likely misstatement in the account balance or class of transactions.

.49 When auditing accounting estimates (for example, allowance for inventory obsolescence, allowance for doubtful accounts, or warranty obligations) the audit evidence gathered may support an amount for an estimate different from the amount the client has recorded. That difference may be considered reasonable by the auditor inasmuch as no one accounting estimate can be considered accurate with certainty. In that case, the difference between the estimate that the audit evidence supports and the estimate recorded in the financial statements would not be considered a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

Known Misstatements

.50 Known misstatements are those for which the amount of the misstatements are specifically identified. Such misstatements are often supported by highly reliable evidence, such as third party documents. An example of a known misstatement would be a failure to record an invoice for repairs expense.

Misstatements From the Prior Year

.51 Often overlooked is the consideration of misstatements detected in the prior year that affect the current year. For example, assume last year’s aggregation of uncorrected misstatements included an item representing an overstatement of prepaid insurance and an understatement of insurance expense. This item would be included in the current year’s aggregation of uncorrected misstatements because it affects the current year’s insurance expense. Therefore, the prior year’s aggregation of uncorrected misstatements should be reviewed for any items that may have an effect on the current year’s financial statements.

Summarizing and Evaluating Misstatements

.52 Most firms prepare a summary of the uncorrected misstatements identified during the audit. This summary may be called the Summary of Misstatements, or the Summary of Possible Journal Entries, or other names. The summary presents known, likely, and prior period misstatements separately. The summary is used in evaluating the effect of uncorrected misstatements on the financial statements at the end of the audit.

.53 Some firms establish a predetermined dollar threshold below which misstatements need not be accumulated. This amount may be set so that any such misstatements, either individually, or when aggregated with other such misstatements, would not be material to the financial statements after the possibility of further undetected misstatements is considered.

.54 When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit.

.55 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor’s report.

.56 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.
In addition to the documentation requirements in AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), AU section 312 states the auditor should document the following:

a. The levels of materiality, as discussed in paragraph .27 of AU section 312, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.

b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.

c. The auditor’s conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.

d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management.

Uncorrected misstatements should be documented in a manner that allows the auditor to:

a. separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods.

b. consider the aggregate effect of misstatements on the financial statements.

c. consider the qualitative factors that are relevant to the auditor’s consideration whether misstatements are material (see paragraph .60 of AU section 312).

[The next page is 3291.]
AAM Section 3145

Fraud

General

.01 AU section 110, Responsibilities and Functions of the Independent Auditor (AICPA, Professional Standards, vol. 1), states that “The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.” Management is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud. That responsibility is described in paragraph .03 of AU section 110.

.02 An auditor’s responsibilities relating to fraud are stated within the context of materiality to the financial statements taken as a whole. An auditor is not responsible for detecting fraud per se, but for obtaining reasonable assurances that material misstatements due to fraud are detected. An auditor is not responsible for detecting immaterial misstatements caused by fraud. Paragraph .03 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), states that the requirements and guidance set forth in AU section 316 are intended to be integrated into the overall audit process in a logical manner that is consistent with the requirements and guidance provided in other AU sections, including AU section 311, Planning and Supervision; AU section 312, Audit Risk and Materiality in Conducting an Audit; AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement, and AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1). AU section 316 describes a process in which the auditor

- exercises professional skepticism,
- discusses the risks of material misstatements due to fraud with engagement personnel,
- gathers information needed to identify risks of material misstatement due to fraud,
- identifies risks that may result in a material misstatement due to fraud,
- assesses the identified risks after taking into account an evaluation of the entity’s programs and controls that address the risks,
- responds to the results of the assessment,
- evaluates audit evidence,
- communicates about fraud to management, those charged with governance, and others, and
- documents the auditor’s consideration of fraud.

.03 Even though some requirements and guidance set forth in AU section 316 are presented in a manner that suggests a sequential audit process, auditing, in fact, involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly, the sequence of the requirements and guidance in AU section 316 may be implemented differently among audit engagements.

Description and Characteristics of Fraud

.04 The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement in financial statements is intentional or unintentional. Paragraph .05 of AU section 316 defines fraud as an intentional act that results in a material misstatement in financial statements that are the subject of an audit.
Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act.

Misstatements Arising From Fraudulent Financial Reporting

Misstatements arising from fraudulent financial reporting are intentional misstatements or omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting may involve acts such as the following:

- Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
- Misrepresentation in, or intentional omission from, the financial statement of events, transactions, or other significant information
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Misstatements Arising From Misappropriation of Assets

Misstatements arising from misappropriation of assets involve the theft of an entity’s assets where the effect of the theft causes the financial statement not to be presented, in all material respects, in conformity with generally accepted accounting principles. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services not received. Misappropriation of assets may be accomplished by false or misleading records or documents, possibly created by circumventing controls, and may involve one or more individuals among management, employees, or third parties.

The Importance of Exercising Professional Skepticism

Because of the characteristics of fraud, the auditor’s exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence, and requires an ongoing assessment of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor’s belief about management’s honesty and integrity.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

Paragraph .14 of AU section 316 states that members of the audit team should discuss the potential for material misstatement due to fraud prior to or in conjunction with his or her information gathering procedures. The discussion should include the following:

- An exchange of ideas or brainstorming among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity’s financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud
As previously noted in AAM section 3120, the brainstorming session to discuss the entity’s susceptibility to material misstatements due to fraud could be held concurrently with the brainstorming session to discuss the potential of the risks of material misstatement that is required under AU section 314.

.10 Communication among the audit team members about the risks of material misstatement due to fraud should continue throughout the audit. See paragraphs .14–.18 of AU section 316 for further guidance.

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.11 In obtaining an understanding of the entity and its environment, including its internal control, information may come to the auditor’s attention that should be considered in identifying risks of material misstatements due to fraud. The auditor should perform procedures to obtain information that is used to identify the risks of material misstatement due to fraud, including the following:

- Making inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed
- Considering any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit
- Considering whether one or more fraud risk factors exist
- Considering other information that may be helpful in identifying risks of material misstatement due to fraud

See paragraphs .19–.34 of AU section 316 for further guidance.

.12 Although fraud usually is concealed and management’s intent is difficult to determine, the presence of certain risk factors or other conditions may suggest the possibility that fraud may exist. However, these conditions may be the result of circumstances other than fraud.

.13 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error. Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify fraud risk factors that do not necessarily indicate the existence of fraud, but often are present in circumstances where fraud exists. A fraud risk factor is an event or condition that indicates the following:

- An incentive or pressure to perpetrate fraud
- Opportunities to carry out the fraud
- Attitudes or rationalizations to justify a fraudulent action

Identifying Risks That May Result in a Material Misstatement Due to Fraud

.14 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives and pressures, opportunities, and attitudes and rationalizations. However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks.

---

1 Paragraph .102 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA Professional Standards, vol. 1), states that the auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. This requirement provides a link between the auditor’s consideration of fraud and the auditor’s assessment of risk and the auditor’s procedures in response to those assessed risks.
The identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including the following:

- The type of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The significance of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements
- The likelihood of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements
- The pervasiveness of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions

Material misstatements due to fraudulent financial reporting often result from an overstatement or understatement of revenues. Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. In addition, even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur and, accordingly, the auditor should address that risk (see paragraph .57 of AU section 316) apart from any conclusions regarding the existence of more specifically identifiable risks.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity’s Programs and Controls That Address the Risks

As part of the understanding of internal control sufficient to plan the audit required by AU section 314, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation and assess those risks taking into account that evaluation.

Responding to the Results of the Assessments

The auditor’s response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence and is influenced by the nature and significance of the risks identified as being present and the entity’s programs and controls that address these identified risks. The auditor’s response can be (1) an overall response on how the audit is conducted, (2) a response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed, or (3) a response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur.

The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action.

Overall Responses to the Risk of Material Misstatement

Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

Assignment of personnel and supervision. The knowledge, skill, and ability of personnel assigned significant engagement responsibility should be commensurate with the auditor’s assessment of the risk.

---

2 Paragraph .03 of AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1), states that to reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. See paragraphs .04 and .07 of AU section 318. This requirement provides a link between the auditor’s consideration of fraud and the auditor’s assessment of risk and the auditor’s procedures in response to those assessed risks.
risks of material misstatement due to fraud for the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud.

**Accounting principles.** The auditor should consider management’s selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.

**Predictability of auditing procedures.** The auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.

### Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.21 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending on the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity’s programs and controls. The auditor’s responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures. See paragraphs .52–.56 of AU section 316 for more guidance.

### Responses to Further Address the Risk of Management Override of Controls

.22 Management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. Accordingly, in addition to overall responses and responses that address specifically identified risks of material misstatement due to fraud, certain procedures should be performed to further address the risk of management override of controls, as discussed in paragraphs .58–.67 of AU section 316.

### Evaluating Audit Evidence

.23 The auditor’s assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. The auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatements due to fraud. The auditor also should evaluate whether analytical procedure that were performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.

.24 At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of audit procedures and other observations affect the assessment of the risk of material misstatement due to fraud made earlier in the audit. Such an evaluation may provide further insight into the risk of material misstatement due to fraud and whether there is a need for additional or different audit procedures to be performed.

.25 When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud. If the auditor has determined that misstatements are or may be the result of fraud, but the effect of the misstatements is not material, the auditor, nevertheless, should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. If the matter involves higher level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management. In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (a) the nature, timing, and extent of the tests
of balances or transactions and (b) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.26 If the auditor believes that the misstatement is, or may be, the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should

- attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred and, if so, its effect on the financial statements and the auditor’s report thereon;
- discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and those charged with governance;
- consider the implications for other aspects of the audit; and
- if appropriate, suggest that the client consult with legal counsel.

.27 The auditor’s consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to those charged with governance or others with equivalent authority and responsibility. Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (a) the implications about the integrity of management and (b) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not always possible to definitely describe when withdrawal is appropriate. The auditor may wish to consult with legal counsel when considering withdrawal from an engagement.

Communicating About Possible Fraud to Management, Those Charged With Governance, and Others

.28 Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to those charged with governance. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower level employees.

.29 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected) the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity’s internal control that should be communicated to management and those charged with governance. Also the auditor should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance.

.30 The auditor should recognize that in the following circumstances a duty to disclose outside the entity may exist

- to comply with certain legal and regulatory requirements.
- to a successor auditor when the successor makes inquiries in accordance with AU section 315, Communications Between Predecessor and Successor Auditors (AICPA, Professional Standards, vol. 1).
- in response to a subpoena.
to a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance.

Because potential conflicts with the auditor’s ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters of fraud or possible fraud with parties outside the client.

**Documenting the Auditor’s Consideration of Fraud**

.31 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity’s financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud
- Specific risks of material misstatement due to fraud that were identified and a description of the auditor’s response to those risks
- If the auditor has not identified, in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor’s conclusion
- The results of the procedures performed to further address the risk of management override of controls
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions

The nature of the communications about fraud made to management, those charged with governance, and others.

**Fraud Risk Factor Memory Jogger**

.32 An auditor may find this memory jogger helpful during planning and at other stages of the audit, when considering fraud risk factors and assessing the risk of material misstatement due to fraud. The following listing contains example risk factors for small, privately owned businesses. If used, this memory jogger should be tailored for the particular client being audited. Identified or possible risk factors should be added to the list. An auditor may also decide to remove the example factors from the list based on the circumstances. In any event, be sure to consider fraud risk factors that relate to fraudulent financial reporting and misappropriation of assets in every related category presented. An auditor should feel free to use this practice aid as he or she sees fit (for example, adding attachments, redesigning the form of the memory jogger). Finally, note that AU section 316 does not require an auditor to use a memory jogger or checklist of fraud risk factors.

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1) High degree of competition or market saturation, accompanied by declining margins</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2) New accounting, statutory, or regulatory requirements</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(3) Significant declines in customer demand and increasing business failures in either the industry or the economy in which the entity operates</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(4) High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(5) Operating losses making the threat of bankruptcy or foreclosure, imminent</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(6) Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(7) Rapid growth or unusual profitability especially compared to that of other companies in the same industry</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1) Need to obtain additional debt or equity financing to stay competitive, including financing of major research and development or capital expenditures</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2) Marginal ability to meet debt repayment or other debt covenant requirements</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. Management’s personal net wealth is threatened by the entity’s financial performance arising from the following:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1) Heavy concentrations of their personal net worth in the entity.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>

</table>

| d. | There is excessive pressure on management or operating personnel to meet financial targets set by the owner, including sales or profitability incentive goals. |

### B. Opportunities

**a.** The nature of the industry or the entity’s operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

1. Significant related party transactions not in the ordinary course of business or with related entities not audited or audited by another firm

2. Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate

3. Significant, unusual, or highly complex transactions, especially those close to year-end that pose difficult “substance over form” questions

**b.** There is a complex or unstable organizational structure as evidenced by the following:

1. Difficulty in determining the organization or individuals that have controlling interest in the entity

2. Overly complex organizational structure involving unusual legal entities or managerial lines of authority

3. High turnover of senior management or counsel

**c.** Internal control components are deficient as a result of the following:

1. Inadequate monitoring of controls, including automated controls

2. High turnover rates or employment of ineffective accounting staff.

3. Ineffective accounting and information systems including situations involving reportable conditions

### C. Attitudes and Rationalizations

(continued)

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>a. Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor’s report</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or those charged with governance</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>d. Dominering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor’s work or the selection or continuance of audit personnel assigned to the engagement</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Part 2—Misappropriation of Assets

<td>Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b.</td>
<td>Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1)</td>
<td>Known or anticipated future layoffs</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>Promotions, compensation, or other rewards inconsistent with expectations</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>B. Opportunities</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>a.</td>
<td>Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1)</td>
<td>Large amounts of cash on hand or processed</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>Company issued credit cards</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>Inventory items that are small in size, of high value, or in high demand</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(4)</td>
<td>Easily convertible assets</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(5)</td>
<td>Fixed assets, that, are small in size, marketable, or lacking observable identification of ownership</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b.</td>
<td>Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1)</td>
<td>Inadequate segregation of duties or independent checks. Inadequate segregation of duties is quite often understandable in a small business environment in that it’s a function of the entity’s size. However, you may consider it in conjunction with other risk factors and with mitigating controls.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>Inadequate management oversight of employees responsible for assets</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>Inadequate job applicant screening of employees with access to assets</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

</tr>
<tr>
<td>(8)</td>
<td>Lack of mandatory vacations for employees performing key control functions.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(9)</td>
<td>Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>Inadequate access controls over automated records.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### C. Attitudes and Rationalizations

1. Disregard for the need for monitoring or reducing risks related to misappropriations of assets
2. Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
3. Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee
4. Changes in behavior or lifestyle that may indicate assets have been misappropriated

AAM Section 3150

Illegal Acts

General Comments

.01 The term illegal acts refers to violations of laws or governmental regulations. Illegal acts by clients do not include personal misconduct by the entity’s personnel unrelated to their business activities.

.02 Whether an act is illegal is a determination that is normally beyond the auditor’s professional competence. The auditor’s training and experience may provide a basis for recognition that some client acts coming to his or her attention may be illegal.

Direct and Material Effect Illegal Acts

.03 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

.04 The auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statement assertions rather than from the perspective of legality per se.

.05 The auditor’s responsibility to detect and report misstatement resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for errors or fraud as described in AU section 110, Responsibilities and Functions of the Independent Auditor (AICPA, Professional Standards, vol. 1). That is, the auditor should design the audit to provide reasonable assurance that financial statement amounts are free from material misstatement resulting from these direct-effect illegal acts.

Other Illegal Acts

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity’s operating aspects than to its financial and accounting aspects and their financial statement effect is indirect.

.07 An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. Normally, an audit conducted in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts having an indirect effect on financial statements.

Engagement Planning Procedures

.08 The auditor should assess the risks that the entity has not complied with laws and regulations that have a direct and material effect on the determination of financial statement amounts (except disclosure of contingencies) in the planning phase of the audit.
Matters that may influence the auditor’s assessment include the following:

a. Management’s understanding of the requirements of laws and regulations pertinent to audit objectives
b. The nature and extent of noncompliance noted in prior audits
c. Changes in requirements since the last audit
d. Internal control components designed to give management reasonable assurance that the entity complies with those laws and regulations
e. The client’s policy relative to the prevention of illegal acts

Normally, there is no need to include audit procedures specifically designed to detect illegal acts. However, if the auditor becomes aware of information that raises suspicions, he or she is obligated to apply additional procedures to determine whether an illegal act has, in fact, occurred (see paragraphs .07–.11 of AU section 317, Illegal Acts by Clients [AICPA, Professional Standards, vol. 1]).

[The next page is 3331.]
AAM Section 3155

Analytical Procedures

General Comments

.01 Analytical procedures are a natural extension of the auditor’s understanding of the client’s business and add to his or her understanding because the key factors that influence the client’s business may be expected to affect the client’s financial information. Analytical procedures are used in all three stages of the audit. In the planning stage, the purpose of analytical procedures is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. In the substantive testing stage of the audit, the purpose of analytical procedures is to obtain evidence, sometimes in combination with other substantive procedures, to identify misstatements in account balances and, thus, to reduce the risk that misstatements will remain undetected. The auditor’s reliance on substantive tests to achieve an audit objective related to a particular assertion may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor’s judgment about the expected effectiveness and efficiency of the available procedures. In the overall review stage, the objective of analytical procedures is to assist the auditor in assessing the conclusions reached and in evaluating the overall financial statement presentation. In all cases, the effectiveness of analytical procedures lies in developing expectations that can reasonably be expected to identify unexpected relationships.

.02 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor. Analytical procedures should be applied, to some extent, for the purposes referred to in the planning stage and the overall review stage above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

Analytical Procedures

.03 Analytical procedures are defined in paragraph .02 of AU section 329, Analytical Procedures (AICPA, Professional Standards, vol. 1), as “evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. ... A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of conditions to the contrary.” The definition implies several key concepts:

- The “evaluations of financial information” suggests that analytical procedures will be used to understand or test financial statement relationships or balances.
- The “study of plausible relationships” implies an understanding of what can reasonably be expected and involves a comparison of the recorded book values with an auditor’s expectations.
- “Relationships among both financial and nonfinancial data” suggests that both types of data can be useful in understanding the relationships of the financial information and, therefore, in forming an expectation.

1 In accordance with paragraph .06 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), analytical procedures are also performed as risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control. Refer to AU section 314 for further guidance.
.04 Also, in accordance with paragraph .09 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

.05 Analytical procedures performed during the overall review stage are designed to assist the auditor in assessing that (a) all significant fluctuations and other unusual items have been adequately explained and (b) the overall financial statement presentation makes sense based on the audit results and the auditor’s knowledge of the business.

.06 During the substantive testing stage, analytical procedures may be used to obtain assurance that material misstatements are not likely to exist in financial statement account balances. If analytical procedures are used for substantive testing, the auditor should focus his or her analytical procedures on particular assertions about account balances and should give detailed attention to the underlying factors that affect those account balances through the development of an expectation independent of the recorded balance. Therefore, substantive analytical procedures generally are performed with more rigor and precision than those used for planning or overall review.

.07 AU section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*, vol. 1), establishes requirements and provides guidance on the use of analytical procedures as substantive procedures. In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity’s preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph .14 of AU section 318.

.08 In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced
primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases.

Analytical Procedure Process: Four Phases

.09 The use of analytical procedures can be considered a process that consists of four phases. The first phase is the expectation-formation process. In this phase, the auditor forms an expectation of an account balance or financial relationship. In doing so, the auditor determines the precision of the expectation and, thus, in part, the effectiveness of the analytical procedure.

.10 The remaining three phases consist of the identification, investigation, and evaluation of the difference between the auditor’s expected value and the recorded book value in light of the auditor’s materiality assessment. In the second phase, identification, the auditor identifies whether an unusual fluctuation exists between the expected and recorded amounts. In the third, investigation, the auditor investigates the cause of unexpected differences by considering possible causes and searching for information to identify the most probable causes. Finally, in the evaluation phase, the auditor evaluates the likelihood of material misstatement and determines the nature and extent of any additional auditing procedures that may be required.

Expectation Formation (Phase I)

.11 Forming an expectation is the most important phase of the analytical procedure process. The more precise the expectation (that is, the closer the auditor’s expectation is to the correct balance or relationship), the more effective the procedure will be at identifying potential misstatements. Also, AU section 329 states that the expectation should be precise enough to provide the desired level of assurance that differences that may be potential misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate.

.12 The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor’s understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes
- b. Anticipated results, for example, budgets or forecasts including extrapolations from interim or annual data
- c. Relationships among elements of financial information within the period
- d. Information regarding the industry in which the client operates, for example, gross margin information
- e. Relationships of financial information with relevant nonfinancial information

.13 The effectiveness of an analytical procedure is a function of three factors related to the precision with which the expectation is developed: (a) the nature of the account or assertion, (b) the reliability and other characteristics of the data, and (c) the inherent precision of the expectation method used.

Identification and Investigation (Phases II and III)

.14 The next two phases of the analytical procedure process consist of identification and investigation. Identification begins by comparing the auditor’s expected value with the recorded amount. Given that the auditor developed an expectation with a particular amount of difference that could be accepted without further explanation, he or she then compares the unexpected differences with the threshold. In substantive testing, an auditor testing for the possible misstatement of the book value of an account determines whether
the audit difference was less than the auditor’s threshold. If the difference is less than the acceptable threshold, taking into consideration the desired level of assurance from the procedure, the auditor accepts the book value without further investigation. If the difference is greater, the next step is to investigate the difference.

.15 In investigation, the auditor should evaluate possible explanations for the difference. The greater the precision of the expectation (that is, the closer the expectation is to the correct amount) the greater the likelihood that the difference between the expected and recorded amounts is due to misstatement rather than nonmisstatement causes. The difference between an auditor’s expectation and the recorded book value of an account (value of an account not subject to auditing procedures) can be due to any or all of the following three causes: (a) the difference is due to misstatements, (b) the difference is due to inherent factors that affect the account being audited (for example, the predictability of the account or account subjectivity), and (c) the difference is due to factors related to the reliability of data used to develop the expectation (for example, data that have been subject to auditing procedures versus data that have not been subject to auditing procedures). The greater the precision of the expectation, the more likely the difference between the auditor’s expectation and the recorded value will be due to misstatements (cause [a]). Conversely, the less precise the expectation, the more likely the difference is due to factors related to the precision of the expectation (causes [b] and [c]).

Evaluation (Phase IV)

.16 The final phase of the analytical procedure process consists of evaluating the difference between the auditor’s expected value and the recorded amount. It is usually not practicable to identify factors that explain the exact amount of a difference identified for investigation. However, the auditor should attempt to quantify that portion of the difference for which plausible explanations can be obtained and, where appropriate, corroborated and determine that the amount that cannot be explained is sufficiently small to enable him or her to conclude on the absence of material misstatement.

.17 If a reasonable explanation can not be obtained, in accordance with paragraph .50 of AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence and determine the effect of such misstatements on the financial statements taken as a whole. Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.” In this case, the auditor should aggregate the misstatement, depending on materiality considerations, with other misstatements the entity has not corrected in the manner discussed in AU section 312.

Engagement Planning Procedures

.18 As stated previously, the purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (a) enhancing the auditor’s understanding of the clients’ business and the transactions and events that have occurred since the last audit date, and (b) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications.

.19 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent, and timing of the procedures, which are based on the auditor’s judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor’s preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the
analytical procedures, combined with the auditor’s knowledge of the business, serve as a basis for additional inquiries and effective planning.

20 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant, nonfinancial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

Audit Documentation Requirements

21 Paragraph .22 of AU section 329 states that when an analytical procedure is used as the principal substantive test of a significant financial statement assertion the auditor should document all of the following:

- The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- Results of the comparison of the expectation to the recorded amounts or ratios developed from the recorded amounts
- Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

Analytical Procedures Audit Guide

22 For additional guidance, practitioners may refer to the AICPA Audit Guide Analytical Procedures. The guide provides practical guidance for auditors on the effective use of analytical procedures. Specifically, the audit guide includes a discussion of AU section 329; concepts and definitions; a series of questions and answers, grouped in the following five categories: precision of the expectation, relationship of analytical procedures to the audit risk model, evaluation and investigation, purpose of analytical procedures, and fraud; and a case study illustrating the four types of expectation methods discussed in chapter 1 of the guide: trend analysis, ratio analysis, reasonableness testing, and regression analysis.

23 The audit guide also includes illustrations that demonstrate the importance of forming expectations and considering the precision of the expectation, two of the most misunderstood concepts from AU section 329. The concepts discussed are applicable for all three stages of the audit (planning, substantive testing, and review). However, the audit guide focuses principally on how the concepts are applied to substantive testing because in designing substantive procedures, auditors ordinarily desire a specified level of audit assurance. To obtain the audit guide, call the AICPA order department at (888) 777-7077 and ask for product no. 012558.

Sample Engagement Letters

.01 Following are illustrative engagement letters. These illustrative letters are examples and may not include all representations necessary for a particular engagement. They may be used as a starting point in the design of specific letters and then tailored to satisfy the terms of a particular engagement. These illustrative engagement letters are intended to be used in connection with engagements of nonpublic entities and are not intended to be used in connection with audits of public entities that are required to be audited under standards set by the Public Company Accounting Oversight Board.

.02 Audit Engagement Leading to Opinion

LACKO, LYNCH, BROWN & COMPANY
Certified Public Accountants

[Date]
Mr. Matt Decker, President
Civil War Antiques, Inc.
111 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Decker:

This will confirm our understanding of the services we will provide to Civil War Antiques, Inc. (the Company) for the year ending December 31, 20XX.

We will audit the balance sheet of Civil War Antiques, Inc. as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended, for the purpose of expressing an opinion on them.

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come
to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.¹

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected customers, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a “representation letter”) from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the entity and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Company’s management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with generally accepted accounting principles; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Company’s management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Company’s management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting the Company involving management, employees who have significant roles in internal control, and others where the fraud or illegal acts could have a material effect on the financial statements. Management’s responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or illegal acts affecting the Company received in communications from employees, former employees, regulators, or others. In

¹ Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94, “Indemnification Clause in Engagement Letters,” under AICPA Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 191 par. 188–189) states that the following indemnification clause in an engagement letter would not impair a CPA’s independence: “The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management.” Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.
addition, the Company’s management is responsible for identifying and ensuring that the Corporation complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report.

Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement for the year ending December 31, 20XX, we will review the federal and state income tax returns for Civil War Antiques, Inc. Further, we will be available during the year to consult with you on the tax effects of any proposed transactions or contemplated changes in business policies.

Professional standards require us to be independent with respect to the Company in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual’s base compensation at the Company, [xx] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.2

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (a) the initial selection of and changes in significant accounting policies and their application; (b) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (c) significant difficulties that we encountered in dealing with management related to the performance of the audit; (d) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (e) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (f) management representations; (g) our views about matters that were the subject of management’s consultation with other accountants about auditing and accounting matters; (h) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions

2 Ethics Ruling No. 112, “Use of a Third-Party Service Provider to Assist a Member in Providing Professional Services,” under Rule 102, Integrity and Objectivity (AICPA, Professional Standards, vol. 2, ET sec. 191 par. 224–225), requires that clients be informed if the firm will outsource professional services to third party service providers. If an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.

AICPA Audit and Accounting Manual

AAM §3165.02
indicating there could be a substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers’ proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out of pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to ______________________ [name of regulator] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to ______________________ [name of regulator]. The ______________________ [name of regulator] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

.03 Change in Circumstances From Those Contemplated in Original Engagement Letter

MACARTHUR & KENNEY, CPA’S

[Date]
Mr. James Melakon, Treasurer
Nimbus Country Club
64 Vasily Road
Velikiye Luki, Ohio 10000

Dear Mr. Melakon:

As we agreed in our original engagement letter dated [date] we are notifying you that our audit of your December 31, 20XX financial statements requires additional procedures.

We have found that certain guest checks are held for only three months after they are paid. Thus, a substantial number of guest checks are not available for examination. Fortunately, your internal control activities allow us to use alternative procedures to satisfy ourselves on this part of the audit. However, this will require substantially more time than examining guest checks.

The fee for these additional services will be billed at our standard per diem rates and added to the fees quoted in our previous letter.

The situation has been discussed with your controller, who assured us that in the future all guest checks will be kept for two years.

If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Very truly yours,

MACARTHUR & KENNEY, CPA’S

.04 Conditions Encountered That Do Not Permit Expression of Opinion as Anticipated in Original Engagement Letter

GEROW, COLLINS & PATCH

[Date]
Mrs. Helene Daestrom, President
Cohrane Manufacturing, Inc.
1234 West Street
Cedar Hill, Tennessee 10000

Dear Mrs. Daestrom:

Our March 15, 20XX letter described our present engagement as an audit for the purpose of expressing an opinion on the financial statements based on our audit. This letter is to inform you that because of the circumstances described below, we will be required to qualify our opinion on these statements.

As you know, the Internal Revenue Service has proposed total income tax assessments of approximately $XXX,XXX for the three fiscal years ended December 31, 20XX. Your tax counsel has advised us that although you have a defensible position and will protest the assessments, counsel cannot offer an opinion as to your ultimate liability. No provision for this assessment or any portion of it is included in your December 31, 20XX financial statements, nor do you feel any is necessary.

Due to an inability to obtain sufficient appropriate audit evidence to support your assertions regarding the tax assessment situation described above, we will be unable to express an unqualified opinion. Our report will state the reasons for the qualification of our opinion.

You and your tax counsel have advised that you will inform us of any new developments in the proposed assessment before our report is issued so that we may consider their effect on your financial statements and on our report.

Sincerely,

GEROW, COLLINS & PATCH

[Engagement Partner’s Signature]

Note:

The client is not asked to sign this letter. Its purpose is to inform the client of the altered circumstances and the effect on the opinion. There is no change in the terms of the engagement. However, it might be desirable to have the client acknowledge receipt of this letter by signing a copy and returning it where—for example—it is a problem, or when there has been a history of misunderstandings.
.05 Audit of Not-for-Profit Financial Statements

LACKO, LYNCH, BROWN & COMPANY
Certified Public Accountants

[Date]
Mr. Matt Smith, President
Not-for-Profit Organization
222 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Smith:

This will confirm our understanding of the services we will provide to Not-for-Profit Organization (the Organization) for the year ending December 31, 20XX.

We will audit the balance sheet of Not-for-Profit Organization as of December 31, 20XX, and the related statements of activities and cash flows for the year then ended, for the purpose of expressing an opinion on them.

Audit Objective

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

Audit Procedures

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a “representation letter”) from you about the financial statements and related matters.

3 Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule 101 (AICPA, Professional Standards, vol. 2, ET sec. 191 par. 188–189) states that the following indemnification clause in an engagement letter would not impair a CPA’s independence: “The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management.” Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.
Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements, or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the organization and obligations related to the accountability of the organization, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

An audit includes obtaining an understanding of the Organization and its environment, including its internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards.

Management Responsibilities

The Organization’s management is responsible for the basic financial statements and all accompanying information as well as all assertions contained therein. Encompassed in that responsibility are the establishment and maintenance of effective internal control over financial reporting; the establishment and maintenance of proper accounting records; the selection of appropriate accounting principles; the safeguarding of assets; fair presentation of the financial statements with generally accepted accounting principles; and compliance with relevant laws and regulations. Management is also responsible for making all financial records and related information available to us and for the accuracy and completeness of that information.

The Organization’s management is responsible for adjusting the financial statements to correct material misstatements and for affirming to us in the representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

The Organization’s management is responsible for the design and implementation of programs and controls to prevent and detect fraud and for informing us about all known or suspected fraud affecting the Organization involving management, employees who have significant roles in internal control, and others where the fraud could have a material effect on the financial statements. Management’s responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the Organization received in communications from employees, former employees, regulators, or others. In addition, the Organization’s management is responsible for identifying and ensuring that the Organization complies with applicable laws and regulations and for taking timely and appropriate steps to remedy any fraud, illegal acts, or violations of contracts or grant agreements, or abuse that we may report. Management is responsible for making all management decisions and performing all management functions, for designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other nonattest services we provide, and for evaluating the adequacy and results of those services and accepting responsibility for them.

Other Engagement Matters and Limitations

As part of our engagement, we will prepare the Federal Form 990 and [identify other returns] for the year ended [date]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.
Our work in connection with the preparation of the Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the Organization in the performance of our services. Any discussions that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual’s base compensation at the Organization, [XX] days from the first day of employment.

Audit Administration, Fees, and Other

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.

Auditing standards generally accepted in the United States of America require that we communicate certain additional matters related to the conduct of our audit to those charged with governance. Such matters include (1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an overview of the planned scope and timing of the audit; (3) significant findings from the audit, including, among others: (a) the initial selection of and changes in significant accounting policies and their application; (b) the process used by management in formulating particularly sensitive accounting estimates and the basis for our conclusions regarding the reasonableness of those estimates; (c) significant difficulties that we encountered in dealing with management related to the performance of the audit; (d) audit adjustments that could, in our judgment, either individually or in the aggregate, have a significant effect on your financial reporting process and uncorrected misstatements of the financial statements that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (e) any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the financial statements or our report; (f) management representations; (g) our views about matters that were the subject of management’s consultation with other accountants about auditing and accounting matters; (h) major issues that were discussed with management in connection with the retention of our services, including, among other matters, any discussions regarding the application of accounting principles and auditing standards, and if applicable, events or conditions indicating there could be a substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time; and (4) other matters as considered necessary or required to be communicated under professional standards.

Assistance to be supplied by your personnel, including the preparation of schedules and analyses of accounts, is described in a separate attachment. Timely completion of this work will facilitate the completion of our audit.

---

4 Ethics Ruling No. 112 under Rule 102 (AICPA, Professional Standards, vol. 2, ET sec. 191 par. 224–225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.
If you intend to publish or otherwise reproduce the financial statements and make reference to our firm, you agree to provide us with printers’ proofs or masters for our review and approval before printing. You also agree to provide us with a copy of the final reproduced material for our approval before it is distributed.

Our fees will be billed as work progresses and are based on the amount of time required plus out-of-pocket costs and administrative expenses. Invoices are payable upon presentation. Our initial fee estimate assumes we will receive the aforementioned assistance from your personnel and unexpected circumstances will not be encountered. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of total fees, which we estimate to range from $XX,XXX to $XX,XXX. Additional expenses are expected to be $X,XXX.

The audit documentation for this engagement is the property of Lacko, Lynch, Brown & Company and constitutes confidential information. However, we may be requested to make certain audit documentation available to [name of regulator] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of Lacko, Lynch, Brown & Company personnel. Furthermore, upon request, we may provide photocopies of selected audit documentation to [name of regulator]. The [name of regulator] may intend, or decide, to distribute the photocopies or information contained therein to others, including governmental agencies.

We appreciate the opportunity to serve you and trust that our association will be a long and pleasant one. If you have any questions, please contact us. If this letter correctly expresses your understanding, please sign the enclosed copy where indicated and return it to us.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

[Date]
.06 Audit of Not-for-Profit Financial Statements Subject to the Provisions of OMB Circular A-133

LACKO, LYNCH, BROWN & COMPANY
Certified Public Accountants

[Date]
Mr. Matt Cox, President
Not-for-Profit Organization
333 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Cox:

This will confirm our understanding of the services we will provide to Not-for-Profit Organization (the Organization) for the year ending December 31, 20XX.5

We will audit the balance sheet of Not-for-Profit Organization as of December 31, 20XX, and the related statements of activities, changes in partners’ capital, and cash flows for the year then ended, for the purpose of expressing an opinion on them. We also will report on the following additional information accompanying the basic financial statements: (1) schedule of expenditures of federal awards and (2) [insert additional information here].

Audit Objectives

The objective of our audit is the expression of an opinion as to whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America and to report on the additional information referenced in the second paragraph of this letter when considered in relation to the financial statements taken as a whole.

Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America; the standards for financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; the Single Audit Act Amendments of 1996; and the requirements of OMB Circular A-133, and will include tests of accounting records and other procedures we consider necessary to enable us to express such an opinion and to render the required reports. If circumstances preclude us from issuing an unqualified opinion, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or decline to issue a report as a result of the engagement.

We will also provide a report (that does not include an opinion) on internal control related to the financial statements and compliance with the provisions of applicable laws, regulations, contracts, agreements, and grants, noncompliance with which could have a material effect on the financial statements as required by Government Auditing Standards. The report on internal control and compliance will include a statement that the report is intended solely for the information and use of management, [insert audit committee, if applicable], the board of directors, and specific legislative or regulatory bodies, federal awarding agencies, and if applicable, pass through entities and is not intended to be and should not be used by anyone other than these specified parties. If, during our audit, we become aware that the Company is subject to an audit requirement that is not encompassed in the terms of this engagement, we will communicate to management and those charged with governance that an audit is accordance with auditing standards generally accepted in the United States of America and the standards for financial audits contained in Government Auditing Standards may not satisfy the relevant legal, regulatory, or contractual requirements.

Audit Procedures

5 Note to users of this sample engagement letter: You may add to the engagement letter as appropriate, for additional considerations, such as performing procedures relating to a compliance audit of or limited scope audits of subrecipients, the involvement of other auditors (for example, a joint audit with a minority firm), or the auditee’s responsibility for obtaining the cooperation of the predecessor auditor.
An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Accordingly, the areas and number of transactions selected for testing will involve judgment. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from errors or fraud. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. We will inform you of all matters of fraud that come to our attention. We will also inform you of illegal acts that come to our attention, unless they are clearly inconsequential.6

Our procedures will include tests of transactions recorded in the accounts, tests of the physical existence of inventory, and direct confirmation of receivables and certain other assets and liabilities by correspondence with selected individuals, funding sources, creditors, legal counsel, and financial institutions. At the conclusion of our audit, we will request certain written representations (a “representation letter”) from you about the financial statements and related matters.

Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements or noncompliance may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you and those charged with governance, defined as the person(s) with responsibility for overseeing the strategic direction of the organization and obligations related to the accountability of the organization, including oversight of the financial reporting process, of any material errors and any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you and those charged with governance of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to matters that might arise during any later periods for which we are not engaged as auditors.

As part of our audit of the basic financial statements, we will obtain an understanding of the Organization and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of our auditing procedures for the purpose of expressing our opinion on the financial statements. Our audit is not designed to provide an opinion on the [abbreviated name]’s internal control over financial reporting or to identify deficiencies in the design or operation of internal control over financial reporting. However, we are responsible for communicating to you and those charged with governance internal control related matters that are required to be communicated under Statements on Auditing Standards, Government Auditing Standards, and the requirements of OMB Circular A-133.

We also will perform tests of the Organization’s compliance with certain provisions of laws, regulations, and the provisions of contracts or grant agreements. However, it is not our objective to provide an opinion on overall compliance with those provisions and, accordingly, we will not express such an opinion.

In planning the audit, we will follow up on known significant findings and recommendations from previous financial audits, attestation engagements, performance audits, or other studies that directly relate to the objectives of the current audit to determine the effect on our risk assessment and audit procedures.

As part of our audit, we will be alert to situations or transactions that could be indicative of abuse, which involves behavior that is deficient or improper when compared with behavior that a prudent person would consider reasonable and necessary business practice given the facts and circumstances. The determination of

---

6 Some practitioners prefer to include in an engagement letter a clause that would indemnify them against knowing management misrepresentations in jurisdictions where such clauses are permitted. Ethics Ruling No. 94 under AICPA Rule 101 (AICPA, Professional Standards, vol. 2, ET sec. 191 par. 188–189) states that the following indemnification clause in an engagement letter would not impair a CPA’s independence: “The client agrees to release, indemnify, and holds me (us) (and my (our) partners and our heirs, executors, personal representatives, successors, and assigns) harmless from any liability and costs resulting from knowing misrepresentations by management.” Auditors of publicly held companies also should consider the applicable Securities and Exchange Commission rules on independence before including an indemnification clause in an engagement letter. Note that the AICPA Professional Ethics Executive Committee is currently addressing the issue of indemnification clauses. Changes to independence rules regarding auditor indemnification and related issues are still pending. Practitioners should be alert to any final guidance.
abuse is subjective; Government Auditing Standards does not expect us to provide reasonable assurance of
detecting abuse, and we will not design the audit to detect abuse. However, if we become aware of indications
of material abuse, we will apply procedures to ascertain whether abuse has occurred.

A schedule of expenditures of federal awards will accompany the Organization’s basic financial statements.
We will subject that schedule to the audit procedures applied in our audit of the basic financial statements
and render our opinion on whether that schedule is fairly presented, in all material respects, in relation to the
basic financial statements taken as a whole. We also will make specific inquiries of management about that
schedule, which management will affirm to us in its representation letter.

Management Responsibilities

The Organization’s management is responsible for the basic financial statements and the schedule of
expenditures of federal awards as well as all assertions contained therein. Encompassed in that responsibility
are the establishment and maintenance of effective internal control over financial reporting; the establishment
and maintenance of proper accounting records; the selection of appropriate accounting principles; the
safeguarding of assets; and the identification of and compliance with laws, regulations, and the provisions of
contracts or grant agreements. Management is responsible for making all financial records and related
information available to us and for the accuracy and completeness of that information. Management also is
responsible for adjusting the basic financial statements to correct material misstatements and for affirming to
us in its representation letter that the effects of any uncorrected misstatements that we accumulate during the
current audit and pertaining to the latest period presented are immaterial, both individually and in the
aggregate, to the basic financial statements.

The Organization’s management is responsible for the design and implementation of programs and controls
to prevent and detect fraud and for informing us about all known or suspected fraud or illegal acts affecting
the Organization involving management, employees who have significant roles in internal control, and others
where the fraud or illegal acts could have a material effect on the financial statements. Management’s
responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud or
illegal acts affecting the Organization received in communications from employees, former employees,
regulators, or others.

You are responsible for making all management decisions and performing all management functions, for
designating an individual with suitable skill knowledge, or experience to oversee the tax services or any other
nonattest services we provide, and for evaluating the adequacy and results of those services and accepting
responsibility for them.

Compliance Audit of Federal Programs

The Organization’s management is responsible for compliance with laws, regulations, and the provisions of
contracts or grant agreements related to federal programs. Encompassed in that responsibility is the estab-
lishment and maintenance of internal control over compliance that provides reasonable assurance that the
Organization is managing federal awards in compliance with laws, regulations, and provisions of contracts
or grant agreements.

Our responsibility is to express an opinion on whether the Organization complied with the types of
compliance requirements described in the OMB Circular A-133 Compliance Supplement that could have a direct
and material effect on each of the Organization’s major federal programs. Following the criteria for federal
program risk in OMB Circular A-133, we will determine which federal programs should be considered major
programs and thus included within the scope of the compliance audit.7

We will plan and perform the audit to obtain reasonable assurance about whether noncompliance with the
types of compliance requirements that are applicable to the Organization’s major federal programs could have
a direct and material effect on each of its major federal programs. An audit of compliance includes examining,
on a test basis, evidence about the Organization’s compliance with those requirements and performing such

7 Note to users of this sample engagement letter: This paragraph may be modified if the auditor elects to use a dollar threshold approach
to selecting major programs, as allowed by A-133 for first-year single audits.

AICPA Audit and Accounting Manual

AAM §3165.06
other procedures we consider necessary in the circumstances. Our audit does not provide a legal determi-
nation on the Organization’s compliance with those requirements.

As part of our audit of compliance applicable to the Organization’s major federal programs, we will obtain
an understanding of the Organization’s internal control over compliance sufficient to assess the risks of
material misstatement of the financial statements whether due to error or fraud and to design the nature,
timing, and extent of our auditing procedures for the purpose of expressing our opinion on compliance and
not to provide assurance on the internal control over compliance. We also will perform testing of internal
control as required by OMB Circular A-133. We are responsible for communicating to you and those charged
with governance internal control related matters that are required to be communicated under AICPA
professional standards, Government Auditing Standards, and the requirements of OMB Circular A-133.

We also will follow up on prior audit findings by performing procedures to assess the reasonableness of the
Organization’s summary schedule of prior audit findings.

We will include in our reports information about the following, if any: material noncompliance with laws,
regulations, and provisions of contracts or grant agreements related to major programs; certain known
questioned costs; fraud affecting federal awards; abuse that is material to a federal program; and other federal
award audit findings as required by Government Auditing Standards and OMB Circular A-133.

Other Communications Arising From the Audit

In connection with planning and performing our audit, we will communicate certain matters to appropriate
Organization’s personnel and to those charged with governance, including our responsibilities for testing and
reporting on internal control over financial reporting and on compliance with laws, regulations, and
provisions of contracts or grant agreements, both for our financial statement audit and our compliance audit
of major federal programs. We also will communicate certain matters of interest, as applicable, to the audit
committee, including changes in significant accounting policies or their application, adjustments arising from
the audit that could either individually or in the aggregate have a significant effect on the Organization’s
financial reporting process, and fraud involving senior management that is not otherwise included in our
reports.

Auditing standards generally accepted in the United States of America require that we communicate certain
additional matters related to the conduct of our audit to those charged with governance. Such matters include
(1) our responsibilities under auditing standards generally accepted in the United States of America; (2) an
overview of the planned scope and timing of the audit; (3) significant audit findings, including, among others:
(a) the initial selection of and changes in significant accounting policies and their application; (b) the process
used by management in formulating particularly sensitive accounting estimates and the basis for our
conclusions regarding the reasonableness of those estimates; (c) serious difficulties that we encountered in
dealing with management related to the performance of the audit; (d) audit adjustments that could, in our
judgment, either individually or in the aggregate, have a significant effect on your financial reporting process
and uncorrected misstatements of the financial statements that were determined by management to be
immaterial, both individually and in the aggregate, to the financial statements taken as a whole; (e) any
disagreements with management, whether or not satisfactorily resolved, about matters that individually or
in the aggregate could be significant to the financial statements or our report; (f) management representa-
tions; (g) our views about matters that were the subject of management’s consultation with other accountants about
auditing and accounting matters; (h) major issues that were discussed with management in connection with
the retention of our services, including, among other matters, any discussions regarding the application of
accounting principles and auditing standards, and if applicable, events or conditions indicating there could
be a substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time;
and (4) other matters as considered necessary or required to be communicated under professional standards.

In planning and performing our audit, we will ask management, those charged with governance, the internal
auditor, and others within the entity about fraud or suspected fraud; allegations of fraud or

8 Note to users of this sample engagement letter: Government Auditing Standards paragraphs 4.08–.09 specify the parties to whom this
communication should be made.
suspected fraud; the risks of fraud; programs and controls established to prevent and detect fraud; whether management has communicated information about those programs and controls to those charged with governance; and how management communicates to employees its views on business practices and ethical behavior.

We also may communicate in a management letter certain matters identified during the audit or possible ways to improve the Organization’s operational efficiency and effectiveness or otherwise improve its internal control or other policies or procedures. Under GAAS and Government Auditing Standards, we also may be required to directly report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse to outside parties.

**Other Engagement Matters and Limitations**

As part of our engagement, we will prepare the Federal Form 990 [and identify other returns] for the year ended [date]. This return will be prepared in accordance with professional standards and may be processed by a contract computer service that has agreed to maintain the confidentiality of all information furnished.

Our work in connection with the preparation of Form 990 does not include any procedures designed to discover defalcations or other fraud, should any exist.

You have the final responsibility for the Form 990. Therefore, you should review it carefully before you sign and file it.

Professional standards require us to be independent with respect to the [abbreviated name] in the performance of our services. Any discussion that you have with personnel of our firm regarding employment could pose a threat to our independence. Therefore, we request that you inform us prior to any such discussions so that we can implement appropriate safeguards to maintain our independence. In addition, if you hire one of our personnel, you agree to pay us a fee of [XX] percent of that individual’s base compensation at the [abbreviated name], [XX] days from the first day of employment.

**Audit Administration, Fees, and Other**

We may from time to time, and depending on the circumstances, use third party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third party service provider. Furthermore, we will remain responsible for the work provided by any such third party service providers.9

The Organization agrees to make available to us all records, documentation, and information we request in connection with our audit, to disclose to us all material information, and to give to us the full cooperation of the Organization’s personnel. An enclosure to this letter describes the assistance to be supplied by Organization personnel, including preparation of schedules and analyses of accounts, and the timing for that assistance. Timely completion of that work will facilitate the conclusion of our audit.

The Organization agrees to provide us printer’s proofs of its basic financial statements, schedule of expenditures of federal awards, and other information for its Circular A-133 reporting package for our review and approval before printing. The [abbreviated name] also agrees to provide us with a copy of the final reproduced material for our approval before distributing it.

---

9 Ethics Ruling No. 112 under Rule 102 (AICPA, Professional Standards, vol. 2, ET sec. 191 par. .224–.225) requires that clients be informed if the firm will outsource professional services to third party service providers. If the an audit firm intends to use third party service providers (that is, entities not controlled by the audit firm or individuals not employed by the audit firm), to perform portions of the audit (for example, input tax return information, act as a specialist, or audit an element of the financial statements), the client must be informed before confidential client information is shared with the service provider. If a third party service provider is not used to perform professional services, this paragraph can be omitted.
The Organization also is responsible for:

- Taking timely and appropriate steps to remedy fraud, illegal acts, violations of provisions of contracts or grant agreements, or abuse that we report.
- Having a process to track the status of audit findings and recommendations.
- Identifying for us previous financial audits, attestation engagements, performance audits, or other studies related to the objectives of our audit and the corrective actions taken to address significant findings and recommendations.
- Providing its views on our current findings, conclusions, and recommendations, as well as management’s planned corrective actions, for our reports. The corrective action plan that the Organization develops for its OMB Circular A-133 reporting package may fully or partially satisfy this responsibility.

Our reports on the Organization’s internal control and compliance will state that they are intended solely for the information and use of those charged with governance, management, federal awarding agencies, and pass-through entities and are not intended to be and should not be used by anyone other than these specified parties. However, the Organization should make copies of our reports available for public inspection unless they are restricted by law or regulation, or contain privileged and confidential information.

The documentation for this audit is our firm’s property and constitutes confidential information. We will maintain that documentation for the minimum period of time required by applicable auditing standards and requirements. In accordance with Government Auditing Standards, OMB Circular A-133, and federal law, we may be required, upon request, to make certain of that documentation (including photocopies) available to other auditors or reviewers, including the cognizant or oversight agency for audit or its designee, a federal agency providing direct or indirect funding, and the U.S. Government Accountability Office. Those parties may intend, or decide, to distribute the photocopies or information contained therein to others, including other governmental agencies and the public. We will notify you of any such requests.

Our firm undergoes a periodic external peer review that examines the quality of our auditing practice. We are enclosing with this letter a copy of the report and letter of comment from our firm’s most recent external peer review.

We are always available to meet with you or other executives at various times throughout the year to discuss current business, operational, accounting, and auditing matters affecting the Organization. Whenever you feel such meetings are desirable, please let us know. We also are prepared to provide services to assist you in any of these areas. We also will be pleased, at your request, to attend your directors’ meetings.

If the Organization wishes to assert that it complied, in all material respects, with specified laws and regulations, we could perform an engagement in accordance the American Institute of Certified Public Accountants’ and Government Auditing Standards’ attestation standards. The procedures we would perform would be more limited than if we were to express an opinion on management’s assertions.

Our fee estimate, which is shown in a separate schedule, is based on a “core” amount for the financial statement audit and tax return preparation services plus an incremental amount for the compliance audit of federal programs, based on the Organization’s actual number of major programs.\(^1\) We also will charge the Organization for our out-of-pocket expenses. We will bill our fees as work progresses with payment to be made upon presentation. Our initial fee estimate and our target date for delivering our reports assume that we will receive the aforementioned assistance from Organization personnel and that we will not encounter unexpected circumstances. We will notify you immediately of any circumstances we encounter that could significantly affect our initial estimate of fees or our report delivery date, which is on or about [date]. Prior to the release of the audit reports, we will require payment of 100 percent of all fees billed.

\(^1\) Note to users of this sample engagement letter: Various factors may change the level of effort required for the compliance audit of federal programs from year-to-year. For example, the auditee may have more or fewer federal programs or major programs because of new or discontinued federal programs, increased or decreased federal funding for existing programs, and OMB changes in program clusters, or the auditee may achieve or lose low risk auditee status. As shown in this sample letter, auditors could consider pricing their services for the compliance audit based on the number of major programs to be audited.
Our charges for other services will be agreed to separately.

The arrangements described in this letter will be updated annually.

Sincerely,

LACKO, LYNCH, BROWN & COMPANY

Audit of Financial Institution Financial Statements

LACKO, LYNCH, BROWN & COMPANY
Certified Public Accountants

[Date]
Mr. Matt Cox, President
Financial Institution
333 Burnside Highway
Sharpsburg, Maryland 00000

Dear Mr. Smith:

We are pleased to confirm our understanding of the services we are to provide for Financial Institution (the “Bank”) for the year ended December 31, 20XX.

We will audit the balance sheet of Financial Institution as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended.

The objective of our audit is the expression of an opinion about whether your financial statements are fairly presented, in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our audit will be conducted in accordance with auditing standards generally accepted in the United States of America and will include tests of your accounting records and other procedures we consider necessary to enable us to express such an opinion. If our opinion is other than unqualified, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed an opinion, we may decline to express an opinion or to issue a report as a result of this engagement.

Our procedures will include tests of documentary evidence and other procedures supporting the transactions recorded in the accounts. We will also request written representations from your attorneys as part of the engagement, and they may bill you for responding to this inquiry. At the conclusion of our audit, we will require certain written representations from you about the financial statements and related matters.

An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; therefore, our audit will involve judgment about the number of transactions to be examined and the areas to be tested. We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from (a) errors, (b) fraudulent financial reporting, (c) misappropriation of assets, or (d) violations of laws or governmental regulations that are attributable to the entity or to acts by management or employees acting on behalf of the entity. Because an audit is designed to provide reasonable, but not absolute, assurance and because we will not perform a detailed examination of all transactions, there is a risk that material misstatements may exist and not be detected by us. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements. However, we will inform you of any material errors that come to our attention, and we will inform you of any fraudulent financial reporting or misappropriation of assets that comes to our attention. We will also inform you of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. Our responsibility as auditors is limited to the period covered by our audit and does not extend to any later periods for which we are not engaged as auditors.

Our audit will include obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed. An audit is not designed to provide assurance on internal control or to identify deficiencies in internal control. However, during the audit, we will communicate to you internal control related matters that are required to be communicated under professional standards.

In accordance with auditing standards promulgated by the AICPA, we will communicate certain matters related to the conduct and results of the audit to those charged with governance. Such matters include, when
applicable, disagreements with management, whether or not resolved; serious difficulties encountered in performing the audit; our level of responsibility under auditing standards promulgated by the AICPA for the financial statements, for internal control, and for other information in documents containing the audited financial statements; unrecorded audit differences that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements as a whole; changes in the Bank’s significant accounting policies and methods for accounting for significant unusual transactions or for controversial or emerging areas; our judgments about the quality of the Bank’s accounting principles; our basis for conclusions as to sensitive accounting estimates; management’s consultations, if any, with other accountants; and major issues discussed with management prior to our retention.

Management of the Bank is responsible for apprising us of all allegations involving financial improprieties received by management or those charged with governance (regardless of the source or form and including, without limitation, allegations by “whistle-blowers”), and providing us full access to these allegations and any internal investigations of them, on a timely basis. Allegations of financial improprieties include allegations of manipulation of financial results by management or employees, misappropriation of assets by management or employees, intentional circumvention of internal controls, inappropriate influence on related party transactions by related parties, intentionally misleading Lacko, Lynch, Brown & Company (“LLBC”), or other allegations of illegal acts or fraud that could result in a misstatement of the financial statements or otherwise affect the financial reporting of the Bank. If the Bank limits the information otherwise available to us under this paragraph (based on the Bank’s claims of attorney/client privilege, work product doctrine, or otherwise), the Bank will immediately inform us of the fact that certain information is being withheld from us. Any such withholding of information could be considered a restriction on the scope of the audit and may prevent us from opining on the Bank’s financial statements; alter the form of report we may issue on such financial statements; or otherwise affect our ability to continue as the Bank’s independent auditors. The Bank and we will disclose any such withholding of information to those charged with governance.

In accordance with FDIC regulations, we, as your auditors, are required to make the following commitments: The audit documentation for this engagement is the property of LLBC and constitutes confidential information. However, we may be requested to make certain attest documentation available to the FDIC or any other applicable Federal or state banking agency pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of LLBC personnel. Furthermore, upon request, we may provide copies of selected audit documentation to the FDIC or other applicable Federal or state banking agency. The FDIC or other applicable Federal or state banking agency may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

We may from time to time, and depending on the circumstances, use third-party service providers in serving your account. We may share confidential information about you with these service providers, but remain committed to maintaining the confidentiality and security of your information. Accordingly, we maintain internal policies, procedures, and safeguards to protect the confidentiality of your personal information. In addition, we will secure confidentiality agreements with all service providers to maintain the confidentiality of your information and we will take reasonable precautions to determine that they have appropriate procedures in place to prevent the unauthorized release of your confidential information to others. In the event that we are unable to secure an appropriate confidentiality agreement, you will be asked to provide your consent prior to the sharing of your confidential information with the third-party service provider. Furthermore, we will remain responsible for the work provided by any such third-party service providers.

You are responsible for establishing and maintaining internal controls, including monitoring ongoing activities; for the selection and application of accounting principles; and for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America. You are also responsible for management decisions and functions; for designating an individual with suitable skill, knowledge, or experience to oversee the tax services and any other nonattest services we provide; and for evaluating the adequacy and results of those services and accepting responsibility for them.

You are responsible for making all financial records and related information available to us and for the accuracy and completeness of that information. Your responsibilities include adjusting the financial statements to correct material misstatements and confirming to us in the management representation letter that
the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

You are responsible for the design and implementation of programs and controls to prevent and detect fraud, and for informing us about all known or suspected fraud affecting the Bank involving (a) management, (b) employees who have significant roles in internal control, and (c) others where the fraud could have a material effect on the financial statements. Your responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the Bank received in communications from employees, former employees, regulators, or others. In addition, you are responsible for identifying and ensuring that the entity complies with applicable laws and regulations.

With regard to the electronic dissemination of audited financial statements, including financial statements published electronically on your Internet website, you understand that electronic sites are a means to distribute information and, therefore, we are not required to read the information contained in these sites or to consider the consistency of other information in the electronic site with the original document.

You should be aware that certain communications involving tax advice between you and members of our firm who are authorized tax practitioners or their agents may be privileged from disclosure to the IRS. The privilege may be waived, however, by voluntarily disclosing the contents of those communications to a third party. The privileged information might be used by you in preparing your financial statements and, consequently, disclosed to us in auditing those statements. In addition, professional standards require us to discuss matters that may affect the audit with our firm personnel responsible for tax services, who may disclose the privileged information to us. The IRS might take the position that such communication results in a waiver of privilege.

In the unlikely event that differences concerning LLBC’s services or fees should arise that are not resolved by mutual agreement, to facilitate judicial resolution and save time and expense of both parties, the Bank and LLBC agree not to demand a trial by jury in any action, proceeding or counterclaim arising out of or relating to LLBC’s services and fees for this engagement and agree to submit to voluntary mediation.

Attached hereto is a copy of a letter that we will request your principal officers to sign at the commencement of our audit. It sets forth, in summary fashion, our respective responsibilities with respect to your financial statements and our audit thereof.

We understand that your employees will prepare all confirmations we request and will locate any documents selected by us for testing. All confirmations will be prepared as of September 30, 20XX, with the exception of legal council and investment confirmations. We expect to begin our audit during October 20XX. Please note that we are required under accounting regulations to issue our report as close to the audit opinion date as possible. We expect the majority of the documentation necessary to perform our audit to be available at the date of fieldwork commencement mentioned above. Our audit engagement ends on delivery of our audit report. We expect to provide you with a final draft of the Bank’s audited financial statements on January 16, 20XX, given that we have been provided by management the first draft by January 4, 20XX. Any follow-up services that might be required will be a separate, new engagement. The terms and conditions of that new engagement will be governed by a new, specific engagement letter for that service. We will also prepare the Bank’s tax returns for the year ended December 31, 20XX.

We estimate that our fees for these services will range from $______ to $______ for the audit and $______ for the tax return. You will also be billed for travel and other out-of-pocket costs such as report production, word processing, postage, etc. The fee estimate is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the audit. If significant additional time is necessary, we will discuss it with you and arrive at a new fee estimate before we incur the additional costs. Our invoices for these fees will be rendered each month as work progresses and are payable on presentation. In accordance with our firm policies, work may be suspended if your account becomes 30 days or more overdue and will not be resumed until your account is paid in full. If we elect to terminate our services for nonpayment, our engagement will be deemed to have been completed upon written notification of termination, even if we have not completed our report. You will be obligated to compensate us for all time expended and to reimburse us for all out-of-pocket expenditures through the date of termination.
You may request that we perform additional services not addressed in this engagement letter. If this occurs, we will communicate with you regarding the scope of the additional services and the estimated fees. We also may issue a separate engagement letter covering the additional services. In the absence of any other written communication from us documenting such additional services, our services will continue to be governed by the terms of this engagement letter.

In the event we are requested or authorized by the Bank or are required by government regulation, subpoena, or other legal process to produce our documents or our personnel as witnesses with respect to our engagements for the Bank, the Bank will, so long as we are not a party to the proceeding in which the information is sought, reimburse us for our professional time and expenses, as well as the fees and expenses of our counsel, incurred in responding to such requests.

This engagement letter is contractual in nature, and includes all of the relevant terms that will govern the engagement for which it has been prepared. The terms of this letter supersede any prior oral or written representations or commitments by or between the parties. Any material changes or additions to the terms set forth in this letter will only become effective if evidenced by a written amendment to this letter, signed by all the parties.

We appreciate the opportunity to be of service to you and believe this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let us know. If you agree with the terms of our engagement as described in this letter, please sign the enclosed copy and return it to us.

Very truly yours,

LACKO, LYNCH, BROWN & COMPANY

AAM Section 4100

Introduction

Overview

.01 As discussed in AAM section 3125, the auditor should obtain an understanding of the 5 components of internal control sufficient to assess the risks of material misstatement of the financial statements whether due to error or fraud and to design the nature, timing, and extent of further audit procedures. A sufficient understanding means the auditor should perform risk assessment procedures to evaluate the design of controls relevant to an audit and to determine whether they have been implemented. In obtaining this understanding, the auditor should consider how an entity’s use of IT and manual procedures may affect controls relevant to the audit.

.02 AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), provides a framework to help the auditor obtain an understanding of internal control. This framework breaks internal control into 5 components as identified in paragraph .03 of AAM section 4200. The division of internal control into the 5 components provides a useful framework for auditors to consider how different aspects of an entity’s internal control may affect the audit.

.03 The auditor’s understanding of internal control is used to

- identify types of potential misstatement;
- consider factors that affect the risks of material misstatement;
- design tests of controls, when applicable; and
- design substantive procedures.

.04 The auditor’s understanding of a client’s internal control should be based on previous experience with the client and the following:

- Inquiries of appropriate management, supervisory, and staff personnel
- Analytical procedures
- Inspection of documents and records
- Observation of the entity’s activities and operations

.05 AAM section 4200 provides more detail on the internal control framework described in AU section 314. Refer to AAM section 5100 for guidance pertaining to the design of further audit procedures (tests of controls or substantive procedures, or both) and AAM section 5200 for specific guidance on the performance of tests of controls.

[The next page is 4201.]
AAM Section 4200

Internal Control Framework

Introduction

.01 As described in AAM section 3125, AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), provides a framework to help the auditor obtain an understanding of internal control. That framework is built on 2 concepts: objectives and components.

.02 An *objective* is what the entity is trying to achieve. Generally, an entity tries to achieve objectives in the following three categories:

- Reliability of financial reporting
- Effectiveness and efficiency of operations
- Compliance with applicable laws and regulations

.03 For each of these objectives, internal control consists of the following five interrelated components:

- **Control environment**, which sets the tone of an organization and influences the control consciousness of its people. It is the foundation for all other components of internal control and provides discipline and structure.
- **Risk assessment**, which is the entity’s identification and analysis of relevant risks to achievement of its objectives. It forms a basis for determining how the risks should be managed.
- **Control activities**, which are the policies and procedures that help ensure management directives are carried out.
- **Information and communication systems**, which support the identification, capture, and exchange of information in a form and time frame that enables people to carry out their responsibilities.
- **Monitoring**, which is a process that assesses the quality of internal control performance over time.

.04 Although an entity’s internal control addresses objectives referred to in paragraph .02, not all of these objectives and related controls are relevant to an effective audit of an entity’s financial statements. Ordinarily, controls that are relevant to an audit pertain to the entity’s objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles (GAAP), including the management of risk that may give rise to a risk of material misstatement in those financial statements. An entity may have controls that relate to operations and compliance with laws and regulations that are not relevant to an audit and, therefore, need not be considered.

.05 The Jones family owns and operates several neighborhood grocery stores in Anytown. The bank reconciliation performed by the Jones Grocery controller is an example of a control that relates primarily to the financial reporting objective. Jones also has an inventory tracking and management system that allows each store manager to track inventory levels and order new items before they run out of stock. This control activity is part of the operations objective. Each store has a small deli that prepares sandwiches and some hot foods. These food preparation activities must comply with state health laws and regulations, and Jones has policies in place to help ensure that those laws and regulations are met. Those policies are directed at the compliance objective of the entity.

.06 The controls having to do with the ordering of inventory or compliance with state health laws and regulations are important to Jones Grocery but ordinarily will not relate to the audit of the company’s financial statement. If you
were the auditor of Jones Grocery, you may wish to ask about and document these controls for client service or other purposes, but because these controls are not relevant to the audit, you are not required to do so.

.07 However, if controls relating to operations and compliance objectives pertain to data the auditor evaluates or uses in applying auditing procedures, then they may be relevant to the audit.

.08 For example, the financial reporting system may produce a sales report by inventory stock number for each sales region. If the auditor decided to use information from this report when auditing the proper valuation of inventory, he or she might obtain an understanding of the following:

- Which transactions or classes of transactions are included in the report
- How significant accounting data about those transactions are entered into and flow through the financial reporting system
- What files are processed
- What nature of processing is involved in producing the report

.09 Controls relating to operations and compliance objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.10 Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor’s consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.11 The internal control framework described in AU section 314 is only a means to help the auditor consider the impact of an entity’s internal control in an audit. The auditor’s primary consideration is whether, and how, a specific control prevents or detects and corrects material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Controls relevant to the audit are those that individually or in combination with others are likely to prevent or detect material misstatements in financial statement assertions. Such controls may exist in any of the 5 components.

.12 Suppose you are the auditor of Jones Grocery. As on all audits, you should obtain an understanding of internal control sufficient to assess the risks of material misstatement and to design the nature, timing, and extent of further audit procedures. To achieve this, you organize your inquiries and other procedures to understand each of the five components of internal control that relate to the financial reporting objectives. As a result of performing your procedures, you discover the client’s bank reconciliation procedures. Should a bank reconciliation be considered a “control procedure”? What about the fact that someone follows up and investigates old or unusual reconciling items? Is that considered a “monitoring” activity?

.13 These questions are rhetorical because the issue of how to classify a particular control is irrelevant for your purposes. As an auditor, your primary consideration is to understand how the bank reconciliations, whether individually or in combination with other controls, affect financial statement assertions relating to cash.
Effect of Information Technology on Internal Control

.14 An entity’s use of IT may affect any of the five components of internal control relevant to the achievement of the entity’s financial reporting, operations, or compliance objectives and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity’s financial reporting, operations, and compliance objectives.

.15 The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported. In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, reconciliations, and follow-ups of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity’s mix of manual and automated controls varies with the nature and complexity of the entity’s use of IT.

.16 IT provides potential benefits of effectiveness and efficiency for an entity’s internal control because it enables an entity to

- consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data;
- enhance the timeliness, availability, and accuracy of information;
- facilitate the additional analysis of information;
- enhance the ability to monitor the performance of the entity’s activities and its policies and procedures;
- reduce the risk that controls will be circumvented; and
- enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.17 IT also poses specific risks to an entity’s internal control, including

- reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions;
- unauthorized changes to data in master files;
- unauthorized changes to systems or programs;
• failure to make necessary changes to systems or programs;
• inappropriate manual intervention; and
• potential loss of data or inability to access data as required.

.18 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity’s information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity’s use of IT in its information system affect the entity’s internal control.

.19 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:
• Large, unusual, or nonrecurring transactions
• Circumstances where misstatements are difficult to define, anticipate, or predict
• In changing circumstances that require a control response outside the scope of an existing automated control
• In monitoring the effectiveness of automated controls

.20 Manual controls are performed by people and, therefore, pose specific risks to the entity’s internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot, therefore, be assumed. Manual systems may be less suitable for the following:
• High volume or recurring transactions, or in situations in which errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated
• Control activities in which the specific ways to perform the control can be adequately designed and automated

.21 The purpose of this section is to provide guidance on each of the five components that comprise the internal control framework. This guidance may help the auditor perform procedures to obtain an understanding of internal control. These procedures generally include the following steps:
• Understand internal control components that have a pervasive effect on the organization
• Understand how IT is used to process significant accounting information
• Understand control activities for significant account balances or transaction cycles
• Assess the risk of management override and lack of segregation of duties

Focus on the Small Business Entity

.22 This section emphasizes the audit of a small business entity. Small business entities are typically characterized by
• a single owner or a small group of owners who manage the business on a day to day basis;
• a small number of employees involved in the accounting function;
• no outside board of directors or internal audit function; and
• the use of off-the-shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

.23 This section provides some guidance for the audits of medium to large businesses.

Controls Relevant to Reliable Financial Reporting and to the Audit

.24 There is a direct relationship between an entity’s objectives and the internal control components it implements to provide reasonable assurance about their achievement. In addition, internal control is relevant to the entire entity or to any of its operating units or business functions. Although the entity’s objectives and, therefore, controls relate to financial reporting, operations, and compliance, not all of these objectives and controls are relevant to the audit. Further, although internal control applies to the entire entity, or to any of its operating units or business functions, an understanding of internal control relating to each of the entity’s operating units and business functions may not be necessary to the performance of the audit.

.25 Ordinarily, controls that are relevant to an audit pertain to the entity’s objective of preparing financial statements that are fairly presented in conformity with GAAP, including the management of risk that may give rise to a risk of material misstatement in those financial statements. However, it is not necessary to assess all controls in connection with assessing the risks of material misstatement and designing and performing further audit procedures in response to assessed risks. It is a matter of the auditor’s professional judgment as to the controls or combination of controls that should be assessed. However, as stated in paragraph .115 of AU section 314, for significant risks—to the extent the auditor has not already done so—the auditor should evaluate the design of the entity’s related controls, including relevant control activities, and determine whether they have been implemented. In exercising that judgment, the auditor should consider the circumstances, the applicable component, and factors such as the following:

• Materiality
• The size of the entity
• The nature of the entity’s business, including its organization and ownership characteristics
• The diversity and complexity of the entity’s operations
• Applicable legal and regulatory requirements
• The nature and complexity of the systems that are part of the entity’s internal control, including the use of service organizations

.26 Controls over the completeness and accuracy of information produced by the entity may also be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures. The auditor’s previous experience with the entity and information obtained in understanding the entity and its environment and throughout the audit assist the auditor in identifying controls relevant to the audit.

.27 Controls relating to operations and compliance objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.28 An entity generally has controls relating to objectives that are not relevant to an audit and, therefore, need not be considered. For example, an entity may rely on a sophisticated system of automated controls to

---

1 An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with AU section 801, Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance (AICPA, Professional Standards, vol. 1).

AICPA Audit and Accounting Manual  
AAM §4200.28
provide efficient and effective operations (such as a manufacturing plant’s computerized production scheduling system), but these controls ordinarily would not be relevant to the audit.

.29 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor’s consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.30 Controls relevant to the audit may exist in any of the components of internal control and a further discussion of controls relevant to the audit is included in paragraphs .67–.101 of AU section 314. In addition, paragraphs .115 and .117 of AU section 314 discuss certain risks for which the auditor should evaluate the design of the entity’s controls over such risks and determine whether they have been implemented.

Internal Control Components
Understanding the Control Environment

.31 The control environment sets the tone of an organization. It influences the control consciousness of its people and is the foundation for all other components of internal control. In obtaining an understanding of the client’s control environment, the auditor should obtain sufficient knowledge to understand the attitudes, awareness, and actions of those charged with governance concerning the entity’s internal control and its importance in achieving reliable financial reporting. In understanding the control environment, the auditor should concentrate on the implementation of controls because controls may be established but not acted upon. The following paragraphs describe some factors the auditor should consider when evaluating a client’s control environment.

.32 Integrity and ethical values. The effectiveness of internal control cannot rise above the integrity and ethical values of the owner-manager. Integrity and ethical values are essential elements of the control environment because they affect the design, administration, and monitoring of other internal control components.

.33 Management may tell you a great deal about their integrity and ethical values. They may even commit their words to a written document. Responses to inquiries and written policies are good, but compliance with ethical standards is best ensured by focusing on management’s actions and how these actions affect the entity on a day to day basis.

.34 For management’s integrity and ethical values to have a positive effect on the entity, the following ordinarily should exist:

- The business owner and management should personally have high ethical and behavioral standards.
- These standards should be communicated to company personnel. In a small business, this communication is often informal.
- The standards should be reinforced.

.35 When observing and evaluating management’s actions be alert for the following:

- Segregation of personal from business funds and activities. Many small business owners mix their personal and business activities, for example, the company may pay the owner’s credit card bills even if they contain nonbusiness expenditures. The auditor might consider the owner’s attitude and the care with which he or she separates the personal from the business activities. It’s not unusual for a business to pay the owner’s credit card bills, but the more important question is “does the owner reimburse the
company?” Owners who treat company assets as if they were personal assets set a bad example for employees who may be encouraged to do the same.

- **Dealing with signs of problems.** Consider how management deals with signs that problems exist, particularly when the cost of identifying and solving the problem could be high. For example, suppose a client became aware of a possible environmental contamination on their premises. How would they react? Would they try to hide it, deny its existence, or act evasively if asked about it, or would they actively seek out their auditor’s advice or the advice of their attorney?

- **Removal or reduction of incentives and temptations.** Individuals may engage in dishonest, illegal, or unethical acts simply because the owner-manager gives them strong incentives or temptations to do so. Removing or reducing these incentives and temptations can go a long way toward diminishing undesirable behavior.

The emphasis on results, particularly in the short term, fosters an environment in which the price of failure becomes very high. **Incentives** for engaging in fraudulent or questionable financial reporting practices include the following:

- Pressure to meet unrealistic performance targets, particularly for short term results
- High performance-dependent rewards
- Upper and lower cutoffs on bonus plans

**Temptations** for employees to engage in improper practices include the following:

- Nonexistent or ineffective controls, such as poor segregation of duties in sensitive areas that offer temptations to steal or conceal questionable financial reporting practices
- Owner-managers who are unaware of actions taken by employees
- Penalties for improper behavior that are insignificant or unpublicized and thus lose their value as deterrents

- **Management intervention.** There are certain situations where it is appropriate for management to intervene and overrule prescribed policies or procedures for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the financial reporting information system. The auditor might consider whether management has provided guidance on the situations and frequency with which intervention of established controls is appropriate. It is a best practice for management interventions to be documented and explained.

.36 **Commitment to competence.** Competence reflects the knowledge and skills necessary to accomplish tasks that define an individual’s job. Commitment to competence includes management’s consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

.37 **Mrs. Jones has always kept the books for Jones Grocery. She is self-taught, with no formal training in accounting or bookkeeping. There are no plans to replace Mrs. Jones with someone more “qualified.”** As the auditor of Jones Grocery you recognized the risk of having an untrained bookkeeper and design your audit approach to address such concerns by

- training Mr. and Mrs. Jones to call you whenever they have a transaction out of the ordinary;
- strongly encouraging Mrs. Jones to take training classes on her accounting software package (she has);
- explaining to Mrs. Jones the importance of key accounting records such as the accounts payable subledger and inventory reports; and
- teaching Mrs. Jones important basic control functions such as bank reconciliations.

.38 **Management’s philosophy and operating style.** Management’s philosophy and operating style encompass a broad range of characteristics. Such characteristics may include

- the owner-manager’s approach to taking and managing business risks;
attitudes and actions toward financial reporting and tax matters; and

attitudes and actions toward information processing and accounting functions and personnel.

Management’s philosophy and operating style have a significant influence on the control environment, particularly in a small business where the owner-manager dominates the organization, regardless of the consideration given to the other control environment factors. For example, the auditor may be concerned about the client’s unduly aggressive attitude toward financial reporting. Not only might this cause the auditor to assess control risk as high for some or all assertions, but it may heighten concerns about irregularities affecting certain assertions.

However, a dominant owner-manager does not necessarily cause the auditor to assess control risk as high.

Mr. Jones dominates the management of Jones Grocery. He demonstrates a positive attitude toward the control environment and a moderate to conservative attitude toward accepting business risk such as expansion. He is more concerned about taxes than financial reporting. Mr. Jones uses information generated by the financial reporting information system to monitor the financial results of the company and compare it to prior periods. His review of the accounting reports encourages Mrs. Jones and others who help with the accounting to work with greater care. Mr. Jones also performs many control activities himself, such as the review and supervision of the physical inventory counts. Although Mr. Jones is concerned about his income tax liability, you might not view the possible bias to misstate income as a significant risk because of the otherwise positive control environment.

Organizational structure. A client’s organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed.

Significant aspects of establishing an organizational structure include considering key areas of authority and responsibility and appropriate lines of reporting. Small business entities usually have fairly simple organizational structures. A highly structured organization with formal reporting lines and responsibilities may be appropriate for large entities, but for a small business, this type of structure may impede the necessary flow of information.

Assignment of authority and responsibility. The assignment of authority and responsibility includes, among other things, the following:

- The establishment of reporting relationships and authorization procedures
- The degree to which individuals and groups are encouraged to use initiative in addressing issues and solving problems
- The establishment of limits of authority
- Policies describing appropriate business practices
- Resources provided for carrying out duties

Alignment of authority and accountability often is designed to encourage individual initiatives, within limits. Delegation of authority means surrendering central control of certain business decisions to lower echelons to the people who are closest to everyday business transactions.

A critical challenge is to delegate only to the extent required to achieve objectives. This requires ensuring that risk acceptance is based on sound practices for identifying and minimizing risk, including sizing risks and weighing potential losses versus gains in arriving at good business decisions.

Another challenge is ensuring that all personnel understand the entity’s objectives. It is essential that each individual knows how his or her actions interrelate and contribute to achievement of the objectives.
Mr. Jones had to decide how to delegate authority and responsibility when he expanded Jones Grocery from the one original store to its present eight store chain spread out over greater Anytown and the surrounding suburbs. One area that proved problematic was setting prices. Mr. Jones assumed that he would be able to set the prices at all of the stores, just like he did for his original store. He felt this was a good procedure because it allowed him some control over profit margins. Problems arose because the competitive pressures were different in different areas of the city. A competitor in the north suburb ran specials or lowered prices on certain items, and a competitor in the west suburb ran specials on different items. It became too difficult for Mr. Jones to keep up with the constantly changing price battles at eight different stores. He eventually delegated this responsibility to the individual store managers. He set a limit on how much a store manager could discount prices without his prior approval, but other than that, the store managers had the freedom to set prices to respond to the changing competitive environment.

The responsibility for accounting information was also affected by Jones Grocery’s expansion. Mr. Jones’ original thought was that each store would be run as a separate business, with separate financial reporting information systems that would be consolidated together at the main store. Problems soon developed in several areas, most notably accounts payable. The store managers were responsible for entering vendor invoices into the computer system. But it seemed that no matter how much Mr. Jones threatened, cajoled, and begged his store managers to enter the invoices on a timely basis, they just couldn’t do it consistently. The procedure had to be changed. Now, the store managers only have the responsibility to check incoming goods for quantity and condition. Vendor invoices are sent directly to Mrs. Jones at the main store, and she is responsible for maintaining the accounts payable for all the stores.

The control environment is greatly influenced by the extent to which individuals recognize that they will be held accountable. This holds true all the way to the owner-manager, who has the ultimate responsibility for all activities within the organization, including internal control.

Human resource policies and practices. Human resource policies and practices affect an entity’s ability to employ sufficient competent personnel to accomplish its goals and objectives. Human resource policies and practices include an entity’s policies and procedures for hiring, orienting, training, evaluating, counseling, promoting, compensating, and taking remedial action. In many small businesses, the policies may not be formalized but they can nevertheless exist and be communicated. The owner-manager can orally make explicit his or her expectations about the type of person to be hired to fill a particular job and may even be active in the hiring process. Formal documentation is not always necessary for a policy to be in place and operating effectively.

When Mr. and Mrs. Jones added a second store, the hiring of a store manager was easy—they hired their daughter. Adding a third store proved to be more problematic, because the other Jones children had no interest in the family business. Mr. and Mrs. Jones talked at length about the type of person they would hire as a store manager. They finally decided it was more important to hire someone they could trust, someone they felt comfortable with on a personal level rather than someone with an extensive background in the grocery business. They felt they could teach someone the grocery business but not how to be trustworthy. That hiring policy worked, and they’ve been following it ever since.

Standards for hiring the most qualified individuals, with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity’s commitment to competent and trustworthy people. Hiring practices that include formal in-depth employment interviews and informative and insightful presentations on the company’s history, culture, and operating style send a message that the company is committed to its people.

Personnel policies that communicate prospective roles and responsibilities and that provide training opportunities indicate expected levels of performance and behavior. Rotation of personnel and promotions driven by periodic performance appraisals demonstrate the entity’s commitment to advancement of qualified personnel to higher levels of responsibility. Competitive compensation programs that include bonus incentives serve to motivate and reinforce outstanding performance. Disciplinary actions send a message that violations of expected behavior will not be tolerated.

Participation of those charged with governance. An entity’s control consciousness is significantly influenced by those charged with governance. As defined in paragraph .03 of AU section 380, The Auditor’s Communication...
With Those Charged With Governance (AICPA, Professional Standards, vol. 1), those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity’s financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the terms board of directors or audit committee. For small business entities, those charged with governance may not include any independent or outside members. Please refer to the following paragraphs .80–.82 for additional discussion of how the participation of those charged with governance applies to medium and large businesses.

Risk Assessment

.56 An entity’s risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of reliable financial statements in conformity with GAAP. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.57 Risks relevant to financial reporting include events and circumstances that may adversely affect the company’s ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should generally be managed. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations.

.58 Risks can arise or change due to circumstances such as the following:

- Changes in the operating environment. Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- New personnel. New personnel may have a different focus on or understanding of internal control. When people change jobs or leave the company, management generally should consider the control activities they performed and who will perform them going forward. Steps ordinarily should be taken to ensure new personnel understand their tasks.
- New or revamped information systems. Significant and rapid changes in information systems can change the risk relating to internal control. When these systems are changed, management generally should assess how the changes will impact control activities. Are the existing activities appropriate or even possible with the new systems? Personnel should be adequately trained when information systems are changed or replaced.
- Rapid growth. Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls. Management generally should consider whether accounting and information systems are adequate to handle increases in volume.
- New technology. Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- New business models, products, or activities. Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- Corporate restructurings. Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- Expanded foreign operations. The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control (for example, additional or changed risks from foreign currency transactions).
- New accounting pronouncements. Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.
.59 The auditor’s procedures to assess whether a risk assessment process is placed in operation are generally of an inquiry nature. For example, you may ask accounting personnel what accounts they believe are the most difficult to become satisfied with as they prepare the financial statements. You may also consider asking the same questions of personnel outside the accounting department.

Control Activities

.60 Control activities are policies and procedures that help ensure that management directives are carried out. For example, necessary actions are taken to address risks to achieve the entity’s objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

.61 At the entity-wide level, control activities may be categorized as policies and procedures that pertain to the following:

- **Performance reviews.** These control activities include reviews of actual performance versus budgets, forecasts, and prior period performance. They may also involve relating different sets of data (for example, operating or financial) to one another, together with analyses of the relationships, investigating unusual relationships and taking corrective action. Performance reviews may also include a review of functional or activity performance.

- **Information processing.** A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail. These controls are discussed in more detail in the following paragraphs .87–.91.

- **Physical controls.** These activities encompass the physical security of assets, including adequate safeguards over access to assets and records such as secured facilities and authorization for access to computer programs and data files and periodic counting and comparison with amounts shown on control records. The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation and, therefore, the audit depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.

- **Segregation of duties.** Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Segregation of duties is often a problem for small business entities. See the following paragraphs .128–.136 for further discussion and guidance.

.62 You should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote
additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. The auditor should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts.

.63 In obtaining an understanding of control activities, the auditor’s primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents or detects and corrects material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. The auditor’s emphasis is on identifying and obtaining an understanding of control activities that address the areas where you consider that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to that objective.

.64 The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions have occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.65 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer’s authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

.66 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. Though ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over systems development may not be relevant to the financial statements being audited.

