WHAT'S NEW IN THIS EDITION

STANDARDS RECENTLY ISSUED

<u>Statement</u>	<u>Title</u>	<u>Issue Date</u>	<u>Section</u>
SAS No. 121	<i>Revised Applicability of Statement on Auditing Standards No. 100, Interim Financial Information</i>	Feb. 2011	AU 722.05
SSAE No. 17	<i>Reporting on Compiled Prospective Financial Statements When the Practitioner's Independence Is Impaired</i>	Nov. 2010	AT 301.23
SSARS No. 20	<i>Revised Applicability of Statements on Standards for Accounting and Review Services</i>	Feb. 2011	AR 90.01
SQCS No. 8	<i>A Firm's System of Quality Control (Redrafted)</i>	Nov. 2010	QC 10

ADDITIONAL CHANGES

In addition to these recently issued standards, other changes in this edition of *AICPA Professional Standards* include the following:

<u>Section</u>	<u>Change</u>
How <i>Professional Standards</i> Is Organized	Revision of sections "Arrangement of Materials in <i>Professional Standards</i> " and "Description of Content" to reflect recent changes.
Part I	Revision of "Applicability of AICPA Professional Standards and Public Company Accounting Oversight Board Standards," to reflect conforming changes necessary due to the issuance of updates in the authoritative literature.
Cross-References to SASs	Revision of parts I–II of the <i>Cross-References to SASs</i> to better reflect the structure and organization of the U.S Auditing Standards section and to relocate the Statements on Standards for Attestation Engagements content to the Attestation Standards section. Addition of new table, "Auditing Standards Board Clarity Project—Extant AU Sections Mapped to Clarity SASs," to part III of the Cross-References to SASs.
AU 311	Amended due to the effective date of Statement on Auditing Standards (SAS) No. 117, <i>Compliance Audits</i> .
AU 314	Amended due to the effective date of SAS No. 117.

<u>Section</u>	<u>Change</u>
AU 9324	Interpretation No. 4 amended due to the effective date of SAS No. 118, <i>Other Information in Documents Containing Audited Financial Statements</i> , No. 119, <i>Supplementary Information in Relation to the Financial Statements as a Whole</i> , and No. 120, <i>Required Supplementary Information</i> .
AU 339	Amended due to the effective date of SAS No. 117.
AU 9342	Interpretation No. 1 amended due to the effective date of SAS Nos. 118–120.
AU 380	Amended due to the effective date of SAS No. 117; amended due to the effective date of SAS Nos. 118–120.
AU 508	Amended due to the effective date of SAS Nos. 118–120.
AU 530	Amended due to the effective date of SAS Nos. 118–120.
AU 552	Amended due to the effective date of SAS Nos. 118–120.
AU 623	Amended due to the effective date of SAS No. 117.
AU 634	Amended due to the effective date of SAS Nos. 118–120.
AU 9634	Interpretation No. 1 amended due to the effective date of SAS Nos. 118–120.
AU 801	Amended due to the effective date of SAS Nos. 118–120.
AU appendix B	Addition of adds appendix B, <i>Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards</i> , which highlights substantive differences between the Statements on Auditing Standards and International Standards on Auditing.
Attestation Standards	Addition of <i>Cross-References to SSAEs</i> . The new section contains two tables, "Statements on Standards for Attestation Engagements" and "Sources of Sections in Current Text," which were previously located in the <i>Cross-References to SASs</i> section.
AT 201	Amended due to the effective date of SAS No. 117.
AT 301	Amended due to the effective date of SAS Nos. 118–120.
AT 9501.01–.07	Addition of Interpretation No. 1 of AT section 501, <i>An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements</i> .
AT 601	Amended due to the effective date of SAS No. 117.

<u>Section</u>	<u>Change</u>
AT 701	Amended due to the effective date of SAS Nos. 118–120.
Accounting and Review Services	Addition of Cross-References to SSARSs to the beginning of the Accounting and Review Services section. The new section contains two tables. The first table "Statements on Standards for Accounting and Review Services," has been moved from AR appendix A, Cross-References to Statements on Standards for Accounting and Review Services. The second table, "Sources of Sections in Current Text," is new.
AR 20	Removed due to the effective date of Statement on Standards for Accounting and Review Services (SSARS) No. 19, <i>Compilation and Review Engagements</i> .
AR 50	Removed due to the effective date of SSARS No. 19.
AR 9080	Addition of Interpretation Nos. 1–16 of AR section 80, <i>Compilation of Financial Statements</i> .
AR 9090	Addition of Interpretation Nos. 1–10 of AR section 90, <i>Review of Financial Statements</i> .
AR 100	Removed due to the effective date of SSARS No. 19.
AR 9100	Removed due to the effective date of SSARS No. 19 (see AR appendix B for disposition of these interpretations).
AR 110	Amended due to the effective date of SSARS No. 19.
AR 120	Amended due to the effective date of SSARS No. 19.
AR 200	Amended due to the effective date of SSARS No. 19.
AR 300	Amended due to the effective date of SSARS No. 19.
AR 400	Amended due to the effective date of SSARS No. 19.
AR 600	Amended due to the effective date of SSARS No. 19.
AR appendix A	Removed due to the relocation of content from that appendix.
AR appendix B	Added due to the effective date of SSARS No. 19.
ET 92	Revisions to the terms <i>covered member (in part)</i> , <i>joint closely held investment, network (in part)</i> , and <i>network firm</i> by the Professional Ethics Executive Committee (PEEC).
ET 101.07, .16, and .19	Revisions to Interpretation Nos. 101-5, 101-14, and 101-17 of Rule 101, <i>Independence</i> , by the PEEC.
ET 191.163, .221, .224	Revisions to Ethics Ruling Nos. 81, 110, and 112 by the PEEC.
ET 291.023	Revisions to Ethics Ruling No. 12 by the PEEC.
ET 302.02	Revision to Interpretation No. 302-1 of Rule 302, <i>Contingent Fees</i> , by the PEEC.

<u>Section</u>	<u>Change</u>
ET 391.001	Revision to Ethics Ruling No. 1 by the PEEC.
ET 501.02	Revision to Interpretation No. 501-1 of Rule 501, <i>Acts Discreditable</i> , by the PEEC.
ET 505.03	Revision to Interpretation No. 505-2 of Rule 505, <i>Form of Organization and Name</i> , by the PEEC.
BL 220	Revisions due to the recently approved proposal to modernize admission requirements to the AICPA.
QC 10A	The content of Statements on Quality Control Standards (SQCS) No. 7, <i>A Firm's System of Quality Control</i> , has been moved to QC section 10A until the effective date of SQCS No. 8.
PFP 100	Revisions to combine the previous PFP sections 100–500 and to rearrange content into an order that better reflects the financial planning process; add appendixes to clarify and illustrate certain parts of the statement; include excerpts of guidance, such as the <i>Code of Professional Conduct</i> , for ease of reference; update foreword; and add new "Exceptions From This Statement."

HOW PROFESSIONAL STANDARDS IS ORGANIZED

Scope of Professional Standards

Professional Standards brings together for continuing reference the currently effective pronouncements on professional standards issued by the AICPA and contains a section detailing the applicability and integration of AICPA *Professional Standards* and Public Company Accounting Oversight Board (PCAOB) Standards.

Special Note About Financial Accounting Standards Board *Accounting Standards Codification*TM

The Financial Accounting Standards Board (FASB) released the FASB *Accounting Standards Codification*TM (ASC) on July 1, 2009. On its effective date, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission (SEC). FASB ASC significantly changes the way financial statement preparers, auditors, and academics perform accounting research.

FASB ASC flattens the U.S. generally accepted accounting principles (GAAP) hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. The codification creates FASB ASC 105, *Generally Accepted Accounting Principles*.

Amendments to FASB ASC are now issued by FASB through Accounting Standards Updates (ASUs) and serve only to update FASB ASC. FASB does not consider the ASUs authoritative in their own right; such amendments become authoritative when they are incorporated into FASB ASC. The ASUs issued include the amendments to the codification and an appendix of FASB ASC update instructions. ASUs also provide background information about the amendments, and explain the basis for FASB's decisions. This method of updating the accounting guidance means that there will no longer be, for example, accounting standards in the form of statements, staff positions, Emerging Issues Task Force (EITF) abstracts, or AICPA Accounting Statements of Position. ASUs are issued in the form of ASU No. 20YY-XX, in which "YY" is the last two digits of the year and "XX" is the sequential number for each update. For example, ASU No. 2011-01 is the first update in the year 2011. FASB organizes the contents of each ASU using the same section headings as those used in FASB ASC.

FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing the authoritative literature in a topically organized structure. FASB ASC disassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the EITF, and the AICPA) and reassembled them under approximately 90 topics and included all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance. Moreover, FASB ASC does not include governmental

accounting standards. FASB ASC is not intended to change U.S. GAAP or any requirements of the SEC.

FASB ASC uses a topical structure in which guidance is organized into *areas*, *topics*, *subtopics*, *sections*, and *subsections*. These terms are defined as follows:

Areas. The broadest category in FASB ASC and represent a grouping of topics.

Topics. The broadest categorization of related content and correlate with the International Accounting Standards (IASs) and International Financial Reporting Standards (IFRSs).

Subtopics. Represent subsets of a topic and are generally distinguished by type or scope.

Sections. Indicate the nature of the content such as recognition, measurement, or disclosure. The sections' structure correlates with the IASs and IFRSs.

Subsections. Allow further segregation and navigation of content.

Topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard setter or standard from which the content was derived. An example of the numerical referencing is FASB ASC 305-10-05, in which 305 is the *Cash and Cash Equivalents* topic, 10 represents the "Overall" subtopic, and 05 represents the "Overview and Background" section.

FASB ASC represents a major shift in the organization and presentation of U.S. GAAP. Users are encouraged to read the notice to constituents, which explains the scope, structure, and usage of consistent terminology in FASB ASC. This document is available on the FASB website at <http://asc.fasb.org>. In addition to the notice, this link contains information on the options available for users to access the codification. FASB ASC is offered by FASB at no charge in a Basic View and for an annual fee in a Professional View. FASB ASC and the notice to constituents are also offered by certain third party licensees, including the AICPA.

To read more about FASB ASC, including recent developments and updates, see the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/AccountingAndAuditing/Resources/AcctgFinRptg/AcctgFinRptgGuidance/Pages/FASBAccountingStandardsCodification.aspx.

Description of Content

Applicability of AICPA Professional Standards and PCAOB Standards

There is one part relating to the PCAOB Standards as follows:

Part I is a full-length narrative that provides guidance about standards applicable to nonissuers and standards applicable to issuers. Information about the PCAOB's Interim Standards is included, as well as information about major differences between generally accepted auditing standards and PCAOB Standards.

Cross-References to SASs

There are three parts relating to auditing standards as follows:

Part I is a list of Statements on Auditing Standards issued to date and a list of sources of sections in the current text.

Part II is a list of sections in Statement on Auditing Standards No. 1, *Codification of Auditing Standards and Procedures*, and a list of Statement on Auditing Procedure Nos. 1–54.

Part III provides a list of extant AU Sections mapped to clarified SASs of the Auditing Standards Board's Clarity Project.

U.S. Auditing — AICPA

The major divisions are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AU section 210.04 refers to the fourth paragraph of section 210, *Training and Proficiency of the Independent Auditor*.

Auditing interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to section 311 are numbered 9311, which directly follows section 311.

There are five appendixes relating to auditing standards as follows:

Appendix A provides the historical background for the present Statements on Auditing Standards.

Appendix B highlights substantive differences between the Statements on Auditing Standards and International Standards on Auditing.

Appendix C is reserved.

Appendix D provides a list of AICPA Audit and Accounting Guides and Statements of Position.

Appendix E provides a schedule of changes in Statements on Auditing Standards since the issuance of Statement on Auditing Standards No. 1, *Codification of Auditing Standards and Procedures, Nos. 33 through 54*.

Appendix F provides a list of other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff and are therefore presumed to be appropriate as defined in AU section 150, *Generally Accepted Auditing Standards*.

A topical index is provided for the auditing division, and is identified as AU Topical Index.

Attestation Engagements

A cross-reference chart is provided for this division and is identified as Cross-References to SSAEs.

Statements on Standards for Attestation Engagements and Attest Engagements interpretations appear with the prefix AT in their section numbers. Attest Engagements interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations relating to section 101 are numbered 9101, which directly follows section 101.

A topical index is provided for this division and is identified as AT Topical Index.

Accounting and Review Services

A cross-reference chart is provided for this division and is identified as Cross-References to SSARSs.

Statements on Standards for Accounting and Review Services and Accounting and Review Services interpretations appear with the prefix AR in their section numbers. Accounting and Review Services interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to section 100 are numbered 9100, which directly follows section 100.

There are two appendixes related to accounting and review services standards as follows:

Appendix A is reserved.

Appendix B reflects disposition of the interpretations to AR section 100 as a result of conforming changes necessary due to the effective date of SSARS No. 19.

Appendix C provides a schedule of changes in Statements on Standards for Accounting and Review Services beginning with the issuance of Statement on Standards for Accounting and Review Services No. 1, *Compilation and Review of Financial Statements*.

A topical index is provided for this division and is identified as AR Topical Index.

Code of Professional Conduct

The Rules of Conduct, Interpretations of Rules of Conduct, and Ethics Rulings related to the same subjects have been assembled within the major divisions of the Code of Professional Conduct part of *Professional Standards*. For example, Rule 101, *Independence* (ET sec.101), is followed by the first Ethics Interpretation under Rule 101, Interpretation No. 101-1, "Interpretation of Rule 101." Ethics rulings for this section appear in ET section 191.

A topical index is provided for this division and is identified as ET Topical Index.

Bylaws

The Bylaws of the AICPA and the related Implementing Resolutions of Council are assembled within the major divisions by section numbers. For example, BL section 230, *Requirements for Retention of Membership*, is followed by BL section 230R, *Implementing Resolutions Under Section 2.3 Requirements for Retention of Membership*.

In BL section 900, *General*, the following sections are included:

AICPA Mission Statement

A Description of the Professional Practice of Certified Public Accountants

A topical index is provided for this division and is identified as BL Topical Index.

Valuation Services

Statements on Standards for Valuation Services and Valuation Services Interpretations appear with the prefix VS in their section numbers.

Consulting Services

Statement on Standards for Consulting Services appears with the prefix CS in its section number.

A topical index is provided for this division and is identified as CS Topical Index.

Quality Control

Statements on Quality Control Standards appear with the prefix QC in their section numbers.

Peer Review

Standards for Performing and Reporting on Peer Reviews and Peer Review Interpretations appear with the prefix PR in their section numbers.

Tax Services

Statements on Standards for Tax Services appear with the prefix TS in their section numbers.

A topical index is provided for this division and is identified as TS Topical Index.

Personal Financial Planning

Statements on Responsibilities in Personal Financial Planning Practice appear with the prefix PFP in their section numbers.

A topical index is provided for this division and is identified as PFP Topical Index.

Continuing Professional Education

Policies for the CPE Membership Requirement and Statement on Standards for Continuing Professional Education (CPE) Programs appear with the prefix CPE in their section numbers.

A topical index is provided for this division and is identified as CPE Topical Index.

Topical Index

The topical indexes use the keyword method to facilitate reference to the pronouncements. The indexes are arranged alphabetically by topic and refer the reader to major divisions, sections, and paragraph numbers.

Part I

Applicability of AICPA Professional Standards and Public Company Accounting Oversight Board Standards

Background

As a result of the passage of the Sarbanes-Oxley Act of 2002 (the act), auditing and related professional practice standards to be used in the performance of and reporting on audits of the financial statements of public companies are now established by the Public Company Accounting Oversight Board (PCAOB). Note that the term *public companies* is a general reference to the entities subject to the securities laws. The act more specifically defines these entities as *issuers*, the definition of which is provided in the section that follows.

Among other significant provisions, the act requires a public accounting firm that prepares or issues, or participates in the preparation or issuance of, any audit report with respect to any issuer to register with the PCAOB. Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of issuers. Moreover, the act authorizes the PCAOB to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for issuers.

Who Is an Issuer?

As provided in Section 2 of the act, the term *issuer* means an issuer (as defined in Section 3 of the Securities Exchange Act of 1934 [15 U.S.C. 78c]), the securities of which are registered under Section 12 of that act (15 U.S.C. 78l) or that is required to file reports pursuant to Section 15(d) [15 U.S.C. 78o(d)], or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn.

Accordingly, nonissuers are those entities not subject to the act or the rules of the Securities and Exchange Commission (SEC). For audits of nonissuers, the preparation and issuance of audit reports must be conducted in accordance with the AICPA Code of Professional Conduct (AICPA Code) and the standards promulgated by the AICPA Auditing Standards Board (ASB). Audits of nonissuers remain governed by generally accepted auditing standards (GAAS) and the Statements on Quality Control Standards (SQCS) as issued by the ASB.

Standards Applicable to the Audits of Nonissuers

With the formation of the PCAOB, the ASB was reconstituted and its jurisdiction amended to recognize the ASB as the body authorized to promulgate auditing, attestation and quality control standards relating to the preparation and issuance of audit reports for nonissuers.

Failure to follow ASB standards in the audit of a nonissuer would be considered a violation of Rule 201, *General Standards*, and Rule 202, *Compliance With Standards* (ET sec. 201 par. .01 and ET sec. 202 par. .01), of the AICPA Code, or both.

As a caution to readers, pursuant to AU section 150, *Generally Accepted Auditing Standards*, interpretative publications are recommendations on the application of the Statements on Auditing Standards (SASs) in specific circumstances, including engagements for entities in specialized industries. Interpretative publications, which include auditing interpretations, auditing guidance in AICPA Audit and Accounting Guides, and auditing guidance found in Statements of Position (SOPs), are issued under the authority of the ASB. The auditor should identify interpretative publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretative publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

The ASB continues to issue SASs and interpretative publications that relate to audits of nonissuers and auditors should be alert to those issuances.

Standards Applicable to the Audits of Issuers

Rule 3100, *Compliance With Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board), issued by the PCAOB (see PCAOB Release No. 2003-009, dated June 30, 2003) generally requires all registered public accounting firms to adhere to the PCAOB's standards in connection with the preparation or issuance of any audit report on the financial statements of an issuer. Rule 3100 requires registered public accounting firms and their associated persons to comply with all applicable standards. Accordingly, if the PCAOB's standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board), issued by the PCAOB (see PCAOB Release No. 2004-007, dated June 9, 2004) defines the degree of responsibility imposed on the auditor by the use of certain terms in the PCAOB's auditing and related professional practice standards, including the interim standards adopted in Rule 3200T, *Interim Auditing Standards*; Rule 3300T, *Interim Attestation Standards*; Rule 3400T, *Interim Quality Control Standards*; Rule 3500T, *Interim Ethics Standards*; and Rule 3600T, *Interim Independence Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board) (further described in a later section). Effectively, Rule 3101 creates three categories of professional responsibilities:

1. *Unconditional responsibility.* The words *must*, *shall*, and *is required* indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.
2. *Presumptively mandatory responsibility.* The word *should* indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the PCAOB's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge

a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

3. *Responsibility to consider.* The words *may*, *might*, *could*, and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

Compliance With Standards Applicable to the Audits of Issuers

Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards in connection with an audit of the financial statements of an issuer may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of the act. In addition, the act provides that any violation of the PCAOB's rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the PCAOB's rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations."

Rule 201 and Rule 202 require a member who performs auditing and other professional services to comply with standards promulgated by bodies designated by the AICPA Council. The AICPA Council has designated the PCAOB as the body authorized to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers.

The AICPA's Professional Ethics Division is able to hold an AICPA member who performs audits of the financial statements of issuers accountable under Rules 201 and 202 of the AICPA Code for complying with PCAOB's auditing and related professional practice standards when performing such audits.

PCAOB's Adoption of Interim Standards

The PCAOB is subject to SEC oversight. As such, rules and standards issued by the PCAOB must be approved by the SEC before they become effective.

Pursuant to PCAOB Release No. 2003-006, dated April 18, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary rules that refer to professional standards of auditing, attestation, quality control, ethics, and independence in existence on that date (known collectively as the Interim Professional Auditing Standards). The SEC granted approval to these rules (see SEC Release No. 33-8222, dated April 25, 2003).

Essentially, the interim standards that the PCAOB adopted were the auditing standards, attestation standards, quality control standards issued by the ASB, certain former AICPA SEC Practice Section (SECPS) membership requirements, certain AICPA ethics and independence rules, and Independence Standards Board (ISB) rules as they existed on April 16, 2003. These interim standards will remain in effect while the PCAOB conducts a review of standards applicable to registered public accounting firms. Based on this review, the PCAOB may modify, repeal, replace, or adopt, in part or in whole, the

interim standards. As reiterated in a succeeding paragraph, the PCAOB's interim independence standards are not to be interpreted to supersede the SEC's independence requirements. The PCAOB has also made certain conforming amendments to the interim standards to reflect the adoption of PCAOB standards.

If a provision of a PCAOB standard addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standard should be considered superseded or effectively amended.

The five rules that comprise the PCAOB's interim standards consist of Rules 3200T, 3300T, 3400T, 3500T, and 3600T, and are described in the paragraphs that follow.

Rule 3200T, *Interim Auditing Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with GAAS as described in AU section 150, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

Rule 3300T, *Interim Attestation Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3300T governs the conduct of engagements that (1) are described in the ASB's Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attest Engagements* (AT sec. 101), and (2) relate to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's SSAEs, and related interpretations and AICPA SOPs, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

Rule 3400T, *Interim Quality Control Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Pursuant to Rule 3400T, the PCAOB has provisionally designated the SQCSs (QC sections 20–40) proposed and issued by the ASB and certain former AICPA SECPS¹ membership requirements, as they existed, and as they applied to SECPS members, on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Quality Control Standards.

Because the PCAOB intends the Interim Quality Control Standards (QC sections 20–40) to preserve existing standards as they applied on April 16, 2003

¹ The Center for Audit Quality (CAQ) restructured and expanded the AICPA's Center for Public Company Audit Firms, which was the successor to the Securities and Exchange Commission Practice Section (SECPS). The CAQ, which began operating in January 2007, is an autonomous, nonpartisan, public policy organization affiliated with the AICPA and dedicated to enhancing investor confidence and public trust in the global capital markets by fostering high quality performance by auditors of public entities.

consistent with Section 103(a)(3) of the act, those Interim Quality Control Standards (QC sec. 20–40) adapted from the former AICPA SECPS requirements apply only to those firms that were members of the AICPA's SECPS on April 16, 2003.

Rule 3500T, *Interim Ethics Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3500T sets forth ethical standards for registered public accounting firms and their personnel. Pursuant to Rule 3500T, the PCAOB has provisionally designated Rule 102, *Integrity and Objectivity*, and its interpretations (ET sec. 102 and .191) of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Ethics Standards.

Rule 3600T, *Interim Independence Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3600T sets forth independence standards for registered public accounting firms and their personnel. Pursuant to Rule 3600T, the PCAOB has provisionally designated Rule 101, *Independence*, and its interpretations (ET sec. 101 and ET sec. 191) of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, and Standard Nos. 1, 2, and 3, and Interpretation Nos. 99-1, 00-1, and 00-2 of the ISB, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Independence Standards (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). In addition, the PCAOB requires compliance with the SEC's independence rules. The PCAOB's Interim Independence Standards are not to be interpreted to supersede the SEC's independence requirements. Therefore, to the extent that a provision of the SEC's rule or policy is more restrictive—or less restrictive—than the PCAOB's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive requirement.

References to GAAS

Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), changed the requirement in the PCAOB's interim standards that the auditors include in their reports a reference to auditing standards promulgated by the ASB, examples of which include GAAS, U.S. GAAS, auditing standards generally accepted in the United States of America, and standards established by the AICPA. Instead, it requires that auditor's reports on the financial statements of issuers that are issued or reissued after the effective date of Auditing Standard No. 1 include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

Conforming amendments resulting from Auditing Standard No. 1 have not yet been reflected in the PCAOB's interim standards. Such conforming changes will be made after the PCAOB issues, and the SEC approves, such conforming amendments.

Standards Applicable If a Nonissuer's Financial Statements Are Audited in Accordance With Both GAAS and PCAOB Auditing Standards

Interpretation No. 18, "Reference to PCAOB Standards in an Audit Report on a Nonissuer," of AU section 508, *Reports on Audited Financial Statements* (AU sec. 9508 par. .89–.92), addresses the applicable standards, and references to those standards in the auditor's report, when an auditor is engaged to perform an audit of a nonissuer in accordance with GAAS and PCAOB auditing standards. The interpretation states that an auditor may indicate that the audit was conducted in accordance with GAAS and another set of auditing standards. If the auditor conducted the audit in accordance with GAAS and the auditing standards of the PCAOB, the auditor may indicate in the auditor's report that the audit was conducted in accordance with both sets of standards. The interpretation provides example report language.

Standards Applicable to an Integrated Audit of a Nonissuer's Financial Statements

In October 2008, the ASB issued SSAE No. 15, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AT sec. 501), which establishes standards and provides guidance to practitioners performing an examination of a nonissuer's internal control over financial reporting in the context of an integrated audit (an audit of an entity's financial statements and an examination of its internal control). SSAE No. 15 supersedes extant AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*, and converges the standards practitioners use for reporting on a nonissuer's internal control with PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards).

AICPA Standards and the Audits of Issuers

If a registered public accounting firm performs an audit of *an issuer* in accordance with PCAOB standards, the auditor does not need to follow standards promulgated by the ASB. However, AICPA members are required to comply with the AICPA Code in addition to the ethics and independence rules and standards required by the SEC and PCAOB.

AU Section 100

STATEMENTS ON AUDITING STANDARDS – Introduction

The following is a Codification of currently effective Statements on Auditing Standards (SASs) and related Auditing Interpretations. Statements on Auditing Standards are issued by the Auditing Standards Board (ASB), the senior technical body of the Institute designated to issue pronouncements on auditing matters. Rule 202 of the Institute's Code of Professional Conduct requires adherence to the applicable generally accepted auditing standards promulgated by the ASB. An auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. An auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, an auditor may depart from a presumptively mandatory requirement provided the auditor documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Interpretations are issued under the authority of the Auditing Standards Board to provide recommendations on the application of Statements on Auditing Standards in specific circumstances, including engagements for entities in specialized industries. An auditor should be aware of and consider interpretations applicable to his or her audit. An interpretation is not as authoritative as a pronouncement of the ASB; however, if an auditor does not apply an auditing interpretation, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing interpretation. The specific terms used to define professional requirements in the SASs are not intended to apply to interpretations since interpretations are not auditing standards. It is the ASB's intention to make conforming changes to the interpretations over the next several years to remove any language that would imply a professional requirement where none exists.

AU Section 110

Responsibilities and Functions of the Independent Auditor

Source: SAS No. 1, section 110; SAS No. 78; SAS No. 82.

Issue date, unless otherwise indicated: November, 1972.

.01 The objective of the ordinary audit of financial statements by the independent auditor is the expression of an opinion on the fairness with which they present, in all material respects, financial position, results of operations, and its cash flows in conformity with generally accepted accounting principles. The auditor's report is the medium through which he expresses his opinion or, if circumstances require, disclaims an opinion. In either case, he states whether his audit has been made in accordance with generally accepted auditing standards. These standards require him to state whether, in his opinion, the financial statements are presented in conformity with generally accepted accounting principles and to identify those circumstances in which such principles have not been consistently observed in the preparation of the financial statements of the current period in relation to those of the preceding period.

Distinction Between Responsibilities of Auditor and Management

.02 The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.¹ Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected.² The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.03 The financial statements are management's responsibility. The auditor's responsibility is to express an opinion on the financial statements. Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, initiate,

¹ See section 312, *Audit Risk and Materiality in Conducting an Audit*, and section 316, *Consideration of Fraud in a Financial Statement Audit*. The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for error or fraud. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

² See section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

authorize, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements. The entity's transactions and the related assets, liabilities, and equity are within the direct knowledge and control of management. The auditor's knowledge of these matters and internal control is limited to that acquired through the audit. Thus, the fair presentation of financial statements in conformity with generally accepted accounting principles³ is an implicit and integral part of management's responsibility. The independent auditor may make suggestions about the form or content of the financial statements or draft them, in whole or in part, based on information from management during the performance of the audit. However, the auditor's responsibility for the financial statements he or she has audited is confined to the expression of his or her opinion on them. [Revised, April 1989, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. As amended, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

Professional Qualifications

.04 The professional qualifications required of the independent auditor are those of a person with the education and experience to practice as such. They do not include those of a person trained for or qualified to engage in another profession or occupation. For example, the independent auditor, in observing the taking of a physical inventory, does not purport to act as an appraiser, a valuer, or an expert in materials. Similarly, although the independent auditor is informed in a general manner about matters of commercial law, he does not purport to act in the capacity of a lawyer and may appropriately rely upon the advice of attorneys in all matters of law. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

.05 In the observance of generally accepted auditing standards, the independent auditor must exercise his judgment in determining which auditing procedures are necessary in the circumstances to afford a reasonable basis for his opinion. His judgment is required to be the informed judgment of a qualified professional person. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

Detection of Fraud

[.06-.09] [Superseded January 1977 by Statement on Auditing Standards No. 16, as superseded by Statement on Auditing Standards No. 53, as superseded by section 316. Paragraphs renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

³ The responsibilities and functions of the independent auditor are also applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles; references in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations. [Footnote added, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

Responsibility to the Profession

.10 The independent auditor also has a responsibility to his profession, the responsibility to comply with the standards accepted by his fellow practitioners. In recognition of the importance of such compliance, the American Institute of Certified Public Accountants has adopted, as part of its Code of Professional Conduct, rules which support the standards and provide a basis for their enforcement. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

AU Section 120

Defining Professional Requirements in Statements on Auditing Standards

Source: SAS No. 102.

Effective December 2005.

Introduction

.01 This section sets forth the meaning of certain terms used in Statements on Auditing Standards (SASs) issued by the Auditing Standards Board in describing the professional requirements imposed on auditors.

Professional Requirements

.02 SASs contain professional requirements together with related guidance in the form of explanatory material. Auditors have a responsibility to consider the entire text of a SAS in carrying out their work on an engagement and in understanding and applying the professional requirements of the relevant SASs.

.03 Not every paragraph of a SAS carries a professional requirement that the auditor is expected to fulfill. Rather, the professional requirements are communicated by the language and the meaning of the words used in the SASs.

.04 SASs use two categories of professional requirements, identified by specific terms, to describe the degree of responsibility they impose on auditors, as follows:

- *Unconditional requirements.* The auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. SASs use the words *must* or *is required* to indicate an unconditional requirement.
- *Presumptively mandatory requirements.* The auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, the auditor may depart from a presumptively mandatory requirement provided the auditor documents his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. SASs use the word *should* to indicate a presumptively mandatory requirement.

If a SAS provides that a procedure or action is one that the auditor "should consider," the consideration of the procedure or action is presumptively required, whereas carrying out the procedure or action is not. The professional requirements of a SAS are to be understood and applied in the context of the explanatory material that provides guidance for their application. Section 339, *Audit Documentation*, establishes standards and provides guidance on the form, content, and extent of audit documentation.

Explanatory Material

.05 Explanatory material is defined as the text within a SAS (excluding any related appendixes or interpretations¹) that may:

- Provide further explanation and guidance on the professional requirements; or
- Identify and describe other procedures or actions relating to the activities of the auditor.

.06 Explanatory material that provides further explanation and guidance on the professional requirements is intended to be descriptive rather than imperative. That is, it explains the objective of the professional requirements (where not otherwise self-evident); it explains why the auditor might consider or employ particular procedures, depending on the circumstances; and it provides additional information for the auditor to consider in exercising professional judgment in performing the engagement.

.07 Explanatory material that identifies and describes other procedures or actions relating to the activities of the auditor is not intended to impose a professional requirement for the auditor to perform the suggested procedures or actions. Rather, these procedures or actions require the auditor's attention and understanding; how and whether the auditor carries out such procedures or actions in the engagement depends on the exercise of professional judgment in the circumstances consistent with the objective of the standard. The words *may*, *might*, and *could* are used to describe these actions and procedures.

Application

.08 The provisions of this section are effective upon issuance.²

¹ Auditing interpretations and certain appendixes represent interpretive publications, which differ from explanatory material. Interpretive publications, as defined in paragraphs .05 and .06 of section 150, *Generally Accepted Auditing Standards*, as amended, reside outside of the standards section of a SAS and are recommendations on the application of the SAS in specific circumstances, including engagements for entities in specialized industries. In contrast, explanatory material is always contained within the standards sections of the SAS and is meant to be more descriptive in nature. Interpretive publications are issued under the authority of the Auditing Standards Board (ASB) and consist of auditing interpretations of the SASs, appendixes to the SASs (except for previously issued appendixes to original pronouncements that when adopted modified other SASs), auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.

² The specific terms used to define professional requirements in this section are not intended to apply to interpretive publications issued under the authority of the ASB, since interpretive publications are not auditing standards. (See footnote 1.) It is the ASB's intention to make conforming changes to the interpretive publications over the next several years to remove any language that would imply a professional requirement where none exists. It is the ASB's intention that such language would only be used in the standards sections of the SASs.

AU Section 150

Generally Accepted Auditing Standards

(Supersedes SAS No. 1, section 150.)

Source: SAS No. 95; SAS No. 98; SAS No. 102; SAS No. 105; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after December 15, 2001, unless otherwise indicated.

.01 An independent auditor plans, conducts, and reports the results of an audit in accordance with generally accepted auditing standards. Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

Auditing Standards

.02 The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

General Standards

1. The auditor must have adequate technical training and proficiency to perform the audit.
2. The auditor must maintain independence in mental attitude in all matters relating to the audit.
3. The auditor must exercise due professional care in the performance of the audit and the preparation of the report.

Standards of Field Work

1. The auditor must adequately plan the work and must properly supervise any assistants.
2. The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.
3. The auditor must obtain sufficient appropriate¹ audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

¹ See paragraph .06 of section 326, *Audit Evidence*, for the definition of the term *appropriate*. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards (SAS) No. 105.]

*Standards of Reporting*²

1. The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles.³
2. The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.
3. When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.
4. The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards (SAS) No. 105. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by SAS No. 113.]

.03 Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct [ET section 202.01], requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB.⁴ The ASB develops and issues standards in the form of SASs through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

.04 The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.⁵ When, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and

² The reporting standards apply only when the auditor issues a report. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by SAS No. 113.]

³ When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), the first standard of reporting is satisfied by stating in the auditor's report that the basis of presentation is a comprehensive basis of accounting other than GAAP and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by SAS No. 113.]

⁴ In certain engagements, the auditor also may be subject to other auditing requirements, such as Government Auditing Standards issued by the comptroller general of the United States, or rules and regulations promulgated by the U.S. Securities and Exchange Commission. [Footnote renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

⁵ See section 312, *Audit Risk and Materiality in Conducting an Audit*. [Footnote renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement. [As amended, effective December 2005, by SAS No. 102. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by SAS No. 113.]

Interpretive Publications

.05 *Interpretive publications* consist of auditing interpretations of the SASs, appendixes to the SASs,⁶ auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.⁷ Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. [As amended, effective September 2002, by SAS No. 98.]

.06 The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

Other Auditing Publications

.07 *Other auditing publications* include AICPA auditing publications not referred to previously; auditing articles in the *Journal of Accountancy* and other professional journals; auditing articles in the *AICPA CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.⁸ Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

.08 If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing

⁶ Appendixes to SASs referred to in paragraph .05 of this section do not include previously issued appendixes to original pronouncements that when adopted modified other SASs. [Footnote added, effective September 2002, by SAS No. 98. Footnote renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

⁷ Auditing interpretations of the SASs are included in the codified version of the SASs. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in appendix D. [Footnote renumbered by the issuance of SAS No. 98, September 2002. Footnote subsequently renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

⁸ The auditor is not expected to be aware of the full body of other auditing publications. [Footnote renumbered by the issuance of SAS No. 98, September 2002. Footnote subsequently renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.⁹

Effective Date

.09 This section is effective for audits of financial statements for periods beginning on or after December 15, 2001.

⁹ Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are listed in AU appendix F. [Footnote renumbered by the issuance of SAS No. 98, September 2002. Footnote subsequently renumbered by the issuance of SAS No. 105, March 2006. Footnote subsequently renumbered by the issuance of SAS No. 113, November 2006.]

AU Section 161

The Relationship of Generally Accepted Auditing Standards to Quality Control Standards

(Supersedes SAS No. 4.)^[1]

Source: SAS No. 25; SAS No. 98.

Issue date, unless otherwise indicated: November, 1979.

.01 The independent auditor is responsible for compliance with generally accepted auditing standards in an audit engagement. Rule 202 [ET section 202.01] of the Rules of Conduct of the Code of Professional Conduct of the American Institute of Certified Public Accountants requires members to comply with such standards when associated with financial statements.

.02 A firm of independent auditors has a responsibility to adopt a system of quality control in conducting an audit practice.² Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with generally accepted auditing standards in its audit engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 96. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

.03 Generally accepted auditing standards relate to the conduct of individual audit engagements; quality control standards relate to the conduct of a firm's audit practice as a whole. Thus, generally accepted auditing standards and quality control standards are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of individual audit engagements and the conduct of a firm's audit practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular audit engagement was not performed in accordance with generally accepted auditing standards. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

^[1] [Footnote deleted by the issuance of Statement on Auditing Standards No. 98, September 2002.]

² The elements of quality control are identified in QC section 10A, *A Firm's System of Quality Control*. A system of quality control consists of policies designed to provide the firm with reasonable assurance that the firm and its personnel comply with professional standards and applicable legal and regulatory requirements and that reports issued by the firm are appropriate in the circumstances, and the procedures necessary to implement and monitor compliance with those policies. [Footnote added, effective September 2002, by SAS No. 98. Footnote amended due to the issuance of SQCS No. 7, December 2008.]

AU Section 201

Nature of the General Standards

Source: SAS No. 1, section 201.

Issue date, unless otherwise indicated: November, 1972.

.01 The general standards are personal in nature and are concerned with the qualifications of the auditor and the quality of his work as distinct from those standards which relate to the performance of his field work and to his reporting. These personal, or general, standards apply alike to the areas of field work and reporting.

AU Section 210

Training and Proficiency of the Independent Auditor

Source: SAS No. 1, section 210; SAS No. 5.

Issue date, unless otherwise indicated: November, 1972.

.01 The first general standard is:

The auditor must have adequate technical training and proficiency to perform the audit.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 This standard recognizes that however capable a person may be in other fields, including business and finance, he cannot meet the requirements of the auditing standards without proper education and experience in the field of auditing.

.03 In the performance of the audit which leads to an opinion, the independent auditor holds himself out as one who is proficient in accounting and auditing. The attainment of that proficiency begins with the auditor's formal education and extends into his subsequent experience. The independent auditor must undergo training adequate to meet the requirements of a professional. This training must be adequate in technical scope and should include a commensurate measure of general education. The junior assistant, just entering upon an auditing career, must obtain his professional experience with the proper supervision and review of his work by a more experienced superior. The nature and extent of supervision and review must necessarily reflect wide variances in practice. The auditor charged with final responsibility for the engagement must exercise a seasoned judgment in the varying degrees of his supervision and review of the work done and judgment exercised by his subordinates, who in turn must meet the responsibility attaching to the varying gradations and functions of their work.

.04 The independent auditor's formal education and professional experience complement one another; each auditor exercising authority upon an engagement should weigh these attributes in determining the extent of his supervision of subordinates and review of their work. It should be recognized that the training of a professional man includes a continual awareness of developments taking place in business and in his profession. He must study, understand, and apply new pronouncements on accounting principles and auditing procedures as they are developed by authoritative bodies within the accounting profession.

.05 In the course of his day-to-day practice, the independent auditor encounters a wide range of judgment on the part of management, varying from true objective judgment to the occasional extreme of deliberate misstatement. He is retained to audit and report upon the financial statements of a business because, through his training and experience, he has become skilled in accounting and auditing and has acquired the ability to consider objectively

and to exercise independent judgment with respect to the information recorded in books of account or otherwise disclosed by his audit. [As amended July, 1975 by Statement on Auditing Standards No. 5.]

AU Section 220

Independence

Source: SAS No. 1, section 220.

Issue date, unless otherwise indicated: November, 1972.

.01 The second general standard is:

The auditor must maintain independence in mental attitude in all matters relating to the audit.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 This standard requires that the auditor be independent; aside from being in public practice (as distinct from being in private practice), he must be without bias with respect to the client since otherwise he would lack that impartiality necessary for the dependability of his findings, however excellent his technical proficiency may be. However, independence does not imply the attitude of a prosecutor but rather a judicial impartiality that recognizes an obligation for fairness not only to management and owners of a business but also to creditors and those who may otherwise rely (in part, at least) upon the independent auditor's report, as in the case of prospective owners or creditors.

.03 It is of utmost importance to the profession that the general public maintain confidence in the independence of independent auditors. Public confidence would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence. To *be* independent, the auditor must be intellectually honest; to be *recognized* as independent, he must be free from any obligation to or interest in the client, its management, or its owners. For example, an independent auditor auditing a company of which he was also a director might be intellectually honest, but it is unlikely that the public would accept him as independent since he would be in effect auditing decisions which he had a part in making. Likewise, an auditor with a substantial financial interest in a company might be unbiased in expressing his opinion on the financial statements of the company, but the public would be reluctant to believe that he was unbiased. Independent auditors should not only be independent in fact; they should avoid situations that may lead outsiders to doubt their independence.

.04 The profession has established, through the AICPA's Code of Professional Conduct, precepts to guard against the *presumption* of loss of independence. "Presumption" is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests. Insofar as these precepts have been incorporated in the profession's code, they have the force of professional law for the independent auditor.

.05 The Securities and Exchange Commission (SEC) has also adopted requirements for independence of auditors who report on financial statements filed with it that differ from the AICPA requirements in certain respects.^[1]

^[1] [Footnote deleted, December 2001, to acknowledge the dissolution of the Independence Standard Board.]

.06 The independent auditor should administer his practice within the spirit of these precepts and rules if he is to achieve a proper degree of independence in the conduct of his work.

.07 To emphasize independence from management, many corporations follow the practice of having the independent auditor appointed by the board of directors or elected by the stockholders.

AU Section 230

*Due Professional Care in the Performance of Work**

Source: SAS No. 1, section 230; SAS No. 41; SAS No. 82; SAS No. 99; SAS No. 104.

Issue date, unless otherwise indicated: November, 1972.

.01 The third general standard is:

The auditor must exercise due professional care in the performance of the audit and the preparation of the report.¹

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 This standard requires the independent auditor to plan and perform his or her work with due professional care. Due professional care imposes a responsibility upon each professional within an independent auditor's organization to observe the standards of field work and reporting. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.03 *Cooley on Torts*, a legal treatise, describes the obligation for due care as follows:

Every man who offers his services to another and is employed assumes the duty to exercise in the employment such skill as he possesses with reasonable care and diligence. In all these employments where peculiar skill is requisite, if one offers his services, he is understood as holding himself out to the public as possessing the degree of skill commonly possessed by others in the same employment, and if his pretensions are unfounded, he commits a species of fraud upon every man who employs him in reliance on his public profession. But no man, whether skilled or unskilled, undertakes that the task he assumes shall be performed successfully, and without fault or error; he undertakes for good faith and integrity, but not for infallibility, and he is liable to his employer for negligence, bad faith, or dishonesty, but not for losses consequent upon pure errors of judgment.²

* [Title amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

¹ This amendment revises the third general standard of the ten generally accepted auditing standards. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

² D. Haggard, *Cooley on Torts*, 472 (4th ed., 1932). [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.04 The matter of due professional care concerns what the independent auditor does and how well he or she does it. The quotation from *Cooley on Torts* provides a source from which an auditor's responsibility for conducting an audit with due professional care can be derived. The remainder of the section discusses the auditor's responsibility in the context of an audit. [As amended, April 1982, by Statement on Auditing Standards No. 41. As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.05 An auditor should possess "the degree of skill commonly possessed" by other auditors and should exercise it with "reasonable care and diligence" (that is, with due professional care). [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.06 Auditors should be assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability so that they can evaluate the audit evidence they are examining. The auditor with final responsibility for the engagement should know, at a minimum, the relevant professional accounting and auditing standards and should be knowledgeable about the client.³ The auditor with final responsibility is responsible for the assignment of tasks to, and supervision of, assistants.⁴ [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

Professional Skepticism

.07 Due professional care requires the auditor to exercise *professional skepticism*. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor uses the knowledge, skill, and ability called for by the profession of public accounting to diligently perform, in good faith and with integrity, the gathering and objective evaluation of evidence. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.08 Gathering and objectively evaluating audit evidence requires the auditor to consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

.09 The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

³ See section 311, *Planning and Supervision*, paragraph .07. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

⁴ See section 311.11. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

Reasonable Assurance

.10 While exercising due professional care, the auditor must plan and perform the audit to obtain sufficient appropriate audit evidence so that audit risk will be limited to a low level that is, in his or her professional judgment, appropriate for expressing an opinion on the financial statements. The high, but not absolute, level of assurance that is intended to be obtained by the auditor is expressed in the auditor's report as obtaining reasonable assurance about whether the financial statements are free of material misstatement (whether caused by error or fraud). Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Therefore, an audit conducted in accordance with generally accepted auditing standards may not detect a material misstatement. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 104.]

.11 The independent auditor's objective is to obtain sufficient appropriate audit evidence to provide him or her with a reasonable basis for forming an opinion. The nature of most evidence derives, in part, from the concept of selective testing of the data being audited, which involves judgment regarding both the areas to be tested and the nature, timing, and extent of the tests to be performed. In addition, judgment is required in interpreting the results of audit testing and evaluating audit evidence. Even with good faith and integrity, mistakes and errors in judgment can be made. Furthermore, accounting presentations contain accounting estimates, the measurement of which is inherently uncertain and depends on the outcome of future events. The auditor exercises professional judgment in evaluating the reasonableness of accounting estimates based on information that could reasonably be expected to be available prior to the completion of field work.⁵ As a result of these factors, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing.⁶ [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.12 Because of the characteristics of fraud, a properly planned and performed audit may not detect a material misstatement. Characteristics of fraud include (a) concealment through collusion among management, employees, or third parties; (b) withheld, misrepresented, or falsified documentation; and (c) the ability of management to override or instruct others to override what otherwise appears to be effective controls. For example, auditing procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among personnel within the entity and third parties or among management or employees of the entity. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. In addition, an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. Furthermore, an auditor may not discover the existence of a

⁵ See section 342, *Auditing Accounting Estimates*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

⁶ See AU section 326, *Audit Evidence*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

modification of documentation through a side agreement that management or a third party has not disclosed. Finally, management has the ability to directly or indirectly manipulate accounting records and present fraudulent financial information by overriding controls in unpredictable ways. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

.13 Since the auditor's opinion on the financial statements is based on the concept of obtaining reasonable assurance, the auditor is not an insurer and his or her report does not constitute a guarantee. Therefore, the subsequent discovery that a material misstatement, whether from error or fraud, exists in the financial statements does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with generally accepted auditing standards. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

AU Section 311

Planning and Supervision

(Supersedes SAS No. 22)

Source: SAS No. 108; SAS No. 114.

See section 9311 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

.01 The first standard of field work states, "The auditor must adequately plan the work and must properly supervise any assistants." This section establishes standards and provides guidance to the independent auditor conducting an audit in accordance with generally accepted auditing standards on the considerations and activities applicable to planning and supervision. Planning and supervision continue throughout the audit.

.02 Audit planning involves developing an overall audit strategy for the expected conduct, organization, and staffing of the audit. The nature, timing, and extent of planning vary with the size and complexity of the entity, and with the auditor's experience with the entity and understanding of the entity and its environment, including its internal control.

.03 Obtaining an understanding of the entity and its environment, including its internal control, is an essential part of planning and performing an audit in accordance with generally accepted auditing standards.¹ The auditor must plan the audit so that it is responsive to the assessment of the risk of material misstatement based on the auditor's understanding of the entity and its environment, including its internal control. Planning is not a discrete phase of the audit, but rather an iterative process that begins with engagement acceptance and continues throughout the audit as the auditor performs audit procedures and accumulates sufficient appropriate audit evidence to support the audit opinion. As a result of performing planned audit procedures,² the auditor may obtain disconfirming evidence that might cause the auditor to revise the overall audit strategy.

¹ Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, establishes standards and provides guidance on obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement, whether due to error or fraud, at the financial statement and relevant assertion levels. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, establishes standards and provides guidance on the auditor's overall responses and the nature, timing, and extent of further audit procedures that are responsive to the assessed risks.

² Paragraph .03 of section 314 provides guidance with respect to the procedures the auditor performs in obtaining an understanding of the entity and its environment to establish a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing the risk of material misstatement of the financial statements.

.04 The auditor with final responsibility for the audit may delegate portions of the planning and supervision of the audit to other firm personnel.³ For purposes of this section, (a) firm personnel other than the auditor with final responsibility for the audit are referred to as *assistants* and (b) the term *auditor* refers to either the auditor with final responsibility for the audit or assistants.

Planning

Appointment of the Independent Auditor

.05 Early appointment of the independent auditor has many advantages to both the auditor and the client. Early appointment enables the auditor to plan the audit prior to the balance-sheet date.

.06 Although early appointment is preferable, an independent auditor may accept an engagement near or after the close of the fiscal year. In such instances, before accepting the engagement, the auditor should ascertain whether circumstances are likely to permit an adequate audit and expression of an unqualified opinion and, if they will not, the auditor should discuss with the client the possible necessity for a qualified opinion or disclaimer of opinion. Sometimes the audit limitations present in such circumstances can be remedied. For example, the taking of the physical inventory can be postponed or another physical inventory, which the auditor can observe, can be taken.

.07 Section 315, *Communications Between Predecessor and Successor Auditors*, provides guidance concerning a change of auditors. Among other matters, it describes communications that a successor auditor should evaluate before accepting an engagement.

Establishing an Understanding With the Client

.08 The auditor should establish an understanding with the client⁴ regarding the services to be performed for each engagement⁵ and should document the understanding through a written communication with the client. Such an understanding reduces the risk that either the auditor or the client may misinterpret the needs or expectations of the other party. For example, it reduces the risk that the client may inappropriately rely on the auditor to protect the entity against certain risks or to perform certain functions that are the client's responsibility. The understanding should include the objectives of

³ Paragraphs .14 through .20 of section 314 provide guidance about the discussion among the audit team. The objective of this discussion is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

⁴ Generally, the auditor establishes an understanding of the services to be performed with the entity's management. In some cases, the auditor may establish such an understanding with those charged with governance. The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting and disclosure process. In some cases, those charged with governance are responsible for approving the financial statements (in other cases, management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committees* expressed elsewhere in generally accepted auditing standards.

⁵ See paragraph .28 of QC section 10A, *A Firm's System of Quality Control*. [Footnote amended due to the issuance of SQCS No. 7, December 2008.]

the engagement, management's responsibilities, the auditor's responsibilities, and limitations of the engagement.⁶

.09 An understanding with the client regarding an audit of the financial statements generally includes the following matters:

- The objective of the audit is the expression of an opinion on the financial statements.
- Management is responsible for the entity's financial statements and the selection and application of the accounting policies.
- Management is responsible for establishing and maintaining effective internal control over financial reporting.
- Management is responsible for designing and implementing programs and controls to prevent and detect fraud.
- Management is responsible for identifying and ensuring that the entity complies with the laws and regulations applicable to its activities.
- Management is responsible for making all financial records and related information available to the auditor.
- At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
- The auditor is responsible for conducting the audit in accordance with generally accepted auditing standards. Those standards require that the auditor obtain reasonable rather than absolute assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, a material misstatement may remain undetected. Also, an audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.
- An audit includes obtaining an understanding of the entity and its environment, including its internal control, sufficient to assess the risks of material misstatement of the financial statements and to design the nature, timing, and extent of further audit procedures. An audit is not designed to provide assurance on internal control or to identify significant deficiencies. However, the auditor is responsible for ensuring that those charged with governance are aware of any significant deficiencies that come to his or her attention.
- Management is responsible for adjusting the financial statements to correct material misstatements and for affirming to the auditor in the

⁶ The objectives of certain engagements may differ. The understanding should reflect the effects of those objectives on the responsibilities of management and the auditor, and on the limitations of the engagement. The following are examples:

- Audits of an entity's compliance with applicable compliance requirements performed under section 801, *Compliance Audits*.
- Application of agreed-upon procedures to specified elements, accounts, or items of a financial statement (see AT section 201, *Agreed-Upon Procedures Engagements*).
- Engagements to examine the design and operating effectiveness of an entity's internal control over financial reporting that is integrated with an audit of the entity's financial statements (see AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*).

[Footnote revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS No. 117.]

management representation letter that the effects of any uncorrected misstatements⁷ aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

These matters should be communicated in the form of an engagement letter.

.10 An understanding with the client also may include other matters, such as the following:

- The overall audit strategy (see paragraphs .13 through .18)
- Involvement of specialists or internal auditors, if applicable
- Involvement of a predecessor auditor
- Fees and billing
- Any limitation of or other arrangements regarding the liability of the auditor or the client, such as indemnification to the auditor for liability arising from knowing misrepresentations to the auditor by management (regulators may restrict or prohibit such liability limitation arrangements)
- Conditions under which access to audit documentation may be granted to others
- Additional services to be provided relating to regulatory requirements
- Other services to be provided in connection with the engagement, for example, nonattest services, such as accounting assistance and preparation of tax returns subject to the limitations of Ethics Interpretation No. 101–3, "Performance of Nonattest Services," [ET section 101.05], under Rule 101, *Independence*.

Preliminary Engagement Activities

.11 In addition to the procedures related to the appointment of the auditor and establishing an understanding of the terms of the engagement as discussed above, the auditor should perform the following activities at the beginning of the current audit engagement:

- Perform procedures regarding the continuance of the client relationship and the specific audit engagement.
- Evaluate the auditor's compliance with ethical requirements, including independence.

The auditor's consideration of client continuance and ethical requirements, including independence, occurs throughout the performance of the audit engagement as changes in conditions and circumstances occur. However, the auditor's initial procedures on both client continuance and evaluation of the auditor's ethical requirements (including independence) should be performed prior to performing other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often occur shortly after (or in connection with) the completion of the previous audit. See QC section 10A, *A Firm's System of Quality Control*. [Paragraph amended due to the issuance of SQCS No. 7, December 2008.]

.12 The purpose of performing these preliminary engagement activities is to consider any events or circumstances that may either adversely affect

⁷ Paragraph .07 of section 312, *Audit Risk and Materiality in Conducting an Audit*, states that a misstatement can result from errors or fraud.

the auditor's ability to plan and perform the audit engagement to reduce audit risk to an acceptably low level or may pose an unacceptable level of risk to the auditor. Performing these preliminary engagement activities helps ensure that the auditor plans an audit engagement for which:

- The auditor maintains the necessary independence and ability to perform the engagement.
- There are no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- There is no misunderstanding with the client as to the terms of the engagement.

The Overall Audit Strategy⁸

.13 The auditor should establish the overall audit strategy for the audit.

.14 In establishing the overall audit strategy, the auditor should:

- a. Determine the characteristics of the engagement that define its scope, such as the basis of reporting, industry-specific reporting requirements, and the locations of the entity;
- b. Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required, such as deadlines for interim and final reporting, and key dates for expected communications with management and those charged with governance; and
- c. Consider the important factors that will determine the focus of the audit team's efforts, such as determination of appropriate materiality levels, preliminary identification of areas where there may be higher risks of material misstatement, preliminary identification of material locations and account balances, evaluation of whether the auditor may plan to obtain evidence regarding the operating effectiveness of internal control, and identification of recent significant entity-specific, industry, financial reporting, or other relevant developments.

In developing the audit strategy, the auditor also should consider the results of preliminary engagement activities (see paragraphs .11 and .12) and, where practicable, experience gained on other engagements performed for the entity. The Appendix [paragraph .34] to this section lists examples of matters the auditor may consider in establishing the overall audit strategy for an engagement.

.15 The process of developing the audit strategy helps the auditor determine the resources necessary to perform the engagement, such as:

- The resources to assign for specific audit areas, such as the use of appropriately experienced team members for high-risk areas or the involvement of experts on complex matters;
- The amount of resources to assign to specific audit areas, such as the number of team members assigned to observe the inventory count at material locations, the extent of review of other auditors' work, or the audit budget in hours to allocate to high-risk areas;
- When these resources are to be assigned, such as whether at an interim audit period or at key cutoff dates;

⁸ See paragraphs .04 through .06 of section 318 for further guidance on the auditor's overall responses in performing an audit.

- How such resources are to be managed, directed, and supervised, such as when team briefing and debriefing meetings are expected to be held, how the auditor with final responsibility and manager reviews are expected to take place (for example, on-site or off-site), and whether to complete engagement quality control reviews.

.16 The auditor should update and document any significant revisions to the overall audit strategy to respond to changes in circumstances.

.17 Once the audit strategy has been established, the auditor is able to start the development of a more detailed audit plan to address the various matters identified in the audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. Although the auditor may establish the audit strategy before developing the detailed audit plan, the two planning activities are not necessarily discrete or sequential processes but are closely interrelated since changes in one may result in consequential changes to the other. Paragraphs .19 through .21 provide further guidance on developing the audit plan.

.18 In audits of small entities, the entire audit may be conducted by a very small audit team. Many audits of small entities involve the auditor with final responsibility (who may be a sole practitioner) working with one audit team member (or without any audit team members). With a smaller team, coordination and communication between team members are easier. Establishing the overall audit strategy for the audit of a small entity need not be a complex or time-consuming exercise; it varies according to the size of the entity and the complexity of the audit. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the audit documentation and highlighting issues identified in the audit just completed, updated, and changed in the current period based on discussions with the owner-manager, can serve as the basis for planning the current audit engagement.

The Audit Plan

.19 The auditor must develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level.

.20 The audit plan is more detailed than the audit strategy and includes the nature, timing, and extent of audit procedures to be performed by audit team members in order to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level. Documentation of the audit plan also serves as a record of the proper planning and performance of the audit procedures that can be reviewed and approved prior to the performance of further audit procedures.

.21 The audit plan should include:

- A description of the nature, timing, and extent of planned risk assessment procedures sufficient to assess the risks of material misstatement, as determined under section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.
- A description of the nature, timing, and extent of planned further audit procedures at the relevant assertion level for each material class of transactions, account balance, and disclosure, as determined under section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. The plan for further audit procedures reflects the auditor's decision whether to test the operating effectiveness of controls, and the nature, timing, and extent of planned substantive procedures.

- A description of other audit procedures to be carried out for the engagement in order to comply with generally accepted auditing standards (for example, seeking direct communication with the entity's lawyers).

Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures may occur early in the audit process. However, planning of the nature, timing, and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. The auditor should document changes to the original audit plan. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances, and disclosures before completing the more detailed audit plan of all remaining further audit procedures.

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.22 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who may be either on the auditor's staff or an outside professional. If the use of such a professional is planned, the auditor should determine whether that professional will effectively function as a member of the audit team. For example, a tax practitioner or a professional with valuation skills employed by the audit firm may be used to perform audit procedures as part of the audit team's work on the audit. If such a professional is part of the audit team, the auditor's responsibilities for supervising that professional are equivalent to those for other assistants (see paragraph .28). In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; to evaluate whether the specified audit procedures will meet the auditor's objectives; and to evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures.

.23 The use of professionals possessing information technology (IT) skills to determine the effect of IT on the audit, to understand the IT controls, or to design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor should consider such factors as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems, or the implementation of new systems
- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.24 Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, authorized, recorded, processed, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls.

Communication With Those Charged With Governance

.25 Section 380, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 114.]

Additional Considerations in Initial Audit Engagements

.26 The auditor should perform the following activities before starting an initial audit:

- a. Perform procedures regarding the acceptance of the client relationship and the specific audit engagement (see QC section 10A).
- b. Communicate with the previous auditor, where there has been a change of auditors (see section 315)

[Paragraph amended due to the issuance of SQCS No. 7, December 2008.]

.27 The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For initial audits, additional matters the auditor should consider in developing the overall audit strategy and audit plan include the following:

- Arrangements to be made with the previous auditor, for example, to review the previous auditor's audit documentation.
- Any major issues (including the application of accounting principles or of auditing and reporting standards) discussed with management in connection with the initial selection as auditors, the communication of these matters to those charged with governance, and how these matters affect the overall audit strategy and audit plan.
- The planned audit procedures to obtain sufficient appropriate audit evidence regarding opening balances.
- The assignment of firm personnel with appropriate levels of capabilities and competence to respond to anticipated significant risks.
- Other procedures required by the firm's system of quality control for initial audit engagements (for example, the firm's system of quality control may require the involvement of another partner or senior individual to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance).

Supervision

.28 Supervision involves directing the efforts of assistants who are involved in accomplishing the objectives of the audit and determining whether those objectives were accomplished. Elements of supervision include instructing assistants, keeping informed of significant issues encountered, reviewing the work performed, and dealing with differences of opinion among firm personnel. The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work, including knowledge of the client's business and industry.

.29 The auditor with final responsibility for the audit should communicate with members of the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, with special emphasis on fraud. Such discussion helps all audit team members understand the entity and its environment, including its internal control, and how risks that the entity faces may affect the audit. The discussion should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit.⁹

.30 In addition, assistants should be informed of their responsibilities and the objectives of the audit procedures they are to perform. They should be informed of matters that may affect the nature, timing, and extent of audit procedures they are to perform, such as the nature of the entity's business as it relates to their assignments and possible accounting and auditing issues. The auditor with final responsibility for the audit should direct assistants to bring to his or her attention accounting and auditing issues raised during the audit that the assistant believes are of significance to the financial statements or auditor's report so the auditor with final responsibility may assess their significance. Assistants also should be directed to bring to the attention of appropriate individuals in the firm difficulties encountered in performing the audit, such as missing documents or resistance from client personnel in providing access to information or in responding to inquiries.

.31 The work performed by each assistant, including the audit documentation, should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditor's report. The person with final responsibility for the audit may delegate parts of the review responsibility to other assistants, in accordance with the firm's quality control system. See section 339, *Audit Documentation*, for guidance on documenting the review of audit documentation.

.32 Each assistant has a professional responsibility to bring to the attention of appropriate individuals in the firm disagreements or concerns with respect to accounting and auditing issues that the assistant believes are of significance to the financial statements or auditor's report, however those disagreements or concerns may have arisen. The auditor with final responsibility for the audit and assistants should be aware of the procedures to be followed when differences of opinion concerning accounting and auditing issues exist among firm personnel involved in the audit. Such procedures should enable an assistant to document his or her disagreement with the conclusions reached if, after appropriate consultation, he or she believes it necessary to disassociate himself or herself from the resolution of the matter. In this situation, the basis for the final resolution should also be documented.

Effective Date

.33 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

⁹ For further guidance on the discussion among the audit team, see paragraphs .14 through .18 of section 316, *Consideration of Fraud in a Financial Statement Audit*, and paragraphs .14 through .20 of section 314.

Appendix

Examples of Matters the Auditor May Consider in Establishing the Overall Audit Strategy

A1. This appendix provides examples of matters the auditor may consider in establishing the overall audit strategy. Many of these matters will also influence the auditor's detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Not all matters listed here are relevant to every audit engagement and the list is not necessarily complete. In addition, the auditor may consider these matters in an order different from that shown below.

Scope of the Audit Engagement

A2. The auditor may consider the following matters when establishing the scope of the audit engagement:

- The basis of reporting on which the financial information to be audited has been prepared, including any need for reconciliations to another basis of reporting.
- Industry-specific reporting requirements, such as reports mandated by industry regulators.
- The expected audit coverage, including the number and locations to be included.
- The nature of the control relationships between a parent and its subsidiaries that determine how the group is to be consolidated.
- The extent to which locations are audited by other auditors.
- The nature of the subsidiaries or divisions to be audited, including the need for specialized knowledge.
- The reporting currency to be used, including any need for currency translation for the financial information audited.
- The need for statutory or regulatory audit requirements, for example, the Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organization*.
- The availability of the work of internal auditors and the extent of the auditor's potential reliance on such work.
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them.
- The expected use of audit evidence obtained in prior audits, for example, audit evidence related to risk assessment procedures and tests of controls.
- The effect of information technology on the audit procedures, including the availability of data and the expected use of computer-assisted audit techniques.

- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews.
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity.
- The availability of client personnel and data.

Reporting Objectives, Timing of the Audit, and Communications Required

A3. The auditor may consider the following matters when ascertaining the reporting objectives of the engagement, the timing of the audit, and the nature of communications required:

- The entity's timetable for reporting, including interim periods.
- The organization of meetings with management and those charged with governance to discuss the nature, extent, and timing of the audit work.
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters, and communications to those charged with governance.
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement and the expected deliverables resulting from the audit procedures.
- Communication with auditors of other locations regarding the expected types and timing of reports to be issued and other communications in connection with the audit of other locations.
- The expected nature and timing of communications among audit team members, including the nature and timing of team meetings and timing of the review of work performed.
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit.

Scope of the Audit

A4. The auditor may consider the following matters when setting the scope of the audit:

- With respect to materiality:
 - Setting materiality for planning purposes.
 - Setting and communicating materiality for auditors of other locations.
 - Reconsidering materiality as audit procedures are performed during the course of the audit.
 - Identifying the material locations and account balances.
- Audit areas where there is a higher risk of material misstatement.
- The effect of the assessed risk of material misstatement at the overall financial statement level on scope, supervision, and review.

- The selection of the audit team (including, where necessary, the engagement quality control reviewer) and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas where there may be higher risks of material misstatement.
 - Engagement budgeting, including considering the appropriate amount of time to set aside for areas where there may be higher risks of material misstatement.
 - The manner in which the auditor emphasizes to audit team members the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating audit evidence.
 - Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified weaknesses and action taken to address them.
 - Management's commitment to the design and operation of internal control.
 - Volume of transactions, which may be a factor in determining whether it is more effective for the auditor to rely on internal control.
 - Importance attached to internal control throughout the entity to the successful operation of the business.
 - Significant business developments affecting the entity, including changes in information technology and business processes; changes in key management; and acquisitions, mergers, and divestments.
 - Significant industry developments, such as changes in industry regulations and new reporting requirements.
 - Significant accounting changes, such as changes in generally accepted accounting principles.
 - Other significant relevant developments, such as changes in the legal environment affecting the entity.
-

AU Section 9311

Planning and Supervision: Auditing Interpretations of Section 311

1. Communications Between the Auditor and Firm Personnel Responsible for Non-Audit Services

.01 *Question*—Section 311, *Planning and Supervision*, Appendix A, paragraph A2. [section 311.34], lists the following procedure that an auditor may consider in planning an audit: "Discussing matters that may affect the audit with firm personnel responsible for non-audit services to the entity."

.02 What specific things should the auditor consider in performing this procedure?

.03 *Interpretation*—The auditor should consider the nature of non-audit services that have been performed. He should assess whether the services involve matters that might be expected to affect the entity's financial statements or the performance of the audit, for example, tax planning or recommendations on a cost accounting system. If the auditor decides that the performance of the non-audit services or the information likely to have been gained from it may have implications for his audit, he should discuss the matter with personnel who rendered the services and consider how the expected conduct and scope of his audit may be affected. In some cases, the auditor may find it useful to review the pertinent portions of the work papers prepared for the non-audit engagement as an aid in determining the nature of the services rendered or the possible audit implications.

AU Section 312

Audit Risk and Materiality in Conducting an Audit

(Supersedes SAS No. 47.)

Source: SAS No. 107.

See section 9312 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

.01 This section provides guidance on the auditor's consideration of audit risk and materiality when performing an audit of financial statements in accordance with generally accepted auditing standards. Audit risk and materiality affect the application of generally accepted auditing standards, especially the standards of fieldwork and reporting, and are reflected in the auditor's standard report. Audit risk and materiality, among other matters, need to be considered together in designing the nature, timing, and extent of audit procedures and in evaluating the results of those procedures.

.02 The existence of audit risk is recognized in the description of the responsibilities and functions of the independent auditor that states, "Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected."¹ Audit risk² is the risk that the auditor may unknowingly fail to appropriately modify his or her opinion on financial statements that are materially misstated.³

.03 The concept of materiality recognizes that some matters, either individually or in the aggregate, are important for fair presentation of financial statements in conformity with generally accepted accounting principles,⁴ while other matters are not important. In performing the audit, the auditor is

¹ See section 110, *Responsibilities and Functions of the Independent Auditor* and section 230, *Due Professional Care in the Performance of Work*, for a further discussion of reasonable assurance.

² In addition to audit risk, the auditor is also exposed to loss of or injury to his or her professional practice from litigation, adverse publicity, or other events arising in connection with financial statements audited and reported on. This exposure is present even though the auditor has performed the audit in accordance with generally accepted auditing standards and has reported appropriately on those financial statements. Even if an auditor assesses this exposure as low, the auditor does not perform less extensive audit procedures than otherwise is appropriate under generally accepted auditing standards.

³ This definition of *audit risk* does not include the risk that the auditor might erroneously conclude that the financial statements are materially misstated. In such a situation, the auditor ordinarily reconsiders or extends audit procedures and requests that management perform specific tasks to reevaluate the appropriateness of the financial statements. These steps ordinarily lead the auditor to the correct conclusion. This definition also excludes the risk of an inappropriate reporting decision unrelated to the detection and evaluation of a misstatement in the financial statements, such as an inappropriate decision regarding the form of the auditor's report because of a limitation on the scope of the audit.

⁴ The concepts of audit risk and materiality also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles as defined in section 623, *Special Reports*. References in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations.

concerned with matters that, either individually or in the aggregate, could be material to the financial statements. The auditor's responsibility is to plan and perform the audit to obtain reasonable assurance that material misstatements, whether caused by errors or fraud, are detected.

Materiality in the Context of an Audit

.04 The auditor's consideration of materiality is a matter of professional judgment and is influenced by the auditor's perception of the needs of users of financial statements. The perceived needs of users are recognized in the discussion of materiality in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*, which defines *materiality* as "the magnitude of an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would have been changed or influenced by the omission or misstatement." That discussion recognizes that materiality judgments are made in light of surrounding circumstances and necessarily involve both quantitative and qualitative considerations.⁵

Users

.05 In an audit of financial statements, the auditor's judgment as to matters that are material to users of financial statements is based on consideration of the needs of users as a group; the auditor does not consider the possible effect of misstatements on specific individual users, whose needs may vary widely.⁶

.06 The evaluation of whether a misstatement could influence economic decisions of users, and therefore be material, involves consideration of the characteristics of those users. Users are assumed to:

- a. Have an appropriate knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with an appropriate diligence;
- b. Understand that financial statements are prepared and audited to levels of materiality;
- c. Recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment, and the consideration of future events; and
- d. Make appropriate economic decisions on the basis of the information in the financial statements.

The determination of materiality, therefore, takes into account how users with such characteristics could reasonably be expected to be influenced in making economic decisions.

Nature and Causes of Misstatements

.07 The representation in the auditor's standard report regarding fair presentation, in all material respects, in conformity with generally accepted accounting principles indicates the auditor's belief that the financial statements,

⁵ See paragraphs .59 and .60 for further guidance regarding qualitative considerations in evaluating audit findings.

⁶ When determining materiality in audits of financial statements or other historical financial information prepared for a special purpose, the auditor considers the needs of specific users in the context of the objective of the engagement.

taken as a whole, are not materially misstated. Misstatements can result from errors or fraud⁷ and may consist of any of the following:

- a. An inaccuracy in gathering or processing data from which financial statements are prepared
- b. A difference between the amount, classification, or presentation of a reported financial statement element, account, or item and the amount, classification, or presentation that would have been reported under generally accepted accounting principles
- c. The omission of a financial statement element, account, or item
- d. A financial statement disclosure that is not presented in conformity with generally accepted accounting principles
- e. The omission of information required to be disclosed in conformity with generally accepted accounting principles
- f. An incorrect accounting estimate arising, for example, from an oversight or misinterpretation of facts; and
- g. Management's judgments concerning an accounting estimate or the selection or application of accounting policies that the auditor may consider unreasonable or inappropriate.

.08 Misstatements may be of two types: known and likely, defined as follows:

- a. *Known misstatements.* These are specific misstatements identified during the audit arising from the incorrect selection or misapplication of accounting principles or misstatements of facts identified, including, for example, those arising from mistakes in gathering or processing data and the overlooking or misinterpretation of facts.
- b. *Likely misstatements.* These are misstatements that:
 - i. Arise from differences between management's and the auditor's judgments concerning accounting estimates that the auditor considers unreasonable or inappropriate (for example, because an estimate included in the financial statements by management is outside of the range of reasonable outcomes the auditor has determined).
 - ii. The auditor considers likely to exist based on an extrapolation from audit evidence obtained (for example, the amount obtained by projecting known misstatements identified in an audit sample⁸ to the entire population from which the sample was drawn).

.09 The term *errors* refers to unintentional misstatements of amounts or disclosures in financial statements. The term *fraud* refers to an intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception to obtain an unjust or illegal advantage. Two types of misstatements resulting from fraud are relevant to the auditor's consideration in a financial statement audit: misstatements arising from fraudulent financial reporting and misstatements arising

⁷ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts are defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors or fraud.

⁸ Audit sample includes statistical and nonstatistical sample. See section 350, *Audit Sampling*.

from misappropriation of assets. These two types of misstatements are further described in section 316, *Consideration of Fraud in a Financial Statement Audit*.

.10 Although the auditor has no responsibility to plan and perform the audit to detect immaterial misstatements, there is a distinction in the auditor's response to detected misstatements depending on whether those misstatements are caused by error or fraud. When the auditor encounters evidence of potential fraud, regardless of its materiality, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit.

Considerations at the Financial Statement Level

.11 The auditor must consider audit risk and must determine a materiality level for the financial statements taken as a whole for the purpose of:

- a. Determining the extent and nature of risk assessment procedures
- b. Identifying and assessing the risks of material misstatement
- c. Determining the nature, timing, and extent of further audit procedures
- d. Evaluating whether the financial statements taken as a whole are presented fairly, in all material respects, in conformity with generally accepted accounting principles

.12 Audit risk is a function of the risk that the financial statements prepared by management are materially misstated and the risk that the auditor will not detect such material misstatement. The auditor should consider audit risk in relation to the relevant assertions related to individual account balances, classes of transactions, and disclosures and at the overall financial statement level. The auditor should perform risk assessment procedures to assess the risks of material misstatement both at the financial statement and the relevant assertion levels.⁹ The auditor may reduce audit risk by determining overall responses and designing the nature, timing, and extent of further audit procedures based on those assessments.¹⁰

.13 The auditor should perform the audit to reduce audit risk to a low level that is, in the auditor's professional judgment, appropriate for expressing an opinion on the financial statements. As discussed in paragraph .20, audit risk may be assessed in quantitative or nonquantitative terms.

.14 The considerations of audit risk and materiality are affected by the size and complexity of the entity and the auditor's experience with and knowledge of the entity and its environment, including its internal control. As discussed in paragraphs .17 through .26, certain entity-related factors also affect the nature, timing, and extent of further audit procedures with respect to relevant assertions related to specific account balances, classes of transactions, and disclosures.

.15 In considering audit risk at the overall financial statement level, the auditor should consider risks of material misstatement that relate pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. Risks of this nature often relate to the entity's control environment and are not necessarily identifiable with specific relevant assertions at

⁹ See paragraph .102 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. See also paragraphs .14 through .19 of section 326, *Audit Evidence*, for discussion and guidance on the use of assertions in obtaining audit evidence.

¹⁰ See section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

the class of transactions, account balance, or disclosure level. Such risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud, for example, through management override of internal control. In developing responses to the risks of material misstatement at the overall financial statement level, the auditor should consider such matters as the knowledge, skill, and ability of personnel assigned significant engagement responsibilities; whether certain aspects of the engagement need the involvement of a specialist; and the appropriate level of supervision of assistants.

.16 In an audit of an entity with operations in multiple locations or with multiple components, the auditor should consider the extent to which audit procedures should be performed at selected locations or components. The factors an auditor should consider regarding the selection of a particular location or component include (a) the nature and amount of assets and transactions executed at the location or component; (b) the degree of centralization of records or information processing; (c) the effectiveness of the control environment, particularly with respect to management's direct control over the exercise of authority delegated to others and its ability to effectively supervise activities at the location or component; (d) the frequency, timing, and scope of monitoring activities by the entity or others at the location or component; (e) judgments about materiality of the location or component; and (f) risks associated with the location, such as political or economic instability.

Considerations at the Individual Account Balance, Class of Transactions, or Disclosure Level

.17 There is an inverse relationship between audit risk and materiality considerations. For example, the risk that relevant assertions related to a particular account balance, class of transactions, or disclosure could be misstated by an extremely large amount might be very low, but the risk that it could be misstated by an extremely small amount might be very high. Holding other considerations equal, either a decrease in the level of audit risk that the auditor judges to be appropriate in an account balance, class of transactions, or disclosure or a decrease in the amount of misstatements in the balance, class, or disclosure that the auditor believes could be material would require the auditor to do one or more of the following: (a) perform more effective audit procedures, (b) perform audit procedures closer to year end, or (c) increase the extent of particular audit procedures.

.18 In determining the nature, timing, and extent of audit procedures to be applied to a specific account balance, class of transactions, or disclosure, the auditor should design audit procedures to obtain reasonable assurance of detecting misstatements that the auditor believes, based on the judgment about materiality, could be material, when aggregated with misstatements in other balances, classes, or disclosures, to the financial statements taken as a whole. Auditors use various methods to design audit procedures to detect such misstatements.

.19 The auditor should consider audit risk at the individual account balance, class of transactions, or disclosure level because such consideration directly assists in determining the nature, timing, and extent of further audit procedures for the relevant assertions related to balances, classes, or disclosures. For example, the auditor should consider the risk of understatement as well as overstatement at the relevant assertion level such as when a liability may be understated (completeness) or when inventory may be overstated as a result of obsolescence (valuation). The auditor should seek to reduce audit

risk at the individual balance, class, or disclosure level in such a way that will enable the auditor, at the completion of the audit, to express an opinion on the financial statements taken as a whole at an appropriately low level of audit risk. Auditors use various approaches to accomplish that objective.

.20 At the account balance, class of transactions, relevant assertion, or disclosure level, audit risk (AR) consists of (a) the risk (consisting of inherent risk and control risk) that the relevant assertions related to balances, classes, or disclosures contain misstatements (whether caused by error or fraud) that could be material to the financial statements when aggregated with misstatements in other relevant assertions related to balances, classes, or disclosures and (b) the risk (detection risk) that the auditor will not detect such misstatements. These components of audit risk may be assessed in quantitative terms, such as percentages, or in nonquantitative terms such as *high*, *medium*, or *low* risk. The way the auditor should consider these component risks and combines them involves professional judgment and depends on the auditor's approach or methodology.

.21 The risk that the relevant assertions related to account balances, classes of transactions, or disclosures are misstated consists of the following two components:

- *Inherent risk* (IR) is the susceptibility of a relevant assertion to a misstatement that could be material, either individually or when aggregated with other misstatements, assuming that there are no related controls. The risk of such misstatement is greater for some assertions and related account balances, classes of transactions, and disclosures than for others. For example, complex calculations are more likely to be misstated than simple calculations. Cash is more susceptible to theft than an inventory of coal. Accounts consisting of amounts derived from accounting estimates that are subject to significant measurement uncertainty pose greater risks than do accounts consisting of relatively routine, factual data. External circumstances giving rise to business risks¹¹ also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. In addition to those circumstances that are peculiar to a specific relevant assertion, factors in the entity and its environment that relate to several or all of the classes of transaction, account balances, or disclosures may influence the inherent risk related to a specific relevant assertion. These latter factors include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.
- *Control risk* (CR) is the risk that a misstatement that could occur in a relevant assertion and that could be material, either individually or when aggregated with other misstatements, will not be prevented or detected on a timely basis by the entity's internal control. That risk is a function of the effectiveness of the design and operation of internal control in achieving the entity's objectives relevant to preparation of the entity's financial statements. Some control risk will always exist because of the inherent limitations of internal control.

.22 Inherent risk and control risk are the entity's risks, that is, they exist independently of the audit of financial statements. This section and other

¹¹ See section 314, paragraphs .29 through .33.

sections describe the risk of material misstatement (RMM) as the auditor's combined assessment of inherent risk and control risk; however, the auditor may make separate assessments of inherent risk and control risk. Furthermore, auditors may implement the concepts surrounding the assessment of inherent and control risks and responding to the risk of material misstatement in different ways as long as they achieve the same result.

.23 The auditor should assess the risk of material misstatement at the relevant assertion level as a basis for further audit procedures. Although that assessment is a judgment rather than a precise measurement of risk, the auditor should have an appropriate basis for that assessment. This basis may be obtained through the risk assessment procedures performed to obtain an understanding of the entity and its environment, including its internal control, and through the performance of suitable tests of controls to obtain audit evidence about the operating effectiveness of controls, where appropriate.

.24 *Detection risk (DR)* is the risk that the auditor will not detect a misstatement that exists in a relevant assertion that could be material, either individually or when aggregated with other misstatements. Detection risk is a function of the effectiveness of an audit procedure and of its application by the auditor. Detection risk cannot be reduced to zero because the auditor does not examine 100 percent of an account balance or a class of transactions and because of other factors. Such other factors include the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results. These other factors might be addressed through adequate planning, proper assignment of personnel to the engagement team, the application of professional skepticism, supervision and review of the audit work performed, and supervision and conduct of a firm's audit practice in accordance with appropriate quality control standards. Detection risk can be disaggregated into additional components of tests of details risk (TD) and substantive analytical procedures risk (AP).

.25 Detection risk relates to the substantive audit procedures and is managed by the auditor's response to risk of material misstatement. For a given level of audit risk, detection risk should bear an inverse relationship to the risk of material misstatement at the relevant assertion level. The greater the risk of material misstatement, the less the detection risk that can be accepted by the auditor. Conversely, the lower the risk of material misstatement, the greater the detection risk that can be accepted by the auditor. However, the auditor should perform substantive procedures for all relevant assertions related to material classes of transactions, account balances, and disclosures.

.26 The model, $AR = RMM \times DR$,¹² expresses the general relationship of audit risk and the risks associated with the auditor's assessments of risk of material misstatement (inherent and control risks); of the risk that substantive tests of details and substantive analytical procedures would fail to detect a material misstatement that could occur in a relevant assertion, given that such misstatements occur and are not detected by the entity's controls; and of the allowable risk that material error will not be detected by the test of details, given that a material misstatement might occur in a relevant assertion and not be detected by internal control or substantive analytical procedures and other relevant substantive procedures. The model is not intended to be a mathematical formula including all factors that may influence the assessment of audit

¹² Risk of material misstatement (RMM) is the product of inherent risk (IR) and control risk (CR); and detection risk (DR) is the product of test of details risk (TD) and substantive analytical procedures risk (AP).

risk; however, some auditors find such a model to be useful when planning appropriate risk levels for audit procedures to reduce the auditor's desired audit risk to an appropriate low level.¹³

Determining Materiality for the Financial Statements Taken as a Whole When Planning the Audit

.27 The auditor should determine a materiality level for the financial statements taken as a whole when establishing the overall audit strategy for the audit (see section 311, *Planning and Supervision*). Determining a materiality level for the financial statements taken as a whole helps guide the auditor's judgments in identifying and assessing the risks of material misstatements and in planning the nature, timing, and extent of further audit procedures. This materiality level does not, however, establish a threshold below which identified misstatements are always considered to be immaterial when evaluating those misstatements and their effect on the financial statements and the auditor's report thereon. As discussed in paragraph .60, the circumstances related to some identified misstatements may cause the auditor to evaluate them as material even if they are below the materiality level determined when establishing the overall audit strategy.

.28 The determination of what is material to the users is a matter of professional judgment. The auditor often may apply a percentage to a chosen benchmark as a step in determining materiality for the financial statements taken as a whole. When identifying an appropriate benchmark, the auditor may consider factors such as:

- The elements of the financial statements (for example, assets, liabilities, equity, income, and expenses) and the financial statement measures defined in generally accepted accounting principles (for example, financial position, financial performance, and cash flows), or other specific requirements.
- Whether there are financial statement items on which, for the particular entity, users' attention tends to be focused (for example, for the purpose of evaluating financial performance).
- The nature of the entity and the industry in which it operates.
- The size of the entity, nature of its ownership, and the way it is financed.

Examples of benchmarks that might be appropriate, depending on the nature and circumstances of the entity, include total revenues, gross profit, and other categories of reported income, such as profit before tax from continuing operations. Profit before tax from continuing operations may be a suitable benchmark for profit-oriented entities but may not be an appropriate benchmark for the determination of materiality when, for example, the entity's earnings are volatile, when the entity is a not-for-profit entity, or when it is an owner-managed business where the owner takes much of the pretax income out of the business in the form of remuneration. For asset-based entities (for example, an investment fund) an appropriate benchmark might be net assets. Other entities (for example, banks and insurance companies) might use other benchmarks.

.29 When determining materiality, the auditor should consider prior periods' financial results and financial positions, the period-to-date financial results

¹³ Table 2 in the Appendix [paragraph .48] of section 350, *Audit Sampling*, illustrates how this application of the model might work when applying sampling.

and financial position, and budgets or forecasts for the current period, taking account of significant changes in the entity's circumstances (for example, a significant business acquisition) and relevant changes of conditions in the economy as a whole or the industry in which the entity operates. For example, when the auditor usually determines materiality for a particular entity based on a percentage of profit, circumstances that give rise to an exceptional decrease or increase in profit may lead the auditor to conclude that materiality is more appropriately determined using a normalized profit figure based on past results.

.30 Once materiality is established, the auditor should consider materiality when planning and evaluating the same way regardless of the inherent business characteristics of the entity being audited. Materiality is determined based on the auditor's understanding of the user needs and expectations. User expectations may differ based on the degree of inherent uncertainty associated with the measurement of particular items in the financial statements, among other considerations. For example, the fact that the financial statements include very large provisions with a high degree of estimation uncertainty (for example, provisions for insurance claims in the case of an insurance company, oil rig decommissioning costs in the case of an oil company, or, more generally, legal claims against an entity) may influence the user's assessment of materiality. However, for audit purposes, this factor does not cause the auditor to follow different procedures for planning or evaluating misstatements than those outlined for other entities.

Materiality for Particular Items of Lesser Amounts Than the Materiality Level Determined for the Financial Statements Taken as a Whole

.31 When establishing the overall strategy for the audit, the auditor should consider whether, in the specific circumstances of the entity, misstatements of particular items of lesser amounts than the materiality level determined for the financial statements taken as a whole, if any, could, in the auditor's judgment, reasonably be expected to influence economic decisions of users taken on the basis of the financial statements. Any such amounts determined represent lower materiality levels to be considered in relation to the particular items in the financial statements.

.32 In making this judgment, the auditor should consider factors such as the following:

- Whether accounting standards, laws, or regulations affect users' expectations regarding the measurement or disclosure of certain items (for example, related party transactions and the remuneration of management and those charged with governance)
- The key disclosures in relation to the industry and the environment in which the entity operates (for example, research and development costs for a pharmaceutical company)
- Whether attention is focused on the financial performance of a particular subsidiary or division that is separately disclosed in the consolidating financial statements (for example, for a newly acquired business)

.33 In considering whether, in the specific circumstances of the entity, misstatements of particular items of lesser amounts than the materiality level for the financial statements taken as a whole, if any, could reasonably be considered material by the users of the financial statements, the auditor may consider

whether the views and expectations of those charged with governance and management¹⁴ might be helpful.

Tolerable Misstatement¹⁵

.34 *Tolerable misstatement* is the maximum error in a population (for example, the class of transactions or account balance) that the auditor is willing to accept. This term may be referred to as *tolerable error* in other standards.

.35 When assessing the risks of material misstatements and designing and performing further audit procedures to respond to the assessed risks, the auditor should allow for the possibility that some misstatements of lesser amounts than the materiality levels determined in accordance with paragraphs .11 and .31 could, in the aggregate, result in a material misstatement of the financial statements. To do so, the auditor should determine one or more levels of tolerable misstatement. Such levels of tolerable misstatement are normally lower than the materiality levels.

.36 The auditor must perform the audit to obtain reasonable assurance of detecting misstatements that the auditor believes could be large enough, individually or in the aggregate, to be quantitatively material to the financial statements. Although the auditor should be alert for misstatements that could be qualitatively material (see paragraphs .59 and .60), it ordinarily is not practical to design audit procedures to detect them.

Considerations as the Audit Progresses

.37 In some situations, the auditor may consider materiality for planning purposes before the financial statements to be audited are prepared. In those situations, the auditor's judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods, as long as recognition is given to the effects of major changes in the entity's circumstances (for example, a significant merger) and relevant changes in the economy as a whole or the industry in which the entity operates.

.38 Because it is not feasible for the auditor to anticipate all the circumstances that may ultimately influence judgments about materiality in evaluating the audit findings at the completion of the audit, the auditor's judgment about materiality for planning purposes may differ from the judgment about materiality used in evaluating the audit findings. For example, while performing the audit, the auditor may become aware of additional quantitative or qualitative factors that were not initially considered but that could be important to users of the financial statements and that should be considered in making judgments about materiality when evaluating audit findings.

.39 If the auditor concludes that a lower materiality level than that initially determined is appropriate, the auditor should reconsider the related levels of tolerable misstatement and appropriateness of the nature, timing, and extent of further audit procedures.

.40 The auditor should consider whether the overall audit strategy and audit plan need to be revised if the nature of identified misstatements and the circumstances of their occurrence are indicative that other misstatements may

¹⁴ Paragraph .25 of section 311, *Planning and Supervision*, provides further discussion and guidance regarding communications with those charged with governance and management.

¹⁵ See section 350 for further discussion and guidance on tolerable misstatement.

exist that, when aggregated with identified misstatements, could be material. The auditor should not assume that a misstatement is an isolated occurrence.¹⁶

.41 If the aggregate of the misstatements (known and likely) that the auditor has identified approaches the materiality level, the auditor should consider whether there is a greater than acceptably low level of risk that undetected misstatements, when taken with the aggregate identified misstatements, could exceed the materiality level and, if so, the auditor should reconsider the nature and extent of further audit procedures.

Communication of Misstatements to Management

.42 The auditor must accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial,¹⁷ and communicate them to the appropriate level of management. This communication should occur on a timely basis.

.43 Timely communication of potential misstatements to the appropriate level of management is important for management to evaluate whether the items are misstatements, or to inform the auditor if they disagree, and to take action as necessary. The determination of which level of management is the appropriate one is based on such factors as the nature, size, and frequency of the misstatement and which level of management can take the necessary action.

.44 When communicating details of misstatements, the auditor should distinguish between known misstatements and likely misstatements, as defined in paragraph .08.

.45 The auditor should request management to record the adjustment needed to correct all known misstatements, including the effect of prior period misstatement (see paragraph .53), other than those that the auditor believes are trivial.

.46 Where the auditor evaluates the amount of likely misstatement from a sample in a class of transactions, account balance, or disclosure as material, either individually or in aggregate with other misstatements, the auditor should request management to examine the class of transactions, account balance, or disclosure in order to identify and correct misstatements therein. For example, if an auditor identifies a misstatement while testing the cost prices of raw materials inventory, the auditor should extrapolate this misstatement to the raw materials account balance. If material, the auditor should then request management to examine the entire raw materials account balance to identify and correct any additional misstatements.

.47 Where the auditor has identified a likely misstatement involving differences in estimates such as a difference in a fair value estimate, the auditor should request management to review the assumptions and methods used in developing management's estimate.

.48 After management has (a) examined a class of transactions, account balance, or disclosure and corrected misstatements that are found and (b) challenged the assumptions and methods used in developing an estimate for which the auditor has identified a likely misstatement, the auditor should reevaluate

¹⁶ See section 318, paragraph .73, for further guidance with respect to isolated misstatements.

¹⁷ Matters that are "trivial" are amounts designated by the auditor below which misstatements need not be accumulated. This amount is set so that any such misstatements, either individually or when aggregated with other such misstatements, would not be material to the financial statements, after the possibility of further undetected misstatements is considered.

the amount of likely misstatement. This includes performing additional further audit procedures, if necessary.

.49 If management decides not to correct some or all of the known and likely misstatements communicated to it by the auditor, or identified when management examined a class of transactions, account balance, or disclosure, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that into account when considering the qualitative aspects of the entity's accounting practices (see paragraph .60) and the implications for the auditor's report (see paragraph .67).

Evaluating Audit Findings¹⁸

.50 In evaluating whether the financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, the auditor must consider the effects, both individually and in the aggregate, of misstatements (known and likely) that are not corrected by the entity. In making this evaluation, in relation to particular classes of transactions, account balances, and disclosures, the auditor should consider the size and nature of the misstatements and the particular circumstances of their occurrence, and determine the effect of such misstatements on the financial statements taken as a whole.

.51 The consideration and aggregation of misstatements should include likely misstatements (the auditor's best estimate of the total misstatements in the account balances or classes of transactions that he or she has examined),¹⁹ not just known misstatements (the amount of misstatements specifically identified).²⁰ Misstatements should be aggregated in a way that enables the auditor to consider whether, in relation to individual amounts, subtotals, or totals in the financial statements, they materially misstate the financial statements taken as a whole.

.52 Before considering the aggregate effect of identified uncorrected misstatements, the auditor should consider each misstatement separately to evaluate:

- a. Its effect in relation to the relevant individual classes of transactions, account balances, or disclosures, including whether materiality levels for particular items of lesser amounts than the materiality level for the financial statements taken as a whole, determined in accordance with paragraph .31, have been exceeded.
- b. Whether, in considering the effect of the individual misstatement on the financial statements taken as a whole, it is appropriate to offset misstatements. For example, it may be appropriate to offset misstatements of items within the same account balance in the financial statements.
- c. The effect of misstatements related to prior periods. In prior periods, misstatements may not have been corrected by the entity because they

¹⁸ This consideration includes any misstatements that remain uncorrected from different entity locations or from audits of portions of the entity that are performed by other auditors.

¹⁹ See paragraphs .68 through .77 of section 316, *Consideration of Fraud in a Financial Statement Audit*, for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. Those paragraphs provide specific guidance on the auditor's consideration of an audit adjustment that is, or may be, the result of fraud.

²⁰ If the auditor were to examine all of the items in a balance or a class, the likely misstatement applicable to recorded transactions in the balance or class would be the amount of known misstatements specifically identified.

did not cause the financial statements for those periods to be materially misstated. Those misstatements might also affect the current period's financial statements.²¹

.53 In aggregating misstatements, the auditor should include the effect on the current period's financial statements of those prior period misstatements. When evaluating the aggregate uncorrected misstatements, the auditor should consider the effects of these uncorrected misstatements in determining whether the financial statements are free of material misstatement.

.54 When the auditor tests relevant assertions related to an account balance or a class of transactions by a substantive analytical procedure,²² the auditor might not specifically identify misstatements but would obtain only an indication of whether misstatement might exist in the balance or class and possibly its approximate magnitude. If the substantive analytical procedure indicates that a misstatement might exist, but not its approximate amount, the auditor should request management to investigate and, if necessary, should expand his or her audit procedures to enable him or her to determine whether a misstatement exists in the account balance or class of transactions.

.55 When an auditor uses audit sampling to test a relevant assertion for an account balance or a class of transactions, he or she should project the amount of known misstatements identified in the sample to the items in the balance or class from which the sample was selected. That projected misstatement, along with the results of other substantive procedures, contributes to the auditor's assessment of likely misstatement in the balance or class.

.56 The risk of material misstatement of the financial statements is generally greater when account balances and classes of transactions are subject to estimation rather than precise measurement because of the inherent subjectivity in estimating future events. Estimates, such as those for inventory obsolescence, uncollectible receivables, and warranty obligations, are subject not only to the unpredictability of future events, but also to misstatements that may arise from using inadequate or inappropriate data or misapplying appropriate data. Because no one accounting estimate can be considered accurate with certainty, the auditor may determine that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may not be significant, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

.57 The "closest reasonable estimate" may be a range of acceptable amounts or a precisely determined point estimate, if that is a better estimate than any other amount. In some cases, the auditor may use a method that produces a range of acceptable amounts to determine the reasonableness of amounts recorded. For example, the auditor's analysis of specific problem accounts receivable and recent trends in bad-debt write-offs as a percent of sales may cause the auditor to conclude that the allowance for doubtful accounts should be between \$130,000 and \$160,000. If management's recorded estimate²³ falls within that range of acceptable amounts, the auditor may conclude

²¹ The measurement of the effect, if any, on the current period's financial statements of misstatements uncorrected in prior periods involves accounting considerations and is therefore not addressed.

²² Section 329, *Analytical Procedures*, provides guidance on the use of analytical procedures.

²³ Section 328, *Auditing Fair Value Measurements and Disclosures*, and section 342, *Auditing Accounting Estimates*, provide guidance with respect to the auditor's procedures to obtain an understanding of management's estimation process.

that the recorded amount is reasonable and no difference would be aggregated. If management's recorded estimate falls outside the auditor's range of acceptable amounts, the difference between the recorded amount and the amount at the closest end of the auditor's range would be aggregated as a likely misstatement.²⁴

.58 The auditor should also consider whether the difference between estimates best supported by the audit evidence and the estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the entity's management. For example, if each accounting estimate included in the financial statements was individually reasonable, but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.²⁵ In these circumstances, the auditor should reconsider whether other recorded estimates reflect a similar bias and should perform additional audit procedures that address those estimates. In addition, the possibility might exist that management's recorded estimates were clustered at one end of the range of acceptable amounts in the preceding year and clustered at the other end of the range of acceptable amounts in the current year, thus indicating the possibility that management is using swings in accounting estimates to offset higher- or lower-than-expected earnings. If the auditor believes that such circumstances exist, he or she should consider whether these matters should be communicated to those charged with governance, as described in paragraphs .34a, .37, and .38 of section 380, *The Auditor's Communication With Those Charged With Governance*.

.59 As discussed in paragraph .04, there are quantitative and qualitative materiality considerations. As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.²⁶

.60 Qualitative considerations also influence the auditor in reaching a conclusion about whether misstatements are material. Qualitative factors that the auditor may consider relevant to his or her consideration of whether misstatements are material include the following:

- a. The potential effect of the misstatement on trends, especially trends in profitability.
- b. A misstatement that changes a loss into income or vice versa.
- c. The potential effect of the misstatement on the entity's compliance with loan covenants, other contractual agreements, and regulatory provisions.
- d. The existence of statutory or regulatory reporting requirements that affect materiality thresholds.

²⁴ See Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

²⁵ Section 316, paragraph .64, also provides guidance to the auditor in performing a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.

²⁶ See section 317.

- e.* The misstatement masks a change in earnings or other trends, especially in the context of general economic and industry conditions.
- f.* A misstatement that has the effect of increasing management's compensation, for example, by satisfying the requirements for the award of bonuses or other forms of incentive compensation.
- g.* The sensitivity of the circumstances surrounding the misstatement, for example, the implications of misstatements involving fraud and possible illegal acts, violations of contractual provisions, and conflicts of interest.
- h.* The significance of the financial statement element affected by the misstatement, for example, a misstatement affecting recurring earnings as contrasted to one involving a nonrecurring charge or credit, such as an extraordinary item.
- i.* The effects of misclassifications, for example, misclassification between operating and nonoperating income or recurring and nonrecurring income items or a misclassification between fundraising costs and program activity costs in a not-for-profit organization.
- j.* The significance of the misstatement relative to reasonable user needs, for example:
 - Earnings to investors and the equity amounts to creditors.
 - The magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests (buy-sell agreement).
 - The effect of misstatements of earnings when contrasted with expectations.

Obtaining the views and expectations of those charged with governance and management may be helpful in gaining or corroborating an understanding of user needs, such as those illustrated above.

- k.* The definitive character of the misstatement, for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty.
- l.* The motivation of management with respect to the misstatement, for example, (i) an indication of a possible pattern of bias by management when developing and accumulating accounting estimates, (ii) a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process, or (iii) intentional decision not to follow generally accepted accounting principles.
- m.* The existence of offsetting effects of individually significant but different misstatements.
- n.* The likelihood that a misstatement that is currently immaterial may have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- o.* The cost of making the correction. It may not be cost-beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management as noted in item *l* above.
- p.* The risk that possible additional undetected misstatements would affect the auditor's evaluation.

These circumstances are only examples; not all are likely to be present in all audits, nor is the list necessarily complete. The existence of any circumstances such as these does not necessarily lead to a conclusion that the misstatement is material.

.61 If the auditor believes that a misstatement is, or may be, the result of fraud, the auditor should consider the implications of the misstatement in relation to other aspects of the audit as described in section 316, even if the effect of the misstatement is not material to the financial statements.

Evaluating Whether the Financial Statements Taken as a Whole Are Free of Material Misstatement

.62 The auditor must evaluate whether the financial statements taken as a whole are free of material misstatement. In making this evaluation, the auditor should consider both the evaluation of the uncorrected (known and likely) misstatements required in paragraphs .50 through .53 and the qualitative considerations in paragraphs .60.

.63 When concluding as to whether the effect of misstatements, individually or in the aggregate, is material, an auditor should consider the nature and amount of the misstatements in relation to the nature and amount of items in the financial statements under audit. For example, an amount that is material to the financial statements of one entity may not be material to the financial statements of another entity of a different size or nature. Also, what is material to the financial statements of a particular entity might change from one period to another.

.64 If the auditor believes that the financial statements taken as a whole are materially misstated, the auditor should request management to make the necessary corrections. If management refuses to make the corrections, the auditor must determine the implications for the auditor's report (see paragraph .67).

.65 If the auditor concludes that the effects of uncorrected misstatements, individually or in the aggregate, do not cause the financial statements to be materially misstated, they could still be materially misstated because of further misstatements remaining undetected. As the aggregate misstatements approach materiality, the risk that the financial statements may be materially misstated also increases; consequently, the auditor should also consider the effect of undetected misstatements in concluding whether the financial statements are fairly stated.

.66 The auditor can reduce audit risk by modifying the nature, timing, and extent of planned audit procedures in performing the audit. If the auditor believes that such risk is unacceptably high, the auditor should perform additional audit procedures or satisfy himself or herself that the entity has adjusted the financial statements to reduce audit risk to an appropriate low level.²⁷

Evaluating the Overall Effect of Audit Findings on the Auditor's Report

.67 If the auditor concludes that, or is unable to conclude whether, the financial statements are materially misstated, the auditor must determine the

²⁷ See section 318, paragraphs .70 through .76, with respect to the auditor's evaluation of the sufficiency and appropriateness of audit evidence obtained.

implications for the auditor's report on the financial statements. See paragraphs .20 through .63 of section 508, *Reports on Audited Financial Statements*, regarding discussion about departures from unqualified opinions.

Communications With Those Charged With Governance

.68 Standards and guidance regarding communications about materiality and misstatements to those charged with governance are set out in section 380, *The Auditor's Communication With Those Charged With Governance*. In addition, section 325, *Communicating Internal Control Related Matters Identified in an Audit*, requires the auditor to communicate, in writing, to management and those charged with governance, significant deficiencies and material weaknesses identified in an audit. [Revised, May 2006, due to conforming changes necessary due to the issuance of Statement on Standards No. 112.]

Documentation

.69 The auditor should document:

- a. The levels of materiality, as discussed in paragraph .27, and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined.
- b. A summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements.
- c. The auditor's conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion.
- d. All known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management.

.70 Uncorrected misstatements should be documented in a manner that allows the auditor to:

- a. Separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods;
- b. Consider the aggregate effect of misstatements on the financial statements; and
- c. Consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material (see paragraph .60).

Effective Date

.71 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

AU Section 314

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

(Supersedes SAS No. 55.)

Source: SAS No. 109.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

Introduction

.01 This section establishes standards and provides guidance about implementing the second standard of field work, as follows:

The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control, to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures.

The importance of the auditor's risk assessment as a basis for further audit procedures is discussed in the explanation of audit risk in section 312, *Audit Risk and Materiality in Conducting an Audit*. See section 326, *Audit Evidence*, for guidance on how the auditor uses relevant assertions¹ in sufficient detail to form a basis for the assessment of risks of material misstatement and to design and perform further audit procedures. The auditor should make risk assessments at the financial statement and relevant assertion levels based on an appropriate understanding of the entity and its environment, including its internal control. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, discusses the auditor's responsibility to determine overall responses and to design and perform further audit procedures whose nature, timing, and extent are responsive to the risk assessments. This section should be applied in conjunction with the standards and guidance provided in other sections. In particular, the auditor's responsibility to consider fraud in an audit of financial statements is discussed in section 316, *Consideration of Fraud in a Financial Statement Audit*.

.02 The following is an overview of this standard:

- *Risk assessment procedures and sources of information about the entity and its environment, including its internal control.* This section explains the audit procedures that the auditor should perform to obtain the understanding of the entity and its environment, including its internal control (risk assessment procedures). The audit team should discuss the susceptibility of the entity's financial statements to material misstatement.

¹ *Relevant assertions* are assertions that have a meaningful bearing on whether the account is fairly stated. For example, valuation may not be relevant to the cash account unless currency translation is involved; however, existence and completeness are always relevant. Similarly, valuation may not be relevant to the gross amount of the accounts receivable balance, but is relevant to the related allowance accounts. Additionally, the auditor might, in some circumstances, focus on the presentation and disclosure assertions separately in connection with the period-end financial reporting process.

- *Understanding the entity and its environment, including its internal control.* This section provides guidance to the auditor in understanding specified aspects of the entity and its environment, and components of its internal control, in order to identify and assess risks of material misstatement, and in designing and performing further audit procedures.
- *Assessing the risks of material misstatement.* This section provides guidance to the auditor in assessing the risks of material misstatement at the financial statement and relevant assertion levels. The auditor should:
 - Identify risks by considering the entity and its environment, including relevant controls, and by considering the classes of transactions, account balances, and disclosures in the financial statements.
 - Relate the identified risks to what could go wrong at the relevant assertion level.
 - Consider the significance and the likelihood of material misstatement for each identified risk.

This section also provides guidance to the auditor in determining whether any of the assessed risks are significant risks that require special audit consideration or risks for which substantive procedures alone do not provide sufficient appropriate audit evidence. The auditor should evaluate the design of the entity's controls, including relevant control activities, over such risks and determine whether they are adequate and have been implemented.

- *Documentation.* This section provides related documentation guidance.

.03 Obtaining an understanding of the entity and its environment is an essential aspect of performing an audit in accordance with generally accepted auditing standards. In particular, that understanding establishes a frame of reference within which the auditor plans the audit and exercises professional judgment about assessing risks of material misstatement of the financial statements and responding to those risks throughout the audit, for example when:

- Establishing materiality for planning purposes and evaluating whether that judgment remains appropriate as the audit progresses.
- Considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures.
- Identifying areas where special audit consideration may be necessary, for example, related-party transactions, the appropriateness of management's use of the going-concern assumption, complex or unusual transactions, or considering the business purpose of transactions.
- Developing expectations for use when performing analytical procedures.
- Designing and performing further audit procedures to reduce audit risk to an appropriately low level.
- Evaluating the sufficiency and appropriateness of audit evidence obtained, such as evidence related to the reasonableness of management's assumptions and of management's oral and written representations.

.04 The auditor should use professional judgment to determine the extent of the understanding required of the entity and its environment, including its

internal control. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to assess risks of material misstatement of the financial statements and to design and perform further audit procedures. The depth of the overall understanding that the auditor obtains in performing the audit is less than that possessed by management in managing the entity.

Risk Assessment Procedures and Sources of Information About the Entity and Its Environment, Including Its Internal Control

.05 Obtaining an understanding of the entity and its environment, including its internal control, is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. Throughout this process, the auditor should also follow the guidance in section 316. As described in section 326, audit procedures to obtain the understanding are referred to as *risk assessment procedures* because some of the information obtained by performing such procedures may be used by the auditor as audit evidence to support assessments of the risks of material misstatement. In addition, in performing risk assessment procedures, the auditor may obtain audit evidence about the relevant assertions related to classes of transactions, account balances, or disclosures and about the operating effectiveness of controls, even though such audit procedures were not specifically planned as substantive procedures or as tests of controls. The auditor also may choose to perform substantive procedures or tests of controls concurrently with risk assessment procedures because it is efficient to do so.

Risk Assessment Procedures

.06 The auditor should perform the following risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control:

- a. Inquiries of management and others within the entity
- b. Analytical procedures
- c. Observation and inspection

The auditor is not required to perform all the risk assessment procedures described above for each aspect of the understanding described in paragraph .21. However, all the risk assessment procedures should be performed by the auditor in the course of obtaining the required understanding.

.07 In addition, the auditor might perform other procedures where the information obtained may be helpful in identifying risks of material misstatement. For example, in cooperation with the entity, the auditor may consider making inquiries of others outside the entity such as the entity's external legal counsel or of valuation experts that the entity has used. Reviewing information obtained from external sources such as reports by analysts, banks, or rating agencies; trade and economic journals; or regulatory or financial publications may also be useful in obtaining information about the entity.

.08 Although much of the information the auditor obtains by inquiries can be obtained from management and those responsible for financial reporting, inquiries of others within the entity, such as production and internal audit personnel, and other employees with different levels of authority, may be useful in

providing the auditor with a different perspective in identifying risks of material misstatement. In determining others within the entity to whom inquiries may be directed, or the extent of those inquiries, the auditor should consider what information may be obtained that might help the auditor in identifying risks of material misstatement. For example:

- Inquiries directed toward those charged with governance² may help the auditor understand the environment in which the financial statements are prepared.
- Inquiries directed toward internal audit personnel may relate to their activities concerning the design and effectiveness of the entity's internal control and whether management has satisfactorily responded to any findings from these activities.
- Inquiries of employees involved in initiating, authorizing, processing, or recording complex or unusual transactions may help the auditor in evaluating the appropriateness of the selection and application of certain accounting policies.
- Inquiries directed toward in-house legal counsel may relate to such matters as litigation, compliance with laws and regulations, knowledge of fraud or suspected fraud affecting the entity, warranties, post-sales obligations, arrangements (such as joint ventures) with business partners, and the meaning of contract terms.
- Inquiries directed toward marketing, sales, or production personnel may relate to changes in the entity's marketing strategies, sales trends, production strategies, or contractual arrangements with its customers.

.09 Paragraphs .04 and .06 of section 329, *Analytical Procedures*, specify that the auditor should apply analytical procedures in planning the audit to assist in understanding the entity and its environment and to identify areas that may represent specific risks relevant to the audit. For example, analytical procedures may be helpful in identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit implications. In performing analytical procedures as risk assessment procedures, the auditor should develop expectations about plausible relationships that are reasonably expected to exist. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying risks of material misstatement. However, when such analytical procedures use data aggregated at a high level (which is often the situation), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, the auditor should consider the results of such analytical procedures along with other information gathered in identifying the risks of material misstatement.

.10 Observation and inspection may support inquiries of management and others, and also provide information about the entity and its environment. Such audit procedures ordinarily include:

- Observation of entity activities and operations
- Inspection of documents (such as business plans and strategies), records, and internal control manuals
- Reading reports prepared by management (such as quarterly management reports and interim financial statements), those charged with

² See footnote 4 of section 311, *Planning and Supervision*, for the definition of and discussion about those charged with governance.

governance (such as minutes of board of directors' meetings), and internal audit

- Visits to the entity's premises and plant facilities
- Tracing transactions through the information system relevant to financial reporting, which may be performed as part of a walk-through

.11 When the auditor intends to use information about the entity and its environment obtained in prior periods, the auditor should determine whether changes have occurred that may affect the relevance of such information in the current audit. For continuing engagements, the auditor's previous experience with the entity contributes to the understanding of the entity. For example, audit procedures performed in previous audits ordinarily provide audit evidence about the entity's organizational structure, business, and controls, as well as information about past misstatements and whether or not they were corrected on a timely basis, which assists the auditor in assessing risks of material misstatement in the current audit. However, such information may have been rendered irrelevant by changes in the entity or its environment. The auditor should make inquiries and perform other appropriate audit procedures, such as walk-throughs of systems, to determine whether changes have occurred that may affect the relevance of such information.

.12 Section 316 specifies that the auditor should specifically assess the risk of material misstatement³ of the financial statements due to fraud and states that the auditor should consider that assessment in designing audit procedures to be performed. In making this assessment, the auditor should also consider fraud risk factors that relate to either material misstatements arising from fraudulent financial reporting or misstatements arising from misappropriation of assets. Fraud risk factors that relate to fraudulent financial reporting are (a) management's characteristics and influence over the control environment, (b) industry conditions, and (c) operating characteristics and financial stability. Fraud risk factors that relate to misappropriation of assets are (a) susceptibility of assets to misappropriations and (b) absence of controls. The auditor's response to the assessment of the risk of material misstatement due to fraud is influenced by the nature and significance of the risk factors identified as being present. In some circumstances, the auditor may conclude that the conditions indicate a need to modify audit procedures. In these circumstances, the auditor should consider whether the assessment of the risk of material misstatement due to fraud calls for an overall response, one that is specific to a particular account balance, class of transactions, or disclosures at the relevant assertion level, or both. However, since such risk factors do not necessarily indicate the existence of fraud, the results of the assessment of the risk of material misstatement due to fraud provide only a broad initial indication about whether a material misstatement due to fraud may exist. Accordingly, the auditor should consider the results of the assessment of the risk of material misstatement due to fraud performed during planning along with other information gathered in identifying the risks of material misstatements.

.13 When relevant to the audit, the auditor also should consider other information such as that obtained from the auditor's client acceptance or continuance process or, where practicable, experience gained on other engagements performed for the entity, for example, engagements to review interim financial information.

³ Risk of material misstatement is described as the auditor's combined assessment of inherent risk and control risk. See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for the definition of and further discussion about risk of material misstatement.

Discussion Among the Audit Team

.14 The members of the audit team, including the auditor with final responsibility for the audit, should discuss the susceptibility of the entity's financial statements to material misstatements. This discussion could be held concurrently with the discussion among the audit team that is specified by section 316 to discuss the susceptibility of the entity's financial statements to fraud. When the entire engagement is performed by a single auditor, the auditor should consider and document the susceptibility of the entity's financial statements to material misstatements. In these circumstances, the auditor should consider other factors that may be necessary in the engagement, such as personnel possessing specialized skills.

.15 Professional judgment should be used to determine which members of the audit team should be included in the discussion, how and when it should occur, and the extent of the discussion. Key members of the audit team, including the auditor with final responsibility, should be involved in the discussion; however, it is not necessary for all team members to have a comprehensive knowledge of all aspects of the audit. The extent of the discussion is influenced by the roles, experience, and information needs of the audit team members. An additional consideration is whether to include specialists assigned to the audit team. For example, the auditor may determine that a professional possessing information technology (IT)⁴ or other specialized skills is needed on the audit team and therefore include that individual in the discussion.

.16 The auditor with final responsibility should consider which matters are to be communicated to members of the engagement not involved in the discussion. In a multilocation audit, for example, there may be multiple discussions that involve the key members of the audit team in each significant location.

.17 The objective of this discussion⁵ is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them, and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

.18 The discussion provides an opportunity for more experienced team members, including the auditor with final responsibility for the audit, to share their insights based on their knowledge of the entity and for the team members to exchange information about the business risks⁶ to which the entity is subject and about how and where the financial statements might be susceptible to material misstatement. As specified in section 316, particular emphasis should be given to the susceptibility of the entity's financial statements to material misstatement due to fraud. In addition, the audit team should discuss critical issues, such as areas of significant audit risk; areas susceptible to management override of controls; unusual accounting procedures used by the client; important control systems; materiality at the financial statement level and at the account level; and how materiality will be used to determine the extent of testing. The discussion should also address application of generally accepted

⁴ Information technology (IT) encompasses automated means of originating, processing, storing, and communicating information, and includes recording devices, communication systems, computer systems (including hardware and software components and data), and other electronic devices. An entity's use of IT may be extensive; however, the auditor is primarily interested in the entity's use of IT to initiate, authorize, record, process, and report transactions or other financial data.

⁵ There may be one or more discussions, depending on the circumstances of the engagement.

⁶ See paragraphs .29 through .33.

accounting principles to the entity's facts and circumstances and in light of the entity's accounting policies.

.19 The auditor should plan and perform the audit with an attitude of professional skepticism. The discussion among the audit team members should emphasize the need to exercise professional skepticism throughout the engagement, to be alert for information or other conditions that indicate that a material misstatement due to fraud or error may have occurred, and to be rigorous in following up on such indications.

.20 Depending on the circumstances of the audit, there may be multiple discussions in order to facilitate the ongoing exchange of information between audit team members regarding the susceptibility of the entity's financial statements to material misstatements. The purpose is for audit team members to communicate and share information obtained throughout the audit that may affect the assessment of the risks of material misstatement due to fraud or error or the audit procedures performed to address the risks.

Understanding the Entity and Its Environment, Including Its Internal Control

.21 The auditor's understanding of the entity and its environment consists of an understanding of the following aspects:

- a. Industry, regulatory, and other external factors
- b. Nature of the entity
- c. Objectives and strategies and the related business risks that may result in a material misstatement of the financial statements
- d. Measurement and review of the entity's financial performance
- e. Internal control, which includes the selection and application of accounting policies

.22 Appendix A [paragraph .125] contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment relating to categories (a) through (d) above. Appendix B [paragraph .126] contains a detailed explanation of the internal control components.

.23 The nature, timing, and extent of the risk assessment procedures performed depend on the circumstances of the engagement, such as the size and complexity of the entity and the auditor's experience with it. In addition, identifying significant changes in any of the above aspects of the entity from prior periods is particularly important in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

Industry, Regulatory, and Other External Factors

.24 The auditor should obtain an understanding of relevant industry, regulatory, and other external factors. These factors include industry conditions, such as the competitive environment, supplier and customer relationships, and technological developments; the regulatory environment encompassing, among other matters, relevant accounting pronouncements, the legal and political environment, and environmental requirements affecting the industry and the entity; and other external factors, such as general economic conditions.⁷

.25 The industry in which the entity operates may be subject to specific risks of material misstatement arising from the nature of the business, the

⁷ See section 317, *Illegal Acts by Clients*, for additional requirements related to the legal and regulatory framework applicable to the entity and the industry.

degree of regulation, or other external forces (such as political, economic, social, technical, and competitive). For example, long-term contracts may involve significant estimates of revenues and costs that give rise to risks of material misstatement of the financial statements. Similarly, regulations may specify certain financial reporting requirements for the industry in which the entity operates. In such cases, the auditor should consider whether the audit team includes members with sufficient relevant knowledge and experience. If management fails to comply with such regulations, its financial statements may be materially misstated.

Nature of the Entity

.26 The auditor should obtain an understanding of the nature of the entity. The nature of an entity refers to the entity's operations, its ownership, governance, the types of investments that it is making and plans to make, the way that the entity is structured, and how it is financed. An understanding of the nature of an entity enables the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements.

.27 The entity may have a complex structure with subsidiaries or other components in multiple locations. In addition to the difficulties of consolidation in such cases, other issues with complex structures that may give rise to risks of material misstatement include the allocation of goodwill to subsidiaries, and its impairment; whether investments are joint ventures, subsidiaries, or investments accounted for using the equity method; and whether special-purpose entities are accounted for appropriately.

.28 An understanding of the ownership, management, and other key personnel and their relations between owners and other people or entities is also important in determining whether related-party transactions have been identified and accounted for appropriately. Section 334, *Related Parties*, provides additional guidance on the auditor's considerations relevant to related parties.

Objectives and Strategies and Related Business Risks

.29 The auditor should obtain an understanding of the entity's objectives and strategies, and the related business risks that may result in material misstatement of the financial statements. The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the operational approaches by which management intends to achieve its objectives. Business risks result from significant conditions, events, circumstances, actions, or inactions that could adversely affect the entity's ability to achieve its objectives and execute its strategies, or through the setting of inappropriate objectives and strategies. Just as the external environment changes, the conduct of the entity's business is also dynamic and the entity's strategies and objectives change over time.

.30 Business risk is broader than the risk of material misstatement of the financial statements, although it includes the latter. For example, a new entrant to the marketplace with the competitive advantage of brand recognition and economies of scale may represent a business risk to a manufacturer's ability to garner as much shelf space at retailers and compete on price. The potential risk of material misstatement of the financial statements related to such business risk might be obsolescence or overproduction of inventory that could only be sold at discounted amounts. Business risk particularly may arise from change or complexity, although a failure to recognize the need for change may also give

rise to risk. Change may arise, for example, from the development of new products that may fail; from an inadequate market, even if successfully developed; or from flaws that may result in liabilities and reputation risk. As an example of complexity, the conduct and management of long-term engineering projects (such as ship construction or the building of a suspension bridge) give rise to risks in the areas of percentage of completion, pricing, costing, design, and performance control. An understanding of business risks increases the likelihood of identifying risks of material misstatement. However, the auditor does not have a responsibility to identify or assess all business risks.

.31 Most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, not all business risks give rise to risks of material misstatement. A business risk may have an immediate consequence for the risk of misstatement for classes of transactions, account balances, or disclosures at the relevant assertion level or for the financial statements taken as a whole. For example, the business risk arising from a contracting customer base due to industry consolidation may increase the risk of misstatement associated with the valuation of accounts receivable. Similarly, a business risk may have an immediate consequence for the risk of misstatement of the financial statements taken as a whole. For example, the business risk of significant transactions with related parties may increase the risk of misstatement of a range of significant account balances and relevant assertions. Furthermore, a business objective and related risks may also have a longer-term consequence that the auditor may need to consider when assessing the appropriateness of the going concern assumption. For example, the business risk of a decline in the industry in which the entity operates may affect the entity's ability to continue as a going concern. The auditor's consideration of whether a business risk may result in material misstatement is, therefore, made in light of the entity's circumstances. Examples of conditions and events that may indicate risks of material misstatement are given in Appendix C [paragraph .127].

.32 Usually management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .76 to .80.

.33 Smaller entities often do not set their objectives and strategies, or manage the related business risks, through formal plans or processes. In many cases there may be no documentation of such matters. In such entities, the auditor's understanding may be obtained through inquiries of management and observation of how the entity responds to such matters.

Measurement and Review of the Entity's Financial Performance

.34 The auditor should obtain an understanding of the measurement and review of the entity's financial performance. Performance measures and their review indicate to the auditor aspects of the entity's performance that management and others consider to be important. Performance measures, whether external or internal, create pressures on the entity that, in turn, may motivate management to take action to improve the business performance or to misstate the financial statements. Obtaining an understanding of the entity's performance measures assists the auditor in considering whether such pressures result in management actions that may have increased the risks of material misstatement.

.35 Management's measurement and review of the entity's financial performance is to be distinguished from the monitoring of controls (discussed as a component of internal control in paragraphs .97 through .101), although their purposes may overlap. Monitoring of controls, however, is specifically concerned with the effective operation of internal control through consideration of

information about the controls. The measurement and review of performance is directed at whether business performance is meeting the objectives set by management (or third parties), but it may be that performance indicators also provide information that enables management to identify deficiencies in internal control.

.36 Internally generated information used by management for this purpose may include key performance indicators (financial and nonfinancial); budgets; variance analysis; subsidiary information and divisional, departmental, or other level performance reports; and comparisons of an entity's performance with that of competitors. External parties may also measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may provide information useful to the auditor's understanding of the entity and its environment. Such reports may be obtained from the entity being audited or from websites.

.37 Internal measures may highlight unexpected results or trends requiring management's inquiry of others in order to determine their cause and take corrective action (including, in some cases, the detection and correction of misstatements on a timely basis). Performance measures may also indicate to the auditor a risk of misstatement of related financial statement information. For example, performance measures may indicate that the entity has unusually rapid growth or profitability when compared to that of other entities in the same industry. Such information, particularly if combined with other factors such as performance-based bonus or incentive remuneration, may indicate the potential risk of management bias in the preparation of the financial statements.

.38 Much of the information used in performance measurement may be produced by the entity's information system. If management assumes that data used for reviewing the entity's performance is accurate without having a basis for that assumption, errors may exist in the information, potentially leading management to incorrect conclusions about performance. When the auditor intends to make use of the performance measures for the purpose of the audit (for example, for analytical procedures), the auditor should consider whether the information related to management's review of the entity's performance provides a reliable basis and is sufficiently precise for such a purpose. If making use of performance measures, the auditor should consider whether they are precise enough to detect material misstatements.

.39 Smaller entities ordinarily do not have formal processes to measure and review the entity's financial performance. Management nevertheless often relies on certain key indicators that knowledge and experience of the business suggest are reliable bases for evaluating financial performance and taking appropriate action.

Internal Control⁸

.40 The auditor should obtain an understanding of the five components of internal control sufficient to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures. The auditor should obtain a sufficient understanding by performing risk assessment procedures to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented. The auditor should use such knowledge to:

⁸ This section recognizes the definition and description of internal control contained in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO Report).

- Identify types of potential misstatements.
- Consider factors that affect the risks of material misstatement.
- Design tests of controls, when applicable, and substantive procedures.

.41 Internal control⁹ is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity's objectives with regard to reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations.¹⁰ Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. Internal control consists of five interrelated components:

- Control environment* sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.
- Entity's *risk assessment* is the entity's identification and analysis of relevant risks to achievement of its objectives, forming a basis for determining how the risks should be managed.
- Information and communication systems* support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.
- Control activities* are the policies and procedures that help ensure that management directives are carried out.
- Monitoring* is a process that assesses the quality of internal control performance over time.

Appendix B [paragraph .126] contains a detailed discussion of the internal control components.

.42 The division of internal control into the five components provides a useful framework for auditors to consider how different aspects of an entity's internal control may affect the audit. The division does not necessarily reflect how an entity considers and implements internal control. Also, the auditor's primary consideration is whether, and how, a specific control prevents, or detects and corrects, material misstatements in relevant assertions related to classes of transactions, account balances, or disclosures, rather than its classification into any particular component. Accordingly, auditors may use different terminology or frameworks to describe the various aspects of internal control, and their effect on the audit, than those used in this section, provided all the components described in this section are addressed.

.43 The way in which internal control is designed and implemented varies with an entity's size and complexity. Specifically, smaller entities may use less formal means and simpler processes and procedures to achieve their objectives. For example, smaller entities with active management involvement in the financial reporting process may not have extensive descriptions of accounting procedures or detailed written policies. For some entities, in particular very small entities, the owner-manager¹¹ may perform functions that in a larger entity would be regarded as belonging to several of the components of internal control. Therefore, the components of internal control may not be clearly distinguished within smaller entities, but their underlying purposes are equally valid.

⁹ Internal control also may be referred to as internal control structure.

¹⁰ It follows that internal control is designed and effected to address business risks that threaten the achievement of any of these objectives.

¹¹ This section uses the term *owner-manager* to indicate proprietors of entities who are involved in the running of the entity on a day-to-day basis.

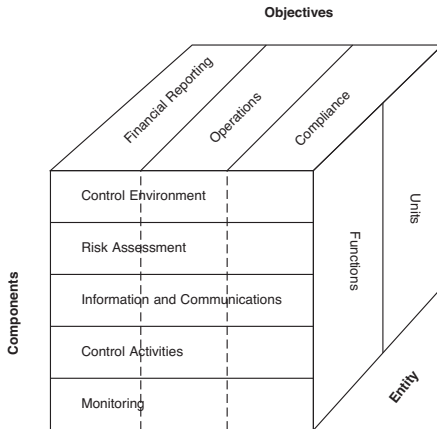

.44 The auditor should obtain an understanding of the entity's selection and application of accounting policies and should consider whether they are appropriate for its business and consistent with generally accepted accounting principles and accounting policies used in the relevant industry,^[12] or with a comprehensive basis of accounting other than generally accepted accounting principles.¹³ The understanding encompasses the methods the entity uses to account for significant and unusual transactions; the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus; and changes in the entity's accounting policies. The auditor should also identify financial reporting standards and regulations that are new to the entity and consider when and how the entity will adopt such requirements. Where the entity has changed its selection of or method of applying a significant accounting policy, the auditor should consider the reasons for the change and whether it is appropriate and consistent with generally accepted accounting principles.

.45 The presentation of financial statements in conformity with generally accepted accounting principles should include adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their appended notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth. The auditor should consider whether the entity has disclosed a particular matter appropriately in light of the circumstances and facts of which the auditor is aware at the time.

.46 For the purposes of this section, the term *internal control* encompasses all five components of internal control stated above. In addition, the term *controls* refers to one or more of the components, or any aspect thereof.

Controls Relevant to Reliable Financial Reporting and to the Audit

.47 There is a direct relationship between an entity's objectives and the internal control components it implements to provide reasonable assurance about their achievement. In addition, internal control is relevant to the entire entity, or to any of its operating units or business functions. This relationship is depicted as follows:

^[12] [Footnote deleted, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

¹³ The term *comprehensive basis of accounting other than generally accepted accounting principles* is defined in section 623, *Special Reports*. Hereafter, reference to generally accepted accounting principles in this section includes, where applicable, an other comprehensive basis of accounting.

Although the entity's objectives, and therefore controls, relate to financial reporting, operations, and compliance, as referred to in paragraph .41, not all of these objectives and controls are relevant to the audit. Further, although internal control applies to the entire entity, or to any of its operating units or business functions, an understanding of internal control relating to each of the entity's operating units and business functions may not be necessary to the performance of the audit.

.48 Ordinarily, controls that are relevant to an audit pertain to the entity's objective of preparing financial statements that are fairly presented in conformity with generally accepted accounting principles, including the management of risk that may give rise to a risk of material misstatement in those financial statements. However, it is not necessary to assess all controls in connection with assessing the risks of material misstatement and designing and performing further audit procedures in response to assessed risks. It is a matter of the auditor's professional judgment, as to the controls or combination of controls that should be assessed. However, as stated in paragraph .115, for significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. In exercising that judgment, the auditor should consider the circumstances, the applicable component, and factors such as the following:

- Materiality.
- The size of the entity.
- The nature of the entity's business, including its organization and ownership characteristics.
- The diversity and complexity of the entity's operations.
- Applicable legal and regulatory requirements.
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations.

.49 Controls over the completeness and accuracy of information produced by the entity may also be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures. The auditor's previous experience with the entity and information obtained in understanding the entity and its environment and throughout the audit assist the auditor in identifying controls relevant to the audit.

.50 Controls relating to operations and compliance¹⁴ objectives may, however, be relevant to an audit if they pertain to information or data the auditor may evaluate or use in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct and material effect on the financial statements, such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.51 An entity generally has controls relating to objectives that are not relevant to an audit and therefore need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as a manufacturing plant's computerized

¹⁴ An auditor may need to consider controls relevant to compliance objectives when performing an audit in accordance with section 801, *Compliance Audits*. [Footnote revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS No. 117.]

production scheduling system), but these controls ordinarily would not be relevant to the audit.

