WHAT'S NEW IN THIS EDITION

STANDARDS RECENTLY ISSUED

<u>Statement</u>	<u>Title</u>	<u>Issue Date</u>	<u>Section</u>
SAS No. 128	<i>Using the Work of Internal Auditors</i>	Feb. 2014	AU-C sec. 610
SSPFPS No. 1	<i>Statement on Standards in Personal Financial Planning Services</i>	Jan. 2014	PFP sec. 100

NEW SECTIONS

Code of Professional Conduct—Revised

(Effective 12/15/14 Unless Early Implemented)

The section *Code of Professional Conduct—Revised (Effective 12/15/14 Unless Early Implemented)* has been added.

The AICPA's Professional Ethics Executive Committee (PEEC) restructured and codified the AICPA Code of Professional Conduct (code) so that members and other users of the code can apply the rules and reach appropriate conclusions more easily and intuitively.

Although PEEC believes it was able to maintain the substance of the existing AICPA ethics standards through this process and limited substantive changes to certain specific areas that were in need of revision, the numeric citations and titles of interpretations have all changed. In addition, the ethics rulings are no longer in a question and answer format but rather, have been drafted as interpretations, incorporated into interpretations as examples, or deleted where deemed appropriate.

To assist users in locating in the revised code content from the prior code, PEEC created a mapping document. The mapping document can be found in ET appendix D of the revised code.

The revised code is effective December 15, 2014.

DELETED SECTIONS

U.S. Auditing Standards—AICPA [AU]

This section has been deleted due to the effective dates of Statements on Auditing Standards (SAS) Nos. 122–127. SAS Nos. 122–127 became effective December 15, 2012. Refer to individual AU-C sections for specific effective date language.

ADDITIONAL CHANGES

In addition to these recently issued standards, other changes in this edition of AICPA *Professional Standards* include the following:

<u>Section</u>	<u>Change</u>
Applicability	Revisions to Part I due to the issuance of recent authoritative literature.
AU-C Foreword	Revisions due to the issuance of recent authoritative literature.

<u>Section</u>	<u>Change</u>
AU-C Glossary	Revisions due to the issuance of SAS No. 127, <i>Omnibus Statement on Auditing Standards—2013</i> .
AU-C 200	Revisions due to the issuance of SAS No. 127; revisions due to the revision of Ethics Interpretation No. 101-3, "Nonattest Services."
AU-C 210	Revisions due to the revision of Ethics Interpretation No. 101-3.
AU-C 9500.23–.36	Addition of Interpretation Nos. 2, "Auditor of Participating Employer in a Governmental Cost-Sharing Multiple-Employer Pension Plan," and 3, "Auditor of Participating Employer in a Governmental Agent Multiple-Employer Pension Plan."
AU-C 9600.01–.02	Addition of Interpretation No. 1, "Auditor of Participating Employer in a Governmental Pension Plan."
AU-C 610A	Added to retain guidance from SAS No. 65, <i>The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements</i> , until the effective date of SAS No. 128.
AU-C 9700.01–.05	Revisions to Interpretation No. 1, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting."
AU-C 9805.01–.12	Addition of Interpretation Nos. 1, "Auditor of Governmental Cost-Sharing Multiple-Employer Pension Plan," and 2, "Auditor of Governmental Agent Multiple-Employer Pension Plan."
AU-C 905	Deletion of Appendix B due to the effective date of SAS No. 125, <i>Alert That Restricts the Use of the Auditor's Written Communication</i> .
AU-C Appendix B	Revisions due to the issuance of SAS Nos. 127–128.
AU-C Exhibits A–B	Deletion due to the deletion of <i>U.S. Auditing Standards—AICPA [AU]</i> , which was removed as a result of the effective dates of SAS Nos. 122–127.
AT 501	Revisions due to the issuance of SAS Nos. 122–126.
AR 60	Revisions due to the revision of Ethics Interpretation No. 101-3.
AR Appendix B	Deleted due to the passage of time.
ET 91.02	Revisions by the Professional Ethics Executive Committee (PEEC).
ET 92.33	Addition of the definition of <i>those charged with governance</i> .
ET 101.05	Revisions by the PEEC.

<u>Section</u>	<u>Change</u>
ET 102.03	Revisions by the PEEC.
ET 102.08	Addition of Interpretation No. 102-7, "Conflicts of Interest for Members in Business."
ET 191.140–.141	Revision by the PEEC.
PFP 100	Replacement of <i>Statement on Responsibilities in Personal Financial Planning Practice</i> by Statement on Standards in Personal Financial Planning Services No. 1.