.67 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.68 The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls
depend. From the auditor’s perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

Information and Communication Systems

.69 An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and automated), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems make extensive use of IT. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transactions by the appropriate level management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by automated or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity’s financial performance and in other functions.

.70 The quality of system generated information affects management’s ability to make appropriate decisions in controlling the entity’s activities and to prepare reliable financial statements. Thus, it is important that management receives the information they need to carry out their responsibilities and that the information is provided at the right level of detail. Accordingly, an information system encompasses procedures and records that

- identify and record all valid transactions;
- describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting;
- measure the value of transactions in a manner that permits recording of their proper monetary value in the financial statements;
- determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period; and
- present properly the transactions and related disclosures in the financial statements.

.71 The financial reporting information system is an integral part of an entity’s information and communication system. The auditor’s consideration of the system is often made at the individual account and classes of transaction level. See the following paragraphs .112–.127 for additional guidance.

.72 Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

.73 The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand

- the classes of transactions in the entity’s operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions;

how the information system captures other events and conditions that are significant to the financial statements; and

the financial reporting process used to prepare the entity’s financial statements, including significant accounting estimates and disclosures.

.74 When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.75 The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it is used by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

.76 In obtaining an understanding of the financial reporting process (including the closing process), the auditor should understand the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include the following:

- **Entering transaction totals into the general ledger (or equivalent record).** In some information systems, IT may be used to automatically transfer such information from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to automatically transfer information there may be little or no visible evidence of such intervention in the information systems.

- **Initiating, authorizing, recording, and processing journal entries in the general ledger.** An entity’s financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity’s financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more difficult to identify through the use of computer assisted techniques.

- **Initiating and recording recurring and nonrecurring adjustments to the financial statements.** These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.

- **Combining and consolidating general ledger data.** This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).

- **Preparing financial statements and disclosures.** These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.
Monitoring

.77 Monitoring is a process that assesses the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions.

.78 Examples of ongoing monitoring activities include the following:

- Management reviews of data produced by the entity’s information system. Managers are in touch with operations and may question reports that differ significantly from their knowledge of operations. However, management generally should have a basis for believing the data is accurate. If errors exist in the information, management may make incorrect conclusions from its monitoring activities.
- Communications from external parties corroborate internally generated information or indicate problems. Customers implicitly corroborate billing data by paying their invoices. Conversely, customer complaints about billings could indicate system deficiencies in the processing of sales transactions. Similarly, bankers, regulators, or other outside parties may communicate with the company on matters of accounting significance.
- External auditors regularly provide recommendations on the way internal control can be strengthened. Auditors may identify potential weaknesses and make recommendations to management for corrective action.
- Employees may be required to sign off to evidence the performance of critical control functions. The sign-off allows management to monitor the performance of these control functions.

Application to Medium and Large Businesses

.79 The control environments of medium to large businesses may differ from those of small business entities in the following ways:

- The presence of a board of directors or audit committee
- The presence of an internal audit function
- More formalized policies and procedures

Board of Directors or Audit Committee

.80 The control consciousness of a medium or large business is influenced significantly by those charged with governance. As defined previously, those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. Those charged with governance encompasses the term board of directors and audit committee used elsewhere in this section. Because of its importance, an active and involved board of directors—possessing an appropriate degree of management, technical, and other expertise coupled with the necessary stature and mind-set so that it can adequately perform the necessary governance, guidance, and oversight responsibilities—is critical to effective internal control.

.81 Factors that influence the effectiveness of those charged with governance include the following:

- Its independence from management
- The experience and stature of its members
- The extent of its involvement and scrutiny of activities
- The appropriateness of its actions
- The degree to which difficult questions are raised and pursued with management
- Its interaction with internal and external auditors
The board of directors must be prepared to question and scrutinize management’s activities, present alternative views and have the courage to act in the face of obvious wrongdoing. Because of this, it is necessary that the board contain at least a critical mass of outside directors. The number should suit the entity’s circumstances, but more than one outside director normally would be needed for a board to have the requisite balance.

**Internal Audit Function**

The internal audit function is established within an entity to monitor and evaluate the adequacy and effectiveness of internal control. For entities with an internal audit function, the auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors’

- organizational status within the entity;
- application of professional standards;
- audit plan, including the nature, timing, and extent of audit work; and
- access to records and any limitations on the scope of their activities.

After obtaining an understanding of the internal audit function, the auditor may either

- conclude that the internal auditors’ activities are not relevant to the financial statement audit and give no further consideration to the internal audit function;
- identify relevant internal auditor activities but conclude that it would not be efficient to consider further the work of the internal auditors; or
- decide that it would be efficient to consider how the internal auditors’ work might affect the nature, timing, and extent of the audit. In this case, you should assess the competence and objectivity of the internal audit function as outlined in AU section 322, The Auditor’s Consideration of the Internal Audit Function in an Audit of Financial Statements (AICPA, Professional Standards, vol. 1).

You may also request direct assistance from the internal auditors. Paragraph .27 of AU section 322 establishes requirements and provides guidance for auditors when using internal auditors to provide direct assistance in performing the audit.

**Formal Policies**

Medium and large businesses may communicate their policies in formal, written documents. For example, they may have a written code of conduct or human resource policies. The existence of formal policy documents is good, but as an auditor, your primary consideration is how the policies are implemented.

**Computer Applications**

Small business entities are typically characterized by the use of off the shelf, unmodified computer software or the use of an outside computer service organization to process significant accounting information.

Jones Grocery has a stand-alone, state-of-the-art PC at its main store. One other store has a computer—an Apple Macintosh that Mr. and Mrs. Jones’ daughter used at college. The PC at the main store is used to run the accounting software, which is an off the shelf product developed specifically for independent grocers. The payroll is processed by an outside payroll service.

In gaining an understanding of how computers are used in the business, the auditor may consider the following:

- The acquisition of hardware and software
- Physical access
• Logical access
• User controls over outsider service bureau applications

Acquisition of Hardware and Software

.90 Companies ordinarily should take steps to ensure they have compatible hardware and software. The use of compatible software reduces the risk of error, because there will be no need to transfer data from one format into another. Even small businesses generally should have a coherent plan for the purchase of computer hardware and software. If the business is growing, management will typically plan for the upgrade of the processor, random access memory (RAM), or hard disk storage.

.91 Mr. and Mrs. Jones did not plan for the purchase of their computers. For several years, Mrs. Jones processed the accounting applications on an old PC with limited RAM and hard-disk storage. When the Jones’ daughter opened the second store, she brought with her the Apple Macintosh she had in college. At first, she tried to transfer data from her store to the main store, but the software had problems converting from the Apple format, so the procedure was abandoned. At a trade show, Mr. Jones discovered a computer software program specifically designed for independent grocers. He was impressed with the program and decided that it fit his needs perfectly. However, his hardware was out of date, and so in order to run the software, he upgraded his hardware. The new software supposedly is able to handle Apple-formatted data, and the company has plans to transfer data from the second store electronically. There are no plans to install computers at the other stores.

.92 As the auditor of Jones Grocery, you should use this understanding of the company computer system to help plan the audit. For example, they plan to transfer data from the Apple to the PC. What other sorts of errors might occur in the transfer? What steps has the client taken to prevent or detect those errors? You also know that stores three through eight are on a manual system. What types of errors might occur in a manual system? What is the risk that those errors will occur?

.93 Entities ordinarily should also establish policies and procedures to mitigate the risk of computer viruses being introduced into their systems. Viruses can cause the loss of data and programs. A virus has the ability to attach itself to a program and infect other programs and systems. Although some viruses merely write messages across the screen, others can cause serious damage to disk files or shut down a network by replicating themselves millions of times and filling all available memory or disk storage.

.94 Methods to prevent the introduction of viruses and to recover from a virus attack include the following:
• Obtaining recognized software from reputable sources and only accepting delivery of the software in the manufacturer’s sealed package.
• Making multiple generations of backups. A virus that is not detected initially may be copied onto more recent backup copies, and the older versions may not be infected.
• Prohibiting the use of unauthorized programs introduced by employees.
• Prohibiting the downloading of untested software from sources such as dial-up bulletin boards.
• Using virus protection software to screen for virus infections.

Physical Security

.95 Physical security—primarily backup and contingency planning—often is ignored by small businesses in a microcomputer environment. Poor backup procedures can result in the loss of important data that are very difficult, time consuming, and costly to recreate, if they can be recreated at all.

.96 Clients generally should have established procedures for the periodic backup of data files and applications. Critical applications and files ordinarily should be stored off-site with corresponding documentation in the event that on-site files become unavailable.
Logical Access

.97 Logical access to computer applications and data files may not be formally or rigorously controlled in a small business. This leaves the company exposed to the risk that files could be inappropriately manipulated or unauthorized transactions entered into the system. For example, without logical access controls a user may be able to enter any or all sections of a general ledger or other financial module and perform file maintenance such as changing the address of an accounts receivable customer or data used to calculate payroll.

.98 Management ordinarily should identify confidential and sensitive data for which access should be restricted. Mechanisms such as password control or the use of menus can be used to limit the access to that data.

.99 In a microcomputer environment, password control may be installed over the operating system using a shell program to prevent the user from accessing menu options of a program. Even if such a restriction exists, a sophisticated user can often bypass the shell by using a utility. Therefore, the use of utility programs generally should be controlled or monitored carefully.

User Controls Over Computer Service Organization Applications

.100 Entities may use an outside computer service organization to process significant accounting information. AU section 324, Service Organizations (AICPA, Professional Standards, vol. 1), establishes requirements and provides guidance for auditors auditing entities that use computer service organizations.

.101 When using an outside computer service organization, most small businesses typically retain the responsibility for authorizing transactions and maintaining the related accountability. The computer service organization merely records user transactions and processes the related data. In these circumstances, the user (the small business) typically maintains controls over the input and output to prevent or detect material misstatement. When the service organization initiates, executes, and does the accounting processing of the user organization’s transactions, it may not be practicable for the user organization to implement effective controls for those transactions.

.102 Jones Grocery uses an outside computer service to process payroll. Time cards are gathered for each store and reviewed by the store manager before being sent to the main store. Mrs. Jones reviews the time cards for the store managers and checks to make sure all personnel have submitted time cards for the pay period. All other payroll transactions such as pay rates, withholdings, and benefits, among others, are sent directly to Mrs. Jones. She forwards all information to the payroll service, which prepares the checks and produces a payroll register. Mrs. Jones reviews the register and checks for any obvious misstatements before she distributes the checks.

Application to Medium or Large Businesses

.103 Medium and large businesses typically have more complicated computer processing systems than small businesses. They also tend to use the computer for a greater amount of processing. For example, a small business may prepare customer invoices manually by looking up prices on a master price list. A medium size business may maintain master price information on a computer file and use the computer to generate packing slips, sales invoices, and reports of unmatched documents.

.104 Medium and large businesses are also typically characterized by a separate management information services department with formally defined job descriptions and responsibilities.

.105 Instead of using off the shelf, unmodified software, the medium or large business will modify standard software or develop its own applications. Its software may be more complicated than that used by the small business; for example, the medium or large business may use a database management system or telecommunications software.
Medium and large businesses often use a mainframe computer in conjunction with microcomputers or a local area microcomputer network. Information is frequently transferred between the mainframe and microcomputers that may be located on-site or at a remote location.

Control activities in a computerized environment generally comprise a combination of the following:
- User control activities
- Programmed control activities and manual follow-up
- Computer general control activities

User controls. User control activities are manual checks of the completeness and accuracy of computer output against source documents or other input. For example, an entity may have programmed procedures in a billing system that calculate sales invoice amounts from shipping data and master price files. The entity may also have a procedure to manually check the completeness and accuracy of the invoices. In many systems, user controls relate only to the completeness of records and not to the accuracy of processing.

Programmed control activities and manual follow-up activities. Programmed control activities are those that are built into the computer processing program; for example, the generation of an exception report. However, an exception report is useless unless the client follows up on the items listed. Thus, in addition to understanding the nature of the programmed control activities, the auditor may also obtain an understanding of the related manual follow-up procedures.

Computer general control activities. If computer general control activities operate effectively, there is greater assurance that programmed control activities are properly designed and function consistently throughout the period. The auditor may plan to understand computer general control activities to provide evidence that
- programs are properly designed and tested in development;
- changes to programs are properly made;
- computer operations ensure the proper use of application programs and data files; and
- adequate access controls reduce the risk of unauthorized changes to the program and data files.

The following table summarizes computer general control activities.

<table>
<thead>
<tr>
<th>Area</th>

(continued)
Obtaining an Understanding of Significant Account Balances and Transaction Cycles

.112 As discussed in paragraph .83 of AU section 314, the auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting to understand

- the classes of transactions in the entity’s operations that are significant to the financial statements;
- the procedures, both automated and manual, by which transactions are initiated, authorized, recorded, processed, and reported from their occurrence to their inclusion in the financial statements;
- the related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, recording, processing, and reporting transactions;
- how the information system captures other events and conditions that are significant to the financial statements; and
- the financial reporting process used to prepare the entity’s financial statements, including significant accounting estimates and disclosures.

.113 Accounting processing. In obtaining an understanding of how a client processes accounting information—from the initiation of the transaction to its inclusion in the financial statements—the auditor may focus on how the computer is used to process data and the ways in which transactions are valued, classified, and summarized in data files, journals, or ledgers. For some transactions, there may be several
significant processing activities and accounting records, including the use of computer programs. Other
transactions may involve only limited processing activities performed manually.

.114 At Jones Grocery, sales are initiated by customers and recorded in the cash register. At the end of the day the
cash register totals are reconciled to the cash on hand, and a deposit is prepared for the day’s receipts. On a weekly basis,
the daily cash register tapes are batched for each store, forwarded to Mrs. Jones, and entered into the computer. The
computer generates a sales register, a sales analysis report, and posts the sales totals to the general ledger. Also, the
processing of inventory transactions (for example, receipt of goods, sales, and spoilage) involves several processing
activities that are linked in the inventory module of the software package. On the other hand, recording depreciation
expense is fairly simple. Fixed assets and the related depreciation are maintained on a computer spreadsheet, and each
month, Mrs. Jones prepares a journal entry to record depreciation.

.115 Understanding the accounting processing also involves understanding the information used for
processing and when processing occurs. For example, when considering the completeness assertion, the
auditor may obtain an understanding about whether transactions entered into the computer system are
processed immediately or in batches and how frequently batches are processed.

.116 The processing of accounting information may involve end user computing. End user computing occurs
when the user is responsible for the development and execution of the computer application that generates
the information used by that same person.

.117 Mrs. Jones developed and maintains the fixed asset spreadsheet that serves as the source document for her
monthly depreciation expense journal entry.

.118 In general, the product of end user computing may be used to

- process significant accounting information outside of the off the shelf accounting software package
  (for example, the fixed-asset spreadsheet is separate from the Jones Grocery general ledger software
  package);
- make significant accounting decisions (for example, a spreadsheet application may be used to
  generate information used to write down inventory); and
- accumulate footnote information (for example, a spreadsheet may be used to calculate the five-year
debt maturity disclosure).

.119 Generally, end users have no training in the formal computer application development process.
Accordingly, applications developed by end users are often inadequately tested, and the development process
is often not documented. This situation can cause significant difficulties for an organization if the end user
computing application is critical to making business or financial decisions.

.120 The access to end user computing applications may also be an audit concern. Many computer
applications used in end user computing come with on-line systems that are capable of restricting users to
specific applications, specific departments, or even specific fields. Often, however, these access restrictions
facilities are not implemented.

.121 To address these concerns and to ensure the end user applications process data completely and
accurately, the auditor may look for control policies and procedures that

- require all significant end user applications to be adequately tested before use;
- prescribe documentation standards for significant end user applications;
- provide for adequate access controls to data;
- provide a mechanism to prevent or detect the use of incorrect versions of data files;
- provide for appropriate applications controls, for example, edit checks, range tests, or reasonableness
  checks; and
support meaningful user reconciliations.

.122 Accounting records, supporting information, and specific accounts. In general, the auditor may identify the following for a client’s significant accounts and transactions:

- Source documents
- Documents converted to computer media
- Computer files that are further processed in the flow of information to the general ledger and the financial statements
- Accounts (subsidiary or general ledger master files) affected by the transaction
- Relevant accounting reports, journals, and ledgers produced in the flow of information to the general ledger and the financial statements

.123 A client’s accounting systems may create many documents, files, and reports that are useful for managing the organization; however, not all will be relevant to the financial statements.

.124 At Jones Grocery, the sales analysis report described in the preceding paragraph .114 is used for management information and analysis. The documents and reports relevant to the financial statements are the daily cash register tapes and the computer generated sales register.

.125 Other significant events and conditions. The entity’s information system may capture other events and conditions that are significant to the financial statements. This might involve, for example, nonrecurring or unusual transactions or adjustments and nonrecurring estimates.

.126 A broken water line, which is an uninsured risk, spoiled a large amount of produce and dry goods in one of the Jones Grocery stores. Based on a list of the lost inventory provided by the store manager, Mrs. Jones recorded a large spoilage loss.

.127 Financial reporting process. When gaining an understanding of the financial reporting process, the auditor may determine the extent of client procedures to prepare accounting estimates (when significant accounting estimates are called for) and information for significant disclosures. The auditor may also understand the way in which general ledger information is summarized to determine how the amounts and disclosures are reported in the financial statements.

Segregation of Duties and Management Override

.128 Small businesses are typically characterized by the following:

- A dominant owner-manager
- A lack of segregation of duties

.129 These characteristics may pose unique risks to the entity.

.130 Duties generally should be divided among different people to reduce the risk of error or inappropriate actions. For instance, responsibilities for authorizing transactions, recording them, and handling the related assets could be divided.

.131 Even small businesses with only a few employees can usually parcel out responsibilities to achieve the necessary checks and balances. If that is not possible—which may be the case on occasion—direct oversight of the incompatible activities by the owner-manager can provide the necessary control. Thus, a dominant owner-manager may be a positive element in the design of internal controls.
A dominant owner-manager may be a negative element in the design of internal control when he or she is able to override established policies and procedures.

Management override is different from management intervention. Management intervention is discussed in the preceding paragraph 35 and is described as the overrule of internal control for legitimate purposes. For example, management intervention is usually necessary to deal with nonrecurring and nonstandard transactions or events that otherwise might be handled by the system.

In contrast, management override is the overrule of internal control for illegitimate purposes with the intent of personal gain or enhanced presentation of an entity’s financial condition or compliance status.

An owner-manager might override the control system for many reasons:
- To increase or decrease reported revenue
- To boost market value of the entity prior to sale
- To meet sales or earnings projections
- To bolster bonus pay-outs tied to performance
- To appear to cover violations of debt covenant agreements
- To hide lack of compliance with legal requirements

Override practices include deliberate misrepresentations to bankers, lawyers, accountants, and vendors, as well as intentionally issuing false documents such as sales invoices.

When gaining an understanding of internal control, the auditor assesses the risk of management override.

Assessing Internal Control Strengths and Weaknesses

When obtaining an understanding of internal control, the auditor may consider the collective effect of strengths and weaknesses in various control environment factors. Management’s strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties. However, human resource policies and practices directed toward hiring competent financial and accounting personnel may not mitigate a strong bias by top management to overstate earnings.

Internal control strengths may indicate account balances, transaction classes, or assertions where you can assess control risk at low or moderate. Internal control weaknesses usually indicate areas where substantive procedures may be required. However, in situations where electronic evidence (information transmitted, processed, maintained, or accessed by electronic means) is significant, testing of the related internal control generally is necessary to obtain sufficient competent audit evidence.

In rare circumstances, the auditor’s understanding of internal control may raise doubts about the auditability of an entity’s financial statements. Concerns about the integrity of the entity’s management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. Concerns about the nature and extent of an entity’s records may cause the auditor to conclude it is unlikely that sufficient appropriate audit evidence will be available to support an opinion on the financial statements.

If the auditor concludes that it is unlikely that sufficient appropriate audit evidence will be available to support an unqualified opinion on the financial statements, the auditor should consider a qualification or disclaimer of opinion. In some cases, the auditor’s only recourse may be to withdraw from the engagement.

---

2 Control risk may be assessed in quantitative terms, such as percentages, or in qualitative terms such as high, medium, or low risk.
Practical Guidance

Readers may refer to appendix M, “Illustrative Audit Documentation Case Study: Young Fashions, Inc.,” of the AICPA Audit Guide Assessing and Responding to Audit Risk in a Financial Statement Audit for examples of how to document your understanding of internal control. Appendix M contains several subappendixes (appendix M-1–M-6). Those that are particularly relevant to internal control include the following:

- Appendix M-2, “Young Fashions: Evaluation of Entity-Level Controls,” provides example documentation of the auditors evaluation of entity-level controls, except for IT general controls. Appendix M-2 illustrates how to document your understanding of the controls relevant to the audit, including (1) an evaluation of whether the design of the control, individually or in combination, is capable of effectively preventing or detecting and correcting material misstatements and (2) a determination of whether the control exists and the entity is using it.

- Appendix M-2-1, “Young Fashions: Procedures Performed to Evaluate Entity-Level Controls,” provides illustrative documentation for the risk assessment and other procedures an auditor performs to gather information about internal control and the source of that information.

- Appendix M-3, “Young Fashions: Understanding of Internal Control—IT General Controls,” provides example documentation of the auditors evaluation of IT general controls.

- Appendix M-4, “Young Fashions: Evaluation of Activity-Level Controls—Wholesale Sales,” provides example documentation of an evaluation of activity-level controls. This case study presents only one class of transactions, sales. In practice, the auditor would evaluate activity-level controls for each significant class of transactions.

AAM Section 5000
Designing and Performing Further Audit Procedures

The material included in these sections on designing and performing further audit procedures is presented for illustrative purposes only. The nature, extent, and timing of the auditing procedures to be applied on a particular engagement are a matter of professional judgment to be determined by the auditor based on the assessed risks of material misstatement.

This manual is a nonauthoritative practice aid. Users of this manual are urged to refer directly to applicable authoritative pronouncements when appropriate. Please also note that this manual does not deal with specialized industry issues; refer to applicable AICPA Audit and Accounting Guides for industry guidance.

AAM Section 5100

Designing Further Audit Procedures

Audit Procedures for Obtaining Audit Evidence

.01 In order to draw reasonable conclusions on which to base the audit opinion, auditors should obtain audit evidence by performing audit procedures to

- obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as risk assessment procedures);
- when necessary or when the auditor has determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as tests of controls); and
- detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as substantive procedures and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.02 The auditor must perform risk assessment procedures to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.03 Tests of controls are necessary in two circumstances. When the auditor’s risk assessment includes an expectation of the operating effectiveness of controls, the auditor should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness. See AAM section 5200 for additional guidance on performing tests of controls.

.04 As described in AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1), the auditor should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor’s risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence. See AAM section 5300 for additional guidance on performing substantive procedures.

Linking the Assessed Risks to the Design of Further Audit Procedures

.05 As discussed in AAM section 3130, the auditor’s risk assessment process culminates with the articulation of the account balances, classes of transactions, or disclosures where material misstatements are most likely to occur and—even more specifically—how the misstatements may occur and the assertions that are likely to be misstated. This assessment of the risks of misstatement, which relates identified financial reporting risks to what can go wrong at the assertion level, provides a basis for the design of further audit procedures.
To reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

Overall Responses to Risks at the Financial Statement Level

The auditor’s audit response to financial statement level risks should be responsive to the assessed risk. The same is true for responses to risk at the account, assertion level, or both. It is critical that the auditor’s audit procedures are linked clearly and responsive to the assessment. This linkage between risk assessment and audit procedures is part of the audit strategy and audit plan, and it should be documented. The following paragraph describes some important characteristics of financial statement level risks. The purpose of these descriptions is to help the auditor bridge between the assessment of financial statement level risks and the subsequent response.

Characteristics of financial statement level risks that are relevant for audit purposes include the following:

- **Financial statement level risks can affect many assertions.** By definition, financial statement level risks may result in material misstatements of several accounts or assertions. For example, a lack of controls over journal entries increases the risk that an inappropriate journal entry could be posted to the general ledger as part of the period-end financial reporting process. The posting of an inappropriate journal entry may not be isolated to one general ledger account but potentially could affect any account. In general, overall audit risk increases when the magnitude or scope of an identified risk of misstatement is not known.

- **Assessing financial statement-level risks requires significant judgment.** Ultimately, the auditor relates identified risks of misstatement to what can go wrong. For example, suppose that while performing risk assessment procedures to gather information about the control environment, the auditor discovered weaknesses relating to the hiring, training, and supervision of entity personnel. These weaknesses result in an increased risk of a misstatement of the financial statements, but it will be a matter of the auditor’s professional judgment to determine the following:
  - The accounts and relevant assertions that could be affected
  - The likelihood that a financial statement misstatement will result from the increased risk
  - The significance of any misstatement

- **Risks at the Financial Statement Level May Not be Identifiable With Specific Assertions.** Control weaknesses at the financial statement level can render well-designed activity-level controls ineffective. For example, a significant risk of management override can potentially negate existing controls and procedures at the activity level in many accounts and for many assertions. Linking such a risk to specific accounts and assertions may be very difficult and may not even be possible. As another example, a client may have excellent data input controls at the application level. But if poorly designed IT general controls allow many unauthorized personnel the opportunity to access and inappropriately change the data, the well-designed input controls have been rendered ineffective. Also, strengths in financial statement-level controls such as an overall culture of ethical behavior may increase the reliability of controls that operate at the activity level. Determining the extent to which financial statement level controls affect the reliability of specific activity level controls (and, therefore, the assessment of the risks of material misstatement) is subjective and may vary from client to client.

Due to the unique characteristics of financial statement level risks, it may not be possible to correlate all of these risks to a finite set of assertions. For example, a weakness in control environment may affect all or mostly all of the accounts, classes of transactions, or disclosures and the relevant assertions. To respond
appropriately to these types of financial statement level risks, the auditor may need to reconsider the overall approach to the engagement. The following paragraph provides examples of overall responses to risks at the financial statement level that have a pervasive effect on the financial statements and cannot necessarily be mapped to individual assertions.

.10 The auditor’s overall responses to address the assessed risks of material misstatement at the financial statement level may include the following:

- Emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence.
- Assigning more experienced staff or those with specialized skills or using specialists.
- Providing more supervision.
- Incorporating additional elements of unpredictability in the selection of further audit procedures to be performed and in selecting individual items for testing.
- Making general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date. One could also focus more time and attention on audit areas more closely associated with the risk.

.11 The assessment of the risks of material misstatement at the financial statement level is affected by the auditor’s understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, the auditor should consider an appropriate response. For example, the auditor could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.12 Such considerations, therefore, have a significant bearing on the auditor’s general approach, for example, an emphasis on substantive procedures (substantive approach) or an approach that uses tests of controls as well as substantive procedures (combined approach).

.13 Paragraphs .13 and .50 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), describe the overall responses the auditor may take in response to your assessment of the risk of material misstatement due to fraud. When determining an overall audit response, the auditor may consider the assessment of fraud risk concurrently with the assessment of the risk of material misstatement due to error. The auditor can develop one overall response that is appropriate for both kinds of risks.

**Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level**

.14 Further audit procedures provide important audit evidence to support the auditor’s audit opinion. These procedures consist of tests of controls and substantive tests.

.15 The auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor’s further audit procedures and the risk assessments.

.16 In designing further audit procedures, the auditor should consider such matters as the following:
The significance of the risk and the likelihood that a material misstatement will occur. In general, the more significant (in terms of likelihood and magnitude) the risk, the more reliable and relevant audit evidence should be.

The characteristics of the class of transactions, account balance, or disclosure involved, which will help determine the nature, timing, and extent of procedures available to the auditor. For example, the gross accounts receivable balance comprises transactions with third parties, which means the auditor can contact these external parties to confirm the transactions or individual account balances. On the other hand, the allowance for doubtful accounts is an estimate prepared internally, which does not lend itself to confirmation but to other substantive tests.

The nature of the specific controls used by the entity, in particular, whether they are manual or automated.

Whether the auditor expects to obtain audit evidence to determine if the entity’s controls are effective in preventing or detecting material misstatements.

The nature of the audit procedures is of most importance in responding to the assessed risks.

.17 The auditor’s assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, the auditor may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, the auditor may exclude the effect of controls from the relevant risk assessment. This may be because the auditor’s risk assessment procedures have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level. The auditor often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

.18 Regardless of the audit approach selected, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. Because effective internal controls generally reduce, but do not eliminate, risk of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

.19 In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, the auditor’s further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in the preceding paragraph .16, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

Nature of Further Audit Procedures

.20 The nature of further audit procedures refers to the following:

- Their purpose, that is, tests of controls or substantive procedures (or dual purpose tests) and whether they are designed to test for overstatement, understatement, or both

- Their type, such as the following:
  - Inspection
  - Observation
  - Inquiry
— Confirmation
— Recalculation
— Reperformance
— Analytical procedures (including scanning)

Table 1 provides additional guidance on each of these procedures.

| Confirmation      | Confirmation is the process of obtaining a representation of information or of an existing condition directly from a knowledgeable third party. | • This procedure  
  — frequently is used in relation to account balances and their components but need not be restricted to these items;  
  — can be designed to ask if any modifications have been made to an agreement, and if so, what the relevant details are; and  
  — also is used to obtain audit evidence about the absence of certain conditions (for example, the absence of an undisclosed agreement that may influence revenue recognition).  
| Recalculation     | Recalculation consists of checking the mathematical accuracy of documents or records. | • This procedure can be performed through the use of information technology, for example, by applying a data extraction application or other computer assisted audit techniques (CAATs). |
| Reperformance     | Reperformance is the auditors independent execution of procedures or controls that were originally performed as part of the entity’s internal control | • This procedure may be performed either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable. |

### Inquiry

.21 Inquiry consists of seeking information of knowledgeable individuals. These individuals may be involved in the financial reporting process or outside of that process; they may be internal or external to the company. Inquiry is used extensively throughout the audit and often is complementary to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Asking questions of knowledgeable individuals is only part of the inquiry process. Evaluating the responses to inquiries is an equally integral part of the process.

.22 Inquiry normally involves such actions as the following:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned
- Asking clear, concise, and relevant questions
- Using open or closed questions appropriately
- Listening actively and effectively
- Considering the reactions and responses and asking follow-up questions
- Evaluating the response

.23 Responses to inquiries may provide the auditor with information he or she did not previously possess or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information the auditor has obtained, such as information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures. The auditor should resolve any significant inconsistencies in the information obtained.

.24 The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

.25 In some instances, the auditor may need to obtain evidence about management’s intended actions, for example, when obtaining evidence to support management’s classification of investments as either trading, available for sale, or held to maturity. To corroborate management’s responses to questions regarding their intended future action, the following may provide relevant information:

- Management’s past history of carrying out its stated intentions
- Management’s stated reasons for choosing a particular course of action
- Management’s ability to pursue a specific course of action

.26 In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See AU section 333, Management Representations (AICPA, Professional Standards, vol. 1), for further guidance on written representations.

Substantive Analytical Procedures

.27 Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. Analytical procedures are used for the following purposes:

a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures
b. As risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control
c. As a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions
d. As an overall review of the financial information in the final review stage of the audit

.28 Analytical procedures can be effective:

- For certain types of assertions (for example, the completeness assertion, which cannot be tested directly using a test of balances on recorded amounts)
- When the relationships between amounts are very predictable
- When the data used to develop expectations based on the relationship are reliable
- When relatively precise expectations can be developed
Analytical procedures can provide evidence supporting financial statement assertions and, thus, can be used as substantive tests. Because analytical procedures are often the least expensive tests, they may be used whenever practical.

Paragraph .05 of AU section 329, Analytical Procedures (AICPA, Professional Standards, vol. 1), describes analytical procedures as follows:

Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor’s understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

a. Financial information for comparable prior period(s) giving consideration to known changes
b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data
c. Relationships among elements of financial information within the period
d. Information regarding the industry in which the client operates—for example, gross margin information
e. Relationships of the financial information with relevant nonfinancial information

Whenever analytical procedures are applied as substantive tests, the auditor may apply the following procedures:

- Consider whether the relationship is plausible and predictable.
- Consider whether the data used for the comparison is reliable.
- Consider whether the account balance tested is consistent with the auditor’s expectations. If it is not consistent, obtain the client’s explanation for the variance and get evidence to corroborate the client’s explanation.

AU section 329 states that analytical procedures should be performed in the planning and overall review stages of all audits. See AU section 329 and AAM section 3155 for further guidance on analytical procedures.

The Selection of Audit Procedures

The auditor’s selection of audit procedures is based on the risk of material misstatement. The higher the auditor’s assessment of risk, the more reliable and relevant the audit evidence sought by the auditor from substantive procedures is. This determination of the requisite reliability and relevance of audit evidence may affect both the types of audit procedures to be performed and their combination. For example, the auditor may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management’s representation. This combination of several procedures would result in more reliable and relevant audit evidence than obtained by performing only one procedure.

In determining the audit procedures to be performed, the auditor should consider the underlying reasons for the assessment of the risk of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure. These underlying reasons relate to both the inherent and control risks related to the assertion. For example, if the auditor assessed risk of material misstatement to be low that a material misstatement might occur because of low inherent risk, the auditor may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if the auditor expects that there is a lower risk of material misstatement because the client has effective controls and the auditor intends to design substantive procedures based on relying on the effective operation of those
controls, then the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness.

.35 The auditor should obtain audit evidence about the accuracy and completeness of information produced by the entity’s information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity’s information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information.

Timing of Further Audit Procedures

.36 Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies. The auditor may perform tests of controls or substantive procedures:

- At an interim date
- At period end
- After period end, in those instances where the procedure cannot be performed prior to or at year end (for example, agreeing the financial statements to the accounting records)

.37 The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to or at the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period.

.38 In considering when to perform audit procedures, the auditor should also consider such matters as the following:

- The assessed risk of misstatement. In general, the higher the risk, the more likely it is that the auditor will perform procedures nearer to or at the period end.
- The control environment. In general, the more effective the control environment, the more likely it is that the auditor will be able to perform tests as of an interim date.
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period end).
- The period or date to which the audit evidence relates.

Extent of Further Audit Procedures

.39 Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the following:

- Tolerable misstatement
- Assessed risk of material misstatement
- Degree of assurance the auditor plans to obtain
In particular, the auditor may increase the extent of audit procedures as the risk of material misstatement increases. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk and reliable; therefore, the nature of the audit procedure is the most important consideration.

The AICPA Audit Guide *Audit Sampling* provides additional guidance on sampling for substantive testing.

**Documentation**

The auditor should document the overall responses to address the assessed risks of misstatement at the financial statement level and the linkage of those procedures with the assessed risks at the relevant assertion level. The manner in which these matters are documented is based on the auditor’s professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[The next page is 5201.]
AAM Section 5200

Performing Tests of Controls

.01 The auditor should perform tests of controls when the auditor’s risk assessment\(^1\) includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.02 When, in accordance with paragraph .117 of AU section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*, vol. 1), the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs .119–.120 of AU section 314, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using information technology (IT) and no documentation of transactions is produced or maintained, other than through the IT system.

.03 Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs .106–.108 of AU section 314 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

.04 Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures, the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about

- how controls were applied at relevant times during the period under audit,
- the consistency with which they were applied, and
- by whom or by what means they were applied.

If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

General Considerations When Testing Controls

Sources of Audit Evidence About Internal Control Effectiveness

.05 The audit evidence used to provide support for the auditor’s conclusion about the operating effectiveness of controls during the audit period may come from a variety of sources, including the following:

- Tests of controls performed during the current period.
- Risk assessment procedures performed during the current period.
- Evidence provided in a type 2 SAS No. 70 report (see AU section 324, *Service Organizations* [AICPA, *Professional Standards*, vol. 1]).
- Evidence obtained from the performance of procedures in previous audits.

---

\(^1\) The auditor’s strategy reflects the level of assurance the auditor plans to obtain regarding controls.
The information gathered and conclusions reached as part of the auditor’s quality control procedures for client acceptance and continuance. For example, client acceptance procedures may include inquiries of attorneys, bankers, or others in the business community about client management that provide insight into their competence, integrity, operating philosophy, and ethical values.

Risk Assessment Procedures vs. Tests of Controls

.06 Risk assessment procedures allow the auditor to evaluate the design effectiveness of internal controls for the purpose of assessing risks of material misstatement. Tests of controls build on the auditor’s evaluation of design effectiveness and allow the auditor to assess the operating effectiveness of controls during the operating period. The results of the auditor tests of controls are used to design substantive procedures.

.07 Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, a walkthrough or the observation of the performance of a control may provide evidence about the operating effectiveness of controls. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

Evidence of Operating Effectiveness of Controls at a Service Organization

.08 A Type 2 service auditor’s report may provide evidence about the operating effectiveness of controls at a service organization. However, controls over the information provided to the service organization may still need to be assessed.

Evaluating the Effectiveness of Complementary Controls

.09 When designing tests of controls, typically the auditor will focus first on testing control activities, because the control activities component of internal control is the one most directly related to the assertion. For example, physically counting goods that have been received and comparing the quantity and description to the vendor’s packing slip is directly related to both the existence and valuation of inventory.

.10 However, in addition to testing the controls that relate directly to the assertion, the auditor should consider the need to obtain audit evidence supporting the effective operation of the complementary controls upon which the effectiveness of the direct control depends.

.11 When considering the need to test complementary controls, the auditor may consider the following:

• The significance of the complementary control to the effective functioning of the direct control. As the effectiveness of the direct control becomes more dependent on the complementary control, the auditor’s need to test the indirect control increases.

• The relative significance of the audit evidence of the complementary control to the auditor’s conclusion on the effectiveness of the direct control. The auditor’s conclusion about the operating effectiveness of a control activity is supported by a combination of evidence about (i) the operating effectiveness of the direct control activity itself and (ii) the operating effectiveness of other, complementary controls upon which the effectiveness of the direct control depends. In some instances, the auditor may be
able to support a conclusion based primarily on tests of the direct control, with little evidence about the operating effectiveness of the related complementary controls. In other instances (for example, IT application controls), the auditor’s conclusion may be based primarily on tests of the complementary controls and little on tests of the direct control. In those situations where you rely significantly on the operating effectiveness of the complementary control, the auditor might obtain more sufficient and adequate audit evidence to support the conclusion on the operating effectiveness of the indirect control, for example, the monitoring of the performance of the reconciliation.

- The degree of reliability required of the audit evidence obtained about internal control operating effectiveness. Testing the complementary control increases the reliability of the audit evidence obtained about the operating effectiveness of the direct control. For example, the auditor may test four month-end reconciliations and draw a conclusion about the effectiveness of those reconciliations for an entire 12-month period. If the auditor has tested the operating effectiveness of the complementary controls related to the reconciliation, the conclusion about the effectiveness of the reconciliation during the period the auditor did not test will be more reliable than if the auditor did not test the complementary controls.

- Evidence of operating effectiveness that may have been obtained as part of obtaining an understanding of the design and implementation of the complementary controls. When performing risk assessment procedures to obtain an understanding of internal control, the auditor may obtain some information about the operating effectiveness of the complementary controls that are indirectly related to an assertion. For example, risk assessment procedures may provide the auditor with some evidence about the operating effectiveness of portions of the control environment. This information about operating effectiveness may be limited, but nevertheless, it may be sufficient for the purpose of drawing a conclusion about the operating effectiveness of the direct control.

.12 When testing complementary controls, the auditor may choose not to test the operating effectiveness of the entire component to which the complementary control pertains, but may limit the tests to those elements of the component that have an immediate bearing on the effectiveness of the direct control. For example, when testing controls over purchasing to place moderate reliance on them, the auditor may consider the need to test the control environment or IT general controls relating to the entire entity beyond the design and implementation assessment procedures the auditor already has performed. If practical, the auditor may limit the tests to those aspects of the control environment or IT general controls that have a direct bearing on the financial statement assertions related to purchasing. To place high reliance on the controls, the auditor may often need to gather additional evidence concerning the IT general controls and overall control environment to support high reliance on the purchasing controls.

The Relationship Between Tests of Controls and Substantive Tests

.13 There is an inverse relationship between the audit evidence to be obtained from substantive tests and that obtained from tests of controls. As the sufficiency and adequacy of the audit evidence obtained from tests of controls increases, the sufficiency and adequacy of the audit evidence required from substantive tests generally decreases. For example, in circumstances when the auditor adopts an approach consisting primarily of tests of controls, in particular related to those risks where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures, the auditor should perform tests of controls to obtain a high level of assurance about their operating effectiveness.

.14 On the other hand, the more audit evidence from substantive tests, the less audit evidence from tests of controls would be necessary. In many instances, the nature and extent of substantive tests alone may provide sufficient, adequate evidence at the assertion level, which would make the testing of control effectiveness (beyond assessing the design and implementation of the related controls) unnecessary.

A Financial Statement Audit vs. an Examination of Internal Control

.15 Testing the operating effectiveness of internal control to support an opinion on the financial statements is different from testing controls to support an opinion on the effectiveness of the internal control system.
In an attestation engagement to examine the effectiveness of internal control, the audit evidence obtained from the tests of internal control is the only evidence the auditor has to support an opinion. In contrast, when performing an audit of the financial statements, the auditor ordinarily performs both tests of controls and substantive tests. The objective of the tests of controls in a financial statement audit is to assess the operating effectiveness of controls and incorporate this assessment into the design of the nature, timing, and extent of substantive procedures. Thus, when testing controls in a financial statement audit, the auditor has flexibility in determining not only whether to test controls, and if so which controls to test, but also the level of effectiveness of those controls that is necessary to provide the desired level of support for an opinion on the financial statements.

Determining the Nature of the Tests of Controls

The nature of the procedures the auditor performs to test controls has a direct bearing on the relevance and reliability of audit evidence. When responding to assessed risks of material misstatement, the nature of the audit procedures is of most importance. Performing more tests or conducting the tests closer to the period end will not compensate for a poorly designed test that lacks sufficient relevance or reliability in gathering audit evidence about the effectiveness of a control.

The types of audit procedures available for obtaining audit evidence about the effectiveness of controls includes the following:

- Inquiries of appropriate entity personnel
- Inspection of documents, reports, or electronic files indicating performance of the control
- Observation of the application of the control
- Reperformance of the application of the control by the auditor

The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about operating effectiveness. Documentation may provide evidence about the performance of some controls; in these situations, the auditor may inspect this documentation to obtain evidence about the operating effectiveness of the control.

For other controls, complete documentation may not be available or relevant. For example, documentation of the operation may be sketchy for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed automatically by the client’s IT system. In these circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation of the performance of the control or the use of computer assisted audit techniques (CAATs). Entities can be encouraged to improve weak documentation.

Because of the limits of inquiry and observation, inquiry combined with inspection or reperformance ordinarily provide more reliable audit evidence than a combination of only inquiry and observation. For example, the auditor may inquire about and observe the entity’s procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor may supplement the observation with other observations or inquiries of entity personnel, and the auditor may also inspect documentation about the operation of such controls at other times during the audit period.

Tests of IT Controls

Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated control, combined with audit evidence about the operating effectiveness of IT general controls (and in particular, security and change controls) may provide substantial audit evidence about the operating effectiveness of the control during the entire audit period. That is, once the auditor has determined that an IT application control has been implemented (placed in operation), the auditor may draw a conclusion about
the operating effectiveness of the IT portion of the control activity, so long as the auditor has determined that relevant IT general controls are operating effectively.

Tests of Spreadsheets

.23 The development and use of spreadsheets typically lack the controls that usually are present for formal, purchased software. Absent audit evidence indicating that appropriate general controls over spreadsheets have been implemented, the auditor might continue to test spreadsheet controls even after their implementation.

Dual Purpose Tests

.24 Some audit procedures may simultaneously provide audit evidence that both

- support the relevant assertion or detects material misstatement and
- support a conclusion about the operating effectiveness of related controls.

Tests that achieve both of these objectives concurrently on the same transaction typically are referred to as dual purpose tests. For example, the auditor may examine an invoice to determine whether it has been approved and also to provide substantive audit evidence about the existence and amount of the transaction.

.25 When performing a dual purpose test, the auditor should carefully consider whether the design and evaluation of such tests can accomplish both objectives. For example, the population of controls and the population of substantive procedures should be the same. If tests on components of a balance such as receivables are designed as dual purpose tests, only evidence of the controls operating over period-end balance items will be obtained.

.26 Furthermore, when performing such tests, the auditor should consider how the outcome of the tests of controls may affect the auditor’s determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, the auditor should consider whether the sample size for substantive procedures should be increased from that originally planned.

Determining the Timing of Tests of Controls

.27 The timing of tests of controls affects the relevance and reliability of the resulting audit evidence. In general, the relevance and reliability of the audit evidence obtained diminishes as time passes between the testing of the controls and the end of the period under audit. For this reason, when tests of controls are performed during an interim period or carried forward from a previous audit, the auditor should determine what additional audit evidence should be obtained to support a conclusion on the current operating effectiveness of those controls.

.28 The timing of tests of controls depends on the auditor’s objective:

a. When controls are tested as of a point in time, the auditor may obtain audit evidence that the controls operated effectively only at that time.

b. When controls are tested throughout a period, the auditor may obtain audit evidence of the effectiveness of the operation of the control during that period.

.29 Audit evidence pertaining only to a point in time may be sufficient for the auditor’s purpose, for example, when testing controls over the client’s physical inventory counting at the period end. If, on the other hand, the auditor needs audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and the auditor should supplement those tests with others that provide audit evidence that the control operated effectively during the period under audit. For example, for an automated control, the auditor may test the operation of the control at a particular point in time. The auditor then may perform tests of controls to determine whether the control operated consistently
during the audit period, or the auditor may test with the intention of relying on general controls pertaining to the modification and use of that computer program during the audit period.

.30 The tests the auditor performs to supplement tests of controls at a point of time may be part of the tests of controls over the client’s monitoring of controls.

Updating Tests of Controls Performed During an Interim Period

.31 The auditor may test controls as of or for a period that ends prior to the balance sheet date. This date often is referred to as the interim date or interim period. The period of time between the interim date or period and the balance sheet date often is referred to as the remaining period.

.32 When the auditor tests controls during an interim period or as of an interim date, the auditor should:

• obtain audit evidence about the nature and extent of any significant changes in internal control that occurred during the remaining period and
• determine what additional audit evidence should be obtained for the remaining period.

.33 To determine what additional audit evidence the auditor should obtain to update tests of controls performed in advance of the balance sheet date, the auditor should consider the following:

• The significance of the assessed risks of material misstatement at the relevant assertion level
• The specific controls that were tested during the interim period
• The degree to which audit evidence about the operating effectiveness of those controls was obtained
• The length of the remaining period
• The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls
• The control environment
• The volume or value of transactions processed in the remaining period

.34 When testing controls as of or during an interim period, the auditor may obtain additional audit evidence about the operating effectiveness of controls during the remaining period by performing procedures such as

• extending the testing of the operating effectiveness of controls over the remaining period or
• testing the client’s monitoring of controls.

.35 For example, the auditor might perform

• inquiries and observations related to the performance of the control, the monitoring of the control, or any changes to the control during the remaining period;
• a walkthrough covering the period between the interim date and the period end; and
• the same procedures performed at interim, but directed to the period from interim to period end.

Use of Audit Evidence Obtained in Prior Audits

.36 If certain conditions are met, the auditor may use audit evidence obtained in prior audits to support the conclusion about the operating effectiveness of controls in the current audit. If the auditor plans to use evidence obtained in prior periods, the auditor should consider

• whether the use of this evidence is appropriate and
• the length of the time period that may elapse before retesting the control.
.37 The following table summarizes the factors the auditor should consider when determining whether to use audit evidence about the operating effectiveness obtained in a prior audit.

<table>
<thead>
<tr>
<th>Appropriateness of Using Evidence From Prior Audit</th>
<th>Length of Time Before Retesting Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>May be appropriate</td>
<td>May not be appropriate</td>

<td>High reliance on the control</td>
</tr>
</tbody>
</table>

.38 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in prior audits, the auditor should

- obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit and
- perform audit procedures to establish the continuing relevance of audit evidence obtained in the prior audit.

.39 Even when the auditor uses audit evidence about the operating effectiveness of controls obtained in prior periods, the auditor still should evaluate the design effectiveness and implementation of controls in the current period. The procedures performed as described in the preceding paragraph may help the auditor fulfill this responsibility; however, the auditor may have to supplement these procedures with others. For example, if the controls have not changed from the previous period but the client’s business process has, the auditor will need to determine whether the design of controls remains effective in light of the changed business processes.

.40 The auditor may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that

- have changed significantly since the prior audit,
• pertain to business processes that have changed significantly since the prior audit, and
• mitigate significant risks.

For any control that meets one of the preceding criteria, the auditor should test operating effectiveness in the current audit.

41 For example, changes in a system that enable an entity to receive a new report from the system probably is not a significant change and, therefore, is unlikely to affect the relevance of prior period audit evidence. On the other hand, a change that causes data to be accumulated or calculated differently probably is significant and, therefore, does affect the relevance of audit evidence obtained in the prior period, in which case the operating effectiveness of the control should be tested in the current period.

Rotating Emphasis on Tests of Controls

42 When the auditor plans to rely on controls that have not changed since they were last tested, the auditor should test the operating effectiveness of these controls at least once in every third year in an annual audit. There also may be some controls, such as over revenue recognition or inventories that, due to their importance to the client financial statements, might be subject to testing every two years or every year, depending on the risks, even when there are purported to be no changes in controls.

43 When there are a number of controls for which the auditor plans to use audit evidence obtained in prior audits, the auditor should test the operating effectiveness of some controls each audit. However, when the auditor is testing controls for only one or two key classes of transactions in an entity, rotating the testing of these controls may not be warranted.

Determining the Extent of Tests of Controls

44 The extent of the auditor’s tests of controls affects the sufficiency of the audit evidence obtained to support the auditor’s assessment of the operating effectiveness of controls. To reduce the extent of substantive procedures in an audit, the tests of controls performed by the auditor need to be sufficient to determine the operating effectiveness of the controls
• at the relevant assertion level and
• either throughout the period, or as of the point in time when the auditor plans to rely on the control.

45 Factors the auditor may consider in determining the extent of tests of controls include the following:
• The frequency of the performance of the control by the entity during the period.
• The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
• The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.
• The extent to which audit evidence is obtained from tests of other controls that meet the same audit objective.
• The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control). The more the auditor relies on the operating effectiveness of controls in the assessment of risk, the greater is the extent of the auditor’s tests of controls.
• The expected deviation from the control.
Sampling Considerations

.46 The auditor should consider using an audit sampling technique to determine the extent of tests whenever the control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and that it is applied frequently. When a control is applied periodically (for example, monthly reconciliations of accounts receivable subsidiary ledger to the general ledger), the auditor should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). AU section 350, Audit Sampling (AICPA, Professional Standards, vol. 1), and the AICPA Audit Guide Audit Sampling provide further guidance on the application of sampling techniques to determine the extent of testing of controls. The AICPA Audit Guide Audit Sampling also provides guidance for testing in smaller populations.

.47 The auditor should consider the expected deviation from the control when determining the extent of tests. As the rate of expected deviation from a control increases, the auditor should increase the extent of testing of the control. However, if the rate of expected deviation is expected to be too high, the auditor may determine that tests of controls for a particular assertion may not be effective. In this case, the auditor may conclude that a control deficiency exists and the auditor should consider its severity and whether it should be communicated to those charged with governance, management, or both.

Extent of Testing IT Controls

.48 Generally, IT processing is inherently consistent. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Therefore, the auditor may be able to limit the testing of an IT application control to one or a few instances of the control operation, provided that the auditor determines that related IT general controls operated effectively during the period of reliance.

Assessing the Operating Effectiveness of Controls

Evidence About Operating Effectiveness

.49 The concept of effectiveness of the operation of controls recognizes that some deviations in the way a client applies the controls may occur. Deviations from prescribed controls may be caused by factors such as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error.

.50 When the auditor encounters deviations in the operation of controls, those deviations will have an effect on the auditor’s assessment of operating effectiveness. A control with an observed non-negligible deviation rate is not an effective control. For example, if a test is designed in which the auditor selects a sample of, say, 25 items and expects no deviations, the finding of one deviation would be considered a non-negligible deviation because, based on the results of the test of the sample, the desired level of confidence has not been obtained.

.51 There are sources of audit evidence beyond the auditor’s tests of controls that contribute to the auditor’s assessment of the operating effectiveness of controls. The extent of misstatements detected by performing substantive procedures also may alter the auditor’s judgment about the effectiveness of controls in a negative direction. However, misstatement-free results of substantive tests do not indicate that a lower assessment of control risk may be substituted for the one supported by the procedures the auditor used to assess control risk.

Investigating Additional Implications of Identified Deviations

.52 When the auditor detects control deviations during the performance of tests of controls, the auditor should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions.
Deviations in the application of control activities may be caused by the ineffective operation of indirect controls such as IT general controls, the control environment, or other components of internal control. To gain an understanding of the deviations in control, the auditor may wish to make inquiries and perform other tests to identify possible weaknesses in the control environment or other indirect controls.

For example, suppose that one of the client’s primary controls related to the existence of inventory—periodic test counts—had several instances where the number of items counted by the count teams did not agree to the actual physical count of the items on hand. When gaining a further understanding of the nature of these deviations, the auditor determines that the underlying cause is poor training of the test count teams and a lack of written instructions. Training and written instructions are indirect controls that may affect the operating effectiveness of controls other than those related to existence. For example, the lack of training and instruction could result in the count teams reporting the wrong product number or description, which also could affect the valuation of inventory. This finding could cause the company and auditor to conclude that a recount is necessary once the teams are properly trained.

Assessing Effectiveness

After considering the results of tests of controls and any misstatements detected from the performance of substantive procedures, the auditor should determine whether the audit evidence obtained provides an appropriate basis for reliance on the controls. If the reliance on the controls is not warranted, the auditor should determine whether

- additional tests of controls are necessary or
- if the potential risks of misstatement will be addressed using substantive procedures.

Once the auditor has concluded that reliance on certain controls is not warranted, it is unnecessary to perform further tests of those controls.

Deficiencies in the Operation of Controls

The auditor may consider whether deviations in the operation of controls have been caused by an underlying control deficiency. When evaluating the reason for a control deviation, the auditor may consider the following:

- Whether the control is automated (in the presence of effective information technology general controls, an automated application control is expected to perform as designed)
- The degree of intervention by entity personnel contributing to the deviation (for example, was the deviation evidence of a possible override)
- Management’s actions in response to the matter (if management was aware of the deviation)

Regardless of the reason for the deviation, numerous or repeated instances of the deviation may constitute a significant deficiency or material weakness. The following are examples of circumstances that may be control deficiencies of some magnitude:

- Failure in the operation of properly designed controls within a significant account or process, for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy (for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements).
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. For example, a company uses security devices to safeguard its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. However, a preventive control failure may be mitigated by an effective detective control that prevents...
the misstatement of the financial statements. Suppose the inventory security control fails. Although
the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material
misstatement to the financial statements if performed effectively and timely (near or at the reporting
date). In the absence of a timely count, a deficient preventive control may be a deficiency in internal
controls of some magnitude.

- Failure to perform reconciliations of significant accounts, for example, accounts receivable subsidiary
  ledgers are not reconciled to the general ledger account in a timely or accurate manner.

- Undue bias or lack of objectivity by those responsible for accounting decisions, for example,
  consistent under accruals of expenses or overstatement of allowances at the direction of management.

- Misrepresentation by client personnel to the auditor (an indicator of fraud).

- Management override of controls that would enable the entity to prepare financial statements in
  accordance with generally accepted accounting principles.

- Failure of an application control caused by a deficiency in the design or operation of an IT general
  control.

.58 The following diagram summarizes the auditor’s considerations related to tests of controls.
In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor’s professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[The next page is 5301.]
AAM Section 5300

Performing Substantive Procedures

.01 The objective of substantive procedures is to detect individual misstatements that alone or in the aggregate cause material misstatements at the assertion level. Substantive procedures include the following:

- Tests of details of transactions, account balances, and disclosures.
- Analytical procedures. AU section 329, Analytical Procedures (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance on the application of analytical procedures as substantive tests.

.02 The auditor should plan and perform substantive procedures to be responsive to the related assessed risks of material misstatement. However, the auditor should perform certain tests regardless of the risk assessment because the risk assessment may not identify all risks.

- Substantive tests of material items. The auditor should perform substantive procedures for all relevant assertions for each material class of transactions, account balance, and disclosure. For example, if the auditor determines that long term debt is a material account, the auditor should perform substantive tests for all assertions that are relevant to long term debt, even if the auditor has determined that it is unlikely that the assertion could contain a material misstatement. The auditor may determine that the risk of the entity not having the obligation to repay the debt (the obligation assertion) is low, but nevertheless, the auditor should perform a substantive procedure (for example, confirming the terms of the debt with the lender) to address the risk. Because the account is material, the auditor is precluded from relying solely on risk assessment procedures or tests of controls to support the conclusion.

- Substantive tests related to the financial statement reporting system. On all engagements the auditor should
  — agree the financial statements, including their accompanying notes, to the underlying accounting records and
  — examine material journal entries and other adjustments made during the course of preparing the financial statements. The nature and extent of the auditor’s examination of journal entries and other adjustments depend on the nature and complexity of the client’s financial reporting system and the associated risks of material misstatement.

.03 When, in accordance with paragraph .110 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When the audit approach to significant risks consists only of substantive procedures, the audit procedures appropriate to address such significant risks consist of

- tests of details only.
- a combination of tests of details and analytical procedures.

That is, to address significant risks, it is unlikely that audit evidence obtained solely from substantive analytical procedures will be sufficient.
Nature of Substantive Procedures

.04 Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation.

.05 The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor’s assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor’s determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor has obtained audit evidence about the operating effectiveness of controls.

Tests of Details

.06 The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

Substantive Analytical Procedures

.07 In designing substantive analytical procedures, the auditor should consider such matters as the following:

- The suitability of using substantive analytical procedures, given the assertions. Analytical procedures may not be suitable for all assertions. For example, transactions subject to management discretion (such as a decision to delay advertising expenses) may lack the predictability between periods or financial statement accounts that is necessary to perform and effective analytical procedure.

- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed. To assess the reliability of the data used in a substantive analytical procedure, the auditor may consider its source and the conditions under which it was gathered.

- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance. The precision of the auditor’s expectation depends on (among other things)
  - the identification and consideration of factors that significantly affect the amount being audited (for example, contributions to an employee 401(k) plan depends on compensation expense and the percentage of the employer contribution committed to by management).
  - the level of data used to develop the expectation. Typically, expectations developed at a detailed level have a greater chance of detecting a material misstatement than do broad comparisons.
The amount of any difference in recorded amounts from expected values that is acceptable. The smaller the difference between the expected amount and the recorded amount that can be accepted, the more precise the expectation will typically be.

The risk of management override of controls. Management override of controls might result in adjustments to the financial statements outside of the normal financial reporting process, which may result in artificial changes to the financial statement relationships being analyzed. These artificial relationships may result in the auditor drawing erroneous conclusions about the substantive analytical procedures.

Paragraphs .57–.67 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), direct the auditor to perform certain procedures to assess the risk of management override of controls.

.08 Paragraphs .09–.21 of AU section 329 establishes standards and provides additional guidance on the design of substantive analytical procedures.

Timing of Substantive Procedures
Substantive Procedures Performed at an Interim Date

.09 In some circumstances, the auditor may choose to perform substantive procedures at an interim date. When the auditor performs procedures as of a date in advance of year end, the risk that the auditor will fail to detect a material misstatement that may exist at year end is increased. This risk increases as the length of the period between interim tests and year end increases. The following table summarizes factors that may be considered when determining whether to perform substantive procedures at an interim date.

Matters to Consider in Determining Whether to Perform Substantive Procedures at an Interim Date

<table>
<thead>
<tr>
<th>Factor to consider</th>
<th>More likely</th>
<th>Less likely</th>
</tr>
</thead>
<tbody>
<tr>
<td>Control environment and other relevant controls</td>
<td>Effectively designed or operating controls, including the control environment</td>
<td>Ineffectively designed or operating controls, including the control environment</td>
</tr>
<tr>
<td>The availability of information for the remaining period</td>
<td>Information is available that will allow the auditor to perform procedures related to the remaining period</td>
<td>Lack of information necessary to perform procedures related to the remaining period</td>
</tr>
<tr>
<td>Assessed risk</td>
<td>Lower risk of material misstatement for the relevant assertion</td>
<td>Higher risk of material misstatement for the relevant assertion</td>
</tr>
<tr>
<td>Nature of transactions or account balances and relevant assertions</td>
<td>Year-end balances are reasonably predictable with respect to amount, relative significance, and composition</td>
<td>Year-end balances can fluctuate significantly from interim balances, for example, due to rapidly changing business conditions, seasonality of business, or transactions that are subject to management’s discretion</td>
</tr>
<tr>
<td>Ability to perform audit procedures to cover remaining period</td>
<td>The auditor will be able to perform all necessary procedures to cover the remaining period</td>
<td>The auditor’s ability to perform procedures relating to the remaining period is limited, for example, by a lack of available information</td>
</tr>
</tbody>
</table>
The objective of some of the tests may make the results of the tests irrelevant if performed at an interim date. For example, tests related to the preparation of the financial statements or the client’s compliance with debt covenants typically provide relevant audit evidence only if performed at the period end.

In addition to those items described in the preceding table, the circumstances of the engagement may result in the performance of certain tests at an interim date. For example, a client may request that the auditor identify all material misstatements a short period of time after year end (which is common for companies that wish to issue a press release of their earnings for the period). In that situation, the auditor may decide to confirm receivables prior to year end because the time period between the end of the period and the release of earnings is too short to allow the auditor to send and receive confirmations of customers and to complete the test work.

The auditor’s ability to perform audit procedures relating to the remaining period depends a great deal on whether the client’s accounting system is able to provide the information needed for the auditor to perform his or her procedures. The auditor should consider whether that information is sufficient to permit investigation of the following:

- Significant unusual transactions or entries (including those at or near the period end)
- Other causes of significant fluctuations or fluctuations that did not occur
- Changes in the composition of the classes of transactions or account balances

The timing of audit procedures also involves consideration of whether related audit procedures are coordinated properly. This consideration includes, for example, the following:

- Coordinating the audit procedures applied to related party transactions and balances
- Coordinating the testing of interrelated accounts and accounting cutoffs
- Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items

When performing substantive procedures at an interim date, the auditor should perform substantive procedures or substantive procedures combined with tests of controls to cover the remaining period that provide a reasonable basis for extending audit conclusions from the interim date to the period end.

When performing substantive procedures at an interim date, the auditor may reconcile the account balance at the interim date to the balance in the same account at year end. The reconciliation will allow the auditor to

- identify amounts that appear unusual,
- investigate these amounts, and
- define the appropriate population to perform substantive analytical procedures or tests of details to test the remaining period.

If misstatements are detected in classes of transactions or account balances at an interim date, the auditor should consider modifying the related assessment of risk and the planned nature, timing, or extent of the substantive procedures covering the remaining period that relate to such classes of transactions or account balances, or the auditor may extend or may repeat such audit procedures at the period end.

Substantive Procedures Performed in Previous Audits

In most cases, audit evidence from substantive procedures performed in a prior audit provides little or no audit evidence for the current period. To use audit evidence obtained during a prior period in the current period audit, both the audit evidence and the related subject matter must not fundamentally change. For example, a legal opinion would continue to be relevant audit evidence if it were received in a prior period related to the structure of a securitization transaction and no changes have occurred during the current period.
If the auditor plans to use audit evidence from a prior period in the current audit, the auditor should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

**Extent of the Performance of Substantive Procedures**

.18 The greater the risk of material misstatement, the greater the extent of the auditor’s substantive procedures. However, the nature of the audit procedures is of most importance in responding to assessed risks. Increasing the extent of an audit procedure is appropriate only if the procedure itself is relevant to the specified risk.

.19 *Considerations for designing tests of details.* When determining the extent of the tests of details, the auditor ordinarily thinks in terms of sample size. However, the auditor also may consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population, rather than performing sampling or stratifying the population into homogeneous sub-populations for sampling. AU section 350, *Audit Sampling* (AICPA, *Professional Standards*, vol. 1), and the AICPA Audit Guide *Audit Sampling*, provide guidance on the use of sampling and other means of selecting items for testing.

**Adequacy of Presentation and Disclosure**

.20 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles (GAAP). The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with GAAP also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph .15 of AU section 326, *Audit Evidence* (AICPA, *Professional Standards*, vol. 1), for a description of the relevant assertions related to presentation and disclosure.

**Documentation**

.21 In regards to the performance of further audit procedures, the auditor should document the following:

- The overall responses to address the assessed risks of misstatement at the financial statement level
- The nature, timing, and extent of the further audit procedures
- The linkage of those procedures with the assessed risks at the relevant assertion level
- The results of the audit procedures
- The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor’s professional judgment. AU section 339, *Audit Documentation* (AICPA, *Professional Standards*, vol. 1), establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

[The next page is 5401.]
AAM Section 5400

Audit Sampling Considerations

.01 Once an auditor decides what audit procedures to apply (the nature of the tests) and when to apply them (the timing of the tests), the next decision to be made is to determine how many items to apply which procedures to—that is, the extent of testing. The greater the risk of material misstatement, the less detection risk that can be accepted, and, consequently, the greater the extent of substantive procedures. Because the risks of material misstatement include consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.02 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous subpopulations for sampling.

Authoritative Standards

.03 AU section 350, Audit Sampling (AICPA, Professional Standards, vol. 1), addresses a variety of issues relating to the auditor’s use of sampling in an audit engagement. However, AU section 350 does not always apply when the auditor is examining less than 100 percent of a population. The AICPA Audit Guide Audit Sampling presents recommendations on the application of generally accepted auditing standards to audits involving the use of audit sampling methods, and provides guidance to help auditors apply audit sampling in accordance with AU section 350.

When AU section 350 Applies

.04 Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate audit evidence to support an opinion on financial statements. AU section 350 discusses design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used

• in tests of controls in internal control to evaluate operating effectiveness from prescribed controls,
• in substantive tests of details of account balances and classes of transactions, and
• in dual purpose tests that assess control risk and test whether the monetary amount of a transaction is correct.

.05 The portion of AU section 350 pertaining to tests of controls applies when sampling techniques are used to assess control risk. The portion pertaining to substantive tests apply when sampling techniques are used to test details of transactions or balances.

.06 According to AU section 350, sampling occurs when the auditor tests less than 100 percent of a population for the purpose of evaluating some characteristic of an account balance or class of transactions. AU section 350 applies to tests of controls when such tests are performed and to tests of balances when sampling populations are material. The extent to which sampling is used in an audit depends on the size of the client and the nature of the client’s internal control. Also, if the sampling populations are small, it could be more efficient to audit individually significant items and obtain audit assurance about the remaining
balance through analytical procedures than to perform audit sampling. As the size and sophistication of the client’s internal control increases, the auditor is more likely to use audit sampling to perform tests of controls and tests of balances.

.07 In determining whether AU section 350 is applicable to circumstances in which an auditor examines less than 100 percent of the items making up an account balance or class of transactions, the auditor should consider the purpose of the test. AU section 350 establishes standards and provides guidance when the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class. For example, if the auditor intends to examine selected sales invoices to draw a conclusion about whether sales are overstated, audit sampling as described in AU section 350 is applied because the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to assess the accuracy and valuation of the remaining invoices, the auditor is not sampling according to AU section 350—the examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated is based on the results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed on the smaller items related to overstatement of sales. However, in practice, it is difficult to attain high assurance regarding a significant aggregate amount of smaller items in the population from procedures other than sampling, such as analytical tests.

.08 The way in which the population is defined can determine whether the requirements of AU section 350 apply. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables, and employee receivables. Each of these populations can be tested using a different audit strategy—some using audit sampling and others not. The sampling concepts in AU section 350 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

Authoritative Guidance About the Application of Audit Sampling to Substantive Tests Provided by AU Section 350

.09 AU section 350 contains the following provisions regarding sampling in connection with substantive testing:

- The concept that some items exist for which, in the auditor’s judgment, acceptance of some sampling risk is not justified, and that these should be examined 100 percent (see paragraph .21 of AU section 350). This simply reminds the auditor that some of the items encountered in an examination of financial statements may be so significant individually or may have such a high likelihood of being in error or misstated that all such items should be examined.

- The suggestion that the efficiency of a sample may be improved by separating items subject to sampling into relatively homogeneous groups based on some characteristic (see paragraph .22 of AU section 350). This indicates that audit efficiency can sometimes be improved by, for example, stratifying or segregating the items constituting a balance or class of transactions into groups based on individual dollar value or some other characteristic.

- Paragraph .18 of AU section 350 establishes a requirement that the auditor considers tolerable misstatement in planning audit sampling applications in the examination of account balances and classes of transactions. The auditor should consider, in the early stages of an audit, how much misstatement the auditor will be able to tolerate for each balance and class of transactions that is sampled, in combination with misstatements in other accounts, and still render an unqualified opinion on the financial statements. According to AU section 350, the auditor should consider tolerable misstatement and to recognize that it is one of the factors influencing sample size.

- Paragraph .24 of AU section 350 establishes a requirement that the auditor selects a sample that can be expected to be representative of the population. Simply put, this means that each item in the population being sampled should have a chance of being selected, not necessarily an equal chance of
being selected. This does not mean that the auditor should use a random or probability sample, but that he or she should use a method that avoids bias (for example, selecting only simple transactions for testing).

- Paragraph .25 of AU section 350 establishes a requirement that the auditor considers selected sample items to which the auditor is unable to apply planned audit procedures to determine their effect on the evaluation of the sample. For example, sometimes the auditor may not be able to apply planned audit procedures to selected sample items because the entity may not be able to locate supporting documentation. If the auditor’s evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion.

- Paragraph .26 of AU section 350 establishes a requirement that the auditor projects the misstatement results of the sample to the items from which the sample was selected. Because the sample is expected to be representative of the population from which it was selected, misstatements found are also expected to be representative of the population. The auditor should measure the likely misstatement in the population from which the sample was drawn and to consider it in reaching his or her conclusions.

- Paragraph .30 of AU section 350 establishes a requirement that the auditor considers, in the aggregate, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications, along with other relevant audit evidence, when evaluating whether the financial statements taken as a whole may be materially misstated.

Documentation Requirements

.10 AU section 350 contains no specific documentation requirements. However, the documentation standards set forth in the Statements on Auditing Standards dealing with documentation apply to audit sampling applications just as they apply to other auditing procedures. AU section 311, Planning and Supervision (AICPA, Professional Standards, vol. 1), states that the auditor “must develop an audit plan in which the auditor documents the audit procedures,” and AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), states that audit documentation of tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include an identification of the items tested. The identification of the items tested may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- when a haphazard or random sample is selected, the documentation should include identifying characteristics (for example, the specific invoice numbers of the items included in the sample);

- when all items over a specified dollar amount are selected from a listing, the documentation need describe only the scope and the identification of the listing (for example, all invoices over $25,000 from the December sales journal); and

- when a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

With regard to audit sampling applications, the audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. Examples of items that the auditor may document for tests of controls are discussed in paragraph .25 of this section. Examples of items that the auditor typically documents for substantive tests are discussed in paragraph .55 of this section.
Determining Extent of Testing in a Small Business Without Sampling

.11 Small businesses have certain characteristics that may influence the auditor’s decision to use audit sampling.

.12 For substantive testing, small businesses frequently have small populations of accounting data in both account balances and classes of transactions. Consequently, sampling may not be necessary when the necessary audit assurance is attained by examining a significant portion or aggregate value of all the transactions.

.13 Paragraph .01 of AU section 350 defines audit sampling as “the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.” This definition allows some alternative approaches to sampling to determine the extent of testing in a small business engagement. These alternatives, by not using audit sampling and thus eliminating the requirements of AU section 350, may provide a more effective and efficient audit approach for a small business engagement.

.14 These alternative approaches include the following:
   • Procedures applied to 100 percent of a certain group (strata) of transactions or balances
   • Testing unusual items without applying procedures to the remainder of the population
   • Other tests that involve application of procedures to less than 100 percent of the items in the population without drawing a conclusion about the entire account or class of transactions

.15 The auditor should decide what audit procedures to perform to meet the established audit objectives. Once this decision is made, the auditor needs to determine the extent of testing.

.16 An effective and efficient approach to determining the extent of testing in a small business engagement is shown in flowchart 1. This approach involves four important steps.

Identification of Individual Items to Be Examined

.17 The auditor is required to apply professional judgment in determining which individual items in an account balance or class of transactions need to be examined. In evaluating individual items, the auditor should consider factors such as the size of the item, whether the item is unusual, prior experience with the client, and whether the item involves a related party.

.18 For example, consider the following information for accounts receivable of a small business.

<table>
<thead>
<tr>
<th>Number of Accounts</th>
<th>Balances</th>
<th>Total Accounts</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>$100,000 or more</td>
<td>$625,000</td>
</tr>
<tr>
<td>7</td>
<td>$25,000–99,999</td>
<td>375,000</td>
</tr>
<tr>
<td>62</td>
<td>$1–24,999</td>
<td>300,000</td>
</tr>
<tr>
<td>73</td>
<td>$1,300,000</td>
<td></td>
</tr>
</tbody>
</table>

In this case, if the eleven largest accounts are confirmed by the auditor, most of the accounts receivable balance is supported ($1,000,000 out of $1,300,000, or 77 percent). Provided the remaining $300,000 is not greater than tolerable misstatement or can be tested through other audit procedures, it may not be necessary to design a sample of the remaining items. Also, the auditor may decide to confirm the receivables that have unusual characteristics (for example, receivables with either large credit balances or those that are very delinquent).
Flowchart 1
An Audit Sampling Approach for a Small Business

Step

1. Given the audit objective, determine the specific audit procedures to be performed.

2. Identify individual items to be examined.
   
   Is extent of audit evidence obtained from examining individual items sufficient?
   
   Yes
   
   2. Consider the contribution of other procedures.
      
   No
      
   3. Accept evidence as sufficient.
      
   Is evidence sufficient?
      
   Yes
      
   4. Apply sampling.
Is Extent of Audit Evidence Obtained Sufficient?

.19 The following are some factors in evaluating the sufficiency of audit evidence obtained in tests of details for a particular account balance or class of transactions:

- The individual importance of the items examined. If the items examined, account for a high percentage of the total population, then the auditor may be reasonably assured that there is an acceptably low risk of an undetected misstatement.
- The nature and cause of misstatements. If during the course of the audit, misstatements are discovered, those misstatements should be evaluated to determine if they are due to differences in principle or in application, are errors or fraud or are due to misunderstanding of instructions or carelessness.
- Possible relationship of the misstatement to other phases of the audit. If it is determined that the misstatement is due to fraud, this would ordinarily require a broader consideration of the possible implications than would the discovery of an error.
- The characteristics of the sample to the population. The auditor may obtain some knowledge of the types of items in the population if the characteristics in the sample are similar in nature and the same controls are followed for processing the transactions.

Consider Contribution of Other Procedures

.20 The auditor may also consider whether other evidence obtained contributes to conclusions regarding the account balance or class of transactions. The auditor often considers the contribution of other procedures at the same time the extent of audit evidence obtained from examining individual items is considered.

.21 The auditor may use a combination of analytical procedures and substantive tests of details to support an opinion on the financial statements. In deciding whether other audit procedures make a contribution, the auditor may consider whether they support the audit objectives in the area, whether they indicate potential problems, and whether the evidence is consistent with the previous evidence obtained.

.22 In considering the contribution of other procedures, the auditor should use professional judgment in determining whether an unqualified opinion can be given without performing additional tests in the form of audit sampling.

Evaluation of Sufficiency of Evidence

.23 There are four factors that the auditor may consider in evaluating the sufficiency of audit evidence obtained from examining individual items and contributed by other procedures, and in determining whether the remaining items in the population should be tested.

.24 First, the auditor should consider whether the dollar amount of the remaining population is equal to or greater than an amount that would individually or in combination with other untested amounts be material to the financial statements. If the remaining population is less than material, the auditor may decide that no additional sampling is necessary, but may consider whether other procedures can provide sufficient assurance that any misstatement of the remaining population is not significant. Second, the auditor should consider the degree of risk involved (that is, how susceptible the account is to misstatement, and whether there have been problems with this area in prior audits). Third, the auditor should consider the sufficiency of all the audit evidence obtained so far (the extent of audit evidence obtained by testing individual items along with the contribution of other procedures). The final factor is the qualitative aspects of the misstatement. These include (a) the nature and cause of misstatements, such as whether there are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (b) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.
Audit Sampling for Tests of Controls

25 AU section 350 indicates that an auditor may use nonstatistical or statistical sampling in performing tests of controls. This section provides guidance for both approaches. Regardless of whether nonstatistical or statistical sampling is being used, audit sampling for tests of controls involves the following steps:

- **Determine the objective of the test.** The objective of tests of controls is to provide evidence about the operating effectiveness of controls. Audit sampling for tests of controls is generally appropriate when application of the control leaves documentary evidence of performance. Normally, audit sampling for tests of controls will involve selecting a sample of documents and examining them for evidence that the relevant controls were applied. Tests of controls involving observation of performance of procedures or inquiries of the client are not normally subject to audit sampling. As with any test, it should be related to a relevant assertion.

- **Define the deviation conditions.** A deviation condition is a situation that indicates that the controls were not performed. For example, if the auditor is examining purchase invoices for evidence of approval of an expenditure (for example, the initials of the approving individual), a deviation condition would be an invoice that is not initialed by the appropriate individual. Performance of a control consists of all the steps the auditor believes are necessary to support the assessed level of control risk. For example, assume that a prescribed control requires that support for every disbursement should include an invoice, a voucher, a receiving report, and a purchase order, all stamped “Paid.” The auditor believes that the existence of an invoice and a receiving report, both stamped “Paid,” is necessary to indicate adequate performance of the control for purposes of supporting the assessed level of control risk. Therefore, a deviation may be defined as “a disbursement not supported by an invoice and a receiving report that have been stamped ‘Paid.’”

- **Define the population.** The population selected should be appropriate for the objective being tested. For example, if the auditor is testing the operating effectiveness of a prescribed control designed to ensure that all shipments were billed, the auditor would not detect deviations by sampling from billed items. An appropriate population for detecting such deviations usually includes the record of all items shipped.

- **Defining the period covered by the test.** For samples to be representative of the period under audit, the population generally includes all transactions processed during the period. Often, auditors perform tests of controls during interim work. The auditor should determine what additional evidence needs to be obtained for the remaining period. Often, the auditor obtains the additional evidence by extending the test to the transactions occurring in the remaining period. However, it is not always efficient to include all transactions executed throughout the period under audit in the population to be sampled. In some cases, it might be more efficient to use alternative approaches to test the performance of the control during the remaining period. In these cases the auditor would define the population to include transactions for the period from the beginning of the year to an interim date and consider the following factors in determining what, if any, additional evidence needs to be obtained for the remaining period:

  - The significance of the assertion involved
  - The specific controls that were tested during the interim period
  - Any changes in controls from the interim period
  - The extent to which substantive tests were changed as a result of the controls
  - The results of the tests of controls performed during the interim period
  - The length of the remaining period
  - The audit evidence about design or operation of controls or substantive correctness of the balances or transactions in the interim period that may result from the substantive tests performed in the remaining period
  - The relevance and effectiveness of information technology general controls
The auditor selects sampling units from a physical representation of the population. For example, if the auditor defines the population as all customer receivable balances as of a specific date, the physical representation might be a printout of the customer accounts receivable trial balance as of that date. Making selections from a controlled source minimizes differences between the physical representation and the population. The auditor should consider whether the physical representation includes the entire population. If the auditor reconciles the selected physical representation and the population and determines that the physical representation has omitted items in the population that should be included in the overall evaluation, the auditor should select a new physical representation or perform alternative procedures on the items excluded from the physical representation.

- **Defining the sampling unit.** The sampling unit is defined in light of the control being tested. A sampling unit may be, for example, a document, an entry, or a line item, where examination of the sampling unit provides evidence of the operation of the control. An important efficiency consideration in selecting a sampling unit is the manner in which documents are filed and cross-referenced.

- **Determine the method of selecting the sample.** Any sample that is selected should be representative of the population (selected in an unbiased manner) and all items should have an opportunity to be selected. Random number selection is generally used when statistical sampling is being applied. When nonstatistical sampling is applied, random number sampling, systematic sampling, haphazard sampling, and block sampling are methods that might be used to obtain a representative sample. Methods of selecting samples are discussed beginning at paragraph .60 of this section.

- **Determine the sample size.** Sample sizes for tests of controls are affected by (a) the risk of assessing control risk too low, (b) the tolerable rate, (c) the expected population deviation rate, and (d) any effects of small population sizes.

- Guidance for determining sample size when performing nonstatistical sampling begins with paragraph .28 of this section. A description of statistical sampling begins with paragraph .31 of this section.

- **Perform the sampling plan.** Once the sample has been selected, the auditor should examine the selected items to determine whether they contain deviations from the prescribed control. If the auditor selects a voided item, and the auditor obtains reasonable assurance that the item has been properly voided and does not represent a deviation from the prescribed control, he or she should replace the voided item. If the auditor selects an unused item, he or she should obtain reasonable assurance that it actually represents an unused item, not a deviation from the control, and then replace the unused item. If the auditor is unable to examine a selected item because it cannot be located or for any other reason, and the auditor is unable to apply the planned audit procedures or appropriate alternative procedures to selected items, he or she should consider the selected items to be deviations from the controls for purposes of evaluating the sample. In addition, the auditor should consider the reasons for this limitation and the effect that such a limitation might have on his or her understanding of internal control and assessment of control risk.

- **Evaluate the sample results.** Guidance for evaluating nonstatistical sampling results begins with paragraph .30 of this section and guidance for evaluating statistical sampling results begins with paragraph .32 of this section.

- **Document the sampling procedure.** Examples of items that the auditor typically documents for tests of controls include the following:
  - A description of the control being tested. The control objectives related to the sampling application, including the relevant assertions
  - The definition of the population (the source from which the items were selected) and the sampling unit, including how the auditor considered the completeness of the population
  - The definition of the deviation condition
Factors Affecting Sample Sizes for Tests of Controls. Sample sizes for tests of controls are affected by the following factors:

- **Acceptable risk of assessing control risk too low.** The risk of assessing control risk too low is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control. Decreasing the risk of assessing control risk too low will increase the sample size.

- **Expected population deviation rate.** The expected population deviation rate is an anticipation of the deviation rate in the entire population. As the expected population deviation rate increases, the sample size will increase.

- **Tolerable rate.** Tolerable rate is the maximum rate (percentage) of deviation from a prescribed control that the auditor is willing to accept without altering the planned assessed level of control risk. Higher tolerable rates will permit smaller sample sizes.

- **Population size.** The size of the population has little or no effect on the determination of sample size except for very small populations. For example, it is generally appropriate to treat any population of more than 2,000 sampling units as if it were infinite. If the population size is under 2,000 sampling units, the population size may have a small effect on the calculation of the sample size.

The effects of these factors on the appropriate nonstatistical sample size may be summarized as follows:

<table>
<thead>
<tr>
<th>Factor</th>
<th>General Effect on Sample Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk of assessing control risk too low—</td>
<td></td>
</tr>
<tr>
<td>increase (decrease)</td>
<td>Smaller (larger)</td>
</tr>
<tr>

<td>Smaller (larger)</td>
</tr>
<tr>
<td>Expected population deviation rate—</td>
<td></td>
</tr>
<tr>
<td>increase (decrease)</td>
<td>Larger (smaller)</td>
</tr>
<tr>
<td>Population size</td>
<td>Virtually no effect</td>
</tr>
</tbody>
</table>

Sample Sizes Using Nonstatistical Sampling. The auditor using nonstatistical sampling for tests of controls uses his or her professional judgment to consider the factors described in paragraph .26 of this section in determining sample sizes.

Reference to firm sample size guidance is sufficient (that is, each team does not need to document inputs that are implicit in the firm’s sample size tables).
sampling parameters.³ It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find it helpful to be familiar with the tables in paragraphs .33–.36 of this section. Auditors using these tables as an aid in understanding relative sample sizes for tests of controls will need to apply professional judgment in reviewing the risk levels and expected population deviation rates in relation to sample sizes. Also, an auditor may decide to establish guidelines for sample sizes for tests of controls based on attribute sampling tables.

.30 After completing the examination of the sampling units and summarizing deviations from prescribed controls, the auditor evaluates the results.

- **Calculate the deviation rate.** Calculating the deviation rate in the sample involves dividing the number of observed deviations by the sample size.

- **Consider sampling risk.** When evaluating a sample for a test of controls, consideration may be given to sampling risk.

- **Consider the qualitative aspects of deviations.** In addition to evaluating the frequency of deviations from pertinent controls, the auditor should consider the qualitative aspects of the deviations.

- **Reach an overall conclusion.** The auditor uses professional judgment to reach an overall conclusion about the effect that the evaluation of the results will have on the assessed level of control risk and on the nature, timing and extent of planned substantive tests.