.52 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives. In obtaining an understanding of each of the components of internal control, the auditor's consideration of safeguarding controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.53 Controls relevant to the audit may exist in any of the components of internal control and a further discussion of controls relevant to the audit is included under the heading of each internal control component below (see paragraphs .67 through .101). In addition, paragraphs .115 and .117 discuss certain risks for which the auditor should evaluate the design of the entity's controls over such risks and determine whether they have been implemented.

Depth of Understanding of Internal Control

.54 Obtaining an understanding of internal control involves evaluating the design of a control and determining whether it has been implemented. Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing or detecting and correcting material misstatements. Further explanation is contained in the discussion of each internal control component below (see paragraphs .67 through .101). Implementation of a control means that the control exists and that the entity is using it. The auditor should consider the design of a control in determining whether to consider its implementation. An improperly designed control may represent a material weakness¹⁵ in the entity's internal control and the auditor should consider whether to communicate this to those charged with governance and management.

.55 As stated in paragraph .06, the auditor should perform risk assessment procedures to obtain an understanding of internal control. Procedures to obtain audit evidence about the design and implementation of relevant controls may include inquiring of entity personnel, observing the application of specific controls, inspecting documents and reports, and tracing transactions through the information system relevant to financial reporting. Inquiry alone is not sufficient to evaluate the design of a control relevant to an audit and to determine whether it has been implemented.

.56 Obtaining an understanding of an entity's controls is not sufficient to serve as testing the operating effectiveness of controls, unless there is some automation¹⁶ that provides for the consistent application of the operation of the control (manual and automated elements of internal control relevant to the audit are further described below). For example, obtaining audit evidence about the implementation of a manually operated control at a point in time does not provide audit evidence about the operating effectiveness of the control at other times during the period under audit. However, IT enables an entity to process large volumes of data consistently and enhances the entity's ability to monitor the performance of control activities and to achieve effective segregation of

¹⁵ A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected.

¹⁶ This is assuming effective IT general controls.

duties by implementing security controls in applications, databases, and operating systems. Therefore, because generally, IT processing is inherently consistent, performing audit procedures to determine whether an automated control has been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of IT general controls, including computer security and program change control. Tests of the operating effectiveness of controls are further described in section 318.

Characteristics of Manual and Automated Elements of Internal Control Relevant to the Auditor's Risk Assessment

.57 Effect of information technology on internal control. An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives, and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.58 The use of IT also affects the fundamental manner in which transactions are initiated, authorized, recorded, processed, and reported.¹⁷ In a manual system, an entity uses manual procedures and records in paper format (for example, individuals may manually record sales orders on paper forms or journals, authorize credit, prepare shipping reports and invoices, and maintain accounts receivable records). Controls in such a system also are manual and may include such procedures as approvals and reviews of activities, and reconciliations and follow-up of reconciling items. Alternatively, an entity may have information systems that use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace such paper documents as purchase orders, invoices, shipping documents, and related accounting records. Controls in systems that use IT consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT, may use information produced by IT, or may be limited to monitoring the effective functioning of IT and of automated controls, and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions, or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT. An entity's mix of manual and automated controls varies with the nature and complexity of the entity's use of IT.

.59 Generally, IT provides potential benefits of effectiveness and efficiency for an entity's internal control because it enables an entity to:

- Consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data.
- Enhance the timeliness, availability, and accuracy of information.
- Facilitate the additional analysis of information.
- Enhance the ability to monitor the performance of the entity's activities and its policies and procedures.
- Reduce the risk that controls will be circumvented.

¹⁷ Paragraph B9 of Appendix B [paragraph .126] defines *initiation, authorizing, recording, processing, and reporting* as used throughout this section.

- Enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.
- .60** IT also poses specific risks to an entity's internal control, including:
 - Reliance on systems or programs that are processing data inaccurately, processing inaccurate data, or both.
 - Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions.
 - Unauthorized changes to data in master files.
 - Unauthorized changes to systems or programs.
 - Failure to make necessary changes to systems or programs.
 - Inappropriate manual intervention.
 - Potential loss of data or inability to access data as required.

.61 The extent and nature of these risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to or destruction of data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. Therefore, the nature and characteristics of an entity's use of IT in its information system affect the entity's internal control.

.62 Manual controls of systems may be more suitable where judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions.
- Circumstances where misstatements are difficult to define, anticipate, or predict.
- In changing circumstances that require a control response outside the scope of an existing automated control.
- In monitoring the effectiveness of automated controls.

.63 Manual controls are performed by people, and therefore pose specific risks to the entity's internal control. Manual controls may be less reliable than automated controls because they can be more easily bypassed, ignored, or overridden and they are also more prone to errors and mistakes. Consistency of application of a manual control element cannot therefore be assumed. Manual systems may be less suitable for the following:

- High volume or recurring transactions, or in situations where errors that can be anticipated or predicted can be prevented or detected by control parameters that are automated.
- Control activities where the specific ways to perform the control can be adequately designed and automated.

Limitations of Internal Control

.64 Internal control, no matter how well designed and operated, can provide an entity with reasonable, but not absolute, assurance about achieving an

entity's objectives. The likelihood of achievement is affected by limitations inherent to internal control. These include the realities that human judgment in decision making can be faulty and that breakdowns in internal control can occur because of human failures such as simple errors or mistakes. For example, if an entity's information system personnel do not sufficiently understand how an order entry system processes sales transactions, they may design changes to the system that will erroneously process sales for a new line of products. On the other hand, such changes may be correctly designed but misunderstood by individuals who translate the design into program code. Errors also may occur in the use of information produced by IT. For example, automated controls may be designed to report transactions over a specified amount for management review, but individuals responsible for conducting the review may not understand the purpose of such reports and, accordingly, may fail to review them or investigate unusual items.

.65 Additionally, controls, whether manual or automated, can be circumvented by the collusion of two or more people or inappropriate management override of internal control. For example, management may enter into undisclosed agreements with customers that alter the terms and conditions of the entity's standard sales contracts, which may result in improper revenue recognition. Also, edit checks in a software program that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

.66 Smaller entities often have fewer employees, which may limit the extent to which segregation of duties is practicable. However, for key areas, even in a very small entity, it can be practicable to implement some degree of segregation of duties or other form of unsophisticated but effective controls. The potential for override of controls by the owner-manager depends to a great extent on the control environment and, in particular, the owner-manager's attitudes about the importance of internal control.

Internal Control Components

.67 Control environment. The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

.68 The primary responsibility for the prevention and detection of fraud and error rests with those charged with governance and the management of the entity. In obtaining an understanding of the control environment, the auditor should consider the design and implementation of entity programs and controls to address the risk of fraud as discussed in section 316. The absence or inadequacy of such programs and controls may constitute a significant deficiency or a material weakness. An example of such programs is a "hotline process" for employees to report on a confidential basis any known or suspected fraudulent activity.

.69 In evaluating the design of the entity's control environment, the auditor should consider the following elements and how they have been incorporated into the entity's processes:

- a. *Communication and enforcement of integrity and ethical values.* Essential elements that influence the effectiveness of the design, administration, and monitoring of controls.
- b. *Commitment to competence.* Management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.

- c. *Participation of those charged with governance.* Independence from management, the experience and stature of its members, the extent of its involvement and scrutiny of activities, the information it receives, the degree to which difficult questions are raised and pursued with management, and its interaction with internal and external auditors.
- d. *Management's philosophy and operating style.* Management's approach to taking and managing business risks, and management's attitudes and actions toward financial reporting, information processing and accounting functions, and personnel.
- e. *Organizational structure.* The framework within which an entity's activities for achieving its objectives are planned, executed, controlled, and reviewed.
- f. *Assignment of authority and responsibility.* How authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established.
- g. *Human resource policies and practices.* Recruitment, orientation, training, evaluating, counseling, promoting, compensating, and remedial actions.

For example, management's response to internal control deficiencies communicated in prior periods may relate to one or more of the aforementioned elements, such as commitment to competence or management's philosophy and operating style.

.70 The auditor should obtain sufficient knowledge of the control environment to understand the attitudes, awareness, and actions of those charged with governance concerning the entity's internal control and its importance in achieving reliable financial reporting. In understanding the control environment, the auditor should concentrate on the implementation of controls because controls may be established but not acted upon.

.71 The responsibilities of those charged with governance are of considerable importance. This is recognized in codes of practice and other regulations or guidance produced for the benefit of those charged with governance. The basis for management remuneration, especially executive performance-related compensation, places stress on management arising from the conflicting demands of fair reporting and the perceived benefits to shareholders of improved results. It is one, but not the only, role of those charged with governance to counterbalance such pressures. In understanding the control environment, the auditor should consider such matters as the independence of the directors and their ability to evaluate the actions of management. The auditor also should consider whether there is a group of those charged with governance that understands the entity's business transactions and evaluates whether the financial statements are presented fairly in conformity with generally accepted accounting principles.

.72 In understanding the control environment elements, the auditor should consider whether they have been implemented. The auditor should obtain sufficient appropriate audit evidence through a combination of inquiries and other risk assessment procedures, for example, corroborating inquiries through observation or inspection of documents. For example, through inquiries of management and employees, the auditor may obtain an understanding of how management communicates to employees its views on business practices and ethical behavior. The auditor should determine whether controls have been implemented by considering, for example, whether management has established a formal code of conduct and whether it acts in a manner that supports or condones violations of or authorizes exceptions to the code.

.73 Audit evidence for elements of the control environment may not be available in documentary form, in particular for smaller entities where communication between management and other personnel may be informal, yet effective. For example, management's commitment to ethical values and competence are often implemented through the behavior and attitude they demonstrate in managing the entity's business instead of in a written code of conduct. Consequently, management's attitudes, awareness, and actions are of particular importance in the design of a smaller entity's control environment. In addition, the role of those charged with governance is often undertaken by the owner-manager where there are no other owners.

.74 When obtaining an understanding of the control environment, the auditor also should consider the collective effect on the control environment of strengths and weaknesses in various control environment elements. Management's strengths and weaknesses may have a pervasive effect on internal control. For example, owner-manager controls may mitigate a lack of segregation of duties in a small business, or an active and independent board of directors may influence the philosophy and operating style of senior management in larger entities. Alternatively, management's failure to commit sufficient resources to address security risks presented by IT may adversely affect internal control by allowing improper changes to be made to computer programs or to data, or by allowing unauthorized transactions to be processed. Similarly, human resource policies and practices directed toward hiring competent financial, accounting, and IT personnel may not mitigate a strong bias by top management to overstate earnings.

.75 The existence of a satisfactory control environment is a positive factor when the auditor assesses the risks of material misstatement of the financial statements. Although an effective control environment is not an absolute deterrent to fraud because of the limitations of internal control, it may help reduce the risks of fraud. Because of the pervasive effect of the control environment on assessing the risks of material misstatement, the auditor's preliminary judgment about its effectiveness often influences the nature, timing, and extent of the further audit procedures to be performed. For example, weaknesses in the control environment may lead the auditor to perform more substantive procedures as of the date of the balance sheet rather than at an interim date, modify the nature of the tests of controls or substantive procedures to obtain more persuasive evidence, or increase the number of locations to be included in the scope of the audit. Conversely, an effective control environment may allow the auditor to have some degree of increased confidence in internal control and the reliability of evidence generated internally within the entity and thus, for example, allow the auditor to perform tests of controls and substantive procedures at an interim date rather than at the balance sheet date. However, the control environment ordinarily is not specific enough to prevent or detect material misstatements in account balances, classes of transactions, or disclosures and related assertions. The auditor, therefore, should consider the effect of other components of internal control in conjunction with the control environment when assessing the risks of material misstatement, for example, the monitoring of controls and the operation of specific control activities.

.76 *The entity's risk assessment process.* An entity's risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles. For example, risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates

recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

.77 Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements.¹⁸ Risks can arise or change due to circumstances such as the following:

- Changes in operating environment
- New personnel
- New or revamped information systems
- Rapid growth
- New technology
- New business models, products, or activities
- Corporate restructurings
- Expanded foreign operations
- New accounting pronouncements

.78 The auditor should obtain sufficient knowledge of the entity's risk assessment process to understand how management considers risks relevant to financial reporting objectives and decides about actions to address those risks. In evaluating the design and implementation of the entity's risk assessment process, the auditor should consider how management identifies business risks relevant to financial reporting, estimates the significance of the risks, assesses the likelihood of their occurrence, and decides upon actions to manage them. An entity's risk assessment process for financial reporting that encompasses the elements of internal control herein might be part of an entity's risk management framework. As such, auditors should focus on aspects of the framework that affect risks of material misstatements in financial reporting. If the entity's risk assessment process is appropriate to the circumstances, it assists the auditor in identifying risks of material misstatement.

.79 The auditor should inquire about business risks that management has identified and should consider whether they may result in material misstatement of the financial statements. An entity's risk assessment process differs from the auditor's consideration of audit risk in a financial statement audit. The purpose of an entity's risk assessment process is to identify, analyze, and manage risks that affect the entity's objectives. In a financial statement audit, the auditor assesses risks to evaluate the likelihood that material misstatements could occur in the financial statements. Not all of the entity's risks are necessarily audit risks. However, the entity's risk assessment process may affect the auditor's consideration of audit risk. During the audit, the auditor may identify business risks or risks of material misstatement in the financial statements that management failed to identify. In such cases, the auditor should consider why the entity's risk assessment process failed to identify those risks and whether the process is appropriate to its circumstances.

.80 In a smaller entity, management may not have a formal risk assessment process as described in paragraph .76. For such entities, the auditor should discuss with management how risks to the business are identified by management and how they are addressed.

¹⁸ These assertions are discussed in section 326, *Audit Evidence*.

.81 *Information system, including the related business processes relevant to financial reporting, and communication.* The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether automated or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. The quality of system-generated information affects management's ability to make appropriate decisions in controlling the entity's activities and to prepare reliable financial reports.

.82 Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting.

.83 The auditor should obtain sufficient knowledge of the information system, including the related business processes relevant to financial reporting, to understand:

- The classes of transactions in the entity's operations that are significant to the financial statements.
- The procedures, within both automated and manual systems, by which those transactions are initiated, authorized, recorded, processed, and reported in the financial statements.
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the financial statements involved in initiating, authorizing, recording, processing, and reporting transactions.
- How the information system captures events and conditions, other than classes of transactions, that are significant to the financial statements.
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.

.84 When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for significant accounts or may be critical to the effective functioning of manual controls that depend on IT.

.85 The auditor also should obtain an understanding of how the incorrect processing of transactions is resolved. For example, such understanding might include whether there is an automated suspense file, how it is used by the entity to ensure that suspense items are cleared out on a timely basis, and how system overrides or bypasses to controls are processed and accounted for.

.86 In obtaining an understanding of the financial reporting process (including the closing process), the auditor should obtain an understanding of the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. Such procedures include those used to:

- *Enter transaction totals into the general ledger (or equivalent record).* In some information systems, IT may be used to transfer such information automatically from transaction processing systems to general ledger or financial reporting systems. The automated processes and controls in such systems may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts

being automatically passed to the general ledger or financial reporting system. Furthermore, in planning the audit, the auditor should be aware that when IT is used to transfer information automatically there may be little or no visible evidence of such intervention in the information systems.

- *Initiate, authorize, record, and process journal entries in the general ledger.* An entity's financial reporting process used to prepare the financial statements typically includes the use of standard journal entries that are required on a recurring basis to record transactions such as sales, purchases, and cash disbursements, or to record accounting estimates that are periodically made by management such as changes in the estimate of uncollectible accounts receivable. An entity's financial reporting process also includes the use of nonstandard journal entries to record nonrecurring or unusual transactions or adjustments such as a business combination or disposal, or a nonrecurring estimate such as an asset impairment. In manual, paper-based general ledger systems, such journal entries may be identified through inspection of ledgers, journals, and supporting documentation. However, when IT is used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may be more easily identified through the use of computer-assisted audit techniques.
- *Initiate and record recurring and nonrecurring adjustments to the financial statements.* These are procedures relating to adjustments and reclassifications that are not reflected in formal journal entries.
- *Combine and consolidate general ledger data.* This includes procedures to combine detailed general ledger accounts, prepare the trial balance, and prepare consolidated financial data (for example, transferring general ledger data and adjusting journals into a consolidation system or spreadsheet; performing consolidation routines; and reconciling and reviewing consolidated financial data, including footnote data).
- *Prepare financial statements and disclosures.* These are procedures designed to ensure that information required to be presented and disclosed is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

.87 The auditor should obtain an understanding of the entity's information system relevant to financial reporting in a manner that is appropriate to the entity's circumstances. This includes obtaining an understanding of how transactions originate within the entity's business processes. An entity's business processes are the activities designed to develop, purchase, produce, sell, and distribute the entity's products and services; ensure compliance with laws and regulations; and record information, including accounting and financial reporting information.

.88 The auditor should obtain sufficient knowledge of the communication component to understand how the entity communicates financial reporting roles and responsibilities and significant matters relating to financial reporting. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting and may take such forms as policy manuals and financial reporting manuals. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on. The auditor's understanding of communication pertaining to financial reporting

matters also includes communications between management and those charged with governance, particularly the audit committee, as well as external communications, such as those with regulatory authorities.

.89 Control activities. The auditor should obtain an understanding of those control activities relevant to the audit. Control activities are the policies and procedures that help ensure that management directives are carried out; for example, that necessary actions are taken to address risks that threaten the achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels. Examples of specific control activities include the following:

- *Authorization.* Control activities related to the initiation of derivatives and other off-balance sheet transactions may be relevant to the auditor's design of audit procedures related to the completeness assertion.
- *Segregation of duties.* Whether the personnel responsible for recording estimates for uncollectible accounts receivables are independent of personnel authorizing sales transactions may be relevant to the auditor's design of audit procedures related to the valuation assertion.
- *Safeguarding.* Control activities related to whether inventory is securely stored and the movement and access to inventory is limited to authorized individuals may be relevant to the auditor's design of audit procedures related to the existence assertion, in particular, the auditor's consideration as to the number of locations to visit.
- *Asset accountability.* Control activities related to reconciliations of the detailed records to the general ledger are ordinarily necessary to design and perform audit procedures for material classes of transactions and account balances.

.90 The auditor should consider the knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities. An audit does not require an understanding of all the control activities related to each class of transactions, account balance, and disclosure in the financial statements or to every relevant assertion. Ordinarily, control activities that may be relevant to an audit include those relating to authorization, segregation of duties, safeguarding of assets, and asset accountability, including, for example, reconciliations of the general ledger to the detailed records. The auditor should obtain an understanding of the process of reconciling detail to the general ledger for significant accounts. Also, control activities are relevant to the audit if the auditor is required to evaluate them as discussed in paragraphs .115 through .117.

.91 In obtaining an understanding of control activities, the auditor's primary consideration is whether, and how, a specific control activity, individually or in combination with others, prevents, or detects and corrects, material misstatements in classes of transactions, account balances, or disclosures. Control activities relevant to the audit are those for which the auditor considers it necessary to obtain an understanding in order to assess risks of material misstatement at the assertion level and to design and perform further audit procedures responsive to the assessed risks. The auditor's emphasis is on identifying and obtaining an understanding of control activities that address the areas where the auditor considers that material misstatements are more likely to occur. When multiple control activities achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to such objective.

.92 The auditor should obtain an understanding of how IT affects control activities that are relevant to planning the audit. Some entities and auditors may view the IT control activities in terms of application controls and general controls. Application controls apply to the processing of individual applications. Accordingly, application controls relate to the use of IT to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data, numerical sequence checks, and manual follow-up of exception reports.

.93 Application controls may be performed by IT (for example, automated reconciliation of subsystems) or by individuals. When application controls are performed by people interacting with IT, they may be referred to as user controls. The effectiveness of user controls, such as reviews of computer-produced exception reports or other information produced by IT, may depend on the accuracy of the information produced. For example, a user may review an exception report to identify credit sales over a customer's authorized credit limit without performing procedures to verify its accuracy. In such cases, the effectiveness of the user control (that is, the review of the exception report) depends on both the effectiveness of the user review and the accuracy of the information in the report produced by IT.

.94 General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. While ineffective general controls do not, by themselves, cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if there are weaknesses in the general controls over access security, and applications are relying on these general controls to prevent unauthorized transactions from being processed, such a general control weakness may have a more severe effect on the effective design and operation of the application control. General controls should be assessed in relation to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, weaknesses in the general controls over "systems development" may not be relevant to the financial statements being audited.

.95 The use of IT affects the way that control activities are implemented. For example, when IT is used in an information system, segregation of duties often is achieved by implementing security controls.

.96 The auditor should consider whether the entity has responded adequately to the risks arising from IT by establishing effective controls, including effective general controls upon which application controls depend. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process.

.97 *Monitoring of controls.* The auditor should obtain an understanding of the major types of activities that the entity uses to monitor internal control over financial reporting, including the sources of the information related to those activities, and how those activities are used to initiate corrective actions to its controls.

.98 An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes whether they are operating as intended and that they are modified as

appropriate for changes in conditions. Monitoring of controls may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and legal department's oversight of compliance with the entity's ethical or business practice policies.

.99 Monitoring of controls is a process to assess the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. Monitoring is done to ensure that controls continue to operate effectively. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them. Management accomplishes monitoring of controls through ongoing activities, separate evaluations, or a combination of the two. In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's activities. When obtaining an understanding of the internal audit function, the auditor should follow the guidance in paragraphs .04 through .08 of section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*. Management's monitoring activities may include using information from communications from external parties such as customer complaints and regulator comments that may indicate problems or highlight areas in need of improvement.

.100 In many entities, much of the information used in monitoring may be produced by the entity's information system. If management assumes that data used for monitoring is accurate without having a basis for that assumption, errors may exist in the information, potentially leading management to incorrect conclusions from its monitoring activities. The auditor should obtain an understanding of the sources of the information related to the entity's monitoring activities, and the basis upon which management considers the information to be sufficiently reliable for the purpose.

.101 The auditor's understanding of management's monitoring of controls may assist the auditor in identifying the existence of more detailed controls or other activities that the auditor may consider in making risk assessments.

Assessing the Risks of Material Misstatement

.102 The auditor should identify and assess the risks of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances, and disclosures. For this purpose, the auditor should:

- Identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, and considering the classes of transactions, account balances, and disclosures in the financial statements.
- Relate the identified risks to what can go wrong at the relevant assertion level.
- Consider whether the risks are of a magnitude that could result in a material misstatement of the financial statements.
- Consider the likelihood that the risks could result in a material misstatement of the financial statements.

.103 The auditor should use information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the

design of controls and determining whether they have been implemented, as audit evidence to support the risk assessment. The auditor should use the risk assessment to determine the nature, timing, and extent of further audit procedures to be performed. When the risk assessment is based on an expectation that controls are operating effectively to prevent or detect material misstatement, individually or when aggregated, at the relevant assertion level, the auditor should perform tests of the controls that the auditor has determined to be suitably designed to prevent or detect a material misstatement in the relevant assertion to obtain audit evidence that the controls are operating effectively, as described in section 318.

.104 The auditor should determine whether the identified risks of material misstatement relate to specific relevant assertions related to classes of transactions, account balances, and disclosures, or whether they relate more pervasively to the financial statements taken as a whole and potentially affect many relevant assertions. The latter risks (risks at the financial statement level) may derive in particular from a weak control environment.

.105 The nature of the risks arising from a weak control environment is such that they are not likely to be confined to specific individual risks of material misstatement in particular classes of transactions, account balances, and disclosures. Rather, weaknesses such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

.106 In making risk assessments, the auditor should identify the controls that are likely to prevent or detect and correct material misstatements in specific relevant assertions. Generally, the auditor gains an understanding of controls and relates them to relevant assertions in the context of processes and systems in which they exist. Doing so is useful because individual control activities often do not in themselves address a risk. Often only multiple control activities, together with other elements of internal control, will be sufficient to address a risk.

.107 Conversely, some control activities may have a specific effect on an individual relevant assertion embodied in a particular class of transaction or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.108 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing or detecting and correcting misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

.109 In assessing risks, deficiencies in an entity's internal control may come to the auditor's attention that are significant enough that they are, in the auditor's judgment, significant deficiencies that should be communicated to those charged with governance as required by section 325, *Communication of Internal Control Related Matters Noted in an Audit*. Furthermore, the auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. Concerns about the integrity of the entity's management may be so serious as to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an

audit cannot be conducted. Also, concerns about the condition and reliability of an entity's records may cause the auditor to conclude that it is unlikely that sufficient appropriate audit evidence will be available to support an unqualified opinion on the financial statements. In such circumstances, the auditor should consider a qualification or disclaimer of opinion, but in some cases the auditor's only recourse may be to withdraw from the engagement.

Significant Risks That Require Special Audit Consideration

.110 As part of the risk assessment described in paragraph .102, the auditor should determine which of the risks identified are, in the auditor's judgment, risks that require special audit consideration (such risks are defined as "significant risks"). Paragraphs .45 and .53 of section 318 describe the consequences for further audit procedures of identifying a risk as significant.

.111 The determination of significant risks, which arise on most audits, is a matter for the auditor's professional judgment. In exercising this judgment, the auditor should consider inherent risk¹⁹ to determine whether the nature of the risk, the likely magnitude of the potential misstatement including the possibility that the risk may give rise to multiple misstatements, and the likelihood of the risk occurring are such that they require special audit consideration. Routine, noncomplex transactions that are subject to systematic processing are less likely to give rise to significant risks because they have lower inherent risks. On the other hand, significant risks are often derived from business risks that may result in a material misstatement. In considering the nature of the risks, the auditor should consider a number of matters, including the following:

- Whether the risk is a risk of fraud
- Whether the risk is related to recent significant economic, accounting, or other developments and, therefore, requires specific attention
- The complexity of transactions
- Whether the risk involves significant transactions with related parties
- The degree of subjectivity in the measurement of financial information related to the risks, especially those involving a wide range of measurement uncertainty
- Whether the risk involves significant nonroutine transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual

.112 Significant risks often relate to significant nonroutine transactions and judgmental matters. Nonroutine transactions are transactions that are unusual, either due to size or nature, and that therefore occur infrequently. Judgmental matters may include the development of accounting estimates for which there is significant measurement uncertainty.

.113 Risks of material misstatement may be greater for risks relating to significant nonroutine transactions arising from matters such as the following:

- Greater management intervention to specify the accounting treatment
- Greater manual intervention for data collection and processing
- Complex calculations or accounting principles

¹⁹ The auditor does this before considering the effect of identified controls related to the risk.

- The nature of nonroutine transactions, which may make it difficult for the entity to implement effective controls over the risks
- Significant related-party transactions

.114 Risks of material misstatement may be greater for risks relating to significant judgmental matters that require the development of accounting estimates arising from matters such as the following:

- Accounting principles for accounting estimates or revenue recognition may be subject to differing interpretation.
- Required judgment may be subjective or complex, or may require assumptions about the effects of future events, for example, judgment about fair value.

.115 For significant risks, to the extent the auditor has not already done so, the auditor should evaluate the design of the entity's related controls, including relevant control activities, and determine whether they have been implemented. An understanding of the entity's controls related to significant risks should provide the auditor with adequate information to develop an effective audit approach. Management ought to be aware of significant risks; however, risks relating to significant nonroutine or judgmental matters are often less likely to be subject to routine controls. Therefore, the auditor's understanding of whether the entity has designed and implemented controls for such significant risks includes whether and how management responds to the risks and whether control activities such as a review of assumptions by senior management or experts, formal processes for estimations, or approval by those charged with governance have been implemented to address the risks. For example, where there are nonrecurring events such as the receipt of notice of a significant lawsuit, consideration of the entity's response will include such matters as whether it has been referred to appropriate experts (such as internal or external legal counsel), whether an assessment has been made of the potential effect, and how it is proposed that the circumstances are to be disclosed in the financial statements.

.116 If management has not appropriately responded by implementing controls over significant risks and if, as a result, the auditor judges that there is a significant deficiency or material weakness in the entity's internal control over financial reporting, the auditor should communicate this matter to those charged with governance. In these circumstances, the auditor also should consider the implications for the auditor's risk assessment.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.117 As part of the risk assessment described in paragraph .102, the auditor should evaluate the design and determine the implementation of the entity's controls, including relevant control activities, over those risks for which, in the auditor's judgment, it is not possible or practicable to reduce detection risk at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures. The consequences for further audit procedures of identifying such risks are described in paragraph .24 of section 318.

.118 The understanding of the entity's information system relevant to financial reporting enables the auditor to identify risks of material misstatement that relate directly to the recording of routine classes of transactions or account balances and the preparation of reliable financial statements; these include risks of inaccurate or incomplete processing. Ordinarily, such risks relate

to significant classes of transactions, such as an entity's revenue, purchases, and cash receipts or cash payments.

.119 The characteristics of routine day-to-day business transactions often permit highly automated processing with little or no manual intervention. In such circumstances, it may not be possible to perform only substantive procedures in relation to the risk. For example, in circumstances where a significant amount of an entity's information is initiated, authorized, recorded, processed, or reported electronically, such as in an integrated system, the auditor may determine that it is not possible to design effective substantive procedures that by themselves would provide sufficient appropriate audit evidence that relevant classes of transactions or account balances are not materially misstated. In such cases, audit evidence may be available only in electronic form, and its appropriateness and sufficiency usually depend on the effectiveness of controls over its accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, authorized, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively.

.120 Examples of situations in which the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence that certain relevant assertions are not materially misstated include the following:

- An entity that conducts its business using IT to initiate orders for the purchase and delivery of goods based on predetermined rules of what to order and in what quantities and to pay the related accounts payable based on system-generated decisions initiated upon the confirmed receipt of goods and terms of payment. No other documentation of orders placed or goods received is produced or maintained, other than through the IT system.
- An entity that provides services to customers via electronic media (for example, an Internet service provider or a telecommunications company) and uses IT to create a log of the services provided to its customers, to initiate and process its billings for the services, and to automatically record such amounts in electronic accounting records that are part of the system used to produce the entity's financial statements.

Revision of Risk Assessment

.121 The auditor's assessment of the risks of material misstatement at the relevant assertion level is based on available audit evidence and may change during the course of the audit as additional audit evidence is obtained. In particular, the risk assessment may be based on an expectation that controls are operating effectively to prevent or detect and correct a material misstatement at the relevant assertion level. In performing tests of controls to obtain audit evidence about their operating effectiveness, the auditor may obtain audit evidence that controls are not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency that is greater than is consistent with the auditor's risk assessment. When the auditor obtains audit evidence from performing further audit procedures that tends to contradict the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and should further modify planned audit procedures accordingly. See paragraphs .70 and .74 of section 318 for further guidance.

Documentation

.122 The auditor should document:

- a. The discussion among the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, including how and when the discussion occurred, the subject matter discussed, the audit team members who participated, and significant decisions reached concerning planned responses at the financial statement and relevant assertion levels.
- b. Key elements of the understanding obtained regarding each of the aspects of the entity and its environment identified in paragraph .21, including each of the components of internal control identified in paragraph .41, to assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures.
- c. The assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level as required by paragraph .102 and the basis for the assessment.
- d. The risks identified and related controls evaluated as a result of the requirements in paragraphs .110 and .117.

.123 The manner in which these matters are documented is for the auditor to determine using professional judgment. Section 339, *Audit Documentation*, provides general guidance regarding the purpose, content, and ownership and confidentiality of audit documentation. Examples of common techniques used alone or in combination include narrative descriptions, questionnaires, checklists, and flowcharts. Such techniques may also be useful in documenting the auditor's assessment of the risks of material misstatement at the overall financial statement and relevant assertions level. The form and extent of this documentation are influenced by the nature, size, and complexity of the entity and its environment, including its internal control, and the availability of information from the entity and the specific audit methodology and technology used in the course of the audit. For example, documentation of the understanding of a complex information system in which a large volume of transactions are electronically initiated, authorized, recorded, processed, or reported may include flowcharts, questionnaires, or decision tables. For an information system making limited or no use of IT or for which few transactions are processed (for example, long-term debt), documentation in the form of a memorandum may be sufficient. Generally, the more complex the entity and its environment, including its internal control, and the more extensive the audit procedures performed by the auditor, the more extensively the auditor should document his or her work. The specific audit methodology and technology used in the course of the audit will also affect the form and extent of documentation.

Effective Date

.124 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

.125

Appendix A

Understanding the Entity and Its Environment

A1. This Appendix provides additional guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity's financial performance. The examples provided cover a broad range of matters applicable to many engagements; however, not all matters are relevant to every engagement and the list of examples is not necessarily complete. Additional guidance on internal control is contained in Appendix B [paragraph .126].

Industry, Regulatory, and Other External Factors

A2. Examples of matters an auditor may consider include the following:

- Industry conditions
 - The market and competition, including demand, capacity, and price competition
 - Cyclical or seasonal activity
 - Product technology relating to the entity's products
 - Supply availability and cost
- Regulatory environment
 - Accounting principles and industry-specific practices
 - Regulatory framework for a regulated industry
 - Legislation and regulation that significantly affect the entity's operations
 - Regulatory requirements
 - Direct supervisory activities
 - Taxation (corporate and other)
 - Government policies currently affecting the conduct of the entity's business
 - Monetary, including foreign exchange controls
 - Fiscal
 - Financial incentives (for example, government aid programs)
 - Tariffs and trade restrictions
 - Environmental requirements affecting the industry and the entity's business
- Other external factors currently affecting the entity's business
 - General level of economic activity (for example, recession, growth)
 - Interest rates and availability of financing
 - Inflation and currency revaluation

Nature of the Entity

A3. Examples of matters an auditor may consider include the following:

- Business operations
 - Nature of revenue sources (for example, manufacturer; wholesaler; banking, insurance, or other financial services; import-export trading, utility, transportation, and technology products and services)
 - Products or services and markets (for example, major customers and contracts, terms of payment, profit margins, market share, competitors, exports, pricing policies, reputation of products, warranties, backlog, trends, marketing strategy and objectives, and manufacturing processes)
 - Conduct of operations (for example, stages and methods of production, subsidiaries or divisions, delivery of products and services, and details of declining or expanding operations)
 - Alliances, joint ventures, and outsourcing activities
 - Involvement in e-commerce, including Internet sales and marketing activities
 - Geographic dispersion and industry segmentation
 - Location of production facilities, warehouses, and offices
 - Key customers
 - Important suppliers of goods and services (for example, long-term contracts, stability of supply, terms of payment, imports, and methods of delivery, such as "just-in-time")
 - Employment (for example, by location, supply, wage levels, union contracts, pension and other postemployment benefits, stock option or incentive bonus arrangements, and government regulation related to employment matters)
 - Research and development activities and expenditures
 - Transactions with related parties
- Investments
 - Acquisitions, mergers, or disposals of business activities (planned or recently executed)
 - Investments and dispositions of securities and loans
 - Capital investment activities, including investments in plant and equipment and technology, and any recent or planned changes
 - Investments in nonconsolidated entities, including partnerships, joint ventures, and special-purpose entities
 - Life cycle stage of enterprise (start-up, growing, mature, declining)
- Financing
 - Group structure—major subsidiaries and associated entities, including consolidated and nonconsolidated structures
 - Debt structure, including covenants, restrictions, guarantees, and off-balance-sheet financing arrangements
 - Leasing of property, plant, or equipment for use in the business
 - Beneficial owners (local and foreign business reputation and experience)
 - Related parties

- Use of derivative financial instruments
- Financial reporting
 - Accounting principles and industry-specific practices
 - Revenue recognition practices
 - Accounting for fair values
 - Inventories (for example, locations and quantities)
 - Foreign currency assets, liabilities, and transactions
 - Industry-specific significant categories (for example, loans and investments for banks, accounts receivable and inventory for manufacturers, research and development for pharmaceuticals)
 - Accounting for unusual or complex transactions including those in controversial or emerging areas (for example, accounting for stock-based compensation)
 - Financial statement presentation and disclosure

Objectives and Strategies and Related Business Risks

A4. Examples of matters an auditor may consider include the following:

- Existence of objectives (that is, how the entity addresses industry, regulatory, and other external factors) relating to, for example, the following:
 - Industry developments (a potential related business risk might be, for example, that the entity does not have the personnel or expertise to deal with the changes in the industry)
 - New products and services (a potential related business risk might be, for example, that there is increased product liability)
 - Expansion of the business (a potential related business risk might be, for example, that the demand has not been accurately estimated)
 - New accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation, or increased costs)
 - Regulatory requirements (a potential related business risk might be, for example, that there is increased legal exposure)
 - Current and prospective financing requirements (a potential related business risk might be, for example, the loss of financing due to the entity's inability to meet requirements)
 - Use of information technology (IT) (a potential related business risk might be, for example, that systems and processes are not compatible)
 - Risk appetite of managers and stakeholders
- Effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation)

Measurement and Review of the Entity's Financial Performance

A5. Examples of matters an auditor may consider include:

- Key ratios and operating statistics
- Key performance indicators

- Employee performance measures and incentive compensation policies
- Trends
- Use of forecasts, budgets, and variance analysis
- Analyst reports and credit rating reports
- Competitor analysis
- Period-on-period financial performance (revenue growth, profitability, and leverage)

.126

Appendix B

Internal Control Components

B1. As set forth in paragraph .41 and described in .67 through .101, internal control consists of the following components:

- a. Control environment
- b. Risk assessment
- c. Information and communication systems
- d. Control activities
- e. Monitoring

This Appendix further explains these components as they relate to the financial statement audit.

Control Environment

B2. The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for effective internal control, providing discipline and structure.

B3. The control environment encompasses the following elements:

- a. *Communication and enforcement of integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical values are essential elements of the control environment that influence the effectiveness of the design, administration, and monitoring of other components of internal control. Integrity and ethical behavior are the product of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. They include management's actions to remove or reduce incentives and temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. They also include the communication of entity values and behavioral standards to personnel through policy statements and codes of conduct and by example.
- b. *Commitment to competence.* Competence is the knowledge and skills necessary to accomplish tasks that define the individual's job. Commitment to competence includes management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
- c. *Participation of those charged with governance.* An entity's control consciousness is significantly influenced by those charged with governance. Attributes include those charged with governance's independence from management, the experience and stature of its members, the extent of its involvement and scrutiny of activities, the appropriateness of its actions, the information it receives, the degree to which difficult questions are raised and pursued with management, and its interaction with internal and external auditors. The importance of responsibilities of those charged with governance is recognized in codes

of practice and other regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle-blower procedures and of the process for reviewing the effectiveness of the entity's internal control.

- d. *Management's philosophy and operating style.* Management's philosophy and operating style encompass a broad range of characteristics. Such characteristics may include the following: management's approach to taking and monitoring business risks; management's attitudes and actions toward financial reporting (conservative or aggressive selection from available alternative accounting principles, and conscientiousness and conservatism with which accounting estimates are developed); and management's attitudes toward information processing and accounting functions and personnel.
- e. *Organizational structure.* An entity's organizational structure provides the framework within which its activities for achieving entity-wide objectives are planned, executed, controlled, and reviewed. Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. An entity develops an organizational structure suited to its needs. The appropriateness of an entity's organizational structure depends in part on its size and the nature of its activities.
- f. *Assignment of authority and responsibility.* This factor includes how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established. It also includes policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it includes policies and communications directed at ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.
- g. *Human resource policies and practices.* Human resource policies and practices relate to recruitment, orientation, training, evaluating, counseling, promoting, compensating, and remedial actions. For example, standards for recruiting the most qualified individuals—with emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior—demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

Application to Small and Midsized Entities

B4. Small and midsized entities may implement the control environment elements differently than larger entities. For example, smaller entities might not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Similarly, those charged with governance in smaller entities may not include independent or outside members.

Entity's Risk Assessment Process

B5. An entity's risk assessment process is its process for identifying and responding to business risks and the results thereof. For financial reporting purposes, the entity's risk assessment process includes how management identifies risks relevant to the preparation of financial statements that are presented fairly in conformity with generally accepted accounting principles, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to manage them. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions.

B6. Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Once risks are identified, management considers their significance, the likelihood of their occurrence, and how they should be managed. Management may initiate plans, programs, or actions to address specific risks, or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to such circumstances as the following:

- *Changes in operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on or understanding of internal control.
- *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
- *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.
- *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control, for example, additional or changed risks from foreign currency transactions.
- *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

Application to Small and Midsized Entities

B7. The basic concepts of the entity's risk assessment process are relevant to every entity, regardless of size, but the risk assessment process is likely to be less formal and less structured in small and midsized entities than in larger ones. All

entities should have established financial reporting objectives, but they may be recognized implicitly rather than explicitly in smaller entities. Management may be able to learn about risks related to these objectives through direct personal involvement with employees and outside parties.

Information System, Including the Related Business Processes Relevant to Financial Reporting, and Communication

B8. An information system consists of infrastructure (physical and hardware components), software, people, procedures (manual and information technology [IT]), and data. Infrastructure and software will be absent, or have less significance, in systems that are exclusively or primarily manual. Many information systems rely extensively on IT.

B9. The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures, whether IT or manual, and records established to initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and to maintain accountability for the related assets, liabilities, and equity. Transactions may be initiated manually or automatically by programmed procedures. Authorization includes the process of approving transactions by the appropriate level of management. Recording includes identifying and capturing the relevant information for transactions or events. Processing includes functions such as edit and validation, calculation, measurement, valuation, summarization, and reconciliation, whether performed by IT or manual procedures. Reporting relates to the preparation of financial reports as well as other information, in electronic or printed format, that the entity uses in measuring and reviewing the entity's financial performance and in other functions. The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

B10. Accordingly, an information system encompasses methods and records that:

- Identify and record all valid transactions.
- Describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- Measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
- Determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- Present properly the transactions and related disclosures in the financial statements.

B11. Communication involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Open communication channels help ensure that exceptions are reported and acted on.

B12. Communication takes such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

Application to Small and Midsized Entities

B13. Information systems and related business processes relevant to financial reporting in small or midsized organizations are likely to be less formal than in larger organizations, but their role is just as significant. Smaller entities with active management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Communication may be less formal and easier to achieve in a small or midsized company than in a larger enterprise due to the smaller organization's size and fewer levels as well as management's greater visibility and availability.

Control Activities

B14. Control activities are the policies and procedures that help ensure that management directives are carried out, for example, that necessary actions are taken to address risks that threaten the achievement of the entity's objectives. Control activities, whether automated or manual, have various objectives and are applied at various organizational and functional levels.

B15. Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:

- *Performance reviews.* These control activities include reviewing and analyzing actual performance versus budgets, forecasts, and prior-period performance; relating different sets of data—operating or financial—to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information, and reviewing functional or activity performance, such as a bank's consumer loan manager's review of reports by branch, region, and loan type for loan approvals and collections.
- *Information processing.* A variety of controls are performed to check accuracy, completeness, and authorization of transactions. The two broad groupings of information systems control activities are application controls and general controls. Application controls apply to the processing of individual applications. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples of application controls include checking the arithmetical accuracy of records, maintaining and reviewing accounts and trial balances, automated controls such as edit checks of input data and numerical sequence checks, and manual follow-up of exception reports. General controls are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. General controls commonly include controls over data center and network operations; system software acquisition, change, and maintenance; access security; and application system acquisition, development, and maintenance. These controls apply to mainframe, miniframe, and end-user environments. Examples of such general controls are program change controls, controls that restrict access to programs or data, controls over the implementation of new releases of packaged software applications, and controls over system software that restrict access to or monitor the use of system utilities that could change financial data or records without leaving an audit trail.
- *Physical controls.* These activities encompass the physical security of assets, including adequate safeguards such as secured facilities to

limit access to assets and records; authorization for access to computer programs and data files; and periodic counting and comparison with amounts shown on control records (for example, comparing the results of cash, security, and inventory counts with accounting records). The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation, and therefore the audit, depends on circumstances such as when assets are highly susceptible to misappropriation. For example, these controls would ordinarily not be relevant when any inventory losses would be detected pursuant to periodic physical inspection and recorded in the financial statements. However, if for financial reporting purposes management relies solely on perpetual inventory records, the physical security controls would be relevant to the audit.

- *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of his or her duties. Examples of segregation of duties include reporting, reviewing and approving reconciliations, and approval and control of documents.

B16. Certain control activities may depend on the existence of appropriate higher-level policies established by management or those charged with governance. For example, authorization controls may be delegated under established guidelines, such as investment criteria set by those charged with governance; alternatively, nonroutine transactions such as major acquisitions or divestments may require specific high-level approval, including in some cases that of shareholders.

Application to Small and Midsized Entities

B17. The concepts underlying control activities in small or midsized organizations are likely to be similar to those in larger entities, but the formality with which they operate varies. Further, smaller entities may find that certain types of control activities are not relevant because of controls applied by management. For example, management's retention of authority for approving credit sales, significant purchases, and draw-downs on lines of credit can provide strong control over those activities, lessening or removing the need for more detailed control activities. An appropriate segregation of duties often appears to present difficulties in smaller organizations. Even companies that have only a few employees, however, may be able to assign responsibilities to achieve appropriate segregation or, if that is not possible, to use management oversight of the incompatible activities to achieve control objectives.

Monitoring of Controls

B18. An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies.

B19. Monitoring of controls is a process to assess the quality of internal control performance over time. It involves assessing the design and operation of controls on a timely basis and taking necessary corrective actions. Monitoring is done to ensure that controls continue to operate effectively. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them. Monitoring of controls is accomplished through ongoing monitoring activities, separate evaluations, or a combination of the two.

B20. Ongoing monitoring activities are built into the normal recurring activities of an entity and include regular management and supervisory activities. Managers of sales, purchasing, and production at divisional and corporate levels are in touch with operations and may question reports that differ significantly from their knowledge of operations.

B21. In many entities, internal auditors or personnel performing similar functions contribute to the monitoring of an entity's controls through separate evaluations. They regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the design and operation of internal control. They communicate information about strengths and weaknesses and recommendations for improving internal control.

B22. Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control, for example, communications concerning examinations by bank regulatory agencies. Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

Application to Small and Midsized Entities

B23. Ongoing monitoring activities of small and midsized entities are more likely to be informal and are typically performed as a part of the overall management of the entity's operations. Management's close involvement in operations often will identify significant variances from expectations and inaccuracies in financial data.

.127

Appendix C

Conditions and Events That May Indicate Risks of Material Misstatement

C1. The following are examples of conditions and events that may indicate the existence of risks of material misstatement. The examples provided cover a broad range of conditions and events; however, not all conditions and events are relevant to every audit engagement and the list of examples is not necessarily complete.

- Operations in regions that are economically unstable, for example, countries with significant currency devaluation or highly inflationary economies.
- Operations exposed to volatile markets, for example, futures trading.
- High degree of complex regulation.
- Going concern and liquidity issues, including loss of significant customers.
- Marginally achieving explicitly stated strategic objectives.
- Constraints on the availability of capital and credit.
- Changes in the industry in which the entity operates.
- Changes in the supply chain.
- Developing or offering new products or services, or moving into new lines of business.
- Expanding into new locations.
- Changes in the entity, such as large acquisitions, reorganizations, or other unusual events.
- Entities or divisions likely to be sold.
- Complex alliances and joint ventures.
- Use of off-balance-sheet finance, special-purpose entities, and other complex financing arrangements.
- Significant transactions with related parties.
- Lack of personnel with appropriate accounting and financial reporting skills.
- Changes in key personnel, including departure of key executives.
- Weaknesses in internal control, especially those not addressed by management.
- Inconsistencies between the entity's information technology (IT) strategy and its business strategies.
- Changes in the IT environment.
- Installation of significant new IT systems related to financial reporting.

- Inquiries into the entity's operations or financial results by regulatory or government bodies.
 - Past misstatements, history of errors, or a significant amount of adjustments at period end.
 - Significant amount of nonroutine or nonsystematic transactions, including intercompany transactions and large revenue transactions at period end.
 - Transactions that are recorded based on management's intent, for example, debt refinancing, assets to be sold, and classification of marketable securities.
 - Application of new accounting pronouncements.
 - Complex processes related to accounting measurements.
 - Events or transactions that result in significant measurement uncertainty, including accounting estimates.
 - Pending litigation and contingent liabilities, for example, sales warranties, financial guarantees, and environmental remediation.

AU Section 315

Communications Between Predecessor and Successor Auditors

(Supersedes SAS No. 7.)

Source: SAS No. 84; SAS No. 93.

Effective with respect to acceptance of an engagement after March 31, 1998, unless otherwise indicated.

Introduction

.01 This section provides guidance on communications between predecessor and successor auditors when a change of auditors is in process or has taken place. It also provides communications guidance when possible misstatements are discovered in financial statements reported on by a predecessor auditor. This section applies whenever an independent auditor is considering accepting an engagement to audit or reaudit (see paragraph .14 of this section) financial statements in accordance with generally accepted auditing standards, and after such auditor has been appointed to perform such an engagement.

.02 For the purposes of this section, the term *predecessor auditor* refers to an auditor who (a) has reported on the most recent audited financial statements¹ or was engaged to perform but did not complete an audit of the financial statements² and (b) has resigned, declined to stand for reappointment, or been notified that his or her services have been, or may be, terminated. The term *successor auditor* refers to an auditor who is considering accepting an engagement to audit financial statements but has not communicated with the predecessor auditor as provided in paragraphs .07 through .10 and to an auditor who has accepted such an engagement. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

Change of Auditors

.03 An auditor should not accept an engagement until the communications described in paragraphs .07 through .10 have been evaluated.³ However, an auditor may make a proposal for an audit engagement before communicating with the predecessor auditor. The auditor may wish to advise the prospective

¹ The provisions of this section are not required if the most recent audited financial statements are more than two years prior to the beginning of the earliest period to be audited by the successor auditor.

² There may be two predecessor auditors: the auditor who reported on the most recent audited financial statements and the auditor who was engaged to perform but did not complete an audit of any subsequent financial statements. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

³ When the most recent financial statements have been compiled or reviewed in accordance with the Statements on Standards for Accounting and Review Services, the accountant who reported on those financial statements is not a predecessor auditor. Although not required by this section, in these circumstances the successor auditor may find the matters described in paragraphs .08 and .09 useful in determining whether to accept the engagement.

client (for example, in a proposal) that acceptance cannot be final until the communications have been evaluated.

.04 Other communications between the successor and predecessor auditors, described in paragraph .11, are advisable to assist in the planning of the engagement. However, the timing of these other communications is more flexible. The successor auditor may initiate these other communications either prior to acceptance of the engagement or subsequent thereto.

.05 When more than one auditor is considering accepting an engagement, the predecessor auditor should not be expected to be available to respond to inquiries until a successor auditor has been selected by the prospective client and has accepted the engagement subject to the evaluation of the communications with the predecessor auditor as provided in paragraphs .07 through .10.

.06 The initiative for communicating rests with the successor auditor. The communication may be either written or oral. Both the predecessor and successor auditors should hold in confidence information obtained from each other. This obligation applies whether or not the successor auditor accepts the engagement.

Communications Before Successor Auditor Accepts Engagement

.07 Inquiry of the predecessor auditor is a necessary procedure because the predecessor auditor may be able to provide information that will assist the successor auditor in determining whether to accept the engagement. The successor auditor should bear in mind that, among other things, the predecessor auditor and the client may have disagreed about accounting principles, auditing procedures, or similarly significant matters.

.08 The successor auditor should request permission from the prospective client to make an inquiry of the predecessor auditor prior to final acceptance of the engagement. Except as permitted by the Rules of the Code of Professional Conduct, an auditor is precluded from disclosing confidential information obtained in the course of an engagement unless the client specifically consents. Thus, the successor auditor should ask the prospective client to authorize the predecessor auditor to respond fully to the successor auditor's inquiries. If a prospective client refuses to permit the predecessor auditor to respond or limits the response, the successor auditor should inquire as to the reasons and consider the implications of that refusal in deciding whether to accept the engagement.

.09 The successor auditor should make specific and reasonable inquiries of the predecessor auditor regarding matters that will assist the successor auditor in determining whether to accept the engagement. Matters subject to inquiry should include—

- Information that might bear on the integrity of management.
- Disagreements with management as to accounting principles, auditing procedures, or other similarly significant matters.
- Communications to those charged with governance regarding fraud and illegal acts by clients.^[4]

^[4] [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

- Communications to management and those charged with governance regarding significant deficiencies and material weaknesses in internal control.⁵
- The predecessor auditor's understanding as to the reasons for the change of auditors.

The successor auditor may wish to consider other reasonable inquiries. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.10 The predecessor auditor should respond promptly and fully, on the basis of known facts, to the successor auditor's reasonable inquiries. However, should the predecessor auditor decide, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor auditor should clearly state that the response is limited. If the successor auditor receives a limited response, its implications should be considered in deciding whether to accept the engagement.

Other Communications

.11 The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized.⁶ It is customary in such circumstances for the predecessor auditor to make himself or herself available to the successor auditor and make available for review certain of the working papers. The predecessor auditor should determine which working papers are to be made available for review and which may be copied. The predecessor auditor should ordinarily permit the successor auditor to review working papers, including documentation of planning, internal control, audit results, and other matters of continuing accounting and auditing significance, such as the working paper analysis of balance sheet accounts, and those relating to contingencies. Also, the predecessor auditor should reach an understanding with the successor auditor as to the use of the working papers.⁷ The extent, if any, to which a predecessor auditor permits access to the working papers is a matter of judgment.

Successor Auditor's Use of Communications

.12 The successor auditor must obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements he or she has been engaged to audit, including evaluating the consistency of the application of accounting principles. The audit evidence used in analyzing the impact of the opening balances on the current-year financial statements and consistency of accounting principles is a matter of professional judgment. Such audit evidence may include the most recent audited financial

⁵ See section 316, *Consideration of Fraud in a Financial Statement Audit*; section 317, *Illegal Acts by Clients*; and section 325, *Communicating Internal Control Related Matters Identified in an Audit*. [Footnote revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

⁶ Appendix A [paragraph .24] contains an illustrative client consent and acknowledgment letter.

⁷ Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers. Appendix B [paragraph .25] contains an illustrative successor auditor acknowledgment letter.

statements, the predecessor auditor's report thereon,⁸ the results of inquiry of the predecessor auditor, the results of the successor auditor's review of the predecessor auditor's working papers relating to the most recently completed audit, and audit procedures performed on the current period's transactions that may provide evidence about the opening balances or consistency. For example, evidence gathered during the current year's audit may provide information about the realizability and existence of receivables and inventory recorded at the beginning of the year. The successor auditor may also apply appropriate auditing procedures to account balances at the beginning of the period under audit and to transactions in prior periods. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.13 The successor auditor's review of the predecessor auditor's working papers may affect the nature, timing, and extent of the successor auditor's procedures with respect to the opening balances and consistency of accounting principles. However, the nature, timing, and extent of audit work performed and the conclusions reached in both these areas are solely the responsibility of the successor auditor. In reporting on the audit, the successor auditor should not make reference to the report or work of the predecessor auditor as the basis, in part, for the successor auditor's own opinion.

Audits of Financial Statements That Have Been Previously Audited

.14 If an auditor is asked to audit and report on financial statements that have been previously audited and reported on (henceforth referred to as a reaudit), the auditor considering acceptance of the reaudit engagement is also a successor auditor, and the auditor who previously reported is also a predecessor auditor. In addition to the communications described in paragraphs .07 through .10, the successor auditor should state that the purpose of the inquiries is to obtain information about whether to accept an engagement to perform a reaudit.

.15 If the successor auditor accepts the reaudit engagement, he or she may consider the information obtained from inquiries of the predecessor auditor and review of the predecessor auditor's report and working papers in planning the reaudit. However, the information obtained from those inquiries and any review of the predecessor auditor's report and working papers is not sufficient to afford a basis for expressing an opinion. The nature, timing, and extent of the audit work performed and the conclusions reached in the reaudit are solely the responsibility of the successor auditor performing the reaudit.

.16 The successor auditor should plan and perform the reaudit in accordance with generally accepted auditing standards. The successor auditor should not assume responsibility for the predecessor auditor's work or issue a report that reflects divided responsibility as described in section 543, *Part of Audit Performed by Other Independent Auditors*. Furthermore, the predecessor auditor is not a specialist as defined in section 336, *Using the Work of a Specialist*, or an internal auditor as defined in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

.17 If the successor auditor has audited the current period, the results of that audit may be considered in planning and performing the reaudit of the

⁸ The successor auditor may wish to make inquiries about the professional reputation and standing of the predecessor auditor. See section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10a.

preceding period or periods and may provide audit evidence that is useful in performing the reaudit. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.18 If, in a reaudit engagement, the successor auditor is unable to obtain sufficient appropriate audit evidence to express an opinion on the financial statements, the successor auditor should qualify or disclaim an opinion because of the inability to perform procedures the successor auditor considers necessary in the circumstances. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.19 The successor auditor should request working papers for the period or periods under reaudit and the period prior to the reaudit period. However, the extent, if any, to which the predecessor auditor permits access to the working papers is a matter of judgment. (See paragraph .11 of this section.)

.20 In a reaudit, the successor auditor generally will be unable to observe inventory or make physical counts at the reaudit date or dates in the manner discussed in paragraphs .09 through .11 of section 331, *Inventories*. In such cases, the successor auditor may consider the knowledge obtained from his or her review of the predecessor auditor's working papers and inquiries of the predecessor auditor to determine the nature, timing, and extent of procedures to be applied in the circumstances. The successor auditor performing the reaudit should, if material, observe or perform some physical counts of inventory at a date subsequent to the period of the reaudit, in connection with a current audit or otherwise, and apply appropriate tests of intervening transactions. Appropriate procedures may include tests of prior transactions, reviews of records of prior counts, and the application of analytical procedures, such as gross profit tests.

Discovery of Possible Misstatements in Financial Statements Reported on by a Predecessor Auditor

.21 If during the audit or reaudit, the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should request that the client inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter. The successor auditor should communicate to the predecessor auditor any information that the predecessor auditor may need to consider in accordance with section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, which sets out the procedures that an auditor should follow when the auditor subsequently discovers facts that may have affected the audited financial statements previously reported on.⁹

.22 If the client refuses to inform the predecessor auditor or if the successor auditor is not satisfied with the resolution of the matter, the successor auditor should evaluate (a) possible implications on the current engagement and (b) whether to resign from the engagement. Furthermore, the successor auditor may wish to consult with his or her legal counsel in determining an appropriate course of further action.

Effective Date

.23 This section will be effective with respect to acceptance of an engagement after March 31, 1998. Earlier application is permitted.

⁹ See section 508, *Reports on Audited Financial Statements*, paragraphs .70 through .74, for reporting guidance.

.24

Appendix A

Illustrative Client Consent and Acknowledgment Letter

1. Paragraph .11 of this section states, "The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

ABC Enterprises

[Address]

You have given your consent to allow [*name of successor CPA firm*], as successor independent auditors for ABC Enterprises (ABC), access to our working papers for our audit of the December 31, 19X1, financial statements of ABC. You also have given your consent to us to respond fully to [*name of successor CPA firm*] inquiries. You understand and agree that the review of our working papers is undertaken solely for the purpose of obtaining an understanding about ABC and certain information about our audit to assist [*name of successor CPA firm*] in planning the audit of the December 31, 19X2, financial statements of ABC.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Attached is the form of the letter we will furnish [*name of successor CPA firm*] regarding the use of the working papers.

Very truly yours,

[Predecessor Auditor]

Appendix B

Illustrative Successor Auditor Acknowledgment Letter

1. Paragraph .11, footnote 7, of this section states, "Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

[Successor Auditor]

[Address]

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the December 31, 20X1, financial statements of ABC Enterprises (ABC). We rendered a report on those financial statements and have not performed any audit procedures subsequent to the audit report date. In connection with your audit of ABC's 20X2 financial statements, you have requested access to our working papers prepared in connection with that audit. ABC has authorized our firm to allow you to review those working papers.

Our audit, and the working papers prepared in connection therewith, of ABC's financial statements were not planned or conducted in contemplation of your review. Therefore, items of possible interest to you may not have been specifically addressed. Our use of professional judgment and the assessment of audit risk and materiality for the purpose of our audit mean that matters may have existed that would have been assessed differently by you. We make no representation as to the sufficiency or appropriateness of the information in our working papers for your purposes.

We understand that the purpose of your review is to obtain information about ABC and our 19X1 audit results to assist you in planning your 19X2 audit of ABC. For that purpose only, we will provide you access to our working papers that relate to that objective.

Upon request, we will provide copies of those working papers that provide factual information about ABC. You agree to subject any such copies or information otherwise derived from our working papers to your normal policy for retention of working papers and protection of confidential client information. Furthermore, in the event of a third-party request for access to your working papers prepared in connection with your audits of ABC, you agree to obtain our permission before voluntarily allowing any such access to our working papers or information otherwise derived from our working papers, and to obtain on our behalf any releases that you obtain from such third party. You agree to advise us promptly and provide us a copy of any subpoena, summons, or other court order for access to your working papers that include copies of our working papers or information otherwise derived therefrom.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Very truly yours,

[Predecessor Auditor]

Date: _____

Even with the client's consent, access to the predecessor auditor's working papers may still be limited. Experience has shown that the predecessor auditor may be willing to grant broader access if given additional assurance concerning the use of the working papers. Accordingly, the successor auditor might consider agreeing to the following limitations on the review of the predecessor auditor's working papers in order to obtain broader access:

- The successor auditor will not comment, orally or in writing, to anyone as a result of the review as to whether the predecessor auditor's engagement was performed in accordance with generally accepted auditing standards.
- The successor auditor will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of the predecessor auditor's audit.
- The successor auditor will not use the audit procedures or results thereof documented in the predecessor auditor's working papers as audit evidence in rendering an opinion on the 19X2 financial statements of ABC Enterprises, except as contemplated in Statement on Auditing Standards No. 84.

The following paragraph illustrates the above:

Because your review of our working papers is undertaken solely for the purpose described above and may not entail a review of all our working papers, you agree that (1) the information obtained from the review will not be used by you for any other purpose, (2) you will not comment, orally or in writing, to anyone as a result of that review as to whether our audit was performed in accordance with generally accepted auditing standards, (3) you will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of our audit, and (4) you will not use the audit procedures or results thereof documented in our working papers as audit evidence in rendering your opinion on the 19X2 financial statements of ABC, except as contemplated in Statement on Auditing Standards No. 84.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

AU Section 316

Consideration of Fraud in a Financial Statement Audit

(Supersedes SAS No. 82.)

Source: SAS No. 99; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after December 15, 2002, unless otherwise indicated.

Introduction and Overview

.01 Section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph .02, states, "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. [footnote omitted]"¹ This section establishes standards and provides guidance to auditors in fulfilling that responsibility, as it relates to fraud, in an audit of financial statements conducted in accordance with generally accepted auditing standards (GAAS).²

.02 The following is an overview of the organization and content of this section:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs .05 through .12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph .13.)
- *Discussion among engagement personnel regarding the risks of material misstatement due to fraud.* This section requires, as part of planning the audit, that there be a discussion among the audit team members to consider how and where the entity's financial statements might be susceptible to material misstatement due to fraud and to reinforce the importance of adopting an appropriate mindset of professional skepticism. (See paragraphs .14 through .18.)

¹ The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors (see section 312, *Audit Risk and Materiality in Conducting an Audit*, or fraud).

² Auditors are sometimes requested to perform other services related to fraud detection and prevention, for example, special investigations to determine the extent of a suspected or detected fraud. These other services usually include procedures that extend beyond or are different from the procedures ordinarily performed in an audit of financial statements in accordance with generally accepted auditing standards (GAAS). AT section 101, *Attest Engagements*, and CS section 100, *Consulting Services: Definitions and Standards*, provide guidance to accountants relating to the performance of such services.

- *Obtaining the information needed to identify risks of material misstatement due to fraud.* This section requires the auditor to gather information necessary to identify risks of material misstatement due to fraud, by
 - a. Inquiring of management and others within the entity about the risks of fraud. (See paragraphs .20 through .27.)
 - b. Considering the results of the analytical procedures performed in planning the audit. (See paragraphs .28 through .30.)
 - c. Considering fraud risk factors. (See paragraphs .31 through .33, and the Appendix, "Examples of Fraud Risk Factors" [paragraph .85].)
 - d. Considering certain other information. (See paragraph .34.)
- *Identifying risks that may result in a material misstatement due to fraud.* This section requires the auditor to use the information gathered to identify risks that may result in a material misstatement due to fraud. (See paragraphs .35 through .42.)
- *Assessing the identified risks after taking into account an evaluation of the entity's programs and controls.* This section requires the auditor to evaluate the entity's programs and controls that address the identified risks of material misstatement due to fraud, and to assess the risks taking into account this evaluation. (See paragraphs .43 through .45.)
- *Responding to the results of the assessment.* This section emphasizes that the auditor's response to the risks of material misstatement due to fraud involves the application of professional skepticism when gathering and evaluating audit evidence. (See paragraph .46 through .49.) The section requires the auditor to respond to the results of the risk assessment in three ways:
 - a. A response that has an overall effect on how the audit is conducted, that is, a response involving more general considerations apart from the specific procedures otherwise planned. (See paragraph .50.)
 - b. A response to identified risks that involves the nature, timing, and extent of the auditing procedures to be performed. (See paragraphs .51 through .56.)
 - c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls. (See paragraphs .57 through .67.)
- *Evaluating audit evidence.* This section requires the auditor to assess the risks of material misstatement due to fraud throughout the audit and to evaluate at the completion of the audit whether the accumulated results of auditing procedures and other observations affect the assessment. (See paragraphs .68 through .74.) It also requires the auditor to consider whether identified misstatements may be indicative of fraud and, if so, directs the auditor to evaluate their implications. (See paragraphs .75 through .78.)
- *Communicating about fraud to management, those charged with governance, and others.* This section provides guidance regarding the auditor's communications about fraud to management, those charged with governance, and others. (See paragraphs .79 through .82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph .83.)

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.03 The requirements and guidance set forth in this section are intended to be integrated into an overall audit process, in a logical manner that is consistent with the requirements and guidance provided in other sections, including section 311, *Planning and Supervision*; section 312, *Audit Risk and Materiality in Conducting an Audit*; section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 318 *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. Even though some requirements and guidance set forth in this section are presented in a manner that suggests a sequential audit process, auditing in fact involves a continuous process of gathering, updating, and analyzing information throughout the audit. Accordingly the sequence of the requirements and guidance in this section may be implemented differently among audit engagements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 109 and No. 110.]

.04 Although this section focuses on the auditor's consideration of fraud in an audit of financial statements, it is management's responsibility to design and implement programs and controls to prevent, deter, and detect fraud.³ That responsibility is described in section 110.03, which states, "Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, authorize, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements." Management, along with those charged with governance, should set the proper tone; create and maintain a culture of honesty and high ethical standards; and establish appropriate controls to prevent, deter, and detect fraud. When management and those charged with governance fulfill those responsibilities, the opportunities to commit fraud can be reduced significantly. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Description and Characteristics of Fraud

.05 Fraud is a broad legal concept and auditors do not make legal determinations of whether fraud has occurred. Rather, the auditor's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. For purposes of the section, *fraud* is an intentional act that results in a material misstatement in financial statements that are the subject of an audit.⁴

³ In its October 1987 report, the National Commission on Fraudulent Financial Reporting, also known as the Treadway Commission, noted, "The responsibility for reliable financial reporting resides first and foremost at the corporate level. Top management, starting with the chief executive officer, sets the tone and establishes the financial reporting environment. Therefore, reducing the risk of fraudulent financial reporting must start with the reporting company."

⁴ Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether the misstatement is intentional or not.

.06 Two types of misstatements are relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets.

- *Misstatements arising from fraudulent financial reporting* are intentional misstatements or omissions of amounts or disclosures in financial statements designed to deceive financial statement users where the effect causes the financial statements not to be presented, in all material respects, in conformity with generally accepted accounting principles (GAAP).⁵ Fraudulent financial reporting may be accomplished by the following:
 - Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
 - Misrepresentation in or intentional omission from the financial statements of events, transactions, or other significant information
 - Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Fraudulent financial reporting need not be the result of a grand plan or conspiracy. It may be that management representatives rationalize the appropriateness of a material misstatement, for example, as an aggressive rather than indefensible interpretation of complex accounting rules, or as a temporary misstatement of financial statements, including interim statements, expected to be corrected later when operational results improve.

- *Misstatements arising from misappropriation of assets* (sometimes referred to as theft or defalcation) involve the theft of an entity's assets where the effect of the theft causes the financial statements not to be presented, in all material respects, in conformity with GAAP. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services that have not been received. Misappropriation of assets may be accompanied by false or misleading records or documents, possibly created by circumventing controls. The scope of this section includes only those misappropriations of assets for which the effect of the misappropriation causes the financial statements not to be fairly presented, in all material respects, in conformity with GAAP.

.07 Three conditions generally are present when fraud occurs. First, management or other employees have an *incentive* or are under *pressure*, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an *opportunity* for a fraud to be perpetrated. Third, those involved are able to *rationalize* committing a fraudulent act. Some individuals possess an *attitude*, character, or set of ethical values that allow them to knowingly and intentionally commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them. The greater the incentive or pressure, the more likely an individual will be able to rationalize the acceptability of committing fraud.

⁵ Reference to generally accepted accounting principles (GAAP) includes, where applicable, a comprehensive basis of accounting other than GAAP as defined in section 623, *Special Reports*, paragraph .04.

.08 Management has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.⁶ Management can either direct employees to perpetrate fraud or solicit their help in carrying it out. In addition, management personnel at a component of the entity may be in a position to manipulate the accounting records of the component in a manner that causes a material misstatement in the consolidated financial statements of the entity. Management override of controls can occur in unpredictable ways.

.09 Typically, management and employees engaged in fraud will take steps to conceal the fraud from the auditors and others within and outside the organization. Fraud may be concealed by withholding evidence or misrepresenting information in response to inquiries or by falsifying documentation. For example, management that engages in fraudulent financial reporting might alter shipping documents. Employees or members of management who misappropriate cash might try to conceal their thefts by forging signatures or falsifying electronic approvals on disbursement authorizations. An audit conducted in accordance with GAAS rarely involves the authentication of such documentation, nor are auditors trained as or expected to be experts in such authentication. In addition, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed.

.10 Fraud also may be concealed through collusion among management, employees, or third parties. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. For example, through collusion, false evidence that controls have been operating effectively may be presented to the auditor, or consistent misleading explanations may be given to the auditor by more than one individual within the entity to explain an unexpected result of an analytical procedure. As another example, the auditor may receive a false confirmation from a third party that is in collusion with management.

.11 Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain conditions may suggest to the auditor the possibility that fraud may exist. For example, an important contract may be missing, a subsidiary ledger may not be satisfactorily reconciled to its control account, or the results of an analytical procedure performed during the audit may not be consistent with expectations. However, these conditions may be the result of circumstances other than fraud. Documents may legitimately have been lost or misfiled; the subsidiary ledger may be out of balance with its control account because of an unintentional accounting error; and unexpected analytical relationships may be the result of unanticipated changes in underlying economic factors. Even reports of alleged fraud may not always be reliable because an employee or outsider may be mistaken or may be motivated for unknown reasons to make a false allegation.

.12 As indicated in paragraph .01, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or

⁶ Frauds have been committed by management override of existing controls using such techniques as (a) recording fictitious journal entries, particularly those recorded close to the end of an accounting period to manipulate operating results, (b) intentionally biasing assumptions and judgments used to estimate account balances, and (c) altering records and terms related to significant and unusual transactions.

error.⁷ However, absolute assurance is not attainable and thus even a properly planned and performed audit may not detect a material misstatement resulting from fraud. A material misstatement may not be detected because of the nature of audit evidence or because the characteristics of fraud as discussed above may cause the auditor to rely unknowingly on audit evidence that appears to be valid, but is, in fact, false and fraudulent. Furthermore, audit procedures that are effective for detecting an error may be ineffective for detecting fraud.

The Importance of Exercising Professional Skepticism

.13 Due professional care requires the auditor to exercise professional skepticism. See section 230, *Due Professional Care in the Performance of Work*, paragraphs .07 through .09. Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. In exercising professional skepticism in gathering and evaluating evidence, the auditor should not be satisfied with less-than-persuasive evidence because of a belief that management is honest.

Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud

.14 Prior to or in conjunction with the information-gathering procedures described in paragraphs .19 through .34 of this section, members of the audit team should discuss the potential for material misstatement due to fraud. The discussion should include:

- An exchange of ideas or "brainstorming" among the audit team members, including the auditor with final responsibility for the audit, about how and where they believe the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. (See paragraph .15.)
- An emphasis on the importance of maintaining the proper state of mind throughout the audit regarding the potential for material misstatement due to fraud. (See paragraph .16.)

.15 The discussion among the audit team members about the susceptibility of the entity's financial statements to material misstatement due to fraud should include a consideration of the known external and internal factors affecting the entity that might (a) create incentives/pressures for management and others to commit fraud, (b) provide the opportunity for fraud to be perpetrated, and (c) indicate a culture or environment that enables management to rationalize committing fraud. The discussion should occur with an attitude that includes a questioning mind as described in paragraph .16 and, for this purpose,

⁷ For a further discussion of the concept of reasonable assurance, see section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13.

setting aside any prior beliefs the audit team members may have that management is honest and has integrity. In this regard, the discussion should include a consideration of the risk of management override of controls.⁸ Finally, the discussion should include how the auditor might respond to the susceptibility of the entity's financial statements to material misstatement due to fraud.

.16 The discussion among the audit team members should emphasize the need to maintain a questioning mind and to exercise professional skepticism in gathering and evaluating evidence throughout the audit, as described in paragraph .13. This should lead the audit team members to continually be alert for information or other conditions (such as those presented in paragraph .68) that indicate a material misstatement due to fraud may have occurred. It should also lead audit team members to thoroughly probe the issues, acquire additional evidence as necessary, and consult with other team members and, if appropriate, experts in the firm, rather than rationalize or dismiss information or other conditions that indicate a material misstatement due to fraud may have occurred.

.17 Although professional judgment should be used in determining which audit team members should be included in the discussion, the discussion ordinarily should involve the key members of the audit team. A number of factors will influence the extent of the discussion and how it should occur. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. Another factor to consider in planning the discussions is whether to include specialists assigned to the audit team. For example, if the auditor has determined that a professional possessing information technology skills is needed on the audit team (see section 311.31), it may be useful to include that individual in the discussion. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

.18 Communication among the audit team members about the risks of material misstatement due to fraud also should continue throughout the audit—for example, in evaluating the risks of material misstatement due to fraud at or near the completion of the field work. (See paragraph .74 and footnote 28.)

Obtaining the Information Needed to Identify the Risks of Material Misstatement Due to Fraud

.19 Section 314 provides guidance about how the auditor obtains an understanding of the entity and its environment, including its internal control. In performing that work, information may come to the auditor's attention that should be considered in identifying risks of material misstatement due to fraud. As part of this work, the auditor should perform the following procedures to obtain information that is used (as described in paragraphs .35 through .42) to identify the risks of material misstatement due to fraud:

- a. Make inquiries of management and others within the entity to obtain their views about the risks of fraud and how they are addressed. (See paragraphs .20 through .27.)
- b. Consider any unusual or unexpected relationships that have been identified in performing analytical procedures in planning the audit. (See paragraphs .28 through .30.)

⁸ See footnote 6.

- c. Consider whether one or more fraud risk factors exist. (See paragraphs .31 through .33, and the Appendix [paragraph .85].)
- d. Consider other information that may be helpful in the identification of risks of material misstatement due to fraud. (See paragraph .34.)

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

Making Inquiries of Management and Others Within the Entity About the Risks of Fraud

.20 The auditor should inquire of management about:⁹

- Whether management has knowledge of any fraud or suspected fraud affecting the entity
- Whether management is aware of allegations of fraud or suspected fraud affecting the entity, for example, received in communications from employees, former employees, analysts, regulators, short sellers, or others
- Management's understanding about the risks of fraud in the entity, including any specific fraud risks the entity has identified or account balances or classes of transactions for which a risk of fraud may be likely to exist
- Programs and controls¹⁰ the entity has established to mitigate specific fraud risks the entity has identified, or that otherwise help to prevent, deter, and detect fraud, and how management monitors those programs and controls. For examples of programs and controls an entity may implement to prevent, deter, and detect fraud, see the exhibit titled "Management Antifraud Programs and Controls" [paragraph .86] at the end of this section.
- For an entity with multiple locations, (a) the nature and extent of monitoring of operating locations or business segments, and (b) whether there are particular operating locations or business segments for which a risk of fraud may be more likely to exist
- Whether and how management communicates to employees its views on business practices and ethical behavior

.21 The inquiries of management also should include whether management has reported to those charged with governance^[11] on how the entity's internal control¹² serves to prevent, deter, or detect material misstatements due to fraud. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.22 The auditor also should inquire directly of those charged with governance (or the audit committee or at least its chair) regarding their views about

⁹ In addition to these inquiries, section 333, *Management Representations*, requires the auditor to obtain selected written representations from management regarding fraud.

¹⁰ Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, paragraph .41, defines internal control and its five interrelated components (the control environment, risk assessment, control activities, information and communication, and monitoring). Entity programs and controls intended to address the risks of fraud may be part of any of the five components discussed in section 314. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

^[11] [Footnote deleted due to conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

¹² See footnote 10.

the risks of fraud and whether those charged with governance have knowledge of any fraud or suspected fraud affecting the entity. An entity's audit committee sometimes assumes an active role in oversight of the entity's assessment of the risks of fraud and the programs and controls the entity has established to mitigate these risks. The auditor should obtain an understanding of how the audit committee exercises oversight activities in that area. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.23 For entities that have an internal audit function, the auditor also should inquire of appropriate internal audit personnel about their views about the risks of fraud, whether they have performed any procedures to identify or detect fraud during the year, whether management has satisfactorily responded to any findings resulting from these procedures, and whether the internal auditors have knowledge of any fraud or suspected fraud.

.24 In addition to the inquiries outlined in paragraphs .20 through .23, the auditor should inquire of others within the entity about the existence or suspicion of fraud. The auditor should use professional judgment to determine those others within the entity to whom inquiries should be directed and the extent of such inquiries. In making this determination, the auditor should consider whether others within the entity may be able to provide information that will be helpful to the auditor in identifying risks of material misstatement due to fraud—for example, others who may have additional knowledge about or be able to corroborate risks of fraud identified in the discussions with management (see paragraph .20) or those charged with governance (see paragraph .22). [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.25 Examples of others within the entity to whom the auditor may wish to direct these inquiries include:

- Employees with varying levels of authority within the entity, including, for example, entity personnel with whom the auditor comes into contact during the course of the audit in obtaining (a) an understanding of the entity's systems and internal control, (b) in observing inventory or performing cutoff procedures, or (c) in obtaining explanations for fluctuations noted as a result of analytical procedures
- Operating personnel not directly involved in the financial reporting process
- Employees involved in initiating, recording, or processing complex or unusual transactions—for example, a sales transaction with multiple elements, or a significant related party transaction
- In-house legal counsel

.26 The auditor's inquiries of management and others within the entity are important because fraud often is uncovered through information received in response to inquiries. One reason for this is that such inquiries may provide individuals with an opportunity to convey information to the auditor that otherwise might not be communicated. Making inquiries of others within the entity, in addition to management, may be useful in providing the auditor with a perspective that is different from that of individuals involved in the financial reporting process. The responses to these other inquiries might serve to corroborate responses received from management, or alternatively, might provide information regarding the possibility of management override of controls—for example, a response from an employee indicating an unusual change in the way transactions have been processed. In addition, the auditor may obtain information from these inquiries regarding how effectively management

has communicated standards of ethical behavior to individuals throughout the organization.

.27 The auditor should be aware when evaluating management's responses to the inquiries discussed in paragraph .20 that management is often in the best position to perpetrate fraud. The auditor should use professional judgment in deciding when it is necessary to corroborate responses to inquiries with other information. However, when responses are inconsistent among inquiries, the auditor should obtain additional audit evidence to resolve the inconsistencies.

Considering the Results of the Analytical Procedures Performed in Planning the Audit

.28 Section 329, *Analytical Procedures*, paragraphs .04 and .06, requires that analytical procedures be performed in planning the audit with an objective of identifying the existence of unusual transactions or events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning implications. In performing analytical procedures in planning the audit, the auditor develops expectations about plausible relationships that are reasonably expected to exist, based on the auditor's understanding of the entity and its environment. When comparison of those expectations with recorded amounts or ratios developed from recorded amounts yields unusual or unexpected relationships, the auditor should consider those results in identifying the risks of material misstatement due to fraud.

.29 In planning the audit, the auditor also should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that may indicate a material misstatement due to fraudulent financial reporting. An example of such an analytical procedure that addresses this objective is a comparison of sales volume, as determined from recorded revenue amounts, with production capacity. An excess of sales volume over production capacity may be indicative of recording fictitious sales. As another example, a trend analysis of revenues by month and sales returns by month during and shortly after the reporting period may indicate the existence of undisclosed side agreements with customers to return goods that would preclude revenue recognition.¹³

.30 Analytical procedures performed during planning may be helpful in identifying the risks of material misstatement due to fraud. However, because such analytical procedures generally use data aggregated at a high level, the results of those analytical procedures provide only a broad initial indication about whether a material misstatement of the financial statements may exist. Accordingly, the results of analytical procedures performed during planning should be considered along with other information gathered by the auditor in identifying the risks of material misstatement due to fraud.

Considering Fraud Risk Factors

.31 Because fraud is usually concealed, material misstatements due to fraud are difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate incentives/pressures to perpetrate fraud, opportunities to carry out the fraud, or attitudes/rationalizations to justify a fraudulent action. Such events or conditions are referred to as "fraud risk factors." Fraud risk factors do not necessarily indicate the existence of fraud; however, they often are present in circumstances where fraud exists.

¹³ See paragraph .70 for a discussion of the need to update these analytical procedures during the overall review stage of the audit.

.32 When obtaining information about the entity and its environment, the auditor should consider whether the information indicates that one or more fraud risk factors are present. The auditor should use professional judgment in determining whether a risk factor is present and should be considered in identifying and assessing the risks of material misstatement due to fraud.

.33 Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in the Appendix [paragraph .85]. These illustrative risk factors are classified based on the three conditions generally present when fraud exists: *incentive/pressure* to perpetrate fraud, an *opportunity* to carry out the fraud, and *attitude/rationalization* to justify the fraudulent action. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Considering Other Information That May Be Helpful in Identifying Risks of Material Misstatement Due to Fraud

.34 The auditor should consider other information that may be helpful in identifying risks of material misstatement due to fraud. Specifically, the discussion among the engagement team members (see paragraphs .14 through .18) may provide information helpful in identifying such risks. In addition, the auditor should consider whether information from the results of (a) procedures relating to the acceptance and continuance of clients and engagements¹⁴ and (b) reviews of interim financial statements may be relevant in the identification of such risks. Finally, as part of the consideration of audit risk at the individual account balance or class of transaction level (see section 312.17 through .26), the auditor should consider whether identified inherent risks would provide useful information in identifying the risks of material misstatement due to fraud (see paragraph .39). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

Identifying Risks That May Result in a Material Misstatement Due to Fraud¹⁵

Using the Information Gathered to Identify Risk of Material Misstatements Due to Fraud

.35 In identifying risks of material misstatement due to fraud, it is helpful for the auditor to consider the information that has been gathered (see paragraphs .19 through .34) in the context of the three conditions present when a material misstatement due to fraud occurs—that is, incentives/pressures,

¹⁴ See paragraphs .27–.36 of QC section 10A, *A Firm's System of Quality Control*. [Footnote amended due to issuance of SQCS No. 7, December 2008.]

¹⁵ Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to identify and assess the risk of material misstatement at the financial statement level and at the relevant assertion level related to classes of transactions, account balances and disclosures. See section 314.102. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

opportunities, and attitudes/rationalizations (see paragraph .07). However, the auditor should not assume that all three conditions must be observed or evident before concluding that there are identified risks. Although the risk of material misstatement due to fraud may be greatest when all three fraud conditions are observed or evident, the auditor cannot assume that the inability to observe one or two of these conditions means there is no risk of material misstatement due to fraud. In fact, observing that individuals have the requisite attitude to commit fraud, or identifying factors that indicate a likelihood that management or other employees will rationalize committing a fraud, is difficult at best.

.36 In addition, the extent to which each of the three conditions referred to above are present when fraud occurs may vary. In some instances the significance of incentives/pressures may result in a risk of material misstatement due to fraud, apart from the significance of the other two conditions. For example, an incentive/pressure to achieve an earnings level to preclude a loan default, or to "trigger" incentive compensation plan awards, may alone result in a risk of material misstatement due to fraud. In other instances, an easy opportunity to commit the fraud because of a lack of controls may be the dominant condition precipitating the risk of fraud, or an individual's attitude or ability to rationalize unethical actions may be sufficient to motivate that individual to engage in fraud, even in the absence of significant incentives/pressures or opportunities.

.37 The auditor's identification of fraud risks also may be influenced by characteristics such as the size, complexity, and ownership attributes of the entity. For example, in the case of a larger entity, the auditor ordinarily considers factors that generally constrain improper conduct by management, such as the effectiveness of the audit committee and the internal audit function, and the existence and enforcement of a formal code of conduct. In the case of a smaller entity, some or all of these considerations may be inapplicable or less important, and management may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and management by example. Also, the risks of material misstatement due to fraud may vary among operating locations or business segments of an entity, requiring an identification of the risks related to specific geographic areas or business segments, as well as for the entity as a whole.¹⁶

.38 The auditor should evaluate whether identified risks of material misstatement due to fraud can be related to specific financial-statement account balances or classes of transactions and related assertions, or whether they relate more pervasively to the financial statements as a whole. Relating the risks of material misstatement due to fraud to the individual accounts, classes of transactions, and assertions will assist the auditor in subsequently designing appropriate auditing procedures.

.39 Certain accounts, classes of transactions, and assertions that have high inherent risk because they involve a high degree of management judgment and subjectivity also may present risks of material misstatement due to fraud because they are susceptible to manipulation by management. For example, liabilities resulting from a restructuring may be deemed to have high inherent risk because of the high degree of subjectivity and management judgment involved in their estimation. Similarly, revenues for software developers may be deemed to have high inherent risk because of the complex accounting principles

¹⁶ Section 312.16 provides guidance on the auditor's consideration of the extent to which auditing procedures should be performed at selected locations or components. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

applicable to the recognition and measurement of software revenue transactions. Assets resulting from investing activities may be deemed to have high inherent risk because of the subjectivity and management judgment involved in estimating fair values of those investments.

.40 In summary, the identification of a risk of material misstatement due to fraud involves the application of professional judgment and includes the consideration of the attributes of the risk, including:

- The *type* of risk that may exist, that is, whether it involves fraudulent financial reporting or misappropriation of assets
- The *significance* of the risk, that is, whether it is of a magnitude that could lead to result in a possible material misstatement of the financial statements
- The *likelihood* of the risk, that is, the likelihood that it will result in a material misstatement in the financial statements¹⁷
- The *pervasiveness* of the risk, that is, whether the potential risk is pervasive to the financial statements as a whole or specifically related to a particular assertion, account, or class of transactions.

A Presumption That Improper Revenue Recognition Is a Fraud Risk

.41 Material misstatements due to fraudulent financial reporting often result from an overstatement of revenues (for example, through premature revenue recognition or recording fictitious revenues) or an understatement of revenues (for example, through improperly shifting revenues to a later period). Therefore, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition. (See paragraph .54 for examples of auditing procedures related to the risk of improper revenue recognition.)¹⁸

A Consideration of the Risk of Management Override of Controls

.42 Even if specific risks of material misstatement due to fraud are not identified by the auditor, there is a possibility that management override of controls could occur, and accordingly, the auditor should address that risk (see paragraph .57) apart from any conclusions regarding the existence of more specifically identifiable risks.

Assessing the Identified Risks After Taking Into Account an Evaluation of the Entity's Programs and Controls That Address the Risks

.43 Section 314 requires the auditor to obtain an understanding of each of the five components of internal control sufficient to plan the audit. It also notes

¹⁷ The occurrence of material misstatements of financial statements due to fraud is relatively infrequent in relation to the total population of published financial statements. However, the auditor should not use this as a basis to conclude that one or more risks of a material misstatement due to fraud are not present in a particular entity. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

¹⁸ For a discussion of indicators of improper revenue recognition and common techniques for overstating revenue and illustrative audit procedures, see the AICPA Audit Guide *Auditing Revenue in Certain Industries*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

that such knowledge should be used to identify types of potential misstatements, consider factors that affect the risk of material misstatement, design tests of controls when applicable, and design substantive tests. Additionally, section 314 notes that controls, whether manual or automated, can be circumvented by collusion of two or more people or inappropriate management override of internal control. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.44 As part of the understanding of internal control sufficient to plan the audit, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation.¹⁹ These programs and controls may involve (a) specific controls designed to mitigate specific risks of fraud—for example, controls to address specific assets susceptible to misappropriation, and (b) broader programs designed to prevent, deter, and detect fraud—for example, programs to promote a culture of honesty and ethical behavior. The auditor should consider whether such programs and controls mitigate the identified risks of material misstatement due to fraud or whether specific control deficiencies may exacerbate the risks (see paragraph .80). The exhibit at the end of this section [paragraph .88] discusses examples of programs and controls an entity might implement to create a culture of honesty and ethical behavior, and that help to prevent, deter, and detect fraud.

.45 After the auditor has evaluated whether the entity's programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation, the auditor should assess these risks taking into account that evaluation. This assessment should be considered when developing the auditor's response to the identified risks of material misstatement due to fraud (see paragraphs .46 through .67).²⁰

Responding to the Results of the Assessment²¹

.46 The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence. As noted in paragraph .13, professional skepticism is an attitude that includes a critical assessment of the competency and sufficiency of audit evidence. Examples of the application of professional skepticism in response to the risks of material misstatement due to fraud are (a) designing additional or different auditing procedures to obtain more reliable evidence in support of specified financial statement account balances, classes of transactions, and related assertions, and (b) obtaining additional corroboration of management's explanations or representations concerning material matters, such as through third-party confirmation, the use of a specialist, analytical procedures, examination of documentation from independent sources, or inquiries of others within or outside the entity.

¹⁹ See footnote 10. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

²⁰ Notwithstanding that the auditor assesses identified risks of material misstatement due to fraud, the assessment need not encompass an overall judgment about whether risk for the entity is classified as *high*, *medium*, or *low* because such a judgment is too broad to be useful in developing the auditor's response described in paragraphs .46 through .67. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

²¹ Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, requires the auditor to determine overall responses and design and perform further audit procedures to respond to the assessed risks of material misstatement at the financial statement and relevant assertion levels in a financial statement audit. See paragraphs .04 and .07 of section 318. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.47 The auditor's response to the assessment of the risks of material misstatement of the financial statements due to fraud is influenced by the nature and significance of the risks identified as being present (paragraphs .35 through .42) and the entity's programs and controls that address these identified risks (paragraphs .43 through .45).

.48 The auditor responds to risks of material misstatement due to fraud in the following three ways:

- a. A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned (see paragraph .50).
- b. A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed (see paragraphs .51 through .56).
- c. A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which such override could occur (see paragraphs .57 through .67).

.49 The auditor may conclude that it would not be practicable to design auditing procedures that sufficiently address the risks of material misstatement due to fraud. In that case, withdrawal from the engagement with communication to the appropriate parties may be an appropriate course of action (see paragraph .78).

Overall Responses to the Risk of Material Misstatement

.50 Judgments about the risk of material misstatement due to fraud have an overall effect on how the audit is conducted in the following ways:

- *Assignment of personnel and supervision.* The knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement (see section 210, *Training and Proficiency of the Independent Auditor*, paragraph .03). For example, the auditor may respond to an identified risk of material misstatement due to fraud by assigning additional persons with specialized skill and knowledge, such as forensic and information technology (IT) specialists, or by assigning more experienced personnel to the engagement. In addition, the extent of supervision should reflect the risks of material misstatement due to fraud (see section 311.28).
- *Accounting principles.* The auditor should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions. In this respect, the auditor may have a greater concern about whether the accounting principles selected and policies adopted are being applied in an inappropriate manner to create a material misstatement of the financial statements. In developing judgments about the quality of such principles (see section 380, *The Auditor's Communication With Those Charged With Governance*, paragraph .11), the auditor should consider whether their collective application indicates a bias that may create such a material misstatement of the financial statements.
- *Predictability of auditing procedures.* The auditor should incorporate an element of unpredictability in the selection from year to

year of auditing procedures to be performed—for example, performing substantive tests of selected account balances and assertions not otherwise tested due to their materiality or risk, adjusting the timing of testing from that otherwise expected, using differing sampling methods, and performing procedures at different locations or at locations on an unannounced basis.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed to Address the Identified Risks

.51 The auditing procedures performed in response to identified risks of material misstatement due to fraud will vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected. These procedures may involve both substantive tests and tests of the operating effectiveness of the entity's programs and controls. However, because management may have the ability to override controls that otherwise appear to be operating effectively (see paragraph .08), it is unlikely that audit risk can be reduced to an appropriately low level by performing only tests of controls.

.52 The auditor's responses to address specifically identified risks of material misstatement due to fraud may include changing the nature, timing, and extent of auditing procedures in the following ways:

- The *nature* of auditing procedures performed may need to be changed to obtain evidence that is more reliable or to obtain additional corroborative information. For example, more audit evidence may be needed from independent sources outside the entity, such as public-record information about the existence and nature of key customers, vendors, or counterparties in a major transaction. Also, physical observation or inspection of certain assets may become more important (see section 326, *Audit Evidence*, paragraphs .06 through .13). Furthermore, the auditor may choose to employ computer-assisted audit techniques to gather more extensive evidence about data contained in significant accounts or electronic transaction files. Finally, inquiry of additional members of management or others may be helpful in identifying issues and corroborating other audit evidence (see paragraphs .24 through .26 and paragraph .53).
- The *timing* of substantive tests may need to be modified. The auditor might conclude that substantive testing should be performed at or near the end of the reporting period to best address an identified risk of material misstatement due to fraud (see section 318, *Performing Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*). That is, the auditor might conclude that, given the risks of intentional misstatement or manipulation, tests to extend audit conclusions from an interim date to the period-end reporting date would not be effective.

In contrast, because an intentional misstatement—for example, a misstatement involving inappropriate revenue recognition—may have been initiated in an interim period, the auditor might elect to apply

substantive tests to transactions occurring earlier in or throughout the reporting period.

- The *extent* of the procedures applied should reflect the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing analytical procedures at a more detailed level may be appropriate (see section 350, *Audit Sampling*, paragraph .22, and section 329). Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105, No. 106, No. 110 and No. 111.]

.53 The following are examples of modification of the nature, timing, and extent of tests in response to identified risks of material misstatements due to fraud.

- Performing procedures at locations on a surprise or unannounced basis, for example, observing inventory on unexpected dates or at unexpected locations or counting cash on a surprise basis.
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Making oral inquiries of major customers and suppliers in addition to sending written confirmations, or sending confirmation requests to a specific party within an organization.
- Performing substantive analytical procedures using disaggregated data, for example, comparing gross profit or operating margins by location, line of business, or month to auditor-developed expectations.²²
- Interviewing personnel involved in activities in areas where a risk of material misstatement due to fraud has been identified to obtain their insights about the risk and how controls address the risk (also see paragraph .24).
- If other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches, discussing with them the extent of work that needs to be performed to address the risk of material misstatement due to fraud resulting from transactions and activities among these components.

Additional Examples of Responses to Identified Risks of Misstatements Arising From Fraudulent Financial Reporting

.54 The following are additional examples of responses to identified risks of material misstatements relating to fraudulent financial reporting:

- *Revenue recognition.* Because revenue recognition is dependent on the particular facts and circumstances, as well as accounting principles

²² Section 329, *Analytical Procedures*, provides guidance on performing analytical procedures as substantive tests. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

and practices that can vary by industry, the auditor ordinarily will develop auditing procedures based on the auditor's understanding of the entity and its environment, including the composition of revenues, specific attributes of the revenue transactions, and unique industry considerations. If there is an identified risk of material misstatement due to fraud that involves improper revenue recognition, the auditor also may want to consider:

- Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
 - Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements.²³ For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
 - Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.
 - Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures.
 - For those situations for which revenue transactions are electronically initiated, authorized, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.
- *Inventory quantities.* If there is an identified risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis (see paragraph .53) or to conduct inventory counts at all locations on the same date. In addition, it may be appropriate for inventory counts to be conducted at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.

It also may be appropriate for the auditor to perform additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances

²³ Section 330, *The Confirmation Process*, provides guidance about the confirmation process in audits performed in accordance with GAAS. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

such as perfumes or specialty chemicals. Using the work of a specialist may be helpful in this regard.²⁴ Furthermore, additional testing of count sheets, tags, or other records, or the retention of copies of these records, may be warranted to minimize the risk of subsequent alteration or inappropriate compilation.

Following the physical inventory count, the auditor may want to employ additional procedures directed at the quantities included in the priced out inventories to further test the reasonableness of the quantities counted—for example, comparison of quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records. The auditor also may consider using computer-assisted audit techniques to further test the compilation of the physical inventory counts—for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

- *Management estimates.* The auditor may identify a risk of material misstatement due to fraud involving the development of management estimates. This risk may affect a number of accounts and assertions, including asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of a segment of the business), and other significant accrued liabilities (such as pension and other postretirement benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. As indicated in section 342, *Auditing Accounting Estimates*, estimates are based on subjective as well as objective factors and there is a potential for bias in the subjective factors, even when management's estimation process involves competent personnel using relevant and reliable data.

In addressing an identified risk of material misstatement due to fraud involving accounting estimates, the auditor may want to supplement the audit evidence otherwise obtained (see section 342.09 through .14). In certain circumstances (for example, evaluating the reasonableness of management's estimate of the fair value of a derivative), it may be appropriate to engage a specialist or develop an independent estimate for comparison to management's estimate. Information gathered about the entity and its environment may help the auditor evaluate the reasonableness of such management estimates and underlying judgments and assumptions.

A retrospective review of similar management judgments and assumptions applied in prior periods (see paragraphs .63 through .65) may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

²⁴ Section 336, *Using the Work of a Specialist*, provides guidance to an auditor who uses the work of a specialist in performing an audit in accordance with GAAS. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

Examples of Responses to Identified Risks of Misstatements Arising From Misappropriations of Assets

.55 The auditor may have identified a risk of material misstatement due to fraud relating to misappropriation of assets. For example, the auditor may conclude that the risk of asset misappropriation at a particular operating location is significant because a large amount of easily accessible cash is maintained at that location, or there are inventory items such as laptop computers at that location that can easily be moved and sold.

.56 The auditor's response to a risk of material misstatement due to fraud relating to misappropriation of assets usually will be directed toward certain account balances. Although some of the audit responses noted in paragraphs .52 through .54 may apply in such circumstances, such as the procedures directed at inventory quantities, the scope of the work should be linked to the specific information about the misappropriation risk that has been identified. For example, if a particular asset is highly susceptible to misappropriation and a potential misstatement would be material to the financial statements, obtaining an understanding of the controls related to the prevention and detection of such misappropriation and testing the operating effectiveness of such controls may be warranted. In certain circumstances, physical inspection of such assets (for example, counting cash or securities) at or near the end of the reporting period may be appropriate. In addition, the use of substantive analytical procedures, such as the development by the auditor of an expected dollar amount at a high level of precision, to be compared with a recorded amount, may be effective in certain circumstances.

Responses to Further Address the Risk of Management Override of Controls

.57 As noted in paragraph .08, management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. By its nature, management override of controls can occur in unpredictable ways. Accordingly, in addition to overall responses (paragraph .50) and responses that address specifically identified risks of material misstatement due to fraud (see paragraphs .51 through .56), the procedures described in paragraphs .58 through .67 should be performed to further address the risk of management override of controls.

.58 *Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.* Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (a) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (b) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications. Accordingly, the auditor should design procedures to test the appropriateness of journal entries recorded in the general ledger and other adjustments (for example, entries posted directly to financial statement drafts) made in the preparation of the financial statements. More specifically, the auditor should:

- a. Obtain an understanding of the entity's financial reporting process²⁵ and the controls over journal entries and other adjustments. (See paragraphs .59 and .60.)
- b. Identify and select journal entries and other adjustments for testing. (See paragraph .61.)
- c. Determine the timing of the testing. (See paragraph .62.)
- d. Inquire of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments.

.59 The auditor's understanding of the entity's financial reporting process may help in identifying the type, number, and monetary value of journal entries and other adjustments that typically are made in preparing the financial statements. For example, the auditor's understanding may include the sources of significant debits and credits to an account, who can initiate entries to the general ledger or transaction processing systems, what approvals are required for such entries, and how journal entries are recorded (for example, entries may be initiated and recorded online with no physical evidence, or may be created in paper form and entered in batch mode).

.60 An entity may have implemented specific controls over journal entries and other adjustments. For example, an entity may use journal entries that are preformatted with account numbers and specific user approval criteria, and may have automated controls to generate an exception report for any entries that were unsuccessfully proposed for recording or entries that were recorded and processed outside of established parameters. The auditor should obtain an understanding of the design of such controls over journal entries and other adjustments and determine whether they are suitably designed and have been placed in operation.

.61 The auditor should use professional judgment in determining the nature, timing, and extent of the testing of journal entries and other adjustments. For purposes of identifying and selecting specific entries and other adjustments for testing, and determining the appropriate method of examining the underlying support for the items selected, the auditor should consider:

- *The auditor's assessment of the risk of material misstatement due to fraud.* The presence of fraud risk factors or other conditions may help the auditor to identify specific classes of journal entries for testing and indicate the extent of testing necessary.
- *The effectiveness of controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and adjustments may affect the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of those controls. However, even though controls might be implemented and operating effectively, the auditor's

²⁵ Section 314 requires the auditor to obtain an understanding of the automated and manual procedures an entity uses to prepare financial statements and related disclosures, and how misstatements may occur. This understanding includes (a) the procedures used to enter transaction totals into the general ledger; (b) the procedures used to initiate, record, and process journal entries in the general ledger; and (c) other procedures used to record recurring and nonrecurring adjustments to the financial statements. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

procedures for testing journal entries and other adjustments should include the identification and testing of specific items.

- *The entity's financial reporting process and the nature of the evidence that can be examined.* The auditor's procedures for testing journal entries and other adjustments will vary based on the nature of the financial reporting process. For many entities, routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments might involve both manual and automated procedures and controls. Regardless of the method, the auditor's procedures should include selecting from the general ledger journal entries to be tested and examining support for those items. In addition, the auditor should be aware that journal entries and other adjustments might exist in either electronic or paper form. When information technology (IT) is used in the financial reporting process, journal entries and other adjustments might exist only in electronic form. Electronic evidence often requires extraction of the desired data by an auditor with IT knowledge and skills or the use of an IT specialist. In an IT environment, it may be necessary for the auditor to employ computer-assisted audit techniques (for example, report writers, software or data extraction tools, or other systems-based techniques) to identify the journal entries and other adjustments to be tested.
- *The characteristics of fraudulent entries or adjustments.* Inappropriate journal entries and other adjustments often have certain unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used accounts, (b) made by individuals who typically do not make journal entries, (c) recorded at the end of the period or as post-closing entries that have little or no explanation or description, (d) made either before or during the preparation of the financial statements that do not have account numbers, or (e) containing round numbers or a consistent ending number.
- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to errors in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain intercompany transactions, or (f) are otherwise associated with an identified risk of material misstatement due to fraud. The auditor should recognize, however, that inappropriate journal entries and adjustments also might be made to other accounts. In audits of entities that have several locations or components, the auditor should consider the need to select journal entries from locations based on the factors set forth in section 312.16.
- *Journal entries or other adjustments processed outside the normal course of business.* Standard journal entries used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record recurring periodic accounting estimates generally are subject to the entity's internal controls. Nonstandard entries (for example, entries used to record nonrecurring transactions, such as a business combination, or entries used to record a nonrecurring estimate, such as an asset impairment) might not be subject to the same level of internal control. In addition, other adjustments such as consolidating adjustments, report combinations, and reclassifications generally are not reflected in formal journal entries and might not be

subject to the entity's internal controls. Accordingly, the auditor should consider placing additional emphasis on identifying and testing items processed outside of the normal course of business.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

.62 Because fraudulent journal entries often are made at the end of a reporting period, the auditor's testing ordinarily should focus on the journal entries and other adjustments made at that time. However, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how it is accomplished, the auditor should consider whether there also is a need to test journal entries throughout the period under audit.

.63 *Reviewing accounting estimates for biases that could result in material misstatement due to fraud.* In preparing financial statements, management is responsible for making a number of judgments or assumptions that affect significant accounting estimates²⁶ and for monitoring the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates. As discussed in section 312.58, the auditor should consider whether differences between estimates best supported by the audit evidence and the estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management, in which case the auditor should reconsider the estimates taken as a whole. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

.64 The auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management. The significant accounting estimates selected for testing should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current-year estimates. This review, however, is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

.65 If the auditor identifies a possible bias on the part of management in making accounting estimates, the auditor should evaluate whether circumstances producing such a bias represent a risk of a material misstatement due to fraud. For example, information coming to the auditor's attention may indicate a risk that adjustments to the current-year estimates might be recorded at the instruction of management to arbitrarily achieve a specified earnings target.

.66 *Evaluating the business rationale for significant unusual transactions.* During the course of the audit, the auditor may become aware of significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment. The auditor should gain an understanding

²⁶ See section 342, *Auditing Accounting Estimates*, paragraphs .02 and .16, for a definition of accounting estimates and a listing of examples. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

of the business rationale for such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.

.67 In understanding the business rationale for the transactions, the auditor should consider:

- Whether the form of such transactions is overly complex (for example, involves multiple entities within a consolidated group or unrelated third parties).
- Whether management has discussed the nature of and accounting for such transactions with those charged with governance.
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by those charged with governance.
- Whether the transactions involve previously unidentified related parties²⁷ or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Evaluating Audit Evidence

.68 *Assessing risks of material misstatement due to fraud throughout the audit.* The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit. Conditions may be identified during fieldwork that change or support a judgment regarding the assessment of the risks, such as the following:

- Discrepancies in the accounting records, including:
 - Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or entity policy
 - Unsupported or unauthorized balances or transactions
 - Last-minute adjustments that significantly affect financial results
 - Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties
 - Tips or complaints to the auditor about alleged fraud
- Conflicting or missing audit evidence, including:
 - Missing documents
 - Documents that appear to have been altered²⁸

²⁷ Section 334, *Related Parties*, provides guidance with respect to the identification of related-party relationships and transactions, including transactions that may be outside the ordinary course of business (see, in particular, section 334.06). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

²⁸ As discussed in paragraph .09, auditors are not trained as or expected to be experts in the authentication of documents; however, if the auditor believes that documents may not be authentic, he or she should investigate further and consider using the work of a specialist to determine the authenticity. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist
- Significant unexplained items on reconciliations
- Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures (See paragraph .72.)
- Unusual discrepancies between the entity's records and confirmation replies
- Missing inventory or physical assets of significant magnitude
- Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies
- Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments
- Problematic or unusual relationships between the auditor and management, including:
 - Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought²⁹
 - Undue time pressures imposed by management to resolve complex or contentious issues
 - Complaints by management about the conduct of the audit or management intimidation of audit team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management
 - Unusual delays by the entity in providing requested information
 - Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques
 - Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel
 - An unwillingness to add or revise disclosures in the financial statements to make them more complete and transparent

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.69 *Evaluating whether analytical procedures performed as substantive tests or in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement due to fraud.* As discussed in paragraphs .28 through .30, the auditor should consider whether analytical procedures performed in planning the audit result in identifying any unusual or unexpected relationships that should be considered in assessing the risks of material misstatement due to fraud. The auditor also should evaluate whether analytical procedures that were performed as substantive tests or in the overall review stage of the audit (see section 329) indicate a previously unrecognized risk of material misstatement due to fraud.

²⁹ Denial of access to information may constitute a limitation on the scope of the audit that may require the auditor to consider qualifying or disclaiming an opinion on the financial statements. (See section 508, *Reports on Audited Financial Statements*, paragraph .24.) [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

.70 If not already performed during the overall review stage of the audit, the auditor should perform analytical procedures relating to revenue, as discussed in paragraph .29, through the end of the reporting period.

.71 Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income often are particularly relevant. These might include, for example, (a) uncharacteristically large amounts of income being reported in the last week or two of the reporting period from unusual transactions, as well as (b) income that is inconsistent with trends in cash flow from operations.

.72 Some unusual or unexpected analytical relationships may have been identified and may indicate a risk of material misstatement due to fraud because management or employees generally are unable to manipulate certain information to create seemingly normal or expected relationships. Some examples are as follows:

- The relationship of net income to cash flows from operations may appear unusual because management recorded fictitious revenues and receivables but was unable to manipulate cash.
- Changes in inventory, accounts payable, sales, or cost of sales from the prior period to the current period may be inconsistent, indicating a possible employee theft of inventory, because the employee was unable to manipulate all of the related accounts.
- A comparison of the entity's profitability to industry trends, which management cannot manipulate, may indicate trends or differences for further consideration when identifying risks of material misstatement due to fraud.
- A comparison of bad debt write-offs to comparable industry data, which employees cannot manipulate, may provide unexplained relationships that could indicate a possible theft of cash receipts.
- An unexpected or unexplained relationship between sales volume as determined from the accounting records and production statistics maintained by operations personnel—which may be more difficult for management to manipulate—may indicate a possible misstatement of sales.

.73 The auditor also should consider whether responses to inquiries throughout the audit about analytical relationships have been vague or implausible, or have produced evidence that is inconsistent with other audit evidence accumulated during the audit. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.74 *Evaluating the risks of material misstatement due to fraud at or near the date of the auditor's report.* At or near the completion of fieldwork, the auditor should evaluate whether the accumulated results of auditing procedures and other observations (for example, conditions and analytical relationships noted in paragraphs .69 through .73) affect the assessment of the risks of material misstatement due to fraud made earlier in the audit. This evaluation primarily is a qualitative matter based on the auditor's judgment. Such an evaluation may provide further insight about the risks of material misstatement due to fraud and whether there is a need to perform additional or different audit procedures. As part of this evaluation, the auditor with final responsibility for the audit should ascertain that there has been appropriate

communication with the other audit team members throughout the audit regarding information or conditions indicative of risks of material misstatement due to fraud.³⁰

.75 Responding to misstatements that may be the result of fraud.

When audit test results identify misstatements in the financial statements, the auditor should consider whether such misstatements may be indicative of fraud.³¹ That determination affects the auditor's evaluation of materiality and the related responses necessary as a result of that evaluation.³²

.76 If the auditor believes that misstatements are or may be the result of fraud, but the effect of the misstatements is not material to the financial statements, the auditor nevertheless should evaluate the implications, especially those dealing with the organizational position of the person(s) involved. For example, fraud involving misappropriations of cash from a small petty cash fund normally would be of little significance to the auditor in assessing the risk of material misstatement due to fraud because both the manner of operating the fund and its size would tend to establish a limit on the amount of potential loss, and the custodianship of such funds normally is entrusted to a nonmanagement employee.³³ Conversely, if the matter involves higher-level management, even though the amount itself is not material to the financial statements, it may be indicative of a more pervasive problem, for example, implications about the integrity of management.³⁴ In such circumstances, the auditor should reevaluate the assessment of the risk of material misstatement due to fraud and its resulting impact on (a) the nature, timing, and extent of the tests of balances or transactions and (b) the assessment of the effectiveness of controls if control risk was assessed below the maximum.

.77 If the auditor believes that the misstatement is or may be the result of fraud, and either has determined that the effect could be material to the financial statements or has been unable to evaluate whether the effect is material, the auditor should:

- a. Attempt to obtain additional audit evidence to determine whether material fraud has occurred or is likely to have occurred, and, if so, its effect on the financial statements and the auditor's report thereon.³⁵

³⁰ To accomplish this communication, the auditor with final responsibility for the audit may want to arrange another discussion among audit team members about the risks of material misstatement due to fraud (see paragraphs .14 through .18). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³¹ See footnote 4. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³² Section 312.60 states in part, "Qualitative considerations also influence the auditor in reaching a conclusion as to whether misstatements are material." Section 312.59 states, "As a result of the interaction of quantitative and qualitative considerations in materiality judgments, misstatements of relatively small amounts that come to the auditor's attention could have a material effect on the financial statements." [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³³ However, see paragraphs .79 through .82 of this section for a discussion of the auditor's communication responsibilities. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³⁴ Section 312.10 states that there is a distinction between the auditor's response to detected misstatements due to error and those due to fraud. When fraud is detected, the auditor should consider the implications for the integrity of management or employees and the possible effect on other aspects of the audit. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³⁵ See section 508 for guidance on auditors' reports issued in connection with audits of financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- b. Consider the implications for other aspects of the audit (see paragraph .76).
- c. Discuss the matter and the approach for further investigation with an appropriate level of management that is at least one level above those involved, and with senior management and those charged with governance.³⁶
- d. If appropriate, suggest that the client consult with legal counsel.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.78 The auditor's consideration of the risks of material misstatement and the results of audit tests may indicate such a significant risk of material misstatement due to fraud that the auditor should consider withdrawing from the engagement and communicating the reasons for withdrawal to those charged with governance.^[37] Whether the auditor concludes that withdrawal from the engagement is appropriate may depend on (a) the implications about the integrity of management and (b) the diligence and cooperation of management or the board of directors in investigating the circumstances and taking appropriate action. Because of the variety of circumstances that may arise, it is not possible to definitively describe when withdrawal is appropriate.³⁸ The auditor may wish to consult with legal counsel when considering withdrawal from an engagement. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Communicating About Possible Fraud to Management, Those Charged With Governance, and Others³⁹

.79 Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. This is appropriate even if the matter might be considered inconsequential, such as a minor defalcation by an employee at a low level in the entity's organization. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes

³⁶ If the auditor believes senior management may be involved, discussion of the matter directly with those charged with governance may be appropriate. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006. Footnote revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

^[37] [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006. Footnote deleted due to conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

³⁸ If the auditor, subsequent to the date of the report on the audited financial statements, becomes aware that facts existed at that date that might have affected the report had the auditor been aware of such facts, the auditor should refer to section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, for guidance. Furthermore, section 315, *Communications Between Predecessor and Successor Auditors*, paragraphs .21 and .22, provide guidance regarding communication with a predecessor auditor. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

³⁹ The requirements to communicate noted in paragraphs .79 through .82 extend to any intentional misstatement of financial statements (see paragraph .03). However, the communication may use terms other than fraud—for example, irregularity, intentional misstatement, misappropriation, or defalcations—if there is possible confusion with a legal definition of fraud or other reason to prefer alternative terms. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

a material misstatement of the financial statements should be reported directly to those charged with governance. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with them about misappropriations perpetrated by lower-level employees. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.80 If the auditor, as a result of the assessment of the risks of material misstatement, has identified risks of material misstatement due to fraud that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected), the auditor should consider whether these risks represent significant deficiencies or material weaknesses in the entity's internal control that should be communicated to management and those charged with governance.^[40] (See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, paragraph .04). The auditor also should consider whether the absence of or deficiencies in programs and controls to mitigate specific risks of fraud or to otherwise help prevent, deter, and detect fraud (see paragraph .44) represent significant deficiencies or material weaknesses that should be communicated to management and those charged with governance. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

.81 The auditor also may wish to communicate other risks of fraud identified as a result of the assessment of the risks of material misstatements due to fraud. Such a communication may be a part of an overall communication with those charged with governance of business and financial statement risks affecting the entity and/or in conjunction with the auditor communication about the quality of the entity's accounting principles (see section 380.11). [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.82 The disclosure of possible fraud to parties other than the client's senior management and those charged with governance ordinarily is not part of the auditor's responsibility and ordinarily would be precluded by the auditor's ethical or legal obligations of confidentiality unless the matter is reflected in the auditor's report. The auditor should recognize, however, that in the following circumstances a duty to disclose to parties outside the entity may exist:

- a. To comply with certain legal and regulatory requirements⁴¹
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*⁴²
- c. In response to a subpoena

^[40] [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

⁴¹ These requirements include reports in connection with the termination of the engagement, such as when the entity reports an auditor change on Form 8-K and the fraud or related risk factors constitute a *reportable event* or is the source of a *disagreement*, as these terms are defined in Item 304 of Regulation S-K. These requirements also include reports that may be required, under certain circumstances, pursuant to Section 10A(b)1 of the Securities Exchange Act of 1934 relating to an illegal act that has a material effect on the financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

⁴² Section 315 requires the specific permission of the client. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance⁴³

Because potential conflicts between the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters covered by paragraphs .79 through .81 with parties outside the client. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Documenting the Auditor's Consideration of Fraud

.83 The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed (See paragraphs .14 through .17.)
- The procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud (See paragraphs .19 through .34.)
- Specific risks of material misstatement due to fraud that were identified (see paragraphs .35 through .45), and a description of the auditor's response to those risks (See paragraphs .46 through .56.)
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion (See paragraph .41.)
- The results of the procedures performed to further address the risk of management override of controls (See paragraphs .58 through .67.)
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions (See paragraphs .68 through .73.)
- The nature of the communications about fraud made to management, those charged with governance, and others (See paragraphs .79 through .82.)

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Effective Date

.84 This section is effective for audits of financial statements for periods beginning on or after December 15, 2002. Early application of the provisions of this section is permissible.

⁴³ For example, *Government Auditing Standards* (the Yellow Book) require auditors to report fraud or illegal acts directly to parties outside the audited entity in certain circumstances. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 113, November 2006.]

.85

Appendix

Examples of Fraud Risk Factors

A.1 This appendix contains examples of risk factors discussed in paragraphs .31 through .33 of the section. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

A.2 The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives/Pressures

- a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):
 - High degree of competition or market saturation, accompanied by declining margins
 - High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
 - Significant declines in customer demand and increasing business failures in either the industry or overall economy
 - Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
 - Recurring negative cash flows from operations and an inability to generate cash flows from operations while reporting earnings and earnings growth
 - Rapid growth or unusual profitability, especially compared to that of other companies in the same industry
 - New accounting, statutory, or regulatory requirements
- b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:
 - Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages

- Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures
 - Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
 - Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- c. Information available indicates that management's or those charged with governance's personal financial situation is threatened by the entity's financial performance arising from the following:
- Significant financial interests in the entity
 - Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow¹
 - Personal guarantees of debts of the entity
- d. There is excessive pressure on management or operating personnel to meet financial targets set up by those charged with governance or management, including sales or profitability incentive goals.

Opportunities

- a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:
- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm
 - A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
 - Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
 - Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions
 - Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist
 - Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification

¹ Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

- b. There is ineffective monitoring of management as a result of the following:
 - Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls
 - Ineffective oversight over the financial reporting process and internal control by those charged with governance
- c. There is a complex or unstable organizational structure, as evidenced by the following:
 - Difficulty in determining the organization or individuals that have controlling interest in the entity
 - Overly complex organizational structure involving unusual legal entities or managerial lines of authority
 - High turnover of senior management, counsel, or board members
- d. Internal control components are deficient as a result of the following:
 - Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required)
 - High turnover rates or employment of ineffective accounting, internal audit, or information technology staff
 - Ineffective accounting and information systems, including situations involving significant deficiencies or material weaknesses in internal control

Attitudes/Rationalizations

Risk factors reflective of attitudes/rationalizations by those charged with governance, management, or employees, that allow them to engage in and/or justify fraudulent financial reporting, may not be susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from fraudulent financial reporting. For example, auditors may become aware of the following information that may indicate a risk factor:

- Ineffective communication, implementation, support, or enforcement of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or board members alleging fraud or violations of laws and regulations
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend
- A practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts
- Management failing to correct known significant deficiencies or material weaknesses in internal control on a timely basis
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons

- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
 - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
 - Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report
 - Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with those charged with governance
 - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

Risk Factors Relating to Misstatements Arising From Misappropriation of Assets

A.3 Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalizations. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and weaknesses in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives/Pressures

- a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:
 - Known or anticipated future employee layoffs
 - Recent or anticipated changes to employee compensation or benefit plans
 - Promotions, compensation, or other rewards inconsistent with expectations

Opportunities

- a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:
 - Large amounts of cash on hand or processed
 - Inventory items that are small in size, of high value, or in high demand

- Easily convertible assets, such as bearer bonds, diamonds, or computer chips
 - Fixed assets that are small in size, marketable, or lacking observable identification of ownership
- b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:
- Inadequate segregation of duties or independent checks
 - Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations
 - Inadequate job applicant screening of employees with access to assets
 - Inadequate recordkeeping with respect to assets
 - Inadequate system of authorization and approval of transactions (for example, in purchasing)
 - Inadequate physical safeguards over cash, investments, inventory, or fixed assets
 - Lack of complete and timely reconciliations of assets
 - Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns
 - Lack of mandatory vacations for employees performing key control functions
 - Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation
 - Inadequate access controls over automated records, including controls over and review of computer systems event logs.

Attitudes/Rationalizations

Risk factors reflective of employee attitudes/rationalizations that allow them to justify misappropriations of assets, are generally not susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from misappropriation of assets. For example, auditors may become aware of the following attitudes or behavior of employees who have access to assets susceptible to misappropriation:

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
- Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

Knowledge Management

This document was commissioned by the Fraud Task Force of the AICPA's Auditing Standards Board. This document has not been adopted, approved, disapproved, or otherwise acted upon by a board, committee, governing body, or membership of the above issuing organizations.

Preface

Some organizations have significantly lower levels of misappropriation of assets and are less susceptible to fraudulent financial reporting than other organizations because these organizations take proactive steps to prevent or deter fraud. It is only those organizations that seriously consider fraud risks and take proactive steps to create the right kind of climate to reduce its occurrence that have success in preventing fraud. This document identifies the key participants in this antifraud effort, including the board of directors, management, internal and independent auditors, and certified fraud examiners.

Management may develop and implement some of these programs and controls in response to specific identified risks of material misstatement of financial statements due to fraud. In other cases, these programs and controls may be a part of the entity's enterprise-wide risk management activities.

Management is responsible for designing and implementing systems and procedures for the prevention and detection of fraud and, along with the board of directors, for ensuring a culture and environment that promotes honesty and ethical behavior. However, because of the characteristics of fraud, a material misstatement of financial statements due to fraud may occur notwithstanding the presence of programs and controls such as those described in this document.

Introduction

Fraud can range from minor employee theft and unproductive behavior to misappropriation of assets and fraudulent financial reporting. Material financial statement fraud can have a significant adverse effect on an entity's market value, reputation, and ability to achieve its strategic objectives. A number of highly publicized cases have heightened the awareness of the effects of fraudulent financial reporting and have led many organizations to be more proactive in taking steps to prevent or deter its occurrence. Misappropriation of assets, though often not material to the financial statements, can nonetheless result in substantial losses to an entity if a dishonest employee has the incentive and opportunity to commit fraud.

The risk of fraud can be reduced through a combination of prevention, deterrence, and detection measures. However, fraud can be difficult to detect because it often involves concealment through falsification of documents or collusion among management, employees, or third parties. Therefore, it is important to place a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals that they should not commit fraud because of the likelihood of detection and punishment. Moreover, prevention and deterrence measures are much less costly than the time and expense required for fraud detection and investigation.

An entity's management has both the responsibility and the means to implement measures to reduce the incidence of fraud. The measures an organization takes to prevent and deter fraud also can help create a positive workplace environment that can enhance the entity's ability to recruit and retain high-quality employees.

Research suggests that the most effective way to implement measures to reduce wrongdoing is to base them on a set of core values that are embraced by the entity. These values provide an overarching message about the key principles guiding all employees' actions. This provides a platform upon which a more detailed code of conduct can be constructed, giving more specific guidance about permitted and prohibited behavior, based on applicable laws and the organization's values. Management needs to clearly articulate that all employees will be held accountable to act within the organization's code of conduct.

This document identifies measures entities can implement to prevent, deter, and detect fraud. It discusses these measures in the context of three fundamental elements. Broadly stated, these fundamental elements are (1) create and maintain a *culture* of honesty and high ethics; (2) *evaluate* the risks of fraud and implement the processes, procedures, and controls needed to mitigate the risks and reduce the opportunities for fraud; and (3) develop an appropriate *oversight* process. Although the entire management team shares the responsibility for implementing and monitoring these activities, with oversight from the board of directors, the entity's chief executive officer (CEO) should initiate and support such measures. Without the CEO's active support, these measures are less likely to be effective.

The information presented in this document generally is applicable to entities of all sizes. However, the degree to which certain programs and controls are applied in smaller, less-complex entities and the formality of their application are likely to differ from larger organizations. For example, management of a smaller entity (or the owner of an owner-managed entity), along with those charged with governance of the financial reporting process, are responsible for creating a culture of honesty and high ethics. Management also is responsible for implementing a system of internal controls commensurate with the nature and size of the organization, but smaller entities may find that certain types

of control activities are not relevant because of the involvement of and controls applied by management. However, all entities must make it clear that unethical or dishonest behavior will not be tolerated.

Creating a Culture of Honesty and High Ethics

It is the organization's responsibility to create a culture of honesty and high ethics and to clearly communicate acceptable behavior and expectations of each employee. Such a culture is rooted in a strong set of core values (or value system) that provides the foundation for employees as to how the organization conducts its business. It also allows an entity to develop an ethical framework that covers (1) fraudulent financial reporting, (2) misappropriation of assets, and (3) corruption as well as other issues.¹

Creating a culture of honesty and high ethics should include the following.

Setting the Tone at the Top

Directors and officers of corporations set the "tone at the top" for ethical behavior within any organization. Research in moral development strongly suggests that honesty can best be reinforced when a proper example is set—sometimes referred to as the tone at the top. The management of an entity cannot act one way and expect others in the entity to behave differently.

In many cases, particularly in larger organizations, it is necessary for management to both behave ethically and openly communicate its expectations for ethical behavior because most employees are not in a position to observe management's actions. Management must show employees through its words and actions that dishonest or unethical behavior will not be tolerated, even if the result of the action benefits the entity. Moreover, it should be evident that all employees will be treated equally, regardless of their position.

For example, statements by management regarding the absolute need to meet operating and financial targets can create undue pressures that may lead employees to commit fraud to achieve them. Setting unachievable goals for employees can give them two unattractive choices: fail or cheat. In contrast, a statement from management that says, "We are aggressive in pursuing our targets, while requiring truthful financial reporting at all times," clearly indicates to employees that integrity is a requirement. This message also conveys that the entity has "zero tolerance" for unethical behavior, including fraudulent financial reporting.

The cornerstone of an effective antifraud environment is a culture with a strong value system founded on integrity. This value system often is reflected in a code of conduct.² The code of conduct should reflect the core values of the entity and guide employees in making appropriate decisions during their workday. The code of conduct might include such topics as ethics, confidentiality, conflicts of interest, intellectual property, sexual harassment, and fraud.³ For a code of

¹ Corruption includes bribery and other illegal acts.

² An entity's value system also could be reflected in an ethics policy, a statement of business principles, or some other concise summary of guiding principles.

³ Although the discussion in this document focuses on fraud, the subject of fraud often is considered in the context of a broader set of principles that govern an organization. Some organizations, however, may elect to develop a fraud policy separate from an ethics policy. Specific examples of topics in a fraud policy might include a requirement to comply with all laws and regulations and explicit guidance regarding making payments to obtain contracts, holding pricing discussions with competitors, environmental discharges, relationships with vendors, and maintenance of accurate books and records.

conduct to be effective, it should be communicated to all personnel in an understandable fashion. It also should be developed in a participatory and positive manner that will result in both management and employees taking ownership of its content. Finally, the code of conduct should be included in an employee handbook or policy manual, or in some other formal document or location (for example, the entity's intranet) so it can be referred to when needed.

Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. For examples of codes of conduct, see Attachment 1, "AICPA 'CPA's Handbook of Fraud and Commercial Crime Prevention,' An Organizational Code of Conduct," and Attachment 2, "Financial Executives International Code of Ethics Statement" provided by Financial Executives International. In addition, visit the Institute of Management Accountant's Ethics Center at www.imanet.org for their members' standards of ethical conduct.

Creating a Positive Workplace Environment

Research results indicate that wrongdoing occurs less frequently when employees have positive feelings about an entity than when they feel abused, threatened, or ignored. Without a positive workplace environment, there are more opportunities for poor employee morale, which can affect an employee's attitude about committing fraud against an entity. Factors that detract from a positive work environment and may increase the risk of fraud include:

- Top management that does not seem to care about or reward appropriate behavior
- Negative feedback and lack of recognition for job performance
- Perceived inequities in the organization
- Autocratic rather than participative management
- Low organizational loyalty or feelings of ownership
- Unreasonable budget expectations or other financial targets
- Fear of delivering "bad news" to supervisors and/or management
- Less-than-competitive compensation
- Poor training and promotion opportunities
- Lack of clear organizational responsibilities
- Poor communication practices or methods within the organization

The entity's human resources department often is instrumental in helping to build a corporate culture and a positive work environment. Human resource professionals are responsible for implementing specific programs and initiatives, consistent with management's strategies, that can help to mitigate many of the detractors mentioned above. Mitigating factors that help create a positive work environment and reduce the risk of fraud may include:

- Recognition and reward systems that are in tandem with goals and results
- Equal employment opportunities
- Team-oriented, collaborative decision-making policies
- Professionally administered compensation programs
- Professionally administered training programs and an organizational priority of career development

Employees should be empowered to help create a positive workplace environment and support the entity's values and code of conduct. They should be given the opportunity to provide input to the development and updating of the entity's code of conduct, to ensure that it is relevant, clear, and fair. Involving employees in this fashion also may effectively contribute to the oversight of the entity's code of conduct and an environment of ethical behavior (see the section titled "Developing an Appropriate Oversight Process").

Employees should be given the means to obtain advice internally before making decisions that appear to have significant legal or ethical implications. They should also be encouraged and given the means to communicate concerns, anonymously if preferred, about potential violations of the entity's code of conduct, without fear of retribution. Many organizations have implemented a process for employees to report on a confidential basis any actual or suspected wrongdoing, or potential violations of the code of conduct or ethics policy. For example, some organizations use a telephone "hotline" that is directed to or monitored by an ethics officer, fraud officer, general counsel, internal audit director, or another trusted individual responsible for investigating and reporting incidents of fraud or illegal acts.