HOW PROFESSIONAL STANDARDS IS ORGANIZED

Scope of Professional Standards

Professional Standards brings together for continuing reference the currently effective auditing and attestation pronouncements on professional standards issued by the AICPA and contains a section detailing the applicability and integration of AICPA *Professional Standards* and Public Company Accounting Oversight Board (PCAOB) Standards.

Special Note About Financial Accounting Standards Board Accounting Standards Codification[®]

The Financial Accounting Standards Board (FASB) released the FASB *Accounting Standards Codification* (ASC) on July 1, 2009. On its effective date, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission (SEC). FASB ASC significantly changes the way financial statement preparers, auditors, and academics perform accounting research.

FASB ASC flattens the U.S. generally accepted accounting principles (GAAP) hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. The codification creates FASB ASC 105, *Generally Accepted Accounting Principles*.

Amendments to FASB ASC are now issued by FASB through Accounting Standards Updates (ASUs) and serve only to update FASB ASC. FASB does not consider the ASUs authoritative in their own right; such amendments become authoritative when they are incorporated into FASB ASC. The ASUs issued include the amendments to the codification and an appendix of FASB ASC update instructions. ASUs also provide background information about the amendments, and explain the basis for FASB's decisions. This method of updating the accounting guidance means that there will no longer be, for example, accounting standards in the form of statements, staff positions, Emerging Issues Task Force (EITF) abstracts, or AICPA Accounting Statements of Position. ASUs are issued in the form of ASU No. 20YY-XX, in which "YY" is the last two digits of the year and "XX" is the sequential number for each update. For example, ASU No. 2011-01 is the first update in the year 2011. FASB organizes the contents of each ASU using the same section headings as those used in FASB ASC.

FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative GAAP by providing the authoritative literature in a topically organized structure. FASB ASC disassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the EITF, and the AICPA) and reassembled them under approximately 90 topics and included all accounting standards issued by a standard setter within levels A–D of the current GAAP hierarchy. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance. Moreover, FASB ASC does not include governmental

accounting standards. FASB ASC is not intended to change GAAP or any requirements of the SEC.

FASB ASC uses a topical structure in which guidance is organized into *areas*, *topics*, *subtopics*, *sections*, and *subsections*. These terms are defined as follows:

Areas. The broadest category in FASB ASC and represent a grouping of topics.

Topics. The broadest categorization of related content and correlate with the International Accounting Standards (IASs) and International Financial Reporting Standards (IFRSs).

Subtopics. Represent subsets of a topic and are generally distinguished by type or scope.

Sections. Indicate the nature of the content such as recognition, measurement, or disclosure. The sections' structure correlates with the IASs and IFRSs.

Subsections. Allow further segregation and navigation of content.

Topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard setter or standard from which the content was derived. An example of the numerical referencing is FASB ASC 305-10-05, in which 305 is the *Cash and Cash Equivalents* topic, 10 represents the "Overall" subtopic, and 05 represents the "Overview and Background" section.

FASB ASC represents a major shift in the organization and presentation of GAAP. Users are encouraged to read the notice to constituents, which explains the scope, structure, and usage of consistent terminology in FASB ASC. This document is available on the FASB website at <http://asc.fasb.org>. In addition to the notice, this link contains information on the options available for users to access the codification. FASB ASC is offered by FASB at no charge in a Basic View and for an annual fee in a Professional View. FASB ASC and the notice to constituents are also offered by certain third party licensees, including the AICPA.

To read more about FASB ASC, including recent developments and updates, see the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/FRC/AccountingFinancialReporting/Pages/FASBAccountingStandardsCodification.aspx.

Description of Content**Applicability of AICPA Professional Standards and PCAOB Standards**

There is one part relating to the PCAOB Standards as follows:

Part I is a full-length narrative that provides guidance about standards applicable to nonissuers and standards applicable to issuers. Information about the PCAOB's Interim Standards is included, as well as information about major differences between generally accepted auditing standards and PCAOB Standards.

U.S. Auditing—AICPA

A cross-reference chart is provided for this division and is identified as AU Cross-References to SASs. There are two parts to this cross-references section:

Part I is a list of Statements on Auditing Standards (SASs) issued through SAS No. 121, *Revised Applicability of Statement on Auditing Standards No. 100*, Interim Financial Information, and a list of sources of sections in the current text.

Part II is a list of sections in SAS No. 1, *Codification of Auditing Standards and Procedures*, and a list of Statement on Auditing Procedure Nos. 1–54.