.31 **Sample Sizes Using Statistical Sampling.** The appropriate statistical method for tests of controls is attributes sampling, which is a technique designed to estimate qualitative characteristics of a population. Attributes sampling is most commonly used in auditing to test the rate of deviation from a prescribed control to support the auditor’s assessed level of control risk.

.32 Applying attributes sampling involves performing the following steps:

a. **Decide on the attributes to test.** The tests of controls may include the testing of one or more attributes. Proper evaluation of the results may require testing and evaluating each attribute separately.

b. **Define the population from which the sample items should be selected.** The auditor should make sure that the population is appropriate for the audit objective as described in paragraph .25 of this section.

c. **Specify the following factors:**

- **Acceptable risk of assessing control risk too low.** There is an inverse relationship between the risk of assessing control risk too low and sample size. If the auditor is willing to accept only a low risk of assessing control risk too low, the sample size would ordinarily be larger than if a higher risk were acceptable. When auditors seek high assurance from important controls, the risk is often set at 10 percent or less.

- **Tolerable rate.** Higher assessments of control risk will permit higher tolerable deviation rates. When auditors seek high assurance from important controls, the tolerable deviation rates are generally set at 10 percent or less.

- **Expected population deviation rate.** The auditor’s expectations may be based on prior year’s tests and the control environment. The prior year’s results may be considered in light of changes in the entity’s internal control and changes in personnel. Sample sizes will increase significantly as the expected population deviation rate increases from zero. If the deviation rate in the sample turns out to be higher than the rate specified by the auditor in determining the sample size, the sample results will not support the auditor’s planned assessed level of control risk.

³ This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.
d. **Determine the appropriate sample size.** Example sample sizes are found in the tables in paragraphs .33–.34 of this section. The table in paragraph .33 is designed for a risk of assessing control risk too low of 5 percent, and the table in paragraph .34 is designed for a 10 percent risk of assessing control risk too low. With the tolerable rate and the expected population deviation rate, the auditor may find the sample size from the table. The numbers in parentheses are the number of deviations that may be found in the sample and still support the auditor’s planned assessed level of control risk.

e. **Randomly select the sample from the population.** The section beginning at paragraph .60 of this section describes the methods that may be used to select a random sample.

f. **Perform the audit procedures to identify deviations in the sample.**

g. **Calculate the statistical results.** Using the tables in paragraphs .35–.36 of this section or the appropriate risk of assessing control risk too low, determine the actual tolerable deviation rate from the sample size and the actual number of deviations found in the sample.

h. **Reassess the level of control risk.** If the sample results, along with other relevant evidential matter, support the planned assessed level of control risk, the auditor generally does not need to modify planned substantive tests. If the planned assessed level of control risk is not supported, the auditor would ordinarily either perform tests of other controls that could support the planned assessed level of control risk or increase the assessed level of control risk.

i. **Document the Sampling Procedures.** AU section 350 and the AICPA Audit Guide *Audit Sampling* do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor typically documents for tests of controls are discussed in paragraph .25 of this section. Auditors may also refer to the Audit Guide *Audit Sampling* for more information.

Audit Sampling for Substantive Tests of Details

.37 The purpose of substantive tests of details of transactions and balances is to detect material misstatements in the account balance, transaction class, and disclosure components of the financial statements. An auditor assesses the risks of material misstatement and relies on a combination of further control tests, analytical procedures, and substantive tests of details for providing a basis for the opinion about whether the financial statements are materially misstated. When testing the details of an account balance or class of transactions, the auditor might use audit sampling to obtain evidence about the reasonableness of monetary amounts.

.38 The auditor uses professional judgment to determine whether audit sampling is appropriate. Sampling may not always be appropriate. For example, the auditor may decide that it is more efficient to test an account balance or class of transactions by applying analytical procedures.

.39 When an auditor plans any audit sampling application, the first consideration is the specific account balance or class of transactions and the circumstances in which the procedure is to be applied. The auditor generally identifies items or groups of items that are of individual significance to an audit objective and relevant assertion. For example, an auditor planning to use audit sampling as part of the tests of an inventory balance as well as observing the physical inventory would generally identify items that have significantly large balances or that might have other special characteristics.

.40 The auditor considers all special knowledge about the items constituting the balance or class before designing audit sampling procedures. For example, the auditor might identify 20 items that make up 25 percent of the account balance, and decide that those items should be examined 100 percent and excluded from inventory subject to audit sampling. Any items that the auditor has decided to test 100 percent are not part of the population subject to sampling.

.41 A population for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. In some circumstances, an auditor might examine all the items that constitute an account balance or class of transactions that exceed a given amount or that have an unusual characteristic; the auditor might either (a) apply other auditing procedures (for example, analytical procedures) to items that do not exceed a given amount or possess an unusual characteristic or (b) apply no auditing procedures to them because there is an acceptably low risk of material misstatement existing in the remaining items.

.42 Once a decision has been made to use audit sampling, the auditor may choose between statistical and nonstatistical sampling. The choice is primarily a cost-benefit consideration. Statistical sampling uses the laws of probability to measure sampling risk. Any sampling procedure that does not measure the sampling risk is a nonstatistical sampling procedure.

.43 Determining the test objectives. A sampling plan for substantive tests of details might be designed to (a) test the reasonableness of one or more assertions about a financial statement amount (for example, the existence of accounts receivable) or (b) make an independent estimate of some amount (for example, the last in, first out [LIFO] index for a LIFO inventory). The auditor should carefully identify the characteristic of interest (for example, the misstatement) for the sampling application that is consistent with the audit objective.

.44 Defining the population. The population consists of the items constituting the account balance or class of transactions of interest. The auditor should determine that the population from which he or she selects the sample is appropriate for the specific audit objective because sample results can be projected only to the population from which the sample was selected.

.45 Defining the sampling unit. A sampling unit is any of the individual elements that constitute the population, and depends on the audit objective and the nature of the audit procedures to be applied. A
sampling unit might be a customer account balance, an individual transaction or an individual entry in a transaction. The auditor might consider which sampling unit leads to a more effective and efficient sampling application in the circumstances.

.46 Choosing an audit sampling technique. Either statistical or nonstatistical sampling is appropriate for substantive tests of details. The most common statistical approaches are classical variables sampling and monetary unit sampling.

.47 Determining the method of selecting the sample. The auditor should select the sample in such a way that the sample can be expected to be representative of the population or the stratum from which it is selected.

.48 Determining the sample size. Accounting populations tend to include a few very large amounts, a number of moderately large amounts, and a large number of small amounts. Auditors consider the variation in a characteristic when they determine an appropriate sample size for a substantive test, and, generally, the variation of the items’ recorded amounts as a means of estimating the variation of the audited amounts of the items in the population. A measure of this variation, or scatter, is called the standard deviation. Sample sizes generally decrease as the variation becomes smaller. Sample sizes from unstratified populations with high variation are generally much larger than stratified samples from the same population.

.49 In performing substantive tests of details, auditors are also concerned with two aspects of sampling risk:

a. Risk of incorrect acceptance—the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.

b. Risk of incorrect rejection—the risk that the sample supports the conclusion that the recorded amount is materially misstated when it is not. This risk is generally controlled by setting an adequate or conservative estimate of expected misstatement and increasing the sample size accordingly.

.50 When planning a sample for a substantive test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions is acceptable without causing the financial statements to be materially misstated. The maximum monetary misstatement for the balance or class is called tolerable misstatement for the sample. For a particular account balance or class of transactions, the sample size required to achieve the auditor’s objective at a given risk of incorrect acceptance increases as the auditor’s assessment of tolerable misstatement for that balance or class decreases.

.51 The auditor also assesses the expected amount of misstatement on the basis of his or her professional judgment after considering such factors as the entity’s business, the results of prior year’s tests of account balances or class of transactions, the results of any pilot sample, the results of any related substantive tests, and the results of any tests of the related controls.

.52 The effect of population size on the appropriate sample size varies according to the audit sampling method used.

.53 Performing the sampling plan. The auditor should apply auditing procedures appropriate for the particular audit objectives to each sample item.

.54 Evaluating the sample results. In evaluating sample results, the auditor should do the following:

• Project the misstatements found in the sample to the population from which the sample was selected and add that amount to the misstatements discovered in any items examined 100 percent.

• Propose known misstatements to management for correction, unless the amounts are trivial.

• Compare the tolerable misstatement for the account balance or class of transactions with the total projected misstatement, adjusted for any corrected misstatements. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement
for the population exceeds the tolerable misstatement. In accordance with paragraph .30 of AU section 350, projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

- Consider the qualitative aspects of misstatements. If the sample results suggest that the auditor’s planning assumptions were in error, appropriate action is taken.

.55 Documenting the sampling procedure. AU section 350 and the AICPA Audit Guide Audit Sampling do not require specific documentation of audit sampling applications. See paragraph .10 of this section for certain documentation requirements of AU section 339. Examples of items that the auditor may document for substantive tests include the following:

- The objectives of the test the accounts and assertions affected
- The definition of the population and the sampling unit, including how the auditor determined the completeness of the population
- The definition of a misstatement
- The risk of incorrect acceptance or level of desired assurance (confidence)
- The risk of incorrect rejection, if used
- Estimated and tolerable misstatement
- The audit sampling technique used
- The method used to determine sample size
- The method of sample selection
- Identification of the items selected
- A description of the performance of the sampling procedures and a list of misstatements identified in the sample
- The evaluation of the sample (for example, projection and consideration of sampling risk)
- A summary of the overall conclusion (if not evident from the results)
- Any qualitative factors considered significant in making the sampling assessments and judgments

.56 Nonstatistical sampling for substantive tests of Details. Paragraph .23 of AU section 350 states that to determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risk of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.4 It is important to note, however, that auditors are not required to specifically compute a statistical sample size. Nevertheless, auditors might find familiarity with sample sizes based on statistical theory helpful when applying professional judgment and experience in considering the effect of various planning considerations on sample size.

.57 The following table “Factors Influencing Sample Sizes for a Substantive Test of Details in Sample Planning” summarizes the effects of various factors on sample sizes for substantive tests of details. (The table is provided only to illustrate the relative effect of different planning considerations on sample size and is not intended as a substitute for professional judgment).

4 This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory.

</tr>
</tbody>
</table>

.58 For additional details on audit sampling, including detailed tables, auditors may refer to AICPA Audit Guide *Audit Sampling* and the appendix of AU section 350.

.59 Stratification is particularly important to increasing the efficiency of the sample. If the nonstatistical sample design is planned without stratification, the auditor should increase the sample size. Before selecting the sample, the auditor generally identifies individually significant items and may then select the sample from the remaining items using the systematic selection method, which automatically stratifies the sample, or stratify the remaining items into groups and allocate the sample size accordingly.

.60 *Evaluating the sample results.* The misstatement in the sample should be projected to the items from which the sample was selected. One method of projecting the amount of misstatement found in a sample is to divide the amount of misstatement in the sample by the fraction of total dollars in the population included in the sample. For example, if a $100 misstatement is found in a sample of 10 percent of the population, the projected misstatement would be $1,000 ($100 ÷ .10).

.61 A second method for projecting the misstatement uses the average difference between the audited and the recorded amounts of each item included in the sample. For example, if $200 of misstatement is found in a sample of 100 items, the average difference between audited and recorded amounts for items in the sample is $2 ($200 ÷ 100). An estimate of the amount of misstatement in the population may be calculated by multiplying the total number of items in the population (in this case 5,000 items) by the average difference of $2 for each sample item. The estimate of misstatement in the population is $10,000 (5,000 × 2).

Suggested Supplemental Reference Materials

.01 Suggested Supplemental Reference Materials

The following publications are useful in helping to determine the nature, timing, and extent of audit procedures. To order AICPA products, call (888) 777-7077.

- **Audit and Accounting Guides (AICPA)**
  
  Each guide describes relevant matters, conditions, and procedures unique to a particular industry, and illustrates treatments of financial statements and reports to caution auditors and accountants about unusual problems.

- **Audit Risk Alerts (AICPA)**
  
  Audit Risk Alerts complement the guidance provided in many of the Audit and Accounting Guides by describing current economic, regulatory, and professional developments that can have a significant impact on engagements.

- **Professional Standards (AICPA)**
  
  The publication features the outstanding pronouncements on professional standards issued by the AICPA, including standards for audits, compilations, and reviews.

- **Financial Statement Preparation Manual (AICPA)**
  
  This publication provides sample statements and checklists for a variety of business enterprises and governmental units.

- **Disclosure Checklist series (AICPA)** (individual paperback versions of sections of the Financial Statement Preparation Manual)
  
  The practice aids are invaluable to anyone who prepares financial statements and reports. The material has been updated to reflect AICPA, FASB, and GASB pronouncements and interpretations as well as SEC regulations.

- **Accounting Trends & Techniques (AICPA)**
  
  This publication contains reporting methods based on a cumulative survey, as well as significant accounting presentations, discussions, and trends. By following the lead of these industry front-runners, practitioners can apply the latest techniques and improve their own reporting performance.

- **Fraud Detection in a GAAS Audit (Revised edition) (AICPA)**
  
  This practice aid provides CPAs with the most recent information related to complying with AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1).

- **Technical Practice Aids (AICPA)**
  
  This publication contains all outstanding AICPA Statements of Position and Practice Bulletins and offers carefully thought-out responses to selected inquiries received by the AICPA Technical Hotline and AICPA Technical and Industry Committees.

- **Standard Form to Confirm Account Balance Information with Financial Institutions (AICPA)**
  
  This form may be used to request a full report on credit balance, liabilities, and contingent liabilities. It may also be used for a confirmation of bank balance only.

- **Accountants’ Handbook by Carmichael, Lilien & Mellman (Wiley)**
• Montgomery’s Auditing by O’Reilly, Hirsch, Defliese, and Jaenicke (Wiley)
• Handbook of Modern Accounting by Davidson & Weil (McGraw-Hill)
• Kohler’s Dictionary for Accountants by Coopers & Ijiri (Prentice-Hall)

AAM Section 6100
Audit Documentation—General

.01 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation, also known as working papers, may be recorded on paper or on electronic or other media. AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance on the form, general content, and ownership and confidentiality of audit documentation.

.02 Other Statements on Auditing Standards (SASs) contain specific documentation requirements and can be found in appendix A of AU section 339. Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement.

.03 The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation provides the principal support for the representation in the auditor’s report that the auditor performed the audit in accordance with generally accepted auditing standards and provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

.04 Among other matters, AU section 339 provides the following:

- The auditor should prepare audit documentation in connection with each engagement in sufficient detail to provide an experienced auditor with no previous connection to the audit a clear understanding of the work performed (including the nature, timing, extent and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached.

- Oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached, but they may be used by the auditor to clarify or explain information contained in the audit documentation.

- The auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), the basis for the final conclusions reached, and discussions of the significant findings or issues with management or others, including responses and when and with whom the discussion took place. If the auditor has identified information that contradicts or is inconsistent with the auditor’s final conclusions regarding a significant finding or issue, the auditor should document how the auditor addressed the contradiction or inconsistency.

- The auditor should assemble the audit documentation to form the final audit engagement file on a timely basis but within 60 days following the report release date (also known as the documentation completion date). After this date, the auditor must not delete or discard audit documentation before the end of the specified retention period and should appropriately document any subsequent additions. (Paragraphs .23–.30 of AU section 339 establish standards and provide guidance regarding revisions to audit documentation after the date of the auditor’s report.)

- A file retention period should not be shorter than 5 years from the report release date.

Audit Documentation Retention

.05 AU section 339 states that the auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any
applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than 5 years from the report release date. Statutes, regulations, or the audit firm’s quality control policies may specify a longer retention period.

.06 Determining the proper periods for retaining records is a major decision for practitioners. Records may be preserved for only as long as they serve a useful purpose or until all legal requirements are met. Record retention periods vary among firms; however, retention periods generally correspond with the longest statute of limitations prevailing in each state for breach of contract, breach of fiduciary duty, and professional liability claims.

.07 Audit documentation may be retained permanently or for periods corresponding with the longest state statute of limitations, as noted in the previous paragraph. Generally, certain audited financial statement working paper data, such as accounts receivable confirmations, are destroyed after 10 years. Examples of audit documentation that the auditor may wish to retain permanently include auditor’s reports, reports filed with the Securities and Exchange Commission, tax returns for current clients, and audit documentation for current clients. Some firms divide the retention period into 2 parts, records are first filed in the office and later placed in storage (for example, 3 years in the office and then permanently in storage). Other records, such as audit documentation files for former clients, may be retained for 3 years in the office, 7 years in storage, and then destroyed after the retention period has ended. The auditor may obtain specific approval of the engagement partner before destroying any audit documentation. An annual schedule may be established for reviewing and purging firm data. Because there is substantial variation in the retention periods used by firms, each firm may carefully consider its requirements and consult with legal counsel before adopting a retention period.

.08 For further guidance on record retention, see the AICPA Management of an Accounting Practice Handbook (online subscription product no. MAP-XX).

Ownership and Confidentiality of Audit Documentation

.09 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes.

.10 The auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information. Because audit documentation contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.11 Whether audit documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the auditor’s knowledge or could be permanently lost or damaged. Accordingly, the auditor should apply appropriate and reasonable controls for audit documentation to

a. clearly determine when and by whom audit documentation was created, changed, or reviewed;

b. protect the integrity of the information at all stages of the audit, especially when the information is shared within the audit team or transmitted to other parties via electronic means;

c. prevent unauthorized changes to the documentation; and

d. allow access to the documentation by the audit team and other authorized parties as necessary to properly discharge their responsibilities.

Documentation of Departures From the SASs

.12 In rare circumstances when the auditor departs from a presumptively mandatory requirement in the SASs, he or she must document the justification for the departure and how the alternative procedures in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.
General Discussion

.13 These sections present points of view on the organization and preparation of audit documentation.

.14 Proper planning is important in the design of specific audit documentation if the documentation is to serve the objective of aiding the auditor in the conduct of his or her work. For example, a well-planned working paper may be designed to provide information that will be needed later in the preparation of tax returns and other required reports, such as those to regulatory bodies, and may therefore eliminate the need for examining the same documents twice to obtain necessary information. The form, content, and extent of audit documentation are matters of the auditor’s professional judgment and depend on the circumstances of the engagement and the audit methodology and tools used. The individual preferences of auditors and firms may be informal common practices or expressed as part of a firm’s formal policies and procedures. A firm may consider the nature of its practice and the services commonly provided to its clients, in addition to professional standards, in developing its procedures and policies on audit documentation. Those procedures and policies may permit the flexibility necessary to meet the needs of individual engagements.

[The next page is 6201.]
AAM Section 6200

Form, Content, and Extent of Audit Documentation

.01 The form, content, and extent of audit documentation vary with the circumstances and needs of the auditors on individual engagements. Some firms, however, include various general and specific instructions on audit documentation content in their policies concerning the working papers.

.02 Examples of audit documentation are audit programs, analyses, issues, memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail), and schedules or commentaries prepared or obtained by the auditor. Abstracts or copies of the entity’s records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Audit documentation may be in paper form, electronic form, or other media.

.03 The auditor should prepare audit documentation that enables an experienced auditor, having no previous connection to the audit, to understand

a. the nature, timing, and extent of auditing procedures performed to comply with Statements on Auditing Standards and applicable legal and regulatory requirements, including (1) who performed the audit work and the date such work was completed and (2) who reviewed specific audit documentation and the date of such review;

b. the results of the audit procedures performed and the audit evidence obtained;

c. the conclusions reached on significant matters; and

d. that the accounting records agree or reconcile with the audited financial statements or other audited information.

.04 In determining the form, content, and extent of audit documentation, the auditor should consider the following factors:

- The nature of the auditing procedures to be performed
- The identified risk of material misstatement associated with the assertion or account or class of transactions, including related disclosures
- The extent of judgment involved in performing the work and evaluating the results
- The significance of the audit evidence obtained to the assertion being tested
- The nature and extent of exceptions identified
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained

Basic Elements of Format

.05 Audit documentation formats generally include at least the following for identification purposes:

- A title or heading including (a) the name of the client, (b) a caption that briefly describes the paper’s contents, (c) the nature of the engagement, and (d) the applicable period or closing date covered by the engagement
• The initials or names of the auditors who performed and reviewed the work presented in the paper and the date the paper was completed.

.06 In instances when audit documentation extends beyond 1 page, some auditors present the heading on only the lead page and fasten or staple all the applicable pages together as a unit and number each page (for example, 1 of 5, 2 of 5, and so forth). Many auditors index each working paper in some organized preestablished manner. This provides for ease in cross-referencing to other relevant papers, for more organized indexing and filing, and for a form of control over the audit documentation. (See AAM section 6300, Organization and Filing (Indexing).)

.07 Some auditors purchase standard analysis paper that includes preprinted blocks for the initials or signature of the preparer and reviewer and the dates on which the paper was prepared and reviewed. Others design their own signature and reference blocks and have them imprinted on all of their analysis paper and lined pads. These signature blocks may include captions such as the following:

• Prepared by client and tested by
• Prepared by
• Date prepared
• Date tested
• Reviewed by
• Date reviewed
• Source
• Audit documentation reference
• Footed by
• Extensions checked by

.08 Some auditors prefer to identify client preparation of schedules and analysis by notations or codes, such as PBC (prepared by client), rather than use a detailed signature and reference block.

General Considerations

.09 The following are some general considerations on audit documentation content that may be helpful:

• The auditor may include identification of the (a) source of the information presented (for example, fixed assets ledger or cash disbursements journal), (b) the nature and extent of the work done and conclusions reached (by symbols and legend, narrative, or a combination of both), and (c) appropriate cross-references to other working papers in the content of an individual working paper or group of related papers.

• The auditor should document significant findings or issues, actions taken to address them, and the basis for the final conclusions reached. If for some reason the auditor leaves the assignment before resolving all items, he or she may provide an open items listing on a separate temporary paper for the in-charge auditor’s attention. An unresolved exception or incomplete explanation in the working papers may be construed by some as indication of an inadequate audit.

• Information and comments in the audit documentation generally represent statements of fact and professional conclusions. Accordingly, the auditor may wish to refrain from using vague judgmental adjectives such as good or bad. Conclusions should be supported by documented facts, especially if they concern the adequacy of the client’s records.

• Working papers are an integrated presentation of information. The auditor may find it useful to cross-reference working papers to call attention to inter-account relationships and to reference a paper to other working papers summarizing or detailing related information.
• All inferences and conclusions should be supported in the working papers, and no misleading or irrelevant statements should be made.
• It is preferable to have negative figures in audit documentation indicated by parentheses instead of red figures to preserve their identity if the papers are photocopied or microfilmed.

Specific Considerations

.10 As mentioned in the preceding section, abstracts or copies of the entity’s records should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. Additionally, audit documentation of procedures performed, including tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include the identifying characteristics of the specific items tested.

.11 Furthermore, the auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Significant audit findings or issues include, but are not limited to, the following:
• Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to, (1) accounting for complex or unusual transactions or (2) accounting estimates and uncertainties and, if applicable, the related management assumptions.
• Results of auditing procedures that indicate that the financial statements or disclosures could be materially misstated or a need to revise the auditor’s previous assessment of the risks of material misstatement and the auditor’s responses to those risks.
• Circumstances that cause significant difficulty in applying auditing procedures that the auditor considered necessary.
• Findings that could result in modification of the auditor’s report.
• Audit adjustments. For purposes of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company’s financial information.

Timesaving Considerations

.12 There are a number of ways to save time and avoid unnecessary detail in audit documentation preparation. For example, the auditor may consider the following examples:
• Whenever possible, have the client’s employees prepare schedules and analyses. This, of course, presupposes that the client has the necessary personnel to prepare the materials.
• Use a detailed audit program that may eliminate the need for lengthy comments in the audit documentation on the scope of audit procedures. However, some believe that such comments are still necessary when a detailed program is used; this is a matter of individual firm judgment.
• Analyze asset (or liability) accounts and their related expense or income accounts on the same working paper. Examples include property, plant, and equipment; accumulated depreciation and related depreciation expense; notes receivable; accrued or prepaid interest receivable and interest income; notes payable; accrued or prepaid interest and interest expense; and accrued taxes and related provisions for tax expense.
• Avoid unnecessary computations. For example, if only the totals are meaningful and can be tested by a single independent computation, check the total and avoid the unnecessary checking of details.
• Consider using carryforward analyses for accounts that tend to remain constant each year or vary only in accordance with a constant predetermined formula. Examples may include long term assets and related depreciation or amortization such as plant, equipment, and intangibles; long term debt with predetermined payment schedules; and capital stock.

• Use symbols (tick marks) whenever possible, especially when the same symbol applies to several working papers.

Symbols (Tick Marks)

.13 When using symbols, it may be helpful to consider the following basic concepts:

• Symbols are merely a shorthand means of explaining a work step performed on a particular item of data. Symbols serve as means of conserving time and space and, if properly used, may ease review of the audit documentation.

• For a working paper to be clear to a reviewer or other reader, it is important that each symbol be clearly explained. The explanation may be located on the same page as the items subjected to the work step or on a separate legend that is clearly cross-referenced to and from the page that presents the applicable items.

• Simple, distinctive, and clear symbols can be quickly written by the preparer and easily identified by a reviewer.

.14 Applying these basic concepts is not that simple. Various auditors have conflicting notions about symbols. For example, some believe a set of standardized symbols can expedite preparation and review. Others believe that a set of standardized symbols is impractical because it lacks flexibility. Because it is generally agreed that symbols are an effective timesaver, it is desirable for firms to establish and communicate a policy on their use to maximize their potential effectiveness.

.15 The most commonly used symbols are variations on a simple checkmark—for example, a checkmark with a slash, a checkmark with a circle at the end, a double checkmark, and any one of these within a circle. This abbreviated listing alone provides eight distinctive tick marks. Symbols may also include circled letters or numbers.

AAM Section 6300

Organization and Filing (Indexing)

.01 Some auditors organize their audit documentation during the course of an engagement into general categories such as the following:

- Planning and administration
- Internal control understanding and assessment of control risk
- Substantive test audit documentation arranged in order of the balance sheet and income statement classifications
- Trial balances, consolidating working papers, journal entries (adjustments, reclassifications, eliminations for consolidation), and potential entries
- Draft reports, financial statements, and notes
- Programs, checklists, and questionnaires (some keep these as separate units, and others interfile them among working papers by statement classifications)
- General matters such as current minutes, contracts, and articles of incorporation that may apply to future engagements as well as current work

Under this approach, actual indexing and filing may be deferred until the conclusion of the engagement.

Predetermined Indexing

.02 Other practitioners and firms may use a predetermined indexing approach so that working papers can be indexed while the field work is still in progress. This offers the following advantages:

- Better control over audit documentation during the performance of field work
- Constant arrangement of audit documentation in logical order to aid in review
- Less time required in assembling and filing them into indexed files
- Quicker access to specific audit documentation after it is filed

.03 Predetermined indexing involves establishing a standard code for each section of the audit documentation using letters and numbers or numbers only. See the following table for an example.

<table>
<thead>
<tr>
<th>Two Possible Alternatives</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Working trial balance—assets</td>
<td>B/S-A</td>
</tr>
<tr>
<td>Working trial balance—liabilities</td>
<td>B/S-L</td>
</tr>
<tr>
<td>Working trial balance—income and expense</td>
<td>P/L</td>
</tr>
<tr>
<td>Cash summary schedule</td>
<td>A</td>
</tr>
<tr>
<td>Receivables summary schedule</td>
<td>B</td>
</tr>
<tr>
<td>Inventory summary schedule</td>
<td>C</td>
</tr>
</tbody>
</table>

.04 Predetermined indexing requires recognition of the need for flexibility to meet unanticipated audit documentation needs or specialized industry requirements, and it requires care to avoid undue complexity.
Excessively complex references may obstruct rather than ease audit documentation preparation, cross-referencing, and filing. Accordingly, it is helpful to develop an organizational plan adaptable to each section of the audit documentation. For example, some accountants classify working papers as lead schedules, primary detail, and secondary detail that might result in the following classification scheme for the preceding examples for cash:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Using Letters and Numbers</th>
<th>Using Only Numbers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lead schedule</td>
<td>(A)</td>
<td>(10)</td>
</tr>
<tr>
<td>Primary detail schedules</td>
<td>(A-1) (A-2) and so forth</td>
<td>(10-1) (10-2) and so forth</td>
</tr>
</tbody>
</table>

Predetermined (standardized) indexing systems may be printed on separate pages for reference during the performance of field work and insertion in the front of audit documentation binders or files when the work is completed. Some firms have their uniform indexing systems printed directly on their file or binder covers.

A well-organized indexing system need not be too complex. On a fairly small engagement, the indexing system may be a lead schedule divider tab between each major group of accounts with the name of the account on it (for example, cash or accounts receivable) with the related working papers filed behind the lead schedule without being individually indexed. At the completion of the engagement, the pages can be consecutively numbered within each account group (for example, 1 of 10, 2 of 10, and so forth). Because there typically are not numerous or complex layers of supporting schedules, extensive cross-referencing can be avoided.

On large engagements, particularly those with detailed charts of accounts, firms may consider it necessary to develop more complex indexing systems. In one such system, standard index number series are assigned as follows:

- Current audit documentation 1000–7000
- Permanent file 7100–9999

In this system, each index number has 4 digits, with the addition of decimals if necessary. Numbers ending with double zero are reserved for lead schedules whose total agrees with a line item on the working trial balance (index 1400). Single zeros are used for specific types of accounts (such as 2010, petty cash funds).

Certain index numbers can be permanently assigned to each major financial statement classification. For instance, index 2000 may be assigned to cash. If various bank accounts exist, the cash schedules are assigned index numbers 2002, 2003, and so forth. Documentation, such as supporting confirmations and lists of outstanding checks, would be assigned index numbers commencing with 2001.1, 2001.2, and so forth. As for the permanent audit documentation file, index 9300, for example, may be assigned to internal control. Accordingly, flowcharts and related questionnaires would be assigned index numbers in that series.

Current and Permanent Files

Audit documentation files are generally classified as current files and permanent (continuing) files. Current files contain information that is pertinent to a single engagement. Permanent files include information relevant to several recurring engagements. Some firms have their binder or file covers preprinted as current or permanent accompanied by pertinent portions of their uniform audit documentation indexes.
A common challenge to many auditors is to keep the permanent file complete, current, and free from outdated or irrelevant materials that belong in an inactive file of superseded materials.

Some auditors who have confronted many unwieldy permanent files believe that it is better to classify all audit documentation as current with certain materials designated as matters of continuing interest to be carried forward each year until they become outdated. Under this approach, a firm may preprint its complete index on 1 type of file or binder cover and provide space to indicate whether specific contents are continuing or carry forward in nature. Regardless of the approach used, it is important to recognize that the provisions of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), apply to current year audit documentation maintained in any type of file (this includes permanent files) if such documentation serves as support for the current year’s audit report.

The requirements and guidance in AU section 339 also apply to permanent files. Accordingly, permanent files should be reviewed and updated, as needed, in conjunction with the annual audit. Examples of documents that may be found in permanent files are listed in paragraph .07 of AAM section 6100.

Practice Tip
The audit documentation files should contain copies of final executed documents when needed to enable an experienced auditor to understand the work performed and conclusions reached. Any drafts or unsigned versions of documents should be replaced with final versions.

Index Topics
The following is a list of topics to consider in developing a standard index for audit documentation. This list is detailed, but it is by no means all inclusive. For example, specialized industries such as life insurance and banking need other specialized topics. Several of the topics may be eliminated, condensed, or expanded depending on the auditor’s needs and preferences:

Planning and administration
- Time and budget data
- General correspondence and memos
- Memos—current
- Notes and copies for use in next engagement
- Engagement letters
- Schedules and analyses to be prepared by client
- Minutes
- Checklist of an administrative nature if required by firm policy

Audit or work program

Matters of continuing concern
- Client’s industry—background
- Description and brief history of client
- Data and ratio analysis of client’s operations

Alternate practices of filing audit programs include
(a) putting the program in a binder that is separate and distinct from current and permanent files;
(b) putting the signed-off program in the current file; and
(c) keeping a master copy of the program in the permanent file with the signed off copies dispersed among the related audit documentation segments in the current file.
• Client’s facilities
• Articles of incorporation
• Bylaws
• Current contracts and agreements
  — Debt agreements
  — Leases
  — Labor contracts
  — Agreements with officers and key people
  — Pension plans
  — Profit-sharing plans
  — Stock warrants
  — Stock options
  — Other agreements
  — Client’s accounting policies and procedures
  — Carryforward analyses

Internal control
• Internal control questionnaire, narrative, flowcharts, and so forth
• Initial assessment of control risk memos
• Tests of controls

Reports, financial statements and footnotes, trial balances, and assembly sheets
• Reports and financial statements (including letters, if any, on reportable conditions in internal control)
• Consolidating working papers
• Consolidation eliminating entries
• Trial balance
• Adjusting journal entries
• Reclassification journal entries
• Recap of possible adjusting entries
• Assembly sheets supporting footnote disclosures (if the information is not included elsewhere in the audit documentation)
• Disclosure checklists (if required by firm policy)
• Supporting schedules (if required for reports to regulatory bodies or other reports)
• Tax return information and work sheets

2 Certain classifications may lend themselves to carry-forward audit documentation. Examples include allowances for doubtful accounts, brief summaries of confirmation response statistics, accumulated depreciation and amortization, deferred income taxes and open tax positions, long term debt, and capital accounts.
3 Internal control questionnaires may be filed as separate binders or as part of current of permanent files.
4 Some firms and practitioners keep tax return preparation working papers in files that are completely separate from other types of engagement working papers.
Assets

- Cash
- Marketable securities (and related income)
- Notes receivable (and related interest)
- Accounts receivable
  - Summary and analyses
  - Confirmation procedures
- Allowance for doubtful accounts and notes
- Inventories
  - Summary and analysis
  - Price tests, cost, and market
  - Obsolescence review
  - Observation, test counts, and cutoff data
  - Last in, first out determinations
- Prepaid expenses
- Other current assets
- Investments
- Property, plant and accumulated depreciation, and depletion and amortization
- Intangible deferred charges and amortization
- Other assets
- Intercompany accounts

Liabilities

- Notes payable (and related interest)
- Accounts payable
- Accrued liabilities other than income taxes
- Accrued income taxes (both current and deferred), related provisions, and credits
  - Federal
  - State and local
- Other current liabilities
- Long-term debt (including current maturities and capitalized leases)
- Other long-term liabilities
- Deferred income

Commitments and contingencies

- Attorney’s letters
- Abstractors of commitments and contingencies noted during review of minutes, contracts and agreements, confirmation responses, and so forth

---

5 For situations involving voluminous responses or bulk inventory listings, the bulk materials may be filed in separate binders that are cross referenced to the pertinent audit documentation (for example, accounts receivable, accounts payable, and inventory).
• Subsequent events review
• Management representation letter

Equity (capital accounts)
• Capital stock
• Additional paid-in capital
• Treasury stock
• Retained earnings
• Partnership capital

Revenue and expenses
• Operating revenues
• Cost of sales
• Selling, general and administrative
• Other operating expenses
• Other income
• Other expense
• Extraordinary and unusual items
• Secondary schedules
  — Maintenance and repairs
  — Taxes other than income taxes
  — Rents
  — Royalties
  — Advertising costs
  — Legal fees
  — Interest expense recap

AAM Section 7100

Control of Confirmations and Correspondence

.01 Generally, clients prepare correspondence and confirmation requests on their own letterhead and submit to the auditor the signed originals and copies. The auditor may obtain one or more copies to serve as file copies for the current audit documentation, second requests, and manuscript copies for the next engagement.

.02 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.03 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (a) the combined assessed level of inherent and control risk is low, (b) a large number of small balances is involved, and (c) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration.

.04 The confirmation requests could be reviewed to the extent the auditor considers necessary. For example, the auditor may perform the following for accounts receivable confirmation requests before they are mailed:

- Compare the names and addresses to the client’s records
- Compare balances per confirmation requests to the subsidiary ledger

.05 The requests may then be stuffed in envelopes and submitted to the post office under the auditor’s control.\(^1\)

.06 The auditor should control the mailings and receipt of responses so that the confirmation process is independent of the client.

.07 The auditor may consider including the firm’s office or post office box number as the return address on mailing envelopes so that undeliverable letters are returned to the auditor and not to the client. For mailings, the auditor may provide the envelopes or affix a label on the client’s envelope that covers the client’s return address and replaces it with the auditor’s address.

.08 Reply envelopes addressed to the auditor may be enclosed with the request letter. Reply envelopes generally have prepaid postage to encourage responses. Some auditors also use codes on the reply envelopes so that responses may be sorted by engagement before the mail is opened. This feature may be particularly useful when there are several engagements that involve voluminous mailings.

\(^1\) Interpretation No. 1, “Use of Electronic Confirmations,” of AU section 330, The Confirmation Process (AICPA, Professional Standards, vol. 1, AU sec. 9330 par. .01–.08), states that properly controlled electronic confirmations may be considered to be reliable audit evidence and discusses auditor considerations when using electronic confirmations.
If the client objects to use of the auditor's name and address, some auditors suggest that a post office box in the client's name be used, with the returns to be opened under the auditor's control for the confirmation process, and that the post office be instructed that after the box is closed subsequent mail be forwarded to the auditor.

[The next page is 7201.]
AAM Section 7200

Requests for Confirmations and Related Materials

Wording of Confirmation Request Forms

.01 Forms and correspondence used for confirmation requests should state clearly that the client is requesting that a reply be sent to the CPA. Forms and correspondence used for information requests for engagements other than audits should not refer to “an audit.” They should also use the term accountant(s) rather than auditors. Suggested wording follows:

Please send the following information to our certified public accountants [name and address of accountants] who are performing accounting services for the company.

.02 The samples of correspondence in this section include language that refers to auditors and an audit of the client’s financial statements on the assumption that an audit is being performed. This language needs to be modified if services other than an audit are being performed.
.03 Request for Bank Cutoff Statement

[Prepared on Client’s Letterhead]

[Date]

Financial Institution Official
First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of [name of client] as of [balance sheet date] and for the [period] then ended, we request that you send the following information directly to our auditors [name and address of auditors] as of close of business [balance sheet date]:

1. The information requested on the enclosed standard form(s) to confirm account balance information with your financial institution.

2. For the following account numbers, statement(s) of our account(s) and the related paid checks for the period from [balance sheet date] to [two weeks subsequent to the balance sheet date] inclusive.

<table>
<thead>
<tr>
<th>Account Number</th>
<th>Account Name</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Sincerely,
[Name of Customer]

_______________________
By:____________________

Notes:

(A) This letter should be addressed to a financial institution official who is responsible for the financial institution’s relationship with the client or who is knowledgeable about the transactions or arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.

(B) The request could be sent at least ten days prior to the audit date so the bank will be able to provide the information requested and to render the cutoff statements as requested. If the request does not reach the bank before the cutoff date, the cutoff statement will include transactions after that date.

(C) The letter may also include requests for the following:
- Confirmation of all securities or other items held for the client’s account as of the closing date for collection or safekeeping, or as agent or trustee (a listing should be provided including titles and account numbers).
- Confirmation of the list of authorized signers for the listed accounts. (This may have been previously requested at a preliminary date in connection with assessment of control risk.)
.04 Standard Form to Confirm Account Balance Information With Financial Institutions

STANDARD FORM TO CONFIRM ACCOUNT BALANCE INFORMATION WITH FINANCIAL INSTITUTIONS

CUSTOMER NAME

Financial Institution’s Name and Address

We have provided to our accountants the following information as of the close of business on _________, 20___, regarding our deposit and loan balances. Please confirm the accuracy of the information, noting any exceptions to the information provided. If the balances have been left blank, please complete this form by furnishing the balance in the appropriate space below. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other deposit and loan accounts we may have with you comes to your attention, please include such information below. Please use the enclosed envelope to return the form directly to our accountants.

1. At the close of business on the date listed above, our records indicated the following deposit balance(s):

<table>
<thead>
<tr>
<th>ACCOUNT NAME</th>
<th>ACCOUNT NO.</th>
<th>INTEREST RATE</th>
<th>BALANCE*</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. We were directly liable to the financial institution for loans at the close of business on the date listed above as follows:

<table>
<thead>
<tr>
<th>ACCOUNT NO./DESCRIPTION</th>
<th>BALANCE*</th>
<th>DATE DUE</th>
<th>INTEREST RATE</th>
<th>DATE THROUGH WHICH INTEREST IS PAID</th>
<th>DESCRIPTION OF COLLATERAL</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(Customer’s Authorized Signature)  
(Date)

The information presented above by the customer is in agreement with our records. Although we have not conducted a comprehensive, detailed search of our records, no other deposit or loan accounts have come to our attention except as noted below.

(Financial Institution Authorized Signature)  
(Date)  

[Title]

EXCEPTIONS AND/OR COMMENTS

Please return this form directly to our accountants:

[ ]

* Ordinarily, balances are intentionally left blank if they are not available at the time the form is prepared.

[ ]
.05 Request for Confirmation of Petty Cash Fund and Advances to Employees

[Prepared on Client’s Letterhead]

[Date]

[Name]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the balance of the petty cash fund (or amount of advances) in your possession as of December 31, 20XX which was shown by our records as $_______.

Please indicate in the following space provided whether the amount above agrees with your records. If not, please send the auditors any information you have that will help them reconcile the difference.

After signing and dating your reply, please return it directly to the auditors. A stamped, addressed enveloped is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]

The foregoing information is in agreement with my records as of December 31, 20XX with the following exceptions (if any):

____________________________________________________

____________________________________________________

____________________________________________________

Date:_____________________________  Signed:________________________
.06 Securities and Cash in Custodian or Trust Accounts

[Prepared on Client’s Letterhead]

[Date]

[Name of Custodian or Trustee]

[Address]

Our auditors, [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the enclosed list of securities owned at [date] and the amount of principal and income of cash held by you at that date for each of the following accounts:\(^1\)\(^2\)

[If a list is not obtained from the client, the auditor may complete the following for each account:

<table>
<thead>
<tr>
<th>Name of Account</th>
<th>Account No.(^3)</th>
<th>Amount Held</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.______________</td>
<td>___________________</td>
<td>____________</td>
</tr>
<tr>
<td>2.______________</td>
<td>___________________</td>
<td>____________</td>
</tr>
<tr>
<td>3.______________</td>
<td>___________________</td>
<td>____________</td>
</tr>
</tbody>
</table>

Please also indicate to the auditors whether or not to your knowledge any of the securities are pledged or otherwise encumbered.

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]

\(^1\) This letter may be expanded, if necessary, to request cutoff statements of activity (principal and interest) in the accounts.

\(^2\) Sometimes this request is combined with a request for cutoff bank statements and the standard form to confirm account balance information with financial institutions. However, it may be more practical to send separate letters because a bank’s commercial banking and trust departments are usually separate operations.

\(^3\) Use the custodian or trustee’s account number.
.07 Securities Held by Brokers

[Prepared on Client’s Letterhead]

[Date]

[Broker’s Name]

[Address]

In connection with the audit of our financial statements, please send directly to our auditors [name and address of auditors], a statement of our account(s) with you as of [date], indicating the following information:

1. Securities held by you for our account
2. Securities out for transfer to our name
3. Any amounts payable to or due from us

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]

____________________________________________________________________

Notes:

(A) The request may be sent so it reaches the broker sufficiently in advance of the listing date for the broker to respond in a practical manner.

(B) It may be helpful to include the account number(s) used by the broker for the client’s account(s).
.08 Sample Receipts for Return of Cash or Securities Counted by Auditor’s Representative and Cutoff Bank Statements Received Directly by the Auditors

Cash Count

The above detailed items were counted in my presence and returned to me intact by [individual's name], representative of [auditor’s firm name].

[Date and Time]  
Custodian: ________________________________
[Custodian’s Signature]

Securities Count

Received intact from [individual’s name], representative of [auditor’s firm name], the securities listed above contained in [Box ______] of the [name of bank or custodian] which were counted by him or her in my presence (or presented to him or her for count).

Date and Time: ____________________  
Signed: ________________________________
Title: _________________________________

Cutoff Bank Statement(s)

Received intact from [individual’s name], representative of [auditor’s firm name], the cutoff bank statements and related paid checks for the [period date range] for the accounts listed in the following space provided:

Date and Time: ____________________  
Signed: ________________________________
Title: _________________________________

Notes:

(A) The auditor may request that receipt(s) be written and signed in ink.

(B) For counts of petty cash funds, the receipt may be written directly on the bottom of the petty cash-count working paper. For security counts and returns of cutoff bank statements, the receipt may be prepared as a separate working paper.
.09 Accounts Receivable—Positive

[Prepared on Client’s Letterhead]

[Date]

[Customer Name]

[Address]

In connection with the audit of our financial statements, please confirm directly to our auditors [name and address of auditors] the amount of your indebtedness to us which according to our records as of [date] amounted to $______.

If the amount shown is in agreement with your records, please check “A.”

If the amount is not in agreement with your records, please check and complete “B.”

After checking the appropriate response, please sign and date your reply and mail it directly to our auditors in the enclosed envelope. DO NOT SEND ANY PAYMENTS to our auditors.

Sincerely,

[Client’s Authorized Signature]

A__________ The balance above agrees with my records.

B__________ My records show a balance of $______.

The difference may be due to the following:

____________________________________

____________________________________

____________________________________

____________________________________

____________________________________

______________________________

[Signed by]

______________________________

[Date]
.10 Accounts Receivable—Negative

[May be a sticker or stamp used on client’s statements to customers]

PLEASE CHECK THIS STATEMENT
If this statement is not correct please write promptly (using the enclosed envelope), giving details of any differences, directly to our auditors, who are now conducting an audit of our financial statements.

[Name of auditors]

[Address of auditors]

If you do not write to our auditors, they will consider this statement to be correct.
Remittances should NOT be sent to the auditors.

Notes:

(A) A negative confirmation may also be requested in letter form using similar wording.

(B) The auditor may consider sending confirmation requests at the time of the client’s regular monthly billings. Coordination of confirmation procedures with the client’s routine preparation and mailing of statements may offer efficiency to both the auditor and client.

(C) Negative confirmation requests may be used as substantive procedure to reduce audit risk only when three conditions exist: (1) the combined assessed level of inherent and control risk is low, (2) a large number of small balances is involved, and (3) the auditor has no reason to believe that the recipients of the request are unlikely to give them consideration.
.11 Notes Receivable

[Prepared on Client’s Letterhead]

[Date]

[Name]

[Address]

Our auditors [name and address of auditors] are performing an audit of our financial statements. Accordingly, please confirm directly to our auditors the amount of your indebtedness due us as of [date], which our records show as follows:

- Type of indebtedness
- Initial date of indebtedness
- Original amount of indebtedness
- Unpaid principal
- Interest rate
- Interest paid to
- Periodic payments required
- Description of collateral

If the above information is in agreement with your records, please so indicate by signing in the following space provided and then return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please so note in the following space provided the particulars shown in your records along with any information that may help reconcile the difference from our records. Payments should not be sent to the auditors.

Sincerely,

[Client’s Authorized Signature]

The above information is correct as of [date] with the following exceptions (if any):

Signed: ___________________________ Date: ___________________________
.12 Inventories Held byWarehouses or Others When Listing Is Not Provided by Client

[Prepared on Client’s Letterhead]

[Date]

[Name of Warehouse]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please send directly to our auditors the following information about merchandise held in your custody for our account as of [date]:

1. Quantities on hand. For each lot, please indicate the following:
   a. Lot number (list each lot separately)
   b. Date received
   c. Kind of merchandise
   d. Unit of measure or package
      (1) Number of units
      (2) Kind of units (box, can, crate, quart, pound, dozen, or other unit)

2. A statement about how you determined the above requested quantities; specify whether they were determined by physical count, weight, or measure or if they represent your book record

3. A list of negotiable or nonnegotiable warehouse receipts issued (if any) and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. A statement of any known liens against this merchandise.

5. The amount of unpaid charges, if any, as of [date].

Please mail your reply directly to the auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]
.13 Inventories Held by Warehouses or Others When Listing Is Provided by Client

[Prepared on Client’s Letterhead]

[Date]

[Name of Warehouse]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about the merchandise held by you for our account as of [date]:

1. The correctness of the quantities shown on the enclosed listing of such merchandise prepared from our records (a second copy is enclosed for your files). If the enclosed listing differs from the quantities you held for us as of [date], please include details of the specific differences in your response to our auditors.

2. Your statement on how you determined the correctness of the quantities you are confirming; please specify whether it was determined by physical count, weight or measure, or whether the quantities are from your records.

3. A list of negotiable or nonnegotiable warehouse receipts issued, if any, and whether or not such receipts have, to your knowledge, been assigned or pledged.

4. A statement of any known liens against these goods.

5. The amount of any unpaid charges as of [date].

Please mail your reply directly to [name and address of auditors]. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[Client's Authorized Signature]

.15 Pension Plan Actuarial Information

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 715, Compensation—Retirement Benefits, provides reduced disclosure requirements for nonissuers. Part C of this letter assumes companies have elected the reduced disclosures allowed by that statement. FASB ASC 715-20-50-5 describes the reduced disclosure requirements. For companies not electing the reduced disclosures, information required for disclosure can be obtained from Parts B and D of the letter.

[Prepared on Client’s Letterhead]

[Name of Actuary]

[Address]

In connection with the audit of our financial statements for the period ending [balance sheet date] by our independent auditors [name and address of auditors], please furnish them the information described as follows as it pertains to the XYZ Pension Plan, which is a defined benefit plan. For your convenience and in response to those requests, you may supply pertinent sections, properly signed and dated, of your actuarial or pension expense report if they are available and if they contain the requested information.

A. Please provide a brief description of the following:

1. The employee group covered.

2. The benefit provisions of the plan used in the calculation of the net periodic pension cost for the period and of the accumulated benefit obligation and the projected benefit obligation at the end of the period. Please identify any such benefit provisions that had not taken effect in the year. Please also provide the date of the most recent plan amendment included in your calculation. Please identify any participants or benefits excluded from the calculations, such as benefits guaranteed under an insurance or annuity contract.

3. The percentages of the plan’s assets that are invested in debt securities, equity securities, real estate, and any additional classifications of investment. Please identify the target compositions, if any, for the aforementioned classifications of investment groups.

4. A narrative description of the plan’s investment policies and strategies, and the basis used to determine the expected long term rate of return on plan assets.

5. The method and the amortization period, if any, used for the following:
   a. Calculation of a market related value of plan assets, if different from the fair value
   b. Amortization of any transition asset or obligation
   c. Amortization of unrecognized prior service cost
   d. Amortization of unrecognized net gain or loss

6. Any substantive commitments for benefits that exceed the benefits defined by the written plan that are included in the calculations.

7. Determination of the value of any insurance or annuity contracts included in the assets.

8. Nature and effect of significant plan amendments and other significant matters affecting comparability of net periodic pension cost, funded status, and other information for the current period with that for the prior period.

9. The following information relating to the employee census data used in calculating the benefit obligations and pension cost:
a. The source and nature of the data is ___________________ and the date as of which the census data was collected is ___________________.

b. The following information concerning participants:

<table>
<thead>
<tr>
<th>Participants</th>
<th>Number of Persons</th>
<th>Compensation (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Currently receiving payments</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Active with vested benefits</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Terminated with deferred vested benefits</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Active without vested benefits</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other (describe)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note: If information is not available for all the above categories, please indicate the categories that have been grouped and describe any group or groups of participants excluded from the above information.

c. Information for the following individuals contained in the census:

<table>
<thead>
<tr>
<th>Participant’s Name or Number</th>
<th>Age or Birth Date</th>
<th>Sex</th>
<th>Salary</th>
<th>Date Hired or Years of Service</th>
</tr>
</thead>
</table>

Note to Auditor: The auditor may select information from employer records to compare with the census data used by the actuary. In addition, the auditor may wish to have the actuary select certain census data from his or her files to compare with the employer’s records.

B. Please provide the following information on the net periodic pension cost for the period ending on __________:

1. Service cost $ ________
2. Interest cost $ ________
3. Expected return on assets $ ________
4. Other components $ ________
   a. Amortization of unrecognized net loss or (gain) from earlier periods $ ________
   b. Amortization of unrecognized prior service cost $ ________
   c. Amortization of the remaining unrecognized net obligation or (asset) existing at the date of the initial application of Financial Accounting Standards Board Accounting Standards Codification 715, Compensation—Retirement Benefits—transition obligation or (asset) $ ________
   d. Amount of loss (or gain) recognized due to a settlement or curtailment $ ________
   e. Net total of components (a+b+c+d) $ ________
5. Net periodic pension cost: (1+2-3+4e) $ ________
6. The above measurement of the net periodic pension cost is based on the following assumptions: Weighted average discount rate ________ %
Weighted average rate of compensation increase ________ %
Weighted average expected long term rate of return on plan assets ________ %

Please describe the basis on which the above rates were selected and whether the basis is consistent with the prior period.
Please briefly describe the other assumptions used in the above measurement.

7. The calculations of the items shown in B1 and B5 are based on the following:
   Asset information ________
   Census data ________
   Measurement date (must not be more than three months before the end of the last fiscal year) ________

Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in B1–B5.

C. Please provide the following information for disclosure in the financial statements for the period ending __________:

   1. Projected benefit obligation $ ________
   2. Fair value of plan assets ________
   3. Funded status of the plan (2-1) ________
   4. Employer contributions to the plan ________
   5. Participant contributions to the plan ________
   6. Benefits paid ________
   7. (Accrued) or prepaid pension cost in the company financial statements ________
   8. The amount of any intangible asset or liability that is recognized may result in a temporary difference, as defined by Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 740, Accounting for Income Taxes. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to FASB ASC 740.
   9. The amount of any accumulated other comprehensive income or liability that is recognized may result in a temporary difference, as defined by FASB ASC 740. The deferred tax effects of any temporary differences shall be recognized in income tax expense or benefit for the year and shall be allocated to various financial statement components, including other comprehensive income, pursuant to FASB ASC 740.
   10. The amount included in other comprehensive income for the period arising from a change in the minimum pension liability recognized in accordance with FASB ASC 715, Compensation—Retirement Benefits.
   11. The above amount of the projected benefit obligation is measured based on the following assumptions:
       Weighted average discount rate ________ %
       Weighted average rate of compensation increase ________ %

Please provide a brief description of the other assumptions used in the measurement.
12. The calculation of the items shown in C1–C10 is based on the following:
   Asset information
   Census data
   Measurement date (must be not more than three months before the current fiscal year end)
   Please describe any adjustments made to project the census data forward to the measurement date or to project the results calculated at an earlier date to those shown in C1–C10.

13. Please describe any significant events noted subsequent to the current year’s measurement date and as of the date of your reply to this request and the effects of those events, such as a large plant closing, which could materially affect the amounts shown in C1–C10.

14. Please describe any significant transactions between the employer or related parties and the plan during the period, including, if applicable, the amounts and types of securities of the employer and related parties included in plan assets and the amount of future annual benefits covered by insurance contracts issued by the employer or related parties.

D. Please provide an analysis for the period showing beginning amounts, additions, reductions, and ending amounts of the
   1. projected benefit obligation,
   2. fair value of plan assets,
   3. unrecognized prior service cost,
   4. unrecognized net loss (gain),
   5. net transition obligation (asset), and
   6. accumulated benefit obligation (ending amount only).

E. Please provide our independent auditors with descriptions and the amounts of gains or losses from combinations, divestitures, settlements, curtailments or termination benefits during the year, such as
   1. purchases of annuity contracts,
   2. lump sum cash payments to plan participants,
   3. other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation and eliminated significant risks related to the obligation and assets,
   4. any events that significantly reduced the expected years of future service of employees,
   5. any events that eliminated for a significant number of employees the accrual of defined benefits for some or all of their future service, or
   6. any special or contractual termination benefits offered to employees.

F. Please provide the amounts of anticipated cash payments for benefits for each of the next 5 years, as well as the expected aggregate amount of benefit payments for the subsequent 5 year period (years 6–10).

H. Describe the nature of your relationship, if any, with the plan or the plan sponsor that may impair or appear to impair the objectivity of your work.
Please mail your response directly to [audit firm’s name and address] in the enclosed return envelope as soon as possible, but no later than [date].

Sincerely,
[Client’s Authorized Signature]

.16 Pension Plan Assets Held by Trustee

[Prepared on Client’s Letterhead]

[Date]

[Name of Trustee or Custodian]

[Address]

Our auditors [name and address of auditor] are conducting an audit of our financial statements. Accordingly, please provide our auditors directly with a listing of the assets including market values as of [date] for our employees’ pension trust [title and trustee’s account number].

Please also provide the auditors with the following information about our employees’ pension trust for the period from [beginning of period] to [end of period]:

1. Contributions by the Company during the above period
2. Contributions by employees during the above period
3. Payments to beneficiaries during the above period
4. Any unpaid fees due for services rendered to [balance sheet date]

Please send your reply directly to our auditors. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,
[Client’s Authorized Signature]

---

4 A listing of the assets might not be requested if one had already been received by the client. In that case, the auditor might want the trustee to confirm the total market value per the listing.
.17 Notes Payable

[Prepared on Client’s Letterhead]

[Date]

[Name]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements.

Accordingly, please confirm directly to them the following information relating to our note(s) payable to you, as of [date]:

Date of note ________
Original amount $ ________
Unpaid principal
   Balance $ ________
   Periodic payments required $ ________
   Payment periods ________
Maturity date ________ %
Interest rate ________
Date to which interest has been paid ________
Amount and description of collateral ________
Description of terms (for example, demand provisions and prepayment penalties) ________
Any other direct or contingent liabilities to you (please write “None” or provide description) ________

If the above information is in agreement with your records at that date, please so indicate by signing in the following space provided and return the copy of this letter directly to our auditors in the enclosed envelope.

If the above is not in agreement with your records, please note in the following space provided the particulars shown in your records and any information that may help reconcile the difference from our records.

Sincerely,

[Client’s Authorized Signature]

The above information is correct as of [date] with the following exceptions (if any):

Date: __________________________________________ Signature: __________________________________________
Title: __________________________________________
.18 Mortgage Debt

[Prepared on Client’s Letterhead]

[Date]

[Name of Creditor or Trustee]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information about our mortgage indebtedness to you as of [date]:

1. Original amount $ __________
2. Date of note __________
3. Unpaid principal balance $ __________
4. Interest rate __________ %
5. Terms for payment of principal __________
6. Date to which interest has been paid __________
7. Nature of mortgage and description or address of property mortgaged __________
8. Amounts on deposit with you in escrow for
   a. insurance $ __________
   b. real estate taxes $ __________
9. Amounts paid during the period [dates from and to] for
   a. insurance $ __________
   b. taxes $ __________
10. Amounts on deposit with you for the reserve for repairs $ __________
11. The nature of defaults, if any __________
12. Description of terms (for example, prepayment penalties and demand provisions) __________

A return envelope is enclosed for your reply.

Sincerely,

[Client’s Authorized Signature]

---

Note:

Many of the items requested will vary with the circumstance of the particular mortgage or other debt involved. The above sample assumes the indenture involves an escrow arrangement for insurance and real estate taxes and a deposit account for repairs.
.19 Accounts Payable

[Prepared on Client’s Letterhead]

[Date]

[Name]

[Address]

In connection with the audit of our financial statements, please confirm directly to our auditors [name and address of auditors], the amount of our liability to you as of [date]. Please attach a statement of our account due. If no balance is due, please attach a statement of our account showing payments made.

Please mail your reply directly to [name of auditors]. A stamped, addressed envelope is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]

________________________________________

Our records indicate that a balance of $_______ was from [name of client] at [date].

Date: ____________________________ Signature: ____________________________

Title: ____________________________
.20 Obligation to Lessor

[Prepared on Client’s Letterhead]

[Date]

[Name of Lessor]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements as of [balance sheet date] and for the [time period] then ended. In connection with this audit, please provide directly to our auditors the following information as of [balance sheet date] regarding the lease dated [date lease was executed] of [brief identification of property under lease] that we are leasing from you:

1. Inception and expiration dates for the lease period, from __________ to __________
2. Amount of monthly rent ________________
3. Renewal options (if any):
   a. Dates of renewal period, from __________ to __________
   b. Amount of monthly rent for renewal ________________
4. Purchase options (if any):
   a. Amount of purchase price __________
   b. Inception and expiration dates of option, from __________ to __________
   c. Percent of monthly rent (if any) applicable towards purchase price __________
5. Dates and descriptions of amendments or supplementary understandings, if any, to the lease mentioned above.
6. The amount of outstanding delinquent payments, if any
7. A statement that there are no defaults or a statement of the nature of defaults, if any

A return envelope is enclosed for your reply.

Sincerely,

[Client’s Authorized Signature]

Note: The content of this type of letter will vary based on the auditor’s professional judgment in the circumstances. To provide additional illustrative language, the above letter is not made parallel with the illustration at AAM section 7200 paragraph .23.
.21 Property Out on Lease

[Prepared on Client’s Letterhead]

[Date]

[Name of Lessee]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements as of [balance sheet date] and for the [time period] then ended. In connection with this audit, please confirm directly to our auditors the following information regarding the lease dated [execution date of lease] of [brief identification of property under lease] that you are leasing from us:

1. Inception and expiration dates of lease period from ____________ to ______________
2. Amount of monthly rent ________________
3. Total rent payments made ________________
4. Date of last payment ________________

A return envelope is enclosed for your reply.

Sincerely,

[Client’s Authorized Signature]

Notes:

(A) If the leased property is of a mobile or portable nature such as a bulldozer or television camera, the confirmation may also include a request for specific serial numbers of significant equipment.

(B) In certain circumstances, the auditor may wish to consider confirming additional information such as renewal options, purchase options, and amendments or supplementary understandings.
Register—Capital Stock

[Prepared on Client’s Letterhead]

[Date]

[Name of Registrar]

[Address]

Our auditors [name and address of auditors] are conducting an audit of our financial statements. Accordingly, please confirm directly to our auditors the following information as of the close of business [balance sheet date] about each class of our preferred and common stock:

1. Authorized number of shares ____________________
2. Issued number of shares _______________________
3. Outstanding number of shares ___________________

Please also indicate the amount of any unpaid registrar fees due you as of [balance sheet date].

A return envelope is enclosed for your convenience.

Sincerely,

[Client’s Authorized Signature]

The above information agrees with our records at [balance sheet date] with the following

________________________
________________________
________________________

Signed: __________________ Date: __________________________

[Name and Title]

Notes:

(A) It may be helpful to include the registrar’s account number for the client’s account to receive a timely response.

(B) Some auditors prefer that the confirmation request include identification of each class of stock.

(C) The above illustration assumes the client has a separate transfer agent (see AAM section 7200 paragraph .25).
Transfer Agent—Capital Stock

[Prepared on Client’s Letterhead]

[Date]

[Name of Transfer Agent]

.25 Confirmation of Contingent Liabilities

[Date]

Financial Institution Official

First United Bank
Anytown, USA 00000

In connection with an audit of the financial statements of [name of customer] as of [balance sheet date] and for the [period] then ended, we have advised our independent auditors of the following listed information, which we believe is a complete and accurate description of our contingent liabilities, including oral and written guarantees, with your financial institution. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other contingent liabilities, including oral and written guarantees, from your financial institution comes to your attention, please include such information in the following space provided.

<table>
<thead>
<tr>
<th>Name of Maker</th>
<th>Date of Note</th>
<th>Due Date</th>
<th>Current Balance</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>

* This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements. Some official institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.
Dear CPA Firm:

The above information listing contingent liabilities, including oral and written guarantees, agrees with the records of this financial institution.† Although we have not conducted a comprehensive, detailed search of our records, no information about other contingent liabilities, including oral and written guarantees, came to our attention. (Note exceptions below or in an attached letter.)

[Name of Financial Institution]

By: _______________________________ _________________

[Officer] _________________________________

[Title] [Date]

† If applicable, comments similar to the following may be added to the confirmation reply by the financial institution: This confirmation does not relate to arrangements, if any, with other branches or affiliates of this financial institution. Information should be sought separately from such branches or affiliates with which any such arrangements might exist.
.26 Confirmation of Compensating Balances

[Date]

Financial Institution Official

First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of [name of customer] as of [balance sheet date] and for the [period] then ended, we have advised our independent auditors that as of the close of business on [balance sheet date] there (were) (were not) compensating balance arrangements as described in our agreement dated [date]. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other compensating balance arrangements between [name of customer] and your financial institution comes to your attention, please include such information below. Withdrawal by [name of customer] of the compensating balance (was) (was not) legally restricted at [date]. The terms of the compensating arrangements at [date] were:

EXAMPLES:

1. The Company has been expected to maintain an average compensating balance of 20 percent of its average loan understanding, as determined from the financial institution’s ledger records adjusted for estimated average uncollected funds.
2. The Company has been expected to maintain an average compensating balance of $100,000 during the year, as determined from the financial institution’s ledger records without adjustment for uncollected funds.
3. The Company has been expected to maintain a compensating balance, as determined from the financial institution’s ledger records without adjustment for uncollected funds, of 15 percent of its outstanding loans plus 10 percent of its unused line of credit.
4. The Company has been expected to maintain as a compensating balance noninterest bearing time deposits of 10 percent of its outstanding loans.

In determining compliance with compensating balance arrangements, the Company uses a factor for uncollected funds of _____ [business calendar] days.\(^5\)

There (were the following) (were no) changes in the compensating balance arrangements during the [period] and subsequently through the date of this letter.

The Company (was) (was not) in compliance with the compensating balance arrangements during the [period] and subsequently through the date of this letter.

There (were the following) (were no) sanctions (applied or imminent) by the financial institution because of noncompliance with compensating balance arrangements.\(^6\)

During the [period], and subsequently through the date of this letter, (no) (the following) compensating balances were maintained by the Company at the financial institution on behalf of an affiliate, director, officer, or any other third party, and (no) (the following) third party maintained compensating balances at the bank on behalf of the Company. (Withdrawal of such compensating balances (was) (was not) legally restricted.)

\(\text{\footnotesize \text{\textsuperscript{1}} This letter should be addressed to a financial institution official who is responsible for the financial institution’s relationship with the client or is knowledgeable about the compensating balance arrangements. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.}\)

\(\text{\footnotesize \text{\textsuperscript{5}} This is not applicable if compensating balances are based on the financial institution’s ledger records without adjustment for uncollected funds. If some other method is used for determining collected funds for compensating balance purposes, the method used should be described.}\)

\(\text{\footnotesize \text{\textsuperscript{6}} This is applicable only if the financial institution has applied sanctions during the [period] or notified the Company that sanctions may be applied. Indicate details.}\)
Please confirm whether the information about compensating balances presented above is correct by signing in the following space provided and returning this letter directly to our independent auditors [name and address of CPA Firm].

Sincerely,

[Name of Customer]

________________________________________

By: _____________________________________

[Authorized Signature]

Dear CPA Firm:

The above information regarding the compensating balance arrangements with this financial institution agrees with the records of this financial institution. Although we have not conducted a comprehensive, detailed search of our records, no information about other compensating balance arrangements, came to our attention. (Note exceptions in the following space provided or in an attached letter.)

.27 Confirmation of Lines of Credit

[Date]

Financial Institution Official

First United Bank
Anytown, USA 00000

Dear Financial Institution Official:

In connection with an audit of the financial statements of [name of client] as of [balance sheet date] and for the [period] then ended, we have advised our independent auditors of the following information that we believe is a complete and accurate description of our line of credit from your financial institution as of the close of business on [balance sheet date]. Although we do not request nor expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other lines of credit from your financial institution comes to your attention, please include such information in the following space provided.

The Company has available at the financial institution a line of credit totaling $[amount]. The current terms of the line of credit are contained in the letter dated [date]. The related debt outstanding at the close of business on [date] was $[amount].

The amount of unused line of credit, subject to the terms of the related letter, at [date] was $[amount].

Interest rate at the close of business on [date] was _____ percent.

Compensating balance arrangements are:

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

This line of credit supports commercial paper (or other borrowing arrangements) as described in the following space provided:

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

Please confirm whether the information about lines of credit presented above is correct by signing in the following space provided and returning this letter directly to our independent auditors [name and address of CPA Firm].

Sincerely,

[Name of Client]

________________________________________

By: _____________________________________

[Authorized Signature]

11 This letter should be addressed to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the lines of credit. Some financial institutions centralize this function by assigning responsibility for responding to confirmation requests to a separate function. Independent auditors should ascertain the appropriate recipient.
Dear CPA Firm:

The above information regarding the line of credit arrangements agrees with the records of this financial institution. Although we have not conducted a comprehensive, detailed search of our records, no information about other lines of credit came to our attention. (Note exceptions in the following space provided or in an attached letter.)

.28 Related Party Confirmation

In certain situations, the auditor may want to confirm the existence of related parties with directors, principal officers, major shareholders, or others. For example, a company does not have adequate controls and processes in place to identify related party transactions and the auditor has not otherwise been satisfied as to the extent of related party transactions. The following is an illustrative related party confirmation letter that an auditor may use when the auditor is not otherwise satisfied as to the extent of related party transactions.

[Date]

[Name of Director, Principal Officer, or Major Stockholder]

[Address]

Dear [Name]:

In connection with an audit of our financial statements, please furnish answers to the attached questionnaire, sign your name, and return the questionnaire in the enclosed stamped, addressed envelope directly to our auditors [name and address of auditors]. The questionnaire is designed to provide the auditors with information about the interests of officers, directors, and other related parties in transactions with the Company.

Please answer all questions. If the answer to any question is “yes,” please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions. Thank you for your cooperation.

Sincerely,

[Client’s Authorized Signature]

[Title]
Related Party Questionnaire

Please answer all questions. If the answer to any question is “yes,” please explain why it is so. Certain terms used in the questions are defined at the end of the questionnaire. Please read the definitions carefully before answering the questions.

1. Have you or any related party of yours had any interest, direct or indirect, in any sales, purchases, transfers, leasing arrangements, guarantees, or other transactions since [beginning of period of audit] to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) was, or is to be, a party?

2. Do you or any related party of yours have any interest, direct or indirect, in any pending or incomplete sales, purchases, transfers, leasing arrangements, guarantees or other transactions to which the Company (or specify any pension, retirement, savings, or similar plan provided by the client) is, or is to be, a party?

3. Have you or any related party of yours been indebted to the Company (or specify any pension, retirement, savings, or similar plan provided by the client) at any time since [beginning of period of audit]? Please exclude amounts due for purchases on usual trade terms and for ordinary travel and expense advances.

The answers to the foregoing questions are correct to the best of my knowledge and belief.

[Signature] [Date]

Definitions

**company.** Parent company, any subsidiary or investee for which investments are accounted for by the equity method

**related party.** Any (1) party (other than the Company) of which you are an officer, director, or partner or are, directly or indirectly, the beneficial owner of 10 percent or more of the voting interests; (2) any trust or other estate in which you have a substantial beneficial ownership or for which you serve as a trustee or in a similar fiduciary capacity; (3) any member of your immediate family; and (4) other party with which you may deal if you (or the other party) control or can significantly influence the other to an extent that either of you might be prevented from fully pursuing your own separate interests.

**control.** Possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a party, whether through ownership, by contract, or otherwise.

**party.** An individual, a corporation, a partnership, an association, a joint stock company, a business trust, or an unincorporated organization.

**beneficial owner.** Party who enjoys, or has the right to secure, benefits substantially equivalent to those of the ownership of securities, even though the securities are not registered in the party’s name. Examples of beneficial ownership include securities held for the party’s benefit in the name of others, such as nominees, custodians, brokers, trustees, executors and other fiduciaries; a partnership of which the person is a partner; and a corporation for which the party owns substantially all of the stock. Shares (1) held (individually or in a fiduciary capacity) by the party’s spouse, the party’s or his or her spouse’s minor children, or a relative of the party or his or her spouse who shares the same home with the party; or (2) as to which the party can vest or revest title in himself or herself at once or at some future time are also considered as being beneficially owned.
.29 Safe Deposit Box Access Confirmation

[Date]

[Name]

[Address]

Our auditors [name and address of auditors], are conducting an audit of our financial statements. Accordingly, please confirm there has been no access to our safe deposit box number _____ between _____ and _____ o’clock.

Please indicate in the following space provided if the previous statement is in agreement with your records. If it is not, please furnish the auditors any details concerning access to our safe deposit box during the period indicated.

After signing and dating your reply, please mail it directly to our auditors in the enclosed envelope.

Sincerely,

[Client’s Authorized Signature]

According to our records, there has been no access to the above described safe deposit box during the period specified, except as follows:

Inquiries to Legal Counsel

.01 Illustrative Audit Inquiry Letter to Legal Counsel

[Prepared on Client’s Letterhead]

[Date]

[Name of Lawyer]

[Address of Lawyer]

Dear [Name]: In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

Pending or Threatened Litigation (excluding unasserted claims)

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments (considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

[Ordinarily management’s information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

1 If a client has not needed to retain legal counsel, the auditor may express an unqualified opinion on the financial statements even though he or she has not obtained a letter from legal counsel of the Company. In these circumstances, the auditor may consider obtaining written representation from the Company that legal counsel has not been retained for matters concerning business operations that may involve current or prospective litigation. Auditing Interpretation No. 6, “Client Has Not Consulted a Lawyer,” of AU section 337, Inquiry of a Client’s Lawyer Concerning Litigation, Claims, and Assessments (AICPA, Professional Standards, vol. 1, AU sec. 337 par. 15–17), provides guidance for auditors when the client has not retained legal counsel during the period under audit.

2 Extracted from AU section 337A, Illustrative Audit Inquiry Letter to Legal Counsel (AICPA, Professional Standards, vol. 1), the appendix to AU section 337. (See footnote 4.)

3 Paragraph .09 of AU section 337 discusses the matters that should be covered in a letter of audit inquiry.

4 Sending of this letter should be timed so that the lawyer’s response is dated as close to the auditor’s opinion date as practical. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.
We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

Sincerely,

[Authorized Signature for Client]
.02 Illustrative Inquiry Letter to Legal Counsel If Management Has Not Provided Details About Pending or Threatened Litigation

[Prepared on Client’s Letterhead]

[Date]

[Name of Lawyer]

[Address of Lawyer]

In connection with an audit of our financial statements at [balance sheet date] and for the [period] then ended, please furnish to our auditors [name and address of auditors] the information requested below for which you have been engaged to provide legal consultation or representation.

Pending or Threatened Litigation, Claims and Assessments

(excluding unasserted claims and assessments)

Please furnish a list of all pending or threatened litigation, claims, and assessments your firm is handling on our behalf including the following:

1. The nature of the litigation (including the amount of monetary or other damages sought)
2. The progress of the case to date
3. How management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement)
4. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss

Unasserted Claims and Assessments

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosing concerning such possible claim or assessment, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 450, Contingencies, as a matter of professional responsibility to us. Please specifically confirm to our auditors that our understanding is correct.

We have represented to our auditors that there are no unasserted claims which are not specifically identified in this letter that you advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450.

(If unasserted claims exist, management’s listed information should include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted; and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.)

Please furnish our auditors with any explanation you consider necessary to supplement the foregoing information, including an explanation of these matters as to which your views may differ from those stated.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the organization, such as guarantees of indebtedness of others.]

Sincerely,

[Authorized Signature for Client]
Notes:

(A) Paragraph .09 of AU section 337, Inquiry of a Client’s Lawyer Concerning Litigation, Claims, and Assessments (AICPA, Professional Standards, vol. 1), discusses the matters that should be covered in a letter of audit inquiry.

(B) The sending of this letter should be timed so that the lawyer’s response is dated as close to the auditor’s opinion date as practicable. However, the auditor and client may consider early mailing of a draft inquiry as a convenience for the lawyer in preparing a timely response to the formal inquiry letter.

(C) If a client has not needed to retain legal counsel, an unqualified opinion may be expressed on the financial statements even though a letter from legal counsel has not been obtained. In these circumstances, the auditor may consider obtaining a written representation from the Company that legal counsel has not been retained for matters concerning its operations that involve current or prospective litigation. Interpretation No. 6, “Client Has Not Consulted a Lawyer,” of AU section 337 (AICPA, Professional Standards, vol. 1, AU sec. 9337 par. .15-.17), provides guidance for auditors when the client has not retained legal counsel during the period under audit.
.03 Improving Inquiry Techniques

If inquiries to legal counsel are not sufficiently detailed or specific, deficiencies in attorneys’ responses may result. A conference between the auditor and the attorney may be necessary to clarify the attorney’s written response, and paragraph .10 of AU section 337 provides for such a conference. However, to improve the auditor’s ability to receive all of the information necessary to complete his or her audit, he or she may consider the following matters in an inquiry to legal counsel:

a. A request that the attorney specify the effective date of his or her response if it is other than the date of the reply.

b. A request that the attorney mail the response so that it will be received by a certain date.

c. A request that the nature of any litigation specifically identify (1) the proceedings, (2) the claim(s) asserted, (3) the amount of monetary damages sought, or if no amounts are indicated in preliminary case filings, a statement to that effect, and (4) the objectives sought by the plaintiff, if any, other than monetary or other damages (such as performance or discontinued performance of certain actions).  
d. A request that the attorney avoid such vague phrases as meritous defenses, without substantial merit, and reasonable chance in expressing an opinion on the outcome of litigation.

e. If an opinion cannot be expressed on the outcome of litigation, a request that the attorney so state together with his or her reasons for that position.

f. A request that the attorney specify to what extent potential damages are covered by insurance. (It may be possible to obtain the opinion of the insurer’s counsel regarding the applicability of insurance coverage.)

g. A request that the attorney provide a summary of material litigation, claims, and assessments settled during the period.

h. A statement that confirmation of the understanding regarding disclosure of unasserted claims and assessments is an integral part of the audit inquiry and that failure to so confirm will require a follow-up contact.

i. A statement that the attorney’s response will not be quoted or referred to in the financial statements without first consulting with him or her.

[The next page is 7401.]
AAM Section 7400

Management Representations and Representation Letters

.01 AU section 333, Management Representations (AICPA, Professional Standards, vol. 1), states that written representations from management should be obtained for all financial statements and periods covered by the auditor’s report. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.¹

.02 Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. Such representations from management are part of the audit evidence the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit.

Specific Representations

.03 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles (GAAP), specific representations should relate to the following matters:

Financial Statements

a. Management’s acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with GAAP.

b. Management’s belief that the financial statements are fairly presented in conformity with GAAP.

Completeness of Information

c. Availability of all financial records and related data.

d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.

e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

f. Absence of unrecorded transactions.

¹ AICPA Technical Questions and Answers (TIS) section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditor’s Report” (AICPA, Technical Practice Aids), provides nonauthoritative guidance for auditors when conducting audits in accordance with generally accepted auditing standards. TIS section 9100.06 discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditor’s report. TIS section 9100.06 indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditor’s report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that they will sign the representation letter, without exception, on or before the date of the representations.
Recognition, Measurement, and Disclosure

g. Management’s belief that the effects of any uncorrected financial statement misstatements\(^2\) aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.\(^3\) (A summary of such items should be included in or attached to the letter.)\(^4\)

h. Management’s acknowledgement of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.

i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.

j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.

l. Information concerning related party transactions and amounts receivable from or payable to related parties.

m. Guarantees, whether written or oral, under which the entity is contingently liable.

n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 275, Risks and Uncertainties.

o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.

p. Unasserted claims or assessments that the entity’s lawyer has advised are probable of assertion and must be disclosed in accordance with FASB ASC 450, Contingencies.\(^5\)

q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.

s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

t. Information concerning subsequent events.

The representation letter ordinarily should be tailored to include additional appropriate representations from management concerning matters specific to the entity’s business or industry.

\(^2\) Paragraph .07 of AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), states that a misstatement can result from errors or fraud and provides guidance for the auditor’s evaluation of audit findings. (See AU section 312 par. .50–.61.)

\(^3\) If management believes that certain identified items are not misstatements, management’s belief may be acknowledged by adding to the representation (for example, “We do not agree that items XX and XX constitute misstatements because [description of reasons]”).

\(^4\) AU section 312 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated.

\(^5\) If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see Interpretation No. 6, “Client Has Not Consulted a Lawyer” of AU section 337, Inquiry of a Client’s Lawyer Concerning Litigation, Claims, and Assessments (AICPA, Professional Standards, vol. 1, AU sec. 9337 par. .15–.17).
Materiality Considerations

.04 Management’s representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements.

Addressing and Dating

.05 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor’s report.

Management’s Signatures

.06 The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

Scope Limitations

.07 Management’s refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

Illustrative Representation Letter—Audit of Financial Statements

.08 The following letter, which relates to an audit of financial statements prepared in conformity with GAAP, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor’s report (for example, “balance sheets of XYZ Company as of December 31, 20X1 and 20X0, and the related statements of income and retained earnings and cash flows for the years then ended”). The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited.

.09 If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: “To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred...” In appropriate circumstances, item 9 could be modified as follows: “The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors.” Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: “Except for the allocations discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected...
fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

.10 The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, Qualitative Characteristics of Accounting Information.

.11 Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in AU section 316, Consideration of Fraud in a Financial Statement Audit, (AICPA, Professional Standards, vol. 1), and related parties in footnote 1 of AU section 334, Related Parties (AICPA, Professional Standards, vol. 1). To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

.12 The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of AU section 333.

.13 Illustrative Representation Letter

[Prepared on Client's Letterhead]

[Date]

To [Independent Auditor]

We are providing this letter in connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [consolidated] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, (as of [date of auditor's report]), the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.

2. We have made available to you all—
   a. Financial records and related data.
   b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.

3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.

4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.

7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
   a. Management,
   b. Employees who have significant roles in internal control, or
   c. Others where the fraud could have a material effect on the financial statements.

8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.

9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.

10. The following have been properly recorded or disclosed in the financial statements:
    a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
    b. Guarantees, whether written or oral, under which the company is contingently liable.
    c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 275, Risks and Uncertainties [Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]

11. There are no—
    a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
    b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450.6
    c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450, Contingencies.

12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[Add additional representations that are unique to the entity’s business or industry. See paragraph .07 and appendix B, of AU section 333.]

---

6 In the circumstances discussed in footnote 7 of AU section 333, Management Representations (AICPA, Professional Standards, vol. 1), this representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies, and we have not consulted a lawyer concerning litigation, claims, or assessments.
To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Name of Chief Executive Officer and Title]

[Name of Chief Financial Officer and Title]

Notes:
Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about

- the appropriateness of the measurement methods, including related assumptions used by management in determining the fair value and the consistency in application of the methods;
- the completeness and adequacy of disclosures related to fair values; and
- whether subsequent events require adjustments to the fair value measurements and disclosures are included in the financial statements.

[Source: Paragraph .49 of AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1)]

.14 Illustrative Representation Letter—Audit of Personal Financial Statements

[Date]

[To the Independent Auditor]

We are providing this letter in connection with your audit of the statement of financial condition of James and Jane Person as of [date] and the related statement of changes in net worth for the [period] then ended for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial condition and changes in the net worth, of James and Jane Person in conformity with generally accepted accounting principles. We confirm that we are responsible for the fair presentation in the statement of financial condition and changes in net worth in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [as of (date of auditor’s report),] the following representations made to you during your audit.

1. The financial statements referred to above are fairly presented in conformity with generally accepted accounting principles.

2. We have made available to you all financial records and related data.

3. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.

4. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

5. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.

6. We have no knowledge of any fraud or suspected fraud affecting the entity involving
   a. us.
   b. others where the fraud could have a material effect on the financial statements.

7. We have no knowledge of any allegations of fraud or suspected fraud affecting us received in communications from analysts, regulators, short sellers, or others.

8. We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.

9. The following have been properly recorded or disclosed in the financial statements:
   a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
   b. Guarantees, whether written or oral, under which we are contingently liable.
   c. Significant estimates and material concentrations known to us that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 275, Risks and Uncertainties. (Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.)

10. There are no
    a. violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
    b. unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450, Contingencies.
    c. other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.

11. We have satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.

12. We have complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

Footnote 7 of AU section 333 states that if a lawyer has not been consulted regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments. In the circumstances discussed in footnote 7 to AU section 333, this representation might be worded as follows:

  We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies, and we have not consulted a lawyer concerning litigation, claims, or assessments.

Interpretation No. 6 of AU section 337 also provides guidance for auditors when the client has not retained legal counsel during the period under audit.
To the best of our knowledge and belief, no events have occurred subsequent to the statement of financial condition date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

.15 Illustrative Representation Letter to Other Accountants

[Firm's Letterhead]

[Date]
[Name]
[Address]

In connection with the report you have been requested to reissue on the financial statements of [client’s name] for the year ended [date], which statements are to be included comparatively with similar statements for the year ended [date], we make the following representations.

We have audited (or reviewed or compiled) the balance sheet of [client’s name] as of [balance sheet date] and the related statements of earnings, retained earnings, and cash flows for the year then ended. Our procedures in connection with the engagement did not disclose any events or transactions subsequent to [predecessor’s balance sheet date] which, in our opinion, would have a material effect upon the financial statements, or which would require mention in the notes to the financial statements of [client’s name] for the year then ended.