Hiring and Promoting Appropriate Employees

Each employee has a unique set of values and personal code of ethics. When faced with sufficient pressure and a perceived opportunity, some employees will behave dishonestly rather than face the negative consequences of honest behavior. The threshold at which dishonest behavior starts, however, will vary among individuals. If an entity is to be successful in preventing fraud, it must have effective policies that minimize the chance of hiring or promoting individuals with low levels of honesty, especially for positions of trust. Proactive hiring and promotion procedures may include:

- Conducting background investigations on individuals being considered for employment or for promotion to a position of trust⁴
- Thoroughly checking a candidate's education, employment history, and personal references
- Periodic training of all employees about the entity's values and code of conduct, (training is addressed in the following section)
- Incorporating into regular performance reviews an evaluation of how each individual has contributed to creating an appropriate workplace environment in line with the entity's values and code of conduct
- Continuous objective evaluation of compliance with the entity's values and code of conduct, with violations being addressed immediately

Training

New employees should be trained at the time of hiring about the entity's values and its code of conduct. This training should explicitly cover expectations of all employees regarding (1) their duty to communicate certain matters; (2) a list of the types of matters, including actual or suspected fraud, to be communicated along with specific examples; and (3) information on how to communicate those matters. There also should be an affirmation from senior management regarding employee expectations and communication responsibilities. Such training should include an element of "fraud awareness," the tone of which should be

⁴ Some organizations also have considered follow-up investigations, particularly for employees in positions of trust, on a periodic basis (for example, every five years) or as circumstances dictate.

positive but nonetheless stress that fraud can be costly (and detrimental in other ways) to the entity and its employees.

In addition to training at the time of hiring, employees should receive refresher training periodically thereafter. Some organizations may consider ongoing training for certain positions, such as purchasing agents or employees with financial reporting responsibilities. Training should be specific to an employee's level within the organization, geographic location, and assigned responsibilities. For example, training for senior manager level personnel would normally be different from that of nonsupervisory employees, and training for purchasing agents would be different from that of sales representatives.

Confirmation

Management needs to clearly articulate that all employees will be held accountable to act within the entity's code of conduct. All employees within senior management and the finance function, as well as other employees in areas that might be exposed to unethical behavior (for example, procurement, sales and marketing) should be required to sign a code of conduct statement annually, at a minimum.

Requiring periodic confirmation by employees of their responsibilities will not only reinforce the policy but may also deter individuals from committing fraud and other violations and might identify problems before they become significant. Such confirmation may include statements that the individual understands the entity's expectations, has complied with the code of conduct, and is not aware of any violations of the code of conduct other than those the individual lists in his or her response. Although people with low integrity may not hesitate to sign a false confirmation, most people will want to avoid making a false statement in writing. Honest individuals are more likely to return their confirmations and to disclose what they know (including any conflicts of interest or other personal exceptions to the code of conduct). Thorough follow-up by internal auditors or others regarding nonreplies may uncover significant issues.

Discipline

The way an entity reacts to incidents of alleged or suspected fraud will send a strong deterrent message throughout the entity, helping to reduce the number of future occurrences. The following actions should be taken in response to an alleged incident of fraud:

- A thorough investigation of the incident should be conducted.⁵
- Appropriate and consistent actions should be taken against violators.
- Relevant controls should be assessed and improved.
- Communication and training should occur to reinforce the entity's values, code of conduct, and expectations.

Expectations about the consequences of committing fraud must be clearly communicated throughout the entity. For example, a strong statement from management that dishonest actions will not be tolerated, and that violators may be terminated and referred to the appropriate authorities, clearly establishes consequences and can be a valuable deterrent to wrongdoing. If wrongdoing occurs

⁵ Many entities of sufficient size are employing antifraud professionals, such as certified fraud examiners, who are responsible for resolving allegations of fraud within the organization and who also assist in the detection and deterrence of fraud. These individuals typically report their findings internally to the corporate security, legal, or internal audit departments. In other instances, such individuals may be empowered directly by the board of directors or its audit committee.

and an employee is disciplined, it can be helpful to communicate that fact, on a no-name basis, in an employee newsletter or other regular communication to employees. Seeing that other people have been disciplined for wrongdoing can be an effective deterrent, increasing the perceived likelihood of violators being caught and punished. It also can demonstrate that the entity is committed to an environment of high ethical standards and integrity.

Evaluating Antifraud Processes and Controls

Neither fraudulent financial reporting nor misappropriation of assets can occur without a perceived opportunity to commit and conceal the act. Organizations should be proactive in reducing fraud opportunities by (1) identifying and measuring fraud risks, (2) taking steps to mitigate identified risks, and (3) implementing and monitoring appropriate preventive and detective internal controls and other deterrent measures.

Identifying and Measuring Fraud Risks

Management has primary responsibility for establishing and monitoring all aspects of the entity's fraud risk-assessment and prevention activities.⁶ Fraud risks often are considered as part of an enterprise-wide risk management program, though they may be addressed separately.⁷ The fraud risk-assessment process should consider the vulnerability of the entity to fraudulent activity (fraudulent financial reporting, misappropriation of assets, and corruption) and whether any of those exposures could result in a material misstatement of the financial statements or material loss to the organization. In identifying fraud risks, organizations should consider organizational, industry, and country-specific characteristics that influence the risk of fraud.

The nature and extent of management's risk assessment activities should be commensurate with the size of the entity and complexity of its operations. For example, the risk assessment process is likely to be less formal and less structured in smaller entities. However, management should recognize that fraud can occur in organizations of any size or type, and that almost any employee may be capable of committing fraud given the right set of circumstances. Accordingly, management should develop a heightened "fraud awareness" and an appropriate fraud risk-management program, with oversight from those charged with governance.

Mitigating Fraud Risks

It may be possible to reduce or eliminate certain fraud risks by making changes to the entity's activities and processes. An entity may choose to sell certain segments of its operations, cease doing business in certain locations, or reorganize its business processes to eliminate unacceptable risks. For example, the risk of misappropriation of funds may be reduced by implementing a central lockbox at a bank to receive payments instead of receiving money at the entity's various locations. The risk of corruption may be reduced by closely monitoring the

⁶ Management may elect to have internal audit play an active role in the development, monitoring, and ongoing assessment of the entity's fraud risk-management program. This may include an active role in the development and communication of the entity's code of conduct or ethics policy, as well as in investigating actual or alleged instances of noncompliance.

⁷ Some organizations may perform a periodic self-assessment using questionnaires or other techniques to identify and measure risks. Self-assessment may be less reliable in identifying the risk of fraud due to a lack of experience with fraud (although many organizations experience some form of fraud and abuse, material financial statement fraud or misappropriation of assets is a rare event for most) and because management may be unwilling to acknowledge openly that they might commit fraud given sufficient pressure and opportunity.

entity's procurement process. The risk of financial statement fraud may be reduced by implementing shared services centers to provide accounting services to multiple segments, affiliates, or geographic locations of an entity's operations. A shared services center may be less vulnerable to influence by local operations managers and may be able to implement more extensive fraud detection measures cost-effectively.

Implementing and Monitoring Appropriate Internal Controls

Some risks are inherent in the environment of the entity, but most can be addressed with an appropriate system of internal control. Once fraud risk assessment has taken place, the entity can identify the processes, controls, and other procedures that are needed to mitigate the identified risks. Effective internal control will include a well-developed control environment, an effective and secure information system, and appropriate control and monitoring activities.⁸ Because of the importance of information technology in supporting operations and the processing of transactions, management also needs to implement and maintain appropriate controls, whether automated or manual, over computer-generated information.

In particular, management should evaluate whether appropriate internal controls have been implemented in any areas management has identified as posing a higher risk of fraudulent activity, as well as controls over the entity's financial reporting process. Because fraudulent financial reporting may begin in an interim period, management also should evaluate the appropriateness of internal controls over interim financial reporting.

Fraudulent financial reporting by upper-level management typically involves override of internal controls within the financial reporting process. Because management has the ability to override controls, or to influence others to perpetrate or conceal fraud, the need for a strong value system and a culture of ethical financial reporting becomes increasingly important. This helps create an environment in which other employees will decline to participate in committing a fraud and will use established communication procedures to report any requests to commit wrongdoing. The potential for management override also increases the need for appropriate oversight measures by those charged with governance, as discussed in the following section.

Fraudulent financial reporting by lower levels of management and employees may be deterred or detected by appropriate monitoring controls, such as having higher-level managers review and evaluate the financial results reported by individual operating units or subsidiaries. Unusual fluctuations in results of particular reporting units, or the lack of expected fluctuations, may indicate potential manipulation by departmental or operating unit managers or staff.

Developing an Appropriate Oversight Process

To effectively prevent or deter fraud, an entity should have an appropriate oversight function in place. Oversight can take many forms and can be performed by many within and outside the entity, under the overall oversight of the audit committee (or those charged with governance, such as the board of directors, where no audit committee exists).

⁸ The report of the Committee of Sponsoring Organizations (COSO) of the Treadway Commission, *Internal Control—Integrated Framework*, provides reasonable criteria for management to use in evaluating the effectiveness of the entity's system of internal control.

Audit Committee or Those Charged With Governance

The audit committee (or those charged with governance where no audit committee exists) should evaluate management's identification of fraud risks, implementation of antifraud measures, and creation of the appropriate "tone at the top." Active oversight by the audit committee can help to reinforce management's commitment to creating a culture with "zero tolerance" for fraud. An entity's audit committee also should ensure that senior management (in particular, the CEO) implements appropriate fraud deterrence and prevention measures to better protect investors, employees, and other stakeholders. The audit committee's evaluation and oversight not only helps make sure that senior management fulfills its responsibility, but also can serve as a deterrent to senior management engaging in fraudulent activity (that is, by ensuring an environment is created whereby any attempt by senior management to involve employees in committing or concealing fraud would lead promptly to reports from such employees to appropriate persons, including the audit committee).

The audit committee also plays an important role in helping those charged with governance fulfill their oversight responsibilities with respect to the entity's financial reporting process and the system of internal control.⁹ In exercising this oversight responsibility, the audit committee should consider the potential for management override of controls or other inappropriate influence over the financial reporting process. For example, the audit committee may obtain from the internal auditors and independent auditors their views on management's involvement in the financial reporting process and, in particular, the ability of management to override information processed by the entity's financial reporting system (for example, the ability for management or others to initiate or record nonstandard journal entries). The audit committee also may consider reviewing the entity's reported information for reasonableness compared with prior or forecasted results, as well as with peers or industry averages. In addition, information received in communications from the independent auditors¹⁰ can assist the audit committee in assessing the strength of the entity's internal control and the potential for fraudulent financial reporting.

As part of its oversight responsibilities, the audit committee should encourage management to provide a mechanism for employees to report concerns about unethical behavior, actual or suspected fraud, or violations of the entity's code of conduct or ethics policy. The committee should then receive periodic reports describing the nature, status, and eventual disposition of any fraud or unethical conduct. A summary of the activity, follow-up and disposition also should be provided to all of those charged with governance.

If senior management is involved in fraud, the next layer of management may be the most likely to be aware of it. As a result, the audit committee (and others of those charged with governance) should consider establishing an open line of communication with members of management one or two levels below senior management to assist in identifying fraud at the highest levels of the

⁹ See the Report of the NACD Blue Ribbon Commission on the Audit Committee, (Washington, D.C.: National Association of Corporate Directors, 2000). For the board's role in the oversight of risk management, see Report of the NACD Blue Ribbon Commission on Risk Oversight, (Washington, D.C.: National Association of Corporate Directors, 2002).

¹⁰ See section 325, *Communicating Internal Control Related Matters Identified in an Audit*, and section 380, *The Auditor's Communication With Those Charged With Governance*. [Footnote revised, May 2006, due to conforming changes necessary due to the issuance of Statement on Standards No. 112. Footnote revised, April 2007, due to conforming changes necessary due to the issuance of Statement on Standards No. 114.]

organization or investigating any fraudulent activity that might occur.¹¹ The audit committee typically has the ability and authority to investigate any alleged or suspected wrongdoing brought to its attention. Most audit committee charters empower the committee to investigate any matters within the scope of its responsibilities, and to retain legal, accounting, and other professional advisers as needed to advise the committee and assist in its investigation.

All audit committee members should be financially literate, and each committee should have at least one financial expert. The financial expert should possess:

- An understanding of generally accepted accounting principles and audits of financial statements prepared under those principles. Such understanding may have been obtained either through education or experience. It is important for someone on the audit committee to have a working knowledge of those principles and standards.
- Experience in the preparation and/or the auditing of financial statements of an entity of similar size, scope and complexity as the entity on whose board the committee member serves. The experience would generally be as a chief financial officer, chief accounting officer, controller, or auditor of a similar entity. This background will provide a necessary understanding of the transactional and operational environment that produces the issuer's financial statements. It will also bring an understanding of what is involved in, for example, appropriate accounting estimates, accruals, and reserve provisions, and an appreciation of what is necessary to maintain a good internal control environment.
- Experience in internal governance and procedures of audit committees, obtained either as an audit committee member, a senior corporate manager responsible for answering to the audit committee, or an external auditor responsible for reporting on the execution and results of annual audits.

Management

Management is responsible for overseeing the activities carried out by employees, and typically does so by implementing and monitoring processes and controls such as those discussed previously. However, management also may initiate, participate in, or direct the commission and concealment of a fraudulent act. Accordingly, the audit committee (or those charged with governance where no audit committee exists) has the responsibility to oversee the activities of senior management and to consider the risk of fraudulent financial reporting involving the override of internal controls or collusion (see discussion on the audit committee and board of directors above).

Public companies should include a statement in the annual report acknowledging management's responsibility for the preparation of the financial statements and for establishing and maintaining an effective system of internal control. This will help improve the public's understanding of the respective roles of management and the auditor. This statement has also been generally referred to as a "Management Report" or "Management Certificate." Such a statement can provide a convenient vehicle for management to describe the nature and manner of preparation of the financial information and the adequacy of the

¹¹ *Report of the NACD Best Practices Council: Coping with Fraud and Other Illegal Activity, A Guide for Directors, CEOs, and Senior Managers* (1998) sets forth "basic principles" and "implementation approaches" for dealing with fraud and other illegal activity.

internal accounting controls. Logically, the statement should be presented in close proximity to the formal financial statements. For example, it could appear near the independent auditor's report, or in the financial review or management analysis section.

Internal Auditors

An effective internal audit team can be extremely helpful in performing aspects of the oversight function. Their knowledge about the entity may enable them to identify indicators that suggest fraud has been committed. The *Standards for the Professional Practice of Internal Auditing* (IIA Standards), issued by the Institute of Internal Auditors, state, "The internal auditor should have sufficient knowledge to identify the indicators of fraud but is not expected to have the expertise of a person whose primary responsibility is detecting and investigating fraud." Internal auditors also have the opportunity to evaluate fraud risks and controls and to recommend action to mitigate risks and improve controls. Specifically, the IIA Standards require internal auditors to assess risks facing their organizations. This risk assessment is to serve as the basis from which audit plans are devised and against which internal controls are tested. The IIA Standards require the audit plan to be presented to and approved by the audit committee (or board of directors where no audit committee exists). The work completed as a result of the audit plan provides assurance on which management's assertion about controls can be made.

Internal audits can be both a detection and a deterrence measure. Internal auditors can assist in the deterrence of fraud by examining and evaluating the adequacy and the effectiveness of the system of internal control, commensurate with the extent of the potential exposure or risk in the various segments of the organization's operations. In carrying out this responsibility, internal auditors should, for example, determine whether:

- The organizational environment fosters control consciousness.
- Realistic organizational goals and objectives are set.
- Written policies (for example, a code of conduct) exist that describe prohibited activities and the action required whenever violations are discovered.
- Appropriate authorization policies for transactions are established and maintained.
- Policies, practices, procedures, reports, and other mechanisms are developed to monitor activities and safeguard assets, particularly in high-risk areas.
- Communication channels provide management with adequate and reliable information.
- Recommendations need to be made for the establishment or enhancement of cost-effective controls to help deter fraud.

Internal auditors may conduct proactive auditing to search for corruption, misappropriation of assets, and financial statement fraud. This may include the use of computer-assisted audit techniques to detect particular types of fraud. Internal auditors also can employ analytical and other procedures to isolate anomalies and perform detailed reviews of high-risk accounts and transactions to identify potential financial statement fraud. The internal auditors should have an independent reporting line directly to the audit committee, to enable them to express any concerns about management's commitment to appropriate internal controls or to report suspicions or allegations of fraud involving senior management.

Independent Auditors

Independent auditors can assist management and the board of directors (or audit committee) by providing an assessment of the entity's process for identifying, assessing, and responding to the risks of fraud. Those charged with governance, such as the board of directors or audit committee, should have an open and candid dialogue with the independent auditors regarding management's risk assessment process and the system of internal control. Such a dialogue should include a discussion of the susceptibility of the entity to fraudulent financial reporting and the entity's exposure to misappropriation of assets.

Certified Fraud Examiners

Certified fraud examiners may assist the audit committee and board of directors with aspects of the oversight process either directly or as part of a team of internal auditors or independent auditors. Certified fraud examiners can provide extensive knowledge and experience about fraud that may not be available within a corporation. They can provide more objective input into management's evaluation of the risk of fraud (especially fraud involving senior management, such as financial statement fraud) and the development of appropriate antifraud controls that are less vulnerable to management override. They can assist the audit committee and board of directors in evaluating the fraud risk assessment and fraud prevention measures implemented by management. Certified fraud examiners also conduct examinations to resolve allegations or suspicions of fraud, reporting either to an appropriate level of management or to the audit committee or board of directors, depending upon the nature of the issue and the level of personnel involved.

Attachment 1: AICPA "CPA's Handbook of Fraud and Commercial Crime Prevention," An Organizational Code of Conduct

The following is an example of an organizational code of conduct, which includes definitions of what is considered unacceptable, and the consequences of any breaches thereof. The specific content and areas addressed in an entity's code of conduct should be specific to that entity.

Organizational Code of Conduct

The Organization and its employees must, at all times, comply with all applicable laws and regulations. The Organization will not condone the activities of employees who achieve results through violation of the law or unethical business dealings. This includes any payments for illegal acts, indirect contributions, rebates, and bribery. The Organization does not permit any activity that fails to stand the closest possible public scrutiny.

All business conduct should be well above the minimum standards required by law. Accordingly, employees must ensure that their actions cannot be interpreted as being, in any way, in contravention of the laws and regulations governing the Organization's worldwide operations.

Employees uncertain about the application or interpretation of any legal requirements should refer the matter to their superior, who, if necessary, should seek the advice of the legal department.

General Employee Conduct

The Organization expects its employees to conduct themselves in a businesslike manner. Drinking, gambling, fighting, swearing, and similar unprofessional activities are strictly prohibited while on the job.

Employees must not engage in sexual harassment, or conduct themselves in a way that could be construed as such, for example, by using inappropriate language, keeping or posting inappropriate materials in their work area, or accessing inappropriate materials on their computer.

Conflicts of Interest

The Organization expects that employees will perform their duties conscientiously, honestly, and in accordance with the best interests of the Organization. Employees must not use their position or the knowledge gained as a result of their position for private or personal advantage. Regardless of the circumstances, if employees sense that a course of action they have pursued, are presently pursuing, or are contemplating pursuing may involve them in a conflict of interest with their employer, they should immediately communicate all the facts to their superior.

Outside Activities, Employment, and Directorships

All employees share a serious responsibility for the Organization's good public relations, especially at the community level. Their readiness to help with religious, charitable, educational, and civic activities brings credit to the Organization and is encouraged. Employees must, however, avoid acquiring any business interest or participating in any other activity outside the Organization that would, or would appear to:

- Create an excessive demand upon their time and attention, thus depriving the Organization of their best efforts on the job.
- Create a conflict of interest—an obligation, interest, or distraction—that may interfere with the independent exercise of judgment in the Organization's best interest.

Relationships With Clients and Suppliers

Employees should avoid investing in or acquiring a financial interest for their own accounts in any business organization that has a contractual relationship with the Organization, or that provides goods or services, or both to the Organization, if such investment or interest could influence or create the impression of influencing their decisions in the performance of their duties on behalf of the Organization.

Gifts, Entertainment, and Favors

Employees must not accept entertainment, gifts, or personal favors that could, in any way, influence, or appear to influence, business decisions in favor of any person or organization with whom or with which the Organization has, or is likely to have, business dealings. Similarly, employees must not accept any other preferential treatment under these circumstances because their position with the Organization might be inclined to, or be perceived to, place them under obligation.

Kickbacks and Secret Commissions

Regarding the Organization's business activities, employees may not receive payment or compensation of any kind, except as authorized under the Organization's remuneration policies. In particular, the Organization strictly prohibits the acceptance of kickbacks and secret commissions from suppliers or others. Any breach of this rule will result in immediate termination and prosecution to the fullest extent of the law.

Organization Funds and Other Assets

Employees who have access to Organization funds in any form must follow the prescribed procedures for recording, handling, and protecting money as detailed in the Organization's instructional manuals or other explanatory materials, or both. The Organization imposes strict standards to prevent fraud and dishonesty. If employees become aware of any evidence of fraud and dishonesty, they should immediately advise their superior or the Law Department so that the Organization can promptly investigate further.

When an employee's position requires spending Organization funds or incurring any reimbursable personal expenses, that individual must use good judgment on the Organization's behalf to ensure that good value is received for every expenditure.

Organization funds and all other assets of the Organization are for Organization purposes only and not for personal benefit. This includes the personal use of organizational assets, such as computers.

Organization Records and Communications

Accurate and reliable records of many kinds are necessary to meet the Organization's legal and financial obligations and to manage the affairs of the Organization. The Organization's books and records must reflect in an accurate and timely manner all business transactions. The employees responsible for accounting and recordkeeping must fully disclose and record all assets, liabilities, or both, and must exercise diligence in enforcing these requirements.

Employees must not make or engage in any false record or communication of any kind, whether internal or external, including but not limited to:

- False expense, attendance, production, financial, or similar reports and statements
- False advertising, deceptive marketing practices, or other misleading representations

Dealing With Outside People and Organizations

Employees must take care to separate their personal roles from their Organization positions when communicating on matters not involving Organization business. Employees must not use organization identification, stationery, supplies, and equipment for personal or political matters.

When communicating publicly on matters that involve Organization business, employees must not presume to speak for the Organization on any topic, unless they are certain that the views they express are those of the Organization, and it is the Organization's desire that such views be publicly disseminated.

When dealing with anyone outside the Organization, including public officials, employees must take care not to compromise the integrity or damage the reputation of either the Organization, or any outside individual, business, or government body.

Prompt Communications

In all matters relevant to customers, suppliers, government authorities, the public and others in the Organization, all employees must make every effort to achieve complete, accurate, and timely communications—responding promptly and courteously to all proper requests for information and to all complaints.

Privacy and Confidentiality

When handling financial and personal information about customers or others with whom the Organization has dealings, observe the following principles:

1. Collect, use, and retain only the personal information necessary for the Organization's business. Whenever possible, obtain any relevant information directly from the person concerned. Use only reputable and reliable sources to supplement this information.
2. Retain information only for as long as necessary or as required by law. Protect the physical security of this information.
3. Limit internal access to personal information to those with a legitimate business reason for seeking that information. Use only personal information for the purposes for which it was originally obtained. Obtain the consent of the person concerned before externally disclosing any personal information, unless legal process or contractual obligation provides otherwise.

Attachment 2: Financial Executives International Code of Ethics Statement

The mission of Financial Executives International (FEI) includes significant efforts to promote ethical conduct in the practice of financial management throughout the world. Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. This code provides principles that members are expected to and advocate. They embody rules regarding individual and peer responsibilities, as well as responsibilities to employers, the public, and other stakeholders.

All members of FEI will:

1. Act with honesty and integrity, avoiding actual or apparent conflicts of interest in personal and professional relationships.
2. Provide constituents with information that is accurate, complete, objective, relevant, timely, and understandable.
3. Comply with rules and regulations of federal, state, provincial, and local governments, and other appropriate private and public regulatory agencies.
4. Act in good faith; responsibly; and with due care, competence, and diligence, without misrepresenting material facts or allowing one's independent judgment to be subordinated.
5. Respect the confidentiality of information acquired in the course of one's work except when authorized or otherwise legally obligated to disclose. Confidential information acquired in the course of one's work will not be used for personal advantage.
6. Share knowledge and maintain skills important and relevant to constituents' needs.
7. Proactively promote ethical behavior as a responsible partner among peers, in the work environment, and in the community.
8. Achieve responsible use of and control over all assets and resources employed or entrusted.

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

AU Section 317

Illegal Acts by Clients

(Supersedes section 328.)

Source: SAS No. 54.

See section 9317 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section prescribes the nature and extent of the consideration an independent auditor should give to the possibility of illegal acts by a client in an audit of financial statements in accordance with generally accepted auditing standards. The section also provides guidance on the auditor's responsibilities when a possible illegal act is detected.

Definition of Illegal Acts

.02 The term *illegal acts*, for purposes of this section, refers to violations of laws or governmental regulations. Illegal acts by clients are acts attributable to the entity whose financial statements are under audit or acts by management or employees acting on behalf of the entity. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

Dependence on Legal Judgment

.03 Whether an act is, in fact, illegal is a determination that is normally beyond the auditor's professional competence. An auditor, in reporting on financial statements, presents himself as one who is proficient in accounting and auditing. The auditor's training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his attention may be illegal. However, the determination as to whether a particular act is illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law.

Relation to Financial Statements

.04 Illegal acts vary considerably in their relation to the financial statements. Generally, the further removed an illegal act is from the events and transactions ordinarily reflected in financial statements, the less likely the auditor is to become aware of the act or to recognize its possible illegality.

.05 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts.

However, the auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statements assertions rather than from the perspective of legality *per se*. The auditor's responsibility to detect and report misstatements resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for misstatements caused by error or fraud as described in section 110, *Responsibilities and Functions of the Independent Auditor*.

.06 Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects, and their financial statement effect is indirect. An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. For example, securities may be purchased or sold based on inside information. While the direct effects of the purchase or sale may be recorded appropriately, their indirect effect, the possible contingent liability for violating securities laws, may not be appropriately disclosed. Even when violations of such laws and regulations can have consequences material to the financial statements, the auditor may not become aware of the existence of the illegal act unless he is informed by the client, or there is evidence of a governmental agency investigation or enforcement proceeding in the records, documents, or other information normally inspected in an audit of financial statements.

The Auditor's Consideration of the Possibility of Illegal Acts

.07 As explained in paragraph .05, certain illegal acts have a direct and material effect on the determination of financial statement amounts. Other illegal acts, such as those described in paragraph .06, may, in particular circumstances, be regarded as having material but indirect effects on financial statements. The auditor's responsibility with respect to detecting, considering the financial statement effects of, and reporting these other illegal acts is described in this section. These other illegal acts are hereinafter referred to simply as *illegal acts*. The auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred. However, because of the characteristics of illegal acts explained above, an audit made in accordance with generally accepted auditing standards provides no assurance that illegal acts will be detected or that any contingent liabilities that may result will be disclosed.

Audit Procedures in the Absence of Evidence Concerning Possible Illegal Acts

.08 Normally, an audit in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts. However, procedures applied for the purpose of forming an opinion

on the financial statements may bring possible illegal acts to the auditor's attention. For example, such procedures include reading minutes; inquiring of the client's management and legal counsel concerning litigation, claims, and assessments; performing substantive tests of details of transactions or balances. The auditor should make inquiries of management concerning the client's compliance with laws and regulations. Where applicable, the auditor should also inquire of management concerning—

- The client's policies relative to the prevention of illegal acts.
- The use of directives issued by the client and periodic representations obtained by the client from management at appropriate levels of authority concerning compliance with laws and regulations.

The auditor also obtains written representations from management concerning the absence of violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency. (See section 333, *Management Representations*.) The auditor need perform no further procedures in this area absent specific information concerning possible illegal acts.

Specific Information Concerning Possible Illegal Acts

.09 In applying audit procedures and evaluating the results of those procedures, the auditor may encounter specific information that may raise a question concerning possible illegal acts, such as the following:

- Unauthorized transactions, improperly recorded transactions, or transactions not recorded in a complete or timely manner in order to maintain accountability for assets
- Investigation by a governmental agency, an enforcement proceeding, or payment of unusual fines or penalties
- Violations of laws or regulations cited in reports of examinations by regulatory agencies that have been made available to the auditor
- Large payments for unspecified services to consultants, affiliates, or employees
- Sales commissions or agents' fees that appear excessive in relation to those normally paid by the client or to the services actually received
- Unusually large payments in cash, purchases of bank cashiers' checks in large amounts payable to bearer, transfers to numbered bank accounts, or similar transactions
- Unexplained payments made to government officials or employees
- Failure to file tax returns or pay government duties or similar fees that are common to the entity's industry or the nature of its business

Audit Procedures in Response to Possible Illegal Acts

.10 When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements. In doing so, the auditor should inquire of management at a level above those involved, if possible. If management

does not provide satisfactory information that there has been no illegal act, the auditor should—

- a. Consult with the client's legal counsel or other specialists about the application of relevant laws and regulations to the circumstances and the possible effects on the financial statements. Arrangements for such consultation with client's legal counsel should be made by the client.
- b. Apply additional procedures, if necessary, to obtain further understanding of the nature of the acts.

.11 The additional audit procedures considered necessary, if any, might include procedures such as the following:

- a. Examine supporting documents, such as invoices, canceled checks, and agreements and compare with accounting records.
- b. Confirm significant information concerning the matter with the other party to the transaction or with intermediaries, such as banks or lawyers.
- c. Determine whether the transaction has been properly authorized.
- d. Consider whether other similar transactions or events may have occurred, and apply procedures to identify them.

The Auditor's Response to Detected Illegal Acts

.12 When the auditor concludes, based on information obtained and, if necessary, consultation with legal counsel, that an illegal act has or is likely to have occurred, the auditor should consider the effect on the financial statements as well as the implications for other aspects of the audit.

The Auditor's Consideration of Financial Statement Effect

.13 In evaluating the materiality of an illegal act that comes to his attention, the auditor should consider both the quantitative and qualitative materiality of the act. For example, section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .59, states that "an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue." [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

.14 The auditor should consider the effect of an illegal act on the amounts presented in financial statements including contingent monetary effects, such as fines, penalties and damages. Loss contingencies resulting from illegal acts that may be required to be disclosed should be evaluated in the same manner as other loss contingencies. Examples of loss contingencies that may arise from an illegal act are: threat of expropriation of assets, enforced discontinuance of operations in another country, and litigation.

.15 The auditor should evaluate the adequacy of disclosure in the financial statements of the potential effects of an illegal act on the entity's operations. If material revenue or earnings are derived from transactions involving illegal acts, or if illegal acts create significant unusual risks associated with material revenue or earnings, such as loss of a significant business relationship, that information should be considered for disclosure.

Implications for Audit

.16 The auditor should consider the implications of an illegal act in relation to other aspects of the audit, particularly the reliability of representations of management. The implications of particular illegal acts will depend on the relationship of the perpetration and concealment, if any, of the illegal act to specific control procedures and the level of management or employees involved.

Communication With Those Charged With Governance

.17 The auditor should assure himself that those charged with governance are adequately informed with respect to illegal acts that come to the auditor's attention.^[1] The auditor need not communicate matters that are clearly inconsequential and may reach agreement in advance with the audit committee on the nature of such matters to be communicated. The communication should describe the act, the circumstances of its occurrence, and the effect on the financial statements. Senior management may wish to have its remedial actions communicated to the audit committee simultaneously. Possible remedial actions include disciplinary action against involved personnel, seeking restitution, adoption of preventive or corrective company policies, and modifications of specific control activities. If senior management is involved in an illegal act, the auditor should communicate directly with those charged with governance. The communication may be oral or written. If the communication is oral, the auditor should document it. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Effect on the Auditor's Report

.18 If the auditor concludes that an illegal act has a material effect on the financial statements, and the act has not been properly accounted for or disclosed, the auditor should express a qualified opinion or an adverse opinion on the financial statements taken as a whole, depending on the materiality of the effect on the financial statements.

.19 If the auditor is precluded by the client from obtaining sufficient appropriate audit evidence to evaluate whether an illegal act that could be material to the financial statements has, or is likely to have, occurred, the auditor generally should disclaim an opinion on the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.20 If the client refuses to accept the auditor's report as modified for the circumstances described in paragraphs .18 and .19, the auditor should withdraw from the engagement and indicate the reasons for withdrawal in writing to those charged with governance. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.21 The auditor may be unable to determine whether an act is illegal because of limitations imposed by the circumstances rather than by the client or because of uncertainty associated with interpretation of applicable laws or regulations or surrounding facts. In these circumstances, the auditor should consider the effect on his report.²

^[1] [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

² See section 508, *Reports on Audited Financial Statements*.

Other Considerations in an Audit in Accordance With Generally Accepted Auditing Standards

.22 In addition to the need to withdraw from the engagement, as described in paragraph .20, the auditor may conclude that withdrawal is necessary when the client does not take the remedial action that the auditor considers necessary in the circumstances even when the illegal act is not material to the financial statements. Factors that should affect the auditor's conclusion include the implications of the failure to take remedial action, which may affect the auditor's ability to rely on management representations, and the effects of continuing association with the client. In reaching a conclusion on such matters, the auditor may wish to consult with his own legal counsel.

.23 Disclosure of an illegal act to parties other than the client's senior management and those charged with governance is not ordinarily part of the auditor's responsibility, and such disclosure would be precluded by the auditor's ethical or legal obligation of confidentiality, unless the matter affects his opinion on the financial statements. The auditor should recognize, however, that in the following circumstances a duty to notify parties outside the client may exist:³

- a. When the entity reports an auditor change under the appropriate securities law on Form 8-K⁴
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*⁵
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive financial assistance from a government agency

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may wish to consult with legal counsel before discussing illegal acts with parties outside the client. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Responsibilities in Other Circumstances

.24 An auditor may accept an engagement that entails a greater responsibility for detecting illegal acts than that specified in this section. For example, a governmental unit may engage an independent auditor to perform an audit in accordance with the Single Audit Act of 1984. In such an engagement,

³ Auditors may be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in section 10A(b)1 of the Securities Exchange Act of 1934) to make a report to the Securities and Exchange Commission relating to an illegal act that has a material effect on the financial statements. [Footnote added, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

⁴ Disclosure to the Securities and Exchange Commission may be necessary if, among other matters, the auditor withdraws because the board of directors has not taken appropriate remedial action. Such failure may be a reportable disagreement on Form 8-K. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

⁵ In accordance with section 315, communications between predecessor and successor auditors require the specific permission of the client. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

the independent auditor is responsible for testing and reporting on the governmental unit's compliance with certain laws and regulations applicable to Federal financial assistance programs. Also, an independent auditor may undertake a variety of other special engagements. For example, a corporation's board of directors or its audit committee may engage an auditor to apply agreed-upon procedures and report on compliance with the corporation's code of conduct under the attestation standards.

Effective Date

.25 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible.

AU Section 318

Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained

(Supersedes SAS No. 55.)

Source: SAS No. 110.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

Introduction

.01 This section establishes standards and provides guidance on determining overall responses and designing and performing further audit procedures to respond to the assessed risks of material misstatement¹ at the financial statement and relevant assertion levels in a financial statement audit, and on evaluating the sufficiency and appropriateness of the audit evidence obtained. In particular, this section provides guidance about implementing the third standard of field work, as follows:

The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit.

.02 The following is an overview of this standard:

- *Overall responses.* This section provides guidance to the auditor in determining overall responses to address risks of material misstatement at the financial statement level and provides guidance on the nature of those responses.
- *Audit procedures responsive to risks of material misstatement at the relevant assertion level.* This section provides guidance to the auditor in designing and performing further audit procedures, including tests of the operating effectiveness of controls, where relevant or necessary, and substantive procedures, whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. In addition, this section includes matters the auditor should consider in determining the nature, timing, and extent of such further audit procedures.
- *Evaluating the sufficiency and appropriateness of the audit evidence obtained.* This section provides guidance to the auditor in evaluating whether the risk assessments remain appropriate and to conclude whether sufficient appropriate audit evidence has been obtained.
- *Documentation.* This section provides related documentation guidance.

¹ Risk of material misstatement is described as the auditor's combined assessment of inherent risk and control risk. See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for the definition of and discussion about risk of material misstatement.

.03 To reduce audit risk to an acceptably low level, the auditor should determine overall responses to address the assessed risks of material misstatement at the financial statement level and should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level² The overall responses and the nature, timing, and extent of the further audit procedures to be performed are matters for the professional judgment of the auditor.

Overall Responses³

.04 The auditor's overall responses to address the assessed risks of material misstatement at the financial statement level may include emphasizing to the audit team the need to maintain professional skepticism in gathering and evaluating audit evidence, assigning more experienced staff or those with specialized skills or using specialists, providing more supervision, or incorporating additional elements of unpredictability in the selection of further audit procedures to be performed. Additionally, the auditor may make general changes to the nature, timing, or extent of further audit procedures as an overall response, for example, performing substantive procedures at period end instead of at an interim date.

.05 The assessment of the risks of material misstatement at the financial statement level is affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and thus, for example, allow the auditor to perform some audit procedures at an interim date rather than at period end. If there are weaknesses in the control environment, the auditor should consider an appropriate response. For example, the auditor could perform audit procedures as of the period end rather than at an interim date, seek more extensive audit evidence from substantive procedures, modify the nature of audit procedures to obtain more persuasive audit evidence, or increase the number of locations to be included in the audit scope.

.06 Such considerations, therefore, have a significant bearing on the auditor's general approach, for example, an emphasis on substantive procedures (substantive approach), or an approach that uses tests of controls as well as substantive procedures (combined approach).

Audit Procedures Responsive to Risks of Material Misstatement at the Relevant Assertion Level

.07 The auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement at the relevant assertion level. The purpose is to provide a clear linkage between the nature, timing, and extent of the auditor's further audit procedures and the risk assessments. In designing further audit procedures, the auditor should consider such matters as:

- The significance of the risk
- The likelihood that a material misstatement will occur

² See paragraph .102 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

³ See paragraphs .13 through .18 of section 311, *Planning and Supervision*, for further guidance on the auditor's overall audit strategy.

- The characteristics of the class of transactions, account balance, or disclosure involved
- The nature of the specific controls used by the entity, in particular, whether they are manual or automated
- Whether the auditor expects to obtain audit evidence to determine if the entity's controls are effective in preventing or detecting material misstatements

The nature of the audit procedures is of most importance in responding to the assessed risks.

.08 The auditor's assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. In some cases, the auditor may determine that performing only substantive procedures is appropriate for specific relevant assertions and risks. In those circumstances, the auditor may exclude the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures⁴ have not identified any effective controls relevant to the assertion or because testing the operating effectiveness of controls would be inefficient. However, the auditor needs to be satisfied that performing only substantive procedures for the relevant assertions would be effective in reducing detection risk to an acceptably low level.⁵ The auditor often will determine that a combined audit approach using both tests of the operating effectiveness of controls and substantive procedures is an effective audit approach.

.09 Regardless of the audit approach selected, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure as specified by paragraph .51. Because effective internal controls generally reduce, but do not eliminate, risk of material misstatement, tests of controls reduce, but do not eliminate, the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes such as examining the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to period end) due to the risk of management override of controls or the subjectivity of the account balance.

.10 In the case of very small entities, there may not be many control activities that could be identified by the auditor. For this reason, the auditor's further audit procedures are likely to be primarily substantive procedures. In such cases, in addition to the matters referred to in paragraph .07, the auditor should consider whether in the absence of controls it is possible to obtain sufficient appropriate audit evidence.

Considering the Nature, Timing, and Extent of Further Audit Procedures

Nature

.11 The nature of further audit procedures refers to their purpose (tests of controls or substantive procedures) and their type, that is, inspection,

⁴ Audit procedures performed for the purpose of assessing risk (risk assessment procedures) are discussed in paragraphs .06 through .13 of section 314.

⁵ Paragraphs .117 through .120 of section 314 describe circumstances in which the auditor may determine that it is not possible or practicable to reduce detection risk at the relevant assertion level to an appropriately low level with audit evidence obtained only from substantive procedures.

observation, inquiry, confirmation, recalculation, reperformance, or analytical procedures. Certain audit procedures may be more appropriate for some assertions than others. For example, in relation to revenue, tests of controls may be most responsive to the assessed risk of misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of misstatement of the occurrence assertion.

.12 The auditor's selection of audit procedures is based on the risk of material misstatement. The higher the auditor's assessment of risk, the more reliable and relevant is the audit evidence sought by the auditor from substantive procedures. This may affect both the types of audit procedures to be performed and their combination. For example, the auditor may confirm the completeness of the terms of a contract with a third party, in addition to inspecting the document and obtaining management's representation.

.13 In determining the audit procedures to be performed, the auditor should consider the reasons for the assessment of the risk of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure. This includes considering both the particular characteristics of each class of transactions, account balance, or disclosure (that is, the inherent risks) and whether the auditor's risk assessment takes account of the entity's controls (that is, the control risk). For example, if the auditor considers that there is a lower risk that a material misstatement may occur because of the particular characteristics of a class of transactions (without consideration of the related controls), the auditor may determine that substantive analytical procedures alone may provide sufficient appropriate audit evidence. On the other hand, if the auditor expects that there is a lower risk that a material misstatement may occur because an entity has effective controls and the auditor intends to design substantive procedures based on the effective operation of those controls, then the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness. This may be the case for a class of transactions of reasonably uniform, noncomplex characteristics that are routinely processed and controlled by the entity's information system.

.14 The auditor should obtain audit evidence about the accuracy and completeness of information produced by the entity's information system when that information is used in performing audit procedures. For example, if the auditor uses nonfinancial information or budget data produced by the entity's information system in performing audit procedures, such as substantive analytical procedures or tests of controls, the auditor should obtain audit evidence about the accuracy and completeness of such information. See paragraph .57 of this section and paragraph .10 of section 326, *Audit Evidence*, for further guidance.

Timing

.15 Timing refers to when audit procedures are performed or the period or date to which the audit evidence applies.

.16 The auditor may perform tests of controls or substantive procedures at an interim date or at period end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters. If the auditor performs tests of the operating effectiveness of controls

or substantive procedures before period end, the auditor should consider the additional evidence that is necessary for the remaining period (see paragraphs .37 through .39, and .58 through .65).

.17 In considering when to perform audit procedures, the auditor should also consider such matters as:

- The control environment
- When relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times)
- The nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period end)
- The period or date to which the audit evidence relates

.18 Certain audit procedures can be performed only at or after period end, for example, agreeing the financial statements to the accounting records, or examining adjustments made during the course of preparing the financial statements. If there is a risk that the entity may have entered into improper sales contracts or that transactions may not have been finalized at period end, the auditor should perform procedures to respond to that specific risk. For example, when transactions are individually material or an error in cutoff may lead to material misstatement, the auditor should inspect transactions near the period end.

Extent

.19 Extent refers to the quantity of a specific audit procedure to be performed, for example, a sample size or the number of observations of a control activity. The extent of an audit procedure is determined by the judgment of the auditor after considering the tolerable misstatement, the assessed risk of material misstatement, and the degree of assurance the auditor plans to obtain. In particular, the auditor may increase the extent of audit procedures as the risk of material misstatement increases. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk and reliable; therefore, the nature of the audit procedure is the most important consideration.

.20 An auditor may use techniques such as computer-assisted audit techniques (CAATs) to enable him or her to extensively test electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to identify transactions with specific characteristics, or to test an entire population instead of a sample.

.21 Valid conclusions may ordinarily be drawn using sampling approaches. However, if the sample size is too small, the sampling approach or the method of selection is not appropriate to achieve the specific audit objective, or exceptions are not appropriately followed up, there will be an unacceptable risk that the auditor's conclusion based on a sample may be different from the conclusion reached if the entire population was subjected to the same audit procedure. Section 350, *Audit Sampling*, provides guidance on planning, performing, and evaluating audit samples.

.22 This section regards the use of different audit procedures in combination as an aspect of the nature of testing as discussed above. However, the auditor should consider whether the extent of testing is appropriate when performing different audit procedures in combination.

Tests of Controls

.23 The auditor should perform tests of controls when the auditor's risk assessment⁶ includes an expectation of the operating effectiveness of controls or when substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.24 When, in accordance with paragraph .117 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the auditor has determined that it is not possible or practicable to reduce the detection risks at the relevant assertion level to an acceptably low level with audit evidence obtained only from substantive procedures, he or she should perform tests of controls to obtain audit evidence about their operating effectiveness. For example, as discussed in paragraphs .119 and .120 of section 314, the auditor may find it impossible to design effective substantive procedures that by themselves provide sufficient appropriate audit evidence at the relevant assertion level when an entity conducts its business using information technology (IT) and no documentation of transactions is produced or maintained, other than through the IT system.

.25 Tests of the operating effectiveness of controls are performed only on those controls that the auditor has determined are suitably designed to prevent or detect a material misstatement in a relevant assertion. Paragraphs .106 through .108 of section 314 discuss the identification of controls at the relevant assertion level likely to prevent or detect a material misstatement in a class of transactions, account balance, or disclosure.

.26 Testing the operating effectiveness of controls is different from obtaining audit evidence that controls have been implemented. When obtaining audit evidence of implementation by performing risk assessment procedures,⁷ the auditor should determine that the relevant controls exist and that the entity is using them. When performing tests of controls, the auditor should obtain audit evidence that controls operate effectively. This includes obtaining audit evidence about how controls were applied at relevant times during the period under audit, the consistency with which they were applied, and by whom or by what means they were applied. If substantially different controls were used at different times during the period under audit, the auditor should consider each separately. The auditor may determine that testing the operating effectiveness of controls at the same time as evaluating their design and obtaining audit evidence of their implementation is efficient.

.27 Although some risk assessment procedures that the auditor performs to evaluate the design of controls and to determine that they have been implemented may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, because, generally, IT processing is inherently consistent, performing risk assessment procedures to determine whether an automated control has been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of IT general controls including computer security and program change control (see paragraph .49). Also, in obtaining an understanding of the control environment, the auditor may have made inquiries

⁶ The auditor's strategy reflects the level of assurance the auditor plans to obtain regarding controls.

⁷ Paragraph .06 of section 314 discusses the use of risk assessment procedures to obtain an understanding of the entity and its environment, including its internal control, that the auditor uses to support assessments of the risks of material misstatement of the financial statements.

about management's use of budgets, observed management's comparison of monthly budgeted and actual expenses, and inspected reports pertaining to the investigation of variances between budgeted and actual amounts. These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented and may also provide audit evidence about the effectiveness of the operation of budgeting policies in preventing or detecting material misstatements in the classification of expenses. In such circumstances, the auditor should consider whether the audit evidence provided by those audit procedures is sufficient.

Nature of Tests of Controls

.28 The auditor should select audit procedures to obtain assurance about the operating effectiveness of controls. As the planned level of assurance increases, the auditor should seek more reliable or more extensive audit evidence. In circumstances in which the auditor adopts an approach consisting primarily of tests of controls, in particular related to those risks where it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures, the auditor should perform tests of controls to obtain a higher level of assurance about their operating effectiveness. Tests of the operating effectiveness of controls ordinarily include procedures such as inquiries of appropriate entity personnel; inspection of documents, reports, or electronic files, indicating performance of the control; observation of the application of the control; and reperformance of the application of the control by the auditor.

.29 The auditor should perform other audit procedures in combination with inquiry to test the operating effectiveness of controls. Tests of the operating effectiveness of controls ordinarily include the same types of audit procedures used to evaluate the design and implementation of controls, and may also include reperformance of the application of the control by the auditor. Since inquiry alone is not sufficient, the auditor should use a combination of audit procedures to obtain sufficient appropriate audit evidence regarding the operating effectiveness of controls. Those controls subject to testing by performing inquiry combined with inspection or reperformance ordinarily provide more assurance than those controls for which the audit evidence consists solely of inquiry and observation. For example, an auditor may inquire about and observe the entity's procedures for opening the mail and processing cash receipts to test the operating effectiveness of controls over cash receipts. Because an observation is pertinent only at the point in time at which it is made, the auditor should supplement the observation with inquiries of entity personnel and may also inspect documentation about the operation of such controls at other times during the audit period in order to obtain sufficient appropriate audit evidence.

.30 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about whether the control was operating effectively at relevant times during the period under audit. For some controls, operating effectiveness is evidenced by documentation. In such circumstances, the auditor may decide to inspect the documentation to obtain audit evidence about operating effectiveness. For other controls, however, such documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as assignment of authority and responsibility, or for some types of control activities, such as control activities performed by a computer. In such circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures such as observation or the use of CAATs.

.31 In designing tests of controls, the auditor should consider the need to obtain audit evidence supporting the effective operation of controls directly related to the relevant assertions as well as other indirect controls on which these controls depend. For example, the auditor may identify a user review of an exception report of credit sales over a customer's authorized credit limit as a direct control related to an assertion. In this case, the auditor should consider the effectiveness of the user's review of the report and also the controls related to the accuracy of the information in the report (for example, the IT general and application controls).

.32 In the case of an automated application control, because of the inherent consistency of IT processing, audit evidence about the implementation of the control, when considered in combination with audit evidence obtained regarding the operating effectiveness of the entity's IT general controls (and in particular, security and change controls), may provide substantial audit evidence about its operating effectiveness during the relevant period.

.33 When responding to the risk assessment, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. The objective of tests of controls is to evaluate whether a control operated effectively. The objective of tests of details is to support relevant assertions or detect material misstatements at the relevant assertion level. Although these objectives are different, both may be accomplished concurrently through performance of a test of controls and a test of details on the same transaction, known as a dual-purpose test. For example, the auditor may examine an invoice to determine whether it has been approved and to provide substantive evidence of a transaction. The auditor should carefully consider the design and evaluation of such tests in order to accomplish both objectives. Furthermore, when performing such tests the auditor should consider how the outcome of the tests of controls may affect the auditor's determination about the extent of substantive procedures to be performed. For example, if controls are found to be ineffective, the auditor should consider whether the sample size for substantive procedures should be increased from that originally planned.

.34 The absence of misstatements detected by a substantive procedure does not provide audit evidence that controls related to the relevant assertion being tested are effective; however, misstatements that the auditor detects by performing substantive procedures should be considered by the auditor when assessing the operating effectiveness of related controls. A misstatement detected by the auditor's procedures that was not identified by the entity is evidence of a deficiency in internal control and may be a significant deficiency or a material weakness. Such a misstatement, if material, is an indicator of a material weakness in internal control. [Revised December 2008 to reflect conforming changes due to the issuance of SAS No. 115.]⁸

Timing of Tests of Controls

.35 The timing of tests of controls depends on the auditor's objective and the period of reliance on those controls. When the auditor tests controls at a particular time, the auditor may obtain audit evidence that the controls operated effectively only at that time. However, when the auditor tests controls throughout a period, the auditor may obtain audit evidence of the effectiveness of the operation of the controls during that period.

⁸ See paragraph .15 of AU section 325, *Communicating Internal Control Related Matters Identified in an Audit*. [Revised December 2008 to reflect conforming changes due to the issuance of SAS No. 115.]

.36 The auditor should test controls for the particular time, or throughout the period, for which the auditor intends to rely on those controls. Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose, for example, when testing controls over the entity's physical inventory counting at the period end. If, on the other hand, the auditor needs audit evidence of the effectiveness of a control over a period, audit evidence pertaining only to a point in time may be insufficient, and the auditor should supplement those tests with other tests of controls that are capable of providing audit evidence that the control operated effectively at relevant times during the period under audit. For example, for a control embedded in a computer program, the auditor may test the operation of the control at a particular point in time to obtain audit evidence about whether the control is operating effectively at that point in time. The auditor then may perform tests of controls directed toward obtaining audit evidence about whether the control operated consistently during the audit period, such as tests of general controls pertaining to the modification and use of that computer program during the audit period. Such additional tests may be made as part of the tests of controls over the entity's monitoring of controls.

.37 When the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor should determine what additional audit evidence should be obtained for the remaining period.

.38 In making that determination, the auditor should consider the significance of the assessed risks of material misstatement at the relevant assertion level, the specific controls that were tested during the interim period, the degree to which audit evidence about the operating effectiveness of those controls was obtained, the length of the remaining period, the extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls, and the control environment. The auditor should obtain audit evidence about the nature and extent of any significant changes in internal control, including changes in the information system, processes, and personnel that occur subsequent to the interim period.

.39 Additional audit evidence may be obtained, for example, by extending the testing of the operating effectiveness of controls over the remaining period, or testing the entity's monitoring of controls.

.40 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in prior audits, the auditor should obtain audit evidence about whether changes in those specific controls have occurred subsequent to the prior audit. The auditor should obtain audit evidence about whether such changes have occurred by a combination of observation, inquiry, and inspection to confirm the understanding of those specific controls. Paragraph .24 of section 326 states that the auditor should perform audit procedures to establish the continuing relevance of audit evidence obtained in prior periods when the auditor plans to use such audit evidence in the current period. For example, in performing the prior audit, the auditor may have determined that an automated control was functioning as intended. The auditor should obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning, for example, through inquiries of management and the inspection of logs to indicate whether controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls.

.41 If the auditor plans to rely on controls that have changed since they were last tested, the auditor should test the operating effectiveness of such controls in the current audit. Changes may affect the relevance of the audit

evidence obtained in prior periods such that it may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of prior-period audit evidence; however, a change that causes data to be accumulated or calculated differently does affect it.

.42 If, based on the understanding of the entity and its environment, the auditor plans to rely on controls that have not changed since they were last tested, the auditor should test the operating effectiveness of such controls at least once in every third year in an annual audit.⁹ As indicated in paragraphs .40 and .45, the auditor may not rely on audit evidence about the operating effectiveness of controls obtained in prior audits for controls that have changed since they were last tested or for controls that mitigate a significant risk. The auditor's decision about whether to rely on audit evidence obtained in prior audits for other controls is a matter of professional judgment. In addition, the length of time between retesting such controls is also a matter of professional judgment, but it should not exceed more than two years. The auditor should test a control at least once in every third year in an annual audit, because as time elapses between testing a control, the audit evidence provided in the current audit period about the operating effectiveness of a control tested in a prior audit becomes less relevant and reliable (see paragraph .44).

.43 In considering whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in prior audits and, if so, the length of time that may elapse before retesting a control, the auditor should consider:

- The effectiveness of other elements of internal control, including the control environment, the entity's monitoring of controls, and the entity's risk assessment process.
- The risks arising from the characteristics of the control, including whether controls are manual or automated (see paragraphs .57 through .63 of section 314 for a discussion of specific risks arising from manual and automated elements of a control).
- The effectiveness of IT general controls.
- The effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control from tests of operating effectiveness in prior audits.
- Whether the lack of a change in a particular control poses a risk due to changing circumstances.
- The risk of material misstatement and the extent of reliance on the control.

In general, the higher the risk of material misstatement, or the greater the reliance on controls, the shorter the time elapsed, if any, is likely to be. Factors that ordinarily decrease the period for retesting a control, or result in not relying on audit evidence obtained in prior audits at all, include:

- A weak control environment.
- Weak monitoring controls.
- A significant manual element to the relevant controls.
- Personnel changes that significantly affect the application of the control.

⁹ This guidance may not be appropriate for audits not performed at least on an annual basis.

- Changing circumstances that indicate the need for changes in the control.
- Weak IT general controls.

.44 When there are a number of controls for which the auditor determines that it is appropriate to use audit evidence obtained in prior audits, the auditor should test the operating effectiveness of some controls each year. The purpose of such tests of operating effectiveness is to avoid the possibility that the auditor might apply the approach of paragraph .42 to all controls on which the auditor proposes to rely, but test all those controls in a single audit period with no testing of controls in the subsequent two audit periods. In addition to providing audit evidence about the operating effectiveness of the controls being tested in the current audit, such tests provide collateral evidence about the continuing effectiveness of the control environment and therefore contribute to the decision about whether it is appropriate to rely on audit evidence obtained in prior audits. Therefore, when the auditor determines in accordance with paragraphs .40 through .43 that it is appropriate to use audit evidence obtained in prior audits for a number of controls, the auditor should plan to test a sufficient portion of the controls in each audit period, so that at a minimum, each control is tested at least every third audit.

.45 When, in accordance with paragraph .110 of section 314, the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, and if the auditor plans to rely on the operating effectiveness of controls intended to mitigate that significant risk, the auditor should obtain audit evidence about the operating effectiveness of those controls from tests of controls performed in the current period. The greater the risk of material misstatement, the more audit evidence the auditor should obtain that controls are operating effectively. Accordingly, although the auditor should consider information obtained in prior audits in designing tests of controls to mitigate a significant risk, the auditor should not rely on audit evidence about the operating effectiveness of controls over such risks obtained in a prior audit, but instead should obtain audit evidence about the operating effectiveness of controls over such risks in the current period.

Extent of Tests of Controls

.46 The auditor should design sufficient tests of controls to obtain sufficient appropriate audit evidence that the controls are operating effectively throughout the period of reliance. Factors that the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period.
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control.
- The relevance and reliability of the audit evidence to be obtained in supporting that the control prevents, or detects and corrects, material misstatements at the relevant assertion level.
- The extent to which audit evidence is obtained from tests of other controls related to the relevant assertion.
- The extent to which the auditor plans to rely on the operating effectiveness of the control in the assessment of risk (and thereby reduce substantive procedures based on the reliance of such control).
- The expected deviation from the control.

Considering the above factors, when a control is applied on a transaction basis (for example, matching approved purchase orders to supplier invoices) and if the control operates frequently, the auditor should consider using an audit sampling technique to obtain reasonable assurance of the operation of the control. When a control is applied on a periodic basis (for example, monthly reconciliation of accounts receivable subsidiary ledger to the general ledger) the auditor should consider guidance appropriate for testing smaller populations (for example, testing the control application for two months and reviewing evidence the control operated in other months or reviewing other months for unusual items). Refer further to section 350, *Audit Sampling*, and the related Audit Guide.

.47 To reduce the extent of substantive procedures in an audit, the tests of controls performed by the auditor need to be sufficient to determine the operating effectiveness of the controls at the relevant assertion level and the level of planned reliance (see paragraph .50).

.48 The auditor should increase the extent of tests of controls the more the auditor relies on the operating effectiveness of controls in the assessment of risk. In addition, as the rate of expected deviation from a control increases, the auditor should increase the extent of testing of the control. However, the auditor should consider whether the rate of expected deviation indicates that obtaining audit evidence from the performance of tests of controls will not be sufficient to reduce the control risk at the relevant assertion level. If the rate of expected deviation is expected to be too high, the auditor may determine that tests of controls for a particular assertion may be inappropriate.

.49 Generally, IT processing is inherently consistent; therefore, the auditor may be able to limit the testing to one or a few instances of the control operation. An automated control should function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor should perform tests to determine that the control continues to function effectively. Such tests might include determining that changes to the program are not made without being subject to the appropriate program change controls, that the authorized version of the program is used for processing transactions, and that other relevant general controls are effective. Such tests also might include determining that changes to the programs have not been made, as may be the case when the entity uses packaged software applications without modifying or maintaining them. For example, the auditor may test the administration of IT security to obtain audit evidence that unauthorized access has not occurred during the period.

Substantive Procedures

.50 Substantive procedures are performed to detect material misstatements at the relevant assertion level, and include tests of details of classes of transactions, account balances, and disclosures and substantive analytical procedures. The auditor should plan and perform substantive procedures to be responsive to the related assessment of the risk of material misstatement.

.51 Regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. This reflects the fact that the auditor's assessment of risk is judgmental and may not be sufficiently precise to identify all risks of material misstatement. Further, there are inherent limitations to internal control, including management

override, and even effective internal controls generally reduce, but do not eliminate, the risk of material misstatement.

.52 The auditor's substantive procedures should include the following audit procedures related to the financial statement reporting process:

- Agreeing the financial statements, including their accompanying notes, to the underlying accounting records; and
- Examining material journal entries and other adjustments made during the course of preparing the financial statements.

The nature and extent of the auditor's examination of journal entries and other adjustments depend on the nature and complexity of the entity's financial reporting system and the associated risks of material misstatement.

.53 When, in accordance with paragraph .110 of section 314, the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a risk that management is inflating sales by improperly recognizing revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external written confirmation requests not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor may find it effective to supplement such external written confirmations with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms.

.54 When the approach to significant risks consists only of substantive procedures, the audit procedures appropriate to address such significant risks consist of tests of details only, or a combination of tests of details and substantive analytical procedures. The auditor should consider the guidance in paragraphs .55 through .68 in designing the nature, timing, and extent of substantive procedures for significant risks. To obtain sufficient appropriate audit evidence, the substantive procedures related to significant risks are most often designed to obtain audit evidence with higher reliability.

Nature of Substantive Procedures

.55 Substantive procedures include tests of details and substantive analytical procedures. Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Tests of details are ordinarily more appropriate to obtain audit evidence regarding certain relevant assertions about account balances, including existence and valuation. The auditor should plan substantive procedures to be responsive to the planned level of detection risk. In some situations, the auditor may determine that performing only substantive analytical procedures may be sufficient to reduce the planned level of detection risk to an acceptably low level. For example, the auditor may determine that performing only substantive analytical procedures is responsive to the planned level of detection risk for an individual class of transactions where the auditor's assessment of risk has been reduced by obtaining audit evidence from performance of tests of the operating effectiveness of controls. In other situations, the auditor may determine that tests of details only are appropriate, or that a combination of substantive analytical procedures and tests of details is most responsive to the assessed risks. The auditor's determination as to the substantive procedures that are most responsive to the planned level of detection risk is affected by whether the auditor

has obtained audit evidence about the operating effectiveness of controls. The Appendix [paragraph .79] includes examples of substantive procedures that may be performed on inventories of a manufacturing entity.

.56 The auditor should design tests of details responsive to the assessed risk with the objective of obtaining sufficient appropriate audit evidence to achieve the planned level of assurance at the relevant assertion level. In designing substantive procedures related to the existence or occurrence assertion, the auditor should select from items contained in a financial statement amount and should obtain the relevant audit evidence. On the other hand, in designing audit procedures related to the completeness assertion, the auditor should select from audit evidence indicating that an item should be included in the relevant financial statement amount and should investigate whether that item is so included. The knowledge gained when understanding the business and its environment should be helpful in selecting the nature, timing, and extent of audit procedures related to the completeness assertion. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

.57 In designing substantive analytical procedures, the auditor should consider such matters as:

- The suitability of using substantive analytical procedures, given the assertions
- The reliability of the data, whether internal or external, from which the expectation of recorded amounts or ratios is developed
- Whether the expectation is sufficiently precise to identify the possibility of a material misstatement at the desired level of assurance
- The amount of any difference in recorded amounts from expected values that is acceptable

The auditor should consider testing the controls, if any, over the entity's preparation of information to be used by the auditor in applying analytical procedures. When such controls are effective, the auditor has greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. When designing substantive analytical procedures, the auditor should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting some types of fraud. Alternatively, the auditor may consider whether the information was subjected to audit testing in the current or prior period. In determining the audit procedures to apply to the information upon which the expectation for substantive analytical procedures is based, the auditor should consider the guidance in paragraph .14.

Timing of Substantive Procedures

.58 In some circumstances, substantive procedures may be performed at an interim date. When substantive procedures are performed at an interim date, the auditor should perform further substantive procedures or substantive procedures combined with tests of controls to cover the remaining period that provide a reasonable basis for extending the audit conclusions from the interim date to the period end.

.59 Performing substantive procedures at an interim date increases the risk that misstatements that may exist at the period end are not detected by the auditor. This risk increases as the remaining period is lengthened. In considering whether to perform substantive procedures at an interim date, the auditor should consider such factors as:

- The control environment and other relevant controls
- The availability of information at a later date that is necessary for the auditor's procedures
- The objective of the substantive procedure
- The assessed risk of material misstatement
- The nature of the class of transactions or account balance and relevant assertions
- The ability of the auditor to reduce the risk that misstatements that exist at the period end are not detected by performing appropriate substantive procedures or substantive procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that exist at period end are not detected

.60 Although it is not necessary to obtain audit evidence about the operating effectiveness of controls in order to have a reasonable basis for extending audit conclusions from an interim date to the period end, the auditor should consider whether performing only substantive procedures to cover the remaining period is sufficient. If the auditor concludes that substantive procedures alone would not be sufficient to cover the remaining period, tests of the operating effectiveness of relevant controls should be performed or the substantive procedures should be performed as of the period end.

.61 In circumstances in which the auditor has identified risks of material misstatement due to fraud, the auditor's responses to address those risks may include changing the timing of audit procedures. For example, the auditor might conclude that, given the risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period-end reporting date would not be effective. In such circumstances, the auditor might conclude that substantive procedures should be performed at or near the end of the reporting period to best address an identified risk of material misstatement due to fraud.¹⁰

.62 When performing substantive procedures at an interim date, the auditor may compare and may reconcile information concerning the balance at the period end with the comparable information at the interim date to identify amounts that appear unusual, investigates any such amounts, and may perform substantive analytical procedures or tests of details to test the intervening period. When the auditor plans to perform substantive analytical procedures with respect to the intervening period, the auditor should consider whether the period-end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition. The auditor should also consider whether the entity's procedures for analyzing and adjusting such classes of transactions or account balances at interim dates and for establishing proper accounting cutoffs are appropriate. In addition, the auditor should consider whether the information system relevant to financial reporting will provide information concerning the balances at the period end and the transactions in the remaining period that is sufficient to

¹⁰ See paragraph .52 of section 316, *Consideration of Fraud in a Financial Statement Audit*.

permit investigation of (a) significant unusual transactions or entries (including those at or near the period end); (b) other causes of significant fluctuations, or expected fluctuations that did not occur; and (c) changes in the composition of the classes of transactions or account balances.

.63 If misstatements are detected in classes of transactions or account balances at an interim date, the auditor should consider modifying the related assessment of risk and the planned nature, timing, or extent of the substantive procedures covering the remaining period that relate to such classes of transactions or account balances, or the auditor may extend or may repeat such audit procedures at the period end.

.64 The use of audit evidence from the performance of substantive procedures in a prior audit is not sufficient to reduce detection risk to an acceptably low level in the current period. In most cases, audit evidence from the performance of substantive procedures in a prior audit provides little or no audit evidence for the current period. In order for audit evidence obtained in a prior audit to be used in the current period as substantive audit evidence, the audit evidence and the related subject matter must not fundamentally change. An example of audit evidence obtained from the performance of substantive procedures in a prior period that may be relevant in the current year is prior audit evidence substantiating the purchase cost of a building or building addition. As specified by paragraph .24 of section 326, if the auditor plans to use audit evidence obtained from the performance of substantive procedures in a prior audit, the auditor should perform audit procedures during the current period to establish the continuing relevance of the audit evidence.

.65 The timing of audit procedures also involves consideration of whether related audit procedures are properly coordinated. This includes, for example:

- a. Coordinating the audit procedures applied to related-party transactions and balances.¹¹
- b. Coordinating the testing of interrelated accounts and accounting cutoffs.
- c. Maintaining temporary audit control over assets that are readily negotiable and simultaneously testing such assets and cash on hand and in banks, bank loans, and other related items.

Decisions about coordinating related audit procedures should be made in the light of the risks of material misstatement and of the particular audit procedures that could be applied, either for the remaining period or at period end, or both.

Extent of the Performance of Substantive Procedures

.66 The greater the risk of material misstatement, the less detection risk that can be accepted; consequently, the greater the extent of substantive procedures. Because the risk of material misstatement includes consideration of the effectiveness of internal control, the extent of substantive procedures may be reduced by satisfactory results from tests of the operating effectiveness of controls. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.67 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size, which is affected by the planned level of detection risk, tolerable misstatement, expected misstatement, and nature of the

¹¹ See section 334, *Related Parties*.

population. However, the auditor should also consider other matters, including whether it is more effective to use other selective means of testing, such as selecting large or unusual items from a population as opposed to performing sampling or stratifying the population into homogeneous sub-populations for sampling. Section 350 contains guidance on the use of sampling and other means of selecting items for testing.

.68 In planning substantive analytical procedures, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced primarily by tolerable misstatement and should be consistent with the desired level of assurance. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balance, class of transactions, or disclosure could aggregate to an unacceptable amount. In designing substantive analytical procedures, the auditor should increase the desired level of assurance as the risk of material misstatement increases. Section 329, *Analytical Procedures*, contains guidance on the application of analytical procedures during an audit.

Adequacy of Presentation and Disclosure

.69 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, are in accordance with generally accepted accounting principles. The auditor should consider whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information. The presentation of financial statements in conformity with generally accepted accounting principles also includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their related notes, including, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the bases of amounts set forth. The auditor should consider whether management should have disclosed a particular matter in light of the circumstances and facts of which the auditor is aware at the time. In performing the evaluation of the overall presentation of the financial statements, including the related disclosures, the auditor should consider the assessed risk of material misstatement at the relevant assertion level. See paragraph .15 of section 326 for a description of the relevant assertions related to presentation and disclosure.

Evaluating the Sufficiency and Appropriateness of the Audit Evidence Obtained¹²

.70 Based on the audit procedures performed and the audit evidence obtained, the auditor should evaluate whether the assessments of the risks of material misstatement at the relevant assertion level remain appropriate.

.71 An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessments were based. For example, the extent of misstatements that the auditor detects by performing substantive procedures may alter the auditor's judgment about the risk

¹² See paragraph .67 of section 312.

assessments and may indicate a material weakness in internal control. In addition, analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement (see section 329). In such circumstances, the auditor should reevaluate the planned audit procedures based on the revised consideration of assessed risks for all or some of the relevant assertions related to classes of transactions, account balances, or disclosures. Paragraph .121 of section 314 contains further guidance on revising the auditor's risk assessment.

.72 The concept of effectiveness of the operation of controls recognizes that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error. When such deviations are detected during the performance of tests of controls, the auditor should make specific inquiries to understand these matters and their potential consequences, for example, by inquiring about the timing of personnel changes in key internal control functions. In addition, the auditor should consider whether any misstatements detected from the performance of substantive procedures alter the auditor's judgment as to the effectiveness of the related controls. The auditor should determine whether the tests of controls performed provide an appropriate basis for reliance on the controls, whether additional tests of controls are necessary, or whether the potential risks of misstatement need to be addressed using substantive procedures.

.73 The auditor should not assume that an instance of fraud or error is an isolated occurrence, and therefore should consider how the detection of such misstatement affects the assessed risks of material misstatement. Before the conclusion of the audit, the auditor should evaluate whether audit risk has been reduced to an appropriately low level and whether the nature, timing, and extent of the audit procedures may need to be reconsidered. For example, the auditor should reconsider:

- The nature, timing, and extent of substantive procedures
- The audit evidence of the operating effectiveness of relevant controls, including the entity's risk assessment process

.74 The auditor should conclude whether sufficient appropriate audit evidence has been obtained to reduce to an appropriately low level the risk of material misstatement in the financial statements. In developing an opinion, the auditor should consider all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the relevant assertions in the financial statements.

.75 The sufficiency and appropriateness of audit evidence to support the auditor's conclusions throughout the audit are a matter of professional judgment. The auditor's judgment as to what constitutes sufficient appropriate audit evidence is influenced by such factors as the:

- Significance of the potential misstatement in the relevant assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements.
- Effectiveness of management's responses and controls to address the risks.
- Experience gained during previous audits with respect to similar potential misstatements.
- Results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.

- Source and reliability of available information.
- Persuasiveness of the audit evidence.
- Understanding of the entity and its environment, including its internal control.

.76 If the auditor has not obtained sufficient appropriate audit evidence as to a material financial statement assertion, the auditor should attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should express a qualified opinion or a disclaimer of opinion.¹³

Documentation

.77 The auditor should document:

- a. The overall responses to address the assessed risks of misstatement at the financial statement level
- b. The nature, timing, and extent of the further audit procedures
- c. The linkage of those procedures with the assessed risks at the relevant assertion level
- d. The results of the audit procedures
- e. The conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit

The manner in which these matters are documented is based on the auditor's professional judgment. Section 339, *Audit Documentation*, establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

Effective Date

.78 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

¹³ See paragraphs .20 through .34 and .61 through .63 of section 508, *Reports on Audited Financial Statements*, for further guidance on expression of a qualified opinion or a disclaimer of opinion.

.79

Appendix

Illustrative Financial Statement Assertions and Examples of Substantive Procedures Illustrations for Inventories of a Manufacturing Company

A1. This Appendix illustrates the use of assertions in designing substantive procedures and does not illustrate tests of controls. The following examples of substantive procedures are not intended to be all-inclusive, nor is it expected that all of the procedures would be applied in an audit. The particular substantive procedures to be used in each circumstance depend on the auditor's risk assessments and tests of controls.

<i>Illustrative Assertions About Account Balances</i>	<i>Examples of Substantive Procedures</i>
Existence	
Inventories included in the balance sheet physically exist.	<ul style="list-style-type: none"> • Physical examination of inventory items. • Obtaining confirmation of inventories at locations outside the entity. • Inspection of documents relating to inventory transactions between a physical inventory date and the balance sheet date.
Inventories represent items held for sale or use in the normal course of business.	<ul style="list-style-type: none"> • Inspecting perpetual inventory records, production records, and purchasing records for indications of current activity. • Reconciling items in the inventory listing to a current computer-maintained sales catalog and subsequent sales and delivery reports using computer-assisted audit techniques (CAATs). • Inquiry of production and sales personnel. • Using the work of specialists to corroborate the nature of specialized products.
Rights and Obligations	
The entity has legal title or similar rights of ownership to the inventories.	<ul style="list-style-type: none"> • Examining paid vendors' invoices, consignment agreements, and contracts. • Obtaining confirmation of inventories at locations outside the entity.

<i>Illustrative Assertions About Account Balances</i>	<i>Examples of Substantive Procedures</i>
Inventories exclude items billed to customers or owned by others.	<ul style="list-style-type: none"> • Examining paid vendors' invoices, consignment agreements, and contracts. • Inspecting shipping and receiving transactions near year end for recording in the proper period.
Completeness	
Inventory quantities include all products, materials, and supplies on hand.	<ul style="list-style-type: none"> • Observing physical inventory counts. • Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities. • Inspecting shipping and receiving transactions near year end for recording in the proper period.
Inventory quantities include all products, materials, and supplies owned by the company that are in transit or stored at outside locations.	<ul style="list-style-type: none"> • Obtaining confirmation of inventories at locations outside the entity. • Analytically comparing the relationship of inventory balances to recent purchasing, production, and sales activities.
Inventory listings are accurately compiled and the totals are properly included in the inventory accounts.	<ul style="list-style-type: none"> • Inspecting shipping and receiving transactions near year end for recording in the proper period. • Examining the inventory listing for inclusion of test counts recorded during the physical inventory observation. • Reconciliation of all inventory tags and count sheets used in recording the physical inventory counts using CAATs. • Recalculation of inventory listing for clerical accuracy using CAATs. • Reconciling physical counts to perpetual records and general ledger balances and investigating significant fluctuations using CAATs.
Valuation and Allocation	
Inventories are properly stated at cost (except when market is lower).	<ul style="list-style-type: none"> • Examining paid vendors' invoices and comparing product prices to standard cost build-ups. • Analytically comparing direct labor rates to production records. • Recalculation of the computation of standard overhead rates. • Examining analyses of purchasing and manufacturing standard cost variances.

<i>Illustrative Assertions About Account Balances</i>	<i>Examples of Substantive Procedures</i>
Slow-moving, excess, defective, and obsolete items included in inventories are properly identified.	<ul style="list-style-type: none"> ● Examining an analysis of inventory turnover. ● Analyzing industry experience and trends. ● Analytically comparing the relationship of inventory balances to anticipated sales volume. ● Walk-through of the plant for indications of products not being used. ● Inquiring of production and sales personnel concerning possible excess, or defective or obsolete inventory items. ● Logistic and distribution business process (e.g., cycle time, volume of returns, or problems with suppliers).
Inventories are reduced, when appropriate, to replacement cost or net realizable value.	<ul style="list-style-type: none"> ● Inspecting sales catalogs or industry publications for current market value quotations. ● Recalculation of inventory valuation reserves. ● Analyzing current production costs. ● Examining sales after year end and open purchase order commitments.
Rights and Obligations	
The pledge or assignment of any inventories is appropriately disclosed.	<ul style="list-style-type: none"> ● Obtaining confirmation of inventories pledged under loan agreements.
Completeness	
The financial statements include all disclosures related to inventories specified by generally accepted accounting principles.	<ul style="list-style-type: none"> ● Using a disclosure checklist to determine whether the disclosures included in generally accepted accounting principles were made.
Understandability

AU Section 322

The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

(Supersedes SAS No. 9.)

Source: SAS No. 65.

Effective for audits of financial statements for periods ending after December 15, 1991, unless otherwise indicated.

.01 The auditor considers many factors in determining the nature, timing, and extent of auditing procedures to be performed in an audit of an entity's financial statements. One of the factors is the existence of an internal audit function.¹ This section provides the auditor with guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor in an audit performed in accordance with generally accepted auditing standards.

Roles of the Auditor and the Internal Auditors

.02 One of the auditor's responsibilities in an audit conducted in accordance with generally accepted auditing standards is to obtain sufficient appropriate audit evidence to provide a reasonable basis for the opinion on the entity's financial statements. In fulfilling this responsibility, the auditor maintains independence from the entity. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]²

.03 Internal auditors are responsible for providing analyses, evaluations, assurances, recommendations, and other information to the entity's management and those charged with governance. To fulfill this responsibility, internal auditors maintain objectivity with respect to the activity being audited. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Obtaining an Understanding of the Internal Audit Function

.04 An important responsibility of the internal audit function is to monitor the performance of an entity's controls. When obtaining an understanding of

¹ An *internal audit function* may consist of one or more individuals who perform internal auditing activities within an entity. This section is not applicable to personnel who have the title *internal auditor* but who do not perform internal auditing activities as described herein.

² Although internal auditors are not independent from the entity, The Institute of Internal Auditors' *Standards for the Professional Practice of Internal Auditing* defines internal auditing as an independent appraisal function and requires internal auditors to be independent of the activities they audit. This concept of independence is different from the independence the auditor maintains under the AICPA Code of Professional Conduct.

internal control,³ the auditor should obtain an understanding of the internal audit function sufficient to identify those internal audit activities that are relevant to planning the audit. The extent of the procedures necessary to obtain this understanding will vary, depending on the nature of those activities.

.05 The auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- a. Organizational status within the entity.
- b. Application of professional standards (see paragraph .11).
- c. Audit plan, including the nature, timing, and extent of audit work.
- d. Access to records and whether there are limitations on the scope of their activities.

In addition, the auditor might inquire about the internal audit function's charter, mission statement, or similar directive from management or those charged with governance. This inquiry will normally provide information about the goals and objectives established for the internal audit function. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.06 Certain internal audit activities may not be relevant to an audit of the entity's financial statements. For example, the internal auditors' procedures to evaluate the efficiency of certain management decision-making processes are ordinarily not relevant to a financial statement audit.

.07 Relevant activities are those that provide evidence about the design and effectiveness of controls that pertain to the entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions embodied in the financial statements or that provide direct evidence about potential misstatements of such data. The auditor may find the results of the following procedures helpful in assessing the relevancy of internal audit activities:

- a. Considering knowledge from prior-year audits
- b. Reviewing how the internal auditors allocate their audit resources to financial or operating areas in response to their risk-assessment process
- c. Reading internal audit reports to obtain detailed information about the scope of internal audit activities

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.08 If, after obtaining an understanding of the internal audit function, the auditor concludes that the internal auditors' activities are not relevant to the financial statement audit, the auditor does not have to give further consideration to the internal audit function unless the auditor requests direct assistance from the internal auditors as described in paragraph .27. Even if some of the internal auditors' activities are relevant to the audit, the auditor may conclude that it would not be efficient to consider further the work of the internal auditors. If the auditor decides that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of audit

³ Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, describes the procedures the auditor follows to obtain an understanding of internal control and indicates that the internal audit function is part of the entity's monitoring component. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

procedures, the auditor should assess the competence and objectivity of the internal audit function in light of the intended effect of the internal auditors' work on the audit.

Assessing the Competence and Objectivity of the Internal Auditors

Competence of the Internal Auditors

.09 When assessing the internal auditors' competence, the auditor should obtain or update information from prior years about such factors as—

- Educational level and professional experience of internal auditors.
- Professional certification and continuing education.
- Audit policies, programs, and procedures.
- Practices regarding assignment of internal auditors.
- Supervision and review of internal auditors' activities.
- Quality of working-paper documentation, reports, and recommendations.
- Evaluation of internal auditors' performance.

Objectivity of the Internal Auditors

.10 When assessing the internal auditors' objectivity, the auditor should obtain or update information from prior years about such factors as—

- The organizational status of the internal auditor responsible for the internal audit function, including—
 - Whether the internal auditor reports to an officer of sufficient status to ensure broad audit coverage and adequate consideration of, and action on, the findings and recommendations of the internal auditors.
 - Whether the internal auditor has direct access and reports regularly to those charged with governance.
 - Whether those charged with governance oversee employment decisions related to the internal auditor.
- Policies to maintain internal auditors' objectivity about the areas audited, including—
 - Policies prohibiting internal auditors from auditing areas where relatives are employed in important or audit-sensitive positions.
 - Policies prohibiting internal auditors from auditing areas where they were recently assigned or are scheduled to be assigned on completion of responsibilities in the internal audit function.

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Assessing Competence and Objectivity

.11 In assessing competence and objectivity, the auditor usually considers information obtained from previous experience with the internal audit function, from discussions with management personnel, and from a recent external quality review, if performed, of the internal audit function's activities. The auditor

may also use professional internal auditing standards⁴ as criteria in making the assessment. The auditor also considers the need to test the effectiveness of the factors described in paragraphs .09 and .10. The extent of such testing will vary in light of the intended effect of the internal auditors' work on the audit. If the auditor determines that the internal auditors are sufficiently competent and objective, the auditor should then consider how the internal auditors' work may affect the audit.

Effect of the Internal Auditors' Work on the Audit

.12 The internal auditors' work may affect the nature, timing, and extent of the audit, including—

- Procedures the auditor performs when obtaining an understanding of the entity's internal control (paragraph .13).
- Procedures the auditor performs when assessing risk (paragraphs .14 through .16).
- Substantive procedures the auditor performs (paragraph .17).

When the work of the internal auditors is expected to affect the audit, the guidance in paragraphs .18 through .26 should be followed for considering the extent of the effect, coordinating audit work with internal auditors, and evaluating and testing the effectiveness of internal auditors' work.

Understanding of Internal Control

.13 The auditor obtains a sufficient understanding of the design of controls relevant to the audit of financial statements to plan the audit and to determine whether they have been placed in operation. Since a primary objective of many internal audit functions is to review, assess, and monitor controls, the procedures performed by the internal auditors in this area may provide useful information to the auditor. For example, internal auditors may develop a flowchart of a new computerized sales and receivables system. The auditor may review the flowchart to obtain information about the design of the related controls. In addition, the auditor may consider the results of procedures performed by the internal auditors on related controls to obtain information about whether the controls have been placed in operation. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 78.]

Risk Assessment

.14 The auditor assesses the risk of material misstatement at both the financial-statement level and the account-balance or class-of-transaction level.

Financial-Statement Level

.15 At the financial-statement level, the auditor makes an overall assessment of the risk of material misstatement. When making this assessment, the auditor should recognize that certain controls may have a pervasive effect on many financial statement assertions. The control environment and accounting system often have a pervasive effect on a number of account balances and transaction classes and therefore can affect many assertions. The auditor's assessment of risk at the financial-statement level often affects the overall audit

⁴ Standards have been developed for the professional practice of internal auditing by The Institute of Internal Auditors and the General Accounting Office. These standards are meant to (a) impart an understanding of the role and responsibilities of internal auditing to all levels of management, boards of directors, public bodies, external auditors, and related professional organizations; (b) permit measurement of internal auditing performance; and (c) improve the practice of internal auditing.

strategy. The entity's internal audit function may influence this overall assessment of risk as well as the auditor's resulting decisions concerning the nature, timing, and extent of auditing procedures to be performed. For example, if the internal auditors' plan includes relevant audit work at various locations, the auditor may coordinate work with the internal auditors (see paragraph .23) and reduce the number of the entity's locations at which the auditor would otherwise need to perform auditing procedures.

Account-Balance or Class-of-Transaction Level

.16 At the account-balance or class-of-transaction level, the auditor performs procedures to obtain and evaluate audit evidence concerning management's assertions. The auditor assesses control risk for each of the significant assertions and performs tests of controls to support assessments below the maximum. When planning and performing tests of controls, the auditor may consider the results of procedures planned or performed by the internal auditors. For example, the internal auditors' scope may include tests of controls for the completeness of accounts payable. The results of internal auditors' tests may provide appropriate information about the effectiveness of controls and change the nature, timing, and extent of testing the auditor would otherwise need to perform. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Substantive Procedures

.17 Some procedures performed by the internal auditors may provide direct evidence about material misstatements in assertions about specific account balances or classes of transactions. For example, the internal auditors, as part of their work, may confirm certain accounts receivable and observe certain physical inventories. The results of these procedures can provide evidence the auditor may consider in restricting detection risk for the related assertions. Consequently, the auditor may be able to change the timing of the confirmation procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

Extent of the Effect of the Internal Auditors' Work

.18 Even though the internal auditors' work may affect the auditor's procedures, the auditor should perform procedures to obtain sufficient appropriate audit evidence to support the auditor's report. Evidence obtained through the auditor's direct personal knowledge, including physical examination, observation, computation, and inspection, is generally more persuasive than information obtained indirectly. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]⁵

.19 The responsibility to report on the financial statements rests solely with the auditor. Unlike the situation in which the auditor uses the work of other independent auditors,⁶ this responsibility cannot be shared with the internal auditors. Because the auditor has the ultimate responsibility to express an opinion on the financial statements, judgments about assessments of inherent and control risks, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the auditor.

⁵ See section 326, *Audit Evidence*, paragraph .13. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

⁶ See section 543, *Part of Audit Performed by Other Independent Auditors*.

.20 In making judgments about the extent of the effect of the internal auditors' work on the auditor's procedures, the auditor considers—

- a. The materiality of financial statement amounts—that is, account balances or classes of transactions.
- b. The risk (consisting of inherent risk and control risk) of material misstatement of the assertions related to these financial statement amounts.
- c. The degree of subjectivity involved in the evaluation of the audit evidence gathered in support of the assertions.⁷

As the materiality of the financial statement amounts increases and either the risk of material misstatement or the degree of subjectivity increases, the need for the auditor to perform his or her own tests of the assertions increases. As these factors decrease, the need for the auditor to perform his or her own tests of the assertions decreases.

.21 For assertions related to material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is high, the auditor should perform sufficient procedures to fulfill the responsibilities described in paragraphs .18 and .19. In determining these procedures, the auditor gives consideration to the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions. However, for such assertions, the consideration of internal auditors' work cannot alone reduce audit risk to an acceptable level to eliminate the necessity to perform tests of those assertions directly by the auditor. Assertions about the valuation of assets and liabilities involving significant accounting estimates, and about the existence and disclosure of related-party transactions, contingencies, uncertainties, and subsequent events, are examples of assertions that might have a high risk of material misstatement or involve a high degree of subjectivity in the evaluation of audit evidence.

.22 On the other hand, for certain assertions related to less material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is low, the auditor may decide, after considering the circumstances and the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions, that audit risk has been reduced to an acceptable level and that testing of the assertions directly by the auditor may not be necessary. Assertions about the existence of cash, prepaid assets, and fixed-asset additions are examples of assertions that might have a low risk of material misstatement or involve a low degree of subjectivity in the evaluation of audit evidence.

Coordination of the Audit Work With Internal Auditors

.23 If the work of the internal auditors is expected to have an effect on the auditor's procedures, it may be efficient for the auditor and the internal auditors to coordinate their work by—

- Holding periodic meetings.
- Scheduling audit work.
- Providing access to internal auditors' working papers.

⁷ For some assertions, such as existence and occurrence, the evaluation of audit evidence is generally objective. More subjective evaluation of the audit evidence is often required for other assertions, such as the valuation and disclosure assertions.

- Reviewing audit reports.
- Discussing possible accounting and auditing issues.

Evaluating and Testing the Effectiveness of Internal Auditors' Work

.24 The auditor should perform procedures to evaluate the quality and effectiveness of the internal auditors' work, as described in paragraphs .12 through .17, that significantly affects the nature, timing, and extent of the auditor's procedures. The nature and extent of the procedures the auditor should perform when making this evaluation are a matter of judgment depending on the extent of the effect of the internal auditors' work on the auditor's procedures for significant account balances or classes of transactions.

.25 In developing the evaluation procedures, the auditor should consider such factors as whether the internal auditors'—

- Scope of work is appropriate to meet the objectives.
- Audit programs are adequate.
- Working papers adequately document work performed, including evidence of supervision and review.
- Conclusions are appropriate in the circumstances.
- Reports are consistent with the results of the work performed.

.26 In making the evaluation, the auditor should test some of the internal auditors' work related to the significant financial statement assertions. These tests may be accomplished by either (a) examining some of the controls, transactions, or balances that the internal auditors examined or (b) examining similar controls, transactions, or balances not actually examined by the internal auditors. In reaching conclusions about the internal auditors' work, the auditor should compare the results of his or her tests with the results of the internal auditors' work. The extent of this testing will depend on the circumstances and should be sufficient to enable the auditor to make an evaluation of the overall quality and effectiveness of the internal audit work being considered by the auditor.

Using Internal Auditors to Provide Direct Assistance to the Auditor

.27 In performing the audit, the auditor may request direct assistance from the internal auditors. This direct assistance relates to work the auditor specifically requests the internal auditors to perform to complete some aspect of the auditor's work. For example, internal auditors may assist the auditor in obtaining an understanding of internal control or in performing tests of controls or substantive tests, consistent with the guidance about the auditor's responsibility in paragraphs .18 through .22. When direct assistance is provided, the auditor should assess the internal auditors' competence and objectivity (see paragraphs .09 through .11) and supervise,⁸ review, evaluate, and test the work performed by internal auditors to the extent appropriate in the circumstances. The auditor should inform the internal auditors of their responsibilities, the

⁸ See section 311, *Planning and Supervision*, paragraphs .28 through .32, for the type of supervisory procedures to apply. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 108.]

objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. The auditor should also inform the internal auditors that all significant accounting and auditing issues identified during the audit should be brought to the auditor's attention.

Effective Date

.28 This section is effective for audits of financial statements for periods ending after December 15, 1991. Early application of the provisions of this section is permissible.

Appendix

The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

AU Section 324

Service Organizations *

(Supersedes SAS No. 44.)

Sources: SAS No. 70; SAS No. 78; SAS No. 88; SAS No. 98.

See section 9324 for interpretations of this section.

Effective for service auditors' reports dated after March 31, 1993, unless otherwise indicated.

SSAE No. 16, *Reporting on Controls at a Service Organization*, supersedes the guidance for service auditors in this AU section when the service auditor is reporting on periods ending on or after June 15, 2011. Earlier implementation of SSAE No. 16 is permitted.

Introduction and Applicability

.01 This section provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain transactions. This section also provides guidance for independent auditors who issue reports on the processing of transactions by a service organization for use by other auditors.

.02 For purposes of this section, the following definitions apply.

- *User organization*—The entity that has engaged a service organization and whose financial statements are being audited
- *User auditor*—The auditor who reports on the financial statements of the user organization
- *Service organization*—The entity (or segment of an entity) that provides services to a user organization that are part of the user organization's information system
- *Service auditor*—The auditor who reports on controls of a service organization that may be relevant to a user organization's internal control as it relates to an audit of financial statements
- *Report on controls placed in operation*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date
- *Report on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements,¹ on whether

* Title amended, effective December 1999, by Statement on Auditing Standards No. 88.

¹ In this section, a service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements will be referred to as a service organization's *controls*.

such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

.03 The guidance in this section is applicable to the audit of the financial statements of an entity that obtains services from another organization that are part of its information system. A service organization's services are part of an entity's information system if they affect any of the following:

- The classes of transactions in the entity's operations that are significant to the entity's financial statements
- The procedures, both automated and manual, by which the entity's transactions are initiated, authorize, recorded, processed, and reported from their occurrence to their inclusion in the financial statements
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the entity's financial statements involved in initiating, recording, processing and reporting the entity's transactions
- How the entity's information system captures other events and conditions that are significant to the financial statements
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures

Service organizations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others, mortgage bankers that service mortgages for others, and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions. The guidance in this section may also be relevant to situations in which an organization develops, provides, and maintains the software used by client organizations. The provisions of this section are not intended to apply to situations in which the services provided are limited to executing client organization transactions that are specifically authorized by the client, such as the processing of checking account transactions by a bank or the execution of securities transactions by a broker. This section also is not intended to apply to the audit of transactions arising from financial interests in partnerships, corporations, and joint ventures, such as working interests in oil and gas ventures, when proprietary interests are accounted for and reported to interest holders. [As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.04 This section is organized into the following sections.

- a. The user auditor's consideration of the effect of the service organization on the user organization's internal control and the availability of evidence to:
 - Obtain the necessary understanding of the user organization's internal control to assess the risks of material misstatement.

- Assess the risks of material misstatement at the user organization.
 - Perform further audit procedures.
- b. Considerations in using a service auditor's report.
 - c. Responsibilities of service auditors.

[Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

The User Auditor's Consideration of the Effect of the Service Organization on the User Organization's Internal Control and the Availability of Audit Evidence

.05 The user auditor should consider the discussion in paragraphs .06–.21 when obtaining an understanding of the entity and its environment, including its internal controls and performing the audit of an entity that uses a service organization to process its transactions. [Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

The Effect of Use of a Service Organization on a User Organization's Internal Control

.06 When a user organization uses a service organization, transactions that affect the user organization's financial statements are subjected to controls that are, at least in part, physically and operationally separate from the user organization. The significance of the controls of the service organization to those of the user organization depends on the nature of the services provided by the service organization, primarily the nature and materiality of the transactions it processes for the user organization and the degree of interaction between its activities and those of the user organization. To illustrate how the degree of interaction affects user organization controls, when the user organization initiates transactions and the service organization executes and does the accounting processing of those transactions, there is a high degree of interaction between the activities at the user organization and those at the service organization. In these circumstances, it may be practicable for the user organization to implement effective controls for those transactions. However, when the service organization initiates, executes, and does the accounting processing of the user organization's transactions, there is a lower degree of interaction and it may not be practicable for the user organization to implement effective controls for those transactions. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

Planning the Audit

.07 Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, states that an auditor should obtain an understanding of each of the five components of the entity's internal control sufficient to assess the risks of material misstatement and to design the nature, timing, and extent of further audit procedures. This understanding may encompass controls placed in operation by the entity and by service organizations whose services are part of the entity's information system. The auditor should use such knowledge to:

- Identify types of potential misstatements.
- Consider factors that affect the risks of material misstatement.

- Design tests of controls, when applicable. Paragraphs .23–.27 of section 318 discuss factors the auditor considers in determining whether to perform tests of controls
- Design substantive tests.

[As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78. As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006 and May 2007, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 109 and No. 110.]

[.08] [Paragraph deleted by the issuance of Statement on Auditing Standards No. 88, December 1999.]

.09 Information about the nature of the services provided by a service organization that are part of the user organization's information system and the service organization's controls over those services may be available from a wide variety of sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports by service auditors, internal auditors, or regulatory authorities on the service organization's controls. If the services and the service organization's controls over those services are highly standardized, information obtained through the user auditor's prior experience with the service organization may be helpful in assessing the risks of material misstatement. [As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.10 After considering the available information, the user auditor may conclude that he or she has the means to obtain a sufficient understanding of internal control to assess the risks of material misstatement. If the user auditor concludes that information is not available to obtain a sufficient understanding to assess the risks of material misstatement, he or she may consider contacting the service organization, through the user organization, to obtain specific information or request that a service auditor be engaged to perform procedures that will supply the necessary information, or the user auditor may visit the service organization and perform such procedures. If the user auditor is unable to obtain sufficient audit evidence to achieve his or her audit objectives, the user auditor should qualify his or her opinion or disclaim an opinion on the financial statements because of a scope limitation. [As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

Assessing Control Risk at the User Organization

.11 The user auditor uses his or her understanding of the internal control to assess control risk for the assertions embodied in the account balances and classes of transactions, including those that are affected by the activities of the service organization. In doing so, the user auditor may identify certain user organization controls that, if effective, would permit the user auditor to assess control risk as low or moderate for particular assertions. Such controls may be applied at either the user organization or the service organization. The user auditor may conclude that it would be efficient to obtain audit evidence about the operating effectiveness of controls to provide a basis for assessing control risk as low or moderate. [Revised, April 2002, to reflect conforming

changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.12 A service auditor's report on controls placed in operation at the service organization should be helpful in providing a sufficient understanding to assess the risks of material misstatement of the user organization. Such a report, however, is not intended to provide any evidence of the operating effectiveness of the relevant controls that would allow the user auditor to reduce the assessed level of control risk as low or moderate. Such audit evidence should be derived from one or more of the following:

- a. Tests of the user organization's controls over the activities of the service organization (for example, the user auditor may test the user organization's independent reperformance of selected items processed by a service organization or test the user organization's reconciliation of output reports with source documents)
- b. A service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls
- c. Appropriate tests of controls performed by the user auditor at the service organization

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.13 The user organization may establish effective controls over the service organization's activities that may be tested and that may enable the user auditor to reduce the assessed level of control risk as low or moderate for some or all of the relevant assertions. If a user organization, for example, uses a service organization to process its payroll transactions, the user organization may establish controls over the submission and receipt of payroll information that could prevent or detect material misstatements. The user organization might reperform the service organization's payroll calculations on a test basis. In this situation, the user auditor should obtain a sufficient understanding of the user organization's controls over payroll processing to (1) evaluate the design of such controls and (2) determine whether they have been implemented. The understanding of the user organization's controls over payroll processing would provide a basis for assessing control risk for the assertions related to payroll transactions. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.14 The user auditor may find that controls relevant to assessing control risk as low or moderate for particular assertions are applied only at the service organization. If the user auditor plans to assess control risk as low or moderate for those assertions, he or she should evaluate the operating effectiveness of those controls by obtaining a service auditor's report that describes the results of the service auditor's tests of those controls (that is, a report on controls placed in operation and tests of operating effectiveness, or an agreed-upon procedures

report)² or by performing tests of controls at the service organization. If the user auditor decides to use a service auditor's report, the user auditor should consider the extent of the evidence provided by the report about the effectiveness of controls intended to prevent or detect material misstatements in the particular assertions. The user auditor remains responsible for evaluating the evidence presented by the service auditor and for determining its effect on the assessment of control risk at the user organization. [Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.15 The user auditor's assessments of control risk regarding assertions about account balances or classes of transactions are based on the combined evidence provided by the service auditor's report and the user auditor's own procedures. In making these assessments, the user auditor should consider the nature, source, and interrelationships among the evidence, as well as the period covered by the tests of controls. The user auditor uses the assessed levels of control risk, as well as his or her understanding of internal control, in determining the nature, timing, and extent of substantive tests for particular assertions.

.16 The guidance in section 326.06, regarding the auditor's consideration of the sufficiency of audit evidence to support a specific assessed level of control risk is applicable to user auditors considering audit evidence provided by a service auditor's report on controls placed in operation and tests of operating effectiveness. Because the report may be intended to satisfy the needs of several different user auditors, a user auditor should determine whether the specific tests of controls and results in the service auditor's report are relevant to assertions that are significant in the user organization's financial statements. For those tests of controls and results that are relevant, a user auditor should consider whether the nature, timing, and extent of such tests of controls and results provide appropriate evidence about the effectiveness of the controls to support the user auditor's assessed level of control risk. In evaluating these factors, user auditors should also keep in mind that, for certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less support for control risk reduction the test may provide. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 105 and No. 106.]

Audit Evidence From Substantive Audit Procedures Performed by Service Auditors

.17 Service auditors may be engaged to perform procedures that are substantive in nature for the benefit of user auditors. Such engagements may involve the performance, by the service auditor, of procedures agreed upon by the user organization and its auditor and by the service organization and its auditor. In addition, there may be requirements imposed by governmental authorities or through contractual arrangements whereby service auditors perform designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service

² See AT section 201, *Agreed-Upon Procedures Engagements*, for guidance on performing and reporting on agreed-upon procedures engagements. [Footnote added, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

organization may be used by user auditors as part of the evidence necessary to support their opinions.

Considerations in Using a Service Auditor's Report

.18 In considering whether the service auditor's report is satisfactory for his or her purposes, the user auditor should make inquiries concerning the service auditor's professional reputation. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10a.

.19 In considering whether the service auditor's report is sufficient to meet his or her objectives, the user auditor should give consideration to the guidance in section 543.12. If the user auditor believes that the service auditor's report may not be sufficient to meet his or her objectives, the user auditor may supplement his or her understanding of the service auditor's procedures and conclusions by discussing with the service auditor the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, he or she may contact the service organization, through the user organization, to request that the service auditor perform agreed-upon procedures at the service organization, or the user auditor may perform such procedures.

.20 When assessing a service organization's controls and how they interact with a user organization's controls, the user auditor may become aware of the existence of significant deficiencies or material weaknesses in internal control. In such circumstances, the user auditor should consider the guidance provided in section 325, *Communicating Internal Control Related Matters Identified in an Audit*. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

.21 The user auditor should not make reference to the report of the service auditor as a basis, in part, for his or her own opinion on the user organization's financial statements. The service auditor's report is used in the audit, but the service auditor is not responsible for examining any portion of the financial statements as of any specific date or for any specified period. Thus, there cannot be a division of responsibility for the audit of the financial statements.

Responsibilities of Service Auditors

.22 The service auditor is responsible for the representations in his or her report and for exercising due care in the application of procedures that support those representations. Although a service auditor's engagement differs from an audit of financial statements conducted in accordance with generally accepted auditing standards, it should be performed in accordance with the general standards and with the relevant fieldwork and reporting standards. Although the service auditor should be independent from the service organization, it is not necessary for the service auditor to be independent from each user organization.

.23 As a result of procedures performed at the service organization, the service auditor may become aware of illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations. The terms *errors*, *fraud*, and *illegal acts* are discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*, and section 317, *Illegal Acts by Clients*; the discussions therein are relevant to this section. When the service auditor becomes aware of such matters, he or she should determine from the appropriate level of management of the service organization whether this information has been communicated appropriately

to affected user organizations, unless those matters are clearly inconsequential. If the management of the service organization has not communicated the information to affected user organizations and is unwilling to do so, the service auditor should inform those charged with governance of the service organization. If those charged with governance do not respond appropriately to the service auditor's communication, the service auditor should consider whether to resign from the engagement. The service auditor may wish to consult with his or her attorney in making this decision. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.24 The type of engagement to be performed and the related report to be prepared should be established by the service organization. However, when circumstances permit, discussions between the service organization and the user organizations are advisable to determine the type of report that will be most suitable for the user organizations' needs. This section provides guidance on the two types of reports that may be issued:

- a. *Reports on controls placed in operation*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date. Such reports may be useful in providing a user auditor with an understanding of the controls necessary to assess the risks of material misstatement and to design effective tests of controls and substantive tests at the user organization, but they are not intended to provide the user auditor with a basis for reducing his or her assessments of control risk as low or moderate.
- b. *Reports on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified. Such reports may be useful in providing the user auditor with an understanding of the controls necessary to plan the audit and may also provide the user auditor with a basis for reducing his or her assessments of control risk as low or moderate.

[Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

Reports on Controls Placed in Operation

.25 The information necessary for a report on controls placed in operation ordinarily is obtained through discussions with appropriate service organization personnel and through reference to various forms of documentation, such as system flowcharts and narratives.

.26 After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service

organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

.27 Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. For the type of report described in paragraph .24*a*, these procedures need not be supplemented by tests of the operating effectiveness of the service organization's controls.

.28 Although a service auditor's report on controls placed in operation is as of a specified date, the service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes that the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered significant by user organization's and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include:

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.
- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

.29 A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization should contain:

- a.* A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b.* A description of the scope and nature of the service auditor's procedures.
- c.* Identification of the party specifying the control objectives.
- d.* An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a

user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.

- e. A disclaimer of opinion on the operating effectiveness of the controls.
- f. The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.
- g. A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to future periods any evaluation of the description.
- h. Identification of the parties for whom the report is intended.

.30 If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

.31 It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

.32 The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.33 The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

.34 For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that:

- a. The service organization identify and appropriately describe such control objectives and the relevant controls.
- b. The service auditor consider the linkage of the controls to the stated control objectives.
- c. The service auditor obtain sufficient appropriate audit evidence to reach an opinion.

.35 The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

.36 The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

.37 The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed as low or moderate. [Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.38 The following is a sample report on controls placed in operation at a service organization. The report should have, as an attachment, a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the __ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,³ and (3) such controls had been placed in operation as of _____. The control objectives were specified by ___. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization's controls, individually or in the aggregate.

³ If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of _____. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

The description of controls at XYZ Service Organization is as of _____ and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers _____.

.39 If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspections of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of _____.

.40 If, after applying the criteria in paragraph .32, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

Reports on Controls Placed in Operation and Tests of Operating Effectiveness

Paragraphs .41–.56 repeat some of the information contained in paragraphs .25–.40 to provide readers with a comprehensive, stand-alone presentation of the relevant considerations for each type of report.

.41 The information necessary for a report on controls placed in operation and tests of operating effectiveness ordinarily is obtained through discussions with appropriate service organization personnel, through reference to various forms of documentation, such as system flowcharts and narratives, and through the performance of tests of controls. Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. The service auditor applies tests of controls to determine whether specific controls are operating with sufficient effectiveness to achieve specified control objectives. Section 350, *Audit Sampling*, as amended, provides guidance on the application and evaluation of audit sampling in performing tests of controls.

.42 After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

.43 The service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered significant by user organizations and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include:

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.

- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

.44 A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization and tests of operating effectiveness should contain:

- a. A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b. A description of the scope and nature of the service auditor's procedures.
- c. Identification of the party specifying the control objectives.
- d. An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.
- e. The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.
- f. A reference to a description of tests of specific service organization controls designed to obtain evidence about the operating effectiveness of those controls in achieving specified control objectives. The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied, and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided.
- g. A statement of the period covered by the service auditor's report on the operating effectiveness of the specific controls tested.
- h. The service auditor's opinion on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.
- i. When all of the control objectives listed in the description of controls placed in operation are not covered by tests of operating effectiveness, a statement that the service auditor does not express an opinion on control objectives not listed in the description of tests performed at the service organization.
- j. A statement that the relative effectiveness and significance of specific service organization controls and their effect on assessments of control

risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations.

- k.* A statement that the service auditor has performed no procedures to evaluate the effectiveness of controls at individual user organizations.
- l.* A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to the future any evaluation of the description or any conclusions about the effectiveness of controls in achieving control objectives.
- m.* Identification of the parties for whom the report is intended.

.45 If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

.46 It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. Similarly, if the operating effectiveness of controls at the service organization is dependent on the application of controls at user organizations, this should be delineated in the description of tests performed.

.47 The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.48 The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

.49 For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that:

- a.* The service organization identify and appropriately describe such control objectives and the relevant controls.
- b.* The service auditor consider the linkage of the controls to the stated control objectives.
- c.* The service auditor obtain sufficient appropriate audit evidence to reach an opinion.

.50 The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

.51 The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

.52 The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed as low or moderate. Evidence that may enable the user auditor to conclude that control risk may be assessed as low or moderate may be obtained from the results of specific tests of operating effectiveness. [Revised, May 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.53 The management of the service organization specifies whether all or selected applications and control objectives will be covered by the tests of operating effectiveness. The service auditor determines which controls are, in his or her judgment, necessary to achieve the control objectives specified by management. The service auditor then determines the nature, timing, and extent of the tests of controls needed to evaluate operating effectiveness. Testing should be applied to controls in effect throughout the period covered by the report. To be useful to user auditors, the report should ordinarily cover a minimum reporting period of six months.

.54 The following is a sample report on controls placed in operation at a service organization and tests of operating effectiveness. It should be assumed that the report has two attachments: (a) a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements and (b) a description of controls for which tests of operating effectiveness were performed, the control objectives the controls were intended to achieve, the tests applied, and the results of those tests. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the ___ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,⁴ and (3) such controls had been placed in operation as of _____. The control objectives

⁴ If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

were specified by _____. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of _____. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X, to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from _____ to _____. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from _____ to _____. [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.]⁵

The relative effectiveness and significance of specific controls at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at XYZ Service Organization is as of _____, and information about tests of the operating effectiveness of specific controls covers the period from _____ to _____. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

.55 If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

⁵ This sentence should be added when all of the control objectives listed in the description of controls placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of controls placed in operation are included in the tests of operating effectiveness. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspection of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of ____.

.56 If, after applying the criteria in paragraph .47, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the related control objectives would be achieved if the described controls were complied with satisfactorily.

Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events

.57 Changes in a service organization's controls that could affect user organizations' information systems may occur subsequent to the period covered by the service auditor's report but before the date of the service auditor's report. These occurrences are referred to as subsequent events. A service auditor should consider information about two types of subsequent events that come to his or her attention. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

.58 The first type consists of events that provide additional information about conditions that existed during the period covered by the service auditor's report. This information should be used by the service auditor in determining whether controls at the service organization that could affect user organizations' information systems were placed in operation, suitably designed, and, if applicable, operating effectively during the period covered by the engagement. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

.59 The second type consists of those events that provide information about conditions that arose subsequent to the period covered by the service auditor's

report that are of such a nature and significance that their disclosure is necessary to prevent users from being misled. This type of information ordinarily will not affect the service auditor's report if the information is adequately disclosed by management in a section of the report containing "Other Information Provided by the Service Organization." If this information is not disclosed by the service organization, the service auditor should disclose it in a section of the report containing "Other Information Provided by the Service Auditor" and/or in the service auditor's report. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

.60 Although a service auditor has no responsibility to detect subsequent events, the service auditor should inquire of management as to whether it is aware of any subsequent events through the date of the service auditor's report that would have a significant effect on user organizations. In addition, a service auditor should obtain a representation from management regarding subsequent events. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

Written Representations of the Service Organization's Management

.61 Regardless of the type of report issued, the service auditor should obtain written representations from the service organization's management that:

- Acknowledge management's responsibility for establishing and maintaining appropriate controls relating to the processing of transactions for user organizations.
- Acknowledge the appropriateness of the specified control objectives.
- State that the description of controls presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control.
- State that the controls, as described, had been placed in operation as of a specific date.
- State that management believes its controls were suitably designed to achieve the specified control objectives.
- State that management has disclosed to the service auditor any significant changes in controls that have occurred since the service organization's last examination.
- State that management has disclosed to the service auditor any illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations.
- State that management has disclosed to the service auditor all design deficiencies in controls of which it is aware, including those for which management believes the cost of corrective action may exceed the benefits.
- State that management has disclosed to the service auditor any subsequent events that would have a significant effect on user organizations.

If the scope of the work includes tests of operating effectiveness, the service auditor should obtain a written representation from the service organization's management stating that management has disclosed to the service auditor all instances, of which it is aware, when controls have not operated with sufficient effectiveness to achieve the specified control objectives. [Paragraph renumbered

and amended, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

Reporting on Substantive Procedures

.62 The service auditor may be requested to apply substantive procedures to user transactions or assets at the service organization. In such circumstances, the service auditor may make specific reference in his or her report to having carried out the designated procedures or may provide a separate report in accordance with AT section 201, *Agreed-Upon Procedures Engagements*. Either form of reporting should include a description of the nature, timing, extent, and results of the procedures in sufficient detail to be useful to user auditors in deciding whether to use the results as evidence to support their opinions. [Revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

Effective Date

.63 This section is effective for service auditors' reports dated after March 31, 1993. Earlier application of this section is encouraged. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

AU Section 9324

Service Organizations: Auditing Interpretations of Section 324

1. Describing Tests of Operating Effectiveness and the Results of Such Tests

.01 Question—Paragraph .44f of section 324, *Service Organizations*, specifies the elements that should be included in a description of tests of operating effectiveness, which is part of a report on controls placed in operation and tests of operating effectiveness. Section 324.44f states:

"...The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided."

When a service auditor performs an engagement that includes tests of operating effectiveness, what information and how much detail should be included in the description of the "tests applied" and the "results of the tests"?

.02 Interpretation—In all cases, for each control objective tested, the description of tests of operating effectiveness should include all of the elements listed in section 324.44f, whether or not the service auditor concludes that the control objective has been achieved. The description should provide sufficient information to enable user auditors to assess control risk for financial statement assertions affected by the service organization. The description need not be a duplication of the service auditor's detailed audit program, which in some cases would make the report too voluminous for user auditors and would provide more than the required level of detail.

.03 In describing the nature, timing, and extent of the tests applied, the service auditor also should indicate whether the items tested represent a sample or all of the items in the population, but need not indicate the size of the population. In describing the results of the tests, the service auditor should include exceptions and other information that in the service auditor's judgment could be relevant to user auditors. Such exceptions and other information should be included for each control objective, whether or not the service auditor concludes that the control objective has been achieved. When exceptions that could be relevant to user auditors are noted, the description also should include the following information:

- The size of the sample, when sampling has been used
- The number of exceptions noted
- The nature of the exceptions

If no exceptions or other information that could be relevant to user auditors are identified by the tests, the service auditor should indicate that finding (for example, "No relevant exceptions noted").

[Issue Date: April, 1995.]

2. Service Organizations That Use the Services of Other Service Organizations (Subservice Organizations)

.04 Question—A service organization may use the services of another service organization, such as a bank trust department that uses an independent computer processing service organization to perform its data processing. In this situation, the bank trust department is a service organization and the computer processing service organization is considered a subservice organization. How are a user auditor's and a service auditor's procedures affected when a service organization uses a subservice organization?

.05 Interpretation—When a service organization uses a subservice organization, the user auditor should determine whether the processing performed by the subservice organization affects assertions in the user organization's financial statements and whether those assertions are significant to the user organization's financial statements. To plan the audit and assess control risk, a user auditor may need to consider the controls at both the service organization and the subservice organization. Paragraphs .06–.17 of section 324, *Service Organizations*, provide guidance to user auditors on considering the effect of a service organization on a user organization's internal control. Although section 324.06–.17 do not specifically refer to subservice organizations, when a subservice organization provides services to a service organization, the guidance in these paragraphs should be interpreted to include the subservice organization. For example, in situations where subservice organizations are used, the interaction between the user organization and the service organization described in section 324.06 would be expanded to include the interaction between the user organization, the service organization and the subservice organization.

.06 Similarly, a service auditor engaged to examine the controls of a service organization and issue a service auditor's report may need to consider functions performed by the subservice organization and the effect of the subservice organization's controls on the service organization.

.07 The degree of interaction and the nature and materiality of the transactions processed by the service organization and the subservice organization are the most important factors to consider in determining the significance of the subservice organization's controls to the user organization's internal control. Section 324.11–.16 describe how a user auditor's assessment of control risk is affected when a user organization uses a service organization. When a subservice organization is involved, the user auditor may need to consider activities at both the service organization and the subservice organization in applying the guidance in these paragraphs.

.08 Question—How does a user auditor obtain information about controls at a subservice organization?

.09 Interpretation—If a user auditor concludes that he or she needs information about the subservice organization to plan the audit or to assess control risk, the user auditor (*a*) may contact the service organization through

the user organization and may contact the subservice organization either through the user organization or the service organization to obtain specific information or (b) may request that a service auditor be engaged to perform procedures that will supply the necessary information. Alternatively, the user auditor may visit the service organization or subservice organization and perform such procedures.

.10 Question—When a service organization uses a subservice organization, what information about the subservice organization should be included in the service organization's description of controls?

.11 Interpretation—A service organization's description of controls should include a description of the functions and nature of the processing performed by the subservice organization in sufficient detail for user auditors to understand the significance of the subservice organization's functions to the processing of the user organizations' transactions. Ordinarily, disclosure of the identity of the subservice organization is not required. However, if the service organization determines that the identity of the subservice organization would be relevant to user organizations, the name of the subservice organization may be included in the description. The purpose of the description of the functions and nature of the processing performed by the subservice organization is to alert user organizations and their auditors to the fact that another entity (that is, the subservice organization) is involved in the processing of the user organizations' transactions and to summarize the functions the subservice organization performs.

.12 When a subservice organization performs services for a service organization, there are two alternative methods of presenting the description of controls. The service organization determines which method will be used.

- a. *The Carve-Out Method*—The subservice organization's relevant control objectives and controls are excluded from the description and from the scope of the service auditor's engagement. The service organization states in the description that the subservice organization's control objectives and related controls are omitted from the description and that the control objectives in the report include only the objectives the service organization's controls are intended to achieve.
- b. *The Inclusive Method*—The subservice organization's relevant controls are included in the description and in the scope of the engagement. The description should clearly differentiate between controls of the service organization and controls of the subservice organization. The set of control objectives includes all of the objectives a user auditor would expect both the service organization and the subservice organization to achieve. To accomplish this, the service organization should coordinate the preparation and presentation of the description of controls with the subservice organization.

In either method, the service organization includes in its description of controls a description of the functions and nature of the processing performed by the subservice organization, as set forth in paragraph .11.

.13 If the functions and processing performed by the subservice organization are significant to the processing of user organization transactions, and the service organization does not disclose the existence of the subservice organization and the functions it performs, the service auditor may need to issue a qualified or adverse opinion as to the fairness of the presentation of the description of controls.

.14 Question—How is the service auditor's report affected by the method of presentation selected?

.15 Interpretation—If the service organization has adopted the carve-out method, the service auditor should modify the scope paragraph of the service auditor's report to briefly summarize the functions and nature of the processing performed by the subservice organization. This summary ordinarily would be briefer than the information provided by the service organization in its description of the functions and nature of the processing performed by the subservice organization. The service auditor should include a statement in the scope paragraph of the service auditor's report indicating that the description of controls includes only the control objectives and related controls of the service organization; accordingly, the service auditor's examination does not extend to controls at the subservice organization.

.16 An example of the scope paragraph of a service auditor's report using the carve-out method is presented below. Additional or modified report language is shown in ***boldface italics***.

Sample Scope Paragraph of a Service Auditor's Report Using the Carve-Out Method

Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) such controls had been placed in operation as of June 30, 20XX. ***Example Trust Company uses a computer processing service organization for all of its computerized application processing. The accompanying description includes only those control objectives and related controls of Example Trust Company and does not include control objectives and related controls of the computer processing service organization. Our examination did not extend to controls of the computer processing service organization.*** The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

[The remainder of the report is the same as the standard service auditor's report illustrated in section 324.38 and .54.]

.17 If the service organization has used the inclusive method, the service auditor should perform procedures comparable to those described in section 324.12. Such procedures may include performing tests of the service organization's controls over the activities of the subservice organization or performing

procedures at the subservice organization. If the service auditor will be performing procedures at the subservice organization, the service organization should arrange for such procedures. The service auditor should recognize that the subservice organization generally is not the client for the engagement. Accordingly, in these circumstances the service auditor should determine whether it will be possible to obtain the required evidence to support the portion of the opinion covering the subservice organization and whether it will be possible to obtain an appropriate letter of representations regarding the subservice organization's controls.

.18 An example of a service auditor's report using the inclusive method is presented below. Additional or modified report language is shown in ***boldface italics***.

Sample Service Auditor's Report Using the Inclusive Method

Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company ***and Computer Processing Service Organization, an independent service organization that provides computer processing services to Example Trust Company***, applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's ***and Computer Processing Service Organization's*** controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) the controls had been placed in operation as of June 30, 20XX. The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned controls presents fairly, in all material respects, the relevant aspects of Example Trust Company's ***and Computer Processing Service Organization's*** controls that had been placed in operation as of June 30, 20XX. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily and user organizations applied the controls contemplated in the design of Example Trust Company's controls.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from January 1, 20XX, to June 30, 20XX. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of Example Trust Company and to their auditors to be taken into consideration, along with information about internal control at user organizations, when making assessments of control risk for user organizations.

In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from January 1, 20XX, to June 30, 20XX.

The relative effectiveness and significance of specific controls at Example Trust Company *and Computer Processing Service Organization*, and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at Example Trust Company *and Computer Processing Service Organization* is as of June 30, 20XX, and information about tests of the operating effectiveness of specific controls covers the period from January 1, 20XX, to June 30, 20XX. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization *and Computer Processing Service Organization* is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.¹

This report is intended solely for use by the management of Example Trust Company, its users, and the independent auditors of its users.

July 10, 20XX

[Issue Date: April, 1995; Revised: February, 1997;
Revised: April, 2002.]

[3.] Responsibilities of Service Organizations and Service Auditors With Respect to Information About the Year 2000 Issue in a Service Organization's Description of Controls

[.19–.34] [Withdrawn July 2000 by the Audit Issues Task Force.]

4. Responsibilities of Service Organizations and Service Auditors With Respect to Forward-Looking Information in a Service Organization's Description of Controls

.35 Question—Section 324.32 requires a service auditor to consider "whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, authorize, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies." A service auditor performing a service auditor's engagement may become aware that a service organization, whose system is correctly processing data during the period covered by the service auditor's examination, has not performed contingency planning or made adequate provision for disaster recovery, and may not be able to retrieve or process data in future periods. Does section 324.32 require a service

¹ This sentence has been expanded to describe the risks of projecting any evaluation of the controls to future periods because of the failure to make needed changes to a system or controls, as provided for in Interpretation No. 5, "Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods" (paragraphs .38–.40).

auditor to identify, in his or her report, design deficiencies that do not affect processing during the period covered by the service auditor's examination but may represent potential problems in future periods?

.36 Interpretation—No. Section 324.32 addresses design deficiencies that could adversely affect processing *during the period covered by the service auditor's examination*. Section 324.32 does not apply to design deficiencies that potentially could affect processing *in future periods*. If the computer programs are correctly processing data during the period covered by the service auditor's examination, and such design deficiencies currently do not affect user organizations' abilities to initiate, authorize, record, process, or report financial data, the service auditor would not be required to report such design deficiencies in his or her report, based on the requirements in section 324.32. However, if a service auditor becomes aware of design deficiencies at the service organization that could potentially affect the processing of user organizations' transactions in future periods, the service auditor, in his or her judgment, may choose to communicate this information to the service organization's management and advise management to disclose this information and its plans for correcting the design deficiencies in a section of the service auditor's document titled "Other Information Provided by the Service Organization."²

.37 If the service organization includes information about the design deficiencies in the section of the document titled "Other Information Provided by the Service Organization," the service auditor should read the information and consider applying by analogy the guidance in section 550, *Other Information in Documents Containing Audited Financial Statements*. In addition, the service auditor should include a paragraph in his or her report disclaiming an opinion on the information provided by the service organization. The following is an example of such a paragraph.

The information in section 4 describing XYZ Service Organization's plans to modify its disaster recovery plan is presented by the Service Organization to provide additional information and is not a part of the Service Organization's description of controls that may be relevant to a user organization's internal control. Such information has not been subjected to the procedures applied in the examination of the description of the controls applicable to the processing of transactions for user organizations and, accordingly, we do not express an opinion or provide any assurance on it.

A service auditor also may consider communicating information about the design deficiencies in the section of the service auditor's document titled "Other Information Provided by the Service Auditor."

[Issue Date: February 2002; Revised: March 2006. Revised: December 2010.]

5. Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods

.38 Question—Section 324.29g and .44l state that a service auditor's report should contain a statement of the inherent limitations of the potential

² Chapter 2 of the AICPA Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*, proposes four sections of a service auditor's document.

1. Independent service auditor's report (the letter from the service auditor expressing his or her opinion)
2. Service organization's description of controls
3. Information provided by the independent service auditor (This section generally contains a description of the service auditor's tests of operating effectiveness and the results of those tests.)
4. Other information provided by the service organization

effectiveness of controls at the service organization and of the risk of projecting to future periods any evaluation of the description. Section 324.44^l goes on to state that the report also should refer to the risk of projecting to the future "any conclusions about the effectiveness of controls in achieving control objectives." The sample service auditor's reports in section 324.38 and .54 include illustrative paragraphs that illustrate this caveat. The following excerpt is from section 324.54:

The description of controls at XYZ Service Organization is as of _____, and information about tests of the operating effectiveness of specific controls covers the period from _____ to _____. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

The validity of projections to the future about the effectiveness of controls may be affected by changes made to the system and the controls, and also by the failure to make needed changes, for example, changes to accommodate new processing requirements. May a service auditor's report be expanded to describe the risk of projecting to the future conclusions about the effectiveness of controls?

.39 Interpretation—The sample reports in section 324.38 and .54 may be expanded to describe this risk. The first and second sentences of the illustrative paragraph above address the potential effect of change on the description of controls as of a specified date; accordingly, they do not require modification because new processing requirements would not affect the description as of the specified date. However, the last sentence in the sample report paragraph above could be expanded to describe the risk of projecting an evaluation of the controls to future periods because of changes to the system or controls, or the failure to make needed changes to the system or controls.

.40 Suggested additions to the paragraph in the illustrative service auditor's reports in section 324.38 and .54 are the following (new language is shown in italics.):

The description of controls at XYZ Service Organization is as of _____, and information about tests of the operating effectiveness of specific controls covers the period from _____ to _____. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes *made to the system or controls, or the failure to make needed changes to the system or controls*, may alter the validity of such conclusions.

[Issue Date: February, 2002.]

[6.] Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor's Engagement

[.41–.42] [Rescinded September 2002, by Statement on Auditing Standards No. 98.]

AU Section 325

Communicating Internal Control Related Matters Identified in an Audit

(Supersedes SAS No. 112.)

Source: SAS No. 115.

Effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier implementation is permitted.

Applicability

.01 This section establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. It is applicable whenever an auditor expresses or disclaims an opinion on financial statements. In particular, this section

- defines the terms *deficiency in internal control*, *significant deficiency*, and *material weakness*.
- provides guidance on evaluating the severity of deficiencies in internal control identified in an audit of financial statements.
- requires the auditor to communicate, in writing, to management and those charged with governance,¹ significant deficiencies and material weaknesses identified in an audit.

.02 This section is not applicable if the auditor is engaged to examine the design and operating effectiveness of an entity's internal control over financial reporting that is integrated with an audit of the entity's financial statements under AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*.

Introduction

.03 Internal control is a process—effected by those charged with governance, management, and other personnel—designed to provide reasonable assurance about the achievement of the entity's objectives with regard to the reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Internal control over the safeguarding of assets against unauthorized acquisition, use, or disposition may include controls related to financial reporting and operations objectives. Generally, controls that are relevant to an audit of financial statements are those

¹ The term *those charged with governance* is defined in paragraph .03 of section 380, *The Auditor's Communication With Those Charged With Governance*, as "the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards."

that pertain to the entity's objective of reliable financial reporting. In this section, the term *financial reporting* relates to the preparation of reliable financial statements that are fairly presented in conformity with generally accepted accounting principles (GAAP).² The design and formality of an entity's internal control will vary depending on the entity's size, the industry in which it operates, its culture, and management's philosophy.

.04 In an audit of financial statements, the auditor is not required to perform procedures to identify deficiencies in internal control^{3,4} or to express an opinion on the effectiveness of the entity's internal control. However, during the course of an audit, the auditor may become aware of deficiencies in internal control while obtaining an understanding of the entity and its environment, including its internal control, assessing the risks of material misstatement of the financial statements due to error or fraud, performing further audit procedures to respond to assessed risks, communicating with management or others (for example, internal auditors or governmental authorities), or otherwise. The auditor's awareness of deficiencies in internal control varies with each audit and is influenced by the nature, timing, and extent of audit procedures performed, as well as other factors.

Definitions

.05 A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis.

A deficiency in *design* exists when

- a control necessary to meet the control objective is missing; or
- an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.

A deficiency in *operation* exists when

- a properly designed control does not operate as designed; or
- the person performing the control does not possess the necessary authority or competence to perform the control effectively.

.06 A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility⁵ that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

.07 A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

² Reference to generally accepted accounting principles includes, where applicable, a comprehensive basis of accounting other than generally accepted accounting principles, as that term is defined in paragraph .04 of section 623, *Special Reports*, as amended.

³ Hereinafter in this section, the term *internal control* means internal control over financial reporting.

⁴ Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, contains a detailed discussion of internal control and identifies the following five inter-related components of internal control: (a) the control environment, (b) the entity's risk assessment, (c) information and communication systems, (d) control activities, and (e) monitoring.

⁵ In this section, a reasonable possibility exists when the likelihood of the event is either *reasonably possible* or *probable* as those terms are defined in the Financial Accounting Standards Board *Accounting Standards Codification* glossary. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Evaluating Deficiencies Identified as Part of the Audit

.08 The auditor should evaluate the severity of each deficiency in internal control⁶ identified during the audit to determine whether the deficiency, individually or in combination, is a significant deficiency or a material weakness. The severity of a deficiency depends on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies; and
- whether there is a reasonable possibility that the entity's controls will fail to prevent, or detect and correct a misstatement of an account balance or disclosure.

The severity of a deficiency does not depend on whether a misstatement actually occurred.

.09 Factors that affect the magnitude of a misstatement that might result from a deficiency or deficiencies include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity (in the current period or expected in future periods) in the account or class of transactions exposed to the deficiency

.10 In evaluating the magnitude of the potential misstatement, the maximum amount by which an account balance or total of transactions can be overstated generally is the recorded amount, whereas understatements could be larger.

.11 Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following:

- The nature of the financial statement accounts, classes of transactions, disclosures, and assertions involved
- The susceptibility of the related asset or liability to loss or fraud
- The subjectivity, complexity, or extent of judgment required to determine the amount involved
- The interaction or relationship of the control with other controls
- The interaction among the deficiencies
- The possible future consequences of the deficiency

.12 The evaluation of whether a deficiency presents a reasonable possibility of misstatement may be made without quantifying the probability of occurrence as a specific percentage or range. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

.13 Multiple deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control increase the likelihood of material misstatement and may, in combination, constitute a significant deficiency or a material weakness, even though such deficiencies individually may

⁶ Hereinafter in this section, the term *deficiency in internal control* is referred to as a *deficiency or deficiencies*.

be less severe. Therefore, the auditor should determine whether deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a significant deficiency or a material weakness.

.14 When performing substantive procedures or tests of the operating effectiveness of controls, the auditor may obtain evidence that a control does not operate effectively; for example, by identifying a misstatement that was not prevented, or detected and corrected by the control. Management may inform the auditor, or the auditor may otherwise become aware, of the existence of compensating controls that, if effective, may limit the severity of the deficiency and prevent it from being a significant deficiency or a material weakness. In these circumstances, although the auditor is not required to consider the effects of compensating controls for purposes of this section, the auditor may consider the effects of compensating controls related to a deficiency in operation provided the auditor has tested the compensating controls for operating effectiveness as part of the financial statement audit. Compensating controls can limit the severity of the deficiency, but do not eliminate the deficiency.

.15 Indicators of material weaknesses in internal control include

- identification of fraud, whether or not material, on the part of senior management;
- restatement of previously issued financial statements to reflect the correction of a material misstatement due to error or fraud;
- identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control; and
- ineffective oversight of the entity's financial reporting and internal control by those charged with governance.

.16 If the auditor determines that a deficiency, or a combination of deficiencies, is not a material weakness, the auditor should consider whether prudent officials, having knowledge of the same facts and circumstances, would likely reach the same conclusion.

Communication—Form, Content, and Timing

.17 Deficiencies identified during the audit that upon evaluation are considered significant deficiencies or material weaknesses under this section should be communicated, in writing, to management and those charged with governance as a part of each audit, including significant deficiencies and material weaknesses that were communicated to management and those charged with governance in previous audits and have not yet been remediated. Significant deficiencies and material weaknesses that previously were communicated and have not yet been remediated may be communicated, in writing, by referring to the previously issued written communication and the date of that communication.

.18 The written communication referred to in paragraph .17 is best made by the report release date,⁷ which is the date the auditor grants the entity permission to use the auditor's report in connection with the financial statements, but should be made no later than 60 days following the report release date.

⁷ See paragraph .23 of section 339, *Audit Documentation*, for additional guidance related to the report release date.

.19 For some matters, early communication to management or those charged with governance may be important because of their relative significance and the urgency for corrective follow-up action. Accordingly, the auditor may decide to communicate certain matters during the audit. These matters need not be communicated in writing during the audit, but significant deficiencies and material weaknesses should ultimately be included in a written communication in accordance with paragraphs .17–.18, even if such significant deficiencies or material weaknesses were remediated during the audit.

.20 The existence of significant deficiencies or material weaknesses may already be known to management and may represent a conscious decision by management or those charged with governance to accept the risk associated with the deficiencies because of cost or other considerations. Management is responsible for making decisions concerning costs to be incurred and related benefits. The auditor's responsibility to communicate significant deficiencies and material weaknesses exists regardless of management's decisions.

.21 Nothing precludes the auditor from communicating to management and those charged with governance other matters related to an entity's internal control. For example, the auditor may communicate

- matters the auditor believes to be of potential benefit to the entity, such as recommendations for operational or administrative efficiency, or for improving controls.
- deficiencies that are not significant deficiencies or material weaknesses.

If other matters are communicated orally, the auditor should document the communication.

.22 The written communication regarding significant deficiencies and material weaknesses identified during the audit of financial statements should

- include a statement that indicates the purpose of the auditor's consideration of internal control was to express an opinion on the financial statements, but not to express an opinion on the effectiveness of the entity's internal control.
- include a statement that indicates the auditor is not expressing an opinion on the effectiveness of internal control.
- include a statement that indicates that the auditor's consideration of internal control was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses.
- include the definition of the term material weakness and, where relevant, the definition of the term significant deficiency.
- identify the matters that are considered to be significant deficiencies and those that are considered to be material weaknesses.
- include a statement that indicates the communication is intended solely for the information and use of management, those charged with governance, and others within the organization and is not intended to be and should not be used by anyone other than these specified parties. If an entity is required to furnish such auditor communications to a governmental authority, specific reference to such governmental authorities may be made.

.23 The auditor may include additional statements in the communication regarding the general inherent limitations of internal control, including the

possibility of management override of controls, or the specific nature and extent of the auditor's consideration of internal control during the audit.

.24 Management or those charged with governance may ask the auditor to issue a communication indicating that no material weaknesses were identified during the audit of the financial statements to submit to governmental authorities. Exhibit A includes an illustrative communication when the auditor has not identified any material weaknesses and decides, or has been requested, to advise management and those charged with governance that no material weaknesses were identified.

.25 The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit.

.26 Management may wish to, or may be required by a regulator to, prepare a written response to the auditor's communication regarding significant deficiencies or material weaknesses identified during the audit. Such management communications may include a description of corrective actions taken by the entity, the entity's plans to implement new controls, or a statement indicating that management believes the cost of correcting a significant deficiency or material weakness would exceed the benefits to be derived from doing so. If such a written response is included in a document containing the auditor's written communication to management and those charged with governance concerning identified significant deficiencies or material weaknesses, the auditor may add a paragraph to his or her written communication disclaiming an opinion on such information. Following is an example of such a paragraph:

ABC Company's written response to the significant deficiencies [*and material weaknesses*] identified in our audit was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Effective Date

.27 This section is effective for audits of financial statements for periods ending on or after December 15, 2009. Earlier implementation is permitted.

.28

Exhibit A

Illustrative Written Communications

1. The following is an illustrative written communication encompassing the requirements in paragraph .22 of this section:

In planning and performing our audit of the financial statements of ABC Company (the "Company") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be material weaknesses *[and other deficiencies that we consider to be significant deficiencies]*.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *[We consider the following deficiencies in the Company's internal control to be material weaknesses:]*

[Describe the material weaknesses that were identified.]

[A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the Company's internal control to be significant deficiencies:]

[Describe the significant deficiencies that were identified.]

This communication is intended solely for the information and use of management, *[identify the body or individuals charged with governance]*, others within the organization, and *[identify any specified governmental authorities]* and is not intended to be and should not be used by anyone other than these specified parties.

2. The following is an illustrative written communication indicating that no material weaknesses were identified during the audit.

In planning and performing our audit of the financial statements of ABC Company (the "Company") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the

purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be deficiencies, significant deficiencies, or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

This communication is intended solely for the information and use of management, [*identify the body or individuals charged with governance*], others within the organization, and [*identify any specified governmental authorities*] and is not intended to be and should not be used by anyone other than these specified parties.

If one or more significant deficiencies have been identified, the auditor may add the following sentence to the third paragraph of the communication:

However, we identified certain deficiencies in internal control that we consider to be significant deficiencies, and communicated them in writing to management and those charged with governance on [*date*]. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Exhibit B

Examples of Circumstances That May Be Deficiencies, Significant Deficiencies, or Material Weaknesses

Paragraph .15 of this section identifies indicators of material weaknesses in internal control. The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses:

Deficiencies in the Design of Controls

- Inadequate design of controls over the preparation of the financial statements being audited.
- Inadequate design of controls over a significant account or process.
- Inadequate documentation of the components of internal control.
- Insufficient control consciousness within the organization; for example, the tone at the top and the control environment.
- Absent or inadequate segregation of duties within a significant account or process.
- Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
- Inadequate design of IT general and application controls that prevent the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
- Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles (GAAP), the person responsible for the accounting and reporting function lacks the skills and knowledge to apply GAAP in recording the entity's financial transactions or preparing its financial statements.
- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time.
- The absence of an internal process to report deficiencies in internal control to management on a timely basis.

Failures in the Operation of Internal Control

- Failure in the operation of effectively designed controls over a significant account or process; for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process.
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy; for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements.
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. This circumstance may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard

its inventory (preventive controls) and also performs periodic physical inventory counts (detective control) timely in relation to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of material weakness and significant deficiency relate to likelihood of misstatement of the financial statements, the failure of a preventive control such as inventory tags will not result in a significant deficiency or material weakness if the detective control (physical inventory) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent, or detect and correct a material misstatement of the financial statements.

- Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions; for example, consistent understatement of expenses or overstatement of allowances at the direction of management.
- Misrepresentation by entity personnel to the auditor (an indicator of fraud).
- Management override of controls.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.
- An observed deviation rate that exceeds the number of deviations expected by the auditor in a test of the operating effectiveness of a control. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a non-negligible deviation rate because, based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

AU Section 9325

Communicating Internal Control Related Matters Identified in an Audit: Auditing Interpretations of Section 325

1. Communicating Deficiencies in Internal Control Over Compliance in an Office of Management and Budget Circular A-133 Audit

.01 Question—Section 325, *Communicating Internal Control Related Matters Identified in an Audit*, establishes standards and provides guidance on communicating matters related to an entity's internal control over financial reporting identified in an audit of financial statements. In an audit performed under Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* (Circular A-133), as amended in a Federal Register Notice on June 26, 2007 (also referred to as a single audit), the auditor also is responsible for reporting significant deficiencies and material weaknesses in internal control over compliance as it relates to major programs.¹ How should the definitions of the terms *deficiency in internal control*, *significant deficiency*, and *material weakness* found in section 325 be adapted and applied in the context of reporting on internal control over compliance in a single audit?

.02 Interpretation—Circular A-133 includes guidelines for reporting significant deficiencies and material weaknesses. On March 11, 2010, the OMB issued a statement on its website (in the introductory section of Circular A-133) clarifying that these terms are to be used as defined in generally accepted auditing standards issued by the AICPA and *Government Auditing Standards* issued by the Government Accountability Office. Therefore, the following definitions should be used when an auditor reports on internal control over compliance in a single audit.²

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance³ requirement of a federal program on a timely basis.

¹ The Federal Register Notice can be found on the Office of Management and Budget (OMB) website at www.whitehouse.gov/omb/fedreg/2007/062607_audits.pdf.

² This interpretation does not modify or replace an auditor's responsibility for communicating internal control over financial reporting matters under section 325, *Communicating Internal Control Related Matters Identified in an Audit*, or reporting such matters as required by *Government Auditing Standards* issued by the U.S. Government Accountability Office.

³ Under Section 510(a)(1) of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, the auditor's determination of whether a deficiency in internal control over compliance is a material weakness or significant deficiency for the purpose of reporting an audit finding is in relation to a type of compliance requirement for a major program or an audit objective identified in the *OMB Circular A-133 Compliance Supplement* (the *Compliance Supplement*). This reference to "type of compliance requirement" refers to the 14 types of compliance requirements (identified as A-N) described in part 3 of the *Compliance Supplement*. For purposes of reporting audit findings, auditors are alerted that certain of the types of compliance requirements may include multiple compliance requirements with multiple audit objectives (for example, compliance requirement "G" covers 3 separate requirements—matching, level of effort, and earmarking; and "N" covers separate requirements specific to each individual special test and provision).

A *material weakness* in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility⁴ that material noncompliance with a type of compliance requirement⁵ of a federal program will not be prevented, or detected and corrected, on a timely basis.

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement⁶ of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

.03 See also the AICPA Audit Guide Government Auditing Standards and *Circular A-133 Audits* for additional guidance on performing single audits.

[Issue Date: June 2007; Revised: March 2010.]

2. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Participants in Office of Management and Budget Single Audit Pilot Project

.04 Question—On October 7, 2009, the Office of Management and Budget (OMB) published the parameters of a pilot project, which is a collaborative effort between volunteer nonfederal entities expending American Recovery and Reinvestment Act of 2009 (ARRA) awards (auditees), the auditors performing compliance audits of auditees with ARRA expenditures under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and the federal government. For auditees that volunteer, the pilot project requires their auditors to issue to management an early written communication of significant deficiencies and material weaknesses in internal control over compliance at an interim date, prior to the completion of the compliance audit. Such communication would be based on internal control work performed on specified compliance requirements for two major programs with ARRA expenditures chosen from a list of approved ARRA pilot project programs. This communication also would be required to be submitted by management to the cognizant agency for audit. May an auditor issue such an interim communication in accordance with section 325, *Communicating Internal Control Related Matters Identified in an Audit*?

.05 Interpretation—Yes. Section 325 permits an auditor to communicate to management identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. Regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with paragraphs .17–.18 of section 325.

.06 The following is an illustrative communication that an auditor may use to comply with the pilot project communication requirement to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim

⁴ In this section, a reasonable possibility exists when the likelihood of the event is either *reasonably possible* or *probable* as those terms are defined in the Financial Accounting Standards Board *Accounting Standards Codification* glossary.

⁵ See footnote 3.

⁶ See footnote 3.

date prior to the completion of the compliance audit and are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control over compliance:

This communication is provided pursuant to the parameters of the 2009 Office of Management and Budget (OMB) pilot project. Such project requires auditors of entities that volunteer for the project to issue, in writing, an early communication of significant deficiencies and material weaknesses in internal control over compliance for certain federal programs having expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding at an interim date, prior to the completion of the compliance audit. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs], we are considering [Example Entity's] compliance with [list the applicable types of compliance requirements subject to the communication requirement in the pilot project (for example, activities allowed or unallowed, allowable costs and cost principles, cash management, eligibility, reporting, and special tests and provisions)] as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 2009. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement⁷ of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

⁷ See footnote 3.

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.]⁸

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.]⁹

[Example Entity's] responses to our findings are described [insert either "in the preceding paragraph" or "in the accompanying schedule"]. We did not audit [Example Entity's] responses and, accordingly, we express no opinion on the responses.¹⁰

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 2009; Revised: March 2010.]

3. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Auditors That Are Not Participants in Office of Management and Budget Pilot Project

.07 Question—Part 6, "Internal Control," of the *Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* stresses the importance of internal control testwork over major programs with American Recovery and Reinvestment Act of 2009 (ARRA) expenditures and encourages early communication to management and those charged with governance of any significant deficiencies or material weaknesses in internal control:

Early communication by auditors to management, and those charged with governance, of identified control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control will allow management to expedite corrective action and mitigate the risk of improper expenditure of ARRA awards. Therefore, auditors are encouraged to promptly inform auditee management and those charged with governance during the audit engagement about control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control. The auditor should use professional judgment regarding the form of such interim communications.

.08 Although not required, if an auditor decides to make such a communication in writing at an interim date, may the auditor issue the interim

⁸ The OMB pilot project requires the auditee, upon receipt of the interim communication from the auditor, to provide it to the federal cognizant agency for audit. Federal agencies are required to follow up with the auditee concerning actions taken or needed to correct the finding. Therefore, to assist the federal agencies with this responsibility, significant deficiency and material weakness finding descriptions should include the level of detail required by both *Government Auditing Standards* and Section 510(b) of OMB Circular A-133. This would require the inclusion of, among other things, the views of responsible officials (see footnote 10).

⁹ See footnote 8.

¹⁰ The OMB pilot project requires the auditor to obtain management responses to the internal control matters identified and to include them in the interim communication.

communication in accordance with section 325, *Communicating Internal Control Related Matters Identified in an Audit*?

.09 Interpretation—Yes. As noted in the previous question, section 325 permits an auditor to communicate to management and those charged with governance identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. The auditor is reminded that, regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with paragraphs .17–.18 of section 325.

.10 If the auditor decides to make the interim communication encouraged in part 6 of the *OMB Circular A-133 Compliance Supplement* in writing, the following is an illustrative communication that an auditor may use to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim date prior to the completion of the compliance audit and that are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control:

This communication is provided pursuant to the *Office of Management and Budget (OMB) Circular A-133 Compliance Supplement*, which encourages auditors to communicate, at an interim date, control deficiencies related to federal programs with expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding that are, or likely to be, significant deficiencies or material weaknesses in internal control over compliance. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program], we are considering [Example Entity's] compliance with the applicable types of compliance requirements as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 20XX. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or

detect and correct, noncompliance with a type of compliance requirement¹¹ of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.]

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.]

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 2009; Revised: March 2010.]

4. Appropriateness of Identifying No Significant Deficiencies or No Material Weaknesses in an Interim Communication

.11 Question—In either of the previously described scenarios, may the auditor issue an interim communication in accordance with section 325, *Communicating Internal Control Related Matters Identified in an Audit*, stating that as of the interim communication date, no significant deficiencies or material weaknesses have been noted?

.12 Interpretation—No. Paragraph .25 of section 325 states that the auditor should not issue a written communication stating that no significant deficiencies were identified during the audit. Such guidance would also apply to the interim communication contemplated in the previous two questions. Therefore, it would not be appropriate for an auditor to issue an interim communication stating that no significant deficiencies were identified.

.13 Although section 325 would permit the auditor to issue a communication at the end of an audit stating that no material weaknesses were identified by the auditor (see paragraph .24 of section 325), it would not be appropriate for an auditor to do so at an interim date. Making such a communication at an interim date could lead to misinterpretation by management and those charged with governance, that there are no identified material weaknesses when, in fact, material weaknesses could be identified before completion of the compliance audit.

AU Section 326

Audit Evidence

(Supersedes SAS No. 31.)

Source: SAS No. 106.

See section 9326 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

Introduction

.01 This section provides guidance about concepts underlying the third standard of field work: "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit." This section:

- Defines *audit evidence*;
- Defines *relevant assertions* and discusses their use in assessing risks and designing appropriate further audit procedures;¹
- Discusses qualitative aspects that the auditor considers in determining the sufficiency and appropriateness of audit evidence; and
- Describes various audit procedures and discusses the purposes for which they may be performed.

Concept of Audit Evidence

.02 *Audit evidence* is all the information used by the auditor in arriving at the conclusions on which the audit opinion is based and includes the information contained in the accounting records underlying the financial statements and other information. Auditors are not expected to examine all information that may exist.² Audit evidence, which is cumulative in nature, includes audit evidence obtained from audit procedures performed during the course of the audit and may include audit evidence obtained from other sources, such as previous audits and a firm's quality control procedures for client acceptance and continuance.

.03 Accounting records generally include the records of initial entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers, journal entries, and other adjustments to the financial statements that are not reflected in formal journal entries; and records such as worksheets and spreadsheets supporting cost allocations, computations, reconciliations, and disclosures. The entries in the accounting records are often initiated, authorized, recorded, processed, and

¹ Further audit procedures include tests of the operating effectiveness of controls and substantive procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement. See paragraph .07 of section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

² See paragraph .13.

reported in electronic form. In addition, the accounting records may be part of integrated systems that share data and support all aspects of the entity's financial reporting, operations, and compliance objectives.

.04 Management is responsible for the preparation of the financial statements based on the accounting records of the entity. The auditor should obtain audit evidence by testing the accounting records, for example, through analysis and review, reperforming procedures followed in the financial reporting process, and reconciling related types and applications of the same information. Through the performance of such audit procedures, the auditor may determine that the accounting records are internally consistent and agree to the financial statements. However, because accounting records alone do not provide sufficient appropriate audit evidence on which to base an audit opinion on the financial statements, the auditor should obtain other audit evidence.

.05 Other information that the auditor may use as audit evidence includes minutes of meetings; confirmations from third parties; industry analysts' reports; comparable data about competitors (benchmarking); controls manuals; information obtained by the auditor from such audit procedures as inquiry, observation, and inspection; and other information developed by or available to the auditor that permits the auditor to reach conclusions through valid reasoning.

Sufficient Appropriate Audit Evidence

.06 *Sufficiency* is the measure of the quantity of audit evidence. *Appropriateness* is the measure of the quality of audit evidence, that is, its relevance and its reliability in providing support for, or detecting misstatements in, the classes of transactions, account balances, and disclosures and related assertions. The auditor should consider the sufficiency and appropriateness of audit evidence to be obtained when assessing risks and designing further audit procedures. The quantity of audit evidence needed is affected by the risk of misstatement (the greater the risk, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less the audit evidence that may be required). Accordingly, the sufficiency and appropriateness of audit evidence are interrelated. However, merely obtaining more audit evidence may not compensate if it is of a lower quality.

.07 A given set of audit procedures may provide audit evidence that is relevant to certain assertions but not to others. For example, inspection of records and documents related to the collection of receivables after the period end may provide audit evidence regarding both existence and valuation, although not necessarily the appropriateness of period-end cutoffs. On the other hand, the auditor often obtains audit evidence from different sources or of a different nature that is relevant to the same assertion. For example, the auditor may analyze the aging of accounts receivable and the subsequent collection of receivables to obtain audit evidence relating to the valuation of the allowance for doubtful accounts. Furthermore, obtaining audit evidence relating to a particular assertion, for example, the physical existence of inventory, is not a substitute for obtaining audit evidence regarding another assertion, for example, rights and obligations.

.08 The reliability of audit evidence is influenced by its source and by its nature and is dependent on the individual circumstances under which it is obtained. Generalizations about the reliability of various kinds of audit evidence can be made; however, such generalizations are subject to important exceptions. Even when audit evidence is obtained from sources external to the entity, circumstances may exist that could affect the reliability of the information

obtained. For example, audit evidence obtained from an independent external source may not be reliable if the source is not knowledgeable. While recognizing that exceptions may exist, the following generalizations about the reliability of audit evidence are useful:

- Audit evidence is more reliable when it is obtained from knowledgeable independent sources outside the entity.
- Audit evidence that is generated internally is more reliable when the related controls imposed by the entity are effective.
- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence is more reliable when it exists in documentary form, whether paper, electronic, or other medium (for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of the matters discussed).
- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles.

.09 The auditor should consider the reliability of the information to be used as audit evidence, for example, photocopies; facsimiles; or filmed, digitized, or other electronic documents, including consideration of controls over their preparation and maintenance where relevant. However, an audit rarely involves the authentication of documentation, nor is the auditor trained as or expected to be an expert in such authentication.

.10 When information produced by the entity is used by the auditor to perform further audit procedures, the auditor should obtain audit evidence about the accuracy and completeness of the information.³ In order for the auditor to obtain reliable audit evidence, the information upon which the audit procedures are based needs to be sufficiently complete and accurate. For example, in auditing revenue by applying standard prices to records of sales volume, the auditor should consider the accuracy of the price information and the completeness and accuracy of the sales volume data. Obtaining audit evidence about the completeness and accuracy of the information produced by the entity's information system may be performed concurrently with the actual audit procedure applied to the information when obtaining such audit evidence is an integral part of the audit procedure itself. In other situations, the auditor may have obtained audit evidence of the accuracy and completeness of such information by testing controls over the production and maintenance of the information. However, in some situations the auditor may determine that additional audit procedures are needed. For example, these additional procedures may include using computer-assisted audit techniques (CAATs) to recalculate the information.

.11 The auditor ordinarily obtains more assurance from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. In addition, obtaining audit evidence from different sources or of a different nature may indicate that an individual item of audit evidence is not reliable. For example, corroborating information obtained from a source independent of the entity may increase the assurance the auditor obtains from a management representation. Conversely, when audit evidence obtained from one source is inconsistent with that obtained

³ See paragraphs .14 and .57 of section 318.

from another, the auditor should determine what additional audit procedures are necessary to resolve the inconsistency.

.12 The auditor may consider the relationship between the cost of obtaining audit evidence and the usefulness of the information obtained. However, the matter of difficulty or expense involved is not in itself a valid basis for omitting an audit procedure for which there is no appropriate alternative.

.13 In forming the audit opinion, the auditor does not examine all the information available (evidence) because conclusions ordinarily can be reached by using sampling approaches and other means of selecting items for testing. Also, the auditor may find it necessary to rely on audit evidence that is persuasive rather than conclusive; however, to obtain reasonable assurance,⁴ the auditor must not be satisfied with audit evidence that is less than persuasive. The auditor should use professional judgment and should exercise professional skepticism in evaluating the quantity and quality of audit evidence, and thus its sufficiency and appropriateness, to support the audit opinion.

The Use of Assertions in Obtaining Audit Evidence

.14 Management is responsible for the fair presentation of financial statements that reflect the nature and operations of the entity.⁵ In representing that the financial statements are fairly presented in conformity with generally accepted accounting principles,⁶ management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of information in the financial statements and related disclosures.

.15 Assertions used by the auditor (see paragraph .16) fall into the following categories:

- a. Assertions about classes of transactions and events for the period under audit:
 - i. *Occurrence.* Transactions and events that have been recorded have occurred and pertain to the entity.
 - ii. *Completeness.* All transactions and events that should have been recorded have been recorded.
 - iii. *Accuracy.* Amounts and other data relating to recorded transactions and events have been recorded appropriately.
 - iv. *Cutoff.* Transactions and events have been recorded in the correct accounting period.
 - v. *Classification.* Transactions and events have been recorded in the proper accounts.
- b. Assertions about account balances at the period end:
 - i. *Existence.* Assets, liabilities, and equity interests exist.
 - ii. *Rights and obligations.* The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.
 - iii. *Completeness.* All assets, liabilities, and equity interests that should have been recorded have been recorded.

⁴ Section 230, paragraphs .10 through .13, provides guidance on reasonable assurance as it relates to an audit of financial statements.

⁵ See section 110, paragraph .03.

⁶ Reference to generally accepted accounting principles in this section includes, where applicable, a comprehensive basis of accounting other than generally accepted accounting principles as defined in section 623, *Special Reports*.

- iv. *Valuation and allocation.* Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.
- c. Assertions about presentation and disclosure:
 - i. *Occurrence and rights and obligations.* Disclosed events and transactions have occurred and pertain to the entity.
 - ii. *Completeness.* All disclosures that should have been included in the financial statements have been included.
 - iii. *Classification and understandability.* Financial information is appropriately presented and described and disclosures are clearly expressed.
 - iv. *Accuracy and valuation.* Financial and other information are disclosed fairly and at appropriate amounts.

.16 The auditor may use the relevant assertions as they are described above or may express them differently provided aspects described above have been covered. For example, the auditor may choose to combine the assertions about transactions and events with the assertions about account balances. As another example, there may not be a separate assertion related to cutoff of transactions and events when the occurrence and completeness assertions include appropriate consideration of recording transactions in the correct accounting period.

.17 The auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks.

.18 Relevant assertions are assertions that have a meaningful bearing on whether the account is fairly stated. For example, valuation may not be relevant to the cash account unless currency translation is involved; however, existence and completeness are always relevant. Similarly, valuation may not be relevant to the gross amount of the accounts receivable balance but is relevant to the related allowance accounts. Additionally, the auditor might, in some circumstances, focus on the presentation and disclosure assertion separately in connection with the period-end financial reporting process.

.19 For each significant class of transactions, account balance, and presentation and disclosure, the auditor should determine the relevance of each of the financial statement assertions. To identify relevant assertions, the auditor should determine the source of likely potential misstatements in each significant class of transactions, account balance, and presentation and disclosure. In determining whether a particular assertion is relevant to a significant account balance or disclosure, the auditor should evaluate:

- a. The nature of the assertion;
- b. The volume of transactions or data related to the assertion; and
- c. The nature and complexity of the systems, including the use of information technology, by which the entity processes and controls information supporting the assertion.

Audit Procedures for Obtaining Audit Evidence

.20 The auditor should obtain audit evidence to draw reasonable conclusions on which to base the audit opinion by performing audit procedures to:

- a. Obtain an understanding of the entity and its environment, including its internal control, to assess the risks of material misstatement at the financial statement and relevant assertion levels (audit procedures performed for this purpose are referred to as *risk assessment procedures*);
- b. When necessary, or when the auditor has determined to do so, test the operating effectiveness of controls in preventing or detecting material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *tests of controls*); and
- c. Detect material misstatements at the relevant assertion level (audit procedures performed for this purpose are referred to as *substantive procedures* and include tests of details of classes of transactions, account balances, and disclosures, and substantive analytical procedures).

.21 The auditor must perform risk assessment procedures⁷ to provide a satisfactory basis for the assessment of risks at the financial statement and relevant assertion levels. Risk assessment procedures by themselves do not provide sufficient appropriate audit evidence on which to base the audit opinion and must be supplemented by further audit procedures in the form of tests of controls, when relevant or necessary, and substantive procedures.

.22 Tests of controls are necessary in two circumstances. When the auditor's risk assessment includes an expectation of the operating effectiveness of controls, the auditor should test those controls to support the risk assessment. In addition, when the substantive procedures alone do not provide sufficient appropriate audit evidence, the auditor should perform tests of controls to obtain audit evidence about their operating effectiveness.⁸

.23 As described in section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, the auditor should plan and should perform substantive procedures to be responsive to the related planned level of detection risk, which includes the results of tests of controls, if any. The auditor's risk assessment is judgmental, however, and may not be sufficiently precise to identify all risks of material misstatement.⁹ Further, there are inherent limitations in internal control, including the risk of management override, the possibility of human error, and the effect of systems changes. Therefore, regardless of the assessed risk of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure to obtain sufficient appropriate audit evidence.

.24 The auditor should use one or more types of the audit procedures described in paragraphs .27 through .41 of this section. These audit procedures, or combinations thereof, may be used as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor. Paragraph .05 of section 314, *Understanding the*

⁷ See paragraph .05 of section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, for an explanation of risk assessment procedures.

⁸ See paragraphs .117 through .120 of section 314 and paragraph .24 of section 318.

⁹ See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for definition of *risk of material misstatement*.

Entity and Its Environment and Assessing the Risks of Material Misstatement, provides guidance to the auditor to perform a combination of audit procedures when performing risk assessment procedures. In addition, a combination of two or more of these audit procedures may be necessary to obtain sufficient appropriate audit evidence when performing tests of controls or substantive procedures at the relevant assertion level. In certain circumstances, audit evidence obtained from previous audits may provide audit evidence where the auditor should perform audit procedures to establish its continuing relevance.¹⁰

.25 The nature and timing of the audit procedures to be used may be affected by the fact that some of the accounting data and other information may be available only in electronic form or only at certain points or periods in time.¹¹ Source documents, such as purchase orders, bills of lading, invoices, and checks, may be replaced with electronic messages. For example, entities may use electronic commerce or image processing systems. In electronic commerce, the entity and its customers or suppliers use connected computers over a public network, such as the Internet, to transact business electronically. Purchasing, shipping, billing, cash receipt, and cash disbursement transactions are often consummated entirely by the exchange of electronic messages between the parties. In image processing systems, documents are scanned and converted into electronic images to facilitate storage and reference, and the source documents may not be retained after conversion. Certain electronic information may exist at a certain point in time. However, such information may not be retrievable after a specified period of time if files are changed and if backup files do not exist. An entity's data retention policies may require the auditor to request retention of some information for the auditor's review or to perform audit procedures at a time when the information is available.

.26 When the information is in electronic form, the auditor may carry out through CAATs certain of the audit procedures described in the following sections.

Inspection of Records or Documents

.27 Inspection consists of examining records or documents, whether internal or external, in paper form, electronic form, or other media. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, on the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records or documents for evidence of authorization.

.28 Some documents represent direct audit evidence of the existence of an asset, for example, a document constituting a financial instrument such as a stock or bond. Inspection of such documents may not necessarily provide audit evidence about ownership or value. In addition, inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting principles, such as revenue recognition.

Inspection of Tangible Assets

.29 Inspection of tangible assets consists of physical examination of the assets. Inspection of tangible assets may provide appropriate audit evidence with respect to their existence, but not necessarily about the entity's rights and

¹⁰ See paragraph .64 of section 318.

¹¹ See paragraphs .57 through .63 of section 314.

obligations or the valuation of the assets. Inspection of individual inventory items ordinarily accompanies the observation of inventory counting. For example, when observing an inventory count, the auditor may inspect individual inventory items (such as opening containers included in the inventory count to ensure that they are not empty) to verify their existence.

Observation

.30 Observation consists of looking at a process or procedure being performed by others. Examples include observation of the counting of inventories by the entity's personnel and observation of the performance of control activities. Observation provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed. See section 331, *Inventories*, for further guidance on observation of the counting of inventory.

Inquiry

.31 Inquiry consists of seeking information of knowledgeable persons, both financial and nonfinancial, inside or outside the entity. Inquiry is an audit procedure that is used extensively throughout the audit and often is complementary to performing other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.

.32 Inquiry normally involves:

- Considering the knowledge, objectivity, experience, responsibility, and qualifications of the individual to be questioned.
- Asking clear, concise, and relevant questions.
- Using open or closed questions appropriately.
- Listening actively and effectively.
- Considering the reactions and responses and asking follow-up questions.
- Evaluating the response.

.33 In some cases, the auditor should obtain replies to inquiries in the form of written representations from management. For example, when obtaining oral responses to inquiries, the nature of the response may be so significant that it warrants obtaining written representation from the source. See section 333, *Management Representations*, for further guidance on written representations.

.34 Responses to inquiries may provide the auditor with information not previously possessed or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information that the auditor has obtained, for example, information regarding the possibility of management override of controls. In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures. The auditor should resolve any significant inconsistencies in the information obtained.

.35 The auditor should perform audit procedures in addition to the use of inquiry to obtain sufficient appropriate audit evidence. Inquiry alone ordinarily does not provide sufficient appropriate audit evidence to detect a material misstatement at the relevant assertion level. Moreover, inquiry alone is not sufficient to test the operating effectiveness of controls.

.36 Although corroboration of evidence obtained through inquiry is often of particular importance, in the case of inquiries about management's intent, the information available to support management's intent may be limited. In these cases, understanding management's past history of carrying out its stated intentions with respect to assets or liabilities, management's stated reasons for choosing a particular course of action, and management's ability to pursue a specific course of action may provide relevant information about management's intent.

Confirmation

.37 Confirmation, which is a specific type of inquiry, is the process of obtaining a representation of information or of an existing condition directly from a third party. For example, the auditor may seek direct confirmation of receivables by communication with debtors. Confirmations are frequently used in relation to account balances and their components but need not be restricted to these items. A confirmation request can be designed to ask if any modifications have been made to the agreement, and if so, what the relevant details are. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties. Confirmations also are used to obtain audit evidence about the absence of certain conditions, for example, the absence of an undisclosed agreement that may influence revenue recognition. See section 330, *The Confirmation Process*, for further guidance on confirmations.

Recalculation

.38 Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation can be performed through the use of information technology, for example, by obtaining an electronic file from the entity and using CAATs to check the accuracy of the summarization of the file.

Reperformance

.39 Repformance is the auditor's independent execution of procedures or controls that were originally performed as part of the entity's internal control, either manually or through the use of CAATs, for example, reperforming the aging of accounts receivable.

Analytical Procedures

.40 Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of identified fluctuations and relationships that are inconsistent with other relevant information or deviate significantly from predicted amounts. See section 329, *Analytical Procedures*, for further guidance on analytical procedures.

.41 An analytical procedure might be scanning, which is the auditor's use of professional judgment to review accounting data to identify significant or unusual items and then to test those items. This includes the identification of anomalous individual items within account balances or other data through the reading or analysis of entries in transaction listings, subsidiary ledgers, general ledger control accounts, adjusting entries, suspense accounts, reconciliations, and other detailed reports. Scanning includes searching for large or unusual items in the accounting records (for example, nonstandard journal entries), as

well as in transaction data (for example, suspense accounts, adjusting journal entries) for indications of misstatements that have occurred. CAATS may assist an auditor in identifying anomalies. Since the auditor tests the items selected by scanning, the auditor obtains audit evidence about those items. The auditor's scanning also may provide some audit evidence about the items not selected since the auditor has used professional judgment to determine that the items not selected are less likely to be misstated.

Effective Date

.42 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006. Earlier application is permitted.

AU Section 9326

Audit Evidence: Auditing Interpretations of Section 326

1. Audit Evidence for an Audit of Interim Financial Statements

.01 Question—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 270-10-45-2 states that "certain accounting principles and practices followed for annual reporting purposes may require modification at interim reporting dates so that the reported results for the interim period may better relate to the results of operations for the annual period." The modifications introduce a need for estimates to a greater extent than is necessary for annual financial information. Does this imply a relaxation of the third standard of field work, which requires that sufficient appropriate audit evidence be obtained to afford a reasonable basis for an opinion regarding the financial statements under audit?

.02 Interpretation—No. The third standard of field work applies to all engagements leading to an expression of opinion on financial statements or financial information.

.03 The objective of the independent auditor's engagement is to obtain sufficient appropriate audit evidence to provide him with a reasonable basis for forming an opinion. The auditor develops specific audit objectives in light of assertions by management that are embodied in financial statement components. Section 326 paragraph .17 states, "the auditor should use relevant assertions for classes of transactions, account balances, and presentation and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor should use relevant assertions in assessing risks by considering the different types of potential misstatements that may occur, and then designing further audit procedures that are responsive to the assessed risks."

.04 Audit evidence obtained for an audit of annual financial statements may also be useful in an audit of interim financial statements, and audit evidence obtained for an audit of interim financial statements may also be useful in an audit of annual financial statements. Section 318 paragraph .16 states that "The auditor may perform tests of controls or substantive procedures at an interim date or at period end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to, or at, the period end rather than at an earlier date, or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). On the other hand, performing audit procedures before the period end may assist the auditor in identifying significant matters at an early stage of the audit, and consequently resolving them with the assistance of management or developing an effective audit approach to address such matters."^[1]

^[1] [Footnote deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.05 The introduction by FASB ASC 270, *Interim Reporting*, of a need for additional estimates in measuring certain items for interim financial information may lead to a need for evidence in examining those items that differs from the evidence required in an audit of annual financial information. For example, computing the provision for federal income taxes in interim information involves estimating the effective tax rate expected to be applicable for the full fiscal year, and the auditor should examine evidence as to the basis for estimating that rate. Since the effective tax rate for the full year ordinarily is known at year-end, similar evidence is not usually required in examining annual information.

[Issue Date: February 1974; Modified: October 1980; Revised: March 2006; Revised: June 2009.]

2. The Effect of an Inability to Obtain Audit Evidence Relating to Income Tax Accruals

.06 Question—The Internal Revenue Service's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including, "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "Listed Transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-.5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

.07 Concern over IRS access to tax accrual working papers might cause some clients to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements, or to deny the independent auditor access to such information.

.08 What effect does this situation have on the auditor's opinion on the financial statements?

.09 Interpretation—The client is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unqualified opinion on the financial statements. Thus, if the client does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to client personnel responsible for making the judgments and estimates relating to the accrual, the auditor should assess the importance of that inadequacy in the accounting records and the client imposed limitation on his or her ability to form an opinion on the financial statements. Also, if the client has appropriate documentation but denies the auditor access to it and to client personnel who possess the information, the auditor should assess the importance of the client-imposed scope limitation on his or her ability to form an opinion.

.10 The third standard of field work requires the auditor to obtain sufficient appropriate audit evidence through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, paragraph .76, requires the

auditor to obtain sufficient appropriate audit evidence about material financial statement assertions or else to qualify or disclaim his or her opinion on the statements. Section 508, *Reports on Audited Financial Statements*, paragraph .24, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, section 333 on *Management Representations* requires the auditor to obtain written representations from management. Section 333 paragraph .06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and section 333 paragraph .08 states that a materiality limit does not apply to that representation. Section 333 paragraph .13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

.11 Question—A client may allow the auditor to inspect its tax accrual workpapers, but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The client also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What should the auditor consider in deciding a response to such a request?

.12 Interpretation—Section 339, *Audit Documentation*, states that audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation should include sufficient appropriate audit evidence to afford a reasonable basis for an opinion. In addition, audit documentation should be sufficient to enable an experienced auditor to understand the nature, timing, extent, and results of auditing procedures performed, and the evidence obtained. Section 326, *Audit Evidence*, paragraph .05, states that other information includes information obtained by the auditor from inquiry, observation, inspection, and physical examination. The quantity, type, and content of audit documentation are matters of the auditor's professional judgment (see section 339).

.13 The auditor's documentation of the results of auditing procedures directed at the tax accounts and related disclosures also should include sufficient appropriate audit evidence about the significant elements of the client's tax liability contingency analysis. This documentation should include copies of the client's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness of the client's accounting and disclosure of significant tax-related contingency matters. The audit documentation should reflect the procedures performed and conclusions reached by the auditor and, for significant matters, include the client's documentary support for its financial statement amounts and disclosures.

.14 The audit documentation should include the significant elements of the client's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the documentation should provide the client's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intra-period allocation of income tax expense or benefit to continuing operations and to items other than continuing operations. Where applicable, the documentation also should include the client's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" in FASB ASC 740-30-25-17, including its specific plans for reinvestment of undistributed foreign earnings.

.15 Question—In some situations, a client may furnish its outside legal counsel or in-house legal or tax counsel with information concerning the tax contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

.16 In such circumstances, rather than inspecting and obtaining documentary evidence of the client's tax liability contingency analysis and making inquiries of the client, may the auditor consider the counsel as a specialist within the meaning of AU section 336, *Using the Work of a Specialist*, and rely solely on counsel's opinion as an appropriate procedure for obtaining audit evidence to support his or her opinion on the financial statements?

.17 Interpretation—No. The opinion of legal counsel in this situation would not provide sufficient appropriate audit evidence to afford a reasonable basis for an opinion on the financial statements.

.18 Section 336 paragraph .01 defines a specialist as "a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing." It is intended to apply to situations requiring special knowledge of matters about which the auditor does not have adequate technical training and proficiency. The auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

.19 The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, can be useful to the auditor in forming his or her own opinion. However, the audit of income tax accounts requires a combination of tax expertise and knowledge about the client's business that is accumulated during all aspects of an audit. Therefore, as previously stated, it is not appropriate for the auditor to rely solely on such legal opinion.

.20 Question—A client may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third party tax advisers? What audit evidence should the auditor obtain and include in the audit documentation?

.21 Interpretation—As discussed in paragraphs .17–.19, the auditor cannot accept a client's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the client's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the auditor either disagrees with the position taken by the client, or its advisers, or does not have sufficient appropriate audit evidence to support his or her opinion.

.22 If the client's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor should obtain access to the opinion, notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation should include either the actual advice or opinions rendered by an outside adviser, or other sufficient documentation or abstracts supporting both the transactions or facts addressed as well as the analysis and conclusions reached by the client and adviser. Alternatives such as redacted or modified opinions may be considered, but must nonetheless

include sufficient content to articulate and document the client's position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept a client's analysis summarizing an outside adviser's opinion, but the client's analysis must provide sufficient appropriate audit evidence for the auditor to formulate his or her conclusion. In addition, client representations may be obtained stating that the client has not received any advice or opinions that are contradictory to the client's support for the tax accrual.

.23 If the auditor is unable to accumulate sufficient appropriate audit evidence about whether there is a supported and reasonable basis for the client's position, the auditor should consider the effect of this scope limitation on his or her report.

[Issue Date: March 1981; Amended: April 9, 2003; Revised: December 2005; Revised: March 2006; Revised: March 2008; Revised: June 2009.]

3. The Auditor's Consideration of the Completeness Assertion

.24 Question—Section 326, *Audit Evidence*, paragraphs .14–.19, discusses the use of assertions that are embodied in financial statement components. In obtaining audit evidence about certain assertions such as, existence or occurrence, rights and obligations, valuation or allocation, and presentation and disclosure, the auditor may consider classes of transactions, account balances and disclosures that are included in the financial statements. In contrast, in obtaining audit evidence about the completeness assertion related to classes of transactions, account balances and disclosures, the auditor may consider whether transactions, accounts and disclosures have been improperly excluded from the financial statements. May management's written representations and the auditor's assessment of control risk constitute sufficient audit evidence about the completeness assertion? [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

.25 Interpretation—Written representations from management are a part of the audit evidence the auditor may obtain in an audit performed in accordance with generally accepted auditing standards. Management's representations about the completeness assertion, whether considered alone or in combination with the auditor's assessment of control risk, do not constitute sufficient appropriate audit evidence to support that assertion. Obtaining such representations complements but does not replace other auditing procedures that the auditor should perform. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

.26 In planning audit procedures to obtain evidence about the completeness assertion, the auditor should consider the inherent risk that transactions and accounts have been improperly omitted from the financial statements. When the auditor assesses the inherent risk of omission for a particular account balance or class of transactions to be such that he believes omissions could exist that might be material when aggregated with errors in other balances or classes, he should restrict the audit risk of omission by performing substantive tests designed to obtain evidence about the completeness assertion. Substantive tests designed primarily to obtain evidence about the completeness assertion include analytical procedures and tests of details of *related populations*.² [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

² For purposes of this interpretation, a related population is a population other than the recorded account balance or class of transactions being audited that would be expected to contain evidence of whether all accounts or transactions that should be presented in that balance or class are so included.

.27 The extent of substantive tests of completeness may properly vary in relation to the assessed level of control risk. Because of the unique nature of the completeness assertion, an assessed level of control risk below the maximum may be an effective means for the auditor to obtain evidence about that assertion. Although an assessed level of control risk below the maximum is not required to satisfy the auditor's objectives with respect to the completeness assertion, the auditor should consider that for some transactions (for example, revenues that are received primarily in cash, such as those of a casino or of some charitable organizations) it may be difficult to limit audit risk for those assertions to an acceptable level without an assessed level of control risk below the maximum. [Paragraph renumbered by the amendment to Interpretation No. 2, April 2003.]

AU Section 328

Auditing Fair Value Measurements and Disclosures

Source: SAS No. 101; SAS No. 113.

Effective for audits of financial statements for periods beginning on or after June 15, 2003, unless otherwise indicated.

See section 9328 for interpretations of this section.

Introduction

.01 The purpose of this section is to establish standards and provide guidance on auditing fair value measurements and disclosures contained in financial statements. In particular, this section addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. Fair value measurements of assets, liabilities, and components of equity may arise from both the initial recording of transactions and later changes in value. Changes in fair value measurements that occur over time may be treated in different ways under generally accepted accounting principles (GAAP). For example, GAAP may require that some fair value changes be reflected in net income and that other fair value changes be reflected in other comprehensive income and equity.

.02 While this section provides guidance on auditing fair value measurements and disclosures, evidence obtained from other audit procedures also may provide evidence relevant to the measurement and disclosure of fair values. For example, inspection procedures to verify existence of an asset measured at fair value also may provide relevant evidence about its valuation, such as the physical condition of the asset.

.03 The auditor should obtain sufficient appropriate audit evidence to provide reasonable assurance that fair value measurements and disclosures are in conformity with GAAP. GAAP requires that certain items be measured at fair value. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary term *fair value* is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.¹ Although GAAP may not prescribe the method for measuring the fair value of an item, it expresses a preference for the use of observable market prices to make that determination. In the absence of observable market prices, GAAP requires fair value to be based on the best information available in the circumstances.

¹ Governmental Accounting Standards Board Statement of Governmental Accounting Standards No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, defines *fair value* as "the amount at which an investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale." [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

.05 Fair value measurements for which observable market prices are not available are inherently imprecise. That is because, among other things, those fair value measurements may be based on assumptions about future conditions, transactions, or events whose outcome is uncertain and will therefore be subject to change over time. The auditor's consideration of such assumptions is based on information available to the auditor at the time of the audit. The auditor is not responsible for predicting future conditions, transactions, or events that, had they been known at the time of the audit, may have had a significant effect on management's actions or management's assumptions underlying the fair value measurements and disclosures.²

.06 Assumptions used in fair value measurements are similar in nature to those required when developing other accounting estimates. However, if observable market prices are not available, GAAP requires that valuation methods incorporate assumptions that marketplace participants would use in their estimates of fair value whenever that information is available without undue cost and effort. If information about market assumptions is not available, an entity may use its own assumptions as long as there are no contrary data indicating that marketplace participants would use different assumptions. These concepts generally are not relevant for accounting estimates made under measurement bases other than fair value. Section 342, *Auditing Accounting Estimates*, provides guidance on auditing accounting estimates in general. This section addresses considerations similar to those in section 342 as well as others in the specific context of fair value measurements and disclosures in accordance with GAAP.

.07 GAAP requires or permits a variety of fair value measurements and disclosures in financial statements. GAAP also varies in the level of guidance that it provides on measuring fair values and disclosures. While this section provides guidance on auditing fair value measurements and disclosures, it does not address specific types of assets, liabilities, components of equity, transactions, or industry-specific practices.³

.08 The measurement of fair value may be relatively simple for certain assets or liabilities, for example, investments that are bought and sold in active markets that provide readily available and reliable information on the prices at which actual exchanges occur. For those items, the existence of published

² For purposes of this section, management's assumptions include assumptions developed by management under the guidance of those charged with governance and assumptions developed by a specialist engaged or employed by management. [Footnote revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

³ See, for example, section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

price quotations in an active market is the best evidence of fair value. The measurement of fair value for other assets or liabilities may be more complex. A specific asset may not have an observable market price or may possess such characteristics that it becomes necessary for management to estimate its fair value based on the best information available in the circumstances (for example, a complex derivative financial instrument). The estimation of fair value may be achieved through the use of a valuation method (for example, a model premised on discounting of estimated future cash flows).

Understanding the Entity's Process for Determining Fair Value Measurements and Disclosures and the Relevant Controls, and Assessing Risk

.09 The auditor should obtain an understanding of the entity's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach.

.10 Management is responsible for establishing an accounting and financial reporting process for determining fair value measurements. In some cases, the measurement of fair value and therefore the process set up by management to determine fair value may be simple and reliable. For example, management may be able to refer to published price quotations in an active market to determine fair value for marketable securities held by the entity. Some fair value measurements, however, are inherently more complex than others and involve uncertainty about the occurrence of future events or their outcome, and therefore assumptions that may involve the use of judgment need to be made as part of the measurement process.

.11 Section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of each of the five components of internal control sufficient to assess the risk of material misstatement. In the specific context of this section, the auditor obtains such an understanding related to the determination of the entity's fair value measurements and disclosures in order to plan the nature, timing, and extent of the audit procedures. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.12 When obtaining an understanding of the entity's process for determining fair value measurements and disclosures, the auditor considers, for example:

- Controls over the process used to determine fair value measurements, including, for example, controls over data and the segregation of duties between those committing the entity to the underlying transactions and those responsible for undertaking the valuations.
- The expertise and experience of those persons determining the fair value measurements.
- The role that information technology has in the process.
- The types of accounts or transactions requiring fair value measurements or disclosures (for example, whether the accounts arise from the recording of routine and recurring transactions or whether they arise from nonroutine or unusual transactions).
- The extent to which the entity's process relies on a service organization to provide fair value measurements or the data that supports the measurement. When an entity uses a service organization, the auditor

considers the requirements of section 324, *Service Organizations*, as amended.

- The extent to which the entity engages or employs specialists in determining fair value measurements and disclosures.
- The significant management assumptions used in determining fair value.
- The documentation supporting management's assumptions.
- The process used to develop and apply management assumptions, including whether management used available market information to develop the assumptions.
- The process used to monitor changes in management's assumptions.
- The integrity of change controls and security procedures for valuation models and relevant information systems, including approval processes.
- The controls over the consistency, timeliness, and reliability of the data used in valuation models.

.13 The auditor uses his or her understanding of the entity's process, including its complexity, and of the controls when assessing the risk of material misstatement. Based on that risk assessment, the auditor determines the nature, timing, and extent of the audit procedures. The risk of material misstatement may increase as the accounting and financial reporting requirements for fair value measurements become more complex.

.14 Section 314 discusses the inherent limitations of internal control. As fair value determinations often involve subjective judgments by management, this may affect the nature of controls that are capable of being implemented, including the possibility of management override of controls (see section 316, *Consideration of Fraud in a Financial Statement Audit*). The auditor considers the inherent limitations of internal control in such circumstances in assessing control risk. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

Evaluating Conformity of Fair Value Measurements and Disclosures With GAAP

.15 The auditor should evaluate whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP. The auditor's understanding of the requirements of GAAP and knowledge of the business and industry, together with the results of other audit procedures, are used to evaluate the accounting for assets or liabilities requiring fair value measurements, and the disclosures about the basis for the fair value measurements and significant uncertainties related thereto.

.16 The evaluation of the entity's fair value measurements and of the audit evidence depends, in part, on the auditor's knowledge of the nature of the business. This is particularly true where the asset or liability or the valuation method is highly complex. For example, derivative financial instruments may be highly complex, with a risk that differing assumptions used in determining fair values will result in different conclusions. The measurement of the fair value of some items, for example "in process research and development" or intangible assets acquired in a business combination, may involve special considerations that are affected by the nature of the entity and its operations. Also, the auditor's knowledge of the business, together with the results of other audit

procedures, may help identify assets for which management should assess the need to recognize an impairment loss under applicable GAAP.

.17 The auditor should evaluate management's intent to carry out specific courses of action where intent is relevant to the use of fair value measurements, the related requirements involving presentation and disclosures, and how changes in fair values are reported in financial statements. The auditor also should evaluate management's ability to carry out those courses of action. Management often documents plans and intentions relevant to specific assets or liabilities and GAAP may require it to do so. While the extent of evidence to be obtained about management's intent and ability is a matter of professional judgment, the auditor's procedures ordinarily include inquiries of management, with appropriate corroboration of responses, for example, by:

- Considering management's past history of carrying out its stated intentions with respect to assets or liabilities.
- Reviewing written plans and other documentation, including, where applicable, budgets, minutes, and other such items.
- Considering management's stated reasons for choosing a particular course of action.
- Considering management's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its contractual commitments.

.18 When there are no observable market prices and the entity estimates fair value using a valuation method, the auditor should evaluate whether the entity's method of measurement is appropriate in the circumstances. That evaluation requires the use of professional judgment. It also involves obtaining an understanding of management's rationale for selecting a particular method by discussing with management its reasons for selecting the valuation method. The auditor considers whether:

- a. Management has sufficiently evaluated and appropriately applied the criteria, if any, provided by GAAP to support the selected method.
- b. The valuation method is appropriate in the circumstances given the nature of the item being valued.
- c. The valuation method is appropriate in relation to the business, industry, and environment in which the entity operates.

Management may have determined that different valuation methods result in a range of significantly different fair value measurements. In such cases, the auditor evaluates how the entity has investigated the reasons for these differences in establishing its fair value measurements.

.19 The auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity, or changes in accounting principles. If management has changed the method for determining fair value, the auditor considers whether management can adequately demonstrate that the method to which it has changed provides a more appropriate basis of measurement or whether the change is supported by a change in the GAAP requirements or a change in circumstances.⁴ For example, the introduction of an active market

⁴ Paragraphs 1–2 of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 250-10-45 state that a presumption exists that an accounting principle once adopted shall not be changed in accounting for events and transactions of a similar type. Consistent use of the same accounting principle from one accounting period to another enhances the utility of financial

(continued)

for an equity security may indicate that the use of the discounted cash flows method to estimate the fair value of the security is no longer appropriate.

Engaging a Specialist

.20 The auditor should consider whether to engage a specialist and use the work of that specialist as audit evidence in performing substantive tests to evaluate material financial statement assertions. The auditor may have the necessary skill and knowledge to plan and perform audit procedures related to fair values or may decide to use the work of a specialist. If the use of such a specialist is planned, the auditor should consider the guidance in section 336, *Using the Work of a Specialist*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.21 When planning to use the work of a specialist in auditing fair value measurements, the auditor considers whether the specialist's understanding of the definition of fair value and the method that the specialist will use to determine fair value are consistent with those of management and with GAAP. For example, the method used by a specialist for estimating the fair value of real estate or a complex derivative may not be consistent with the measurement principles specified in GAAP. Accordingly, the auditor considers such matters, often through discussions with the specialist or by reading the report of the specialist.

.22 Section 336 provides that, while the reasonableness of assumptions and the appropriateness of the methods used and their application are the responsibility of the specialist, the auditor obtains an understanding of the assumptions and methods used. However, if the auditor believes the findings are unreasonable, he or she applies additional procedures as required in section 336.

Testing the Entity's Fair Value Measurements and Disclosures

.23 Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent. For example, substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data (see paragraphs .26 through .39), (b) developing independent fair value estimates for corroborative purposes (see paragraph .40), or (c) reviewing subsequent events and transactions (see paragraphs .41 and .42).

.24 Some fair value measurements are inherently more complex than others. This complexity arises either because of the nature of the item being measured at fair value or because of the valuation method used to determine fair value. For example, in the absence of quoted prices in an active market, an estimate of a security's fair value may be based on valuation methods such as the

(footnote continued)

statements for users by facilitating analysis and understanding of comparative accounting data. A reporting entity shall change an accounting principle only if either of the following apply:

- a. The change is required by a newly issued codification update.
- b. The entity can justify the use of an allowable alternative accounting principle on the basis that it is preferable.

[Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

discounted cash flow method or the transactions method. Complex fair value measurements normally are characterized by greater uncertainty regarding the reliability of the measurement process. This greater uncertainty may be a result of:

- The length of the forecast period
- The number of significant and complex assumptions associated with the process
- A higher degree of subjectivity associated with the assumptions and factors used in the process
- A higher degree of uncertainty associated with the future occurrence or outcome of events underlying the assumptions used
- Lack of objective data when highly subjective factors are used

.25 The auditor uses both the understanding of management's process for determining fair value measurements and his or her assessment of the risk of material misstatement to determine the nature, timing, and extent of the audit procedures. The following are examples of considerations in the development of audit procedures:

- The fair value measurement (for example, a valuation by an independent appraiser) may be made at a date that does not coincide with the date at which the entity is required to measure and report that information in its financial statements. In such cases, the auditor obtains evidence that management has taken into account the effect of events, transactions, and changes in circumstances occurring between the date of the fair value measurement and the reporting date.
- Collateral often is assigned for certain types of investments in debt instruments that either are required to be measured at fair value or are evaluated for possible impairment. If the collateral is an important factor in measuring the fair value of the investment or evaluating its carrying amount, the auditor obtains sufficient appropriate audit evidence regarding the existence, value, rights, and access to or transferability of such collateral, including consideration of whether all appropriate liens have been filed, and considers whether appropriate disclosures about the collateral have been made.
- In some situations, additional procedures, such as the inspection of an asset by the auditor, may be necessary to obtain sufficient appropriate audit evidence about the appropriateness of a fair value measurement. For example, inspection of the asset may be necessary to obtain information about the current physical condition of the asset relevant to its fair value, or inspection of a security may reveal a restriction on its marketability that may affect its value.

[Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Testing Management's Significant Assumptions, the Valuation Model, and the Underlying Data

.26 The auditor's understanding of the reliability of the process used by management to determine fair value is an important element in support of the resulting amounts and therefore affects the nature, timing, and extent of audit

procedures. When testing the entity's fair value measurements and disclosures, the auditor evaluates whether:

- a. Management's assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).
- b. The fair value measurement was determined using an appropriate model, if applicable.
- c. Management used relevant information that was reasonably available at the time.

.27 Estimation methods and assumptions, and the auditor's consideration and comparison of fair value measurements determined in prior periods, if any, to results obtained in the current period, may provide evidence of the reliability of management's processes. However, the auditor also considers whether variances from the prior-period fair value measurements result from changes in market or economic circumstances.

.28 Where applicable, the auditor should evaluate whether the significant assumptions used by management in measuring fair value, taken individually and as a whole, provide a reasonable basis for the fair value measurements and disclosures in the entity's financial statements.

.29 Assumptions are integral components of more complex valuation methods, for example, valuation methods that employ a combination of estimates of expected future cash flows together with estimates of the values of assets or liabilities in the future, discounted to the present. Auditors pay particular attention to the significant assumptions underlying a valuation method and evaluate whether such assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).

.30 Specific assumptions will vary with the characteristics of the item being valued and the valuation approach used (for example, cost, market, or income). For example, where the discounted cash flows method (a method under the income approach) is used, there will be assumptions about the level of cash flows, the period of time used in the analysis, and the discount rate.

.31 Assumptions ordinarily are supported by differing types of evidence from internal and external sources that provide objective support for the assumptions used. The auditor evaluates the source and reliability of evidence supporting management's assumptions, including consideration of the assumptions in light of historical and market information.

.32 Audit procedures dealing with management's assumptions are performed in the context of the audit of the entity's financial statements. The objective of the audit procedures is therefore not intended to obtain sufficient appropriate audit evidence to provide an opinion on the assumptions themselves. Rather, the auditor performs procedures to evaluate whether the assumptions provide a reasonable basis for measuring fair values in the context of an audit of the financial statements taken as a whole. [Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.33 Identifying those assumptions that appear to be significant to the fair value measurement requires the exercise of judgment by management. The auditor focuses attention on the significant assumptions that management has identified. Generally, significant assumptions cover matters that materially affect the fair value measurement and may include those that are:

- a. Sensitive to variation or uncertainty in amount or nature. For example, assumptions about short-term interest rates may be less susceptible

to significant variation compared to assumptions about long-term interest rates.

b. Susceptible to misapplication or bias.

.34 The auditor considers the sensitivity of the valuation to changes in significant assumptions, including market conditions that may affect the value. Where applicable, the auditor encourages management to use techniques such as sensitivity analysis to help identify particularly sensitive assumptions. If management has not identified particularly sensitive assumptions, the auditor considers whether to employ techniques to identify those assumptions.

.35 The evaluation of whether the assumptions provide a reasonable basis for the fair value measurements relates to the whole set of assumptions as well as to each assumption individually. Assumptions are frequently interdependent and therefore need to be internally consistent. A particular assumption that may appear reasonable when taken in isolation may not be reasonable when used in conjunction with other assumptions. The auditor considers whether management has identified the significant assumptions and factors influencing the measurement of fair value.

.36 To be reasonable, the assumptions on which the fair value measurements are based (for example, the discount rate used in calculating the present value of future cash flows),⁵ individually and taken as a whole, need to be realistic and consistent with:

- a. The general economic environment, the economic environment of the specific industry, and the entity's economic circumstances;
- b. Existing market information;
- c. The plans of the entity, including what management expects will be the outcome of specific objectives and strategies;
- d. Assumptions made in prior periods, if appropriate;
- e. Past experience of, or previous conditions experienced by, the entity to the extent currently applicable;
- f. Other matters relating to the financial statements, for example, assumptions used by management in accounting estimates for financial statement accounts other than those relating to fair value measurements and disclosures; and
- g. The risk associated with cash flows, if applicable, including the potential variability in the amount and timing of the cash flows and the related effect on the discount rate.

Where assumptions are reflective of management's intent and ability to carry out specific courses of action, the auditor considers whether they are consistent with the entity's plans and past experience.

.37 If management relies on historical financial information in the development of assumptions, the auditor considers the extent to which such reliance is justified. However, historical information might not be representative of future conditions or events, for example, if management intends to engage in new activities or circumstances change.

.38 For items valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management. Rather, the auditor reviews the model and evaluates whether the assumptions used are reasonable and

⁵ The auditor also should consider requirements of FASB ASC 820, *Fair Value Measurements and Disclosures*. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

the model is appropriate considering the entity's circumstances. For example, it may be inappropriate to use discounted cash flows for valuing an equity investment in a start-up enterprise if there are no current revenues on which to base the forecast of future earnings or cash flows.

.39 The auditor should test the data used to develop the fair value measurements and disclosures and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions. Specifically, the auditor evaluates whether the data on which the fair value measurements are based, including the data used in the work of a specialist, is accurate, complete, and relevant; and whether fair value measurements have been properly determined using such data and management's assumptions. The auditor's tests also may include, for example, procedures such as verifying the source of the data, mathematical recomputation of inputs, and reviewing of information for internal consistency, including whether such information is consistent with management's intent and ability to carry out specific courses of action discussed in paragraph .17.

Developing Independent Fair Value Estimates for Corroborative Purposes

.40 The auditor may make an independent estimate of fair value (for example, by using an auditor-developed model) to corroborate the entity's fair value measurement.⁶ When developing an independent estimate using management's assumptions, the auditor evaluates those assumptions as discussed in paragraphs .28 to .37. Instead of using management's assumptions, the auditor may develop his or her own assumptions to make a comparison with management's fair value measurements. In that situation, the auditor nevertheless understands management's assumptions. The auditor uses that understanding to ensure that his or her independent estimate takes into consideration all significant variables and to evaluate any significant difference from management's estimate. The auditor also should test the data used to develop the fair value measurements and disclosures as discussed in paragraph .39.

Reviewing Subsequent Events and Transactions

.41 Events and transactions that occur after the balance-sheet date but before the date of the auditor's report (for example, a sale of an investment shortly after the balance-sheet date) may provide audit evidence regarding management's fair value measurements as of the balance-sheet date.⁷ In such circumstances, the audit procedures described in paragraphs .26 through .40 may be minimized or unnecessary because the subsequent event or transaction can be used to substantiate the fair value measurement. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.42 Some subsequent events or transactions may reflect changes in circumstances occurring after the balance-sheet date and thus do not constitute appropriate audit evidence of the fair value measurement at the balance-sheet date (for example, the prices of actively traded marketable securities that change after the balance-sheet date). When using a subsequent event or transaction to

⁶ See section 329, *Analytical Procedures*.

⁷ The auditor's consideration of a subsequent event or transaction, as contemplated in this paragraph, is a substantive test and thus differs from the review of subsequent events performed pursuant to section 560, *Subsequent Events*.

substantiate a fair value measurement, the auditor considers only those events or transactions that reflect circumstances existing at the balance-sheet date.

Disclosures About Fair Values

.43 The auditor should evaluate whether the disclosures about fair values made by the entity are in conformity with GAAP.⁸ Disclosure of fair value information is an important aspect of financial statements. Often, fair value disclosure is required because of the relevance to users in the evaluation of an entity's performance and financial position. In addition to the fair value information required under GAAP, some entities disclose voluntary additional fair value information in the notes to the financial statements.

.44 When auditing fair value measurements and related disclosures included in the notes to the financial statements, whether required by GAAP or disclosed voluntarily, the auditor ordinarily performs essentially the same types of audit procedures as those employed in auditing a fair value measurement recognized in the financial statements. The auditor obtains sufficient appropriate audit evidence that the valuation principles are appropriate under GAAP and are being consistently applied, and that the method of estimation and significant assumptions used are adequately disclosed in accordance with GAAP. [Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.45 The auditor evaluates whether the entity has made adequate disclosures about fair value information. If an item contains a high degree of measurement uncertainty, the auditor assesses whether the disclosures are sufficient to inform users of such uncertainty.⁹

.46 When disclosure of fair value information under GAAP is omitted because it is not practicable to determine fair value with sufficient reliability, the auditor evaluates the adequacy of disclosures required in these circumstances. If the entity has not appropriately disclosed fair value information required by GAAP, the auditor evaluates whether the financial statements are materially misstated.

Evaluating the Results of Audit Procedures

.47 The auditor should evaluate the sufficiency and competence of the audit evidence obtained from auditing fair value measurements and disclosures as well as the consistency of that evidence with other audit evidence obtained and evaluated during the audit. The auditor's evaluation of whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP is performed in the context of the financial statements taken as a whole (see section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraphs .50 through .61). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

Management Representations

.48 Section 333, *Management Representations*, requires that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted

⁸ See also section 431, *Adequacy of Disclosure in Financial Statements*.

⁹ See FASB ASC 275, *Risks and Uncertainties*. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

auditing standards and provides guidance concerning the representations to be obtained. The auditor ordinarily should obtain written representations from management regarding the reasonableness of significant assumptions, including whether they appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures.

.49 Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about:

- The appropriateness of the measurement methods, including related assumptions, used by management in determining fair value and the consistency in application of the methods.
- The completeness and adequacy of disclosures related to fair values.
- Whether subsequent events require adjustment to the fair value measurements and disclosures included in the financial statements.

Communication With Those Charged With Governance

.50 Section 380, *The Auditor's Communication With Those Charged With Governance*, requires auditors to determine that certain matters related to the conduct of an audit are communicated to those charged with governance. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. For example, the auditor considers communicating the nature of significant assumptions used in fair value measurements, the degree of subjectivity involved in the development of the assumptions, and the relative materiality of the items being measured at fair value to the financial statements as a whole. The auditor considers the guidance contained in section 380 when determining the nature and form of communication. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Effective Date

.51 This section is effective for audits of financial statements for periods beginning on or after June 15, 2003. Earlier application of the provisions of this section is permitted.

AU Section 9328

Auditing Fair Value Measurements and Disclosures: Auditing Interpretations of Section 328

1. Auditing Interests in Trusts Held by a Third-Party Trustee and Reported at Fair Value

.01 Question—Entities may have interests in trusts held by a third-party trustee. For example, a not-for-profit organization (NPO) may have an interest in a trust established by a donor for the benefit of the NPO. Further, that interest may be required to be reported at fair value because it is a beneficial interest pursuant to Financial Accounting Standards Board *Accounting Standards Codification* 958, *Not-for-Profit Entities*. Further, the fair value of that beneficial interest may be estimated, at least in part, because a readily determinable fair value does not exist. For example, the NPO may have an unconditional right to receive all or a portion of the specified cash flows from a charitable trust that has investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. In such circumstances, the auditor typically would satisfy the existence assertion through confirmation, examination of legal documents, or other means. In confirming the existence, the auditor may request the trustee to indicate or to confirm the trust's fair value, including the fair value of investments held in the trust. In some circumstances, the trustee will not provide management or the auditor detailed information about the basis and method for measuring those investments, nor will they provide information about the specific investments held by the trust. For example, in some circumstances the trustee may inform management or the auditor that investments are held by the trust as follows:

- In aggregate, such as "\$XXX of total investments"
- In aggregate, such as "\$XXX of total investments in private equity securities, \$YYY of total investments in interests in limited partnerships, and \$ZZZ of total investments in debt securities"
- On an investment-by-investment basis, such as "AA shares of common stock of private company A, with a fair value of \$AAA; BB shares of preferred stock of private company B, with a fair value of \$BBB; CC units of limited partnership interest CCC, with a fair value of \$CCC; and real estate property DDD, with a fair value of \$DDDD"

In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments held by a trust, does receiving a confirmation from the trustee, either in aggregate or on an investment-by-investment basis, constitute adequate audit evidence with respect to the existence assertion and auditing fair value measurements in accordance with section 328, *Auditing Fair Value Measurements and Disclosures*?

.02 Interpretation—In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the

existence and testing the measurement of investments held by a trust, simply receiving a confirmation from the trustee, either in aggregate or on an investment-by-investment basis, does not in and of itself constitute adequate audit evidence with respect to the requirements for auditing the fair value of the interest in the trust under section 328. In addition, receiving confirmation from the trustee for investments in aggregate (illustrated by the first two bullets in the preceding paragraph) does not constitute adequate audit evidence with respect to the existence assertion. Receiving confirmation from the trustee on an investment-by-investment basis (illustrated by the third bullet in the preceding paragraph), however, typically would constitute adequate audit evidence with respect to the existence assertion. Also, as noted in section 328 paragraph .04, in discussing management's responsibility for making fair value measurements:

Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

.03 In addition, section 328 discusses the auditor's responsibility dealing with:

- Understanding the entity's process for determining fair value measurements and disclosures and the relevant controls, and assessing risk
- Evaluating conformity of fair value measurements and disclosures with GAAP
- Engaging a specialist, where necessary
- Testing the entity's fair value measurements and disclosures
- Disclosures about fair values
- Evaluating the results of audit procedures
- Management representations
- Communication with those charged with governance

.04 In circumstances in which the auditor is unable to audit the existence or measurement of interests in trusts at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to either qualify his or her opinion or to disclaim an opinion, as discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .22–.26.

[Issue Date: July 2005; Revised: April 2007; Revised: June 2009.]

AU Section 329

Analytical Procedures

(Supersedes section 318.)

Source: SAS No. 56; SAS No. 96.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance on the use of analytical procedures and requires the use of analytical procedures in the planning and overall review stages of all audits.

.02 Analytical procedures are an important part of the audit process and consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures range from simple comparisons to the use of complex models involving many relationships and elements of data. A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary. Particular conditions that can cause variations in these relationships include, for example, specific unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements.

.03 Understanding financial relationships is essential in planning and evaluating the results of analytical procedures, and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires judgment by the auditor.

.04 Analytical procedures are used for the following purposes:

- a. To assist the auditor in planning the nature, timing, and extent of other auditing procedures
- b. As a substantive test to obtain audit evidence about particular assertions related to account balances or classes of transactions
- c. As an overall review of the financial information in the final review stage of the audit

Analytical procedures should be applied to some extent for the purposes referred to in (a) and (c) above for all audits of financial statements made in accordance with generally accepted auditing standards. In addition, in some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives. [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.05 Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible

relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes
- b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data
- c. Relationships among elements of financial information within the period
- d. Information regarding the industry in which the client operates—for example, gross margin information
- e. Relationships of financial information with relevant nonfinancial information

Analytical Procedures in Planning the Audit

.06 The purpose of applying analytical procedures in planning the audit is to assist in planning the nature, timing, and extent of auditing procedures that will be used to obtain audit evidence for specific account balances or classes of transactions. To accomplish this, the analytical procedures used in planning the audit should focus on (a) enhancing the auditor's understanding of the client's business and the transactions and events that have occurred since the last audit date, and (b) identifying areas that may represent specific risks relevant to the audit. Thus, the objective of the procedures is to identify such things as the existence of unusual transactions and events, and amounts, ratios and trends that might indicate matters that have financial statement and audit planning ramifications. [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.07 Analytical procedures used in planning the audit generally use data aggregated at a high level. Furthermore, the sophistication, extent and timing of the procedures, which are based on the auditor's judgment, may vary widely depending on the size and complexity of the client. For some entities, the procedures may consist of reviewing changes in account balances from the prior to the current year using the general ledger or the auditor's preliminary or unadjusted working trial balance. In contrast, for other entities, the procedures might involve an extensive analysis of quarterly financial statements. In both cases, the analytical procedures, combined with the auditor's knowledge of the business, serve as a basis for additional inquiries and effective planning.

.08 Although analytical procedures used in planning the audit often use only financial data, sometimes relevant nonfinancial information is considered as well. For example, number of employees, square footage of selling space, volume of goods produced, and similar information may contribute to accomplishing the purpose of the procedures.

Analytical Procedures Used as Substantive Tests

.09 The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion¹ may be derived from tests of details, from

¹ Assertions are representations by management that are embodied in financial statement components. See section 326, *Audit Evidence*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment on the expected effectiveness and efficiency of the available procedures.

.10 The auditor considers the level of assurance, if any, he wants from substantive testing for a particular audit objective and decides, among other things, which procedure, or combination of procedures, can provide that level of assurance. For some assertions, analytical procedures are effective in providing the appropriate level of assurance. For other assertions, however, analytical procedures may not be as effective or efficient as tests of details in providing the desired level of assurance.

.11 The expected effectiveness and efficiency of an analytical procedure in identifying potential misstatements depends on, among other things, (a) the nature of the assertion, (b) the plausibility and predictability of the relationship, (c) the availability and reliability of the data used to develop the expectation, and (d) the precision of the expectation.

Nature of Assertion

.12 Analytical procedures may be effective and efficient tests for assertions in which potential misstatements would not be apparent from an examination of the detailed evidence or in which detailed evidence is not readily available. For example, comparisons of aggregate salaries paid with the number of personnel may indicate unauthorized payments that may not be apparent from testing individual transactions. Differences from expected relationships may also indicate potential omissions when independent evidence that an individual transaction should have been recorded may not be readily available.

Plausibility and Predictability of the Relationship

.13 It is important for the auditor to understand the reasons that make relationships plausible because data sometimes appear to be related when they are not, which could lead the auditor to erroneous conclusions. In addition, the presence of an unexpected relationship can provide important evidence when appropriately scrutinized.

.14 As higher levels of assurance are desired from analytical procedures, more predictable relationships are required to develop the expectation. Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment. Relationships involving income statement accounts tend to be more predictable than relationships involving only balance sheet accounts since income statement accounts represent transactions over a period of time, whereas balance sheet accounts represent amounts as of a point in time. Relationships involving transactions subject to management discretion are sometimes less predictable. For example, management may elect to incur maintenance expense rather than replace plant and equipment, or they may delay advertising expenditures.

Availability and Reliability of Data

.15 Data may or may not be readily available to develop expectations for some assertions. For example, to test the completeness assertion, expected sales for some entities might be developed from production statistics or square feet of selling space. For other entities, data relevant to the assertion of completeness of sales may not be readily available, and it may be more effective or efficient to use the details of shipping records to test that assertion.

.16 The auditor obtains assurance from analytical procedures based upon the consistency of the recorded amounts with expectations developed from data derived from other sources. The reliability of the data used to develop the expectations should be appropriate for the desired level of assurance from the analytical procedure. The auditor should assess the reliability of the data by considering the source of the data and the conditions under which it was gathered, as well as other knowledge the auditor may have about the data. The following factors influence the auditor's consideration of the reliability of data for purposes of achieving audit objectives:

- Whether the data was obtained from independent sources outside the entity or from sources within the entity
- Whether sources within the entity were independent of those who are responsible for the amount being audited
- Whether the data was developed under a reliable system with adequate controls
- Whether the data was subjected to audit testing in the current or prior year
- Whether the expectations were developed using data from a variety of sources

Precision of the Expectation

.17 The expectation should be precise enough to provide the desired level of assurance that differences that may be potential material misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate (see paragraph .20). As expectations become more precise, the range of expected differences becomes narrower and, accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. The precision of the expectation depends on, among other things, the auditor's identification and consideration of factors that significantly affect the amount being audited and the level of detail of data used to develop the expectation.

.18 Many factors can influence financial relationships. For example, sales are affected by prices, volume and product mix. Each of these, in turn, may be affected by a number of factors, and offsetting factors can obscure misstatements. More effective identification of factors that significantly affect the relationship is generally needed as the desired level of assurance from analytical procedures increases.

.19 Expectations developed at a detailed level generally have a greater chance of detecting misstatement of a given amount than do broad comparisons. Monthly amounts will generally be more effective than annual amounts and comparisons by location or line of business usually will be more effective than company-wide comparisons. The level of detail that is appropriate will be influenced by the nature of the client, its size and its complexity. Generally, the risk that material misstatement could be obscured by offsetting factors increases as a client's operations become more complex and more diversified. Disaggregation helps reduce this risk.

Investigation and Evaluation of Significant Differences

.20 In planning the analytical procedures as a substantive test, the auditor should consider the amount of difference from the expectation that can be accepted without further investigation. This consideration is influenced

primarily by materiality and should be consistent with the level of assurance desired from the procedures. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balances, or class of transactions, or other balances or classes could aggregate to an unacceptable amount.²

.21 The auditor should evaluate significant unexpected differences. Reconsidering the methods and factors used in developing the expectation and inquiry of management may assist the auditor in this regard. Management responses, however, should ordinarily be corroborated with other audit evidence. In those cases when an explanation for the difference cannot be obtained, the auditor should obtain sufficient appropriate audit evidence about the assertion by performing other audit procedures to satisfy himself as to whether the difference is a likely misstatement.³ In designing such other procedures, the auditor should consider that unexplained differences may indicate an increased risk of material misstatement. (See section 316, *Consideration of Fraud in a Financial Statement Audit*.) [Revised, March, 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Documentation of Substantive Analytical Procedures

.22 When an analytical procedure is used as the principal substantive test of a significant financial statement assertion, the auditor should document all of the following:

- a. The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- b. Results of the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts
- c. Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

[Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96.]

Analytical Procedures Used in the Overall Review

.23 The objective of analytical procedures used in the overall review stage of the audit is to assist the auditor in assessing the conclusions reached and in the evaluation of the overall financial statement presentation. A wide variety of analytical procedures may be useful for this purpose. The overall review would generally include reading the financial statements and notes and considering (a) the adequacy of evidence gathered in response to unusual or unexpected balances identified in planning the audit or in the course of the audit and (b) unusual or unexpected balances or relationships that were not previously identified. Results of an overall review may indicate that additional evidence may be needed. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

² See section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraphs .24 through .26.

³ See section 312.35.

Effective Date

.24 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002.]

AU Section 9329

Analytical Procedures: Auditing Interpretations of Section 329

**[1.] Corroboration of Replies to Inquiries in Applying Analytical
Review Procedures**

[.01-.02] [Withdrawn March 1989.]

AU Section 330

The Confirmation Process

(Supersedes section 331.03–.08.)

Source: SAS No. 67.

Effective for audits of fiscal periods ending after June 15, 1992, unless otherwise indicated.

Introduction and Applicability

.01 This section provides guidance about the confirmation process in audits performed in accordance with generally accepted auditing standards. This section—

- Defines the confirmation process (see paragraph .04).
- Discusses the relationship of confirmation procedures to the auditor's assessment of audit risk (see paragraphs .05 through .10).
- Describes certain factors that affect the reliability of confirmations (see paragraphs .16 through .27).
- Provides guidance on performing alternative procedures when responses to confirmation requests are not received (see paragraphs .31 and .32).
- Provides guidance on evaluating the results of confirmation procedures (see paragraph .33).
- Specifically addresses the confirmation of accounts receivable and supersedes section 331, *Inventories*, paragraphs .03–.08 and the portion of section 331.01 that addresses the confirmation of receivables (see paragraphs .34 and .35). This section does not supersede the portion of section 331.01 that addresses the observation of inventories.

.02 This section does not address the extent or timing of confirmation procedures. Guidance on the extent of audit procedures (that is, considerations involved in determining the number of items to confirm) is found in section 350, *Audit Sampling*, and section 312, *Audit Risk and Materiality in Conducting an Audit*. Guidance on the timing of audit procedures is included in section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 110.]

.03 In addition, this section does not address matters described in section 336, *Using the Work of a Specialist*, or in section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*.

Definition of the Confirmation Process

.04 Confirmation is the process of obtaining and evaluating a direct communication from a third party in response to a request for information

about a particular item affecting financial statement assertions. The process includes—

- Selecting items for which confirmations are to be requested.
- Designing the confirmation request.
- Communicating the confirmation request to the appropriate third party.
- Obtaining the response from the third party.
- Evaluating the information, or lack thereof, provided by the third party about the audit objectives, including the reliability of that information.

Relationship of Confirmation Procedures to the Auditor's Assessment of Audit Risk

.05 Section 312 discusses the audit risk model. It describes the concept of assessing inherent and control risks, determining the acceptable level of detection risk, and designing an audit program to achieve an appropriately low level of audit risk. The auditor uses the audit risk assessment in determining the audit procedures to be applied, including whether they should include confirmation.

.06 Confirmation is undertaken to obtain evidence from third parties about financial statement assertions made by management. Section 326, *Audit Evidence*, states that, in general, it is presumed that "Audit evidence is more reliable when it is obtained from knowledgeable independent sources outside the entity." [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.07 The greater the combined assessed level of inherent and control risk, the greater the assurance that the auditor needs from substantive tests related to a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk increases, the auditor designs substantive tests to obtain more or different evidence about a financial statement assertion. In these situations, the auditor might use confirmation procedures rather than or in conjunction with tests directed toward documents or parties within the entity.

.08 Unusual or complex transactions may be associated with high levels of inherent risk and control risk. If the entity has entered into an unusual or complex transaction and the combined assessed level of inherent and control risk is high, the auditor should consider confirming the terms of the transaction with the other parties in addition to examining documentation held by the entity. For example, if the combined assessed level of inherent and control risk over the occurrence of revenue related to an unusual, year-end sale is high, the auditor should consider confirming the terms of that sale.

.09 The auditor should assess whether the evidence provided by confirmations reduces audit risk for the related assertions to an acceptably low level. In making that assessment, the auditor should consider the materiality of the account balance and his or her inherent and control risk assessments. When the auditor concludes that evidence provided by confirmations alone is not sufficient, additional procedures should be performed. For example, to achieve an appropriately low level of audit risk related to the completeness and existence assertions for accounts receivable, an auditor may perform sales cutoff tests in addition to confirming accounts receivable.

.10 The lower the combined assessed level of inherent and control risk, the less assurance the auditor needs from substantive tests to form a conclusion about a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk decreases for a particular assertion, the auditor may modify substantive tests by changing their nature from more effective (but costly) tests to less effective (and less costly) tests. For example, if the combined assessed level of inherent and control risk over the existence of cash is low, the auditor might limit substantive procedures to inspecting client-provided bank statements rather than confirming cash balances.

Assertions Addressed by Confirmations

.11 For the audit evidence obtained to be appropriate, it must be reliable and relevant. Factors affecting the reliability of confirmations are discussed in paragraphs .16 through .27. The relevance of audit evidence depends on its relationship to the financial statement assertion being addressed. Section 326 classifies financial statement assertions into five categories:

- a. Existence or occurrence
- b. Completeness
- c. Rights and obligations
- d. Valuation or allocation
- e. Presentation and disclosure

.12 Confirmation requests, if properly designed by the auditor, may address any one or more of those assertions. However, confirmations do not address all assertions equally well. Confirmation of goods held on consignment with the consignee would likely be more effective for the existence and the rights-and-obligations assertions than for the valuation assertion. Accounts receivable confirmations are likely to be more effective for the existence assertion than for the completeness and valuation assertions. Thus, when obtaining evidence for assertions not adequately addressed by confirmations, auditors should consider other audit procedures to complement confirmation procedures or to be used instead of confirmation procedures.

.13 Confirmation requests can be designed to elicit evidence that addresses the completeness assertion: that is, if properly designed, confirmations may provide evidence to aid in assessing whether all transactions and accounts that should be included in the financial statements are included. Their effectiveness in addressing the completeness assertion depends, in part, on whether the auditor selects from an appropriate population for testing. For example, when using confirmations to provide evidence about the completeness assertion for accounts payable, the appropriate population might be a list of vendors rather than the amounts recorded in the accounts payable subsidiary ledger.

.14 Some confirmation requests are not designed to elicit evidence regarding the completeness assertion. For example, the AICPA Standard Form to Confirm Account Balance Information With Financial Institutions is designed to substantiate information that is stated on the confirmation request; the form is not designed to provide assurance that information about accounts not listed on the form will be reported.

The Confirmation Process

.15 The auditor should exercise an appropriate level of professional skepticism throughout the confirmation process (see section 230, *Due Professional*

Care in the Performance of Work). Professional skepticism is important in designing the confirmation request, performing the confirmation procedures, and evaluating the results of the confirmation procedures.

Designing the Confirmation Request

.16 Confirmation requests should be tailored to the specific audit objectives. Thus, when designing the confirmation requests, the auditor should consider the assertion(s) being addressed and the factors that are likely to affect the reliability of the confirmations. Factors such as the form of the confirmation request, prior experience on the audit or similar engagements, the nature of the information being confirmed, and the intended respondent should affect the design of the requests because these factors have a direct effect on the reliability of the evidence obtained through confirmation procedures.

Form of Confirmation Request

.17 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.18 Positive forms provide audit evidence only when responses are received from the recipients; nonresponses do not provide audit evidence about the financial statement assertions being addressed.

.19 Since there is a risk that recipients of a positive form of confirmation request with the information to be confirmed contained on it may sign and return the confirmation without verifying that the information is correct, blank forms may be used as one way to mitigate this risk. Thus, the use of blank confirmation requests may provide a greater degree of assurance about the information confirmed. However, blank forms might result in lower response rates because additional effort may be required of the recipients; consequently, the auditor may have to perform more alternative procedures.

.20 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (a) the combined assessed level of inherent and control risk is low, (b) a large number of small balances is involved, and (c) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration. For example, in the examination of demand deposit accounts in a financial institution, it may be appropriate for an auditor to include negative confirmation requests with the customers' regular statements when the combined assessed level of inherent and control risk is low and the auditor has no reason to believe that the recipients will not consider the requests. The auditor should consider performing other substantive procedures to supplement the use of negative confirmations.

.21 Negative confirmation requests may generate responses indicating misstatements, and are more likely to do so if the auditor sends a large number of negative confirmation requests and such misstatements are widespread. The auditor should investigate relevant information provided on negative confirmations that have been returned to the auditor to determine the effect such information may have on the audit. If the auditor's investigation

of responses to negative confirmation requests indicates a pattern of misstatements, the auditor should reconsider his or her combined assessed level of inherent and control risk and consider the effect on planned audit procedures.

.22 Although returned negative confirmations may provide evidence about the financial statement assertions, unreturned negative confirmation requests rarely provide significant evidence concerning financial statement assertions other than certain aspects of the existence assertion. For example, negative confirmations may provide some evidence of the existence of third parties if they are not returned with an indication that the addressees are unknown. However, unreturned negative confirmations do not provide explicit evidence that the intended third parties received the confirmation requests and verified that the information contained on them is correct.

Prior Experience

.23 In determining the effectiveness and efficiency of employing confirmation procedures, the auditor may consider information from prior years' audits or audits of similar entities. This information includes response rates, knowledge of misstatements identified during prior years' audits, and any knowledge of inaccurate information on returned confirmations. For example, if the auditor has experienced poor response rates to properly designed confirmation requests in prior audits, the auditor may instead consider obtaining audit evidence from other sources.

Nature of Information Being Confirmed

.24 When designing confirmation requests, the auditor should consider the types of information respondents will be readily able to confirm, since the nature of the information being confirmed may directly affect the competence of the evidence obtained as well as the response rate. For example, certain respondents' accounting systems may facilitate the confirmation of single transactions rather than of entire account balances. In addition, respondents may not be able to confirm the balances of their installment loans, but they may be able to confirm whether their payments are up-to-date, the amount of the payment, and the key terms of their loans.

.25 The auditor's understanding of the client's arrangements and transactions with third parties is key to determining the information to be confirmed. The auditor should obtain an understanding of the substance of such arrangements and transactions to determine the appropriate information to include on the confirmation request. The auditor should consider requesting confirmation of the terms of unusual agreements or transactions, such as bill and hold sales,¹ in addition to the amounts. The auditor also should consider whether there may be oral modifications to agreements, such as unusual payment terms or liberal rights of return. When the auditor believes there is a moderate or high degree of risk that there may be significant oral modifications, he or she should inquire about the existence and details of any such modifications to written agreements. One method of doing so is to confirm both the terms of the agreements and whether any oral modifications exist.

Respondent

.26 The auditor should direct the confirmation request to a third party who the auditor believes is knowledgeable about the information to be confirmed.

¹ Bill and hold sales are sales of merchandise that are billed to customers before delivery and are held by the entity for the customers.

For example, to confirm a client's oral and written guarantees with a financial institution, the auditor should direct the request to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements.

.27 If information about the respondent's competence, knowledge, motivation, ability, or willingness to respond, or about the respondent's objectivity and freedom from bias with respect to the audited entity² comes to the auditor's attention, the auditor should consider the effects of such information on designing the confirmation request and evaluating the results, including determining whether other procedures are necessary. In addition, there may be circumstances (such as for significant, unusual year-end transactions that have a material effect on the financial statements or where the respondent is the custodian of a material amount of the audited entity's assets) in which the auditor should exercise a heightened degree of professional skepticism relative to these factors about the respondent. In these circumstances, the auditor should consider whether there is sufficient basis for concluding that the confirmation request is being sent to a respondent from whom the auditor can expect the response will provide meaningful and appropriate audit evidence.

Performing Confirmation Procedures

.28 During the performance of confirmation procedures, the auditor should maintain control over the confirmation requests and responses. Maintaining control³ means establishing direct communication between the intended recipient and the auditor to minimize the possibility that the results will be biased because of interception and alteration of the confirmation requests or responses.

.29 There may be situations in which the respondent, because of timeliness or other considerations, responds to a confirmation request other than in a written communication mailed to the auditor. When such responses are received, additional evidence may be required to support their validity. For example, facsimile responses involve risks because of the difficulty of ascertaining the sources of the responses. To restrict the risks associated with facsimile responses and treat the confirmations as valid audit evidence, the auditor should consider taking certain precautions, such as verifying the source and contents of a facsimile response in a telephone call to the purported sender. In addition, the auditor should consider requesting the purported sender to mail the *original* confirmation directly to the auditor. Oral confirmations should be documented in the workpapers. If the information in the oral confirmations is significant, the auditor should request the parties involved to submit written confirmation of the specific information directly to the auditor.

.30 When using confirmation requests other than the negative form, the auditor should generally follow up with a second and sometimes a third request to those parties from whom replies have not been received.

² Section 334, *Related Parties*, paragraphs .09 and .10, provide guidance on examining related-party transactions that have been identified by the auditor.

³ The need to maintain control does not preclude the use of internal auditors in the confirmation process. Section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, provides guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor.

Alternative Procedures

.31 When the auditor has not received replies to positive confirmation requests, he or she should apply alternative procedures to the nonresponses to obtain the evidence necessary to reduce audit risk to an acceptably low level. However, the omission of alternative procedures may be acceptable (a) when the auditor has not identified unusual qualitative factors or systematic characteristics related to the nonresponses, such as that all nonresponses pertain to year-end transactions, and (b) when testing for overstatement of amounts, the nonresponses in the aggregate, when projected as 100 percent misstatements to the population and added to the sum of all other unadjusted differences, would not affect the auditor's decision about whether the financial statements are materially misstated.

.32 The nature of alternative procedures varies according to the account and assertion in question. In the examination of accounts receivable, for example, alternative procedures may include examination of subsequent cash receipts (including matching such receipts with the actual items being paid), shipping documents, or other client documentation to provide evidence for the existence assertion. In the examination of accounts payable, for example, alternative procedures may include examination of subsequent cash disbursements, correspondence from third parties, or other records to provide evidence for the completeness assertion.

Evaluating the Results of Confirmation Procedures

.33 After performing any alternative procedures, the auditor should evaluate the combined audit evidence provided by the confirmations and the alternative procedures to determine whether sufficient audit evidence has been obtained about all the applicable financial statement assertions. In performing that evaluation, the auditor should consider (a) the reliability of the confirmations and alternative procedures; (b) the nature of any exceptions, including the implications, both quantitative and qualitative, of those exceptions; (c) the audit evidence provided by other procedures; and (d) whether additional audit evidence is needed. If the combined audit evidence provided by the confirmations, alternative procedures, and other procedures is not sufficient, the auditor should request additional confirmations or extend other tests, such as tests of details or analytical procedures.

Confirmation of Accounts Receivable

.34 For the purpose of this section, *accounts receivable* means—

- a. The entity's claims against customers that have arisen from the sale of goods or services in the normal course of business, and
- b. A financial institution's loans.

Confirmation of accounts receivable is a generally accepted auditing procedure. As discussed in paragraph .06, it is generally presumed that evidence obtained from third parties will provide the auditor with higher-quality audit evidence than is typically available from within the entity. Thus, there is a presumption that the auditor will request the confirmation of accounts receivable during an audit unless one of the following is true:

- Accounts receivable are immaterial to the financial statements.

- The use of confirmations would be ineffective.⁴
- The auditor's combined assessed level of inherent and control risk is low, and the assessed level, in conjunction with the evidence expected to be provided by analytical procedures or other substantive tests of details, is sufficient to reduce audit risk to an acceptably low level for the applicable financial statement assertions. In many situations, both confirmation of accounts receivable and other substantive tests of details are necessary to reduce audit risk to an acceptably low level for the applicable financial statement assertions.

.35 An auditor who has not requested confirmations in the examination of accounts receivable should document how he or she overcame this presumption.

Effective Date

.36 This section is effective for audits of fiscal periods ending after June 15, 1992. Early application of this section is permissible.

⁴ For example, if, based on prior years' audit experience or on experience with similar engagements, the auditor concludes that response rates to properly designed confirmation requests will be inadequate, or if responses are known or expected to be unreliable, the auditor may determine that the use of confirmations would be ineffective.

AU Section 9330

The Confirmation Process: Auditing Interpretations of Section 330

1. Use of Electronic Confirmations

.01 Question—Section 330, *The Confirmation Process*, uses phrases such as *written communication* and *mail the original confirmation* when describing the confirmation process. Increasingly, there are situations in which the auditor transmits, or the respondent responds to, a confirmation request other than in a written communication mailed directly between the respondent and the auditor. For example, the auditor may transmit the confirmation request via e-mail using a scanned electronic copy of a document that has been signed by a client either physically on the original document or with an electronic signature. The response to a confirmation request may also be facilitated through a process whereby a respondent provides the auditor access to a secure website, hosted either by the respondent or by a third party, where the requested information about a particular item affecting financial statement assertions has been made available by the respondent. Therefore, the following questions arise:

- Can the auditor transmit a confirmation request electronically?
- Can information obtained electronically from third parties, sometimes referred to as an electronic confirmation, be considered to be reliable audit evidence?

.02 Interpretation—Yes. The transmission or receipt of electronic confirmations or the use of an electronic confirmation process is not precluded by section 330.

.03 The auditor's consideration of the reliability of the information obtained through the confirmation process to be used as audit evidence includes consideration of the risks that

- the information obtained may not be from an authentic source;
- a respondent may not be knowledgeable about the information to be confirmed; or
- the integrity of the information may have been compromised.

No confirmation process with a third party is without some risk of interception or alteration, including the risk that the confirmation respondent will not be the intended respondent. Such risk exists regardless of whether a response is obtained in paper form, by electronic correspondence, or through some other medium. Factors that may indicate increased risk relating to the reliability of a response include that it

- was received by the auditor indirectly; or
- appeared not to come from the originally intended confirming party.

Responses received electronically, for example by facsimile or e-mail, involve risks relating to reliability because proof of origin and knowledge of the respondent may be difficult to establish and alterations may be difficult to detect. An electronic confirmation process that creates a secure confirmation environment

may mitigate the risks of interception or alteration. The key to creating a secure confirmation environment lies in the process or mechanism used by the auditor and the respondent to minimize the possibility that the results will be compromised because of interception or alteration of the confirmation.

.04 Paragraph .04 of section 330 discusses the confirmation process, which includes the auditor's communication of the confirmation request to the appropriate third party. Paragraph .28 states that the auditor should maintain control over the confirmation requests and responses. Maintaining control includes performing procedures to verify that the confirmation is being directed to the intended recipient. For example, just as the auditor might perform procedures to verify the physical address of a recipient for a confirmation to be sent through the postal service, the auditor would perform similar procedures to verify the e-mail address supplied by the auditor's client for a confirmation request to be sent to that recipient's e-mail address. If another electronic process is used, the auditor may perform other procedures to determine that the request is directed to the intended recipient.

.05 Paragraph .09 of section 326, *Audit Evidence*, states that the auditor should consider the reliability of the information to be used as audit evidence. Confirmations obtained electronically can be considered to be reliable audit evidence if the auditor is satisfied that (a) the electronic confirmation process is secure and properly controlled, (b) the information obtained is a direct communication in response to a request, and (c) the information is obtained from a third party who is the intended respondent.

.06 Various means might be used to validate the source of the electronic information and the respondent's knowledge about the requested information. For example, the use of encryption,¹ electronic digital signatures,² and procedures to verify website authenticity³ may improve the security of the electronic confirmation process.

.07 If a system or process that facilitates electronic confirmation between the auditor and the confirmation respondent is in place and the auditor plans to rely on such a system or process, an assurance trust services report (for example, SysTrust), or another auditor's report on that process, may assist the auditor in assessing the design and operating effectiveness of the electronic and manual controls with respect to that process. Such a report would usually address the risks described in paragraph .03. If these risks are not adequately addressed in the report, the auditor may perform additional procedures to address those risks.

.08 In some cases, the auditor may determine that it is appropriate to address the risks related to the reliability of the information received electronically by directly contacting the purported sender (for example, by telephone) rather than by using alternative means to validate the source of the electronic information. For example, if significant information is provided via an e-mail response, the auditor may perform alternative procedures, including procedures

¹ Encryption is the process of encoding electronic data in such a way that it cannot be read without the second party employing a matching encryption key. Use of encryption reduces the risk of unintended intervention in a communication.

² Digital signatures may use the encryption of codes, text, or other means to ensure that only the claimed signer of the document could have affixed the symbol. The signature and its characteristics are uniquely linked to the signer. Digital signature routines allow for the creation of the signature and the checking of the signature at a later date for authenticity.

³ Website authenticity routines may use various means, including mathematical algorithms to monitor data or a website, to ensure that its content has not been altered without authorization. WebTrust or VeriSign certifications may be earned and affixed to a website, indicating an active program of protecting the underlying content of the information.

to verify the authenticity of information such as the e-mail address of the purported sender. The auditor may also contact the purported sender directly by telephone to verify that the information received by the auditor was sent by the confirming party and also that what was received by the auditor corresponds to the information transmitted by the purported sender. The auditor's determination of procedures appropriate in the circumstances depend on the auditor's assessment of the risks described in paragraph .03.

[Issue Date: April, 2007; Revised: November, 2008.]

AU Section 331

Inventories^{*}

Source: SAS No. 1, section 331; SAS No. 43; SAS No. 67.

Issue date, unless otherwise indicated: November, 1972.

.01 Observation of inventories is a generally accepted auditing procedure. The independent auditor who issues an opinion when he has not employed them must bear in mind that he has the burden of justifying the opinion expressed. [As amended, effective for fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.]

.02 The purpose of this section is to provide guidelines for the independent auditor in observing inventories. This section relates only to observation of inventories and does not deal with other important auditing procedures which generally are required for the independent auditor to satisfy himself as to these assets. [Revised, December 1991, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 67.]

Receivables

[.03-.08] [Superseded November 1991 by Statement on Auditing Standards No. 67.]^[1-2]

Inventories

.09 When inventory quantities are determined solely by means of a physical count, and all counts are made as of the balance-sheet date or as of a single date within a reasonable time before or after the balance-sheet date, it is ordinarily necessary for the independent auditor to be present at the time of count and, by suitable observation, tests, and inquiries, satisfy himself respecting the effectiveness of the methods of inventory-taking and the measure of reliance which may be placed upon the client's representations about the quantities and physical condition of the inventories.

.10 When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor's observation procedures usually can be performed either during or after the end of the period under audit.

.11 In recent years, some companies have developed inventory controls or methods of determining inventories, including statistical sampling, which are highly effective in determining inventory quantities and which are sufficiently reliable to make unnecessary an annual physical count of each item of inventory. In such circumstances, the independent auditor must satisfy himself that

* Title amended, effective for audits of fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.

^[1-2] [Superseded November 1991, by Statement on Auditing Standards No. 67.]

the client's procedures or methods are sufficiently reliable to produce results substantially the same as those which would be obtained by a count of all items each year. The auditor must be present to observe such counts as he deems necessary and must satisfy himself as to the effectiveness of the counting procedures used. If statistical sampling methods are used by the client in the taking of the physical inventory, the auditor must be satisfied that the sampling plan is reasonable and statistically valid, that it has been properly applied, and that the results are reasonable in the circumstances. [Revised, June 1981, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 39.]

.12 When the independent auditor has not satisfied himself as to inventories in the possession of the client through the procedures described in paragraphs .09 through .11, tests of the accounting records alone will not be sufficient for him to become satisfied as to quantities; it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions. This should be coupled with inspection of the records of any client's counts and procedures relating to the physical inventory on which the balance-sheet inventory is based.

.13 The independent auditor may be asked to audit financial statements covering the current period and one or more periods for which he had not observed or made some physical counts of prior inventories. He may, nevertheless, be able to become satisfied as to such prior inventories through appropriate procedures, such as tests of prior transactions, reviews of the records of prior counts, and the application of gross profit tests, provided that he has been able to become satisfied as to the current inventory.

Inventories Held in Public Warehouses³

.14 If inventories are in the hands of public warehouses or other outside custodians, the auditor ordinarily would obtain direct confirmation in writing from the custodian. If such inventories represent a significant proportion of current or total assets, to obtain reasonable assurance with respect to their existence, the auditor should apply one or more of the following procedures as he considers necessary in the circumstances.

- a. Test the owner's procedures for investigating the warehouseman and evaluating the warehouseman's performance.
- b. Obtain an independent accountant's report on the warehouseman's control procedures relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that information received from the warehouseman is reliable.
- c. Observe physical counts of the goods, if practicable and reasonable.
- d. If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts (on a test basis, if appropriate).

[As amended, effective after August 31, 1982, by Statement on Auditing Standards No. 43.]

³ See section 901 for Special Report of Committee on Auditing Procedure.

Effect on the Auditor's Report

.15 For a discussion of the circumstances relating to receivables and inventories affecting the independent auditor's report, see sections 508.24 and 508.67. [As amended, effective for periods ending on or after December 31, 1974, by Statement on Auditing Standards No. 2. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, effective after August 1982.]

Inventories: Auditing Interpretations of Section 331

[1.] Evidential Matter for Inventories at Interim Dates

[.01-.05] [Withdrawn December, 1992.]

AU Section 332

Auditing Derivative Instruments, Hedging Activities, and Investments in Securities¹

(Supersedes SAS No. 81.)

Source: SAS No. 92.

See section 9332 for interpretations of this section.

Effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.

Applicability

.01 This section provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities² that are made in an entity's financial statements.³ Those assertions⁴ are classified according to three broad categories that are discussed in section 326, *Audit Evidence*, paragraphs .14–.19, as follows:

- a. Assertions about classes of transactions and events for the period under audit:
 - i. *Occurrence*. Transactions and events that have been recorded have occurred and pertain to the entity.
 - ii. *Completeness*. All transactions and events that should have been recorded have been recorded.
 - iii. *Accuracy*. Amounts and other data relating to recorded transactions and events have been recorded appropriately.
 - iv. *Cutoff*. Transactions and events have been recorded in the correct accounting period.
 - v. *Classification*. Transactions and events have been recorded in the proper accounts.
- b. Assertions about account balances at the period end:
 - i. *Existence*. Assets, liabilities, and equity interests exist.
 - ii. *Rights and obligations*. The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.

¹ The AICPA Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* provides practical guidance for implementing this section.

² Throughout the remainder of this section, the word *security* or *securities* refers to an entity's investment in a security or securities.

³ The guidance provided in this section applies to audits of financial statements prepared in accordance with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. Such other bases of accounting are described in section 623, *Special Reports*, paragraph .04. References in this section to generally accepted accounting principles are intended to also refer to other comprehensive bases of accounting when the reference is relevant to the basis of accounting used.

⁴ Throughout the remainder of this section, the word *assertion* refers to an assertion made in an entity's financial statements.

- iii. *Completeness.* All assets, liabilities, and equity interests that should have been recorded have been recorded.
- iv. *Valuation and allocation.* Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments are appropriately recorded.
- c. Assertions about presentation and disclosure:
 - i. *Occurrence and rights and obligations.* Disclosed events and transactions have occurred and pertain to the entity.
 - ii. *Completeness.* All disclosures that should have been included in the financial statements have been included.
 - iii. *Classification and understandability.* Financial information is appropriately presented and described and disclosures are clearly expressed.
 - iv. *Accuracy and valuation.* Financial and other information are disclosed fairly and at appropriate amounts.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

Derivative Instruments and Hedging Activities Included in the Scope of this Section

.02 The guidance in this section applies to derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), of all entities. This section uses the definition of a derivative instrument that is in Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 815, Derivatives and Hedging*. FASB ASC 815 addresses the accounting for derivatives that are either freestanding or embedded in contracts or agreements. For purposes of applying the guidance in this section, a derivative instrument is a financial instrument or other contract with all three of the characteristics listed in FASB ASC 815-10-15-83, which are the following.

- a. *Underlying, notional amount, payment provision.* The contract has both of the following terms, which determine the amount of the settlement or settlements, and, in some cases, whether or not a settlement is required:
 - (1) One or more underlyings
 - (2) One or more notional amounts or payment provisions or both
- b. *Initial net investment.* The contract requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c. *Net settlement.* The contract can be settled net by any of the following means:
 - (1) Its terms implicitly or explicitly require or permit net settlement.
 - (2) It can readily be settled net by a means outside the contract.
 - (3) It provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 An entity may enter into a derivative⁵ for investment purposes or to designate it as a hedge of exposure to changes in fair value (referred to as a *fair value hedge*), exposure to variability in cash flows (referred to as a *cash flow hedge*), or foreign currency exposure. The guidance in this section applies to hedging activities in which the entity designates a derivative or a nonderivative financial instrument as a hedge of exposure for which FASB ASC 815 permits hedge accounting. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Securities Included in the Scope of this Section

.04 The guidance in this section applies to all securities. There are two types of securities—debt securities and equity securities. This section uses the definitions of *debt security* and *equity security* that are in the FASB ASC glossary. This section applies to debt and equity securities without regard to whether they are subject to the accounting requirements of FASB ASC 320, *Investments—Debt and Equity Securities*. For example, it applies to assertions about securities accounted for under the equity method following the requirements of FASB ASC 323, *Investments—Equity Method and Joint Ventures*. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

The Need for Special Skill or Knowledge to Plan and Perform Auditing Procedures

.05 The auditor may need special skill or knowledge to plan and perform auditing procedures for certain assertions about derivatives and securities. Examples of such auditing procedures and the special skill or knowledge required include—

- Obtaining an understanding of an entity's information system for derivatives and securities, including services provided by a service organization, which may require that the auditor have special skill or knowledge with respect to computer applications when significant information about derivatives and securities is transmitted, processed, maintained, or accessed electronically.
- Identifying controls placed in operation by a service organization that provides services to an entity that are part of the entity's information system for derivatives and securities, which may require that the auditor have an understanding of the operating characteristics of entities in a certain industry.
- Understanding the application of generally accepted accounting principles for assertions about derivatives, which might require that the auditor have special knowledge because of the complexity of those principles. In addition, a derivative may have complex features that require the auditor to have special knowledge to evaluate the measurement and disclosure of the derivative in conformity with generally accepted accounting principles. For example, features embedded in contracts or agreements may require separate accounting as a derivative, and complex pricing structures may increase the complexity of the assumptions used in estimating the fair value of a derivative.

⁵ To simplify the use of terminology, the remainder of this section often uses the term *derivative* to refer to both the derivative and the purpose for which the entity uses it.

- Understanding the determination of the fair values of derivatives and securities, including the appropriateness of various types of valuation models and the reasonableness of key factors and assumptions, which may require knowledge of valuation concepts.
- Assessing inherent risk and control risk for assertions about derivatives used in hedging activities, which may require an understanding of general risk management concepts and typical asset/liability management strategies.

.06 The auditor may plan to seek the assistance of employees of the auditor's firm, or others outside the firm, with the necessary skill or knowledge. Section 311, *Planning and Supervision*, provides guidance on the use of individuals who serve as members of the audit team and assist the auditor in planning and performing auditing procedures. The auditor also may plan to use the work of a specialist. Section 336, *Using the Work of a Specialist*, provides guidance on the use of the work of specialists as audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Audit Risk and Materiality

.07 Section 312, *Audit Risk and Materiality in Conducting an Audit*, provides guidance on the auditor's consideration of audit risk and materiality when planning and performing an audit of financial statements in accordance with generally accepted auditing standards. It requires the auditor to design procedures to obtain reasonable assurance of detecting misstatements of assertions about derivatives and securities that, when aggregated with misstatements of other assertions, could cause the financial statements taken as a whole to be materially misstated. When designing such procedures, the auditor should consider the inherent risk and control risk for these assertions. The auditor may also consider the work performed by the entity's internal auditors in designing procedures. Guidance on considering the work performed by internal auditors is found in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

Inherent Risk Assessment

.08 The inherent risk for an assertion about a derivative or security is its susceptibility to a material misstatement, assuming there are no related controls. Examples of considerations that might affect the auditor's assessment of inherent risk for assertions about a derivative or security include the following.

- *Management's objectives.* Accounting requirements based on management's objectives may increase the inherent risk for certain assertions. For example, in response to management's objective of minimizing the risk of loss from changes in market conditions, the entity may enter into derivatives as hedges. The use of hedges is subject to the risk that market conditions will change in a manner other than expected when the hedge was implemented so that the hedge is no longer effective. That increases the inherent risk for certain assertions about the derivatives because in such circumstances continued application of hedge accounting would not be in conformity with generally accepted accounting principles.
- *The complexity of the features of the derivative or security.* The complexity of the features of the derivative or security may increase the complexity of measurement and disclosure considerations required by

generally accepted accounting principles. For example, interest payments on a structured note may be based on two or more factors, such as one or more interest rates and the market price of certain equity securities. A formula may dictate the interaction of the factors, such as a prescribed interest rate less a multiple of another rate. The number and interaction of the factors may increase the inherent risk for assertions about the fair value of the note.

- *Whether the transaction that gave rise to the derivative or security involved the exchange of cash.* Derivatives that do not involve an initial exchange of cash are subject to an increased risk that they will not be identified for valuation and disclosure considerations. For example, a foreign exchange forward contract that is not recorded at its inception because the entity does not pay cash to enter into the contract is subject to an increased risk that it will not be identified for subsequent adjustment to fair value. Similarly, a stock warrant for a traded security that is donated to an entity is subject to an increased risk that it will not be identified for initial or continuing measurement at fair value.
- *The entity's experience with the derivative or security.* An entity's inexperience with a derivative or security increases the inherent risk for assertions about it. For example, under a new arrangement, an entity may pay a small deposit to enter into a futures contract for foreign currency to pay for purchases from an overseas supplier. The entity's inexperience with such derivatives may lead it to incorrectly account for the deposit, such as treating it as inventory cost, thereby increasing the risk that the contract will not be identified for subsequent adjustment to fair value.
- *Whether a derivative is freestanding or an embedded feature of an agreement.* Embedded derivatives are less likely to be identified by management, which increases the inherent risk for certain assertions. For example, an option to convert the principal outstanding under a loan agreement into equity securities is less likely to be identified for valuation and disclosure considerations if it is a clause in a loan agreement than if it is a freestanding agreement. Similarly, a structured note may include a provision for payments related to changes in a stock index or commodities prices that requires separate accounting.
- *Whether external factors affect the assertion.* Assertions about derivatives and securities may be affected by a variety of risks related to external factors, such as—
 - *Credit risk*, which exposes the entity to the risk of loss as a result of the issuer of a debt security or the counterparty to a derivative failing to meet its obligation.
 - *Market risk*, which exposes the entity to the risk of loss from adverse changes in market factors that affect the fair value of a derivative or security, such as interest rates, foreign exchange rates, and market indexes for equity securities.
 - *Basis risk*, which exposes the entity to the risk of loss from ineffective hedging activities. Basis risk is the difference between the fair value (or cash flows) of the hedged item and the fair value (or cash flows) of the hedging derivative. The entity is subject to the risk that fair values (or cash flows) will change so that the hedge will no longer be effective.

- *Legal risk*, which exposes the entity to the risk of loss from a legal or regulatory action that invalidates or otherwise precludes performance by one or both parties to the derivative or security.

Following are examples of how changes in external factors can affect assertions about derivatives and securities.

- The increase in credit risk associated with amounts due under debt securities issued by entities that operate in declining industries increases the inherent risk for valuation assertions about those securities.
- Significant changes in and the volatility of general interest rates increase the inherent risk for the valuation of derivatives whose value is significantly affected by interest rates.
- Significant changes in default rates and prepayments increase the inherent risk for the valuation of retained interests in a securitization.
- The fair value of a foreign currency forward contract will be affected by changes in the exchange rate, and the fair value of a put option for an available-for-sale security will be affected by changes in the fair value of the underlying security.
- *The evolving nature of derivatives and the applicable generally accepted accounting principles.* As new forms of derivatives are developed, interpretive accounting guidance for them may not be issued until after the derivatives are broadly used in the marketplace. In addition, generally accepted accounting principles for derivatives may be subject to frequent interpretation by various standard-setting bodies. Evolving interpretive guidance and its applicability increase the inherent risk for valuation and other assertions about existing forms of derivatives.
- *Significant reliance on outside parties.* An entity that relies on external expertise may be unable to appropriately challenge the specialist's methodology or assumptions. This may occur, for example, when a valuation specialist values a derivative.
- *Generally accepted accounting principles may require developing assumptions about future conditions.* As the number and subjectivity of those assumptions increase, the inherent risk of material misstatement increases for certain assertions. For example, the inherent risk for valuation assertions based on assumptions about debt securities whose value fluctuates with changes in prepayments (for example, interest-only strips) increases as the expected holding period lengthens. Similarly, the inherent risk for assertions about cash flow hedges fluctuates with the subjectivity of the assumptions about probability, timing, and amounts of future cash flows.

Control Risk Assessment

Obtaining an Understanding of Internal Control to Plan the Audit

.09 Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of internal control that will enable the auditor to—

- a. Identify the risk of material misstatement at the assertion level.
- b. Assess the risk of material misstatement at the assertion level.

- c. Evaluate the design of internal controls and determine whether they are implemented.

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.10 Controls should be related to management's objectives for financial reporting, operations, and compliance.⁶ For example, to achieve its objectives, management of an entity with extensive derivatives transactions may implement controls that call for—

- a. Monitoring by a control staff that is fully independent of derivatives activities.
- b. Derivatives personnel to obtain, prior to exceeding limits, at least oral approval from members of senior management who are independent of derivatives activities.
- c. Senior management to properly address limit excesses and divergences from approved derivatives strategies.
- d. The accurate transmittal of derivatives positions to the risk measurement systems.
- e. The performance of appropriate reconciliations to ensure data integrity across the full range of derivatives, including any new or existing derivatives that may be monitored apart from the main processing networks.
- f. Derivatives traders, risk managers, and senior management to define constraints on derivatives activities and justify identified excesses.
- g. Senior management, an independent group, or an individual that management designates to perform a regular review of the identified controls and financial results of the derivatives activities to determine whether controls are being effectively implemented and the entity's business objectives and strategies are being achieved.
- h. A review of limits in the context of changes in strategy, risk tolerance of the entity, and market conditions.

.11 The extent of the understanding of internal control over derivatives and securities obtained by the auditor depends on how much information the auditor needs to identify and assess the risk of material misstatement at the assertion level. The understanding obtained may include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements. It may encompass controls placed in operation by the entity and by service organizations whose services are part of the entity's information system. Section 314 paragraph .81 defines the information system as the procedures, whether automated or manual, and records established by an entity to initiate, authorize, record, process, and report entity transactions and

⁶ The AICPA issued an Audit Guide concurrent with this section entitled *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (the Guide). Chapter 5 of the Guide, "Control Risk Assessment," provides sample control objectives for derivatives, hedging activities, and securities which may be useful to auditors in assessing control risk for relevant assertions. Additionally, in 1996, The Committee of Sponsoring Organizations of the Treadway Commission (COSO) issued *Internal Control Issues in Derivatives Usage: An Information Tool for Considering the COSO Internal Control—Integrated Framework in Derivatives Applications*. Although the document precedes Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 815, *Derivatives and Hedging*, its guidance may be useful to entities in developing controls over derivatives transactions and to auditors in assessing control risk for assertions about those transactions. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

to maintain accountability for the related assets, liabilities, and equity. Following the guidance in section 324, *Service Organizations*, a service organization's services are part of an entity's information system for derivatives and securities if they affect any of the following:

- a. How the entity's derivatives and securities transactions are initiated.
- b. The accounting records, supporting information, and specific accounts in the financial statements involved in the processing and reporting of the entity's derivatives and securities transactions
- c. The accounting processing involved from the initiation of those transactions to their inclusion in the financial statements, including electronic means (such as computers and electronic data interchange) used to transmit, process, maintain, and access information
- d. The process the entity uses to report information about derivatives and securities transactions in its financial statements, including significant accounting estimates and disclosures

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statements on Auditing Standards No. 106, and No. 109.]

.12 Examples of a service organization's services that would be part of an entity's information system include—

- The initiation of the purchase or sale of equity securities by a service organization acting as investment adviser or manager.
- Services that are ancillary to holding⁷ an entity's securities such as—
 - Collecting dividend and interest income and distributing that income to the entity.
 - Receiving notification of corporate actions.
 - Receiving notification of security purchase and sale transactions.
 - Receiving payments from purchasers and disbursing proceeds to sellers for security purchase and sale transactions.
 - Maintaining records of securities transactions for the entity.
- A pricing service providing fair values of derivatives and securities through paper documents or electronic downloads that the entity uses to value its derivatives and securities for financial statement reporting.

.13 Examples of a service organization's services that would not be part of an entity's information system are the following:

- The execution by a securities broker of trades that are initiated by either the entity or its investment adviser
- The holding of an entity's securities

.14 An auditor who needs information about the nature of a service organization's services that are part of an entity's information system for derivatives and securities transactions, or its controls over those services, to plan the audit may be able to gather the information from a variety of sources, such as the following:

⁷ In this section, maintaining custody of securities, either in physical or electronic form, is referred to as *holding* securities, and performing ancillary services is referred to as *servicing* securities.

- User manuals
- System overviews
- Technical manuals
- The contract between the entity and the service organization
- Reports by auditors,⁸ internal auditors, or regulatory authorities on the information system and other controls placed in operation by a service organization
- Inquiry or observation of personnel at the entity or at the service organization

In addition, if the services and the service organization's controls over those services are highly standardized, information about the service organization's services, or its controls over those services, obtained through the auditor's prior experience with the service organization may be helpful in planning the audit.

Assessing Control Risk

.15 After obtaining the understanding of internal control over derivatives and securities transactions, the auditor should assess control risk for the related assertions. Guidance on that assessment is found in section 314. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 109.]

.16 If the auditor plans to assess control risk below the maximum for one or more assertions about derivatives and securities, the auditor should identify specific controls relevant to the assertions that are likely to prevent or detect material misstatements and that have been placed in operation by either the entity or the service organization, and gather audit evidence about their operating effectiveness. Audit evidence about the operating effectiveness of a service organization's controls may be gathered through tests performed by the auditor or by an auditor engaged by either the auditor or the service organization—

- a. As part of an engagement in which a service auditor reports on the controls placed in operation by the service organization and the operating effectiveness of those controls, as described in section 324.
- b. An agreed-upon procedures engagement.⁹
- c. To work under the direction of the auditor of the entity's financial statements.

Confirmations of balances or transactions from a service organization do not provide audit evidence about its controls. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.17 The auditor should consider the size of the entity, the entity's organizational structure, the nature of its operations, the types, frequency, and complexity of its derivatives and securities transactions, and its controls over those transactions in designing auditing procedures for assertions about derivatives and securities. For example, if the entity has a variety of derivatives

⁸ Section 324 provides guidance on auditors' reports on controls placed in operation by a service organization and the operating effectiveness of those controls.

⁹ AT section 201, *Agreed-Upon Procedures Engagements*, provides guidance on applying agreed-upon procedures to controls. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

and securities that are reported at fair value estimated using valuation models, the auditor may be able to reduce the substantive procedures for valuation assertions by gathering audit evidence about the controls over the design and use of the models (including the significant assumptions) and evaluating their operating effectiveness. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.18 In some circumstances, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the entity or a service organization and gathering audit evidence about the operating effectiveness of those controls. For example, if the entity has a large number of derivatives or securities transactions, the auditor likely would be unable to reduce audit risk to an acceptable level for assertions about the occurrence of earnings on those securities, including gains and losses from sales, without identifying controls over the authorization, recording, custody, and segregation of duties for those transactions and gathering audit evidence about their operating effectiveness.¹⁰ [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Designing Substantive Procedures Based on Risk Assessments

.19 The auditor should use the assessed levels of inherent risk and control risk for assertions about derivatives and securities to determine the nature, timing, and extent of the substantive procedures to be performed to detect material misstatements of the financial statement assertions. Some substantive procedures address more than one assertion about a derivative or security. Whether one or a combination of substantive procedures should be used to address an assertion depends on the auditor's assessment of the inherent and control risk associated with it as well as the auditor's judgment about a procedure's effectiveness. Paragraphs .21 through .58 provide examples of substantive procedures that address assertions about derivatives and securities. In addition, the auditor should consider whether the results of other audit procedures conflict with management's assertions about derivatives and securities. The auditor should consider the impact of any such identified matters on management's assertions about derivatives and securities. Additionally, the auditor should consider the impact of such matters on the sufficiency of the audit evidence evaluated by the auditor in support of the assertions. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.20 The provision by a service organization of services that are part of an entity's information system may affect the nature, timing, and extent of the auditor's substantive procedures for assertions about derivatives and securities in a variety of ways. Following are examples of such services and how they may affect the nature, timing, and extent of the auditor's substantive procedures.

- Supporting documentation, such as derivative contracts and securities purchases and sales advices, may be located at the service organization's facilities. As a result, either the auditor of the entity's financial statements, an auditor working under the direction of that auditor, or

¹⁰ See footnote 6.

an auditor engaged by the service organization may need to visit the facilities to inspect the documentation.

- Data processors, investment advisers, holders of securities, record-keepers, and other service organizations may electronically transmit, process, maintain, or access significant information about an entity's securities. In such situations, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the service organization or the entity and gathering audit evidence about the operating effectiveness of those controls.
- Service organizations may initiate securities transactions for an entity and hold and service the securities. In determining the level of detection risk for substantive tests, the auditor should consider whether there is a segregation of duties and other controls for the services provided. Examples include—
 - When one service organization initiates transactions as an investment adviser and another service organization holds and services those securities, the auditor may corroborate the information provided by the two organizations. For example, the auditor may confirm holdings with the holder of the securities and apply other substantive tests to transactions reported by the entity based on information provided by the investment adviser. Depending on the facts and circumstances, the auditor also may confirm transactions or holdings with the investment adviser and review the reconciliation of differences. Paragraph .24 provides additional guidance on the auditor's considerations.
 - If one service organization initiates transactions as an investment adviser and also holds and services the securities, all of the information available to the auditor is based on the service organization's information. The auditor may be unable to sufficiently limit audit risk without obtaining audit evidence about the operating effectiveness of one or more of the service organization's controls. An example of such controls is establishing independent departments that provide the investment advisory services and the holding and servicing of securities, then reconciling the information about the securities that is provided by each department.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Financial Statement Assertions

Existence or Occurrence

.21 Existence assertions address whether the derivatives and securities reported in the financial statements through recognition or disclosure exist at the date of the statement of financial position. Occurrence assertions address whether derivatives and securities transactions reported in the financial statements, as a part of earnings, other comprehensive income, or cash flows or through disclosure, occurred. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for existence or occurrence assertions about derivatives and securities include—

- Confirmation with the issuer of the security.
- Confirmation with the holder of the security, including securities in electronic form, or with the counterparty to the derivative.¹¹
- Confirmation of settled transactions with the broker-dealer or counterparty.
- Confirmation of unsettled transactions with the broker-dealer or counterparty.
- Physical inspection of the security or derivative contract.
- Reading executed partnership or similar agreements.
- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form, for the following:
 - Amounts reported
 - Evidence that would preclude the sales treatment of a transfer
 - Unrecorded repurchase agreements
- Inspecting supporting documentation for subsequent realization or settlement after the end of the reporting period.
- Performing analytical procedures.¹² For example, the absence of a material difference from an expectation that interest income will be a fixed percentage of a debt security based on the effective interest rate determined when the entity purchased the security provides evidence about existence of the security.

Completeness

.22 Completeness assertions address whether all of the entity's derivatives and securities are reported in the financial statements through recognition or disclosure. They also address whether all derivatives and securities transactions are reported in the financial statements as a part of earnings, other comprehensive income, or cash flows or through disclosure. The extent of substantive procedures for completeness may properly vary in relation to the assessed level of control risk. In addition, the auditor should consider that since derivatives may not involve an initial exchange of tangible consideration, it may be difficult to limit audit risk for assertions about the completeness of derivatives to an acceptable level with an assessed level of control risk at the maximum. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for completeness assertions about derivatives and securities are—

- Requesting the counterparty to a derivative or the holder of a security to provide information about it, such as whether there are any side agreements or agreements to repurchase securities sold.

¹¹ Section 330, provides guidance to auditors in using confirmations as substantive tests of financial statement assertions. Confirmations may be used as a substantive test of various financial statement assertions about derivatives and securities. For example, a confirmation may be designed to—

- Obtain information about valuation assertions or assumptions underlying valuations.
- Determine whether there are any side agreements that affect assertions about the entity's rights and obligations associated with a transaction, such as an agreement to repurchase securities sold or an agreement to pledge securities as collateral for a loan.
- Determine whether the holder of the entity's securities agrees to deliver the securities reported or their value when required by the entity.

¹² Section 329, provides guidance to auditors in using analytical procedures as substantive tests.

- Requesting counterparties or holders who are frequently used, but with whom the accounting records indicate there are presently no derivatives or securities, to state whether they are counterparties to derivatives with the entity or holders of its securities.¹³
- Inspecting financial instruments and other agreements to identify embedded derivatives.
- Inspecting documentation in paper or electronic form for activity subsequent to the end of the reporting period.
- Performing analytical procedures. For example, a difference from an expectation that interest expense is a fixed percentage of a note based on the interest provisions of the underlying agreement may indicate the existence of an interest rate swap agreement.
- Comparing previous and current account detail to identify assets that have been removed from the accounts and testing those items further to determine that the criteria for sales treatment have been met.
- Reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees.

.23 One of the characteristics of derivatives is that they may involve only a commitment to perform under a contract and not an initial exchange of tangible consideration. Therefore, auditors designing tests related to the completeness assertion should not focus exclusively on evidence relating to cash receipts and disbursements. When testing for completeness, auditors should consider making inquiries, inspecting agreements, and reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees. Auditors should also consider making inquiries about aspects of operating activities that might present risks hedged using derivatives. For example, if the entity conducts business with foreign entities, the auditor should inquire about any arrangements the entity has made for purchasing foreign currency. Similarly, if an entity is in an industry in which commodity contracts are common, the auditor should inquire about any commodity contracts with fixed prices that run for unusual durations or involve unusually large quantities. The auditor also should consider inquiring as to whether the entity has converted interest-bearing debt from fixed to variable, or vice versa, using derivatives.

.24 Derivatives may not involve an initial exchange of tangible consideration, as discussed in paragraphs .22 and .23. If one or more service organizations provide services that are part of the entity's information system for derivatives, the auditor may be unable to sufficiently limit audit risk for assertions about the completeness of derivatives without obtaining audit evidence about the operating effectiveness of controls at one or more of the service organizations. Since the auditor's concern is that derivatives that do not require an initial exchange of tangible consideration may not have been recorded, testing reconciliations of information provided by two or more of the service organizations as discussed in paragraph .20 of this section may not sufficiently limit audit risk for assertions about the completeness of derivatives. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

¹³ Section 317 paragraph .17 discusses the blank form of positive confirmation in which the auditor does not state the amount or other information but instead asks the respondent to provide information.

Rights and Obligations

.25 Assertions about rights and obligations address whether the entity has the rights and obligations associated with derivatives and securities, including pledging arrangements, reported in the financial statements. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for assertions about rights and obligations associated with derivatives and securities are—

- Confirming significant terms with the counterparty to a derivative or the holder of a security, including the absence of any side agreements.
- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form.
- Considering whether the findings of other auditing procedures, such as reviewing minutes of meetings of the board of directors and reading contracts and other agreements, provide evidence about rights and obligations, such as pledging of securities as collateral or selling securities with a commitment to repurchase them.

Valuation

.26 Assertions about the valuation of derivatives and securities address whether the amounts reported in the financial statements through measurement or disclosure were determined in conformity with generally accepted accounting principles. Tests of valuation assertions should be designed according to the valuation method used for the measurement or disclosure. Generally accepted accounting principles may require that a derivative or security be valued based on cost, the investee's financial results, or fair value. They also may require disclosures about the value of a derivative or security and specify that impairment losses should be recognized in earnings prior to their realization. Also, generally accepted accounting principles for securities may vary depending on the type of security, the nature of the transaction, management's objectives related to the security, and the type of entity. Procedures for evaluating management's consideration of the need to recognize impairment losses are discussed in paragraphs .47 and .48 of this section.

.27 *Valuation Based on Cost.* Procedures to obtain evidence about the cost of securities may include inspection of documentation of the purchase price, confirmation with the issuer or holder, and testing discount or premium amortization, either by recomputation or analytical procedures. The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its cost that is other than temporary.

.28 *Valuation Based on an Investee's Financial Results.* For valuations based on an investee's financial results, including but not limited to the equity method of accounting, the auditor should obtain sufficient appropriate audit evidence in support of the investee's financial results. The auditor should read available financial statements of the investee and the accompanying audit report, if any. Financial statements of the investee that have been audited by an auditor whose report is satisfactory, for this purpose,¹⁴ to the investor's auditor

¹⁴ In determining whether the report of another auditor is satisfactory for this purpose, the auditor may consider performing procedures such as making inquiries as to the professional reputation and standing of the other auditor, visiting the other auditor and discussing the audit procedures followed and the results thereof, and reviewing the audit program and/or working papers of the other auditor.

may constitute appropriate audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.29 If in the auditor's judgment additional audit evidence is needed, the auditor should perform procedures to gather such evidence. For example, the auditor may conclude that additional audit evidence is needed because of significant differences in fiscal year-ends, significant differences in accounting principles, changes in ownership, changes in conditions affecting the use of the equity method, or the materiality of the investment to the investor's financial position or results of operations. Examples of procedures the auditor may perform are reviewing information in the investor's files that relates to the investee such as investee minutes and budgets and cash flows information about the investee and making inquiries of investor management about the investee's financial results. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.30 If the investee's financial statements are not audited, or if the investee auditor's report is not satisfactory to the investor's auditor for this purpose, the investor's auditor should apply, or should request that the investor arrange with the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor.