Should anything come to our attention prior to the date our report is issued that, in our judgment, would have a material effect upon the financial statements covered by your report, we shall notify you promptly.

Sincerely,

[Engagement Partner’s Signature]

Note:
If any matters come to the firm’s attention that may require revision of the previous financial statements, they could be included in a separate paragraph after approval by the engagement partner.

.16 Letter to Other Accountants Upon Whose Work We Plan to Rely

[Firm’s Letterhead]

[Date]
[Name]
[Address]

We are auditing the financial statements of [client’s name], [parent company]. The financial statements of [other accountants’ client’s name] that you are auditing are to be included in the financial statements of [client’s name]. We will rely on your report on the financial statements in expressing an opinion on the (consolidated) financial statements of [client’s name] (and subsidiaries). In that connection, we will refer to your report.
Please confirm to us that your firm is independent with respect to [client’s name] and [other accountant’s client’s name] within the meaning of Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec.101 par. .01), of the Code of Professional Conduct.

Please provide us promptly, in writing, with the following information in connection with your current examination of the financial statements of [other accountant’s client’s name] with respect to the following:

1. Related party transactions or other matters that have come to your attention. We are aware of the following related parties: [names of known related parties].

2. Any limitation on the scope of your examination that is related to the financial statements of [client’s name], or that limits your ability to respond to this inquiry.

Please update your letter to indicate any additional matters of the type designated above that have come to your attention through the date of your report on the financial statements of [other accountants’ client’s name].

Sincerely,

[Engagement Partner’s Signature]

.17 Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of AU section 333. Management need not repeat all of the representations made in the previous representation letter.

If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: “To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. …”

[Firm’s Letterhead]

[Date]

To [Auditor],

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the (consolidated) financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with generally accepted accounting principles, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

AAM Section 7500

Communication With Those Charged With Governance

.01 AU section 380, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), establishes standards and provides guidance on the auditor’s communication with those charged with governance in relation to an audit of financial statements. The term those charged with governance means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. For entities with a board of directors, the term encompasses the term board of directors or audit committee used elsewhere in generally accepted auditing standards (GAAS). Recognizing the importance of effective 2-way communication to the audit, AU section 380 provides a framework for the auditor’s communication with those charged with governance and identifies some specific matters to be communicated with them.

Matters to Be Communicated

.02 In accordance with paragraph .05 of AU section 380, the auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor’s professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. The auditor should communicate the following with those charged with governance:

a. The auditor’s responsibilities under GAAS, including that
   (1) the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with the oversight of those charged with governance are presented fairly, in all material respects, in conformity with generally accepted accounting principles (GAAP); and
   (2) the audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

   These responsibilities may be communicated through the engagement letter, or other form of contract that records the terms of the engagement, if that letter or contract is provided to those charged with governance. See paragraphs .26–.28 of AU section 380 for additional guidance.

b. An overview of the planned scope and timing of the audit. See paragraphs .29–.33 of AU section 380 for additional guidance.

c. Significant findings from the audit, including
   (1) the auditor’s views about qualitative aspects of the entity’s significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures (see paragraphs .37–.38 of AU section 380);
   (2) significant difficulties, if any, encountered during the audit (see paragraph .39 of AU section 380);
   (3) uncorrected misstatements, other than those the auditor believes are trivial, if any (see paragraphs .40–.41 of AU section 380);
   (4) disagreements with management, if any (see paragraph .42 of AU section 380); and
(5) other findings or issues, if any, arising from the audit that are, in the auditor’s professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process.

.03 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate the following:

a. Material, corrected misstatements that were brought to the attention of management as a result of audit procedures. The auditor also may communicate other corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.

b. Representations the auditor is requesting from management. The auditor may provide those charged with governance with a copy of management’s written representations.

c. Management’s consultations with other accountants (see paragraph .43 of AU section 380).

d. Significant issues, if any, arising from the audit that were discussed, or were the subject of correspondence, with management (see paragraph .44 of AU section 380).

The Communication Process

.04 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. Clear communication of the auditor’s responsibilities, an overview of the planned scope and timing of the audit, and the expected general content of communications helps establish the basis for effective two-way communication. Matters that may also contribute to effective two-way communication include discussion of the following:

• The purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.

• The form in which communications will be made.

• The person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.

• The auditor’s expectation that communication will be two-way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; the suspicion or the detection of fraud; or concerns about the integrity or competence of senior management.

• The process for taking action and reporting back on matters communicated by the auditor.

• The process for taking action and reporting back on matters communicated by those charged with governance.

.05 The auditor should communicate in writing with those charged with governance significant findings from the audit (see paragraphs .34–.35 of AU section 380) when, in the auditor’s professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. Other communications may be oral or in writing. When the auditor communicates matters in accordance with AU section 380 in writing, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management; and is not intended to be and should not be used by anyone other than these specified parties. When matters required to be communicated have been communicated orally, the auditor should document them. When matters have been communicated in writing, the auditor should retain a copy of the communication. Documentation of oral
communication may include a copy of minutes prepared by the entity if those minutes are an appropriate record of the communication.

.06 The auditor should communicate with those charged with governance on a sufficiently timely basis to enable those charged with governance to take appropriate action. The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, and the action expected to be taken by those charged with governance.

.07 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should take appropriate action to address the effectiveness of the communication process.

Additional Communication Requirements

.08 Requirements for the auditor to communicate with those charged with governance are included in other standards, including the following:

a. Paragraph .17 of AU section 317, Illegal Acts by Clients (AICPA, Professional Standards, vol. 1), to communicate with the audit committee or others with equivalent authority and responsibility illegal acts that come to the auditor’s attention.

b. Paragraph .22 of AU section 801, Compliance Auditing Considerations in Audits of Governmental Entities and Recipients of Governmental Financial Assistance (AICPA, Professional Standards, vol. 1), to communicate to management and the audit committee (or others with equivalent authority and responsibility) when the auditor becomes aware during an audit in accordance with GAAS that the entity is subject to an audit requirement that may not be encompassed in the terms of the engagement, and that an audit in accordance with GAAS may not satisfy the relevant legal, regulatory, or contractual requirements.

c. Paragraph .22 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), to inquire directly of the audit committee (or at least its chair) regarding the audit committee’s views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity.

d. Paragraph .79 of AU section 316 to communicate with those charged with governance fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with those charged with governance about misappropriations perpetrated by lower level employees.

e. Paragraph .20 of AU section 325A, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1),1 to communicate in writing to management and those charged with governance control deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses, including significant deficiencies and material weaknesses that were communicated in previous audits and have not yet been remediated. See examples in the following paragraphs.

---

1 In October 2008, the Auditing Standards Board issued Statement on Auditing Standards (SAS) No. 115, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325). SAS No. 115 supersedes SAS No. 112, Communicating Internal Control Related Matters Identified in an Audit (AICPA, Professional Standards, vol. 1, AU sec. 325A). SAS No. 115 was issued to eliminate differences within the AICPA’s Audit and Attest Standards resulting from the issuance of Statement on Standards for Attestation Engagements (SSAE) No. 15, An Examination of an Entity’s Internal Control Over Financial Reporting That is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 1, AT sec. 501). SAS No. 115 is effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier application is permitted. Due to the issuance of SAS No. 115, extant AU section 325 has been moved to AU section 325A of Professional Standards until the effective date of SAS No. 115. This manual references the “A” sections as appropriate because the changes due to SAS No. 115 have not been incorporated into this edition of the manual. See AAM section ????, “Communicating Internal Control Related Matters in an Audit—Understanding SAS No. 115,” for further guidance.
In planning and performing our audit of the financial statements of [client’s name] as of and for the year ended [financial statement date], in accordance with auditing standards generally accepted in the United States of America, we considered [client’s name] internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the company’s internal control. Accordingly, we do not express an opinion on the effectiveness of the company’s internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed in the following sections, we identified certain deficiencies in internal control that we consider to be significant deficiencies and a deficiency that we consider to be a material weakness.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control. We consider the following deficiencies to be significant deficiencies in internal control.

Accrued Vacation

Although accrued vacation has not been recorded on the financial statements, the amount of accrued vacation must be considered in determining the fair presentation of the financial statements. The year end analysis of accrued vacation had a balance significantly lower than the prior year’s balance. The details of the analysis were traced to the attendance control cards. We found (1) the number of days earned on the listing did not agree to that recorded in the cards, (2) individuals were reported in the cards with earned vacation but were not on the listing, and (3) some of the cards appeared to not have been maintained.

Detailed records of vacation days earned and used by employees should be recorded in a timely manner and accurately maintained. At least annually, these days should be converted to dollar amounts. Management should review the conversion and consider reporting this liability on the financial statements for complete recognition of liabilities.

Discussions with the office manager revealed that not all employees are required to notify him or her when they use vacation days. All employees should be required to inform the office manager of all vacation days taken. Employees should also be asked to periodically review their vacation records with the office manager and to indicate their agreement by signing the records.

Bad Debts

During 20XX, the board approved the write-off of accounts receivable of about $ [amount] The write-off was charged to revenue rather than to bad debt expense.

Procedures for recording bad debt write-offs should be reviewed for adequacy. All adjusting entries should be reviewed by the treasurer or a member of management other than the person preparing the journal entry.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

---

2 The wording in this illustrative communication is consistent with the requirements and guidance of AU section 325A. Paragraph .28 of AU section 325 provides updated wording for early adopters of AU section 325. Conforming changes to reflect the issuance of SAS No. 115 will be made in a future edition of this guide.
detected by the entity’s internal control. We believe that the following deficiency constitutes a material weakness.

**Blank Checks**

Blank checks are maintained in an unlocked cabinet along with the check signing machine.

Blank checks and the check signing machine should be locked in separate locations so as to prevent the embezzlement of funds.

This report is intended solely for the information and use of the board of directors, management, and others within the entity and is not intended to be and should not be used by anyone other than these specified parties.

Sincerely,

______________________________

AAM Section 7600

Reliance Letter

.01 Illustrative Reliance Letter

[Addressee]:

The following is in response to your letter to our firm dated _______.

We performed an audit of [company’s] balance sheet dated December 31, 20X0, and the related statements of income, retained earnings, and cash flow for the year then ended. The financial statements were audited as of the financial statement date and the audit procedures performed were completed on March 28, 20X1 [audit report date]. No additional audit procedures were performed subsequent to March 28, 20X1.

The audit was conducted in accordance with generally accepted auditing standards (GAAS). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. However, a properly designed and executed audit may not detect a material irregularity. For example, GAAS does not require that an auditor authenticate documents, nor is an auditor trained to do so. Also, audit procedures that are effective for detecting a misstatement that is unintentional may not be effective for a misstatement that is intentional and is concealed through collusion between client personnel and third parties or among management or employees of the client.

We understand that you intend to rely on the report and associated statements in connection with [describe as precisely as possible the transaction in connection with which the third party intends to rely on the report and statements]. It should be noted that the audit procedures performed in order to render an opinion on the financial statements of [company] may not be adequate or appropriate for this purpose. Because of the limitations inherent in the audit process, we may not have detected all material misstatements. Accordingly, our audit was not intended for your benefit and should not be taken to supplant the inquiries and procedures that you should take to satisfy yourself as to [company’s] credit-worthiness. We recommend that you perform your own due diligence investigation, which should include but not be limited to the following steps [itemize]. We emphasize that this list of procedures may not be all inclusive and that we cannot provide any assurance that the procedures we have mentioned will be sufficient for your purposes.

Proposal Letter

.01 Illustrative Proposal Letter

[Date]

[Name]

[Address]

Dear [Name]:

We appreciate this opportunity to present a proposal for [nature of services] and a brief description of our firm and services.

Our firm was formed in 20XX. We have [number of] partners and [number of] staff and support personnel working with clients in accounting and auditing, taxation, and various consulting services. Although we serve all size clients, our clientele consists primarily of small and medium size businesses such as yours.

Our professional objectives are to provide the highest quality services on a timely basis. As a member of the AICPA Division for Firm’s Private Companies Practice Section, our accounting and auditing practice has been subjected to a review by another firm of CPAs. We received an unqualified opinion as a result of that review. We extend our client relationships to include ongoing contact and services to achieve our services objectives.

We have extensive experience in the [type of] industry. This experience and related understanding of your industry’s operations permit us to design, perform, and complete engagements for your company effectively and at a reasonable cost.

Our services include the following:

- Accounting, Auditing, and Attestation Services
  
  Our accounting, auditing, and attestation services include annual or special audits, compilations and reviews of financial statements, and the examination and review of financial and other information under the attestation standards. We accompany our report on audited financial statements with a letter communicating deficiencies in internal control and a management letter communicating recommendations for operational efficiencies. Our purpose in making these suggestions is to help you accomplish your operational objectives. These suggestions often result in cost savings.

- Tax Services
  
  We offer diversified tax services, including assistance in all phases of federal, state, and local income taxes; estate, inheritance, and gift taxes; and payroll and other taxes. These services include tax return preparation, tax research, and representation of clients at administrative proceedings before the various taxing authorities. The objectives of our tax services are to minimize taxes and potential problems.

- Consulting Services
  
  Our consulting services are designed to assist clients in improving efficiency and profitability. Our approach offers assistance in such areas as developing plans for problem identification or implementing more effective operating controls, evaluating information systems and installing or upgrading data processing systems.

[Name], an audit partner, will be primarily responsible for your engagement.
As you requested, our proposal is for [state nature of services].

We estimate that our fees for the proposed services will be approximately $[amount], plus out-of-pocket expenses, billable as the work progresses. Our fees are based on time spent on the engagement. Should we encounter any unforeseen circumstances requiring additional time, you will be notified promptly of the situation.

Our fee estimate is based on the assumption that your personnel will prepare certain schedules and analyses for us. We also anticipate their assistance in locating invoices and other documents for our examination.

Our firm is organized and staffed to help you satisfy our business needs. Please call [number] with questions about this proposal.

Sincerely,

[ Firm Signature ]

Comprehensive Audit Risk Alert—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Important Notice

The U.S. economy is experiencing a great amount of instability. During 2008 and continuing into 2009, economic conditions have deteriorated and government intervention has increased. The economic crisis undoubtedly is affecting both financial statement preparers and the auditors engaged to audit their financial statements. Few, if any, industries are immune to the effects of the crisis. Since the time the AICPA published the 2008 Comprehensive Audit Risk Alert, much in the economic situation has changed.

In light of this, the AICPA has developed a dedicated alert to address common accounting and auditing concerns relative to current market conditions. This alert, Current Economic Crisis: Accounting and Auditing Considerations—2009, replaces Comprehensive Audit Risk Alert—2008. As a subscriber to Comprehensive Audit Risk Alert you are also receiving access to Current Economic Crisis: Accounting and Auditing Considerations.

Current Economic Crisis: Accounting and Auditing Considerations—2009

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Accounting and Auditing Publications

How This Alert Helps You

01 These unprecedented times are making accounting for transactions and auditing entities more challenging than ever. This Audit Risk Alert (alert) helps you plan and perform your audits in the current economic environment. This alert can also be used by an entity’s internal management to address areas of audit concern during these difficult and grave economic times and is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements given the current economic conditions. In today’s environment, which affects all types of businesses and industries, it is crucial to remain alert to current events and evaluate how they affect the audits you perform.

Economic, Legislative, and Regulatory Developments

The State of the Economy

02 The United States has been experiencing and is expected to continue to experience severe instability in the economy. The National Bureau of Economic Research officially declared that the United States entered into a recession in December 2007 and, at the date of this writing, has remained there for 12 months. The length of the recession and whether the United States enters into a depression is yet to be determined. Entering 2009, the term depression is being used more often. Today’s economy has also been compared to the Great Depression of the 1930s. According to BusinessWeek, “Through October 7th [2008], the U.S. stock market had its worst five-day performance since 1932 on fears of a severe economic downturn.”
Some key areas and occurrences that exhibit the gravity of the economic crisis include the following:

- Government intervention in the private sector has increased. Numerous financial institutions and automakers have received a “bailout” from the government.
- The number of residential home foreclosures has increased to record levels; in November 2008, foreclosures were up 28 percent from November 2007.
- Approximately 12 million households, or 16 percent, owe more on their mortgages than their homes are currently worth.
- The Federal Reserve has continued to decrease the federal fund interest rate. In December 2008, it set the key interest rate at a range between 0 percent and 0.25 percent.
- The demand for U.S. Treasury bills has increased at a staggering rate, which drove the interest rate for these Treasury bills to approximately 0 percent in December 2008.
- The number of jobless claims has continued to increase; the number of claims reported for the week ended December 6, 2008, reached the highest level since November 1982.
- The unemployment rate has continued to rise; in November 2008, the rate was 6.7 percent.
- Preliminary advance estimates of the third quarter 2008 gross domestic product indicate that it will be -0.5 percent.
- In November 2008, the S&P 500 plunged to an 11.5 year low, and both the Dow Jones Industrial Average and NASDAQ closed at their lowest points since March 2003.
- Treasuries Over Euro Dollar Spread reached a historic high in October 2008 at 4.63 percent.

The U.S. government has taken unprecedented actions to prevent worsening economic conditions, including facilitating the sale of ailing banks, passing the Emergency Economic Stabilization Act of 2008 (EESA), and dramatically increasing the monetary programs available from the Federal Reserve. The results of many of these actions have not been fully realized to date. To fully understand how we have arrived in this situation, it is important to understand the circumstances that brought us here.

Events Leading to the Current Economic Crisis

Some experts have attributed the current situation with the residential real estate industry to the perfect storm of circumstances: rising home values, historically low interest rates, loosening underwriting and lending standards, and the notion that housing is a fail-safe investment. As these problems with the real estate market have become evident, they have had a significant impact on the credit market. As the credit markets have become frozen and banks have become unwilling to lend to consumers or one another, the downward sloping cycle perpetuates, resulting in continued stress on the overall economy.

In 2001, the Federal Reserve dramatically cut interest rates to stimulate the economy, which was suffering from the burst of the technology bubble and the September 11th terrorist attacks. This cut in interest rates decreased the cost of mortgages, thereby stimulating demand for housing. As cheap money was flowing, home buying demand increased, real estate prices increased, underwriting standards were loosened by banks, and unconventional mortgages, such as interest only and adjustable rate mortgages, became more common. These mortgages had little to zero money put down by the homebuyer as a down payment, high loan to value ratios, teaser interest rates, and borrowers with lower credit scores. These mortgages, commonly referred to as subprime mortgages, also required very little income verification. Lenders took these actions so they could continue to capitalize on the booming residential real estate market. As a result of lenders abandoning traditional mortgages and lending policies, a growing number of homeowners entered into mortgages they could not afford. These homeowners ultimately became delinquent and, sometimes, defaulted on their mortgages.

One of the main reasons these defaults have had such an overwhelming effect on the overall economy is securitization. Many of these mortgages were sold by the original lender to another entity (in
many cases, a bank), which then pooled thousands of mortgages together into a securitization. The resulting debt securities from this securitization were purchased by a variety of entities, some of which securitize these securities further into collateralized debt obligations (CDOs).

.08 As the situation evolved and delinquencies began increasing in the residential market, lenders were unable to sell the loans they had already made. In addition, the secondary market dried up as executives became nervous about the quality of the assets, the riskiness of these investments, and the soundness of the financial institutions. This doubt inhibited banks from being able to sell loans for securitizations, which reduced liquidity and lending activity even more. As a result, investors in these securities and lenders who issued these securities have almost come to a standstill, causing a liquidity crisis, which has resulted in significant declines in the values of these existing loans and mortgage backed securities held by both lenders and investors due to the lack of demand. The liquidity crisis has also resulted in a lack of demand for investments in CDOs, as many hold securities backed by subprime mortgages, and even the short-term commercial paper market. These liquidity issues are further exacerbated by defaulting homeowners and imminent foreclosures of homes that may not be worth their outstanding loan value, which will significantly affect the actions taken by both borrowers and lenders.

.09 As the quality of the underlying assets of these securities continued to decrease, demand decreased and therefore their values did as well. As these values decreased, many banks and other entities took large write-downs to mark these assets to fair value. Market confidence started to rapidly decline and a series of previously unthinkable events occurred. Starting in March 2008, many commercial and investment banks collapsed, filed for bankruptcy, or were purchased (some with the help of the U.S. Treasury). Additionally, Fannie Mae and Freddie Mac, which had been implicitly government-sponsored entities that purchased and securitized approximately half of all residential mortgages, were taken over by the U.S. Treasury amidst concerns about their capitalization. These occurrences led to passing of the EESA in October 2008.

.10 Given these events and circumstances, banks and investors have become increasingly nervous about making loans given the uncertainty around what the future holds for themselves, the counterparty of the transaction, and the overall economy. Consequently, the economy is now in the midst of a credit freeze due to the unique circumstances previously described. This affects both general financial health and growth as businesses rely on loans to fund their daily operations, such as payroll and also to expand.

Regulatory Interventions

Consolidation of Banks

.11 During 2008, many large financial institutions have been forced by the economic conditions to consolidate and some even filed for bankruptcy. The first indication of a major breakdown in the financial sector occurred in June 2007 when 2 hedge funds of a large investment bank, which invested heavily in the subprime housing market, collapsed. Nine months later, the same investment bank was saved from bankruptcy by intervention from the Federal Reserve. The Federal Reserve mediated a sale of the investment bank to another financial institution, in addition to assuming $30 billion of the investment banks liabilities.

.12 In September 2008, another major investment bank failed despite attempts for another Federal Reserve mediated sale. Soon after, to avoid a similar fate, another major investment bank sold itself to a financial institution. This left only 2 existing major investment banks; however, shortly thereafter, these entities transformed themselves into bank holding companies.

Conversion of Investment Banks to Bank Holding Companies

.13 Late in the third quarter of 2008, the last 2 major investment banks requested, and received approval, to convert themselves from investment banks to bank holding companies. When compared to investment banks, bank holding companies are more regulated, more closely supervised, less profitable, and subject to higher capital requirements. These actions were taken to attempt to avoid the fates suffered by their competitor’s bankruptcy and consolidation.
Although changing the legal structure of the investment bank subjects them to increased regulation, the advantages of the reclassification outweigh the disadvantages. Because they are now banking holding companies, these entities have the ability to hold some assets as available for sale or held to maturity in their banking divisions (as opposed to trading). The banks also have greater access to the Federal Reserve’s lending facilities, the ability to purchase a commercial bank, and a solid deposit base to utilize for short-term cash flow purposes, as they now will now be allowed to accept customer deposits. These investment banks are in the process of decreasing their leverage to become more in line with bank holding companies. According to the Wall Street Journal, investment banks typically have leverage ratios above 20, whereas bank holding companies average a total leverage ratio of around 10. With lower leverage ratios, profits will not be as high, but losses will not be as steep either.

Experts note part of the reason for the unraveling of the investment banking model was their strong reliance on short-term credit markets to fund operations. With customer deposits to fall back on as banking holding companies, frozen short-term credit markets would not have such a profound impact on the reclassified entity’s financial health. Many feel this more regulated, less risky business model is the only way for these two companies to survive the continuing liquidity and credit crisis.

One (among many) of the reasons the investment banks ran into trouble was a ruling made by the Securities and Exchange Commission (SEC) in April 2004. At that time, the major investment banks were petitioning for an exemption from the net capital rule. This rule required certain capital cushions and limited the acceptable amount of liabilities. The exemption from the rule was granted by the SEC for investment banks with assets greater than $5 billion. According to the New York Times, “In loosening the capital rules, which are supposed to provide a buffer in turbulent times, the agency also decided to rely on the firms’ own computer models for determining the riskiness of investments, essentially outsourcing the job of monitoring risk to the banks themselves.” The underlying presumption was that the investment banks could effectively self-discipline without imposed regulations because being financially sound was, inherently, one of their main goals. The banks argued that they would know when to limit their borrowing and how much cash to hold as cushion to remain financially strong. The investment banks noted these newly unrestricted funds would be used to purchase mortgage-related securities. After this ruling was made, the leverage ratios at investment banks grew dramatically—at one point the leverage ratio at one of these major investment banks was 33 to 1. When turbulent times arrived, these banks did not have adequate capital to sustain the losses they were incurring.

By allowing a major investment bank to fail when it had saved others, the government seemed to be making the point that not all institutions would be rescued and that it was not in the business of rewarding risky behavior; its interventions were calculated and made only in select situations.

Conservatorship of Fannie Mae and Freddie Mac

Amidst the consolidations of investment banks, concerns began to mount around the capitalization of two government sponsored entities (GSEs)—Federal Home Loan Mortgage Corporation (Freddie Mac) and Federal National Mortgage Association (Fannie Mae). These 2 GSEs are the biggest market makers of mortgage-backed securities and both had implicit government backing. To calm market sentiment and inject confidence, Congress passed a bill authorizing the U.S. Treasury Department to make loans and investments in the 2 publicly traded GSEs. In early September 2008, the U.S. Treasury Department exercised this ability and acquired $1 billion of preferred shares in each GSE and pledged to provide the GSEs with up to $200 billion to weather the current real estate housing market. These preferred shares are the most senior class of equity and will therefore receive their 10 percent dividend yield first. Additionally, the U.S. Treasury, for a nominal sum, received warrants equivalent to 79.9 percent ownership in each GSE. These plans put the GSEs under a conservatorship. Their regulator, the Federal Housing Finance Agency, will control the GSEs until it deems the entities financially healthy. The executives and boards of directors of both GSEs are also being replaced. The U.S. Treasury will limit the size of each entity’s mortgage portfolios to $850 billion as of year-end 2009. Immediately following this time, the entities will decrease their mortgage portfolios by approximately 10 percent per annum until they each hold $250 billion. This has changed the perception of the 2 GSEs from being implicitly government backed to explicitly government backed.
As the economy continued to worsen, these previous interventions were trumped by the EESA.

**Emergency Economic Stabilization Act of 2008**

On October 3, 2008, due to the severity of the situation affecting the U.S. economy, Congress passed and the president immediately signed the EESA. As stated in Section 2 of the bill, it “Provides authority to the Treasury Secretary to restore liquidity and stability to the U.S. financial system and to ensure the economic well-being of Americans.” Primary components of this bill include (a) an allocation of $700 billion to stabilize the U.S. financial system; (b) creation of an oversight board, executive compensation rules, and other corporate governance rules for any entities that receive government aid; (c) an increase of the statutory limit on public debt from $10.0 trillion to $11.3 trillion; (d) a temporary increase of Federal Deposit Insurance Corporation insurance limits; (e) creation of a tax modification for Fannie Mae and Freddie Mac stock losses; (f) restatement of the SEC’s authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, *Fair Value Measurements*; and (g) the requirement of the SEC to conduct a study on the impact and effects of FASB Statement No. 157.

**Troubled Assets Relief Program**

As the details of the EESA were formulating before it was passed into law, the first use of the $700 billion allocation was supposed to be to purchase illiquid mortgage-related assets from banks. This allocation was entitled the Troubled Assets Relief Program (TARP). According to Treasury Secretary Henry Paulson’s speech on November 12, 2008:

> It was clear to me by the time the bill was signed on October 3rd that we needed to act quickly and forcefully, and that purchasing troubled assets—our initial focus—would take time to implement and would not be sufficient given the severity of the problem. In consultation with the Federal Reserve, I determined that the most timely, effective step to improve credit market conditions was to strengthen bank balance sheets quickly through direct purchases of equity in banks.

This injection of capital into banks was announced on October 14, 2008, had an allocated budget of $250 billion, and was named the Capital Purchase Program (CPP). Half of funds for this program were distributed to 9 of the largest financial institutions in the nation, which hold approximately 55 percent of U.S. banking assets. The other half of the funds were allocated for smaller financial institutions. All participating institutions will have the same terms under this program. However, there is a sense of uncertainty by many about how the banks will actually use this $250 billion. The clear intent is for them to increase lending practices. The worry is that they will hoard it for possible tough times ahead. The full effects of the CPP have yet to be realized and only time will reveal how banks used this government cash injection and which benefits were provided to the economy.

This $250 billion will also purchase senior preferred shares of the participating entities. These shares are senior to common stock and *pari passu* with existing preferred shares. The only exception to this *pari passu* status would be any preferred shares, which by their terms, rank junior to any existing preferred shares. These preferred shares pay a cumulative dividend of 5 percent per annum for the first 5 years and reset to 9 percent after year 5. These shares are nonvoting (other than on matters that could adversely affect the shares) and are callable at par after 3 years. Simultaneously, the Treasury will receive warrants to purchase common stock with an aggregate market value equal to 15 percent of the senior preferred investment. These warrants have a 10 year term and the exercise price will be the market price of the institutions common stock at the time of issuance, calculated on a 20 trading day trailing average. Any participating entities must adopt the standards on executive compensation and corporate governance created by the EESA for the period the Treasury holds equity issued under this program.

After the announcement of this plan, practitioners started to consider the accounting implications of these warrants. In general, depending on the terms of warrants, some are accounted for as liabilities as they represent a future obligation. If these warrants were accounted for as liabilities, the intended benefits may be somewhat diminished due to the warrants being accounted for at fair value, thereby possibly
increasing earnings volatility and part of the capital proceeds being allocated to the warrants, which resides in the liability section of the balance sheet as opposed to in the equity section.

.25 To address this concern, the SEC and FASB issued a letter on October 24, 2008, that noted, “we would not object if the Warrants...were to be classified as permanent equity under applicable U.S. GAAP [generally accepted accounting principles], provided that the issuer of such Warrants has sufficient authorized but unissued shares of the class of stock that may be required upon settlement and any other necessary shareholder approvals have been obtained.” The letter went on to state that as long as these approvals were obtained prior to the end of the fiscal quarter in which the warrants were issued, immediate classification as permanent equity would be appropriate as well.

.26 It is unclear whether the remaining allocation of money to stabilize the economy will be directed at troubled mortgage-related assets, though many are still hoping that will occur. According to a survey conducted by the Securities Industry and Financial Markets Association and 4 other advocacy groups in November 2008, 53 percent of 445 banks said they would expect to participate if this program was carried out. The lack of clarity on whether this method will ever be implemented has had numerous effects on the market. Many institutions were hoping these purchases would occur for some price discovery on these troubled assets, which they could then leverage off of in pricing their own assets. Additionally, some institutions would consider transferring assets to held to maturity (and therefore not subject to fair value unless the assets become other-than-temporarily impaired); however, they are worried to do that if the U.S. Treasury does become a buyer for these types of assets.

.27 Late in November 2008, the Federal Reserve announced the creation of the Term Asset-Backed Securities Loan Facility. The Federal Reserve Bank of New York will lend up to $200 billion to holders of certain AAA-rated asset backed securities backed by newly and recently originated consumer and small business loans through December 31, 2009. The first $20 billion for this facility will be provided by the EESA to the Federal Reserve Bank of New York. The intent of this facility is to increase credit availability for student loans, auto loans, credit card loans, and loans guaranteed by the Small Business Administration.

.28 In December 2008, the Government Accountability Office (GAO), as mandated by the EESA, published its first report on TARP to Congress. This report noted specific “areas that warrant Treasury’s ongoing attention,” which consist of the following 9 recommendations for the Treasury to implement:

- Develop a system to determine whether participating institutions activities are consistent with the underlying purpose of the CPP.
- Develop a method to ensure that participating entities of the CPP comply with the requirements of the program, such as executive compensation limits and dividend payments.
- Formalize communications with the key stakeholders (the public and Congress) to ensure an understanding of the programs current strategy and the underlying rationale.
- Develop a definitive transition plan for the new incoming presidential administration.
- Continue building a base of employees to carry out and oversee TARP.
- Ensure that appropriate amounts of personnel are assigned to oversee the performance of all contractors hired to execute TARP.
- Continue to develop a comprehensive system of internal controls over TARP activities.
- Issue final regulations on any conflicts of interest concerning contractors and financial agents.
- Institute a system to effectively manage and monitor the mitigation of conflicts of interest.

.29 Overall, the U.S. Treasury agreed with the recommendations of the GAO; however, the Treasury did have a different opinion on how best to monitor the activities of participants of the CPP. The Treasury’s method consisted of developing general metrics for evaluating the overall success of CPP, instead of working with bank regulators to establish a systematic method for determining whether entities use of CPP
funds were consistent with the purpose of the program, as recommended by the GAO. The full report can be viewed at www.gao.gov/new.items/d09161.pdf.

**Fannie Mae and Freddie Mac Stock Losses**

.30 Another key aspect of the EESA relates to losses incurred by banking organizations that either incurred losses on sales of their holdings of Fannie Mae or Freddie Mac perpetual preferred stock between January 1 and September 7, 2008, or held such stock at September 6, 2008, and then later sell or exchange it at a loss. These losses, incurred via asset sales or other-than-temporary impairments, are to be treated as ordinary losses rather than capital losses for federal income tax purposes.

.31 Under FASB Statement No. 109, *Accounting for Income Taxes*, these organizations must record the effect of this change in the period in which the law is enacted, which is the fourth quarter of 2008. In order to act in accordance with the intent of the EESA, banking organizations may adjust the tax effects associated with these losses for their third quarter regulatory capital calculations as if EESA was enacted in the third quarter of 2008. For further details on the tax change and its application, visit http://files.ots.treas.gov/481135.pdf.

**EESA Requirements Related to FASB Statement No. 157**

.32 As described in the EESA discussion, the SEC was required to conduct a study on the impact of FASB Statement No. 157, which was released on December 30, 2008. This study helped the SEC determine whether to exercise their right to suspend FASB Statement No. 157, which they decided not to do. The study was focused on the impact of FASB Statement No. 157 on financial institutions balance sheets, bank failures in 2008, the quality of financial information available to investors, the process used by FASB in developing accounting standards, and alternative accounting standards to FASB Statement No. 157. As noted in the EESA section requiring this study, the EESA restated the SECs right to suspend the application of FASB Statement No. 157. Many constituents communicated with the SEC around this possible suspension and these responses contained a wide range of opinions on the matter. Additionally, comment letters to the SEC have also been issued on the issuance of FASB Staff Position (FSP) FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*.

.33 The complete effects of the EESA will take time to be felt throughout the economy; however, the first goal of the act is to increase market confidence and liquidity. The varying methods the U.S. Treasury will employ to achieve the goals of the EESA will be seen in the coming months and years.

**Other Government Interventions**

.34 In addition to the previously discussed events, the government has taken numerous actions via the Federal Reserve and the U.S. Treasury to restore liquidity to the short-term credit markets, such as commercial paper and money market funds. In July, the Federal Reserve introduced an 84 day $25 billion term auction facility to complement its 28 day $75 billion term auction facility. In October, both of these auction facilities were increased to $150 billion each. Also in July, the Federal Reserve extended the primary dealer credit facility (PDCF) and the term securities lending facility (TSLF) through January 30, 2009; in September, the collateral for each of these facilities was broadened and the TSLF was expanded from $175 billion to $200 billion.

.35 Also in September 2008, the asset-backed commercial paper (ABCP) money market mutual funds liquidity facility (AMLF) was created. This program will extend nonrecourse loans to U.S. depository institutions and bank holding companies to finance their purchases of high quality ABCP from money market mutual funds. Another temporary program created in September, which will expire in January 2009, allows insured depository institutions to provide liquidity to their affiliates for assets typically funded in the triparty repo market. In early December 2008, the Federal Reserve extended the expiration dates of the PDCF, AMLF, and TSLF to April 2009 “in light of continuing strains in financial markets.”
To add to the liquidity measures taken by the Federal Reserve, the U.S. Treasury opened its Temporary Guarantee Program for Money Market Funds. Under this program, the U.S. Treasury guarantees the share price of participating money market funds that seek to maintain a stable net asset value of $1.00 per share, subject to certain conditions and limitations, for amounts held in participating money market funds as of the close of business on September 19, 2008. Eligible funds must be regulated under Rule 2a-7 of the Investment Company Act of 1940, must maintain a stable share price of $1, and must be publicly offered and registered with the SEC. Both taxable and nontaxable funds are eligible for this program. The program will be in effect for an initial 3 month term, after which the secretary of the Treasury will review the need and terms for the program and the costs to provide the coverage. The secretary has the option to extend the program up to the close of business on September 18, 2009. This was created after a major money market fund “broke the buck” with a net asset value under $1 due to losses from a recently bankrupted investment bank.

October 2008 saw the creation of the commercial paper funding facility (CPFF) and the money market investor funding facility (MMIFF). In the CPFF, an entity’s special purpose vehicle (SPV) purchases 3 month U.S. dollar denominated commercial paper from eligible issuers and the Federal Reserve commits to lend to the SPV on a recourse basis. The MMIFF allows the Federal Reserve to provide senior secured funding to money market funds so they can buy top-rated short-term investments such as certificates of deposit, commercial paper, and bank notes with maturities from 7 to 90 days. At the time of this writing, the MMIFF will expire in April 2009.

The extent these programs were needed can be exemplified by the ferocity with which entities signed up for participation. According to the Federal Reserve Bank of St. Louis, by October 22, 2008, bank borrowings reached $400 billion from the Federal Reserve, which is 4,000 times the level in March.

Another unique action taken by the Federal Reserve was lending an insurance conglomerate $85 billion in September 2008. In November 2008, the loan was restructured by the Federal Reserve and the U.S. Treasury into a $150 billion rescue package, including $40 billion for partial ownership. This $40 billion comes from the $700 billion allocated in the EESA and is the first time any money from that allocation was used for an entity other than a bank.

In late November 2008, the Federal Reserve announced a program to purchase the direct obligations of Fannie Mae, Freddie Mac, and the Federal Home Loan Banks up to $100 billion. Additionally, the Federal Reserve will purchase mortgage-backed securities collateralized by Fannie Mae, Freddie Mac, and Ginnie Mae up to $500 billion. These purchases will take place over the next several quarters and are not associated with the EESA. This program has the intent of reducing the cost and increasing the availability of credit for the purchases of houses. Although these actions have helped the economy dodge further bankruptcies, it remains to be analyzed the extent to which these programs decreased the severity of the current economic crisis.

Lastly, in December 2008, the president announced a $17.4 billion rescue package for U.S. automakers. The first $13.4 billion will be lent to the automakers immediately, with the remaining $4 billion likely in the coming months. By the end of the first quarter of 2009, the borrowing automakers must prove they are financially viable, which is defined as having a positive net present value. If not, even though the loans are for 3 years, they will become due and all funds must be returned within 30 days. The U.S. government will also receive nonvoting warrants from these automakers. This is the second instance where funds have been allocated from EESA for entities other than financial institutions.

Resources for Economic Information

The Internet covers a vast amount of information that you may find valuable. Some of the sites not previously mentioned in this section and links to relevant documents regarding economic information include those shown in the following table.
Given the current economic crisis, there are a number of accounting and financial reporting issues that auditors should consider, such as the following:

- Fair value, including fair value measurements in illiquid markets
- Impairment
- Liquidity restrictions

### Fair Value

**The Need for Further Fair Value Guidance**

Among the causes cited for the economic crisis, FASB Statement No. 157 has received a great deal of attention. FASB Statement No. 157 defines fair value and establishes a framework for measuring fair value; however, it does not dictate when an entity must measure something at fair value, nor does it expand the use of fair value in any way. The beginnings of fair value accounting measurements came about in the 1970s. The need to understand fair value accounting has increased in importance as alternative investments increased in popularity and complexity. Some of the developments in fair value accounting have been in response to the savings and loan crisis and Japan’s lost decade in the 1990s.

**Fair value** is defined as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” A contention with FASB Statement No. 157 is in regard to lack of guidance in applying fair value in an illiquid or distressed market, such as the current one. A lack of guidance also has the potential to create inconsistencies in application by accountants and auditors. The areas of FASB Statement No. 157 that relate to measuring fair value in an illiquid market are limited to the following mentions:

- “An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).”
• “Market participants are buyers and sellers in the principal (or most advantageous) market for the asset or liability that are... [w]illing to transact for the asset or liability; that is, they are motivated but not forced or otherwise compelled to do so.”

• “For example, a transaction price might not represent the fair value of an asset or liability at initial recognition if... [t]he transaction occurs under duress or the seller is forced to accept the price in the transaction. For example, that might be the case if the seller is experiencing financial difficulty.”

.46 Both the SEC and FASB took notice of constituents’ desire for further guidance. On September 30, 2008, the SEC issued SEC Office of the Chief Accountant and FASB Staff Clarifications on Fair Value Accounting, (SEC and FASB press release) to provide immediate clarifications on fair value in illiquid markets for preparers and auditors until FASB was able to provide additional interpretative guidance. Shortly thereafter, FASB issued FSP FAS 157-3 as authoritative guidance to clarify the application of FASB Statement No. 157 in an inactive market and to provide an illustrative example of key considerations in determining the fair value of an asset in an inactive market.

.47 As previously discussed, the EESA required the SEC to conduct a study on the impact of FASB Statement No. 157, which was released on December 30, 2008. In mid-October 2008, the SEC announced it would hold 2 roundtable discussions to assist in its mandated study of FASB Statement No. 157. The participants in these discussions included investors, issuers, auditors, and others with experience in fair value accounting. Additionally, the SEC requested public comment on the topic. These roundtable discussions occurred on October 29, 2008, and November 21, 2008.

.48 The AICPA has formally commented on the study via a letter to the Deputy Chief Accountant of the SEC. This letter states “[A]ny recommendations resulting from this study should be deliberated on and addressed by the FASB, ...[w]ith appropriate oversight by the SEC given its investor protection mandate, is best able to decide what is the most appropriate financial reporting for capital markets.” The letter also discusses the importance of transparency and neutrality in financial reporting, as well as the consideration of how the results of the study should be applied to privately held entities. Further, SEC Chairman Cox addressed some of the preliminary findings of the study in his December 8, 2008 speech at an AICPA conference. The text of his speech can be found at www.sec.gov/news/speech/2008/spch120808cc.htm. The outcome of the overall study of the effects of FASB Statement No. 157 is discussed in the “Results of SEC Study on Fair Value Accounting” section of this alert. In addition to the EESA requiring the SEC to study the effects of FASB Statement No. 157, the EESA also restated the SECs right to suspend the application of FASB Statement No. 157. To understand these issues, it is important to understand fair value accounting and some of its history, which are discussed further in the “Accounting Issues and Developments” section of this alert.

Opposition to Fair Value

.49 The constituents calling for the repeal of FASB Statement No. 157 claim it worsened the economic situation. Further, these constituents claim current accounting standards did not anticipate the wide variance and price disconnects of today’s marketplace. They argue that there should be a more appropriate and accurate measure that approximates true fair value over longer periods of time than just the immediate time frame.

.50 They assert that the standard has distorted the true value of certain assets, which forces banks to take large write-downs, which in turn led to declines in stock values. As assets kept being written down and stock prices dropped, this caused more asset write downs and a steep downward sloping cycle began that has since frozen the markets. Essentially, assets were valued at distressed prices to comply with FASB Statement No. 157, which exacerbated the current economic crisis by forcing losses and therefore hindering banks from lending.

.51 The core problem seen by opponents of FASB Statement No. 157 is the way companies are forced to value assets in illiquid markets. This general sentiment did not change after FSP FAS 157-3 was issued, as the FSP requires that liquidity risk from the buyers perspective be factored into the fair value calculation. In some constituents opinions, this requirement forces the fair value back to a distressed sale value, which they feel does not represent true fair value and is not useful to users of financial statements. A separate
Qualm with the FSP is the practicability; large banks have too many securities to apply these provisions and small banks do not have sufficient resources to apply the provisions.

Opponents argue the market value quotes being seen in these illiquid markets represent prices that companies would be willing to pay for assets they do not want to buy or that are set at prices from liquidation sales. A suggestion for valuing assets in an illiquid market is to use either economic value (where credit losses are deducted from the value) or intrinsic value.

Support for Fair Value

The proponents of FASB Statement No. 157 claim the standard merely exposed the problem; it did not create the problem. Conversely, there are many entities that strongly advocate for no suspension of FASB Statement No. 157 and are in favor of the guidance in FSP FAS 157-3 for valuing assets in illiquid markets. There are 4 primary reasons not to suspend FASB Statement No. 157 as noted by various constituents:

- Standard-setting authority should remain with an independent standard-setting body such as FASB and not become a political process.
- Fair value in accordance with FASB Statement No. 157 serves investor interests by enhancing the transparency of financial statements.
- Fair value in accordance with FASB Statement No. 157 increases comparability across companies financial statements.
- Fair value in accordance with FASB Statement No. 157 is more accurate than historical or amortized cost values and superior to other, more subjective, valuation calculations.

Proponents of FASB Statement No. 157 also believe that its issuance improved comparability across financial statements for investors. The requirement to measure items at fair value has existed since the 1970s; however, each entity applied the guidance differently. FASB Statement No. 157 defines fair value, establishes a framework to measure fair value, and requires additional disclosures to enhance investors understanding. Using an exit price, as mandated by FASB Statement No. 157, provides the most relevant, consistent, and transparent fair value to investors and other users of financial statements.

Lastly, proponents of fair value in accordance with FASB Statement No. 157 believe it is the most accurate and objective measure. Measuring assets at historical cost does not account at all for the current market conditions, whether good or bad, and therefore does not accurately reflect current values. Measuring assets at intrinsic or economic values is subjective to managements judgments as intrinsic and economic values are not uniformly defined.

However, proponents of FASB Statement No. 157 do not purport that no flaws exist with the current guidance. Although FSP FAS 157-3 was issued to provide further authoritative guidance in illiquid markets, proponents would still like more guidance due to the high levels of judgment used in applying fair value in illiquid markets. Specifically, the requests are for (a) further guidance on determining when to shift from level 2 inputs to level 3 inputs; (b) how to determine when a market is inactive or when a transaction is distressed; (c) additional examples of fair value measurements under diverse market conditions; and (d) further guidance on how to present periodic changes in asset valuation.

As described in the October 15, 2008, The Center for Audit Quality (CAQ) letter to the SEC, “a move by the SEC to suspend fair value accounting would be a disservice to the capital markets, would be inconsistent with the views of investors, would harm the credibility and independence of the standards setting process, and would run counter to fundamental notice and comment principles.”

Results of SEC Study on Fair Value Accounting

In late December 2008, the SEC released to Congress its EESA-mandated report on fair value accounting standards. This report recommends against the suspension of fair value accounting standards.
However, it does recommend improvements to existing practice, including reconsidering the accounting for impairments and the development of additional guidance for determining fair value of investments in inactive markets, including situations where market prices are not readily available.

.59 The highlights of the report include the following findings related to the key EESA mandated topics and 8 recommendations by the SEC staff:

a. First, in regard to the effect of fair value accounting standards on financial institutions balance sheets, the SEC staff observed that fair value measurements were used to measure a minority of the assets and liabilities included in financial institutions balance sheets. However, these fair value measurements did significantly affect financial institutions reported income.

b. Second, in regard to the impact of fair value accounting on bank failures in 2008, the staff observed that it did not appear to play a significant role.

c. Third, in regard to the impact of fair value accounting on the quality of financial information available to investors, the staff noted investors generally support measurements at fair value. However, many investors also indicated the need for improvements to existing fair value standards.

d. Fourth, the report confirmed that FASB, as an independent accounting standard-setter, is best positioned to develop neutral accounting guidance. However, there are steps that could be taken to enhance the existing process in terms of timeliness and transparency.

e. Fifth, the staff found that suspending FASB Statement No. 157 would lead to a reversion of practice and would likely increase investor uncertainty. Nonetheless, the issuance of additional guidance is advised.

f. Lastly, the staff provided recommendations on the advisability and feasibility of modifications to existing accounting standards and related financial report requirements.

.60 The 8 key recommendations from the report are as follows:

- FASB Statement No. 157 should be improved, but not suspended.
- Existing fair value and mark-to-market requirements should not be suspended.
- Additional measures should be taken to improve the application and practice related to existing fair value requirements (particularly as they relate to both level 2 and level 3 estimates).
- Accounting for financial asset impairments should be readdressed.
- Further guidance should be implemented to foster the use of sound judgment.
- Accounting standards should continue to be established to meet the needs of investors.
- Formal measures to address the operation of existing accounting standards in practice should be established.
- Accounting for investments in financial assets should be simplified.

.61 The changes in fair value accounting standards and the FASB standard setting process that could occur due to the results of this report will be seen in the coming months and years. For the full text of the SEC report, visit www.sec.gov/news/studies/2008/marktomarket123008.pdf.

Understanding Fair Value Accounting

Definition of Fair Value

.62 Paragraph 5 of FASB Statement No. 157 defines fair value as “the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.” That definition retains the exchange price notion in earlier definitions of fair value but clarifies that the exchange price is the price in a hypothetical transaction at the measurement date in the
A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market defined as the market in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity for the asset or liability, or, in the absence of a principal market, the most advantageous market for the asset or liability.

A fair value measurement of an asset assumes the highest and best use of the asset by market participants, considering the use of the asset that is physically possible, legally permissible, and financially feasible at the measurement date. Highest and best use for an asset is established by one of two valuation premises: value in-use or value in-exchange.

If the asset would provide maximum value to market participants principally through its use in combination with other assets as a group (as installed or otherwise configured for use), the highest and best use of the asset is in-use. For example, value in-use might be appropriate for certain nonfinancial assets. An assets value in-use should be based on the price that would be received in a current transaction to sell the asset assuming that the asset would be used with other assets as a group and that those other assets would be available to market participants.

If the asset would provide maximum value to market participants principally on a standalone basis, the highest and best use of the asset is in exchange. For example, value in-exchange might be appropriate for a financial asset. An assets value in-exchange is determined based on the price that would be received in a current transaction to sell the asset standalone.

A fair value measurement for a liability reflects its nonperformance risk (the risk that the obligation will not be fulfilled). Because nonperformance risk includes the reporting entity’s credit risk, the reporting entity should consider the effect of its credit risk (credit standing) on the fair value of the liability in all periods in which the liability is measured at fair value.

Valuation Techniques

As described in FASB Statement No. 157, valuation techniques, which are consistent with the market approach, income approach, cost approach, or some combination of these approaches, should be used to measure fair value:

- The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach include matrix pricing and often use market multiples derived from a set of comparables.

- The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Valuation techniques consistent with the income approach include present value techniques, option-pricing models, and the multiperiod excess earnings method.

- The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (often referred to as current replacement cost). Fair value is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility, adjusted for obsolescence.

Valuation techniques that are appropriate in the circumstances and for which sufficient data are available should be used to measure fair value. In some cases, a single valuation technique will be
appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate and the respective indications of fair value should be evaluated and weighted, as appropriate.

Present Value Techniques

Appendix B of FASB Statement No. 157 provides guidance on present value techniques. Present value techniques differ in how they adjust for risk and in the type of cash flows they use. For example, the discount rate adjustment technique (also called the traditional present value technique) uses a risk-adjusted discount rate and contractual, promised, or most likely cash flows. In contrast, expected present value techniques use the probability-weighted average of all possible cash flows (referred to as expected cash flows). The traditional present value technique and 2 methods of expected present value techniques are discussed more fully in appendix B of FASB Statement No. 157.

The Fair Value Hierarchy

FASB Statement No. 157 emphasizes that fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use when pricing the asset or liability (referred to in the statement as inputs). Paragraphs 21–31 establish a fair value hierarchy that distinguishes between (a) market participant assumptions developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (b) the reporting entity’s own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). Valuation techniques used to measure fair value should maximize the use of observable inputs and minimize the use of unobservable inputs.

The fair value hierarchy in FASB Statement No. 157 prioritizes the inputs to valuation techniques used to measure fair value into 3 broad levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available, except as discussed in paragraphs 25–26 of FASB Statement No. 157.

- Level 2 inputs are inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. Adjustments to level 2 inputs will vary depending on factors specific to the asset or liability. An adjustment that is significant to the fair value measurement in its entirety might render the measurement a level 3 measurement, depending on the level in the fair value hierarchy within which the inputs used to determine the adjustment fall. Level 2 inputs include the following:
  - Quoted prices for similar assets or liabilities in active markets
  - Quoted prices for identical or similar assets or liabilities in markets that are not active
  - Inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates)
  - Inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs)

- Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs should be used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. In developing unobservable inputs, the reporting entity need not undertake all possible efforts to obtain information about market participant assumptions. Unobservable inputs should reflect
the reporting entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

Disclosures

.73 Paragraphs 32–35 of FASB Statement No. 157 expand the disclosures required for assets and liabilities measured at fair value. For assets and liabilities that are measured at fair value on a recurring basis in periods subsequent to initial recognition or that are measured on a nonrecurring basis in periods subsequent to initial recognition, the statement requires the reporting entity to disclose certain information that enables users of its financial statements to assess the inputs used to develop those measurements. For recurring fair value measurements using significant unobservable inputs (level 3), the reporting entity is required to disclose certain information to help users assess the effect of the measurements on earnings (or changes in net assets) for the period.

Additional Fair Value Guidance

.74 Since FASB Statement No. 157 was issued, a number of FSPs have been issued. In February 2008, FASB issued FSP FAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13, which amends FASB Statement No. 157, to exclude FASB Statement No. 13, Accounting for Leases, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141, Business Combinations, or FASB Statement No. 141 (revised 2007), regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

.75 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. However, in February 2008, FASB also issued FSP FAS 157-2, Effective Date of FASB Statement No. 157, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157. As previously mentioned, in October 2008, FASB issued FSP FAS 157-3, which clarifies FASB Statement No. 157’s application in an inactive market and also amends the standard to include an illustrative example.

Measurements of Fair Value in Illiquid Markets

.76 Given the state of the market, there is confusion around the use of market quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are in actuality distressed sales. On September 30, 2008, while FASB was going through its due process to issue interpretative guidance, the SEC issued the SEC and FASB press release in an effort to assist preparers and auditors by providing immediate clarification. Ten days later, FASB issued FSP FAS 157-3. This FSP noted the consistency between the guidance provided in it and the guidance provided in the SEC and FASB press release.

.77 FSP FAS 157-3 noted the following:

Broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset. ... In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.
Two other factors to consider regarding the reliability of a quote are whether it can be determined that market participants currently are transacting at that price and the appropriateness of the valuation technique employed by the pricing service to arrive at the quoted price.

As discussed in paragraph 7 of FASB Statement No. 157, “an orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).” Low transaction volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. The market would still be considered active as long as the frequency and volume of transactions are sufficient to provide reliable pricing information. Additionally, the size of an entity’s position should not be a factor in this determination. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

If transaction volume is too low to provide accurate pricing information and therefore not a level 1 input, those observable transactions are to be considered level 2 inputs or even level 3 inputs if they are significantly adjusted. In October 2007, the CAQ, which is affiliated with the AICPA, issued a white paper on the topic and noted that some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” In describing an inactive market as well, the SEC and FASB press release noted, “A significant increase in the spread between the amount sellers are asking and the price that buyers are bidding, or the presence of a relatively small number of bidding parties, are indicators that should be considered in determining whether a market is inactive.”

The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “[i]n cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB press release noted that “in some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs it may be appropriate to utilize an estimate based primarily on unobservable inputs.” When significant adjustments are made to an observable input (level 2), it becomes a level 3 fair value measurement. The level of activity in the market in which transactions occur (that is, whether the market is active or inactive) is an indicator of the extent to which the entity will have relevant observable market data that will not require a significant adjustment in its determination of fair value.

Paragraph C85 of FASB Statement No. 157 states that “the reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transaction or assumptions that are reasonably available without undue cost and effort.

The FSP concluded that “the use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted, “In some cases, multiple inputs from different sources may collectively provide the best evidence of fair value. In these cases expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.”

Readers are encouraged to review the full text of the FSP and the amended standard (inclusive of its recently added illustrative example) on the FASB Web site at www.fasb.org. The FSP was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement
of APB Opinion No. 20 and FASB Statement No. 3; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.

**International Accounting Standards Board Fair Value Guidance**

.85 In October 2008, the International Accounting Standards Board (IASB) issued the staff summary “Using judgment to measure the fair value of financial instruments when markets are no longer active,” which accompanies the IASB expert advisory panel report “Measuring and disclosing the fair value of financial instruments in markets that are no longer active.” The summary takes into consideration and is consistent with FSP FAS 157-3 and the SEC and FASB press release. Additionally, the summary notes the consistency between FSP FAS 157-3 and the SEC and FASB press release with International Accounting Standard No. 39, *Financial Instruments: Recognition and Measurement*.

**FASB Statement No. 159**

.86 Subsequent to the issuance of FASB Statement No. 157, FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with FASB’s long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement’s objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions.

.87 In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.88 FASB Statement No. 159 is effective as of the beginning of an entity’s first fiscal year after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to “be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard.” The alert can be accessed at [www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf](http://www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf).

**Fair Value Resources**

.89 The Internet covers a vast amount of information that you may find valuable. Some of the sites not previously mentioned in this section and links to relevant documents regarding fair value measurements include those shown in the following table:

**Other-Than-Temporary Impairment**

.90 Determining when an investment is other-than-temporarily impaired is another important topic that has received increased attention in today’s economic environment. FSP FAS 115-1 and FAS 124-1, *The Meaning of Other-Than-Temporary and Its Application to Certain Investments*, addresses the determination of when an investment is considered impaired, whether the impairment is other-than-temporary, and the
measurement of the impairment loss. Also included in the FSP are accounting issues to be considered subsequent to the recognition of other-than-temporary impairments and related disclosures about unrealized losses as a result of the other-than-temporary impairment. The guidance in this FSP applies to (a) debt and equity securities within the scope of FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, (b) debt and equity securities within the scope of FASB Statement No. 124, Accounting for Certain Investments Held by Not-for-Profit Organizations, and that are held by an investor that reports a performance indicator, and (c) equity securities not within the scope of FASB Statement Nos. 115 and 124 and not accounted for under the equity method pursuant to Accounting Principles Board (APB) Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. The remaining discussion focuses on impairment of debt and equity securities. However, the auditor should also be alert for all types of assets which can become impaired, including goodwill, deferred tax assets, and real property. Given the current economic situation, entities should be alert to values of many types of assets on the balance sheet and possible impairment issues. Readers should consult the appropriate accounting requirements for further information. For further details on impairment for equity method investments and the full text of the FSP, please visit the FASB Web site at www.fasb.org.

.91 According to FSP FAS 115-1 and 124-1, “Impairment shall be assessed at the individual security level. An investment is impaired if the fair value of the investment is less than its cost. (Cost includes any adjustments made to the cost basis of an investment for accretion, amortization, previous other-than-temporary impairments, and hedging.)” Investors shall assess impairment in each reporting period. If it is determined, based on these criteria, that impairment has occurred, the next step is to determine whether it is temporary or other-than-temporary. As noted in footnote 4 of the FSP, “Other than temporary does not mean permanent.” For additional guidance on determining if an impairment is other-than-temporary, the FSP refers users to FASB Statement No. 115; Emerging Issues Task Force (EITF) Issue No. 99-20, “Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets”; and SEC Staff Accounting Bulletin (SAB) Topic 5.M, Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities (previously referred to as SAB No. 59).

.92 Paragraph 16 of FASB Statement No. 115 notes, “If it is probable that the investor will be unable to collect all amounts due according to the contractual terms of a debt security not impaired at acquisition, an other-than-temporary impairment shall be considered to have occurred.” SAB Topic 5.M expands with the following additional factors which might indicate a decline is other-than-temporary:

- The duration and extent to which the fair value is below cost
- The financial health of the issuer
- The intent and ability of the investor to hold the investment until it has recovered

.93 The September 30, 2008, SEC and FASB press release reiterated the preceding criteria from SAB Topic 5.M. An additional comment in this release noted, “In general, the greater the decline in value, the greater the period of time until anticipated recovery, and the longer the period of time that a decline has existed, the greater the level of evidence necessary to reach a conclusion that an other-than-temporary decline has not occurred.”

.94 EITF Issue No. 99-20 applies to beneficial interests that continue to be held by a transferor in securitization transactions that are accounted for as sales and purchased beneficial interests in securitized financial assets. If the fair value of the beneficial interest is less than the reference amount, the security should be evaluated for impairment. The reference amount is equivalent to the initial cost less cash received to date less other-than-temporary impairments recognized to date plus the yield accreted to date. Consistent with paragraph 16 of FASB Statement No. 115, EITF Issue No. 99-20 states, “If, based on a holders best estimate of cash flows that a market participant would use in determining the current fair value of the beneficial interest, there has been an adverse change in estimated cash flows...an other-than-temporary impairment should be considered to have occurred.”
Determining whether an other-than-temporary impairment has occurred requires significant judgment by the preparer of the financial statements based upon numerous considerations; generally accepted accounting principles (GAAP) do not provide any suggestions in making this conclusion. Readers are encouraged to read the full text of FSP FAS 115-1 and FAS 124-1, the SEC and FASB press release, SAB Topic 5.M, FASB Statement No. 115, and EITF Issue No. 99-20.

On October 14, 2008, the SEC issued a letter to FASB with additional guidance on how to assess declines in fair value for perpetual preferred securities (PPS). Prior to this issuance, the SEC had received a number of inquiries on this topic including a letter from the American Bankers Association and a letter from the CAQ. PPS are classified as equity securities in accordance with FASB Statement No. 115 because they are not required to be redeemed by the issuer, nor are they redeemable at the option of the investor. Further, the SEC noted that FASB Statement No. 115 does not specifically address the impact of the debt-like characteristics of PPS on the assessment of other-than-temporary impairment. Until this matter can be further addressed by FASB, the SEC concluded that “it would not object to an issuer for impairment tests in filings subsequent to the date of this letter applying an impairment model (including an anticipated recovery period) similar to a debt security provided there has been no evidence of a deterioration in credit of the issuer (for example, a decline in the cash flows from holding the investment or a downgrade of the rating of the security below investment grade).” Further, an issuer should follow disclosure requirements required by FSP FAS 115-1 and FAS 124-1 if the cost of a PPS exceeds the fair value. The full text of the letter can be found at www.sec.gov/info/accountants/staffletters/fasb101408.pdf.

Modifications of Residential Mortgage Loans

In the current market environment where many homeowners are unable to make their mortgage payments, lenders have turned to restructuring mortgages as a way to prevent default and foreclosure. Methods of restructuring include, but are not limited to, reducing the interest rate, forgiving a portion of the principal, and extending the life of the loan. As a result of these restructurings, many of these residential mortgage loans will be subject to FASB Statement No. 114, Accounting by Creditors for Impairment of a Loan, for the first time. Paragraph 6(a) of FASB Statement No. 114 excludes from its scope “large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment”. However, as discussed in paragraph 9, a loan that is initially excluded from the scope of the statement, but whose terms are modified in a troubled debt restructuring, becomes subject to the provisions of the statement once the loan is restructured. A troubled debt restructuring as used in this scenario is consistent with the definition stated in paragraph 2 of FASB Statement No. 15, Accounting by Debtors and Creditors for Troubled Debt Restructurings, which describes a troubled debt restructuring as a situation where “the creditor for economic or legal reasons related to the debtor’s financial difficulties grants a concession to the debtor that it would not otherwise consider.” To address and assist during this growing situation of first time appliers of FASB Statement No. 114, the CAQ issued a white paper in December 2008, Application of Statement 114 to Modifications of Residential Mortgage Loans That Qualify as Troubled Debt Restructurings.

Readers are encouraged to view the full text of the FASB statement and the CAQ white paper on the FASB Web site and at http://thecaq.org/newsroom/pdfs/FAS114_LoanModifications.pdf.

Liquidity Restrictions

The AICPA staff has issued the new nonauthoritative Technical Practice Aid (TPA) Technical Questions and Answers (TIS) 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), which addresses the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle. The TIS section discusses some considerations for when these restriction events occur, such as determining (a) whether any assets subject to these restrictions qualify as cash equivalents or current assets; (b) whether disclosures about the risks and uncertainties resulting from such restrictions should be made; (c) whether these restrictions may trigger violations of debt covenants and consequently if that liability should be classified as current; (d) if the occurrence of such restriction occurs between the balance sheet date and the issuance date, whether the financial statements need to be adjusted; and (e) if the
restriction events call into question the entity’s ability to continue as a going concern. For further details, please find the TIS section at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

Tax Exempt Debt Issues for Not for Profit Organizations

.100 The current credit environment has affected the market for debt securities. Although all debt securities may be affected, particular issues affect not-for-profit organizations issuing tax exempt debt. Some examples of these tax exempt debt securities are auction rate securities and variable rate demand obligations.

.101 Although each situation is different and should be evaluated based on its own specific facts and circumstances, the current situation may raise various accounting and auditing issues pertaining to issuers of tax exempt debt, including, but not limited to, the following:

- Bond restructurings
- Derivative and hedge accounting implications
- Potential violation of debt covenants
- Classification of the debt on the balance sheet as either a current or noncurrent liability
- Subsequent event disclosures
- Going concern issues

.102 For further information, refer to a nonauthoritative article the AICPA has posted to its Web site, authored by a group of AICPA members, Tax-Exempt Bonds—Accounting and Auditing Considerations in the Current Environment. The article can be accessed at www.aicpa.org/download/acctstd/ars_article14.pdf.

Other Accounting and Financial Management Considerations

.103 Operating in the current economic environment produces various challenges for your clients and requires taking some steps to meet those challenges, including managing liquidity, maintaining and improving their controls and risk management, and providing increased transparency to investors through financial statement disclosures. Included in the following are some considerations for your clients. For more information to assist the financial statement preparers, the AICPA is developing a Financial Reporting Alert as a companion publication to this alert.

Managing Risk

.104 Given the events of 2008, entities should ensure that counterparty risk has been minimized to the extent practicable. Some steps entities could take to achieve this goal include reassessing possible defaults of any significant counterparties, reviewing and examining the underlying collateral for all agreements that contain these requirements, assessing any changes in the creditworthiness of the counterparty, diversifying among counterparties, and if possible, creating cross-default clauses in debt agreements. The decline in financial institutions due to bankruptcy or consolidation may also negatively affect an entity’s ability to obtain favorable financing terms in addition to limiting the entity’s ability to diversify counterparty risk. Given the dramatic decline in the current market values of securities, entities should also consider reevaluating internally used valuation models to ensure that all current risk factors are appropriately incorporated.

.105 Other considerations include analyzing the amounts of recourse, nonrecourse, and unlevered financings to ensure an appropriate balance exists. Similarly, the total amount of leverage employed by an entity should be analyzed as it could be detrimental to the entity if investors or lenders view the ratio as too high. An entity should constantly monitor all covenants in order to prevent a violation before it happens. Lastly, an entity’s management might consider increasing lines of credits or exploring other measures to ensure any future requirements for liquidity can be met.
With the constant news of lay-offs and companies scaling back spending, management should try to strike a balance between curtailing spending and maintaining a robust risk management process. With the expected continued risks and uncertainties facing our economy, a strong risk management process will be a vital asset in maintaining an entity’s financial health.

Given the sharp declines in many entities stock prices and debt securities, some entities are considering repurchasing these assets. This action can also boost investor confidence. To implement any repurchases, entities must ensure that they are authorized to take such measures and obtain any necessary approvals from the board of directors. Entities should also consider any tax and debt covenant implications of such repurchases. When making future decisions regarding liquidity needs, entities should also consider necessary contributions to pension plans.

**Internal Control and Processes**

Another area on which entities should focus during this economic period is controls. Many entities, in an attempt to prevent another crisis, are developing process controls that help them better understand their potential downside at any given point. Other possibilities include creating processes and controls within those processes to foster greater executive involvement and oversight. Entities are also implementing controls via human capital or software that more effectively capture the risk of an investment. Many have noted part of the problem that led to this economic crisis was the lack of understanding of investments owned and how greatly they could be affected by changes in the market. By having a firm-wide understanding of all assets owned, entities will more effectively be able to manage their risk and reduce the impact of the next economic storm that strikes.

Entities that invest heavily in financial assets and liabilities that are accounted for at fair value under FASB Statement No. 157 should consider implementing a controlled process and related policies for how to determine these measurements. As discussed by the Rothstein Kass article *SFAS 157 Fair Value Measurements: Implementation Challenges for the Alternative Investment Industry*, some items for inclusion might be the following:

Methodology on level designation, definition of an active market, the level of average trading volume and frequency that will deem a position as thinly traded (i.e., inactive)..., determination of the principal and/or most advantageous market, identifying aftermarket events and their impact on fair value, quantitative and qualitative documentation on the valuation techniques used, including how they fit into the fair value hierarchy, evaluating the effect of security restrictions, identifying risk assumptions in unobservable inputs, identifying the reports that will provide the required data to prepare the year-end financial statement disclosures..., [and] back testing of realized transactions.

**Disclosures**

In this current economic climate, both investors and regulators will be looking for increased disclosures in financial statements. Entities should review prior disclosures to be included in the current periods financial statements to determine if they are still appropriate and not misleading based on the current environment. Entities should also consider the effects of and disclosures of events that occurred after the balance sheet date. Some specific topics entities should consider expanding disclosures on include, but are not limited to, liquidity and capital resources, material impairments, pension plan assets, fair value determinations, critical accounting policies and estimates, risk factors, and relationships with distressed businesses. Another area to consider discussing is the entity’s strategy in dealing with current market conditions in addition to how it has been and will continue to be affected by the economic crisis.

In March and September 2008, the SEC sent illustrative letters to certain public companies identifying numerous disclosures on the application of FASB Statement No. 157 the entity may include in their managements discussion and analysis. Although the letters were sent only to financial institutions, the SEC has indicated that the letters apply to other organizations as well. The advice focused primarily on fair value measurements based on unobservable inputs, which require significant judgment and can have a
material effect on the results of an entity’s operations, liquidity, and capital resources. These letters can be obtained from the SEC’s Web site at www.sec.gov/divisions/corpfin/guidance/fairvalueltr0308.htm and www.sec.gov/divisions/corpfin/guidance/fairvalueltr0908.htm.

.112 Additionally, as described in AICPA Statement of Position (SOP) 94-6, Disclosure of Certain Significant Risks and Uncertainties (AICPA, Technical Practice Aids, ACC sec. 10,640), disclosure regarding an estimate should be made when known information available prior to issuance of the financial statements indicates that both of the following criteria are met:

- It is at least reasonably possible (more than remote but less than likely) that the estimate of the effect on the financial statements of a condition, situation, or set of circumstances that existed at the date of the financial statements will change in the near term due to one or more future confirming events
- The effect of the change would be material to the financial statements.

Audit and Attestation Issues and Developments
Understanding the Entity and Its Environment and Performing Audit Procedures in Response to Assessed Risks

.113 AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), establishes requirements and provides guidance about implementing the second standard of field work, as follows: “The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.” Obtaining this understanding is further complicated by the rapidly changing economic environment. In accordance with paragraph .04, the auditors primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures.

.114 The auditors understanding of the entity and its environment consists of an understanding of the following: (a) industry, regulatory, and other external factors, (b) nature of the entity, (c) objectives and strategies and the related business risks that may result in a material misstatement of the financial statements, (d) measurement and review of the entity’s financial performance, and (e) internal control, which includes the selection and application of accounting policies. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the handling of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.115 Appendix A of AU section 314 contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment relating to categories (a)—(d) of the preceding. Understanding the effects of the current economic climate on each specific audit client is a key step in designing the audit plan.

.116 AU section 318, Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained (AICPA, Professional Standards, vol. 1), provides guidance about implementing the third standard of field work, as follows: “The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.” To reduce audit risk to an acceptably low level, the auditor (a) should determine overall responses to address the assessed risks of material misstatement at the financial statement level and (b)
should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditors further audit procedures and the assessed risks.

Audit Risks Arising From Current Economic Conditions

.117 The overall responses to manage assessed risks and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor. In accordance with paragraph .75 of AU section 318, while performing the substantive procedures, some factors to assist the auditor in determining the sufficiency of the audit evidence include

- significance of the potential misstatement in the relevant assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements.
- effectiveness of managements responses and controls to address the risks.
- experience gained during previous audits with respect to similar potential misstatements.
- results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.
- source and reliability of available information.
- persuasiveness of the audit evidence.
- understanding of the entity and its environment, including its internal control.

.118 The recent economic conditions and regulatory actions described in this alert may cause additional risk factors that had not previously existed or did not have a material effect on audit clients in prior years. Some examples that may result from the current economic condition are as follows: constraints on the availability of capital and credit, going concern and liquidity issues, marginally achieving explicitly stated strategic objectives, use of off-balance-sheet financings, special-purpose entities and other complex financing arrangements, volatile real estate markets, and the credit crisis, which result in significant measurement uncertainty, including accounting estimates and fair value measurements, and operations that are exposed to volatile markets.

.119 Although many of these risks are not new to businesses, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17 of AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), some possible audit responses to a significant risk of material misstatement include increasing the extent of audit procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect your client, auditors should consider modifying audit procedures to ensure that risks are still addressed adequately.

.120 Public float of many entities has significantly decreased due to the steep declines in stock prices. Under the amended exit provisions, an accelerated filer (large or otherwise) whose public float falls below $50 million as of the last business day of its second fiscal quarter would become a nonaccelerated filer for that fiscal year. This has caused some entities that were previously accelerated filers under SEC rules to become nonaccelerated filers. Based on the discussion document from the SEC Regulations Committee meeting on September 26, 2006, an issuer that exits accelerated filer status and becomes a nonaccelerated filer is not required to comply with Section 404(b) for a fiscal year ending before December 15, 2009. Section 404(b) is the auditors attestation on the effectiveness of internal control over financial reporting. The full discussion document can be found at www.aicpa.org/cpcaf/download/DocumentA_404_Reptg_by_Non_Acc_Filers_092606.pdf.
Liquidity Considerations

.121 In the AICPA’s recently issued TIS section on liquidity, some considerations for auditors are discussed in addition to the accounting considerations previously discussed in the “Accounting Issues and Developments” section of this alert. Auditors should consider whether any additional disclosures made by management include “forward-looking statements that are not required by generally accepted accounting principles and therefore may not be audited.” Auditors should also consider whether the inability to withdraw funds can pose significant challenges to the entity’s liquidity and therefore affect the entity’s ability to continue as a going concern. Restrictions on liquidity may also be an appropriate matter to communicate to those charged with governance. Lastly, the auditor should consider if he or she wishes to emphasize any liquidity restrictions in the auditors report.

Alternative Investments

.122 Another source of information for auditors is the AICPA’s practice aid Alternative Investments—Audit Considerations. This nonauthoritative practice aid focuses on the existence and valuation assertions associated with alternative investments, but also discusses general considerations pertaining to auditing alternative investments, management representations, disclosure of certain significant risks and uncertainties, and reporting. As defined in the foreword of the practice aid, alternative investments are “investments for which a readily determinable fair value does not exist...including private investment funds meeting the definition of an investment company...such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds.” The full text of this practice aid can be located on the AICPA’s Web site at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

.123 Further, as discussed in a meeting of the FASBs Valuation Resource Group, net asset value of a fund may not represent fair value under FASB Statement No. 157. Given the state of the economy many funds are imposing limitations on redemptions and some are even unwinding. As this occurs, the fair value measurements applied to these investments will fall under increased scrutiny and become even more important.

Auditing Fair Value Measurements

.124 In addition to understanding the looming questions relative to fair value accounting, auditors should be aware of audit issues involving fair value accounting. Particular assets, liabilities, and components of equity are measured or disclosed at fair value in the financial statements, and it is management’s responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1).

.125 In regard to analyzing the sufficiency of the audit evidence, the strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor may also identify any possible indicators of impairment. According to paragraph .23 of AU section 328, “substantive tests of the fair value measurements may involve (a) testing managements significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.” Paragraph .26 also notes when testing the fair value measurements and disclosures, the auditor evaluates whether managements assumptions are reasonable and reflect market information, or are not consistent with market information. In relation to FASB
Statement No. 157 this might include whether the market is distressed, whether the transaction was an orderly transaction, the reasonableness of the determination within the fair value hierarchy of inputs, and the reasonableness of the underlying assumptions.

**Fair Values of Securities**

.126 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value. However, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). These prices may also be based on quoted prices from an active market or other observable inputs that will be a consideration on the auditors procedures as well. The process used by the pricing service in measuring fair value should be evaluated to determine the consistency with the specified valuation method (typically fair value as defined in FASB Statement No. 157). The auditor may also determine it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157 quoted prices in active markets are considered level 1 inputs.

.127 When an entity performs its own valuation, possible value testing procedures to be taken by the auditor include assessing the reasonableness, comparing the assumptions to industry reports or benchmarks, the appropriateness of the model, calculating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether the inputs to the entity’s valuation model are observable or not determines their characterization as level 2 or level 3 inputs, respectively, within FASB Statement No. 157. When there is extensive judgment, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, Professional Standards, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral should also be examined for existence, fair value, transferability, and the investors right to the collateral.

.128 Paragraph .19 of AU section 328 also notes, “The auditor should also evaluate whether the entity’s method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity, or changes in accounting principles.”

.129 The auditor should also evaluate managements conclusions regarding other-than-temporary impairment on its securities. Examples of factors that could cause an other-than-temporary impairment per paragraph .47 of AU section 332 include the following:

- “Fair value is significantly below cost and
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.

- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.”
These factors are consistent with those discussed in the “Auditing Fair Value Measurements” section of this alert. Auditors must consider all facts and circumstances when determining if an other-than-temporary impairment has occurred. Additionally, the classification of an entity’s securities is based on management’s intent and ability. The auditor should obtain an understanding of management’s classification process between trading, available-for-sale, and held-to-maturity, as well as consider the classifications in light of the entity’s current financial position.

**Auditing Accounting Estimates**

As noted in paragraph .04 of AU section 342, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as whole. Although this alert has discussed at length fair value measurements, it is important to remember there are many types of accounting estimates that exist in client financial statements. Some examples include the allowance for uncollectible accounts receivable, impairment analysis and estimated useful lives of long-lived assets, valuation allowance for deferred tax assets, and actuarial assumptions in pension and other postretirement benefit costs. Given the current economic climate, additional skepticism should be exercised when considering management’s underlying assumptions used in accounting estimates. When evaluating accounting estimates, the auditor should consider, with professional skepticism, both the subjective and objective factors. As discussed in paragraph .09 of AU section 342, key factors and assumptions the auditor normally concentrates on include which assumptions are significant to the estimate, sensitive to variations, deviate from historical patterns, or are particularly subjective and susceptible to misstatement and bias. However, it is important to consider whether historical patterns are still applicable. For example, in a slow market, new patterns may emerge. A key aspect of AU section 342 in this economy is for an auditor to determine the reasonableness of management’s accounting estimates with an extra degree of professional skepticism given the current economic climate and possible increases of pressure on management to meet earnings. As noted by AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*, vol. 1), when assessing audit differences between client estimates and audit estimates, even if they are individually reasonable, an auditor should consider whether these differences are indicative of possible bias by management. If so, the auditor should reconsider the estimates taken as a whole.

The auditor should obtain an understanding of how management develops estimates and should employ one of the approaches in testing that process as outlined in AU section 342 paragraph .10. In reviewing and testing management’s process, the auditor may consider identifying controls around this process and determining if the underlying data used for the estimate are reliable and used appropriately. An auditor may also develop an estimate and compare it to management. Lastly, the auditor may review subsequent events or transactions occurring prior to the date of the auditor’s report. Further, as noted in AU section 316, hindsight may provide the auditor additional insight into the existence of management bias. For further details on auditing estimates, see AU section 342.

Additionally, AICPA SOP 94-6 describes required disclosures regarding estimates when certain information is known before issuance of the financial statements.

**Using the Work of a Specialist**

It may be necessary to use a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters during the audit. Examples of matters where an auditor may engage a specialist are valuation issues, reasonableness of determination of amounts derived from specialized techniques or models, or implementation of technical requirements, regulations, or legal documents. AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor’s firm participates in the audit, AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), is applicable rather than AU section 336.
.135 When using the work of a specialist, the auditor should evaluate the specialist's professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist's findings in the context of the audit and related assertions in the financial statements.

Consideration of an Entity's Ability to Continue as a Going Concern

.136 The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards, and is an especially important consideration in the current state of the economy. An entity’s ability to continue as a going concern is affected by many factors related to the current uncertain economy—the industry and geographic area in which it operates, the financial health of its customers, suppliers, and financing sources. Accordingly, it is critical to perform an individual analysis of going concern issues related to each entity. The consideration of an entity’s ability to continue as a going concern may be discussed during client retention procedures and also in the earliest stages of the audit in conjunction with gaining an understanding of the entity and its environment. As explained by AU section 341, The Auditors Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1), the auditors evaluation is based on relevant conditions that exist at or have occurred prior to the date of the auditors report. Therefore, this is an ongoing evaluation that extends through the date of the auditors report.

.137 The auditor is responsible for evaluating whether there is a substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time. AU section 341 notes that is a period not to exceed one year beyond the date of the financial statements being audited. Some examples of indications that there could be substantial doubt about the ability of the entity to continue as a going concern include, but are not limited to, the following:

- Negative trends such as negative cash flows from operating activities, recurring operating losses, working capital deficiencies, or lack of the ability to obtain additional financing
- Other indications of financial difficulties such as defaults on debt, debt covenants, or both; arrearages in dividends; the need to seek new sources of financing; or the disposal of substantial assets
- Inadequate capitalization
- Internal matters such as turnover in key management positions like CEO, CFO, and controller, or substantial dependence on the success of a particular investment or project
- Entrance into a new market for which the entity might not have the required expertise to successfully compete
- External matters such as market conditions

.138 Audit teams may find it useful to have preliminary discussions about going concern considerations during engagement planning meetings. However, as noted in AU section 341, it is not necessary to design audit procedures around specifically identifying the possibility of a going concern since results of typical audit procedures should illuminate any indicators. These procedures may consist of analytical procedures, review of subsequent events, review of compliance with financing agreements, review of board minutes, inquiry of legal counsel, and confirmation with related third parties of the details of arrangements to provide or maintain financial support.

.139 Some risks related to the current state of the economy that may influence an entity’s ability to continue as a going concern include the following:

- Lenders may be looking for ways to get out of lending relationships.
• Financial support of a related party may not be a feasible mitigating factor depending on the financial health of that related party.
• An entity's financial health could be significantly weakened if their suppliers or customers have been strongly affected by the economic crisis.
• Projections provided by entities based on historical data may not be reliable future predictions.
• Some entities may be hesitant to include informative and transparent going concern disclosures.

.140 Possible audit responses for each of these respective risks are as follows:
• Discuss with management their relationship with the lender and thoroughly review loan agreements.
• Determine the viability of the related party to provide financial support and review any formal documentation stating the details of this financial support.
• Obtain a strong understanding of the entity's customers and suppliers and for any major customer or supplier consider reviewing data supporting their financial health.
• Review the projections in detail and consider their reasonableness based upon current economic conditions.
• Consider whether financial statement users would consider the disclosures complete.

.141 If the auditor believes a substantial doubt on the entity’s ability to continue as a going concern exists, the next steps are to obtain management plans to mitigate the effect of such conditions and then assess the likelihood that these plans can be effectively implemented. Additionally, auditors may consider posing the following questions to help make their assessment on how likely management plans will be to successfully mitigate their going concern risk:
• What is the strategy for extending lines of credit or refinancing any debt coming due? Have there been any preliminary agreements or discussions?
• If negative operating trends exist, how does management plan on turning them around?
• If turnover of key personnel has occurred, what actions are being taken to replace these positions?
• What is the plan to maintain or increase the liquidity of your balance sheet?
• Are there any restrictions which could limit management's ability to carry out these plans?

.142 As noted in paragraph .08 of AU section 341, when evaluating management’s plans, the auditor should also identify those elements that are particularly significant to overcoming the adverse effects of the conditions and events and obtain audit evidence for these elements. For example, at the date of this writing, a condition that is significant to some entities ability to continue as a going concern is the success of the government bailout for U.S. automakers. This would affect not just the automakers, but also any supplier which heavily relies on the business of one of these U.S. automakers, in addition to the thousands of dealerships across the country.

.143 If an auditor determines there is a substantial doubt about an entity’s ability to continue as a going concern, the auditor should communicate with those charged with governance of the entity in accordance with AU section 341. In that instance, the auditor should also consider the effects on the entity’s financial statements and the adequacy of the related disclosure. The disclosure might include such information as the condition which gave rise to the doubt about the entity’s ability to continue as a going concern, management’s evaluation of the significance of those conditions and any mitigating factors, possible ceasing of operations, and management plans going forward. Alternatively, if management’s plan mitigates the risk of the entity’s ability to continue as a going concern, the auditor should consider disclosing the primary conditions that gave rise to the initial doubt and management plans. These disclosures are especially important for financial statement users to fully comprehend the entity’s financial strength and ability to continue as a going concern.
.144 If the auditor ultimately determines there is a substantial doubt about an entity’s ability to continue as a going concern, an explanatory paragraph should be added to the audit report following the opinion paragraph. AU section 341 provides an example explanatory paragraph.

.145 AU section 341 also provides further guidance to an auditor with respect to evaluating whether there is substantial doubt about an entity’s ability to continue as a going concern and what the auditor should do when such a doubt exists. FASB has undertaken a project that will relocate the guidance related to going concern from the realm of auditing standards to accounting standards. See the “On the Horizon” section of this alert for further details.

Consideration of Fraud in a Financial Statement Audit

.146 AU section 316 is the primary source of authoritative guidance about an auditors responsibilities concerning the consideration of fraud in a financial statement audit. AU section 316 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement (whether the material misstatement was caused by error or fraud as stated in paragraph .02 of AU section 110, Responsibilities and Functions of the Independent Auditor [AICPA, Professional Standards, vol. 1]).

.147 Three conditions generally are present when fraud occurs. First, management or other employees have an incentive or are under pressure, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an opportunity for a fraud to be perpetrated. Third, those involved are able to rationalize committing a fraudulent act. The current economic situation may result in unexpected losses and possibly cause financing or liquidity difficulties for many entities. Additionally, management may be valuing many illiquid securities using inherently subjective methodologies. These situations may provide management additional opportunity and incentive to commit fraud.

.148 A recent fraud discussed in the news, which contains all 3 conditions for fraud to occur, has been that of Bernard Madoff Investment Securities. At the time of this writing, the owner of the investment firm, Bernard Madoff, has been charged with paying off earlier investors with money from new investors. This is a classic example of a Ponzi scheme, which demonstrated itself as markets began declining and many investors requested redemptions of their capital. The losses from this fraud are estimated at $50 billion. Although the details of this fraud are just beginning to be investigated, auditors should ensure they are properly testing for existence of assets, such as investments in this scenario.

.149 Additionally, auditors should always gain an understanding of the entity’s business and how profits are made. In this scenario, auditors are being probed about failing to question the strong, consistent annual returns by these investment funds that lacked a clear investment strategy. Because of the characteristics of fraud, the auditors exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditors belief about management’s honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. In accordance with paragraph .79 of AU section 316, any fraud involving senior management and any fraud that causes a material misstatement of the financial statements (regardless of the perpetrator) should be reported directly to those charged with governance.

.150 As further discussed in AU section 316, 3 ways for the auditor to respond to the risk of material misstatement due to fraud include

- a response involving more general considerations apart from specific audit procedures otherwise planned. For example, ensure that the knowledge and skill of the assigned personnel to the client engagement matches the risk of material misstatement due to fraud of the engagement.
a response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed. For example, ensure that the auditing procedures to address the risk of material misstatement due to fraud vary depending upon the level of risk, the account balance, the class of transactions, and the related assertions which may be affected.

a response involving the performance of certain procedures to further address the risk of material misstatements due to fraud involving management override of controls given the unpredictable ways this could occur. For example, examine journal entries and other adjustments or evaluate the business rationale for significant unusual transactions.

Management Letter of Representations

.151 As discussed in AU section 333, Management Representations (AICPA, Professional Standards, vol. 1), in some circumstances, audit evidence that can be obtained by the application of auditing procedures other than inquiry is limited; therefore, the auditor obtains written representations to provide additional audit evidence. This may be the case for assumptions used in fair value measurements or the entire measurement or claims around an entity’s ability to continue as a going concern.

.152 According to paragraph .48 of AU section 328, the auditor ordinarily should add language to the letter of representations from management regarding the reasonableness of significant underlying assumptions, including whether they appropriately reflect management’s intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures. Additionally, depending on the nature, materiality, and complexity of fair values, representations may be included in regard to the appropriateness of the measurement methods and consistency in the application of these methods, the completeness and adequacy of disclosures related to fair values, and whether subsequent events require adjustment to the fair value measurements and disclosures included in the financial statements. When significant assumptions are used or they are highly subjective, and the items being measured at fair value are material, the auditor considers discussing these items with those charged with governance of the entity.

Communication With Those Charged With Governance

.153 In addition to instances where communication with those charged with governance in other auditing sections is discussed, there are other select measures outlined in AU section 380, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), which are specifically relevant during an economic crisis and when measuring fair value. AU section 380 establishes standards and provides guidance on the auditors communication with those charged with governance. As noted in paragraph .05, “the auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditors professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process.”

.154 The auditor should communicate his or her views about the quality of the entity’s significant accounting policies, accounting estimates, and financial statement disclosures. As further described in appendix B of AU section 380, the communication regarding accounting policies may include the effect of any significant accounting policies in controversial or emerging areas. Regarding accounting estimates, the communication may include

• managements identification of accounting estimates.
• managements process for making accounting estimates.
• risks of material misstatement.
• indicators of possible management bias.
• disclosure of estimation uncertainty in the financial statements

.155 AU section 328 expands on the applicability of AU section 380 when auditing fair value measurements by noting the consideration of the auditor to communicate the nature of the significant
assumptions used in fair value measurements, the degree of subjectivity involved, and the materiality of the items being measured at fair value to the financial statements as a whole.

.156 AU section 341 expands on the applicability of AU section 380 when the auditor has concluded that substantial doubt about the entity’s ability to continue as a going concern exists. In that case, the auditor should communicate to those charged with governance: the nature of the events or conditions identified, the possible effect on the financial statements, the sufficiency of the related disclosures, and the effects on the auditors report.

.157 Additionally, unless all of those charged with governance are involved in managing the entity, the auditor should communicate the representations being requested from management.

.158 Although it is impossible to predict and include all accounting, auditing, and attestation issues that may affect your engagements we have covered primary areas of concern given the current economic conditions. Continue to remain alert to economic, legislative, and regulatory developments as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

Recent Accounting, Auditing, and Attestation Pronouncements

.159 Presented in the following tables, for your convenience, are a list of recently issued accounting pronouncements and related guidance and a list of audit and attestation pronouncements and related guidance.

.160 For information on accounting, audit, and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued accounting standards in the CPA Letter and the Journal of Accountancy. Lastly, for announcements of newly issued auditing and attestation standards issued, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing and to the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion/.

Recent Auditing and Attestation Pronouncements and Related Guidance

SSAE No. 14, SSAE Hierarchy
(AICPA, Professional Standards, vol. 1, AT sec. 50)
Issue Date: November 2006

This statement identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in AT section 20, Defining Professional Requirements in Statements on Standards for Attestation Engagements (AICPA, Professional Standards, vol. 1). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006.

Interpretation No. 14, “Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .56–.59)
Issue Date: March 2002
Revised Date: May 2008
(Interpretive publication)

This interpretation of AU section 508 addresses the application of AU section 508 in reporting on financial statements prepared in conformity with International Financial Reporting Standards (IFRS).

Issue Date: May 2008
(Interpretive publication)

This interpretation of AU section 508 addresses the application of AU section 508 in reporting on financial statements prepared in conformity with IFRS.

Issue Date: May 2008
(Interpretive publication)

This interpretation of AU section 534 addresses the application of AU section 534 in reporting on financial statements prepared in conformity with IFRS.

| TIS sections 8200.05–.16 (AICPA, Technical Practice Aids) | These questions and answers in TIS section 8200, Internal Control, were developed in response to common questions received from members regarding the implementation of SAS Nos. 104–111. Some of the topics include:  
  - consideration of internal controls that are less formal or not documented by the client.  
  - whether the auditor may suggest improvements to a clients internal control.  
  - assessing inherent risk in relation to the consideration of control risk.  
  - the frequency of walkthroughs that are used as the basis for the auditors understanding of internal control.  
  - considerations in obtaining an understanding of, evaluating, and documenting controls that the auditor believes are nonexistent or ineffective.  
  - assessing control risk at the maximum level.  
  - considerations for developing a substantive audit strategy. | April and May 2008 | (Nonauthoritative) |

</table>
| **TIS section 9120.08, “Part of an Audit Performed in Accordance With International Standards on Auditing”** (AICPA, Technical Practice Aids)  
Issue Date: April 2008  
(Nonauthoritative) | This question and answer discusses the implications to the principal auditors report when part of an audit is conducted by other independent auditors in accordance with International Standards on Auditing or another country’s auditing standards. |
| **TIS section 9100.06, “The Effect of Obtaining the Management Representation Letter on Dating the Auditors Report”** (AICPA, Technical Practice Aids)  
Issue Date: May 2007  
(Nonauthoritative) | This question and answer discusses whether the auditor is required to have the signed management representation letter in hand as of the date of the auditors report. The question and answer indicates that although the auditor need not be in physical receipt of the representation letter on the date of the auditors report, management will need to have reviewed the final representation letter and, at a minimum, have orally confirmed that it will sign the representation letter, without exception, on or before the date of the representations. |
| **TIS section 8350.01, “Current Year Audit Documentation Contained in the Permanent File”** (AICPA, Technical Practice Aids)  
Issue Date: May 2007  
(Nonauthoritative) | This question and answer discusses whether the provisions of AU section 339, Audit Documentation (AICPA, Professional Standards, vol. 1), related to documentation completion and retention, apply to current year audit documentation maintained in the permanent file. The question and answer indicates that AU section 339 does apply to current year audit documentation maintained in a permanent file, or, for that matter, maintained in any type of file, if the documentation serves as support for the current years audit report. |
| **AICPA Professional Issues Task Force (PITF) Practice Alert (PA) 03-1, Audit Confirmations** (AICPA, Technical Practice Aids, PA sec. 16,240)  
Revised: June 2007  
(Nonauthoritative) | This practice alert is a response to practitioners current concerns about audit confirmations and includes discussion of improving confirmation response rates, negative versus positive confirmation requests, nonresponses to positive confirmations, responses to positive confirmation requests indicating exception, and use of electronic confirmations among other topics. |
| **AICPA PITF PA 07-1, Dating of the Auditors Report and Related Practical Guidance** (AICPA, Technical Practice Aids, PA sec. 16,290)  
Issue Date: January 2007  
(Nonauthoritative) | This practice alert provides guidance regarding application of certain provisions of AU section 339, primarily related to dating the auditors report. |
| **PCAOB Auditing Standard No. 6, Evaluating Consistency of Financial Statements** (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
Issue Date: September 2008  
(Applicable to audits conducted in accordance with PCAOB standards) | This standard and its related amendments update the auditors responsibilities to evaluate and report on the consistency of a company’s financial statements and align the auditors responsibilities with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3. This standard also improves the auditor reporting requirements by clarifying that the auditors report should indicate whether an adjustment to previously issued financial statements results from a change in accounting principles or the correction of a misstatement.  
Auditing Standard No. 6 is effective November 15, 2008. |
Recent Auditing and Attestation Pronouncements and Related Guidance

Issue Date: July 2007

(Applicable to audits conducted in accordance with PCAOB standards)

This standard replaces the PCAOB’s previous internal control standard, Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company’s financial statements, and, at the same time, eliminate procedures that are unnecessary.

Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.

**PCAOB Rule 3526, Communication with Audit Committees Concerning Independence (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)**

Issue Date: August 2008

(Applicable to audits conducted in accordance with PCAOB standards)

Rule 3526 requires the registered public accounting firm to

- describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

- discuss with the audit committee of the issuer the potential effects of any relationships that could impact independence, should they be appointed as the issuer’s auditor; and

- document the substance of these discussions. These discussions should occur at least annually.

The board also adjusted the implementation schedule for Rule 3523, Tax Services for Persons in Financial Reporting Oversight Roles (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), as it applies to tax services. The board agreed not to apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins. The amendments to Rule 3523 became effective August 28, 2008. The remaining provisions of Rule 3526 became effective on September 30, 2008.

**PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)**

Issue Date: July 2007

(Applicable to audits conducted in accordance with PCAOB standards)

This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client’s audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the SEC or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm’s independence, and document the substance of the firm’s discussion with the audit committee. These requirements parallel the auditor’s responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524, Audit Committee Pre-approval of Certain Tax Services (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”). This rule is effective for audits of fiscal years ending on or after November 15, 2007.

**Recent AICPA Independence and Ethics Pronouncements**

.162 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

.163 One specific independence consideration to pay particular attention to in the current economic environment relates to appropriate client services. Your firm may not provide valuation services for a client if the results of the service would be material to the clients financial statements and the service involves a significant amount of subjectivity.

.164 This rule has one limited exception for valuation services. Valuation services performed for nonfinancial statement purposes may be provided if they otherwise meet the general requirements of Interpretation No. 101-3, “Performance of Nonattest Services,” under Rule 101, Independence (AICPA, Professional Standards, vol. 2, ET sec. 101 par. .05).

**On the Horizon**

.165 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance because of the current state of the economy. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.166 The following table lists the various standard setting bodies Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.
Auditing Pipeline—Issuers

.167 In October 2008, the PCAOB proposed 7 new auditing standards to update and supersede the current risk assessment standards, which will be available for comment through February 18, 2009. The PCAOB chairman noted the proposals demonstrate the view that the risk of fraud is a central part of the audit process and not a separate consideration. The proposed standards integrate the risk assessment standards with the standard for the audit of internal control over financial reporting. Many of the International Auditing and Assurance Standards Boards risk assessment standards were utilized in creating these proposed standards and efforts were made to reduce any unnecessary differences. These proposed standards each have a statement of objective for the auditor, which were loosely adapted from the International Auditing Standards. This is an example of the move in the United States from rules-based to principles-based accounting and auditing standards because these objectives do not state required outcomes. The 7 proposed standards are the following:

- Audit Risk in an Audit of Financial Statements
- Audit Planning and Supervision
- Identifying and Assessing Risks of Material Misstatement
- The Auditors Responses to the Risks of Material Misstatement
- Evaluating Audit Results
- Consideration of Materiality in Planning and Performing an Audit
- Audit Evidence

.168 As with any new auditing standard or amendment to a PCAOB standard, after adoption by the PCAOB the standards will be submitted to the SEC for approval.

.169 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk).

Accounting Pipeline

.170 In December 2008, FASB added to the technical agenda a comprehensive project to address the complexity in existing standards of accounting and reporting for financial instruments, which will be undertaken jointly with the IASB. This comprehensive project comprises four short term projects, as follows:
a. Amendments to EITF Issue No. 99-20  
b. Disclosures about Certain Financial Instruments  
c. Recoveries of Other-Than-Temporary Impairments (Reversals)  
d. Embedded Credit Derivative Scope Exception

.171 At the time of this writing, exposure drafts on EITF Issue No. 99-20 and disclosures about certain financial instruments have been issued. Further, exposure drafts on recoveries of other-than-temporary impairments and embedded credit derivative scope exception are expected to be released in the first quarter of 2009. Some of these projects are expected to have effective dates applicable for 2008 calendar year end entities. Readers are encouraged to check the progress of these projects on the FASB Web site at www.fasb.org.

.172 In October 2008, FASB issued an exposure draft of a proposed statement on going concern. The comment deadline was December 8, 2008. Currently, as discussed in the “Audit and Attestation Issues and Developments” section, the guidance on going concern is covered in AU section 341 and not in accounting literature. As discussed in the exposure draft, “The Board believes that accounting guidance about the going concern assumption should be directed specifically to management of a reporting entity because management is responsible for preparing an entity’s financial statements and evaluating its ability to continue as a going concern.”

.173 This proposed statement exemplifies the convergence with International Financial Reporting Standards (IFRS) as the statement carries forward much of the guidance in AU section 341, yet changes portions of it to become consistent with its IFRS equivalent. The modifications are as follows:

• Extend, without limit, the horizon for going concern assessment from the prior one year time frame beyond the date of the financial statements being audited.

• Change the types of information to be considered in making the going concern assessment to be stated as “all available information about the future.”

• Require an entity to disclose when it does not present financial statements on a going concern basis.

.174 By avoiding any conflicting interpretations regarding the time horizon, this proposed statement also exemplifies the movement towards principles based standards from rules based standards. The AICPA formally commented on this exposure draft and that comment letter can be read at www.fasb.org/ocl/1650-100/53021.pdf. Readers are also encouraged to review the exposure draft of this standard on the FASB Web site.

.175 For a summary of significant accounting projects and pronouncements, including proposed FASB EITF issues and proposed FSPs, refer to the FASB Web site.

Resource Central

.176 The following are various resources that practitioners may find beneficial to their audit engagements.

Publications

.177 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM:

A common set of high quality global standards remains the long-term strategic priority of both the Financial Accounting Standards Board (FASB) and the International Accounting Standards Board. For more information on the status of this project, go to www.fasb.org and www.iasb.org. The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt International Financial Reporting Standards.

Also visit the FASB Web site for updates regarding the FASB Accounting Standards Codification, which is expected to become effective in July 2009.
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2008) (product no. 012528kk [paperback], WDI-XXkk [online], or DDI-XXkk [CD-ROM])
- Audit Risk Alert *Independence and Ethics Developments—2008* (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])
- Audit Risk Alert *SEC and PCAOB Developments—2008* (product no. 022499kk [paperback])
- Checklists and Illustrative Financial Statements for Corporations (product no. 008939kk [paperback] or WCP-CLkk [online])
- *Audit and Accounting Manual* (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])
- *Accounting Trends & Techniques, 62nd Edition* (product no. 009900kk [paperback] or WAT-XXkk [online])

**AICPA reSOURCE: Accounting and Auditing Literature**

.178 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest *Professional Standards*, *Technical Practice Aids*, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

**Continuing Professional Education**

.179 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

- *AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)* (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

- *SEC Reporting* (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

- *International Versus U.S. Accounting: What in the World is the Difference?* (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

- *The International Financial Reporting Standards: An Overview* (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

.180 Among the many courses, the following are specifically related to the current economic conditions and to discussions on fair value and are useful for both members of business and industry and auditors:

- *Minimize the Effects of a Recession on Your Business* (182010kk [DVD and manual] and 352010kk [additional text and manual for DVD]). An economic slowdown may be an inevitable part of the business cycle, but its painful impact does not have to be same for every business. This course provides the information and guidance you need to weather a recession and build a stronger business over the long haul.

- *Plug Your Profit Leaks: Ways to Significantly Save Time and Money* (product no. 733820kk [text]). This course gives you specific ways to immediately affect an organization’s bottom line. These proven
techniques for plugging the most overlooked profit leaks come from specific strategies for lowering costs, improving productivity, or gaining efficiencies.

- **Lean Accounting and Management: Improving Profitability by Streamlining Operations** (product no. 731275kk [text]). Learn how to minimize waste and create wealth in your organization through a lean accounting and management approach that improves profitability by streamlining operations. Develop an action plan for accomplishing the transition to this lean accounting and management approach within your organization.

- **Fair Value Accounting: A Critical New Skill for All CPAs** (product no. 733301kk [text] or 183301kk [DVD and manual] and 353301kk [additional manual for DVD]). The course covers the conceptual and practical issues that arise when fair value measurement is implemented under existing FASB standards and provides examples of these issues.

Visit www.cpa2biz.com for a complete list of CPE courses.

**Online CPE**

.181 AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest include the following:

- Accounting & Auditing Quarterly Updates
- Accounting & Auditing Annual Updates
- Auditor Communications: Critical New Requirements
- Fair Value Accounting: A Critical New Skill for All CPAs
- Bottom Line Management Accounting: Practical Solutions to Real World Problems
- Plug Your Profit Leaks: Ways to Significantly Save Time and Money
- Controllers: AICPAs Annual Update
- Lean Accounting
- Lean Management

To register or learn more, visit www.cpa2biz.com.

**Webcasts**

.182 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the professions leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

**CFO Quarterly Roundtable Series**

.183 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFOs personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.
SEC Quarterly Update Series

The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the professions leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

IFRS Quarterly Webcast Series

The IFRS Quarterly Webcast Series, brought to you each calendar quarter is part of a multistep educational process to get practitioners, financial managers, and auditors up to speed on all aspects of IFRS implementation. Over the course of the quarterly series, IFRS standards will be covered in depth. International harmonization is quickly approaching and this series will help both accountants and auditors stay abreast of the developments and the changes they will need to implement.

Member Service Center

To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Conferences

The AICPA offers a number of conferences that include the most recent developments affecting the profession. The AICPA has two such opportunities relative to fair value.

The AICPA is offering a Fair Value Measurement Workshop in February 2009. The Fair Value Measurement Workshop is a 2 day workshop with an objective of discussing the conceptual issues in using fair value measurements and providing examples of valuation measurements. This workshop will provide detailed examples of measuring the fair value of individual assets, especially as prepared by a valuation specialist. The workshop will show members in industry as well as their outside auditing firms the information necessary to confront the challenges in making and attesting to fair value measurements.

Additionally, the AICPA is offering a Fair Value Measurement Conference in June 2009. The Fair Value Measurement Conference is a 2-day conference designed to offer you specialized knowledge pertinent to your area of focus. With 3 distinct tracks—auditing, valuation, specialized knowledge—experts
from the field will share knowledge and update you on several key fair value measurement initiatives and regulations. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

The Center for Audit Quality

.192 The CAQ was created to serve investors, public company auditors, and the markets. The CAQs mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the professions core values of integrity, objectivity, honesty, and trust.

.193 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

Compilation and Review Developments—2008

CURRENT ACCOUNTING REPORTING AND PRACTICE ISSUES

Notice to Readers

This Compilation and Review Alert is intended to provide accountants with an update on recent practice issues and professional standards that affect compilation and review engagements.

This publication is an other compilation and review publication as defined in AR section 50, Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2). Other compilation and review publications have no authoritative status; however, they may help the accountant understand and apply the Statements on Standards for Accounting and Review Services.

If an accountant applies the guidance included in an other compilation and review publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the engagement and appropriate. The guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Kristy L. Illuzzi, CPA
Technical Manager
Accounting and Auditing Publications

Acknowledgments

The Accounting and Auditing Publications Team would like to thank the members of the Accounting and Review Services Committee for their invaluable review of this year’s publication. We would also like to thank the AICPA Peer Review program for their contributions to this publication. In addition, the AICPA staff is grateful to Mike Glynn, CPA, Technical Manager, Audit and Attest Standards for his essential contributions in creating this publication.

How This Alert Helps You

.01 This Compilation and Review Alert (alert) is a crucial tool, designed to help you as you plan and perform your compilation and review engagements. This alert discusses recent Standards for Accounting and Review Services (SSARSs) developments, addresses emerging practice issues, points out pitfalls that frequently occur in compilation and review engagements, and provides valuable information regarding current accounting developments.

Economic Developments

The State of the Economy

.02 When compiling or reviewing financial statements, you should possess a level of knowledge of the accounting principles and practices of the industry in which the entity operates that will enable you to compile or review the financial statements for an entity operating in that industry. Furthermore, to compile or review financial statements, you should possess a general understanding of the nature of the entity’s business transactions. Such understanding may include an understanding of the economic conditions facing the industry in which your client operates. Economic activities relating to factors such as interest rates,
consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on your client.

.03 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 second quarter advance estimates, real GDP increased at an annual rate of 1.9 percent, which is up slightly from the 1.0 percent rate in the first quarter of 2008.

.04 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate has risen. As of July 2008, the unemployment rate was 5.7 percent, representing approximately 8.8 million people.

.05 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 3.25 percentage points to 2.00 percent as of the end of July 2008. The Federal Reserve noted in its July press release that overall economic activity continues to expand. However, labor markets have softened further, and financial markets remain under considerable stress. Tight credit conditions, the ongoing housing contraction, and the rise in energy prices are likely to weigh on economic growth over the next few quarters. Inflation has been high, spurred by the earlier increases in the prices of energy and some other commodities, and some indicators of inflation expectations have been elevated. The Federal Open Market Committee expects inflation to moderate later this year and next year, but the inflation outlook remains highly uncertain.

Small Business Trends and Conditions

.06 Private companies and, more specifically, small businesses, are a main driver for the United States economy. According to the National Federation of Independent Businesses, small business has produced roughly half of the private gross domestic product and about two out of every three net new jobs in the United States since the early 1970s. The United States has nearly 6 million small business employers, 96 percent of which employ fewer than 100 people. Ninety-nine percent of employing businesses are “small” under prevailing definitions.

.07 Small businesses are represented in virtually every industry. However, the following are the most common among those that employ people other than their owners: retail; construction; professional; scientific; technical services; other services (generally, professional services like barber shops); health care and social assistance; accommodations and food service; wholesale; administrative support and waste management services; and manufacturing. The biggest change in the last 25 years has been the increase in service businesses and the decrease in retail businesses.

.08 In June 2008, Discover Business Card released the results of the Discover Small Business Watch, a monthly index of economic confidence of the nation’s 22 million small businesses with five or fewer employees. The Discover Small Business Watch (Watch) is compiled each month by Rasmussen Reports, LLC, an independent research firm, and is based on telephone interviews and responses from approximately 1,000 small business owners and 4,000 potential users of small business products and services.

.09 According to the Watch, after a brief rebound in May 2008, economic confidence among small business owners dropped to a record low in June 2008. The number of those who think the U.S. economy is getting worse expanded to nearly 80 percent. The Watch plummeted in June 2008 to 71.8, down 10 points from 81.8 in May 2008.

.10 Overall, the economic outlook remains uncertain. Pay close attention to how economic factors such as interest rates, consumer confidence, the housing market, overall economic expansion or contraction, inflation, and the labor market will affect your clients and your compilation and review engagements this year.
Recently Issued SSARSs

.11 The Accounting and Review Services Committee (ARSC) has approved an ambitious plan to make the standards for compilation and review engagements more understandable and easier to use. The first step in this process was the elimination of references to the auditing literature that existed within the SSARSs. The ARSC is aware that many more compilations and reviews are performed each year in the United States than audits. Furthermore, many practitioners who perform compilation and review engagements do not perform any audits. Therefore, the ARSC concluded that it is not appropriate to reference literature that many practitioners may be unfamiliar with. The ARSC developed and issued SSARS No. 15, Elimination of Certain References to Statements on Auditing Standards and Incorporation of Appropriate Guidance Into Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2), which resulted in a SSARSs codification that stands alone as the source for standards on the performance and reporting for compilation and review engagements.

.12 The next step in the process of making the SSARSs more understandable was defining the use of the terms should and must within the standards. The ARSC accomplished this through the development and issuance of SSARS No. 16, Defining Professional Requirements in Statements on Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2, AR sec. 20). The final chapter in the trilogy is SSARS No. 17, Omnibus Statement on Standards for Accounting and Review Services—2008 (AICPA, Professional Standards, vol. 2). SSARS No. 17 further clarifies the standards for compilation and review engagements. The following provides a summary of SSARS Nos. 16 and 17.

Issuance of SSARS No. 16

.13 In December 2005, the Auditing Standards Board (ASB) issued Statement on Auditing Standards (SAS) No. 102, Defining Professional Requirements in Statements on Auditing Standards (AICPA, Professional Standards, vol. 1, AU sec. 120). SAS No. 102 expressly defined imperatives used to describe different degrees of the auditor’s responsibility when conducting audit engagements in accordance with generally accepted auditing standards. The ARSC believed that by defining the levels of responsibilities that accountants have in compilation and review engagements in a fashion similar to SAS No. 102, standards for compilation and review engagements would be clarified, and the imperatives used in such standards would then be consistent with the standards for audit engagements.

.14 Therefore, on December 18, 2007, the ARSC issued SSARS No. 16. SSARS No. 16 defines the terminology that the ARSC will use to describe the degrees of responsibility that the requirements impose on the accountant.

.15 SSARSs use two categories of professional requirements identified by specific terms to describe the degree of responsibility that they impose on accountants, which mirror the definitions in the auditing standards. They are as follows:

**Unconditional requirements.** The accountant is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SSARSs use the words must or is required to indicate an unconditional requirement.

**Presumptively mandatory requirements.** The accountant is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the accountant may depart from a presumptively mandatory requirement provided that the accountant documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SSARSs use the word should to indicate a presumptively mandatory requirement.

.16 If a SSARS provides that a procedure or action is one that the accountant “should consider,” the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of a SSARS are to be understood and applied in the context of the explanatory material that provides guidance for their application.
The ARSC believes that this clarity and consistency will assist accountants in their work and improve the quality of compilation and review engagements. SSARS No. 16 was effective upon issuance.

**Issuance of SSARS No. 17**

On February 13, 2008, the ARSC issued SSARS No. 17. This SSARS was intended to further clarify the standards for compilation and review engagements. This SSARS

- revises AR section 100, *Compilation and Review of Financial Statements*; AR section 200, *Reporting on Comparative Financial Statements*; and AR section 300, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*, vol. 2), to conform to the terminology utilized by other standard setters, including the ASB, by replacing the term *nonpublic entity* with the term *nonissuer*. Generally, a *nonpublic entity* as defined before the issuance of SSARS No. 17 in AR section 100A paragraph .04, is considered a *nonissuer* under the revised definition in AR section 100 paragraph .04.

- revises the definition of compilation of financial statements and clarifies the objective of a compilation engagement as an engagement in which no assurance is provided and incorporating such objective in a new section of AR section 100 entitled, “Objective of a Compilation Engagement.” In addition, the illustrative engagement letter for a compilation of financial statements and the illustrative engagement letter for a compilation of financial statements not intended for third party use are revised to incorporate the stated objective. You can find the revised illustrative engagement letters at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Accounting+and+Review+Services+Committee/Updated+Illustrative+Engagement+Letters+to+Reflect+SSARS+17+Changes.htm.

- revises the definition of review of financial statements; revises and incorporates the objective of a review engagement in a new section of AR section 100 entitled, “Objective of a Compilation Engagement;” and provides that in a review engagement, the accountant must (1) apply analytical procedures to the financial statements; (2) make inquiries of management or other company personnel, or both; and (3) obtain representations from management for all financial statements and periods covered by the accountant’s review report. SSARS No. 17 also revised AR section 100 to properly state the preceding requirement with respect to analytical procedures.

- revises the definition of third parties to clarify that the phrase “who are knowledgeable about the nature of the procedures applied and the basis of accounting and assumptions used in the preparation of financial statements” applies to “members of management.”

- introduces definitions of those charged with governance and management into AR section 100.

- revises AR section 100 to state that because review procedures include obtaining representations from management that they have taken responsibility for all financial statements and periods covered by the accountant’s review report, and because the accountant’s review report should be dated as of the completion of the accountant’s review procedures, as well as the fact that the accountant is concerned with events occurring through the date of the review report that may require adjustment to or disclosure in the financial statements, management’s written representations should be made as of the date of the accountant’s review report.

- provides guidance with respect to an accountant’s consideration of the entity’s ability to continue as a going concern during the performance of compilation or review procedures.

- provides guidance with respect to an accountant’s consideration of subsequent events in a compilation or review engagement.

---

1 SSARS No. 17, *Omnibus Statement on Standards for Accounting and Review Services—2008* (AICPA, *Professional Standards*, vol. 2), amends some of the guidance for compilation and review engagements and is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008, with early application permitted. Due to the issuance of SSARS No. 17, AR sections 100, 9100, 200, 300, 9300, and 400 have been moved to AR sections 100A, 9100A, 200A, 300A, 9300A, and 400A, respectively, of Professional Standards until the effective date of SSARS No. 17. This alert references the “A” sections, where applicable, when referring to specific paragraphs of the standards as they existed before issuance of SSARS No. 17.
• deletes the word primarily from AR section 100A paragraph .70 (Supplementary Information), which stated that “the review has been made primarily for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles.”

• incorporates guidance with respect to analytical procedures in a review engagement as an exhibit (exhibit A) to the codification of SSARSs. In addition to exhibit A, “Analytical Procedures in a Review Engagement,” the AICPA has separately issued exhibit B, “Going Concern Considerations,” and exhibit C, “Subsequent Events Considerations,” to provide nonauthoritative accounting guidance to assist practitioners performing compilation and review engagements. These exhibits can be found online at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Accounting+and+Review+Services+Committee/Nonauthoritative+Exhibits+to+the+SSARSs+Codification.htm.

.19 SSARS No. 17 is effective for compilations and reviews of financial statements for periods ending on or after December 15, 2008. Early application is permitted.

Recently Issued Compilation and Review Interpretations of the SSARSs

.20 Compilation and review interpretations of the SSARSs are interpretive publications pursuant to AR section 50, Standards for Accounting and Review Services (AICPA, Professional Standards, vol. 2). Interpretive publications are not standards for accounting and review services. Interpretive publications are recommendations on the application of SSARSs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued after all ARSC members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SSARSs.

.21 The accountant should be aware of and consider interpretive publications applicable to his or her compilation or review. If the accountant does not apply the guidance included in an applicable interpretive publication, the accountant should be prepared to explain how he or she complied with the SSARSs provisions addressed by such guidance.

Interpretation No. 24 of AR Section 100

.22 In response to the AICPA’s governing council vote to designate the International Accounting Standards Board (IASB) as an international accounting standard setter for purposes of establishing international financial accounting and reporting principles, the ARSC revised Interpretation No. 24, “Reference to the Country of Origin in a Review or Compilation Report,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .93–.94). This interpretation states that there is no prohibition to referencing the country of origin in either a compilation or review report. The interpretation also includes an example of an emphasis of a matter paragraph that can be added to a compilation report to reference the country of origin of the accounting principles used to prepare financial statements, as follows:

As disclosed in note X, the accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America.

.23 The interpretation also states that the accountant may modify the third paragraph of the standard review report to read as follows:

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.
Interpretation No. 30 of AR Section 100

.24 Also, in response to the AICPA’s governing council vote to designate the IASB as an international accounting standard setter for purposes of establishing international financial accounting and reporting principles, the ARSC issued Interpretation No. 30, “Considerations Related to Financial Statements Prepared in Accordance With International Financial Reporting Standards and Compilations and Reviews Performed in Accordance With International Standards,” of AR section 100 (AICPA, Professional Standards, vol. 2, AR sec. 9100 par. .130–.135). It is expected that now that the IASB has been designated as an accounting standard setter, accountants will be requested to compile and review financial statements based on International Financial Reporting Standards (IFRS) as established by the IASB. As such, the accountant may determine to modify the standard compilation or review report to reflect that the financial statements were prepared in accordance with IFRS, rather than U.S. generally accepted accounting principles (GAAP).

.25 Therefore, the accountant may determine to modify the standard compilation report by adding the following emphasis of matter paragraph as the third paragraph of the report:

As disclosed in Note X, the accompanying financial statements were prepared in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

.26 When the accountant compiles financial statements that omit substantially all disclosures, but are otherwise in conformity with IFRS as issued by the IASB, the accountant may wish to modify the third paragraph of the standard report as follows:

Management has elected to omit substantially all disclosures (and the statement of cash flows) required by International Financial Reporting Standards as issued by the International Accounting Standards Board. If the omitted disclosures and statement were included in the financial statements, they might influence the user’s conclusions about the company’s financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

.27 When the accountant reviews financial statements prepared in accordance with IFRS, the accountant would refer, in the accountant’s report, to IFRS rather than U.S. GAAP.

.28 An example of the third paragraph in an accountant’s review report is as follows:

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

.29 The interpretation also states that the accountant may apply the reporting guidance in AR section 100 paragraphs .56–.58 regarding departures from U.S. GAAP when engaged to report on financial statements presented in accordance with a jurisdictional variation of IFRS.

.30 This interpretation also clarifies that an accountant performing a compilation or review of historical financial statements of a U.S. entity is required to follow the SSARSs but can also perform the compilation or review in accordance with international standards. The interpretation provides examples of what a compilation report and review report might look like in these circumstances.

Current ARSC Projects

Reliability

.31 At its meeting in April/May 2008, the ARSC approved a project to develop a framework for the performance of compilation and review engagements. Such framework would permit the expression of limited assurance on reviewed financial statements for an entity with respect to whom the accountant is not independent due to the performance of certain control activities. As a result, the Reliability Task Force (task
force) was formed with the charge of developing a draft SSARS that would expand the applicability of the compilation and review literature to enable an accountant who maintains his or her objectivity to provide limited assurance on an entity’s financial statements, even though the accountant’s independence may be impaired because he or she performed certain control activities for the entity.

.32 The task force discussed the types of independence impairments that it felt should not preclude an accountant from providing limited assurance under the proposed framework and the limits to the performance of control activities on behalf of the client. The issues were discussed with the ARSC at its meeting in August 2008. The ARSC plans to issue a draft document for public comment in the first half of 2009.

ARSC Clarity Project

.33 The first step in the ARSC’s clarity project was the issuance of SSARS No. 16 in December 2007. The goal of the ARSC’s clarity project is to make the SSARSs easier for users to read, understand, and apply. Over the next few years, the ARSC will examine the existing SSARSs and consider whether any additional revisions are appropriate.

.34 In addition, the ASB has determined that the appropriate format for the SASs is the International Auditing and Assurance Standards Board (IAASB) style. The format used by the IAASB separates the requirements and application material. Application material paragraphs are numbered using an “A” prefix and presented in a separate section that follows the requirements. The ARSC is currently considering whether it deems appropriate to draft the SSARSs so that the standards for compilation and review engagements are consistent in format to the auditing standards.

Requirement to Obtain Engagement Letters

.35 Currently, the SSARSs do not include a requirement for the accountant to obtain an engagement letter for all compilation and review engagements. In considering the revisions to the standard reports that will clarify management’s responsibility (as discussed in the preceding section), the ARSC is considering whether the SSARSs should be revised to require that the accountant obtain an engagement letter on all engagements.

Current Practice Issues

AICPA Guidance for Bookkeeping Engagements

.36 The ARSC is assisting in the development of an AICPA practice aid for bookkeeping engagements. The practice aid, when issued, will focus on how existing standards apply to bookkeeping engagements, specifically Statements on Quality Control Standards (SQCSs), including client acceptance and continuance procedures and communication of best practices. In addition, the practice aid should address certain practical situations, such as whether a compilation report is necessary if financial statements are prepared, as well as issues regarding accountant independence. This practice aid is expected to be issued in 2009.

OCBOA Task Force

.37 Over the past few years, many practitioners have noted that it would be beneficial to have nonauthoritative accounting guidance as it relates to an other comprehensive basis of accounting (OCBOA). In 2007, the ARSC took the lead on creating a cross-functional task force that has been charged with developing an OCBOA practice aid that will provide guidance to preparers.

SQCS No. 7, A Firm’s System of Quality Control

.38 On October 10, 2007, SQCS No. 7, A Firm’s System of Quality Control (AICPA, Professional Standards, vol. 2, QC sec. 10), was issued. This new SQCS supersedes existing statements on quality control standards and differs from them as follows:
• Defines the term *engagement quality control review* and requires firms to establish which engagements are to be subject to an engagement quality control review.

• Defines the terminology the ASB uses to describe the degrees of responsibility that the requirements in SQCSs impose on firms, which includes use of the terms *unconditional requirements* and *presumptively mandatory requirements*.

• Requires a firm to document its quality control policies and procedures. The extent of the documentation is based on the size, structure, and nature of the firm’s practice.

• Requires a firm’s system of quality control to address each of the following elements: leadership responsibilities for quality within the firm, relevant ethical requirements, acceptance and continuance of client relationships, human resources, engagement performance, and monitoring.

• Recognizes the importance of a quality-oriented internal culture and requires firms to (a) establish policies that require the firm to assign its management responsibilities so that commercial considerations do not override the quality of work performed, and (b) address personnel performance evaluation, compensation, and advancement to demonstrate the firm’s overarching commitment to quality.

• Provides more detailed guidance on independence and requires a written confirmation of compliance with independence requirements from all firm personnel at least annually.

• Provides more detailed guidance on client acceptance and continuance and requires documentation of the resolution of significant issues.

• Provides more detailed guidance on engagement supervision and review, engagement documentation, and consultation policies and procedures.

• Requires policies and procedures for resolving differences of opinions, including a requirement that reports must not be released until all differences of opinions are resolved.

• Requires performance of monitoring procedures that are sufficiently comprehensive to enable the firm to assess compliance with all applicable professional standards and regulatory requirements and the firm’s quality control policies and procedures.

• Requires policies and procedures for dealing appropriately with complaints and allegations of noncompliance with professional standards or with the firm’s system of quality control.

.39 This SQCS is effective as of January 1, 2009.

**Accountants Engaged to Prepare Financial Statements**

.40 The question has come up among practitioners about whether an accountant who is engaged to prepare financial statements that will be audited by another firm would be required to follow guidance in the SSARSs.

.41 Interpretation No. 21, “Applicability of SSARS No. 1 When Performing Controllership of Other Management Services,” of AR section 100 (AICPA, *Professional Standards*, vol. 2, AR sec. 9100 par. 80–84), states that “if the accountant is in the practice of public accounting as defined by the AICPA’s Code of Conduct and is not a stockholder, partner, director, officer, or employee of the entity, the accountant is required to follow the performance and communication requirements of SSARS No. 1, *Compilation and Review of Financial Statements* (AICPA, *Professional Standards*, vol. 2, AR sec. 100), including any requirement to disclose a lack of independence.”

**Common Peer Review Findings**

.42 In 2007, the AICPA Peer Review Program reported approximately 10,000 peer reviews, of which approximately 5,400 pertained to compilation and review engagements. The importance of peer review
findings cannot be overemphasized. Some of the significant deficiencies identified related to compilation and review engagements include the following:

- Failure to perform analytical and inquiry procedures and failure to adequately document the procedures
- Failure to document the matters covered in the accountant’s inquiry and analytical procedures
- Failure to obtain a client management representation letter
- Failure to modify the standard review report to indicate a departure from U.S. GAAP with respect to the classification of long-term debt
- Engagement letters on SSARS No. 8, Amendment to Statement on Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements (AICPA, Professional Standards, vol. 2, AR sec. 100) engagements that omit the required descriptions or statements documenting the understanding with the client

Accounting Issues and Developments

Convergence With International Financial Reporting Standards

Since the signing of the Norwalk Agreement by the Financial Accounting Standards Board (FASB) and IASB, the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. During meetings held in 2005, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and IFRS. A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project, go online to www.fasb.org and www.iasb.org.

AICPA Launches IFRS.com Web Site

The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define the next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.
The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, continuing professional education (CPE) courses and live conference training, helpful links, and assistance for audit committee members.

**FASB Accounting Standards Codification™**

On January 15, 2008, FASB launched the one-year verification period of the FASB Accounting Standards Codification™ (codification). The codification is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. The codification includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. The codification also includes relevant authoritative content issued by the Securities and Exchange Commission (SEC), as well as selected SEC staff interpretations and administrative guidance.

The purpose of the codification is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the one-year verification period, FASB is expected to formally approve the codification as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing, non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve the codification in April 2009.

The codification can be accessed online at http://asc.fasb.org/home. Constituents are encouraged to use FASB’s online Codification Research System free of charge and provide feedback to FASB on the codification.

The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of the codification, outline the structure of the codification, as well as provide case studies on how to navigate the FASB Accounting Standards Codification™ Research System and perform accounting research.

**Summary of Recent Accounting Pronouncements and Related Guidance**

Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with the AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only certain pronouncements and related guidance or those of specific significance to compilation and review engagements are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

In February 2008, FASB issued FSP SOP 07-1-1, Effective Date of AICPA Statement of Position 07-1, which indefinitely defers the effective date of SOP 07-1. Entities that early adopted SOP 07-1 before December 15, 2007 are permitted but not required to continue to apply the provisions of the SOP. No other entities may adopt the provision of the SOP, subject to the exception in the following sentence. If a parent entity that early adopted the SOP chooses not to rescind its early adoption, an entity consolidated by the parent entity that is formed or acquired after that parent entity’s adoption of the SOP must apply the provisions of the SOP in its stand-alone financial statements.

.55 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to compilation and review engagements are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The AICPA Comprehensive Audit Risk Alert—2008 and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

**Deferral of FASB Interpretation No. 48 for Certain Nonpublic Entities**

.56 FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, was issued in June 2006 and is effective for fiscal years beginning after December 15, 2006. However, subsequent to its issuance, FASB issued FASB Staff Position (FSP) FIN 48-2, Effective Date of FASB Interpretation No. 48 for Certain Nonpublic Enterprises, which defers the effective date of FIN 48 for nonpublic enterprises included in the FSP’s scope to the annual financial statements for fiscal years beginning after December 15, 2007. For the full text of FIN 48 and its associated FSPs, visit the FASB Web site.

**Recent AICPA Independence and Ethics Pronouncements**

.57 AICPA Independence and Ethics Alert—2007/08 (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

**On the Horizon**

.58 Accountants should keep abreast of compilation, review, and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to your clients or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.59 The following table lists the various standard-setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting, compilation, and review projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.
**Help Desk**—The AICPA’s standard-setting committees publish exposure drafts of proposed professional standards exclusively on the AICPA Web site. The AICPA will notify interested parties by e-mail about new exposure drafts. To be added to the notification list for all AICPA exposure drafts, send your e-mail address to service@aicpa.org. Indicate “exposure draft e-mail list” in the subject header field to help process your submission more efficiently. Include your full name, mailing address, and, if known, your membership and subscriber number in the message. The AICPA Web site also has connecting links to the other standard-setting bodies listed here.

## SSARSs Pipeline

.60 The ARSC is currently working on the following new projects.

### Recodification

.61 The ARSC has been considering a reorganization of the codification of SSARSs. The ARSC has envisioned a codification that contains separate “chapters” for compilation and review engagements, as follows:

1. SSARSs hierarchy
2. Compilation of financial statements
   - Establishing an understanding with the entity
   - Performance of a compilation engagement
   - Reporting on compiled financial statements
3. Review of financial statements
   - Establishing an understanding with the entity
   - Performance of a review engagement
   - Reporting on reviewed financial statements
4. Compilation on specified elements, accounts, or items of a financial statement
   - Establishing an understanding with the entity
b. Performance of a compilation of specified elements, accounts, or items of a financial statement

c. Reporting on compiled specified elements, accounts, or items of a financial statement

5. Compilation of pro forma information

a. Establishing an understanding with the entity

b. Performance of a compilation of pro forma financial information

c. Reporting on compiled pro forma information

6. Exhibits

.62 At their meeting in May 2008, the ARSC considered the effect of its current and expected projects on a recodification. The ARSC tentatively plans to expose proposed chapters during the fourth quarter of 2009 and during 2010.

International Review and Compilation Standards

.63 The IAASB is currently looking at whether its standards for review and compilation engagements remain appropriate. It is not anticipated they will complete their project before 2010. However, the ARSC is currently looking at existing international standards for review and compilation engagements prior to the issuance of “recodified” SSARSs. The ARSC believes that a harmonization with international standards will assist practitioners, especially those practitioners that are engaged to review the financial statements prepared in conformity with IFRS, as issued by the IASB.

Accounting Pipeline

.64 A number of accounting projects and pronouncements are currently in progress. For a summary of significant accounting projects and pronouncements, refer to AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in-progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Income tax convergence project

Proposed FASB Emerging Issues Task Force Issues and Staff Positions

.65 Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.66 Proposed FSPs. A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

.67 The following are various resources that practitioners performing compilation and review engagements may find beneficial.
Publications

Practitioners may find the following publications useful with respect to compilation and review engagements. Choose the format that is best for you—online, print, or CD-ROM.

- **Review Engagements: New and Expanded Guidance on Analytical Procedures Inquiries and Other Procedures** (product no. 006618kk [paperback])
- **Defining Professional Requirements in Statements on Standards for Accounting and Review Services—SSARS No. 16** (product no. 060654kk [paperback])
- **Omnibus Statement on Standards for Accounting and Review Services 2008—SSARS No. 17** (product no. 060655kk [paperback])
- **Audit and Accounting Manual** (2008) (product no. 005138kk [paperback], WAM-XX [online], or AAM-XX [loose leaf])
- **Accounting Trends & Techniques, 62nd Edition** (product no. 009900kk [paperback] or WAT-XX [online])

Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

- **Financial Reporting Alert Current Accounting Issues and Risks—2008** (product no. 029208kk)
- **Financial Reporting Alert FASB Codification Developments—2008** (product no. 029209kk)

AICPA reSOURCE: Accounting and Attest Literature

The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

The AICPA offers a number of CPE courses that are valuable to CPAs performing compilation and review engagements, including the following:

- **AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)** (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.
- **International Versus U.S. Accounting: What in the World is the Difference?** (product no. 731666 [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.
- **The International Financial Reporting Standards: An Overview** (product no. 157220 [online] or 739750HS [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

Among the many courses, the following are specifically related to compilation and review engagements:

- **Compilation and Review Engagement Essentials** (product no. 733678kk [text])
- **Managing Compilation, Review and Accounting Services** (product no. 733480kk [text])

Visit www.cpa2biz.com for a complete list of CPE courses.
Online CPE

AICPA CPExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is AICPA’s flagship online learning product. AICPA CPExpress now offers a free trial subscription to the entire product for up to 30 days. AICPA members pay $149 for a new subscription and $119 for the annual renewal. Nonmembers pay $369 for each. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to those performing compilation and review engagements include the following:

- 2008 Annual Update—Accounting & Auditing: Compilation and Review Update
- Compilation & Review Engagements: Environmental, Accounting, and Reporting Issues; Potential Change
- Compilations and Reviews: Introduction and Background
- Drafting Audit, Review, and Compilation Reports
- Intro to Cash and Tax OCBOAs and Their Effects on Procedures in Audits, Reviews, and Compilations
- Types and Scope of Compilation Engagements
- Compilation & Review Engagements: Recent SSARS Developments and Current Practice Issues
- Compilations and Reviews: Engagement Planning, Administration, and Quality Control
- Compilations & Reviews: Independence Considerations

To register or learn more, visit www.cpa2biz.com.

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting and budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

Member Service Center

To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9am to 8pm on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.
Ethics Hotline

.80 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

* * * *

.82 This Compilation and Review Alert is published annually. As you encounter issues that you believe warrant discussion in next year’s Compilation and Review Alert, please feel free to share them with us. Any other comments that you have about this alert would also be appreciated. You may e-mail these comments to killuzzi@aicpa.org or write to

Health Care Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of health care organizations with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in another auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Zachary T. Donahue, CPA
Senior Technical Manager
Accounting and Auditing Publications

Acknowledgments

The AICPA staff is grateful to the members of the AICPA Health Care Expert Panel and the chair of that panel, Rick Corcoran, for their assistance and contributions to this Audit Risk Alert.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your health care industry audits. This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.03 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error
or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment includes the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

.04 The health care industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.05 The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies.

.06 Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.07 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.08 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

**Economic and Industry Developments**

**The State of the Economy**

.09 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.

.10 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 second quarter final estimates, real GDP increased at an annual rate of 2.8 percent, which is up significantly from the 0.9 percent rate in the first quarter of 2008.

.11 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate
has risen. As of September 2008, the unemployment rate was 6.1 percent, representing approximately 9.5 million people.

.12 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 3.75 percentage points to 1.50 percent as of mid-October 2008. The Federal Reserve noted in its October press release that strains in financial markets have increased significantly, and labor markets have weakened further. Incoming economic data suggest that the pace of economic activity has slowed markedly in recent months. Moreover, the intensification of financial market turmoil is likely to exert additional restraint on spending, partly by further reducing the ability of households and businesses to obtain credit. Inflation has been high, but the Federal Open Market Committee, which sets the nation’s monetary policy, believes that the decline in energy and other commodity prices and the weaker prospects for economic activity have reduced the upside risks to inflation.

**Industry Trends and Conditions**

**Impact of the Current Credit Crisis**

.13 The significant disruptions in the global credit markets in 2007 and 2008 are having broad, sweeping effects on a wide variety of industry sectors, including health care. These disruptions are creating a significant number of accounting and financial reporting concerns and have led to

- declines in the fair values of many investment securities as a result of credit issues primarily involving U.S. mortgage products;
- liquidity and funding concerns, including a significant contraction in commercial paper and other short-term funding sources;
- debt covenant compliance concerns;
- an inability of hedge funds to reliably value certain of their holdings, halting redemption requests and filing for bankruptcy protection; and
- a concern that the net asset value of some money-market funds may decline to less than one dollar per share.

.14 Although the problems began in the U.S. housing market, they have extended beyond sub-prime mortgage products and spread rapidly throughout the global financial marketplace, triggering negative economic consequences. The volatility in the debt and equity markets can adversely affect companies in all industry sectors, particularly with valuation of investment portfolios and tighter lending standards curbing the flow of capital.

.15 For example, many health care organizations have significant investment portfolios, including alternative investments that may be adversely affected by current market conditions. Management is responsible for the valuation of all investments in the financial statements, and this responsibility cannot be outsourced or assigned to a third party.

.16 Due to the current market instability, accounting is increasingly complex:

- Determining the fair values of financial instruments (for example, investment securities, alternative investments and derivatives) has become more challenging due to changes in market liquidity.
- Many potential accounting considerations involve significant accounting estimates, for example, valuation of investments not traded in active markets.
- Current conditions may require a greater use of judgment.
- Organizations and their external auditors may need to rely on specialists more extensively.
The valuation of money-market funds, commercial paper, asset-backed securities, and alternative investments all need to be considered, as well as the accounting treatment for other-than-temporary declines in the fair value of investments. Significant debt agreements and covenants could be affected by adverse change clauses and material subjective acceleration clauses. Consideration should be given to debt expected to be refinanced in the near term as well as short-term debt facilities.

Also, many organizations are in the process of changing the mode of interest on their long-term debt. In the wake of the current market turmoil, organizations must understand their risks and evaluate the impact of planned transactions in order to address those risks on the financial statements.

In May 2008, the AICPA released a nonauthoritative article, “Tax-Exempt Bonds—Accounting and Auditing Considerations in the Current Environment.” The article focuses on issuers of auction rate securities and variable rate demand obligations, and provides issuers of tax-exempt debt with an overview of the accounting considerations that may be relevant in light of recent market events. The article may be accessed at www.aicpa.org/download/acctstd/ARS_article14.pdf.

Managed Investment Portfolios

Health care organizations often outsource the management of their investment portfolios to third-party investment managers. In some cases, the health care organization places restrictions on the trading activities of the third-party investment manager such that management maintains control over investment decisions, for instance, determining when to buy or sell specific securities. In most cases, however, no such restrictions are placed on the third-party investment manager.

When restrictions have not been imposed, management of the health care organization typically may not assert that it has the intent and ability to hold any impaired investments (for which cost is less than fair value) until recovery. Without the intent and ability to hold an impaired security until anticipated recovery, the health care organization is precluded from considering the impairment to be temporary. Other-than-temporary impairment losses are included within net income, or, for not-for-profit health care organizations, the performance indicator (typically referred to as the excess of revenues and gains over expenses), and a new cost basis for that security is established.

Health care organizations that outsource their investment management function should review their investment management agreements and determine the appropriate accounting treatment for any impaired securities.

Legislative and Regulatory Developments

U.S. Department of Health and Human Services

Office of Inspector General

Time and Effort Reporting

Time and effort reporting continues to be a challenging area, particularly for organizations that receive funding from the HHS. In most federal awards, personnel costs, including direct labor charges,
Municipal Securities Rulemaking Board

**New Electronic Municipal Market Access System for Municipal Disclosure Documents**

.25 The Municipal Securities Rulemaking Board is working to implement Electronic Municipal Market Access (EMMA), a municipal market version of the Securities and Exchange Commission’s (SEC’s) Electronic Data Gathering, Analysis, and Retrieval system that makes annual, quarterly, and material events information of SEC registrant companies publicly available. EMMA is expected to be implemented in stages, with the initial stage for official statements and advance refunding documents.

.26 Additional stages will expand to allow EMMA to become a complete online public dissemination vehicle. At that point, all official statements, annual and quarterly financial information, and material event notices for all issuers required to make continuing disclosure filings under SEC Rule 15c2-12 would be made available online free of charge. The system would also provide trade pricing information for municipal securities that is similar to the New York Stock Exchange or NASDAQ.

.27 Initial submissions to EMMA are voluntary; however, the SEC is expected to eventually mandate its use to replace the current vendor-based system of nationally recognized municipal information repositories, as well as Disclosure USA, the disclosure facility operated by the Municipal Advisory Council of Texas.

Centers for Medicare and Medicaid Services

.28 The Center for Medicare and Medicaid Services (CMS) has experienced much activity during the past year; however, the following matters seem to affect health care organizations and their auditors the most.

**CMS Risk Share/Medicare Part D**

.29 Many health care organizations participate in the Medicare Part D drug benefit program. Through the program, millions of older Americans who are Medicare eligible obtain access to prescription drugs independent of their other health care coverage. Under the drug benefit program, CMS has agreed to share in the ultimate experience of a health care organization’s pharmacy benefit costs if certain variances from estimated experience result (the CMS Risk Share). The CMS Risk Share is based on whether the ultimate per-member, per-month pharmacy benefit costs of any Medicare Part D regional plan vary more than 2.5 percentage points above or below the level estimated in the managed care organization’s original bid submitted to and approved by CMS.

.30 Based on the ultimate experience, CMS determines a risk share receivable or payable for the health care organization and subsequently settles the amounts with the health care organization.

.31 When planning and performing audit engagements, an auditor should (1) understand how the entity calculates its risk share portion of its Medicare Part D plan, (2) understand the underlying accounting for such risk-sharing balance being recorded by the entity (including the settlement process), and (3) understand the entity’s corresponding internal control environment. The auditor should determine the extent of testing to be performed on the assumptions and data used by management to estimate this balance.

**Accounting for Risk-Adjusted Revenues for Certain Medicare Products**

.32 Health care organizations have arrangements with CMS for certain Medicare products whereby periodic changes in member “risk factor adjustments scores” (for certain diagnoses codes) result in changes to Medicare revenues. These health care organizations are required to submit encounter data to CMS via the Risk Adjustment Payment System on a regular basis. CMS then applies the health care organization’s
encounter data to the hierarchical condition category payment methodology to impute payments that accompany the monthly payment report. Health care organizations calculate “baseline” risk scores and compare these scores to the “final” risk-adjusted scores to establish the “incremental” difference that is used, in combination with eligibility information, to establish additional revenue by member.

.33 Because the Medicare risk adjustment may represent a significant estimate recorded in the entity’s financial statements, when planning and performing audit engagements, an auditor should (1) assess the health care organization’s methodology used to determine the risk score adjustments, (2) understand the related internal control environment, (3) test the underlying assumptions (using a Medicare compliance specialist when material), and (4) assess the risk-adjusted revenues for reasonableness. Auditors then determine whether the revenue recorded meets the appropriate revenue recognition criteria and whether related receivables are collectible.

.34 Because of the complexities associated with estimating such premium adjustments, auditors should consider whether consulting a specialist is necessary in order to properly design and complete the necessary audit procedures. Further, auditors should assess the adequacy and appropriateness of the health care organization’s financial statement disclosures, including those related to significant changes in estimates.

Internal Revenue Service

Form 990 Redesigned for Tax Year 2008

.35 In December 2007, the IRS issued an updated version of Form 990 for tax year 2008 (which will be filed in 2009) to enhance transparency, promote tax compliance, and minimize the burden on the filing organization. Form 990 now consists of an 11-page core form, which is to be completed by all filers, and 16 schedules designed by topic (lobbying, related parties, compensation, and so on). A transition period allows smaller organizations and certain schedules pertaining to hospitals and tax-exempt bonds to use Form 990-EZ.

.36 Substantial changes have been made to the amount and type of information required on the new Form 990. Some of the more significant changes include the following:

- More questions regarding organizational governance practices
- Disclosure of information from the organization’s audited financial statements
- Expansion of compensation information disclosures
- Expansion of disclosures regarding programs and activities of the organization

.37 The IRS issued preliminary instructions and a glossary for use with Form 990 in April 2008. More information, including drafts of the form and schedules, is available at www.irs.gov/charities/article/0,,id=176613,00.html.

Exempt Organization Abusive Tax Avoidance Transactions

.38 Tax-exempt organizations, by definition, are exempt from federal income tax under various provisions of the Internal Revenue Code (IRC). However, some are directly involved in Abusive Tax Avoidance Transactions (ATATs). In addition, because they are tax-indifferent, tax-exempt organizations are, at times, used by for-profit entities as accommodation parties in these transactions. Identifying and responding to ATATs involving tax-exempt organizations is critical to the IRS objective of discouraging and deterring noncompliance within tax-exempt and government entities.

.39 As a result of provisions included in the Tax Increase Prevention and Reconciliation Act of 2005, the Treasury Department and IRS have issued proposed and temporary regulations under IRC Section 4965, which imposes excise taxes and disclosure requirements with respect to prohibited tax shelter transactions to which tax-exempt entities are parties. The new regulations provide (1) rules regarding the form, manner,
and timing of disclosure obligations and (2) return requirements accompanying payment of excise taxes. The deadline for submitting comments on the proposed regulations has passed. IRS guidance addresses the following issues under this legislation:

- Which entities and individuals are subject to excise tax under the new provisions and which taxes and penalties may apply
- Who is subject to the new provisions
- The treatment of proceeds of transactions received before the effective date of the new provisions
- Disclosure and filing requirements

Additional information is available at www.irs.gov/charities/article/0,,id=172158,00.html.

Certain Charitable Contributions Designated as Transactions of Interest Under New Reportable Transaction Regulations

In September 2007, the IRS issued IRS Notice 2007-72, Transaction of Interest—Contribution of Successor Member Interest, designating certain transactions as having the potential for tax avoidance or evasion and alerting participants to required disclosures and potential penalties. In the transactions, a taxpayer transfers a membership interest in a limited liability company that directly or indirectly owns real property to an IRC Section 501(c)(3) charitable organization or government entity, claiming a charitable contribution deduction for an amount significantly higher than the original purchase price paid by the taxpayer to acquire the interest.

Charitable organizations that receive property in these transactions after August 14, 2007, are participants in these transactions for the first year in which their tax returns reflect the acquired interest, which is generally the year of receipt of the interest. For that year, the charity must disclose certain information to the IRS required by the reportable transaction regulations or be subject to penalties described in the notice. The IRS has begun notifying participating organizations that they have been selected for examination.

Audit and Attestation Issues and Developments

New Filing and Audit Requirements for ERISA-Covered 403(b) Employee Benefit Plans

Beginning in 2009, employee benefit plans sponsored by charitable organizations and schools under IRC Section 403(b) and covered under the Employee Retirement Income Security Act (ERISA) will be subject to the same reporting and audit requirements that currently exist for Section 401(k) plans. Section 403(b) plans are also commonly known as tax-shelter annuity plans.

Under new U.S. Department of Labor (DOL) regulations issued in November 2007 amending the filing requirements for Form 5500, Annual Return/Report of Employee Benefit Plan, ERISA-covered 403(b) plans with 100 or more participants generally will be required to file audited financial statements beginning with their 2009 Form 5500 filing. 403(b) plans with fewer than 100 participants will be eligible to use abbreviated reporting forms without audited financial statements.

The DOL estimates that approximately 7,000 403(b) plans will be subject to the new audit requirements and another 9,000 403(b) plans will be eligible for the waiver. The DOL regulations were published in the November 16, 2007, Federal Register and are available at www.dol.gov/ebsa/regs/fedreg/final/20071116.pdf. The AICPA's Employee Benefit Plan Audit Quality Center and Expert Panel have formed a joint task force to develop resources to help members with these new audit requirements. For more information visit http://ebpaqc.aicpa.org.
Medicare Recovery Audit Contractors

.47 The RACs detect improper Medicare payments, correct the improper payments, and implement actions that will prevent future improper payments. The improper payments are to include both overpayments and underpayments to providers. According to CMS, the RAC demonstration project has identified $357.2 million in overpayments and $14.3 million in underpayments. The RACs are paid a contingency fee based on the amount of improper payments identified. This payment methodology has led to criticism that such an incentive could tempt RACs to identify errors where none exist.

.48 Four years of claims, from October 1, 2001, through September 30, 2005, were available for review under the RAC demonstration project. Under the permanent RAC program, the contractors will review claims paid on or after October 1, 2007, and at no time will they look back more than three years.

.49 The RACs have performed two types of reviews: automated reviews and complex medical reviews. The automated reviews were designed to identify the “low hanging fruit” and used data mining techniques to identify multiple units billed, missing modifiers and payments for discontinued HCPC/CPT codes. The complex medical reviews involved reviewing the medical record or other documentation. They have led to a denial of payments mainly due to lack of medical necessity and missing records or documentation. The RACs were criticized in this area for failing to have knowledgeable and adequately trained staff performing the reviews and the lack of a medical director to interpret the medical records. RACs are now required to have a medical director.

.50 The RAC claim review process for medical records reviews includes the request by the RAC for the medical record or other documentation. Providers have 45 days to comply with the request. If the requested documentation is not submitted within the 45 days, the RAC may identify the claim as an overpayment by default. The RAC has 60 days to review the chart and issue a denial or an “all clear” letter to the provider.

.51 To dispute an RAC adjustment, providers can submit a rebuttal to the RAC or file an appeal following normal Medicare appeal rules. The provider must submit a rebuttal to the RAC within 15 days of the denial. The appeals process has various levels and strict deadlines that cannot be missed.

.52 An appeal must be filed soon after the RAC’s notice of its decision (initial determination). The initial determination date is presumed to be five days after the date of the denial notice or the date of the take-back. The first level of appeal is to file an appeal or redetermination with the Medicare fiscal intermediary (FI) within 120 days after the initial determination. The second level of appeal is with a qualified independent contractor (QIC).

.53 After receiving the decision of the FI, the provider has 180 days to file an appeal with the QIC. The third level of appeal is with an administrative law judge (ALJ). This appeal must be filed within 60 days of the QIC decision. After the ALJ appeal, the next level of appeal is with the Medicare Appeals Council (MAC). This appeal must be filed within 60 days of the ALJ’s decision. If the provider is still dissatisfied with the determination, the provider can file legal proceedings in U.S. District Court within 60 days of the MAC determination.

.54 Providers can prepare for the RAC program by developing a strategy and creating policies and procedures for addressing all RAC notifications. The strategy should address interdepartmental communication to notify clinical, reimbursement, and financial staff of any and all RAC requests. Providers should keep detailed records of all RAC requests, correspondence with the RAC, and the results of the determination.
In the event of any denials, the provider should consider the value of filing a rebuttal or appeal by evaluating the financial impact, the cost versus the benefit of the appeal, and other factors such as availability and accuracy of the medical records and implications of not filing an appeal. Not filing an appeal could force the provider to institute changes in policies and procedures to address the issues raised in the RAC denials and could potentially expose the provider to higher scrutiny and increased medical audits.

Medicare Risk Adjusters

Medicare Advantage Plans (plans) generally receive, from CMS, premium adjustments related to medical encounters that result in calculated risk score adjustments. These premium adjustments can be material to the financial statements of a plan. In addition to obtaining an understanding of a plan’s process to estimate such premium adjustments, auditors should give appropriate consideration to whether the revenue recorded met the appropriate revenue recognition criteria, and whether related receivables are collectible.

Because of the complexities associated with estimating such premium adjustments, auditors may consult a specialist to assist in the design and possibly performance of related audit procedures. Further, auditors should assess the adequacy and appropriateness of a plan’s related financial statement disclosures.

Audit Risks Arising From Current Economic Conditions

Rising food and oil prices, a weak housing market, and a weak U.S. dollar have ripple effects throughout the U.S. economy. Whether the audit client applies for a line of credit, or simply buys office supplies, costs are increasing. The health care industry has seen a general rise in the cost of health care. Effects may also be noted on negotiated managed care contracts. The client may struggle with how to compensate for rising costs and how much its business will be affected by passing those costs onto the customer. Your client’s profit margins are likely to be affected as well. You may find that your clients have renegotiated supplier contracts to seek better payment terms. The client’s customers may be scaling back purchases in an effort to control costs or may not be able to pay promptly, which may cause accounts receivable collection rates to decrease. Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to economic conditions are as follows:

- Operations that are exposed to volatile markets, which may include oil, agriculture, or currency markets
- Changes in the entity’s supply chain, including surcharges on transportation
- Constraints on the availability of capital and credit
- Going concern and liquidity issues
- Growth in health care costs
- Increase in bad debts related to patient co-pays
- Changes in mix of services

While many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008.
(product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.61 The Public Company Accounting Oversight Board (PCAOB) establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review AICPA Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

<tr>
<td>No. 115, <em>Communicating Internal Control Related Matters Identified in an Audit</em> (AICPA, Professional Standards, vol. 1, AU sec. 325)</td>
</tr>
<tr>
<td>Issue Date: October 2008</td>
</tr>
<tr>
<td>(Applicable to audits conducted in accordance with generally accepted auditing standards [GAAS])</td>
</tr>
<tr>
<td>Replacing SAS No. 112, <em>Communicating Internal Control Related Matters Identified in an Audit</em>, this standard defines the terms <em>deficiency in internal control, significant deficiency, and material weakness</em>; provides guidance on evaluating the severity of deficiencies in internal control identified in an audit of financial statements; and requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit. It is effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier implementation is permitted.</td>
</tr>
<tr>
<td><strong>SAS No. 114, The Auditor’s Communication With Those Charged With Governance</strong> (AICPA, Professional Standards, vol. 1, AU sec. 380)</td>
</tr>
<tr>
<td>Issue Date: December 2006</td>
</tr>
<tr>
<td>(Applicable to audits conducted in accordance with GAAS)</td>
</tr>
<tr>
<td>Replacing SAS No. 61, <em>Communication With Audit Committees</em>, this standard requires the auditor to conduct two-way communication with those charged with governance about certain significant matters related to the audit and also establishes standards and provides guidance on which matters should be communicated, to whom they should be communicated, and the form and timing of the communication. It is effective for audits of financial statements for periods beginning on or after December 15, 2006.</td>
</tr>
<tr>
<td>Standard</td>
</tr>
<tr>
<td>----------</td>
</tr>
</tbody>
</table>
(Applicable to audits conducted in accordance with GAAS)  
This standard does the following:  
- Revises the terminology used in the 10 standards of AU section 150, *Generally Accepted Auditing Standards*, to reflect terminology in AU section 120, *Defining Professional Requirements in Statements on Auditing Standards* (AICPA, Professional Standards, vol. 1).  
- Adds a footnote to the headings before paragraphs .35 and .46 in AU section 316, *Consideration of Fraud in a Financial Statement Audit* (AICPA, Professional Standards, vol. 1), to provide a clear link between the auditor’s consideration of fraud and the auditor’s assessment of risk and the auditor’s procedures in response to those assessed risks.  
- Replaces throughout the SASs the term *completion of fieldwork* with the term *date of the auditor’s report*.  
- Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor’s report. |
| SAS Nos. 104–111, the risk assessment standards | Issue Date: March 2006  
(Applicable to audits conducted in accordance with GAAS)  
The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits; focusing on identifying and assessing the risks of material misstatements; further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels; and improving the linkage between the risks, controls, audit procedures, and conclusions. These eight SASs became effective for audits of financial statements for periods beginning on or after December 15, 2006. |
This statement establishes requirements and provides guidance that applies when a practitioner is engaged to perform an examination of the design and operating effectiveness of an entity’s internal control over financial reporting (examination of internal control) that is integrated with an audit of financial statements (integrated audit). This SSAE is effective for integrated audits for periods ending on or after December 15, 2008. Earlier implementation is permitted. |
<p>| SSAE No. 14, SSAE Hierarchy (AICPA, Professional Standards, vol. 1, AT sec. 50) | This standard identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in AT section 20, Defining Professional Requirements in Statements on Standards for Attestation Engagements (AICPA, Professional Standards, vol. 1). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006. |
| Issue Date: November 2006 | |
| Auditing Interpretation No. 14, “Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing,” of AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .56–.59) | This auditing interpretation interprets AU section 508 and addresses the application of AU section 508 in reporting on financial statements prepared in conformity with International Financial Reporting Standards (IFRS). |
| Issue Date: March 2002 Revised Date: May 2008 (Interpretive publication) | |
| Auditing Interpretation No. 19, “Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board,” of AU section 508 (AICPA, Professional Standards, vol. 1, AU sec. 9508 par. .93–.97) | This auditing interpretation interprets AU section 508 and addresses the application of AU section 508 in reporting on financial statements prepared in conformity with IFRS. |
| Issue Date: May 2008 (Interpretive publication) | |
| Auditing Interpretation No. 2, “Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board,” of AU section 534, Reporting on Financial Statements Prepared for Use in Other Countries (AICPA, Professional Standards, vol. 1, AU sec. 9534 par. .05–.08) | This auditing interpretation interprets AU section 534 and addresses the application of AU section 534 in reporting on financial statements prepared in conformity with IFRS. |</p>

<td>Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 6, Evaluating Consistency of Financial Statements</td>
<td>This standard and its related amendments update the auditor’s responsibilities to evaluate and report on the consistency of a company’s financial statements and align the auditor’s responsibilities with Financial Accounting Standards Board (FASB) Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3. This standard also improves the auditor reporting requirements by clarifying that the auditor’s report should indicate whether an adjustment to previously issued financial statements results from a change in accounting principles or the correction of a misstatement.</td>
</tr>
<tr>
<td>Issue Date: November 15, 2008 (Applicable to audits conducted in accordance with PCAOB standards)</td>
<td></td>
</tr>
</tbody>
</table>
**Issue Date:** July 2007  
(Applicable to audits conducted in accordance with PCAOB standards)

This standard replaces the PCAOB’s previous internal control standard, Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. This principles-based auditing standard is designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatement of a company’s financial statements, and, at the same time, eliminate procedures that are unnecessary.  
Auditing Standard No. 5 is required to be used by registered audit firms for all audits of internal control over financial reporting no later than for fiscal years ending on or after November 15, 2007. Earlier adoption is permitted and encouraged.

### PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence* (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)  
**Issue Date:** August 2008  
(Applicable to audits conducted in accordance with PCAOB standards)

Rule 3526 requires the registered public accounting firm to:  
- describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;  
- discuss with the audit committee of the issuer the potential effects of any relationships that could impact independence, should they be appointed as the issuer’s auditor; and  
- document the substance of these discussions. These discussions should occur at least annually.  

The board also adjusted the implementation schedule for Rule 3523 as it applies to tax services. The board agreed not to apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins. The amendments to Rule 3523 became effective August 28, 2008. The remaining provisions of Rule 3526 became effective September 30, 2008.

(continued)
| **PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting**
| (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)
| **Issue Date:** July 2007
| (Applicable to audits conducted in accordance with PCAOB standards)  

This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client’s audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the Securities and Exchange Commission (SEC) or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm’s independence, and document the substance of the firm’s discussion with the audit committee. These requirements parallel the auditor’s responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524, Audit Committee Pre-approval of Certain Tax Services (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”). This rule is effective for audits of fiscal years ending on or after November 15, 2007.

| **PCAOB Conforming Amendments to the Interim Auditing Standards**
| (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
| **Issue Date:** November 15, 2008
| (Applicable to audits conducted in accordance with PCAOB standards)  

| **PCAOB Conforming Amendments to the Interim Auditing Standards**
| (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
| **Issue Date:** July 2007
| (Applicable to audits conducted in accordance with PCAOB standards)  

These amendments are effective for audits of fiscal years ending on or after November 15, 2007, the same effective date of Auditing Standard No. 5.

| **Issue Date:** January 2007
| (Applicable to audits conducted in accordance with PCAOB standards)  

This release focuses on aspects of the PCAOB’s interim auditing standards that address the auditor’s responsibility with respect to fraud, specifically AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, PCAOB Standards and Related Rules). This report does not change or propose to change any existing standard nor is the PCAOB providing any new interpretation of existing standards.
Accounting Issues and Developments

Convergence With International Financial Reporting Standards

.62 Since the signing of the Norwalk Agreement by the Financial Accounting Standards Board (FASB) and International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

.63 FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project go to www.fasb.org and www.iasb.org.
SEC Eases Acceptance of IFRS Financial Statements

.64 On December 21, 2007, the SEC took a major step towards easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.65 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

.66 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS “Roadmap”

.67 On August 27, 2008, the SEC voted to publish for public comment a proposed roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

.68 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016.

.69 The 60-day comment period will begin when the proposed roadmap is published in the federal register.

.70 Additionally, in the spotlight section of its Web site, the SEC provides information on the following topics and groups:

- SEC roundtable on IFRS held on August 4, 2008
- SEC roundtable on practical issues surrounding the use of IFRS in the United States in recent years, and the potential expanded use of IFRS in future years
- SEC roundtable on IFRS in the U.S. markets held on December 13, 2007
- Proposed rulemaking and request for public comments
- SEC staff roundtable on IFRS roadmap
- SEC press releases
- Staff review of financial statements prepared in accordance with IFRS
- Speeches and public statements
This information can be accessed at www.sec.gov/spotlight/ifrsroadmap.htm.

**AICPA Launches IFRS.com Web Site to Inform Members and Financial Professionals About International Accounting Standards**

The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe over the past few years.

Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, the goal of IFRS.com is to provide a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees and other users of financial statements.

The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, CPE courses and live conference training, helpful links and assistance for audit committee members.

**FASB Accounting Standards Codification™**

On January 15, 2008, FASB launched the one-year verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, Emerging Issues Task Force (EITF), and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the one-year verification period, FASB is expected to formally approve the FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the FASB ASC will become nonauthoritative. FASB expects to approve FASB ASC in April 2009. FASB ASC can be accessed at asc.fasb.org/home.

 Constituents are encouraged to use FASB’s online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

The AICPA has published the Financial Reporting Alert *FASB Codification Developments—2008* (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating FASB ASC Research System and performing accounting research.
Accounting for Collaborative Arrangements

.80 Companies may enter into arrangements with other companies to jointly develop, manufacture, distribute, and market a product or provide a service. Often the activities associated with these arrangements are conducted by the collaborators without creating a separate legal entity (that is, the arrangement is operated as a virtual joint venture). For example, two not-for-profit health care systems may enter into a joint operating agreement whereby both parties agree to jointly operate and control certain of their hospitals. The arrangements generally provide that the collaborators will share, based on contractually defined calculations, the profits or losses from the associated activities.

.81 Questions have arisen in practice as to the appropriate presentation and classification of these activities in the income statement (for example, report revenues generated and costs incurred on a gross basis within the financial statements, report the net amount of revenue and expenses in the revenue line item or as a contra-expense, or report the activities of the arrangement as if it were a joint venture).

.82 At its November 29, 2007, meeting, the EITF reached consensus on EITF Issue No. 07-1, “Accounting for Collaborative Arrangements.” This consensus requires participants in a collaborative arrangement to present the results of activities for which they act as the principal on a gross basis and to report any payments received from (or made to) other collaborators based on other applicable GAAP or, in the absence of other applicable GAAP, based on analogy to authoritative literature or a reasonable, rational, and consistently applied accounting policy election.

.83 The consensus permits payments between collaborators to be “grossed up” into component parties in the income statement (for example, amounts due from one party could be presented separately from amounts due to the other party, even if only one net payment was made). For those entities that followed the guidance in the AICPA’s Technical Practice Aid Technical Questions and Answers (TIS) section 6400.33, “Accounting for a Joint Operating Agreement” (AICPA, Technical Practice Aids) this consensus may have significant implications: Joint operating agreements between two not-for-profit health care systems should be accounted for by using the equity method of accounting (similar to a corporate joint venture).

.84 The consensus prohibits using the equity method of accounting for collaboration arrangements unless a new legal entity is formed. It also requires significant disclosures related to material collaborative arrangements.

.85 Effective for annual periods beginning after December 15, 2008, the consensus should be applied retrospectively for collaborative arrangements existing at the effective date of the consensus as a change in accounting principle.

Accounting for Certain Real Estate Transactions

.86 Health care organizations continue to monetize noncore assets (such as medical office buildings) through sale-leaseback transactions and enter into agreements with developers to construct assets in which the organization will lease space (build-to-suit transactions). In both cases, the health care organization might believe the transaction will be off-balance sheet. Yet the accounting requirements for these transactions (contained primarily in FASB Statement No. 66, Accounting for Sales of Real Estate; FASB Statement No. 98, Accounting for Leases: Sale-Leaseback Transactions Involving Real Estate, Sales-Type Leases of Real Estate, Definition of the Lease Term, and Initial Direct Costs of Direct Financing Leases—an amendment of FASB Statements No. 13, 66, and 91 and a rescission of FASB Statement No. 26 and Technical Bulletin No. 79-11; and EITF Issue No. 97-10, “The Effect of Lessee Involvement in Asset Construction”), are extremely restrictive and should be consulted before entering into any agreements or before starting any construction activity, including site preparation.

.87 When evaluating these or other real estate transactions, health care organizations also should consider the guidance contained in EITF Issue No. 01-8, “Determining Whether an Arrangement Contains
a Lease,” to determine if lease accounting may be required when the organization has the right to use property and equipment.

**Expiration of Donor-Imposed Restrictions**

.88 Paragraph 17 of FASB Statement No. 116, *Accounting for Contributions Received and Contributions Made*, requires that a not-for-profit organization recognize the expiration of a donor-imposed restriction on a contribution in the period in which the restriction expires. A purpose restriction expires when the stipulated purpose for which the resource was restricted has been fulfilled. FASB Statement No. 116 goes on to note that if an expense is incurred for a purpose for which both restricted and unrestricted net assets are available, the donor-imposed restriction is considered fulfilled to the extent of the expense incurred (the “first-dollar” rule). In the past, many not-for-profit health care organizations and their related fund-raising foundations may not have carefully monitored the status of temporarily restricted donations that were received in previous years. In many cases, the donor’s restrictions on those funds have been fulfilled based on the first-dollar rule (and therefore, the net assets should have been reclassified from temporarily restricted to unrestricted net assets).

.89 Organizations should evaluate the status of their restricted funds to determine if they are appropriately classified in the financial statements. In addition, given the requirements of FASB Statement No. 116 and the first-dollar rule, development personnel may wish to reconsider the processes used to solicit donor contributions to ensure that the donor’s true intent is clearly documented.

**Omnibus Changes to Consolidation and Equity Method Guidance for Not-for-Profit Organizations**

.90 In May 2008, FASB issued FASB Staff Position (FSP) SOP 94-3-1 and AAG HCO-1, *Omnibus Changes to Consolidation and Equity Method Guidance for Not-for-Profit Organizations*. This FSP makes several changes to the guidance on consolidation and the equity method of accounting in AICPA Statement of Position (SOP) 94-3, *Reporting of Related Entities by Not-for-Profit Organizations* (AICPA, Technical Practice Aids, ACC sec. 10,610), and the AICPA Audit Accounting Guide *Health Care Organizations*. Specifically, SOP 94-3-1,

- eliminates the temporary control exception to consolidation that currently exists for certain relationships between not-for-profit organizations.
- confirms the continued applicability to not-for-profit organizations of the consensus guidance on consolidation of special-purpose lessors in EITF Issue No. 90-15, “Impact of Nonsubstantive Lessors, Residual Value Guarantees, and Other Provisions in Leasing Transactions”; No. 96-21, “Implementation issues in Accounting for Leasing Transactions involving Special-Purpose Entities”; and No. 97-1, “Implementation Issues in Accounting for Lease Transactions, Including Those Involving Special-Purpose Entities.”
- requires that not-for-profit organizations apply the guidance in AICPA SOP 78-9, *Accounting for Investments in Real Estate Ventures* (AICPA, Technical Practice Aids, ACC sec. 10,240); EITF Issue No. 03-16, “Accounting for Investments in Limited Liability Companies”; and FSP SOP 78-9-1, *Interaction of AICPA Statement of Position 78-9 and EITF Issue No. 04-5*, for investments in for-profit partnerships and limited liability companies in which they have more than a minor interest unless they carry those investments at fair value. This change is not expected to have a significant impact on not-for-profit health care organizations.

The guidance in the FSP is effective for fiscal years beginning after June 15, 2008, and interim periods therein.

**Summary of Recent Accounting Pronouncements and Related Guidance**

.91 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on accounting standards issued...
subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

AICPA SOP 07-1 (AICPA, Technical Practice Aids, ACC sec. 10,950)  | Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies
---|---
In February 2008, FASB issued FSP SOP 07-1-1, Effective Date of AICPA Statement of Position 07-1, which indefinitely defers the effective date of SOP 07-1. Entities that early adopted SOP 07-1 before December 15, 2007 are permitted, but not required, to continue to apply the provisions of the SOP. No other entities may adopt the provision of the SOP, subject to the exception in the following sentence: if a parent entity that early adopted the SOP chooses not to rescind its early adoption, an entity consolidated by the parent entity that is formed or acquired after that parent entity’s adoption of the SOP must apply the provisions of the SOP in its stand-alone financial statements.

TIS sections 6910.25–.28 (AICPA, Technical Practice Aids)  | These questions and answers discuss financial statement presentation considerations for investment companies.
(Nonauthoritative)  |  
TIS sections 6140.20–.22 (AICPA, Technical Practice Aids)  | These questions and answers discuss not-for-profit organizations fund-raising expenses.

Recent AICPA Independence and Ethics Pronouncements

.93 AICPA Independence and Ethics Alert—2007/08 (product no. 022478kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

On the Horizon

.94 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the health care industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.
The following table lists the various standard-setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Overhaul Project—AICPA Audit and Accounting Guide *Health Care Organizations*

The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide *Health Care Organizations*, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1996. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

**Auditing Pipeline—Nonissuers**

**ASB Clarity Project**

The Auditing Standards Board (ASB) formed a Clarity Task Force to address concerns over the clarity, length, and complexity of generally accepted auditing standards. In March 2007, the ASB approved for exposure a discussion paper *Improving the Clarity of ASB Standards*. Over the next two to three years, the ASB will be redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA’s *Professional Standards*), to apply the clarity drafting conventions and to converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board. The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the *Clarity Project Explanatory Memorandum* and the discussion paper *Improving the Clarity of ASB Standards* at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.
Auditing Pipeline—Issuers

.98 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert SEC and PCAOB Developments—2008.