.31 If the carrying amount of the security reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, the auditor should obtain sufficient evidence in support of these amounts. Paragraphs .35 through .46 of this section provide guidance on audit evidence that may be used to corroborate assertions about the fair value of derivatives and securities, and paragraphs .47 and .48 provide guidance on procedures for evaluating management's consideration of the need to recognize impairment losses.

.32 There may be a time lag in reporting between the date of the financial statements of the investor and that of the investee. A time lag in reporting should be consistent from period to period. If a time lag between the date of the entity's financial statements and those of the investee has a material effect on the entity's financial statements, the auditor should determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the time lag is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time lag. If a change in time lag occurs that has a material effect on the investor's financial statements, an explanatory paragraph should be added to the auditor's report because of the change in reporting period.¹⁵

.33 The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its carrying amount that is other than temporary. In addition, with respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the investor auditor's report, the auditor should read available interim financial statements of the investee and make appropriate inquiries of the investor to identify subsequent events and transactions that are material to the investor's financial statements. Such events or transactions of the type contemplated in section 560, *Subsequent Events*, paragraphs .05–.06), should be disclosed in the notes to the investor's financial statements and (where applicable) labeled as unaudited information.

¹⁵ See section 508, *Reports on Audited Financial Statements*, paragraphs .16–.18.

For the purpose of recording the investor's share of the investee's results of operations, recognition should be given to events or transactions of the type contemplated in section 560 paragraph .03.

.34 Evidence relating to material transactions between the entity and the investee should be obtained to evaluate (a) the propriety of the elimination of unrealized profits and losses on transactions between the entity and the investee that is required when the equity method of accounting is used to account for an investment under generally accepted accounting principles and (b) the adequacy of disclosures about material related party transactions.

.35 *Valuation Based on Fair Value.* The auditor should obtain evidence supporting management's assertions about the fair value of derivatives and securities measured or disclosed at fair value. The method for determining fair value may be specified by generally accepted accounting principles and may vary depending on the industry in which the entity operates or the nature of the entity. Such differences may relate to the consideration of price quotations from inactive markets and significant liquidity discounts, control premiums, and commissions and other costs that would be incurred to dispose of the derivative or security. The auditor should determine whether generally accepted accounting principles specify the method to be used to determine the fair value of the entity's derivatives and securities and evaluate whether the determination of fair value is consistent with the specified valuation method. Paragraphs .35–.46 of this section provide guidance on audit evidence that may be used to support assertions about fair value; that guidance should be considered in the context of specific accounting requirements. If the determination of fair value requires the use of estimates, the auditor should consider the guidance in section 342, *Auditing Accounting Estimates*. In addition, section 312 paragraph .56 provides guidance on considering a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

.36 Quoted market prices for derivatives and securities listed on national exchanges or over-the-counter markets are available from sources such as financial publications, the exchanges, the National Association of Securities Dealers Automated Quotations System (NASDAQ), or pricing services based on sources such as those. Quoted market prices obtained from those sources are generally considered to provide sufficient evidence of the fair value of the derivatives and securities.

.37 For certain other derivatives and securities, quoted market prices may be obtained from broker-dealers who are market makers in them or through the National Quotation Bureau. However, using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed. For example, quotations published by the National Quotation Bureau may not be based on recent trades and may only be an indication of interest and not an actual price for which a counterparty will purchase or sell the underlying derivative or security.

.38 If quoted market prices are not available for the derivative or security, estimates of fair value frequently can be obtained from broker-dealers or other third-party sources based on proprietary valuation models or from the entity based on internally or externally developed valuation models (for example, the Black-Scholes option pricing model). The auditor should understand the method used by the broker-dealer or other third-party source in developing the estimate, for example, whether a pricing model or a cash flow projection was used. The auditor may also determine that it is necessary to obtain estimates from more

than one pricing source. For example, this may be appropriate if either of the following occurs.

- The pricing source has a relationship with an entity that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product.
- The valuation is based on assumptions that are highly subjective or particularly sensitive to changes in the underlying circumstances.

.39 For fair-value estimates obtained from broker-dealers and other third-party sources, the auditor should consider the applicability of the guidance in section 336 or section 324. The auditor's decision about whether such guidance is applicable and which guidance is applicable will depend on the circumstances. The guidance in section 336 may be applicable if the third-party source derives the fair value of the derivative or security by using modeling or similar techniques. If the entity uses a pricing service to obtain prices of securities and derivatives, the guidance in section 324 may be appropriate.

.40 If the derivative or security is valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management.¹⁶ Examples of valuation models include the present value of expected future cash flows, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis.

The auditor should obtain evidence supporting management's assertions about fair value determined using a model by performing procedures such as—

- Assessing the reasonableness and appropriateness of the model. The auditor should determine whether the valuation model is appropriate for the derivative or security to which it is applied and whether the assumptions used are reasonable and appropriately supported. Estimates of expected future cash flows, for example, to determine the fair value of debt securities should be based on reasonable and supportable assumptions. The evaluation of the appropriateness of valuation models and each of the assumptions used in the models may require considerable judgment and knowledge of valuation techniques, market factors that affect value, and actual and expected market conditions, particularly in relation to similar derivatives and securities that are traded. Accordingly, the auditor may consider it necessary to involve a specialist in assessing the model.
- Calculating the value, for example using a model developed by the auditor or by a specialist engaged by the auditor, to develop an independent expectation to corroborate the reasonableness of the value calculated by the entity.
- Comparing the fair value with subsequent or recent transactions.

However, a valuation model should not be used to determine fair value when generally accepted accounting principles require that the fair value of a security be determined using quoted market prices.

¹⁶ Independence Standards Board Interpretation 99-1, *FAS 133 Assistance*, provides guidance to auditors of public companies on services an auditor may provide management to assist with the application of FASB ASC 815 that would and would not impair the auditor's independence. Ethics Interpretation 101-3, *Performance of Nonattest Services* [ET section 101.05], provides general guidance to auditors of all entities on the effect of nonattest services on the auditor's independence. [Footnote revised, September 2003, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3. Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.41 Evaluating audit evidence for assertions about derivatives and securities may require the auditor to use considerable judgment. That may be because the assertions, especially those about valuation, are based on highly subjective assumptions or are particularly sensitive to changes in the underlying circumstances. Valuation assertions may be based on assumptions about the occurrence of future events for which expectations are difficult to develop or on assumptions about conditions expected to exist over a long period; for example, default rates or prepayment rates. Accordingly, competent persons could reach different conclusions about estimates of fair values or estimates of ranges of fair values. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.42 Considerable judgment may also be required in evaluating audit evidence for assertions based on features of the derivative or security and applicable accounting principles, including underlying criteria such as for hedge accounting, that are extremely complex. For example, determining the fair value of a structured note may require consideration of a variety of features of the note that react differently to changes in economic conditions. In addition, one or more other derivatives may be designated to hedge changes in cash flows under the note. Evaluating audit evidence to support the fair value of the note, the determination of whether the hedge is highly effective, and the allocation of changes in fair value to earnings and other comprehensive income may require considerable judgment. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.43 In situations requiring considerable judgment, the auditor should consider the guidance in—

- a. Section 342 on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates.
- b. Section 336 on the use of the work of a specialist in performing substantive procedures.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.44 Negotiable securities, real estate, chattels, or other property is often assigned as collateral for debt securities. If the collateral is an important factor in evaluating the fair value and collectibility of the security, the auditor should obtain evidence regarding the existence, fair value, and transferability of such collateral as well as the investor's rights to the collateral.

.45 Generally accepted accounting principles may specify how to account for unrealized appreciation and depreciation in the fair value of the entity's derivatives and securities. For example, generally accepted accounting principles require the entity to report a change in the unrealized appreciation or depreciation in the fair value of—

- A derivative that is designated as a fair value hedge in earnings, with disclosure of the ineffective portion of the hedge.
- A derivative that is designated as a cash flow hedge in two components, with the ineffective portion reported in earnings and the effective portion reported in other comprehensive income.
- A derivative that was previously designated as a hedge but is no longer highly effective, or a derivative that is not designated as a hedge, in earnings.
- An available-for-sale security in other comprehensive income.

Generally accepted accounting principles may also require the entity to reclassify amounts from accumulated other comprehensive income to earnings. For example, such reclassifications may be required because a hedged transaction is determined to no longer be probable of occurring, a hedged forecasted transaction affects earnings for the period, or a decline in fair value is determined to be other than temporary.

.46 The auditor should evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary as discussed in paragraphs .47 and .48 of this section. The auditor should also gather audit evidence to support the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized in earnings or other comprehensive income or that is disclosed because of the ineffectiveness of a hedge. That requires an understanding of the methods used to determine whether the hedge is highly effective and to determine the ineffective portion of the hedge. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.47 *Impairment Losses.* Regardless of the valuation method used, generally accepted accounting principles might require recognizing in earnings an impairment loss for a decline in fair value that is other than temporary. Determinations of whether losses are other than temporary often involve estimating the outcome of future events. Accordingly, judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors.

- Fair value is significantly below cost and—
 - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
 - The decline has existed for an extended period of time.
 - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.48 The auditor should evaluate (a) whether management has considered relevant information in determining whether factors such as those listed in paragraph .47 exist and (b) management's conclusions about the need to recognize an impairment loss. That evaluation requires the auditor to obtain evidence about such factors that tend to corroborate or conflict with management's conclusions. When the entity has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the entity has appropriately followed generally accepted accounting principles.

Presentation and Disclosure

.49 Assertions about presentation and disclosure address whether the classification, description, and disclosure of derivatives and securities in the entity's financial statements are in conformity with generally accepted accounting principles. The auditor should evaluate whether the presentation and disclosure of derivatives and securities are in conformity with generally accepted accounting principles.

[Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93. Revised, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

.50 For some derivatives and securities, generally accepted accounting principles may prescribe presentation and disclosure requirements. For example—

- Whether changes in the fair value of derivatives used to hedge risks are required to be reported as a component of earnings or other comprehensive income depends on whether they are intended to hedge the risk of changes in the fair value of assets and liabilities or changes in expected future cash flows and on the degree of effectiveness of the hedge.
- Certain securities are required to be classified into categories according to management's intent and ability, such as held-to-maturity.
- Specific information is required to be disclosed about derivatives and securities.

.51 In evaluating the adequacy of presentation and disclosure, the auditor should consider the form, arrangement, and content of the financial statements and their notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts reported. The auditor should compare the presentation and disclosure with the requirements of generally accepted accounting principles. However, the auditor should also follow the guidance in section 431, *Adequacy of Disclosure in Financial Statements*, in evaluating the adequacy of disclosure that is not specifically required by generally accepted accounting principles.

Additional Considerations About Hedging Activities

.52 To account for a derivative as a hedge, generally accepted accounting principles require management at the inception of the hedge to designate the derivative as a hedge and contemporaneously formally document¹⁷ the hedging relationship, the entity's risk management objective and strategy for undertaking the hedge, and the method of assessing the effectiveness of the hedge. In addition, to qualify for hedge accounting, generally accepted accounting principles require that management have an expectation, both at the inception of the hedge and on an ongoing basis, that the hedging relationship will be highly effective in achieving the hedging strategy.¹⁸

¹⁷ FASB ASC 815 requires formal documentation of prescribed aspects of hedging relationships at the inception of the hedge. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹⁸ FASB ASC 815 requires management to periodically reassess the effectiveness of hedging relationships whenever financial statements or earnings are reported, and at least every three months. It also requires that all assessments of effectiveness be consistent with the risk management strategy documented for the particular hedging relationship. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.53 The auditor should gather audit evidence to determine whether management complied with the hedge accounting requirements of generally accepted accounting principles, including designation and documentation requirements. In addition, the auditor should gather audit evidence to support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by generally accepted accounting principles. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.54 When the entity designates a derivative as a fair value hedge, generally accepted accounting principles require that the entity adjust the carrying amount of the hedged item for the change in the hedged item's fair value that is attributable to the hedged risk. The auditor should gather audit evidence supporting the recorded change in the hedged item's fair value that is attributable to the hedged risk. Additionally, the auditor should gather audit evidence to determine whether management has properly applied generally accepted accounting principles to the hedged item. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.55 For a cash flow hedge of a forecasted transaction, generally accepted accounting principles require management to determine that the forecasted transaction is probable of occurring. Those principles require that the likelihood that the transaction will take place not be based solely on management's intent. Instead, the transaction's probability should be supported by observable facts and the attendant circumstances, such as the following:

- The frequency of similar past transactions
- The financial and operational ability of the entity to carry out the transaction
- The extent of loss that could result if the transaction does not occur
- The likelihood that transactions with substantially different characteristics might be used to achieve the same business purpose

The auditor should evaluate management's determination of whether a forecasted transaction is probable.

Assertions About Securities Based on Management's Intent and Ability

.56 Generally accepted accounting principles require that management's intent and ability be considered in valuing certain securities; for example, whether—

- Debt securities are classified as held-to-maturity and reported at their cost depends on management's intent and ability to hold them to their maturity.
- Equity securities are reported using the equity method depends on management's ability to significantly influence the investee.
- Equity securities are classified as trading or available-for-sale depends on management's intent and objectives in investing in the securities.

.57 In evaluating management's intent and ability, the auditor should—

- a. Obtain an understanding of the process used by management to classify securities as trading, available-for-sale, or held-to-maturity.

- b. For an investment accounted for using the equity method, inquire of management as to whether the entity has the ability to exercise significant influence over the operating and financial policies of the investee and evaluate the attendant circumstances that serve as a basis for management's conclusions.
- c. If the entity accounts for the investment contrary to the presumption established by generally accepted accounting principles for use of the equity method, obtain sufficient appropriate audit evidence about whether that presumption has been overcome and whether appropriate disclosure is made regarding the reasons for not accounting for the investment in keeping with that presumption.
- d. Consider whether management's activities corroborate or conflict with its stated intent. For example, the auditor should evaluate an assertion that management intends to hold debt securities to their maturity by examining evidence such as documentation of management's strategies and sales and other historical activities with respect to those securities and similar securities.
- e. Determine whether generally accepted accounting principles require management to document its intentions and specify the content and timeliness of that documentation.¹⁹ The auditor should inspect the documentation and obtain audit evidence about its timeliness. Unlike the formal documentation required for hedging activities, audit evidence supporting the classification of debt and equity securities may be more informal.
- f. Determine whether management's activities, contractual agreements, or the entity's financial condition provide evidence of its ability. Examples follow.
 - (1) The entity's financial position, working capital needs, operating results, debt agreements, guarantees, alternate sources of liquidity, and other relevant contractual obligations, as well as laws and regulations, may provide evidence about an entity's ability to hold debt securities to their maturity.
 - (2) Management's cash flow projections may suggest that it does not have the ability to hold debt securities to their maturity.
 - (3) Management's inability to obtain information from an investee may suggest that it does not have the ability to significantly influence the investee.
 - (4) If the entity asserts that it maintains effective control over securities transferred under a repurchase agreement, the contractual agreement may be such that the entity actually surrendered control over the securities and therefore should account for the transfer as a sale instead of a secured borrowing.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

¹⁹ FASB ASC 320-10-25-1 requires an investor to document the classification of debt and equity securities into one of three categories—held-to-maturity, available-for-sale, or trading—at their acquisition. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Management Representations

.58 Section 333, *Management Representations*, provides guidance to auditors in obtaining written representations from management. The auditor ordinarily should obtain written representations from management confirming aspects of management's intent and ability that affect assertions about derivatives and securities, such as its intent and ability to hold a debt security until its maturity or to enter into a forecasted transaction for which hedge accounting is applied. In addition, the auditor should consider obtaining written representations from management confirming other aspects of derivatives and securities transactions that affect assertions about them.²⁰

Effective Date

.59 This section is effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.

²⁰ Section 333 paragraph .17 provides illustrative representations about derivatives and securities transactions.

AU Section 9332

Auditing Derivative Instruments, Hedging Activities, and Investments in Securities: Auditing Interpretations of Section 332

1. Auditing Investments in Securities Where a Readily Determinable Fair Value Does Not Exist

.01 Question—Entities may make investments in securities, required by generally accepted accounting principals to be accounted for at fair value, where a readily determinable fair value for those securities does not exist. For example, an entity may have an investment in a hedge fund that it reports at fair value, but for which a readily determinable fair value does not exist. Further, the hedge fund may own interests in investments in limited partnership interests or other private equity securities for which a readily determinable fair value does not exist. As part of an auditor's procedures in accordance with section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, he or she typically would satisfy the existence assertion through either confirmation with the hedge fund, examination of legal documents, or other means as discussed in section 332. In confirming the existence, the auditor may request the hedge fund to indicate or to confirm the fair value of the entity's investment in the hedge fund, including the fair value of investments held by the hedge fund. In some circumstances, the hedge fund will not provide management or the auditor detailed information about the basis and method for measuring the entity's investment in the hedge fund, nor will they provide information about the specific investments held by the hedge fund. For example, in some circumstances the hedge fund may inform management or the auditor that investments are held by the hedge fund as follows:

- In aggregate, such as "\$XXX of total investments"
- In aggregate, such as "\$XXX of total investments in private equity securities, \$YYY of total investments in interests in limited partnerships, and \$ZZZ of total investments in debt securities"
- On an investment-by-investment basis, such as "AA shares of common stock of private company A, with a fair value of \$AAA; BB shares of preferred stock of private company B, with a fair value of \$BBB; CC units of limited partnership interest CCC, with a fair value of \$CCC; and real estate property DDD, with a fair value of \$DDDD"

In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments in securities, does receiving a confirmation from a third party, either in aggregate or on a security-by-security basis, constitute adequate audit evidence with respect to the existence and valuation assertions in section 332?

.02 Interpretation—In circumstances in which the auditor determines that the nature and extent of auditing procedures should include verifying the existence and testing the measurement of investments in securities, simply receiving a confirmation from a third party, either in aggregate or on a

security-by-security basis, does not in and of itself constitute adequate audit evidence with respect to the valuation assertion in section 332. In addition, receiving confirmation from a third party for investments in aggregate (illustrated by the first two bullets above) does not constitute adequate audit evidence with respect to the existence assertion under section 332. Receiving confirmation from a third party on a security-by-security basis (illustrated by the third bullet above), however, typically would constitute adequate audit evidence with respect to the existence assertion under section 332. Also, as noted in section 328, *Auditing Fair Value Measurements and Disclosures*, paragraph .04, in discussing management's responsibility for making fair value measurements:

Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

.03 In addition, section 328 discusses the auditor's responsibility dealing with:

- Understanding the entity's process for determining fair value measurements and disclosures and the relevant controls, and assessing risk
- Evaluating conformity of fair value measurements and disclosures with GAAP
- Engaging a specialist, where necessary
- Testing the entity's fair value measurements and disclosures
- Disclosures about fair values
- Evaluating the results of audit procedures
- Management representations
- Communication with those charged with governance

.04 In circumstances in which the auditor is unable to audit the existence or measurement of interests in investments in securities at the financial statement date, the auditor should consider whether that scope limitation requires the auditor to either qualify his or her opinion or to disclaim an opinion, as discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .22 to .26.

[Issue Date: July, 2005; Revised: April, 2007.]

AU Section 333

Management Representations

(Supersedes SAS No. 19.)

Source: SAS No. 85; SAS No. 89; SAS No. 99; SAS No. 113.

See section 9333 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after June 30, 1998, unless otherwise indicated.

Introduction

.01 This section establishes a requirement that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted auditing standards and provides guidance concerning the representations to be obtained.

Reliance on Management Representations

.02 During an audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries or through the financial statements. Such representations from management are part of the audit evidence the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit. Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]¹

.03 The auditor obtains written representations from management to complement other auditing procedures. In many cases, the auditor applies auditing procedures specifically designed to obtain audit evidence concerning matters that also are the subject of written representations. For example, after the auditor performs the procedures prescribed in section 334, *Related Parties*, even if the results of those procedures indicate that transactions with related parties have been properly disclosed, the auditor should obtain a written representation to document that management has no knowledge of any such transactions that have not been properly disclosed. In some circumstances, audit evidence that can be obtained by the application of auditing procedures other than inquiry is limited; therefore, the auditor obtains written representations to provide additional audit evidence. For example, if an entity plans to discontinue a line of business and the auditor is not able to obtain sufficient information through other auditing procedures to corroborate the plan or intent,

¹ Section 230, *Due Professional Care in the Performance of Work*, states, "The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest."

the auditor obtains a written representation to provide evidence of management's intent. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.04 If a representation made by management is contradicted by other audit evidence, the auditor should investigate the circumstances and consider the reliability of the representation made. Based on the circumstances, the auditor should consider whether his or her reliance on management's representations relating to other aspects of the financial statements is appropriate and justified.

Obtaining Written Representations

.05 Written representations from management should be obtained for all financial statements and periods covered by the auditor's report.² For example, if comparative financial statements are reported on, the written representations obtained at the completion of the most recent audit should address all periods being reported on. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements.

.06 In connection with an audit of financial statements presented in accordance with generally accepted accounting principles, specific representations should relate to the following matters:³

Financial Statements

- a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.
- b. Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.

Completeness of Information

- c. Availability of all financial records and related data.
- d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.
- e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
- f. Absence of unrecorded transactions.

Recognition, Measurement, and Disclosure

- g. Management's belief that the effects of any uncorrected financial statement misstatements⁴ aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements

² An illustrative representation letter from management is contained in paragraph .16 of appendix A, "Illustrative Management Representation Letter".

³ Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of presentation of the financial statements being audited.

⁴ Paragraph .07 of section 312, *Audit Risk and Materiality in Conducting an Audit*, states that a misstatement can result from errors or fraud, and provides guidance for the auditor's evaluation of audit findings (paragraphs 50-61 of section 312). [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

taken as a whole.⁵ (A summary of such items should be included in or attached to the letter.)^{6, 7}

- h. Management's acknowledgment of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.
- i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.^[8]
- j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
- k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.
- l. Information concerning related-party transactions and amounts receivable from or payable to related parties.⁹
- m. Guarantees, whether written or oral, under which the entity is contingently liable.
- n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 275, *Risks and Uncertainties*.
- o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.¹⁰
- p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with FASB ASC 450, *Contingencies*.¹¹

⁵ If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [description of reasons]." [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

⁶ Paragraph .42 of section 312 states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

⁷ The communication to management of immaterial misstatements aggregated by the auditor does not constitute a communication pursuant to paragraph .17 of section 317, *Illegal Acts by Clients*, Section 10A of the Securities Exchange Act of 1934, or paragraphs .38-.40 of section 316, *Consideration of Fraud in a Financial Statement Audit*. The auditor may have additional communication responsibilities pursuant to section 317, Section 10A of the Securities Exchange Act of 1934, or section 316. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

^[8] [Footnote deleted by the issuance of Statement on Auditing Standards No. 99, October 2002.]

⁹ See section 334. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹⁰ See section 317. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹¹ See paragraph .05 of section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*. If the entity has not consulted a lawyer regarding litigation, claims, and

(continued)

- q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.¹²
- r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.
- s. Compliance with aspects of contractual agreements that may affect the financial statements.

Subsequent Events

- t. Information concerning subsequent events.¹³

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.07 The representation letter ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry.¹⁴ Examples of additional representations that may be appropriate are provided in paragraph .17 appendix B, "Additional Illustrative Representations."

.08 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements, for example, items (a), (c), (d), and (e) above. In addition, because of the possible effects of fraud on other aspects of the audit, materiality would not apply to item (h) above with respect to management or those employees who have significant roles in internal control.

.09 The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report. [If the auditor "dual dates" his or her report, the auditor should consider whether obtaining additional representations relating to the subsequent event is appropriate. See paragraph .05 of section 530, *Dating of the Independent Auditor's Report*.] The letter should be signed by those members of management

(footnote continued)

assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer" (paragraphs .15–.17 of section 9337). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹² See paragraph .05b of section 337. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹³ See paragraph .12 of section 560, *Subsequent Events*; paragraph .10 of section 711, *Filings Under Federal Securities Statutes*; and paragraph .45, footnote 31 of section 634, *Letters for Underwriters and Certain Other Requesting Parties*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹⁴ Certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.10 If current management was not present during all periods covered by the auditor's report, the auditor should nevertheless obtain written representations from current management on all such periods. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. As discussed in paragraph .08, management's representations may be limited to matters that are considered either individually or collectively material to the financial statements.

.11 In certain circumstances, the auditor may want to obtain written representations from other individuals. For example, he or she may want to obtain written representations about the completeness of the minutes of the meetings of stockholders, directors, and committees of directors from the person responsible for keeping such minutes. Also, if the independent auditor performs an audit of the financial statements of a subsidiary but does not audit those of the parent company, he or she may want to obtain representations from management of the parent company concerning matters that may affect the subsidiary, such as related-party transactions or the parent company's intention to provide continuing financial support to the subsidiary.

.12 There are circumstances in which an auditor should obtain updating representation letters from management. If a predecessor auditor is requested by a former client to reissue (or consent to the reuse of) his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, the predecessor auditor should obtain an updating representation letter from the management of the former client.¹⁵ Also, when performing subsequent events procedures in connection with filings under the Securities Act of 1933, the auditor should obtain certain written representations.¹⁶ The updating management representation letter should state (a) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest financial statements reported on by the auditor that would require adjustment to or disclosure in those financial statements.¹⁷

Scope Limitations

.13 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion

¹⁵ See paragraph .71 of section 508, *Reports on Audited Financial Statements*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹⁶ See paragraph .10 of section 711. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

¹⁷ An illustrative updating management representation letter is contained in paragraph .18 of appendix C, "Illustrative Updating Management Representation Letter." [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

or withdraw from the engagement.¹⁸ However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

.14 If the auditor is precluded from performing procedures he or she considers necessary in the circumstances with respect to a matter that is material to the financial statements, even though management has given representations concerning the matter, there is a limitation on the scope of the audit, and the auditor should qualify his or her opinion or disclaim an opinion.

Effective Date

.15 This section is effective for audits of financial statements for periods ending on or after June 30, 1998. Earlier application is permitted.

¹⁸ See paragraphs .22–.34 of section 508. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

.16

Appendix A

Illustrative Management Representation Letter

1. The following letter, which relates to an audit of financial statements prepared in conformity with generally accepted accounting principles, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 19X1 and 19X0, and the related statements of income and retained earnings and cash flows for the years then ended." The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited. (See paragraph .17 of appendix B.)

2. If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allegation discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

3. The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

4. Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in section 316, and related parties, in section 334 footnote 1. To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

5. The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of this section.

6.

[Date]

To [Independent Auditor]

We are providing this letter in connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position,

results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [*consolidated*] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report),*] the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all—
 - a. Financial records and related data.
 - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.¹
6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
 - a. Management,
 - b. Employees who have significant roles in internal control, or
 - c. Others where the fraud could have a material effect on the financial statements.
8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
10. The following have been properly recorded or disclosed in the financial statements:
 - a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.

¹ If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [*description of reasons*]." [Footnote added effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

- b. Guarantees, whether written or oral, under which the company is contingently liable.
 - c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 275, Risks and Uncertainties*. [Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]
11. There are no—
 - a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
 - b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450, *Contingencies*.²
 - c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB ASC 450.
 12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
 13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

[Add additional representations that are unique to the entity's business or industry. See paragraph .07 and appendix B, paragraph .17 of this section.]

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Name of Chief Executive Officer and Title]

[Name of Chief Financial Officer and Title]

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999 by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

² In the circumstance discussed in footnote 11 of this section, this representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

[Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999. Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17

Appendix B

Additional Illustrative Representations

1. As discussed in paragraph .07 of this section, representation letters ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. The auditor also should be aware that certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all-inclusive. The auditor also should consider the effects of pronouncements issued subsequent to the issuance of this section.

<i>General</i>	
<i>Condition</i>	<i>Illustrative Example</i>
<p>Unaudited interim information accompanies the financial statements.</p>	<p>The unaudited interim financial information accompanying [presented in Note X to] the financial statements for the [identify all related periods] has been prepared and presented in conformity with generally accepted accounting principles applicable to interim financial information [and with Item 302(a) of Regulation S-K]. The accounting principles used to prepare the unaudited interim financial information are consistent with those used to prepare the audited financial statements.</p>
<p>The impact of a new accounting principle is not known.</p>	<p>We have not completed the process of evaluating the impact that will result from adopting the guidance in Financial Accounting Standards Board (FASB) <i>Accounting Standards Codification</i> (ASC) Update 20YY-XX, as discussed in Note [X]. The company is therefore unable to disclose the impact that adopting the guidance in FASB ASC Update 20YY-XX will have on its financial position and the results of operations when such guidance is adopted.</p>
<p>There is justification for a change in accounting principles.</p>	<p>We believe that [describe the newly adopted accounting principle] is preferable to [describe the former accounting principle] because [describe management's justification for the change in accounting principles].</p>

<i>Condition</i>	<i>Illustrative Example</i>
Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.	Note [X] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.
The possibility exists that the value of specific significant long-lived assets or certain identifiable intangibles may be impaired.	We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of its assets might not be recoverable and have appropriately recorded the adjustment.
The entity has a variable interest in another entity.	<p>Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with US GAAP.</p> <p>We have considered both implicit and explicit variable interests in (a) determining whether potential VIEs should be considered VIEs, (b) calculating expected losses and residual returns, and (c) determining which party, if any, is the primary beneficiary.</p> <p>We have provided you with lists of all identified variable interests in (i) VIEs, (ii) potential VIEs that we considered but judged not to be VIEs, and (iii) entities that were afforded the scope exceptions of Financial Accounting Standards Board (FASB) <i>Accounting Standards Codification</i> (ASC) 810, <i>Consolidation</i>.</p> <p>We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FASB ASC 810.</p> <p>We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents and other entities, including but not limited to, their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements.</p>

(continued)

Condition

Illustrative Example

The work of a specialist has been used by the entity.

The information we provided about financial interests and contractual arrangements with related parties, de facto agents and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements.

Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes.

Regarding entities in which the Company has variable interests (implicit and explicit), we have provided all information about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the Company is the primary beneficiary or has a significant variable interest in the entity.

We have made and continue to make exhaustive efforts to obtain information about entities in which the Company has an implicit or explicit interest but that were excluded from complete analysis under FASB ASC 810 due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the Company is the primary beneficiary, or the accounting required to consolidate the entity.

We agree with the findings of specialists in evaluating the [*describe assertion*] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values

<i>Condition</i>	<i>Illustrative Example</i>
	<p>or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an impact on the independence or objectivity of the specialists.</p>

<i>Assets</i>	
<i>Condition</i>	<i>Illustrative Examples</i>

Cash

Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.

Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements have been properly disclosed.

Financial Instruments

Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.

Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities, to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.

Management considers the decline in value of debt or equity securities to be temporary.

We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.

Management has determined the fair value of significant financial instruments that do not have readily determinable market values.

The methods and significant assumptions used to determine fair values of financial instruments are as follows: [*describe methods and significant assumptions used to determine fair values of financial instruments*]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.

There are financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk.

The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements:

1. The extent, nature, and terms of financial instruments with off-balance-sheet risk

(continued)

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Receivables</i></p> <p>Receivables have been recorded in the financial statements.</p>	<p>2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments</p> <p>3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments</p> <p>Receivables recorded in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance-sheet date and have been appropriately reduced to their estimated net realizable value.</p>
<p><i>Inventories</i></p> <p>Excess or obsolete inventories exist.</p>	<p>Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value.</p>
<p><i>Investments</i></p> <p>There are unusual considerations involved in determining the application of equity accounting.</p>	<p><i>[For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:]</i></p> <ul style="list-style-type: none"> • The equity method is used to account for the company's investment in the common stock of [investee] because the company has the ability to exercise significant influence over the investee's operating and financial policies. • The cost method is used to account for the company's investment in the common stock of [investee] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.
<p><i>Deferred Charges</i></p> <p>Material expenditures have been deferred.</p>	<p>We believe that all material expenditures that have been deferred to future periods will be recoverable.</p>

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Deferred Tax Assets</i></p> <p>A deferred tax asset exists at the balance-sheet date.</p>	<p>The valuation allowance has been determined pursuant to the provisions of Financial Accounting Standards Board <i>Accounting Standards Codification</i> 740, <i>Income Taxes</i>, including the company's estimation of future taxable income, if necessary, and is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized. [Complete with appropriate wording detailing how the entity determined the valuation allowance against the deferred tax asset.]</p> <p style="text-align: center;">or</p> <p>A valuation allowance against deferred tax assets at the balance-sheet date is not considered necessary because it is more likely than not the deferred tax asset will be fully realized.</p>

Liabilities

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Debt</i></p> <p>Short-term debt could be refinanced on a long-term basis and management intends to do so.</p>	<p>The company has excluded short-term obligations totaling \$[amount] from current liabilities because it intends to refinance the obligations on a long-term basis. [Complete with appropriate wording detailing how amounts will be refinanced as follows:]</p> <ul style="list-style-type: none"> • The company has issued a long-term obligation [debt security] after the date of the balance sheet but prior to the issuance of the financial statements for the purpose of refinancing the short-term obligations on a long-term basis. • The company has the ability to consummate the refinancing, by using the financing agreement referred to in Note [X] to the financial statements.
<p>Tax-exempt bonds have been issued.</p>	<p>Tax-exempt bonds issued have retained their tax-exempt status.</p>

(continued)

<i>Condition</i>	<i>Illustrative Examples</i>
<p><i>Taxes</i></p> <p>Management intends to reinvest undistributed earnings of a foreign subsidiary.</p>	<p>We intend to reinvest the undistributed earnings of [name of foreign subsidiary].</p>
<p><i>Contingencies</i></p> <p>Estimates and disclosures have been made of environmental remediation liabilities and related loss contingencies.</p>	<p>Provision has been made for any material loss that is probable from environmental remediation liabilities associated with [name of site]. We believe that such estimate is reasonable based on available information and that the liabilities and related loss contingencies and the expected outcome of uncertainties have been adequately described in the company's financial statements.</p>
<p>Agreements may exist to repurchase assets previously sold.</p>	<p>Agreements to repurchase assets previously sold have been properly disclosed.</p>
<p><i>Pension and Postretirement Benefits</i></p> <p>An actuary has been used to measure pension liabilities and costs.</p>	<p>We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.</p>
<p>There is involvement with a multi-employer plan.</p>	<p>We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan.</p> <p style="text-align: center;">or</p> <p>We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of \$[XX].</p>
<p>Postretirement benefits have been eliminated.</p>	<p>We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits.</p> <p style="text-align: center;">or</p> <p>We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of \$[XX].</p>
<p>Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.</p>	<p>Current employee layoffs are intended to be temporary.</p>

<i>Condition</i>	<i>Illustrative Examples</i>
Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.	<p>We plan to continue to make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost.</p> <p style="text-align: center;">or</p> <p>We do not plan to make frequent amendments to its pension or other postretirement benefit plans.</p>

Equity

<i>Condition</i>	<i>Illustrative Example</i>
There are capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.	Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.

Income Statement

<i>Condition</i>	<i>Illustrative Example</i>
There may be a loss from sales commitments.	Provisions have been made for losses to be sustained in the fulfillment of or from inability to fulfill any sales commitments.
There may be losses from purchase commitments.	Provisions have been made for losses to be sustained as a result of purchase commitments for inventory quantities in excess of normal requirements or at prices in excess of prevailing market prices.
Nature of the product or industry indicates the possibility of undisclosed sales terms.	We have fully disclosed to you all sales terms, including all rights of return or price adjustments and all warranty provisions.

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of recent guidance on special purpose entity transactions. Revised, January 2006, to reflect conforming changes necessary due to the issuance of FASB Interpretation No. 46 (revised 2003). Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Appendix C

Illustrative Updating Management Representation Letter

1. The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of this section. Management need not repeat all of the representations made in the previous representation letter.

2. If matters exist that should be disclosed to the auditor, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

3.

[Date]

To [Auditor]

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

AU Section 9333

Management Representations: Auditing Interpretations of Section 333

1. Management Representations on Violations and Possible Violations of Laws and Regulations

.01 Question—Section 333, *Management Representations*, lists matters for which the auditor ordinarily obtains written representations from management. One of those matters is: Violations or possible violations of laws or regulations whose effects should be considered for disclosure in financial statements or as a basis for recording a loss contingency.

.02 Guidance on evaluating the need to disclose litigation, claims, and assessments that may result from possible violations is provided by Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. Section 317, *Illegal Acts by Clients*, provides guidance on evaluating the materiality of illegal acts. Does the representation regarding "possible violations" include matters beyond those described in FASB ASC 450 and section 317?

.03 Interpretation—No. Section 333 did not change the relevant criteria for evaluating the need for disclosure of violations and possible violations of laws or regulations. In requesting the representation on possible violations, the auditor is not asking for management's speculation on all possibilities of legal challenges to its actions.

.04 The representation concerns matters that have come to management's attention and that are significant enough that they should be considered in determining whether financial statement disclosures are necessary. It recognizes that these are matters of judgment and that the need for disclosure is not always readily apparent.

[Issue Date: March 1979; Revised: June 2009.]

AU Section 334

Related Parties

(Supersedes Statement on Auditing Standards No. 6, sec. 335.01–.19.)*

Source: SAS No. 45.

See section 9334 for interpretations of this section.

Effective for periods ended after September 30, 1983, unless otherwise indicated.

.01 This section provides guidance on procedures that should be considered by the auditor when he is performing an audit of financial statements in accordance with generally accepted auditing standards to identify related party relationships and transactions and to satisfy himself concerning the required financial statement accounting and disclosure.¹ The procedures set forth in this section should not be considered all-inclusive. Also, not all of them may be required in every audit.

Accounting Considerations

.02 Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 850, *Related Party Disclosures*, gives the requirements for

* This section also withdraws the following auditing interpretations dated March 1976 (AICPA, *Professional Standards*, vol. 1, AU sec. 9335.01–.11):

- Evaluating the Adequacy of Disclosure of Related Party Transactions
- Disclosure of Commonly Controlled Parties
- Definition of "Immediate Family"

¹ Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 850-10-50 contains the disclosure requirements for related party relationships and transactions. The FASB ASC glossary defines *related parties* as

- a. Affiliates of the entity
- b. Entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825–10–15, to be accounted for by the equity method by the investing entity
- c. Trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management
- d. Principal owners of the entity and members of their immediate families
- e. Management of the entity and members of their immediate families
- f. Other parties with which the entity may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests
- g. Other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests. The FASB ASC glossary also defines the terms *affiliate*, *control*, *immediate family*, *management*, and *principal owners*. FASB ASC 850-10-05-3 provides examples of related party transactions.

[Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

related party disclosures. Certain accounting pronouncements prescribe the accounting treatment when related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from that which would be appropriate if the parties were not related. The auditor should view related party transactions within the framework of existing pronouncements, placing primary emphasis on the adequacy of disclosure. In addition, the auditor should be aware that the substance of a particular transaction could be significantly different from its form and that financial statements should recognize the substance of particular transactions rather than merely their legal form.² [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Transactions that because of their nature may be indicative of the existence of related parties include³ —

- a. Borrowing or lending on an interest-free basis or at a rate of interest significantly above or below market rates prevailing at the time of the transaction.
- b. Selling real estate at a price that differs significantly from its appraised value.
- c. Exchanging property for similar property in a nonmonetary transaction.
- d. Making loans with no scheduled terms for when or how the funds will be repaid.

Audit Procedures

.04 An audit performed in accordance with generally accepted auditing standards cannot be expected to provide assurance that all related party transactions will be discovered. Nevertheless, during the course of his audit, the auditor should be aware of the possible existence of material related party transactions that could affect the financial statements and of common ownership or management control relationships for which FASB ASC 850-10-50 requires disclosure. Many of the procedures outlined in the following paragraphs are normally performed in an audit in accordance with generally accepted auditing standards, even if the auditor has no reason to suspect that related party transactions or control relationships exist. Other audit procedures set forth in this section are specifically directed to related party transactions. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.05 In determining the scope of work to be performed with respect to possible transactions with related parties, the auditor should obtain an

² Some pronouncements specify criteria for determining, presenting, and accounting for the substance of certain transactions and events. Examples include (1) presenting consolidated financial statements instead of separate statements of the component legal entities (FASB ASC 810, *Consolidation*); (2) capitalizing leases (FASB ASC 840, *Leases*); and (3) imputing an appropriate interest rate when the face amount of a note does not reasonably represent the present value of the consideration given or received in exchange for it (FASB ASC 835, *Interest*). [Footnote revised, June 1993, to reflect conforming changes necessary due to the issuance of Statement of Position 93-3. Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

³ FASB ASC 850-10-05-4 gives other examples of common types of transactions with related parties. FASB ASC 850-10-05-5 states that "transactions between related parties are considered to be related party transactions even though they may not be given accounting recognition. For example, an entity may receive services from a related party without charge and not record receipt of the services. While not providing accounting or measurement guidance for such transactions, FASB ASC 850 requires their disclosure nonetheless." [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

understanding of management responsibilities and the relationship of each component to the total entity. He should consider controls over management activities, and he should consider the business purpose served by the various components of the entity. Normally, the business structure and style of operating are based on the abilities of management, tax and legal considerations, product diversification, and geographical location. Experience has shown, however, that business structure and operating style are occasionally deliberately designed to obscure related party transactions.

.06 In the absence of evidence to the contrary, transactions with related parties should not be assumed to be outside the ordinary course of business. The auditor should, however, be aware of the possibility that transactions with related parties may have been motivated solely, or in large measure, by conditions similar to the following:

- a. Lack of sufficient working capital or credit to continue the business
- b. An urgent desire for a continued favorable earnings record in the hope of supporting the price of the company's stock
- c. An overly optimistic earnings forecast
- d. Dependence on a single or relatively few products, customers, or transactions for the continuing success of the venture
- e. A declining industry characterized by a large number of business failures
- f. Excess capacity
- g. Significant litigation, especially litigation between stockholders and management
- h. Significant obsolescence dangers because the company is in a high-technology industry

Determining the Existence of Related Parties

.07 The auditor should place emphasis on testing material transactions with parties he knows are related to the reporting entity. Certain relationships, such as parent-subsidary or investor-investee, may be clearly evident. Determining the existence of others requires the application of specific audit procedures, which may include the following:

- a. Evaluate the company's procedures for identifying and properly accounting for related party transactions.
- b. Request from appropriate management personnel the names of all related parties and inquire whether there were any transactions with these parties during the period.
- c. Review filings by the reporting entity with the Securities and Exchange Commission and other regulatory agencies for the names of related parties and for other businesses in which officers and directors occupy directorship or management positions.
- d. Determine the names of all pension and other trusts established for the benefit of employees and the names of their officers and trustees.⁴
- e. Review stockholder listings of closely held companies to identify principal stockholders.

⁴ FASB ASC glossary term *related parties* includes "trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management." [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

- f.* Review prior years' working papers for the names of known related parties.
- g.* Inquire of predecessor, principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions.
- h.* Review material investment transactions during the period under audit to determine whether the nature and extent of investments during the period create related parties.

Identifying Transactions With Related Parties

.08 The following procedures are intended to provide guidance for identifying material transactions with parties known to be related and for identifying material transactions that may be indicative of the existence of previously undetermined relationships:

- a.* Provide audit personnel performing segments of the audit or auditing and reporting separately on the accounts of related components of the reporting entity with the names of known related parties so that they may become aware of transactions with such parties during their audits.
- b.* Review the minutes of meetings of the board of directors and executive or operating committees for information about material transactions authorized or discussed at their meetings.
- c.* Review proxy and other material filed with the Securities and Exchange Commission and comparable data filed with other regulatory agencies for information about material transactions with related parties.
- d.* Review conflict-of-interests statements obtained by the company from its management.⁵
- e.* Review the extent and nature of business transacted with major customers, suppliers, borrowers, and lenders for indications of previously undisclosed relationships.
- f.* Consider whether transactions are occurring, but are not being given accounting recognition, such as receiving or providing accounting, management or other services at no charge or a major stockholder absorbing corporate expenses.
- g.* Review accounting records for large, unusual, or nonrecurring transactions or balances, paying particular attention to transactions recognized at or near the end of the reporting period.
- h.* Review confirmations of compensating balance arrangements for indications that balances are or were maintained for or by related parties.
- i.* Review invoices from law firms that have performed regular or special services for the company for indications of the existence of related parties or related party transactions.
- j.* Review confirmations of loans receivable and payable for indications of guarantees. When guarantees are indicated, determine their nature and the relationships, if any, of the guarantors to the reporting entity.

⁵ Conflict-of-interests statements are intended to provide those charged with governance with information about the existence or nonexistence of relationships between the reporting persons and parties with whom the company transacts business. [Footnote revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Examining Identified Related Party Transactions

.09 After identifying related party transactions, the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose, nature, and extent of these transactions and their effect on the financial statements. The procedures should be directed toward obtaining and evaluating sufficient appropriate audit evidence and should extend beyond inquiry of management. Procedures that should be considered include the following:

- a. Obtain an understanding of the business purpose of the transaction.⁶
- b. Examine invoices, executed copies of agreements, contracts, and other pertinent documents, such as receiving reports and shipping documents.
- c. Determine whether the transaction has been approved by those charged with governance.
- d. Test for reasonableness the compilation of amounts to be disclosed, or considered for disclosure, in the financial statements.
- e. Arrange for the audits of intercompany account balances to be performed as of concurrent dates, even if the fiscal years differ, and for the examination of specified, important, and representative related party transactions by the auditors for each of the parties, with appropriate exchange of relevant information.
- f. Inspect or confirm and obtain satisfaction concerning the transferability and value of collateral.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.10 When necessary to fully understand a particular transaction, the following procedures, which might not otherwise be deemed necessary to comply with generally accepted auditing standards, should be considered.⁷

- a. Confirm transaction amount and terms, including guarantees and other significant data, with the other party or parties to the transaction.
- b. Inspect evidence in possession of the other party or parties to the transaction.
- c. Confirm or discuss significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
- d. Refer to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
- e. With respect to material uncollected balances, guarantees, and other obligations, obtain information about the financial capability of the

⁶ Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to understand a particular transaction, he should consult with persons who do have the requisite knowledge.

⁷ Arrangements for certain procedures should be made or approved in advance by appropriate client officials.

other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies. The auditor should decide on the degree of assurance required and the extent to which available information provides such assurance.

Disclosure

.11 For each material related party transaction (or aggregation of similar transactions) or common ownership or management control relationship for which FASB ASC 850-10-50 requires disclosure, the auditor should consider whether he has obtained sufficient appropriate audit evidence to understand the relationship of the parties and, for related party transactions, the effects of the transaction on the financial statements. He should then evaluate all the information available to him concerning the related party transaction or control relationship and satisfy himself on the basis of his professional judgment that it is adequately disclosed in the financial statements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]⁸

.12 Except for routine transactions, it will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related, or assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a transaction was consummated on terms equivalent to those that prevail in arm's-length transactions.⁹ If such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality (see section 508.35 and .36).

⁸ Also, see section 431, *Adequacy of Disclosure in Financial Statements*. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁹ FASB ASC 850-10-50-5 states that if representations are made about transactions with related parties, the representations "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated." [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

AU Section 9334*

Related Parties: Auditing Interpretations of Section 334

[1.] Evaluating the Adequacy of Disclosure of Related Party Transactions

[.01–.05] [Withdrawn August 1983, by SAS No. 45.] (See section 334.)

[2.] Disclosure of Commonly Controlled Parties

[.06–.09] [Withdrawn August 1983, by SAS No. 45.] (See section 334.)

[3.] Definition of "Immediate Family"

[.10–.11] [Withdrawn August 1983, by SAS No. 45.] (See section 334.)

4. Exchange of Information Between the Principal and Other Auditor on Related Parties

.12 Question—Section 334, *Related Parties*, paragraphs .04–.07, states that "during the course of his audit, the auditor should be aware of the possible existence of material related party transactions," and that determining the existence of related party transactions may require the inquiry of the "principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions." When should that inquiry be made?

.13 Interpretation—The principal auditor and the other auditor should each obtain from the other the names of known related parties and the other information referred to above. Ordinarily, that exchange of information should be made at an early stage of the audit.

[Issue Date: April 1979.]

5. Examination of Identified Related Party Transactions with a Component

.14 Question—According to section 334 paragraph .09, once related party transactions have been identified, "the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose, nature and extent of these transactions and their effect on the financial statements." When there is a principal auditor-other auditor relationship, how may the auditors obtain that satisfaction regarding transactions that may involve not only the components¹ they are auditing, but also, other components?

* [Section number changed August 1983, to correspond to section 334, *Related Parties*.]

¹ For the purpose of this interpretation, the entities whose separate financial statements collectively comprise the consolidated or other financial statements are referred to as components.

.15 Interpretation—Audit procedures may sometimes have to be applied to records of components being audited by the other. One auditor may arrange to perform those procedures himself, or he may request the other to do so.² There may be circumstances when there are unusual or complex related party transactions and an auditor believes that access to relevant portions of the other's work papers is essential to his understanding of the effects of those transactions on the financial statements he is auditing. In those circumstances, access ordinarily should be provided.³

[Issue Date: April 1979.]

6. The Nature and Extent of Auditing Procedures for Examining Related Party Transactions

.16 Question—Section 334, *Related Parties*, provides general guidance about the types of procedures an auditor might apply to identified related party transactions. How extensive should the auditor's procedures be to examine related party transactions?

.17 Interpretation—The auditor's procedures should be sufficient to provide reasonable assurance that related party transactions are adequately disclosed and that identified related party transactions do not contain misstatements that, when aggregated with misstatements in other balances or classes of transactions, could be material to the financial statements taken as a whole. As in examining any other material account balance or class of transactions, the auditor needs to consider audit risk⁴ and design and apply appropriate substantive tests to evaluate management's assertions.

.18 The risk associated with management's assertions about related party transactions is often assessed as higher than for many other types of transactions because of the possibility that the parties to the transaction are motivated by reasons other than those that exist for most business transactions.⁵

.19 The higher the auditor's assessment of risk regarding related party transactions, the more extensive or effective the audit tests should be. For example, the auditor's tests regarding valuation of a receivable from an entity under common control might be more extensive than for a trade receivable of the same size because the common parent may be motivated to obscure the substance of the transaction. In assessing the risk of the related party transactions the auditor obtains an understanding of the business purpose of the transactions. Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to obtain that understanding for a particular transaction, he should consult with persons who do have the requisite knowledge. In addition, to understand the transaction, or obtain evidence regarding it, the auditor may have to refer to audited or unaudited financial statements of the related party, apply procedures at the related party, or in some cases audit the financial statements of the related party.

² In this case, the auditor should follow the guidance in Interpretation No. 1, "Specific Procedures Performed by Other Auditors at the Principal Auditor's Request," of section 543, *Part of Audit Performed by Other Independent Auditors* (sec. 9543 par. .01–.03).

³ There is no intention in this interpretation to modify section 543 paragraph .12c regarding the principal auditor's consideration of review of the other auditor's workpapers when he decides not to make reference to the other auditor.

⁴ Audit risk and its components are described in section 312, *Audit Risk and Materiality in Conducting an Audit*.

⁵ See section 334 in paragraph .06.

.20 Question—Section 334, *Related Parties*, paragraph .07 states that specific audit procedures should be applied to determine if related parties exist. That paragraph also suggests some specific audit procedures to identify related parties that the auditor should consider. What other audit procedures for determining the existence of related parties should the auditor consider?

.21 Interpretation—The auditor should consider obtaining representations from the entity's senior management and its board of directors about whether they or any other related parties engaged in any transactions with the entity during the period.

[Issue Date: May 1986.]

7. Management's and Auditor's Responsibilities With Regard to Related Party Disclosures Prefaced by Terminology Such As "Management Believes That"

.22 Question—Management discloses in its financial statements that a related party transaction was consummated on terms equivalent to those that prevail in arm's length transactions, and prefaces the representation with a phrase such as "Management believes that" or "It is the Company's belief that." Does the use of such terminology change management's responsibility to substantiate the representation?

.23 Interpretation—No. Financial Accounting Standards Board *Accounting Standards Codification* 850-10-50-5 states that the representations about a related party transaction "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated. "A preface to a disclosure such as "Management believes that" or "It is the Company's belief that" does not change management's responsibility to substantiate the representation. Section 334, *Related Parties*, paragraph .12 indicates that if such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality.

[Issue Date: May 2000; Revised: June 2009.]

AU Section 336

Using the Work of a Specialist

(Supersedes SAS No. 11.)

Source: SAS No. 73.

See section 9336 for interpretations of this section.

Effective for audits of periods ending on or after December 15, 1994.

Introduction and Applicability

.01 The purpose of this section is to provide guidance to the auditor who uses the work of a specialist in performing an audit in accordance with generally accepted auditing standards. For purposes of this section, a specialist is a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing.¹

.02 Specialists to which this section applies include, but are not limited to, actuaries, appraisers, engineers, environmental consultants, and geologists. This section also applies to attorneys engaged as specialists in situations other than to provide services to a client concerning litigation, claims, or assessments to which section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, applies. For example, attorneys may be engaged by a client or by the auditor as specialists in a variety of other circumstances, including interpreting the provisions of a contractual agreement.

.03 The guidance in this section is applicable when—

- a. Management engages or employs a specialist and the auditor uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.
- b. Management engages a specialist employed by the auditor's firm to provide advisory services² and the auditor uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.
- c. The auditor engages a specialist and uses that specialist's work as audit evidence in performing substantive tests to evaluate material financial statement assertions.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.04 The guidance provided in this section applies to audits of financial statements prepared in conformity with generally accepted accounting principles (GAAP)³ and to engagements performed under section 623, *Special Reports*, including a comprehensive basis of accounting other than GAAP.

¹ In general, the auditor's education, training, and experience enable him or her to be knowledgeable concerning income tax matters and to be competent to assess their presentation in the financial statements.

² The auditor should consider the effect, if any, that using the work of a specialist employed by the auditor's firm has on independence.

³ References in this section to "financial statements" and to "generally accepted accounting principles" include special reports covered under section 623, *Special Reports*.

.05 This section does not apply to situations covered by section 311, *Planning and Supervision*, in which a specialist employed by the auditor's firm participates in the audit.

Decision to Use the Work of a Specialist

.06 The auditor's education and experience enable him or her to be knowledgeable about business matters in general, but the auditor is not expected to have the expertise of a person trained for or qualified to engage in the practice of another profession or occupation. During the audit, however, an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.07 Examples of the types of matters that the auditor may decide require him or her to consider using the work of a specialist include, but are not limited to, the following:

- a. Valuation (for example, special-purpose inventories, high-technology materials or equipment, pharmaceutical products, complex financial instruments, real estate, restricted securities, works of art, and environmental contingencies)
- b. Determination of physical characteristics relating to quantity on hand or condition (for example, quantity or condition of minerals, mineral reserves, or materials stored in stockpiles)
- c. Determination of amounts derived by using specialized techniques or methods (for example, actuarial determinations for employee benefits obligations and disclosures, and determinations for insurance loss reserves⁴)
- d. Interpretation of technical requirements, regulations, or agreements (for example, the potential significance of contracts or other legal documents or legal title to property)

Qualifications and Work of a Specialist

.08 The auditor should consider the following to evaluate the professional qualifications of the specialist in determining that the specialist possesses the necessary skill or knowledge in the particular field:

- a. The professional certification, license, or other recognition of the competence of the specialist in his or her field, as appropriate
- b. The reputation and standing of the specialist in the views of peers and others familiar with the specialist's capability or performance
- c. The specialist's experience in the type of work under consideration

.09 The auditor should obtain an understanding of the nature of the work performed or to be performed by the specialist. This understanding should cover the following:

⁴ In the specific situation involving the audit of an insurance entity's loss reserves, an outside loss reserve specialist—that is, one who is not an employee or officer of the insurance entity—should be used. When the auditor has the requisite knowledge and experience, the auditor may serve as the loss reserve specialist. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

- a. The objectives and scope of the specialist's work
- b. The specialist's relationship to the client (see paragraphs .10 and .11)
- c. The methods or assumptions used
- d. A comparison of the methods or assumptions used with those used in the preceding period
- e. The appropriateness of using the specialist's work for the intended purpose⁵
- f. The form and content of the specialist's findings that will enable the auditor to make the evaluation described in paragraph .12

Relationship of the Specialist to the Client

.10 The auditor should evaluate the relationship⁶ of the specialist to the client, including circumstances that might impair the specialist's objectivity. Such circumstances include situations in which the client has the ability—through employment, ownership, contractual right, family relationship, or otherwise—to directly or indirectly control or significantly influence the specialist.

.11 When a specialist does not have a relationship with the client, the specialist's work usually will provide the auditor with greater assurance of reliability. However, the work of a specialist who has a relationship with the client may be acceptable under certain circumstances. If the specialist has a relationship with the client, the auditor should assess the risk that the specialist's objectivity might be impaired. If the auditor believes the relationship might impair the specialist's objectivity, the auditor should perform additional procedures with respect to some or all of the specialist's assumptions, methods, or findings to determine that the findings are not unreasonable or should engage another specialist for that purpose.

Using the Findings of the Specialist

.12 The appropriateness and reasonableness of methods and assumptions used and their application are the responsibility of the specialist. The auditor should (a) obtain an understanding of the methods and assumptions used by the specialist, (b) make appropriate tests of data provided to the specialist, taking into account the auditor's assessment of control risk, and (c) evaluate whether the specialist's findings support the related assertions in the financial statements. Ordinarily, the auditor would use the work of the specialist unless the auditor's procedures lead him or her to believe the findings are unreasonable in the circumstances. If the auditor believes the findings are unreasonable, he or she should apply additional procedures, which may include obtaining the opinion of another specialist.

Effect of the Specialist's Work on the Auditor's Report

.13 If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude

⁵ In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements.

⁶ The term *relationship* includes, but is not limited to, those situations discussed in section 334, *Related Parties*, footnote 1.

that sufficient appropriate audit evidence has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate audit evidence as to an assertion of material significance in the financial statements constitutes a scope limitation. (See section 508, *Reports on Audited Financial Statements*, paragraphs .22 and .23.) [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.14 The auditor may conclude after performing additional procedures, including possibly obtaining the opinion of another specialist, that the assertions in the financial statements are not in conformity with GAAP. In that event, the auditor should express a qualified or adverse opinion. (See section 508.35, .36, and .41.)

Reference to the Specialist in the Auditor's Report

.15 Except as discussed in paragraph .16, the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.

.16 The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to his or her standard report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.

Effective Date

.17 This section is effective for audits of periods ending on or after December 15, 1994. Early application of the provisions of this section is encouraged.

AU Section 9336

Using the Work of a Specialist: Auditing Interpretations of Section 336

1. The Use of Legal Interpretations As Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of FASB ASC 860-10-40

.01 Introduction—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 860,^[1] *Transfers and Servicing*, requires that a transferor of financial assets must surrender control over the financial assets to account for the transfer as a sale. FASB ASC 860-10-40-5(a) states one of several conditions that must be met to provide evidence of surrender of control:

The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

Paragraphs 8–10 of FASB ASC 860-10-40 describe in greater detail the evidence required to support management's assertion that transferred financial assets have been isolated:

Derecognition of transferred assets is appropriate only if the available evidence provides reasonable assurance that the transferred assets would be beyond the reach of the powers of a bankruptcy trustee or other receiver for the transferor or any *consolidated affiliate of the transferor*² that is not a special-purpose corporation or other entity designed to make remote the possibility that it would enter bankruptcy or other receivership (see FASB ASC 860-10-55-23[c]). The nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. FASB ASC 860 does not provide guidance as to the type and amount of evidence that must be obtained to conclude that transferred financial assets have been isolated from the transferor. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law.

^[1] [Footnote deleted, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

² The Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary defines *consolidated affiliate of the transferor* as "an entity whose assets and liabilities are included with those of the transferor in the consolidated, combined, or other financial statements being presented". [Footnote added, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

A determination about whether the isolation criterion has been met to support a conclusion regarding surrender of control is largely a matter of law. This aspect of surrender of control, therefore, is assessed primarily from a legal perspective.

.02 *Effective Date and Applicability*—This interpretation is effective for auditing procedures related to transfers of financial assets that are required to be accounted for under FASB ASC 860.^[3]

.03 *Question*—What should the auditor consider in determining whether to use the work of a legal specialist⁴ to obtain persuasive evidence to support management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a)?

.04 *Interpretation*—Section 336, *Using the Work of a Specialist*, paragraph .06 states that "during the audit . . . an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate audit evidence."

.05 Use of a legal specialist may not be necessary to obtain appropriate audit evidence to support management's assertion that the isolation criterion is met in certain situations, such as when there is a routine transfer of financial assets that does not result in any continuing involvement by the transferor.⁵

.06 Many transfers of financial assets involve complex legal structures, continuing involvement by the transferor, or other legal issues that, in the auditor's judgment, make it difficult to determine whether the isolation criterion is met. In these situations, use of a legal specialist usually is necessary. A legal specialist formulating an opinion as to whether a transfer isolates the transferred assets beyond the reach of the transferor and its creditors may consider, among other things, the structure of the transaction taken as a whole, the nature of any continuing involvement, the type of insolvency or other receivership proceedings to which the transferor might become subject, and other factors pertinent under applicable law.

.07 If a legal opinion is used as evidence to support the accounting conclusion related to multiple transfers under a single structure, and such transfers occur over an extended period of time under that structure, the auditor should evaluate the need for management to obtain periodic updates of that opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may change the applicability of the previous opinion to such transfers. The auditor also should evaluate the need for management to obtain periodic updates of an opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may affect the conclusions reached in the previous opinion in the case of other transfers (see FASB ASC 860-10-40-41 and FASB ASC 860-20-25).

^[3] [Footnote deleted and renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁴ Client's internal or external attorney who is knowledgeable about relevant sections of the U.S. Bankruptcy Code and other federal, state, or foreign laws, as applicable. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁵ FASB ASC 860-10-55-28 characterizes no continuing involvement with the transferred assets as "no servicing responsibilities, no participation in future cash flows, no recourse obligations other than standard representations and warranties that the financial assets transferred met the delivery requirements under the arrangement, no further involvement of any kind. The transferee is significantly limited in its ability to pledge or exchange the transferred assets."

If a contractual provision (such as a call or removal of accounts provision) gives the transferor the unilateral ability to require the return of specific financial assets, the auditor should consider the effect of FASB ASC 860-10-40-5(c). [Footnote revised and renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.08 If management's assertion with respect to a new transaction is that the transaction structure is the same as a prior structure for which a legal opinion that complies with this interpretation was used as evidence to support an assertion that the transfer of assets met the isolation criterion, the auditor should evaluate the need for management to obtain an update of that opinion to confirm that there have been no changes in relevant law, applicable regulations, or in the pertinent facts of the transaction that may affect the applicability of the previous opinion to the new transaction.

.09 Question—If the auditor determines that the use of a legal specialist is required, what should he or she consider in assessing the adequacy of the legal opinion?

.10 Interpretation—In assessing the adequacy of the legal opinion, the auditor should consider whether the legal specialist has experience with relevant matters, including knowledge of the U.S. Bankruptcy Code, and other federal, state, or foreign law, as applicable, as well as knowledge of the transaction upon which management's assertion is based. For transactions that may be affected by provisions of the Federal Deposit Insurance Act, the auditor should consider whether the legal specialist has experience with the rights and powers of receivers, conservators, and liquidating agents under that act. The auditor should obtain an understanding of the assumptions that are used by the legal specialist, and make appropriate tests of any information that management provides to the legal specialist and upon which the specialist indicates it relied. For example, testing management's information underlying a legal specialist's assumption regarding the adequacy of consideration received may depend on the nature of the transaction and the relationship of the parties. When the legal specialist's opinion has assumed the adequacy of consideration for transfers from a particular legal entity to its wholly owned subsidiary, changes in the subsidiary's capital accounts plus other consideration generally would be sufficient audit evidence as to the adequacy of consideration. In the case of other transfers, such as those that are not to a wholly owned subsidiary of a particular legal entity that is the transferor, obtaining additional audit evidence may be necessary to evaluate management's assertion with regard to the adequacy of consideration upon which the legal specialist relied, because changes in the transferee's capital accounts do not solely benefit the transferring entity.

.11 The auditor also should consider the form and content of the documentation that the legal specialist provides and evaluate whether the legal specialist's findings support management's assertions with respect to the isolation criterion. Section 336 paragraph .13 states that "if the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate audit evidence has been obtained." FASB ASC 860's requirement regarding reasonable assurance that the transferred assets would be isolated provides the basis for what auditors should consider in evaluating the work of a legal specialist.

.12 Findings of a legal specialist that relate to the isolation of transferred financial assets are often in the form of a reasoned legal opinion that is restricted to particular facts and circumstances relevant to the specific transaction. The reasoning of such opinion may rely upon analogy to legal precedents that may not involve facts and circumstances that are comparable to that specific transaction. The auditor also should consider the effect of any limitations or disclaimers of opinion in assessing the adequacy of any legal opinion.

.13 An example of the conclusions in a legal opinion for an entity that is subject to the U.S. Bankruptcy Code that provides persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the

transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in bankruptcy or other receivership, follows:

We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become a Debtor, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of the Seller's estate for purposes of [the relevant sections] of the U.S. Bankruptcy Code.

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist. For example, if a so-called "two-step" structure has been used to achieve isolation, this paragraph usually will be required with respect to the transferee in the first step of such structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

"Based upon the assumptions of fact and the discussion set forth previously, and on a reasoned analysis of analogous case law, *we are of the opinion that in a properly presented and argued case, as a legal matter, in a proceeding under the U.S. Bankruptcy Code,*⁶ in which the Seller is a Debtor, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller in a case involving the insolvency of the Seller under the doctrine of substantive consolidation."

In the case of a transferor that is not entitled to become a debtor under the U.S. Bankruptcy Code, a legal opinion regarding whether the isolation criterion is met would consider whether isolation is satisfactorily achieved under the insolvency or receivership laws that apply to the transferor.

.14 Following are two examples of the conclusions in a legal opinion for an entity that is subject to receivership or conservatorship under provisions of the Federal Deposit Insurance Act. The conclusions in these two examples provide persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in conservatorship or receivership. Insolvency and receivership laws applicable to depository institutions, and how those laws affect the legal isolation criterion, differ depending upon the nature of the depository institution and its chartering authority. Accordingly, legal opinions addressing the legal isolation criterion may be formulated in different ways to accommodate those differences.⁷

⁶ For an entity subject to additional regulation (for example, a broker-dealer subject to the Securities Investor Protection Act), the legal opinion also generally should address the effect of such regulation and the policies of the regulators implementing such regulations (for example, the Securities Investor Protection Corporation). [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁷ For an entity subject to conservatorship or liquidation under the National Credit Union Act, the examples and discussion in this paragraph would be modified to make appropriate references to "liquidation" and "liquidating agent" and additional information relating to rights and regulations of the National Credit Union Administration. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Example 1: "*We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become subject to receivership or conservatorship, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of, or subject to repudiation, reclamation, recovery, or recharacterization by, the receiver or conservator appointed with respect to the Seller.*"⁸

Example 2: "The Federal Deposit Insurance Corporation (FDIC) has issued a regulation, 'Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection with a Securitization or Participation,' 12 CFR section 360.6 (the Rule). Based on and subject to the discussion, assumptions, and qualifications herein, it is our opinion that:

- A. Following the appointment of the FDIC as the conservator or receiver for the Bank:
 - (i) The Rule will apply to the Transfers,
 - (ii) Under the Rule, the FDIC acting as conservator or receiver for the Bank could not, by exercise of its authority to disaffirm or repudiate contracts under 12 U.S.C. §1821(e), reclaim or recover the Transferred Assets from the Issuer or recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank,
 - (iii) Neither the FDIC (acting for itself as a creditor or as representative of the Bank or its shareholders or creditors) nor any creditor of the Bank would have the right, under any bankruptcy or insolvency law applicable in the conservatorship or receivership of the Bank, to avoid the Transfers, to recover the Transferred Assets, or to require the Transferred Assets to be turned over to the FDIC or such creditor, and
 - (iv) There is no other power exercisable by the FDIC as conservator or receiver for the Bank that would permit the FDIC as such conservator or receiver to reclaim or recover the Transferred Assets from the Issuer, or to recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank; provided, however, that we offer no opinion as to whether, in receivership, the FDIC or any creditor of the Bank may take any such actions if the Holders [*holders of beneficial interests in the transferred assets*] receive payment of the principal amount of the Interests and the interest earned thereon (at the contractual yield) through the date the Holders are so paid; and
- B. Prior to the appointment of the FDIC as conservator or receiver for the Bank, the Bank and its other creditors would not have the right to reclaim or recover the Transferred Assets from the Issuer, except by the exercise of a contractual provision [insert appropri-

⁸ When the opinion indicates that isolation is achieved without reference to a true sale, the opinion also should provide reasonable assurance that the transferred assets are beyond the reach of the transferor and its creditors other than the transferee to the same extent that is provided in example 2 paragraph B. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

ate citation] to require the transfer, or return, of the Transferred Assets that exists solely as a result of the contract between the Bank and the Issuer.⁹

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold or transferred (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist.¹⁰ For example, if a so-called two-step structure has been used to achieve isolation, the following paragraph usually will be required with respect to the transferee in the first step of the structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion:

Based upon the assumptions of fact and the discussion set forth previously, and on a reasoned analysis of analogous case law, *we are of the opinion that* in a properly presented and argued case, as a legal matter, in a receivership, conservatorship, or liquidation proceeding in respect of the Seller, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller.

Certain powers to repudiate contracts, recover, reclaim, or recharacterize transferred assets as property of a transferor that are exercisable by the FDIC under the Federal Deposit Insurance Act may, as of the date of the transfer, be limited by a regulation that may be repealed or amended only in respect of transfers occurring on or after the effective date of such repeal or amendment.¹¹ With respect to the powers of a receiver or conservator that may not be exercised under that regulation, it is acceptable for attorneys to rely upon the effectiveness of the limitation on such powers set forth in the applicable regulation, provided that the attorney states, based on reasonable assumptions, that: (a) the affected transfer of financial assets meets all qualification requirements of the regulation, and (b) the regulation had not, as of the date of the opinion, been amended, repealed, or held inapplicable by a court with jurisdiction with respect to such transfer. The opinion should separately address any powers of repudiation, recovery, reclamation, or recharacterization exercisable by a receiver or conservator notwithstanding that regulation (for example, rights, powers, or remedies regarding transfers specifically excluded from the regulation) in a manner that provides the same level of assurance as would be provided in the case of opinions that conform with requirements of paragraph .13, except that such opinion shall address powers arising under the Federal Deposit Insurance Act. The considerations in the immediately preceding three sentences are adequately addressed either by the example 1 opinion or the

⁹ See the second paragraph of footnote 5.

Paragraph B is not required if the opinion includes both a conclusion, as set forth in example 1, that the transfer constitutes a "true sale" and the conclusions set forth of example 2 paragraph A. It is not necessary to include any provision of Example 2 if the opinion is as set forth in example 1. [Footnote revised and renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹⁰ An additional substantive consolidation opinion is not required if the opinion states that its conclusion includes the inability to recover the transferred financial assets or recharacterize the transfer by application of the doctrine of "substantive consolidation." [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹¹ The applicable regulation is 12 U.S. Code of Federal Regulations 360.6, effective September 11, 2000. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

example 2 opinion described in this paragraph or by the variations described in the second paragraph of footnote 9 and in footnote 10.

.15 A legal letter that includes an inadequate opinion, inappropriate limitations, or a disclaimer of opinion, or that effectively limits the scope of the opinion to facts and circumstances that are not applicable to the transaction, does not provide persuasive evidence to support the entity's assertion that the transferred assets have been put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. Likewise, a legal letter that includes conclusions that are expressed using some of the following language would not provide persuasive evidence that a transfer of financial assets has met the isolation criterion of FASB ASC 860-10-40-5(a) (see paragraphs .20–.21 of this interpretation):

- "We are unable to express an opinion..."
- "It is our opinion, based upon limited facts..."
- "We are of the view..." or "it appears..."
- "There is a reasonable basis to conclude that..."
- "In our opinion, the transfer would *either* be a sale *or* a grant of a perfected security interest..."¹²
- "In our opinion, there is a reasonable possibility..."
- "In our opinion, the transfer *should* be considered a sale..."
- "It is our opinion that the company will be able to assert meritorious arguments..."
- "In our opinion, it is more likely than not ..."
- "In our opinion, the transfer would *presumptively* be..."
- "In our opinion, it is probable that..."

Furthermore, conclusions about hypothetical transactions may not be relevant to the transaction that is the subject of management's assertions. Section 326, *Audit Evidence*, paragraph .06 states "The auditor should consider the sufficiency and appropriateness of audit evidence to be obtained when assessing risks and designing further audit procedures." Additionally, conclusions about hypothetical transactions may not contemplate all of the facts and circumstances or the provisions in the agreements of the transaction that is the subject of management's assertions, and generally would not provide persuasive evidence.¹³

¹² Certain transferors are subject only to receivership (and not to proceedings under the U.S. Bankruptcy Code or the Federal Deposit Insurance Act) under laws that do not allow a receiver to reach assets in which a security interest has been granted. In such circumstances, an opinion that concludes that the transfer would either be a sale or a grant of a security interest that puts the transferred assets beyond the reach of such receiver and other creditors would provide persuasive evidence that the isolation criterion is met.

In certain circumstances, a legal specialist may provide an opinion on both steps of a two-step structure. Such language would be acceptable in an opinion for a transfer of assets in the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55 provided that the opinion on the transfer in the first step is consistent with paragraphs .13 or .14 of this interpretation. [Footnote revised and renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹³ For example, a memorandum of law from a legal specialist usually analyzes (and may make conclusions about) a transaction that may be completed subsequently. Such memorandum generally would not provide persuasive evidence unless the conclusions conform with this interpretation and a legal specialist opines that such conclusions apply to a completed transaction that is the subject of management's assertion. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Question—Are legal opinions that restrict the use of the opinion to the client, or to third parties other than the auditor, acceptable audit evidence?

.17 Interpretation—No. Footnote 5 to section 336 paragraph .09 states: "In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements." Given the importance of the legal opinion to the assertion in this case, and the precision that legal specialists use in drafting such opinions, an auditor should not use as evidence a legal opinion that he or she deems otherwise adequate if the letter restricts use of the findings expressed therein to the client or to third parties other than the auditor. In that event, the auditor should request that the client obtain the legal specialist's written permission for the auditor to use the opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a).

.18 An example of a letter from a legal specialist to a client that adequately communicates permission for the auditor to use the legal specialist's opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a) is as follows:

Notwithstanding any language to the contrary in our opinions of even date with respect to certain bankruptcy issues relating to the previously referenced transaction, you are authorized to make available to your auditors such opinions solely as audit evidence in support of their evaluation of management's assertion that the transfer of the receivables meets the isolation criterion of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40-5(a), provided a copy of this letter is furnished to them in connection therewith. In authorizing you to make copies of such opinions available to your auditors for such purpose, we are not undertaking or assuming any duty or obligation to your auditors or establishing any lawyer-client relationship with them. Further, we do not undertake or assume any responsibility with respect to financial statements of you or your affiliates.¹⁴

.19 A letter from a legal specialist to a client might authorize the client to make copies of the legal opinion available to the auditor to use in his or her evaluation of management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a), but then state that the auditor is not authorized to rely thereon. Such "use but not rely on" language, or other language that similarly restricts the auditor's use of the legal specialist's opinion, does not adequately communicate permission for the auditor to use the legal specialist's opinion as audit evidence. The auditor may wish to consult with his or her legal counsel in circumstances where it is not clear that the auditor may use the legal specialist's opinion.

.20 Question—If the auditor determines that it is appropriate to use the work of a legal specialist, and either the resulting legal response does not provide persuasive evidence that a transfer of assets has met the isolation criterion, or the legal specialist does not grant permission for the auditor to use a legal opinion that is restricted to the client or to third parties other than the auditor, what other steps might an auditor consider?

.21 Interpretation—When other relevant audit evidence exists, the auditor should consider it before reaching a conclusion about the appropriateness of

¹⁴ This language may appear in the legal specialist's opinion rather than in a separate letter. In that case, the wording would be modified slightly to indicate the context. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

management's accounting for a transfer.¹⁵ However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with section 508, *Reports on Audited Financial Statements*, paragraphs .35–.60. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with section 508 paragraphs .22–.26 and .61–.63.

AU Section 337

Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments¹

Source: SAS No. 12.

See section 9337 for interpretations of this section.

Issue date, unless otherwise indicated: January, 1976.

.01 This section provides guidance on the procedures an independent auditor should consider for identifying litigation, claims, and assessments and for satisfying himself as to the financial accounting and reporting for such matters when he is performing an audit in accordance with generally accepted auditing standards.

Accounting Considerations

.02 Management is responsible for adopting policies and procedures to identify, evaluate, and account for litigation, claims, and assessments as a basis for the preparation of financial statements in conformity with generally accepted accounting principles.

.03 The standards of financial accounting and reporting for loss contingencies, including those arising from litigation, claims, and assessments, are set forth in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]²

Auditing Considerations

.04 With respect to litigation, claims, and assessments, the independent auditor should obtain audit evidence relevant to the following factors:

- a. The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments.
- b. The period in which the underlying cause for legal action occurred.
- c. The degree of probability of an unfavorable outcome.
- d. The amount or range of potential loss.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

¹ This section supersedes the commentary, "Lawyers' Letters," January 1974 (section 1001), and auditing interpretations of section 560 paragraph .12 on lawyers' letters, January 1975 (section 9560 paragraphs .01-.26). It amends section 560 paragraph .12d to read as follows: "Inquire of client's legal counsel concerning litigation, claims, and assessments (see section 337)."

² Pertinent portions are reprinted in exhibit I (section 337B). Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*, also describes the standards of financial accounting and reporting for gain contingencies. The auditor's procedures with respect to gain contingencies are parallel to those described in this SAS for loss contingencies. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Audit Procedures

.05 Since the events or conditions that should be considered in the financial accounting for and reporting of litigation, claims, and assessments are matters within the direct knowledge and, often, control of management of an entity, management is the primary source of information about such matters. Accordingly, the independent auditor's procedures with respect to litigation, claims, and assessments should include the following:

- a. Inquire of and discuss with management the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments.
- b. Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the date of the balance sheet being reported on, and during the period from the balance sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel, and obtain assurances from management, ordinarily in writing, that they have disclosed all such matters required to be disclosed by FASB ASC 450.
- c. Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.
- d. Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with FASB ASC 450. Also the auditor, with the client's permission, should inform the lawyer that the client has given the auditor this assurance. This client representation may be communicated by the client in the inquiry letter or by the auditor in a separate letter.³

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 An auditor ordinarily does not possess legal skills and, therefore, cannot make legal judgments concerning information coming to his attention. Accordingly, the auditor should request the client's management to send a letter of inquiry to those lawyers with whom management consulted concerning litigation, claims, and assessments.

.07 The audit normally includes certain other procedures undertaken for different purposes that might also disclose litigation, claims, and assessments. Examples of such procedures are as follows:

- a. Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited.
- b. Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents.

³ An example of a separate letter is as follows: We are writing to inform you that (name of company) has represented to us that (except as set forth below and excluding any such matters listed in the letter of audit inquiry) there are no unasserted possible claims that you have advised are probable of assertion and must be disclosed in accordance with FASB ASC 450 in its financial statements at (balance sheet date) and for the (period) then ended. (List unasserted possible claims, if any.) Such a letter should be signed and sent by the auditor. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

- c. Obtaining information concerning guarantees from bank confirmation forms.
- d. Inspecting other documents for possible guarantees by the client.

Inquiry of a Client's Lawyer⁴

.08 A letter of audit inquiry to the client's lawyer is the auditor's primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.⁵ Audit evidence obtained from the client's inside general counsel or legal department may provide the auditor with the necessary corroboration. However, audit evidence obtained from inside counsel is not a substitute for information outside counsel refuses to furnish. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.09 The matters that should be covered in a letter of audit inquiry include, but are not limited to, the following:

- a. Identification of the company, including subsidiaries, and the date of the audit.
- b. A list prepared by management (or a request by management that the lawyer prepare a list) that describes and evaluates pending or threatened litigation, claims, and assessments with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- c. A list prepared by management that describes and evaluates unasserted claims and assessments that management considers to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome, with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- d. As to each matter listed in item *b*, a request that the lawyer either furnish the following information or comment on those matters as to which his views may differ from those stated by management, as appropriate:
 - (1) A description of the nature of the matter, the progress of the case to date, and the action the company intends to take (for example, to contest the matter vigorously or to seek an out-of-court settlement).
 - (2) An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.
 - (3) With respect to a list prepared by management, an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

⁴ An illustrative inquiry letter to legal counsel is contained in the appendix (section 337A).

⁵ It is not intended that the lawyer be requested to undertake a reconsideration of all matters upon which he was consulted during the period under audit for the purpose of determining whether he can form a conclusion regarding the probability of assertion of any possible claim inherent in any of the matters so considered.

- e. As to each matter listed in item *c*, a request that the lawyer comment on those matters as to which his views concerning the description or evaluation of the matter may differ from those stated by management.
- f. A statement by the client that the client understands that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client should disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements of FASB ASC 450.
- g. A request that the lawyer confirm whether the understanding described in item *f* is correct.
- h. A request that the lawyer specifically identify the nature of and reasons for any limitation on his response.

Inquiry need not be made concerning matters that are not considered material, provided the client and the auditor have reached an understanding on the limits of materiality for this purpose. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 In special circumstances, the auditor may obtain a response concerning matters covered by the audit inquiry letter in a conference, which offers an opportunity for a more detailed discussion and explanation than a written reply. A conference may be appropriate when the evaluation of the need for accounting for or disclosure of litigation, claims, and assessments involves such matters as the evaluation of the effect of legal advice concerning unsettled points of law, the effect of uncorroborated information, or other complex judgments. The auditor should appropriately document conclusions reached concerning the need for accounting for or disclosure of litigation, claims, and assessments.

.11 In some circumstances, a lawyer may be required by his Code of Professional Responsibility to resign his engagement if his advice concerning financial accounting and reporting for litigation, claims, and assessments is disregarded by the client. When the auditor is aware that a client has changed lawyers or that a lawyer engaged by the client has resigned, the auditor should consider the need for inquiries concerning the reasons the lawyer is no longer associated with the client.

Limitations on the Scope of a Lawyer's Response⁶

.12 A lawyer may appropriately limit his response to matters to which he has given substantive attention in the form of legal consultation or representation. Also, a lawyer's response may be limited to matters that are considered

⁶ The American Bar Association has approved a "Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," which explains the concerns of lawyers and the nature of the limitations an auditor is likely to encounter. That Statement of Policy is reprinted as exhibit II (section 337C) for the convenience of readers, but is not an integral part of this Statement.

individually or collectively material to the financial statements, provided the lawyer and auditor have reached an understanding on the limits of materiality for this purpose. Such limitations are not limitations on the scope of the audit.

.13 A lawyer's refusal to furnish the information requested in an inquiry letter either in writing or orally (see paragraphs .09 and .10) would be a limitation on the scope of the audit sufficient to preclude an unqualified opinion (see section 508 paragraph .22 and .23).⁷ A lawyer's response to such an inquiry and the procedures set forth in paragraph .05 provide the auditor with sufficient audit evidence to satisfy himself concerning the accounting for and reporting of pending and threatened litigation, claims and assessments. The auditor obtains sufficient audit evidence to satisfy himself concerning reporting for those unasserted claims and assessments required to be disclosed in financial statements from the foregoing procedures and the lawyer's specific acknowledgement of his responsibility to his client in respect of disclosure obligations (see paragraph .09g). This approach with respect to unasserted claims and assessments is necessitated by the public interest in protecting the confidentiality of lawyer-client communications. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Other Limitations on a Lawyer's Response

.14 A lawyer may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss, because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome may sometimes not be within a lawyer's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available; and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, a lawyer may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor ordinarily will conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event which is not susceptible of reasonable estimation, and should look to the guidance in section 508 paragraphs .45–.49 to determine the effect, if any, of the lawyer's response on the auditor's report. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 79.]

⁷ A refusal to respond should be distinguished from an inability to form a conclusion with respect to certain matters of judgment (see paragraph .14). Also, lawyers outside the United States sometimes follow practices at variance with those contemplated by this section to the extent that different procedures from those outlined herein may be necessary. In such circumstances, the auditor should exercise judgment in determining whether alternative procedures are adequate to comply with the requirements of this section.

AU Section 337A

Appendix — Illustrative Audit Inquiry Letter to Legal Counsel

Source: SAS No. 12.

Issue date, unless otherwise indicated: January, 1976.

.01 In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

Pending or Threatened Litigation (excluding unasserted claims)

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

Unasserted Claims and Assessments (considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)

[Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning

the question of such disclosure and the applicable requirements of Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

AU Section 337B

Exhibit I—Excerpts From Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies

Source: SAS No. 12.

March, 1975.

The following excerpts are reprinted with the permission of the Financial Accounting Standards Board (FASB).

Overall

Overview and Background

General

450-10-05-4. The Contingencies Topic establishes standards of financial accounting and reporting for loss contingencies and gain contingencies, including standards for disclosures.

450-10-05-5. Resolution of the uncertainty may confirm any of the following:

- a. The acquisition of an asset
- b. The reduction of a liability
- c. The loss or impairment of an asset
- d. The incurrence of a liability.

450-10-05-6. Not all uncertainties inherent in the accounting process give rise to contingencies.¹ Estimates are required in financial statements for many ongoing and recurring activities of an entity. The mere fact that an estimate is involved does not of itself constitute the type of uncertainty referred to in the definition of a *loss contingency*² or a *gain contingency*.³ Several examples of situations that are not contingencies are included in Section 450-10-55.

¹ According to the Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary, a *contingency* is "an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss (loss contingency) to an entity that will ultimately be resolved when one or more future events occur or fail to occur."

² According to the FASB ASC glossary, a *gain contingency* is "an existing condition, situation, or set of circumstances involving uncertainty as to possible gain to an entity that will ultimately be resolved when one or more future events occur or fail to occur."

³ According to the FASB ASC glossary, a *loss contingency* is "an existing condition, situation, or set of circumstances involving uncertainty as to possible loss to an entity that will ultimately be resolved when one or more future events occur or fail to occur. The term loss is used for convenience to include many charges against income that are commonly referred to as expenses and others that are commonly referred to as losses."

General

General Rule

450-20-25-1. When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from *probable*⁴ to *remote*.⁵ As indicated in the definition of contingency the term *loss* is used for convenience to include many charges against income that are commonly referred to as expenses and others that are commonly referred to as losses. The Contingencies Topic uses the terms *probable*, *reasonably possible*,⁶ and *remote* to identify three areas within that range.

450-20-25-2. An estimated loss from a loss contingency shall be accrued by a charge to income if both of the following conditions are met:

- a. Information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements. Date of the financial statements means the end of the most recent accounting period for which financial statements are being presented. It is implicit in this condition that it must be probable that one or more future events will occur confirming the fact of the loss.
- b. The amount of loss can be reasonably estimated.

The purpose of those conditions is to require accrual of losses when they are reasonably estimable and relate to the current or a prior period. Paragraphs 450-20-55-1 through 55-17 and Examples 1–2 (see paragraphs 450-20-55-18 through 55-35) illustrate the application of the conditions. As discussed in paragraph 450-20-50-5, disclosure is preferable to accrual when a reasonable estimate of loss cannot be made. Further, even losses that are reasonably estimable shall not be accrued if it is not probable that an asset has been impaired or a liability has been incurred at the date of an entity's financial statements because those losses relate to a future period rather than the current or a prior period. Attribution of a loss to events or activities of the current or prior periods is an element of asset impairment or liability incurrence.

Disclosure

General

Accruals for Loss Contingencies

450-20-50-1. Disclosure of the nature of an accrual made pursuant to the provisions of paragraph 450-20-25-2, and in some circumstances the amount accrued, may be necessary for the financial statements not to be misleading. Terminology used shall be descriptive of the nature of the accrual, such as estimated liability or liability of an estimated amount. The term *reserve* shall not be used for an accrual made pursuant to paragraph 450-20-25-2; that term is limited to

⁴ According to the FASB ASC glossary, *probable* is "the future event or events are likely to occur."

⁵ According to the FASB ASC glossary, *remote* is "the chance of the future event or events occurring is slight."

⁶ According to the FASB ASC glossary, *reasonably possible* is "the chance of the future event or events occurring is more than remote but less than likely."

an amount of unidentified or unsegregated assets held or retained for a specific purpose. Examples 1 (see paragraph 450-20-55-18) and 2, Cases A, B, and D (see paragraphs 450-20-55-23, 450-20-55-27, and 450-20-55-32) illustrate the application of these disclosure standards.

450-20-50-2. If the criteria in paragraph 275-10-50-8 are met, paragraph 275-10-50-9 requires disclosure of an indication that it is at least reasonably possible that a change in an entity's estimate of its probable liability could occur in the near term. Example 3 (see paragraph 450-20-55-36) illustrates this disclosure for an entity involved in litigation.

Unrecognized Contingencies

450-20-50-3. Disclosure of the contingency shall be made if there is at least a reasonable possibility that a loss or an additional loss may have been incurred and either of the following conditions exists:

- a. An accrual is not made for a loss contingency because any of the conditions in paragraph 450-20-25-2 are not met.
- b. An exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 450-20-30-1.

Examples 1–3 (see paragraphs 450-20-55-18 through 55-37) illustrate the application of these disclosure standards.

450-20-50-4. The disclosure in the preceding paragraph shall include both of the following:

- a. The nature of the contingency
- b. An estimate of the possible loss or range of loss or a statement that such an estimate cannot be made.

450-20-50-5. Disclosure is preferable to accrual when a reasonable estimate of loss cannot be made. For example, disclosure shall be made of any loss contingency that meets the condition in paragraph 450-20-25-2(a) but that is not accrued because the amount of loss cannot be reasonably estimated (the condition in paragraph 450-20-25-2(b)). Disclosure also shall be made of some loss contingencies that do not meet the condition in paragraph 450-20-25-2(a)—namely, those contingencies for which there is a reasonable possibility that a loss may have been incurred even though information may not indicate that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements.

450-20-50-6. Disclosure is not required of a loss contingency involving an unasserted claim or assessment if there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment unless both of the following conditions are met:

- a. It is considered probable that a claim will be asserted.
- b. There is a reasonable possibility that the outcome will be unfavorable.

450-20-50-7. Disclosure of noninsured or underinsured risks is not required by this Subtopic. However, disclosure in appropriate circumstances is not discouraged.

450-20-50-8. No disclosure about general or unspecified business risks is required by this Subtopic, however, Topic 275 requires disclosure of certain business risks.

Losses Arising After the Date of the Financial Statements

450-20-50-9. Disclosure of a loss, or a loss contingency, arising after the date of an entity's financial statements but before those financial statements are

issued, as described in paragraphs 450-20-25-6 through 25-7, may be necessary to keep the financial statements from being misleading if an accrual is not required. If disclosure is deemed necessary, the financial statements shall include both of the following:

- a. The nature of the loss or loss contingency
- b. An estimate of the amount or range of loss or possible loss or a statement that such an estimate cannot be made.

450-20-50-10. Occasionally, in the case of a loss arising after the date of the financial statements if the amount of asset impairment or liability incurrence can be reasonably estimated, disclosure may best be made by supplementing the historical financial statements with pro forma financial data giving effect to the loss as if it had occurred at the date of the financial statements. It may be desirable to present pro forma statements, usually a balance sheet only, in columnar form on the face of the historical financial statements.

Implementation Guidance and Illustrations

General

Implementation Guidance

Litigation, Claims, and Assessments

450-20-55-10. The following factors should be considered in determining whether accrual and/or disclosure is required with respect to pending or threatened litigation and actual or possible claims and assessments:

- a. The period in which the underlying cause (that is, the cause for action) of the pending or threatened litigation or of the actual or possible claim or assessment occurred
- b. The degree of probability of an unfavorable outcome
- c. The ability to make a reasonable estimate of the amount of loss.

Examples 1 through 2 (see paragraphs 450-20-55-18 through 55-35) illustrate the consideration of these factors in determining whether to accrue or disclose litigation.

Losses Arising Before the Date of the Financial Statements

450-20-55-11. Accrual may be appropriate for litigation, claims, or assessments whose underlying cause is an event occurring on or before the date of an entity's financial statements even if the entity does not become aware of the existence or possibility of the lawsuit, claim, or assessment until after the date of the financial statements. If those financial statements have not been issued, accrual of a loss related to the litigation, claim, or assessment would be required if the probability of loss is such that the condition in paragraph 450-20-25-2(a) is met and the amount of loss can be reasonably estimated.

Assessing Probability of the Incurrence of a Loss

450-20-55-12. If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an entity's financial statements, the probability of an outcome unfavorable to the entity must be assessed to determine whether the condition in paragraph 450-20-25-2(a) is met. Among the factors that should be considered are the following:

- a. The nature of the litigation, claim, or assessment
- b. The progress of the case (including progress after the date of the financial statements but before those statements are issued)

- c. The opinions or views of legal counsel and other advisers, although, the fact that legal counsel is unable to express an opinion that the outcome will be favorable to the entity should not necessarily be interpreted to mean that the condition in paragraph 450-20-25-2(a) is met
- d. The experience of the entity in similar cases
- e. The experience of other entities
- f. Any decision of the entity's management as to how the entity intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement).

450-20-55-13. The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition in paragraph 450-20-25-2(a) would be met if an unfavorable outcome is determined to be probable. Accrual would be inappropriate, but disclosure would be required, if an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated.

450-20-55-14. With respect to unasserted claims and assessments, an entity must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 450-20-25-2. For example:

- a. A catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable.
- b. An investigation of an entity by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case.
- c. An entity may believe there is a possibility that it has infringed on another entity's patent rights, but the entity owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable.

450-20-55-15. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. The disclosures described in paragraphs 450-20-50-3 through 50-8 would be required in either of the following circumstances:

- a. An unfavorable outcome is probable but the amount of loss cannot be reasonably estimated.
- b. An unfavorable outcome is reasonably possible but not probable.

Assessing Whether a Loss is Reasonably Estimable

450-20-55-16. As a condition for accrual of a loss contingency, the condition in paragraph 450-20-25-2(b) requires that the amount of loss can be reasonably estimated. In some cases, it may be determined that a loss was incurred because an unfavorable outcome of the litigation, claim, or assessment is probable (thus satisfying the condition in paragraph 450-20-25-2(a)), but the range of possible loss is wide. Examples 1 and 3 (see paragraphs 450-20-55-18 and 450-20-55-36)

illustrate the application of the standards in this Subtopic when the range of possible loss is wide.

Losses Arising After the Date of the Financial Statements

450-20-55-17. As a condition for accrual of a loss contingency, the condition in paragraph 450-20-25-2(a) requires that information available prior to the issuance of financial statements indicate that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements. Accordingly, accrual would clearly be inappropriate for litigation, claims, or assessments whose underlying cause is an event or condition occurring after the date of financial statements but before those financial statements are issued. For example, an entity would not accrue a suit for damages alleged to have been suffered as a result of an accident that occurred after the date of the financial statements. However, disclosure may be required by paragraphs 450-20-50-9 through 50-10.

Illustrations

Example 1: Litigation Open to Considerable Interpretation

450-20-55-18. An entity may be litigating a dispute with another party. In preparation for the trial, it may determine that, based on recent developments involving one aspect of the litigation, it is probable that it will have to pay \$2 million to settle the litigation. Another aspect of the litigation may, however, be open to considerable interpretation, and depending on the interpretation by the court the entity may have to pay an additional \$8 million over and above the \$2 million.

450-20-55-19. In that case, paragraph 450-20-25-2 requires accrual of the \$2 million if that is considered a reasonable estimate of the loss.

450-20-55-20. Paragraphs 450-20-50-1 through 50-2 require disclosure of the nature of the accrual, and depending on the circumstances, may require disclosure of the \$2 million that was accrued.

450-20-55-21. Paragraphs 450-20-50-3 through 50-8 require disclosure of the additional exposure to loss if there is a reasonable possibility that the additional amounts will be paid.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Exhibit II—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information

Note: This document, in the form herein set forth, was approved by the Board of Governors of the American Bar Association in December 1975, which official action permitted its release to lawyers and accountants as the standard recommended by the American Bar Association for the lawyer's response to letters of audit inquiry.

Source: SAS No. 12.

Preamble

The public interest in protecting the confidentiality of lawyer-client communications is fundamental. The American legal, political and economic systems depend heavily upon voluntary compliance with the law and upon ready access to a respected body of professionals able to interpret and advise on the law. The expanding complexity of our laws and governmental regulations increases the need for prompt, specific and unhampered lawyer-client communication. The benefits of such communication and early consultation underlie the strict statutory and ethical obligations of the lawyer to preserve the confidences and secrets of the client, as well as the long-recognized testimonial privilege for lawyer-client communication.

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards

and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and encouraging its readiness to seek advice of counsel and to act in accordance with counsel's advice.

Consistent with the foregoing public policy considerations, it is believed appropriate to distinguish between, on the one hand, litigation which is pending or which a third party has manifested to the client a present intention to commence and, on the other hand, other contingencies of a legal nature or having legal aspects. As regards the former category, unquestionably the lawyer representing the client in a litigation matter may be the best source for a description of the claim or claims asserted, the client's position (e.g., denial, contest, etc.), and the client's possible exposure in the litigation (to the extent the lawyer is in a position to do so). As to the latter category, it is submitted that, for the reasons set forth above, it is not in the public interest for the lawyer to be required to respond to general inquiries from auditors concerning possible claims.

It is recognized that the disclosure requirements for enterprises subject to the reporting requirements of the Federal securities laws are a major concern of managements and counsel, as well as auditors. It is submitted that compliance therewith is best assured when clients are afforded maximum encouragement, by protecting lawyer-client confidentiality, freely to consult counsel. Likewise, lawyers must be keenly conscious of the importance of their clients being competently advised in these matters.

Statement of Policy

NOW, THEREFORE, BE IT RESOLVED that it is desirable and in the public interest that this Association adopt the following Statement of Policy regarding the appropriate scope of the lawyer's response to the auditor's request, made by the client at the request of the auditor, for information concerning matters referred to the lawyer during the course of his representation of the client:

(1) *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5,^{*} promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying Commentary), to the extent hereinafter set forth, subject to the following:

- a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.

^{*} In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification*TM (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission. As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

- b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.
- c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.
- d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

(2) *Limitation on Scope of Response.* It is appropriate for the lawyer to set forth in his response, by way of limitation, the scope of his engagement by the client. It is also appropriate for the lawyer to indicate the date as of which information is furnished and to disclaim any undertaking to advise the auditor of changes which may thereafter be brought to the lawyer's attention. *Unless the lawyer's response indicates otherwise, (a) it is properly limited to matters which have been given substantive attention by the lawyer in the form of legal consultation and, where appropriate, legal representation since the beginning of the period or periods being reported upon, and (b) if a law firm or a law department, the auditor may assume that the firm or department has endeavored, to the extent believed necessary by the firm or department, to determine from lawyers currently in the firm or department who have performed services for the client since the beginning of the fiscal period under audit whether such services involved substantive attention in the form of legal consultation concerning those loss contingencies referred to in Paragraph 5(a) below but, beyond that, no review has been made of any of the client's transactions or other matters for the purpose of identifying loss contingencies to be described in the response.*[†]

(3) *Response may be Limited to Material Items.* In response to an auditor's request for disclosure of loss contingencies of a client, it is appropriate for the lawyer's response to indicate that the response is limited to items which are considered individually or collectively material to the presentation of the client's financial statements.

(4) *Limited Responses.* Where the lawyer is limiting his response in accordance with the Statement of Policy, his response should so indicate (see Paragraph 8). If in any other respect the lawyer is not undertaking to respond to or comment on particular aspects of the inquiry when responding to the auditor, he should consider advising the auditor that his response is limited, in order to avoid any inference that the lawyer has responded to all aspects; otherwise, he may be assuming a responsibility which he does not intend.

(5) *Loss Contingencies.* When properly requested by the client, it is appropriate for the lawyer to furnish to the auditor information concerning the following matters if the lawyer has been engaged by the client to represent or advise the client professionally with respect thereto and he has devoted substantive attention to them in the form of legal representation or consultation:

- a. *overtly threatened or pending litigation*, whether or not specified by the client;

[†] As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

- b. *a contractually assumed obligation* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor;
- c. *an unasserted possible claim or assessment* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor.

With respect to clause (a), overtly threatened litigation means that a potential claimant has manifested to the client an awareness of and present intention to assert a possible claim or assessment unless the likelihood of litigation (or of settlement when litigation would normally be avoided) is considered remote. With respect to clause (c), where there has been no manifestation by a potential claimant of an awareness of and present intention to assert a possible claim or assessment, consistent with the considerations and concerns outlined in the Preamble and Paragraph 1 hereof, the client should request the lawyer to furnish information to the auditor only if the client has determined that it is probable that a possible claim will be asserted, that there is a reasonable possibility that the outcome (assuming such assertion) will be unfavorable, and that the resulting liability would be material to the financial condition of the client. Examples of such situations might (depending in each case upon the particular circumstances) include the following: (i) a catastrophe, accident or other similar physical occurrence in which the client's involvement is open and notorious, or (ii) an investigation by a government agency where enforcement proceedings have been instituted or where the likelihood that they will not be instituted is remote, under circumstances where assertion of one or more private claims for redress would normally be expected, or (iii) a public disclosure by the client acknowledging (and thus focusing attention upon) the existence of one or more probable claims arising out of an event or circumstance. In assessing whether or not the assertion of a possible claim is probable, it is expected that the client would normally employ, by reason of the inherent uncertainties involved and insufficiency of available data, concepts parallel to those used by the lawyer (discussed below) in assessing whether or not an unfavorable outcome is probable; thus, assertion of a possible claim would be considered probable only when the prospects of its being asserted seem reasonably certain (i.e., supported by extrinsic evidence strong enough to establish a presumption that it will happen) and the prospects of nonassertion seem slight.

It would not be appropriate, however, for the lawyer to be requested to furnish information in response to an inquiry letter or supplement thereto if it appears that (a) the client has been required to specify unasserted possible claims without regard to the standard suggested in the preceding paragraph, or (b) the client has been required to specify all or substantially all unasserted possible claims as to which legal advice may have been obtained, since, in either case, such a request would be in substance a general inquiry and would be inconsistent with the intent of this Statement of Policy.

The information that lawyers may properly give to the auditor concerning the foregoing matters would include (to the extent appropriate) an identification of the proceedings or matter, the stage of proceedings, the claim(s) asserted, and the position taken by the client.

In view of the inherent uncertainties, the lawyer should normally refrain from expressing judgments as to outcome except in those relatively few clear cases where it appears to the lawyer that an unfavorable outcome is either "probable" or "remote"; for purposes of any such judgment it is appropriate to use the following meanings:

- (i) *probable*—an unfavorable outcome for the client is probable if the prospects of the claimant not succeeding are judged to be extremely

doubtful and the prospects for success by the client in its defense are judged to be slight.

- (ii) *remote*—an unfavorable outcome is remote if the prospects for the client not succeeding in its defense are judged to be extremely doubtful and the prospects of success by the claimant are judged to be slight.

If, in the opinion of the lawyer, considerations within the province of his professional judgment bear on a particular loss contingency to the degree necessary to make an informed judgment, he may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is "probable" or "remote," applying the above meanings. No inference should be drawn, from the absence of such a judgment, that the client will not prevail.

The lawyer also may be asked to estimate, in dollar terms, the potential amount of loss or range of loss in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the amount or range of potential loss will normally be as inherently impossible to ascertain, with any degree of certainty, as the outcome of the litigation. Therefore, it is appropriate for the lawyer to provide an estimate of the amount or range of potential loss (if the outcome should be unfavorable) only if he believes that the probability of inaccuracy of the estimate of the amount or range of potential loss is slight.

The considerations bearing upon the difficulty in estimating loss (or range of loss) where pending litigation is concerned are obviously even more compelling in the case of unasserted possible claims. In most cases, the lawyer will not be able to provide any such estimate to the auditor.

As indicated in Paragraph 4 hereof, the auditor may assume that all loss contingencies specified by the client in the manner specified in clauses (b) and (c) above have received comment in the response, unless otherwise therein indicated. The lawyer should not be asked, nor need the lawyer undertake, to furnish information to the auditor concerning loss contingencies except as contemplated by this Paragraph 5.

(6) *Lawyer's Professional Responsibility.* Independent of the scope of his response to the auditor's request for information, the lawyer, depending upon the nature of the matters as to which he is engaged, may have as part of his professional responsibility to his client an obligation to advise the client concerning the need for or advisability of public disclosure of a wide range of events and circumstances. The lawyer has an obligation not knowingly to participate in any violation by the client of the disclosure requirements of the securities laws. In appropriate circumstances, the lawyer also may be required under the Code of Professional Responsibility to resign his engagement if his advice concerning disclosures is disregarded by the client. The auditor may properly assume that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment which may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client must disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements[‡] of FAS 5.

[‡] Under FAS 5, when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment, disclosure of an unasserted possible claim is required only if the enterprise concludes that (i) it is probable that a claim will be asserted, (ii) there is a reasonable possibility, if the claim is in fact asserted, that the outcome will be unfavorable, and (iii) the liability resulting from such unfavorable outcome would be material to its financial condition.

(7) *Limitation on Use of Response.* Unless otherwise stated in the lawyer's response, it shall be solely for the auditor's information in connection with his audit of the financial condition of the client and is not to be quoted in whole or in part or otherwise referred to in any financial statements of the client or related documents, nor is it to be filed with any governmental agency or other person, without the lawyer's prior written consent.[†] Notwithstanding such limitation, the response can properly be furnished to others in compliance with court process or when necessary in order to defend the auditor against a challenge of the audit by the client or a regulatory agency, provided that the lawyer is given written notice of the circumstances at least twenty days before the response is so to be furnished to others, or as long in advance as possible if the situation does not permit such period of notice.[†]

(8) *General.* This Statement of Policy, together with the accompanying Commentary (which is an integral part hereof), has been developed for the general guidance of the legal profession. In a particular case, the lawyer may elect to supplement or modify the approach hereby set forth. If desired, this Statement of Policy may be incorporated by reference in the lawyer's response by the following statement: "This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any 'loss contingencies' is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement)."

*The accompanying Commentary is an integral part
of this Statement of Policy.*

Commentary

Paragraph 1 (Client Consent to Response)

In responding to any aspect of an auditor's inquiry letter, the lawyer must be guided by his ethical obligations as set forth in the Code of Professional Responsibility. Under Canon 4 of the Code of Professional Responsibility a lawyer is enjoined to preserve the client's confidences (defined as information protected by the attorney-client privilege under applicable law) and the client's secrets (defined as other information gained in the professional relationship that the client has requested be held inviolate or the disclosure of which would be embarrassing or would be likely to be detrimental to the client). The observance of this ethical obligation, in the context of public policy, "... not only facilitates the full development of facts essential to proper representation of the client but also encourages laymen to seek early legal assistance." (Ethical Consideration 4-1).

The lawyer's ethical obligation therefore includes a much broader range of information than that protected by the attorney-client privilege. As stated in Ethical Consideration 4-4: "The attorney-client privilege is more limited than the ethical obligation of a lawyer to guard the confidences and secrets of his client. This ethical precept, unlike the evidentiary privilege, exists without regard to the nature or source of information or the fact that others share the knowledge."

[†] See footnote † in paragraph (2) in this section.

In recognition of this ethical obligation, the lawyer should be careful to disclose fully to his client any confidence, secret or evaluation that is to be revealed to another, including the client's auditor, and to satisfy himself that the officer or agent of a corporate client consenting to the disclosure understands the legal consequences thereof and has authority to provide the required consent.

The law in the area of attorney-client privilege and the impact of statements made in letters to auditors upon that privilege has not yet been developed. Based upon cases treating the attorney-client privilege in other contexts, however, certain generalizations can be made with respect to the possible impact of statements in letters to auditors.

It is now generally accepted that a corporation may claim the attorney-client privilege. Whether the privilege extends beyond the control group of the corporation (a concept found in the existing decisional authority), and if so, how far, is yet unresolved.

If a client discloses to a third party a part of any privileged communication he has made to his attorney, there may have been a waiver as to the whole communication; further, it has been suggested that giving accountants access to privileged statements made to attorneys may waive any privilege as to those statements. Any disclosure of privileged communications relating to a particular subject matter may have the effect of waiving the privilege on other communications with respect to the same subject matter.

To the extent that the lawyer's knowledge of unasserted possible claims is obtained by means of confidential communications from the client, any disclosure thereof might constitute a waiver as fully as if the communication related to pending claims.

A further difficulty arises with respect to requests for evaluation of either pending or unasserted possible claims. It might be argued that any evaluation of a claim, to the extent based upon a confidential communication with the client, waives any privilege with respect to that claim.

Another danger inherent in a lawyer's placing a value on a claim, or estimating the likely result, is that such a statement might be treated as an admission or might be otherwise prejudicial to the client.

The Statement of Policy has been prepared in the expectation that judicial development of the law in the foregoing areas will be such that useful communication between lawyers and auditors in the manner envisaged in the Statement will not prove prejudicial to clients engaged in or threatened with adversary proceedings. If developments occur contrary to this expectation, appropriate review and revision of the Statement of Policy may be necessary.

Paragraph 2 (Limitation on Scope of Response)

In furnishing information to an auditor, the lawyer can properly limit himself to loss contingencies which he is handling on a substantive basis for the client in the form of legal consultation (advice and other attention to matters not in litigation by the lawyer in his professional capacity) or legal representation (counsel of record or other direct professional responsibility for a matter in litigation). Some auditors' inquiries go further and ask for information on matters of which the lawyer "has knowledge." Lawyers are concerned that such a broad request may be deemed to include information coming from a variety of sources including social contact and third party contacts as well as professional engagement and that the lawyer might be criticized or subjected to liability if some of this information is forgotten at the time of the auditor's request.

It is also believed appropriate to recognize that the lawyer will not necessarily have been authorized to investigate, or have investigated, all legal problems of the client, even when on notice of some facts which might conceivably constitute a legal problem upon exploration and development. Thus, consideration in the form of preliminary or passing advice, or regarding an incomplete or hypothetical state of facts, or where the lawyer has not been requested to give studied attention to the matter in question, would not come within the concept of "substantive attention" and would therefore be excluded. Similarly excluded are matters which may have been mentioned by the client but which are not actually being handled by the lawyer. Paragraph 2 undertakes to deal with these concerns.

Paragraph 2 is also intended to recognize the principle that the appropriate lawyer to respond as to a particular loss contingency is the lawyer having charge of the matter for the client (e.g., the lawyer representing the client in a litigation matter and/or the lawyer having overall charge and supervision of the matter), and that the lawyer not having that kind of role with respect to the matter should not be expected to respond merely because of having become aware of its existence in a general or incidental way.

The internal procedures to be followed by a law firm or law department may vary based on factors such as the scope of the lawyer's engagement and the complexity and magnitude of the client's affairs. Such procedures could, but need not, include use of a docket system to record litigation, consultation with lawyers in the firm or department having principal responsibility for the client's affairs or other procedures which, in light of the cost to the client, are not disproportionate to the anticipated benefit to be derived. Although these procedures may not necessarily identify all matters relevant to the response, the evolution and application of the lawyer's customary procedures should constitute a reasonable basis for the lawyer's response.

As the lawyer's response is limited to matters involving his professional engagement as counsel, such response should not include information concerning the client which the lawyer receives in another role. In particular, a lawyer who is also a director or officer of the client would not include information which he received as a director or officer unless the information was also received (or, absent the dual role, would in the normal course be received) in his capacity as legal counsel in the context of his professional engagement. Where the auditor's request for information is addressed to a law firm as a firm, the law firm may properly assume that its response is not expected to include any information which may have been communicated to the particular individual by reason of his serving in the capacity of director or officer of the client. The question of the individual's duty, in his role as a director or officer, is not here addressed.

Paragraph 3 (Response May Cover only Material Items in Certain Cases)

Paragraph 3 makes it clear that the lawyer may optionally limit his responses to those items which are individually or collectively material to the auditor's inquiry. If the lawyer takes responsibility for making a determination that a matter is not material for the purposes of his response to the audit inquiry, he should make it clear that his response is so limited. The auditor, in such circumstance, should properly be entitled to rely upon the lawyer's response as providing him with the necessary corroboration. It should be emphasized that the employment of inside general counsel by the client should not detract from the acceptability of his response since inside general counsel is as fully bound by the professional obligations and responsibilities contained in

the Code of Professional Responsibility as outside counsel. If the audit inquiry sets forth a definition of materiality but the lawyer utilizes a different test of materiality, he should specifically so state. The lawyer may wish to reach an understanding with the auditor concerning the test of materiality to be used in his response, but he need not do so if he assumes responsibility for the criteria used in making materiality determinations. Any such understanding with the auditor should be referred to or set forth in the lawyer's response. In this connection, it is assumed that the test of materiality so agreed upon would not be so low in amount as to result in a disservice to the client and an unreasonable burden on counsel.

Paragraph 4 (Limited Responses)

The Statement of Policy is designed to recognize the obligation of the auditor to complete the procedures considered necessary to satisfy himself as to the fair presentation of the company's financial condition and results, in order to render a report which includes an opinion not qualified because of a limitation on the scope of the audit. In this connection, reference is made to SEC Accounting Series Release No. 90 [Financial Reporting Release No. 1, section 607.01(b)], in which it is stated:

"A 'subject to' or 'except for' opinion paragraph in which these phrases refer to the scope of the audit, indicating that the accountant has not been able to satisfy himself on some significant element in the financial statements, is not acceptable in certificates filed with the Commission in connection with the public offering of securities. The 'subject to' qualification is appropriate when the reference is to a middle paragraph or to footnotes explaining the status of matters which cannot be resolved at statement date."

Paragraph 5 (Loss Contingencies)

Paragraph 5 of the Statement of Policy summarizes the categories of "loss contingencies" about which the lawyer may furnish information to the auditor. The term loss contingencies and the categories relate to concepts of accounting accrual and disclosure specified for the accounting profession in Statement of Financial Accounting Standards No. 5* ("FAS 5") issued by the Financial Accounting Standards Board in March, 1975.

5.1 Accounting Requirements

To understand the significance of the auditor's inquiry and the implications of any response the lawyer may give, the lawyer should be aware of the following accounting concepts and requirements set out in FAS 5:^{||}

- (a) A "loss contingency" is an existing condition, situation or set of circumstances involving uncertainty as to possible loss to an enterprise that will ultimately be resolved when one or more events occur or fail to occur. Resolutions of the uncertainty may confirm the loss or impairment of an asset or the incurrence of a liability.

(Para. 1)

- (b) When a "loss contingency" exists, the likelihood that a future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. There are three areas within that range, defined as follows:

* See footnote * in paragraph (1) in this section.

^{||} Citations are to paragraph numbers of FAS 5.

- (i) *Probable*—"The future event or events are likely to occur."
- (ii) *Reasonably possible*—"The chance of the future event or events occurring is more than remote but less than likely."
- (iii) *Remote*—"The chance of the future event or events occurring is slight."

(Para. 3)

- (c) *Accrual* in a client's financial statements by a charge to income of the period will be required if *both* the following conditions are met:
 - (i) "Information available prior to issuance of the financial statements indicates that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements. It is implicit in this condition that it must be *probable* that one or more future events will occur confirming the fact of the loss." (emphasis added; footnote omitted)
 - (ii) "The amount of loss can be reasonably estimated."

(Para. 8)

- (d) *If there is no accrual* of the loss contingency in the client's financial statements because one of the two conditions outlined in (c) above are not met, *disclosure* may be required as provided in the following:

"If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, *disclosure* of the contingency *shall be made when there is at least a reasonable possibility* that a loss or an additional loss may have been incurred. *The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable.*" (emphasis added; footnote omitted)

(Para. 10)

- (e) The accounting requirements recognize or specify that (i) the opinions or views of counsel are not the sole source of audit evidence in making determinations about the accounting recognition or treatment to be given to litigation, and (ii) the fact that the lawyer is notable to express an opinion that the outcome will be favorable does not necessarily require an accrual of a loss. Paragraphs 36 and 37 of FAS 5 state as follows:

"If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as

to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

"The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement."

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

- (f) Paragraph 38 of FAS 5 focuses on certain examples concerning the determination by the enterprise whether an assertion of an unasserted possible claim may be considered probable:

"With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10."

For a more complete presentation of FAS 5, reference is made to Exhibit I, section 337B, in which are set forth excerpts selected by the AICPA as relevant to a Statement on Auditing Standards, issued by its Auditing Standards Executive Committee, captioned "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments."

5.2 Lawyer's Response

Concepts of probability inherent in the usage of terms like "probable" or "reasonably possible" or "remote" mean different things in different contexts. Generally, the outcome of, or the loss which may result from, litigation cannot be assessed in any way that is comparable to a statistically or empirically determined concept of "probability" that may be applicable when determining such matters as reserves for warranty obligations or accounts receivable or loan losses when there is a large number of transactions and a substantial body of known historical experience for the enterprise or comparable enterprises. While lawyers are accustomed to counseling clients during the progress of litigation as to the possible amount required for settlement purposes, the estimated risks of the proceedings at particular times and the possible application or establishment of points of law that may be relevant, such advice to the client is not possible at many stages of the litigation and may change dramatically depending upon the development of the proceedings. Lawyers do not generally quantify for clients the "odds" in numerical terms; if they do, the quantification is generally only undertaken in an effort to make meaningful, for limited purposes, a whole host of judgmental factors applicable at a particular time, without any intention to depict "probability" in any statistical, scientific or empirically-grounded sense. Thus, for example, statements that litigation is being defended vigorously and that the client has meritorious defenses do not, and do not purport to, make a statement about the probability of outcome in any measurable sense.

Likewise, the "amount" of loss—that is, the total of costs and damages that ultimately might be assessed against a client—will, in most litigation, be a subject of wide possible variance at most stages; it is the rare case where the amount is precise and where the question is whether the client against which claim is made is liable either for all of it or none of it.

In light of the foregoing considerations, it must be concluded that, as a general rule, it should not be anticipated that meaningful quantifications of "probability" of outcome or amount of damages can be given by lawyers in assessing litigation. To provide content to the definitions set forth in Paragraph 5 of the Statement of Policy, this Commentary amplifies the meanings of the terms under discussion, as follows:

"probable"—An unfavorable outcome is normally "probable" if, but only if, investigation, preparation (including development of the factual data and legal research) and progress of the matter have reached a stage where a judgment can be made, taking all relevant factors into account which may affect the outcome, that it is extremely doubtful that the client will prevail.

"remote"—The prospect for an unfavorable outcome appears, at the time, to be slight; i.e., it is extremely doubtful that the client will not prevail. Normally, this would entail the ability to make an unqualified judgment, taking into account all relevant factors which may affect the outcome, that the client may confidently expect to prevail on a motion for summary judgment on all issues due to the clarity of the facts and the law.

In other words, for purposes of the lawyer's response to the request to advise auditors about litigation, an unfavorable outcome will be "probable" only if the chances of the client prevailing appear slight and of the claimant losing appear extremely doubtful; it will be "remote" when the client's chances of losing appear slight and of not winning appear extremely doubtful. It is, therefore, to be anticipated that, in most situations, an unfavorable outcome will be neither "probable" nor "remote" as defined in the Statement of Policy.

The discussion above about the very limited basis for furnishing judgments about the outcome of litigation applies with even more force to a judgment concerning whether or not the assertion of a claim not yet asserted is "probable." That judgment will infrequently be one within the professional competence of lawyers and therefore the lawyer should not undertake such assessment except where such judgment may become meaningful because of the presence of special circumstances, such as catastrophes, investigations and previous public disclosure as cited in Paragraph 5 of the Statement of Policy, or similar extrinsic evidence relevant to such assessment. Moreover, it is unlikely, absent relevant extrinsic evidence, that the client or anyone else will be in a position to make an informed judgment that assertion of a possible claim is "probable" as opposed to "reasonably possible" (in which event disclosure is not required). In light of the legitimate concern that the public interest would not be well served by resolving uncertainties in a way that invites the assertion of claims or otherwise causes unnecessary harm to the client and its stockholders, a decision to treat an unasserted claim as "probable" of assertion should be based only upon compelling judgment.

Consistent with these limitations believed appropriate for the lawyer, he should not represent to the auditor, nor should any inference from his response be drawn, that the unasserted possible claims identified by the client (as contemplated by Paragraph 5(c) of the Statement of Policy) represent all such claims of which the lawyer may be aware or that he necessarily concurs in his client's determination of which unasserted possible claims warrant specification by the client; within proper limits, this determination is one which the client is entitled to make—and should make—and it would be inconsistent with his professional obligations for the lawyer to volunteer information arising from his confidential relationship with his client.

As indicated in Paragraph 5, the lawyer also may be asked to estimate the potential loss (or range) in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the lawyer would provide an estimate only if he believes that the probability of inaccuracy of the estimate of the range or amount is slight. What is meant here is that the estimate of amount of loss presents the same difficulty as assessment of outcome and that the same formulation of "probability" should be used with respect to the determination of estimated loss amounts as should be used with respect to estimating the outcome of the matter.

In special circumstances, with the proper consent of the client, the lawyer may be better able to provide the auditor with information concerning loss contingencies through conferences where there is opportunity for more detailed discussion and interchange. However, the principles set forth in the Statement of Policy and this Commentary are fully applicable to such conferences.

Subsumed throughout this discussion is the ongoing responsibility of the lawyer to assist his client, at the client's request, in complying with the requirements of FAS 5 to the extent such assistance falls within his professional competence. This will continue to involve, to the extent appropriate, privileged discussions with the client to provide a better basis on which the client can make accrual and disclosure determinations in respect of its financial statements.

In addition to the considerations discussed above with respect to the making of any judgment or estimate by the lawyer in his response to the auditor, including with respect to a matter specifically identified by the client, the lawyer should also bear in mind the risk that the furnishing of such a judgment or estimate to any one other than the client might constitute an admission or be otherwise prejudicial to the client's position in its defense against such litigation or claim (see Paragraph 1 of the Statement of Policy and of this Commentary).

Paragraph 6 (Lawyer's Professional Responsibility)

The client must satisfy whatever duties it has relative to timely disclosure, including appropriate disclosure concerning material loss contingencies, and, to the extent such matters are given substantive attention in the form of legal consultation, the lawyer, when his engagement is to advise his client concerning a disclosure obligation, has a responsibility to advise his client concerning its obligations in this regard. Although lawyers who normally confine themselves to a legal specialty such as tax, antitrust, patent or admiralty law, unlike lawyers consulted about SEC or general corporate matters, would not be expected to advise generally concerning the client's disclosure obligations in respect of a matter on which the lawyer is working, the legal specialist should counsel his client with respect to the client's obligations under FAS 5 to the extent contemplated herein. Without regard to legal specialty, the lawyer should be mindful of his professional responsibility to the client described in Paragraph 6 of the Statement of Policy concerning disclosure.

The lawyer's responsibilities with respect to his client's disclosure obligations have been a subject of considerable discussion and there may be, in due course, clarification and further guidance in this regard. In any event, where in the lawyer's view it is clear that (i) the matter is of material importance and seriousness, and (ii) there can be no reasonable doubt that its non-disclosure in the client's financial statements would be a violation of law giving rise to material claims, rejection by the client of his advice to call the matter to the attention of the auditor would almost certainly require the lawyer's withdrawal from employment in accordance with the Code of Professional Responsibility. (See, e.g., Disciplinary Rule 7-102 (A)(3) and (7), and Disciplinary Rule 2-110 (B)(2).) Withdrawal under such circumstances is obviously undesirable and might present serious problems for the client. Accordingly, in the context of financial accounting and reporting for loss contingencies arising from unasserted claims, the standards for which are contained in FAS 5, clients should be urged to disclose to the auditor information concerning an unasserted possible claim or assessment (not otherwise specifically identified by the client) where in the course of the services performed for the client it has become clear to the lawyer that (i) the client has no reasonable basis to conclude that assertion of the claim is not probable (employing the concepts hereby enunciated) and (ii) given the probability of assertion, disclosure of the loss contingency in the client's financial statements is beyond reasonable dispute required.

Paragraph 7 (Limitation on Use of Response)

Some inquiry letters make specific reference to, and one might infer from others, an intention to quote verbatim or include the substance of the lawyer's reply in footnotes to the client's financial statements. Because the client's prospects in pending litigation may shift as a result of interim developments, and because the lawyer should have an opportunity, if quotation is to be made, to review the footnote in full, it would seem prudent to limit the use of the lawyer's reply letter. Paragraph 7 sets out such a limitation.

Paragraph 7 also recognizes that it may be in the client's interest to protect information contained in the lawyer's response to the auditor, if and to the extent possible, against unnecessary further disclosure or use beyond its intended purpose of informing the auditor. For example, the response may contain information which could prejudice efforts to negotiate a favorable settlement of a pending litigation described in the response. The requirement of consent to further disclosure, or of reasonable advance notice where disclosure may be required by court process or necessary in defense of the audit, is designed to

give the lawyer an opportunity to consult with the client as to whether consent should be refused or limited or, in the case of legal process or the auditor's defense of the audit, as to whether steps can and should be taken to challenge the necessity of further disclosure or to seek protective measures in connection therewith. It is believed that the suggested standard of twenty days advance notice would normally be a minimum reasonable time for this purpose.

Paragraph 8 (General)

It is reasonable to assume that the Statement of Policy will receive wide distribution and will be readily available to the accounting profession. Specifically, the Statement of Policy has been reprinted as Exhibit II to the Statement on Auditing Standards, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments," issued by the Auditing Standards Executive Committee of the American Institute of Certified Public Accountants. Accordingly, the mechanic for its incorporation by reference will facilitate lawyer-auditor communication. The incorporation is intended to include not only limitations, such as those provided by Paragraphs 2 and 7 of the Statement of Policy, but also the explanatory material set forth in this Commentary.

Annex A

[Illustrative forms of letters for full response by outside practitioner or law firm and inside general counsel to the auditor's inquiry letter. These illustrative forms, which are not part of the Statement of Policy, have been prepared by the Committee on Audit Inquiry Responses solely in order to assist those who may wish to have, for reference purposes, a form of response which incorporates the principles of the Statement of Policy and accompanying Commentary. Other forms of response letters will be appropriate depending on the circumstances.]

Illustrative form of letter for use by outside practitioner or law firm:

[Name and Address of Accounting Firm]

Re: [Name of Client] [and Subsidiaries]

Dear Sirs:

By letter date [insert date of request] Mr. [insert name and title of officer signing request] of [insert name of client] [(the "Company") or (together with its subsidiaries, the "Company")] has requested us to furnish you with certain information in connection with your examination of the accounts of the Company as at [insert fiscal year-end].

[Insert description of the scope of the lawyer's engagement; the following are sample descriptions:]

While this firm represents the Company on a regular basis, our engagement has been limited to specific matters as to which we were consulted by the Company.

[or]

We call your attention to the fact that this firm has during the past year represented the Company only in connection with certain [Federal income tax matters] [litigation] [real estate transactions] [describe other specific matters, as appropriate] and has not been engaged for any other purpose.

Subject to the foregoing and to the last paragraph of this letter, we advise you that since [insert date of beginning of fiscal period under audit] we have not been engaged to give substantive attention to, or represent the Company

in connection with, [*material*]** loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[Describe litigation and claims which fit the foregoing criteria.]

[If the inquiry letter requests information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations:]

With respect to the matters specifically identified in the Company's letter and upon which comment has been specifically requested, as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, we advise you, subject to the last paragraph of this letter, as follows:

[Insert information as appropriate]

The information set forth herein is [as of the date of this letter] [as of [*insert date*], the date on which we commenced our internal review procedures for purposes of preparing this response], except as otherwise noted, and we disclaim any undertaking to advise you of changes which thereafter may be brought to our attention.

[Insert information with respect to outstanding bills for services and disbursements.]

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. [Describe any other or additional limitation as indicated by Paragraph 4 of the Statement]

Very truly yours,

** **Note:** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

Illustrative form of letter for use by inside general counsel:

[Name and Address of Accounting Firm]

Re: [Name of Company] [and Subsidiaries]

Dear Sirs:

As General Counsel[#] of [insert name of client] [(the "Company")] [(together with its subsidiaries, the "Company")], I advise you as follows in connection with your examination of the accounts of the Company as at [insert fiscal year-end].

I call your attention to the fact that as General Counsel[#] for the Company I have general supervision of the Company's legal affairs. [If the general legal supervisory responsibilities of the person signing the letter are limited, set forth here a clear description of those legal matters over which such person exercises general supervision, indicating exceptions to such supervision and situations where primary reliance should be placed on other sources.] In such capacity, I have reviewed litigation and claims threatened or asserted involving the Company and have consulted with outside legal counsel with respect thereto where I have deemed appropriate.

Subject to the foregoing and to the last paragraph of this letter, I advise you that since [insert date of beginning of fiscal period under audit] neither I, nor any of the lawyers over whom I exercise general legal supervision, have given substantive attention to, or represented the Company in connection with, [material]** loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[Describe litigation and claims which fit the foregoing criteria.]

[If information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations is to be supplied:]

With respect to matters which have been specifically identified as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, I advise you, subject to the last paragraph of this letter, as follows:

[Insert information as appropriate]

The information set forth herein is [as of the date of this letter] as of [insert date], the date on which we commenced our internal review procedures for purposes of preparing this response], except as otherwise noted, and I disclaim any undertaking to advise you of changes which thereafter may be brought to my attention or to the attention of the lawyers over whom I exercise general legal supervision.

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by

Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy, this will confirm as correct the Company's understanding that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted

[#] It may be appropriate in some cases for the response to be given by inside counsel other than inside general counsel in which event this letter should be appropriately modified.

^{**} See footnote ** earlier in this section.

possible claim or assessment that may call for financial statement disclosure, I have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, I, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5.* [Describe any other or additional limitation as indicated by Paragraph 4 of the Statement.]

Very truly yours,

* See footnote * in paragraph (1) in this section.

AU Section 9337

Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337

1. Specifying Relevant Date in an Audit Inquiry Letter

.01 Question—Should the auditor request the client to specify, in his audit inquiry letter to a lawyer prepared in accordance with section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, the date by which the lawyer's response should be sent to the auditor. Also, should the letter request the lawyer to specify in his response the latest date covered by his review (the "effective date")?