Accounting Pipeline

.99 There are a number of accounting projects and pronouncements currently in progress. For a summary of significant accounting projects and pronouncements, refer to AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
- Income tax convergence project

Uniform Prudent Management of Institutional Funds Act

.100 In February 2008, FASB released for public comment proposed FSP FAS 117-a, Endowments of Not-for-Profit Organizations: Net Asset Classification of Funds Subject to an Enacted Version of the Uniform Prudent Management of Institutional Funds Act, and Enhanced Disclosures. If approved as proposed, the FSP would

- provide guidance on the net asset classification of donor-restricted endowment funds for not-for-profit organizations that are subject to an enacted version of the Uniform Prudent Management of Institutional Funds Act (UPMIFA). (As of February 1, 2008, 13 states and the District of Columbia had enacted a version of UPMIFA, with legislation pending in several other states.)
- improve disclosures about an organization’s endowment funds (both donor-restricted and funds functioning as endowments), whether or not the organization is subject to UPMIFA.

The FSP would be effective for fiscal years ending after June 15, 2008, with earlier application permitted.

.101 The first, and perhaps most significant question the proposed FSP addresses is how UPMIFA’s elimination of the historic-dollar-value threshold—the amount below which an organization could not spend under the Uniform Management of Institutional Funds Act (UMIFA)—affects net asset classification. The proposed FSP would require an organization to classify a portion of a donor-restricted endowment fund (other than a term endowment) as permanently restricted net assets. That portion would be equal to the amount of the fund (a) that must be retained permanently in accordance with explicit donor stipulations, or (b) that in the absence of such stipulations, the organization’s governing board determines must be retained permanently under the relevant law. The organization would be required to disclose its interpretation of the law.

.102 It is anticipated that discussions among organizations, accountants, attorneys, and regulators in the various states may lead to consensus in those states determining what must be retained permanently under the law. If a governing board determines that the law requires maintenance of purchasing power of a donor’s gift, the organization would increase permanently restricted net assets to the extent that the purchasing power of a dollar decreases or decrease permanently restricted net assets to the extent that the purchasing power of a dollar increases. (This would typically be done by adjusting permanently restricted net assets by an appropriate inflationary factor, such as the consumer price index or higher education price index.)
In contrast, an organization would not subsequently decrease permanently restricted net assets because of investment losses or organizational spending from the endowment, but would instead decrease temporarily restricted net assets, if available, or unrestricted net assets. The guidance on investment losses and spending is consistent with the guidance previously provided on investment losses in paragraph 12 of FASB Statement No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*. FASB considered but decided not to change that guidance, noting that permanently restricted net assets should reflect the amount for which an organization has a permanent fiduciary duty and not the amount that it has on hand at a financial statement date because of cumulative investment and spending decisions.

The proposed FSP also addresses whether two other provisions in UPMIFA’s endowment spending guidelines impose temporary (time) restrictions on the portion of a donor-restricted endowment fund that would otherwise be considered unrestricted net assets:

- A provision that “[u]nless stated otherwise in the gift instrument, the assets in an endowment fund are donor-restricted assets until appropriated for expenditure by the institution”
- An optional provision for a rebuttable presumption that spending more than 7 percent of endowment market value is imprudent (Some states have included this provision.)

The FSP would require organizations to apply the guidance previously provided in EITF Topic No. D-49, “Classifying Net Appreciation on Investments of a Donor-Restricted Endowment Fund,” included as an appendix to the FSP. EITF Topic No. D-49 stresses that not all legal restrictions on the use of particular assets result in restricted net assets for accounting purposes, only those that extend donor restrictions. An example of the latter would be a requirement to maintain the purchasing power of a donor’s endowment gift.

Laws that refer to actions entirely within the purview of a governing board, such as acting to appropriate funds or exercising prudence do not, alone, extend donor-imposed restrictions. The FSP contains the important caveat that, in applying the guidance in EITF Topic No. D-49, an organization would need to look at the actual wording in the specific version of UPMIFA (and other relevant laws) to which the organization is subject.

The other key provisions of the proposed FSP focus on improving endowment disclosures, both donor-restricted and board-designated. Aiming to improve transparency about endowments in an era of increased public scrutiny, the proposed FSP focuses on disclosures in four areas:

- Net asset classification (especially how that is affected by a governing board’s interpretation of relevant law)
- Spending policies
- Investment policies (especially their relationship with spending policies)
- Net asset composition and changes therein (especially the relationship of endowment spending to endowment size and growth)

Proposed FASB EITFs and FSPs

Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

Proposed FSPs. A number of other proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

The following are various resources that practitioners engaged in the health care industry may find beneficial.
Publications

.111 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide *Health Care Organizations* (2008) (product no. 012618kk [paperback], WHC-XX [online with the associated Audit Risk Alert], or DHC-XX [CD-ROM with the associated Audit Risk Alert])
- Audit and Accounting Guide *Not-for-Profit Organizations* (2008) (product no. 012648 [paperback], WNP-XX [online with the associated Audit Risk Alert], or DNP-XX [CD-ROM with the associated Audit Risk Alert])
- Audit Guide *Analytical Procedures* (2008) (product no. 012558kk [paperback], WAN-XX [online], or DAN-XX [CD-ROM])
- Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2008) (product no. 012528kk [paperback], WDI-XX [online], or DDI-XX [CD-ROM])
- Audit Guide *Auditing Revenue in Certain Industries* (2008) (product no. 012518kk [paperback], WAR-XX [online], or DAR-XX [CD-ROM])
- Audit Guide *Audit Sampling* (2008) (product no. 012538kk [paperback], WAS-XX [online], or DAS-XX [CD-ROM])
- Audit Guide *Government Auditing Standards and Circular A-133 Audits* (2008) (product no. 012748kk [paperback], WRF-XX [online with the associated Audit Risk Alert], or DRF-XX [CD-ROM with the associated Audit Risk Alert])
- Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk [paperback], WSV-XX [online], or DSV-XX [CD-ROM])
- AICPA Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XX [online], or DGE-XX [CD-ROM])
- Audit Risk Alert *Independence and Ethics—2008* (product no. 022479kk [paperback], WIA-XX [online], or DIA-XX [CD-ROM])
- Audit Risk Alert *SEC and PCAOB Developments—2008* (product no. 022499kk [paperback])
- Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk [paperback])
- Audit Risk Alert *Understanding SAS No. 112 and Evaluating Control Deficiencies* (product no. 022536kk [paperback], or 022536PDF [downloadable PDF])
- Checklists and Illustrative Financial Statements for Health Care Organizations (product no. 009028kk [paperback], or WHE-CL [online])
- Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XX [online], or AAM-XX [loose leaf])
- Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XX [online])

.112 Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

- Financial Reporting Alert *Current Accounting Issues and Risks—2008* (product no. 029208kk)
- Financial Reporting Alert *Not-for-Profit Organizations—Accounting Issues and Risks 2008* (product no. 029207kk)
AICPA reSOURCE: Accounting and Auditing Literature

.113 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.114 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

• AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

• SEC Reporting (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

• International Versus U.S. Accounting: What in the World is the Difference? (product no. 731666 [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

• The International Financial Reporting Standards: An Overview (product no. 157220 [online] or 739750HS [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors. Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.115 AICPA CPEExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics. To register or learn more, visit www.cpa2biz.com.

Webcasts

.116 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

.117 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.
SEC Quarterly Update Series

The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help.

Ethics Hotline

In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

The AICPA offers an annual Health Care Conference in the fall. The National Health Care Conference is a three-day conference designed to update attendees on recent developments related to the health care industry. The National Health Care Industry Conference is an unparalleled opportunity to gain the information and techniques you need to know to stay on top of trends to benefit your practice and your client offerings. With access to some of the nation’s top health care specialists, you’ll get up-to-the-minute information on the latest developments in health care issues. For further information about the conference, call (888) 777-7077 or visit www.cpa2biz.com.

AICPA Governmental Audit Quality Center

The Governmental Audit Quality Center (GAQC) is a firm-based, voluntary membership center designed to help CPAs meet the challenges of performing quality audits in this unique and complex area. The GAQC’s primary purpose is to promote the importance of quality governmental audits and the value of such audits to purchasers of governmental audit services. The GAQC also offers resources to enhance the quality of a firm’s governmental audits.

The mission of the GAQC is to do the following:

- Raise awareness about the importance of governmental audits.
- Serve as a comprehensive resource provider on governmental audits for member firms.
- Create a community of firms that demonstrates a commitment to governmental audit quality.
• Provide center members with an online forum tool for sharing best practices and discussing audit, accounting, and regulatory issues.

• List member firms to enable purchasers of governmental audit services to identify firms that are members.

• Provide information about the center’s activities to other governmental audit stakeholders.

.125 For more information about the GAQC, visit http://gaqc.aicpa.org.

The Center for Audit Quality

.126 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.127 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Health Care

.128 For information about the activities of the AICPA Health Care Industry Expert Panel, visit the panel’s Web page at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_healthcare.htm.

Industry Web Sites

.129 The Internet covers a vast amount of information that may be valuable to auditors of health care organizations, including current industry trends and developments. Some of the more relevant sites for auditors with health care clients include those shown in the following table:

<table>
<thead>

Insurance Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of insurance industry entities with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

.01 This Audit Risk Alert (alert) helps you plan and perform your insurance industry audits. This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.

.02 This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.03 An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

.04 The insurance industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

.05 The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

.06 After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

.07 Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.
Economic and Industry Developments

The State of the Economy

.08 When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.

.09 In September 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, acquisitions of several investment and commercial banks (including some that required assistance from federal agencies), and the placement of Fannie Mae and Freddie Mac into conservatorship. Further, several foreign financial institutions received assistance from their national governments or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant publicly-registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short-term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened, and corporations and financial institutions generally recognized as creditworthy began experiencing difficulty borrowing money in the financial markets for any period of time longer than an overnight basis.

.10 In response, the U.S. Senate and, on October 3, 2008, the U.S. House of Representatives passed a bill that, among other things, appropriated up to $700 billion to purchase various forms of asset-backed securities and made a number of changes to the Internal Revenue Code. The repercussions of these events are just beginning to be felt in the wider economy. How they will affect the financial markets in the fourth quarter of 2008 is difficult to predict.

.11 The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 third quarter final advance estimates, real GDP decreased at an annual rate of 0.3 percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

.12 The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate has risen. As of October 2008, the unemployment rate was 6.5 percent, representing approximately 10.1 million people.

.13 The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007 when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 4.25 percentage points to 1.0 percent as of the end of October 2008. The Federal Reserve noted in its October press release that the pace of economic activity appears to have slowed markedly, owing importantly to a decline in consumer expenditures. Business equipment spending and industrial production have weakened in recent months, and slowing economic activity in many foreign economies is damping the prospects for U.S. exports. Moreover, the intensification of financial market turmoil is likely to exert additional restraint on spending, partly by further reducing the ability of households and businesses to obtain credit. Inflation has been high, but the Federal Open Market Committee, which sets the nation’s monetary policy, believes that the decline in energy and other commodity prices and the weaker prospects for economic activity have reduced the upside risks to inflation.
Industry Trends and Conditions

Life and Health Insurance Industry

.14 Over the past several years, life insurance companies have focused on products meant to accumulate wealth. Individual annuities compose the largest component of industry premiums and profits. As a result of an aging population, concerns about the viability of the social security system, and the shifting responsibility from employers to employees for retirement funds, life insurance companies are increasing the focus on products that ensure that an individual will not outlive his or her wealth. The early versions of these products were minimum guarantee products offered with variable annuities. The more recent focus includes variations on those minimum guarantee products as well as products that focus on longevity, liquidity, and retirement medical or long-term care expenses. Life insurers have responded to these challenges by offering creative financial options in addition to traditional mortality, morbidity, and investment returns as a part of basic product offerings.

.15 Through the end of 2008, U.S. life and annuity companies face an increasingly complex economic environment, with negative operating and net income trends and continuing adverse capital market conditions. In the midst of failing financial institutions and U.S. government intervention, financial flexibility remains diminished. The following points illustrate how significant realizable capital erosion remains a major risk, both from a ratings and an operating perspective:

- Six month 2008 net income for the major U.S. publicly traded life and annuity companies included in A.M. Best Research’s report was down 63 percent from a year earlier, whereas net operating income fell 16 percent.
- Sales of individual variable annuities through the first six months were down 12.5 percent, whereas sales of individual fixed annuities were up 34.2 percent.
- Investment risk remains heightened as asset prices continue to fall and more write-downs are likely.
- Merger and acquisition activity has slowed.

.16 Certain important elements, especially in this time of increased market volatility, may affect an auditor’s risk assessment including, but not limited to, the following:

- Due to the continued decline in the market, there is an increased emphasis on accounting for and proper disclosure of other-than-temporary-impairments of debt and equity investments. Auditors should refer to Financial Accounting Standards Board (FASB) Staff Position (FSP) FAS 115-1/FAS 124-1, The Meaning of Other-Than-Temporary-Impairment and Its Application to Certain Investments, and FASB Emerging Issues Task Force (EITF) Issue No. 99-20, “Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets,” for assistance in evaluating a company’s assessment of whether an impaired investment is other-than-temporarily impaired.
- It has become increasingly difficult to obtain input for determining the fair value of auction rate securities, money market funds, commercial paper, mortgage-backed or other asset-backed securities, collateralized debt obligations, and municipal securities due to the slowdown in trading caused by the current market. Auditors should refer to FSP FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, for help in clarifying the application of FASB Statement No. 157, Fair Value Measurements, in a market that is not active.
- Due to the significant upheaval in the current market, auditors should pay particular attention to the company’s liquidity and capital resources, and whether the current conditions could affect the company’s ability to continue as a going concern.
- Limited historical or market policyholder behavior experience to be utilized by companies in pricing and reserving for recently issued policyholder financial options continues to affect the comparability of valuation among competitors and the availability of reinsurance capacity. (The

---

availability of reinsurance is beginning to loosen; see further discussion on reinsurance in the sections of this alert entitled “Reinsurance Arrangements” and “NAIC Reinsurance Disclosure and Filing Requirements.”

- Application of a statutory principles-based approach to reserving for no-lapse guarantees is still a few years away and, as a result, large excess reserving needs remain for many of these contracts, causing a need to fund this excess statutory strain. The auditor can refer to AU section 342, Auditing Accounting Estimates (AICPA, Professional Standards, vol. 1), which provides guidance on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates. In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate and, based on that understanding, should use one or a combination of the approaches included in AU section 342.

- Hedging programs developed by insurers in recent years to manage exposures to policyholder financial options are being reexamined to determine the effect of a decline in a counterparty’s creditworthiness or a company’s own creditworthiness on the fair value of a derivative. The decline in the current market has increased the number of companies experiencing financial problems, resulting in widening credit spreads to bankruptcy. As discussed in FASB Derivatives Implementation Group Statement 133 Implementation Issue No. G10, Cash Flow Hedges: Need to Consider Possibility of Default by the Counterparty to the Hedging Derivative, “The entity must be aware of the counterparty’s creditworthiness (and changes therein) in determining the fair value of the derivative. Although a change in the counterparty’s creditworthiness would not necessarily indicate that the counterparty would default on its obligations, such a change would warrant further evaluation. If the likelihood that the counterparty will not default ceases to be probable, an entity would be unable to conclude that the hedging relationship in a cash flow hedge is expected to be highly effective in achieving offsetting cash flows.” The auditor also can refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1), which provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities.

Guarantees and Other Developments

.17 Variable annuity products that contain minimum guaranteed death benefits (MGDBs) or guaranteed minimum income benefits (GMIBs) pose additional considerations, which include the following:

- Companies may experience general account charges for the payout of these benefits (upon either death or annuitization, as applicable) when the market value of the separate account assets is not sufficient to support the level of benefit payment.

- Generally accepted accounting principles (GAAP) and statutory accounting principles (SAP) may require insurers to establish reserves for variable annuity guarantees on these products, thereby placing strain on capital strength.

.18 The National Association of Insurance Commissioners (NAIC) Risk Based Capital C3 Phase II initiative requires cash-flow testing for annuities or other products with exposure to interest-rate risks. Interest-rate risk may increase if there is a duration mismatch between assets and liabilities. Testing includes multiple scenarios with various interest rate fluctuations to determine whether reserves are adequate. This testing may cause some life insurers to increase their capital requirements for interest-sensitive products.

.19 Companies that issue universal life insurance with no-lapse guarantee mortality features are subject to the provisions of Statement of Position (SOP) 03-1, Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts (AICPA, Technical Practice Aids, ACC sec. 10,870), and should establish liabilities in addition to account balances if amounts assessed each period for the feature are expected to result in profits in earlier years followed by losses in subsequent years.

.20 SOP 03-1 contains guidance for accounting for MGDBs, GMIBs, and no-lapse guarantee features. These features also are addressed in FSP FAS 97-1, Situations in Which Paragraphs 17(b) and 20 of FASB...
Statement No. 97, Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments, Permit or Require Accrual of an Unearned Revenue Liability, and in Technical Practice Aid (TPA) Technical Questions and Answers (TIS) section 6300.08, “Definition of an Insurance Benefit Feature” (AICPA, Technical Practice Aids). Management should be familiar with all of these pronouncements in applying the guidance in SOP 03-1. Auditors also should gain an understanding of these pronouncements, depending on the circumstances of their clients.

Property and Casualty Insurance Industry

.21 The U.S. property and casualty (P&C) insurance industry experienced weak performance in the first half of 2008. Net written premiums declined 0.7 percent continuing the negative growth trend that began in 2007 with a –0.6 percent growth rate. These decreases are significant given that premium growth has not been negative since 1943, in the midst of World War II. During the first six months of 2008, the industry’s net income decreased more than 50 percent to $15.9 billion, whereas the annualized after-tax return on surplus declined to 9.5 percent, down from 14.2 percent return for the 12 months ended June 30, 2007. The first half of 2008 combined ratio was 102.1, which is the highest level it has reached in 6 years.

.22 The industry decline was driven primarily by the housing and credit crisis faced by mortgage insurers and financial guarantee insurers, the continuation of soft market conditions through much of the industry, an increase in catastrophe losses, and a volatile investment market. Each of these performance factors are subsequently discussed in more detail.

Impact of the Housing and Credit Crisis on Mortgage and Financial Guarantee Insurers

.23 Since 2007, securities backed by subprime mortgages have gone into default at record rates due to the slump in the housing market and loans that were extended to borrowers with poor credit histories. Mortgage insurers now face substantial borrower defaults on loans that were approved when the process of securing a mortgage was less difficult. During the first half of 2008, many mortgage and financial guarantee insurers reported significant underwriting losses. According to A.M. Best Research 2008 Special Report, U.S. Property/Casualty—6-Month Financial Review, as of September 23, 2008, although these lines only account for a small percentage of the industry’s net premiums written, their loss impact caused a 5.0 point deterioration on the industry-wide combined ratio. As a result, major rating agencies have downgraded the financial strength ratings of several mortgage insurance companies. Additionally, stock prices for these insurers are decreasing. In reaction, mortgage insurers have tightened their standards, making such insurance more challenging to obtain.

Continuation of the Soft Market Conditions

.24 For the fourth consecutive year, the P&C market remains soft as a consequence of a sustained, highly aggressive pricing environment. This is a result of competitive pressure in practically all lines of property casualty business and geographic areas. Renewals reportedly have declined and pricing increases have lagged the inflation rate. Due to increased competition, advertisement spending by P&C insurers is at a record high, even after accounting for growth premiums.

Surge of Catastrophe Losses

.25 The Insurance Services Office has noted that 2008 first quarter catastrophe losses have reached the highest level of any first quarter since 1994. The second quarter losses doubled the first quarter, allowing

---

2 According to the Mortgage Insurance Companies of America 2007–2008 Fact Book & Membership Directory, property and casualty (P&C) insurers that protect lenders against loss from a mortgagor’s default on conventional first home mortgages made to home buyers who make down payments of less than 20 percent of the purchase price.

3 P&C insurers that issue financial guarantees, including the guaranteeing of interest and principal payments on corporate and municipal debt, the guaranteeing of limited partnership obligations, and a number of other products in which the insurance company takes on an obligation to pay at some later date. (AICPA Audit and Accounting Guide Property and Liability Insurance Companies)

4 Subprime mortgages are mortgages used by borrowers with low credit ratings, who are considered risky by lending agencies because the default risk is greater than that of other borrowers. Due to this, lenders charge a higher interest rate on subprime loans.
the total for the first half of 2008 to be greater than the total amount for all of 2007. According to A.M. Best Research, insured catastrophe losses reached $10.3 billion in the first 6 months of 2008, contributing 4.7 percentage points to the industry’s combined ratio. These losses in the first half of the year were due to record-breaking tornado activity, brutal hail, wildfires, and wind damage. Severe flooding in the Midwest also has been a major cause of concern during the second quarter of 2008, costing private insurers $600 million. As of mid-September, 10 storms had been named, including Hurricanes Gustav and Ike. The estimated losses for Gustav range between $2 billion and $10 billion, and estimates for Hurricane Ike are as high as $18 billion. The hurricane season is expected to add earnings pressure to the market, but the overall financial impact is expected to be manageable due to the capital strength of the P&C industry.

Volatile Investment Market

.26 The P&C industry’s profitability has been further adversely affected by volatile investment markets. Stock prices have declined, credit spreads have widened on fixed income securities, and the Federal Reserve has consistently cut rates on federal funds. Approximately two-thirds of P&C investments are in bonds, which are sensitive to interest rates. Recently, the market for investments has been affected by unfavorable news headlines about credit markets, increasing oil prices, and economic weakness. A.M. Best Research notes in the first half of 2008, the industry’s total investment gain slipped by 11.2 percent or $3.4 billion. Investment returns have been significantly affected by the historically low interest rate environment, held constant at 2 percent, according to A.M. Best Research. Further declines are expected through the remainder of 2008 due to the tumultuous financial markets, which will test the strength of a number of insurers.

.27 According to A.M. Best Research 2008 Special Report, U.S. Property/Casualty—1st Quarter Financial Review, as of June 30, 2008, the property liability insurance industry faces a challenging environment for the remainder of 2008, due to a combination of deteriorating rate adequacy, loosening terms and conditions, a difficult investment climate, and catastrophe-related losses. A.M. Best Research notes it appears that the P&C industry will face underwriting losses for the year-end 2008, but believes the industry to be on track for an operating profit. For the long term, Conning Research & Consulting projects a soft market through 2010 with better performance in 2009 and 2010 compared to 2008. They anticipate a rebound in the economy and a moderating competitive environment.

Legislative and Regulatory Developments

Recent Statutory Accounting Principles

.28 The NAIC continues to create and clarify statutory accounting guidance for insurance enterprises through its ongoing maintenance process. The most recent Accounting Practices and Procedures Manual (manual) was published by the NAIC as of March 2008 and contains accounting practices and procedures adopted by the NAIC through December 2007. For manual subscribers, modifications made subsequent to the publication of the manual are available on the NAIC Web site at www.naic.org. Insurance laws and regulations of the state insurance departments require insurance companies domiciled in those states to comply with the guidance provided in the manual, except as otherwise prescribed or permitted by state law or regulation.

.29 The 2008 manual contains one new Statement of Statutory Accounting Principle (SSAP) that was adopted during 2007—SSAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 88. SSAP No. 97 was adopted in December 2007 and was effective for reporting periods ending on or after December 31, 2007.

.30 Most of the revisions incorporated in SSAP No. 97 are related to satisfying the audit requirements applicable in various subsidiary, controlled, and affiliated entities (SCA) situations. The significant changes in SSAP No. 97 include the following:

- Combined audited financial statements are allowed in complying with requirements under SSAP No. 97 that SCA be audited.
• Foreign (non-U.S.) entities are allowed to provide audited financial statements on a foreign basis of accounting, with an audited footnote reconciliation to U.S. GAAP, in complying with the audit requirement under SSAP No. 97.

• In certain circumstances, the “look-through” approach, which permits a company to admit the value of a downstream holding company, is allowed.

.31 Language was added to clarify that the value of preferred stock and surplus notes issued by an SCA are to be deducted from the SCA’s total equity in determining the carrying value attributed to the common stock of such an SCA.

.32 In fall 2008, the following two new SSAPs were issued:

1. SSAP No. 98, Treatment of Cash Flows When Quantifying Changes in Valuation and Impairments, An Amendment to SSAP No. 43—Loan-Backed and Structured Securities, requires fair value of the security be used to measure other-than-temporary impairments. In addition, SSAP No. 98 clarifies interest-related declines in value are considered other-than-temporary when there is intent to sell the investment prior to recovery of the cost and also clarifies the asset valuation reserve and interest maintenance reserve treatment of other-than-temporary impairments. This SSAP is effective for quarterly and annual reporting periods beginning on or after January 1, 2009, with early adoption permitted and encouraged.

2. SSAP No. 99, Accounting for Certain Securities Subsequent to an Other-Than-Temporary Impairment, adopts the guidance in paragraph 16 of FSP FAS 115-1/FAS 124-1 and provides guidance to account for the amortization or accretion of debt securities after an other-than-temporary impairment. Upon impairment of a security, an immediate amortization of premium shall be reported as a realized loss and shall not be included in investment income. This SSAP is effective January 1, 2009, with early adoption permitted.

.33 Additionally, nine new interpretations were adopted during 2007 and incorporated into the March 2008 manual. Also, several nonsubstantive revisions to various SSAPs and manual appendixes were made during 2007 by the NAIC. Interpretations are immediately effective upon adoption by the NAIC, and new SSAP’s occasionally are effective for the calendar year they are adopted. Interim updates to the manual can be found under the SAP Working Group section of the NAIC Web site at www.naic.org/committees_e_app_sapwg.htm. Beginning in 2008, the user identification and password necessary to access adopted updates to the March 2008 manual require the prepurchase of the subsequent year’s manual (the March 2009 publication, in this case).

The NAIC’s Sarbanes-Oxley Initiative Update

.34 The NAIC adopted changes to the Annual Financial Reporting Model Regulation (Model Audit Rule) related to the Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley) during its fall 2006 meeting, with the majority of the changes effective for 2010.

.35 Highlights of the significant changes made to the Model Audit Rule related to Sarbanes-Oxley include:

• Section 7: The time allowed to serve in the capacity as the lead or coordinating audit partner was decreased from seven years to five consecutive years with a new five year break in service (previously two years), effective beginning with year 2010 statutory audits.

• Section 7: A list of nonaudit services that cannot be performed by the auditor in conjunction with the audit (the prohibitions generally agree with those designated by the Securities and Exchange Commission [SEC]), effective for the year 2010 statutory audits.

• Section 9: To the extent required by AU section 319, Consideration of Internal Control in a Financial Statement Audit (AICPA, PCAOB Standards and Related Rules, PCAOB Standards, As Amended), for those insurers required to file a management’s report on internal control over financial reporting
pursuant to Section 16 (see the following “Section 16” bullet point), the independent CPA should consider the most recently available report in planning and performing the audit of statutory financial statements.

• Section 11: Auditors should prepare a written communication of any unremediated material weaknesses that the insurer will furnish the domiciliary commissioner, effective beginning with year 2010 statutory audits. The current Model Audit Rule requires the auditor to prepare a report of significant deficiencies and material weaknesses in the insurer’s internal control structure noted by the auditor during the audit. The AICPA NAIC Task Force has, for several years, undertaken efforts to confirm that states will accept the reporting of only those significant deficiencies and material weaknesses that are unremediated as of the balance sheet date, and it will continue to do so until the year 2010 effective date of the revised Model Audit Rule.

Until the revisions of this section become effective in 2010, representatives of the AICPA plan on obtaining negative clearance from regulators that they will continue to follow the guidance contained in a March 9, 2005 letter that was sent to regulators. This letter contained suggested guidance for complying with Section 11 of the Model Audit Rule because the term significant deficiencies had a different definition under Sarbanes-Oxley than it had under Section 11 of the Model Audit Rule.

• Section 14: New specifications for the responsibilities of audit committees and the required qualifications of audit committee members will be effective January 1, 2010. The adopted revisions require that insurance companies have an audit committee that is solely responsible for the appointment, compensation, and oversight of the company’s auditor. The guidance also indicates that some audit committees, based on the insurer’s premium volume, would need to be comprised of a certain percentage of individuals who are independent from company management. The premium threshold that triggers the requirement for independent audit committee members is $300 million assumed and direct premiums. The premium range for a majority (50 percent or more) of independent audit committee members is from $300 million to $500 million. The requirement for a supermajority (75 percent or more) of independent audit committee members is $500 million in premiums. Notwithstanding premium volume, all insurers are encouraged to structure their audit committees with at least a supermajority of independent audit committee members.

• Section 16: Every insurer required to file an audited financial report that has an annual direct written and assumed premium of $500 million or more shall prepare a report of the insurers’ or group of insurers’ internal control over financial reporting and file it with their insurance commissioner, effective December 31, 2010. The Model Audit Rule also includes a list of what should be included in management’s report on internal control over financial reporting. This report is prepared by management and is not audited.

An insurer that is a Sarbanes-Oxley compliant entity or is a direct or indirect wholly owned subsidiary of a Sarbanes-Oxley compliant entity will be able to file its or its parent’s Sarbanes-Oxley Act Section 404 report in satisfaction of this Section 16 requirement. However, there also is an addendum that needs to be filed with the Sarbanes-Oxley Act Section 404 report that would include a positive statement that there are no material processes related to the preparation of the audited statutory financial statements that were excluded from the Sarbanes-Oxley Act Section 404 report. If there are internal controls that have a material impact on the preparation of the audited statutory financial statements excluded from the Sarbanes-Oxley Act Section 404 report they need to be addressed. The insurer may either file a report under Section 16 or the insurer can file its Sarbanes-Oxley Act Section 404 report and a Section 16 report for those internal controls that would have a material impact on the audited statutory financial statements and were not covered by the Sarbanes-Oxley Act Section 404 report.

The independent CPA should consider this report during the planning and performance of the annual audit. In addition, the proposed revisions require the insurer to file with the state insurance department the independent public accountant’s communication regarding any unremediated material weaknesses noted during the course of the audit.
SSAP No. 9 Considerations

.36 SSAP No. 9, Subsequent Events, which was based on AU section 560, Subsequent Events (AICPA, Professional Standards, vol. 1), defines subsequent events and establishes criteria for recording such events in the financial statements or disclosing them in the notes to the financial statements. All information that becomes available prior to the issuance of the financial statements relating to a material type I subsequent event (currently defined in SSAP No. 9 as “events that provide additional evidence with respect to conditions that existed at the date of the balance sheet and affect the estimates inherent in the process of preparing financial statements”) shall be used by management in determining the related accounting estimate.

.37 During 2007, the NAIC SAP Working Group adopted revisions to paragraph 13 of SSAP No. 55, Unpaid Claims, Losses and Loss Adjustment Expenses, to address the issue of whether accounting judgments and estimates inherent in the preparation of statutory-basis financial statements should be updated to reflect type I subsequent events occurring between the annual statement filing date and the issuance of the audited statutory-basis financial statements. This amended paragraph clarifies that liabilities for unpaid claims, losses, and loss adjustment expenses within the scope of SSAP No. 55 are not expected to be reestimated. Rather, additional information that is obtained after the submission of the annual statement, which is not indicative of an error in the estimation process, is considered part of the continuous review process and should be reflected in the statement of operations in the period the change becomes known.

.38 Readers should be aware that this guidance applies only to unpaid claims, losses, and loss adjustment expenses within the scope of SSAP No. 55, and that to be compliant with SSAP No. 9 as currently written, companies will need to have a process in place to update other judgments and estimates for type I subsequent events occurring between the annual statement filing date and the issuance of the audited statutory-basis financial statements.

Risk-Focused Statutory Examinations

.39 Companies are examined for statutory purposes by the domestic insurance departments. State regulators perform their financial examinations using the NAIC Financial Condition Examiners Handbook. Beginning in 2010, state examiners will be required to conduct their examinations using a risk-focused approach (although many states have already begun conducting examinations using a risk-focused approach). This examination approach, which is a key component of establishing and operating an effective risk-focused surveillance process, involves several differences from the traditional, more substantive-based statutory examination process. In particular, under the risk-focused approach, there is a heavy emphasis on the insurer’s corporate governance and established risk management practices and processes. At the beginning of the examination, regulators gain an understanding of the corporate governance structure and assess the “tone at the top.” In addition, examiners obtain information on the quality of oversight provided by a company’s board of directors. Examiners also evaluate and assess the effectiveness of senior management as part of this corporate governance assessment process. All of this information contributes to an understanding of how a company identifies, controls, monitors, mitigates, evaluates, and responds to its risks. This assessment helps determine the most significant current and prospective risk areas and assists with determining the amount of substantive examination procedures that state examiners should perform. The examiner’s review and consideration of prospective business risk is designed to focus on key risks to future solvency and allows the regulators to tailor their supervision plan to address key risks.

.40 In conjunction with the previously explained objectives, examiners typically will make inquiries of a company’s external auditor regarding various areas in order to determine potential leverage of the auditor’s work papers. In addition to reviewing areas associated with the auditor’s balance sheet and income statement account testing, the examiners also may be interested in reviewing the auditor’s internal control assessment and testing of the insurer’s corporate governance environment, recognizing that the extent of documentation pertaining to the insurer’s corporate governance structure and risk mitigation strategies will vary based on the size and structure of the company and its holding company group. As part of this assessment, the examiners also may request to see the auditor’s assessment and testing over various
entity-level controls, especially any testing or assessments performed related to the insurer’s enterprise risk management (ERM) structure. Several rating agencies such as A.M. Best Research and Standard & Poor’s have emphasized a review of a company’s ERM environment and practices. If the external auditor has reviewed the ERM practices and potential relationship to the Committee of Sponsoring Organizations of the Treadway Commission ERM framework, the examiner generally will want to review this documentation.

.41 Additionally, once the examiners determine the most significant financial reporting areas of focus, they may be interested in reviewing the external auditor’s testing of certain key internal controls related to public companies’ compliance with Sarbanes-Oxley Act Section 404. The risk and control matrices that outline the risk, key controls, financial statement assertions, testing performed, results of testing, and conclusions reached regarding design and operating effectiveness may be of particular interest to the examiners. The regulators will want to understand the scope of testing by the external auditors and may want to review or reperform certain aspects of the external auditor’s testing in order to establish a basis for reliance. Most companies will want their external auditors to cooperate with the state insurance regulators in order to avoid duplication of effort relating to testing key financial controls.

.42 Furthermore, the regulators may be particularly interested in the scope of information systems testing performed by both the external auditor and the company. Given that data integrity is usually classified as a high inherent risk, the scope of information technology testing performed by the external auditor likely will be of interest to most examiners (that is, testing performed over information technology key controls related to both general and application controls). Smaller companies, as well as Sarbanes-Oxley compliant entities, will be expected to proactively address information technology risks, and the external auditor’s work in this area will be considered important by most examiners.

Federal Initiatives—Treasury Department’s Blueprint for a Modernized Financial Regulatory Structure, an Optional Federal Charter, and an Office of Insurance Information

.43 In March 2008, the Treasury Department released its Blueprint for a Modernized Financial Regulatory Structure (the blueprint). The purpose of the blueprint is to present a series of recommendations to Congress for the reform of the U.S. financial regulatory structure. The blueprint is a key part of the Treasury Department’s efforts to improve the competitiveness of the U.S. capital markets in a global marketplace. One area of proposed reform affects the insurance industry and how the insurance industry is currently regulated by a state-based regulatory system. The blueprint recommends the following:

- The establishment of a federal insurance regulatory structure to provide for the creation of an optional federal charter (OFC). This structure is similar to the current dual-chartering system for banking. An office of national insurance within the Treasury Department would oversee this federal regulatory structure.
- As an intermediate step, Congress would establish a federal office of insurance oversight within the Treasury Department in order to establish a federal presence in insurance for international and regulatory issues with a goal toward providing “more effective, efficient, and consistent regulation for national insurers and [to] enhance product choice and innovation.”

.44 Subsequent to the release of the blueprint, much debate has ensued regarding the merits of moving to a dual regulatory system for insurers. As of this writing, the OFC, if one were to be approved by Congress, is not expected to apply to health insurance. As currently drafted, it will apply to both property-casualty and life insurance lines of business but could ultimately apply only to life insurance. Indications from Treasury officials are that it would be broadly consistent with banking regulation, specifically dealing with charter, licensing, regulation, and supervision for insurers and producers. The state-based system would continue for those deciding not to operate at the national level. Legislation has been introduced in both the U.S. House of Representatives and the U.S. Senate supporting the establishment of an OFC.

.45 The office of insurance oversight that was recommended in the blueprint is now being referred to as the office of insurance information (OII). Legislation to create the OII, the Insurance Information Act of 2008,
was approved in July 2008 by the House Financial Services Subcommittee on Capital Markets, Insurance, and Government Sponsored Entities. The initial focus of the OII is expected to be on global issues, particularly those pertaining to the European Union’s new framework for insurance regulation; it also is expected to have limited authorities. Auditors should be aware of and monitor developments in the preceding areas and assess effects to disclosures, liability accruals, and subsequent events for 2008 fiscal year-ends.

**National Flood Insurance Program**

The National Flood Insurance Act of 1968 created the National Flood Insurance Program (NFIP) because flood insurance was unavailable from the private insurance markets. The NFIP was overwhelmed by claims from the 2004 and 2005 hurricane season and Congress was forced to raise the program’s borrowing authority to pay claims. It became apparent the NFIP was in need of reform in order to remain viable and provide consumers the desired protection. Additionally, due to consumer’s difficulty in obtaining windstorm coverage in the marketplace and controversial decisions regarding coverage of claims from Hurricanes Rita and Katrina, there has been a move to have the NFIP offer both windstorm and flood coverage. A U.S. House of Representatives bill passed in 2007 to reform the program and offer windstorm coverage. In July 2008, the U.S. Senate Committee on Banking, Housing, and Urban Affairs voted on its own legislative version to reform the NFIP; however, it did not propose an expansion of the program to the offering of windstorm coverage. The U.S. Senate voted to extend the NFIP through September 30, 2013. The Office of Management and Budget said that it would recommend the president veto any extension bill that contained the windstorm provision. U.S. House of Representatives and U.S. Senate negotiators will have to iron out differences between the two bills so the NFIP can be extended beyond its September 30, 2008 expiration. Auditors should be aware of and monitor developments in this area and assess effects to disclosures, liability accruals, and subsequent events for 2008 fiscal year-ends.

**Terrorism Insurance Developments**

The market for terrorism risk insurance was severely disrupted by the events of September 11, 2001. Those events resulted in reinsurers no longer covering terrorism risk or offering coverage only at very high rates. On November 26, 2002, the president signed the Terrorism Risk Insurance Act (TRIA) into law. The TRIA established a temporary federal program of shared public and private compensation for insured commercial P&C losses resulting from acts of terrorism.

Accordingly, terrorism exclusions on existing insurance policies were removed, and all policyholders had the ability to secure coverage for terrorism risk through mandatory offer requirements placed on insurers. The TRIA, as amended in 2005, placed the federal government temporarily in the terrorism risk reinsurance business because the program was written to expire on December 31, 2007. With expiration imminent, the TRIA was amended on December 26, 2007 by the Terrorism Risk Insurance Program Reauthorization Act of 2007 (the Reauthorization Act), which extended the TRIA for another seven years, or through December 31, 2014. A summary of the 2007 amendments, which are in effect for 2008, are discussed in the following paragraphs of this alert.

Under the original program, once an insurer suffers a loss equal to its deductible, the Treasury Department covers 90 percent of the losses above the deductible. The insurer’s deductible increases over the life of the program. The TRIA also provides the Treasury Department with the authority to recoup federal payments via policyholder surcharges. The maximum amount of any potential policyholder surcharge that can be imposed is 3 percent per year.

A summary of the major changes as a result of the 2007 amendments is as follows:

- The definition of act of terrorism was revised to remove the requirement that the act of terrorism be committed by an individual acting on behalf of any foreign person or foreign interest in order to be certified as an act of terrorism for purposes of the TRIA. Insurers have designed their insurance
contracts and notifications to policyholders differently concerning potential changes to the certification criteria for acts of terrorism. Insurers must determine how their policy language and particular circumstances are affected by the revised definition of an act of terrorism.

- The definition of insurer deductible was revised for all additional program years as the value of an insurer’s direct earned premium for commercial P&C insurance for the immediately preceding calendar year multiplied by 20 percent.
- The federal share of compensation for insured losses (subject to a $100 million program trigger) for all additional program years is set at 85 percent of that portion of the amount of insured losses that exceeds the applicable insurer deductible.
- The Treasury Department is required to submit a report to Congress and issue final regulations for determining the pro rata share of insured losses to be paid under the program when aggregate insured losses exceed the annual liability cap of $100 billion.
- The Secretary of the Treasury is required to notify Congress not later than 15 days after the date of an act of terrorism about whether aggregate insured losses are estimated to exceed $100 billion.
- For policies issued after the date of enactment, insurers are required to provide clear and conspicuous disclosure to the policyholder of the existence of the $100 billion cap at the time of offer, purchase, and renewal of a policy (in addition to current disclosure requirements).
- The recoupment provisions of the TRIA have been revised. For purposes of recouping the federal share of compensation under the TRIA, the insurance marketplace aggregate retention amount for all additional program years is the lesser of $27.5 billion and the aggregate amount, for all insurers, of insured losses during each program year. With regard to mandatory recoupment of the federal share of compensation through policyholder surcharges, collection is required within a certain schedule specified in the Reauthorization Act. The limitation that surcharges not exceed 3 percent of the premium charged for P&C insurance coverage under the policy is eliminated (but remains in the case of discretionary recoupment).

.51 Auditors should remain alert to developments in this area and assess effects to disclosures, liability accruals, and subsequent events for 2008 fiscal year-ends. The concern with the expiration of the TRIA in 2014 is that, in the absence of a federal program, it is likely that terrorism exclusions will become the norm for commercial line policies, and private reinsurers are not likely to fill the reinsurance capacity void.

.52 The NAIC has adopted a model bulletin to provide guidance to insurers related to rate filings and policy language that state regulators would find acceptable to protect U.S. businesses from acts of terrorism. They also have developed Model Disclosure Forms 1 and 2 to assist insurers in complying with the TRIA. The model disclosure forms may be used and modified by insurers to meet their obligation under the rules, provide policyholders with the status of current coverage, and, in some cases, make a selection regarding future insurance coverage for acts of terrorism. Insurers must comply with state law and the TRIA and are encouraged to review the disclosure forms in light of their current policy language, state legal requirements, and the provisions of the TRIA amendments and the Terrorism Risk Insurance Program.

Audit and Attestation Issues and Developments

Audit Risks Arising From Current Economic Conditions

.53 As mentioned in “The State of the Economy,” unprecedented events occurred in the financial markets in September 2008 resulting in Congress appropriating up to $700 billion to purchase various asset-backed securities. Generally, many fixed income markets became extraordinarily illiquid in late September 2008, resulting in a substantial increase in risk over the valuation assertion for virtually any kind of fixed income security of any duration. Also, concerns existed about the possibility of significant redemptions from various types of funds and some reports of certain private funds either placing limits on redemptions, freezing the ability to redeem entirely, or determining to commence an orderly wind-down of operations. Thus,
subsequent events reporting considerations, and assessment of the “going concern” status of some entities, take on added importance in the current environment as well.

.54 The AICPA staff has issued TIS section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), addressing the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle. The question and answer covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things, and can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

.55 Recent economic conditions may cause additional risk factors that had not existed or did not have a material effect on audit clients in prior years. When obtaining an understanding of the external factors that affect the entity and the risks associated with those factors, the auditor may consider whether conditions exist that indicate risks of material misstatement. Some examples that relate to economic conditions are as follows:

- Operations that are exposed to volatile markets, which may include oil, agriculture, or currency markets
- Constraints on the availability of capital and credit
- Operations in regions with economic volatility, including employment and housing issues
- Going concern and liquidity issues

.56 In addition to economic conditions, external forces such as natural disasters significantly affect the insurance industry, especially property and liability insurance. Although many of these risks are not new to business, consideration of the many ways a client is affected by external forces is part of obtaining an understanding of the entity and its environment and will allow the auditor to plan and perform the audit to address those risks.

Other-Than-Temporary Impairments

.57 Emphasis has increased on accounting for and proper disclosure of other-than-temporary impairments of debt and equity investments due to the continued negative decline in the market. Auditors should refer to FSP FAS 115-1/FAS 124-1 and EITF Issue No. 99-20 for assistance in evaluating a company’s assessment of whether an impaired investment is other-than-temporarily impaired.

Liquidity

.58 Also, due to the significant upheaval in the current market, auditors should pay particular attention to the company’s liquidity and capital resources, and whether the current conditions could affect the company’s ability to continue as a going concern. AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1), requires auditors to evaluate whether there is substantial doubt about an entity’s ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. Statement on Auditing Standards No. 114, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1, AU sec. 380), requires that auditors communicate with those charged with governance events or conditions that lead the auditor to believe there is substantial doubt about the entity’s ability to continue as a going concern.

Valuation

.59 It has become difficult to obtain input for determining the fair value of auction rate securities, money market funds, commercial paper, mortgage-backed or other asset-backed securities, collateralized debt obligations, and municipal securities due to the slowdown in trading caused by the current market. Auditors
should refer to FSP FAS 157-3 for help in clarifying the application of FASB Statement No. 157 in a market that is not active.

Reinsurance

.60 Auditors of companies with significant reinsurance contracts may want to request that management state in its representation letter to the auditor that there are no side agreements to reinsurance contracts, or, alternatively, that the auditor has been informed of any such agreements in order to enable a determination about whether the company has properly considered these agreements in the accounting analysis for the contract. Auditors of companies with significant reinsurance contracts also may consider directing procedures under AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), toward these arrangements to identify any of the following:

- Contracts backdated to avoid retroactive reinsurance accounting on coverage of losses that had already been incurred
- Side agreements to reimburse the reinsurer for covered losses or to return profits under a contract in a different accounting period, which may compel accounting accruals
- Linked contracts where losses experienced under one will be reimbursed under another in the future and which should be considered together in the risk transfer analysis
- Contracts whose terms do not make economic sense and indicate a side agreement, or linkage, with another contract that should be considered in the accounting evaluation
- Exclusive reinsurance arrangements with offshore assuming companies that raise consolidation questions
- Commutations where the settlements are not in accordance with contract terms and suggest a noncontractual agreement on the allocation of profits and losses
- Contracts where the risk transfer analysis supporting the accounting evaluation differs materially from and cannot be reconciled to cash flow analyses included in the underwriting file

Reinsurance Recoverables

.61 Consideration should be given to the terms of the reinsurance agreements and the creditworthiness of the reinsurer. Significant payment terms may be material to liquidity and required capital levels. As previously noted, auditors should refer to AU section 341. Due to continued downturns in the market, the auditor should give significant consideration to whether the company complies with regulatory risk-based capital requirements when evaluating an insurance company’s ability to continue as a going concern.

Claims Expense and Loss Reserves

.62 Due to the increased number and complexity of transactions surrounding claims and claim expenses, inherent risk surrounding the recording and payout of claims can increase. Auditors should evaluate their client’s response and adherence to criteria and related controls surrounding expenses.

.63 The identification of changes surrounding valuation variables and consideration of their effect on losses are critical audit steps. The evaluation of these factors includes the involvement of specialists and input from various operating departments within the company, such as marketing, underwriting, actuarial, reinsurance, and legal. Readers should remember that losses are only accrued for events that have occurred; catastrophe reserves are not allowed in anticipation of future events.

.64 AU section 342 states that the auditor should obtain an understanding of how management developed the accounting estimates included in the financial statements. Claims expense and loss reserve estimates are significant variables on an insurance company’s financial statements. Accordingly, regardless of the approach used to audit claims expense and loss reserve estimates, the auditor should gain an
understanding of how management develops estimates. Additionally, chapter 4 and appendix A of the AICPA Audit and Accounting Guide *Property and Liability Insurance Companies* is an additional source of guidance.

.65 Auditors also can refer to AU section 336, *Using the Work of a Specialist* (AICPA, *Professional Standards*, vol. 1), as well as noting current practitioner prohibitions and restrictions that exist related to the performance of nonaudit services for audit clients, including certain actuarial services. Practitioners should be aware of and comply with these prohibitions and restrictions, including the AICPA, SEC, and Public Company Accounting Oversight Board (PCAOB) independence rules; new NAIC rules describing qualifications of an independent CPA included in the Model Audit Rule effective for 2010 statutory audits; and rules passed by the U.S. Government Accountability Office, state licensing boards, and others.

**Summary of Recent Auditing and Attestation Pronouncements and Related Guidance**

.66 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with the *Comprehensive Audit Risk Alert—2008* (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You also may look for announcements of newly issued standards in the CPA Letter, *Journal of Accountancy*, and in the quarterly electronic newsletter *In Our Opinion*, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.67 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review Audit Risk Alert *SEC and PCAOB Developments—2008* (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

### Recent Auditing and Attestation Pronouncements and Related Guidance

**PCAOB Rule 3526, Communication with Audit Committees Concerning Independence**  
(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)  
**Issue Date:** August 2008  
(Applicable to audits conducted in accordance with PCAOB standards)

Rule 3526 requires the registered public accounting firm to:

- describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence.
- discuss with the audit committee of the issuer, the potential effects of any relationships that could affect independence, should they be appointed as the issuer’s auditor.
- document the substance of these discussions. These discussions should occur at least annually.

The board also adjusted the implementation schedule for PCAOB Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles* (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), as it applies to tax services. The board agreed not to apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins. The amendments to Rule 3523 became effective August 28, 2008. The remaining provisions of Rule 3526 became effective on September 30, 2008.

**PCAOB Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting**  
(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”)  
**Issue Date:** July 2007  
(Applicable to audits conducted in accordance with PCAOB standards)

This rule requires a registered public accounting firm that seeks preapproval of an issuer audit client’s audit committee to perform internal control-related nonaudit services that are not otherwise prohibited by the act or the rules of the Securities and Exchange Commission or the PCAOB to describe, in writing, to the audit committee the scope of the proposed service, discuss with the audit committee the potential effects of the proposed service on the firm’s independence, and document the substance of the firm’s discussion with the audit committee. These requirements parallel the auditor’s responsibility in seeking audit committee preapproval to perform tax services for an audit client under PCAOB Rule 3524, *Audit Committee Pre-approval of Certain Tax Services* (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”). This rule is effective for audits of fiscal years ending on or after November 15, 2007.

**PCAOB Conforming Amendments to the Interim Auditing Standards**  
(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”)  
**Issue Date:** November 15, 2008  
(Applicable to audits conducted in accordance with PCAOB standards)

In conjunction with the PCAOB’s adoption of Auditing Standard No. 6, the PCAOB also adopted a number of conforming amendments to its interim standards. The conforming amendments can be found in appendix 2 of PCAOB Release No. 2008-001 at www.pcaob.org/Rules/Docket_023/PCAOB_Release_No._2008-001_-_Evaluating_Consistency.pdf.

Accounting Issues and Developments

Other-Than-Temporary Impairments

.68 Much attention has been given to the topic of other-than-temporary impairments, particularly due to the continuing declines in the markets. The resulting extended declines in the fair values of many investment securities have brought attention about whether these declines should be considered an other-than-temporary impairment. Significant judgment is involved in determining whether a decline in fair value is temporary or reflects conditions that are more persistent. An investor should assess whether an impaired investment is other-than-temporarily impaired at every reporting period and recognize an impairment loss when the impairment is deemed other-than-temporary even if a decision to sell has not yet been made.

.69 As mentioned earlier in this alert, auditors should refer to FSP FAS 115-1/FAS 124-1, EITF Issue No. 99-20, and FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, depending on the type of investment security, for guidance in determining whether an impaired investment is other-than-temporarily impaired.

.70 Under SAP, determining whether impairment has occurred on an investment under the NAIC Accounting Practices and Procedures Manual is similar to GAAP. Management needs to consider all available evidence in determining whether an impairment exists and if that impairment is other than temporary. SSAP No. 99 adopts the guidance in paragraph 16 of FSP FAS 115-1/124-1 and provides guidance to account for the amortization or accretion of debt securities after an other-than-temporary impairment. Upon impairment of a security, an immediate amortization of premium shall be reported as a realized loss and shall not be included in investment income.

Reinsurance Arrangements

.71 During the past several years, the SEC, the New York attorney general’s office, several state insurance departments, and other governmental and regulatory bodies have been investigating the use of and accounting for finite reinsurance contracts. Several companies have restated previously issued financial statements with respect to accounting for certain reinsurance arrangements and some insurance company executives have been indicted or are the subject of enforcement actions. Reinsurance accounting and reporting—in particular, the question of what constitutes significant transfer of insurance risk and whether side agreements exist between ceding and assuming companies that may have accounting consequences—continue to be important issues requiring careful analysis.

.72 FASB Statement No. 113, Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts, and EITF Topic No. D-34, “Accounting for Reinsurance: Questions and Answers about FASB Statement No. 113,” continue to be the primary sources of guidance used to determine whether a contract transfers significant insurance risk and meets the conditions for reinsurance accounting. In 2005, FASB undertook a project on insurance risk transfer, the objective of which was to clarify what constitutes transfer of significant insurance risk in insurance and reinsurance contracts. In 2007, FASB discussed editorial changes to FASB Statement No. 113 in order to clarify the risk transfer conditions and enhance required disclosures. Those changes were not issued and FASB removed the insurance risk transfer project from its agenda in June 2008 to better align FASB’s agenda with its Memorandum of Understanding with the International Accounting Standards Board (IASB). FASB plans to consider at a future date whether to address insurance accounting in a joint project with the IASB.

.73 EITF Issue No. 93-6, “Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises”; EITF Issue No. 93-14, “Accounting for Multiple-Year Retrospectively Rated Insurance Contracts by Insurance Enterprises and Other Enterprises”; and EITF Topic No. D-35, “FASB Staff Views on Issue No. 93-6, ‘Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises’,” represent guidance on required accruals when future rights and obligations under a multiple-year contract change based on loss experience to date.
SOP 98-7, Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk (AICPA, Technical Practice Aids, ACC sec. 10.760), should be used to determine the appropriate method of accounting for contracts that do not meet the requirements for reinsurance accounting under FASB Statement No. 113. SOP 98-7 outlines the appropriate accounting for contracts based on whether the contract transfers the following:

- Only significant timing risk
- Only significant underwriting risk
- Neither significant timing nor underwriting risk
- An indeterminate risk

Other accounting standards continue to have implications for transactions involving reinsurance arrangements. For example, FASB Interpretation No. (FIN) 46 (revised 2003), Consolidation of Variable Interest Entities—an interpretation of ARB No. 51, may necessitate counterparties to reinsurance arrangements placed in certain kinds of structures or entities (for example, catastrophe bond structures) to consider consolidation of these structures or entities. In addition, certain reinsurance contracts may contain embedded derivatives that require accounting in accordance with FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities. FASB Derivatives Implementation Group Statement 133 Implementation Issue No. B36, Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments, addresses embedded derivatives in modified coinsurance and coinsurance with funds-withheld arrangements and other contracts with similar provisions where, for example, a return under the contract is calculated based on a referenced pool of assets. This implementation issue, which was last updated in June 2006, can be accessed on the FASB Web site at www.fasb.org/derivatives/issuindex.shtml.

As products become more advanced and complex, careful consideration is required to determine whether the contracts are being accounted for appropriately based on a complete understanding of the facts and circumstances. Alternative risk transfer products and finite risk covers usually present complex issues with respect to evaluating the contracts for risk transfer under FASB Statement No. 113 and determining proper accruals under FASB Statement No. 60, Accounting and Reporting by Insurance Enterprises; FASB Statement No. 113; and EITF Issue No. 93-6 (for example, whether premium recognition should be accelerated as reinsurance coverage is exhausted). Auditors should assess whether companies have adequate internal controls to identify and analyze complex reinsurance agreements in order to determine the proper accounting.

Convergence With International Financial Reporting Standards

Since the signing of the Norwalk Agreement by FASB and the IASB, the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. In September 2008, FASB and the IASB published an update of their 2006 Memorandum of Understanding to update the progress they have made since 2006 and to set the goal of completing their major joint projects by 2011. For more information on the status of this project go to www.fasb.org and www.iasb.org.
SEC Eases Acceptance of IFRS Financial Statements

.79 On December 21, 2007, the SEC took a major step toward easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

.80 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the U.S. has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

.81 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS “Roadmap”

.82 On August 27, 2008, the SEC voted to publish for public comment a proposed roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

.83 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016. The 90 day comment period ends on February 19, 2009.

.84 The proposed roadmap sets forth seven milestones that will influence the SEC’s decision to adopt IFRS for all filers. These milestones relate to improvements in accounting standards, the accountability and funding of the International Accounting Standards Committee Foundation, the improvement in the ability to use interactive data for IFRS reporting, education and training relating to IFRS, limited early use of IFRS where this would enhance comparability for U.S. investors, the anticipated timing of future rulemaking by the SEC, and the implementation of the mandatory use of IFRS by U.S. issuers.

.85 Additionally, the roadmap discusses two alternatives for U.S. issuers that elect to use IFRS to disclose U.S. GAAP information. Proposal A suggests a U.S. issuer that elects to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS called for under IFRS 1, First-Time Adoption of International Financial Reporting Standards, in a footnote to its audited financial statements. This information would include the restatement of and reconciliation from the prior year’s financial statements and the related disclosures.

.86 Proposal B suggests that U.S. issuers that elect to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS required under IFRS 1, and also would disclose on an annual basis certain unaudited supplemental U.S. GAAP financial information covering a three year period.
This unaudited supplemental financial information would be in the form of a reconciliation from IFRS to U.S. GAAP.

.87 The roadmap does not address how the SEC would mandate IFRS; however, it noted an option would be, “for the FASB to continue to be the designated standard setter for purposes of establishing the financial reporting standards in issuer filings with the Commission. In this option our presumption would be that the FASB would incorporate all provisions under IFRS, and all future changes to IFRS, directly into generally accepted accounting principles as used in the United States. This type of approach has been adopted by a significant number of other jurisdictions when they adopted IFRS as the basis of financial reporting in their capital markets.”

AICPA Launches IFRS.com Web Site

.89 The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define the next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

.90 To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

.91 Developed by the AICPA, in partnership with its marketing and technology subsidiary, cpa2biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

.92 The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, continuing professional education (CPE) courses and live conference training, helpful links, and assistance for audit committee members.

FASB Accounting Standards Codification™

.93 On January 15, 2008, FASB launched the one-year verification period of FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.94 The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the one-year verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve FASB ASC in April 2009. FASB ASC can be accessed at http://asc.fasb.org/home.
The insurance portion of FASB ASC was released in September 2008. Constituents are encouraged to use FASB's online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating the FASB ASC Research System and performing accounting research.

NAIC Reinsurance Disclosure and Filing Requirements

Some reinsurance disclosures that consist of interrogatories directed at disclosing certain finite reinsurance situations were added to SSAP No. 62, Property and Casualty Reinsurance, in 2006, with minor modification in 2007. These reinsurance interrogatory disclosures are required to be included as accompanying supplemental schedules to the annual audited financial statements of P&C insurance companies. These disclosures, which also are included as interrogatories in the annual statement, require detailed information about specific ceded reinsurance contracts. Reinsurance issues took center stage at the NAIC as regulators reacted to the former New York state attorney general's investigations of finite reinsurance, as well as allegations that undisclosed side agreements between ceding and assuming companies contributed to some P&C insolvencies.

The required disclosures include the following:

- Whether any quota share reinsurance contracts include provisions that would limit the reinsurer’s losses below the stated quota share percentage (for example, a deductible, loss ratio corridor, loss cap, aggregate limits, or similar provisions). If such contracts exist, management is required to disclose the number of such contracts and whether the amount of credit taken under such contracts reflects the reduction in quota share coverage caused by any applicable provisions.
- Whether any significant reinsurance contracts contain any of six specific contractual features often associated with finite reinsurance arrangements.
- Whether there are any significant reinsurance contracts with related parties, other than approved pooling arrangements.
- Whether any contracts are accounted for as reinsurance under SAP and as deposits under GAAP, or vice versa, and, if so, why.

For contracts meeting the second and third bulleted criteria, management is further required to disclose a summary of the reinsurance contract terms; a brief discussion of management’s principal objectives in entering into the agreement, including the economic purpose to be achieved; and the aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income.

Summary of Recent Accounting Pronouncements and Related Guidance

Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB.

---

5 Significant is defined as those contracts having an underwriting gain or loss or either ceded written premiums or ceded loss and loss expense reserves greater than 5 percent of the prior year-end surplus as regards policyholders.

6 The six specific contractual features are (1) a contact term greater than two years when the contract is noncancelable by the reporting entity, (2) cancellation provisions that trigger an obligation on the reporting entity to enter into a new reinsurance agreement with the reinsurer, (3) aggregate stop loss reinsurance coverage, (4) a unilateral right by either or both parties to commute the treaty, (5) a provision permitting reporting or payment of losses less frequently than on a quarterly basis, and (6) any features designed to delay timely reimbursement to the ceding entity.

| AICPA Statement of Position (SOP) 07-1 (AICPA, Technical Practice Aids, ACC sec. 10,930) | Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies. 
In February 2008, FASB issued FSP SOP 07-1-1, Effective Date of AICPA Statement of Position 07-1, which indefinitely defers the effective date of SOP 07-1. Entities that early adopted SOP 07-1 before December 15, 2007 are permitted, but not required, to continue to apply the provisions of the SOP. No other entities may adopt the provision of the SOP, subject to the exception in the following sentence: “If a parent entity that early adopted the SOP chooses not to rescind its early adoption, an entity consolidated by that parent entity that is formed or acquired after that parent entity’s adoption of the SOP must apply the provisions of the SOP in its standalone financial statements.” |
| Technical Questions and Answers (TIS) section 1100.15 (AICPA, Technical Practice Aids) | This question and answer discusses auditing and accounting issues related to withdrawal restrictions placed on short term investments by a money market fund or its trustee. |
| TIS sections 6910.25–.28 (AICPA, Technical Practice Aids) | These questions and answers discuss financial statement presentation considerations for investment companies. |
| TIS sections 6140.20–.22 (AICPA, Technical Practice Aids) | These questions and answers discuss not-for-profit organizations’ fund-raising expenses. |
| TIS sections 6931.08–.10 (AICPA, Technical Practice Aids) | These questions and answers discuss various employee benefit plan topics. |

.101 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the insurance industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The Comprehensive Audit Risk Alert—2008 and other AICPA industry-specific alerts contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

### FASB Statement No. 163

.102 In May 2008, FASB issued FASB Statement No. 163, Accounting for Financial Guarantee Insurance Contracts—an interpretation of FASB Statement No. 60. The scope of FASB Statement No. 163 is limited to financial guarantee insurance and reinsurance contracts issued by enterprises included in FASB Statement No. 60. Financial guarantee insurance and reinsurance contracts obligate the insurance enterprise to pay a claim upon the occurrence of an event of default.

.103 This statement does not apply to enterprises excluded from FASB Statement No 60, financial guarantee insurance contracts that are accounted for as derivative instruments within the scope of FASB.
Statement No. 133, and some insurance contracts that are similar to financial guarantee insurance contracts issued by insurance enterprises (such as mortgage guaranty insurance and credit insurance on trade receivables). The changes to current practice are around premium revenue, claim liabilities, and disclosure requirements. The provisions of FASB Statement No. 163 should be applied on a contract-by-contract basis.

.104 At the inception of a financial guarantee insurance contract, a liability for the unearned premium revenue should be recognized, along with a premium receivable for the same amount. This initial measurement of the unearned premium revenue is the present value of the premiums due or, subject to certain criteria, expected to be collected over the contract period. The discount on the receivable should be accreted through earnings.

.105 The premium should be recognized as revenue over the contract period in proportion to the amount of insurance protection provided. As revenue is recognized, a corresponding decrease should occur in the unearned premium liability. For example, if there was a financial guarantee on a 10-year bond with periodic principal paydowns, the insurance enterprise would recognize more revenue in the earlier years as it is providing more protection (that is, insuring higher amounts of outstanding principal, which could possibly default).

.106 An insurance enterprise shall recognize a claim liability on a financial guarantee insurance contract when the insurance enterprise expects that a claim loss will exceed the unearned premium revenue for that contract based on the present value of expected net cash outflows to be paid under the insurance contract. Expected net cash outflows are probability weighted cash flows that reflect the likelihood of all possible outcomes of the insurance enterprise. This claim liability equals the present value of the contract’s expected net cash outflows discounted using a current risk free rate, which shall be based on the remaining period of the insurance contract. In periods after initial recognition of a claim liability, an insurance enterprise shall update the discount rate each reporting period. An insurance enterprise also shall revise expected net cash outflows when increases (or decreases) in the likelihood of a default (insured event) (and related amounts of net cash outflows) and potential recoveries occur. These revisions should be recognized as claim expense in the period of change (as a change in accounting estimate).

.107 Paragraph 29 of FASB Statement No. 163 also notes that an insurance enterprise should disclose information that enables readers of the financial statements to understand the factors affecting the present and future recognition and measurement of financial guarantee insurance contracts.

.108 FASB Statement No. 163 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. However, select disclosure requirements are effective for the first period (including interim periods) beginning after the issuance of this statement. Besides those select disclosures, early adoption is prohibited.

.109 Readers are encouraged to review the full text of FASB Statement No. 163 before applying its guidance, which can be found on the FASB Web site.

Business Combinations

.110 In December 2007, FASB issued FASB Statement No. 141 (revised 2007), Business Combinations, and FASB Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51. These standards strive not only to improve and simplify the accounting for business combinations and the reporting of noncontrolling interests in consolidated financial statements, but also to converge with international standards. The issuance of these standards marks the completion of FASB’s first major joint project with the IASB.

.111 FASB Statement No. 141(R) requires the acquiring entity in a business combination to recognize all the assets acquired and liabilities assumed in the transaction, with specific additional guidance regarding insurance and reinsurance contracts acquired in a business combination; establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer...
to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination.

.112 The specific guidance applicable to insurance and reinsurance contracts acquired in a business combination, provided by amendment to FASB Statement No. 60, requires all assets and liabilities arising from insurance and reinsurance contracts acquired in a business combination to be recognized at their acquisition-date fair values, with those fair values separated into (a) insurance and reinsurance GAAP accounting balances using the acquirer’s accounting policies and (b) an intangible asset (or, rarely, another liability). This approach enables the acquiring entity to subsequently report the acquired business on a basis consistent with its own written business. The amendments to FASB Statement No. 60 also clarify that the acquisition date assets and liabilities do not include certain of the acquiree’s accounts, such as deferred acquisition costs and unearned premiums that do not represent future cash flows. However, if under the acquirer’s accounting policies there would be an unearned premium reserve, these amendments would not preclude the acquirer from estimating that reserve in place of the acquiree’s unearned premium reserve.

.113 Additionally, FASB Statement No. 141(R) amends FASB Statement No. 109, Accounting for Income Taxes, to require that changes in a valuation allowance for an acquiree’s deferred tax asset, other than changes during the measurement period that result from new information about facts and circumstances that existed at the acquisition date, should be reported as a reduction or increase to income tax expense (or a direct adjustment to contributed capital in some circumstances). Although FASB Statement No. 141(R) is generally applicable on a prospective basis to business combinations for which the acquisition date is on or after December 15, 2008, this requirement will affect the accounting and reporting for changes in the valuation allowance for an acquiree’s deferred tax asset even for business combinations for which the acquisition date is prior to that date. As a result, auditors should be aware that companies may be working toward refining the valuation allowance for an acquiree’s deferred tax asset in the annual reporting period ending before implementation is required, during which time the companies would appropriately treat any such adjustment as an adjustment to goodwill, rather than as an income tax expense or benefit.

.114 FASB states that FASB Statement No. 141(R) also will decrease the complexity of existing GAAP because the new standard includes both core principles and application guidance, eliminating the need for other interpretive guidance. FASB Statement No. 141(R) is to be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply the standard before this date.

.115 FASB Statement No. 160 improves the relevance, comparability, and transparency of financial information by requiring all entities to report noncontrolling (minority) interests in subsidiaries in the same way—as equity in the consolidated financial statements. FASB Statement No. 160 also eliminates the diversity in accounting for transactions between an entity and noncontrolling interests by requiring they be treated as equity transactions. FASB Statement No. 160 is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2008 (for calendar year-end companies January 1, 2009). Earlier adoption is prohibited. The standard is applied prospectively as of the beginning of the fiscal year in which the statement is initially applied, except for the presentation and disclosure requirements. Presentation and disclosure requirements should be applied retroactively for all periods presented.

Recent AICPA Independence and Ethics Pronouncements

.116 Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.
On the Horizon

Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the insurance industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

The following table lists the various standard setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.

Overhaul Project—AICPA Audit and Accounting Guide Property and Liability Insurance Companies

The AICPA is continuing to make progress overhauling the AICPA Audit and Accounting Guide Property and Liability Insurance Companies, addressing numerous accounting, auditing, industry, and regulatory issues that have transpired since this guide was originally issued in 1990. During this project, the AICPA will continue to issue annual editions of the guide, updated to reflect recent audit and accounting pronouncements.

Auditing Pipeline—Nonissuers

ASB Clarity Project

In response to growing concerns about the complexity of standards, the Auditing Standards Board (ASB) has commenced a large-scale “clarity” project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the Codification of Statements on Auditing Standards (AU sections of the AICPA’s Professional Standards), to apply the clarity drafting conventions and to converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board. The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards.
standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the Clarity Project Explanatory Memorandum and the discussion paper Improving the Clarity of ASB Standards at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

Auditing Pipeline—Issuers

.121 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert SEC and PCAOB Developments—2008.

Accounting Pipeline

.122 A number of accounting projects and pronouncements are currently in progress. For a summary of significant accounting projects and pronouncements, refer to the Comprehensive Audit Risk Alert—2008 (product no. 022339kk). Such in-progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
- Income tax convergence project
- Leases project
- Reporting discontinued operations project
- Going concern proposed statement
- Subsequent events proposed statement
- Amendments to FIN 46(R) proposed statement

IASB Insurance Contracts Phase II

.123 The IASB is currently working on phase II of the insurance contracts project, which will provide a basis for consistent accounting for insurance contracts on the longer term. In February 2008, the IASB started its review of responses to the discussion paper preliminary views on insurance contracts. At their April 2008 meeting, the insurance working group provided input for a number of issues that followed from the responses to the discussion paper. During their September 2008 meeting, the working group discussed the notion advocated by respondents regarding a measurement that reflects the fact that the insurer intends (and in most cases must) settle the liability by paying the contractual benefits as they become due, rather than by transferring the liability to a third party; however, no decisions were reached. The next meeting of the insurance working group will take place in November 2008. FASB does not have this as a current project item, but lists it as an IASB project that is monitored by the FASB staff.

Proposed FASB Emerging Issues Task Force Issues and Staff Positions

.124 Proposed FASB EITF Issues. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.
Proposed FASB Staff Positions (FSPs). A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

Resource Central

The following are various resources that practitioners engaged in the insurance industry may find beneficial.

Publications

Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

- Audit and Accounting Guide Life and Health Insurance Entities (2008) (product no. 012638kk [paperback], WLH-XXkk [online], or DLH-XXkk [CD-ROM])
- Audit and Accounting Guide Property and Liability Insurance Companies (2008) (product no. 012678kk [paperback], WPL-XXkk [online], or DPL-XXkk [CD-ROM])
- Audit Guide Analytical Procedures (2008) (product no. 012558kk [paperback], WAN-XXkk [online], or DAN-XXkk [CD-ROM])
- Audit Guide Assessing and Responding to Audit Risk In a Financial Statement Audit (2006) (product no. 012456kk [paperback] or WRA-XXkk [online])
- Audit Guide Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (2008) (product no. 012528kk [paperback], WDI-XXkk [online], or DDI-XXkk [CD-ROM])
- Audit Guide Auditing Revenue in Certain Industries (2008) (product no. 012518kk [paperback], WAR-XXkk [online], or DAR-XXkk [CD-ROM])
- Audit Guide Audit Sampling (2008) (product no. 012538kk [paperback], WAS-XXkk [online], or DAS-XXkk [CD-ROM])
- Audit Guide Service Organizations: Applying SAS No. 70, as Amended (2008) (product no. 012778kk [paperback], WSV-XXkk [online], or DSV-XXkk [CD-ROM])
- Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XXkk [online], or DGE-XXkk [CD-ROM])
- Audit Risk Alert Independence and Ethics Developments—2008 (product no. 022479kk [paperback], WIA-XXkk [online], or DIA-XXkk [CD-ROM])

- Checklists and Illustrative Financial Statements for Property & Liability Insurance Companies (product no. 008968kk [paperback] or WPI-CLkk [online])
- Audit and Accounting Manual (2008) (product no. 005138kk [paperback], WAM-XXkk [online], or AAM-XXkk [loose leaf])
- Accounting Trends & Techniques, 62nd Edition (product no. 009900kk [paperback] or WAT-XXkk [online])

Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.
• Financial Reporting Alert Current Accounting Issues and Risks—2008 (product no. 029208kk [paperback])
• Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk [paperback])

AICPA reSOURCE: Accounting and Auditing Literature

.129 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, you can sign up for access to the entire library. Get access—anytime, anywhere—to the AICPA’s latest Professional Standards, Technical Practice Aids, Audit and Accounting Guides (more than 20), Audit Risk Alerts (more than 15), and Accounting Trends & Techniques. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

Continuing Professional Education

.130 The AICPA offers a number of CPE courses that are valuable to CPAs working in public practice and industry, including the following:

• AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition) (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

• SEC Reporting (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements in addition to giving you examples and tips for ensuring compliance.

• International Versus U.S. Accounting: What in the World is the Difference? (product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

• The International Financial Reporting Standards: An Overview (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

.131 Visit www.cpa2biz.com for a complete list of CPE courses.

Online CPE

.132 AICPA CPEExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics.

.133 To register or learn more, visit www.cpa2biz.com.

Webcasts

.134 Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.
CFO Quarterly Roundtable Series

.135 The CFO Quarterly Roundtable Series, brought to you each calendar quarter via webcast, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting, budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

.136 The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

.137 To order AICPA products, receive information about AICPA activities, and get help with your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

.138 Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.

Ethics Hotline

.139 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

The Center for Audit Quality

.140 The Center for Audit Quality (CAQ), which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.141 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.
AICPA Industry Expert Panel—Insurance

.142 For information about the activities of the AICPA Insurance Industry Expert Panel, visit the panel’s Web page at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_insurance.htm.

Industry Web Sites

.143 The Internet covers a vast amount of information that may be valuable to auditors of insurance entities, including current industry trends and developments. Some of the more relevant sites for auditors with insurance clients include those shown in the following table:

Depository and Lending Institution Industry Developments—2008

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of banks, credit unions, and other financial institutions with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

How This Alert Helps You

This Audit Risk Alert (alert) helps you plan and perform your audits of financial institutions and other lenders. This alert can also be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool in helping you identify the significant risks that may result in the material misstatement of financial statements. Moreover, this alert delivers information about emerging practice issues and current accounting, auditing, and regulatory developments.
This alert is intended to be used in conjunction with Comprehensive Audit Risk Alert—2008 (product no. 022339kk). This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

An auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. An auditor’s understanding of the entity and its environment consists of an understanding of the following aspects:

- Industry, regulatory, and other external factors
- Nature of the entity
- Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- Measurement and review of the entity’s financial performance
- Internal control, which includes the selection and application of accounting policies

The financial institutions industry may be subject to specific risks of material misstatement arising from the nature of the business, the degree of regulation, or other external forces (for example, political, economic, social, technical, and competitive forces).

The auditor should obtain an understanding of the entity’s objectives and strategies and the related business risks that may result in material misstatement of the financial statements. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity’s ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity’s business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks. Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement.

After obtaining a sufficient understanding of the entity and its environment, including its internal control, an auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures based on that understanding.

Understanding and properly addressing, as necessary, the matters presented in this alert will help you gain a better understanding of your client’s environment, better assess risks of material misstatement of the financial statements, and strengthen the integrity of your audits.

Economic and Industry Developments

The State of the Economy

When planning and performing audit engagements, an auditor should understand the economic conditions facing the industry in which the client operates. Economic activities relating to factors such as interest rates, availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor market conditions are likely to have an effect on the entity’s financial statements being audited.
Unprecedented Events in the Financial Markets

During 2008, unprecedented events occurred in the financial markets, including the failure of a major investment bank, acquisitions of several investment and commercial banks (including some that required assistance from federal agencies), and the placement into conservatorship of Fannie Mae and Freddie Mac. Further, several foreign financial institutions received assistance from their national governments, or entered into similar acquisition agreements. Additionally, on September 17, 2008, a significant, publicly registered money market fund declined below the industry standard of $1.00 per share on a market value basis due to a combination of holdings of short-term securities issued by the failed investment bank and major shareholder redemptions. As a result of these events, the condition of the fixed income markets worsened. Corporations and financial institutions generally recognized as creditworthy began experiencing difficulty borrowing money in the financial markets for any longer than an overnight basis. Of primary concern to depository institutions was the decline in liquidity faced by the industry.

The following sections detail some of the recent events that have affected the financial markets.

Lehman Brothers

Many believed that the U.S. government would bail out Lehman, as it had Freddie Mac and Fannie Mae. However, the government took a tougher stance with Lehman, as it refused to provide a financial backstop to investors. As Lehman’s future looked bleak, it became clear that the best option was for Wall Street firms to create a solution in which financing would be provided to carve out some of Lehman’s real estate exposure. Lehman’s decline was due, in part, to over exposure in real-estate investments.

Merrill Lynch

As Bank of America backed off a purchase offer of Lehman, the bank began to consider Merrill Lynch as a potential acquisition. The Bank of America deal calls for a purchase price of $29 per share, for $44 billion total.

American International Group

On September 16, 2008, the U.S. Federal Reserve Bank (FRB), with the full support of the U.S. Department of the Treasury, authorized the FRB of New York to lend up to $85 billion to the American International Group (AIG) under Section 13(3) of the Federal Reserve Act. Terms and conditions of the secured loan are designed to protect the interest of the U.S. government and taxpayers. The FRB determined a chaotic failure of AIG could add to already significant levels of financial market fragility. The purpose of this liquidity facility is to assist AIG in meeting its obligations as they come due. This loan will facilitate a process under which AIG will sell some of its businesses in an orderly manner, with the least possible disruption to the overall economy. The loan is expected to be repaid from the proceeds of the sale of the firm’s assets. The U.S. government will receive a 79.9 percent equity interest in AIG and has the right to veto the payment of dividends to common and preferred shareholders.

Development of New Alert to Address Current Market Conditions

This alert discusses the current economic environment (including basic measures of economic activity) and the economy’s effect on the financial institutions industry. In light of the economic situation, the AICPA is developing a dedicated alert to address common accounting and auditing concerns relative to current market conditions. Specifically, the alert will discuss resources to assist in fair value accounting and its associated audit risks. Until that alert is published, we encourage you to remain current on economic happenings. Please visit www.cpa2biz.com for upcoming AICPA products, including the alert mentioned here, to help navigate this trying time.
Basic Measures of Economic Activity—Gross Domestic Product, Unemployment, and Interest Rates

The U.S. real gross domestic product (GDP), the broadest measure of economic activity, measures output of goods and services by labor and property within the United States and increases as the economy grows. According to the Bureau of Economic Analysis, real GDP increased at an annual rate of 2.2 percent in 2007. According to 2008 third quarter advance estimates, real GDP decreased at an annual rate of 0.3 percent, which is down significantly from the 2.8 percent increase in real GDP during the second quarter of 2008.

The unemployment rate remained relatively unchanged during 2007, holding between 4.4 percent and 5.0 percent, with an annual average rate of 4.6 percent. However, during 2008, the unemployment rate has risen. As of October 2008, the unemployment rate was 6.5 percent, representing approximately 10.1 million people.

The target for the federal funds rate remained stable at 5.25 percent from June 2006 to September 2007, when the Federal Reserve began decreasing rates. Since the first rate decrease in September 2007, the Federal Reserve has decreased rates a total of 4.25 percentage points to 1.00 percent as of the end of October 2008. The Federal Reserve noted in its October press release that the pace of economic activity appears to have slowed markedly, owing importantly to a decline in consumer expenditures. Business equipment spending and industrial production have weakened in recent months, and slowing economic activity in many foreign economies is damping the prospects for U.S. exports. Moreover, the intensification of financial market turmoil is likely to exert additional restraint on spending, partly by further reducing the ability of households and businesses to obtain credit. Inflation has been high, but the Federal Open Market Committee, which sets the nation’s monetary policy, believes that the decline in energy and other commodity prices and the weaker prospects for economic activity have reduced the upside risks to inflation.

The EESA is intended to restore financial sector liquidity and stability, protect the value of taxpayer assets (such as homes, savings and retirement funds) and provide a return to taxpayers. The EESA authorizes the Treasury secretary to establish the Troubled Assets Relief Program (TARP), whereby the U.S. Treasury can purchase troubled assets from financial institutions, and authorizes $700 billion as requested by the Treasury secretary for the implementation of TARP. Upon authorization of TARP, up to $350 billion became available for immediate use. The secretary is required to examine the long-term viability of an institution in determining whether to directly purchase assets under TARP. Financial institutions participating in TARP will be subject to certain restrictions on executive compensation.

At the time this alert was written, the Treasury had not acquired any assets under TARP, but the Treasury had released the terms of its Capital Purchase Program (CPP) and had finalized certain transactions under the CPP.

Under the CPP, the Treasury proposed to invest up to $250 billion in senior perpetual preferred stock and warrants in qualifying financial institutions. In November 2008, the Treasury completed its $125 billion aggregate investment in the nine banking organizations deemed to be systemically important. Funds received from the CPP will be includible in an institution’s Tier 1 capital without limitation. Other institutions were required to apply by November 14, 2008 to their appropriate federal banking agency for participation in the program. The deadline for nonpublic stock institutions and mutual banks has been extended as the Treasury develops term sheets applicable to these institutions.
Among other things, the EESA

- requires the Securities and Exchange Commission (SEC), in consultation with the Federal Reserve and Treasury, to conduct a study on mark-to-market accounting standards as provided in Financial Accounting Standards Board (FASB) Statement No. 157, *Fair Value Measurements*, and to report to Congress within 90 days on its findings.

- raises the Federal Deposit Insurance Corporation (FDIC) and the National Credit Union Share Insurance Fund (NCUSIF) deposit insurance limits from $100,000 per account to $250,000 until December 31, 2009, and temporarily raises the borrowing limits at the Treasury for the FDIC and the NCUSIF.

- details certain changes in the tax treatment (from capital to ordinary) of losses on the preferred stock of Freddie Mac and Fannie Mae for financial institutions.

- applies limits on executive compensation and golden parachutes for certain executives of employers who participate in the auction program.

- extends current law tax forgiveness on the cancellation of mortgage debt.

For additional information on the EESA and its related programs, see http://treasury.gov/initiatives/eesa/. On that Web site, you may also sign up for EESA e-mail alerts to receive notification about current developments.

**Industry Trends and Conditions**

The current economic conditions and resulting government intervention is directly and significantly affecting the financial institutions industry. This section of the alert includes information on the state of the financial institution, banking, credit union, financial services, and mortgage industries and then turns to a discussion of the unprecedented events occurring in the industry through the date of this writing.

**The State of the Financial Institutions Industry**

According to the FDIC Quarterly Banking Profile issued for the second quarter of 2008, insured commercial banks and savings institutions reported net income of $5.0 billion for the second quarter of 2008, the second-lowest quarterly total since 1991 and $31.8 billion (86.5 percent) less than the industry earned in the same period of the prior year. The decrease in earnings was primarily driven by higher loan-loss provisions, which totaled $50.2 billion for the period. This is more than four times the $11.4 billion quarterly total from one year ago.

The average return on assets (ROA) in the second quarter of 2008 was 0.15 percent, compared to 1.21 percent from one year earlier. For institutions with assets greater than $1 billion, the average ROA in the second quarter was 0.10 percent, down from 1.23 percent a year ago. More than half of all insured institutions reported year-over-year declines in quarterly net income, and almost two out of every three institutions, or 62 percent, reported lower ROAs. Almost 18 percent of all insured institutions were unprofitable in the second quarter, compared to only 9.8 percent in the second quarter of 2007.

Loan losses increased significantly during the second quarter of 2008, as loss rates on real estate loans increased sharply. Net charge-offs of loans and leases totaled $26.4 billion in the second quarter of 2008, which is three times the $8.9 billion charged off in the second quarter of 2007. The annualized net charge-off rate in the second quarter was 1.32 percent, compared to 0.49 percent a year earlier and represents the highest quarterly charge-off rate for the industry since the fourth quarter of 1991.

The number of institutions filing quarterly financial reports fell to 8,451 at the end of the second quarter of 2008, down from 8,494 at the end of the first quarter of 2008. Twenty-four new charters were added during the second quarter of 2008, while 64 existing charters were merged into other institutions. Two insured institutions failed during the quarter, bringing the total for the first six months of 2008 to four failures. Three mutually owned savings banks, with combined assets of $1.1 billion, converted to stock...
ownership in the second quarter. The number of institutions on the FDIC’s “Problem List” increased from 90 to 117 during the quarter. Assets of “problem” institutions increased from $26.3 billion to $78.3 billion.

The State of the Banking Industry

Other-Than-Temporary Impairments

In a September 2008 press release, several banks expressed concern over the accounting application of other than temporary impairments based on preferred securities, collateralized mortgage obligations, and other mortgage backed securities by auditors. The main issue is the accounting treatment of mortgage and other debt investments whose values decline so much that financial institutions might not be able to recoup what they paid for them. Although the accounting treatment is subjective, many auditors are pressuring banks to record the investments as impaired. Banks disagree with the accounting treatment being applied by some auditors, stating that they are still able to collect principal and interest on the investments. In some cases, banks have expressed the belief that the battered securities will rebound in the future.

FASB Staff Position (FSP) FAS 115-1 and FAS 124-1, The Meaning of Other-Than-Temporary and Its Application to Certain Investments, addresses the determination concerning when an investment is considered impaired, whether the impairment is other than temporary, and the measurement of the impairment loss. Also included in the FSP are accounting considerations subsequent to the recognition of other than temporary impairment and related disclosures about unrealized losses as a result of the other than temporary impairment. The FSP amends FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, FASB Statement No. 124, Accounting for Certain Investments Held by Not for Profit Organizations, and Accounting Principles Bulletin (APB) Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. The FSP also nullifies certain requirements of Emerging Issues Task Force (EITF) Issue No. 03-1, “The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments,” and supersedes EITF Topic No. D-44, “Recognition of Other-Than-Temporary Impairment upon the Planned Sale of a Security Whose Cost Exceeds Fair Value.” The FSP provides the following guidance:

• Determine whether an investment is impaired.
• Evaluate whether an impairment is other than temporary.
• If the impairment is other than temporary, recognize an impairment loss equal to the difference between the investment’s cost and its fair value.

It is important for auditors and financial institutions to understand when an investment is impaired and may require specific treatment under the FSP. For more information on the FSP, please visit the FASB Web site.

EITF Issue No. 99-20

Recognition and potential impairment issues continue to arise based on the continued complexity of financial institution investments. EITF Issue No. 99-20, “Recognition of Interest Income and Impairment on Purchased Beneficial Interest and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets,” addresses how a transferor that continues to hold an interest in securitized financial assets, or an enterprise that purchases a beneficial interest in securitized financial assets, should account for interest income and impairment. FASB reached the following consensuses in development of this EITF issue:

• The holder should recognize the excess of all cash flows attributable to the beneficial interest estimated at the acquisition or transaction date over the initial investment as interest income over the life of the beneficial interest using the effective yield method.
• The holder of a beneficial interest should continue to update the estimate of cash flows over the life of the beneficial interest.
• All cash flows estimated at the transaction date are defined as the holder’s estimate of the amount and timing of estimated future principal and interest cash flows used in determining the purchase price or the holder’s fair value determination for purposes of determining a gain or loss under FASB Statement No. 125, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.

• An entity should retain the available for sale classification of the interest that continues to be held by a transferor and should not recognize as interest income over the life of that interest that continues to be held by a transferor unless a portion of the unrealized gain or loss recorded in other comprehensive income must be included in income as a component of the recognition of an other-than-temporary impairment.

• When an entity intends to sell a specifically identified beneficial interest classified as available for sale at a loss shortly after the balance sheet date whose fair value is less than its carrying amount and the entity does not expect the fair value to recover prior to the expected time of the sale, a write-down for other-than-temporary impairment should be recognized in earnings in the period in which the decision to sell is made.

• When it is not practicable for a transferor to estimate the fair value of the beneficial interest at the initial transfer date, interest income should not be recognized using the interest method. In those instances, the cash basis for recognizing interest income should be used.

.33 The EITF issue does not address when a holder of a beneficial interest would place the interest on nonaccrual status or when a holder cannot reliably estimate cash flows. For more information on this EITF issue, please visit the FASB Web site.

Measurements of Fair Value in Illiquid Markets

.34 Most of the subprime mortgages making headlines were ultimately financed via securitization issuances. As a result of the growing numbers of defaults and foreclosures and uncertainty about the future, investors in these securities and lenders who issued these securities have almost come to a standstill, causing a liquidity crisis. This has caused significant declines in the values of existing loans and mortgage backed securities held by both lenders and investors given the lack of demand. This has also spread to a lack of demand for investments in collateralized debt obligations, as many hold securities backed by subprime mortgages, and even the short-term commercial paper market.

.35 Given the state of the market, there is confusion around the use of market quotes and whether current market prices represent fair value in accordance with FASB Statement No. 157 or are, in actuality, distressed sales. To clarify the application of FASB Statement No. 157 in an inactive market, FASB issued FSP FAS 157-3. This FSP also amends FASB Statement No. 157 to include an illustrative example. FSP FAS 157-3 noted the consistency between the guidance provided in it and the guidance provided in the SEC and FASB press release. Readers are encouraged to review the full text of the FSP and the amended standard (inclusive of its recently added illustrative example) on the FASB Web site at www.fasb.org. The FSP was effective upon issuance, including any prior periods for which financial statements have not been issued. Any revisions from changes in valuation techniques or their application shall be accounted for as a change in accounting estimate in accordance with FASB Statement No. 154, Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3; however, the disclosure provisions of FASB Statement No. 154 for such revisions are not required.

.36 FSP FAS 157-3 noted that broker (or pricing service) quotes may be an appropriate input when measuring fair value, but they are not necessarily determinative if an active market does not exist for the financial asset. ... In weighing a broker quote as an input to a fair value measurement, an entity should place less reliance on quotes that do not reflect the result of market transactions. Further, the nature of the quote (for example, whether the quote is an indicative price or a binding offer) should be considered when weighing the available evidence.
As discussed in paragraph 7 of FASB Statement No. 157, an orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets or liabilities; it is not a forced transaction (for example, a forced liquidation or distress sale).

Low transaction volume involving such assets does not necessarily translate into forced sales, nor does it necessarily mean the market is inactive. To deem a transaction forced or disorderly, persuasive evidence and judgment are required.

If transaction volume is too low to provide accurate pricing information and therefore a level 1 input, those observable transactions are to be considered level 2 inputs or even level 3 inputs if they are significantly adjusted. The Center for Audit Quality’s (CAQ) October 2007 white paper on the topic noted some characteristics of an inactive market are “few transactions for the asset, the prices are not current, price quotations vary substantially, or in which little information is released publicly.” The SEC and FASB also described an inactive market. Their press release noted that “a significant increase in the spread between the amount sellers are ‘asking’ and the price that buyers are ‘bidding’, or the presence of a relatively small number of ‘bidding’ parties, are indicators that should be considered in determining whether a market is inactive.”

The lack of an active market and the information obtained from it require further analysis. According to FSP FAS 157-3, “in cases where the volume and level of trading activity in the asset have declined significantly, the available prices vary significantly over time or among market participants, or the prices are not current, the observable inputs might not be relevant and could require significant adjustment.” Further, the SEC and FASB press release noted, “in some cases using unobservable inputs (level 3) might be more appropriate than using observable inputs (level 2); for example, when significant adjustments are required to observable inputs, it may be appropriate to utilize an estimate based primarily on unobservable inputs.” When significant adjustments are made to an observable input (level 2), it becomes a level 3 fair value measurement.

Paragraph C85 of FASB Statement No. 157 states, “the reporting entity may use its own data to develop unobservable inputs, provided that there is no information reasonably available without undue cost and effort that indicates that market participants would use different assumptions in pricing the asset or liability.” A reporting entity is prohibited from ignoring observable transaction or assumptions that are reasonably available without undue cost and effort.

The FSP concluded, “the use of a reporting entity’s own assumptions about future cash flows and appropriately risk-adjusted discount rates is acceptable when relevant observable inputs are not available.” Similarly, the SEC and FASB press release noted the following:

In some cases, multiple inputs from different sources may collectively provide the best evidence of fair value. In these cases, expected cash flows would be considered alongside other relevant information. The weighting of the inputs in the fair value estimate will depend on the extent to which they provide information about the value of an asset or liability and are relevant in developing a reasonable estimate.

The AICPA, in October 2008 (as mentioned previously in this alert), issued a nonauthoritative Technical Practice Aid (TPA) about liquidity restrictions. Technical Questions and Answers (TIS) section 1100.15, “Liquidity Restrictions” (AICPA, Technical Practice Aids), provides useful information to accountants and auditors when an entity’s short-term investments (such as money market funds) have become restricted by the fund (or its trustee). The full TPA can be obtained from the AICPA’s Web site.

Beige Book Report

on current economic conditions gathered by each FRB by district and sector. The October 2008 report noted the following:

- Credit conditions were tight across all districts, with several reporting reduced credit availability for both financial and nonfinancial institutions.
- Bank lending was stable or lower for both consumers and businesses.
- Lenders had become more cautious and more conservative.
- Customers were taking steps to ensure that existing deposits were covered by insurance and noted deposit withdrawals after reports of bank closings during September 2008.
- Liquidity problems existed in interbank markets along with a higher cost of funds in several districts.
- Businesses having difficulties in obtaining credit were also reported in several districts.

As auditors perform their risk assessment, the Beige Book is a useful resource to understand the environment in which depository and lending institutions are operating and how current conditions may affect the assessment of the risks of material misstatement of the financial statements. For more information and the latest Beige Book report, visit www.federalreserve.gov/fomc/beigebook/2008/.

2008 Senior Loan Officer Opinion Survey

The Federal Reserve conducts a Senior Loan Officer Opinion Survey quarterly for availability in January and February, April and May, August, and October and November to coincide with the meetings of the Federal Open Market Committee. The Federal Reserve occasionally conducts one or two additional surveys annually. These reports can be obtained at www.federalreserve.gov/boarddocs/SnLoanSurvey/.

The October 2008 report noted several developments, including the following:

- Approximately 85 percent of domestic banks reported having tightened lending standards on commercial and industrial (C&I) loans to large and middle market firms since July 2008. Approximately 75 percent noted having tightened lending standards on C&I loans to small firms during the same 3 month period.
- Approximately 95 percent of U.S. banks reported having tightened the costs of credit lines to large and medium-sized firms; nearly 90 percent reported such tightening for smaller firms.
- Approximately 70 percent of U.S. branches and agencies of foreign banks indicated that they had tightened their lending standards on C&I loans since July 2008.
- Approximately 15 percent of domestic respondents reported a reduction in demand for C&I loans from large and middle-market firms; 5 percent reported a weakening in demand from smaller firms. However, 5 percent, on net, of the U.S. branches and agencies of foreign banks actually reported an increase in demand for C&I loans.

Consumer Credit Increase

According to the FRB, consumer credit increased at an annual rate of 1.25 percent in the third quarter of 2008 with revolving credit increasing 2.5 percent and nonrevolving credit increasing 0.50 percent during the quarter. This data is released on the 5th of each month and can be accessed at www.federalreserve.gov/Releases/G19/.

Navigating the Credit Storm

From faltering credit lines at megabanks to weakening credit lines, the U.S. credit crisis continues to affect the industry and the overall economy. To address this issue, many U.S. banks are altering their underwriting and pricing practices. Bankers across the nation predict an increase in losses due to credit card
fraud, commercial loan losses, and an increase in foreclosures during 2008. To offset these losses, many banks have begun to tighten their underwriting standards. Federal regulators have also proposed new appraisal guidelines for depositary and lending institutions. See the “Proposed Interagency Appraisal and Evaluation Guidelines” section of this alert for further discussion of this topic. Auditors should obtain an understanding of the internal controls surrounding the underwriting process and inquire of any changes to those controls as a result of the current economic environment.

The State of the Credit Union Industry

.50 On August 20, 2008, the National Credit Union Association (NCUA) reported that the overall financial condition of federally insured credit unions remains strong. Call report data submitted by the nation’s 7,972 federally insured credit unions showed that assets, loans, shares, and membership demonstrated consistent growth through the first 6 months of the year ending June 30, 2008.

.51 Membership grew to approximately 88 million in federally insured credit unions, and transposing recent trends, savings outpaced lending in the first 6 months of 2008. Savings grew a substantial 7.0 percent, lending grew 3.7 percent, and assets increased 6.5 percent from January to June.

.52 The loan to share ratio remains high at 80.72 percent. With the exception of declines in new automobile and other unsecured loans and lines of credit, all major loan categories grew from December 2007 to June 2008. In addition to the 10.1 percent increase in first mortgage real estate loans, which represent $198.1 billion, other types of real estate loans reported 1.7 percent growth to $92.8 billion, used automobile loans grew 3.3 percent to $92.0 billion, unsecured credit card loans grew 1.5 percent to $30.6 billion, and all other loans and lines of credit grew to $25.6 billion.

.53 The loan delinquency ratio increased 4 basis points, up from 0.93 percent to 0.97 percent, and the net charge-off ratio increased from 0.51 percent to 0.71 percent during the first 6 months of 2008. The ROA ratio declined from 0.64 percent to 0.52 percent primarily due to increased funds set aside for loan and lease losses. With savings growth outpacing loan growth in 2008, the loan-to-share ratio declined to 80.72 percent from 83.32 percent at year-end 2007.

False Filing of Identity Theft to Improve Credit Rating

.55 In April 2008, the NCUA issued a warning to credit unions concerning a scam that involves falsely filing an identity theft claim in order to improve one’s credit report and credit score. The perpetrators claim identity theft and as a result file police reports, causing disputed accounts to be removed from their credit reports. This improves credit reports and scores dramatically. The improved credit scores allow the perpetrators to obtain additional credit and loans that then go unpaid.

.56 Precautions should be taken when a credit report is obtained that reflects that a person has been the victim of identity theft. Credit union personnel should be aware that the loan applicant should be able to prove that he or she was a victim of identity theft. Proof of identity theft includes the names of credit bureaus that were notified, a police report, and a list of disputed accounts.

.57 Management must ensure they file a suspicious activity report when they believe their credit union has been the victim of the identity theft scam. Part 748 of the NCUA Rules and Regulations instructs management to provide notice to the appropriate NCUA regional director, and, in the case of state-chartered credit unions, to their state supervisory authority.
The State of the Financial Services Industry

Finance companies provide lending and financing services to consumers (consumer financing) and to business enterprises (commercial financing). A number of finance companies engage solely in consumer or commercial financing activities; others provide both types. Examples of financial service companies include insurance companies, businesses that provide financing to entice the purchase of goods, and consumer finance companies.

Numerous state and federal statutes affect finance companies’ operations. Some statutes apply only to specific types of activities. Regulations affecting finance companies generally are limited to matters such as loan amounts, repayment terms, interest rates, and collateral; they generally do not address financial accounting and reporting.

Signs of Life From a Credit Crunch Casualty

On May 9, 2008, the Wall Street Journal featured an article that described the current state of securitized debt. Banks and other financial institutions often create securities out of pools of similar loans; for example, mortgages. During the past year these loans have suffered from the credit crisis, as investors lost faith in these debt instruments.

Securitization volumes across all assets classes are still down nearly 80 percent compared to last year and will probably be slow to recover. However, some credit analysts believe that the rationale for certain types of securitized debt, such as loans securitized by subprime loans, remains. Analysts contend that demand for securitized debt backed by auto loans and corporate loans will strengthen. Analysts also believe that debt securitized by complex instruments such as debt obligations that pool together mortgage bonds may remain dormant for a long time.

As discussed previously in this alert, auditors should obtain an understanding of the entity’s objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. This understanding may include the type of debt issued by the financial institution in order to determine if management is taking appropriate measures to prevent unexpected losses in the current environment.

The State of the Mortgage Industry

Weekly Mortgage Bankers Association Survey

On November 5, 2008, the Mortgage Bankers Association’s Weekly Mortgage Application Survey for the week ended October 31, 2008 showed a decrease of 20.3 percent in mortgage loan application volume from the previous week; from 476.7 to 379.9 applications. The refinance index also decreased 27.8 percent compared to the prior week. The survey covers approximately 50 percent of all U.S. retail residential mortgage applications and has been conducted weekly since 1990.

Money Laundering and Trends in Residential Real Estate

On May 1, 2008, the Financial Crimes Enforcement Network (FinCEN) released a report based on an analysis of suspicious activity published by the financial industry that highlights several transactional typologies and associated illicit activities that may be perpetrated by individuals or groups in an attempt to launder funds via residential property transactions.

Included in the report is a study that confirms the increase in money laundering in the financial institutions industry. It is important to note that money laundering by way of real estate transaction is

---

1 Practitioners may also find the latest version of the AICPA’s Audit Risk Alert Insurance Companies Industry Developments—2008 (product no. 022359) helpful when auditing financial service companies.

AICPA Audit and Accounting Manual
different than other forms of bank fraud (for example, mortgage fraud) because those seeking to launder money intend to make the required mortgage payments. In fact, making the required payments is necessary for money laundering in order to disguise the source of funds.

.66 Financial institutions in the United States have been able to identify some possible instances of money laundering through residential real estate. The use of real estate to launder money is also well documented internationally. Auditors should be aware of the financial institution’s policies and procedures to assure that proper review and approval of high risk loans are followed. For more information please refer to www.fincen.gov/news_room/.

Legislative and Regulatory Developments

Proposed Interagency Appraisal and Evaluation Guidelines

.67 On November 13, 2008 the federal bank, thrift, and credit union regulatory agencies jointly issued proposed Interagency Appraisal and Evaluation Guidelines that reaffirm supervisory expectations for real estate appraisals and evaluation practices. The proposed guidance is designed to clarify and strengthen an entity’s risk management principals and internal controls to ensure that the entity’s real estate collateral valuations are reliable.

.68 The proposed guidance incorporates recent supervisory issuances and reflects changes in industry practice, including uniform appraisal standards and available technologies. The proposed guidance also addresses

- additional detail on agencies expectations for an independent appraisal and evaluation function;
- greater explanation of the agencies minimal appraisal standards;
- revision to the Uniform Standards of Professional Appraisal Practice; and
- risk focused appraisal and evaluation reviews.

.69 For more information please visit www.ots.treas.gov/?p=PressReleases&ContentRecord_id=9700d0c5-1e0b-8562-e8a2-84c5dcd00a86&ContentType_id=4c12f337-b596-c87-b45c-83895842bf3.

Bank Support for Money Market Mutual Funds

.70 On September 17, 2008, the SEC Office of the Chief Accountant clarified that bank support of money market mutual funds does not normally result in a requirement to report the fund on-balance sheet. Furthermore, the Office of the Chief Accountant believes that on-balance sheet accounting for money market funds is not required if the investing (or sponsoring) financial institution does not absorb the majority of the expected future risk associated with the money market fund’s assets. Should a situation occur where a financial institution is exposed to a majority of expected future risk, consultation on the issues associated with presenting money market mutual funds in the financial statements is encouraged by the Office of the Chief Accountant.

Temporary Guarantee Program for Money Market Funds

.72 On September 29, 2008, the U.S. Department of the Treasury began its temporary guarantee program for money market funds. The program guarantees the share price of any publicly traded money market fund, both retail and institutional. The program is designed to last for three months, after which the secretary of the Treasury will determine if the program should be extended.

.73 In order to participate in the program, eligible money market funds must apply and pay a fee. Money market funds with net asset values per share greater than or equal to $0.9975 as of the close of
business on September 19, 2008 may participate in the program. In order to do so, money market funds must pay 0.01 percent of 1 basis point, based on the number of shares outstanding on that date. Funds with per share values less than $0.9975 but greater than $0.995 are required to pay an upfront fee of 0.015 percent, 1.5 basis points, based on the number of shares outstanding. The fees only cover three months, the initial duration of the program.

The program provides coverage to shareholders for amounts that they held in participating money market funds as of the close of business on September 19, 2008. The guarantee triggers if the share price falls below $0.995.

**Interim Rule Issued to Implement Temporary Liquidity Guarantee Program**

On October 23, 2008 the FDIC approved an interim rule to govern its newly created Temporary Liquidity Guarantee Program (TLGP). The rule is effective immediately.

The TLGP has two components. One guarantees newly issued senior unsecured debt of the participating organizations, within a certain limit, issued between October 14, 2008 and June 30, 2009. For debt that matures after June 30, 2009, the guarantee remains in effect until June 30, 2012. The other provides full coverage for noninterest bearing transaction deposit accounts, regardless of dollar amount until December 31, 2009.

Eligible entities generally include any FDIC insured depository institution, any U.S. bank holding company, financial holding companies, and certain U.S. savings and loan holding companies. The interim rule includes a provision for certain otherwise ineligible holding companies or affiliates that issue debt for the benefit of an insured institution or eligible holding company to apply for inclusion in the program on a case-by-case basis. For more information visit www.fdic.gov/news/news/press/2008/pr08105.html.

**Interim Final Rule on Risk Based Capital**

On September 19, 2008, the Federal Reserve System adopted measures to reduce the liquidity and other strains being experienced by money market mutual funds. As a result, a special lending asset-backed commercial paper (ABCP) facility was created that enables depository institutions and bank holding companies to borrow from the FRB on a nonrecourse basis if they use the loan proceeds to purchase certain types of ABCP from money market mutual funds. Banking organizations that participate in the ABCP lending facility must acquire and hold ABCP on the balance sheet.

To facilitate this lending program, an exemption from leverage and risk based capital rules for ABCP held by a state member bank or bank holding company as a result of participation in the program has also been adopted on an interim basis. The interim rule became effective on September 19, 2008. The interim rule will expire on January 30, 2009 unless extended by the Governors of the Federal Reserve System.

In addition to the information provided in the preceding, the Federal Reserve System Discount Window has released 20 frequently asked questions (FAQs) that describe solutions on how the program will affect money market funds, what funds are eligible for the program, what has to be reported, as well as other items. These FAQs and others can be accessed at www.frbdiscountwindow.org/faqs.cfm?hdrID=14&dttID=75.

**SEC Proposes “Naked” Short Selling Antifraud Rule**

In March 2008, the SEC proposed antifraud Rule 10b-21 under the Securities Exchange Act of 1934, to address failures to deliver securities associated with naked short selling. Although abusive short selling is not defined in federal securities laws, it refers to short selling stock without having stock availability, and intentionally failing to deliver within the three day settlement cycle. The misrepresentation or failure to deliver is considered fraud by the general antifraud statutes of securities laws.
The proposed rule is intended to highlight the liability of persons that deceive specified persons about their intention or ability to deliver securities in time for settlement, including persons who deceive their broker about their ownership of shares and that fail to deliver securities by the settlement date. For more information, please visit www.sec.gov/news/press/2008/2008-204.htm.

Proposed Regulation on Risk Based Lending

On May 8, 2008, the FRB and Federal Trade Commission announced proposed regulations that would require a lending institution to provide a consumer with a risk-based pricing notice when, based in whole or in part on the consumer’s credit report, the creditor offers or provides credit to the consumer on terms less favorable than the terms it offers or provides to other consumers.

Risk-based pricing refers to the practice of using a consumer’s credit report, which reflects his or her risk of nonpayment, in setting or adjusting the price and other terms of credit offered or extended to a particular consumer. Under these rules, a risk-based pricing notice would generally be provided to the consumer after the terms of credit have been set, but before the consumer becomes contractually obligated on the credit transaction.

The proposed regulation provides a number of different approaches that creditors may use to identify the consumers to whom they must provide risk-based pricing notices. In addition, the proposed rule includes certain exceptions to the notice requirement. The most significant of the exceptions permits creditors, in lieu of providing a risk-based pricing notice to those consumers who receive less favorable terms, to provide all of their consumers with their credit scores and explanatory information.

The proposed regulation implements Section 311 of the Fair and Accurate Credit Transactions Act of 2003, which amends the Fair Credit Reporting Act. For more information, visit www.federalreserve.gov/newsevents/press/bcreg/20080508a.htm.

NCUA to Issue Proposed Unfair or Deceptive Credit Practice Rule

On May 2, 2008, the NCUA Board approved a joint proposed rule prohibiting credit card and overdraft service practices as unfair or deceptive under Section 5 of the Federal Trade Commission Act. The proposed rule, issued with the FRB and OTS prohibits the following 7 practices:

1. Unfair time constraints for consumers to make payments
2. Unfair allocations of payments based on balances with different interest rates
3. Unfair application of increased annual percentage rates to outstanding balances
4. Unfair fees for exceeding the credit limit solely because of a hold placed on an account
5. Unfair balance computation method
6. Unfair financing of security deposits and fees for issuance or availability of credit
7. Deceptive firm offers of credit

The rule also requires federal credit unions (FCUs) to provide an opportunity for a consumer to opt out of an overdraft protection program and would prohibit an FCU from charging a fee for an overdraft caused by a hold placed on consumer funds in connection with the use of a debit card.

FDIC Coverage Rules for Revocable Trusts Simplified

On September 26, 2008, the FDIC adopted changes to simplify the rules for determining the amount of coverage available on revocable trust accounts. These accounts are also referred to as payable on death or living trust accounts. The adopted changes, which are effective immediately, eliminate the concept of qualifying beneficiaries, as a result virtually any beneficiary can be named.
Under the revised rules, coverage is based on the number of beneficiaries named in a depositor’s revocable trust account. The insurance limit is still based on $100,000 per named beneficiary. If a revocable trust account owner has more than $500,000 in such accounts, naming more than 5 beneficiaries, the coverage is the greater of either $500,000 or the sum of all the named beneficiaries’ share of interest in the trusts, limited to $100,000 per different beneficiary.

The new rules are effective now and apply to all existing and future revocable trust accounts at FDIC insured institutions. For more information visit the FDIC Web site: www.fdic.gov/news/news/press/2008/pr08086.html.

Foreclosure Prevention Proposal From the OTS

On February 20, 2008, the OTS proposed a plan to help homeowners avoid foreclosure. The homeowners in question are unable to refinance their loan because the fair market value of the property is less than the current outstanding loan amount. The proposal has several objectives, including the following:

- To identify a market driven solution that avoids new government guarantees or assistance
- To ensure that the motivation to “game” the system by borrowers currently able to pay their existing loan is minimized
- To avoid providing a windfall to borrowers and investors in properties held in securitization

Pursuant to the proposal, the Federal Housing Authority (FHA) would issue a new loan to the homeowner based on the fair value of the property. The original loan holder receives negative equity interest in the property equal to the amount of the discount between the new loan and the unpaid balance on the original mortgage. Once the property is sold, any amount greater than the discount payout would be payable to the holder of the negative equity (the owner).

The OTS believes that the proposal offers a market driven solution to the mortgage crisis that does not “bail out” borrowers. They also believe that the negative equity created by the FHA loan could create a marketable financial instrument. For more information, visit the OTS Web site at http://files.ots.gslsolutions.com/481075.pdf.

Illustrations of Consumer Information for Hybrid Adjustable Rate Mortgage Products

On May 29, 2008, the FRB, FDIC, OCC, OTS, and NCUA published Illustrations of Consumer Information for Hybrid Adjustable Rate Mortgage Products, which is intended to assist institutions as they implement the “Consumer Protection Principles” section of the Interagency Statement on Subprime Mortgage Lending (subprime statement). The illustrations present examples of the types of consumer information that the agencies recommend institutions provide. The illustrations are not intended as model forms and institutions will not be required to use them. Some highlights include the following:

- The illustrations are intended to assist institutions in providing consumer information as discussed in the “Consumer Protection Principles” section of the subprime statement.
- A narrative illustration explains some of the key features of certain adjustable rate mortgage (ARM) loans identified in the subprime statement.
- The narrative emphasizes features that borrowers should understand—escrow payments or their absence, prepayment penalties, balloon payments, and premiums for no-document or low-document loans.
- Charts that contain numerical examples are designed to show the potential consequences of payment shock for an ARM loan structured with a reduced initial interest rate.

Bank Secrecy Act

.97 The Bank Secrecy Act of 1970 (BSA, or otherwise known as the Currency and Foreign Transactions Reporting Act) requires U.S. financial institutions to assist U.S. government agencies to detect and prevent money laundering. Specifically, the act requires financial institutions to keep records of cash purchases of negotiable instruments, file reports of cash transactions exceeding $10,000 (daily aggregate amount), and to report suspicious activity that might signify money laundering, tax evasion, or other criminal activities. The act was passed by the U.S. Congress in 1970. The BSA is sometimes referred to as an anti-money laundering law (AML) or jointly as BSA/AML. For more information visit www.fincen.gov/statutes_regs/bsa/.

Amendment to BSA

.98 The BSA was recently amended to implement enhanced due diligence requirements with regard to accounts established or maintained by foreign banks. Title 31 of the U.S. Code of Federal Regulations (CFR) Part 103.176(b) requires banks to establish risk-based due diligence policies, procedures, and internal controls when maintaining or managing a correspondent account in the United States for foreign banks, based on

- an offshore banking license.
- a banking license issued by a foreign country that has been designated as noncooperative with the international AML principles or procedures by an intergovernmental group or organization of which the United States is a member, and with which designation the U.S. representative to the group concurs.
- a banking license issued by a foreign country that has been designated by the secretary of the Treasury as warranting special measures due to money laundering concerns.

.99 In addition to the requirement to establish enhanced due diligence policies, procedures, and controls, the bank must, at a minimum, take reasonable steps to

- determine the identity of each of the owners of foreign banks whose shares are not publicly traded and the nature and extent of the ownership.
- conduct enhanced scrutiny of such accounts to guard against money laundering and to report suspicious activity. The level of enhanced scrutiny is to be based on the bank’s risk assessment of the account. If appropriate, the bank should
  — obtain and review information related to the foreign bank’s AML program and assess the risk of money laundering within or through the foreign bank.
  — monitor transactions to, from, and through the correspondent account in a manner that is reasonably designed to detect money laundering and suspicious activity.
  — obtain information from the foreign bank about the identity of any person with the authority to direct transactions through any correspondent account that is a payable through account, as well as the sources and the beneficial owner of the funds or other assets in the payable through account.
  — determine whether the foreign bank for which the correspondent account is maintained in turn maintains correspondent accounts for other foreign banks that use the bank’s foreign correspondent account. If so, the bank must take reasonable steps to assess and mitigate money laundering risks associated with the foreign bank’s correspondent accounts with other foreign banks, including the identity of those foreign banks as appropriate.

.100 The amendment was published on August 9, 2007 and the rules are to be applied to all correspondent accounts established on or behalf of the foreign banks listed in 31 CFR 103.176(c) on or after February 5, 2008. The enhanced due diligence requirements are retroactive to previously established accounts. For any accounts established prior to February 5, 2008, the bank must have enhanced due diligence policies, procedures and controls in place and applied to all such accounts by May 1, 2008.
Bank Securities Activities

.101 On October 29, 2007, the SEC and FRB jointly issued final rule Regulation R that defines the extent to which brokerage activities of banks are subject to SEC regulations. The SEC and FRB consulted with the OCC, FDIC, and OTS. The final rule is commonly referred to as Regulation R and implements provisions of the Gramm-Leach-Bliley Act of 1999 (GLBA).

.102 Regulation R defines the terms used in several of GLBA's statutory exceptions and includes certain related exemptions. The final rule allows a bank, subject to certain conditions, to continue to conduct securities transactions for patrons as a function of the bank’s trust, fiduciary, custodial, and deposit sweep functions and to refer the patron to a securities dealer pursuant to an existing networking agreement with the broker dealer. The regulation also includes exemptions related to foreign securities transactions, noncustodial securities lending transactions conducted in an agency capacity, and the execution of transactions other than through a broker dealer.

.103 The banking agencies (OTS, FDIC, and OCC) will develop and request public comment on the record keeping rules for banks that operate under broker exceptions as outlined in the Securities Exchange Act of 1934 (Exchange Act). The SEC will act as a consultant during the design of these rules, and will establish record keeping requirements that enable banks to demonstrate compliance with statutory exceptions and any newly finalized rules. The banking agencies are also revisiting the Interagency Statement on Retail Sales of Nondeposit Investment Products to determine the appropriate revisions based on changes implemented by the GLBA.

.104 The effective date of most of Regulation R’s provisions is September 28, 2008. Banks are exempt from complying with the rules and the “broker” exceptions in Section 3(a)(4)(B) of the Exchange Act until the first day of their first fiscal year that commences after September 30, 2008. The compliance date for most national banks will be January 1, 2009.

.105 In addition to Regulation R, the SEC amended and adopted related rules regarding the exemptions from the definitions broker and dealer for certain securities activities conducted by banks. The adoption is made pursuant to Regulation S of the Securities Act of 1933 and allows banks conduct riskless principal transactions with non-U.S. persons. The SEC is also amending the rules governing brokers in order to align these rules with the new bank broker and dealer provisions.

.106 To view the final rule visit www.occ.treas.gov/ftp/bulletin/2007-42.html.

FinCEN Proposal to Amend Currency Transaction Reporting Exemption Regulations

.107 On April 23, 2008, FinCEN proposed regulations that would significantly simplify the requirements for depository institutions to exempt their eligible customers from currency transaction reporting. The proposed rule would amend the BSA regulation allowing depository institutions to exempt certain persons from the requirements to report transactions in currency in excess of $10,000, in accordance with Government Accountability Office recent recommendations. FinCEN also conducted research to determine if the proposed rule was feasible.

.108 Under current BSA regulations, depository institutions may exempt from Currency Transaction Reports (CTRs) requirements

- large reportable transactions in currency made by other depository institutions, government agencies, or those acting with government authority.
- reportable transactions in currency by eligible nonlisted businesses or payroll customers.
FinCEN proposes the following changes be made to the current regulation:

- Depository institutions would no longer be required to file exemption forms, or to annually review customers that are depository institutions, government agencies, or agencies action on behalf of the government.
- Biannual review of the exempt person designation or other phase II customers would no longer be required.
- Depository institutions would no longer have to wait 12 months before designating otherwise eligible phase II customers by exemption.

FinCEN proposed rule changes to the BSA are designed to increase the effectiveness and efficiency of BSA regulations while maintaining the usefulness of BSA reports (such as CTRs) to law enforcement. For more information please visit www.fincen.gov/news_room/nr/html/20080423.html.

Managing Commercial Real Estate Concentrations in a Challenging Environment

The FDIC is increasingly concerned that institutions with concentrated commercial real estate (CRE) exposures may be vulnerable to a sustained downturn in real estate and should ensure that capital and allowance for lease and loan losses (ALLL) levels are strong, and that credit risk management is robust. As market conditions warrant, institutions with significant CRE concentrations should increase capital that provides protection from unexpected losses if market conditions deteriorate further. The FDIC issued Federal Institutions Letter (FIL) 22-2008, Managing Commercial Real Estate Concentrations in a Challenging Environment, in an attempt to reemphasize the importance of strong capital and loan loss allowances for nonmember institutions with significant CRE and construction and development (C&D) concentrations.

Institutions with significant CRE concentrations should maintain capital and ALLL levels, as well as maintain an overall credit risk process that reflects the principles of 2006 CRE guidance. The FDIC recommends five risk management processes to help institutions with significant C&D and CRE concentrations:

1. Increase strong capital levels. Due to stressed markets, strong capital levels have been called upon to provide protection against unexpected losses. Institutions with significant CRE and C&D exposure may require more capital because market uncertainty has increased the level of unexpected losses. Management and directors should take steps to increase capital levels to support significant CRE and C&D concentrations.

2. Ensure that loan loss allowances are appropriate. As required by GAAP, financial institutions should use their best judgment when determining their ALLL. Institutions should review the collectability of CRE loans and all other exposures in order to determine if their ALLL is a level that could cover estimated credit losses on individual loans that become impaired.

3. Manage C&D and CRE loan portfolios closely. It is vitally important for institutions to maintain prudent, time-tested lending policies during current market conditions.

4. Maintain updated financial and analytical information. Recent borrower financial statements, including property cash flow statements, rent rolls, guarantor personal statements, tax return data, global builder and other income performance measures should be maintained by institutions that have significant CRE concentrations. Management should consider if appraisals conducted during high growth periods are reliable during periods of uncertain market changes. All appraisals should be consistent with the FDIC’s appraisal rules in Part 323 of the FDIC’s Rules and Regulations (Title 12 CFR Part 323).

5. Bolster loan infrastructure. Institutions should maintain adequate staff with the necessary skill set to properly manage an increase in problem loans and workouts. The institution should have a network of legal, underwriting, appraisal, and real estate brokerage professionals to handle relevant issues.
FDIC examiners recognize the challenges faced by many financial institutions in the current CRE environment and expect each institution’s board of directors and management team to maintain robust credit risk policies. Institutions should also strive for strong capital and loan loss allowance levels.

Auditors should note management’s general attitude toward CRE lending policies when considering an institution’s internal controls. Strong CRE lending policies and diligent oversight could assist the auditor when assessing control risk.

**Guidance on Other Real Estate**

On July 1, 2008, the FDIC issued FIL 62-2008, *Guidance on Other Real Estate*, in order to address the current housing market, the rapid rise in foreclosures, and the increased probability of other real estate (ORE) held by FDIC-supervised institutions.

The FDIC encourages FDIC-supervised institutions to avoid unnecessary foreclosures of properties through loan modifications that achieve affordable, sustainable mortgage obligations. Due to the risk of foreclosure, these institutions should maintain established policies and procedures for acquiring, holding, and disposing of ORE. ORE guidance

- details the importance of expenses associated with maintaining and protecting ORE from further deterioration.
- addresses the need to comply with requirements for obtaining initial and updated values for ORE.
- summarizes the accounting and reporting standards for ORE in each phase of ownership; acquisition, holding period, and disposition.

**Housing Stabilization Measures**

On May 12, 2008, the U.S. House of Representatives passed a substantial housing assistance package that would help struggling homeowners avoid foreclosure and ease the growing burden of vacant housing on cities and states. Two bills were passed, the Neighborhood Stabilization Act and the American Housing Rescue and Foreclosure Prevention Act.

**The Neighborhood Stabilization Act**

The Neighborhood Stabilization Act authorizes a 1 year, $7.5 million grant program and a $7.5 billion federal loan program to help sustain neighborhoods and communities experiencing the highest rates of home foreclosure. Funding could be used to rehabilitate houses not up to local codes, to make energy efficiency improvements, and to purchase qualified houses made vacant by foreclosure. Funding could also be used to renovate the houses for rent or resale to income targeted families.

In addition, grant recipients could use up to 8 percent of their grant to cover operating costs such as management fees, taxes, insurance, and other administrative fees associated with the property. The bill gives the Department of Housing and Urban Development the ability to approve funds for the demolition of houses too damaged for rehabilitation. Funds are barred from use for the demolition of public housing.

**The American Housing Rescue and Foreclosure Prevention Act**

The American Housing Rescue and Foreclosure Prevention Act is designed to stimulate foreclosure prevention efforts undertaken by private lenders and mortgage servicers, provide increased liquidity in the mortgage markets, and increase federal regulation and oversight of the lending industry.
Under this bill, the FHA would encourage lenders to voluntarily forgive a portion of outstanding debt on troubled mortgages. In exchange for forgiving the debt, those mortgages would be refinanced into conventional, lower interest mortgages guaranteed by the FHA.

To qualify for the program, lenders would have to accept a payment of no more than 85 percent of the current appraised value of the property as payment in full on the loan. Homeowners would be eligible only if they could reasonably be expected to repay the refinanced loan. They would also have to share any profit from future home appreciation with the government.

Another provision of the bill establishes a federal affordable housing fund paid for by Fannie Mae and Freddie Mac, which would contribute funding equal to 1.2 percent of their total outstanding mortgages. Only very low income families would be eligible for assistance from this fund.

Lastly, the bill provides a legal safe harbor for mortgage loan servicers making certain loan modifications. The provision responds to concerns that mortgage loan servicers are being discouraged from modifying loan terms to prevent foreclosures by the fear of potential lawsuits from investors who stand to lose profits due to loan modification.

Updated Continuity Planning Booklet

On March 19, 2008, the Federal Financial Institutions Examination Council released an updated business continuity planning booklet. The booklet provides guidance to bank examiners, financial institutions, and technology service providers to identify business continuity risks. The booklet provides guidance on the evaluation of internal controls and risk management practices for effective continuity planning. Also included in the booklet is the addition of enhancements to business analysis and testing discussions based on emerging threats and lessons learned in recent years. Lastly, the booklet stresses the responsibilities of management and the institution’s board of directors to address business continuity planning by considering technology, business operations, and testing strategies for the institution.

FDIC Proposes Changes for FDICIA Institutions

On November 2, 2007, the FDIC issued a proposal to amend its regulations that address audit and reporting requirements, internal control assessments, and audit committees. The proposal amends Title 12 Part 363, Annual Independent Audits and Reporting Requirements, of the FDIC Rules and Regulations, which is the FDIC’s implementing regulation of Section 36 of the Federal Deposit Insurance Act. Section 36 was added by the Federal Deposit Insurance Corporation Improvement Act of 1991.

For institutions above certain thresholds, Part 363 generally addresses annual independent audits, internal control over financial reporting assessments, compliance with designated laws and regulations, the establishment of independent audit committees, and related reporting requirements. The asset-size threshold for internal control assessments is $1 billion and the threshold for the other requirements is $500 million, measured as of the beginning of the fiscal year. Of the 8,600 FDIC-insured institutions, approximately 1,300 have $500 million or more in assets while approximately 650 have $1 billion or more in assets.

Also included in Part 363 is appendix A, Guidelines and Interpretations, which is intended to assist institutions and independent public accountants in understanding and complying with Section 36 and Part 363. A new subsection of Part 363 featuring the guideline requirements has been added based on several of the proposed changes.

Some of the more significant revisions include the following:

- Audit committees and auditors
  - Specifies that the audit committee’s duties include the appointment, compensation, and oversight of the external auditor.
— Requires the audit committee to ensure the external audit engagement letter does not contain unsafe and unsound limitation of liability provisions.

— Requires institutions to file copies of the external audit engagement letter with the FDIC, the appropriate federal banking agency, and any appropriate state bank supervisor within 15 days of acceptance by the institution.

— Requires the board of directors to adopt written criteria for evaluating an audit committee member’s independence and provide expanded guidance for boards of directors to use in determining independence.

— Clarifies that the external auditor must comply with the Public Company Accounting Oversight Board (PCAOB) independence standards and interpretations in addition to the independence standards and interpretations of the AICPA and the SEC.

— Requires certain communications by the external auditor to the audit committee consistent with the requirements for public companies. These required communications include critical accounting policies, alternative accounting treatments discussed with management, and written communications provided to management (for example, management letters and a schedule of unadjusted differences).

— Establishes retention requirements for external auditor working papers consistent with the seven-year retention period applicable to public companies.

• Management

— Extends the time period for a nonpublic institution to file its Part 363 annual report by 30 days. The reports will now be due 120 days after the end of the fiscal year.

— Permits the use of a 30-day late filing notification if an institution is confronted with extraordinary circumstances.

— Requires management to state its conclusion regarding compliance with designated safety and soundness laws and regulations and disclose any noncompliance with such laws.

— Provides illustrative management reports for the statement of management’s responsibilities, management’s assessment of compliance with laws and regulations, and management’s internal control assessment.

— Requires management and the external auditor to identify the internal control framework used to evaluate internal control.

— Requires management and the external auditor to disclose all material weaknesses.

— Provides relief from reporting on internal control for businesses acquired during the year.

Credit Industry Legislation

Credit Card Company Practices

The Associated Press reported that legislation to rein in the billing and marketing practices of credit card companies is gaining traction in Congress. A bill introduced on April 30, 2008 would require credit card issuers to give account holders 45 days notice of any increase in interest rates. A similar bill is pending the House of Representatives. Both bills are supported by consumer advocacy groups and those who oppose the banking industry. In addition to the bills, the FDR, OTS, and NCUA have also proposed similar curbs to credit card practices.
Credit Union Legislation Introduced Into the Senate

On May 1, 2008, Senator Joe Lieberman introduced the Credit Union Regulatory Improvements Act in the U.S. Senate. This bill allows, among other things, nontraditional credit unions to offer multimillion dollar tax subsidized commercial loans. For more information, visit http://thomas.loc.gov/cgi-bin/ bdquery/z?d110:s.02957:.

Basel II Update

On November 1, 2007, the OCC approved a final rule implementing the advanced approaches as stated in the Basel II Capital Accord. The final rule establishes regulatory and supervisory standards for credit risk through the use of an internal ratings based approach. The final rule also measures operational risk through the use of an advanced measurement approach. Standards for the review of capital adequacy and public disclosure for the largest U.S. banks are also articulated in the final rule.

FDIC Approves Basel II—Based Standardized Approach Capital Proposal

On June 26, 2008, the Board of Directors of the FDIC approved an interagency proposal that would provide banks with the option to adopt an alternative risk-based capital framework based largely upon the standardized approach set forth in the Basel II Framework. The standardized approach is expected to add greater risk sensitivity without creating burdensome complexity and should help minimize competitive inequalities between large and small financial institutions. It is also expected that the standardized approach should provide bank supervisors with some control over unconstrained reductions in risk-based capital.

This approach would be available to all banks except the largest and most complex banks that are subject to the advanced approaches final rules that were issued on December 7, 2007.

Some of the key aspects of the proposal include the following:
- Adding more risk buckets to the existing rules
- Expanding the use of external ratings to a broader range of exposures
- Expanding the recognition of credit risk mitigants, such as collateral and guarantees
- Establishing a more risk-sensitive approach for residential mortgages based largely on loan-to-value measures
- Increasing the capital requirements on certain off-balance sheet exposures, including liquidity lines to asset-backed commercial paper exposures
- Requiring a capital charge for operational risk using the basic indicator approach under the Basel II capital framework

Currently, the agencies are seeking comment on various aspects of the proposed framework. This includes possible changes and alternatives that include the use of external credit ratings, especially for structured finance exposures. Readers of this alert are advised to monitor the progress of this proposed rule at the FDIC Web site.

Audit and Attestation Issues and Developments

Auditing Fair Value Measurements

It is management’s responsibility to determine and disclose an entity’s fair value measurements. When auditing these fair values to ensure conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328.
328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (AICPA, Professional Standards, vol. 1).

.140 The strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method should incorporate common market assumptions. If common market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor may also identify possible indicators of impairment. According to paragraph .23 of AU section 328, “substantive tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.”

.141 According to paragraph .48 of AU section 328, the auditor ordinarily should add language to the letter of representations from management regarding the reasonableness of significant underlying assumptions. When significant assumptions are used or they are highly subjective and the items being measured at fair value are material, the auditor should consider discussing these items with those charged with governance of the entity.

**Fair Values of Securities**

.142 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, there are some items of note for the auditor. As noted previously, quoted market prices in active markets are the best available audit evidence to support a fair value. However, when they are unavailable and the valuations of securities are obtained from a broker-dealer or another third party source based on valuation models, the auditor should understand the underlying valuation method used (such as a cash flow projection). The auditor may also determine that it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157 quoted prices in active markets are considered level 1 inputs.

.143 When an entity performs its own valuation, value testing procedures to be taken by the auditor include assessing the reasonableness and appropriateness of the model, calculating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether the inputs to the entities’ valuation model are observable or not determines their characterization as level 2 or level 3 inputs, respectively, within FASB Statement No. 157. When there is extensive judgment, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, Professional Standards, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral should also be examined for existence, fair value, transferability, and the investor’s right to the collateral.

.144 The auditor should also evaluate management’s conclusions regarding other than temporary impairment on its securities. Examples of factors that could cause an *other than temporary impairment* per paragraph .47 of AU section 332 include the following:

- Fair value is significantly below cost and—
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
• The financial condition of the issuer has deteriorated.
• Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
• The entity recorded losses from the security subsequent to the end of the reporting period.

.145 Additional factors to consider when determining whether a security is other than temporarily impaired, as described in the September 30, 2008 press release on clarifications on fair value accounting (SEC and FASB press release), by the SEC Office of the Chief Accountant and FASB staff, include “length of time and the extent to which the market value has been less than cost; the financial condition of the issuer; and ... the intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.” The classification of an entity’s securities is based on management’s intent and ability. The auditor should obtain an understanding of management’s classification process between trading, available-for-sale, or held-to maturity, as well as consider the classifications in light of the entity’s current financial position.

Liquidity Restrictions

.146 As mentioned in “The State of the Economy” section of this alert, unprecedented events occurred in the financial markets in September 2008 resulting in Congress appropriating up to $700 billion to purchase various asset-backed securities. Generally, many fixed income markets became extraordinarily illiquid in late September 2008, resulting in a substantial increase in risk over the valuation assertion for virtually any kind of fixed income security of any duration. There also were concerns about the possibility of significant redemptions from various types of funds, and some reports of certain private funds either placing limits on redemptions, freezing the ability to redeem entirely, or determining to commence an orderly wind-down of operations. Thus, subsequent events reporting considerations and assessment of the going concern status of some entities take on added importance in the current environment.

.147 AICPA staff has issued a nonauthoritative TIS section 1100.15 addressing the potential accounting and auditing implications when a fund or its trustee imposes restrictions on a nongovernmental entity’s ability to withdraw its balance in a money market fund or other short term investment vehicle. The TPA covers balance sheet classification, disclosures, debt covenants, subsequent events, and going concern considerations, among other things. The TPA can be found at www.aicpa.org/download/acctstd/TIS1100_15.pdf.

Consideration of an Entity’s Ability to Continue as a Going Concern

.148 The consideration of an entity’s ability to continue as a going concern is required in every audit performed under generally accepted auditing standards (GAAS) and is an especially important consideration in the current state of the residential market and the overall economy. It is important to note the time frame for this consideration is one year beyond the date of the financial statements. If the auditor believes there is a substantial doubt on the entity’s ability to continue as a going concern, the next steps are to obtain management’s plans to mitigate the effect of such conditions and then assess the likelihood these plans can be effectively implemented.

.149 If an auditor determines there is a substantial doubt about an entity’s ability to continue as a going concern, the auditor should communicate with those charged with governance of the entity in accordance with AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1). AU section 341 provides guidance to an auditor with respect to evaluating whether there is substantial doubt about an entity’s ability to continue as a going concern and what the auditor should do when a going concern exists.

Consideration of Fraud

.150 Auditors should consider the pressures financial institutions are facing when planning and performing the audit engagement. Auditors have a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Paragraph .32 of AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), explains that when obtaining information about the entity and its
environment, an auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud. Paragraph .33 of AU section 316 lists three conditions generally present when fraud exists: incentive or pressure to perpetrate fraud, an opportunity to carry out the fraud, and attitude or rationalization to justify the fraudulent action.

**Allowance for Lease and Loan Losses**

.151 The ALLL represents one of the most significant estimates in a financial institution’s financial statements and regulatory reports. Each institution has a responsibility for developing, maintaining, and documenting a comprehensive, systematic process for determining the amounts of ALLL and the provision for loan and lease losses (PLL). Loans and leases should be reviewed, at least, quarterly to determine if the ALLL amount is able to cover the estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of the loan and lease portfolio.

.152 When estimating credit losses, consideration should be given to several significant factors that affect the collectability of the portfolio as of the evaluation date. The historical loss experience provides a reasonable starting point for the institution’s analysis, historical losses, or even recent trends in losses, but do not by alone form a sufficient basis to determine the appropriate level for the ALLL. Management should also consider those qualitative or environmental factors that are likely to cause estimated credit losses associated with the institution’s existing portfolio to differ from historical loss experience. Qualitative changes include changes in internal loan policy, the nature and volume of similar loans, a change in the ability and depth of management, and legal and regulatory requirements.

.153 The principal sources of guidance on accounting for impairment in a loan portfolio under GAAP are FASB Statement No. 5, *Accounting for Contingencies*, and FASB Statement No. 114, *Accounting for Creditors for Impairment of a Loan—an amendment of FASB Statements No. 5 and 15*. Additionally, EITF Topic No. D-80, “Application of FASB Statement No. 5 and No. 114 to a Loan Portfolio,” presents questions and answers that provide specific guidance on the interaction between these two FASB statements and may be helpful when applying them.

.154 According to paragraph .56 of AU section 312, *Audit Risk and Materiality in Conducting an Audit* (AICPA, *Professional Standards*, vol. 1), the risk of material misstatement of the financial statements is generally greater when account balances and classes of transactions are subject to estimation rather than precise measurement because of the inherent subjectivity in estimating future events. Auditors should consider the guidance in AU section 312 when examining a financial institution’s ALLL.

**Responsibilities of Management and Those Charged With Governance**

.155 Each financial institution’s management is responsible for maintaining the ALLL at an appropriate level. Management should document its analysis according to the standards set forth in the 2006 Federal Financial Institutions Examination Council Revised Policy Statement. Management’s analysis and evaluation is subject to review by examiners. Failure to maintain and support ALLL in accordance with GAAP and supervisory guidance is not considered sound practice. At a minimum, the institution’s policies and procedures should include

- a well documented comprehensive process for determining the ALLL level.
- an effective loan review system with internal controls that include monitoring and correct loan classification.
- adequate data capture and reporting systems to supply information necessary to support its estimate of ALLL.
- available information to confirm that a loan or lease determined to be uncollectable.
• documentation to support evaluation of any loss estimation models before they are employed by the financial institution.

.156 Those charged with governance in the financial institution are responsible for overseeing management’s significant judgments and estimates concerning ALLL. Generally, this oversight includes, but is not limited to, the following:

• Review and approval of management’s ALLL policies and procedures, at least annually
• Review of management’s assessment and justification of loan review system based on the institution’s size and complexity
• Management’s assessment and justification of estimated ALLL and PLLL amounts reported each period
• Management’s periodic validation and revision of ALLL policies

Auditing the ALLL

.157 AU section 342 paragraph .03 states that management is responsible for making the accounting estimates included in the financial statements. Estimates are based on subjective as well as objective factors and, as a result, judgment is required to estimate an amount at the date of the financial statements. Management’s judgment is normally based on its knowledge and experience about past and current events and its assumptions about conditions it expects to exist and courses of action it expects to take. According to AU section 342 paragraph .04, the auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. As estimates are based on subjective as well as objective factors, it may be difficult for management to establish controls over them.

.158 AU section 342 provides guidance on auditing accounting estimates (such as estimates of fair values, discussed previously, and estimates of loan losses). AU section 342 discusses how an auditor obtains an understanding of how management developed estimates, concentrating on the key factors and assumptions used. It also discusses how the auditor evaluates the reasonableness of those estimates. AU section 328 establishes standards and provides guidance on auditing fair value measurements and disclosures contained in financial statements.

.159 The auditor typically achieves objectives for auditing the allowances by testing management’s estimates of the allowance based on available and relevant information regarding loan collectability. The auditor is not responsible for estimating the amount of the allowance or ascertaining the collectability of each, or any, specific loan included in an institution’s loan portfolio. However, the auditor’s primary objective of audit procedures for credit losses is to obtain reasonable assurance surrounding the loan loss estimate. Some questions include the following:

• Are the allowance for loan losses and the allowance for credit losses on off-balance sheet credit exposures reasonably estimated in accordance with GAAP to cover the amount of probable credit losses inherent in the loan portfolio and in off-balance sheet financial instruments, respectively, at the balance-sheet date?
• Are internal controls over the allowance estimation process operating effectively?
• Is the allowance calculation properly documented and in accordance with current accounting and regulatory guidance?
• Are disclosures adequate?
• Is the allowance excessive or does it imply shortfall?
• Is there directional consistency between credit quality indicators (for example, charge-offs versus delinquencies, and loan-loss provision levels versus allowance levels)?
Summary of Recent Auditing and Attestation Pronouncements and Related Guidance

.160 Presented in the following table is a list of recently issued auditing and attestation pronouncements and related guidance. This alert is intended to be used in conjunction with Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on auditing and attestation standards issued subsequent to the writing of this alert, please refer to the AICPA Accounting and Auditing Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing. You may also look for announcements of newly issued standards in the CPA Letter, Journal of Accountancy, and in the quarterly electronic newsletter In Our Opinion, issued by the AICPA Auditing Standards team, available at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Opinion. As a reminder, AICPA auditing and attestation standards are applicable only to audits and attestation engagements of nonissuers.

.161 The PCAOB establishes auditing and attestation standards for audits of issuers. Refer to the PCAOB Web site at www.pcaob.org for information about its activities. You may also review Audit Risk Alert SEC and PCAOB Developments—2008 (product no. 022499kk), which summarizes recent developments at both the SEC and PCAOB. This alert can be obtained by calling the AICPA at (888) 777-7077 or by visiting www.cpa2biz.com.

<th>Pronouncement</th>
<th>Description</th>
</tr>
</thead>
</table>
| **SAS No. 113, Omnibus Statement on Auditing Standards—2006 (AICPA, Professional Standards, vol. 1)** | This standard does the following:  
- Revises the terminology used in the 10 standards of AU section 150, Generally Accepted Auditing Standards, to reflect terminology in AU section 120, Defining Professional Requirements in Statements on Auditing Standards (AICPA, Professional Standards, vol. 1).  
- Adds a footnote to the headings before paragraphs .35 and .46 in AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), to provide a clear link between the auditor’s consideration of fraud and the auditor’s assessment of risk and the auditor’s procedures in response to those assessed risks.  
- Replaces throughout the SASs the term completion of fieldwork with the term date of the auditor’s report.  
- Changes the convention for dating the representation letter by requiring that it be dated as of the date of the auditor’s report. |

| Issue Date: November 2006 | (Applicable to audits conducted in accordance with GAAS) |

| SAS Nos. 104–111, the risk assessment standards | The risk assessment standards provide extensive guidance on how to apply the audit risk model when planning and performing financial statement audits; focusing on identifying and assessing the risks of material misstatements; further designing and performing tailored audit procedures in response to the assessed risks at relevant assertion levels; and improving the linkage between the risks, controls, audit procedures, and conclusions. These eight SASs became effective for audits of financial statements for periods beginning on or after December 15, 2006. |

| Issue Date: March 2006 | (Applicable to audits conducted in accordance with GAAS) |

| Statement on Standards for Attestation Engagements (SSAE) No. 15, An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 1, AT sec. 501) | This statement establishes requirements and provides guidance that applies when a practitioner is engaged to perform an examination of the design and operating effectiveness of an entity’s internal control over financial reporting (examination of internal control) that is integrated with an audit of financial statements (integrated audit). This SSAE is effective for integrated audits for periods ending on or after December 15, 2008. Earlier implementation is permitted. |

| Issue Date: October 2008 | |

| SSAE No. 14, SSAE Hierarchy (AICPA, Professional Standards, vol. 1, AT sec. 50) | This standard identifies the body of attestation literature, clarifies the authority of attestation publications issued by the AICPA and others, specifies the extent of familiarity a practitioner needs to have with various kinds of attestation publications when conducting an attestation engagement, and amends the 11 attestation standards to reflect the terminology used in AT section 20, Defining Professional Requirements in Statements on Standards for Attestation Engagements (AICPA, Professional Standards, vol. 1). It is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2006. |

### Recent Auditing and Attestation Pronouncements and Related Guidance

**PCAOB Staff Questions and Answers, Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees** *(AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 100 par. .05)*

**Issue Date:** April 2007

(Applicable to audits conducted in accordance with PCAOB standards)

Topics covered include the following:
- The application of PCAOB Rule 3522(a), *Tax Transactions* *(AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Rules”), when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm*
- Whether a public accounting firm can advise an audit client on the tax consequences of structuring a particular transaction
- Whether a registered public accounting firm’s independence is affected by the IRS’s subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in PCAOB Rule 3522(b)
- Clarification that the auditor must evaluate whether a person is in a financial reporting oversight role at affiliates and not just the audit client itself
- Clarification of the term *other change in employment event* as it relates to PCAOB Rule 3522(c)

**PCAOB Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists** *(AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400 par. .02)*

**Issue Date:** December 2007

(Applicable to audits conducted in accordance with PCAOB standards)

This practice alert highlights certain requirements in the auditing standards related to fair value measurements and disclosures in the financial statements and certain aspects of generally accepted accounting principles that are particularly relevant to the current economic environment.
Statement on Standards for Attestation Engagements No. 15 and FDICIA

.162 When reporting on a financial institution’s internal control over financial reporting pursuant to the requirements of the FDICIA, the auditor’s attestation engagement is required to be performed in accordance with AT section 501A, Reporting on an Entity’s Internal Control Over Financial Reporting (AICPA, Professional Standards, vol. 2).

.163 In October 2008, the Auditing Standards Board (ASB) issued Statement on Standards for Attestation Engagements (SSAE) No. 15, An Examination of an Entity’s Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements (AICPA, Professional Standards, vol. 2, AT sec. 501), which establishes standards and provides guidance to practitioners performing an examination of a nonissuer’s internal control over financial reporting (internal control) in the context of an integrated audit (an audit of an entity’s financial statements and an examination of its internal control). SSAE No. 15 converges the standards practitioners use for reporting on a nonissuer’s internal control with PCAOB Auditing Standards No. 5, An Audit of Internal Control That is Integrated with an Audit of Financial Statements (AICPA, PCAOB Standards and Related Rules, Rules of the Board, “Standards”). The new standard is effective when the subject matter or assertion is as of or for a period ending on or after December 15, 2008 with earlier application permitted. Therefore it is effective for December 31, 2008 audits of financial institutions that are required to have an examination of internal control over financial reporting pursuant to the requirements of the FDICIA.

.164 The new standard establishes requirements that are applicable when an examination of internal control over financial reporting is integrated with an audit of financial statements and contains provisions that will affect both the auditor and the reporting company. The new standard does the following:

- Revises the scope making it applicable only to examinations of the design and operating effectiveness of an entity’s internal control that are integrated with an audit of the entity’s financial statements. Therefore, AT section 501 would no longer be applicable to examinations of the design and operating effectiveness of an entity’s internal control if the financial statements are not also being audited or examinations of only the suitability of the design of an entity’s internal control. (Such engagements may be developed and performed under AT section 101, Attest Engagements [AICPA, Professional Standards, vol. 2]. The ASB is currently developing an interpretation of AT section 101 on reporting on the design of internal control.)
- Requires management’s written assertion about the effectiveness of the entity’s internal control to accompany the practitioner’s report.
- Revises the terms significant deficiency and material weakness to conform with PCAOB Auditing Standard No. 5.
- Revises the list of deficiencies in internal control that are indicators of material weaknesses.
- Eliminates the list of deficiencies that ordinarily would be considered at least significant deficiencies.
- Expands coverage of and adds discussion of a number of various topics including, but not limited to, using a top-down approach for identifying the most important controls to test and incorporating the results of the auditor’s fraud risk assessment from the financial statement audit into planning and performing the examination of internal controls.
- Provides a definition of internal control for reports on certain insured depository institutions under Section 112 of FDICIA.
- Provides an illustrative written communication from the practitioner to management and those charged with governance of any significant deficiencies and material weaknesses.

.165 Readers can assess a summary of the standard and the full text of the standard on the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Authoritative+Standards+and+Related+Guidance+for+Non-Issuers/Summaries+of+Recently+Issued+Auditing+Standards.htm.

AICPA Audit and Accounting Manual

AAM §8050.165
Accounting Issues and Developments

Convergence with International Financial Reporting Standards

166 Since the signing of the Norwalk Agreement by FASB and the International Accounting Standards Board (IASB), the bodies have had a common goal—one set of accounting standards for international use. In this agreement, each body acknowledged its commitment to the development of high quality, compatible accounting standards that could be used for both domestic and cross-border financial reporting. In 2005 meetings, FASB and the IASB reaffirmed their commitment to the convergence of U.S. GAAP and International Financial Reporting Standards (IFRS). A common set of high quality, globally accepted standards remains the long-term strategic priority of both FASB and the IASB.

167 FASB and the IASB have undertaken several joint projects, which are being conducted simultaneously in a coordinated manner to further the goal of convergence of U.S. GAAP and IFRS. These ongoing joint projects address the conceptual framework, business combinations, financial statement presentation, and revenue recognition. For more information on the status of this project go to www.fasb.org and www.iasb.org.

SEC Eases Acceptance of IFRS Financial Statements

168 On December 21, 2007, the SEC took a major step toward easing the acceptance of IFRS financial statements by adopting rules to accept from foreign private issuers financial statements prepared in accordance with IFRS as issued by the IASB without reconciliation to U.S. GAAP. This rule marks an important step in the process toward the development of a single set of high quality, globally accepted accounting standards. This rule became effective March 4, 2008. Readers can access this rule at www.sec.gov/rules/final/2007/33-8879.pdf.

169 More than 100 countries now either require or allow the use of IFRS for the preparation of financial statements by listed companies, and additional countries are moving to do the same. This recent movement to IFRS outside the United States has resulted in an increase of filings with the SEC of foreign private issuers that represent in the footnotes to their financial statements that their financial statements comply with IFRS as published by the IASB—from a relative few in 2005 to approximately 110 in 2006. The SEC expects this number will continue to increase in the future, particularly pursuant to Canada’s announced move to IFRS, as there currently are approximately 500 foreign private issuers from Canada.

170 This movement to IFRS also has begun to affect U.S. issuers, in particular those with a significant global footprint. For instance, certain U.S. issuers may compete for capital globally in industry sectors in which a critical mass of non-U.S. companies report under IFRS. Also, U.S. issuers with subsidiaries located in jurisdictions that have moved to IFRS may prepare those subsidiaries’ financial statements in IFRS for purposes of local regulatory or statutory filings. Readers should remain alert to developments regarding convergence.

IFRS “Roadmap”

171 On August 27, 2008, the SEC voted to publish for public comment a proposed roadmap that could lead to the use of IFRS by U.S. issuers beginning in 2014. The SEC would make a decision in 2011 on whether adoption of IFRS is in the public interest and would benefit investors. The proposed multiyear plan sets out several milestones that, if achieved, could lead to the use of IFRS by U.S. issuers in their filings with the SEC.

172 The top 20 companies in each industry, as determined by market capitalization, could elect to begin filing IFRS financial statements for fiscal periods ending after December 15, 2009. If, in 2011, the SEC adopts IFRS for all filers, the roadmap suggests mandatory filing for large accelerated filers beginning in 2014, accelerated filers in 2015, and nonaccelerated filers in 2016. The 90 day comment period ends on February 19, 2009.
The proposed roadmap sets forth seven milestones that will influence the SEC’s decision to adopt IFRS for all filers. These milestones relate to improvements in accounting standards, the accountability and funding of the International Accounting Standards Committee Foundation, the improvement in the ability to use interactive data for IFRS reporting, education and training relating to IFRS, limited early use of IFRS where this would enhance comparability for U.S. investors, the anticipated timing of future rulemaking by the SEC, and the implementation of the mandatory use of IFRS by U.S. issuers.

Additionally, the roadmap discusses two alternatives for U.S. issuers that elect to use IFRS to disclose U.S. GAAP information. Proposal A suggests a U.S. issuer that elects to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS called for under IFRS No. 1, “First-time Adoption of International Financial Reporting Standards,” in a footnote to its audited financial statements. This information would include the restatement of and reconciliation from prior year’s financial statements and the related disclosures.

Proposal B suggests that U.S. issuers that elect to file IFRS financial statements would provide the reconciling information from U.S. GAAP to IFRS required under IFRS No. 1, and would also disclose on an annual basis certain unaudited supplemental U.S. GAAP financial information covering a three year period. This unaudited supplemental financial information would be in the form of a reconciliation from IFRS to U.S. GAAP.

The roadmap does not address how the SEC would mandate IFRS; however, noted, an option would be for FASB to continue to be the designated standard setter for purposes of establishing the financial reporting standards in issuer filings with the Commission. In this option our presumption would be that FASB would incorporate all provisions under IFRS, and all future changes to IFRS, directly into generally accepted accounting principles as used in the United States. This type of approach has been adopted by a significant number of other jurisdictions when they adopted IFRS as the basis of financial reporting in their capital markets.

AICPA Launches IFRS.com Web Site

The AICPA is calling for an orderly transition and reasonable time frame of three to five years for the U.S. accounting profession to adopt IFRS. During a FASB forum on June 16, 2008, held to facilitate an open dialogue about whether and how to move the U.S. financial reporting system to IFRS and define next steps in that process, it was noted that awareness of IFRS is growing, but most believe it will take three to five years to prepare.

To assist in both awareness building and education, the AICPA launched a new Web site, www.ifrs.com, in May 2008. The site provides current information about developments in international convergence. The growing acceptance of IFRS as a basis for U.S. financial reporting represents a fundamental change for the U.S. accounting profession. Acceptance of a single set of high-quality accounting standards for worldwide use by public companies has been gaining momentum around the globe for the past few years.

Developed by the AICPA, in partnership with its marketing and technology subsidiary, CPA2Biz, IFRS.com provides a comprehensive set of resources for accounting professionals, auditors, financial managers, audit committees, and other users of financial statements.

The Web site features tools and resources to help CPAs get acquainted with IFRS, the surrounding issues, and available support. Resources include a history of convergence, a high-level overview of the differences between IFRS and U.S. GAAP, frequently asked questions, articles, textbooks, CPE courses and live conference training, helpful links, and assistance for audit committee members.
FASB Accounting Standards Codification™

.182 On January 15, 2008, FASB launched the one-year verification period of the FASB Accounting Standards Codification™ (ASC). FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing all authoritative literature in a topically organized structure. FASB ASC includes all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy, including FASB, AICPA, EITF, and related literature. FASB ASC also includes relevant authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance.

.183 The purpose of FASB ASC is not to change GAAP, but rather to reorganize thousands of GAAP pronouncements into approximately 90 topics. At the end of the one-year verification period, FASB is expected to formally approve FASB ASC as the single source of authoritative U.S. accounting and reporting standards, other than guidance issued by the SEC. At that time, FASB will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the codification will become nonauthoritative. FASB expects to approve FASB ASC in April 2009. FASB ASC can be accessed at http://asc.fasb.org/home.

.184 Constituents are encouraged to use the online FASB ASC Research System free of charge and provide feedback to FASB on the codification.

.185 The AICPA has published the Financial Reporting Alert FASB Codification Developments—2008 (product no. 029209kk). This Financial Reporting Alert is intended to provide a better understanding of FASB ASC, outline its structure, as well as provide case studies on navigating the FASB ASC Research System and perform accounting research.

Summary of Recent Accounting Pronouncements and Related Guidance

.186 Presented in the following table is a list of recently issued accounting pronouncements and related guidance. This alert is intended to be used in conjunction with the Comprehensive Audit Risk Alert—2008 (product no. 022339kk); therefore, only industry specific pronouncements and related guidance or those of specific significance to the industry are summarized herein. For information on accounting standards issued subsequent to the writing of this alert, please refer to the AICPA Web site at www.aicpa.org and the FASB Web site at www.fasb.org. You may also look for announcements of newly issued standards in the CPA Letter and Journal of Accountancy.

.187 Of the accounting pronouncements and related guidance listed in the previous table, those having particular significance to the financial institutions industry are briefly explained here. The following summaries are for informational purposes only and should not be relied upon as a substitute for a complete reading of the applicable standard. The Comprehensive Audit Risk Alert—2008 and other AICPA industry-specific alerts also contain summaries of recent pronouncements that may not be discussed here. To obtain copies of AICPA literature, call (888) 777-7077 or visit www.cpa2biz.com.

FASB Statement No. 163

.188 In May 2008, FASB issued Statement No. 163, Accounting for Financial Guarantee Insurance Contracts—an interpretation of FASB Statement No. 60. The scope of FASB Statement No. 163 is limited to financial guarantee insurance and reinsurance contracts issued by enterprises included in FASB Statement No. 60, Accounting and Reporting by Insurance Enterprises. Financial guarantee insurance and reinsurance contracts obligate the insurance enterprise to pay a claim upon the occurrence of an event of default. This statement does not apply to enterprises excluded from FASB Statement No. 60, financial guarantee insurance contracts that are accounted for as derivative instruments within the scope of FASB Statement No. 133, and some insurance contracts that are similar to financial guarantee insurance contracts issued by insurance enterprises (such as mortgage guaranty insurance and credit insurance on trade receivables).

.189 The new standard clarifies how FASB Statement No. 60 applies to financial guarantee insurance contracts issued by insurance enterprises. This includes the recognition and measurement of premium revenue and claim liabilities. The statement also requires expanded disclosures about financial guarantee insurance contracts. The provisions of FASB Statement No. 163 should be applied on a contract-by-contract basis.

.190 The accounting and disclosure requirements of FASB Statement No. 163 are intended to improve the comparability and quality of information provided to users of financial statements by creating consistency; for example, in the measurement and recognition of claim liabilities. The statement requires that an insurance enterprise recognize a claim liability prior to an event of default (insured event) when there is evidence that credit deterioration has occurred in an insured financial obligation. It also requires disclosure about (a) the risk-management activities used by an insurance enterprise to evaluate credit deterioration in its insured financial obligations and (b) the insurance enterprise’s surveillance or watch list.

.191 FASB Statement No. 163 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years. However, select disclosure requirements are effective for the first period (including interim periods) beginning after the issuance of this statement. Besides those select disclosures, early adoption is prohibited.

.192 To read FASB Statement No. 163 in its entirety, visit the FASB Web site at www.fasb.org.

Disclosures About Derivative Instruments and Hedging Activities

.193 In March 2008, FASB issued Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133. The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable
investors to better understand their effects on an entity’s financial position, financial performance, and cash flows.

194 The new standard improves transparency about the location and amounts of derivative instruments in an entity’s financial statements; how derivative instruments and related hedged items are accounted for under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*; and how derivative instruments and related hedged items affect its financial position, financial performance, and cash flows.

195 FASB Statement No. 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity’s liquidity by requiring disclosure of derivative features that are credit risk-related. Finally, it requires cross-referencing within footnotes to enable financial statement users to locate important information about derivative instruments. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged.

**Fair Value Measurements**

*FASB Statement No. 157*

196 In September 2006, FASB issued Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances.

197 Prior to this statement, there were different definitions of fair value, and guidance for applying those definitions was dispersed among many accounting pronouncements. Difference in the existing guidance created inconsistencies that added to the complexity in applying GAAP. FASB Statement No. 157 provides increased consistency and comparability in fair value measurements. Expanded disclosures about the use of fair value to measure assets and liabilities should provide users of financial statements with better information about the use of fair value in the financial statements, the inputs used to develop the measurements, and the effect of the measurements on earnings (or changes in net assets) for the period.

198 In February 2008, FASB issued FSP FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which amends FASB Statement No. 157, to exclude FASB Statement No. 13, *Accounting for Leases*, and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under FASB Statement No. 13. However, this scope exception does not apply to assets acquired and liabilities assumed in a business combination that are required to be measured at fair value under FASB Statement No. 141, *Business Combinations*, or FASB Statement No. 141 (revised 2007), *Business Combinations*, regardless of whether those assets and liabilities are related to leases. This FSP is effective upon the initial adoption of FASB Statement No. 157.

199 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Early adoption is permitted. However, in February 2008, FASB also issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which is effective upon issuance. This FSP delays the effective date of FASB Statement No. 157 until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years for fair value measurements of all nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The delay is intended to allow FASB and its constituents the time to consider the various implementation issues associated with FASB Statement No. 157. In October 2008, FASB issued FSP FAS 157-3, which clarifies FASB Statement No. 157’s application in an inactive market and also amends the standard to include an illustrative example. See the section of this alert “Measurements of Fair Value in Illiquid Markets” for further discussion of FSP FAS 157-3. Readers can
access the full text of FASB Statement No. 157 and the previously referenced FSPs on the FASB Web site at www.fasb.org.

**FASB Statement No. 159**

.200 Subsequent to the issuance of FASB Statement No. 157, FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*. This statement is expected to expand the use of fair value measurement, which is consistent with FASB’s long-term measurement objectives for accounting for financial instruments. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. FASB Statement No. 159 allows entities to choose to measure many financial instruments and certain other items at fair value. The standard permits an entity to elect the fair value option on an instrument-by-instrument basis; and once the election is made, it is irrevocable. This statement’s objective is to improve financial reporting by providing entities with an opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently, without having to apply complex hedge accounting provisions.

.201 In addition, FASB Statement No. 159 establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. The statement does not eliminate disclosure requirements included in other accounting standards, such as the requirements for disclosures about fair value measurements included in FASB Statement No. 107, *Disclosures about Fair Value of Financial Instruments*, and FASB Statement No. 157.

.202 FASB Statement No. 159 is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. FASB and the SEC expressed concern in the way some early adopters applied the transition provisions of the standard. The CAQ issued an alert on this development in April 2007. The alert advises auditors to exercise appropriate professional skepticism when evaluating if a principles-based standard, such as this, is applied in a good faith manner consistent with those objectives and principles. Specifically, the alert warns auditors to “be alert for circumstances in which an entity proposes to adopt FASB Statement No. 159 in a manner that is contrary to the principles and objectives outlined in the standard.” The alert can be accessed at www.thecaq.org/newsroom/pdfs/CAQPressRelease_041807a.pdf. Readers can access the full text of FASB Statement No. 159 on the FASB Web site at www.fasb.org.

**Recent AICPA Independence and Ethics Pronouncements**

.203 AICPA Audit Risk Alert *Independence and Ethics Developments—2008* (product no. 022479kk) contains a complete update on new independence and ethics pronouncements. This alert can be obtained by calling the AICPA at (888) 777-7077 or visiting www.cpa2biz.com. Readers should obtain this alert to be aware of independence and ethics matters that will affect their practice.

**On the Horizon**

.204 Auditors should keep abreast of auditing and accounting developments and upcoming guidance that may affect their engagements. The following sections present brief information about some ongoing projects that have particular significance to the financial institutions industry or that may result in significant changes. Remember that exposure drafts are nonauthoritative and cannot be used as a basis for changing existing standards.

.205 The following table lists the various standard-setting bodies’ Web sites, where information may be obtained on outstanding exposure drafts, including downloading exposure drafts. These Web sites contain in-depth information about proposed standards and other projects in the pipeline. Many more accounting and auditing projects exist in addition to those discussed here. Readers should refer to information provided by the various standard-setting bodies for further information.
Auditing Pipeline—Nonissuers

*ASB Clarity Project*

.206 In response to growing concerns about the complexity of standards, the ASB has commenced a large-scale clarity project to revise all existing auditing standards so they are easier to read and understand. Over the next two or three years, the ASB will be redrafting all of the existing auditing sections contained in the *Codification of Statements on Auditing Standards* (AU sections of the AICPA’s *Professional Standards*), to apply the clarity drafting conventions and to converge with the International Standards on Auditing issued by the International Auditing and Assurance Standards Board. The ASB proposes that, except to address current issues, all redrafted standards will become effective at the same time. Only those standards needing to address current issues would have earlier effective dates. The ASB believes that a single effective date will ease the transition to, and implementation of, the redrafted standards. The effective date will be long enough after all redrafted statements are finalized to allow sufficient time for training and updating of firm audit methodologies. Currently, the date is expected to be for audits of financial statements for periods beginning no earlier than December 15, 2010. This date depends on satisfactory progress being made, and will be amended should that prove necessary. See the Clarity Project Explanatory Memorandum and the discussion paper *Improving the Clarity of ASB Standards* at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Audit+and+Attest+Standards/Improving+the+Clarity+of+ASB+Standards.htm.

**Auditing Pipeline—Issuers**

.207 Guidance issued by the PCAOB is included in the section of this alert titled “Summary of Recent Auditing and Attestation Pronouncements and Related Guidance.” For more information regarding recent developments at both the SEC and PCAOB, readers may refer to Audit Risk Alert *SEC and PCAOB Developments—2008*.

**Accounting Pipeline**

.208 There are a number of accounting projects and pronouncements currently in progress. For a summary of significant accounting projects and pronouncements, refer to *Comprehensive Audit Risk Alert—2008* (product no. 022339kk). Such in progress issues include the following:

- Accounting for hedging activities exposure draft
- Accounting for contingencies exposure draft
- Phase 2 of the fair value project
- Transfers of financial assets project
- Earnings per share convergence project
• Income tax convergence project
• Leases project
• Reporting discontinued operations project
• Going concern proposed statement
• Subsequent events proposed statement
• Amendments to FASB Interpretation No. (FIN) 46(R), *Consolidation of Variable Interest Entities (revised December 2003)—an interpretation of ARB No. 51*, proposed statement

**Proposed FASB EITF Issues and FSPs**

.209 *Proposed FASB EITF Issues*. Numerous open issues are under deliberation by the EITF. Readers should visit the FASB Web site at www.fasb.org/eitf/agenda.shtml for complete information.

.210 *Proposed FSPs*. A number of proposed FSPs are currently in progress. Readers should visit the FASB Web site at www.fasb.org/fasb_staff_positions/ for complete information.

**Resource Central**

.211 The following are various resources that practitioners engaged in the financial institutions industry may find beneficial.

**Publications**

.212 Practitioners may find the following publications useful. Choose the format best for you—online, print, or CD-ROM.

• Audit and Accounting Guide *Depository and Lending Institutions: Banks and Savings Institutions, Credit Unions, Finance Companies, and Mortgage Companies* (2008) (product no. 012738kk [paperback], WDL-XX [online with the associated Audit Risk Alert], or DDL-XX [CD-ROM with the associated Audit Risk Alert])

• Audit and Accounting Guide *Investment Companies* (2008) (product no. 012628kk [paperback], WIN-XX [online with the associated Audit Risk Alert], or DIN-XX [CD-ROM with the associated Audit Risk Alert])

• Audit Guide *Analytical Procedures* (2008) (product no. 012558kk [paperback], WAN-XX [online], or DAN-XXkk [CD-ROM])

• Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* (2006) (product no. 012456kk [paperback] or WRA-XX [online])

• Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (2008) (product no. 012528kk [paperback], WDI-XX [online], or DDI-XX [CD-ROM])

• Audit Guide *Audit Sampling* (2008) (product no. 012538kk [paperback], WAS-XX [online], or DAS-XX [CD-ROM])

• Audit Guide *Service Organizations: Applying SAS No. 70, as Amended* (2008) (product no. 012778kk [paperback], WSV-XX [online], or DSV-XX [CD-ROM])

• Comprehensive Audit Risk Alert—2008 (product no. 022339kk [paperback], WGE-XX [online], or DGE-XX [CD-ROM])

• Audit Risk Alert *Independence and Ethics Developments—2008* (product no. 022479kk [paperback], WIA-XX [online], or DIA-XX [CD-ROM])

• Audit Risk Alert *SEC and PCAOB Developments—2008* (product no. 022499kk [paperback])
• Audit Risk Alert *Understanding the New Auditing Standards Related to Risk Assessment* (product no. 022526kk [paperback])

• *Checklists and Illustrative Financial Statements for Depository and Lending Institutions* (2008) (product no. 008919 [paperback] or WDP-CL [online])

• *Audit and Accounting Manual* (2008) (product no. 005138kk [paperback], WAM-XX [online], or AAM-XX [loose leaf])

• *Accounting Trends & Techniques, 62nd Edition* (product no. 009900kk [paperback] or WAT-XX [online])

.213 Additional resources for accountants in business and industry are the Financial Reporting Alert series, designed to be used by members of an entity’s financial management and audit committee to identify and understand current accounting and regulatory developments affecting the entity’s financial reporting.

• Financial Reporting Alert *Current Accounting Issues and Risks—2008* (product no. 029208kk [paperback])

• Financial Reporting Alert *FASB Codification Developments—2008* (product no. 029209kk [paperback])

**AICPA reSOURCE: Accounting and Auditing Literature**

.214 The AICPA has created your core accounting and auditing library online. AICPA reSOURCE is now customizable to suit your preferences or your firm’s needs. Or, if you prefer to have access to the entire library, that is available too. Get access—anytime, anywhere—to the AICPA’s latest *Professional Standards*, *Technical Practice Aids*, *Audit and Accounting Guides* (more than 20), *Audit Risk Alerts* (more than 15), and *Accounting Trends & Techniques*. To subscribe to this essential online service for accounting professionals, go to www.cpa2biz.com.

**Continuing Professional Education**

.215 The AICPA offers a number of continuing professional education (CPE) courses that are valuable to CPAs working in public practice and industry, including the following:

• *AICPA’s Annual Accounting and Auditing Update Workshop (2008–2009 Edition)* (product no. 736184kk [text] or 187192kk [DVD]). Whether you are in industry or public practice, this course keeps you current and informed and shows you how to apply the most recent standards.

• *SEC Reporting* (product no. 736775kk [text] or 186756kk [DVD]). Confidently comply with the latest SEC reporting requirements with this comprehensive course. It clarifies new, difficult, and important reporting and disclosure requirements while giving you examples and tips for ensuring compliance.

• *International Versus U.S. Accounting: What in the World is the Difference?* (Product no. 731666kk [text]). With the fast pace of the convergence project, understanding the differences between IFRS and U.S. GAAP is becoming more important for businesses of all sizes. This course outlines the major differences between IFRS and U.S. GAAP.

• *The International Financial Reporting Standards: An Overview* (product no. 157220kk [online] or 739750HSkk [DVD]). This course captures a live presentation on IFRS given to the AICPA Board of Directors.

.216 Among the many courses, *Audits of Banks and Other Financial Institutions* (product no. 733440kk [self study]) offers industry-specific information you may find useful. Visit www.cpa2biz.com for a complete list of CPE courses.