.02 Interpretation—Yes. It should be recognized that, to adequately respond to an audit inquiry letter, lawyers will ordinarily employ some internal review procedures which will be facilitated by specifying the earliest acceptable effective date of the response and the latest date by which it should be sent to the auditor. Ordinarily, a two-week period should be allowed between the specified effective date of the lawyer's response and the latest date by which the response should be sent to the auditor. Clearly stating the relevant dates in the letter and specifying these dates to the lawyer in a timely manner will allow the responding lawyer an adequate amount of time to complete his review procedures and assist the auditor in coordinating the timing of the completion of his field work with the latest date covered by the lawyer's review.

.03 Further, the lawyer should be requested to specify the effective date of his response. If the lawyer's response does not specify an effective date, the auditor can assume that the date of the lawyer's response is the effective date.

[Issue Date: March 1977.]

2. Relationship Between Date of Lawyer's Response and Auditor's Report

.04 Question—The illustrative form of audit inquiry letter included in the appendix [section 337A] to section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, requests a response as to matters that existed at the balance sheet date and during the period from that date to the date of the response. What is the relationship between the effective date of the lawyer's response and the date of the auditor's report, which is generally the date of the completion of field work?

.05 Interpretation—Section 560 paragraphs .10–.12 indicate that the auditor is concerned with events, which may require adjustments to, or disclosure in, the financial statements, occurring through the date of his or her report. Therefore, the latest date of the period covered by the lawyer's response (the "effective date") should be as close to the date of the auditor's report as is practicable in the circumstances. Consequently, specifying the effective date of the

lawyer's response to reasonably approximate the expected date of the auditor's report will in most instances obviate the need for an updated response from the lawyer.

[Issue Date: March 1977; Revised: December 2005.]

3. Form of Audit Inquiry Letter When Client Represents That No Unasserted Claims and Assessments Exist

.06 Question—The illustrative audit inquiry letter included in the appendix [section 337A] to section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, assumes that the client specifies certain unasserted claims and assessments. However, in some cases, clients have stated that there are no such claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome. What appropriate revision to the wording of the letter can be used in such situations?

.07 Interpretation—Wording that could be used in an audit inquiry letter, instead of the heading and first paragraph in the section relating to unasserted claims and assessments included in the appendix [section 337A] to section 337, when the client believes that there are no unasserted claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, is as follows:

Unasserted claims and assessments—We have represented to our auditors that there are no unasserted possible claims that you have advised us are probable of assertion and must be disclosed, in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. (The second paragraph in the section relating to unasserted claims and assessments would not be altered.)

[Issue Date: March 1977; Revised: June 2009.]

4. Documents Subject to Lawyer-Client Privilege

.08 Question—Section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .05c, states: "Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers." Would this include a review of documents at the client's location considered by the lawyer and the client to be subject to the lawyer-client privilege?

.09 Interpretation—No. Although ordinarily an auditor would consider the inability to review information that could have a significant bearing on his audit as a scope restriction, in recognition of the public interest in protecting the confidentiality of lawyer-client communications (see section 337 paragraph .13), section 337 paragraph .05(c) is not intended to require an auditor to examine documents that the client identifies as subject to the lawyer-client privilege. In the event of questions concerning the applicability of this privilege, the auditor may request confirmation from the client's counsel that the information is subject to that privilege and that the information was considered by the lawyer in

responding to the audit inquiry letter or, if the matters are being handled by another lawyer, an identification of such lawyer for the purpose of sending him an audit inquiry letter.

[Issue Date: March 1977.]

5. Alternative Wording of the Illustrative Audit Inquiry Letter to a Client's Lawyer

.10 Question—The appendix [section 337A] of section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, provides an illustrative audit inquiry letter to legal counsel. That inquiry letter is based on the assumptions that (1) management of the company has prepared and furnished to the auditor and has set forth in the audit inquiry letter a description and evaluation of pending or threatened litigation, claims, and assessments and (2) management has identified and specified for comment in the audit inquiry letter unasserted claims or assessments that are probable of assertion and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome. In many engagements, circumstances may render certain portions of the illustrative letter inappropriate. For instance, many clients ask their lawyers to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments rather than have management furnish such information. How can the wording of the inquiry letter be modified to recognize circumstances that differ from those assumed in the illustrative letter and to be more specific regarding the timing of the lawyer's response?

.11 Interpretation—Section 337 paragraph .09, outlines the matters that should be covered in a letter of audit inquiry. Although section 337 provides an illustrative audit inquiry letter to legal counsel, it should be modified, if necessary, to fit the circumstances. The modified illustrative audit inquiry letter that follows is based on a typical situation: management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments, and also represents that there are no unasserted claims or assessments that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. It also includes a separate response section with language that clarifies the auditor's expectations regarding the timing of the lawyer's response.

"In connection with an audit of our financial statements as of (balance-sheet date) and for the (period) then ended, please furnish our auditors, (name and address of auditors), with the information requested below concerning certain contingencies involving matters with respect to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation." [When a materiality limit has been established based on an understanding between management and the auditor, the following sentence should be added: This request is limited to contingencies amounting to (amount) individually or items involving lesser amounts that exceed (amount) in the aggregate.]

.12 Pending or Threatened Litigation, Claims, and Assessments

"Regarding pending or threatened litigation, claims, and assessments, please include in your response: (1) the nature of each matter, (2) the progress of each matter to date, (3) how the Company is responding or intends to respond

(for example, to contest the case vigorously or seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss."

.13 Unasserted Claims and Assessments

"We have represented to our auditors that there are no unasserted possible claims or assessments that you have advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450.¹ We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of FASB ASC 450. Please specifically confirm to our auditors that our understanding is correct."

.14 Response

"Your response should include matters that existed as of (balance-sheet date) and during the period from that date to the effective date of your response."

"Please specifically identify the nature of and reasons for any limitations on your response."

"Our auditors expect to have the audit completed about (expected completion date). They would appreciate receiving your reply by that date with a specified effective date no earlier than (ordinarily two weeks before expected completion date)."²

[Issue Date: June 1983; Revised: June 2009.]

6. Client Has Not Consulted a Lawyer

.15 Question—Section 337 paragraph .06 requires an auditor to request that the client's management send a letter of inquiry to those lawyers with whom management has consulted concerning litigation, claims, or assessments. In some instances, management may not have consulted a lawyer. In such circumstances, what should the auditor do to obtain sufficient, appropriate audit evidence regarding litigation, claims, and assessments?

.16 Interpretation—Section 337 is expressly limited to inquiry of lawyers with whom management has consulted. If the client has not consulted a lawyer, the auditor normally would rely on the review of internally available information as outlined in section 337 paragraph .05 and .07, and the written

¹ A parenthetical statement such as "(excerpts of which can be found in the ABA's *Auditor's Letter Handbook*") might be added here if the auditor believes that it would be helpful to the lawyer's understanding of the requirements of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. The *Auditor's Letter Handbook* contains, among other things, a copy of section 337, the ABA's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* (section 337C), and excerpts from FASB ASC 450. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

² Two auditing interpretations (see Interpretation Nos. 1–2 of section 337 [par. .01–.05]) address relevant dates in an audit inquiry letter and the relationship between the date of the lawyer's response and the audit report date.

representation of management regarding litigation, claims, and assessments as required by section 333, *Management Representations*, paragraph .06o and p. In those circumstances, the representation regarding litigation, claims, and assessments might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

.17 If information comes to the auditor's attention that may indicate potentially material litigation, claims, and assessments, the auditor should discuss with the client its possible need to consult legal counsel so that the client may evaluate its responsibility under Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies* to accrue or disclose loss contingencies. Depending on the severity of the matter, refusal by the client to consult legal counsel in those circumstances may result in a scope limitation, and the auditor should consider the effect of such a limitation on his audit report.

[Issue Date: June 1983; Revised: January 2004; Revised: March 2006; Revised: June 2009.]

7. Assessment of a Lawyer's Evaluation of the Outcome of Litigation

.18 *Question*—Section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .09d(2), states that a letter of audit inquiry should include a request for the lawyer's evaluation of the likelihood of an unfavorable outcome of pending or threatened litigation, claims, and assessments to which he has devoted substantive attention. However, written responses from lawyers vary considerably and may contain evaluation wording that is vague or ambiguous and, thus, of limited use to the auditor. What constitutes a clear response and what should the auditor do if he considers the response unclear?

.19 *Interpretation*—The American Bar Association's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* (ABA Statement) is reprinted as exhibit II [section 337C] to section 337. While paragraph 5 of the ABA statement [section 337C] states that the lawyer "may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is 'probable' or 'remote'," he is not required to use those terms in communicating his evaluation to the auditor. The auditor may find other wording sufficiently clear as long as the terms can be used to classify the outcome of the uncertainty under one of the three probability classifications established in Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*.³

.20 Some examples of evaluations concerning litigation that may be considered to provide sufficient clarity that the likelihood of an unfavorable outcome is "remote" even though they do not use that term are:

- "We are of the opinion that this action will not result in any liability to the company."

³ Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*, uses the terms *probable*, *reasonably possible*, and *remote* to describe different degrees of likelihood that future events will confirm a loss or an impairment of an asset or incurrence of a liability, and the accounting standards for accrual and disclosure are based on those terms. [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

- "It is our opinion that the possible liability to the company in this proceeding is nominal in amount."
- "We believe the company will be able to defend this action successfully."
- "We believe that the plaintiff's case against the company is without merit."
- "Based on the facts known to us, after a full investigation, it is our opinion that no liability will be established against the company in these suits."

.21 Absent any contradictory information obtained by the auditor either in other parts of the lawyer's letter or otherwise, the auditor need not obtain further clarification of evaluations such as the foregoing.

.22 Because of inherent uncertainties described in section 337 paragraph .14 and in the ABA Policy Statement [section 337C], an evaluation furnished by the lawyer may indicate significant uncertainties or stipulations as to whether the client will prevail. The following are examples of lawyers' evaluations that are unclear as to the likelihood of an unfavorable outcome:

- "This action involves unique characteristics wherein authoritative legal precedents do not seem to exist. We believe that the plaintiff will have serious problems establishing the company's liability under the act; nevertheless, if the plaintiff is successful, the award may be substantial."
- "It is our opinion that the company will be able to assert meritorious defenses to this action." (The term "meritorious defenses" indicates that the company's defenses will not be summarily dismissed by the court; it does not necessarily indicate counsel's opinion that the company will prevail.)
- "We believe the action can be settled for less than the damages claimed."
- "We are unable to express an opinion as to the merits of the litigation at this time. The company believes there is absolutely no merit to the litigation." (If client's counsel, with the benefit of all relevant information, is unable to conclude that the likelihood of an unfavorable outcome is "remote," it is unlikely that management would be able to form a judgment to that effect.)
- "In our opinion, the company has a substantial chance of prevailing in this action." (A "substantial chance," a "reasonable opportunity," and similar terms indicate more uncertainty than an opinion that the company will prevail.)

.23 If the auditor is uncertain as to the meaning of the lawyer's evaluation, he should request clarification either in a follow-up letter or a conference with the lawyer and client, appropriately documented. If the lawyer is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor should look to the guidance in section 508 paragraphs .45–.49 to determine the effect, if any, of the lawyer's response on the auditor's report.

[Issue Date: June 1983; Revised: February 1997; Revised: June 2009.]

8. Use of the Client's Inside Counsel in the Evaluation of Litigation, Claims, and Assessments

.24 Question—Section 337 paragraph .06 requires an auditor to request that the client's management send a letter of inquiry to those lawyers with whom management has consulted concerning litigation, claims, and assessments. Sometimes, the client's inside general counsel or legal department (hereinafter referred to as "inside counsel") is handling litigation, claims, and assessments either exclusive of or in conjunction with outside lawyers. In such circumstances, when does inside counsel's response constitute sufficient, appropriate audit evidence regarding litigation, claims, and assessments?

.25 Interpretation—Section 337 paragraph .08 states that "Audit evidence obtained from the client's inside general counsel or legal department may provide the auditor with the necessary corroboration." Inside counsel can range from one lawyer to a large staff, with responsibilities ranging from specific internal matters to a comprehensive coverage of all of the client's legal needs, including litigation with outside parties. Because both inside counsel and outside lawyers are bound by the ABA's Code of Professional Responsibilities, there is no difference in their professional obligations and responsibilities. In some circumstances, outside lawyers, if used at all, may be used only for limited purposes, such as data accumulation or account collection activity. In such circumstances, inside counsel has the primary responsibility for corporate legal matters and is in the best position to know and precisely describe the status of all litigation, claims, and assessments or to corroborate information furnished by management.

.26 Audit inquiry letters should be sent to those lawyers, which may be either inside counsel or outside lawyers, who have the primary responsibility for, and knowledge about, particular litigation, claims, and assessments. If inside counsel in handling litigation, claims, and assessments exclusively, their evaluation and response ordinarily would be considered adequate. Similarly, if both inside counsel and outside lawyers have been involved in the matters, but inside counsel has assumed the primary responsibility for the matters, inside counsel's evaluation may well be considered adequate.⁴ However, there may be circumstances when litigation, claims, or assessments involving substantial overall participation by outside lawyers are of such significance to the financial statements that the auditor should consider obtaining the outside lawyers' response that they have not formulated a substantive conclusion that differs in any material respect from inside counsel's evaluation, even though inside counsel may have primary responsibility.

.27 If both inside counsel and outside lawyers have devoted substantive attention to a legal matter, but their evaluations of the possible outcome differ, the auditor should discuss the differences with the parties involved. Failure to reach agreement between the lawyers may require the auditor to consider appropriate modification of his audit report.

[Issue Date: June 1983; Revised: March 2006.]

9. Use of Explanatory Language About the Attorney-Client Privilege or the Attorney Work-Product Privilege

.28 Question—In some cases, in order to emphasize the preservation of the attorney-client privilege or the attorney work-product privilege, some clients

⁴ This does not alter the caveat in section 337 paragraph .08 that "evidential matter obtained from inside counsel is not a substitute for information outside counsel refuses to furnish."

have included the following or substantially similar language in the audit inquiry letter to legal counsel:

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

For the same reason, some lawyers have included the following or substantially similar language in their response letters to auditors:

The Company [OR OTHER DEFINED TERM] has advised us that, by making the request set forth in its letter to us, the Company [OR OTHER DEFINED TERM] does not intend to waive the attorney-client privilege with respect to any information which the Company [OR OTHER DEFINED TERM] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [OR OTHER DEFINED TERM].

Does the explanatory language about the attorney-client privilege or the attorney work-product privilege result in a limitation on the scope of the audit?

.29 Answer—No. According to the *Report by the American Bar Association's Subcommittee on Audit Inquiry Responses*, explanatory language similar to the foregoing in the letters of the client or the lawyer is not a limitation on the scope of the lawyer's response. The report states that such language simply makes explicit what has always been implicit, namely, the language states clearly that neither the client nor the lawyer intended a waiver. The report further states that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges. The *Report by the American Bar Association's Subcommittee on Audit Inquiry Responses* is reprinted in paragraph .30.

.30 Report of the Subcommittee on Audit Inquiry Responses*

Because of a recent court case and other judicial decisions involving lawyers' responses to auditors' requests for information, an area of uncertainty or concern has been brought to the Subcommittee's attention and is the subject of the following comment:

This Committee's report does not modify the ABA Statement of Policy, nor does it constitute an interpretation thereof. The Preamble to the ABA Statement of Policy states as follows:

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

* "Excerpted from 'Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information,' *The Business Lawyer*, vol. 31, no. 3, April 1976, copyright 1976 American Bar Association, reprinted by permission of the American Bar Association."

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political, and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and to act in accordance with counsel's advice.

Paragraph (1) of the ABA Statement of Policy provides as follows:

(1) *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5,[†] promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying commentary), to the extent hereinafter set forth, subject to the following:

(a) Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.

(b) In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.

(c) Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.

(d) In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

In order to preserve explicitly the evidentiary privileges, some lawyers have suggested that clients include language in the following or substantially similar form:

[†] In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification*[™] (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission. As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

If client's request letter does not contain language similar to that in the preceding paragraph, the lawyer's statement that the client has so advised him or her may be based upon the fact that the client has in fact so advised the lawyer, in writing or orally, in other communications or in discussions.

For the same reason, the response letter from some lawyers also includes language in the following or substantially similar form:

The Company [OR OTHER DEFINED TERM] has advised us that, by making the request set forth in its letter to us, the Company [OR OTHER DEFINED TERM] does not intend to waive the attorney-client privilege with respect to any information which the Company [OR OTHER DEFINED TERM] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [OR OTHER DEFINED TERM].

We believe that language similar to the foregoing in letters of the client or the lawyer simply makes explicit what has always been implicit, namely, it expressly states clearly that neither the client nor the lawyer intended a waiver. It follows that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges.

On the other hand, the inclusion of such language does not necessarily assure the client that, depending on the facts and circumstances, a waiver may not be found by a court of law to have occurred.

We do not believe that the foregoing types of inclusions cause a negative impact upon the public policy considerations described in the Preamble to the ABA Statement of Policy nor do they intrude upon the arrangements between the legal profession and the accounting profession contemplated by the ABA Statement of Policy. Moreover, we do not believe that such language interferes in any way with the standards and procedures of the accounting profession in the auditing process nor should it be construed as a limitation upon the lawyer's reply to the auditors. We have been informed that the Auditing Standards Board of the AICPA has adopted an interpretation of SAS 12 recognizing the propriety of these statements.

Lawyers, in any case, should be encouraged to have their draft letters to auditors reviewed and approved by the client before releasing them to the auditors and may wish to explain to the client the legal consequences of the client's consent to lawyer's response as contemplated by subparagraph 1(d) of the Statement of Policy.

December 1989

[Issue Date: February, 1990.]

10. Use of Explanatory Language Concerning Unasserted Possible Claims or Assessments in Lawyers' Responses to Audit Inquiry Letters

.31 Question—In order to emphasize the preservation of the attorney-client privilege with respect to unasserted possible claims or assessments, some lawyers include the following or substantially similar language in their responses to audit inquiry letters:

"Please be advised that pursuant to clauses (b) and (c) of Paragraph 5 of the ABA Statement of Policy [American Bar Association's *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*] and related Commentary referred to in the last paragraph of this letter, it would be inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the Company. We can only furnish information concerning those unasserted possible claims or assessments upon which the Company has specifically requested in writing that we comment. We also cannot comment upon the adequacy of the Company's listing, if any, of unasserted possible claims or assessments or its assertions concerning the advice, if any, about the need to disclose same."

Does the inclusion of this or similar language result in a limitation on the scope of the audit?

.32 Interpretation—No. Additional language similar to the foregoing in a letter of a lawyer is not a limitation on the scope of the audit. However, the ABA Statement of Policy [section 337C] and the understanding between the legal and accounting professions assumes that the lawyer, under certain circumstances, will advise and consult with the client concerning the client's obligation to make financial statement disclosure with respect to unasserted possible claims or assessments.⁵ Confirmation of this understanding should be included in the lawyer's response.

[Issue Date: January 1997; Revised: June 2009.]

⁵ See paragraph 6 of the ABA Statement of Policy [section 337C] and its commentary [section 337C]. In addition, Annex A to the ABA Statement of Policy [section 337C] contains the following illustrative language in the lawyers' response letter to the auditors:

Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of FASB Statement No. 5, *Accounting for Contingencies*.

[See footnote †.] [Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

AU Section 339

Audit Documentation

(Supersedes SAS No. 96.)

Source: SAS No. 103.

See section 9339 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2006.

Introduction

.01 The purpose of this section is to establish standards and provide guidance on audit documentation. The exercise of professional judgment is integral in applying the provisions of this section. For example, professional judgment is used in determining the quantity, type, and content of audit documentation consistent with this section.

.02 Other Statement on Auditing Standards contain specific documentation requirements (see appendix A [paragraph .36]). Additionally, specific documentation or document retention requirements may be included in other standards (for example, government auditing standards), laws, and regulations applicable to the engagement.

.03 The auditor must prepare audit documentation in connection with each engagement in sufficient detail to provide a clear understanding of the work performed (including the nature, timing, extent, and results of audit procedures performed), the audit evidence obtained and its source, and the conclusions reached. Audit documentation:

- a.* Provides the principal support for the representation in the auditor's report that the auditor performed the audit in accordance with generally accepted auditing standards.
- b.* Provides the principal support for the opinion expressed regarding the financial information or the assertion to the effect that an opinion cannot be expressed.

.04 Audit documentation is an essential element of audit quality. Although documentation alone does not guarantee audit quality, the process of preparing sufficient and appropriate documentation contributes to the quality of an audit.

.05 Audit documentation is the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. Audit documentation, also known as working papers or workpapers, may be recorded on paper or on electronic or other media. When transferring or copying paper documentation to another media, the auditor should apply procedures to generate a copy that is faithful in form and content to the original paper document.¹

¹ There may be legal, regulatory, or other reasons to retain the original paper document.

.06 Audit documentation includes, for example, audit programs,² analyses, issues memoranda, summaries of significant findings or issues, letters of confirmation and representation, checklists, abstracts or copies of important documents, correspondence (including e-mail) concerning significant findings or issues, and schedules of the work the auditor performed. Abstracts or copies of the entity's records (for example, significant and specific contracts and agreements) should be included as part of the audit documentation if they are needed to enable an experienced auditor to understand the work performed and conclusions reached. The audit documentation for a specific engagement is assembled in an audit file.³

.07 The auditor need not retain in audit documentation superseded drafts of working papers or financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.08 In addition to the objectives set out in paragraph .03, audit documentation serves a number of other purposes, including:

- Assisting the audit team to plan and perform the audit;
- Assisting auditors who are new to an engagement and review the prior year's documentation to understand the work performed as an aid in planning and performing the current engagement;
- Assisting members of the audit team responsible for supervision to direct and supervise the audit work, and to review the quality of work performed;
- Demonstrating the accountability of the audit team for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached;
- Retaining a record of matters of continuing significance to future audits of the same entity;
- Assisting quality control reviewers (for example, internal inspectors) who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions;
- Enabling an experienced auditor to conduct inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements; and
- Assisting a successor auditor who reviews a predecessor auditor's audit documentation.

.09 For the purposes of this section, *experienced auditor* means an individual (whether internal or external to the firm) who possesses the competencies and skills that would have enabled him or her to perform the audit. These competencies and skills include an understanding of (a) audit processes, (b) the SASs and applicable legal and regulatory requirements, (c) the business environment in which the entity operates, and (d) auditing and financial reporting issues relevant to the entity's industry.

² See paragraph .05 of section 311, *Planning and Supervision*, as amended, for guidance regarding preparation of audit programs.

³ The audit documentation contained within the audit file may consist of cross-references to documentation for audit engagements with related entities. For example, the documentation for an audit of the financial statements of an employee benefit plan may consist partly of cross-references to the documentation of dual-purpose payroll-related tests performed in connection with the audit of the financial statements of the plan's sponsor.

Form, Content, and Extent of Audit Documentation

.10 The auditor should prepare audit documentation that enables an experienced auditor, having no previous connection to the audit, to understand:

- a. The nature, timing, and extent of auditing procedures performed to comply with SASs and applicable legal and regulatory requirements;
- b. The results of the audit procedures performed and the audit evidence obtained;
- c. The conclusions reached on significant matters; and
- d. That the accounting records agree or reconcile with the audited financial statements or other audited information.

.11 The form, content, and extent of audit documentation depend on the circumstances of the engagement and the audit methodology and tools used. Oral explanations on their own do not represent sufficient support for the work the auditor performed or conclusions the auditor reached but may be used by the auditor to clarify or explain information contained in the audit documentation. It is, however, neither necessary nor practicable to document every matter the auditor considers during the audit.

.12 In determining the form, content, and extent of audit documentation, the auditor should consider the following factors:

- The nature of the auditing procedures to be performed;
- The identified risk of material misstatement associated with the assertion, or account or class of transactions, including related disclosures;
- The extent of judgment involved in performing the work and evaluating the results;
- The significance of the audit evidence obtained to the assertion being tested;
- The nature and extent of exceptions identified; and
- The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or evidence obtained.

.13 Certain matters, such as auditor independence and staff training, that are not engagement specific, may be documented either centrally within a firm or in the audit documentation for an audit engagement. Documentation of matters specific to a particular engagement should be included in the audit file for the specific engagement.

Significant Findings or Issues

.14 The auditor should document significant findings or issues, actions taken to address them (including any additional evidence obtained), and the basis for the final conclusions reached. Judging the significance of a finding or issue requires an objective analysis of the facts and circumstances. Significant findings or issues include, but are not limited to, the following:

- a. Significant matters involving the selection, application, and consistency of accounting principles with regard to the financial statements, including related disclosures. Such matters include, but are not limited to (1) accounting for complex or unusual transactions or (2) accounting estimates and uncertainties and, if applicable, the related management assumptions.

- b. Results of audit procedures indicating (1) that the financial information or disclosures could be materially misstated or (2) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- c. Circumstances that cause the auditor significant difficulty in applying auditing procedures the auditor considered necessary,⁴ for example, the lack of responsiveness to confirmation or information requests, or the lack of original documents.
- d. Findings that could result in a modification of the auditor's report.
- e. Audit adjustments. For purposes of this section, an audit adjustment is a correction of a misstatement of the financial information that is identified by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial information.

.15 The auditor should document discussions of significant findings or issues with management and others on a timely basis, including responses. The audit documentation should include documentation of the significant findings or issues discussed, and when and with whom the discussions took place. It is not limited to documentation prepared by the auditor but may include other appropriate evidence, such as minutes of meetings prepared by the entity's personnel. Others with whom the auditor may discuss significant findings or issues include those charged with governance;⁵ those responsible for the oversight of the financial reporting process; other personnel within the entity, for example, internal audit; and external parties, such as persons providing professional services to the entity.

.16 If the auditor has identified information that contradicts or is inconsistent with the auditor's final conclusions regarding a significant finding or issue, the auditor should document how the auditor addressed the contradiction or inconsistency in forming the conclusion.

.17 The documentation of how the auditor addressed the contradiction or inconsistency, however, does not imply that the auditor needs to retain documentation that is incorrect or superseded (except as required by paragraph .30). The documentation of the contradiction or inconsistency may include, but is not limited to, procedures performed in response to the information, and records documenting consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

Identification of Preparer and Reviewer

.18 In documenting the nature, timing, and extent of audit procedures performed, the auditor should record:

- a. Who performed the audit work and the date such work was completed; and

⁴ See paragraphs .34b and .39 of section 380, *The Auditor's Communication With Those Charged With Governance*, for guidance regarding communication with those charged with governance of any serious difficulties encountered in dealing with management related to the performance of the audit. [Footnote revised, February 2008, to reflect conforming changes necessary due to the effective date of Statement on Auditing Standards No. 114.]

⁵ The term *those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting and disclosure process. In some cases, those charged with governance are responsible for approving the financial statements (in other cases, management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committees* expressed elsewhere in the Statements on Auditing Standards.

- b. Who reviewed specific audit documentation and the date of such review.

.19 The requirement to document who reviewed the audit work performed does not imply a need for each specific working paper to include evidence of review. It should be clear from the audit documentation who reviewed specified elements of the audit work performed and when.

Documentation of Specific Items Tested

.20 Audit documentation of procedures performed, including tests of operating effectiveness of controls and substantive tests of details that involve inspection of documents or confirmation should include the identifying characteristics of the specific items tested.

.21 Recording the identifying characteristics serves a number of purposes. For example, it improves the ability of the auditor to supervise and review the work performed and thus demonstrates the accountability of the audit team for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the subject matter. For example:

- For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over \$25,000 from the journal register).
- For a procedure requiring inquiries of specific entity personnel, the auditor may record the dates of the inquiries, the names and job designations of the entity personnel, and the inquiry made.
- For an observation procedure, the auditor may record the process or subject matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.
- For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point, and the sampling interval (for example, a systematic sample of shipping reports was selected from the shipping log for the period from X to Y, starting with report number 14564 and selecting every 250th report from that point).

Documentation of Departures From Statements on Auditing Standards

.22 As required by paragraph .04 of section 150, *Generally Accepted Auditing Standards*, as amended, when, in rare circumstances, the auditor departs from a presumptively mandatory requirement, the auditor must document in the working papers his or her justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Revisions to Audit Documentation After the Date of the Auditor's Report

.23 The auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion. Among other things, sufficient appropriate audit evidence includes evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that it has taken responsibility for them. This will ordinarily result in a report date that is close to the date the auditor grants the entity permission to use the auditor's report in connection with the financial statements (report release date).⁶ Delays in releasing the report may require the auditor to perform additional procedures to comply with the requirements of section 560, *Subsequent Events*, as amended.

Documentation of New Information

.24 If, as a result of consideration of the procedures performed and the evidence obtained, the auditor concludes that procedures considered necessary at the time of the audit in the circumstances then existing were omitted from the audit of the financial information, the auditor should follow the guidance in section 390, *Consideration of Omitted Procedures After the Report Date*. The audit documentation supporting the auditor's compliance with section 390 should be prepared in accordance with the requirements in this section.

.25 If the auditor subsequently becomes aware of information relating to financial information previously reported on by him or her, but that was not known to him or her at the date of the report, the auditor should follow the guidance in section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, as amended.

.26 In the circumstances described in paragraphs .24–.25, the auditor should make the changes necessary to reflect either the performance of the new audit procedure or the new conclusion reached, including:

- When and by whom such changes were made and (where applicable) reviewed;
- The specific reasons for the changes; and
- The effect, if any, of the changes on the auditor's conclusions.

Changes Resulting From the Process of Assembling and Completing the Audit File

.27 The auditor should complete the assembly of the final audit file on a timely basis, but within 60 days following the report release date (documentation completion date). Statutes, regulations, or the audit firm's quality control policies may specify a shorter period of time in which this assembly process should be completed.

⁶ In many cases, the report release date will be the date the auditor delivers the audit report to the entity.

.28 At anytime prior to the documentation completion date, the auditor may make changes to the audit documentation to:

- a. Complete the documentation and assembly of audit evidence that the auditor has obtained, discussed, and agreed with relevant members of the audit team prior to the date of the auditor's report;
- b. Perform routine file-assembling procedures such as deleting or discarding superseded documentation and sorting, collating, and cross-referencing final working papers;
- c. Sign off on file completion checklists prior to completing and archiving the audit file; and
- d. Add information received after the date of the auditor's report, for example, an original confirmation that was previously faxed.

.29 The report release date should be recorded in the audit documentation.

Changes After the Documentation Completion Date

.30 After the documentation completion date, the auditor must not delete or discard audit documentation before the end of the specified retention period, as discussed in paragraph .32. When the auditor finds it necessary to make an addition (including amendments) to audit documentation after the documentation completion date, the auditor should document the addition in accordance with paragraph .26.

Ownership and Confidentiality of Audit Documentation

.31 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes. The auditor may make available to the entity at the auditor's discretion copies of the audit documentation, provided such disclosure does not undermine the independence or the validity of the audit process.

.32 The auditor should adopt reasonable procedures to retain and access audit documentation for a period of time sufficient to meet the needs of his or her practice and to satisfy any applicable legal or regulatory requirements for records retention. Such retention period, however, should not be shorter than five years from the report release date. Statutes, regulations, or the audit firm's quality control policies may specify a longer retention period.

.33 The auditor has an ethical and, in some situations, a legal obligation to maintain the confidentiality of client information.⁷ Because audit documentation often contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information.

.34 Whether audit documentation is in paper, electronic, or other media, the integrity, accessibility, and retrievability of the underlying data may be compromised if the documentation could be altered, added to, or deleted without the auditor's knowledge, or could be permanently lost or damaged. Accordingly, the auditor should apply appropriate and reasonable controls for audit documentation to:

- a. Clearly determine when and by whom audit documentation was created, changed, or reviewed;

⁷ Also, see Rule 301, *Confidential Client Information*.

- b.* Protect the integrity of the information at all stages of the audit, especially when the information is shared within the audit team or transmitted to other parties via electronic means;
- c.* Prevent unauthorized changes to the documentation; and
- d.* Allow access to the documentation by the audit team and other authorized parties as necessary to properly discharge their responsibilities.

Effective Date

.35 This section is effective for audits of financial statements for periods ending on or after December 15, 2006. Earlier application is permitted.

Appendix A

Audit Documentation Requirements in Other Statements on Auditing Standards

- A1. Documentation requirements are included in other Statements on Auditing Standards (SASs). This section does not change the requirements in:
- a. Paragraph .05*d* of section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, to document in either the audit inquiry letter or a separate letter to the client's lawyer that the client has assured the auditor that the letter has disclosed all unasserted claims that the lawyer has advised the client are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 450, *Contingencies*. Also, this section does not change the requirement in paragraph .10 of section 337 to document the conclusions reached as a result of responses obtained in a conference relating to matters covered by the audit inquiry letter.
 - b. Paragraph .08 of section 311, *Planning and Supervision*, to establish an understanding with the client regarding the services to be performed for each engagement and to document the understanding through a written communication with the client.
 - c. Paragraph .19 of section 311 to develop an audit plan in which the auditor documents the audit procedures to be used that, when performed, are expected to reduce audit risk to an acceptably low level. Paragraph .21 of section 311 requires the auditor to document changes to the original audit plan.
 - d. Paragraph .69 of section 312, *Audit Risk and Materiality in Conducting an Audit*, to document (a) the levels of materiality and tolerable misstatement, including any changes thereto, used in the audit and the basis on which those levels were determined; (b) a summary of uncorrected misstatements, other than those that are trivial, related to known and likely misstatements; (c) the auditor's conclusion as to whether uncorrected misstatements, individually or in aggregate, do or do not cause the financial statements to be materially misstated, and the basis for that conclusion; and (d) all known and likely misstatements identified by the auditor during the audit, other than those that are trivial, that have been corrected by management.
 - e. Paragraph .70 of section 312 to document uncorrected misstatements in a manner that allows the auditor to (a) separately consider the effects of known and likely misstatements, including uncorrected misstatements identified in prior periods; (b) consider the aggregate effect of misstatements on the financial statements; and (c) consider the qualitative factors that are relevant to the auditor's consideration whether misstatements are material.
 - f. Paragraph .122 of section 314, *Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement*,

to document (a) the discussion among the audit team regarding the susceptibility of the entity's financial statements to material misstatement due to error or fraud, including how and when the discussion occurred, the subject matter discussed, the audit team members who participated, and significant decisions reached concerning planned responses at the financial statement and relevant assertion levels; (b) key elements of the understanding obtained regarding each of the aspects of the entity and its environment identified in paragraph .21, including each of the components of internal control identified in paragraph .41, that assess the risks of material misstatement of the financial statements; the sources of information from which the understanding was obtained; and the risk assessment procedures; (c) the assessment of the risks of material misstatement both at the financial statement level and at the relevant assertion level as required by paragraph .102 and the basis for the assessment; and (d) the risks identified and related controls evaluated as a result of the requirements in paragraphs .110 and .117.

- g. Paragraph .77 of section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, to document (a) the overall responses to address the assessed risks of misstatement at the financial statement level; (b) the nature, timing, and extent of the further audit procedures; (c) the linkage of those procedures with the assessed risks at the relevant assertion level; (d) the results of the audit procedures; and (e) the conclusions reached with regard to the use in the current audit of audit evidence about the operating effectiveness of controls that was obtained in a prior audit.
- h. Paragraph .02 of section 534, *Reporting on Financial Statements Prepared for Use in Other Countries*, to obtain written representations from management regarding the purpose and uses of financial statements prepared in conformity with the accounting principles of another country.
- i. Paragraph .17 of section 317, *Illegal Acts by Clients*, to document oral communications to the audit committee or others with equivalent authority and responsibility regarding illegal acts that come to the auditor's attention.
- j. Paragraph .22 of section 329, *Analytical Procedures*, to document (a) the expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development; (b) the results of the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts; and (c) any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures.
- k. Paragraph .71 of section 508, *Reports on Audited Financial Statements*, for the predecessor auditor to obtain representation letters from management of the former client and from the successor auditor before reissuing (or consenting to the reissue of) a report previously issued on the financial statements of a prior period.

- l.* Paragraph .18 of section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, to document (a) the conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern; (b) the work performed in connection with the auditor's evaluation of management's plans; (c) the auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated; and (d) the consideration and effect of that conclusion on the financial statements, disclosures, and the audit report.
- m.* Paragraph .64 of section 380, *The Auditor's Communication With Those Charged With Governance*, to document any matters that have been communicated orally. When matters have been communicated in writing, the auditor should retain a copy of the communication.
- n.* Paragraph .29 of section 330, *The Confirmation Process*, to document oral confirmations. Also, when the auditor has not requested confirmations in the examination of accounts receivable, this section does not change the requirement in paragraph .35 of section 330 to document how the auditor overcame this presumption.
- o.* Paragraphs .39–.42 of section 801, *Compliance Audits*, to document (a) the risk assessment procedures performed, including those related to gaining an understanding of internal control over compliance; (b) the auditor's responses to the assessed risks of material noncompliance, the procedures performed to test compliance with the applicable compliance requirements, and the results of those procedures, including any tests of controls over compliance; (c) materiality levels and the basis on which they were determined; and (d) how the auditor complied with the specific governmental audit requirements that are supplementary to GAAS and *Government Auditing Standards*.
- p.* Section 333, *Management Representations*, to obtain written representations from management.
- q.* Section 316, *Consideration of Fraud in a Financial Statement Audit*, to document (a) the discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed; (b) the procedures performed to obtain information necessary to identify and assess the risks of material misstatement due to fraud; (c) specific risks of material misstatement due to fraud that were identified and a description of the auditor's response to those risks; (d) if the auditor has not identified in a particular circumstance improper revenue recognition as a risk of material misstatement due to fraud, the reasons supporting the auditor's conclusion; (e) the results of the procedures performed to further address the risk of management override of controls; (f) other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate to address such risks or other conditions; and (g) the nature of the communications about fraud made to management, the audit committee, and others.

- r. Section 722, *Interim Financial Information*, to prepare documentation in connection with a review of interim financial information, the form and content of which should be designed to meet the circumstances of the particular engagement.

[Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112; Revised, December 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 107–110 and 114. Revised, February 2008, to reflect conforming changes necessary due to the effective date of Statement on Auditing Standards No. 108. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS No. 117.]

AU Section 9339

Audit Documentation: Auditing Interpretations of Section 339

1. Providing Access to or Copies of Audit Documentation to a Regulator^{1,2}

.01 Question—Section 339, *Audit Documentation*, paragraph .33, states that "the auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information. Because audit documentation often contains confidential client information, the auditor should adopt reasonable procedures to maintain the confidentiality of that information." However, auditors are sometimes required by law, regulation or audit contract,³ to provide a regulator, or a duly appointed representative, access to audit documentation. For example, a regulator may request access to the audit documentation to fulfill a quality review requirement or to assist in establishing the scope of a regulatory examination. Furthermore, as part of the regulator's review of the audit documentation, the regulator may request copies of all or selected portions of the audit documentation during or after the review. The regulator may intend, or decide, to make copies (or information derived from the audit documentation) available to others, including other governmental agencies, for their particular purposes, with or without the knowledge of the auditor or the client. When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation pursuant to law, regulation or audit contract, what steps should the auditor take?

.02 Interpretation—When a regulator requests access to audit documentation pursuant to law, regulation or audit contract, the auditor should take the following steps:

- a. Consider advising the client that the regulator has requested access to (and possibly copies of) the audit documentation and that the auditor intends to comply with such request.⁴

¹ The term "regulator(s)" includes federal, state and local government officials with legal oversight authority over the entity. Examples of regulators who may request access to audit documentation include, but are not limited to, state insurance and utility regulators, various health care authorities, and federal agencies such as the Federal Deposit Insurance Corporation, the Office of Thrift Supervision, the Department of Housing and Urban Development, the Department of Labor, and the Rural Electrification Administration.

² The guidance in this Interpretation does not apply to requests from the Internal Revenue Service, firm practice-monitoring programs to comply with AICPA or state professional requirements such as peer or quality reviews, proceedings relating to alleged ethics violations, or subpoenas.

³ For situations in which the auditor is not required by law, regulation or audit contract to provide a regulator access to the audit documentation, reference should be made to the guidance in paragraphs .11–.15 of this Interpretation.

⁴ The auditor may wish (and in some cases may be required by law, regulation, or audit contract) to confirm in writing with the client that the auditor may be required to provide a regulator access to the audit documentation. Sample language that may be used follows:

"The audit documentation for this engagement is the property of (*name of auditor*) and constitutes confidential information. However, we may be requested to make certain audit documentation available to (*name of regulator*) pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of (*name of auditor*) personnel. Furthermore, upon request, we may provide copies of selected audit documentation to (*name of regulator*). The (*name of regulator*) may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies."

- b. Make appropriate arrangements with the regulator for the review.
- c. Maintain control over the audit documentation, and
- d. Consider submitting the letter described in paragraph .05 of this Interpretation to the regulator.

.03 The auditor should make appropriate arrangements with the regulator. These arrangements ordinarily would include the specific details such as the date, time and location of the review. The audit documentation may be made available to a regulator at the offices of the client, the auditor, or a mutually agreed-upon location, so long as the auditor maintains control. Furthermore, the auditor should take appropriate steps to maintain control of the audit documentation. For example, the auditor (or his or her representative) should consider being present when the audit documentation is reviewed by the regulator. Maintaining control of audit documentation is necessary to ensure the continued integrity of the audit documentation and to ensure confidentiality of client information.

.04 Ordinarily, the auditor should not agree to transfer ownership of the audit documentation to a regulator. Furthermore, the auditor should not agree, without client authorization, that the information contained therein about the client may be communicated to or made available to any other party. In this regard, the action of an auditor providing access to, or copies of, the audit documentation shall not constitute transfer of ownership or authorization to make them available to any other party.

.05 An audit performed in accordance with generally accepted auditing standards is not intended to, and does not, satisfy a regulator's oversight responsibilities. To avoid any misunderstanding, prior to allowing a regulator access to the audit documentation, the auditor should consider submitting a letter to the regulator that:

- a. Sets forth the auditor's understanding of the purpose for which access is being requested
- b. Describes the audit process and the limitations inherent in a financial statement audit
- c. Explains the purpose for which the audit documentation was prepared, and that any individual conclusions must be read in the context of the auditor's report on the financial statements
- d. States, except when not applicable, that the audit was not planned or conducted in contemplation of the purpose for which access is being granted or to assess the entity's compliance with laws and regulations
- e. States that the audit and the audit documentation should not supplant other inquiries and procedures that should be undertaken by the regulator for its purposes
- f. Requests confidential treatment under the Freedom of Information Act or similar laws and regulations,⁵ when a request for the audit documentation is made, and that written notice be given to the auditor before transmitting any information contained in the audit documentation to others, including other governmental agencies, except when such transfer is required by law or regulation, and

⁵ The auditor may need to consult the regulations of individual agencies and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

- g. States that if any copies are to be provided, they will be identified as "Confidential Treatment Requested by (*name of auditor, address, telephone number*)."

The auditor may wish to obtain a signed acknowledgment copy of the letter as evidence of the regulator's receipt of the letter.

.06 An example of a letter containing the elements described in paragraph .05 of this Interpretation is presented below:

Illustrative Letter to Regulator⁶

(Date)

(Name and Address of Regulatory Agency)

Your representatives have requested access to our audit documentation in connection with our audit of the December 31, 20XX financial statements of (name of client). It is our understanding that the purpose of your request is (*state purpose: for example, "to facilitate your regulatory examination"*).⁷

Our audit of (*name of client*) December 31, 20XX financial statements was conducted in accordance with auditing standards generally accepted in the United States of America,⁸ the objective⁹ of which is to form an opinion as to whether the financial statements, which are the responsibility and representations of management, present fairly, in all material respects, the financial position, results of operations and cash flows in conformity with generally accepted accounting principles.¹⁰ Under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to design our audit to provide reasonable assurance that errors and fraud that have a material effect on the financial statements will be detected, and to exercise due care in the conduct of our audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and as to the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Thus, our audit, based on the concept of selective testing, is subject to the inherent risk that material errors or fraud, if they exist, would not be detected. In addition, an audit does not address the possibility that material errors or fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may have existed that would have been assessed differently by you.

⁶ The auditor should appropriately modify this letter when the audit has been performed in accordance with generally accepted auditing standards and also in accordance with additional auditing requirements specified by a regulatory agency (for example, the requirements specified in *Government Auditing Standards* issued by the Comptroller General of the United States).

⁷ If the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation but otherwise intends to provide such access (see paragraphs .11-.15 of this Interpretation), the letter should include a statement that: "Management of (*name of client*) has authorized us to provide you access to our audit documentation for (*state purpose*)."

⁸ Refer to footnote 6.

⁹ In an audit performed in accordance with the *Single Audit Act of 1984*, and certain other federal audit requirements, an additional objective of the audit is to assess compliance with laws and regulations applicable to federal financial assistance. Accordingly, in these situations, the above letter should be modified to include the additional objective.

¹⁰ If the financial statements have been prepared in conformity with regulatory accounting practices, the phrase "financial position, results of operations and cash flows in conformity with generally accepted accounting principles" should be replaced with appropriate wording such as, in the case of an insurance company, the "admitted assets, liabilities... of the XYZ Insurance Company in conformity with accounting practices prescribed or permitted by the state of... insurance department."

The audit documentation was prepared for the purpose of providing the principal support for our report on (*name of client*) December 31, 20XX financial statements and to aid in the conduct and supervision of our audit. The audit documentation is the principal record of auditing procedures performed, evidence obtained and conclusions reached in the engagement. The auditing procedures that we performed were limited to those we considered necessary under generally accepted auditing standards¹¹ to enable us to formulate and express an opinion on the financial statements¹² taken as a whole. Accordingly, we make no representation as to the sufficiency or appropriateness, for your purposes, of either the information contained in our audit documentation or our auditing procedures. In addition, any notations, comments, and individual conclusions appearing on any of the audit documents do not stand alone, and should not be read as an opinion on any individual amounts, accounts, balances or transactions.

Our audit of (*name of client*) December 31, 20XX financial statements was performed for the purpose stated above and has not been planned or conducted in contemplation of your (*state purpose: for example, "regulatory examination"*) or for the purpose of assessing (*name of client*) compliance with laws and regulations.¹³ Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our audit and the audit documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the (*name of regulatory agency*) for the purpose of monitoring and regulating the financial affairs of the (*name of client*). In addition, we have not audited any financial statements of (*name of client*) since (*date of audited balance sheet referred to in the first paragraph above*) nor have we performed any auditing procedures since (*date*), the date of our auditor's report, and significant events or circumstances may have occurred since that date.

The audit documentation constitutes and reflects work performed or evidence obtained by (*name of auditor*) in its capacity as independent auditor for (*name of client*). The documents contain trade secrets and confidential commercial and financial information of our firm and (*name of client*) that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations¹⁴ when requests are made for the audit documentation or information contained therein or any documents created by the (*name of regulatory agency*) containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the audit documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.

[If it is expected that copies will be requested, add:

Any copies of our audit documentation we agree to provide you will be identified as "Confidential Treatment Requested by (*name of auditor; address, telephone number*)."]

Firm signature

¹¹ Refer to footnote 6.

¹² Refer to footnote 9.

¹³ Refer to footnote 9.

¹⁴ This illustrative paragraph may not in and of itself be sufficient to gain confidential treatment under the rules and regulations of certain regulatory agencies. The auditor should consider tailoring this paragraph to the circumstances after consulting the regulations of each applicable regulatory agency and, if necessary, consult with legal counsel regarding the specific procedures and requirements to gain confidential treatment.

.07 Question—A regulator may request access to the audit documentation before the audit has been completed and the report released. May the auditor allow access in such circumstances?

.08 Interpretation—When the audit has not been completed, the audit documentation is necessarily incomplete because (a) additional information may be added as a result of further tests and review by supervisory personnel and (b) any audit results and conclusions reflected in the incomplete audit documentation may change. Accordingly, it is preferable that access be delayed until all auditing procedures have been completed and all internal reviews have been performed. If access is provided prior to completion of the audit, the auditor should consider issuing the letter referred to in paragraph .05 of this Interpretation, appropriately modified, and including additional language along the following lines:

"We have been engaged to audit in accordance with auditing standards generally accepted in the United States of America the December 31, 20XX, financial statements of XYZ Company, but have not as yet completed our audit. Accordingly, at this time we do not express any opinion on the Company's financial statements. Furthermore, the contents of the audit documentation may change as a result of additional auditing procedures and review of the audit documentation by supervisory personnel of our firm. Accordingly, our audit documentation is incomplete."

Because the audit documentation may change prior to completion of the audit, the auditor ordinarily should not provide copies of the audit documentation until the audit has been completed.

.09 Question—Some regulators may engage an independent party, such as another independent public accountant, to perform the audit documentation review on behalf of the regulatory agency. Are there any special precautions the auditor should observe in these circumstances?

.10 Interpretation—The auditor should be satisfied that the party engaged by the regulator is subject to the same confidentiality restrictions as the regulatory agency itself. This can be accomplished by obtaining acknowledgment, preferably in writing, from the regulator stating that the third party is acting on behalf of the regulator and agreement from the third party that he or she is subject to the same restrictions on disclosure and use of audit documentation and the information contained therein as the regulator.

.11 Question—When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation and the auditor is not otherwise required by law, regulation or audit contract to provide such access, what steps should the auditor take?

.12 Interpretation—The auditor should obtain an understanding of the reasons for the regulator's request for access to the audit documentation and may wish to consider consulting with legal counsel regarding the request. If the auditor decides to provide such access, the auditor should obtain the client's consent, preferably in writing, to provide the regulator access to the audit documentation.

.13 Following is an example of language that may be used in the written communication to the client:

"The audit documentation for this engagement is the property of (*name of auditor*) and constitutes confidential information. However, we have been requested to make certain audit documentation available to (*name of regulator*)

for *(describe the regulator's basis for its request)*. Access to such audit documentation will be provided under the supervision of *(name of auditor)* personnel. Furthermore, upon request, we may provide copies of selected audit documentation to *(name of regulator)*.

"You have authorized *(name of auditor)* to allow *(name of regulator)* access to the audit documentation in the manner discussed above. Please confirm your agreement to the above by signing below and returning to *(name of auditor; address)*."

Firm signature

Agreed and acknowledged:

(Name and title)

(Date)

.14 If the client requests to review the audit documentation before allowing the regulator access, the auditor may provide the client with the opportunity to obtain an understanding of the nature of the information about its financial statements contained in the audit documentation that is being made available to the regulator. When a client reviews the audit documentation, the auditor should maintain control of the audit documentation as discussed in paragraph .03 of this Interpretation.

.15 The auditor should also refer to the guidance in paragraphs .03–.10 of this Interpretation which provide guidance on making arrangements with the regulator for access to the audit documentation, maintaining control over the audit documentation and submitting a letter describing various matters to the regulator.

AU Section 341

The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*

(Supersedes section 340.)

Source: SAS No. 59; SAS No. 64; SAS No. 77; SAS No. 96; SAS No. 113; SAS No. 114.

See section 9341 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance to the auditor in conducting an audit of financial statements in accordance with generally accepted auditing standards with respect to evaluating whether there is substantial doubt about the entity's ability to continue as a going concern.^{1,2} Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions.

The Auditor's Responsibility

.02 The auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited (hereinafter referred to as *a reasonable period of time*). The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.

* The Financial Accounting Standards Board (FASB) has issued proposed Statement of Financial Accounting Standards *Going Concern* to (a) provide guidance on the preparation of financial statements as a going concern and on management's responsibility to evaluate a reporting entity's ability to continue as a going concern and (b) require disclosures when either financial statements are not prepared on a going concern basis or there is substantial doubt as to an entity's ability to continue as a going concern. FASB has decided that this guidance also belongs in the accounting literature because it is management's responsibility to assess the ongoing viability of the reporting entity. The proposed statement would amend FASB *Accounting Standards Codification*TM by inserting subtopic 30, *Going Concern*, to topic 205, *Presentation of Financial Statements*. Readers are encouraged to consult FASB ASC for guidance regarding going concern.

¹ This section does not apply to an audit of financial statements based on the assumption of liquidation (for example, when [a] an entity is in the process of liquidation, [b] the owners have decided to commence dissolution or liquidation, or [c] legal proceedings, including bankruptcy, have reached a point at which dissolution or liquidation is probable). See Auditing Interpretation, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting" (section 9508.33–38).

² The guidance provided in this section applies to audits of financial statements prepared either in accordance with generally accepted accounting principles or in accordance with a comprehensive basis of accounting other than generally accepted accounting principles. References in this section to generally accepted accounting principles are intended to include a comprehensive basis of accounting other than generally accepted accounting principles (excluding liquidation basis).

Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited, as described in section 326, *Audit Evidence*. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106. As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.03 The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time in the following manner:

- a. The auditor considers whether the results of his procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. It may be necessary to obtain additional information about such conditions and events, as well as the appropriate audit evidence to support information that mitigates the auditor's doubt.
- b. If the auditor believes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, he should (1) obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and (2) assess the likelihood that such plans can be effectively implemented.
- c. After the auditor has evaluated management's plans, he concludes whether he has substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If the auditor concludes there is substantial doubt, he should (1) consider the adequacy of disclosure about the entity's possible inability to continue as a going concern for a reasonable period of time, and (2) include an explanatory paragraph (following the opinion paragraph) in his audit report to reflect his conclusion. If the auditor concludes that substantial doubt does not exist, he should consider the need for disclosure.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.04 The auditor is not responsible for predicting future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of reference to substantial doubt in an auditor's report should not be viewed as providing assurance as to an entity's ability to continue as a going concern.

Audit Procedures

.05 It is not necessary to design audit procedures solely to identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

The following are examples of procedures that may identify such conditions and events:

- Analytical procedures
- Review of subsequent events
- Review of compliance with the terms of debt and loan agreements
- Reading of minutes of meetings of stockholders, board of directors, and important committees of the board
- Inquiry of an entity's legal counsel about litigation, claims, and assessments
- Confirmation with related and third parties of the details of arrangements to provide or maintain financial support

Consideration of Conditions and Events

.06 In performing audit procedures such as those presented in paragraph .05, the auditor may identify information about certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The significance of such conditions and events will depend on the circumstances, and some may have significance only when viewed in conjunction with others. The following are examples of such conditions and events:

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood

Consideration of Management's Plans

.07 If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he should consider management's plans for dealing with the adverse effects of the conditions and events. The auditor should obtain information about the plans and consider whether it is likely the adverse effects will be mitigated for a reasonable period of time and that such plans can be effectively implemented.

The auditor's considerations relating to management plans may include the following:

- Plans to dispose of assets
 - Restrictions on disposal of assets, such as covenants limiting such transactions in loan or similar agreements or encumbrances against assets
 - Apparent marketability of assets that management plans to sell
 - Possible direct or indirect effects of disposal of assets
- Plans to borrow money or restructure debt
 - Availability of debt financing, including existing or committed credit arrangements, such as lines of credit or arrangements for factoring receivables or sale-leaseback of assets
 - Existing or committed arrangements to restructure or subordinate debt or to guarantee loans to the entity
 - Possible effects on management's borrowing plans of existing restrictions on additional borrowing or the sufficiency of available collateral
- Plans to reduce or delay expenditures
 - Apparent feasibility of plans to reduce overhead or administrative expenditures, to postpone maintenance or research and development projects, or to lease rather than purchase assets
 - Possible direct or indirect effects of reduced or delayed expenditures
- Plans to increase ownership equity
 - Apparent feasibility of plans to increase ownership equity, including existing or committed arrangements to raise additional capital
 - Existing or committed arrangements to reduce current dividend requirements or to accelerate cash distributions from affiliates or other investors

.08 When evaluating management's plans, the auditor should identify those elements that are particularly significant to overcoming the adverse effects of the conditions and events and should plan and perform auditing procedures to obtain audit evidence about them. For example, the auditor should consider the adequacy of support regarding the ability to obtain additional financing or the planned disposal of assets. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.09 When prospective financial information is particularly significant to management's plans, the auditor should request management to provide that information and should consider the adequacy of support for significant assumptions underlying that information. The auditor should give particular attention to assumptions that are—

- Material to the prospective financial information.
- Especially sensitive or susceptible to change.
- Inconsistent with historical trends.

The auditor's consideration should be based on knowledge of the entity, its business, and its management and should include (a) reading of the prospective financial information and the underlying assumptions and (b) comparing prospective financial information in prior periods with actual results and comparing prospective information for the current period with results achieved to date. If the auditor becomes aware of factors, the effects of which are not

reflected in such prospective financial information, he should discuss those factors with management and, if necessary, request revision of the prospective financial information.

Consideration of Financial Statement Effects

.10 When, after considering management's plans, the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider the possible effects on the financial statements and the adequacy of the related disclosure. Some of the information that might be disclosed includes—

- Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- The possible effects of such conditions and events.
- Management's evaluation of the significance of those conditions and events and any mitigating factors.
- Possible discontinuance of operations.
- Management's plans (including relevant prospective financial information).³
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities.

.11 When, primarily because of the auditor's consideration of management's plans, he concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time is alleviated, he should consider the need for disclosure of the principal conditions and events that initially caused him to believe there was substantial doubt. The auditor's consideration of disclosure should include the possible effects of such conditions and events, and any mitigating factors, including management's plans.

Consideration of the Effects on the Auditor's Report

.12 If, after considering identified conditions and events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the audit report should include an explanatory paragraph (following the opinion paragraph) to reflect that conclusion.⁴ The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" [or similar wording that includes the terms substantial doubt *and* going concern] as illustrated in paragraph .13. [As amended, effective for

³ It is not intended that such prospective financial information constitute prospective financial statements meeting the minimum presentation guidelines set forth in AT section 301, *Financial Forecasts and Projections*, nor that the inclusion of such information require any consideration beyond that normally required by generally accepted auditing standards. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

⁴ The inclusion of an explanatory paragraph (following the opinion paragraph) in the auditor's report contemplated by this section should serve adequately to inform the users of the financial statements. Nothing in this section, however, is intended to preclude an auditor from declining to express an opinion in cases involving uncertainties. If he disclaims an opinion, the uncertainties and their possible effects on the financial statements should be disclosed in an appropriate manner (see paragraph .10), and the auditor's report should give all the substantive reasons for his disclaimer of opinion (see section 508, *Reports on Audited Financial Statements*).

reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

.13 An example follows of an explanatory paragraph (following the opinion paragraph) in the auditor's report describing an uncertainty about the entity's ability to continue as a going concern for a reasonable period of time.⁵

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

[As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

.14 If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, a departure from generally accepted accounting principles exists. This may result in either a qualified (except for) or an adverse opinion. Reporting guidance for such situations is provided in section 508, *Reports on Audited Financial Statements*.

.15 Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, should not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. When financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period, reporting guidance is provided in section 508.

.16 If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis, and that doubt has been removed in the current period, the explanatory paragraph included in the auditor's report (following the opinion paragraph) on the financial statements of the prior period should not be repeated.

Communication With Those Charged With Governance

.17 If, after considering identified conditions and events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate with those charged with governance:

- a. The nature of the events or conditions identified.
- b. The possible effect on the financial statements and the adequacy of related disclosures in the financial statements.

⁵ In a going-concern explanatory paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern. Examples of inappropriate wording in the explanatory paragraph would be, "If the Company continues to suffer recurring losses from operations and continues to have a net capital deficiency, there may be substantial doubt about its ability to continue as a going concern" or "The Company has been unable to renegotiate its expiring credit agreements. Unless the Company is able to obtain financial support, there is substantial doubt about its ability to continue as a going concern." [Footnote added, effective for reports issued after December 15, 1995, by Statement on Auditing Standards No. 77.]

- c. The effects on the auditor's report.

[Paragraph added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 114.]

Documentation

.18 As stated in paragraph .03 of this section, the auditor considers whether the results of the auditing procedures performed in planning, gathering audit evidence relative to the various audit objectives, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If, after considering the identified conditions and events in the aggregate, the auditor believes there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, he or she follows the guidance in paragraphs .07–.16. In connection with that guidance, the auditor should document all of the following:

- a. The conditions or events that led him or her to believe that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- b. The elements of management's plans that the auditor considered to be particularly significant to overcoming the adverse effects of the conditions or events.
- c. The auditing procedures performed and evidence obtained to evaluate the significant elements of management's plans.
- d. The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated. If substantial doubt remains, the auditor also should document the possible effects of the conditions or events on the financial statements and the adequacy of the related disclosures. If substantial doubt is alleviated, the auditor also should document the conclusion as to the need for disclosure of the principal conditions and events that initially caused him or her to believe there was substantial doubt.
- e. The auditor's conclusion as to whether he or she should include an explanatory paragraph in the audit report. If disclosures with respect to an entity's ability to continue as a going concern are inadequate, the auditor also should document the conclusion as to whether to express a qualified or adverse opinion for the resultant departure from generally accepted accounting principles.

[Paragraph added, effective for audits of financial statements for periods beginning on or after May 15, 2002, by Statement on Auditing Standards No. 96. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 114, December 2006.]

Effective Date

.19 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this

section is permissible. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 96, January 2002. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 114, December 2006.]

AU Section 9341

The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern: Auditing Interpretations of Section 341

1. Eliminating a Going-Concern Explanatory Paragraph From a Reissued Report

.01 Question—An auditor may be asked to reissue his or her report on financial statements and eliminate the going-concern explanatory paragraph that appeared in the original report. Such requests ordinarily occur after the conditions that gave rise to substantial doubt about the entity's ability to continue as a going concern have been resolved. For example, subsequent to the date of the auditor's original report, an entity might obtain needed financing. In such circumstances, may the auditor reissue his or her report and eliminate the going-concern explanatory paragraph that appeared in the original report?

.02 Interpretation—An auditor has no obligation to reissue his or her report.¹ However, if the auditor decides to reissue the report,² the auditor should perform the following procedures when determining whether to reissue the report without the going-concern explanatory paragraph that appeared in the original report:

- Audit the event or transaction that prompted the request to reissue the report without the going-concern explanatory paragraph.
- Perform the procedures listed in section 560, *Subsequent Events*, paragraph .12, at or near the date of reissuance.
- Consider the factors described in section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, paragraphs .06 through .11, based on the conditions and circumstances at the date of reissuance.

The auditor may perform any other procedures that he or she deems necessary in the circumstances. Based on the information that the auditor becomes aware of as a result of performing the procedures mentioned above, the auditor should reassess the going-concern status of the entity.

[Issue Date: August, 1995.]

[2.] Effect of the Year 2000 Issue on the Auditor's Consideration of an Entity's Ability to Continue as a Going Concern

[.03–.27] [Withdrawn July 2000 by the Audit Issues Task Force.]

¹ If the auditor decides not to reissue his or her report, the auditor may agree to be engaged to audit the financial statements for a period subsequent to that covered by the original report. This might be the case, for example, if the entity is experiencing profitable operations.

² Section 530, *Dating of the Independent Auditor's Report*, paragraph .05, states that an auditor may either "dual-date" or "later-date" his or her reissued report.

AU Section 342

Auditing Accounting Estimates

Source: SAS No. 57; SAS No. 113.

See section 9342 for interpretations of this section.

Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.

.01 This section provides guidance to auditors on obtaining and evaluating sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements in accordance with generally accepted auditing standards. For purposes of this section, an *accounting estimate* is an approximation of a financial statement element, item, or account. Accounting estimates are often included in historical financial statements because—

- a. The measurement of some amounts or the valuation of some accounts is uncertain, pending the outcome of future events.
- b. Relevant data concerning events that have already occurred cannot be accumulated on a timely, cost-effective basis.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.02 Accounting estimates in historical financial statements measure the effects of past business transactions or events, or the present status of an asset or liability. Examples of accounting estimates include net realizable values of inventory and accounts receivable, property and casualty insurance loss reserves, revenues from contracts accounted for by the percentage-of-completion method, and pension and warranty expenses.¹

.03 Management is responsible for making the accounting estimates included in the financial statements. Estimates are based on subjective as well as objective factors and, as a result, judgment is required to estimate an amount at the date of the financial statements. Management's judgment is normally based on its knowledge and experience about past and current events and its assumptions about conditions it expects to exist and courses of action it expects to take.

.04 The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole. As estimates are based on subjective as well as objective factors, it may be difficult for management to establish controls over them. Even when management's estimation process involves competent personnel using relevant and reliable data, there is potential for bias in the subjective factors. Accordingly, when planning and performing procedures to evaluate accounting estimates, the auditor should consider, with an attitude of professional skepticism, both the subjective and objective factors.

¹ Additional examples of accounting estimates included in historical financial statements are presented in paragraph .16.

Developing Accounting Estimates

.05 Management is responsible for establishing a process for preparing accounting estimates. Although the process may not be documented or formally applied, it normally consists of—

- a. Identifying situations for which accounting estimates are required.
- b. Identifying the relevant factors that may affect the accounting estimate.
- c. Accumulating relevant, sufficient, and reliable data on which to base the estimate.
- d. Developing assumptions that represent management's judgment of the most likely circumstances and events with respect to the relevant factors.
- e. Determining the estimated amount based on the assumptions and other relevant factors.
- f. Determining that the accounting estimate is presented in conformity with applicable accounting principles and that disclosure is adequate.

The risk of material misstatement of accounting estimates normally varies with the complexity and subjectivity associated with the process, the availability and reliability of relevant data, the number and significance of assumptions that are made, and the degree of uncertainty associated with the assumptions.

Internal Control Related to Accounting Estimates

.06 An entity's internal control may reduce the likelihood of material misstatements of accounting estimates. Specific relevant aspects of internal control include the following:

- a. Management communication of the need for proper accounting estimates
- b. Accumulation of relevant, sufficient, and reliable data on which to base an accounting estimate
- c. Preparation of the accounting estimate by qualified personnel
- d. Adequate review and approval of the accounting estimates by appropriate levels of authority, including—
 1. Review of sources of relevant factors
 2. Review of development of assumptions
 3. Review of reasonableness of assumptions and resulting estimates
 4. Consideration of the need to use the work of specialists
 5. Consideration of changes in previously established methods to arrive at accounting estimates
- e. Comparison of prior accounting estimates with subsequent results to assess the reliability of the process used to develop estimates
- f. Consideration by management of whether the resulting accounting estimate is consistent with the operational plans of the entity.

Evaluating Accounting Estimates

.07 The auditor's objective when evaluating accounting estimates is to obtain sufficient appropriate audit evidence to provide reasonable assurance that—

- a. All accounting estimates that could be material to the financial statements have been developed.
- b. Those accounting estimates are reasonable in the circumstances.
- c. The accounting estimates are presented in conformity with applicable accounting principles^[2] and are properly disclosed.³

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Identifying Circumstances That Require Accounting Estimates

.08 In evaluating whether management has identified all accounting estimates that could be material to the financial statements, the auditor considers the circumstances of the industry or industries in which the entity operates, its methods of conducting business, new accounting pronouncements, and other external factors. The auditor should consider performing the following procedures:

- a. Consider assertions embodied in the financial statements to determine the need for estimates. (See paragraph .16 for examples of accounting estimates included in financial statements.)
- b. Evaluate information obtained in performing other procedures, such as—
 1. Information about changes made or planned in the entity's business, including changes in operating strategy, and the industry in which the entity operates that may indicate the need to make an accounting estimate (section 311, *Planning and Supervision*).
 2. Changes in the methods of accumulating information.
 3. Information concerning identified litigation, claims, and assessments (section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*), and other contingencies.
 4. Information from reading available minutes of meetings of stockholders, directors, and appropriate committees.
 5. Information contained in regulatory or examination reports, supervisory correspondence, and similar materials from applicable regulatory agencies.
- c. Inquire of management about the existence of circumstances that may indicate the need to make an accounting estimate.

Evaluating Reasonableness

.09 In evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are—

- a. Significant to the accounting estimate.
- b. Sensitive to variations.
- c. Deviations from historical patterns.
- d. Subjective and susceptible to misstatement and bias.

^[2] [Footnote deleted, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

³ Section 431, *Adequacy of Disclosure in Financial Statements*, discusses the auditor's responsibility to consider whether the financial statements include adequate disclosures of material matters in light of the circumstances and facts of which he is aware.

The auditor normally should consider the historical experience of the entity in making past estimates as well as the auditor's experience in the industry. However, changes in facts, circumstances, or entity's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.⁴

.10 In evaluating reasonableness, the auditor should obtain an understanding of how management developed the estimate. Based on that understanding, the auditor should use one or a combination of the following approaches:

- a. Review and test the process used by management to develop the estimate.
- b. Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate.
- c. Review subsequent events or transactions occurring prior to the date of the auditor's report.

[As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.11 Review and test management's process. In many situations, the auditor assesses the reasonableness of an accounting estimate by performing procedures to test the process used by management to make the estimate. The following are procedures the auditor may consider performing when using this approach:

- a. Identify whether there are controls over the preparation of accounting estimates and supporting data that may be useful in the evaluation.
- b. Identify the sources of data and factors that management used in forming the assumptions, and consider whether such data and factors are relevant, reliable, and sufficient for the purpose based on information gathered in other audit tests.
- c. Consider whether there are additional key factors or alternative assumptions about the factors.
- d. Evaluate whether the assumptions are consistent with each other, the supporting data, relevant historical data, and industry data.
- e. Analyze historical data used in developing the assumptions to assess whether the data is comparable and consistent with data of the period under audit, and consider whether such data is sufficiently reliable for the purpose.
- f. Consider whether changes in the business or industry may cause other factors to become significant to the assumptions.
- g. Review available documentation of the assumptions used in developing the accounting estimates and inquire about any other plans, goals, and objectives of the entity, as well as consider their relationship to the assumptions.
- h. Consider using the work of a specialist regarding certain assumptions (section 336, *Using the Work of a Specialist*).
- i. Test the calculations used by management to translate the assumptions and key factors into the accounting estimate.

⁴ In addition to other evidential matter about the estimate, in certain instances, the auditor may wish to obtain written representation from management regarding the key factors and assumptions.

.12 *Develop an expectation.* Based on the auditor's understanding of the facts and circumstances, he may independently develop an expectation as to the estimate by using other key factors or alternative assumptions about those factors.

.13 *Review subsequent events or transactions.* Events or transactions sometimes occur subsequent to the date of the balance sheet, but prior to the date of the auditor's report, that are important in identifying and evaluating the reasonableness of accounting estimates or key factors or assumptions used in the preparation of the estimate. In such circumstances, an evaluation of the estimate or of a key factor or assumption may be minimized or unnecessary as the event or transaction can be used by the auditor in evaluating their reasonableness. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 113.]

.14 As discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .56, the auditor evaluates the reasonableness of accounting estimates in relationship to the financial statements taken as a whole:

Because no one accounting estimate can be considered accurate with certainty, the auditor may determine that a difference between an estimated amount best supported by the audit evidence and the estimated amount included in the financial statements may not be significant, and such difference would not be considered to be a likely misstatement. However, if the auditor believes the estimated amount included in the financial statements is unreasonable, he or she should treat the difference between that estimate and the closest reasonable estimate as a likely misstatement.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 107.]

Effective Date

.15 This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible.

.16

Appendix

Examples of Accounting Estimates

The following are examples of accounting estimates that are included in financial statements. The list is presented for information only. It should not be considered all-inclusive.

Receivables:

- Uncollectible receivables
- Allowance for loan losses
- Uncollectible pledges

Inventories:

- Obsolete inventory
- Net realizable value of inventories where future selling prices and future costs are involved
- Losses on purchase commitments

Financial instruments:

- Valuation of securities
- Trading versus investment security classification
- Probability of high correlation of a hedge
- Sales of securities with puts and calls

Productive facilities, natural resources and intangibles:

- Useful lives and residual values
- Depreciation and amortization methods
- Recoverability of costs
- Recoverable reserves

Accruals:

- Property and casualty insurance company loss reserves
- Compensation in stock option plans and deferred plans
- Warranty claims
- Taxes on real and personal property
- Renegotiation refunds
- Actuarial assumptions in pension costs

Revenues:

- Airline passenger revenue
- Subscription income
- Freight and cargo revenue
- Dues income
- Losses on sales contracts

Contracts:

- Revenue to be earned
- Costs to be incurred
- Percent of completion

Leases:

- Initial direct costs
- Executory costs
- Residual values

Litigation:

- Probability of loss
- Amount of loss

Rates:

- Annual effective tax rate in interim reporting
- Imputed interest rates on receivables and payables
- Gross profit rates under program method of accounting

Other:

- Losses and net realizable value on disposal of segment or restructuring of a business
- Fair values in nonmonetary exchanges
- Interim period costs in interim reporting
- Current values in personal financial statements

AU Section 9342

Auditing Accounting Estimates: Auditing Interpretations of Section 342

1. Performance and Reporting Guidance Related to Fair Value Disclosures

.01 Question—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 825, *Financial Instruments*, requires all entities to disclose the fair value of certain financial instruments for which it is practicable to estimate fair value. Some entities may disclose the information required by FASB ASC 825 and also disclose voluntarily the fair value of assets and liabilities not encompassed by FASB ASC 825. What are the auditor's responsibilities in situations in which entities are disclosing required or both required and voluntary fair value financial information?

.02 Interpretation—The auditor should determine whether the fair value disclosures represent only those required by FASB ASC 825 or whether additional voluntary fair value information has been disclosed by the entity. When auditing management's estimate of both required and voluntary fair value information, the auditor should obtain sufficient appropriate audit evidence to reasonably assure that

- the valuation principles are acceptable, are being consistently applied, and are supported by the underlying documentation, and
- the method of estimation and significant assumptions used are properly disclosed.

If such assurance cannot be obtained, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

.03 Required Information Presented. When an entity discloses in its basic financial statements only information required by FASB ASC 825, the auditor may issue a standard unqualified opinion (assuming no other report modifications are necessary). The auditor may add an emphasis-of-matter paragraph describing the nature and possible range of such fair value information especially when management's best estimate of value is used in the absence of quoted market values and the range of possible values is significant. If the entity has not disclosed required fair value information, the auditor should evaluate whether the financial statements are materially affected by the departure from generally accepted accounting principles.

.04 Required and Voluntary Information Presented. When voluntary information is presented in addition to required information the auditor may audit the voluntary information only if both the following conditions exist:

- The measurement and disclosure criteria used to prepare the fair value financial information are reasonable.
- Competent persons using the measurement and disclosure criteria would ordinarily obtain materially similar measurements or disclosures.

In applying this guidance to fair value disclosures, the intention is that another auditor would reach similar conclusions regarding the reasonableness of the valuation or estimation techniques and methods used by the entity.

.05 Voluntary disclosures may supplement required disclosures in such a fashion as to constitute either a complete balance sheet (the fair value of all material items in the balance sheet) or a presentation of less than a complete balance sheet.

.06 When the audited disclosures constitute a complete balance sheet presentation, the auditor should add a paragraph to the report, similar to the following:

We have also audited in accordance with auditing standards generally accepted in the United States of America the supplemental fair value balance sheet of ABC Company as of December 31, 20XX. As described in Note X, the supplemental fair value balance sheet has been prepared by management to present relevant financial information that is not provided by the historical-cost balance sheets and is not intended to be a presentation in conformity with generally accepted accounting principles. In addition, the supplemental fair value balance sheet does not purport to present the net realizable, liquidation, or market value of ABC Company as a whole. Furthermore, amounts ultimately realized by ABC Company from the disposal of assets may vary significantly from the fair values presented. In our opinion, the supplemental fair value balance sheet referred to above presents fairly, in all material respects, the information set forth therein as described in Note X.

.07 When the audited disclosures do not constitute a complete balance sheet presentation and are located on the face of the financial statements or in the notes, the auditor may issue a standard unqualified opinion and need not mention the disclosures in the report. When the audited disclosures do not constitute a complete balance sheet presentation and are included in a supplemental schedule or exhibit, the auditor should report on the audited disclosures in either (a) an explanatory paragraph following the opinion paragraph in the auditor's report on the financial statements or (b) in a separate report on the audited disclosures as discussed in paragraph .09 of section 551, *Supplementary Information in Relation to the Financial Statements as a Whole*.

.08 In some situations, the auditor may not be engaged to audit the voluntary information or may be unable to audit it because it does not meet both conditions in paragraph .04 of this interpretation. When the unaudited voluntary disclosures are located on the face of the financial statements, the notes, or in a supplemental schedule to the basic financial statements, the auditor is not required to reference the unaudited information in the auditor's report on the financial statements. However, the auditor may include an other matter paragraph disclaiming an opinion on the unaudited information as discussed in paragraph .A1 of section 550.

[.09] [Paragraph deleted, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

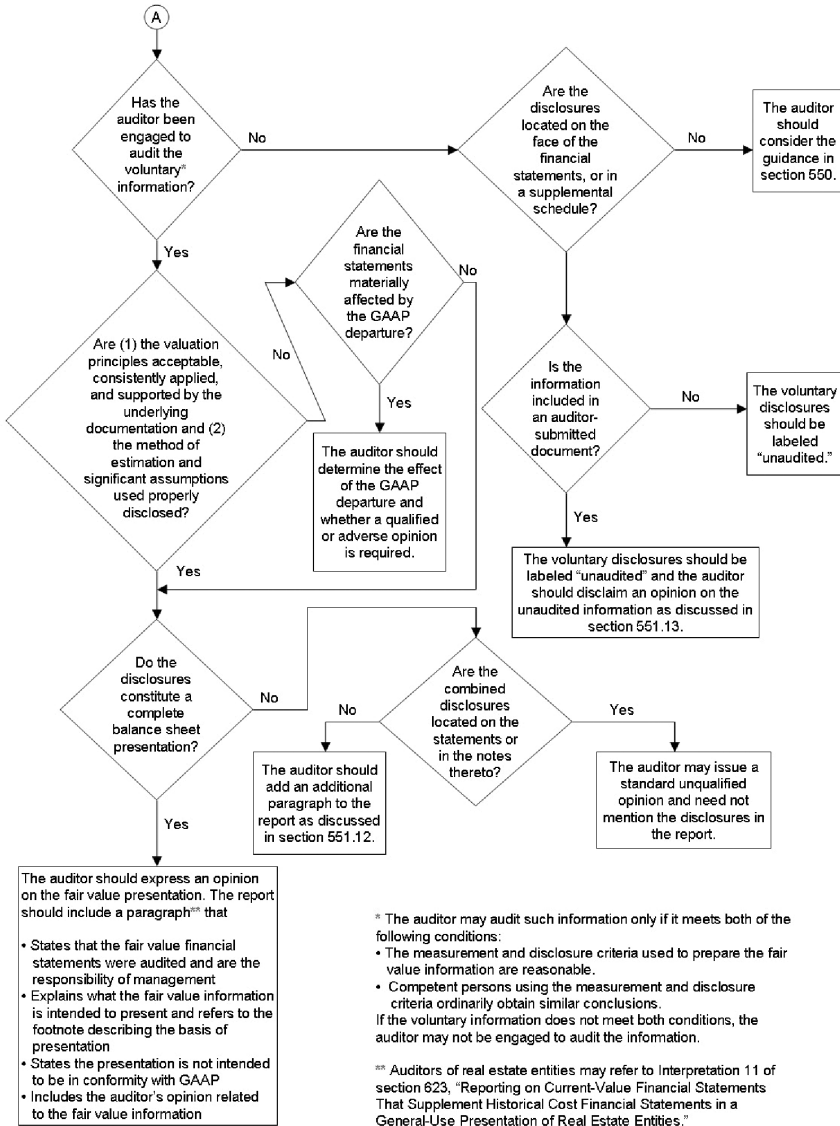

.10 The auditing guidance related to each of these alternatives is presented in the following flowcharts:

AUDITING GUIDANCE FOR FAIR VALUE INFORMATION Required* Information Only

AU Section 350

Audit Sampling

(Supersedes SAS No. 1, sections 320A and 320B.)

Source: SAS No. 39; SAS No. 43; SAS No. 45; SAS No. 111.

See section 9350 for interpretations of this section.

Effective for periods ended on or after June 25, 1983, unless otherwise indicated.

.01 Audit sampling is the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.¹ This section provides guidance for planning, performing, and evaluating audit samples.

.02 The auditor often is aware of account balances and transactions that may be more likely to contain misstatements.² He considers this knowledge in planning his procedures, including audit sampling. The auditor usually will have no special knowledge about other account balances and transactions that, in his judgment, will need to be tested to fulfill his audit objectives. Audit sampling is especially useful in these cases.

.03 There are two general approaches to audit sampling: nonstatistical and statistical. Both approaches require that the auditor use professional judgment in planning, performing, and evaluating a sample and in relating the audit evidence produced by the sample to other audit evidence when forming a conclusion about the related account balance or class of transactions. The guidance in this section applies equally to nonstatistical and statistical sampling. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.04 The third standard of field work states, "The auditor must obtain sufficient appropriate audit evidence by performing audit procedures to afford a reasonable basis for an opinion regarding the financial statements under audit." Either approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.05 The sufficiency of audit evidence is related to the design and size of an audit sample, among other factors. The size of a sample necessary to provide sufficient audit evidence depends on both the objectives and the efficiency of the sample. For a given objective, the efficiency of the sample relates to its design; one sample is more efficient than another if it can achieve the same objectives with a smaller sample size. In general, careful design can produce more efficient

¹ There may be other reasons for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For example, an auditor may examine only a few transactions from an account balance or class of transactions to (a) gain an understanding of the nature of an entity's operations or (b) clarify his understanding of the entity's internal control. In such cases, the guidance in this statement is not applicable.

² For purposes of this section the use of the term misstatement can include both errors and fraud as appropriate for the design of the sampling application. Errors and fraud are discussed in section 312, *Audit Risk and Materiality in Conducting an Audit*.

samples. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.06 Evaluating the appropriateness of audit evidence is solely a matter of auditing judgment and is not determined by the design and evaluation of an audit sample. In a strict sense, the sample evaluation relates only to the likelihood that existing monetary misstatements or deviations from prescribed controls are proportionately included in the sample, not to the auditor's treatment of such items. Thus, the choice of nonstatistical or statistical sampling does not directly affect the auditor's decisions about the auditing procedures to be applied, the appropriateness of the audit evidence obtained with respect to individual items in the sample, or the actions that might be taken in light of the nature and cause of particular misstatements. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Uncertainty and Audit Sampling

.07 Some degree of uncertainty is implicit in the concept of "a reasonable basis for an opinion" referred to in the third standard of field work. The justification for accepting some uncertainty arises from the relationship between such factors as the cost and time required to examine all of the data and the adverse consequences of possible erroneous decisions based on the conclusions resulting from examining only a sample of the data. If these factors do not justify the acceptance of some uncertainty, the only alternative is to examine all of the data. Since this is seldom the case, the basic concept of sampling is well established in auditing practice.

.08 The uncertainty inherent in applying audit procedures is referred to as audit risk. Audit risk includes both uncertainties due to sampling and uncertainties due to factors other than sampling. These aspects of audit risk are sampling risk and nonsampling risk, respectively.³ [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

[.09] [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. Paragraph deleted by the issuance of Statement on Auditing Standards No. 111, March 2006.]

.10 Sampling risk arises from the possibility that, when a test of controls or a substantive test is restricted to a sample, the auditor's conclusions may be different from the conclusions he would reach if the test were applied in the same way to all items in the account balance or class of transactions. That is, a particular sample may contain proportionately more or less monetary misstatements or deviations from prescribed controls than exist in the balance or class as a whole. For a sample of a specific design, sampling risk varies inversely with sample size: the smaller the sample size, the greater the sampling risk.

.11 Nonsampling risk includes all the aspects of audit risk that are not due to sampling. An auditor may apply a procedure to all transactions or balances and still fail to detect a material misstatement. Nonsampling risk includes the possibility of selecting audit procedures that are not appropriate to achieve the

³ See paragraph .22 of section 312, *Audit Risk and Materiality in Conducting an Audit*, for definition of risk of material misstatement. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

specific objective. For example, confirming recorded receivables cannot be relied on to reveal unrecorded receivables. Nonsampling risk also arises because the auditor may fail to recognize misstatements included in documents that he examines, which would make that procedure ineffective even if he were to examine all items. Nonsampling risk can be reduced to a negligible level through such factors as adequate planning and supervision (see section 311, *Planning and Supervision*) and proper conduct of a firm's audit practice (see section 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*). [As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45.]

Sampling Risk

.12 The auditor should apply professional judgment in assessing sampling risk. In performing substantive tests of details the auditor is concerned with two aspects of sampling risk:

- *The risk of incorrect acceptance* is the risk that the sample supports the conclusion that the recorded account balance is not materially misstated when it is materially misstated.
- *The risk of incorrect rejection* is the risk that the sample supports the conclusion that the recorded account balance is materially misstated when it is not materially misstated.

The auditor is also concerned with two aspects of sampling risk in performing tests of controls when sampling is used:

- *The risk of assessing control risk too low* is the risk that the assessed level of control risk based on the sample is less than the true operating effectiveness of the control.
- *The risk of assessing control risk too high* is the risk that the assessed level of control risk based on the sample is greater than the true operating effectiveness of the control.

.13 The risk of incorrect rejection and the risk of assessing control risk too high relate to the efficiency of the audit. For example, if the auditor's evaluation of an audit sample leads him to the initial erroneous conclusion that a balance is materially misstated when it is not, the application of additional audit procedures and consideration of other audit evidence would ordinarily lead the auditor to the correct conclusion. Similarly, if the auditor's evaluation of a sample leads him to unnecessarily assess control risk too high for an assertion, he would ordinarily increase the scope of substantive tests to compensate for the perceived ineffectiveness of the controls. Although the audit may be less efficient in these circumstances, the audit is, nevertheless, effective.

.14 The risk of incorrect acceptance and the risk of assessing control risk too low relate to the effectiveness of an audit in detecting an existing material misstatement. These risks are discussed in the following paragraphs.

Sampling in Substantive Tests of Details

Planning Samples

.15 Planning involves developing a strategy for conducting an audit of financial statements. For general guidance on planning, see section 311, *Planning and Supervision*.

.16 When planning a particular sample for a substantive test of details, the auditor should consider

- The relationship of the sample to the relevant audit objective (see section 326, *Audit Evidence*).
- Preliminary judgments about materiality levels.
- The auditor's allowable risk of incorrect acceptance.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

[Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 106.]

.17 When planning a particular sample, the auditor should consider the specific audit objective to be achieved and should determine that the audit procedure, or combination of procedures, to be applied will achieve that objective. The auditor should determine that the population from which he draws the sample is appropriate for the specific audit objective. For example, an auditor would not be able to detect understatements of an account due to omitted items by sampling the recorded items. An appropriate sampling plan for detecting such understatements would involve selecting from a source in which the omitted items are included. To illustrate, subsequent cash disbursements might be sampled to test recorded accounts payable for understatement because of omitted purchases, or shipping documents might be sampled for understatement of sales due to shipments made but not recorded as sales.

.18 Evaluation in monetary terms of the results of a sample for a test of details contributes directly to the auditor's purpose, since such an evaluation can be related to the auditor's judgment of the monetary amount of misstatements that would be material for the test. When planning a sample for a test of details, the auditor should consider how much monetary misstatement in the related account balance or class of transactions may exist when combined with misstatements that may be found in other tests without causing the financial statements to be materially misstated. This maximum monetary misstatement that the auditor is willing to accept for the balance or class is called tolerable misstatement for the sample. Tolerable misstatement is a planning concept and is related to the auditor's determination of materiality for planning the financial statement audit in such a way that tolerable misstatement, combined for all of the tests in the entire audit, does not exceed materiality for the financial statements. This means that auditors should normally set tolerable misstatement for a specific audit procedure at less than financial statement materiality so that when the results of the audit procedures are aggregated, the required overall assurance is attained. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.19 The second standard of field work states, "The auditor must obtain a sufficient understanding of the entity and its environment, including its internal control to assess the risk of material misstatement of the financial statements whether due to error or fraud, and to design the nature, timing, and extent of further audit procedures." After assessing and considering the levels of inherent and control risks, the auditor performs substantive tests to restrict detection risk to an acceptable level. As the assessed levels of inherent risk, control risk, and detection risk for other substantive procedures directed toward the same specific audit objective decreases, the auditor's allowable risk

of incorrect acceptance for the substantive tests of details increases and, thus, the smaller the required sample size for the substantive tests of details. For example, if inherent and control risks are assessed at the maximum, and no other substantive tests directed toward the same specific audit objectives are performed, the auditor should allow for a low risk of incorrect acceptance for the substantive tests of details.⁴ Thus, the auditor would select a larger sample size for the tests of details than if he allowed a higher risk of incorrect acceptance. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.20 The auditor planning a statistical or nonstatistical sample may use the model in paragraph .26 of section 312, *Audit Risk and Materiality in Conducting an Audit*, to assist in planning the allowable risk of incorrect acceptance for a specific test of details. To do so, the auditor should determine an acceptable audit risk and subjectively quantify his or her judgment of the risk of material misstatement (consisting of inherent risk and control risk), and the risk that substantive analytical procedures and other relevant substantive procedures would fail to detect misstatements that could occur in an assertion equal to tolerable misstatement, given that such misstatements occur and are not detected by the entity's controls. Some levels of these risks are implicit in evaluating audit evidence and reaching conclusions. Auditors using the model might prefer to evaluate these judgment risks explicitly. The relationships between these risks are illustrated in Table 1 of the Appendix [paragraph .48]. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.21 As discussed in section 326, the sufficiency of tests of details for a particular account balance or class of transactions is related to the individual importance of the items examined as well as to the potential for material misstatement. When planning a sample for a substantive test of details, the auditor uses his judgment to determine which items, if any, in an account balance or class of transactions should be individually examined and which items, if any, should be subject to sampling. The auditor should examine those items for which, in his judgment, acceptance of some sampling risk is not justified. For example, these may include items for which potential misstatements could individually equal or exceed the tolerable misstatement. Any items that the auditor has decided to examine 100 percent are not part of the items subject to sampling. Other items that, in the auditor's judgment, need to be tested to fulfill the audit objective but need not be examined 100 percent, would be subject to sampling.

.22 The auditor may be able to reduce the required sample size by separating items subject to sampling into relatively homogeneous groups on the basis of some characteristic related to the specific audit objective. For example, common bases for such groupings are the recorded or book value of the items, the nature of controls related to processing the items, and special considerations associated with certain items. An appropriate number of items is then selected from each group.

⁴ Some auditors prefer to think of risk levels in quantitative terms. For example, in the circumstances described, an auditor might think in terms of a 5 percent risk of incorrect acceptance for the substantive test of details. Risk levels used in sampling applications in other fields are not necessarily relevant in determining appropriate levels for applications in auditing because an audit includes many interrelated tests and sources of evidence. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

.23 To determine the number of items to be selected in a sample for a particular test of details, the auditor should consider the tolerable misstatement and the expected misstatement, the audit risk, the characteristics of the population, the assessed risk of material misstatement (inherent risk and control risk), and the assessed risk for other substantive procedures related to the same assertion. An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable to the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters.⁵ Table 2 in the Appendix [paragraph .48] illustrates the effect these factors may have on sample size. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

Sample Selection

.24 Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. For example, haphazard and random-based selection of items represents two means of obtaining such samples.⁶

Performance and Evaluation

.25 Audit procedures that are appropriate to the particular audit objective should be applied to each sample item. In some circumstances the auditor may not be able to apply the planned audit procedures to selected sample items because, for example, the entity might not be able to locate supporting documentation. The auditor's treatment of unexamined items will depend on their effect on his or her evaluation of the sample. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it is not necessary to examine the items. However, if considering those unexamined items to be misstated would lead to a conclusion that the balance or class contains material misstatement, the auditor should consider alternative audit procedures that would provide sufficient appropriate audit evidence to form a conclusion. The auditor should also consider whether the reasons for his or her inability to examine the items have implications in relation to assessing risks of material misstatement due to fraud,⁷ the assessed level of control risk that he or she expects to be supported, or the degree of reliance on management representations. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

⁵ This guidance does not suggest that the auditor using nonstatistical sampling compute a corresponding sample size using statistical theory. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

⁶ Random-based selection includes, for example, random sampling, stratified random sampling, sampling with probability proportional to size, and systematic sampling (for example, every hundredth item) with one or more random starts. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

⁷ See section 316, *Consideration of Fraud in a Financial Statement Audit*. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.26 The auditor should project the misstatement results of the sample to the items from which the sample was selected.^{8,9} There are several acceptable ways to project misstatements from a sample. For example, an auditor may have selected a sample of every twentieth item (50 items) from a population containing one thousand items. If he discovered overstatements of \$3,000 in that sample, the auditor could project a \$60,000 overstatement by dividing the amount of misstatement in the sample by the fraction of total items from the population included in the sample. The auditor should add that projection to the misstatements discovered in any items examined 100 percent. This total projected misstatement should be compared with the tolerable misstatement for the account balance or class of transactions, and appropriate consideration should be given to sampling risk. If the total projected misstatement is less than tolerable misstatement for the account balance or class of transactions, the auditor should consider the risk that such a result might be obtained even though the true monetary misstatement for the population exceeds tolerable misstatement. For example, if the tolerable misstatement in an account balance of \$1 million is \$50,000 and the total projected misstatement based on an appropriate sample (see paragraph .23) is \$10,000, he may be reasonably assured that there is an acceptably low sampling risk that the true monetary misstatement for the population exceeds tolerable misstatement. On the other hand, if the total projected misstatement is close to the tolerable misstatement, the auditor may conclude that there is an unacceptably high risk that the actual misstatements in the population exceed the tolerable misstatement. An auditor uses professional judgment in making such evaluations.

.27 In addition to the evaluation of the frequency and amounts of monetary misstatements, consideration should be given to the qualitative aspects of the misstatements. These include (a) the nature and cause of misstatements, such as whether they are differences in principle or in application, are errors or are caused by fraud, or are due to misunderstanding of instructions or to carelessness, and (b) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error.

.28 If the sample results suggest that the auditor's planning assumptions were incorrect, he should take appropriate action. For example, if monetary misstatements are discovered in a substantive test of details in amounts or frequency that is greater than is consistent with the assessed levels of inherent and control risk, the auditor should alter his risk assessments. The auditor should also consider whether to modify the other audit tests that were designed based upon the inherent and control risk assessments. For example, a large number of misstatements discovered in confirmation of receivables may indicate the need to reconsider the control risk assessment related to the assertions that impacted the design of substantive tests of sales or cash receipts.

.29 The auditor should relate the evaluation of the sample to other relevant audit evidence when forming a conclusion about the related account balance or class of transactions.

⁸ If the auditor has separated the items subject to sampling into relatively homogeneous groups (see paragraph .22), he separately projects the misstatement results of each group and sums them. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

⁹ See section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .75–.78, for a further discussion of the auditor's consideration of differences between the accounting records and the underlying facts and circumstances. This section provides specific guidance on the auditor's consideration of an audit adjustment that is, or may be, fraud. [Footnote revised, January 2004, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 99. Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

.30 Projected misstatement results for all audit sampling applications and all known misstatements from nonsampling applications should be considered in the aggregate along with other relevant audit evidence when the auditor evaluates whether the financial statements taken as a whole may be materially misstated.

Sampling in Tests of Controls

Planning Samples

.31 When planning a particular audit sample for a test of controls, the auditor should consider

- The relationship of the sample to the objective of the test of controls.
- The maximum rate of deviations from prescribed controls that would support his planned assessed level of control risk.
- The auditor's allowable risk of assessing control risk too low.
- Characteristics of the population, that is, the items comprising the account balance or class of transactions of interest.

.32 Sampling applies when the auditor needs to decide whether the rate of deviation from a prescribed procedure is no greater than a tolerable rate, for example in testing a matching process or an approval process. However, risk assessment procedures performed to obtain an understanding of internal control do not involve sampling.¹⁰ Sampling concepts also do not apply for some tests of controls. Tests of automated application controls are generally tested only once or a few times when effective (IT) general controls are present, and thus do not rely on the concepts of risk and tolerable deviation as applied in other sampling procedures. Sampling generally is not applicable to analyses of controls for determining the appropriate segregation of duties or other analyses that do not examine documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls or to analyses of the effectiveness of security and access controls. Sampling also may not apply to some tests directed toward obtaining audit evidence about the operation of the control environment or the accounting system, for example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control, or when examining the actions of those charged with governance¹¹ for assessing their effectiveness. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.33 When designing samples for tests of controls the auditor ordinarily should plan to evaluate operating effectiveness in terms of deviations from prescribed controls, as to either the rate of such deviations or the monetary amount of the related transactions.¹² In this context, pertinent controls are

¹⁰ The auditor often plans to perform tests of controls concurrently with obtaining an understanding of internal control (see section 318.27) for the purpose of estimating the rate of deviation from the prescribed controls, as to either the rate of such deviations or monetary amount of the related transactions. Sampling, as defined in this section, applies to such tests of controls. [Footnote revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94. Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

¹¹ See footnote 4 in section 311, *Planning and Supervision*, for the definition of those charged with governance. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

¹² For simplicity the remainder of this section will refer to only the rate of deviations. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

ones that, had they not been included in the design of internal control would have adversely affected the auditor's planned assessed level of control risk. The auditor's overall assessment of control risk for a particular assertion involves combining judgments about the prescribed controls, the deviations from prescribed controls, and the degree of assurance provided by the sample and other tests of controls.

.34 The auditor should determine the maximum rate of deviations from the prescribed control that he would be willing to accept without altering his planned assessed level of control risk. This is the *tolerable rate*. In determining the tolerable rate, the auditor should consider (a) the planned assessed level of control risk, and (b) the degree of assurance desired by the audit evidence in the sample. For example, if the auditor plans to assess control risk at a low level, and he desires a high degree of assurance from the audit evidence provided by the sample for tests of controls (i.e., not perform other tests of controls for the assertion), he might decide that a tolerable rate of 5 percent or possibly less would be reasonable. If the auditor either plans to assess control risk at a higher level, or he desires assurance from other tests of controls along with that provided by the sample (such as inquiries of appropriate entity personnel or observation of the application of the policy or procedure), the auditor might decide that a tolerable rate of 10 percent or more is reasonable. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.35 In assessing the tolerable rate of deviations, the auditor should consider that, while deviations from pertinent controls increase the risk of material misstatements in the accounting records, such deviations do not necessarily result in misstatements. For example, a recorded disbursement that does not show evidence of required approval may nevertheless be a transaction that is properly authorized and recorded. Deviations would result in misstatements in the accounting records only if the deviations and the misstatements occurred on the same transactions. Deviations from pertinent controls at a given rate ordinarily would be expected to result in misstatements at a lower rate.

.36 In some situations, the risk of material misstatement for an assertion may be related to a combination of controls. If a combination of two or more controls is necessary to affect the risk of material misstatement for an assertion, those controls should be regarded as a single procedure, and deviations from any controls in combination should be evaluated on that basis.

.37 Samples taken to test the operating effectiveness of controls are intended to provide a basis for the auditor to conclude whether the controls are being applied as prescribed. When the degree of assurance desired by the audit evidence in the sample is high, the auditor should allow for a low level of sampling risk (that is, the risk of assessing control risk too low). [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]¹³

.38 To determine the number of items to be selected for a particular sample for a test of controls, the auditor should consider the tolerable rate of deviation from the controls being tested, the likely rate of deviations, and the allowable risk of assessing control risk too low. An auditor applies professional judgment to relate these factors in determining the appropriate sample size.

¹³ The auditor who prefers to think of risk levels in quantitative terms might consider, for example, a 5 percent to 10 percent risk of assessing control risk too low. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 111, March 2006.]

Sample Selection

.39 Sample items should be selected in such a way that the sample can be expected to be representative of the population. Therefore, all items in the population should have an opportunity to be selected. Random-based selection of items represents one means of obtaining such samples. Ideally, the auditor should use a selection method that has the potential for selecting items from the entire period under audit. Section 318.37 provides guidance applicable to the auditor's use of sampling during interim and remaining periods. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

Performance and Evaluation

.40 Auditing procedures that are appropriate to achieve the objective of the test of controls should be applied to each sample item. If the auditor is not able to apply the planned audit procedures or appropriate alternative procedures to selected items, he should consider the reasons for this limitation, and he should ordinarily consider those selected items to be deviations from the prescribed policy or procedure for the purpose of evaluating the sample.

.41 The deviation rate in the sample is the auditor's best estimate of the deviation rate in the population from which it was selected. If the estimated deviation rate is less than the tolerable rate for the population, the auditor should consider the risk that such a result might be obtained even though the true deviation rate for the population exceeds the tolerable rate for the population. For example, if the tolerable rate for a population is 5 percent and no deviations are found in a sample of 60 items, the auditor may conclude that there is an acceptably low sampling risk that the true deviation rate in the population exceeds the tolerable rate of 5 percent. On the other hand, if the sample includes, for example, two or more deviations, the auditor may conclude that there is an unacceptably high sampling risk that the rate of deviations in the population exceeds the tolerable rate of 5 percent. An auditor applies professional judgment in making such an evaluation.

.42 In addition to the evaluation of the frequency of deviations from pertinent procedures, consideration should be given to the qualitative aspects of the deviations. These include (a) the nature and cause of the deviations, such as whether they are due to error or fraud, and (b) the possible relationship of the deviations to other phases of the audit. The discovery of fraud ordinarily requires a broader consideration of possible implications than does the discovery of an error. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.43 If the auditor concludes that the sample results do not support the planned assessed level of control risk for an assertion, he should re-evaluate the nature, timing, and extent of substantive procedures based on a revised consideration of the assessed level of control risk for the relevant financial statement assertions.

Dual-Purpose Samples

.44 In some circumstances the auditor may design a sample that will be used for dual purposes: testing the operating effectiveness of an identified control and testing whether the recorded monetary amount of transactions is

correct.¹⁴ In general, an auditor planning to use a dual-purpose sample would have made a preliminary assessment that there is an acceptably low risk that the rate of deviations from the prescribed control in the population exceeds the tolerable rate. For example, an auditor designing a test of control over entries in the voucher register may plan a related substantive procedure at a risk level that anticipates a particular assessed level of control risk. The size of a sample designed for dual purposes should be the larger of the samples that would otherwise have been designed for the two separate purposes.¹⁵ In evaluating such tests, deviations from the prescribed control and monetary misstatements should be evaluated separately using the risk levels applicable for the respective purposes. The absence of monetary misstatements detected in a sample does not necessarily imply that related controls are effective; however, misstatements that the auditor detects by performing substantive procedures should be considered by the auditor as a possible indication of a control failure when assessing the operating effectiveness of related controls. [As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

Selecting a Sampling Approach

.45 As discussed in paragraph .04, either a nonstatistical or statistical approach to audit sampling, when properly applied, can provide sufficient audit evidence. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.46 Statistical sampling helps the auditor (*a*) to design an efficient sample, (*b*) to measure the sufficiency of the audit evidence obtained, and (*c*) to evaluate the sample results. By using statistical theory, the auditor can quantify sampling risk to assist himself in limiting it to a level he considers acceptable. However, statistical sampling involves additional costs of training auditors, designing individual samples to meet the statistical requirements, and selecting the items to be examined. Because either nonstatistical or statistical sampling can provide sufficient audit evidence, the auditor chooses between them after considering their relative cost and effectiveness in the circumstances. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Effective Date

.47 This section is effective for audits of financial statements for periods ended on or after June 25, 1983. Earlier application is encouraged. [As amended, effective retroactively to June 25, 1982, by Statement on Auditing Standards No. 43.]

¹⁴ Section 318, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, discusses dual-purpose tests in paragraph .33. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

¹⁵ The test requiring the smaller sample size may be selected as a subset of the larger sample. [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

.48

Appendix

Relating the Risk of Incorrect Acceptance for a Substantive Test of Details to Other Sources of Audit Assurance

In Table 1 it is assumed, for illustrative purposes, that the auditor has chosen an audit risk (AR) of 5 percent for an assertion. Table 1 incorporates the premise that internal control cannot be expected to be completely effective in detecting aggregate misstatements equal to tolerable misstatement that might occur. The table also illustrates the fact that the risk level for substantive procedures for particular assertions is not an isolated decision. Rather, it is a direct consequence of the auditor's assessments of the risk of material misstatement (RMM) (combined assessments of inherent and control risks), and judgments about the effectiveness of substantive analytical procedures (AP) and other relevant tests of details (TD), and it cannot be properly considered out of this context.^[1]

Table 1

**Allowable Risk of Incorrect Acceptance (TD)
for Various Assessments of RMM and AP; for AR = .05**

Auditor's subjective assessment of risk of material misstatement.	Auditor's subjective assessment of risk that substantive analytical proce- dures and other relevant substantive procedures might fail to detect aggre- gate misstatements equal to tolerable misstatement.			
	<i>RMM</i>	<i>AP</i>		
	<i>10%</i>	<i>30%</i>	<i>50%</i>	<i>100%</i>
	<i>TD</i>			
10%	*	*	*	50%
30%	*	55%	33%	16%
50%	*	33%	20%	10%
100%	50%	16%	10%	5%

* The allowable level of AR of 5 percent exceeds the product of RMM and AP, and thus, the planned test of details may not be necessary unless specified by regulation or other Standards (e.g., confirmation or inventory observation procedures).

Note: The table entries for TD are computed from the illustrated model: TD equals AR/(RMM x AP). For example, for RMM = .50, AP = .30, TD = .05/ (.50 x .30) or .33 (equals 33%).

^[1] As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. Footnote deleted by the issuance of Statement on Auditing Standards No. 111, March 2006.]

Table 2**Factors Influencing Sample Sizes for a Test of Details in Sample Planning**

<i>Factor</i>	<i>Conditions leading to</i>		<i>Related factor for substantive sample planning</i>
	<i>Smaller sample size</i>	<i>Larger sample size</i>	
<i>a.</i> Assessment of inherent risk.	Low assessed level of inherent risk.	High assessed level of inherent risk.	Allowable risk of incorrect acceptance.
<i>b.</i> Assessment of control risk.	Low assessed level of control risk.	High assessed level of control risk.	Allowable risk of incorrect acceptance.
<i>c.</i> Assessment of risk for other substantive procedures related to the same assertion (including substantive analytical procedures and other relevant substantive procedures).	Low assessment of risk associated with other relevant substantive procedures.	High assessment of risk associated with other relevant substantive procedures.	Allowable risk of incorrect acceptance.
<i>d.</i> Measure of tolerable misstatement for a specific account.	Larger measure of tolerable misstatement.	Smaller measure of tolerable misstatement.	Tolerable misstatement.
<i>e.</i> Expected size and frequency of misstatements.	Smaller misstatements or lower frequency.	Larger misstatements or higher frequency.	Assessment of population characteristics.
<i>f.</i> Number of items in the population.	Virtually no effect on sample size unless population is very small.		
<i>g.</i> Choice between statistical and nonstatistical sampling	Ordinarily, sample sizes are comparable.		

As amended, effective for audits of financial statements for periods ended after September 30, 1983, by Statement on Auditing Standards No. 45. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2006, by Statement on Auditing Standards No. 111.]

AU Section 9350

Audit Sampling: Auditing Interpretations of Section 350

1. Applicability

.01 Question—Section 350, *Audit Sampling*, paragraph .01, footnote 1, states that there may be reasons other than sampling for an auditor to examine less than 100 percent of the items comprising an account balance or class of transactions. For what reasons might an auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions *not* be considered audit sampling?

.02 Interpretation—The auditor's examination of less than 100 percent of the items comprising an account balance or class of transactions would not be considered to be an audit sampling application under the following circumstances.

- a. *It is not the auditor's intent to extend the conclusion that he reaches by examining the items to the remainder of the items in the account balance or class.* Audit sampling is defined as the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class. Thus, if the purpose of the auditor's application of an auditing procedure to less than 100 percent of the items in an account balance or class of transactions is something other than evaluating a trait of the entire balance or class, he is not using audit sampling.

For example, an auditor might trace several transactions through an entity's accounting system to gain an understanding of the nature of the entity's operations or clarify his understanding of the design of the entity's internal control. In such cases the auditor's intent is to gain a general understanding of the accounting system or other relevant parts of the internal control, rather than the evaluation of a characteristic of all transactions processed. As a result, the auditor is not using audit sampling.

Occasionally auditors perform procedures such as checking arithmetical calculations or tracing journal entries into ledger accounts on a test basis. When such procedures are applied to less than 100 percent of the arithmetical calculations or ledger postings that affect the financial statements, audit sampling may not be involved if the procedure is not a test to evaluate a characteristic of an account balance or class of transactions, but is intended only to provide limited knowledge that supplements the auditor's other audit evidence regarding a financial statement assertion.

- b. *Although he might not be examining all the items in an account balance or class of transactions, the auditor might be examining 100 percent of the items in a given population.* A "population" for audit sampling purposes does not necessarily need to be an entire account balance or class of transactions. For example, in some circumstances, an auditor might

examine all of the items that comprise an account balance or class of transactions that exceed a given amount or that have an unusual characteristic and either apply other auditing procedures (e.g., analytical procedures) to those items that do not exceed the given amount or possess the unusual characteristic or apply no auditing procedures to them because of their insignificance. Again, the auditor is not using audit sampling. Rather, he has broken the account balance or class of transactions into two groups. One group is tested 100 percent, the other group is either tested by analytical procedures or considered insignificant. The auditor would be using audit sampling only if he applied an auditing procedure to less than all of the items in the second group to form a conclusion about that group. For the same reason, cutoff tests often do not involve audit sampling applications. In performing cutoff tests auditors often examine all significant transactions for a period surrounding the cutoff date and, as a result, such tests do not involve the application of audit sampling.

- c. *The auditor is testing controls that are not documented.* Auditors choose from a variety of methods including inquiry, observation, and examination of documentary evidence in testing controls. For example, observation of a client's physical inventory count procedures is a test that is performed primarily through the auditor's observation of controls over such things as inventory movement, counting procedures and other procedures used by the client to control the count of the inventory. The procedures that the auditor uses to observe the client's physical inventory count generally do not require use of audit sampling. However, audit sampling may be used in certain tests of controls or substantive tests of details of inventory, for example, in tracing selected test counts into inventory records.
- d. *The auditor is not performing a substantive test of details.* Substantive tests consist of tests of details of transactions and balances, analytical review and or from a combination of both. In performing substantive tests, audit sampling is generally used only in testing details of transactions and balances.

[Issue Date: January, 1985; Revised: March, 2006.]

AU Section 380

The Auditor's Communication With Those Charged With Governance

(Supersedes SAS No. 61.)

Source: SAS No. 114.

Effective for audits of financial statements for periods beginning on or after December 15, 2006.

.01 This section establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements.¹ Although this section applies regardless of an entity's governance structure or size, particular considerations apply where all of those charged with governance are involved in managing an entity. This section does not establish requirements regarding the auditor's communication with an entity's management or owners unless they are also charged with a governance role.

.02 This section has been drafted in terms of an audit of financial statements, but may also be applied, adapted as necessary in the circumstances, to audits of other historical financial information when those charged with governance have a responsibility to oversee the preparation and presentation of the other historical financial information.

.03 For purposes of this section:

- a. *Those charged with governance* means the person(s) with responsibility for overseeing the strategic direction of the entity and obligations related to the accountability of the entity. This includes overseeing the financial reporting process. In some cases, those charged with governance are responsible for approving the entity's financial statements (in other cases management has this responsibility). For entities with a board of directors, this term encompasses the term *board of directors* or *audit committee* used elsewhere in generally accepted auditing standards.
- b. *Management* means the person(s) responsible for achieving the objectives of the entity and who have the authority to establish policies and make decisions by which those objectives are to be pursued. Management is responsible for the financial statements, including designing, implementing, and maintaining effective internal control over financial reporting.

.04 Recognizing the importance of effective two-way communication to the audit, this section provides a framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated with them. Additional matters to be communicated are identified

¹ The provisions of this section apply to audits of financial statements prepared either in accordance with generally accepted accounting principles or in accordance with a comprehensive basis of accounting other than generally accepted accounting principles. References in this section to generally accepted accounting principles are intended to also refer to other comprehensive bases of accounting when the reference is relevant to the basis of accounting used.

in other Statements on Auditing Standards (see Appendix A [paragraph .66]). Further matters may be communicated by agreement with those charged with governance or management, or in accordance with external requirements.

.05 The auditor must communicate with those charged with governance matters related to the financial statement audit that are, in the auditor's professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process.

.06 Clear communication of specific matters in accordance with this section is an integral part of every audit. However, the auditor is not required to perform procedures specifically to identify other significant matters to communicate with those charged with governance.

The Role of Communication

.07 The principal purposes of communication with those charged with governance are to:

- a. Communicate clearly with those charged with governance the responsibilities of the auditor in relation to the financial statement audit, and an overview of the scope and timing of the audit.
- b. Obtain from those charged with governance information relevant to the audit.
- c. Provide those charged with governance with timely observations arising from the audit that are relevant to their responsibilities in overseeing the financial reporting process.

.08 This section focuses primarily on communications from the auditor to those charged with governance. However, effective two-way communication is also very important in assisting:

- a. The auditor and those charged with governance in understanding matters related to the audit in context, and in developing a constructive working relationship. This relationship is developed while maintaining the auditor's independence and objectivity.
- b. The auditor in obtaining from those charged with governance information relevant to the audit. For example, those charged with governance may assist the auditor in understanding the entity and its environment, in identifying appropriate sources of audit evidence, and in providing information about specific transactions or events.
- c. Those charged with governance in fulfilling their responsibility to oversee the financial reporting process, thereby reducing the risks of material misstatement of the financial statements.

.09 Although the auditor is responsible for communicating specific matters in accordance with this section, management also has a responsibility to communicate matters of governance interest to those charged with governance. Communication by the auditor does not relieve management of this responsibility.

Legal Considerations

.10 In certain circumstances, the auditor may be required to report to a regulatory or enforcement body certain matters communicated with those charged with governance. For example, governmental auditing standards require auditors to report fraud, illegal acts, violations of provisions of contracts or grant

agreements, and abuse directly to parties outside the audited entity in certain circumstances.

.11 In rare circumstances, laws or regulations may prevent the auditor from communicating certain matters with those charged with governance, or others within the entity. For example, laws or regulations may specifically prohibit a communication, or other action, that might prejudice an investigation by an appropriate authority into an actual or suspected illegal act. In such circumstances, it may be appropriate for the auditor to seek legal advice.

Those Charged With Governance

.12 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. The appropriate person(s) may vary depending on the matter to be communicated.

.13 Governance structures vary by entity, reflecting influences such as size and ownership characteristics. For example:

- In some entities, those charged with governance hold positions that are an integral part of the entity's legal structure, for example, company directors. For other entities, a body that is not part of the entity may be charged with governance, as with some government agencies.
- In some cases, some or all of those charged with governance also have management responsibilities. In others, those charged with governance and management are different people.

.14 In most entities, governance is the collective responsibility of a governing body, such as a board of directors, a supervisory board, partners, proprietors, a committee of management, trustees, or equivalent persons. In some smaller entities, however, one person may be charged with governance, such as the owner-manager where there are no other owners, or a sole trustee. When governance is a collective responsibility, a subgroup, such as an audit committee or even an individual, may be charged with specific tasks to assist the governing body in meeting its responsibilities.

.15 Such diversity means that it is not possible for this section to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Also, in some cases the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances, for example, entities where the governance structure is not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. The auditor's understanding of the entity's governance structure and processes obtained in accordance with section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, is relevant in deciding with whom to communicate matters.

.16 When the appropriate person(s) with whom to communicate are not clearly identifiable, the auditor and the engaging party should agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate. When the entity being audited is a component² of a group,³ the appropriate person(s) with whom to communicate is dependent on the nature of the matter to be communicated and the terms of the engagement.

² *Component* means a head office, parent, division, branch, subsidiary, joint venture, associated company, equity investee, or other entity whose financial information is or should be included in the consolidated financial statements of a group.

³ *Group* means an entity whose consolidated financial statements include or should include financial information of more than one component.

Communication With the Audit Committee or Other Subgroup of Those Charged With Governance

.17 Audit committees (or similar subgroups with different names) exist in many entities. Although their specific authority and functions may differ, communication with the audit committee, where one exists, is a key element in the auditor's communication with those charged with governance. Good governance principles suggest that:

- The auditor has access to the audit committee as necessary.
- The chair of the audit committee and, when relevant, the other members of the audit committee, meet with the auditor periodically.
- The audit committee meets with the auditor without management present at least annually.

.18 The auditor should evaluate whether communication with a subgroup of those charged with governance, such as the audit committee or an individual, adequately fulfills the auditor's responsibility to communicate with those charged with governance. When considering communicating with a subgroup of those charged with governance, the auditor may take into account such matters as:

- The respective responsibilities of the subgroup and the governing body.
- The nature of the matter to be communicated.
- Relevant legal or regulatory requirements.
- Whether the subgroup (*a*) has the authority to take action in relation to the information communicated and (*b*) can provide further information and explanations the auditor may need.
- Whether the auditor is aware of potential conflicts of interest between the subgroup and other members of the governing body.
- Whether there is also a need to communicate the information, in full or in summary form, to the governing body. This decision may be influenced by the auditor's assessment of how effectively and appropriately the subgroup communicates relevant information with the governing body. The auditor retains the right to communicate with the governing body, a fact the auditor may make explicit in the terms of the engagement.

Communication With Management

.19 Many matters may be discussed with management in the ordinary course of an audit, including matters to be communicated with those charged with governance in accordance with this section. Such discussions recognize management's executive responsibility for the conduct of the entity's operations and, in particular, management's responsibility for the financial statements.

.20 Before communicating matters with those charged with governance, the auditor may discuss them with management unless that is inappropriate. For example, it may not be appropriate to discuss with management questions of management's competence or integrity. In addition to recognizing management's responsibility, these initial discussions may clarify facts and issues, and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor may discuss matters with the internal auditor before communicating with those charged with governance.

When All of Those Charged With Governance Are Involved in Managing the Entity

.21 In some cases, all of those charged with governance are involved in managing the entity. In these cases, if matters required by this section are communicated with person(s) with management responsibilities, and those person(s) also have governance responsibilities, the matters need not be communicated again with those same person(s) in their governance role.

.22 When all of those charged with governance are involved in managing the entity, the auditor should consider whether communication with person(s) with financial reporting responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity. (See paragraphs .12 and .18.)

Matters to Be Communicated

.23 The auditor should communicate with those charged with governance:

- a. The auditor's responsibilities under generally accepted auditing standards (see paragraphs .26 through .28);
- b. An overview of the planned scope and timing of the audit (see paragraphs .29 through .33); and
- c. Significant findings from the audit (see paragraphs .34 through .44).

.24 Management's communication of these matters to those charged with governance does not relieve the auditor of the responsibility to also communicate them. However, communication of these matters by management may affect the form or timing of the auditor's communication.

.25 Nothing in this section precludes the auditor from communicating any other matters to those charged with governance.

The Auditor's Responsibilities Under Generally Accepted Auditing Standards

.26 The auditor should communicate with those charged with governance the auditor's responsibilities under generally accepted auditing standards, including that:

- a. The auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management with the oversight of those charged with governance are presented fairly, in all material respects, in conformity with generally accepted accounting principles.
- b. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

These responsibilities may be communicated through the engagement letter, or other form of contract that records the terms of the engagement, if that letter or contract is provided to those charged with governance.

.27 The auditor may also communicate that:

- a. The auditor is responsible for performing the audit in accordance with generally accepted auditing standards and that the audit is designed to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement.

- b. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting.
- c. The auditor is responsible for communicating significant matters related to the financial statement audit that are, in the auditor's professional judgment, relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. Generally accepted auditing standards do not require the auditor to design procedures for the purpose of identifying other matters to communicate with those charged with governance.
- d. When applicable, the auditor is also responsible for communicating particular matters required by laws or regulations, by agreement with the entity or by additional requirements applicable to the engagement.

.28 Section 550, *Other Information in Documents Containing Audited Financial Statements*, addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon.^[4] If the entity includes other information in documents containing audited financial statements, the auditor should communicate with those charged with governance the auditor's responsibility with respect to such other information, any procedures performed relating to the other information, and the results. [Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

Planned Scope and Timing of the Audit

.29 The auditor should communicate with those charged with governance an overview of the planned scope and timing of the audit. However, it is important for the auditor not to compromise the effectiveness of the audit, particularly where some or all of those charged with governance are involved in managing the entity. For example, communicating the nature and timing of detailed audit procedures may reduce the effectiveness of those procedures by making them too predictable. Certain factors described in paragraph .53 may be relevant in determining the nature and extent of this communication.

.30 Communication regarding the planned scope and timing of the audit may:

- a. Assist those charged with governance in understanding better the consequences of the auditor's work for their oversight activities, discussing with the auditor issues of risk and materiality, and identifying any areas in which they may request the auditor to undertake additional procedures; and
- b. Assist the auditor to understand better the entity and its environment.

.31 Matters communicated may include the following:

- How the auditor proposes to address the significant risks of material misstatement, whether due to fraud or error.
- The auditor's approach to internal control relevant to the audit, including, when applicable, whether the auditor will express an opinion on the effectiveness of internal control over financial reporting.

^[4] [Footnote deleted, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

- The concept of materiality in planning and executing the audit, focusing on the factors considered rather than on specific thresholds or amounts.
 - Where the entity has an internal audit function, the extent to which the auditor will use the work of internal audit, and how the external and internal auditors can best work together.
- .32** Other planning matters that the auditor may consider discussing with those charged with governance include:
- The views of those charged with governance about:
 - The appropriate person(s) in the entity's governance structure with whom to communicate.
 - The allocation of responsibilities between those charged with governance and management.
 - The entity's objectives and strategies, and the related business risks that may result in material misstatements.
 - Matters those charged with governance consider warrant particular attention during the audit, and any areas where they request additional procedures to be undertaken.
 - Significant communications with regulators.
 - Other matters those charged with governance believe are relevant to the audit of the financial statements.
 - The attitudes, awareness, and actions of those charged with governance concerning (a) the entity's internal control and its importance in the entity, including how those charged with governance oversee the effectiveness of internal control and (b) the detection or the possibility of fraud.
 - The actions of those charged with governance in response to developments in financial reporting, laws, accounting standards, corporate governance practices, and other related matters.
 - The actions of those charged with governance in response to previous communications with the auditor.
- .33** While communication with those charged with governance may assist the auditor in planning the scope and timing of the audit, it does not change the auditor's sole responsibility to determine the overall audit strategy and the audit plan, including the nature, timing, and extent of procedures necessary to obtain sufficient appropriate audit evidence.

Significant Findings From the Audit

- .34** The auditor should communicate with those charged with governance the following matters:
- a. The auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures (see paragraphs .37 and .38).
 - b. Significant difficulties, if any, encountered during the audit (see paragraph .39).
 - c. Uncorrected misstatements, other than those the auditor believes are trivial, if any (see paragraphs .40 and .41).
 - d. Disagreements with management, if any, (see paragraph .42).

- e. Other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process.

.35 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate:

- a. Material, corrected misstatements that were brought to the attention of management as a result of audit procedures. The auditor also may communicate other corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.
- b. Representations the auditor is requesting from management. The auditor may provide those charged with governance with a copy of management's written representations.
- c. Management's consultations with other accountants (see paragraph .43).
- d. Significant issues, if any, arising from the audit that were discussed, or the subject of correspondence, with management (see paragraph .44).

.36 The communication of significant findings from the audit may include requesting further information from those charged with governance in order to complete the audit evidence obtained. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to specific transactions or events.

Qualitative Aspects of the Entity's Significant Accounting Practices

.37 Generally accepted accounting principles provide for the entity to make accounting estimates and judgments about accounting policies and financial statement disclosures. Open and constructive communication about qualitative aspects of the entity's significant accounting practices may include comment on the acceptability of significant accounting practices. Appendix B [paragraph .67] provides guidance on the matters that may be included in this communication.

.38 The auditor should explain to those charged with governance why the auditor considers a significant accounting practice not to be appropriate and, when considered necessary, request changes. If requested changes are not made, the auditor should inform those charged with governance that the auditor will consider the effect of this on the financial statements of the current and future years, and on the auditor's report.

Significant Difficulties Encountered During the Audit

.39 The auditor should inform those charged with governance of any significant difficulties encountered in dealing with management related to the performance of the audit. Significant difficulties encountered during the audit may include such matters as:

- Significant delays in management providing required information.
- An unnecessarily brief time within which to complete the audit.
- Extensive unexpected effort required to obtain sufficient appropriate audit evidence.
- The unavailability of expected information.

- Restrictions imposed on the auditors by management.
- Management's unwillingness to provide information about management's plans for dealing with the adverse effects of the conditions or events that lead the auditor to believe there is substantial doubt about the entity's ability to continue as a going concern.

In some circumstances, such difficulties may constitute a scope limitation that leads to a modification of the auditor's opinion.

Uncorrected Misstatements

.40 Section 312, *Audit Risk and Materiality in Conducting an Audit*, requires the auditor to accumulate all known and likely misstatements identified during the audit, other than those that the auditor believes are trivial, and communicate them to the appropriate level of management. The auditor should communicate with those charged with governance uncorrected misstatements and the effect that they may have on the opinion in the auditor's report, and request their correction. In communicating the effect that material uncorrected misstatements may have on the opinion in the auditor's report, the auditor should communicate them individually. Where there are a large number of small uncorrected misstatements, the auditor may communicate the number and overall monetary effect of the misstatements, rather than the details of each individual misstatement.

.41 The auditor should discuss with those charged with governance the implications of a failure to correct known and likely misstatements, if any, considering qualitative as well as quantitative considerations, including possible implications in relation to future financial statements. The auditor should also communicate with those charged with governance the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

Disagreements With Management

.42 The auditor should discuss with those charged with governance any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the entity's financial statements or the auditor's report. Disagreements with management may occasionally arise over, among other things, the application of accounting principles to the entity's specific transactions and events and the basis for management's judgments about accounting estimates. Disagreements may also arise regarding the scope of the audit, disclosures to be included in the entity's financial statements, and the wording of the auditor's report. For purposes of this section, disagreements do not include differences of opinion based on incomplete facts or preliminary information that are later resolved.

Management's Consultations With Other Accountants

.43 In some cases, management may decide to consult with other accountants about auditing and accounting matters. When the auditor is aware that such consultation has occurred, the auditor should discuss with those charged with governance his or her views about significant matters that were the subject of such consultation.⁵

⁵ Circumstances in which the auditor should be informed of such consultations are described in paragraph .07 of section 625, *Reports on the Application of Accounting Principles*.

Significant Issues Discussed, or Subject to Correspondence, With Management

.44 The auditor should communicate with those charged with governance any significant issues that were discussed or were the subject of correspondence with management. Significant issues may include such matters as:

- Business conditions affecting the entity, and business plans and strategies that may affect the risks of material misstatement.
- Discussions or correspondence in connection with the initial or recurring retention of the auditor including, among other matters, any discussions or correspondence regarding the application of accounting principles and auditing standards.

Independence

.45 Generally accepted auditing standards require independence for all audits. Relevant matters to consider in reaching a conclusion about independence include circumstances or relationships that create threats to auditor independence and the related safeguards that have been applied to eliminate those threats or reduce them to an acceptable level.⁶

.46 Although the auditor's report affirms the auditor's independence, in certain situations, particularly for public interest entities,⁷ the auditor may determine that it is appropriate to communicate with those charged with governance circumstances or relationships (for example, financial interests, business or family relationships, or nonaudit services provided or expected to be provided) that in the auditor's professional judgment may reasonably be thought to bear on independence and that the auditor gave significant consideration to in reaching the conclusion that independence has not been impaired.

.47 The form and timing of communications regarding independence may be affected by the entity's governance structure and whether a formal subgroup such as an audit committee exists. In situations where all of those charged with governance are involved in managing the entity, the auditor may determine that those charged with governance have been informed of relevant facts regarding the auditor's independence through their management activities or through other means, such as the engagement letter. This is particularly likely where the entity is owner-managed, and the auditor's firm has little involvement with the entity beyond a financial statement audit.

⁶ Comprehensive guidance on threats to independence and safeguards, including application to specific situations, is set forth in the AICPA's *Conceptual Framework for AICPA Independence Standards* [ET section 100-1].

⁷ In addition to entities subject to Securities and Exchange Commission reporting requirements, the *Conceptual Framework for AICPA Independence Standards* [ET section 100-1] considers the following entities to be *public interest entities*: (1) employee benefit and health and welfare plans subject to Employee Retirement Income Security Act audit requirements; (2) governmental retirement plans; (3) entities or programs (including for-profit entities) subject to Single Audit Act OMB Circular A-133 audit requirements and entities or programs subject to similar program oversight; and (4) financial institutions, credit unions, and insurance companies. These entities are public interest entities because their audited financial statements are directly relied upon by significant numbers of stakeholders to make investment, credit, or similar decisions or indirectly relied upon through regulatory oversight (for example, in the case of pension plans, banks, and insurance companies) and, therefore, the potential extent of harm to the public from an audit failure involving one of these entities would generally be significant.

The Communication Process

Establishing a Mutual Understanding

.48 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. Clear communication of the auditor's responsibilities (paragraphs .26 through .28), an overview of the planned scope and timing of the audit (paragraphs .29 through .33), and the expected general content of communications helps establish the basis for effective two-way communication.

.49 Matters that may also contribute to effective two-way communication include discussion of:

- The purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- The form in which communications will be made.
- The person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- The auditor's expectation that communication will be two way, and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; the suspicion or the detection of fraud; or concerns about the integrity or competence of senior management.
- The process for taking action and reporting back on matters communicated by the auditor.
- The process for taking action and reporting back on matters communicated by those charged with governance.

.50 The communication process will vary with the circumstances, including the size and governance structure of the entity, how those charged with governance operate, and the auditor's view of the significance of matters to be communicated. Difficulty in establishing effective two-way communication may indicate that the communication between the auditor and those charged with governance is not adequate for the purpose of the audit (see paragraph .60).

Forms of Communication

.51 The auditor should communicate in writing with those charged with governance significant findings from the audit (see paragraphs .34 and .35) when, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. Other communications may be oral or in writing.

.52 Effective communication may involve formal presentations and written reports as well as less formal communications, including discussions. Written communications may include an engagement letter that is provided to those charged with governance.

.53 In addition to the significance of a particular matter, the form of communication (for example, whether to communicate orally or in writing, the

extent of detail or summarization in the communication, and whether to communicate in a formal or informal manner) may be affected by such factors as:

- Whether the matter has been satisfactorily resolved.
- Whether management has previously communicated the matter.
- The size, operating structure, control environment, and legal structure of the entity being audited.
- Legal or regulatory requirements that may require a written communication with those charged with governance.
- The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- The amount of ongoing contact and dialogue the auditor has with those charged with governance.
- Whether there have been significant changes in the membership of a governing body.
- In the case of a special purpose financial statement audit, whether the auditor also audits the entity's general purpose financial statements.

.54 When a significant matter is discussed with an individual member of those charged with governance, for example, the chair of an audit committee, it may be appropriate for the auditor to summarize the matter in later communications so that all of those charged with governance have full and balanced information.

.55 When the auditor communicates matters in accordance with this section in writing, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management and is not intended to be and should not be used by anyone other than these specified parties.

Timing of Communications

.56 The auditor should communicate with those charged with governance on a sufficiently timely basis to enable those charged with governance to take appropriate action.