**Online CPE**

.217 AICPA CPEExpress (formerly AICPA InfoBytes), offered exclusively through CPA2Biz.com, is the AICPA’s flagship online learning product. AICPA members pay $180 for a new subscription and $149 for
the annual renewal. Nonmembers pay $435 for a new subscription and $375 for the annual renewal. Divided into 1-credit and 2-credit courses that are available 24 hours a day, 7 days a week, AICPA CPEExpress offers hundreds of hours of learning in a wide variety of topics. Some topics of special interest to the financial institutions industry include the following:

- Auditing Financial Institutions: Cash, Investments, Intangibles, Real Estate, and Deposits
- Auditing Financial Institutions: Credit Losses
- Auditing Financial Institutions: Equity, Capital, and Capital Disclosures
- Auditing Financial Institutions: Regulatory and Government Supervision Plus General Auditing and Reporting Issues
- Revenue Recognition: Depository and Lending Institutions, Health Care, Insurance, Real Estate

To register or learn more, visit www.cpa2biz.com.

Webcasts

Stay plugged in to what is happening and earn CPE credit right from your desktop. AICPA webcasts are high quality, two-hour CPE programs that bring you the latest topics from the profession’s leading experts. Broadcast live, they allow you to interact with the presenters and join in the discussion. If you cannot make the live event, each webcast is archived and available on CD-ROM.

CFO Quarterly Roundtable Series

The CFO Quarterly Roundtable Webcast Series, brought to you each calendar quarter, covers a broad array of “hot topics” that successful organizations employ and subjects that are important to the CFO’s personal success. From financial reporting and budgeting, and forecasting to asset management and operations, the roundtable helps CFOs, treasurers, controllers, and other financial executives excel in their demanding roles.

SEC Quarterly Update Series

The SEC Quarterly Update Webcast Series, brought to you each calendar quarter, showcases the profession’s leading experts on what is “hot” at the SEC. From corporate accounting reform legislation and new regulatory initiatives to accounting and reporting requirements and corporate finance activities, these hard-hitting sessions will keep you “plugged in” to what is important. A must for preparers in public companies and practitioners who have public company clients, this is the place to be when it comes to knowing about the areas of current interest at the SEC.

Member Service Center

To order AICPA products, receive information about AICPA activities, and find help on your membership questions, call the AICPA Service Operations Center at (888) 777-7077.

Hotlines

Accounting and Auditing Technical Hotline

Do you have a complex technical question about GAAP, other comprehensive bases of accounting, or other technical matters? If so, use the AICPA’s Accounting and Auditing Technical Hotline. AICPA staff will research your question and call you back with the answer. Beginning January 14, 2008, hotline hours were extended so that the hotline is now available from 9 a.m. to 8 p.m. on weekdays. You can reach the Technical Hotline at (877) 242-7212 or at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+and+Auditing+Technical+Help/.
Ethics Hotline

.224 In addition to the Technical Hotline, the AICPA also offers an Ethics Hotline. Members of the AICPA’s Professional Ethics Team answer inquiries concerning independence and other behavioral issues related to the application of the AICPA Code of Professional Conduct. You can reach the Ethics Hotline at (888) 777-7077.

Industry Conference

.225 The AICPA offers an annual National Banking School. The National Banking School, next offered in May 2009, covers every major aspect of bank operations and accounting using case studies, classroom discussion, and a simulated bank environment. The AICPA also offers a National Conference on Banks and Savings Institutions. The National Conference on Banks and Savings Institutions is a three-day conference designed to update attendees on recent developments related to audit, accounting, regulatory and legislative, and tax issues affecting the industry. For further information about these, call (888) 777-7077 or visit www.cpa2biz.com.

The CAQ

.226 The CAQ, which is affiliated with the AICPA, was created to serve investors, public company auditors, and the markets. The CAQ’s mission is to foster confidence in the audit process and to aid investors and the capital markets by advancing constructive suggestions for change rooted in the profession’s core values of integrity, objectivity, honesty, and trust.

.227 To accomplish this mission, the CAQ works to make public company audits even more reliable and relevant for investors in a time of growing financial complexity and market globalization. The CAQ also undertakes research, offers recommendations to enhance investor confidence and the vitality of the capital markets, issues technical support for public company auditing professionals, and helps facilitate the public discussion about modernizing business reporting. The CAQ is a voluntary membership center that supports member firms that audit or are interested in auditing public companies with education, communication, representation, and other means. To learn more about the CAQ, visit http://thecaq.aicpa.org.

AICPA Industry Expert Panel—Depository Institutions

.228 For information about the activities of the AICPA Depository Institutions Expert Panel, visit the AICPA Web site at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/expertpanel_depository.htm.

Industry Web Sites

.229 The Internet covers a vast amount of information that may be valuable to auditors of financial institutions, including current industry trends and developments. Some of the more relevant sites for auditors with financial institution clients include those shown in the following table:

<table>
<thead>
<tr>
<th>Organization</th>
<th>Web Site</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal Deposit Insurance Corporation</td>
<td><a href="http://www.fdic.gov">www.fdic.gov</a></td>

Employee Benefit Plans Industry Developments—2009

STRENGTHENING AUDIT INTEGRITY
SAFEGUARDING FINANCIAL REPORTING

Notice to Readers

This Audit Risk Alert is intended to provide auditors of financial statements of employee benefit plans with an overview of recent economic, industry, technical, regulatory, and professional developments that may affect the audits and other engagements they perform.

This publication is an other auditing publication as defined in AU section 150, Generally Accepted Auditing Standards (AICPA, Professional Standards, vol. 1). Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the Statements on Auditing Standards.

If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate. The auditing guidance in this document has been reviewed by the AICPA Audit and Attest Standards staff and published by the AICPA and is presumed to be appropriate. This document has not been approved, disapproved, or otherwise acted on by a senior technical committee of the AICPA.

Linda C. Delahanty, CPA
Technical Manager
Audit and Attest Standards

Acknowledgments

The AICPA staff gratefully acknowledges the Employee Benefit Plans Guide Task Force; the Office of the Chief Accountant, the Employee Benefits Security Administration; and JulieAnn Verrekia for their essential contributions in creating this publication.

How This Alert Helps You

.01 This Audit Risk Alert helps you plan and perform your employee benefit plan audits and also can be used by an entity’s internal management to address areas of audit concern. This alert provides information to assist you in achieving a more robust understanding of the business, economic, and regulatory environments in which your clients operate. This alert is an important tool to help you identify the significant risks that may result in the material misstatement of financial statements and delivers information about emerging practice issues and current accounting, auditing, and regulatory developments. You should refer to the full text of accounting and auditing pronouncements as well as the full text of any rules or publications that are discussed in this alert.

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

.02 Paragraph .01 of AU section 314, Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement (AICPA, Professional Standards, vol. 1), establishes requirements and provides guidance about implementing the second standard of field work, as follows: “The auditor must obtain a sufficient
understanding of the entity and its environment, including its internal control, to assess the risks of material
misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and
extent of further audit procedures.” Just as the external environment changes, the handling of the entity’s
business is also dynamic, and the entity’s strategies and objectives change over time. An understanding of
business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does
not have a responsibility to identify or assess all business risks. Most business risks will eventually have
financial consequences and, therefore, an effect on the financial statements. However, not all business risks
give rise to risks of material misstatement.

Economic and Industry Developments

The Current Economic Crisis

.03 When planning and performing an audit of an employee benefit plan, an auditor should understand
the economic conditions facing the industry in which the plan sponsor operates as well as the effects of these
conditions on the employee benefit plan. Economic activities relating to factors such as interest rates,
availability of credit, consumer confidence, overall economic expansion or contraction, inflation, and labor
market conditions are likely to have an effect on the audit of the plan’s financial statements. Although it is
impossible to predict and include all accounting, auditing, and attestation issues that may affect employee
benefit plan audits, the primary areas of concern given the current economic conditions are described in this
alert. As always, continue to remain alert to changes in economic, legislative, and regulatory developments
as well as the associated accounting, auditing, and attestation issues as you perform your engagements.

.04 Recent economic conditions and regulatory actions may cause additional risk factors that had not
previously existed or did not have a material effect on the audit of the plan in prior years. Some challenges
that may affect the plan in the current economic conditions are as follows:

- Constraints on the availability of capital and credit
- The credit crisis, which results in significant measurement uncertainty, including accounting esti-
mates and fair value measurements
- Operations that are exposed to volatile markets, such as currency markets
- Volatile real estate markets
- Severely underfunded defined benefit plans
- Downsizing causing significant layoffs
- Going concern and liquidity issues
- Fraudulent internal and external transactions

.05 Although many of these risks are not new for plan audits, consideration of the ways an employee
benefit plan is affected by external forces is part of obtaining an understanding of the plan and its environment
and will allow the auditor to plan and perform the audit to address those risks. As noted in paragraph .17
of AU section 312, Audit Risk and Materiality in Conducting an Audit (AICPA, Professional Standards, vol. 1), some
possible audit responses to a significant risk of material misstatement include increasing the extent of audit
procedures, performing procedures closer to year-end, or increasing audit procedures to obtain more
persuasive evidence. Additionally, given the constant changing status of economic conditions that could affect
your plan audit, auditors should consider modifying audit procedures to ascertain that risks are still
adequately addressed.

.06 Currently, the U.S. economy continues to experience severe instability. The National Bureau of
Economic Research officially declared that, as of December 2007, the United States slid into a recession. The
length of the recession and whether the United States will enter into a depression are yet to be determined.
Some key occurrences that exhibit the gravity of the economic crisis include the following:
• Government intervention in the private sector has increased. Numerous financial institutions and automakers have received a bailout from the government.

• Millions of households owe more on their mortgages than their homes are currently worth. The number of residential home foreclosures has increased to record levels; in January 2009, foreclosures were up 18 percent from January 2008.

• The number of jobless claims has continued to increase; the economy has experienced the biggest job loss since the end of World War II.

• U.S. real gross domestic product (GDP), the broadest measure of economic activity, continues to decrease at an increasing rate.

• The financial markets continue to experience instability. At the end of February 2009, the S&P 500 hit a 12-year low. Likewise, the Dow Jones Industrial Average and NASDAQ also continue to hit long-time lows.

• The Federal Reserve has continued to decrease the federal fund interest rate.

• The demand for U.S. Treasury bills has increased at a staggering rate, which drove the interest rate for these Treasury bills to less than 1 percent in February 2009.

• The Treasuries Over Eurodollar Spread reached 4.63 percent in October 2008, a historic high.

• The discovery of alleged frauds in hedge funds or in other alternative investments has caused investors to lose millions of dollars.

• Certain investments that were once considered safe investments, such as money market funds and securities lending activities, have “broken the buck” and are now experiencing write downs.

Some experts have attributed the current situation with the residential real estate industry to the perfect storm of circumstances: rising home values, historically low interest rates, loosening underwriting and lending standards, and the notion that housing was a fail-safe investment. As these problems with the real estate market became evident, they have had a significant effect on the credit market. As the credit markets have become frozen and banks have become unwilling to lend to consumers or to one another, the downward sloping cycle perpetuates, resulting in continued stress on the overall economy.

One major spillover effect of these events has been in the market for short term commercial paper, particularly securities backed by various financial assets. Various money market funds (both registered and unregistered) have acknowledged investments in troubled paper. They have enhanced their procedures to monitor the differences between net asset value as determined using amortized cost and market values of securities, as required by Rule 2a-7 under the Investment Company Act of 1940 or other equivalent regulations. Some money market funds may have material differences between amortized cost and the market value of securities, resulting in a share value reported in the audited financial statements that is different than what is used for participant transactions and reported on the trustee or custodial statements at year-end.

Government Intervention to Curtail the Economic Crisis

Due to the economic crisis, the U.S. government has taken unprecedented actions to prevent worsening economic conditions, including passing the American Recovery and Reinvestment Act of 2009 (ARRA) in February 2009 and the Emergency Economic Stabilization Act of 2008 (EESA), facilitating the sale of ailing banks, and dramatically increasing the monetary programs available from the Federal Reserve.

The EESA was signed into law in October 2008. As stated in Section 2 of the EESA bill, it “provide[s] authority and facilities that the Secretary of the Treasury can use to restore liquidity and stability to the financial system of the United States” to ensure the economic wellbeing of Americans. Certain components of the EESA bill include the following:

• An allocation of $700 billion to stabilize the U.S. financial system

• The creation of an oversight board
• A temporary increase of Federal Deposit Insurance Corporation insurance limits
• The restatement of the Securities and Exchange Commission’s (SEC’s) authority to suspend the application of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements, (which is codified at FASB Accounting Standards Codification [ASC] 820, Fair Value Measurements and Disclosures)

.11 In February 2009, President Obama signed legislation designed to work hand in hand with the EESA to stimulate the U.S. economy. The ARRA is designed primarily to combat the rising unemployment trend, put more money in the hands of consumers, and reduce the likelihood that state and local governments will need to raise taxes significantly.

.12 Many of the provisions of this legislation took effect immediately in an effort to stimulate consumer spending and boost the economy. The total cost of the spending in the ARRA is $787 billion, which is in addition to the $700 billion in the EESA. Many economists are concerned that further financial support may be necessary before an economic recovery is possible. Additionally, the federal government developed the Web site www.recovery.gov to facilitate a transparent process to ensure accountability for the execution of the package.

.13 The complete effects of the ARRA as well as the other government interventions will take time to be felt throughout the economy; however, the primary goal is to first increase market confidence and liquidity.

Effect on Employee Benefit Plans

.14 Pricing services typically used by plan trustees or custodians to provide investment prices, such as Interactive Data Pricing and Reference Data, have issued press releases to inform users that they are experiencing difficulties in obtaining consistent market information in the production of valuations of subprime-related securities. Therefore, certain service providers have enhanced their procedures to respond to these issues including, among other things, more frequent monitoring of the differences between amortized cost and the market value of securities for money market funds and close monitoring of the portfolios for exposure to these markets and the associated valuations of these securities.

.15 Additionally, the risks related to securities lending have become too great for the incremental income that can be earned. These risks recently surfaced in investment vehicles where managers of securities lending programs invest the cash collateral they receive from borrowers. That collateral was typically 102 percent of domestic shares and 105 percent of the value of non-U.S. shares. Institutional investors thought the collateral was invested in “safe” securities. Unfortunately, the range of permissible investments expanded into asset-backed securities and home equity loans. Both of these events are causing liquidity issues for plans and plan sponsors. See paragraphs .130–.132 for further discussion of securities lending.

.16 The credit crisis also raises concerns among plan sponsors about the ability for insurance companies to pay out claims on the annuity products sold to benefit plans and the safety of guaranteed annuities. Insurance companies are now hoping that the government has funds for a bail out program for them.

.17 Also, due to the significant upheaval in the current market, auditors may want to pay particular attention to the plan’s liquidity, and whether the current conditions could affect the plan sponsor and plan’s ability to continue as a going concern. AU section 341, The Auditor’s Consideration of an Entity’s Ability to Continue as a Going Concern (AICPA, Professional Standards, vol. 1), requires auditors to evaluate whether there is substantial doubt about an entity’s ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. AU section 380, The Auditor’s Communication With Those Charged With Governance (AICPA, Professional Standards, vol. 1), requires that auditors communicate with those charged with governance events or conditions that lead the auditor to believe there is substantial doubt about the entity’s ability to continue as a going concern. See paragraphs .65–.70 for further discussion of going concern matters in an employee benefit plan audit.
Events or transactions sometimes occur that affect the fair value of financial instruments, subsequent to the balance-sheet date but prior to the issuance of the financial statements that have a material effect on the financial statements and therefore require adjustment or disclosure in the statements. The determination of whether such information represents a type 1 or type 2 subsequent event is highly judgmental and will be based on the specific facts and circumstances. For example, the subsequent events procedure to review trustee or custodial statements after year-end may identify pricing adjustments to investment accounts. Auditors may consider if the adjustment resulted from specific market events occurring (a) after year-end (type 2 event) or (b) as of year-end (type 1). Type 1 subsequent events may need to be recorded as an adjustment to the year-end financial statements. See AU section 560, Subsequent Events (AICPA, Professional Standards, vol. 1), for further guidance. Flexibility in auditing procedures will help the auditor to respond to changes in market conditions.

In addition, auditors should consider the requirements of Statement of Position (SOP) 94-6, Disclosure of Certain Significant Risks and Uncertainties (AICPA, Technical Practice Aids, ACC sec. 10,640), about disclosing significant risks and uncertainties in the plan’s financial statements at year-end regarding investments affected by subprime, illiquid, or other market events. The following is an example of such a disclosure:

The plan invests in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market’s perception of the issuers and changes in interest rates.

Additional disclosures may also be required related to defined benefit plans due to the deficit between plan assets and the plan’s accumulated plan benefit obligations and funding requirements.

The current economic crisis may result in unexpected losses and possibly cause financing or liquidity difficulties for many plans and plan sponsors. Additionally, plan sponsors may be valuing illiquid securities using inherently subjective methodologies. These situations may provide plan management additional opportunity and incentive to commit fraud.

As seen in the news recently, a number of frauds allegedly have occurred. One of those frauds is that of Bernard Madoff Investment Securities. Although the details of this fraud are just beginning to be investigated, the planning and design of testing for the existence of assets, such as investments, is important. In addition, the requirements in AU section 314 are further emphasized in light of this alleged scenario. In this scenario, auditors are being probed about failing to question the strong, consistent annual returns by these investment funds that lacked a clear investment strategy. Because of the characteristics of fraud, the auditor’s exercise of professional skepticism is important when considering the risk of material misstatement due to fraud.

Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor’s belief about management’s honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. AU section 316, Consideration of Fraud in a Financial Statement Audit (AICPA, Professional Standards, vol. 1), provides additional information including ways for the auditor to respond to the risk of material misstatement due to fraud.

Due to the current economic crisis and the recent developments involving financial frauds in managed investment funds, the U.S. Department of Labor (DOL) is expanding the scope of its inspection programs to consider the current status of the investments being reviewed. The DOL plans to emphasize its focus on how plan management determines that investments exist and that their values have been adjusted to reflect the current market conditions.

Additional areas of fraudulent transactions could result due to the economic crisis related to the operation of the plan. Defalcations, inappropriate vesting of participants, ineligible participants included in

AICPA Audit and Accounting Manual
the plan, and inappropriate assumptions for Defined Benefit and Health and Welfare plan obligations are possible areas to consider.

.26 AU section 316 is the primary source of authoritative guidance about an auditor's responsibilities concerning the consideration of fraud in a financial statement audit. AU section 316 establishes standards and provides guidance to auditors in fulfilling their responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement (whether the material misstatement was caused by error or fraud as stated in paragraph .02 of AU section 110, Responsibilities and Functions of the Independent Auditor [AICPA, Professional Standards, vol. 1]).

.27 In addition, the significant number of layoffs at plan sponsors will affect employee benefit plans. For a defined benefit pension plan, this may add to the liquidity issues that the plan faces. For a defined contribution plan, a provision of the Internal Revenue Code (IRC) requires that all participants be fully vested in the event of a partial termination. This is a technical term that does not have a clear definition. It has been interpreted to apply where 20 percent or more of the workers have lost their jobs due to an event such as a plant closing or economic downturn. Because many plans use forfeitures to reduce employer contributions or to pay expenses, it is important for the client to properly identify when such a partial termination has occurred. See paragraph 12.21 of the Audit and Accounting Guide Employee Benefit Plans for further guidance.

**Resources for Economic Information**

.28 The Internet covers a vast amount of information that you may find valuable. See appendix E for some of the sites not previously mentioned in this section and links to relevant documents regarding economic information.

**Hot Topics**

**Fair Value Measurements and Disclosures**

*AASB Statement No. 157*

.29 In September 2006, FASB issued FASB Statement No. 157 to provide enhanced guidance for using fair value to measure assets and liabilities. This standard defines fair value and expands disclosures about fair value measurements. The standard applies whenever other standards require (or permit) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. FASB Statement No. 157 amends paragraph 11 of FASB Statement No. 35, Accounting and Reporting by Defined Benefit Pension Plans, to change the definition of fair value.

.30 For plan assets and liabilities that are traded in active markets, fair value is determined based on quoted market prices. If quoted market prices for identical assets and liabilities are not available, the plan uses valuation techniques that should maximize the use of observable inputs (assumptions based on market data) and minimize the use of unobservable inputs. In measuring fair value, the plan should make adjustments for risks and uncertainties if a market participant would include such an adjustment in its pricing. FASB Statement No. 157 requires entities to make certain disclosures for each major category of assets and liabilities that are measured at fair value, including the level within the fair value hierarchy in which the fair value measurements fall as discussed in paragraphs 22–31 of the standard. Please refer to paragraphs 32–35 of the standard for disclosure requirements.

.31 FASB Statement No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. A contention with FASB Statement No. 157 is in regard to lack of guidance in applying fair value in an illiquid or distressed market, such as the current one. To respond to this concern, in October 2008, FASB issued FASB Staff Position (FSP) FAS 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active, which clarifies FASB Statement No. 157's application in an inactive market and also amends the standard to include an illustrative example. In March 2009, FASB posted for comment, proposed FSP FAS 157-e, Determining Whether a Market Is Not Active.
and a Transaction Is Not Distressed, which would provide additional guidance on determining whether a market for a financial asset is not active and a transaction is not distressed for fair value measurements under FASB Statement No. 157. Readers can access the full text of FASB Statement No. 157 and the previously referenced FSPs and proposed FSP on the FASB Web site at www.fasb.org.

**Effect on Employee Benefit Plans and Plan Sponsors**

.32 Preparing to meet the requirements of FASB Statement No. 157 will require coordination among plan management, custodians, investment fiduciaries, and auditors. Generally accepted accounting principles (GAAP) require plan management to take responsibility for valuation and the Form 5500, Annual Return/Report of Employee Benefit Plan, requires assets to be reported at current value. Plan administrators have a fiduciary responsibility to ensure the accuracy of the information reported on the Form 5500. The nonauthoritative practice aid *Alternative Investments—Audit Considerations* states that “management of the investor entity is responsible for the valuation of alternative investment amounts as presented in the investor entity’s financial statements” and “this responsibility cannot, under any circumstances, be outsourced or assigned to a party outside of the investor entity’s management.” Therefore, plan management can delegate but not abdicate its valuation responsibility. Although the plan sponsor is responsible for establishing an accounting and financial reporting process for determining fair value measurements, the plan sponsor will typically rely on the trustee or custodian for the pricing of its investments. The trustee or custodian may use an outside service provider or pricing service for valuation of the investments. Because many plans outsource investment management activities to third party service providers, information regarding the pricing and valuation of the plan’s investments may not be fully transparent to those responsible for financial reporting.

.33 Plan management is ultimately responsible for the fair values reported in the financial statements and is obligated to carefully consider how third-party input is used in estimating fair value. Accordingly, plan management needs to understand and document the pricing inputs used by plan custodians and others used to value each plan investment in order to properly classify each investment into the appropriate level within the FASB Statement No. 157 hierarchy. Service providers are not typically making the hierarchy level decisions for plans. Plan management will need to obtain pricing service documentation describing the valuation methods they or their custodians use to support their fair value hierarchy. Pricing services typically used by plan trustees or custodians to provide investment prices, such as Interactive Data Pricing and Reference Data, have prepared this information.

.34 Accordingly, for full scope audits, auditors may consider the procedures and controls put in place by the plan sponsor and service provider to identify hard to value investments; validate the reliability of pricing or institute fair value procedures, or both, if necessary; monitor the collectability of accrued income; and modify reporting and disclosures based on the exposure of these markets in their plans. Auditors may also consider the need to enhance audit procedures to ascertain that prices obtained from pricing services are reasonable, including the use of multiple pricing sources or valuation experts to review any pricing models or fair value methodologies put in place, or both.

.35 Additional time may be needed this year to prepare and audit the investment information. Implementation issues will vary based on the types of investments held and the availability of information. Valuing different types of financial instruments, including understanding whether the valuation assumptions and methods used are appropriate under FASB Statement No. 157, and obtaining additional information about
valuation inputs to make the appropriate note disclosures may present plan sponsors and administrators with significant challenges.

| Help Desk—For audits of issuers, such as Form 11-K audits, the guidance in Public Company Accounting Oversight Board (PCAOB) Staff Audit Practice Alert No. 2, Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists (AICPA, PCAOB Standards and Related Rules, PCAOB Staff Guidance, sec. 400.02), would be applicable. |

.36 For limited scope audits, if the auditor becomes aware that the certified information relating to such investments is inaccurate as a result of valuation or other concerns, further inquiry may be necessary that might result in additional testing or modification to the auditor’s report. See the “Limited Scope Audits” section (paragraphs .52–.60) of this alert for further guidance.

.37 The AICPA Employee Benefit Plan Audit Quality Center (EBPAQC) has developed the following documents to assist readers, plan sponsors, and administrators with implementing FASB Statement No. 157:

- Getting Started: Applying New Accounting Rules for Measuring and Reporting Fair Value of Plan Investments
- Assessing the Fair Values of Your Plan Investments
- Alternative Investments in Employee Benefit Plans

Auditing Fair Value Measurements

.38 As was stated previously, it is plan management’s responsibility to make the fair value measurements and disclosures. When auditing these fair values to ensure they are in conformity with GAAP, auditors should consult AU section 328, Auditing Fair Value Measurements and Disclosures (AICPA, Professional Standards, vol. 1), which establishes standards and provides guidance for auditors. Specific types of fair value measurements are not covered by AU section 328. For example, when auditing the fair value of derivatives and securities, refer to AU section 332, Auditing Derivative Instruments, Hedging Activities, and Investments in Securities (AICPA, Professional Standards, vol. 1).

.39 The strongest audit evidence to support a fair value is an observable market price in an active market. If that is not available, a valuation method may incorporate market assumptions. If market assumptions are not available or require significant adjustments, the entity may use its own assumptions. The auditor should obtain an understanding of the entity’s process for determining fair values, as well as whether the fair value measurements and disclosures are in accordance with GAAP. During this testing, the auditor also may identify possible indicators of impairment. According to paragraph .23 of AU section 328, “Substantive tests of the fair value measurements may involve (a) testing management’s significant assumptions, the valuation model, and the underlying data; (b) developing independent fair value estimates for corroborative purposes; or (c) reviewing subsequent events and transactions.” Paragraph .26 also notes when testing the fair value measurements and disclosures, the auditor evaluates whether management’s assumptions are reasonable and reflect market information, or are not consistent with market information. In relation to FASB Statement No. 157, this might include whether the market is distressed, whether the transaction was an orderly transaction, the reasonableness of the determination within the fair value hierarchy of inputs, and the reasonableness of the underlying assumptions.

.40 It is important for the auditor to be aware of the increased risk posed by current market conditions and to develop or modify audit procedures accordingly. Among other things, auditors may consider the following:

- The overall effect of risk on a plan’s portfolio of illiquid investments (for example, asset-backed commercial paper or high-yield debt or loans). The auditor should identify risks throughout the process of obtaining an understanding of the plan and its environment, including relevant controls.
such as controls at the plan sponsor and outside service provider, including any applicable investment service provider. The auditor also may consider the policies that affect the management and monitoring of these investments.

- The increased difficulty of obtaining reliable valuations for certain types of asset-backed securities, given the decrease in market liquidity. The auditor should obtain an understanding of the plan’s process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach. This would include controls over valuation at the plan sponsor and service provider, in particular the extent to which they monitor valuations obtained from brokers and external pricing services for consistency with observations of market conditions, as well as the involvement of valuation committees or other internal review groups independent of portfolio managers in assessing the day-to-day reasonableness of security valuations and overriding quotations that appear to be unrepresentative.

- Swap or derivative contracts are often written using the International Swap and Derivatives Association Master Agreement (ISDA) protocol. ISDA contracts include events of default and termination events, similar to bank loan covenants. The effect of a violation could be the acceleration or termination of the agreement, the requirement to post additional collateral, or the violation could effect the valuation of the derivative instrument. The auditor may obtain an understanding of management’s ongoing monitoring process. If the vehicle is no longer in compliance with the covenants, the auditor would assess the appropriate accounting and reporting implications, including AU section 341.

.41 In certain instances, the auditor may need special skills or knowledge to plan and perform auditing procedures for privately held employee stock ownership plans (ESOPs) or plans that hold alternative investments and subprime-mortgage-backed securities. AU section 332 states that for some derivatives and securities, GAAP may prescribe presentation and disclosure requirements. Furthermore, AU section 332 advises the auditor to consider the form, arrangement, and content of the financial statements (including the notes) when evaluating the adequacy of presentation and disclosure. Auditors may also consider using a specialist when determining how to audit a plan that includes hard to value investments. AU section 336, Using the Work of a Specialist (AICPA, Professional Standards, vol. 1), provides guidance on the use of a specialist during an engagement.

**Fair Value of Securities**

.42 The guidance in AU section 332 relating to auditing the fair value of securities is fairly similar to the guidance in AU section 328; however, some items of note exist for the auditor. As previously mentioned, quoted market prices in active markets are the best available audit evidence to support a fair value; however, when they are unavailable and the valuations of securities are obtained from a broker or dealer or another pricing service based on valuation models, it is important for the auditor to understand the underlying valuation method used (such as a cash flow projection). These valuations also may be based on quoted prices from an active market or other observable inputs that would be considered by the auditor when developing audit procedures.

.43 The process used by the pricing service to measure fair value should be evaluated to determine that the resulting measurement is in accordance with the requirements of FASB Statement No. 157. The auditor also may determine it is necessary to obtain quotes from more than one pricing source based on circumstances such as an existing relationship between the entity and the valuing entity, which could inhibit objective pricing or underlying valuation assumptions that are highly subjective. In the context of FASB Statement No. 157, quoted prices in active markets for identical assets or liabilities are considered level 1 inputs.

.44 When an entity performs its own valuation, value testing procedures for the auditor to consider include assessing the reasonableness, comparing the assumptions to industry reports or benchmarks, assessing the appropriateness of the model, calculating the value using his or her own model, and comparing the fair value with subsequent or recent transactions. Whether or not the inputs to the entity’s valuation model are observable or not determines their characterization as level 2 or level 3 inputs, respectively, within the FASB
Statement No. 157 fair value hierarchy. When extensive judgment is needed, consider using a specialist or refer to AU section 342, *Auditing Accounting Estimates* (AICPA, *Professional Standards*, vol. 1). Additionally, when the underlying collateral of a security significantly contributes to its fair value and collectability of the security, evidence of the collateral also should be examined for existence, fair value, transferability, and the investor’s right to the collateral.

**Using the Work of a Specialist**

.45 It may be necessary to use a specialist (such as a securities valuation expert) to assist in auditing complex or subjective matters. Examples of matters in which an auditor may engage a specialist are valuation issues; reasonableness of determination of amounts derived from specialized techniques or models; or implementation of technical requirements, regulations, or legal documents. AU section 336 provides guidance to auditors in using specialists. The guidance in AU section 336 is applicable when the specialist is hired by management or if the auditor engages the specialist. However, if a specialist employed by the auditor’s firm participates in the audit, AU section 311, *Planning and Supervision* (AICPA, *Professional Standards*, vol. 1), is applicable rather than AU section 336.

.46 When using the work of a specialist, the auditor should evaluate the specialist’s professional qualifications, obtain an understanding of the nature of the work performed or to be performed, and evaluate the relationship of the specialist to the client in terms of objectivity. Although the appropriateness and reasonableness of the methods and assumptions employed by the specialist are his or her responsibility, the auditor should obtain an understanding of these qualities, test the underlying data provided to the specialist, and evaluate the specialist’s findings in the context of the audit and related assertions in the financial statements.

**Alternative Investments**

.47 The AICPA practice aid *Alternative Investments—Audit Considerations* is a useful tool for auditors that focuses on the existence and valuation assertions associated with alternative investments but also discusses general considerations pertaining to auditing alternative investments, management representations, disclosure of certain significant risks and uncertainties, and reporting. As defined in the foreword of the practice aid, alternative investments are “investments for which a readily determinable fair value does not exist...including private investment funds meeting the definition of an investment company...such as hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as bank common/collective trust funds.” You can access the full text of this practice aid on the AICPA’s Web site at www.aicpa.org/download/members/div/auditstd/Alternative_Investments_Practice_Aid.pdf.

.48 Further, as discussed in a meeting of FASB’s Valuation Resource Group, net asset value of a fund may not represent fair value under FASB Statement No. 157. Given the state of the economy, many funds are imposing limitations on redemptions and some are even unwinding. To assist with the estimation of fair value of interests in alternative investments, the Accounting Standards Executive Committee (AcSEC) of the AICPA has issued the draft issues paper *FASB Statement No. 157 Valuation Considerations for Interests in Alternative Investments*. The draft issues paper discusses how to estimate the fair value of alternative investments (such as interests in hedge funds, private equity funds, or real estate funds) in accordance with the provisions of FASB Statement No. 157. Among other things, the draft issues paper discusses the role of net asset value (NAV) in estimating fair value. The draft issues paper can be found at www.aicpa.org/Professional+Resources/Accounting+and+Auditing/Accounting+Standards/AcSEC+Issues+Draft+Issues+Paper+on+Valuation+of+Interests+in+Alternative+Investments.htm.

.49 The following is a list of additional resources that provides guidance on auditing investments:

- AU section 328, *Auditing Fair Value Measurements and Disclosures* (AICPA, *Professional Standards*, vol. 1)
Master Trust Fair Value Disclosures

AICPA Issues Technical Practice Aid

The AICPA recently issued an employee benefit plan related Technical Practice Aid (TPA) to provide guidance on the required fair value measurement disclosures to be made when a plan holds investments in a master trust. Technical Questions and Answers (TIS) section 6931.11, “Fair Value Measurement Disclosures for Master Trusts” (AICPA, Technical Practice Aids), is available on the AICPA’s Web site www.aicpa.org and is also provided in the following section.

Fair Value Measurement Disclosures for Master Trusts

Inquiry—Employee benefit plans often hold investments under master trust arrangements. According to the Department of Labor’s Form 5500 instructions, a master trust is a trust for which a regulated financial institution serves as trustee or custodian and in which assets of more than one plan, sponsored by a single employer or by a group of employers under common control, are held.

In a typical master trust arrangement, the plan does not hold units or shares of the master trust but has an undivided interest in the assets of the master trust. However, for participant directed defined contribution plans, the plan typically has a divided interest in the individual assets of the master trust based upon participant direction. The “Additional Financial Statement Disclosures” section in chapters 2 and 3 of the AICPA Audit and Accounting Guide Employee Benefit Plans (guide) requires investments in master trusts to be shown as a single line item on the statement of net assets available for benefits; however, the plan does not “purchase” and “dispose” of its interest in the master trust but is allocated an interest once the plan sponsor chooses to transfer the plan’s assets into the master trust. The guide also requires the master trust investments to be shown by general type in the footnotes.

For employee benefit plan financial statements, are the disclosure requirements of paragraphs 32–34 of Financial Accounting Standards Board (FASB) Statement No. 157, Fair Value Measurements, required for the plan’s total interest in the master trust or the individual investments under the master trust arrangement?

Reply—The disclosures required by paragraphs 32–34 of FASB Statement No. 157 are required for individual investments under a master trust arrangement and are not required for the plan’s total interest in the master trust.

According to paragraph 32 of FASB Statement No. 157, for assets that are measured at fair value on a recurring basis in periods subsequent to initial recognition, the reporting entity shall disclose information that enables
users of its financial statements to assess the inputs used to develop those measurements, and for recurring
fair value measurements using significant unobservable inputs (level 3), the effect of the measurements on
earnings (or changes in net assets) for the period.

Because of the nature of the plan’s ownership interest in the master trust—that is, the plan does not hold units
or shares of a master trust—FASB Statement No. 157 disclosures should be presented for the underlying
master trust investments. Therefore, the plan should disclose separately the following information for each
period for each major category of master trust assets and liabilities (quantitative disclosures should be made
in tabular format):

a. The fair value measurements recorded during the period and the reasons for the measurements
b. The level within the fair value hierarchy in which the fair value measurements in their entirety fall,
   segregating fair value measurements using quoted prices in active markets for identical assets or
   liabilities (level 1), significant other observable inputs (level 2), and significant unobservable inputs
   (level 3)
c. For fair value measurements using significant unobservable inputs (level 3), a description of the
   inputs and the information used to develop the inputs
d. In annual periods only, the valuation technique(s) used to measure fair value and a discussion of
   changes, if any, in the valuation technique(s) used to measure similar assets or liabilities, or both, in
   prior periods.

Consideration should be given to combining, or reconciling, or both, the master trust FASB Statement No. 157
disclosures as described previously with the current master trust disclosures as required in chapters 2 and 3
of the guide.

Limited Scope Audits

.52 When a plan administrator elects to have a limited scope audit performed, the auditor is instructed by
the plan administrator to limit the scope of testing on investment information prepared and certified by a
qualified trustee or custodian as complete and accurate. The trustee or custodian certifies to the “completeness
and accuracy” of the plan’s investment assets and investment activity as contained in the institution’s ordinary
books and records, which may or may not be fair value in accordance with GAAP. Although DOL regulations
allow the qualified trustee or custodian to report in this manner, it is the plan sponsor’s responsibility to
prepare the financial statements and footnote disclosures in accordance with GAAP (that is, at fair value as
of the plan’s year-end).

Practice Tip: Plan administrators should review their trustee or custodial arrangements to
determine the nature of the financial information that will be provided by the trustee or
custodian, or both. For instance, in cases where the plan invests in assets without readily
determinable market values, the reported values may be based on the best information
available to the trustee or custodian at the time the certification is prepared, which may
or may not be fair value as of the plan’s year end.

.53 The auditor’s responsibilities for investments covered by the limited scope exemption are to (a) obtain
and read a copy of the certification from the plan administrator, (b) determine whether the entity issuing the
certification is a qualifying institution under DOL regulations, (c) compare the certified investment informa-
tion to the financial statements and related disclosures, (d) perform the necessary procedures to become
satisfied that any received or disbursed amounts reported by the trustee or custodian were determined in
accordance with the plan provisions, and (e) determine whether the form and content of the financial
statement disclosures related to the investment information prepared and certified by the plan’s trustee or
custodian are in conformity with GAAP and are in compliance with DOL rules and regulations. See
paragraphs 7.65–69 of AICPA Audit and Accounting Guide Employee Benefits Plans for further guidance on
limited scope audits.
The scope limitation extends only to investments and related investment information certified by the qualified trustee or custodian. Plan investments not held by a qualified trustee or custodian, such as real estate, leases, mortgages, self-directed brokerage accounts, participant loans, and any other investments or assets not covered by such a certification, should be subjected to appropriate audit procedures. Moreover, the appropriate audit procedures for all noninvestment related information (for example, contributions and distributions) are the same for a limited scope audit as they are for a full scope audit.

When engaged to perform a limited scope audit, the auditor has no responsibility to perform audit procedures on investments and related activity covered by the certification. Although the auditor is not required to audit certain investment information when the limited scope audit exception is applicable, if the auditor becomes aware that the certified information is incomplete, inaccurate, or otherwise unsatisfactory, further inquiry may be necessary that might result in additional testing or modification to the auditor’s report. In certain instances, a limited scope audit may no longer be appropriate (or may only be appropriate with respect to certain investments held by the plan).

Plan management’s decision to rely on a certification for purposes of limiting the scope of the audit has become increasingly more challenging, especially in light of recent economic events as well as the issuance of FASB Statement No. 157. Because plans increasingly invest in alternative investments (including hedge funds, real estate, limited partnerships, private equity funds, and other hard-to-value investments), care should be taken by plan management when determining if certified information can be relied upon in preparing the plan’s Form 5500 and related financial statements.

Plan management will need to have sufficient understanding of the nature of the plan’s investments and the valuation methodologies, key assumptions, and inputs used to determine fair value. Plan management cannot outsource or assign its responsibility for properly reporting fair value of the plan’s investments, even in situations where the plan’s trustee or custodian certifies the completeness and accuracy of the plan’s investments for a limited scope audit. Therefore, prior to being engaged to perform a limited scope audit, it is recommended that plan management and the auditor briefly discuss the nature of the investments held by the plan, including how those investments are valued and where they fall in the fair value hierarchy, to help ensure that plan management engages their auditor to perform the appropriate type of audit.

Practice Tip: FASB Statement No. 157 does not change the auditor’s responsibility in a limited scope audit. Third parties may provide pricing methodology information that assists plan management in determining the fair value hierarchy levels, or may provide preliminary suggestions of the fair value hierarchy levels. It is ultimately the responsibility of the plan’s management to understand the basis for the designations to determine whether the plan’s investments have been valued and disclosed in accordance with GAAP or whether revisions are necessary.

If the auditor becomes aware that the certified information relating to such investments is inaccurate as a result of valuation or other concerns, further inquiry may be necessary that might result in additional testing or modification to the auditor’s report. For example, when a plan has significant interests in alternative investments, that are hard to value or fall within level 3 of the fair value hierarchy, this may prompt the auditor to inquire whether these investments are covered by the certification, the method used to value these investments, and whether they are reflected in the certification at fair value in accordance with GAAP. Upon further inquiry, if the auditor becomes aware that adequate year-end valuation procedures have not been performed and therefore the financial statements may not be prepared in conformity with GAAP, the auditor would communicate those findings to the plan management. It is the plan management’s responsibility to prepare the financial statements and footnote disclosures in conformity with GAAP and in compliance with DOL rules and regulations. Accordingly, plan management may request the trustee or custodian to recertify or amend the certification for such investments at their appropriate year-end values or to exclude such investments from the certification. If the trustee or custodian amends the certification to exclude such investments from the certification, or if the trustee or custodian does not recertify those investments, plan management is responsible for valuing such investments as of the plan year-end and engaging the auditor.
to perform full scope audit procedures on the investments excluded from the certification. Paragraph 7.69 of Audit and Accounting Guide Employee Benefit Plans contains an illustrative auditor’s report when plan investments have been certified and plan management was unable to determine whether the investment information is valued in conformity with GAAP.

.59 If the trustee or custodian excludes certain investments from the certification, this ordinarily would not affect the limited scope language in the auditor’s report. Accordingly, the footnote pertaining to certified information should only reflect the investment information that was included or derived from the certified information.

.60 In the event that the audit changes from a limited scope in the prior year to a full scope in the current year, the auditor would perform full scope audit procedures regarding the beginning balances of investments. See paragraph 13.28 of Audit and Accounting Guide Employee Benefit Plans for an illustrative auditor’s report when the scope of the audit in the prior year was limited in accordance with DOL rules and regulations.

**Practice Tip:** After the issuance of the auditor’s report, if the auditor subsequently discovers that certain or all investment information should have been subjected to full scope audit procedures in the prior year, the auditor may be required to perform additional procedures and to consider whether to recall, restate, or reissue the prior auditor’s report. For further guidance, refer to AU section 390, Consideration of Omitted Procedures After the Report Date, and AU section 561, Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report (AICPA, Professional Standards, vol. 1).

### Stable Value Funds

.61 Some employer-sponsored defined contribution plans offer an investment alternative often referred to as a stable value fund. These funds primarily invest in guaranteed investment contracts (GICs) issued by insurance companies and other financial services institutions, referred to as **traditional GICs** and **synthetic GICs**. Synthetic contracts often invest in mortgage related fixed income investments. FSP AAG INV-1 and SOP 94-4-1, Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans, allows such contracts to be presented at contract value for purposes of determining the net assets available for benefits for a defined-contribution plan if the contract meets the definition of benefit responsiveness according to the FSP. An investment contract is considered fully benefit-responsive for purposes of the FSP, if all of the following criteria are met for that contract:

- The investment contract is effected directly between the plan and the issuer and prohibits the plan from assigning or selling the contract or its proceeds to another party without the consent of the issuer.

- Either (a) the repayment of principal and interest credited to participants in the plan is a financial obligation of the issuer of the investment contract or (b) prospective interest crediting rate adjustments are provided to participants in the plan on a designated pool of investments held by the plan or the contract issuer, whereby a financially responsible third party, through a contract generally referred to as a wrapper, must provide assurance that the adjustments to the interest crediting rate will not result in a future interest crediting rate that is less than zero. If an event has occurred such that realization of full contract value for a particular investment contract is no longer probable (for example, a significant decline in creditworthiness of the contract issuer or wrapper provider), the investment contract shall no longer be considered fully benefit-responsive.

- The terms of the investment contract require all permitted participant-initiated transactions with the plan to occur at contract value with no conditions, limits, or restrictions. Permitted participant-initiated transactions are those transactions allowed by the plan, such as withdrawals for benefits, loans, or transfers to other funds within the plan.
• An event that limits the ability of the plan to transact at contract value with the issuer (for example, premature termination of the contracts by the plan, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives) that also limits the ability of the plan to transact at contract value with the participants in the plan must be probable of not occurring.

• The plan itself must allow participants reasonable access to their funds.

.62 As a result of recent credit market events, some of the issuers of these contracts may have experienced a decline in credit worthiness. In addition, as a result of depreciation in the mortgage back securities and related markets, the difference between fair value and contract value for synthetic GIC contracts has increased risk relating to these contracts. Certain issuers are requesting to terminate contracts, limit future contributions or redemptions, or increase wrap fees. In addition, certain issuers are deciding to no longer offer stable value products or exiting the business altogether thereby limiting the number of stable value alternatives for plan sponsors. Also, these contracts typically have certain investment guidelines that need to be followed in order to maintain the stable value protection by the wrap provider.

.63 Reading stable value contracts would enable auditors to understand the terms for (a) events that limit the ability of the plan to transact at contract value with the issuer (for example, premature termination of the contracts by the fund, plant closings, layoffs, plan termination, bankruptcy, mergers, and early retirement incentives), and (b) events and circumstances that would allow issuers to terminate fully benefit-responsive investment contracts with the fund and settle at an amount different from contract value (for example, breaches of investment guidelines, investments in default, and so on). For appropriate financial statement accounting and reporting, it is important for the auditor to give careful consideration to the ability of the issuer to comply with the terms of the contracts, the benefit-responsive provisions of the FSP, and the credit worthiness of the wrap provider.

.64 Plans may hold stable value investments through direct contracts with issuers or through a separately managed account. Plans may also hold stable value investments through beneficial ownership of bank collective funds (CCTs) that own investment contracts. Insurance company pooled separate accounts that hold investment contracts also have similar characteristics. See TIS section 6931.08, “Types of Investments Subject to SOP 94-4, as Amended by FSP AAG INV-1 and SOP 94-4-1” (AICPA, Technical Practice Aids), for further guidance that includes financial statement presentation and disclosure guidance for CCTs and master trusts.

Going Concern Matters

.65 Many plan sponsors are currently experiencing, or may experience in the near term, conditions and events that may raise substantial doubt about their ability to continue as a going concern for a reasonable period of time (not to exceed one year beyond the date of the financial statements being audited). Substantial doubt raised about the plan sponsor may also raise concerns about the ability of the plan to continue as a going concern. Given the current volatile economic environment, management’s evaluation of the plan’s ability to continue as a going concern for a reasonable period of time may require more extensive analysis. It may be necessary for the auditor to obtain additional information about such conditions and events, as well as the appropriate audit evidence to support information that mitigates the auditor’s doubt.

.66 If the auditor believes there is substantial doubt about the plan’s ability to continue as a going concern for a reasonable period of time, he should (a) obtain information about management’s plans that are intended to mitigate the effect of such conditions or events, and (b) assess the likelihood that such plans can be effectively implemented. The assessment of the plan’s ability to continue as a going concern is the responsibility of the plan’s management. The auditor’s responsibility, as described in AU section 341 is to consider, when planning and performing audit procedures and evaluating their results, the appropriateness of management’s use of the going concern assumption in the preparation of the financial statements.

.67 Additionally, current market conditions have heightened the expectations of financial statement users that entities, including benefit plans, will be providing a more thorough and transparent analysis of risks and uncertainties in accordance with SOP 94-6, which requires management to make certain disclosures of risks and uncertainties facing the entity. In many cases, those are the same risks and uncertainties that management
and the auditor need to assess in evaluating the entity’s ability to continue as a going concern. It is important for the auditor to have discussions with management about the plan’s significant risks and uncertainties and the adequacy of disclosures about them in current year financial statements.

.68 Conditions or events that raise doubt about the plan sponsor’s ability to continue as a going concern are significant in evaluating the ability of an employee benefit plan to continue as a going concern for a reasonable period of time. Factors that may be relevant to management’s use of the going concern assumption or, conversely, events or conditions that may cast substantial doubt on the going concern assumption include, but are not limited to, financial events that are becoming more prevalent in the current environment, such as the following:

- Substantial doubt about the plan sponsor’s ability to continue as a going concern
- The ability of the plan sponsor to continue funding the plan
- The plan’s lack of liquidity
- The plan’s ability to continue paying benefits when due to participants

.69 For defined contribution plans, the financial condition of the plan sponsor typically does not affect the plans’ ability to meet its obligations as they become due; however, consideration should be given to the level of company stock held by the plan, restrictions on withdrawals from certain investments held by the plan due to liquidity concerns, and plan terminations (see paragraphs 3.36–.39 of Audit and Accounting Guide Employee Benefit Plans for guidance regarding terminating plans).

.70 After the auditor has evaluated management’s plans, the auditor concludes whether he or she has substantial doubt about the plan’s ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, the auditor should (a) consider the adequacy of disclosure about the plan’s possible inability to continue as a going concern for a reasonable period of time, and (b) include an explanatory paragraph (following the opinion paragraph) in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he or she should consider the need for disclosure. When, primarily because of the auditor’s consideration of management’s plans, he or she concludes that substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time is alleviated, the auditor should consider the need for disclosure of the principal conditions and events that initially caused him or her to believe there was substantial doubt. The auditor’s consideration of disclosure should include the possible effects of such conditions and events, and any mitigating factors, including management’s plans.

ERISA-Covered 403(b) Employee Benefit Plans

.71 Section 403(b) plans are also commonly known as tax-sheltered annuity plans (TSA plans). A 403(b) TSA plan is a retirement plan offered by schools, hospitals, churches, charities, and certain other tax-exempt organizations. An individual’s 403(b) annuity can be obtained only under an employer’s TSA plan. Generally, these annuities are funded by elective deferrals made under salary reduction agreements and may include nonelective employer contributions. A 403(b) plan works very similarly to a 401(k) plan.

.72 A 403(b) plan comprises individual investment accounts that may include the following types:

- Fixed and variable annuity contracts with insurance companies—403(b)(1) annuities
- Custodial accounts made up of mutual funds—403(b)(7) accounts
- A retirement income account set up for church employees—403(b)(9) accounts

New IRS Regulation Highlights

.73 On July 23, 2007, the IRS issued the first comprehensive regulations for 403(b) plans in 43 years. The IRS's new rules bring 403(b) plans closer to the standards set for 401(k) plans and may result in significant changes for tax-exempt organizations and their employees. The new IRS regulations clarify several points on
employer responsibility and require all organizations to have a written plan document in place. Additionally, in an effort to ease the administrative burden, the new IRS rules have the effect of encouraging employers to limit the number of investment vendors offered to employees while introducing due-diligence expectations that affect daily plan management. The new IRS rules were effective for 403(b) plan years beginning on or after January 1, 2009; however, the IRS provided some relief to the written plan document requirement when they issued IRS Notice 2009-3, Relief From Immediate Compliance With 2009 § 403(b) Written Plan Requirement, indicating they will treat plans as meeting the requirements of 403(b) and the regulations during the 2009 calendar year if

- by December 31, 2009, the plan sponsor has adopted a written 403(b) plan that is intended to satisfy the requirements of 403(b) and the regulations;
- during 2009, the plan sponsor operates the plan in accordance with a reasonable interpretation of 403(b) and the related regulations; and
- by the end of 2009, the plan sponsor makes its best effort to retroactively correct any operational failure during the 2009 calendar year to conform to the written plan.

New Filing and Audit Requirements for ERISA-Covered 403(b) Plans

.74 On November 16, 2007, the Employee Benefits Security Administration (EBSA), the IRS, and the Pension Benefit Guaranty Corporation (PBGC) published in the Federal Register revisions to the Form 5500 for plan year 2009. The revisions include improved financial disclosure by the approximately 16,000 403(b) TSA plans subject to Title I of the Employee Retirement Income Security Act of 1974 (ERISA) by making the reporting rules for those 403(b) plans on par with 401(k) plans. A 403(b) plan generally will be covered under ERISA if there are employer contributions or employer involvement in the plan exceeds the limitations permitted under the DOL’s safe harbor regulations, or both. (For further information, see DOL Field Assistance Bulletin No. 2007-02 online at www.dol.gov/ebsa/regs/fab2007-2.html.)

.75 Beginning with 2009 Form 5500 filings, employee benefit plans under Section 403(b) of the IRC covered under ERISA that are sponsored by charitable organizations will be subject to the same Form 5500 reporting and audit requirements that currently exist for Section 401(k) plans. The new DOL amended regulations eliminated a previous exemption granted to IRC Section 403(b) plans from the annual Form 5500 reporting, disclosure, and audit requirements under Part 1 of Subtitle B of Title I of ERISA. Generally, 403(b) plans sponsored by charities and schools are subject to ERISA whereas 403(b) plans sponsored by religious organizations and governments are not covered under ERISA.

.76 For large 403(b) plans (generally plans with 100 or more eligible participants at the beginning of the plan year), the new reporting requirements include not only the completion of the entire Form 5500, but also the engagement of an independent qualified public accountant (IQPA) to conduct an independent audit of the plan.

.77 The 2009 Form 5500 package and the related Federal Register notices are available on the EBSA’s Web site at www.dol.gov/ebsa.

First Year Auditing Considerations for 403(b) Plans

.78 Although the new, large-plan audit requirement will not be in effect until the 2009 plan year, ERISA requires the presentation of comparative statements of net assets. As such, when a plan’s financial statements have not been previously audited, the auditor should apply procedures to assure himself that the accounting principles used by the plan in both the current and preceding year are consistent. (See paragraphs .24–.25 of AU section 420, Consistency of Application of Generally Accepted Accounting Principles [AICPA, Professional Standards, vol. 1], for further guidance.) The initial audit of the plan will likely require significant audit effort as the auditor will need to perform procedures to test the completeness and accuracy of plan and participant-level information going back numerous years.
Many plans may face significant challenges in establishing plan accounting records and proper controls, such as identifying all participant accounts to be included as plan assets, determining beginning account balances (that is, comparative balances are also required as of December 31, 2008, for calendar year plans), and obtaining other financial information to be included in the plan’s financial statements, which could hinder an auditor’s capability of issuing an unqualified opinion on the plan’s financial statements. For example, plans may have multiple third-party administrator (TPA) vendors (nonexclusive administration), orphan contracts (old accounts and contracts that were not transferred to the current TPA), missing participants, or participants with multiple annuity contracts. Also, historical plan records may not be readily available or may be nonexistent for previous years.

For many 403(b) plans, the individual account plan status goes further than what auditors may be accustomed to seeing. The assets attributable to a participant’s vested interest may be held in a custodial account or in an annuity contract that is issued in the participant’s name, rather than the plan’s name. This industry practice raises critical plan reporting issues and associated audit issues including the following questions:

- What are the plan’s assets?
- When does a terminated employee cease to be a plan participant?
- Does the plan report distributions?

During this transition period, it is important for auditors to work with their clients to determine the kind of contracts held by the plan and the ownership of those contracts.

Areas of special consideration in an initial audit of a plan’s financial statements include (a) the completeness of participant data and records of the prior year(s), especially as they relate to participant eligibility; (b) the amounts and types of benefits; (c) the eligibility for benefits; and (d) account balances.

The nature, timing, and extent of auditing procedures applied by the auditor are a matter of judgment and will vary with factors such as the adequacy of past records, the significance of beginning balances, the complexity of the plan’s operations, and controls covered by Statement on Auditing Standards (SAS) No. 70, Service Organizations (AICPA, Professional Standards, vol. 1, AU sec. 324), reports.

Because ERISA requires that audited plan financial statements present comparative statements of net assets available for benefits, the current year statements should be audited, and the prior year that is presented for comparative purposes may be either compiled, reviewed, or audited. Appropriate reference in the current year audit report should be made to describe the level of responsibility assumed in the prior year. However, although a compilation or review of prior year is acceptable, the auditor would apply sufficient auditing procedures on the beginning balance of net assets available for benefits to obtain appropriate evidence that no material misstatements to these beginning balances exist that may affect the current year’s statement of changes in net assets available for benefits.

The DOL intends to fully enforce this new audit requirement. Accordingly, it is critical that plan auditors educate themselves and their clients about this change and its effects on plan records that will be subject to audit. Auditors should carefully consider whether to accept the audit of a 403(b) plan. For example, they should consider

- independence under the DOL and AICPA independence standards (for example, has the auditor provided management functions or other nonaudit services to help prepare the plan for audit such that independence may be impaired?); and
• risks associated with the engagement and if they have the requisite skills and competence to complete
the engagement (see the “Client Acceptance and Continuance” section that follows for further
information).

Help Desk—The EBPAQC has created a 403(b) Resource Center at the EBPAQC Web site
www.aicpa.org/EBPAQC (under the “Resources” tab), which has helpful resources and
links to additional information to help practitioners with the new requirements.

Client Acceptance and Continuance Considerations

.86 Statement on Quality Control Standards No. 7, A Firm’s System of Quality Control (AICPA, Professional
Standards, vol. 2, QC sec. 10 par. .27), provides that policies and procedures should be established for the
acceptance and continuance of client relationships and specific engagements. Such policies and procedures
should provide the audit firm with reasonable assurance that it will undertake or continue relationships and
engagements only where the firm

• has considered the integrity of the client, including the identity and business reputation of the client’s
principal owners, key management, related parties, and those charged with its governance, and the
risks associated with providing professional services in the particular circumstances;

• is competent to perform the engagement and has the capabilities and resources to do so; and

• can comply with legal and ethical requirements.

.87 The firm should obtain such information as it considers necessary in the circumstances before accepting
an engagement with a new client, when deciding whether to continue an existing engagement, and when
considering acceptance of a new engagement with an existing client.

.88 The following is a list of risk factors that engagement teams might consider during their client
acceptance and continuance discussions related to an employee benefit plan engagement:

• Ineffective monitoring by management (for example, lack of oversight by plan management of
outside providers [such as lack of review of reconciliations of trust assets to participant accounts or
no independent records maintained by the sponsor to periodically check information provided by the
custodian] or an ineffective plan oversight committee)

• Complex or unstable organizational structure (for example, turnover of plan management, oversight
committee members, or outside service providers or difficulty in determining what individuals or
committees have oversight or fiduciary responsibility for the plan)

• Weak financial reporting skills, failure by the plan administrator or plan management to take
appropriate responsibility for the financial statements, or the plan has a material weakness or
significant deficiency in its financial reporting process

• Significant related party transactions or transactions with parties in interest, or history of engaging
in prohibited transactions (for example, involvement in nonexempt transactions or events or activities
[violations of laws, regulations, or plan provisions] that could cause loss of tax-exempt status)

• Plan invests in nonreadily marketable securities (such as limited partnerships and nonpublicly traded
employer securities), specialized, or unique investments, or engages in securities lending (regardless
of the scope of the audit) and management lacks the proper oversight and understanding of such
investments, including valuation

• The use of service providers that do not provide a type 2 SAS No. 70 report

• The plan is inherently more complex (such as, health and welfare plans and leveraged ESOPs) and
the engagement team lacks the technical skills that are necessary to audit such a plan
• Other inherent risk factors, such as electronic payroll or human resources systems, complex-decentralized control environment, or in-house processing of complex transactions (such as benefit calculations and claims)
• The plan has significant issues with regulatory agencies, pending enforcement matters, or other investigations

The Pension Protection Act and Other 2008 Legislation

Effects of the Pension Protection Act on Defined Benefit Plans

.89 The Pension Protection Act (PPA) has affected many aspects of plan design, administration, and funding. For defined benefit plans, the PPA focuses on the funded percentage as the trigger point to activate additional funding requirements and benefit limitations. These rules are very complex and this discussion will not address all of those complexities but rather will provide an overview of the key features.

.90 New minimum funding standards were fully operational for 2008 plan years. Minimum funding standards are established based on a plan’s funded status. The funding target is the present value of accrued benefits. If the assets equal the present value of accrued benefits, the plan’s funding target percentage will be 100 percent. The minimum required contribution for plans with a funded percentage of 100 percent or greater will be the plan’s normal cost. This is the actuarially determined amount necessary to fund the benefits that have accrued in the current year. For plans with a funded percentage of less than 100 percent, the minimum required contribution will be the plan’s normal cost plus an additional payment that will amortize the shortfall over 7 years. Funding waivers may be requested in cases of business hardship. As in prior years, the minimum required contribution will be part of the actuarial report.

.91 Each year the actuary is required to certify to the plan’s funded percentage. Plans with a funding percentage below 80 percent will be required to implement certain benefit limitations. Further limitations will be required when the percentage falls below 60 percent. Plans with a funded percentage more than 60 percent but less than 80 percent may not amend the plan to provide additional or increased benefits. They must also place a limit on accelerated benefits such as lump sums and annuity purchases. This limit is 50 percent of the full amount allowed by the plan. If the funded percentage falls below 60 percent, the plan must freeze the accrual of all future benefits until such time as the percentage increases to more than 60 percent. The plan will also not be allowed to make any accelerated payments. The auditor will need to determine if the plan is being operated in accordance with any limitations that apply based on these rules.

Automatic Enrollment and Planning Considerations

.92 There has been a significant increase in the number of plan sponsors choosing to automatically enroll plan participants largely because the PPA included provisions designed to encourage sponsors of 401(k) plans to add an automatic enrollment feature.

.93 Automatic enrollment is a mechanism where an eligible employee who does not make an affirmative election to make pretax contributions to the plan is automatically enrolled in the plan at a specific pretax contribution percentage, unless the employee specifically opts out. Because those funds must then be invested, the PPA also included provisions to protect plan fiduciaries that invest a participant’s account in certain default investment options. The IRS issued proposed regulations regarding the implementation of automatic contribution arrangements, and the DOL issued final regulations regarding default investments.

.94 On October 24, 2007, the DOL published a final rule in the Federal Register establishing qualified default investment alternatives (QDIA), making it easier for employers to automatically enroll workers in their 401(k) and other defined contribution plans. Auditors may want to consider any amendments made to the plan document as a result of the PPA provisions when determining the audit approach.
The IRS issued proposed regulations in November 2007 to implement automatic enrollment. The proposed regulations describe 2 types of automatic enrollment arrangements: an eligible automatic contribution arrangement and a more complex qualified automatic contribution arrangement that passes certain nondiscrimination rules automatically.

The final regulation does not identify specific investment products. Rather, it describes mechanisms for investing participant contributions. The intent is to ensure that an investment qualifying as a QDIA is appropriate as a single investment capable of meeting a worker’s long term retirement savings needs.

It is important for auditors to be aware of the rules governing an employee’s right to withdraw from the plan following his or her automatic enrollment. An eligible automatic contribution arrangement may allow employees to elect permissible withdrawals of amounts that were automatically contributed to the plan on behalf of the employee. To be effective, the election must be made within 90 days after the date of the first automatic contribution made for the employee under the arrangement. This distribution is permissible in spite of the normal 401(k) plan restrictions on in-service distributions. If the plan wants to include this privilege, which is very popular as it eliminates the accounting for very small balances, the plan must provide for this privilege. In addition, the plan must provide participants with a notice describing this right upon initial enrollment in the plan and at least annually thereafter.

Because of the current economic conditions, more and more plans may be faced with employees electing out of plan participation and wanting their money back. A significant risk of an operational error exists in the implementation of this new rule. A copy of the regulation and a fact sheet detailing the rule may be found at the DOL’s Web site at www.dol.gov/ebsa/regs.

COBRA Premium Assistance Under the ARRA

The Consolidated Omnibus Budget Reconciliation Act (COBRA) provides employees and their dependents with the right to continue access to certain types of healthcare coverage once eligibility is otherwise terminated for a variety of reasons. A new subsidy for COBRA premiums has been provided under the ARRA. In tough economic times, many employees are losing their healthcare coverage and they find that they cannot afford the cost of coverage under COBRA. The ARRA will subsidize 65 percent of this coverage for eligible persons. An eligible person is someone who involuntarily lost his or her job between September 1, 2008, and December 31, 2009. A new COBRA election period must be made available for persons who were terminated prior to the effective date of the legislation and whose normal COBRA election period has expired and for those who had elected coverage but subsequently lost coverage due to inability to pay.

Employers can recover this cost through a credit to their payroll taxes. This first applies to coverage period beginning on or after February 17, 2009. For welfare benefit plans subject to audit, this law change presents interesting financial reporting issues which could effect the post employment benefit obligation at the plan level. The employee pays only a portion of the premium while the plan pays the full benefit, but the employer’s reimbursement for its share of the costs is recorded as a reduction in the employer’s obligation for payroll taxes. The Form 941, Employer’s Quarterly Federal Tax Return, instructions explain how to complete lines 12a and 12b, which address the COBRA premium assistance payments.

For a summary of the law change, see www.dol.gov/ebsa/newsroom/fsCOBRApremiumreduction.html. This law change may affect the measurement of benefit obligations for health and welfare plans.

Audit and Accounting Guide Revision as of March 1, 2009

Audit and Accounting Guide Employee Benefit Plans has been updated with conforming changes as of March 1, 2009, and includes updates required by FASB Accounting Standards Codification™ (ASC). The Audit
Audit and Attestation Issues and Developments

SAS No. 70 Issues

.103 Internal control of a benefit plan consists of the controls at the sponsor as well as the controls at applicable service and subservice organizations that perform significant plan functions including but not limited to processing of participant-level transactions such as contributions and distributions, investment custody and valuation, and execution of investment transactions. A report prepared in accordance with SAS No. 70, as amended, may be useful in providing user auditors with a sufficient understanding of controls at the service organization to assess the risks of material misstatement in accordance with AU section 314.

.104 It is not uncommon for the service organization’s SAS No. 70 report to cover only some of the services used by the plan (for example, the report might cover custodial services but not allocation services) or to not cover activities performed by subservice organizations (for example, the report might not cover services performed by an investment pricing service). The subservice organization may be a separate entity from the service organization or may be related to the service organization. For example, 401(k) record keepers often exclude the related data processing center from their SAS No. 70 reports. The independent auditor’s report included in the SAS No. 70 report will typically include language that the report does not cover certain significant service or subservice organizations or systems. For less significant service or subservice organizations or systems, this language will not be included in the auditor’s report, but will be described elsewhere in the report. In these situations, auditors would gain an understanding of the controls related to the services not covered in the SAS No. 70 report as they relate to the plan’s transactions processed by the service or subservice organization that are part of the plan’s information system. If the user auditor does not have sufficient information to assess control risk as low or moderate, the plan auditor may decide to perform additional tests of the service or subservice organization’s controls or perform additional audit procedures on the plan’s financial statements. The auditor may obtain a copy of the subservice organization’s SAS No. 70 report if one was issued.

.105 During 2008, the Auditing Standards Board (ASB) proposed two exposure drafts that related to SAS No. 70. First, the proposed SAS Audit Considerations Relating to an Entity Using a Service Organization (Redrafted) would supersede SAS No. 70. Currently, SAS No. 70 contains guidance for auditors auditing the financial statements of entities that use a service organization (user auditors) and for auditors reporting on controls at a service organization (service auditors). The proposed SAS will only contain guidance for user auditors. Guidance for service auditors will be contained in the new Statement on Standards for Attestation Engagements (SSAE) Reporting on Controls at a Service Organization that is being exposed for comment concurrently with the proposed SAS. The comment period for both exposure drafts ended February 17, 2009.

.106 See chapter 6, “Internal Control,” in the Audit and Accounting Guide Employee Benefit Plans for further guidance regarding SAS No. 70.

Auditing Plan Fees and Expenses

.107 Administrative expenses are often paid out of plan assets. As plan sponsors look for ways to decrease operating costs, it is becoming more common to amend benefit plans to allow for the payment of the expenses out of the plan. In certain instances, forfeitures are used to pay plan expenses. The auditor’s responsibilities with respect to testing administrative expenses are detailed in paragraphs 12.13–.14 of Audit and Accounting...
Guide Employee Benefit Plans. Auditors need to gain an understanding of the expenses that are allowed to be paid by the plan according to the plan document. Typically, plan expenses are below materiality levels in a benefit plan audit and, therefore, are not subject to significant detailed testing. Often, auditors obtain reasonable assurance related to expense balances using other audit procedures such as substantive analytics. Auditors may also want to be aware of fees paid by one plan on behalf of another plan resulting from errors or inappropriate allocations or fees paid by the plan for certain services (actuarial fees) that may relate to services provided to the plan sponsor. Excessive fees or expenses paid by the plan that are not allowed by the plan document, no matter how immaterial, may be deemed a prohibited transaction requiring further testing and disclosure as described in paragraph 11.13 of Audit and Accounting Guide Employee Benefit Plans.

.108 In addition, any fees or expenses paid to related parties need to be considered for disclosure under FASB Statement No. 57, Related Party Disclosures. In certain instances, it may be difficult to understand the nature of the expenses being paid by the plan due to the netting of expenses against income or other hidden arrangements resulting in expenses not being apparent on the service provider statements. In these situations, the auditor may determine that additional inquiries with management and the service providers or review of service provider agreements may assist in understanding the fee arrangements. Consideration should be given to disclosing the terms of expense offset arrangements with third parties, whereby fees (for example, recordkeeping and so on) are reduced by a specified or readily ascertainable amount for services provided. Also, refer to the DOL-issued publication Understanding Retirement Plan Fees and Expenses and DOL Letter 2001-O1A to better understand and evaluate plan fees and expenses.

Payroll Data

.109 If one audit firm performs both the plan audit and corporate audit, there may be some efficiencies to be achieved surrounding the testing of payroll. Although testing of the payroll area may have been performed in conjunction with the corporate audit, relevant assertions related to payroll for the plan audit may or may not have been tested. When determining the scope of testing for the plan audit, the plan auditor may consider gaining an understanding of the assertions relevant to payroll that were tested during the corporate audit.

.110 For example, payroll testing performed for a corporate audit may not place any emphasis on individual amounts withheld and may be insufficient to satisfy the payroll testing requirements for a plan audit. Often payroll processing is outsourced to an outside service provider that may or may not have an appropriate SAS No. 70 report (see chapter 6 of Audit and Accounting Guide Employee Benefit Plans for further discussion of SAS No. 70 reports).

.111 If the plan sponsor has an internal audit department that has performed procedures on payroll data that is relevant to the audit, and it would be effective to incorporate their work into the audit, AU section 322, The Auditor’s Consideration of the Internal Audit Function in an Audit of Financial Statements (AICPA, Professional Standards, vol. 1), provides guidance on what the auditor needs to consider when making use of the internal auditors’ work in an audit.

Actuarial Reports for Defined Benefit Plans

.112 Several economic and demographic assumptions are used in actuarial valuations for defined benefit plans to determine funding requirements and the actuarial present value of accumulated plan benefits in accordance with FASB Statement No. 35. One of the most significant economic assumptions is the discount rate. Two approaches exist that can be used to select the discount rate. The most commonly used approach is to reflect the long term expected rate of return on assets. This amount is generally stable from one year to the next. This assumption would reflect anticipated growth of the actual underlying investments in the pension trust. Many employers are changing the mix of investments that have been used historically. For employers that are changing their mix of assets, the actual history of returns is not as relevant as new expectations for the new mix of assets. When an approach of looking at the long term expected return is used, the rate selected has generally been the same as that used for funding purposes. However, the PPA has changed the funding rate. The funding rate is no longer an appropriate rate for use in the plan’s financial statements under FASB Statement No. 35. Plans using “expected return on plan assets” as the basis for choosing the discount rate will now have to find a new benchmark. One of the most common approaches has
been to use the FASB Statement No. 87, *Employers’ Accounting for Pensions*, assumed return on plan assets. It is important to note that this is not the FASB Statement No. 87 discount rate. Therefore, auditors will need to take care when determining if the proper rate is disclosed in the benefit plan’s financial statements.

**.113** The second approach that may be used to select the FASB Statement No. 35 discount rate is to select a rate that reflects an insurance company’s purchase rates as of the benefit information date. Because this is a settlement type of rate, it may be similar to (but not necessarily the same as) the FASB Statement No. 87 discount rate. A discount rate selected on this basis can be expected to change from year to year to reflect changes in the long term interest rate markets. Throughout 2008 long term interest rates increased significantly. This was largely due to risk factors related to the subprime mortgage crisis. However, rates dropped sharply in December. At December 31, 2008, long term interest rates had decreased by 150 basis points from November. Because of the volatility in rates, those plans that base the discount rate on a settlement type rate and that use end-of-year benefit information may see either increases or decreases in the discount rate compared to a year earlier. Plans that use beginning of year information will experience increases in the discount rate that will provide for gains.

**.114** The most significant demographic assumptions used to determine the actuarial present value of accumulated plan benefits include mortality rates, retirement age, form of payment or type of benefit elections and cash balance crediting rates if applicable. With the increase in life expectancies, the mortality assumption should include improvements to longevity that were not included in earlier tables. Certain mortality tables used by actuaries include the 1983 GAM, 1994 GAM, UP 1994, and RP 2000 tables. Auditors may consider challenging the use of such tables for purposes of determining the FASB Statement No. 35 liability beginning in 2007. For 2007 calendar year plans and beyond, a new mortality table is required as part of the minimum required contribution calculation. This table, which is based on the RP 2000 mortality table, has replaced the 1983 GAM table. Many actuarial reports will refer to this table as the RP 2000 Combined Mortality Table with projections as specified by IRS Regulation 1.412(1)(7)-1. It has been common practice to use the same table for FASB Statement No. 35 purposes as is required for minimum funding purposes. It can therefore be expected that the RP 2000 table with or without the IRS required projections will be used frequently for 2008 valuations. It is possible that the use of the 1983 GAM table may continue to be acceptable depending on the plan’s experience; however, most plans will be changing to use the 1994 GAM, UP 1994, or the recent RP 2000 tables for their mortality assumptions. It is expected that plan sponsors will consider the demographics of their participant population prior to utilizing a mortality table in determining the actuarial present value of accumulated plan benefits.

**.115** The medical trend assumption is unique to postretirement health and welfare plans. This assumption is intended to project the current cost of health care benefits to future periods when those benefits will be paid. Health care costs have traditionally increased at a faster rate than general inflation. In addition to general inflation, health care costs are affected by increased utilization of plan benefits, rising cost of medical technology, and the leveraging effect of plan provisions such as copays and deductibles. Taken together, these factors contribute to cost increases well above the rate of general inflation. Most actuaries assume that these excess cost increases will continue in the near term but will ultimately merge with general inflation rates. Therefore, a common approach is to assume a higher trend rate for the current year and grade down to the general inflation rate after several years. An example is a trend rate of 9 percent for 2009 grading down by 0.50 percent each year until the ultimate rate of 5 percent is reached for 2017 and beyond. Auditors should question trend assumptions that only reflect general inflation for all years.

**.116** Regardless of the assumption used, each assumption must be individually reasonable. Plan management ordinarily should review actual plan experience with assumptions used periodically to determine if any changes should be made. The following may also be considered as plan auditors review actuarial valuations:

- Trends and nature of benefit distributions (for example, lump sum versus annuity)—a plan that predominantly pays lump sum benefits may have a higher obligation than an equivalent plan that pays annuities. To properly value the plan’s liabilities, there must be assumptions used to reflect the cost of the lump sum benefits. If only assumptions exist that reflect annuities, the lump sum benefits may be undervalued.
Whether there has been a shift in the plan population over time—this could warrant a different assumption for turnover or retirement, for example, if participants are retiring much earlier or later than assumed.

Whether there have been recent plan mergers or acquisitions—in the case of a plan merger, all assumptions would be reviewed for their continued reasonableness because the assumptions used for one plan may not be appropriate for the plan being merged.

Whether there have been any plan benefit formula changes or a freezing of the plan—changes in plan benefits available may affect anticipated turnover and retirement patterns. These assumptions would be reviewed if the plan is amended to change benefits.

Whether consistent gains and losses are generated each year—if yes, this may indicate that one or more of the assumptions are not reasonable based on actual experience.

When reviewing an actuarial report, consideration may be given to

- consistency of benefits accumulated each year (auditors would expect changes if there has been a plan merger, acquisition, a significant plan provision change, or changes to the underlying assumptions).
- benefit payments in the roll forward of accumulated plan benefits, which should match the amount per the statement of changes in net assets (to properly match these amounts, it is necessary to understand if the beginning of the year or end of the year information is used for the actuarial valuation).
- the asset value on the financial statements, which should match the asset value shown in the actuarial report.
- inclusion of the effect of a change in plan provisions and the effect of merger, spin-off, or acquisition.

It is also important to note that the assumption of salary increases may not be relevant for FASB Statement No. 35 because the statement is based on the disclosure of the actuarial present value of accumulated plan benefits that does not take into account future salary increases. It may have some relevance if the actuary does not have or maintain salary histories for the plan participants and the salary increase assumption is used to estimate prior salary histories.

The Use of Beginning of Year Benefit Information Date

The presentation of the financial statement information and the footnotes are affected by the benefit information date selected for disclosure. The preferred approach is to use an end-of-year benefit information date. If end-of-year is presented, the present value of accumulated plan benefits will be as of the same date as the net assets. In this case, at a minimum, there will be two statements of net assets available for benefits and one statement of changes in net assets. There will be two corresponding statements (or disclosure in the footnotes) of the present value of accumulated plan benefits and one statement of changes. Examples of this are shown in exhibits D-1, D-2, D-3, and D-4 of Audit and Accounting Guide Employee Benefit Plans.

However, if beginning-of-year benefit information is used, the date of the benefit information in the actuarial report may not match the date that net assets are presented. For example, for financial statements presented as of December 31, 2008, and December 31, 2007, the actuarial valuation will be as of January 1, 2008. For the benefit information to match the statement of net assets, the present value of accumulated plan benefits should be presented as of December 31, 2007 (one day earlier). Typically, this will not cause a material misstatement unless there was a plan amendment that was adopted on or after January 1, 2008, with a January 1, 2008, effective date. In that case, the effect of the amendment must be removed. As shown in Audit and Accounting Guide Employee Benefit Plans, when beginning-of-year benefit information is used, two statements of net assets and two statements of changes would be presented. Only a single year of present value of accumulated plan benefits is required with a reconciliation from the prior year. Examples of this are shown in exhibits D-1, D-7, and D-8 of Audit and Accounting Guide Employee Benefit Plans.
Allocation Testing for Defined Contribution Plans

.120 One of the objectives of auditing procedures applied to individual participant accounts of a defined contribution plan is to provide the auditor with a reasonable basis for concluding whether net assets and transactions have been properly allocated (sometimes referred to as credited or charged, as applicable) to participant accounts in accordance with the plan documents. In some cases, the plan documents specify how certain plan activity is to be allocated. After the auditor obtains an understanding of what and how allocations are made, participant account activity during the year (for example, contributions, income allocations, expense allocations, and forfeiture allocations) would be taken into consideration in the determination of auditing procedures including consideration of reliance on a SAS No. 70 type 2 report, if available.

Help Desk—Investment income (loss) has several components, not all of which are always allocated at individual participant accounts. For example, net appreciation or depreciation is typically not allocated to participant accounts but is derived by the recordkeeping system based on the end of day pricing of investments. Dividend and interest income is often times immaterial to the financial statements taken as a whole, yet it is typically allocated.

.121 One method to test certain allocations is to recalculate activity for individual participants (for example, deferral or matching contributions). Other allocations may be performed electronically by the recordkeeping system, and it may be more efficient to rely on the SAS No. 70 type 2 report to reduce the scope of the substantive testing. Some of the additional substantive procedures the auditor may consider in addition to obtaining the SAS No. 70 type 2 report for participant allocations include

- reconciling the summation of participant accounts by investment option to investment balances.
- testing adjustments to participant accounts during the period.
- testing the participant complaint process including the resolution of complaints.

.122 Based on the results of those procedures as well as the auditor’s overall risk assessment of participant accounts, the auditor can determine if additional procedures are required, such as

- performing scanning analytics of participant activity (for example, contributions, benefit payments, and income allocation) during the period or
- confirming allocation activity directly with participants.

Help Desk—In a limited scope audit, the allocation of investment income to individual accounts is not certified by the trustee or custodian and therefore would be considered for testing by the auditor.

Missing Participant Data

.124 Plan sponsors and service providers have significant data storage burdens given the volume of paper and electronic records associated with ERISA plans and a number of plan sponsors have experienced difficulty in maintaining all pertinent participant data relating to census data and benefit payments. Often, plan sponsors do not maintain the proper detail supporting the deferred vested benefits for defined benefit plans (for example, eligibility records, individual census data, compensation records, employee work history, and so on). Lapses in maintaining data can be caused for various reasons, such as
• the result of a corporate transaction (for example, plan merger, spinoff, change in sponsorship, and so on).
• a change in service providers (for example, actuaries or other third-party administrators).
• a natural disaster (for example, a fire, flood, and so on).
• the inadvertent destruction or disposal of records.

.125 Irrespective of the various document retention requirements under federal and individual state laws, two basic record retention provisions under ERISA exist:

• Section 107 of ERISA requires anyone who must file a report (such as Form 5500) or certify information under Title 1 of ERISA to maintain sufficient records to verify, explain, or clarify the information contained in such reports for not less than 6 years after the filing of the report.
• Section 209 of ERISA requires every employer to maintain records necessary to determine benefits due or that may become due to each of its employees.

.126 As a result, employers should assume that records regarding plan benefits must be maintained indefinitely (either in their original paper form or electronically under certain conditions), or at least long enough such that they will never be needed to determine the eligibility for, or the amount of, a benefit. Failure to retain necessary documents, even if not specifically required to be kept by law, can result in very unfortunate consequences including significant costs and fees (for example, recreation of records, litigation defense, and so on).

.127 When auditors are unable to obtain the necessary information to test participant data or benefit payments, this could be considered a restriction on the scope of the audit. According to AU section 508, Reports on Audited Financial Statements (AICPA, Professional Standards, vol. 1), restrictions on the scope of the audit, whether imposed by the client or by circumstances (such as the timing of his or her work, the inability to obtain sufficient competent evidential matter, or an inadequacy in the accounting records), may require the auditor to qualify his or her opinion or to disclaim an opinion. In these situations, the auditor will need to determine how significant the restriction on the scope of the audit is to the overall engagement to determine the effect on the auditor’s report.

.128 The missing participant data issue is exacerbated when a change in auditor occurs, especially for defined benefit plans. Often, the predecessor auditor has been auditing the participant data for years and is comfortable with the cumulative audit knowledge. However, if the participant data have not been maintained, the successor auditor may have a scope limitation. Prior to accepting a new benefit plan engagement, auditors may wish to take special care in determining if any missing participant data exists.

.129 Auditors may recommend that the plan sponsor consult with legal counsel and consider contacting the DOL prior to attaching a qualified or disclaimer of opinion relating to a Form 5500 filing for a benefit plan.

Securities Lending

.130 Many employee benefit plans take part in securities lending programs. Often it is not evident from the trustee or custodial investment reports that the securities lending arrangements exist. Identification of such arrangements can be achieved through discussions with (a) those responsible at the plan sponsor for investment decisions or (b) investment service providers (for example, investment advisors, trustees/custodians, and so on) or review of all investment related agreements.

.131 Under FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125, plans that engage in securities lending should present the assets received in return for the securities, as well as the exchanged securities, on the statement of net assets available for benefits. The exchanged securities, as well as the assets received for them (if an investment) should be reported on the ERISA required supplemental schedule of assets (held at end of year)
with the appropriate disclosures. Also refer to paragraphs 2.32–35, 3.39–43, and 4.57–61 of Audit and Accounting Guide Employee Benefit Plans for further information.

.132 Employee benefit plans that participate in securities lending programs through security lending agents typically receive cash collateral for security loans. The cash is often invested in security lending cash collateral funds that are managed by the agent or parties affiliated with the agent. Although some collateral funds are money market funds registered with the SEC and subject to Rule 2a-7 under the Investment Company Act of 1940, many—even some holding themselves out as managed in a way similar to Rule 2a-7—are not registered. Unregistered collateral funds often invest in securities with longer maturity and higher risk than typical short-term “money market” type securities. Accordingly, it is important for benefit plans to verify the exact nature of the collateral funds used for investment of cash collateral. As a result of financial market conditions, many unregistered collateral funds have a net asset value per unit/participation interest (NAV) based on current fair values of underlying assets significantly less than $1, yet the collateral funds continue to issue and redeem their units/participation interests (units) at $1, as may be allowed by the relevant legal agreements. A number of those collateral funds have placed restrictions on redemption. Examples of audit procedures the auditor may perform regarding management’s determination of the fair value of the collateral fund at year-end, may include obtaining a copy of the collateral fund audited financial statements, if available, and comparing the value to what was reported in the benefit plan financial statements.

Form 11-K Audits

.133 The SEC requires employee stock purchase, savings, and similar plans with interests that constitute securities registered under the Securities Act of 1933 to file Form 11-K pursuant to Section 15(d) of the Securities Exchange Act of 1934. Plans that are required to file a Form 11-K are deemed to be issuers under the Sarbanes-Oxley Act and must submit to the SEC an audit in accordance with the auditing and related professional practice standards promulgated by the PCAOB.