.57 The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter, and the action expected to be taken by those charged with governance. The auditor may consider communicating:

- Planning matters early in the audit engagement and, for an initial engagement, as part of the terms of the engagement.
- Significant difficulties encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor to overcome the difficulties, or if the difficulties are likely to lead to a modified opinion.

.58 Other factors that may be relevant to the timing of communications include:

- The size, operating structure, control environment, and legal structure of the entity being audited.
- Any legal obligation to communicate certain matters within a specified timeframe.

- The expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- The time at which the auditor identifies certain matters, for example, timely communication of a material weakness to enable appropriate remedial action to be taken.
- Whether the auditor is auditing both general purpose and special purpose financial statements.

Adequacy of the Communication Process

.59 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should take appropriate action to address the effectiveness of the communication process. (See paragraph .62.)

.60 As discussed in paragraph .08, effective two-way communication assists both the auditor and those charged with governance. Further, section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, identifies participation by those charged with governance, including their interaction with internal audit, if any, and external auditors, as an element of the entity's control environment. Inadequate two-way communication may indicate an unsatisfactory control environment, which will influence the auditor's assessment of the risks of material misstatements.

.61 The auditor need not design specific procedures to support the evaluation required by paragraph .59. Rather, that evaluation may be based on observations resulting from audit procedures performed for other purposes. Such observations may include:

- The appropriateness and timeliness of actions taken by those charged with governance in response to matters communicated by the auditor.
- The apparent openness of those charged with governance in their communications with the auditor.
- The willingness and capacity of those charged with governance to meet with the auditor without management present.
- The apparent ability of those charged with governance to fully comprehend matters communicated by the auditor, such as the extent to which those charged with governance probe issues and question recommendations made to them.
- Difficulty in establishing with those charged with governance a mutual understanding of the form, timing, and expected general content of communications.
- Where all or some of those charged with governance are involved in managing the entity, their apparent awareness of how matters discussed with the auditor affect their broader governance responsibilities, as well as their management responsibilities.

.62 If, in the auditor's judgment, the two-way communication between the auditor and those charged with governance is not adequate, there is a risk the auditor may not have obtained all the audit evidence required to form an opinion on the financial statements. The auditor should consider the effect, if any, on the auditor's assessment of the risks of material misstatements.

.63 The auditor may discuss the situation with those charged with governance. If the situation cannot be resolved, the auditor may take such actions as:

- Modifying the auditor's opinion on the basis of a scope limitation.
- Obtaining legal advice about the consequences of different courses of action.
- Communicating with third parties (for example, a regulator), or a higher authority in the governance structure that is outside the entity, such as the owners of a business (for example, shareholders in a general meeting), or the responsible government agency for certain governmental entities.
- Withdrawing from the engagement.

Documentation

.64 When matters required to be communicated by this section have been communicated orally, the auditor should document them.⁸ When matters have been communicated in writing, the auditor should retain a copy of the communication. Documentation of oral communication may include a copy of minutes prepared by the entity if those minutes are an appropriate record of the communication.

Effective Date

.65 This section is effective for audits of financial statements for periods beginning on or after December 15, 2006.

⁸ Section 339, *Audit Documentation*, requires the auditor to document discussions of significant findings or issues with management and others (including those charged with governance) on a timely basis, including responses. That section also requires that the audit documentation include documentation of the significant findings or issues discussed, and when and with whom the discussions took place.

.66

Appendix A

Requirements to Communicate With Those Charged With Governance in Other Statements on Auditing Standards

A1. Requirements for the auditor to communicate with those charged with governance are included in other Statements on Auditing Standards. This section does not change the requirements in:

- a. Paragraph .17 of section 317, *Illegal Acts by Clients*, to communicate with the audit committee or others with equivalent authority and responsibility illegal acts that come to the auditor's attention.
- b. Paragraphs .36–.37 of section 801, *Compliance Audits*, for the auditor to communicate (i) in writing to management and those charged with governance identified significant deficiencies and material weakness in internal control over compliance, even in the absence of a governmental audit requirement to report on internal control over compliance; and (ii) to those charged with governance of the entity, the auditor's responsibilities under GAAS, *Government Auditing Standards*, and the governmental audit requirement, an overview of the planned scope and timing of the compliance audit, and significant findings from the compliance audit.
- c. Paragraph .22 of section 316, *Consideration of Fraud in a Financial Statement Audit*, to inquire directly of the audit committee (or at least its chair) regarding the audit committee's views about the risks of fraud and whether the audit committee has knowledge of any fraud or suspected fraud affecting the entity.
- d. Paragraph .79 of section 316, *Consideration of Fraud in a Financial Statement Audit*, to communicate with those charged with governance fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements. In addition, the auditor should reach an understanding with those charged with governance regarding the nature and extent of communications with those charged with governance about misappropriations perpetrated by lower-level employees.
- e. Paragraph .20 of section 325, *Communicating Internal Control Related Matters Identified in an Audit*, to communicate in writing to management and those charged with governance control deficiencies identified during an audit that upon evaluation are considered significant deficiencies or material weaknesses.

[Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS No. 117.]

.67

Appendix B

Qualitative Aspects of Accounting Practices

The communication in accordance with paragraph .34a of this section, and discussed in paragraphs .37 and .38, may include such matters as the following:

Accounting Policies

- The appropriateness of the accounting policies to the particular circumstances of the entity, considering the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements. Where acceptable alternative accounting policies exist, the communication may include identification of the financial statement items that are affected by the choice of significant policies as well as information on accounting policies used by similar entities.
- The initial selection of, and changes in, significant accounting policies, including the application of new accounting pronouncements. The communication may include the effect of the timing and method of adoption of a change in accounting policy on the current and future earnings of the entity; and the timing of a change in accounting policies in relation to expected new accounting pronouncements.
- The effect of significant accounting policies in controversial or emerging areas (or those unique to an industry, particularly when there is a lack of authoritative guidance or consensus).
- The effect of the timing of transactions in relation to the period in which they are recorded.

Accounting Estimates

- For items for which estimates are significant, issues discussed in section 342, *Auditing Accounting Estimates*, and section 328, *Auditing Fair Value Measurements and Disclosures*, including, for example:
 - Management's identification of accounting estimates.
 - Management's process for making accounting estimates.
 - Risks of material misstatement.
 - Indicators of possible management bias.
 - Disclosure of estimation uncertainty in the financial statements.

Financial Statement Disclosures

- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures (for example, disclosures related to revenue recognition, going concern, subsequent events, and contingency issues).
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements.

Related Matters

- The potential effect on the financial statements of significant risks and exposures, and uncertainties, such as pending litigation, that are disclosed in the financial statements.

- The extent to which the financial statements are affected by unusual transactions including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements.
 - The factors affecting asset and liability carrying values, including the entity's bases for determining useful lives assigned to tangible and intangible assets. The communication may explain how factors affecting carrying values were selected and how alternative selections would have affected the financial statements.
 - The selective correction of misstatements, for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings.
-

AU Section 390

Consideration of Omitted Procedures After the Report Date

Source: SAS No. 46.

Effective, unless otherwise indicated: October 31, 1983.

.01 This section provides guidance on the considerations and procedures to be applied by an auditor who, subsequent to the date of his report on audited financial statements, concludes that one or more auditing procedures considered necessary at the time of the audit in the circumstances then existing were omitted from his audit of the financial statements, but there is no indication that those financial statements are not fairly presented in conformity with generally accepted accounting principles or with another comprehensive basis of accounting.¹ This circumstance should be distinguished from that described in section 561, which applies if an auditor, subsequent to the date of his report on audited financial statements, becomes aware that facts regarding those financial statements may have existed at that date that might have affected his report had he then been aware of them.

.02 Once he has reported on audited financial statements, an auditor has no responsibility to carry out any retrospective review of his work. However, reports and working papers relating to particular engagements may be subjected to post-issuance review in connection with a firm's internal inspection program,² peer review, or otherwise, and the omission of a necessary auditing procedure may be disclosed.

.03 A variety of conditions might be encountered in which an auditing procedure considered necessary at the time of the audit in the circumstances then existing has been omitted; therefore, the considerations and procedures described herein necessarily are set forth only in general terms. The period of time during which the auditor considers whether this section applies to the circumstances of a particular engagement and then takes the actions, if any, that are required hereunder may be important. Because of legal implications that may be involved in taking the actions contemplated herein, the auditor would be well advised to consult with his attorney when he encounters the circumstances to which this section may apply, and, with the attorney's advice and assistance, determine an appropriate course of action.

.04 When the auditor concludes that an auditing procedure considered necessary at the time of the audit in the circumstances then existing was omitted from his audit of financial statements, he should assess the importance of the omitted procedure to his present ability to support his previously expressed

¹ The provisions of this section are not intended to apply to an engagement in which an auditor's work is at issue in a threatened or pending legal proceeding or regulatory investigation. (*A threatened legal proceeding* means that a potential claimant has manifested to the auditor an awareness of, and present intention to assert, a possible claim.)

² See section 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*, paragraph .02, and related quality control standards regarding the quality control function of inspection.

opinion regarding those financial statements taken as a whole. A review of his working papers, discussion of the circumstances with engagement personnel and others, and a re-evaluation of the overall scope of his audit may be helpful in making this assessment. For example, the results of other procedures that were applied may tend to compensate for the one omitted or make its omission less important. Also, subsequent audits may provide audit evidence in support of the previously expressed opinion.

.05 If the auditor concludes that the omission of a procedure considered necessary at the time of the audit in the circumstances then existing impairs his present ability to support his previously expressed opinion regarding the financial statements taken as a whole, and he believes there are persons currently relying, or likely to rely, on his report, he should promptly undertake to apply the omitted procedure or alternative procedures that would provide a satisfactory basis for his opinion.

.06 When as a result of the subsequent application of the omitted procedure or alternative procedures, the auditor becomes aware that facts regarding the financial statements existed at the date of his report that would have affected that report had he been aware of them, he should be guided by the provisions of section 561.05–.09.

.07 If in the circumstances described in paragraph .05, the auditor is unable to apply the previously omitted procedure or alternative procedures, he should consult his attorney to determine an appropriate course of action concerning his responsibilities to his client, regulatory authorities, if any, having jurisdiction over the client, and persons relying, or likely to rely, on his report.

Effective Date

.08 This section is effective as of October 31, 1983.

AU Section 410

Adherence to Generally Accepted Accounting Principles

Source: SAS No. 1, section 410; SAS No. 62.

See section 9410 for interpretations of this section.

Issue date, unless otherwise indicated: November, 1972.

.01 The first standard of reporting is:

The auditor must state in the auditor's report whether the financial statements are presented in accordance with generally accepted accounting principles.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of SAS No. 113.]

.02 The term *generally accepted accounting principles* as used in reporting standards is construed to include not only accounting principles and practices but also the methods of applying them. The first reporting standard is construed not to require a statement of fact by the auditor but an opinion as to whether the financial statements are presented in conformity with such principles.¹ If limitations on the scope of the audit make it impossible for the auditor to form an opinion as to such conformity, appropriate qualification of his report is required. [Amended by SAS No. 14, effective with respect to engagements to issue special reports on data for periods beginning after December 31, 1976.]

[.03–.04] [Superseded, July 1975, by SAS No. 5, as superseded by section 411, as withdrawn by the Auditing Standards Board.]

¹ When an auditor reports on financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles, the first standard of reporting is satisfied by disclosing in the auditor's report that the statements have been prepared in conformity with another comprehensive basis of accounting other than generally accepted accounting principles and by expressing an opinion (or disclaiming an opinion) on whether the financial statements are presented in conformity with the comprehensive basis of accounting used (see section 623, *Special Reports*, paragraphs .02-.10).

AU Section 9410

Adherence to Generally Accepted Accounting Principles: Auditing Interpretations of Section 410

[1.] Accounting Principles Recommended by Trade Associations^[1]

[.01–.03] [Withdrawn, August 1982, by Statement on Auditing Standards No. 43.]

[2.] The Impact of FASB Statement No. 2 on Auditor's Report Issued Prior to the Statement's Effective Date²

[.04–.12] [Superseded, October 1979, by Interpretation No. 3, paragraphs .13–.18.]

3. The Impact on an Auditor's Report of Accounting Guidance Prior to its Effective Date

.13 Question—What is the impact on the auditor's report when (a) the auditor is reporting on financial statements issued before the effective date of accounting guidance currently reflected in Financial Accounting Standards Board (FASB) *Accounting Standards Codification*TM (ASC) as "pending content" due to transition and open effective date information, and (b) these financial statements will have to be restated in the future because this "pending content" will require retroactive application of its provisions by prior period adjustment?

.14 Interpretation—Where the accounting guidance being followed is currently acceptable, the auditor should not qualify his opinion if a company does not adopt the accounting guidance that is currently reflected as "pending content" in FASB ASC due to transition and open effective date information. An example would include the accounting guidance originally issued on research and development costs, which is now reflected in FASB ASC 730, *Research and Development Costs*. This guidance was originally issued in October 1974, but was effective for fiscal years beginning on or after January 1, 1975. This guidance requires companies to expense certain research and development costs in the period they are incurred. Companies that had deferred research and development costs were required to restate their financial statements by prior period adjustment in the period in which this guidance became effective. Deferring research and development costs before this guidance became effective was an acceptable alternative principle under generally accepted accounting principles (GAAP), although this guidance proscribed such treatment for fiscal years beginning on or after January 1, 1975. Other reporting considerations are addressed in the following paragraphs.

.15 Section 508, Reports on Audited Financial Statements, paragraph .41 states: "Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include related notes)." For financial statements that

^[1] [Footnote deleted.]

² Originally issued under the title "Effect on the Auditor's Opinion of FASB Statement on Research and Development Costs" (*Journal of Accountancy*, Jan. 1975, p. 74).

are prepared on the basis of accounting principles that are acceptable at the financial-statement date but that will not be acceptable in the future, the auditor should consider whether disclosure of the impending change in principle and the resulting restatement are essential data. If he decides that the matter should be disclosed and it is not, the auditor should express a qualified or adverse opinion as to conformity with GAAP, as required by section 508 paragraph .41.

.16 To evaluate the adequacy of disclosure of the prospective change in principle, the auditor should assess the potential effect on the financial statements. Using the research and development cost example given previously, the effect of the anticipated prior period adjustment to write off previously deferred research and development costs would in some instances be so material that disclosure would be essential for an understanding of the financial statements. In cases such as this, where the estimated impact is so material, disclosure can best be made by supplementing the historical financial statements with pro forma financial data that give effect to the future adjustment as if it had occurred on the date of the balance sheet. (See section 560 paragraph .05.) The pro forma data may be presented in columnar form alongside the historical statements, in the notes to the historical statements, or in separate pro forma statements presented with the historical statements.

.17 The auditor also should consider whether disclosure is needed for other effects that may result upon the required future adoption of an accounting principle. For example, the future adoption of such a principle may result in a reduction to stockholders' equity that may cause the company to be in violation of its debt covenants, which in turn may accelerate the due date for repayment of debt.

.18 Even if the auditor decides that the disclosure of the forthcoming change and its effects are adequate and, consequently, decides not to qualify his opinion, he nevertheless may decide to include an explanatory paragraph in his report if the effects of the change are expected to be unusually material. The explanatory paragraph should not be construed as a qualification of the auditor's opinion; it is intended to highlight circumstances of particular importance and to aid in interpreting the financial statements (see section 508 paragraph .19).

AU Section 411***The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles***

(Supersedes SAS No. 5.)

Source: SAS No. 69; SAS No. 91; SAS No. 93.

See section 9411 for interpretations of this section.

Effective for audits of financial statements for periods ending after March 15, 1992, unless otherwise indicated.

Notice of Withdrawal of Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, and Interpretation No. 3, “The Auditor’s Consideration of Management’s Adoption of Accounting Principles for New Transactions or Events”

The hierarchies of generally accepted accounting principles (GAAP hierarchies) of nongovernmental, state and local, and federal reporting entities have resided in SAS No. 69 in the auditing literature. The Financial Accounting Standards Board (FASB), the Governmental Accounting Standards Board (GASB), and the Federal Accounting Standards Advisory Board (FASAB) have issued the following pronouncements that incorporate their respective GAAP hierarchy into their respective authoritative literature:

- FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, as superseded by FASB Statement No. 168, *The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*
- GASB Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*
- Statement of Federal Financial Accounting Standards No. 34, *The Hierarchy of Generally Accepted Accounting Principles, Including the Application of Standards Issued by the Financial Accounting Standards Board*

Therefore, the Auditing Standards Board (ASB) has withdrawn SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, and its interpretation.

AU Section 9411***The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles: Auditing Interpretations of Section 411*****Notice of Withdrawal of Statement on Auditing Standards (SAS) No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles, and Interpretation No. 3, “The Auditor’s Consideration of Management’s Adoption of Accounting Principles for New Transactions or Events”***

The hierarchies of generally accepted accounting principles (GAAP hierarchies) of nongovernmental, state and local, and federal reporting entities have resided in SAS No. 69 in the auditing literature. The Financial Accounting Standards Board (FASB), the Governmental Accounting Standards Board (GASB), and the Federal Accounting Standards Advisory Board (FASAB) have issued the following pronouncements that incorporate their respective GAAP hierarchy into their respective authoritative literature:

- FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, as superseded by FASB Statement No. 168, *The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162*
- GASB Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*
- Statement of Federal Financial Accounting Standards No. 34, *The Hierarchy of Generally Accepted Accounting Principles, Including the Application of Standards Issued by the Financial Accounting Standards Board*

Therefore, the Auditing Standards Board (ASB) has withdrawn SAS No. 69, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, and its interpretation.

AU Section 420

Consistency of Application of Generally Accepted Accounting Principles*

Source: SAS No. 1, section 420; SAS No. 43; SAS No. 88.

See section 9420 for interpretations of this section.

Issue date, unless otherwise indicated: November, 1972.

.01 The second standard of reporting (referred to herein as the consistency standard) is:

The auditor must identify in the auditor's report those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 The objective of the consistency standard is to ensure that if comparability of financial statements between periods has been materially affected by changes in accounting principles, there will be appropriate reporting by the independent auditor regarding such changes.¹ It is also implicit in the objective that such principles have been consistently observed within each period. The auditor's standard report implies that the auditor is satisfied that the comparability of financial statements between periods has not been materially affected by changes in accounting principles and that such principles have been consistently applied between or among periods because either (a) no change in accounting principles has occurred, or (b) there has been a change in accounting principles or in the method of their application, but the effect of the change on the comparability of the financial statements is not material. In these cases, the auditor would not refer to consistency in his report.

.03 Proper application of the consistency standard by the independent auditor requires an understanding of the relationship of consistency to

* This section has not been updated to reflect the issuance of Financial Accounting Standards Board (FASB) Statement No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*, which supersedes Accounting Principles Board Opinion No. 20, *Accounting Changes*. It is expected to be updated when this section is clarified in accordance with the AICPA Auditing Standards Board's (ASB) Clarity Project. The clarity project is a significant effort that the ASB has undertaken to make U.S. generally accepted auditing standards easier to read, understand, and apply by utilizing established clarity drafting conventions. Once finalized, the effective date of all clarified standards is expected to apply to audits of financial statements for periods beginning on or after December 15, 2010. This date is provisional, but will not be earlier.

In July 2009, FASB approved FASB *Accounting Standards Codification* (ASC), effectively superseding FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, because all of the FASB ASC content carries the same level of authority. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other non-grandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative.

As a result of these developments, this section has not been conformed to reflect FASB ASC.

¹ The appropriate form of reporting on a lack of consistency is discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .16–.18. [Footnote added to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62.]

comparability. Although lack of consistency may cause lack of comparability, other factors unrelated to consistency may also cause lack of comparability.²

.04 A comparison of the financial statements of an entity between years may be affected by (a) accounting changes, (b) an error in previously issued financial statements, (c) changes in classification, and (d) events or transactions substantially different from those accounted for in previously issued statements. Accounting change, as defined in APB Opinion No. 20 [AC section A06], means a change in (1) an accounting principle, (2) an accounting estimate, or (3) the reporting entity (which is a special type of change in accounting principle).

.05 Changes in accounting principle having a material effect on the financial statements require recognition in the independent auditor's report through the addition of an explanatory paragraph (following the opinion paragraph). Other factors affecting comparability in financial statements may require disclosure, but they would not ordinarily be commented upon in the independent auditor's report.

Accounting Changes Affecting Consistency

Change in Accounting Principle

.06 "A change in accounting principle results from adoption of a generally accepted accounting principle different from the one used previously for reporting purposes. The term *accounting principle* includes not only accounting principles and practices but also the methods of applying them."³ A change in accounting principle includes, for example, a change from the straight-line method to the declining balance method of depreciation for all assets in a class or for all newly acquired assets in a class. The consistency standard is applicable to this type of change and requires recognition in the auditor's report through the addition of an explanatory paragraph. [As modified, effective January 1, 1975, by FASB Statement No. 2 (AC section R50).]

Change in the Reporting Entity

.07 A change in the reporting entity is a special type of change in accounting principle, which results in financial statements that, in effect, are those of a different reporting entity. This type is limited mainly to—

- a. Presenting consolidated or combined statements in place of statements of individual companies.
- b. Changing specific subsidiaries comprising the group of companies for which consolidated statements are presented.
- c. Changing the companies included in combined financial statements.

A business combination accounted for by the pooling of interests method also results in a different reporting entity.⁴ [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

² For a discussion of comparability of financial statements of a single enterprise, see paragraphs 111 through 119 of FASB Statement of Financial Accounting Concepts No. 2, "Qualitative Characteristics of Accounting Information." [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Revised, June, 1993, to reflect conforming changes necessary due to the issuance of Statement of Position 93-3.]

³ Accounting Principles Board Opinion No. 20, paragraph 7 [AC section A06.105]. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62.]

⁴ APB Opinion No. 20 paragraph .12. [Footnote added, effective December 1999, by Statement on Auditing Standards No. 88.]

.08 A change in the reporting entity resulting from a transaction or event, such as a pooling of interests, or the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require that an explanatory paragraph about consistency be included in the auditor's report. A change in the reporting entity that does not result from a transaction or event requires recognition in the auditor's report through inclusion of an explanatory paragraph. [Paragraph added, effective December 1999, by Statement on Auditing Standards No. 88.]

.09 When companies have merged or combined in a pooling of interests, appropriate effect of the pooling should be given in the presentation of financial position, results of operations, cash flows, and other historical financial data of the continuing business for the year in which the combination is consummated and, in comparative financial statements, for years prior to the year of pooling, as described in APB Opinion No. 16, *Business Combinations* [AC section B50]. If prior year financial statements, presented in comparison with current year financial statements, are not restated to give appropriate recognition to a pooling of interests, a departure from generally accepted accounting principles has occurred which necessitates that the auditor express a qualified or an adverse opinion as discussed in section 508, *Reports on Audited Financial Statements*, paragraphs .35–.40. Since the inconsistency arises not from a change in the application of an accounting principle in the current year, but from the lack of such application to prior years, an explanatory paragraph (in addition to the modification relating to the departure from generally accepted accounting principles) is not required. [Paragraph added to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Paragraph renumbered and amended, effective December 1999, by Statement on Auditing Standards No. 88.]

[.10] [Paragraph added to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Paragraph renumbered and deleted by the issuance of Statement on Auditing Standards No. 88, December 1999.]

[.11] [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Paragraph subsequently renumbered and deleted by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Correction of an Error in Principle

.12 A change from an accounting principle that is not generally accepted to one that is generally accepted, including correction of a mistake in the application of a principle, is a correction of an error. Although this type of change in accounting principle should be accounted for as the correction of an error,⁵ the change requires recognition in the auditor's report through the addition of an explanatory paragraph. [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]^[6]

⁵ See paragraphs 13, 36, and 37 of APB Opinion No. 20 [AC section A35.104–105]. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

^[6] [Footnote deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Footnote renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Change in Principle Inseparable From Change in Estimate

.13 The effect of a change in accounting principle may be inseparable from the effect of a change in estimate.⁷ Although the accounting for such a change is the same as that accorded a change only in estimate, a change in principle is involved. Accordingly, this type of change requires recognition in the independent auditor's report through the addition of an explanatory paragraph. [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Changes in Presentation of Cash Flows

.14 For purposes of presenting cash flows, FASB Statement No. 95, *Statement of Cash Flows* [AC section C25], states that, "An enterprise shall disclose its policy for determining which items are treated as cash equivalents. Any change to that policy is a change in accounting principle that shall be effected by restating financial statements for earlier years presented for comparative purposes." Accordingly, this type of change in presentation of cash flows requires recognition in the independent auditor's report through the addition of an explanatory paragraph. [Paragraph added to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Changes Not Affecting Consistency

Change in Accounting Estimate

.15 Accounting estimates (such as service lives and salvage values of depreciable assets and provisions for warranty costs, uncollectible receivables, and inventory obsolescence) are necessary in the preparation of financial statements. Accounting estimates change as new events occur and as additional experience and information are acquired. This type of accounting change is required by altered conditions that affect comparability but do not involve the consistency standard. The independent auditor, in addition to satisfying himself with respect to the conditions giving rise to the change in accounting estimate, should satisfy himself that the change does not include the effect of a change in accounting principle. Provided he is so satisfied, he need not comment on the change in his report.^[8] However, an accounting change of this type having a material effect on the financial statements may require disclosure in a note to the financial statements.⁹ [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards

⁷ See paragraph 11 of Accounting Principles Board Opinion No. 20 [AC section A06.110]. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

^[8] [Footnote deleted. Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

⁹ See paragraph 33 of Accounting Principles Board Opinion No. 20 [AC section A06.132]. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Nos. 53 through 62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Error Correction Not Involving Principle

.16 Correction of an error in previously issued financial statements resulting from mathematical mistakes, oversight, or misuse of facts that existed at the time the financial statements were originally prepared does not involve the consistency standard if no element of accounting principles or their application is included. Accordingly, the independent auditor need not recognize the correction in his report.¹⁰ [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Changes in Classification and Reclassifications

.17 Classifications in the current financial statements may be different from classifications in the prior year's financial statements. Although changes in classification are usually not of sufficient importance to necessitate disclosure, material changes in classification should be indicated and explained in the financial statements or notes. These changes and material reclassifications made in previously issued financial statements to enhance comparability with current financial statements ordinarily would not need to be referred to in the independent auditor's report. [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Variations in Presentation of Statement of Changes in Financial Position

[.18] [Paragraph renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88.]

Substantially Different Transactions or Events

.19 Accounting principles are adopted when events or transactions first become material in their effect. Such adoption, as well as modification or adoption of an accounting principle necessitated by transactions or events that are clearly different in substance from those previously occurring, do not involve the consistency standard although disclosure in the notes to the financial statements may be required. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, August 1982. Paragraph subsequently renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

¹⁰ If the independent auditor had previously reported on the financial statements containing the error, he should refer to section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Changes Expected to Have a Material Future Effect

.20 If an accounting change has no material effect on the financial statements in the current year, but the change is reasonably certain to have substantial effect in later years, the change should be disclosed in the notes to the financial statements whenever the statements of the period of change are presented, but the independent auditor need not recognize the change in his report. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, August 1982. Paragraph subsequently renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Disclosure of Changes Not Affecting Consistency

.21 While the matters do not require the addition of an explanatory paragraph about consistency in the independent auditor's report, the auditor should qualify his opinion as to the disclosure matter if necessary disclosures are not made. (See section 431.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, August 1982. Paragraph subsequently renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

Periods to Which the Consistency Standard Relates

.22 When the independent auditor reports only on the current period, he should obtain sufficient appropriate audit evidence about consistency of the application of accounting principles, regardless of whether financial statements for the preceding period are presented. (The term "current period" means the most recent year, or period of less than one year, upon which the independent auditor is reporting.) When the independent auditor reports on two or more years, he should address the consistency of the application of accounting principles between such years and the consistency of such years with the year prior thereto if such prior year is presented with the financial statements being reported upon. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, August 1982. Paragraph subsequently renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999. Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Consistency Expression

[**.23**] [Paragraph renumbered and deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53–62. Paragraph subsequently renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999.]

First Year Audits

.24 When the independent auditor has not audited the financial statements of a company for the preceding year, he should adopt procedures that are practicable and reasonable in the circumstances to assure himself that the accounting principles employed are consistent between the current and the

preceding year. Where adequate records have been maintained by the client, it is usually practicable and reasonable to extend auditing procedures to gather sufficient appropriate audit evidence about consistency. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999. Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.25 Inadequate financial records or limitations imposed by the client may preclude the independent auditor from obtaining sufficient appropriate audit evidence about the consistent application of accounting principles between the current and the prior year, as well as to the amounts of assets or liabilities at the beginning of the current year. Where such amounts could materially affect current operating results, the independent auditor would also be unable to express an opinion on the current year's results of operations and cash flows. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 88, December 1999. Revised, March 2008, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

AU Section 9420

Consistency of Application of Generally Accepted Accounting Principles: Auditing Interpretations of Section 420*

[1.] The Effect of APB Opinion No. 30 on Consistency¹

[.01–.10] [Superseded October 1979 by Interpretation No. 5 paragraphs .28–.31.]

2. The Effect of APB Opinion No. 28 on Consistency

.11 Question—Independent auditors may be engaged to report on financial information for an annual period and a subsequent interim period. Should the auditor add an explanatory paragraph (following the opinion paragraph) to his report in those circumstances where accounting principles and practices used in preparing the annual financial information have been modified in accordance with APB Opinion No. 28 [AC section I73] in preparing the interim financial statements?

.12 Interpretation—No. The auditor should not add an explanatory paragraph to his report because of these modifications. Although the modifications deemed appropriate under Opinion No. 28 [AC section I73] may appear to be changes in the methods of applying accounting principles, they differ from changes in methods that require an explanatory paragraph since the modifications are made in order to recognize a difference in circumstances, that is, a difference between presenting financial information for a year and presenting financial information for only a part of a year.

.13 Section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph .02, states: "The objective of the consistency standard is to ensure that if comparability of financial statements between periods has been materially affected by changes in accounting principles there will be appropriate reporting by the independent auditor regarding such changes." Section 420 paragraph .02 refers to changes in methods that lessen the usefulness

* This section has not been updated to reflect the issuance of Financial Accounting Standards Board (FASB) Statement No. 154, *Accounting Changes and Error Corrections—a replacement of APB Opinion No. 20 and FASB Statement No. 3*, which supersedes Accounting Principles Board Opinion No. 20, *Accounting Changes*. It is expected to be updated when this section is clarified in accordance with the AICPA Auditing Standards Board's (ASB) Clarity Project. The clarity project is a significant effort that the ASB has undertaken to make U.S. generally accepted auditing standards easier to read, understand, and apply by utilizing established clarity drafting conventions. Once finalized, the effective date of all clarified standards is expected to apply to audits of financial statements for periods beginning on or after December 15, 2010. This date is provisional, but will not be earlier.

In July 2009, FASB approved FASB *Accounting Standards Codification* (ASC), effectively superseding FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, because all of the FASB ASC content carries the same level of authority. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other non-grandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative.

As a result of these developments, this section has not been conformed to reflect FASB ASC.

¹ Originally issued under the title "Reporting on Consistency and Extraordinary Items" (*Journal of Accountancy*, Jan. '74, p. 67).

of financial statements in comparing the financial information of one period with that of an earlier period. Thus, the purpose of an explanatory paragraph about consistency in the auditor's report is to alert readers of the report not to make an unqualified comparison of the financial information for the two periods.

.14 The modifications introduced by Opinion No. 28 [AC section I73], however, do not lessen the comparability of the financial information of an interim period with that of a preceding annual period. On the contrary, those modifications are intended to enhance comparability between the two sets of financial information. As paragraph 10 of Opinion No. 28 [AC section I73.103] states, the modifications are needed "so that the reported results for the interim period may better relate to the results of operations for the annual period."

.15 Thus the modifications introduced by Opinion No. 28 [AC section I73] are not of the type that would require an explanatory paragraph (following the opinion paragraph) in the auditor's report. Independent auditors should, of course, add an explanatory paragraph if changes of the type that lessen comparability are introduced in the interim financial information.

[Issue Date: February 1974.]

3. Impact on the Auditor's Report of FIFO to LIFO Change in Comparative Financial Statements

.16 Question—Changing economic conditions have caused some companies to change their inventory pricing methods from the first-in, first-out (FIFO) method to the last in, first out (LIFO) method. When a company presents comparative financial statements and the year of the FIFO to LIFO change is the earliest year both presented and reported on, should the auditor refer to that change in accounting principle in his report?

.17 Interpretation—The auditor would not be required to refer in his report to a FIFO to LIFO change in the circumstances described above.

.18 A change in accounting principle usually results in including the cumulative effect of the change in net income of the period of the change. A change in inventory pricing method from FIFO to LIFO, however, is a change in accounting principle that ordinarily does not affect retained earnings at the beginning of the period in which the change was made. (See APB Opinion No. 20, paragraphs 14(d) and 26.)²

.19 An example of typical disclosure of a FIFO to LIFO change in the year of the change is as follows:

"In 1974, the company adopted the last in, first out (LIFO) method of costing inventory. Previously, the first in, first out (FIFO) method of costing inventory was used. Management believes that the LIFO method has the effect of minimizing the impact of price level changes on inventory valuations and generally matches current costs against current revenues in the income statement. The effect of the change was to reduce net income by \$xxxx (\$.xx per share) from that which would otherwise have been reported. There is no cumulative effect on prior years since the ending inventory as previously reported (1973) is the beginning inventory for LIFO purposes. Accordingly, pro forma results of operations for the prior year had LIFO been followed is not determinable."

.20 Section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph .22 discusses the periods to which the consistency

² AC section A06.122.

standard relates: "When the independent auditor reports on two or more years, he should address the consistency of the application of accounting principles between such years. . . ." For a FIFO to LIFO change made in the earliest year presented and reported on, there is no inconsistency in the application of accounting principles, and comparability between the earliest year and subsequent years is not affected since no cumulative effect is reported in the year of the change. Consequently, the independent auditor need not refer to the change in inventory pricing methods.

[.21–.23] [Paragraphs deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

[Issue Date: January 1975; Amended: April 1989.]

[4.] The Effect of FASB Statement No. 13 on Consistency^[3]

[.24–.27] [Withdrawn March 1989 by the Auditing Standards Board.]

[5.] The Effects of Changes in Accounting Principles and Classification on Consistency

[6.] The Effect of FASB Statement No. 34 on Consistency

[.32–.43] [Withdrawn March 1989 by the Auditing Standards Board.]

[7.] The Effect of FASB Statement No. 31 on Consistency

[.44–.51] [Withdrawn March 1989 by the Auditing Standards Board.]

8. The Effect of Accounting Changes by an Investee on Consistency

.52 Question—Does a change in accounting principle by an investee accounted for by the equity method require the auditor to add an explanatory paragraph (following the opinion paragraph) to his report on the financial statements of the investor?

.53 Interpretation—Changes in accounting principle affect the comparability of financial statements regardless of whether such changes originate at the investor level or are made solely by an investee.⁴ Section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph .02 states: "The objective of the consistency standard is to ensure that if comparability of financial statements between periods has been materially affected by changes in accounting principles there will be appropriate reporting by the independent auditor regarding such changes."

.54 Thus, the auditor would need to add an explanatory paragraph (following the opinion paragraph) to his report when there has been a change in accounting principle by an investee accounted for by the equity method that causes a material lack of comparability in the financial statements of an investor.

[.55–.57] [Paragraphs deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

[Issue Date: July 1980; Revised: June 1993.]

^[3] [Footnote deleted.]

⁴ For a discussion of comparability of financial statements of a single enterprise, see paragraphs 111 through 119 of FASB Statement of Financial Accounting Concepts No. 2, "Qualitative Characteristics of Accounting Information."

[9.] The Effect of Adoption of FASB Statement No. 35 on Consistency

[.58-.63] [Withdrawn March 1989 by the Auditing Standards Board.]

10. Change in Presentation of Accumulated Benefit Information in the Financial Statements of a Defined Benefit Pension Plan

.64 Question—FASB Statement No. 35, *Accounting and Reporting by Defined Benefit Pension Plans* [AC section Pe5] requires the presentation of information regarding the actuarial present value of accumulated plan benefits and year-to-year changes therein of a defined benefit pension plan but permits certain flexibility in presenting such information. The information may be included on the face of a financial statement (a separate statement or one that combines accumulated benefit information with asset information), or it may be included in the notes to the financial statements. Furthermore, the benefit information may be as of the beginning of the period being reported upon or as of the end of that period. Does a change in the format of presentation of accumulated benefit information or a change in the date as of which such information is presented require the auditor to add an explanatory paragraph (after the opinion paragraph) to his report because of the change?

.65 Interpretation—Such changes in the presentation of information regarding accumulated benefits are considered reclassifications or variations in the nature of information presented. Changes such as these that are material should be explained in the financial statements or notes, but these changes ordinarily would not require the auditor to add this explanatory paragraph to his report (see section 420 paragraph .17).

[Issue Date: December 1980.]

[11.] The Effect of the Adoption of FASB Statement No. 36 on Consistency

[.66-.68] [Withdrawn March 1989 by the Auditing Standards Board.]

12. The Effect on the Auditor's Report of an Entity's Adoption of a New Accounting Standard That Does Not Require the Entity to Disclose the Effect of the Change in the Year of Adoption

.69 Question—An entity adopts a new accounting standard (for example, Financial Accounting Standards Board Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*) and the standard does not require the entity to disclose, and the entity has not disclosed or determined, the effect of the change in the year of adoption.⁵

.70 Section 420, *Consistency of Application of Generally Accepted Accounting Principles*, paragraph .05 states, in part, that:

Changes in accounting principle having a *material* [emphasis added] effect on the financial statements require recognition in the independent auditor's report through the addition of an explanatory paragraph (following the opinion paragraph).

.71 If an accounting standard does not require the entity to disclose, and the entity has not disclosed or determined, the effect of the change in accounting principle in the year of adoption, how should the auditor determine materiality for purposes of applying the consistency standard?

⁵ Accounting Principles Board Opinion (APB) No. 20, *Accounting Changes*, does not apply to initial adoption of an accounting standard that specifies the manner of reporting the accounting change to conform with the conclusions of that standard. See APB No. 20, paragraph 4.

.72 Interpretation—According to section 420 paragraph .02, the objective of the second standard of reporting (referred to in section 420 as the *consistency standard*) is to:

...ensure that if comparability of financial statements between periods has been materially affected by changes in accounting principles, there will be appropriate reporting by the independent auditor regarding such changes. [Footnote omitted]

When an accounting standard does not require the entity to disclose the effect of the change in accounting principle in the year of adoption, section 420 does not require the auditor to independently determine the effect of that change in the year of adoption. Therefore, to determine whether to add an explanatory paragraph to the audit report for the accounting change resulting from adoption of such an accounting standard, the auditor should consider (a) the materiality of the cumulative effect of the change, where the accounting standard specifies that the cumulative effect of the change be recorded as of the beginning of the reporting period, and (b) the entity's voluntary disclosure, and the related support, regarding how it believes the change in accounting principle affected the financial statements in the year of adoption, when such disclosure is made. An explanatory paragraph would be required only if the cumulative effect of the change is material or if management discloses that it believes that the effect is or may be material in the year of adoption.

[Issue Date: April 2002.]

AU Section 431

Adequacy of Disclosure in Financial Statements

(Supersedes SAS No. 1, section 430.)

Source: SAS No. 32.

Issue date, unless otherwise indicated: October, 1980.

.01 The third standard of reporting is:

When the auditor determines that informative disclosures are not reasonably adequate, the auditor must so state in the auditor's report.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 The presentation of financial statements in conformity with generally accepted accounting principles includes adequate disclosure of material matters. These matters relate to the form, arrangement, and content of the financial statements and their appended notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth. An independent auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he is aware at the time.

.03 If management omits from the financial statements, including the accompanying notes, information that is required by generally accepted accounting principles, the auditor should express a qualified or an adverse opinion and should provide the information in his report, if practicable, unless its omission from the auditor's report is recognized as appropriate by a specific Statement on Auditing Standards.¹ In this context, *practicable* means that the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information. For example, the auditor would not be expected to prepare a basic financial statement or segment information and include it in his report when management omits such information.

.04 In considering the adequacy of disclosure, and in other aspects of his audit, the auditor uses information received in confidence from the client. Without such confidence, the auditor would find it difficult to obtain information necessary for him to form an opinion on financial statements. Thus, the auditor should not ordinarily make available, without the client's consent, information that is not required to be disclosed in financial statements to comply with generally accepted accounting principles (see AICPA Code of Professional Conduct, Rule 301 [ET section 301.01]).

¹ An independent auditor may participate in preparing financial statements, including accompanying notes. The financial statements, including accompanying notes, however, remain the representations of management, and such participation by the auditor does not require him to modify his report (see section 110.03).

AU Section 504

Association With Financial Statements

(Supersedes SAS No. 1, sections 516, 517, and 518 and SAS No. 15, paragraphs 13–15.)^[1]

Source: SAS No. 26; SAS No. 35; SAS No. 72.

See section 9504 for interpretations of this section.

Issue date, unless otherwise indicated: November, 1979.

.01 The fourth standard of reporting is:

The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

The objective of the fourth reporting standard is to prevent misinterpretation of the degree of responsibility the accountant assumes when his name is associated with financial statements. [Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.02 This section defines *association* as that term is used in the fourth reporting standard. It provides guidance to an accountant associated with the financial statements of a public entity or with a nonpublic entity's financial statements that he has been engaged to audit in accordance with generally accepted auditing standards.²

.03 An accountant is associated with financial statements when he has consented to the use of his name in a report, document, or written communication containing the statements.³ Also, when an accountant submits to his client or others financial statements that he has prepared or assisted in preparing, he is deemed to be associated even though the accountant does not append his name to the statements. Although the accountant may participate in the preparation of financial statements, the statements are representations of management, and the fairness of their presentation in conformity with generally accepted accounting principles is management's responsibility.

^[1] [Footnote deleted to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

² For purposes of this section, a public entity is any entity (a) whose securities trade in a public market either on a stock exchange (domestic or foreign) or in the over-the-counter market, including securities quoted only locally or regionally, (b) that makes a filing with a regulatory agency in preparation for the sale of any class of its securities in a public market, or (c) a subsidiary, corporate joint venture, or other entity controlled by an entity covered by (a) or (b). Statements on Standards for Accounting and Review Services provide guidance in connection with the unaudited financial statements or other unaudited financial information of a nonpublic entity.

³ However, this section does not apply to data, such as tax returns, prepared solely for submission to taxing authorities.

.04 An accountant may be associated with audited or unaudited financial statements. Financial statements are audited if the accountant has applied auditing procedures sufficient to permit him to report on them as described in section 508, *Reports on Audited Financial Statements*. The unaudited interim financial statements (or financial information) of a public entity are reviewed when the accountant has applied procedures sufficient to permit him to report on them as described in section 722, *Interim Financial Information*.

Disclaimer of Opinion on Unaudited Financial Statements

.05 When an accountant is associated with the financial statements of a public entity, but has not audited or reviewed⁴ such statements, the form of report to be issued is as follows:

The accompanying balance sheet of X Company as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

(Signature and date)

This disclaimer of opinion is the means by which the accountant complies with the fourth standard of reporting when associated with unaudited financial statements in these circumstances. The disclaimer may accompany the unaudited financial statements or it may be placed directly on them. In addition, each page of the financial statements should be clearly and conspicuously marked as unaudited. When an accountant issues this form of disclaimer of opinion, he has no responsibility to apply any procedures beyond reading the financial statements for obvious material misstatements. Any procedures that may have been applied should not be described, except in the limited circumstances set forth in paragraphs .18–.20. Describing procedures that may have been applied might cause the reader to believe the financial statements have been audited or reviewed.

.06 If the accountant is aware that his name is to be included in a client-prepared written communication of a public entity containing financial statements that have not been audited or reviewed, he should request (a) that his name not be included in the communication or (b) that the financial statements be marked as unaudited and that there be a notation that he does not express an opinion on them. If the client does not comply, the accountant should advise the client that he has not consented to the use of his name and should consider what other actions might be appropriate.⁵

Disclaimer of Opinion on Unaudited Financial Statements Prepared on a Comprehensive Basis of Accounting

.07 When an accountant is associated with unaudited financial statements of a public entity prepared in accordance with a comprehensive basis of

⁴ When a public entity does not have its annual financial statements audited, an accountant may be requested to review its annual or interim financial statements. In those circumstances, an accountant may make a review and look to the guidance in Statements on Standards for Accounting and Review Services for the standards and procedures and form of report applicable to such an engagement.

⁵ In considering what actions, if any, may be appropriate in the circumstances, the accountant may wish to consult his legal counsel.

accounting other than generally accepted accounting principles, he should follow the guidance provided by paragraph .05, except that he should modify the identification of financial statements in his disclaimer of opinion (see section 623.02-.10, *Special Reports*).⁶ For example, a disclaimer of opinion on cash-basis statements might be worded as follows:

The accompanying statement of assets and liabilities resulting from cash transactions of XYZ Corporation as of December 31, 19X1, and the related statement of revenues collected and expenses paid during the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

(Signature and date)

A note to the financial statements should describe how the basis of presentation differs from generally accepted accounting principles, but the monetary effect of such differences need not be stated.

Disclaimer of Opinion When Not Independent

.08 The second general standard states, "The auditor must maintain independence in mental attitude in all matters relating to the audit." The independent public accountant must be without bias with respect to the client; otherwise, he would lack that impartiality necessary for the dependability of his findings. Whether the accountant is independent is something he must decide as a matter of professional judgment. [Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.09 When an accountant is not independent, any procedures he might perform would not be in accordance with generally accepted auditing standards, and he would be precluded from expressing an opinion on such statements. Accordingly, he should disclaim an opinion with respect to the financial statements and should state specifically that he is not independent.

.10 If the financial statements are those of a nonpublic entity, the accountant should look to the guidance in Statements on Standards for Accounting and Review Services. In all other circumstances, regardless of the extent of procedures applied, the accountant should follow the guidance in paragraph .05, except that the disclaimer of opinion should be modified to state specifically that he is not independent. The reasons for lack of independence and any procedures he has performed should not be described; including such matters might confuse the reader concerning the importance of the impairment of independence. An example of such a report is as follows:

We are not independent with respect to XYZ Company, and the accompanying balance sheet as of December 31, 19X1, and the related statements of income, retained earnings, and cash flows for the year then ended were not audited by us and, accordingly, we do not express an opinion on them.

(Signature and date)

Circumstances Requiring a Modified Disclaimer

.11 If the accountant concludes on the basis of facts known to him that the unaudited financial statements on which he is disclaiming an opinion are not in conformity with generally accepted accounting principles, which include adequate disclosure, he should suggest appropriate revision; failing that, he should describe the departure in his disclaimer of opinion. This description

⁶ Reference to generally accepted accounting principles in this section includes, where applicable, another comprehensive basis of accounting.

should refer specifically to the nature of the departure and, if practicable, state the effects on the financial statements or include the necessary information for adequate disclosure.

.12 When the effects of the departure on the financial statements are not reasonably determinable, the disclaimer of opinion should so state. When a departure from generally accepted accounting principles involves inadequate disclosure, it may not be practicable for the accountant to include the omitted disclosures in his report. For example, when management has elected to omit substantially all of the disclosures, the accountant should clearly indicate that in his report, but the accountant would not be expected to include such disclosures in his report.

.13 If the client will not agree to revision of the financial statements or will not accept the accountant's disclaimer of opinion with the description of the departure from generally accepted accounting principles, the accountant should refuse to be associated with the statements and, if necessary, withdraw from the engagement.

Reporting on Audited and Unaudited Financial Statements in Comparative Form

.14 When unaudited financial statements are presented in comparative form with audited financial statements in documents filed with the Securities and Exchange Commission, such statements should be clearly marked as "unaudited" but should not be referred to in the auditor's report.

.15 When unaudited financial statements are presented in comparative form with audited financial statements in any other document, the financial statements that have not been audited should be clearly marked to indicate their status and either (a) the report on the prior period should be reissued (see section 530.06–.08)⁷ or (b) the report on the current period should include as a separate paragraph an appropriate description of the responsibility assumed for the financial statements of the prior period (see paragraphs .16 and .17). Either reissuance or reference in a separate paragraph is acceptable; in both circumstances, the accountant should consider the current form and manner of presentation of the financial statements of the prior period in light of the information of which he has become aware during his current engagement.

.16 When the financial statements of the prior period have been audited and the report on the current period is to contain a separate paragraph, it should indicate (a) that the financial statements of the prior period were audited previously, (b) the date of the previous report, (c) the type of opinion expressed previously, (d) if the opinion was other than unqualified, the substantive reasons therefor, and (e) that no auditing procedures were performed after the date of the previous report. An example of such a separate paragraph is as follows:

The financial statements for the year ended December 31, 19X1, were audited by us (other accountants) and we (they) expressed an unqualified opinion on them in our (their) report dated March 1, 19X2, but we (they) have not performed any auditing procedures since that date.

.17 When the financial statements of the prior period have not been audited and the report on the current period is to contain a separate paragraph, it should include (a) a statement of the service performed in the prior period, (b) the date

⁷ For reissuance of a compilation or review report, see Statements on Standards for Accounting and Review Services.

of the report on that service, (c) a description of any material modifications noted in that report, and (d) a statement that the service was less in scope than an audit and does not provide the basis for the expression of an opinion on the financial statements taken as a whole. When the financial statements are those of a public entity, the separate paragraph should include a disclaimer of opinion (see paragraph .05) or a description of a review. When the financial statements are those of a nonpublic entity and the financial statements were compiled or reviewed, the separate paragraph should contain an appropriate description of the compilation or review. For example, a separate paragraph describing a review might be worded as follows:

The 20X1 financial statements were reviewed by us (other accountants) and our (their) report thereon, dated March 1, 20X2, stated we (they) were not aware of any material modifications that should be made to those statements for them to be in conformity with generally accepted accounting principles. However, a review is substantially less in scope than an audit and does not provide a basis for the expression of an opinion on the financial statements taken as a whole.

A separate paragraph describing a compilation might be worded as follows:

The 19X1 financial statements were compiled by us (other accountants) and our (their) report thereon, dated March 1, 19X2, stated we (they) did not audit or review those financial statements and, accordingly, express no opinion or other form of assurance on them.

Negative Assurance

.18 When an accountant, for whatever reason, disclaims an opinion on financial statements his disclaimer should not be contradicted by the inclusion of expressions of assurance on the absence of knowledge of departures from generally accepted accounting principles except as specifically recognized as appropriate in applicable standards established by the American Institute of Certified Public Accountants.

.19 Negative assurances, for example, are permissible in letters for underwriters in which the independent auditor reports on limited procedures followed with respect to unaudited financial statements or other financial data pertinent to a registration statement filed with the Securities and Exchange Commission (see section 634, *Letters for Underwriters and Certain Other Requesting Parties*^{*}).

[.20] [Superseded, February 1993, by Statement on Auditing Standards No. 72.] (See section 634.)

* [Section 631, formerly 630, changed by the issuance of Statement on Auditing Standards No. 38 (superseded). Section 634, formerly 631, changed by the issuance of Statement on Auditing Standards No. 49 (superseded). Title of section 634 changed, February 1993, to reflect the issuance of Statement on Auditing Standards No. 72.] (See section 634.)

AU Section 9504

Association With Financial Statements: Auditing Interpretations of Section 504

1. Annual Report Disclosure of Unaudited Fourth Quarter Interim Data

.01 Question—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 270-10-50-2, which applies to publicly traded companies, states: "If interim financial data and disclosures are not separately reported for the fourth quarter, users of the interim financial information often make inferences about that quarter by subtracting data based on the third quarter interim report from the annual results. In the absence of a separate fourth quarter report or disclosure of the results (as outlined in FASB ASC 270-10-50-1) for that quarter in the annual report, disposals of components of an entity and extraordinary, unusual, or infrequently occurring items recognized in the fourth quarter, as well as the aggregate effect of year-end adjustments that are material to the results of that quarter (see FASB ASC 270-10-05-2 and 270-10-45-10) shall be disclosed in the annual report in a note to the annual financial statements." Does the auditor have an obligation, arising from the disclosure requirements of FASB ASC 270-10-50-2 to audit interim data?

.02 Interpretation—No. If the auditor has not been specifically engaged to audit interim information, he does not have an obligation to audit interim data as a result of his audit of the annual financial statements.

.03 Disclosure of fourth quarter adjustments and other disclosures required by FASB ASC 270-10-50-2 would appear in a note to the annual financial statements of a publicly traded company only if fourth quarter data were not separately distributed or did not appear elsewhere in the annual report. Consequently, such disclosures are not essential for a fair presentation of the annual financial statements in conformity with generally accepted accounting principles.

.04 If interim financial data and disclosures are not separately reported (as outlined in FASB ASC 270-10-50-1) for the fourth quarter, the independent auditor, during his audit of the annual financial statements, should inquire as to whether there are fourth quarter items that need to be disclosed in a note to the annual financial statements.

.05 Information on fourth quarter adjustments and similar items that appear in notes to the annual financial statements to comply with FASB ASC 270-10-50-2 would ordinarily not be audited separately and, therefore, the information would be labeled "unaudited" or "not covered by auditor's report."

.06 If a publicly traded company fails to comply with the provisions of FASB ASC 270-10-50-2, the auditor should suggest appropriate revision; failing that, he should call attention in his report to the omission of the information. The auditor need not qualify his opinion on the annual financial statements since the disclosure is not essential for a fair presentation of those statements in conformity with generally accepted accounting principles.

.07 Reference should be made to section 722 for guidance with respect to reviews of interim financial information of SEC registrants or non-SEC registrants that make a filing with a regulatory agency in preparation for a public offering or listing.

[Issue Date: November 1979; Revised: November 2002; Revised: June 2009.]

[2.] Association of the Auditor of an Acquired Company With Unaudited Statements in a Listing Application

[.08-.12] [Deleted May 1980.]

[3.] Association of the Auditor of the Acquiring Company With Unaudited Statements in a Listing Application

[.13-.14] [Deleted May 1980.]

4. Auditor's Identification With Condensed Financial Data

.15 *Question*—Section 150 paragraph .02 states in part: "In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking." Section 504 paragraph .03 states that "An accountant is associated with financial statements when he has consented to the use of his name in a report, document, or written communication containing the statements." Is the auditor "associated" with condensed financial data when he is identified by a financial reporting service as being a company's independent auditor or when his report is reproduced and presented with such data?

.16 *Interpretation*—No. The accountant has not consented to the use of his name when it is published by a financial reporting service. Financial data released to the public by a company and the name of its auditor are public information. Accordingly, neither the auditor nor his client has the ability to require a financial reporting service to withhold publishing such information.

.17 Financial reporting services, such as Dun & Bradstreet and Moody's Investors Service, furnish to subscribers information and ratings concerning commercial enterprises as a basis for credit, insurance, marketing and other business purposes. Those reports frequently include condensed financial data and other data such as payments to trade creditors, loan experience with banks, a brief history of the entity and a description of its operations. Also, as part of its report, the financial service often discloses the names of the officers and directors or principals or owners of the company and the name of the company's auditor.

.18 In the context in which the auditor's name appears, it is doubtful that readers will assume that he has audited the information presented. However, the AICPA has suggested to certain financial reporting services that they identify data as "unaudited" if the data has been extracted from unaudited financial statements. Also, the AICPA has suggested that when summarized financial data is presented together with an auditor's report on complete financial statements (including notes), the financial reporting services state that the auditor's report applies to the complete financial statements which are not presented.

[Issue Date: November, 1979.]

5. Applicability of Guidance on Reporting When Not Independent

.19 *Question*—Section 504 describes the reporting responsibilities of the certified public accountant who has determined that he is not independent

with respect to financial statements with which he is associated. That section, however, does not indicate how he should determine whether he is independent. What should the certified public accountant consider in determining whether he is independent? Also, should his consideration be any different for an engagement to prepare unaudited financial statements?

.20 Interpretation—Section 504 explains the certified public accountant's reporting responsibilities when he is not independent. However, it does not attempt to explain how the certified public accountant determines whether he is independent because that is a question of professional ethics. Section 220 paragraph .04 states: "The profession has established, through the AICPA Code of Professional Conduct, precepts to guard against the . . . loss of independence." The AICPA, state CPA societies and state boards of accountancy have issued pronouncements to provide the certified public accountant with guidance to aid him in determining whether he is independent.

.21 The certified public accountant should consider the AICPA's Code of Professional Conduct in determining whether he is independent and whether the reporting requirements of section 504 apply. He should also consider the ethical requirements of his state CPA society or state board of accountancy.

.22 Section 504 paragraph .10 states that the reporting guidance applies, *regardless of the extent of procedures applied*, (emphasis added) in all circumstances other than when the financial statements are those of a nonpublic entity.¹ Thus, the accountant's consideration of whether he is independent should be the same whether the financial statements are audited or unaudited.

[Issue Date: November, 1979.]

[6.] Reporting on Solvency

[.23–.35] [Rescinded May 1988 by the issuance of attestation interpretation, "Responding to Requests for Reports on Matters Relating to Solvency."] (See AT section 9101.23–.33.) [Revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

¹ If the financial statements are those of a nonpublic entity, the accountant should look to the guidance in Statements on Standards for Accounting and Review Services.

AU Section 508*

Reports on Audited Financial Statements

(Supersedes sections 505, 509, 542, 545, and 546.)

Source: SAS No. 58; SAS No. 64; SAS No. 79; SAS No. 85; SAS No. 93; SAS No. 98.

See section 9508 for interpretations of this section.

Effective for reports issued or reissued on or after January 1, 1989, unless otherwise indicated.

Introduction

.01 This section applies to auditors' reports issued in connection with audits¹ of historical financial statements that are intended to present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. It distinguishes the types of reports, describes the circumstances in which each is appropriate, and provides example reports.

.02 This section does not apply to unaudited financial statements as described in section 504, *Association With Financial Statements*, nor does it apply to reports on incomplete financial information or other special presentations as described in section 623, *Special Reports*.

.03 Justification for the expression of the auditor's opinion rests on the conformity of his or her audit with generally accepted auditing standards and on the findings. Generally accepted auditing standards include four standards of reporting.² This section is concerned primarily with the relationship of the fourth reporting standard to the language of the auditor's report.

.04 The fourth standard of reporting is as follows:

The auditor must either express an opinion regarding the financial statements, taken as a whole, or state that an opinion cannot be expressed, in the auditor's

* This section has been revised to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.

¹ An audit, for purposes of this section, is defined as an examination of historical financial statements performed in accordance with generally accepted auditing standards in effect at the time the audit is performed. Generally accepted auditing standards include the ten standards as well as the Statements on Auditing Standards that interpret those standards. In some cases, regulatory authorities may have additional requirements applicable to entities under their jurisdiction and auditors of such entities should consider those requirements.

² This section revises the second standard of reporting as follows:

The report shall identify those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

Previously, the second standard required the auditor's report to state whether accounting principles had been consistently applied. As revised, the second standard requires the auditor to add an explanatory paragraph to his report only if accounting principles have not been applied consistently. (See section 420, *Consistency of Application of Generally Accepted Accounting Principles*.) Paragraphs .17-.19 of this section provide reporting guidance under these circumstances.

report. When the auditor cannot express an overall opinion, the auditor should state the reasons therefor in the auditor's report. In all cases where an auditor's name is associated with financial statements, the auditor should clearly indicate the character of the auditor's work, if any, and the degree of responsibility the auditor is taking, in the auditor's report.

[Revised, November 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 113.]

.05 The objective of the fourth standard is to prevent misinterpretation of the degree of responsibility the auditor is assuming when his or her name is associated with financial statements. Reference in the fourth reporting standard to the financial statements "taken as a whole" applies equally to a complete set of financial statements and to an individual financial statement (for example, to a balance sheet) for one or more periods presented. (Paragraph .65 discusses the fourth standard of reporting as it applies to comparative financial statements.) The auditor may express an unqualified opinion on one of the financial statements and express a qualified or adverse opinion or disclaim an opinion on another if the circumstances warrant.

.06 The auditor's report is customarily issued in connection with an entity's basic financial statements—balance sheet, statement of income, statement of retained earnings and statement of cash flows. Each financial statement audited should be specifically identified in the introductory paragraph of the auditor's report. If the basic financial statements include a separate statement of changes in stockholders' equity accounts, it should be identified in the introductory paragraph of the report but need not be reported on separately in the opinion paragraph since such changes are part of the presentation of financial position, results of operations, and cash flows.

The Auditor's Standard Report

.07 The auditor's standard report states that the financial statements present fairly, in all material respects, an entity's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This conclusion may be expressed only when the auditor has formed such an opinion on the basis of an audit performed in accordance with generally accepted auditing standards.

.08 The auditor's standard report identifies the financial statements audited in an opening (introductory) paragraph, describes the nature of an audit in a scope paragraph, and expresses the auditor's opinion in a separate opinion paragraph. The basic elements of the report are the following:

- a. A title that includes the word *independent*³
- b. A statement that the financial statements identified in the report were audited
- c. A statement that the financial statements are the responsibility of the Company's management⁴ and that the auditor's responsibility is to express an opinion on the financial statements based on his or her audit

³ This section does not require a title for an auditor's report if the auditor is not independent. See section 504, *Association With Financial Statements*, for guidance on reporting when the auditor is not independent.

⁴ In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility.

- d. A statement that the audit was conducted in accordance with generally accepted auditing standards and an identification of the United States of America as the country of origin of those standards (for example, auditing standards generally accepted in the United States of America or U.S. generally accepted auditing standards)
- e. A statement that those standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement
- f. A statement that an audit includes—
 - (1) Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements
 - (2) Assessing the accounting principles used and significant estimates made by management
 - (3) Evaluating the overall financial statement presentation^[5]
- g. A statement that the auditor believes that his or her audit provides a reasonable basis for his or her opinion
- h. An opinion as to whether the financial statements present fairly, in all material respects, the financial position of the Company as of the balance sheet date and the results of its operations and its cash flows for the period then ended in conformity with generally accepted accounting principles. The opinion should include an identification of the United States of America as the country of origin of those accounting principles (for example, accounting principles generally accepted in the United States of America or U.S. generally accepted accounting principles⁶)
- i. The manual or printed signature of the auditor's firm
- j. The date⁷ of the audit report

The form of the auditor's standard report on financial statements covering a single year is as follows:

Independent Auditor's Report

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

^[5] [Footnote deleted, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

⁶ A U.S. auditor also may be engaged to report on the financial statements of a U.S. entity that have been prepared in conformity with accounting principles generally accepted in another country. In those circumstances, the auditor should refer to the guidance in section 534, *Reporting on Financial Statements Prepared for Use in Other Countries*. [Footnote added, effective for reports issued or reissued on or after June 30, 2001 by Statement on Auditing Standards No. 93.]

⁷ For guidance on dating the auditor's report, see section 530, *Dating of the Independent Auditor's Report*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

The form of the auditor's standard report on comparative financial statements⁸ is as follows:

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

[As amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

⁸ If statements of income, retained earnings, and cash flows are presented on a comparative basis for one or more prior periods, but the balance sheet(s) as of the end of one (or more) of the prior period(s) is not presented, the phrase "for the years then ended" should be changed to indicate that the auditor's opinion applies to each period for which statements of income, retained earnings, and cash flows are presented, such as "for each of the three years in the period ended [date of latest balance sheet]." [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

.09 The report may be addressed to the company whose financial statements are being audited or to its board of directors or stockholders. A report on the financial statements of an unincorporated entity should be addressed as circumstances dictate, for example, to the partners, to the general partner, or to the proprietor. Occasionally, an auditor is retained to audit the financial statements of a company that is not a client; in such a case, the report is customarily addressed to the client and not to the directors or stockholders of the company whose financial statements are being audited.

.10 This section also discusses the circumstances that may require the auditor to depart from the standard report and provides reporting guidance in such circumstances. This section is organized by type of opinion that the auditor may express in each of the various circumstances presented; this section describes what is meant by the various audit opinions:

- *Unqualified opinion.* An unqualified opinion states that the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles. This is the opinion expressed in the standard report discussed in paragraph .08.
- *Explanatory language added to the auditor's standard report.* Certain circumstances, while not affecting the auditor's unqualified opinion on the financial statements, may require that the auditor add an explanatory paragraph (or other explanatory language) to his or her report.
- *Qualified opinion.* A qualified opinion states that, except for the effects of the matter(s) to which the qualification relates, the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of the entity in conformity with generally accepted accounting principles.
- *Adverse opinion.* An adverse opinion states that the financial statements do not present fairly the financial position, results of operations, or cash flows of the entity in conformity with generally accepted accounting principles.
- *Disclaimer of opinion.* A disclaimer of opinion states that the auditor does not express an opinion on the financial statements.

These opinions are discussed in greater detail throughout the remainder of this section.

Explanatory Language Added to the Auditor's Standard Report

.11 Certain circumstances, while not affecting the auditor's unqualified opinion, may require that the auditor add an explanatory⁹ paragraph (or other explanatory language) to the standard report.¹⁰ These circumstances include:

- a. The auditor's opinion is based in part on the report of another auditor (paragraphs .12–.13).

⁹ Unless otherwise required by the provisions of this section, an explanatory paragraph may precede or follow the opinion paragraph in the auditor's report. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

¹⁰ See footnote 3. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

- b. To prevent the financial statements from being misleading because of unusual circumstances, the financial statements contain a departure from an accounting principle promulgated by a body designated by the AICPA Council to establish such principles (paragraphs .14–.15).
- c. There is substantial doubt about the entity's ability to continue as a going concern.¹¹
- d. There has been a material change between periods in accounting principles or in the method of their application (paragraphs .16–.18).
- e. Certain circumstances relating to reports on comparative financial statements exist (paragraphs .68–.69 and .72–.74).
- f. Selected quarterly financial data required by SEC Regulation S-K has been omitted or has not been reviewed. (See section 722, *Interim Financial Information*, paragraph .50.)
- g. When a designated accounting standard setter requires information to accompany the entity's basic financial statements (see paragraphs .07–.09 of section 558, *Required Supplementary Information*).
- h. Other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements. (See paragraph .11 of section 550, *Other Information in Documents Containing Audited Financial Statements*.)

In addition, the auditor may add an explanatory paragraph to emphasize a matter regarding the financial statements (paragraph .19). [As amended, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 100. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

Opinion Based in Part on Report of Another Auditor

.12 When the auditor decides to make reference to the report of another auditor as a basis, in part, for his or her opinion, he or she should disclose this fact in the introductory paragraph of his or her report and should refer to the report of the other auditor in expressing his or her opinion. These references indicate division of responsibility for performance of the audit. (See section 543, *Part of Audit Performed by Other Independent Auditors*.)

.13 An example of a report indicating a division of responsibility follows:

Independent Auditor's Report

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the related consolidated statements of income, retained earnings, and cash flows for the years then ended.

¹¹ Section 341A, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, describes the auditor's responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and, when applicable, to consider the adequacy of financial statement disclosure and to include an explanatory paragraph in the report to reflect his or her conclusions. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets of \$_____ and \$_____ as of December 31, 20X2 and 20X1, respectively, and total revenues of \$_____ and \$_____ for the years then ended. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of other auditors, the consolidated financial statements referred to above, present fairly, in all material respects, the financial position of ABC Company and subsidiaries as of December 31, 20X2 and 20X1, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Departure From a Promulgated Accounting Principle

.14 Rule 203 [ET section 203.01] of the Code of Professional Conduct of the AICPA states:

A member shall not (1) express an opinion or state affirmatively that the financial statements or other financial data of any entity are presented in conformity with generally accepted accounting principles or (2) state that he or she is not aware of any material modifications that should be made to such statements or data in order for them to be in conformity with generally accepted accounting principles, if such statements or data contain any departure from an accounting principle promulgated by bodies designated by Council to establish such principles that has a material effect on the statements or data taken as a whole. If, however, the statements or data contain such a departure and the member can demonstrate that due to unusual circumstances the financial statements or data would otherwise have been misleading, the member can comply with the rule by describing the departure, its approximate effects, if practicable, and the reasons why compliance with the principle would result in a misleading statement.

.15 When the circumstances contemplated by Rule 203 (ET section 202 paragraph .01) are present, the auditor's report should include, in a separate paragraph or paragraphs, the information required by the rule. In such a case, it is appropriate for the auditor to express an unqualified opinion with respect to the conformity of the financial statements with generally accepted accounting principles unless there are other reasons, not associated with the departure from a promulgated principle, not to do so. [Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93. Revised, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

Former paragraphs .16–.33 and related footnotes have been deleted and all subsequent paragraphs and footnotes renumbered by the issuance of Statement on Auditing Standards No. 79, effective for reports issued or reissued on or after February 29, 1996.

Lack of Consistency

.16 The auditor's standard report implies that the auditor is satisfied that the comparability of financial statements between periods has not been materially affected by changes in accounting principles and that such principles have been consistently applied between or among periods because either (a) no change in accounting principles has occurred, or (b) there has been a change in accounting principles or in the method of their application, but the effect of the change on the comparability of the financial statements is not material. In these cases, the auditor should not refer to consistency in the report. If, however, there has been a change in accounting principles or in the method of their application that has a material effect on the comparability of the company's financial statements, the auditor should refer to the change in an explanatory paragraph of the report. Such explanatory paragraph (following the opinion paragraph) should identify the nature of the change and refer the reader to the note in the financial statements that discusses the change in detail. The auditor's concurrence with a change is implicit unless he or she takes exception to the change in expressing his or her opinion as to fair presentation of the financial statements in conformity with generally accepted accounting principles.¹² When there is a change in accounting principles, there are also other matters that the auditor should consider (see paragraphs .50–.57). [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.17 Following is an example of an appropriate explanatory paragraph:

As discussed in Note X to the financial statements, the Company changed its method of computing depreciation in 20X2.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.18 The addition of this explanatory paragraph in the auditor's report is required in reports on financial statements of subsequent years as long as the year of the change is presented and reported on.¹³ However, if the accounting change is accounted for by retroactive restatement of the financial statements

¹² With respect to the method of accounting for the effect of a change in accounting principle, see Financial Accounting Standards Board *Accounting Standards Codification* 250, *Accounting Changes and Error Corrections*. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000. Footnote revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹³ An exception to this requirement occurs when a change in accounting principle that does not require a cumulative effect adjustment is made at the beginning of the earliest year presented and reported on. That exception is addressed in the auditing interpretation of section 420, *Consistency of Application of Generally Accepted Accounting Principles*, titled "Impact on the Auditor's Report of FIFO to LIFO Change in Comparative Financial Statements," (section 9420.16–.23). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

affected, the additional paragraph is required only in the year of the change since, in subsequent years, all periods presented will be comparable. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Emphasis of a Matter

.19 In any report on financial statements, the auditor may emphasize a matter regarding the financial statements. Such explanatory information should be presented in a separate paragraph of the auditor's report. Phrases such as "with the foregoing [following] explanation" should not be used in the opinion paragraph if an emphasis paragraph is included in the auditor's report. Emphasis paragraphs are never required; they may be added solely at the auditor's discretion. Examples of matters the auditor may wish to emphasize are—

- That the entity is a component of a larger business enterprise.
- That the entity has had significant transactions with related parties.
- Unusually important subsequent events.
- Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.

[Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

Departures From Unqualified Opinions

Qualified Opinions

.20 Certain circumstances may require a qualified opinion. A qualified opinion states that, *except for* the effects of the matter to which the qualification relates, the financial statements present fairly, in all material respects, financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when—

- a. There is a lack of sufficient appropriate audit evidence or there are restrictions on the scope of the audit that have led the auditor to conclude that he or she cannot express an unqualified opinion and he or she has concluded not to disclaim an opinion (paragraphs .22–.34).
- b. The auditor believes, on the basis of his or her audit, that the financial statements contain a departure from generally accepted accounting principles, the effect of which is material, and he or she has concluded not to express an adverse opinion (paragraphs .35–.57).

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.21 When the auditor expresses a qualified opinion, he or she should disclose all of the substantive reasons in one or more separate explanatory paragraph(s) preceding the opinion paragraph of the report. The auditor should also

include, in the opinion paragraph, the appropriate qualifying language and a reference to the explanatory paragraph. A qualified opinion should include the word *except* or *exception* in a phrase such as *except for* or *with the exception of*. Phrases such as *subject to* and *with the foregoing explanation* are not clear or forceful enough and should not be used. Since accompanying notes are part of the financial statements, wording such as *fairly presented, in all material respects, when read in conjunction with Note 1* is likely to be misunderstood and should not be used. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Scope Limitations

.22 The auditor can determine that he or she is able to express an unqualified opinion only if the audit has been conducted in accordance with generally accepted auditing standards and if he or she has therefore been able to apply all the procedures he considers necessary in the circumstances. Restrictions on the scope of the audit, whether imposed by the client or by circumstances, such as the timing of his or her work, the inability to obtain sufficient appropriate audit evidence, or an inadequacy in the accounting records, may require the auditor to qualify his or her opinion or to disclaim an opinion. In such instances, the reasons for the auditor's qualification of opinion or disclaimer of opinion should be described in the report. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.23 The auditor's decision to qualify his or her opinion or disclaim an opinion because of a scope limitation depends on his or her assessment of the importance of the omitted procedure(s) to his or her ability to form an opinion on the financial statements being audited. This assessment will be affected by the nature and magnitude of the potential effects of the matters in question and by their significance to the financial statements. If the potential effects relate to many financial statement items, this significance is likely to be greater than if only a limited number of items is involved. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.24 Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors.¹⁴ Another common scope restriction involves accounting for long-term investments when the auditor has not been able to obtain audited financial statements of an investee. Restrictions on the application of these or other audit procedures to important elements of the financial statements require the auditor to decide whether he or she has examined sufficient appropriate audit evidence to permit him or her to express an unqualified or qualified opinion, or whether he or she should disclaim an opinion. When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements. [Paragraph renumbered by the issuance of Statement on

¹⁴ Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include a reference to the omission of the procedures or the use of alternative procedures. It is important to understand, however, that section 331, *Inventories*, states that "it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions." [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.25 When a qualified opinion results from a limitation on the scope of the audit or an insufficiency of audit evidence, the situation should be described in an explanatory paragraph preceding the opinion paragraph and referred to in both the scope and opinion paragraphs of the auditor's report. It is not appropriate for the scope of the audit to be explained in a note to the financial statements, since the description of the audit scope is the responsibility of the auditor and not that of the client. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.26 When an auditor qualifies his or her opinion because of a scope limitation, the wording in the opinion paragraph should indicate that the qualification pertains to the possible effects on the financial statements and not to the scope limitation itself. Wording such as "In our opinion, except for the above-mentioned limitation on the scope of our audit . . ." bases the exception on the restriction itself, rather than on the possible effects on the financial statements and, therefore, is unacceptable. An example of a qualified opinion related to a scope limitation concerning an investment in a foreign affiliate (assuming the effects of the limitation are such that the auditor has concluded that a disclaimer of opinion is not appropriate) follows:

Independent Auditor's Report

[Same first paragraph as the standard report]

Except as discussed in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at \$_____ and \$_____ at December 31, 20X2 and 20X1, respectively, or its equity in earnings of that affiliate of \$_____ and \$_____, which is included in net income for the years then ended as described in Note X to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine evidence regarding the foreign affiliate investment and earnings, the financial statements referred to in the first paragraph above, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.27 Other scope limitations. Sometimes, notes to financial statements may contain unaudited information, such as pro forma calculations or other similar disclosures. If the unaudited information (for example, an investor's share, material in amount, of an investee's earnings recognized on the equity method) is such that it should be subjected to auditing procedures in order for the auditor to form an opinion with respect to the financial statements taken as a whole, the auditor should apply the procedures he or she deems necessary to the unaudited information. If the auditor has not been able to apply the procedures he or she considers necessary, the auditor should qualify his or her opinion or disclaim an opinion because of a limitation on the scope of the audit. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.28 If, however, these disclosures are not necessary to fairly present the financial position, operating results, or cash flows on which the auditor is reporting, such disclosures may be identified as *unaudited* or as *not covered by the auditor's report*. For example, the pro forma effects of a business combination or of a subsequent event may be labelled unaudited. Therefore, while the event or transaction giving rise to the disclosures in these circumstances should be audited, the pro forma disclosures of that event or transaction would not be. The auditor should be aware, however, that section 530, *Dating of the Independent Auditor's Report*, states that, if the auditor is aware of a material subsequent event that has occurred after the date of the auditor's report but before issuance of the report that should be disclosed, the auditor's only options are to dual date the report or date the report as of the date of the subsequent event and extend the procedures for review of subsequent events to that date. Labelling the note unaudited is not an acceptable alternative in these circumstances. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, December 2005, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 103.]

.29 Uncertainties and scope limitations. A matter involving an uncertainty is one that is expected to be resolved at a future date, at which time conclusive audit evidence concerning its outcome would be expected to become available. Uncertainties include, but are not limited to, contingencies covered by FASB *Accounting Standards Codification* (ASC) 450, *Contingencies*, and matters related to estimates covered by FASB ASC 275, *Risks and Uncertainties*. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.30 Conclusive audit evidence concerning the ultimate outcome of uncertainties cannot be expected to exist at the time of the audit because the outcome and related audit evidence are prospective. In these circumstances, management is responsible for estimating the effect of future events on the financial statements, or determining that a reasonable estimate cannot be made and making the required disclosures, all in accordance with generally accepted accounting principles, based on management's analysis of existing conditions. An audit includes an assessment of whether the audit evidence is sufficient to support management's analysis. Absence of the existence of information related to the outcome of an uncertainty does not necessarily lead to a conclusion that the audit evidence supporting management's assertion is not sufficient. Rather,

the auditor's judgment regarding the sufficiency of the audit evidence is based on the audit evidence that is, or should be, available. If, after considering the existing conditions and available evidence, the auditor concludes that sufficient audit evidence supports management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, an unqualified opinion ordinarily is appropriate. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.31 If the auditor is unable to obtain sufficient audit evidence to support management's assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements, the auditor should consider the need to express a qualified opinion or to disclaim an opinion because of a scope limitation. A qualification or disclaimer of opinion because of a scope limitation is appropriate if sufficient audit evidence related to an uncertainty does or did exist but was not available to the auditor for reasons such as management's record retention policies or a restriction imposed by management. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.32 Scope limitations related to uncertainties should be differentiated from situations in which the auditor concludes that the financial statements are materially misstated due to departures from generally accepted accounting principles related to uncertainties. Such departures may be caused by inadequate disclosure concerning the uncertainty, the use of inappropriate accounting principles, or the use of unreasonable accounting estimates. Paragraphs .45–.49 provide guidance to the auditor when financial statements contain departures from generally accepted accounting principles related to uncertainties. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79.]

.33 *Limited reporting engagements.* The auditor may be asked to report on one basic financial statement and not on the others. For example, he or she may be asked to report on the balance sheet and not on the statements of income, retained earnings or cash flows. These engagements do not involve scope limitations if the auditor's access to information underlying the basic financial statements is not limited and if the auditor applies all the procedures he considers necessary in the circumstances; rather, such engagements involve limited reporting objectives. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.34 An auditor may be asked to report on the balance sheet only. In this case, the auditor may express an opinion on the balance sheet only. An example of an unqualified opinion on a balance-sheet-only audit follows (the report assumes that the auditor has been able to satisfy himself or herself regarding the consistency of application of accounting principles):

Independent Auditor's Report

We have audited the accompanying balance sheet of X Company as of December 31, 20XX. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan

and perform the audit to obtain reasonable assurance about whether the balance sheet is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the balance sheet. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall balance sheet presentation. We believe that our audit of the balance sheet provides a reasonable basis for our opinion.

In our opinion, the balance sheet referred to above, presents fairly, in all material respects, the financial position of X Company as of December 31, 20XX, in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Departure From a Generally Accepted Accounting Principle

.35 When financial statements are materially affected by a departure from generally accepted accounting principles and the auditor has audited the statements in accordance with generally accepted auditing standards, he or she should express a qualified (paragraphs .36–.57) or an adverse (paragraphs .58–.60) opinion. The basis for such opinion should be stated in the report. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.36 In deciding whether the effects of a departure from generally accepted accounting principles are sufficiently material to require either a qualified or adverse opinion, one factor to be considered is the dollar magnitude of such effects. However, the concept of materiality does not depend entirely on relative size; it involves qualitative as well as quantitative judgments. The significance of an item to a particular entity (for example, inventories to a manufacturing company), the pervasiveness of the misstatement (such as whether it affects the amounts and presentation of numerous financial statement items), and the effect of the misstatement on the financial statements taken as a whole are all factors to be considered in making a judgment regarding materiality. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.37 When the auditor expresses a qualified opinion, he or she should disclose, in a separate explanatory paragraph(s) preceding the opinion paragraph of the report, all of the substantive reasons that have led him or her to conclude that there has been a departure from generally accepted accounting principles. Furthermore, the opinion paragraph of the report should include the appropriate qualifying language and a reference to the explanatory paragraph(s). [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.38 The explanatory paragraph(s) should also disclose the principal effects of the subject matter of the qualification on financial position, results of operations, and cash flows, if practicable.¹⁵ If the effects are not reasonably

¹⁵ Section 431, *Adequacy of Disclosure in the Financial Statements*, defines *practicable* as "... the information is reasonably obtainable from management's accounts and records and that providing the information in the report does not require the auditor to assume the position of a preparer of financial information." For example, if the information can be obtained from the accounts and records without the auditor substantially increasing the effort that would normally be required to complete the audit, the information should be presented in the report. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

determinable, the report should so state. If such disclosures are made in a note to the financial statements, the explanatory paragraph(s) may be shortened by referring to it. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.39 An example of a report in which the opinion is qualified because of the use of an accounting principle at variance with generally accepted accounting principles follows (assuming the effects are such that the auditor has concluded that an adverse opinion is not appropriate):

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Company has excluded, from property and debt in the accompanying balance sheets, certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by \$_____ and \$_____, long-term debt by \$_____ and \$_____, and retained earnings by \$_____ and \$_____ as of December 31, 20X2 and 20X1, respectively. Additionally, net income would be increased (decreased) by \$_____ and \$_____ and earnings per share would be increased (decreased) by \$_____ and \$_____, respectively, for the years then ended.

In our opinion, except for the effects of not capitalizing certain lease obligations as discussed in the preceding paragraph, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.40 If the pertinent facts are disclosed in a note to the financial statements, a separate paragraph (preceding the opinion paragraph) of the auditor's report in the circumstances illustrated in paragraph .39 might read as follows:

As more fully described in Note X to the financial statements, the Company has excluded certain lease obligations from property and debt in the accompanying balance sheets. In our opinion, accounting principles generally accepted in the United States of America require that such obligations be included in the balance sheets.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.41 *Inadequate disclosure.* Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include the related notes). When such information is set forth elsewhere in a report to shareholders, or in a prospectus, proxy statement, or other similar report, it should be referred to in the financial statements. If the financial statements, including accompanying notes, fail to disclose information that is required by generally accepted accounting principles, the auditor should express a qualified or adverse opinion because of the departure from those principles and should provide the information in the report, if practicable,¹⁶ unless its omission from the auditor's report is recognized as

¹⁶ See footnote 15. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

appropriate by a specific Statement on Auditing Standards. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.42 Following is an example of a report qualified for inadequate disclosure (assuming that the auditor has concluded that it is not practicable to present the required information and the effects are such that the auditor has concluded an adverse opinion is not appropriate):

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Company's financial statements do not disclose *[describe the nature of the omitted information that it is not practicable to present in the auditor's report]*. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, . . .

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.43 If a company issues financial statements that purport to present financial position and results of operations but omits the related statement of cash flows, the auditor will normally conclude that the omission requires qualification of his opinion. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.44 The auditor is not required to prepare a basic financial statement (for example, a statement of cash flows for one or more periods) and include it in the report if the company's management declines to present the statement. Accordingly, in these cases, the auditor should ordinarily qualify the report in the following manner:

Independent Auditor's Report

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income and retained earnings for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

[Same second paragraph as the standard report]

The Company declined to present a statement of cash flows for the years ended December 31, 20X2 and 20X1. Presentation of such statement summarizing the Company's operating, investing, and financing activities is required by accounting principles generally accepted in the United States of America.

In our opinion, except that the omission of a statement of cash flows results in an incomplete presentation as explained in the preceding paragraph, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.45 *Departures from generally accepted accounting principles involving risks or uncertainties, and materiality considerations.*

Departures from generally accepted accounting principles involving risks or uncertainties generally fall into one of the following categories:

- Inadequate disclosure (paragraphs .46–.47)
- Inappropriate accounting principles (paragraph .48)
- Unreasonable accounting estimates (paragraph .49)

[Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79.]

.46 If the auditor concludes that a matter involving a risk or an uncertainty is not adequately disclosed in the financial statements in conformity with generally accepted accounting principles, the auditor should express a qualified or an adverse opinion. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79.]

.47 The auditor should consider materiality in evaluating the adequacy of disclosure of matters involving risks or uncertainties in the financial statements in the context of the financial statements taken as a whole. The auditor's consideration of materiality is a matter of professional judgment and is influenced by his or her perception of the needs of a reasonable person who will rely on the financial statements. Materiality judgments involving risks or uncertainties are made in light of the surrounding circumstances. The auditor evaluates the materiality of reasonably possible losses that may be incurred upon the resolution of uncertainties both individually and in the aggregate. The auditor performs the evaluation of reasonably possible losses without regard to his or her evaluation of the materiality of known and likely misstatements in the financial statements. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79.]

.48 In preparing financial statements, management estimates the outcome of certain types of future events. For example, estimates ordinarily are made about the useful lives of depreciable assets, the collectibility of accounts receivable, the realizable value of inventory items, and the provision for product warranties. Paragraphs 10–11 of FASB ASC 310-10-35 and FASB ASC 460-10-25-6 describe situations in which the inability to make a reasonable estimate may raise questions about the appropriateness of the accounting principles used. If, in those or other situations, the auditor concludes that the accounting principles used cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.49 Usually, the auditor is able to satisfy himself or herself regarding the reasonableness of management's estimate of the effects of future events by considering various types of audit evidence, including the historical experience of the entity. If the auditor concludes that management's estimate is unreasonable (see section 312, *Audit Risk and Materiality*, and section 342, *Auditing Accounting Estimates*) and that its effect is to cause the financial statements to be materially misstated, he or she should express a qualified or an adverse opinion. [Paragraph added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.50 Accounting changes. The auditor should evaluate a change in accounting principle to satisfy himself that (a) the newly adopted accounting principle is a generally accepted accounting principle, (b) the method of accounting

for the effect of the change is in conformity with generally accepted accounting principles, and (c) management's justification for the change is reasonable. If a change in accounting principle does not meet these conditions, the auditor's report should so indicate, and his opinion should be appropriately qualified as discussed in paragraphs .51–.52. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.51 If (a) a newly adopted accounting principle is not a generally accepted accounting principle, (b) the method of accounting for the effect of the change is not in conformity with generally accepted accounting principles, or (c) management has not provided reasonable justification for the change in accounting principle, the auditor should express a qualified opinion or, if the effect of the change is sufficiently material, the auditor should express an adverse opinion on the financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.52 According to FASB ASC 250-10-45-2, a reporting entity shall change an accounting principle only if either of the following apply:

- a. The change is required by a newly issued codification update.
- b. The entity can justify the use of an allowable alternative accounting principle on the basis that it is preferable.

If management has not provided reasonable justification for the change in accounting principle, the auditor should express an exception to the change having been made without reasonable justification. An example of a report qualified for this reason follows:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

As disclosed in Note X to the financial statements, the Company adopted, in 20X2, the first-in, first-out method of accounting for its inventories, whereas it previously used the last-in, first-out method. Although use of the first-in, first-out method is in conformity with accounting principles generally accepted in the United States of America, in our opinion the Company has not provided reasonable justification for making this change as required by those principles.¹⁷

In our opinion, except for the change in accounting principle discussed in the preceding paragraph, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹⁷ Section 420, *Consistency of Application of Generally Accepted Accounting Principles*, states that a change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of an error and that such a change requires recognition in the auditor's report as to consistency. Therefore, the auditor should add an explanatory paragraph to the report discussing the accounting change.

However, because the middle paragraph included in the example presented contains all of the information required in an explanatory paragraph on consistency, a separate explanatory paragraph (following the opinion paragraph) as required by paragraphs .16–.18 of this section is not necessary in this instance. A separate paragraph that identifies the change in accounting principle would be required if the substance of the disclosure did not fulfill the requirements outlined in these paragraphs. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

.53 Whenever an accounting change results in an auditor expressing a qualified or adverse opinion on the conformity of financial statements with generally accepted accounting principles for the year of change, the auditor should consider the possible effects of that change when reporting on the entity's financial statements for subsequent years, as discussed in paragraphs .54–.57. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.54 If the financial statements for the year of such change are presented and reported on with a subsequent year's financial statements, the auditor's report should disclose his or her reservations with respect to the statements for the year of change. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.55 If an entity has adopted an accounting principle that is not a generally accepted accounting principle, its continued use might have a material effect on the statements of a subsequent year on which the auditor is reporting. In this situation, the independent auditor should express either a qualified opinion or an adverse opinion, depending on the materiality of the departure in relation to the statements of the subsequent year. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.56 If an entity accounts for the effect of a change prospectively when generally accepted accounting principles require restatement or the inclusion of the cumulative effect of the change in the year of change, a subsequent year's financial statements could improperly include a charge or credit that is material to those statements. This situation also requires that the auditor express a qualified or an adverse opinion. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.57 If management has not provided reasonable justification for a change in accounting principles, the auditor's opinion should express an exception to the change having been made without reasonable justification, as previously indicated. In addition, the auditor should continue to express his or her exception with respect to the financial statements for the year of change as long as they are presented and reported on. However, the auditor's exception relates to the accounting change and does not affect the status of a newly adopted principle as a generally accepted accounting principle. Accordingly, while expressing an exception for the year of change, the independent auditor's opinion regarding the subsequent years' statements need not express an exception to use of the newly adopted principle. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Adverse Opinions

.58 An adverse opinion states that the financial statements do not present fairly the financial position or the results of operations or cash flows in conformity with generally accepted accounting principles. Such an opinion is expressed when, in the auditor's judgment, the financial statements taken as a whole are not presented fairly in conformity with generally accepted accounting principles. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.59 When the auditor expresses an adverse opinion, he or she should disclose in a separate explanatory paragraph(s) preceding the opinion paragraph of the report (a) all the substantive reasons for his or her adverse opinion, and

(b) the principal effects of the subject matter of the adverse opinion on financial position, results of operations, and cash flows, if practicable.¹⁸ If the effects are not reasonably determinable, the report should so state.¹⁹ [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.60 When an adverse opinion is expressed, the opinion paragraph should include a direct reference to a separate paragraph that discloses the basis for the adverse opinion, as shown as follows:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

As discussed in Note X to the financial statements, the Company carries its property, plant and equipment accounts at appraisal values, and provides depreciation on the basis of such values. Further, the Company does not provide for income taxes with respect to differences between financial income and taxable income arising because of the use, for income tax purposes, of the installment method of reporting gross profit from certain types of sales. Accounting principles generally accepted in the United States of America require that property, plant and equipment be stated at an amount not in excess of cost, reduced by depreciation based on such amount, and that deferred income taxes be provided.

Because of the departures from accounting principles generally accepted in the United States of America identified above, as of December 31, 20X2 and 20X1, inventories have been increased \$_____ and \$_____ by inclusion in manufacturing overhead of depreciation in excess of that based on cost; property, plant and equipment, less accumulated depreciation, is carried at \$_____ and \$_____ in excess of an amount based on the cost to the Company; and deferred income taxes of \$_____ and \$_____ have not been recorded; resulting in an increase of \$_____ and \$_____ in retained earnings and in appraisal surplus of \$_____ and \$_____, respectively. For the years ended December 31, 20X2 and 20X1, cost of goods sold has been increased \$_____ and \$_____, respectively, because of the effects of the depreciation accounting referred to above and deferred income taxes of \$_____ and \$_____ have not been provided, resulting in an increase in net income of \$_____ and \$_____, respectively.

In our opinion, because of the effects of the matters discussed in the preceding paragraphs, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company as of December 31, 20X2 and 20X1, or the results of its operations or its cash flows for the years then ended.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

¹⁸ See footnote 15. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No 93, October 2000.]

¹⁹ When the auditor expresses an adverse opinion, he or she should also consider the need for an explanatory paragraph under the circumstances identified in paragraph .11, subsection (c), (d), and (e) of this section. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

Disclaimer of Opinion

.61 A disclaimer of opinion states that the auditor does not express an opinion on the financial statements. An auditor may decline to express an opinion whenever he or she is unable to form or has not formed an opinion as to the fairness of presentation of the financial statements in conformity with generally accepted accounting principles. If the auditor disclaims an opinion, the auditor's report should give all of the substantive reasons for the disclaimer. [Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

.62 A disclaimer is appropriate when the auditor has not performed an audit sufficient in scope to enable him or her to form an opinion on the financial statements.²⁰ A disclaimer of opinion should not be expressed because the auditor believes, on the basis of his or her audit, that there are material departures from generally accepted accounting principles (see paragraphs .35–.57). When disclaiming an opinion because of a scope limitation, the auditor should state in a separate paragraph or paragraphs all of the substantive reasons for the disclaimer. He or she should state that the scope of the audit was not sufficient to warrant the expression of an opinion. The auditor should not identify the procedures that were performed nor include the paragraph describing the characteristics of an audit (that is, the scope paragraph of the auditor's standard report); to do so may tend to overshadow the disclaimer. In addition, the auditor should also disclose any other reservations he or she has regarding fair presentation in conformity with generally accepted accounting principles. [Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

.63 An example of a report disclaiming an opinion resulting from an inability to obtain sufficient appropriate audit evidence because of the scope limitation follows:

Independent Auditor's Report

We were engaged to audit the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management.²¹

²⁰ If an accountant is engaged to conduct an audit of the financial statements of a nonpublic entity in accordance with generally accepted auditing standards, but is requested to change the engagement to a review or a compilation of the statements, he or she should look to the guidance in paragraphs 46–51 of Statement on Standards for Accounting and Review Services No. 1, *Compilation and Review of Financial Statements* (AR section 100 paragraphs .46–.51). Section 504, *Association With Financial Statements*, paragraph .05 provides guidance to an accountant who is associated with the financial statements of a public entity, but has not audited such statements. [Footnote renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000. Footnote revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Accounting and Review Services No. 9.]

²¹ The wording in the first paragraph of the auditor's standard report is changed in a disclaimer of opinion because of a scope limitation. The first sentence now states that "we were engaged to audit" rather than "we have audited" since, because of the scope limitation, the auditor was not able to perform an audit in accordance with generally accepted auditing standards. In addition, the last sentence of the first paragraph is also deleted, because of the scope limitation, to eliminate the reference to the auditor's responsibility to express an opinion. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

[Second paragraph of standard report should be omitted]

The Company did not make a count of its physical inventory in 20X2 or 20X1, stated in the accompanying financial statements at \$_____ as of December 31, 20X2, and at \$_____ as of December 31, 20X1. Further, evidence supporting the cost of property and equipment acquired prior to December 31, 20X1, is no longer available. The Company's records do not permit the application of other auditing procedures to inventories or property and equipment.

Since the Company did not take physical inventories and we were not able to apply other auditing procedures to satisfy ourselves as to inventory quantities and the cost of property and equipment, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on these financial statements.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

Piecemeal Opinions

.64 Piecemeal opinions (expressions of opinion as to certain identified items in financial statements) should not be expressed when the auditor has disclaimed an opinion or has expressed an adverse opinion on the financial statements *taken as a whole* because piecemeal opinions tend to overshadow or contradict a disclaimer of opinion or an adverse opinion. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Reports on Comparative Financial Statements

.65 The fourth standard of reporting requires that the auditor either express an opinion regarding the financial statements *taken as a whole* or an assertion to the effect that an opinion cannot be expressed, in the auditor's report. Reference in the fourth reporting standard to the financial statements *taken as a whole* applies not only to the financial statements of the current period but also to those of one or more prior periods that are presented on a comparative basis with those of the current period. Therefore, a continuing auditor²² should update²³ the report on the individual financial statements of the one or more prior periods presented on a comparative basis with those of

²² A *continuing auditor* is one who has audited the financial statements of the current period and of one or more consecutive periods immediately prior to the current period.

If one firm of independent auditors merges with another firm and the new firm becomes the auditor of a former client of one of the former firms, the new firm may accept responsibility and express an opinion on the financial statements for the prior period(s), as well as for those of the current period. In such circumstances, the new firm should follow the guidance in paragraphs .65–.69 and may indicate in its report or signature that a merger took place and may name the firm of independent auditors that was merged with it. If the new firm decides not to express an opinion on the prior-period financial statements, the guidance in paragraphs .70–.74 should be followed. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

²³ An updated report on prior-period financial statements should be distinguished from a reissuance of a previous report (see section 530, *Dating of the Independent Auditor's Report*, paragraphs .06–.08), since in issuing an updated report the continuing auditor considers information that he or she has become aware of during his or her audit of the current-period financial statements (see paragraph .68) and because an updated report is issued in conjunction with the auditor's report on the current-period financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

the current period.²⁴ Ordinarily, the auditor's report on comparative financial statements should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to support the opinion for the most recent audit. (See section 530, *Dating of the Independent Auditor's Report*, paragraph .01.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. As amended, effective September 2002, by Statement on Auditing Standards No. 98. Revised, December 2005, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 103.]

.66 During the audit of the current-period financial statements, the auditor should be alert for circumstances or events that affect the prior-period financial statements presented (see paragraph .68) or the adequacy of informative disclosures concerning those statements. (See section 431, *Adequacy of Disclosure in Financial Statements*, and FASB ASC 205, *Presentation of Financial Statements*.) In updating his or her report on the prior-period financial statements, the auditor should consider the effects of any such circumstances or events coming to his or her attention. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Different Reports on Comparative Financial Statements Presented

.67 Since the auditor's report on comparative financial statements applies to the individual financial statements presented, an auditor may express a qualified or adverse opinion, disclaim an opinion, or include an explanatory paragraph with respect to one or more financial statements for one or more periods, while issuing a different report on the other financial statements presented. Following are examples of reports on comparative financial statements (excluding the standard introductory and scope paragraphs, where applicable) with different reports on one or more financial statements presented.

Standard Report on the Prior-Year Financial Statements and a Qualified Opinion on the Current-Year Financial Statements

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Company has excluded, from property and debt in the accompanying 20X2 balance sheet, certain lease obligations that were entered into in 20X2 which, in our opinion, should be capitalized in order to conform with accounting principles

²⁴ A continuing auditor need not report on the prior-period financial statements if only summarized comparative information of the prior period(s) is presented. For example, entities such as state and local governmental units frequently present total-all-funds information for the prior period(s) rather than information by individual funds because of space limitations or to avoid cumbersome or confusing formats. Also, not-for-profit organizations frequently present certain information for the prior period(s) in total rather than by net asset class. In some circumstances, the client may request the auditor to express an opinion on the prior period(s) as well as the current period. In those circumstances, the auditor should consider whether the information included for the prior period(s) contains sufficient detail to constitute a fair presentation in conformity with generally accepted accounting principles. In most cases, this will necessitate including additional columns or separate detail by fund or net asset class, or the auditor would need to modify his or her report. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000. Revised, April 2002, to reflect conforming changes necessary due to the issuance of FASB Statement No. 117.]

generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by \$_____, long-term debt by \$_____, and retained earnings by \$_____ as of December 31, 20X2, and net income and earnings per share would be increased (decreased) by \$_____ and \$_____, respectively, for the year then ended.

In our opinion, except for the effects on the 20X2 financial statements of not capitalizing certain lease obligations as described in the preceding paragraph, the financial statements referred to in the preceding present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Standard Report on the Current-Year Financial Statements With a Disclaimer of Opinion on the Prior-Year Statements of Income, Retained Earnings, and Cash Flows

Independent Auditor's Report

[Same first paragraph as the standard report]

Except as explained in the following paragraph, we conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

We did not observe the taking of the physical inventory as of December 31, 20X0, since that date was prior to our appointment as auditors for the Company, and we were unable to satisfy ourselves regarding inventory quantities by means of other auditing procedures. Inventory amounts as of December 31, 20X0, enter into the determination of net income and cash flows for the year ended December 31, 20X1.²⁵

Because of the matter discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the results of operations and cash flows for the year ended December 31, 20X1.

In our opinion, the balance sheets of ABC Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the year ended December 31, 20X2, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the year ended December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America.

²⁵ It is assumed that the independent auditor has been able to satisfy himself or herself as to the consistency of application of generally accepted accounting principles. See section 420, *Consistency of Application of Generally Accepted Accounting Principles*, for a discussion of consistency. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995; the former footnote 29 has been deleted and subsequent footnotes renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Opinion on Prior-Period Financial Statements Different From the Opinion Previously Expressed

.68 If, during the current audit, an auditor becomes aware of circumstances or events that affect the financial statements of a prior period, he or she should consider such matters when updating his or her report on the financial statements of the prior period. For example, if an auditor has previously qualified his or her opinion or expressed an adverse opinion on financial statements of a prior period because of a departure from generally accepted accounting principles, and the prior-period financial statements are restated in the current period to conform with generally accepted accounting principles, the auditor's updated report on the financial statements of the prior period should indicate that the statements have been restated and should express an unqualified opinion with respect to the restated financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

.69 If, in an updated report, the opinion is different from the opinion previously expressed on the financial statements of a prior period, the auditor should disclose all the substantive reasons for the different opinion in a separate explanatory paragraph(s) preceding the opinion paragraph of his or her report.^[fn 29] The explanatory paragraph(s) should disclose (a) the date of the auditor's previous report, (b) the type of opinion previously expressed, (c) the circumstances or events that caused the auditor to express a different opinion, and (d) that the auditor's updated opinion on the financial statements of the prior period is different from his or her previous opinion on those statements. The following is an example of an explanatory paragraph that may be appropriate when an auditor issues an updated report on the financial statements of a prior period that contains an opinion different from the opinion previously expressed:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

In our report dated March 1, 20X2, we expressed an opinion that the 20X1 financial statements did not fairly present financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America because of two departures from such principles: (1) the Company carried its property, plant, and equipment at appraisal values, and provided for depreciation on the basis of such values, and (2) the Company did not provide for deferred income taxes with respect to differences between income for financial reporting purposes and taxable income. As described in Note X, the Company has changed its method of accounting for these items and restated its 20X1 financial statements to conform with accounting principles generally accepted in the United States of America. Accordingly, our present opinion on the 20X1 financial statements, as presented herein, is different from that expressed in our previous report.²⁶

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years

²⁶ See footnote 17. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

then ended in conformity with accounting principles generally accepted in the United States of America.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Report of Predecessor Auditor

.70 A predecessor auditor ordinarily would be in a position to reissue his or her report on the financial statements of a prior period at the request of a former client if he or she is able to make satisfactory arrangements with the former client to perform this service and if he or she performs the procedures described in paragraph .71.²⁷ [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Predecessor Auditor's Report Reissued

.71 Before reissuing (or consenting to the reuse of) a report previously issued on the financial statements of a prior period, when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, a predecessor auditor should consider whether his or her previous report on those statements is still appropriate. Either the current form or manner of presentation of the financial statements of the prior period or one or more subsequent events might make a predecessor auditor's previous report inappropriate. Consequently, a predecessor auditor should (a) read the financial statements of the current period, (b) compare the prior-period financial statements that he or she reported on with the financial statements to be presented for comparative purposes, and (c) obtain representation letters from management of the former client and from the successor auditor. The representation letter from management of the former client should state (a) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest prior-period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements.²⁸ The representation letter from the successor auditor should state whether the successor's audit revealed any matters that, in the successor's opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor. Also, the predecessor auditor may wish to consider the matters described in section 543, *Part of Audit Performed by Other Independent Auditors*, paragraphs .10–.12. However, the predecessor auditor should not refer in his or her reissued report to the report or work of the successor auditor. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. As amended, effective for reports reissued on or after June 30, 1998, by Statement on Auditing Standards No. 85.]

.72 A predecessor auditor who has agreed to reissue his or her report may become aware of events or transactions occurring subsequent to the date of his

²⁷ It is recognized that there may be reasons why a predecessor auditor's report may not be reissued and this section does not address the various situations that could arise. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

²⁸ See section 333, *Management Representations*, appendix C (paragraph .18), "Illustrative Updating Management Representation Letter." [Footnote added, effective for reports reissued on or after June 30, 1998, by Statement on Auditing Standards No. 85. Footnote renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

or her previous report on the financial statements of a prior period that may affect his or her previous report (for example, the successor auditor might indicate in the response that certain matters have had a material effect on the prior-period financial statements reported on by the predecessor auditor). In such circumstances, the predecessor auditor should make inquiries and perform other procedures that he or she considers necessary (for example, reviewing the working papers of the successor auditor as they relate to the matters affecting the prior-period financial statements). The auditor should then decide, on the basis of the audit evidence obtained, whether to revise the report. If a predecessor auditor concludes that the report should be revised, he or she should follow the guidance in paragraphs .68–.69 and .73 of this section. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Revised, March 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 105.]

.73 A predecessor auditor's knowledge of the current affairs of his former client is obviously limited in the absence of a continuing relationship. Consequently, when reissuing the report on prior-period financial statements, a predecessor auditor should use the date of his or her previous report to avoid any implication that he or she has examined any records, transactions, or events after that date. If the predecessor auditor revises the report or if the financial statements are restated, he or she should dual-date the report. (See section 530, *Dating of the Independent Auditor's Report*, paragraph .05.) [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995.]

Predecessor Auditor's Report Not Presented

.74 If the financial statements of a prior period have been audited by a predecessor auditor whose report is not presented, the successor auditor should indicate in the introductory paragraph of his or her report (a) that the financial statements of the prior period were audited by another auditor,²⁹ (b) the date of his or her report, (c) the type of report issued by the predecessor auditor, and (d) if the report was other than a standard report, the substantive reasons therefore.³⁰ An example of a successor auditor's report when the predecessor auditor's report is not presented is shown as follows:

Independent Auditor's Report

We have audited the balance sheet of ABC Company as of December 31, 20X2, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of ABC Company as of December 31, 20X1, were audited by other auditors whose report dated March 31, 20X2, expressed an unqualified opinion on those statements.

²⁹ The successor auditor should not name the predecessor auditor in his or her report; however, the successor auditor may name the predecessor auditor if the predecessor auditor's practice was acquired by, or merged with, that of the successor auditor. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 85, November 1997. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

³⁰ If the predecessor's report was issued before the effective date of this section and contained an uncertainties explanatory paragraph, a successor auditor's report issued or reissued after the effective date hereof should not make reference to the predecessor's previously required explanatory paragraph. [Footnote added, effective for reports issued or reissued on or after February 29, 1996, by Statement on Auditing Standards No. 79. Footnote renumbered by the issuance of Statement on Auditing Standards No. 85, November 1997. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

[Same second paragraph as the standard report]

In our opinion, the 20X2 financial statements referred to above, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X2, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

If the predecessor auditor's report was other than a standard report, the successor auditor should describe the nature of and reasons for the explanatory paragraph added to the predecessor's report or the opinion qualification. Following is an illustration of the wording that may be included in the successor auditor's report:

... were audited by other auditors whose report dated March 1, 20X2, on those statements included an explanatory paragraph that described the change in the Company's method of computing depreciation discussed in Note X to the financial statements.

If the financial statements have been restated, the introductory paragraph should indicate that a predecessor auditor reported on the financial statements of the prior period before restatement. In addition, if the successor auditor is engaged to audit and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, he or she may also include the following paragraph in his report:

We also audited the adjustments described in Note X that were applied to restate the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied.

[As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64. Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

Effective Date and Transition

.75 This section is effective for reports issued or reissued on or after February 29, 1996. Earlier application of the provisions of this section is permissible. [Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

.76 An auditor who previously included an uncertainties explanatory paragraph in a report should not repeat that paragraph and is not required to include an emphasis paragraph related to the uncertainty in a reissuance of that report or in a report on subsequent periods' financial statements, even if the uncertainty has not been resolved. If the auditor decides to include an emphasis paragraph related to the uncertainty, the paragraph may include an explanation of the change in reporting standards.^[31] [Paragraph renumbered and amended, effective for reports issued or reissued on or after February 29, 1996, by the issuance of Statement on Auditing Standards No. 79.]

^[31] [Footnote renumbered and deleted by the issuance of Statement on Auditing Standards No. 79, December 1995. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 85, November 1997. Footnote subsequently renumbered by the issuance of Statement on Auditing Standards No. 93, October 2000.]

AU Section 9508

Reports on Audited Financial Statements: Auditing Interpretations of Section 508

1. Report of an Outside Inventory-Taking Firm as an Alternative Procedure for Observing Inventories

.01 Question—Section 508, *Reports on Audited Financial Statements*, paragraph .24 states that "Common restrictions on the scope of the audit include those applying to the observation of physical inventories and the confirmation of accounts receivable by direct communication with debtors. . . ." A footnote to that paragraph states: "Circumstances such as the timing of the work may make it impossible for the auditor to accomplish these procedures. In this case, if the auditor is able to satisfy himself or herself as to inventories or accounts receivable by applying alternative procedures, there is no significant limitation on the scope of the work, and the report need not include reference to the omission of the procedures or to the use of alternative procedures." Outside firms of nonaccountants specializing in the taking of physical inventories are used at times by some companies, such as retail stores, hospitals, and automobile dealers, to count, list, price and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. Would obtaining the report of an outside inventory-taking firm be an acceptable alternative procedure to the independent auditor's own observation of physical inventories?

.02 Interpretation—Sufficient appropriate audit evidence for inventories is discussed in section 331, *Inventories*, paragraphs .09–.12. Paragraph .09 of section 331 states that ". . . it is ordinarily necessary for the independent auditor to be present at the time of count and, by suitable observation, tests, and inquiries, satisfy himself respecting the effectiveness of the methods of inventory-taking and the measure of reliance which may be placed upon the client's representations about the quantities and physical condition of the inventories."

.03 Section 331 paragraphs .10–.11 discuss two variations of that procedure when the client has well-kept perpetual records that are checked periodically by comparisons with physical counts or when the client uses statistical sampling to determine inventories. In such instances, the auditor may vary the timing and extent of his observation of physical counts, but he "must be present to observe such counts as he deems necessary and must satisfy himself as to the effectiveness of the counting procedures used."

.04 Section 331 paragraph .12 deals with circumstances in which the auditor has not satisfied himself or herself as to inventories in the possession of the client through procedures described in section 331 paragraphs .09–.11. In those circumstances, the general requirement for satisfactory alternative procedures is that ". . . tests of the accounting records alone will not be sufficient for him to become satisfied as to quantities; it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions."

.05 The fact that the inventory is counted by an outside inventory firm of nonaccountants is not, by itself, a satisfactory substitute for the auditor's own

observation or taking of some physical counts. The auditor's concern, in this respect, is to satisfy himself as to the effectiveness of the counting procedures used. If the client engages an outside inventory firm to take the physical inventory, the auditor's primary concern would be to evaluate the effectiveness of the procedures used by the outside firm and his auditing procedures would be applied accordingly.

.06 Thus, the auditor would examine the outside firm's program, observe its procedures and controls, make or observe some physical counts of the inventory, recompute calculations of the submitted inventory on a test basis and apply appropriate tests to the intervening transactions. The independent auditor ordinarily may reduce the extent of the work on the physical count of inventory because of the work of an outside inventory firm, but any restriction on the auditor's judgment concerning the extent of his or her contact with the inventory would be a scope restriction.

[7.] Reporting on an Uncertainty

[.29-.32] [Withdrawn, August 1982, by SAS No. 43.]

8. Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting

.33 *Question*—Footnote †† of Statement of Position (SOP) 93-3, *Rescission of Accounting Principles Board Statements* (AICPA, *Technical Practice Aids*, ACC sec. 10,560), states that an enterprise is not viewed as a going concern

if liquidation appears imminent. How should the auditor report on financial statements that are prepared on a liquidation basis of accounting for an entity in liquidation or for which liquidation appears imminent?

.34 Answer—A liquidation basis of accounting may be considered generally accepted accounting principles GAAP for entities in liquidation or for which liquidation appears imminent. Therefore, the auditor should issue an unqualified opinion on such financial statements, provided that the liquidation basis of accounting has been properly applied, and that adequate disclosures are made in the financial statements.

.35 Typically, the financial statements of entities that adopt a liquidation basis of accounting are presented along with financial statements of a period prior to adoption of a liquidation basis that were prepared on the basis of GAAP for going concerns. In such circumstances, the auditor's report ordinarily should include an explanatory paragraph that states that the entity has changed the basis of accounting used to determine the amounts at which assets and liabilities are carried from the going concern basis to a liquidation basis.

.36 Examples of auditor's reports with such an explanatory paragraph follow.

Report on Single Year Financial Statements in Year of Adoption of Liquidation Basis

"We have audited the statement of net assets in liquidation of XYZ Company as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. In addition, we have audited the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

"We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

"As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

"In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets in liquidation of XYZ Company as of December 31, 20X2, the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, and the results of its operations and its cash flows for the period from January 1, 20X2 to April 25, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph."

Report on Comparative Financial Statements in Year of Adoption of Liquidation Basis

"We have audited the balance sheet of XYZ Company as of December 31, 20X1, the related statements of income, retained earnings, and cash flows for the year then ended, and the statements of income, retained earnings, and cash flows for the period from January 1, 20X2 to April 25, 20X2. In addition, we have audited the statement of net assets in liquidation as of December 31, 20X2, and the related statement of changes in net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

"We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

"As described in Note X to the financial statements, the stockholders of XYZ Company approved a plan of liquidation on April 25, 20X2, and the company commenced liquidation shortly thereafter. As a result, the company has changed its basis of accounting for periods subsequent to April 25, 20X2 from the going-concern basis to a liquidation basis.

"In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20X1, the results of its operations and its cash flows for the year then ended and for the period from January 1, 20X2 to April 25, 20X2, its net assets in liquidation as of December 31, 20X2, and the changes in its net assets in liquidation for the period from April 26, 20X2 to December 31, 20X2, in conformity with accounting principles generally accepted in the United States of America applied on the bases described in the preceding paragraph."

.37 The auditor may, in subsequent years, continue to include an explanatory paragraph in his report to emphasize that the financial statements are presented on a liquidation basis of accounting.

[.38] [Paragraph deleted to reflect conforming changes necessary due to the issuance of SAS No. 79.]

[9.] Quantifying Departures From Generally Accepted Accounting Principles

[.39–.43] [Superseded by SAS No. 58, effective for reports issued or reissued on or after January 1, 1989.] (See section 508.)

[10.] Updated Reports Resulting From the Retroactive Suspension of Earnings per Share and Segment Information Disclosure Requirements

[.44–.48] [Withdrawn, March 1989, by the Auditing Standards Board (ASB).]

[11.] Restating Financial Statements Reported on by a Predecessor Auditor

[.49–.50] [Superseded by SAS No. 84, effective with respect to acceptance of an engagement after March 31, 1998.] (See section 315, *Communications Between Predecessor and Successor Auditors*.)

12. Reference in Auditor's Standard Report to Management's Report

.51 Question—One of the basic elements of the auditor's standard report is a statement that the financial statements are the responsibility of the Company's management. That statement is required in the auditor's report even when a document containing the auditor's report includes a statement by management regarding its responsibility for the presentation of the financial statements. When an annual shareholders' report (or other client-prepared document that includes audited financial statements) contains a management report that states the financial statements are the responsibility of management, is it permissible for the auditor's report to include a reference to the management report?

.52 Interpretation—No. The statement about management's responsibilities for the financial statements required by section 508, *Reports on Audited Financial Statements*, should not be further elaborated upon in the auditor's standard report or referenced to management's report. Such modifications to the standard auditor's report may lead users to erroneously believe that the auditor is providing assurances about representations made by management about their responsibility for financial reporting, internal controls and other matters that might be discussed in the management report.

[Issue Date: January 1989.]

[13.] Reference to Country of Origin in the Auditor's Standard Report

[.53–.55] [Withdrawn October 2000 by SAS No. 93.]

14. Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing

.56 Question—Section 508 states that a basic element of the auditor's report is a statement that the audit was conducted in accordance with generally accepted auditing standards (GAAS) and an identification of the United States of America as the country of origin of those standards. If the auditor conducts the audit in accordance with standards generally accepted in the United States of America and in accordance with the International Standards on Auditing (ISA) promulgated by the International Auditing and Assurance Standards Board (IAASB), may the auditor so indicate in the auditor's report?

.57 Interpretation—Yes. Section 508 requires that the auditor indicate in the auditor's report that the audit was conducted in accordance with GAAS and an identification of the United States of America as the country of origin of those standards; however, section 508 does not prohibit the auditor from indicating that the audit also was conducted in accordance with another set of auditing standards. If the audit also was conducted in accordance with the ISAs, in their entirety, the auditor may so indicate in the auditor's report. To determine whether an audit was conducted in accordance with the ISAs, it is necessary to consider the text of the ISA in their entirety, including the basic

principles and essential procedures together with the related guidance included in the ISA.^[1]

.58 When reporting on an audit performed in accordance with auditing standards generally accepted in the United States of America and ISA, the auditor should comply with reporting standards generally accepted in the United States of America.

.59 An example of reporting on an audit conducted in accordance with auditing standards generally accepted in the United States and in accordance with ISA follows:

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and in accordance with International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

[Issue Date: March 2002; Revised: May 2008.]

15. Reporting as Successor Auditor When Prior-Period Audited Financial Statements Were Audited by a Predecessor Auditor Who Has Ceased Operations²

.60 Question—If the prior-period financial statements audited by a predecessor auditor who has ceased operations are presented for comparative purposes with current-period audited financial statements, how is the successor auditor's report affected?

.61 Interpretation—If the prior-period audited financial statements are *unchanged*, pursuant to section 508 paragraph .74, the successor auditor should indicate in the introductory paragraph of his or her report (a) that the financial statements of the prior period were audited by another auditor, (b) the date of the predecessor auditor's report, (c) the type of report issued by the predecessor auditor, and (d) if the report was other than a standard report, the substantive reasons therefor. The successor auditor ordinarily also should indicate that the other auditor has ceased operations. Footnote 29 of section 508 indicates that the successor auditor should not name the predecessor auditor in the report. An example of the reference that would be added to the introductory paragraph of the successor auditor's report is presented as follows:

The financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. Those auditors expressed an unqualified opinion on those financial statements in their report dated March 31, 20X2.

A reference to the predecessor auditor's report should be included even if the predecessor auditor's report on the prior-period financial statements is

^[1] [Footnote deleted, November 2010, due to the removal of AU appendix B.]

² A firm is considered to have ceased operations when it no longer issues audit opinions either in its own name or in the name of a successor firm. A firm may cease operations with respect to public entities and still issue audit opinions with respect to nonpublic entities.

reprinted and accompanies the successor auditor's report, because reprinting does not constitute reissuance of the predecessor auditor's report.

.62 If the prior-period financial statements *have been restated*, and the entity does not file annual financial statements with the Securities and Exchange Commission (SEC), the successor auditor should follow the guidance in paragraph .61, indicating that the predecessor auditor reported on such financial statements before restatement.

.63 When the prior-period financial statements have been restated, the successor auditor may be engaged either to reaudit the prior-period financial statements or to audit only the restatement adjustments. If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in section 508 paragraph .74. (The auditor also may use the guidance on alternative language contained in paragraph .71.) In determining the nature, timing and extent of procedures, the successor auditor should consider that a predecessor auditor who has ceased operations cannot perform the procedures to evaluate the appropriateness of the restatement adjustments as described in section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

.64 If the successor auditor neither performs a reaudit of the prior-period financial statements nor audits only the restatement adjustments, the note to the financial statements describing the restatement adjustments should be marked "Unaudited." Depending on the nature and extent of the restatement adjustments, it may be appropriate for the prior-period financial statements to be marked "Unaudited."

.65 If the entity files annual financial statements with the SEC, the SEC staff has indicated (specifically with respect to Arthur Andersen LLP) that, in annual reports (on Form 10-K and to shareholders), the predecessor auditor's latest signed and dated report on the prior-period financial statements should be reprinted with a legend indicating (a) that the report is a copy of the previously issued report and (b) that the predecessor auditor has not reissued the report.³

.66 The successor auditor should refer to the predecessor auditor's report in his or her report, as described in paragraph .61, and, if the prior-period financial statements *have been restated*, indicate that the predecessor auditor reported on such financial statements before restatement.

.67 SEC rules require that annual and, in some instances, other financial statements be audited. To satisfy the SEC audit requirement when the prior-period financial statements have been restated, the successor auditor may be engaged either to reaudit the prior-period financial statements or to audit only the restatement adjustments. A successor auditor who is engaged to audit only the restatement adjustments is not required to perform procedures to identify all adjustments to the financial statements that may be appropriate.⁴

³ See Securities and Exchange Commission (SEC) Release No. 33-8070, *Requirements for Arthur Andersen LLP Auditing Clients*.

⁴ However, a successor auditor who identifies other adjustments that may be appropriate to the prior-period financial statements, either in the course of auditing the restatement adjustments or in the audit of current-period financial statements, should consider their effect on the prior-period financial statements. See section 315, *Communications Between Predecessor and Successor Auditors*. Section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, provides further guidance that may be useful to a successor auditor who either reaudits the prior-period financial statements or audits only the restatement adjustments.

.68 In some cases, prior-period financial statement disclosures may be revised in a manner that does not involve restating amounts in the prior-period financial statements, but rather involves the addition of disclosures. In such cases, the successor auditor may be engaged to perform audit procedures to satisfy himself or herself as to the appropriateness of the additional disclosures. Financial statements that have been revised are considered to be restated for the purposes of this interpretation.

.69 Some revisions may be sufficiently inconsequential such that audit procedures by the successor auditor would be unnecessary and the reference to the predecessor auditor's report on the prior-period financial statements would not indicate that the predecessor auditor reported on such financial statements before restatement. For example, inconsequential revisions might include conforming editorial modifications to footnote disclosures or reclassifications made for comparative purposes in the financial statements.⁵

.70 When the successor auditor is engaged to audit only the restatement adjustments, the procedures performed will vary significantly depending on the nature of adjustment. In some instances, the successor auditor may determine that conducting a reaudit of the prior-period financial statements is necessary based on the nature of the restatement adjustments. Examples of restatement adjustments whose nature indicates that a reaudit ordinarily is necessary (particularly with respect to entities that file financial statements with the SEC) include, but are not limited to:

- corrections of an error.
- reflection of a change in reporting entity.
- retroactive accounting changes (a) with significant impact on previously reported amounts or (b) that affect previously reported net income or net assets.
- reporting discontinued operations.
- changes affecting previously reported net income or net assets.

.71 If the successor auditor is engaged to audit only the restatement adjustments and applies sufficient procedures to satisfy himself or herself as to the appropriateness of the restatement adjustments, the successor auditor may report on the restatement adjustments using the guidance in section 508 paragraph .74. Alternatively, the successor auditor may wish to make it clear that he or she did not audit, review, or apply other procedures to the prior-period financial statements beyond the procedures applied to the restatement adjustments. Accordingly, he or she may include the following paragraph in his or her report:

As discussed above, the financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. As described in Note X, these financial statements have been restated [revised]. We audited the adjustments described in Note X that were applied to restate [revise] the 20X1 financial statements. In our opinion, such adjustments are appropriate and have been properly applied. However, we were not engaged to audit, review, or apply any procedures to the 20X1 financial statements of the Company other than with respect to such adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X1 financial statements taken as a whole.

⁵ If reclassifications result in material changes to prior-period financial statements, they should be disclosed and the successor auditor would, at a minimum, need to perform audit procedures on the related restatement adjustments.

.72 If the auditor wishes to identify the procedures performed in his or her report, he or she may include in his or her report a paragraph similar to the following example:

Restatement Adjustments for Changes in Segment Composition

As discussed above, the financial statements of ABC Company as of December 31, 20X1, and for the year then ended were audited by other auditors who have ceased operations. As described in Note X, the Company changed the composition of its reportable segments in 20X2, and the amounts in the 20X1 financial statements relating to reportable segments have been restated to conform to the 20X2 composition of reportable segments. We audited the adjustments that were applied to restate the disclosures for reportable segments reflected in the 20X1 financial statements. Our procedures included (a) agreeing the adjusted amounts of segment revenues, operating income and assets to the Company's underlying records obtained from management, and (b) testing the mathematical accuracy of the reconciliations of segment amounts to the consolidated financial statements. In our opinion, such adjustments are appropriate and have been properly applied. However, we were not engaged to audit, review, or apply any procedures to the 20X1 financial statements of the Company other than with respect to such adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X1 financial statements taken as a whole.

[.73] [Paragraph deleted due to the passage of time, June 2009.]

.74 Question—If the prior-period financial statements audited by a predecessor auditor who has ceased operations have been subsequently restated, but the successor auditor has not yet completed an audit of current-period financial statements, can the successor auditor report on the restatement adjustments pursuant to section 508 paragraph .74?

.75 Interpretation—No. Section 508 paragraph .74 is only applicable when the prior-period financial statements are presented for comparative purposes with current-period audited financial statements. If the prior-period financial statements have been restated, and the successor auditor is requested to report on those financial statements without also reporting on current-period audited financial statements, the successor auditor would need to reaudit the prior-period financial statements in order to report on them.

[Issue Date: November 2002; Revised: June 2009.]

16. Effect on Auditor's Report of Omission of Schedule of Investments by Investment Partnerships That Are Exempt From Securities and Exchange Commission Registration Under the Investment Company Act of 1940

.76 Question—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 946, *Financial Services—Investment Companies*, addresses financial statement presentation and disclosure requirements for investment partnerships that are exempt from SEC registration under the Investment Company Act of 1940 (the 1940 act). FASB ASC 946-210-50 specifically describes information that should be disclosed in a Schedule of Investments. FASB ASC 946-210-50-6 states that the financial statements of an investment partnership that is exempt from SEC registration under the Investment Company Act of 1940, should, at a minimum, include a condensed schedule of investments in securities owned by the partnership at the close of the most recent period. Such a schedule shall do all of the following:

- a. Categorize investments by all of the following:

The Fourth Standard of Reporting

- (1) Type (such as common stocks, preferred stocks, convertible securities, fixed-income securities, government securities, options purchased, options written, warrants, futures, loan participations, short sales, other investment companies, and so forth)
 - (2) Country or geographic region, except for derivative instruments for which the underlying is not a security (see [a][4])
 - (3) Industry, except for derivative instruments for which the underlying is not a security (see [a][4])
 - (4) For derivative instruments for which the underlying is not a security, by broad category of underlying (for example, grains and feeds, fibers and textiles, foreign currency, or equity indexes) in place of the categories in (a)(2) and (a)(3)
- b. Report the percent of net assets that each such category represents and the total value and cost for each category in (a)(1) and (a)(2)
- c. Disclose the name, shares or principal amount, value, and type of both of the following:
- (1) Each investment (including short sales) constituting more than 5 percent of net assets, except for derivative instruments (see [e]); in applying the 5 percent test, total long and total short positions in any one issuer should be considered separately
 - (2) All investments in any one issuer aggregating more than 5 percent of net assets, except for derivative instruments (see [e]); in applying the 5 percent test, total long and total short positions in any one issuer shall be considered separately
- d. Aggregate other investments (each of which is 5 percent or less of net assets) without specifically identifying the issuers of such investments, and categorize them in accordance with the guidance in (a); in applying the 5 percent test, total long and total short positions in any one issuer shall be considered separately
- e. Disclose the number of contracts, range of expiration dates, and cumulative appreciation (depreciation) for open futures contracts of a particular underlying (such as wheat, cotton, specified equity index, or U.S. Treasury Bonds), regardless of exchange, delivery location, or delivery date, if cumulative appreciation (depreciation) on the open contracts exceeds 5 percent of net assets; in applying the 5 percent test, total long and total short positions in any one issuer shall be considered separately
- f. Disclose the range of expiration dates and fair value for all other derivative instruments of a particular underlying (such as foreign currency, wheat, specified equity index, or U.S. Treasury Bonds) regardless of counterparty, exchange, or delivery date, if fair value exceeds 5 percent of net assets; in applying the 5 percent test, total long and total short positions in any one issuer shall be considered separately
- g. Provide both of the following additional qualitative descriptions for each investment in another nonregistered investment partnership whose fair value constitutes more than 5 percent of net assets:
- (1) The investment objective
 - (2) Restrictions on redemption (that is, liquidity provisions)

.77 Section 508 paragraph .41 addresses the effect of inadequate disclosure of information essential for fair presentation of the financial statements on the auditor's report. It states:

If the financial statements, including accompanying notes, fail to disclose information that is required by GAAP, the auditor should express a qualified or adverse opinion because of the departure from those principles and should provide the information in the report, if practicable, unless its omission from the auditor's report is recognized as appropriate by a specific SAS.

.78 Section 508 paragraph .42 provides an example of a report qualified for inadequate disclosure (assuming that the auditor has concluded that it is not practicable to present the required information and the effects are such that the auditor has concluded an adverse opinion is not appropriate) as follows:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Company's financial statements do not disclose *[describe the nature of the omitted information that it is not practicable to present in the auditor's report]*. In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, . . .

.79 FASB ASC 946 does not make it clear how the guidance in section 508 paragraphs .41–.42 should be applied to reports on financial statements of investment partnerships that are exempt from SEC registration and that do not include all the investment information required in the Schedule of Investments as required by FASB ASC 946. For example, if the financial statements did not disclose each of the required items for each investment, the guidance in section 508 paragraph .41 indicates the auditor should, if practicable, include the missing information (for example, the Schedule of Investments or information about individual investments) in the auditor's report. However, the example in section 508 paragraph .42 provides that the auditor would disclose the nature of the missing information, rather than the actual information, in the auditor's report.

.80 In applying section 508 paragraphs .41–.42 to an auditor's report on financial statements of an investment partnership that is exempt from SEC registration and that does not include the required Schedule of Investments information required by FASB ASC 946-210-50-6, is it sufficient for the auditor to describe "the nature of the omitted disclosures" in his or her report expressing a qualified (or adverse) opinion?

.81 *Interpretation*—No. The example in section 508 paragraph .42 does not change the requirement in section 508 paragraph .41 for the auditor to issue a qualified or adverse opinion and also to provide the missing information, if practicable. If the investment disclosures required by FASB ASC 946 are not included in the financial statements and it is practicable for the auditor to determine them or any portion thereof, the auditor should include the information in his or her report expressing the qualified or adverse opinion.

.82 Footnote 15 of section 508 indicates that it is practicable to provide the missing information if "the information is reasonably obtainable from management's accounts and records and . . . providing the information in the report does not require the auditor to assume the position of a preparer of financial information." Ordinarily, it would be practicable for the auditor to obtain and present the information about investments constituting more than 5 percent

of net assets called for by section (b) of the disclosure requirement described in paragraph .76. However, due to the need to categorize the investments for the purpose of preparing the schedule called for by section (a) of the disclosure requirement described in paragraph .76, the auditor might be in the position of preparer of financial information and, therefore, would not include the schedule in his or her report. In rare cases, the Schedule of Investments information may be so limited that the auditor may conclude that disclosure of the entire schedule is practicable.

.83 Following is an illustration of a report that expresses a qualified opinion because the Schedule of Investments fails to disclose investments constituting more than 5 percent of net assets, but in all other respects conforms to the requirements of FASB ASC 946:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Schedule of Investments included in the Partnership's financial statements does not disclose required information about the following investments, each constituting more than 5 percent of the Partnership's total net assets, at December 31, 20X2:

- Amalgamated Buggy Whips, Inc., 10,000 shares of common stock—fair value \$3,280,000 (Consumer nondurable goods)
- Paper Airplane Corp., 6.25% Cv. Deb. due 20XX, \$4.5 million par value—fair value \$4,875,000 (Aviation)

In our opinion, disclosure of this information is required by accounting principles generally accepted in the United States of America.

In our opinion, except for the omission of the information discussed in the preceding paragraph, the financial statements and financial highlights referred to above present fairly, . . .

.84 An illustration of an adverse opinion relating to failure to present the entire Schedule of Investments and all of the related required information follows.⁶ This illustration assumes that the auditor has concluded that it is not practicable to present all of the required information. In such circumstances, the auditor presents in his or her report the missing information, where it is practicable to do so, and describes the nature of the missing information where it is not practicable to present the information in the report:

Independent Auditor's Report

[Same first and second paragraphs as the standard report]

The Partnership has declined to prepare and present a Schedule of Investments and the related information as of December 31, 20X2. Accounting principles generally accepted in the United States of America require presentation of this Schedule and the related information. Presentation of this Schedule would have disclosed required information about the following investments, each constituting more than 5 percent of the Partnership's total net assets, at December 31, 20X2:

- Amalgamated Buggy Whips, Inc., 10,000 shares of common stock—fair value \$3,280,000 (Consumer nondurable goods)⁷

⁶ Section 508 paragraph .36 discusses the factors the auditor considers in deciding whether to issue a qualified opinion or an adverse opinion.

⁷ In the absence of a Schedule of Investments containing categorizations by type, country or geographic region, and industry, such categorizations should be provided only if readily ascertainable from management's accounts and records. The auditor should not assign such categorizations if management has not done so.

- Paper Airplane Corp., 6.25% Cv. Deb. due 20XX, \$4.5 million par value—fair value \$4,875,000 (Aviation)

In addition, presentation of the Schedule of Investments would have disclosed [describe the nature of the information that it is not practicable to present in the auditor's report].

In our opinion, because the omission of a Schedule of Investments results in an incomplete presentation as explained in the preceding paragraph, the financial statements and financial highlights referred to above do not present fairly, . . .

[Issue Date: April 9, 2003; Revised: June 2009.]

17. Clarification in the Audit Report of the Extent of Testing of Internal Control Over Financial Reporting in Accordance With Generally Accepted Auditing Standards

.85 Question—Auditing standards established by the ASB of the AICPA are in effect and are enforceable⁸ for audits of entities that are not *issuers*, as that term is defined by the Sarbanes-Oxley Act of 2002 (the act) or whose audit is not prescribed by the rules of the SEC. For purposes of this interpretation, these entities are referred to as *nonissuers*.⁹

.86 Section 314, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, provides guidance on the auditor's consideration of internal control in an audit of a nonissuer's financial statements in accordance with GAAS. That consideration is intended to provide the auditor a sufficient understanding of internal control to plan the audit and to determine the nature, timing, and extent of tests to be performed. The scope of the auditor's procedures required under section 314 is considerably less than that required for an attestation of internal control pursuant to Section 404(b) of the act.

.87 To clarify that an audit performed in accordance with GAAS does not require the same level of testing and reporting on internal control over financial reporting as an audit of an issuer when Section 404(b) of the act is applicable, may the auditor expand his or her audit report to indicate that the purpose and extent of the auditor's testing of internal control over financial reporting was to determine the auditor's procedures and was not sufficient to express an opinion on the effectiveness of internal control over financial reporting?

⁸ The AICPA governing council designated the Public Company Accounting Oversight Board (PCAOB) as the body, pursuant to Rule 201, *General Standards* (ET sec. 201 par. .01), and Rule 202, *Compliance With Standards* (ET sec. 202 par. .01) of the AICPA's Code of Professional Conduct, with the authority to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers, as defined by the Sarbanes-Oxley Act of 2002. The council also designated the Auditing Standards Board (ASB), pursuant to Rules 201 and 202 (ET sec. 201 par. .01 and ET sec. 202 par. .01), as the body with the authority to promulgate auditing, attestation, and quality control standards and procedures for all other entities.

⁹ In a report issued on the audit of the financial statements of a subsidiary, investee, or other type of affiliate of an issuer, that is not itself an issuer, the auditor should refer to the audit as having been performed in accordance with generally accepted auditing standards (GAAS) if the report will not be filed with the SEC. For example, a subsidiary of an issuer may be subject to certain regulations that require an audit be performed in accordance with *Government Auditing Standards* (the Yellow Book). In this example, the auditor's report of the nonissuer should refer to GAAS and generally accepted government auditing standards.

.88 Interpretation—Yes. An auditor may add such language to the auditor's standard report. An example of additional language¹⁰ that may be included in the auditor's report to indicate this matter follows:

Independent Auditor's Report

[Same first paragraph as the standard report]

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. *An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.* An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

[Same opinion paragraph as the standard report]

[Issue Date: June 2004; Revised: March 2006.]

18. Reference to PCAOB Standards in an Audit Report on a Nonissuer¹¹

.89 Question—Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, PCAOB Standards and Related Rules, Auditing Standards), directs auditors to state in the auditor's report that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)" whenever the auditor has performed the engagement in accordance with Public Company Accounting Oversight Board (PCAOB) standards. Additionally, the release accompanying the standard states that "nothing in the Board's rules would preclude an accounting firm from conducting an audit of a company that is not an issuer in accordance with the Board's standards and so stating in its audit report. This is true regardless of whether or not the accounting firm performing the audit is registered with the Board."

.90 If an auditor is engaged to perform an audit of a nonissuer in accordance with PCAOB standards, which standards are applicable and how should the auditor report?

.91 Interpretation—Section 508 requires the auditor to indicate in the auditor's report that the audit was conducted in accordance with GAAS and an identification of the United States of America as the country of origin of those standards. However, an auditor may indicate that the audit was also conducted in accordance with another set of auditing standards. If the auditor conducted

¹⁰ The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.

¹¹ In a report issued on the audit of the financial statements of a subsidiary, investee, or other type of affiliate of an issuer, that is not itself an issuer, the auditor should refer to the audit as having been performed in accordance with GAAS if the report will not be filed with the SEC. For example, a subsidiary of an issuer may be subject to certain regulations that require an audit be performed in accordance with *Government Auditing Standards* (the Yellow Book). In this example, the auditor's report of the nonissuer should refer to GAAS and generally accepted government auditing standards.

the audit in accordance with GAAS *and* the auditing standards of the PCAOB, the auditor may indicate in the auditor's report that the audit was conducted in accordance with both sets of standards.

.92 Following is an example of additional language that may be included¹² in the auditor's report to indicate that an audit was conducted in accordance with both GAAS and the PCAOB's auditing standards, and to clarify that the purpose and extent of the auditor's testing of internal control over financial reporting was to determine the auditor's procedures and was not sufficient to express an opinion on the effectiveness of internal control. To clarify the source of GAAS in a dual reference reporting situation, the auditor may indicate that the audit was conducted in accordance with GAAS as established by the ASB:

Independent Auditor's Report

[Same first paragraph as the standard report]

We conducted our audit in accordance with *generally accepted auditing standards as established by the Auditing Standards Board (United States) and in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States)*. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. *The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly we express no such opinion.* An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

[Same opinion paragraph as the standard report]

[Issue Date: June 2004.]

19. Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board

.93 *Question*—Section 508 provides guidance regarding auditors' reports issued in connection with audits of historical financial statements prepared in conformity with GAAP. May an independent auditor apply the guidance in section 508 when engaged to report on financial statements presented in conformity with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB)?

¹² This example includes the illustrative language from paragraph .88. Because the PCAOB's Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), requires an audit of internal control for certain entities that are subject to Section 404(a) of the act, an audit of a nonissuer performed under PCAOB auditing standards does not require an audit of internal control unless otherwise required by a regulator with jurisdiction over the nonissuer. The additional language related to internal control should not be used when reporting on the audit of financial statements of a nonissuer that engages its auditor to examine (or audit) and report on the effectiveness of internal control over financial reporting either voluntarily or to comply with regulatory requirements.

.94 Interpretation—Yes. Because the IASB has been designated by the council of the AICPA as the body to establish international financial reporting standards for both private and public entities pursuant to Rule 202 (ET sec. 202 par. .01) and Rule 203, *Accounting Principles* (ET sec. 203 par. .01), of the AICPA Code of Professional Conduct and as of May 18, 2008, an auditor may report on general purpose financial statements presented in conformity with IFRS as issued by the IASB. When the auditor reports on financial statements prepared in conformity with IFRS, the auditor would refer, in the auditor's report, to IFRS rather than U.S. GAAP.

.95 An example of the opinion paragraph follows:

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of X Entity as of [at] December 31, 20X2 and 20X1, and the results of its operations, comprehensive income, changes in equity and its cash flows for the years then ended in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

.96 An entity may prepare financial statements in conformity with a jurisdictional variation of IFRS such that the entity's financial statements do not contain an explicit and unreserved statement of compliance with IFRS as issued by the IASB. Because the council of the AICPA has not designated bodies other than the IASB to establish international financial reporting standards, section 534, *Reporting on Financial Statements Prepared for Use in Other Countries*, applies to such financial statements prepared for use outside the United States, and paragraphs .14–.15 of section 534 and paragraphs .35–.60 of section 508 apply to financial statements prepared for more than limited distribution in the United States.

.97 If financial statements are presented in conformity with both IFRS as issued by the IASB and a jurisdictional variation of IFRS (for example, financial statements prepared in conformity with IFRS as issued by the IASB and with IFRS as endorsed by the European Union), an auditor may follow the guidance as described above.

[Issue Date: May 2008.]

AU Section 530

Dating of the Independent Auditor's Report

Source: SAS No. 1, section 530; SAS No. 29; SAS No. 98; SAS No. 103.

Issue date, unless otherwise indicated: November, 1972.

.01 The auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence¹ to support the opinion. Paragraph .05 describes the procedure to be followed when a subsequent event occurring after the date of the auditor's report is disclosed in the financial statements. [As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 103.]

.02 The auditor has no responsibility to make any inquiry or carry out any auditing procedures for the period after the date of his report.² However, with respect to filings under the Securities Act of 1933, reference should be made to section 711.10–.13.*

Events Occurring After Completion of Field Work But Before Issuance of Report

.03 In case a subsequent event of the type requiring adjustment of the financial statements (as discussed in section 560.03) occurs after the date of the independent auditor's report but before the issuance of the related financial statements, and the event comes to the attention of the auditor, the financial statements should be adjusted or the auditor should qualify his or her opinion.³ When the adjustment is made without disclosure of the event, the report ordinarily should be dated in accordance with paragraph .01. However, if the financial statements are adjusted and disclosure of the event is made, or if no adjustment is made and the auditor qualifies his or her opinion,⁴ the procedures set forth in paragraph .05 should be followed. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

.04 In case a subsequent event of the type requiring disclosure (as discussed in section 560.05) occurs after the date of the auditor's report but before the issuance of the related financial statements, and the event comes to the attention of the auditor, it should be disclosed in a note to the financial statements

¹ Among other things, sufficient appropriate audit evidence includes evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 103.]

² See section 561 regarding procedures to be followed by the auditor who, subsequent to the date of his report upon audited financial statements, becomes aware that facts may have existed at that date which might have affected his report had he then been aware of such facts. [Footnote renumbered, by the issuance of Statement on Auditing Standards No. 103, December 2005.]

* Section number revised, April 1981, by the issuance of Statement on Auditing Standards No. 37.

³ In some cases, a disclaimer of opinion or an adverse opinion may be appropriate. [Footnote renumbered, by the issuance of Statement on Auditing Standards No. 103, December 2005.]

⁴ Ibid. [Footnote renumbered, by the issuance of Statement on Auditing Standards No. 103, December 2005.]

or the auditor should qualify his or her opinion.⁵ If disclosure of the event is made, either in a note or in the auditor's report, the auditor would date the report as set forth in the following paragraph. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

.05 The independent auditor has two methods available for dating the report when a subsequent event disclosed in the financial statements occurs after the original date of the auditor's report but before the issuance of the related financial statements. The auditor may use "dual dating," for example, "February 16, 20__ except for Note __, as to which the date is March 1, 20__," or may date the report as of the later date. In the former instance, the responsibility for events occurring subsequent to the original report date is limited to the specific event referred to in the note (or otherwise disclosed). In the latter instance, the independent auditor's responsibility for subsequent events extends to the date of the report and, accordingly, the procedures outlined in section 560.12 generally should be extended to that date. [As amended, effective September 2002, by Statement on Auditing Standards No. 98. As amended, effective for audits of financial statements for periods ending on or after December 15, 2006, by Statement on Auditing Standards No. 103.]

Reissuance of the Independent Auditor's Report

.06 An independent auditor may reissue his or her report on financial statements contained in annual reports filed with the Securities and Exchange Commission or other regulatory agencies or in a document that contains information in addition to the client's basic financial statements subsequent to the date of his or her original report on the basic financial statements. An independent auditor may also be requested by his or her client to furnish additional copies of a previously issued report. Use of the original report date in a reissued report removes any implication that records, transactions, or events after that date have been examined or reviewed. In such cases, the independent auditor has no responsibility to make further investigation or inquiry as to events which may have occurred during the period between the original report date and the date of the release of additional reports. However, see section 711* as to an auditor's responsibility when his or her report is included in a registration statement filed under the Securities Act of 1933 and see section 508.70–.73, for the predecessor auditor's responsibility when reissuing or consenting to the reuse of a report previously issued on the financial statements of a prior period. [As modified, effective December 31, 1980, by SAS No. 29. Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

.07 In some cases, it may not be desirable for the independent auditor to reissue his report in the circumstances described in paragraph .06 because he has become aware of an event that occurred subsequent to the date of his original report that requires adjustment or disclosure in the financial statements. In such cases, adjustment with disclosure or disclosure alone should be made as described in section 560.08. The independent auditor should consider the effect of these matters on his opinion and he should date his report in accordance with the procedures described in paragraph .05.

⁵ Ibid. [Footnote renumbered, by the issuance of Statement on Auditing Standards No. 103, December 2005.]

* See footnote * in paragraph .02.

.08 However, if an event of the type requiring disclosure only (as discussed in section 560.05 and .08) occurs between the date of the independent auditor's original report and the date of the reissuance of such report, and if the event comes to the attention of the independent auditor, the event may be disclosed in a separate note to the financial statements captioned somewhat as follows:

Event (Unaudited) Subsequent to the Date of the
Independent Auditor's Report

Under these circumstances, the report of the independent auditor would carry the same date used in the original report.

AU Section 532

Restricting the Use of an Auditor's Report

Source: SAS No. 87.

Effective for reports issued after December 31, 1998, unless otherwise indicated.

Introduction and Applicability

.01 This section provides guidance to auditors on restricting the use of reports issued pursuant to Statements on Auditing Standards (SASs).¹ This section—

- Defines the terms *general use* and *restricted use*.
- Describes the circumstances in which the use of auditors' reports should be restricted.
- Specifies the language to be used in auditors' reports that are restricted as to use.

The reporting guidance in paragraph .19 of this section is not applicable to reports issued under section 324, *Service Organizations*, or reports issued under section 634, *Letters for Underwriters and Certain Other Requesting Parties*.

General-Use and Restricted-Use Reports

.02 The term *general use* applies to auditors' reports that are not restricted to specified parties. Auditors' reports on financial statements prepared in conformity with generally accepted accounting principles or certain comprehensive bases of accounting other than generally accepted accounting principles² ordinarily are not restricted as to use.^{3, 4}

.03 The term *restricted use* applies to auditors' reports intended only for specified parties. The need for restriction on the use of a report may result from a number of circumstances, including the purpose of the report, the nature of the procedures applied in its preparation, the basis of or assumptions used in its preparation, the extent to which the procedures performed generally are known or understood, and the potential for the report to be misunderstood when taken out of the context in which it was intended to be used.

¹ Throughout this section, the term *accountant* may be used interchangeably with the term *auditor*. The term *accountant* refers to a person possessing the professional qualifications required to practice as an independent auditor. See section 110, *Responsibilities and Functions of the Independent Auditor*, paragraphs .04 and .05.

² Section 623, *Special Reports*, paragraph .04, defines a comprehensive basis of accounting other than generally accepted accounting principles.

³ However, see section 623.05f for restrictions on the use of reports on financial statements prepared in conformity with the requirements of the financial reporting provisions of a governmental regulatory agency.

⁴ Nothing in this section precludes an auditor from restricting the use of any report.

.04 An auditor should restrict the use of a report in the following circumstances.

- a. The subject matter of the auditor's report or the presentation being reported on is based on measurement or disclosure criteria contained in contractual agreements or regulatory provisions that are not in conformity with generally accepted accounting principles or an other comprehensive basis of accounting (OCBOA). (See paragraph .05.)
- b. The auditor's report is issued as a by-product of a financial statement audit and is based on the results of procedures designed to enable the auditor to express an opinion on the financial statements taken as a whole, not to provide assurance on the specific subject matter of the report. (See paragraphs .07 through 11.)

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

Reporting on Subject Matter or Presentations Based on Measurement or Disclosure Criteria Contained in Contractual Agreements or Regulatory Provisions

.05 Reports on subject matter or presentations based on measurement or disclosure criteria contained in contractual agreements or regulatory provisions that are not in conformity with generally accepted accounting principles or an OCBOA are restricted as to use because the basis, assumptions, or purpose of such presentations (contained in such agreements or regulatory provisions) are developed for and directed only to the parties to the agreement or regulatory agency responsible for the provisions.

Reporting When Specified Parties Accept Responsibility for the Sufficiency of the Procedures Performed

[.06] [Paragraph deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

Reporting as a By-Product of a Financial Statement Audit

.07 An auditor may issue certain reports on matters coming to his or her attention during the course of an audit of financial statements. Such reports include but are not limited to reports issued pursuant to the following:

- Section 325, *Communicating Internal Control Related Matters Identified in an Audit*
- Section 380, *The Auditor's Communication With Those Charged With Governance*
- Paragraphs .19 through .21 of section 623, *Special Reports*, for reporting on compliance with aspects of contractual agreements or regulatory requirements related to audited financial statements

[Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Revised, April 2007, to reflect

conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.08 Reports issued pursuant to the aforementioned auditing standards are based on the results of procedures designed to enable an auditor to express an opinion on the financial statements taken as a whole, not to provide assurance on the specific subject matter of the report. These reports are by-products of an audit of financial statements and are referred to as by-product reports in this section.

.09 Because the issuance of the by-product report is not the primary objective of the engagement, an audit generally includes only limited procedures directed toward the subject matter of the by-product report. Accordingly, because of the potential for misinterpretation or misunderstanding of the limited degree of assurance associated with a by-product report, the use of such reports should be restricted. For example, a report issued under section 325 should be restricted because the purpose of the engagement is to report on an entity's financial statements, not to provide assurance on its internal control.

.10 An auditor may issue a by-product report in connection with other engagements conducted in accordance with generally accepted auditing standards, such as an engagement to express an opinion on one or more specified elements, accounts, or items of a financial statement.

.11 In consideration of the foregoing, the use of by-product reports should be restricted to management, those charged with governance, others within the organization, and any specified governmental authorities, when communicating internal control related matters identified in an audit (see section 325); those charged with governance and, if appropriate, management when communicating with those charged with governance (see section 380), and, in the case of reports on compliance with aspects of contractual agreements, to the parties to the contract or agreement (see section 623). [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

Combined Reports Covering Both Restricted-Use and General-Use Subject Matter or Presentations

.12 If an auditor issues a single combined report covering both (a) subject matter or presentations that require a restriction on use to specified parties and (b) subject matter or presentations that ordinarily do not require such a restriction, the use of such a single combined report should be restricted to the specified parties.

Inclusion of a Separate Restricted-Use Report in the Same Document With a General-Use Report

.13 In some instances, a separate restricted-use report may be included in a document that also contains a general-use report.⁵ The inclusion of a separate restricted-use report in a document that contains a general-use report does

⁵ Such a requirement exists in audits performed in accordance with U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and U.S. General Accounting Office, *Government Auditing Standards*.

not affect the intended use of either report. The restricted-use report remains restricted as to use, and the general-use report continues to be for general use.

Adding Other Specified Parties

.14 Subsequent to the completion of an engagement resulting in a restricted-use report, or in the course of such an engagement, an auditor may be asked to consider adding other parties as specified parties.

.15 As noted in paragraph .11 of this section, the use of by-product reports should be restricted to management, those charged with governance, others within the organization, and any specified governmental authorities, when communicating internal control related matters identified in an audit (see section 325); those charged with governance and, if appropriate, management when communicating with those charged with governance (see section 380), and, in the case of reports on compliance with aspects of contractual agreements, to the parties to the contract or agreement. An auditor should not agree to add other parties as specified parties of a by-product report. [Revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112. Revised, April 2007, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 114.]

.16 If an auditor is reporting on subject matter or a presentation based on measurement or disclosure criteria contained in contractual agreements or regulatory provisions, as described in paragraph .05 of this section, the auditor may agree to add other parties as specified parties based on the auditor's consideration of factors such as the identity of the other parties and the intended use of the report. If the auditor agrees to add other parties as specified parties, the auditor should obtain affirmative acknowledgment, ordinarily in writing, from the other parties of their understanding of the nature of the engagement, the measurement or disclosure criteria used in the engagement, and the related report. If the other parties are added after the auditor has issued his or her report, the report may be reissued or the auditor may provide other written acknowledgment that the other parties have been added as specified parties. If the report is reissued, the report date should not be changed. If the auditor provides written acknowledgment that the other parties have been added as specified parties, such written acknowledgment ordinarily should state that no procedures have been performed subsequent to the date of the report.

[.17] [Paragraph deleted to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

Limiting the Distribution of Reports

.18 Because of the reasons presented in paragraph .03 of this section, an auditor should consider informing his or her client that restricted-use reports are not intended for distribution to nonspecified parties, regardless of whether they are included in a document containing a separate general-use report.^{6,7} However, an auditor is not responsible for controlling a client's distribution of restricted-use reports. Accordingly, a restricted-use report should alert readers

⁶ In some cases, restricted-use reports filed with regulatory agencies are required by law or regulation to be made available to the public as a matter of public record. Also, a regulatory agency as part of its oversight responsibility for an entity may require access to restricted-use reports in which they are not named as a specified party.

⁷ This section does not preclude an auditor, in connection with establishing the terms of the engagement, from reaching an understanding with the client that the intended use of the report will be restricted, and from obtaining the client's agreement that the client and the specified parties will not distribute the report to parties other than those identified in the report.

to the restriction on the use of the report by indicating that the report is not intended to be and should not be used by anyone other than the specified parties.

Report Language—Restricted Use

.19 An auditor's report that is restricted as to use should contain a separate paragraph at the end of the report that includes the following elements:

- a. A statement indicating that the report is intended solely for the information and use of the specified parties
- b. An identification of the specified parties to whom use is restricted
- c. A statement that the report is not intended to be and should not be used by anyone other than the specified parties

An example of such a paragraph is the following:

This report is intended solely for the information and use of [*the specified parties*]⁸ and is not intended to be and should not be used by anyone other than these specified parties.

Effective Date

.20 This section is effective for reports issued after December 31, 1998. Early application of the provisions of this section is permitted.

⁸ The report may list the specified parties or refer the reader to the specified parties listed elsewhere in the report. For reports on engagements performed in accordance with U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, the specified parties may be identified as "federal awarding agencies and pass-through entities."

AU Section 534

Reporting on Financial Statements Prepared for Use in Other Countries

Source: SAS No. 51.

See section 9534 for interpretations of this section.

Effective for audits of financial statements for periods beginning after July 31, 1986, unless otherwise indicated.

.01 This section provides guidance for an independent auditor practicing in the United States who is engaged to report on the financial statements of a U.S. entity that have been prepared in conformity with accounting principles generally accepted in another country for use outside the United States.¹ A "U.S. entity" is an entity that is either organized or domiciled in the United States.

Purpose and Use of Financial Statements

.02 A U.S. entity ordinarily prepares financial statements for use in the United States in conformity with accounting principles generally accepted in the United States, but it may also prepare financial statements that are intended for use outside the United States and are prepared in conformity with accounting principles generally accepted in another country. For example, the financial statements of a U.S. entity may be prepared for inclusion in the consolidated financial statements of a non-U.S. parent. A U.S. entity may also have non-U.S. investors or may decide to raise capital in another country. Before reporting on financial statements prepared in conformity with the accounting principles of another country, the auditor should have a clear understanding of, and obtain written representations from management regarding, the purpose and uses of such financial statements. If the auditor uses the standard report of another country, and the financial statements will have general distribution in that country, he should consider whether any additional legal responsibilities are involved.

General and Fieldwork Standards

.03 When auditing the financial statements of a U.S. entity prepared in conformity with accounting principles generally accepted in another country, the auditor should perform the procedures that are necessary to comply with the general and fieldwork standards of U.S. generally accepted auditing standards (GAAS).

¹ See paragraph .07, however, for a discussion of financial statements prepared in conformity with accounting principles generally accepted in another country for limited distribution in the United States.

.04 The auditing procedures generally performed under U.S. GAAS may need to be modified, however. The assertions embodied in financial statements prepared in conformity with accounting principles generally accepted in another country may differ from those prepared in conformity with U.S. generally accepted accounting principles. For example, accounting principles generally accepted in another country may require that certain assets be revalued to adjust for the effects of inflation—in which case, the auditor should perform procedures to test the revaluation adjustments. On the other hand, another country's accounting principles may not require or permit recognition of deferred taxes; consequently, procedures for testing deferred tax balances would not be applicable. As another example, the accounting principles of some countries do not require or permit disclosure of related party transactions. Determining that such transactions are properly disclosed, therefore, would not be an audit objective in such cases. Other objectives, however, would remain relevant—such as identifying related parties in order to fully understand the business purpose, nature, and extent of the transactions and their effects on the financial statements.

.05 The auditor should understand the accounting principles generally accepted in the other country. Such knowledge may be obtained by reading the statutes or professional literature (or codifications thereof) that establish or describe the accounting principles generally accepted in the other country. Application of accounting principles to a particular situation often requires practical experience; the auditor should consider, therefore, consulting with persons having such expertise in the accounting principles of the other country. If the accounting principles of another country are not established with sufficient authority or by general acceptance, or a broad range of practices is acceptable, the auditor may nevertheless be able to report on financial statements for use in such countries if, in the auditor's judgment, the client's principles and practices are appropriate in the circumstances and are disclosed in a clear and comprehensive manner. In determining the appropriateness of the accounting principles used, the auditor may consider, for example, International Accounting Standards established by the International Accounting Standards Committee.

Compliance With Auditing Standards of Another Country

.06 In those circumstances in which the auditor is requested to apply the auditing standards of another country when reporting on financial statements prepared in conformity with accounting principles generally accepted in that country, the auditor should comply with the general and fieldwork standards of that country as well as with those standards in U.S. GAAS. This may require the auditor to perform certain procedures required by auditing standards of the other country in addition to those required by U.S. GAAS. The auditor will need to read the statutes or professional literature, or codifications thereof, that establish or describe the auditing standards generally accepted in the other country. He should understand, however, that such statutes or professional literature may not be a complete description of auditing practices and, therefore, should consider consulting with persons having expertise in the auditing standards of the other country.

Reporting Standards

.07 If financial statements prepared in conformity with accounting principles generally accepted in another country are prepared for use only outside

the United States, the auditor may report using either (a) a U.S.-style report modified to report on the accounting principles of another country (see paragraphs .09 and .10) or (b) if appropriate, the report form of the other country (see paragraphs .11 and .12). This is not intended to preclude limited distribution of the financial statements to parties (such as banks, institutional investors, and other knowledgeable parties that may choose to rely on the report) within the United States that deal directly with the entity, if the financial statements are to be used in a manner that permits such parties to discuss differences from U.S. accounting and reporting practices and their significance with the entity.

.08 Financial statements prepared in conformity with accounting principles generally accepted in another country ordinarily are not useful to U.S. users. Therefore, if financial statements are needed for use both in another country and within the United States, the auditor may report on two sets of financial statements for the entity—one prepared in conformity with accounting principles generally accepted in another country for use outside the United States, and the other prepared in accordance with accounting principles generally accepted in the United States (see paragraph .13). If dual statements are not prepared, or for some other reason the financial statements prepared in conformity with accounting principles generally accepted in another country will have more than limited distribution in the United States, the auditor should report on them using the U.S. standard form of report, modified as appropriate for departures from accounting principles generally accepted in the United States (see paragraph .14).

Use Only Outside the United States

.09 A U.S.-style report modified to report on financial statements prepared in conformity with accounting principles generally accepted in another country that are intended for use only outside the United States should include—

- a. A title that includes the word "independent."²
- b. A statement that the financial statements identified in the report were audited.
- c. A statement that refers to the note to the financial statements that describes the basis of presentation of the financial statements on which the auditor is reporting, including identification of the nationality of the accounting principles.
- d. A statement that the financial statements are the responsibility of the Company's management³ and that the auditor's responsibility is to express an opinion on the financial statements based on his audit.

² This statement does not require a title for an auditor's report if the auditor is not independent. See section 504, *Association With Financial Statements*, for guidance on reporting when the auditor is not independent. [Footnote added to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

³ In some instances, a document containing the auditor's report may include a statement by management regarding its responsibility for the presentation of the financial statements. Nevertheless, the auditor's report should state that the financial statements are management's responsibility. [Footnote added to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

- e. A statement that the audit was conducted in accordance with auditing standards generally accepted in the United States of America (and, if appropriate, with the auditing standards of the other country).
- f. A statement that U.S. standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.
- g. A statement that an audit includes:
 - (1) Examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements,
 - (2) Assessing the accounting principles used and significant estimates made by management, and
 - (3) Evaluating the overall financial statement presentation.^[4]
- h. A statement that the auditor believes that his audit provides a reasonable basis for his opinion.
- i. A paragraph that expresses the auditor's opinion on whether the financial statements are presented fairly, in all material respects, in conformity with the basis of accounting described. If the auditor concludes that the financial statements are not fairly presented on the basis of accounting described, all substantive reasons for that conclusion should be disclosed in an additional explanatory paragraph (preceding the opinion paragraph) of the report, and the opinion paragraph should include appropriate modifying language as well as a reference to the explanatory paragraph.
- j. If the auditor is auditing comparative financial statements and the described basis of accounting has not been applied in a manner consistent with that of the preceding period and the change has had a material effect on the comparability of the financial statements, the auditor should add an explanatory paragraph to his report (following the opinion paragraph) that describes the change in accounting principle and refers to the note to the financial statements that discusses the change and its effect on the financial statements.
- k. The manual or printed signature of the auditor's firm.
- l. Date.⁵

[As amended to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

^[4] [Footnote added to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93. Footnote deleted, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69.]

⁵ For guidance on dating the independent auditor's report, see section 530, *Dating of the Independent Auditor's Report*. [Footnote added to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

.10 The following is an illustration of such a report:

Independent Auditor's Report

We have audited the accompanying balance sheet of International Company as of December 31, 20XX and the related statements of income, retained earnings, and cash flows for the year then ended which, as described in Note X, have been prepared on the basis of accounting principles generally accepted in [*name of country*]. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (and in [*name of country*]). U.S. standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of International Company as of [*at*] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in [*name of country*].

[As amended to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

.11 The independent auditor may also use the auditor's standard report of another country, provided that—

- a. Such a report would be used by auditors in the other country in similar circumstances.
- b. The auditor understands, and is in a position to make, the attestations contained in such a report (see paragraph .12).

The auditor should consider whether the standard report of another country or the financial statements may be misunderstood because they resemble those prepared in conformity with U.S. standards. When the auditor believes there is a risk of misunderstanding, he should identify the other country in the report.

.12 When the auditor uses the standard report of the other country, the auditor should comply with the reporting standards of that country. The auditor should recognize that the standard report used in another country, even when it appears similar to that used in the United States, may convey a different meaning and entail a different responsibility on the part of the auditor due to custom or culture. Use of a standard report of another country may also require the auditor to provide explicit or implicit assurance of statutory compliance or otherwise require understanding of local law. When using the auditor's standard report of another country, the auditor needs to understand applicable legal responsibilities, in addition to the auditing standards and the accounting principles generally accepted in the other country. Accordingly, depending on the nature and extent of the auditor's knowledge

and experience, he should consider consulting with persons having expertise in the audit reporting practices of the other country to attain the understanding needed to issue that country's standard report.

.13 A U.S. entity that prepares financial statements in conformity with U.S. generally accepted accounting principles also may prepare financial statements in conformity with accounting principles generally accepted in another country for use outside the United States. In such circumstances, the auditor may report on the financial statements that are in conformity with accounting principles of the other country by following the guidance in paragraphs .09 and .10. The auditor may wish to include, in one or both of the reports, a statement that another report has been issued on the financial statements for the entity that have been prepared in accordance with accounting principles generally accepted in another country. The auditor may also wish to reference any note describing significant differences between the accounting principles used and U.S. GAAP. An example of such a statement follows.

We also have reported separately on the financial statements of International Company for the same period presented in accordance with accounting principles generally accepted in [name of country]. (The significant differences between the accounting principles accepted in [name of country] and those generally accepted in the United States are summarized in Note X.)

Use in the United States

.14 If the auditor is requested to report on the fair presentation of financial statements, prepared in conformity with the accounting principles generally accepted in another country, that will have more than limited distribution in the United States, he should use the U.S. standard form of report (see section 508, *Reports on Audited Financial Statements*, paragraph .08), modified as appropriate (see section 508.35-.57), because of departures from accounting principles generally accepted in the United States.⁶ The auditor may also, in a separate paragraph to the report, express an opinion on whether the financial statements are presented in conformity with accounting principles generally accepted in another country.

.15 The auditor may also report on the same set of financial statements, prepared in conformity with accounting principles generally accepted in another country, that will have more than limited distribution in the United States by using both the standard report of the other country or a U.S.-style report (described in paragraph .09) for distribution outside the United States, and a U.S. form of report (described in paragraph .14) for distribution in the United States.

Effective Date

.16 This section is effective for audits of financial statements for periods beginning after July 31, 1986.

⁶ This section does not apply to reports on financial statements of U.S. subsidiaries of foreign registrants presented in SEC filings of foreign parent companies where the subsidiaries' financial statements have been prepared on the basis of accounting principles used by the parent company. [Footnote renumbered to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.]

AU Section 9534

Reporting on Financial Statements Prepared for Use in Other Countries: Auditing Interpretations of Section 534

[1.] Financial Statements for General Use Only Outside of the United States in Accordance With International Accounting Standards and International Standards on Auditing

[.01–.04] [Withdrawn, May 2008, by the Audit Issues Task Force.]^[1]

2. Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board

.05 Question—Section 534, *Reporting on Financial Statements Prepared for Use in Other Countries* provides guidance for the independent auditor practicing in the United States who is engaged to report on the financial statements of a U.S. entity² for use outside of the United States in conformity with accounting principles generally accepted in another country. Does the guidance in section 534 apply to the financial statements of a U.S. entity presented in conformity with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB)?

.06 Interpretation—No. The IASB has been designated by the council of the AICPA as the body to establish international financial reporting standards for both private and public entities pursuant to Rule 202, *Compliance With Standards* [ET section 202 paragraph.01], and Rule 203, *Accounting Principles* [ET section 203 paragraph .01], of the AICPA Code of Professional Conduct and as of May 18, 2008. Accordingly, section 534 is not applicable to financial statements prepared in conformity with IFRS as issued by the IASB. When the auditor reports on financial statements of a U.S. entity prepared in conformity with IFRS as issued by the IASB, the auditor would refer to section 508, *Reports on Audited Financial Statements*.³

.07 An entity may prepare financial statements in conformity with a jurisdictional variation of IFRS such that the entity's financial statements do not contain an explicit and unreserved statement of compliance with IFRS as issued by the IASB. Because the council of the AICPA has not designated bodies other than the IASB to establish IFRS, Section 534 applies to such financial statements prepared for use outside the United States, and paragraphs .14–.15 of section 534 and paragraphs .35–.37 of section 508 apply to financial statements prepared for more than limited distribution in the United States.

^[1] [Footnote deleted.]

² A U.S. entity is an entity that is either organized or domiciled in the United States.

³ Also see Auditing Interpretation No. 19, "Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board," of section 508, *Reports on Audited Financial Statements* [section 9508 paragraph .93].

.08 If financial statements are presented in conformity with both IFRS as issued by the IASB and a jurisdictional variation of IFRS (for example, financial statements prepared in conformity with IFRS as issued by the IASB and with IFRS as endorsed by the European Union), an auditor may follow the guidance in section 508 (and in paragraphs .93–.94 of Auditing Interpretation No. 19, "Financial Statements Prepared in Conformity With International Financial Reporting Standards as Issued by the International Accounting Standards Board," of section 508 [section 9508 paragraphs .93–.94]).

[Issue Date: May, 2008.]

3. Financial Statements Audited in Accordance With International Standards on Auditing

.09 Question—May a U.S. auditor perform an audit of financial statements of a U.S. entity in accordance with the International Standards on Auditing (ISA)? The financial statements subject to audit may be prepared in conformity with IFRS, accounting principles generally accepted in the United States, or accounting principles generally accepted in another country.

.10 Interpretation—Yes. In such an engagement where the financial statements are for use outside the United States, the auditor should follow the guidance in section 534 in planning and performing the engagement. Section 534 requires the U.S. auditor, in these circumstances, to comply with the general and fieldwork standards of U.S. generally accepted auditing standards as well as any additional requirements of the ISA. When the financial statements are intended for general use only outside of the United States, the auditor may use either a U.S. style report [section 534 paragraph .09] or the report form set forth in the ISA.

.11 When the financial statements are intended for use in the United States, section 534 would not be applicable; however, section 508 would apply. Also see paragraph .56 of Auditing Interpretation No. 14, "Reporting on Audits Conducted in Accordance With Auditing Standards Generally Accepted in the United States of America and in Accordance With International Standards on Auditing," of section 508 [section 9508 paragraph .56].

[Issue Date: May, 2008.]

AU Section 543

Part of Audit Performed by Other Independent Auditors

Source: SAS No. 1, section 543; SAS No. 64.

See section 9543 for interpretations of this section.

Issue date, unless otherwise indicated: November, 1972.

.01 This section provides guidance on the professional judgments the independent auditor makes in deciding (a) whether he may serve as principal auditor and use the work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in the financial statements presented and (b) the form and content of the principal auditor's report in these circumstances.¹ Nothing in this section should be construed to require or imply that an auditor, in deciding whether he may properly serve as principal auditor without himself auditing particular subsidiaries, divisions, branches, components, or investments of his client, should make that decision on any basis other than his judgment regarding the professional considerations as discussed in paragraphs .02 and .10; nor should an auditor state or imply that a report that makes reference to another auditor is inferior in professional standing to a report without such a reference. [As modified, September 1981, by the Auditing Standards Board.]

Principal Auditor's Course of Action

.02 The auditor considering whether he may serve as principal auditor may have performed all but a relatively minor portion of the work, or significant parts of the audit may have been performed by other auditors. In the latter case, he must decide whether his own participation is sufficient to enable him to serve as the principal auditor and to report as such on the financial statements. In deciding this question, the auditor should consider, among other things, the materiality of the portion of the financial statements he has audited in comparison with the portion audited by other auditors, the extent of his knowledge of the overall financial statements, and the importance of the components he audited in relation to the enterprise as a whole. [As modified, September 1981, by the Auditing Standards Board.]

.03 If the auditor decides that it is appropriate for him to serve as the principal auditor, he must then decide whether to make reference in his report² to the audit performed by another auditor. If the principal auditor decides to assume responsibility for the work of the other auditor insofar as

¹ Section 315 applies if an auditor uses the work of a predecessor auditor in expressing an opinion on financial statements.

² See paragraph .09 for example of appropriate reporting when reference is made to the audit of other auditors.

that work relates to the principal auditor's expression of an opinion on the financial statements taken as a whole, no reference should be made to the other auditor's work or report. On the other hand, if the principal auditor decides not to assume that responsibility, his report should make reference to the audit of the other auditor and should indicate clearly the division of responsibility between himself and the other auditor in expressing his opinion on the financial statements. Regardless of the principal auditor's decision, the other auditor remains responsible for the performance of his own work and for his own report.

Decision Not to Make Reference

.04 If the principal auditor is able to satisfy himself as to the independence and professional reputation of the other auditor (see paragraph .10) and takes steps he considers appropriate to satisfy himself as to the audit performed by the other auditor (see paragraph .12), he may be able to express an opinion on the financial statements taken as a whole without making reference in his report to the audit of the other auditor. If the principal auditor decides to take this position, he should not state in his report that part of the audit was made by another auditor because to do so may cause a reader to misinterpret the degree of responsibility being assumed.

.05 Ordinarily, the principal auditor would be able to adopt this position when:

- a. Part of the audit is performed by another independent auditor which is an associated or correspondent firm and whose work is acceptable to the principal auditor based on his knowledge of the professional standards and competence of that firm; or
- b. The other auditor was retained by the principal auditor and the work was performed under the principal auditor's guidance and control; or
- c. The principal auditor, whether or not he selected the other auditor, nevertheless takes steps he considers necessary to satisfy himself as to the audit performed by the other auditor and accordingly is satisfied as to the reasonableness of the accounts for the purpose of inclusion in the financial statements on which he is expressing his opinion; or
- d. The portion of the financial statements audited by the other auditor is not material to the financial statements covered by the principal auditor's opinion.

Decision to Make Reference

.06 On the other hand, the principal auditor may decide to make reference to the audit of the other auditor when he expresses his opinion on the financial statements. In some situations, it may be impracticable for the principal auditor to review the other auditor's work or to use other procedures which in the judgment of the principal auditor would be necessary for him to satisfy himself as to the audit performed by the other auditor. Also, if the financial statements of a component audited by another auditor are material in relation to the total, the principal auditor may decide, regardless of any other considerations, to make reference in his report to the audit of the other auditor.

.07 When the principal auditor decides that he will make reference to the audit of the other auditor, his report should indicate clearly, in both the introductory, scope and opinion paragraphs, the division of responsibility as between that portion of the financial statements covered by his own audit and that covered by the audit of the other auditor. The report should disclose the magnitude of the portion of the financial statements audited by the other auditor. This may be done by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly reveals the portion of the financial statements audited by the other auditor. The other auditor may be named but only with his express permission and provided his report is presented together with that of the principal auditor.³

.08 Reference in the report of the principal auditor to the fact that part of the audit was made by another auditor is not to be construed as a qualification of the opinion but rather as an indication of the divided responsibility between the auditors who conducted the audits of various components of the overall financial statements. [As modified, September 1981, by the Auditing Standards Board.]

.09 An example of appropriate reporting by the principal auditor indicating the division of responsibility when he makes reference to the audit of the other auditor follows:

Independent Auditor's Report

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20...., and the related consolidated statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets and revenues constituting 20 percent and 22 percent, respectively, of the related consolidated totals. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the report of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20...., and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

³ As to filings with the Securities and Exchange Commission, see Rule 2-05 of Regulation S-X.

When two or more auditors in addition to the principal auditor participate in the audit, the percentages covered by the other auditors may be stated in the aggregate. [Revised, April 1998, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

Procedures Applicable to Both Methods of Reporting

.10 Whether or not the principal auditor decides to make reference to the audit of the other auditor, he should make inquiries concerning the professional reputation and independence of the other auditor. He also should adopt appropriate measures to assure the coordination of his activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements. These inquiries and other measures may include procedures such as the following:

- a. Make inquiries as to the professional reputation and standing of the other auditor to one or more of the following:
 - (i) The American Institute of Certified Public Accountants,⁴ the applicable state society of certified public accountants and/or the local chapter, or in the case of a foreign auditor, his corresponding professional organization.
 - (ii) Other practitioners.
 - (iii) Bankers and other credit grantors.
 - (iv) Other appropriate sources.
- b. Obtain a representation from the other auditor that he is independent under the requirements of the American Institute of Certified Public Accountants and, if appropriate, the requirements of the Securities and Exchange Commission (SEC).^[4a]
- c. Ascertain through communication with the other auditor:
 - (i) That he is aware that the financial statements of the component which he is to audit are to be included in the financial statements on which the principal auditor will report and that the other auditor's report thereon will be relied upon (and, where applicable, referred to) by the principal auditor.

⁴ The AICPA Professional Ethics Division can respond to inquiries about whether individuals are members of the American Institute of Certified Public Accountants and whether complaints against members have been adjudicated by the Joint Trial Board. The division cannot respond to inquiries about public accounting firms or provide information about letters of required corrective action issued by the division or pending disciplinary proceedings or investigations. The AICPA Division for CPA Firms can respond to inquiries about whether specific public accounting firms are members of either the Private Companies Practice Section (PCPS) or the SEC Practice Section (SECPS), and can indicate whether a firm had a peer review in compliance with the Section's membership requirements and whether any sanctions against the firm have been publicly announced. In addition, the division will supply copies of peer-review reports that have been accepted by the applicable section of the division and information submitted by member firms on applications for membership and annual updates. The AICPA Practice Monitoring staff or the appropriate state CPA society can respond to inquiries as to whether specific public accounting firms are enrolled in the AICPA Peer Review Program and can indicate whether a firm had a peer review in compliance with the AICPA *Standards for Performing and Reporting on Peer Reviews* [PR section 100]. [As amended by the Auditing Standards Board, June 1990.]

^[4a] [Footnote deleted, December 2001, to acknowledge the dissolution of the Independence Standard Board.]

- (ii) That he or she is familiar with accounting principles generally accepted in the United States of America and with the generally accepted auditing standards promulgated by the American Institute of Certified Public Accountants and will conduct his or her audit and will report in accordance therewith.
- (iii) That he has knowledge of the relevant financial reporting requirements for statements and schedules to be filed with regulatory agencies such as the Securities and Exchange Commission, if appropriate.
- (iv) That a review will be made of matters affecting elimination of intercompany transactions and accounts and, if appropriate in the circumstances, the uniformity of accounting practices among the components included in the financial statements.

(Inquiries as to matters under *a*, and *c* (ii) and (iii) ordinarily would be unnecessary if the principal auditor already knows the professional reputation and standing of the other auditor and if the other auditor's primary place of practice is in the United States.) [As modified, September 1981, by the Auditing Standards Board. Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

.11 If the results of inquiries and procedures by the principal auditor with respect to matters described in paragraph .10 lead him to the conclusion that he can neither assume responsibility for the work of the other auditor insofar as that work relates to the principal auditor's expression of an opinion on the financial statements taken as a whole, nor report in the manner set forth in paragraph .09, he should appropriately qualify his opinion or disclaim an opinion on the financial statements taken as a whole. His reasons therefor should be stated, and the magnitude of the portion of the financial statements to which his qualification extends should be disclosed.

Additional Procedures Under Decision Not to Make Reference

.12 When the principal auditor decides not to make reference to the audit of the other auditor, in addition to satisfying himself as to the matters described in paragraph .10, he should also consider whether to perform one or more of the following procedures:

- a.* Visit the other auditor and discuss the audit procedures followed and results thereof.
- b.* Review the audit programs of the other auditor. In some cases, it may be appropriate to issue instructions to the other auditor as to the scope of his audit work.
- c.* Review the working papers of the other auditor, including the understanding of internal control and the assessment of control risk.

.13 In some circumstances the principal auditor may consider it appropriate to participate in discussions regarding the accounts with management personnel of the component whose financial statements are being audited by

other auditors and/or to make supplemental tests of such accounts. The determination of the extent of additional procedures, if any, to be applied rests with the principal auditor alone in the exercise of his professional judgment and in no way constitutes a reflection on the adequacy of the other auditor's work. Because the principal auditor in this case assumes responsibility for his opinion on the financial statements on which he is reporting without making reference to the audit performed by the other auditor, his judgment must govern as to the extent of procedures to be undertaken.

Long-Term Investments

.14 With respect to investments accounted for under the equity method, the auditor who uses another auditor's report for the purpose of reporting on the investor's equity in underlying net assets and its share of earnings or losses and other transactions of the investee is in the position of a principal auditor using the work and reports of other auditors. Under these circumstances, the auditor may decide that it would be appropriate to refer to the work and report of the other auditor in his report on the financial statements of the investor. (See paragraphs .06-.11.) When the work and reports of other auditors constitute a major element of evidence with respect to investments accounted for under the cost method, the auditor may be in a position analogous to that of a principal auditor.

Other Auditor's Report Departs From Standard Report

.15 If the report of the other auditor is other than a standard report, the principal auditor should decide whether the reason for the departure from the standard report is of such nature and significance in relation to the financial statements on which the principal auditor is reporting that it would require recognition in his own report. If the reason for the departure is not material in relation to such financial statements and the other auditor's report is not presented, the principal auditor need not make reference in his report to such departure. If the other auditor's report is presented, the principal auditor may wish to make reference to such departure and its disposition.

Restated Financial Statements of Prior Years Following a Pooling of Interests

.16 Following a pooling-of-interests transaction, an auditor may be asked to report on restated financial statements for one or more prior years when other auditors have audited one or more of the entities included in such financial statements. In some of these situations the auditor may decide that he has not audited a sufficient portion of the financial statements for such prior year or years to enable him to serve as principal auditor (see paragraph .02). Also, in such cases, it often is not possible or it may not be appropriate or necessary for the auditor to satisfy himself with respect to the restated financial statements. In these circumstances it may be appropriate for him to express his opinion solely with respect to the combining of such statements; however, no opinion should be expressed unless the auditor has audited the statements of at least one of the entities included in the restatement for at

least the latest period presented. The following is an illustration of appropriate reporting on such combination that can be presented in an additional paragraph of the auditor's report following the standard introductory, scope and opinion paragraphs covering the consolidated financial statements for the current year:*

We previously audited and reported on the consolidated statements of income and cash flows of XYZ Company and subsidiaries for the year ended December 31, 19X1, prior to their restatement for the 19X2 pooling of interests. The contribution of XYZ Company and subsidiaries to revenues and net income represented percent and percent of the respective restated totals. Separate financial statements of the other companies included in the 19X1 restated consolidated statements of income and cash flows were audited and reported on separately by other auditors. We also audited the combination of the accompanying consolidated statements of income and cash flows for the year ended December 31, 19X1, after restatement for the 19X2 pooling of interests; in our opinion, such consolidated statements have been properly combined on the basis described in Note A of notes to consolidated financial statements.

[As modified, October 1980, by the Auditing Standards Board. As amended, effective for reports issued after December 31, 1990, by Statement on Auditing Standards No. 64.]

.17 In reporting on restated financial statements as described in the preceding paragraph, the auditor does not assume responsibility for the work of other auditors nor the responsibility for expressing an opinion on the restated financial statements taken as a whole. He should apply procedures which will enable him to express an opinion only as to proper combination of the financial statements. These procedures include testing the combination for clerical accuracy and the methods used to combine the restated financial statements for conformity with generally accepted accounting principles. For example, the auditor should make inquiries and apply procedures regarding such matters as the following:

- a. Elimination of intercompany transactions and accounts.
- b. Combining adjustments and reclassifications.
- c. Adjustments to treat like items in a comparable manner, if appropriate.
- d. The manner and extent of presentation of disclosure matters in the restated financial statements and notes thereto.

The auditor should also consider the application of procedures contained in paragraph .10. [As modified, October 1980, by the Auditing Standards Board.]

Predecessor Auditor

[.18] [Superseded by Statement on Auditing Standards No. 7, effective November 30, 1975, as superseded by Statement on Auditing Standards No. 84, effective with respect to acceptance of an engagement after March 31, 1998.] (See section 315.)

* If restated consolidated balance sheets are also presented, the auditor may also express his opinion with respect to the combination of the consolidated balance sheets.

AU Section 9543

Part of Audit Performed by Other Independent Auditors: Auditing Interpretations of Section 543

1. Specific Procedures Performed by the Other Auditor at the Principal Auditor's Request

.01 Question—An independent auditor is auditing the financial statements of a component¹ in accordance with generally accepted auditing standards and is issuing a report to his client that will also be used by another independent auditor who is acting as a principal auditor.² The principal auditor requests the other auditor to perform specific procedures, for example, to furnish or test amounts to be eliminated in consolidation, such as intercompany profits, or to read other information in documents containing audited financial statements. In those circumstances, who is responsible to determine the extent of the procedures to be performed?

.02 Interpretation—Section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10, states that the principal auditor "should adopt appropriate measures to assure the coordination of his activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements." Section 543.10c(iv) further states that those measures may include procedures such as ascertaining through communication with the other auditor "that a review will be made of matters affecting elimination of intercompany transactions and accounts."

.03 Thus, when the principal auditor requests the other auditor to perform procedures, the principal auditor is responsible for determining the extent of the procedures to be performed. The principal auditor should provide specific instructions on procedures to be performed, materiality considerations for that purpose, and other information that may be necessary in the circumstances. The other auditor should perform the requested procedures in accordance with the principal auditor's instructions and report the findings solely for the use of the principal auditor.

[Issue Date: April, 1979; Revised: November 1996.]

2. Inquiries of the Principal Auditor by the Other Auditor

.04 Question—Section 543, *Part of Audit Performed by Other Independent Auditors*, gives guidance to a principal auditor on making inquiries of the other auditor. Section 543.03 also states that "the other auditor remains responsible for the performance of his own work and for his own report." Should the other auditor also make inquiries of the principal auditor to fulfill that responsibility?

¹ For the purposes of this interpretation, the entities whose separate financial statements collectively comprise the consolidated or other financial statements are referred to as components.

² See section 543 for the definition of a principal auditor. For the purposes of this interpretation, the auditor whose work is used by a principal auditor is referred to as the other auditor.

.05 Interpretation—Section 334, *Related Parties*, states that there may be inquiry of the principal auditor regarding related parties. In addition, before issuing his report, the other auditor should consider whether he should inquire of the principal auditor as to matters that may be significant to his own audit.

.06 The other auditor's consideration of whether to make the inquiry should be based on factors such as his awareness that there are transactions or relationships which are unusual or complex between the component he is auditing and the component the principal auditor is auditing, or his knowledge that in the past matters relating to his audit have arisen that were known to the principal auditor but not to him.

.07 If the other auditor believes inquiry is appropriate he may furnish the principal auditor with a draft of the financial statements expected to be issued and of his report solely for the purpose of aiding the principal auditor to respond to the inquiry. The inquiry would concern transactions, adjustments, or other matters that have come to the principal auditor's attention that he believes require adjustment to or disclosure in the financial statements of the component being audited by the other auditor. Also, the other auditor should inquire about any relevant limitation on the scope of the audit performed by the principal auditor.

[Issue Date: April, 1979.]

3. Form of Inquiries of the Principal Auditor Made by the Other Auditor

.08 Question—In those circumstances when the other auditor believes an inquiry of the principal auditor is appropriate, what form should the inquiry take and when should it be made?

.09 Interpretation—The other auditor's inquiry ordinarily should be in writing. It should indicate whether the response should be in writing, and should specify the date as of which the principal auditor should respond. Ordinarily, that date should be near the anticipated date of the other auditor's report. An example of a written inquiry from the other auditor is as follows:

"We are auditing the financial statements of (name of client) as of (date) and for the (period of audit) for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of (name of client) in conformity with generally accepted accounting principles.

A draft of the financial statements referred to above and a draft of our report are enclosed solely to aid you in responding to this inquiry. Please provide us (in writing) (orally) with the following information in connection with your current examination of the consolidated financial statements of (name of parent company):

1. Transactions or other matters (including adjustments made during consolidation or contemplated at the date of your reply) that have come to your attention that you believe require adjustment to or disclosure in the financial statements of (name of client) being audited by us.

2. Any limitation on the scope of your audit that is related to the financial statements of (name of client) being audited by us, or that limits your ability to provide us with the information requested in this inquiry.

Please make your response as of a date near (expected date of the other auditor's report)."

.10 The principal auditor's reply will often be made as of a date when his audit is still in progress; however, the other auditor should expect that ordinarily the response should satisfy his need for information. However, there may be instances when the principal auditor's response explains that it is limited because his audit has not progressed to a point that enables him to provide a response that satisfies the other auditor's need for information. If the principal auditor's response is limited in that manner, the other auditor should consider whether to apply acceptable alternative procedures, delay the issuance of his report until the principal auditor can respond, or qualify his opinion or disclaim an opinion for a limitation on the scope of his audit.

[Issue Date: April, 1979]

4. Form of Principal Auditor's Response to Inquiries from Other Auditors

.11 Question—An independent auditor acting in the capacity of a principal auditor may receive an inquiry from another independent auditor performing the audit of the financial statements of a component concerning transactions, adjustments, or limitations on his audit.³ What should be the form of the principal auditor's response?

.12 Interpretation—The principal auditor should respond promptly to the other auditor's inquiry, based on his audit, and if applicable, on his reading of the draft financial statements and report furnished by the other auditor. His response may be written or oral, as requested by the other auditor. However, the principal auditor's response ordinarily should be in writing if it contains information that may have a significant effect on the other auditor's audit.

.13 The principal auditor should identify the stage of completion of his audit as of the date of his reply. He should also indicate that no audit procedures were performed for the purpose of identifying matters that would not affect his audit and report, and therefore, not all the information requested would necessarily be revealed. If the principal auditor has been furnished with a draft of the financial statements being audited by the other auditor and a draft of his report, the principal auditor should state that he has read the draft only to aid him in making his reply.

.14 An example of a written response from the principal auditor is as follows:

"This letter is furnished to you in response to your request that we provide you with certain information in connection with your audit of the financial statements of (name of component), a (subsidiary, division, branch or investment) of Parent Company for the year ended (date).

We are in the process of performing an audit of the consolidated financial statements of Parent Company for the year ended (date) (but have not completed our work as of this date). The objective of our audit is to enable us to express an opinion on the consolidated financial statements of Parent Company and, accordingly, we have performed no procedures directed toward identifying matters that would not affect our audit or our report. However, solely for the purpose of responding to your inquiry, we have read the draft of the financial statements of (name of component) as of (date) and for the (period of audit) and the draft of your report on them, included with your inquiry dated (date of inquiry).

³ See section 9543.04-.07, "Inquiries of the Principal Auditor by the Other Auditor," above.

Based solely on the work we have performed (to date) in connection with our audit of the consolidated financial statements, which would not necessarily reveal all or any of the matters covered in your inquiry, we advise you that:

1. No transactions or other matters (including adjustments made during consolidation or contemplated at this date) have come to our attention that we believe require adjustment to or disclosure in the financial statements of (name of component) being audited by you.

2. No limitation has been placed by Parent Company on the scope of our audit that, to our knowledge, is related to the financial statements of (name of component) being audited by you, that has limited our ability to provide you with the information requested in your inquiry."

[Issue Date: April, 1979.]

5. Procedures of the Principal Auditor

.15 Question—What steps, if any, should the principal auditor take in responding to an inquiry such as that described in section 9543.11?

.16 Interpretation—The principal auditor's response should ordinarily be made by the auditor with final responsibility for the engagement. He should take those steps that he considers reasonable under the circumstances to be informed of known matters pertinent to the other auditor's inquiry. For example, the auditor with final responsibility may inquire of principal assistants⁴ responsible for various aspects of the engagement or he may direct assistants to bring to his attention any significant matters of which they become aware during the audit. The principal auditor is not required to perform any procedures directed toward identifying matters that would not affect his audit or his report.

.17 If between the date of his response and the completion of his audit, the principal auditor becomes aware of information that he would have included in his response to the other auditor's inquiry had he been aware of it, the principal auditor should promptly communicate such information to the other auditor.⁵

[Issue Date: April, 1979.]

6. Application of Additional Procedures Concerning the Audit Performed by the Other Auditor

.18 Question—If a principal auditor decides not to make reference to the audit of another auditor, section 543 requires him to consider whether to apply procedures to obtain information about the adequacy of the audit performed by the other auditor. In making a decision about (a) whether to apply one or more of the procedures listed in section 543.12 and (b), if applicable, the extent of those procedures, may the principal auditor consider his knowledge of the other auditor's compliance with quality control policies and procedures?

.19 Interpretation—Yes. The principal auditor's judgment about the extent of additional procedures, if any, to be applied in the circumstances may be affected by various factors including his knowledge of the other auditor's quality

⁴ See section 311, *Planning and Supervision*, for the definition of "assistants."

⁵ See section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, concerning procedures to be followed by the other auditor if he receives the information after the issuance of his report.

control policies and procedures that provide the other auditor with reasonable assurance of conformity with generally accepted auditing standards in his audit engagements.

.20 Other factors that the principal auditor may wish to consider in making that decision include his previous experience with the other auditor, the materiality of the portion of the financial statements audited by the other auditor, the control exercised by the principal auditor over the conduct of the audit performed by the other auditor, and the results of the principal auditor's other procedures that may indicate whether additional audit evidence is necessary.

[Issue Date: December, 1981; Revised: March, 2006.]

[7.] Reporting on Financial Statements Presented on a Comprehensive Annual Financial Report of a Governmental Entity When One Fund Has Been Audited by Another Auditor

[.21-.24] [Withdrawn December, 1992 by the Audit Issues Task Force.]^[6-7]

AU Section 544

Lack of Conformity With Generally Accepted Accounting Principles

Source: SAS No. 1, section 544; SAS No. 2; SAS No. 62; SAS No. 77.

Issue date, unless otherwise indicated: November, 1972.

[.01] [Superseded by Statement on Auditing Standards No. 2, effective December 31, 1974.]

Regulated Companies

.02 The basic postulates and broad principles of accounting comprehended in the term "generally accepted accounting principles" which pertain to business enterprises in general apply also to companies whose accounting practices are prescribed by governmental regulatory authorities or commissions. (For example, public utilities and insurance companies.) Accordingly, the first reporting standard is equally applicable to opinions on financial statements of such regulated companies presented for purposes other than filings with their respective supervisory agencies; and material variances from generally accepted accounting principles, and their effects, should be dealt with in the independent auditor's report in the same manner followed for companies which are not regulated.¹ Ordinarily, this will require either a qualified or an adverse opinion on such statements. An adverse opinion may be accompanied by an opinion on supplementary data which are presented in conformity with generally accepted accounting principles. [As amended, effective periods ending on or after December 31, 1974, by Statement on Auditing Standards No. 2. As amended by Statement on Auditing Standards No. 62, effective for reports issued on or after July 1, 1989.]

.03 It should be recognized, however, that appropriate differences exist with respect to the application of generally accepted accounting principles as between regulated and nonregulated businesses because of the effect in regulated businesses of the rate-making process, a phenomenon not present in nonregulated businesses (Financial Accounting Standards Board *Accounting Standards Codification* 980, *Regulated Operations*). Such differences usually concern mainly the time at which various items enter into the determination of net income in accordance with the principle of matching costs and revenues. It should also be recognized that accounting requirements not directly related to the rate-making process commonly are imposed on regulated businesses and

¹ When reporting on financial statements of a regulated entity that are prepared in accordance with the requirements of financial reporting provisions of a government regulatory agency to whose jurisdiction the entity is subject, the auditor may report on the financial statements as being prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles (see section 623, *Special Reports* paragraphs .02 and .10). Reports of this nature, however, should be issued only if the financial statements are intended solely for filing with one or more regulatory agencies to whose jurisdiction the entity is subject. [As amended, effective for audits of financial statements for periods ended on or after December 31, 1996, by Statement on Auditing Standards No. 77.]

that the imposition of such accounting requirements does not necessarily mean that they conform with generally accepted accounting principles. [Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 When financial statements of a regulated entity are prepared in accordance with a basis of accounting prescribed by one or more regulatory agencies or the financial reporting provisions of another agency, the independent auditor may also be requested to report on their fair presentation in conformity with such prescribed basis of accounting in presentations for distribution in other than filings with the entity's regulatory agency. In those circumstances, the auditor should use the standard form of report (see section 508, *Reports on Audited Financial Statements*, paragraph .08), modified as appropriate (see paragraphs .35–.60 of section 508) because of the departures from generally accepted accounting principles, and then, in an additional paragraph to the report, express an opinion on whether the financial statements are presented in conformity with the prescribed basis of accounting. [As amended by Statement on Auditing Standards No. 62, effective for reports issued on or after July 1, 1989. As amended, effective for audits of financial statements for periods ended on or after December 31, 1996, by Statement on Auditing Standards No. 77.]

AU Section 550

Other Information in Documents Containing Audited Financial Statements

(Supersedes SAS Nos. 8 and 29 and portions of SAS Nos. 52 and 98.)

Source: SAS No. 118.

Effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility in relation to other information in documents containing audited financial statements and the auditor's report thereon. In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the financial statements does not cover other information, and the auditor has no responsibility for determining whether such information is properly stated. This section establishes the requirement for the auditor to read the other information of which the auditor is aware because the credibility of the audited financial statements may be undermined by material inconsistencies between the audited financial statements and other information. (Ref: par. .A1–.A2)

.02 In this section, *documents containing audited financial statements* refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) and annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public that contain audited financial statements and the auditor's report thereon. This section also may be applied, adapted as necessary in the circumstances, to other documents to which the auditor, at management's request, devotes attention. (Ref: par. .A3–.A5)

Effective Date

.03 This section is effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Objective

.04 The objective of the auditor is to respond appropriately when the auditor becomes aware that documents containing audited financial statements and the auditor's report thereon include other information that could undermine the credibility of those financial statements and the auditor's report.

Definitions

.05 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Other information. Financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information.¹

Inconsistency. Other information that conflicts with information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the financial statements.

Misstatement of fact. Other information that is unrelated to matters appearing in the audited financial statements that is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the document containing audited financial statements.

Requirements

Reading Other Information

.06 The auditor should read the other information of which the auditor is aware in order to identify material inconsistencies, if any, with the audited financial statements.

.07 The auditor should make appropriate arrangements with management or those charged with governance to obtain the other information prior to the report release date.² If it is not possible to obtain all of the other information prior to the report release date, the auditor should read such other information as soon as practicable. (Ref: par. .A6)

.08 The auditor should communicate with those charged with governance the auditor's responsibility with respect to the other information, any procedures performed relating to the other information, and the results.

Material Inconsistencies

.09 If, on reading the other information, the auditor identifies a material inconsistency, the auditor should determine whether the audited financial statements or the other information needs to be revised.

Material Inconsistencies Identified in Other Information Obtained Prior to the Report Release Date

.10 When the auditor identifies a material inconsistency prior to the report release date that requires revision of the audited financial statements and management refuses to make the revision, the auditor should modify the auditor's opinion in accordance with section 508, *Reports on Audited Financial Statements*.

.11 When the auditor identifies a material inconsistency prior to the report release date that requires revision of the other information and management refuses to make the revision, the auditor should communicate this matter to those charged with governance and

¹ Required supplementary information is defined in paragraph .04 of section 558, *Required Supplementary Information*.

² See paragraph .23 of section 339, *Audit Documentation*, for the definition of report release date.

- a. include in the auditor's report an explanatory paragraph describing the material inconsistency, in accordance with paragraph .11 of section 508;
- b. withhold the auditor's report; or
- c. when withdrawal is possible under applicable law or regulation, withdraw from the engagement.

(Ref: par. .A7–.A8)

Material Inconsistencies Identified in Other Information Obtained Subsequent to the Report Release Date

.12 When revision of the audited financial statements is necessary as a result of a material inconsistency with other information and the auditor's report on the financial statements has already been released, the auditor should apply the relevant requirements in section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

.13 When revision of the other information is necessary after the report release date and management agrees to make the revision, the auditor should carry out the procedures necessary under the circumstances. (Ref: par. .A9)

.14 When revision of the other information is necessary after the report release date but management refuses to make the revision, the auditor should notify those charged with governance of the auditor's concerns regarding the other information and take any further appropriate action. (Ref: par. .A10)

Material Misstatements of Fact

.15 If, on reading the other information for the purpose of identifying material inconsistencies, the auditor becomes aware of an apparent material misstatement of fact, the auditor should discuss the matter with management. (Ref: par. .A11)

.16 When, following such discussions, the auditor still considers that there is an apparent material misstatement of fact, the auditor should request management to consult with a qualified third party, such as the entity's legal counsel, and the auditor should consider the advice received by the entity in determining whether such matter is a material misstatement of fact.

.17 When the auditor concludes that there is a material misstatement of fact in the other information that management refuses to correct, the auditor should notify those charged with governance of the auditor's concerns regarding the other information and take any further appropriate action. (Ref: par. .A12)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01–.02)

.A1 This section also addresses other information for which a designated accounting standard setter³ has issued standards or guidance regarding the format to be used and content to be included when such information is voluntarily presented in a document containing the audited financial statements and the auditor's report thereon. The auditor's responsibility for other information presented in a document containing audited financial statements that is required to be included by a designated accounting standard setter is addressed in section 558, *Required Supplementary Information*.

.A2 The auditor is not required to reference the other information in the auditor's report on the financial statements. However, the auditor may include an explanatory paragraph disclaiming an opinion on the other information. For example, an auditor may choose to include a disclaimer on the other information when the auditor believes that the auditor could be associated with the information and the user may infer a level of assurance that is not intended. Exhibit A, "Example of an Explanatory Paragraph to Disclaim an Opinion on Other Information," has an example of how an auditor may word such a disclaimer of opinion on other information.

.A3 Other information may comprise the following:

- A report by management or those charged with governance on operations
- Financial summaries or highlights
- Employment data
- Planned capital expenditures
- Financial ratios
- Names of officers and directors
- Selected quarterly data

.A4 For purposes of GAAS, other information does not encompass, for example, the following:

- A press release or similar memorandum or cover letter accompanying the document containing audited financial statements and the auditor's report thereon
- Information contained in analyst briefings
- Information contained on the entity's website

Considerations Specific to Governmental Entities (Ref: par. .02)

.A5 The term *annual reports of governments* is intended to include comprehensive annual reports or other annual financial reports that include the government's financial statements and the auditor's report thereon.

³ *Designated accounting standard setter* is defined in paragraph .04 of section 558.

Reading Other Information (Ref: par. .07)

.A6 Obtaining the other information prior to the report release date enables the auditor to resolve possible material inconsistencies and apparent material misstatements of fact with management on a timely basis. An agreement with management regarding when other information will be available may be helpful. The auditor may delay the release of the auditor's report until management provides the other information to the auditor.

Material Inconsistencies

Material Inconsistencies Identified in Other Information Obtained Prior to the Report Release Date (Ref: par. .11)

.A7 When management refuses to revise the other information, the auditor may base any decision on what further action to take on advice from the auditor's legal counsel.

Considerations Specific to Governmental Entities (Ref: par. .11)

.A8 In audits of governmental entities, withdrawal from the engagement or withholding the auditor's report may not be options. In such cases, the auditor may issue a report to those charged with governance and the appropriate statutory body, if applicable, giving details of the inconsistency.

Material Inconsistencies Identified in Other Information Obtained Subsequent to the Report Release Date (Ref: par. .13–.14)

.A9 When revision of other information is necessary after the report release date and management agrees to make the revision, the auditor's procedures may include reviewing the steps taken by management to ensure that individuals in receipt of the previously issued financial statements, the auditor's report thereon, and the other information are informed of the need for revision.

.A10 When revision of other information is necessary after the report release date but management refuses to make the revision, appropriate further actions by the auditor may include obtaining advice from the auditor's legal counsel.

Material Misstatements of Fact (Ref: par. .15–.17)

.A11 When discussing an apparent material misstatement of fact with management, the auditor may not be able to evaluate the validity of some disclosures included within the other information and management's responses to the auditor's inquiries and may conclude that valid differences of judgment or opinion exist.

.A12 When the auditor concludes that there is a material misstatement of fact that management refuses to correct, appropriate further actions by the auditor may include obtaining advice from the auditor's legal counsel, withholding the auditor's report if such report has not been released, or withdrawing from the engagement.

.A13

Exhibit A: Example of an Explanatory Paragraph to Disclaim an Opinion on Other Information

The following is an example of an explanatory paragraph that the auditor may use to disclaim an opinion on other information:

Our audit was conducted for the purpose of forming an opinion on the basic financial statements as a whole. The [*identify the other information*] is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

.A14

Exhibit B: Comparison of Section 550, *Other Information in Documents Containing Audited Financial Statements*, With International Standard on Auditing 720, *The Auditor's Responsibility in Relation to Other Information in Documents Containing Audited Financial Statements*

This analysis was prepared by the Audit and Attest Standards staff to highlight substantive differences between section 550, *Other Information in Documents Containing Audited Financial Statements*, and International Standard on Auditing (ISA) 720, *The Auditor's Responsibility in Relation to Other Information in Documents Containing Audited Financial Statements*, and the rationale therefore. This analysis is not authoritative and is prepared for informational purposes only. It has not been acted on or reviewed by the Auditing Standards Board (ASB).

This section clarifies that the auditor's objective is to respond appropriately (in paragraph .04), and the requirement is to read the other information (in paragraph .06) when the auditor becomes aware that documents containing audited financial statements and the auditor's report thereon include other information that could undermine the credibility of those financial statements and the auditor's report. The objective in ISA 720 and the corresponding requirement are not specifically limited to documents of which the auditor is aware. However, the ISA states that *documents containing audited financial statements* refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) containing audited financial statements and the auditor's report thereon. The ISA further states that it may be applied, adapted as necessary in the circumstances, to other documents containing audited financial statements. The ASB believes that the language added to this section limiting the auditor's responsibilities clarifies the intent of the objective and the requirement in the ISA and is appropriate in the U.S. legal environment.

This section applies the requirements in paragraphs .07 and .10–.14 to the report release date, but ISA 720 applies the corresponding requirements to the date of the auditor's report. The ASB determined that the report release date, as defined in auditing standards generally accepted in the United States, is more appropriate in the U.S. environment.

The ASB has made various changes to the language throughout this section, in comparison with ISA 720. The changes to this section include the following:

- In paragraph .01, clarifying that *auditor's opinion* is the opinion on the financial statements.
- In paragraph .02, adding clarifying language that documents containing audited financial statements refer to "annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public" and that this section also applies to "other documents to which the auditor, at management's request, devotes attention."

The Fourth Standard of Reporting

- In paragraph .05
 - deleting the phrase *either by law, regulation or custom* from the definition of *other information* to avoid confusion with required supplementary information.
 - replacing *contradicts* with *conflicts with* to better define the term *inconsistency*.
- In paragraph .11, adding the word *explanatory* to clarify the report modification.
- In paragraph .16, adding the wording "by the entity in determining whether such matter is a material misstatement of fact" to clarify that the advice is received by the entity.

Such changes have been made to make this section easier to read and apply. The ASB believes that such changes will not create differences between the application of ISA 720 and the application of this section.

AU Section 550A

Other Information in Documents Containing Audited Financial Statements

Source: SAS No. 8; SAS No. 98.

See section 9550A for interpretations of this section.

Issue date, unless otherwise indicated: December 1975.

.01 An entity may publish various documents that contain information (hereinafter, "other information") in addition to audited financial statements and the independent auditor's report thereon. This section provides guidance for the auditor's consideration of other information included in such documents.

.02 This section is applicable only to other information contained in (a) annual reports to holders of securities or beneficial interests, annual reports of organizations for charitable or philanthropic purposes distributed to the public, and annual reports filed with regulatory authorities under the Securities Exchange Act of 1934 or (b) other documents to which the auditor, at the client's request, devotes attention.

.03 This section is not applicable when the financial statements and report appear in a registration statement filed under the Securities Act of 1933. The auditor's procedures with respect to 1933 Act filings are unaltered by this section (see sections 634* and 711†). Also, this section is not applicable to other information on which the auditor is engaged to express an opinion.¹ The guidance applicable to auditing and reporting on certain information other than financial statements intended to be presented in conformity with generally accepted accounting principles is unaltered by this section (see sections 551A‡ and 623||).

.04 Other information in a document may be relevant to an audit performed by an independent auditor or to the continuing propriety of his report. The auditor's responsibility with respect to information in a document does not extend beyond the financial information identified in his report, and the auditor has no obligation to perform any procedures to corroborate other information contained in a document. However, he should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing

* [Section 631, formerly 630, changed by the issuance of Statement on Auditing Standards No. 38 (superseded). Section 634, formerly 631, changed by the issuance of Statement on Auditing Standards No. 49.] (See section 634.)

† [Section number revised, April 1981, by the issuance of Statement on Auditing Standards No. 37.] (See section 711.)

¹ Mere reading of other information is an inadequate basis for expressing an opinion on that information.

‡ [Section number revised, July 1980, by the issuance of Statement on Auditing Standards No. 29.] (See section 551A.)

|| [Section number changed, April 1989, by the issuance of Statement on Auditing Standards No. 62.] (See section 623.)

in the financial statements.² If the auditor concludes that there is a material inconsistency, he should determine whether the financial statements, his report, or both require revision. If he concludes that they do not require revision, he should request the client to revise the other information. If the other information is not revised to eliminate the material inconsistency, he should consider other actions such as revising his report to include an explanatory paragraph describing the material inconsistency, withholding the use of his report in the document, and withdrawing from the engagement. The action he takes will depend on the particular circumstances and the significance of the inconsistency in the other information.

.05 If, while reading the other information for the reasons set forth in paragraph .04, the auditor becomes aware of information that he believes is a material misstatement of fact that is not a material inconsistency as described in paragraph .04, he should discuss the matter with the client. In connection with this discussion, the auditor should consider that he may not have the expertise to assess the validity of the statement, that there may be no standards by which to assess its presentation, and that there may be valid differences of judgment or opinion. If the auditor concludes he has a valid basis for concern he should propose that the client consult with some other party whose advice might be useful to the client, such as the client's legal counsel.

.06 If, after discussing the matter as described in paragraph .05, the auditor concludes that a material misstatement of fact remains, the action he takes will depend on his judgment in the particular circumstances. He should consider steps such as notifying his client in writing of his views concerning the information and consulting his legal counsel as to further appropriate action in the circumstances.

.07 If certain other information³ has been subjected to auditing procedures applied in the audit of the basic financial statements, the auditor may express an opinion on whether the information is fairly stated in all material respects in relation to those financial statements taken as a whole. In those circumstances, the auditor's report on the information should describe clearly the character of the auditor's work and the degree of responsibility the auditor is taking. The auditor may report on such information using the guidance in section 551A, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*, paragraphs .12 and .14). [Paragraph added, effective September 2002, by Statement on Auditing Standards No. 98.]

² In fulfilling his responsibility under this section, a principal auditor may also request the other auditor or auditors involved in the engagement to read the other information. If a predecessor auditor's report appears in a document to which this section applies, he should read the other information for the reasons described in this paragraph.

³ This information may include supplementary information required by generally accepted accounting principles. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

AU Section 9550A

Other Information in Documents Containing Audited Financial Statements: Auditing Interpretations of Section 550A

[1.] Reports by Management on Internal Accounting Control^[1-4]

[.01-.06] [Superseded May 1994 by Interpretation Nos. 2-3 paragraphs .07-.15.]

2. Reports by Management on Internal Control Over Financial Reporting

.07 Question—Communications to various parties specified in section 550A, *Other Information in Documents Containing Audited Financial Statements*, paragraph .02 may include a separate report by management containing an assertion about the effectiveness of the entity's internal control over financial reporting. What is the auditor's responsibility concerning such report?

.08 Interpretation—If the auditor has been engaged to examine and report on management's assertion, the guidance in AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That is Integrated With an Audit of Its Financial Statements*, should be followed.

.09 If the auditor has not been engaged to examine and report on management's assertion, the auditor should follow the guidance in section 550A, which states that "the auditor has no obligation to perform any procedures to corroborate other information contained in [such] a document." Under section 550A, the auditor is required to read the report by management and consider whether it is materially inconsistent with information appearing in the financial statements and, as a result, he or she may become aware of a material misstatement of fact.⁵

.10 Although not required, the auditor may consider adding the following paragraph to the standard auditor's report: "We were not engaged to examine management's assertion about the effectiveness of [name of entity's] internal control over financial reporting as of [date] included in the accompanying [title of management's report] and, accordingly, we do not express an opinion thereon."

.11 Because an auditor is required to consider internal control in an audit of the financial statements, he or she would often be familiar with matters covered in a management report on internal control over financial reporting. As a result, the auditor may become aware of information that causes him or her to believe that management's assertion on the effectiveness of internal control over financial reporting contains a material misstatement of fact as described in section 550A.⁶ If the auditor becomes aware of information in the report

^[1-4] [Superseded May 1994 by Interpretation Nos. 2 and 3, paragraphs .07-.15.]

⁵ Unless information on internal control over financial reporting appears in the financial statements, which is not common, a management assertion on the effectiveness of internal control over financial reporting could not be inconsistent with information appearing in financial statements.

⁶ For example, the auditor has communicated to management a material weakness in internal control over financial reporting and management states or implies there are no material weaknesses.

by management that conflicts with his or her knowledge or understanding of such matters, he or she should discuss the information with the client. If, after discussions with the client, the auditor concludes that a material misstatement of fact exists, the auditor should follow the guidance in section 550A paragraph .06.

[Issue Date: May 1994; Revised: January 2001.]

3. Other References by Management to Internal Control Over Financial Reporting, Including References to the Independent Auditor

.12 Question—Communications to various parties specified in section 550A, *Other Information in Documents Containing Audited Financial Statements*, paragraph .02 may include a statement by management about the entity's internal control over financial reporting. Such documents may also refer to the independent auditor in circumstances other than when the auditor has been engaged to examine and report on management's assertion about the effectiveness of internal control over financial reporting. What is the auditor's responsibility in such circumstances?

.13 Interpretation—The auditor should follow the guidance in section 550A, which states that "the auditor has no obligation to perform any procedures to corroborate other information contained in [such] a document." Under section 550A, the auditor is required to read other information in documents containing audited financial statements and consider whether it is materially inconsistent with information appearing in the financial statements and, as a result, he or she may become aware of a material misstatement of fact. If the auditor becomes aware of information in the report by management that conflicts with his or her knowledge or understanding of such matters, he or she should discuss the information with the client. If, after discussions with the client, the auditor concludes that a material misstatement of fact exists, the auditor should follow the guidance in section 550A paragraph .06.

.14 Generally, management may discuss its responsibility for internal control over financial reporting and report on its effectiveness. In reading such information, the auditor should evaluate specific references by management that deal with the auditor's consideration of internal control in planning and performing the audit of the financial statements, particularly if such reference would lead the reader to assume the auditor had performed more work than required under generally accepted auditing standards or would lead the reader to believe that the auditor was giving assurances on internal control. The auditor should also consider whether management's comment or statement uses the auditor's name in such a way as to indicate or imply that the auditor's involvement is greater than is supported by the facts.⁷ If management misstates the auditor's responsibility for consideration of internal control over financial reporting, the auditor should discuss the matter with the client and consider whether any further action is needed in accordance with section 550A paragraph .06.

.15 Paragraph .28 of section 325, *Communicating Internal Control Related Matters Identified in an Audit*, permits an auditor to report to management that

⁷ For instance, management may report that "X Company's external auditors have reviewed the company's internal control in connection with their audit of the financial statements." Because paragraph .06 of AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That is Integrated With an Audit of Its Financial Statements*, prohibits an engagement to review and report on the effectiveness of the entity's internal control over financial reporting or a written assertion thereon, a statement by management that the auditors had "reviewed" the company's internal control would be inappropriate.

no material weaknesses⁸ were identified during the audit, but requires such reports to be solely for the information and use of the entity's management, those charged with governance, others within the organization, and specified governmental authorities. If, however, management decides to include or refer to this communication in a general use document, the auditor should communicate to management the restrictions on use of the communication and the potential for such a statement to be misunderstood. For example, the fact that an audit has not disclosed any material weaknesses does not necessarily mean none exist since an audit of the financial statements does not constitute an examination of a management assertion about the effectiveness of internal control over financial reporting. If management refuses to make appropriate changes to the report, the auditor should advise management that he or she has not consented to the use of his or her name and should consider what other actions might be appropriate. In considering what actions, if any, may be appropriate in the circumstances, the auditor may wish to consult legal counsel.

[Issue Date: May 1994; Revised: January 2001; Revised: May 2006.]

4. Other Information in Electronic Sites Containing Audited Financial Statements

.16 Question—An entity may make information available in public computer networks, such as the World Wide Web area of the Internet, an electronic bulletin board, the Securities and Exchange Commission's EDGAR system, or similar electronic venues (hereinafter, "electronic sites"). Information in electronic sites may include annual reports to shareholders, financial statements and other financial information, as well as press releases, product information and promotional material. When audited financial statements and the independent auditor's report thereon are included in an electronic site, what is the auditor's responsibility with respect to other information included in the electronic site?

.17 Interpretation—Electronic sites are a means of distributing information and are not "documents," as that term is used in section 550A, *Other Information in Documents Containing Audited Financial Statements*. Thus, auditors are not required by section 550A to read information contained in electronic sites, or to consider the consistency of other information (as that term is used in section 550A) in electronic sites with the original documents.

.18 Auditors may be asked by their clients to render professional services with respect to information in electronic sites. Such services, which might take different forms, are not contemplated by section 550A. Other auditing or attestation standards may apply, for example, agreed-upon procedures pursuant to AT section 201, *Agreed-Upon Procedures Engagements*, depending on the nature of the service requested.

[Issue Date: March 1997; Revised: January 2001.]

⁸ Section 325 paragraph .29 prohibits a written communication that no significant deficiencies were identified during the audit. If management reports that an auditor made an oral communication that no significant deficiencies were identified during the audit, the auditor should follow the guidance in this paragraph. [Footnote revised, May 2006, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 112.]

AU Section 551

Supplementary Information in Relation to the Financial Statements as a Whole

(With SAS No. 118, supersedes former section 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents.*)

Source: SAS No. 119.

Effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility when engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. The information covered by this section is presented outside the basic financial statements and is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. This section also may be applied, with the report wording adapted as necessary, when an auditor has been engaged to report on whether required supplementary information¹ is fairly stated, in all material respects, in relation to the financial statements as a whole. (Ref: par. .A1–.A6)

Effective Date

.02 This section is effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Objective

.03 The objective of the auditor, when engaged to report on supplementary information in relation to the financial statements as a whole, is

- a. to evaluate the presentation of the supplementary information in relation to the financial statements as a whole and
- b. to report on whether the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Definition

.04 For purposes of generally accepted auditing standards, *supplementary information* is defined as information presented outside the basic financial

¹ Required supplementary information is defined in paragraph .04 of section 558, *Required Supplementary Information*.

statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements. (Ref: par. .A7–.A8)

Requirements

Procedures to Determine Whether Supplementary Information Is Fairly Stated, in All Material Respects, in Relation to the Financial Statements as a Whole (Ref: par. .A9–.A15)

.05 In order to opine on whether supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, the auditor should determine that all of the following conditions are met:

- a. The supplementary information was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements.
- b. The supplementary information relates to the same period as the financial statements.
- c. The financial statements were audited, and the auditor served as the principal auditor in that engagement.
- d. Neither an adverse opinion nor a disclaimer of opinion was issued on the financial statements. (Paragraph .11 addresses reporting while not opining on supplementary information when the report on the financial statements contains an adverse opinion or a disclaimer of opinion.)
- e. The supplementary information will accompany the entity's audited financial statements, or such audited financial statements will be made readily available by the entity. (Ref: par. .A9)

.06 The auditor should obtain the agreement of management that it acknowledges and understands its responsibility

- a. for the preparation of the supplementary information in accordance with the applicable criteria.
- b. to provide the auditor with the written representations described in paragraph .07(g).
- c. to include the auditor's report on the supplementary information in any document that contains the supplementary information and that indicates that the auditor has reported on such supplementary information.
- d. to present the supplementary information with the audited financial statements or, if the supplementary information will not be presented with the audited financial statements, to make the audited financial statements readily available to the intended users of the supplementary information no later than the date of issuance by the entity of the supplementary information and the auditor's report thereon. (Ref: par. .A9)

.07 In addition to the procedures performed during the audit of the financial statements, in order to opine on whether supplementary information is

fairly stated, in all material respects, in relation to the financial statements as a whole, the auditor should perform the following procedures using the same materiality level used in the audit of the financial statements:

- a. Inquire of management about the purpose of the supplementary information and the criteria used by management to prepare the supplementary information, such as an applicable financial reporting framework, criteria established by a regulator, a contractual agreement, or other requirements
- b. Determine whether the form and content of the supplementary information complies with the applicable criteria
- c. Obtain an understanding about the methods of preparing the supplementary information and determine whether the methods of preparing the supplementary information have changed from those used in the prior period and, if the methods have changed, the reasons for such changes
- d. Compare and reconcile the supplementary information to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves
- e. Inquire of management about any significant assumptions or interpretations underlying the measurement or presentation of the supplementary information
- f. Evaluate the appropriateness and completeness of the supplementary information, considering the results of the procedures performed and other knowledge obtained during the audit of the financial statements (Ref: par. .A13)
- g. Obtain written representations from management
 - i. that it acknowledges its responsibility for the presentation of the supplementary information in accordance with the applicable criteria;
 - ii. that it believes the supplementary information, including its form and content, is fairly presented in accordance with the applicable criteria;
 - iii. that the methods of measurement or presentation have not changed from those used in the prior period or, if the methods of measurement or presentation have changed, the reasons for such changes;
 - iv. about any significant assumptions or interpretations underlying the measurement or presentation of the supplementary information; and
 - v. that when the supplementary information is not presented with the audited financial statements, management will make the audited financial statements readily available to the intended users of the supplementary information no later than the date of issuance by the entity of the supplementary information and the auditor's report thereon. (Ref: par. .A9)

.08 The auditor has no responsibility for the consideration of subsequent events with respect to the supplementary information. However, if information comes to the auditor's attention prior to the release of the auditor's report on the financial statements regarding subsequent events that affect the financial statements, the auditor should apply the relevant requirements in section 560, *Subsequent Events*. If information comes to the auditor's attention subsequent

to the release of the auditor's report on the financial statements regarding facts that may have existed at that date, which might have affected the report had the auditor been aware of such facts, the auditor should apply the relevant requirements in section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

Reporting

.09 When the entity presents the supplementary information with the financial statements, the auditor should report on the supplementary information in either (1) an explanatory paragraph following the opinion paragraph in the auditor's report on the financial statements or (2) in a separate report on the supplementary information. The explanatory paragraph or separate report should include the following elements:

- a. A statement that the audit was conducted for the purpose of forming an opinion on the financial statements as a whole
- b. A statement that the supplementary information is presented for purposes of additional analysis and is not a required part of the financial statements
- c. A statement that the supplementary information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements
- d. A statement that the supplementary information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America
- e. If the auditor issues an unqualified opinion on the financial statements and the auditor has concluded that the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, a statement that, in the auditor's opinion, the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole
- f. If the auditor issues a qualified opinion on the financial statements and the qualification has an effect on the supplementary information, a statement that, in the auditor's opinion, except for the effects on the supplementary information of (refer to the paragraph in the auditor's report explaining the qualification), such information is fairly stated, in all material respects, in relation to the financial statements as a whole

.10 When the audited financial statements are not presented with the supplementary information, the auditor should report on the supplementary information in a separate report. When reporting separately on the supplementary information, the report should include, in addition to the elements in paragraph .09, a reference to the report on the financial statements, the date of that report, the nature of the opinion expressed on the financial statements, and any report modifications. (Ref: par. .A16)

.11 When the auditor's report on the audited financial statements contains an adverse opinion or a disclaimer of opinion and the auditor has been engaged to report on whether supplementary information is fairly stated, in all material respects, in relation to such financial statements as a whole, the auditor is precluded from expressing an opinion on the supplementary information. When permitted by law or regulation, the auditor may withdraw from the engagement to report on the supplementary information. If the auditor does not withdraw, the auditor's report on the supplementary information should state that because of the significance of the matter disclosed in the auditor's report, it is inappropriate to, and the auditor does not, express an opinion on the supplementary information.

.12 The date of the auditor's report on the supplementary information in relation to the financial statements as a whole should not be earlier than the date on which the auditor completed the procedures required in paragraph .07.

.13 If the auditor concludes, on the basis of the procedures performed, that the supplementary information is materially misstated in relation to the financial statements as a whole, the auditor should discuss the matter with management and propose appropriate revision of the supplementary information. If management does not revise the supplementary information, the auditor should either

- a.* modify the auditor's opinion on the supplementary information and describe the misstatement in the auditor's report or
- b.* if a separate report is being issued on the supplementary information, withhold the auditor's report on the supplementary information.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibility for information that a designated accounting standard setter² requires to accompany an entity's basic financial statements is addressed in section 558, *Required Supplementary Information*.

.A2 The auditor's responsibility for financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information, is addressed in section 550, *Other Information in Documents Containing Audited Financial Statements*.

.A3 The supplementary information need not be presented with the audited financial statements in order for the auditor to express an opinion on whether such supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole. However, in accordance with paragraph .10, if the supplementary information is not presented with the audited financial statements, the auditor's report on the supplementary information is required to make reference to the auditor's report on the financial statements.

.A4 The auditor may be engaged to express an opinion on specified elements, accounts, or items of financial statements for the purpose of a separate presentation, in accordance with paragraphs .11–.18 of section 623, *Special Reports*. In such an engagement, the auditor's procedures are designed to provide the auditor with reasonable assurance that the supplementary information is not misstated by an amount that would be material to the information itself. An engagement to examine the supplementary information or an assertion related to the supplementary information also may be performed in accordance with AT section 101, *Attest Engagements*.

.A5 Although an auditor has no obligation to apply auditing procedures to supplementary information presented outside the basic financial statements, the auditor may choose to modify or redirect certain of the procedures to be applied in the audit of the basic financial statements so that the auditor may express an opinion on the supplementary information in relation to the financial statements as a whole.

.A6 Management may include nonaccounting information and accounting information that is not directly related to the basic financial statements in a document containing the basic financial statements. Ordinarily, such information would not have been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, the auditor would be unable to opine on the information in relation to the financial statements as a whole. In some circumstances, however, such information may have been obtained or derived from accounting records that have been tested by the auditor (for example, number of units produced related to royalties under a license agreement or number of employees related to a given payroll period). Accordingly, the auditor may be in a position to express an opinion on such information in relation to the financial statements as a whole.

² *Designated accounting standard setter* is defined in paragraph .04 of section 558.

Definitions (Ref: par. .04)

.A7 Supplementary information includes additional details or explanations of items in or related to the basic financial statements, consolidating information, historical summaries of items extracted from the basic financial statements, statistical data, and other material, some of which may be from sources outside the accounting system or outside the entity.

.A8 Supplementary information may be prepared in accordance with an applicable financial reporting framework, by regulatory or contractual requirements, in accordance with management's criteria, or in accordance with other requirements.

Procedures to Determine Whether Supplementary Information Is Fairly Stated, in All Material Respects, in Relation to the Financial Statements as a Whole (Ref: par. .05–.08)

The Meaning of Readily Available (Ref: par. .05(e), .06(d), and .07(f))

.A9 Audited financial statements are deemed to be readily available if a third party user can obtain the audited financial statements without any further action by the entity. For example, financial statements on an entity's website may be considered readily available, but being available upon request is not considered readily available.

Procedures Performed on Supplementary Information (Ref: par. .07)

.A10 When engaged to report on supplementary information in relation to the financial statements as a whole, the auditor need not apply procedures as extensive as would be necessary to express an opinion on the information on a stand-alone basis.

.A11 With respect to the supplementary information, the auditor is not required to obtain a separate understanding of the entity's internal control or to assess fraud risk.

.A12 The auditor may consider materiality in determining which information to compare and reconcile to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves.

.A13 In evaluating the appropriateness and completeness of the supplementary information as required by paragraph 07(f), the auditor may consider testing accounting or other records through observation or examination of source documents or other procedures ordinarily performed in an audit of the financial statements.

.A14 The auditor may consider whether it is appropriate to address the supplementary information in procedures that the auditor performs in auditing the financial statements, including, but not limited to, the following:

- a. Obtaining an updating representation letter, in accordance with section 333, *Management Representations*
- b. Performing subsequent events procedures, in accordance with section 560

- c. Sending a letter of audit inquiry to the client's lawyer specifically regarding the information contained in the supplementary information, in accordance with section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*

Considerations Specific to Audits of Governmental Entities

.A15 For most state and local governments, the auditor's report on the financial statements includes multiple opinions to address individual reporting units or aggregation of reporting units of the governmental entity. Accordingly, materiality is considered by the auditor for each opinion unit. However, in the context of this section, the auditor's opinion on the supplementary information is in relation to the financial statements as a whole. Accordingly, in this situation, materiality is considered at a level that represents the entire governmental entity.

Reporting (Ref. par. .09–.13)

.A16 The auditor may consider restricting the use of a separate report on supplementary information to the appropriate specified parties, in accordance with section 532, *Restricting the Use of an Auditor's Report*, to avoid potential misinterpretation or misunderstanding of the supplementary information that is not presented with the financial statements.

.A17

Exhibit: Illustrative Reporting Examples

The following is an example of an explanatory paragraph that the auditor may use when engaged to report on supplementary information in relation to the financial statements as a whole and the auditor is issuing an unqualified opinion on the financial statements and the auditor has concluded that the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole:

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

The following is an example of an explanatory paragraph that the auditor may use when engaged to report on supplementary information in relation to the financial statements as a whole and the auditor is issuing a qualified opinion on the financial statements and a qualified opinion on the supplementary information:

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the supplementary information of [*describe reason for qualification of the auditor's opinion on the financial statements and reference the explanatory paragraph*], the information is fairly stated in all material respects in relation to the financial statements as a whole.

The following is an example of an explanatory paragraph that the auditor may use when engaged to report on supplementary information in relation to the financial statements as a whole and the auditor is disclaiming an opinion on the financial statements:

We were engaged for the purpose of forming an opinion on the basic financial statements as a whole. The [*identify accompanying supplementary information*] is presented for the purposes of additional analysis

and is not a required part of the financial statements. Because of the significance of the matter described above [the auditor may describe the basis for the disclaimer of opinion], it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

The following is an example of an explanatory paragraph that the auditor may use when engaged to report on supplementary information in relation to the financial statements as a whole and the auditor is issuing an adverse opinion on the financial statements:

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The [*identify accompanying supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Because of the significance of the matter described above [the auditor may describe the basis for the adverse opinion], it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

The following are reporting examples that the auditor may use when reporting separately on supplementary information in relation to the financial statements as a whole.

The following may be used when the auditor has issued an unqualified opinion on the financial statements and an unqualified opinion on the supplementary information:

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements*] which contained an unqualified opinion on those financial statements. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. The [*identify supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

The following may be used when the auditor has issued a qualified opinion on the financial statements and a qualified opinion on the supplementary information:

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated [*date of the auditor's report on the financial statements, the nature of the opinion expressed on the financial statements, and a description of the report modifications*]. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. The [*identify supplementary information*] is presented for the purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management

and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the accompanying information of the qualified opinion on the financial statements as described above, the information is fairly stated in all material respects in relation to the financial statements as a whole.

The following may be used when the auditor has disclaimed an opinion on the financial statements:

We were engaged to audit the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated *[date of the auditor's report on the financial statements]*. However, the scope of our audit of the financial statements was not sufficient to enable us to express an opinion because *[describe reasons]* and accordingly we did not express an opinion on such financial statements. The *[identify the supplementary information]* is presented for purposes of additional analysis and is not a required part of the basic financial statements. Because of the significance of the matter discussed above, it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

The following may be used when the auditor has issued an adverse opinion on the financial statements:

We have audited the financial statements of XYZ Entity as of and for the year ended June 30, 20X1, and have issued our report thereon dated *[date of the auditor's report on the financial statements]* which stated that the financial statements are not presented fairly in accordance with *[identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America [GAAP])]* because *[describe reasons]*. The *[identify the supplementary information]* is presented for purposes of additional analysis and is not a required part of the basic financial statements. Because of the significance of the matter discussed above, it is inappropriate to and we do not express an opinion on the supplementary information referred to above.

AU Section 551A

Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents

(Supersedes section 610, "Long-Form Reports.")¹

Source: SAS No. 29; SAS No. 52; SAS No. 98.

Effective for auditors' reports dated on or after December 31, 1980, unless otherwise indicated.

.01 This section provides guidance on the form and content of reporting when an auditor submits to his client or to others a document that contains information in addition to the client's basic financial statements and the auditor's report thereon.

.02 The auditor's standard report covers the basic financial statements: balance sheet, statement of income, statement of retained earnings or changes in stockholders' equity, and statement of cash flows. The following presentations are considered part of the basic financial statements: descriptions of accounting policies, notes to financial statements, and schedules and explanatory material that are identified as being part of the basic financial statements. For purposes of this section, basic financial statements also include an individual basic financial statement, such as a balance sheet or statement of income and financial statements prepared in accordance with a comprehensive basis of accounting other than generally accepted accounting principles.

.03 The information covered by this section is presented outside the basic financial statements and is not considered necessary for presentation of financial position, results of operations, or cash flows in conformity with generally accepted accounting principles. Such information includes additional details or explanations of items in or related to the basic financial statements, consolidating information, historical summaries of items extracted from the basic financial statements, statistical data, and other material, some of which may be from sources outside the accounting system or outside the entity.

Reporting Responsibility

.04 When an auditor submits a document containing audited financial statements to his client or to others, he has a responsibility to report on all the information included in the document. On the other hand, when the auditor's report is included in a client-prepared document² and the auditor is not engaged to report on information accompanying the basic financial statements, his responsibility with respect to such information is described in (a) section 550A, *Other Information in Documents Containing Audited Financial*

¹ This section also supersedes the March 1979 auditing interpretation, "Reports on Consolidated Financial Statements That Include Supplementary Consolidating Information".

² Client-prepared documents include financial reports prepared by the client but merely reproduced by the auditor on the client's behalf.

Statements, and (b) other sections covering particular types of information or circumstances, such as section 558A, *Required Supplementary Information*.

.05 An auditor's report on information accompanying the basic financial statements in an auditor-submitted document has the same objective as an auditor's report on the basic financial statements: to describe clearly the character of the auditor's work and the degree of responsibility the auditor is taking. Although the auditor may participate in the preparation of the accompanying information as well as the basic financial statements, both the statements and the accompanying information are representations of management.

.06 The following guidelines apply to an auditor's report on information accompanying the basic financial statements in an auditor-submitted document:

- a. The report should state that the audit has been performed for the purpose of forming an opinion on the basic financial statements taken as a whole.
- b. The report should identify the accompanying information. (Identification may be by descriptive title or page number of the document.)
- c. The report should state that the accompanying information is presented for purposes of additional analysis and is not a required part of the basic financial statements.³
- d. The report should include either an opinion on whether the accompanying information is fairly stated in all material respects in relation to the basic financial statements taken as a whole or a disclaimer of opinion, depending on whether the information has been subjected to the auditing procedures applied in the audit of the basic financial statements. The auditor may express an opinion on a portion of the accompanying information and disclaim an opinion on the remainder.
- e. The report on the accompanying information may be added to the auditor's report on the basic financial statements or may appear separately in the auditor-submitted document.

.07 The purpose of an audit of basic financial statements in accordance with generally accepted auditing standards is to form an opinion on those statements taken as a whole. Nevertheless, an audit of basic financial statements often encompasses information accompanying those statements in an auditor-submitted document. Also, although an auditor has no obligation to apply auditing procedures to information presented outside the basic financial statements, he may choose to modify or redirect certain of the procedures to be applied in the audit of the basic financial statements so that he may express an opinion on the accompanying information in the manner described in paragraph .06.

.08 When reporting in this manner, the measurement of materiality is the same as that used in forming an opinion on the basic financial statements taken as a whole. Accordingly, the auditor need not apply procedures as extensive as would be necessary to express an opinion on the information taken by itself. Guidance applicable to the expression of an opinion on specified elements, accounts, or items of financial statements for the purpose of a separate presentation is provided in section 623.11–.18, *Special Reports*.

³ The auditor may refer to any regulatory agency requirements applicable to the information presented.

.09 If the auditor concludes, on the basis of facts known to him, that any accompanying information is materially misstated in relation to the basic financial statements taken as a whole, he should discuss the matter with the client and propose appropriate revision of the accompanying information.⁴ If the client will not agree to revision of the accompanying information, the auditor should either modify his report on the accompanying information and describe the misstatement or refuse to include the information in the document.

.10 The auditor should consider the effect of any modifications in his standard report when reporting on accompanying information. When the auditor expresses a qualified opinion on the basic financial statements, he should make clear the effects upon any accompanying information as well (see paragraph .14). When the auditor expresses an adverse opinion, or disclaims an opinion, on the basic financial statements, he should not express the opinion described in paragraph .06 on any accompanying information.⁵ An expression of such an opinion in these circumstances would be inappropriate because, like a piecemeal opinion, it may tend to overshadow or contradict the disclaimer of opinion or adverse opinion on the basic financial statements. (See section 508.64 and section 623.14.)

.11 A client may request that nonaccounting information and certain accounting information not directly related to the basic financial statements be included in an auditor-submitted document. Ordinarily, such information would not have been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, the auditor would disclaim an opinion on it. In some circumstances, however, such information may have been obtained or derived from accounting records that have been tested by the auditor (for example, number of units produced related to royalties under a license agreement or number of employees related to a given payroll period). Accordingly, the auditor may be in a position to express an opinion on such information in the manner described in paragraph .06.

Reporting Examples

.12 An example of reporting on information accompanying the basic financial statements in an auditor-submitted document follows:

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.^{6]}

.13 When the auditor disclaims an opinion on all or part of the accompanying information in a document that he submits to his client or to others, such information should either be marked as unaudited or should include a reference to the auditor's disclaimer of opinion. The wording of the disclaimer will vary according to the circumstances. Two examples follow.

⁴ See paragraph .10 for guidance when there is a modification of the auditor's standard report on the basic financial statements.

⁵ The provisions of this paragraph do not change the guidance, concerning companies whose accounting practices are prescribed by governmental regulatory authorities or commissions, in the last sentence of section 544 paragraph .02, *Regulated Companies*, which reads: "An adverse opinion may be accompanied by an opinion on supplementary data which are presented in conformity with generally accepted accounting principles."

^{6]} [Footnote deleted by the issuance of Statement on Auditing Standards No. 98, September 2002.]

Disclaimer on All of the Information

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The (identify the accompanying information) is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and, accordingly, we express no opinion on it.

Disclaimer on Part of the Information

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information on pages XX—YY is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information, except for that portion marked "unaudited," on which we express no opinion, has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

.14 An example follows of reporting on accompanying information to which a qualification in the auditor's report on the basic financial statements applies.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules of investments (page 7), property (page 8), and other assets (page 9) as of December 31, 19XX, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The information in such schedules has been subjected to the auditing procedures applied in the audit of the basic financial statements; and, in our opinion, except for the effects on the schedule of investments of not accounting for the investments in certain companies by the equity method as explained in the second preceding paragraph [second paragraph of our report on page 1], such information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Supplementary Information Required by GAAP

.15 When supplementary information required by GAAP is presented outside the basic financial statements in an auditor-submitted document, the auditor should (a) express an opinion on the information if the auditor has been engaged to examine the information, (b) report on the information using the guidance in paragraphs .12 and .14, provided such information has been subjected to the auditing procedures applied in the audit of the basic financial statements, or (c) disclaim an opinion on the information.⁷ The following is an example of a disclaimer an auditor might use in these circumstances:

The [identify the supplementary information] on page XX is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America.⁸ We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the

⁷ The guidance in subsection (b) of this paragraph applies to GASB required supplementary information, such as that required by GASB Statement No. 5, *Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers*. The auditor should refer to section 552, *Reporting on Condensed Financial Statements and Selected Financial Data*, paragraphs .09–.10, for an example of a report on GASB required supplementary information.

⁸ The auditor may identify the body requiring the information, such as the Financial Accounting Standards Board or the Governmental Accounting Standards Board. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

supplementary information. However, we did not audit the information and express no opinion on it.

[As amended, effective April 1988, by Statement on Auditing Standards No. 52. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

.16 The auditor's report should be expanded in accordance with section 558A, *Required Supplementary Information*, paragraph .08, if (a) supplementary information that GAAP requires to be presented in the circumstances is omitted, (b) the auditor has concluded that the measurement or presentation of the supplementary information departs materially from guidelines prescribed by GAAP, (c) the auditor is unable to complete the procedures prescribed by section 558A, or (d) the auditor is unable to remove substantial doubts about whether the supplementary information conforms to prescribed guidelines. [Paragraph added, effective September 2002, by Statement on Auditing Standards No. 98.]

Consolidating Information

.17 Consolidated financial statements may include consolidating information or consolidating schedules presenting separate financial statements of one or more components of the consolidated group.⁹ In some cases, the auditor is engaged to express an opinion on the financial statements of the components as well as on the consolidated financial statements. In other cases, the auditor is engaged to express an opinion only on the consolidated financial statements but consolidating information or schedules accompany the basic consolidated financial statements. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

.18 When the auditor is engaged to express an opinion only on the consolidated financial statements and consolidating information is also included, the auditor should be satisfied that the consolidating information is suitably identified. For example, when the consolidated financial statements include columns of information about the components of the consolidated group, the balance sheets might be titled, "Consolidated Balance Sheet—December 31, 19X1, with Consolidating Information," and the columns including the consolidating information might be marked, "Consolidating Information." When the consolidating information is presented in separate schedules, the schedules presenting balance sheet information of the components might be titled, for example, "Consolidating Schedule, Balance Sheet Information, December 31, 19X1." [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

.19 When the consolidated financial statements include consolidating information that has not been separately audited, the auditor's report on the consolidating information might read

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations, and cash flows of the individual companies. The consolidating information has

⁹ This section [paragraphs .17–.20] is also applicable to combined and combining financial statements. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002. Footnote revised, September 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 98.]

been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

[Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

.20 When the auditor is engaged to express an opinion on both the consolidated financial statements and the separate financial statements of the components presented in consolidating financial statements, the auditor's reporting responsibilities with respect to the separate financial statements are the same as his responsibilities with respect to the consolidated financial statements. In such cases, the consolidating financial statements and accompanying notes should include all the disclosures that would be necessary for presentation in conformity with generally accepted accounting principles of separate financial statements of each component. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

Additional Commentary Concerning the Audit

.21 The auditor may be requested to describe the procedures applied to specific items in the financial statements. Additional comments of this nature should not contradict or detract from the description of the scope of his audit in the standard report. Also, they should be set forth separately rather than interspersed with the information accompanying the basic financial statements to maintain a clear distinction between management's representations and the auditor's representations. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

Co-Existing Financial Statements

.22 More than one type of document containing the audited financial statements may exist. For example, the auditor may submit to his client or others a document containing the basic financial statements, other information, and his report thereon, and the client may issue a separate document containing only the basic financial statements and the auditor's report. The basic financial statements should include all the information considered necessary for presentation in conformity with generally accepted accounting principles in all co-existing documents. The auditor should be satisfied that information accompanying the basic financial statements in an auditor-submitted document would not support a contention that the basic financial statements in the other document were not presented in conformity with generally accepted accounting principles because of inadequate disclosure of material information known to the auditor. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

Effective Date

.23 This section will be effective for auditors' reports dated on or after December 31, 1980. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

AU Section 552

Reporting on Condensed Financial Statements and Selected Financial Data*

Source: SAS No. 42; SAS No. 71.

Effective for reports issued or reissued on or after January 1, 1989, on condensed financial statements or selected financial data unless otherwise indicated.

.01 This section provides guidance on reporting in a client-prepared document on—

- a. Condensed financial statements (either for an annual or an interim period) that are derived from audited financial statements of a public entity¹ that is required to file, at least annually, complete audited financial statements with a regulatory agency.
- b. Selected financial data that are derived from audited financial statements of either a public or a nonpublic entity and that are presented in a document that includes audited financial statements (or, with respect to a public entity, that incorporates audited financial statements by reference to information filed with a regulatory agency).

Guidance on reporting on condensed financial statements or selected financial data that accompany audited financial statements in a document that contains audited financial statements and the auditor's report thereon is provided in section 550, *Other Information in Documents Containing Audited Financial Statements*. [Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

.02 In reporting on condensed financial statements or selected financial data in circumstances other than those described in paragraph .01, the auditor should follow the guidance in section 508, *Reports on Audited Financial Statements*, paragraphs .41 through .44, section 623, *Special Reports*, or other applicable Statements on Auditing Standards.²

Condensed Financial Statements

.03 Condensed financial statements are presented in considerably less detail than complete financial statements that are intended to present financial position, results of operations, and cash flows in conformity with generally

* This section has been revised to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62.

¹ *Public entity* is defined in section 504, *Association With Financial Statements*, footnote 2.

² An auditor who has audited and reported on complete financial statements of a nonpublic entity may subsequently be requested to compile financial statements for the same period that omit substantially all disclosures required by generally accepted accounting principles. Reporting on comparative financial statements in those circumstances is described in SSARS No. 2, paragraphs 29 and 30 [AR section 200.29 and .30].

accepted accounting principles. For this reason, they should be read in conjunction with the entity's most recent complete financial statements that include all the disclosures required by generally accepted accounting principles.

.04 An auditor may be engaged to report on condensed financial statements that are derived from audited financial statements. Because condensed financial statements do not constitute a fair presentation of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles, an auditor should not report on condensed financial statements in the same manner as he reported on the complete financial statements from which they are derived. To do so might lead users to assume, erroneously, that the condensed financial statements include all the disclosures necessary for complete financial statements. For the same reason, it is desirable that the condensed financial statements be so marked.

.05 In the circumstances described in paragraph .01a,³ the auditor's report on condensed financial statements that are derived from financial statements that he has audited should indicate (a) that the auditor has audited and expressed an opinion on the complete financial statements, (b) the date of the auditor's report on the complete financial statements,⁴ (c) the type of opinion expressed, and (d) whether, in the auditor's opinion, the information set forth in the condensed financial statements is fairly stated in all material respects in relation to the complete financial statements from which it has been derived.⁵

.06 The following is an example of wording that an auditor may use in the circumstances described in paragraph .01a to report on condensed financial statements that are derived from financial statements that he or she has audited and on which he or she has issued a standard report:

Independent Auditor's Report

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements.

³ SEC regulations require certain registrants to include in filings, as a supplementary schedule to the consolidated financial statements, condensed financial information of the parent company. The auditor should report on such condensed financial information in the same manner as he reports on other supplementary schedules.

⁴ Reference to the date of the original report removes any implication that records, transactions, or events after that date have been examined. The auditor does not have a responsibility to investigate or inquire further into events that may have occurred during the period between the date of the report on the complete financial statements and the date of the report on the condensed financial statements. (However, see section 711, *Filings Under Federal Securities Statutes*, regarding the auditor's responsibility when his report is included in a registration statement filed under the Securities Act of 1933.)

⁵ If the auditor's opinion on the complete financial statements was other than unqualified, the report should describe the nature of, and the reasons for, the qualification. The auditor should also consider the effect that any modification of the report on the complete financial statements might have on the report on the condensed financial statements or selected financial data. For example, if the auditor's report on the complete financial statements referred to another auditor or included an explanatory paragraph because of a material uncertainty, a going concern matter, or an inconsistency in the application of accounting principles, the report on the condensed financial statements should state that fact. However, no reference to the inconsistency is necessary if a change in accounting referred to in the auditor's report on the complete financial statements does not affect the comparability of the information being presented.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

.07 A client might make a statement in a client-prepared document that names the auditor and also states that condensed financial statements have been derived from audited financial statements. Such a statement does not, in itself, require the auditor to report on the condensed financial statements, provided that they are included in a document that contains audited financial statements (or that incorporates such statements by reference to information filed with a regulatory agency). However, if such a statement is made in a client-prepared document of a public entity that is required to file, at least annually, complete audited financial statements with a regulatory agency and that document does not include audited financial statements (or does not incorporate such statements by reference to information filed with a regulatory agency),⁶ the auditor should request that the client either (a) not include the auditor's name in the document or (b), include the auditor's report on the condensed financial statements, as described in paragraph .05. If the client will neither delete the reference to the auditor nor allow the appropriate report to be included, the auditor should advise the client that he does not consent to either the use of his name or the reference to him, and he should consider what other actions might be appropriate.⁷

⁶ If such a statement is made in a client-prepared document that does not include audited financial statements and the client is not a public entity that is required to file complete audited financial statements with a regulatory agency (at least annually), the auditor would ordinarily express an adverse opinion on the condensed financial statements because of inadequate disclosure. (See section 508, *Reports on Audited Financial Statements*, paragraphs .41 through .44.) The auditor would not be expected to provide the disclosure in his report. The following is an example of an auditor's report on condensed financial statements in such circumstances when the auditor had previously audited and reported on the complete financial statements:

Independent Auditor's Report

We have audited the consolidated balance sheet of X Company and subsidiaries as of December 31, 20X0, and the related earnings, and cash flows for the year then ended (not presented herein). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The condensed consolidated balance sheet as of December 31, 20X0, and the related condensed statements of income, retained earnings, and cash flows for the year then ended, presented on pages xx-xx, are presented as a summary and therefore do not include all of the disclosures required by accounting principles generally accepted in the United States of America.

In our opinion, because of the significance of the omission of the information referred to in the preceding paragraph, the condensed consolidated financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States of America, the financial position of X Company and subsidiaries as of December 31, 20X0, or the results of its operations or its cash flows for the year then ended.

[Footnote revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

⁷ In considering what other actions, if any, may be appropriate in these circumstances, the auditor may wish to consult his legal counsel.

.08 Condensed financial statements derived from audited financial statements of a public entity may be presented on a comparative basis with interim financial information as of a subsequent date that is accompanied by the auditor's review report. In that case, the auditor should report on the condensed financial statements of each period in a manner appropriate for the type of service provided for each period. The following is an example of a review report on a condensed balance sheet as of March 31, 19X1, and the related condensed statements of income and cash flows for the three-month periods ended March 31, 19X1 and 19X0, together with a report on a condensed balance sheet derived from audited financial statements as of December 31, 19X0, included in Form 10-Q:⁸

We have reviewed the condensed consolidated balance sheet of ABC Company and subsidiaries as of March 31, 19X1, and the related condensed consolidated statements of income and cash flows for the three-month periods ended March 31, 19X1 and 19X0. These financial statements are the responsibility of the company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with generally accepted accounting principles.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of December 31, 20X0, and the related consolidated statements of income, retained earnings, and cash flows for the year then ended (not presented herein); and in our report dated February 15, 20X1, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 20X0, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

[Revised, May 1992, to reflect the conforming changes necessary due to the issuance of Statement on Auditing Standards No. 71. Revised, October 2000,

⁸ Regulation S-X specifies that the following financial information should be provided in filings on Form 10-Q:

- a. An interim balance sheet as of the end of the most recent fiscal quarter and a balance sheet (which may be condensed to the same extent as the interim balance sheet) as of the end of the preceding fiscal year.
- b. Interim condensed statements of income for the most recent fiscal quarter, for the period between the end of the preceding fiscal year and the end of the most recent fiscal quarter, and for the corresponding periods of the preceding fiscal year.
- c. Interim condensed cash flow statements for the period between the end of the preceding fiscal year and the end of the most recent fiscal quarter and for the corresponding period for the preceding fiscal year.

The Securities and Exchange Commission requires a registrant to engage an independent accountant to review the registrant's interim financial information before the registrant files its interim financial information on Form 10-Q or Form 10-QSB. If the auditor has made a review of interim financial information, he may agree to the reference to his name and the inclusion of his review report in a Form 10-Q. (See section 722, *Interim Financial Information*, paragraph .03.) [Footnote revised, November 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 100.]

to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

Selected Financial Data

.09 An auditor may be engaged to report on selected financial data that are included in a client-prepared document that contains audited financial statements (or, with respect to a public entity, that incorporates such statements by reference to information filed with a regulatory agency). Selected financial data are not a required part of the basic financial statements, and the entity's management is responsible for determining the specific selected financial data to be presented.⁹ If the auditor is engaged to report on the selected financial data, his report should be limited to data that are derived from audited financial statements (which may include data that are calculated from amounts presented in the financial statements, such as working capital). If the selected financial data that management presents include both data derived from audited financial statements and other information (such as number of employees or square footage of facilities), the auditor's report should specifically identify the data on which he is reporting. The report should indicate (a) that the auditor has audited and expressed an opinion on the complete financial statements, (b) the type of opinion expressed,¹⁰ and (c) whether, in the auditor's opinion, the information set forth in the selected financial data is fairly stated in all material respects in relation to the complete financial statements from which it has been derived.¹¹ If the selected financial data for any of the years presented are derived from financial statements that were audited by another independent auditor, the report on the selected financial data should state that fact, and the auditor should not express an opinion on that data.

.10 The following is an example of an auditor's report that includes an additional paragraph because he is also engaged to report on selected financial data for a five-year period ended December 31, 19X5, in a client-prepared document that includes audited financial statements:

Independent Auditor's Report

We have audited the consolidated balance sheets of ABC Company and subsidiaries as of December 31, 19X5 and 19X4, and the related consolidated statements of income, retained earnings, and cash flows for each of the three years in the period ended December 31, 19X5. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the

⁹ Under regulations of the SEC, certain reports must include, for each of the last five fiscal years, selected financial data in accordance with regulation S-K, including net sales or operating revenues, income or loss from continuing operations, income or loss from continuing operations per common share, total assets, long-term obligations and redeemable preferred stock and cash dividends declared per common share. Registrants may include additional items that they believe may be useful. There is no SEC requirement for the auditor to report on selected financial data.

¹⁰ See footnote 5.

¹¹ Nothing in this section is intended to preclude an auditor from expressing an opinion on one or more specified elements, accounts, or items of a financial statement, providing the provisions of section 623, *Special Reports*, are observed.

financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provided a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the ABC Company and subsidiaries as of December 31, 20X5 and 20X4, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 20X5, in conformity with accounting principles generally accepted in the United States of America.

We have also previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheets as of December 31, 20X3, 20X2, and 20X1, and the related statements of income, retained earnings, and cash flows for the years ended December 31, 20X2, and 20X1 (none of which are presented herein); and we expressed unqualified opinions on those consolidated financial statements. In our opinion, the information set forth in the selected financial data for each of the five years in the period ended December 31, 20X5, appearing on page xx, is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

.11 In introductory material regarding the selected financial data included in a client-prepared document, an entity might name the independent auditor and state that the data are derived from financial statements that he audited. Such a statement does not, in itself, require the auditor to report on the selected financial data, provided that the selected financial data are presented in a document that contains audited financial statements (or, with respect to a public entity, that incorporates such statements by reference to information filed with a regulatory agency). If such a statement is made in a document that does not include (or incorporate by reference) audited financial statements, the auditor should request that neither his name nor reference to him be associated with the information, or he should disclaim an opinion on the selected financial data and request that the disclaimer be included in the document. If the client does not comply, the auditor should advise the client that he does not consent to either the use of his name or the reference to him, and he should consider what other actions might be appropriate.¹²

Effective Date

.12 This section is effective for reports issued or reissued on or after January 1, 1989. Earlier application of the provision of this section is permissible.

¹² See footnote 7.

AU Section 558

Required Supplementary Information

(Supersedes portions of SAS Nos. 52 and 98.)

Source: SAS No. 120.

Effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility with respect to information that a designated accounting standard setter requires to accompany an entity's basic financial statements (hereinafter referred to as *required supplementary information*). In the absence of any separate requirement in the particular circumstances of the engagement, the auditor's opinion on the basic financial statements does not cover required supplementary information. (Ref: par. .A1)

Effective Date

.02 This section is effective for audits of financial statements for periods beginning on or after December 15, 2010. Early application is permitted.

Objective

.03 The objectives of the auditor when a designated accounting standard setter requires information to accompany an entity's basic financial statements are to perform specified procedures in order to

- a. describe, in the auditor's report, whether required supplementary information is presented and
- b. communicate therein when some or all of the required supplementary information has not been presented in accordance with guidelines established by a designated accounting standard setter or when the auditor has identified material modifications that should be made to the required supplementary information for it to be in accordance with guidelines established by the designated accounting standard setter.

Definitions

.04 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Required supplementary information. Information that a designated accounting standard setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standard setter

considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established.

Designated accounting standard setter. A body designated by the AICPA council to establish GAAP pursuant to Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), and Rule 203, *Accounting Principles* (ET sec. 203 par. .01). The bodies designated by the council to establish professional standards with respect to financial accounting and reporting principles pursuant to Rules 202 and 203 are the Financial Accounting Standards Board, the Governmental Accounting Standards Board, the Federal Accounting Standards Advisory Board, and the International Accounting Standards Board.

Basic financial statements. Financial statements presented in accordance with an applicable financial reporting framework as established by a designated accounting standard setter, excluding required supplementary information.

Applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

Prescribed guidelines. The authoritative guidelines established by the designated accounting standard setter for the methods of measurement and presentation of the required supplementary information.

Requirements

Procedures

.05 The auditor should apply the following procedures to required supplementary information:

- a. Inquire of management about the methods of preparing the information, including (1) whether it has been measured and presented in accordance with prescribed guidelines, (2) whether methods of measurement or presentation have been changed from those used in the prior period and the reasons for any such changes, and (3) whether there were any significant assumptions or interpretations underlying the measurement or presentation of the information
- b. Compare the information for consistency with (1) management's responses to the foregoing inquiries, (2) the basic financial statements, and (3) other knowledge obtained during the audit of the basic financial statements
- c. Obtain written representations from management (1) that it acknowledges its responsibility for the required supplementary information; (2) about whether the required supplementary information is measured and presented in accordance with prescribed guidelines; (3) about whether the methods of measurement or presentation have changed from those used in the prior period and, if so, the reasons for such changes; and (4) about any significant

assumptions or interpretations underlying the measurement or presentation of the required supplementary information¹

.06 If the auditor is unable to complete the procedures in paragraph .05, the auditor should consider whether management contributed to the auditor's inability to complete the procedures. If the auditor concludes that the inability to complete the procedures was due to significant difficulties encountered in dealing with management, the auditor should inform those charged with governance.²

Reporting

.07 The auditor should include an explanatory paragraph in the auditor's report on the financial statements to refer to the required supplementary information. The explanatory paragraph should be included after the opinion paragraph and should include language to explain the following circumstances, as applicable:

- a. The required supplementary information is included, and the auditor has applied the procedures in paragraph .05 of this section.
- b. The required supplementary information is omitted.
- c. Some required supplementary information is missing and some is presented in accordance with the prescribed guidelines.
- d. The auditor has identified material departures from the prescribed guidelines.
- e. The auditor is unable to complete the procedures in paragraph .05 of this section.
- f. The auditor has unresolved doubts about whether the required supplementary information is presented in accordance with prescribed guidelines.

.08 If the entity has presented all or some of the required supplementary information, the explanatory paragraph referred to in paragraph .07 should include the following elements:

- a. A statement that *[identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)]* require that the *[identify the required supplementary information]* be presented to supplement the basic financial statements
- b. A statement that such information, although not a part of the basic financial statements, is required by *[identify designated accounting standard setter]*, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context
- c. If the auditor is able to complete the procedures in paragraph .05 of this section,
 - i. a statement that the auditor has applied certain limited procedures to the required supplementary information in

¹ See section 333, *Management Representations*, for additional requirements and guidance with respect to obtaining written representations from management as part of an audit of financial statements performed in accordance with generally accepted auditing standards.

² See paragraph .39 of section 380, *The Auditor's Communication With Those Charged With Governance*, for additional guidance when the auditor encounters significant difficulties in dealing with management during the audit.

The Fourth Standard of Reporting

accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to the auditor's inquiries, the basic financial statements, and other knowledge the auditor obtained during the audit of the basic financial statements

- ii. a statement that the auditor does not express an opinion or provide any assurance on the information because the limited procedures do not provide the auditor with sufficient evidence to express an opinion or provide any assurance
- d. If the auditor is unable to complete the procedures in paragraph .05 of this section,
 - i. a statement that the auditor was unable to apply certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States because *[state the reasons]*
 - ii. a statement that the auditor does not express an opinion or provide any assurance on the information
- e. If some of the required supplementary information is omitted,
 - i. a statement that management has omitted *[description of the missing required supplementary information]* that *[identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)]* require to be presented to supplement the basic financial statements
 - ii. a statement that such missing information, although not a part of the basic financial statements, is required by *[identify designated accounting standard setter]*, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context
 - iii. a statement that the auditor's opinion on the basic financial statements is not affected by the missing information
- f. If the measurement or presentation of the required supplementary information departs materially from the prescribed guidelines, a statement that although the auditor's opinion on the basic financial statements is not affected, material departures from prescribed guidelines exist *[describe the material departures from the applicable financial reporting framework]*
- g. If the auditor has unresolved doubts about whether the required supplementary information is measured or presented in accordance with prescribed guidelines, a statement that although the auditor's opinion on the basic financial statements is not affected, the results of the limited procedures have raised doubts about whether material modifications should be made to the required supplementary information for it to be presented in accordance with guidelines established by *[identify designated accounting standard setter]*

(Ref: par. .A2)

.09 If all of the required supplementary information is omitted, the explanatory paragraph should include the following elements:

- a. A statement that management has omitted [*description of the missing required supplementary information*] that [*identify the applicable financial reporting framework (for example, accounting principles generally accepted in the United States of America)*] require to be presented to supplement the basic financial statements
- b. A statement that such missing information, although not a part of the basic financial statements, is required by [*identify designated accounting standard setter*], who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context
- c. A statement that the auditor's opinion on the basic financial statements is not affected by the missing information

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibility for financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon but that is not required by a designated accounting standard setter is addressed in section 550, *Other Information in Documents Containing Audited Financial Statements*.

Reporting (Ref: par. .07–.09)

.A2 Because the required supplementary information accompanies the basic financial statements, the auditor's report on the financial statements includes a discussion of the responsibility taken by the auditor on that information. However, because the required supplementary information is not part of the basic financial statements, the auditor's opinion on the fairness of presentation of such financial statements in accordance with the applicable financial reporting framework is not affected by the presentation by the entity of the required supplementary information or the failure to present some or all of such required supplementary information. Furthermore, if the required supplementary information is omitted by the entity, the auditor does not have a responsibility to present that information.

.A3

Exhibit: Examples of Explanatory Paragraphs When Reporting on Required Supplementary Information

The Required Supplementary Information Is Included, the Auditor Has Applied the Specified Procedures, and No Material Departures From Prescribed Guidelines Have Been Identified