The standards are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered.

Auditing interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to section 311 are numbered 9311, which directly follows section 311.

There are four appendixes relating to auditing standards as follows:

Appendix A provides the historical background for the SASs.

Appendix B is reserved.

Appendix C is reserved.

Appendix D provides a list of AICPA Audit and Accounting Guides and Statements of Position.

Appendix E provides a schedule of changes in extant SASs since the issuance of SAS No. 1.

Appendix F provides a list of other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff.

The AU topical index uses the keyword method to facilitate reference to the pronouncements. The index is arranged alphabetically by topic and refers the reader to major divisions, sections, and paragraph numbers.

U.S. Auditing Standards—AICPA (Clarified) [AU-C]

A cross-reference chart is provided for this division and is identified as AU-C Cross-References to SASs.

The major divisions are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered. For example, AU-C section 210.04 refers to the fourth paragraph of AU-C section 210, *Terms of Engagement*.

Auditing interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to AU-C section 230 are numbered 9230, which directly follows AU-C section 230.

There are two exhibits relating to auditing standards as follows:

Exhibit A provides a list of AU-C sections designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, cross referenced to a list of AU sections.

Exhibit B provides a list of retained interpretations.

There are five appendixes relating to auditing standards as follows:

Appendix A provides the historical background for the present SASs.

Appendix B highlights substantive differences between the International Standards on Auditing and Generally Accepted Auditing Standards.

Appendix C is reserved.

Appendix D provides a list of AICPA Audit and Accounting Guides and Statements of Position.

Appendix E provides a schedule of changes that lists changes that are the result of SASs issued after SAS No. 122, which was issued in October 2011.

Appendix F provides a list of other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff.

A topical index is provided for this division and is identified as AU-C Topical Index.

Attestation Engagements

The AT Cross-References to SSAEs is a list of all issued Statements on Standards for Attestation Engagements (SSAEs) and a list of sources of sections in the current text.

The standards are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered.

Attestation interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to section 101 are numbered 9101, which directly follows section 101.

The AT topical index uses the key word method to facilitate reference to the statements and interpretations. The index is arranged alphabetically by topic with references to section and paragraph numbers.

Accounting and Review Services

The AR Cross-References to SSARSs is a list of all issued Statements on Standards for Accounting and Review Services (SSARSs) and a list of sources of sections in the current text.

The standards are divided into sections, each with its own section number. Each paragraph within a section is decimally numbered.

Accounting and review services interpretations are numbered in the 9000 series with the last three digits indicating the section to which the interpretation relates. Interpretations immediately follow their corresponding section. For example, interpretations related to section 200 are numbered 9200, which directly follows section 200.

There are two exhibits related to accounting and review services standards as follows:

Exhibit A illustrates how an accountant might document expectations in a review engagement.

Exhibit B helps practitioners better understand the accounting concepts of going concern in performing a compilation or review engagement.

Exhibit C is reserved.

There are two appendixes related to accounting and review services standards as follows:

Appendix A is reserved.

Appendix B outlines the disposition of interpretations to section 100 as a result of conforming changes necessary due to the effective date of SSARS No. 19, *Compilation and Review Engagements*.

Appendix C provides a schedule of changes in SSARSs beginning with the issuance of SSARSs No. 1, *Compilation and Review of Financial Statements*.

The AR topical index uses the keyword method to facilitate reference to the pronouncements. The index is arranged alphabetically by topic and refers to major divisions, sections, and paragraph numbers.

Code of Professional Conduct

The Rules of Conduct, Interpretations of Rules of Conduct, and Ethics Rulings related to the same subjects have been assembled within the major divisions of the Code of Professional Conduct part of *Professional Standards*. For example, Rule 101, *Independence* (ET sec.101), is followed by the first Ethics Interpretation under Rule 101, Interpretation No. 101-1, "Interpretation of Rule 101." Ethics rulings for this section appear in ET section 191.

A topical index is provided for this division and is identified as ET Topical Index.

Bylaws

The Bylaws of the AICPA and the related Implementing Resolutions of Council are assembled within the major divisions by section numbers. For example, BL section 230, *Requirements for Retention of Membership*, is followed by BL section 230R, *Implementing Resolutions Under Section 2.3 Requirements for Retention of Membership*.

In BL section 900, *General*, the following sections are included:

AICPA Mission Statement

A Description of the Professional Practice of Certified Public Accountants

A topical index is provided for this division and is identified as BL Topical Index.

Valuation Services

Statements on Standards for Valuation Services and Valuation Services Interpretations appear with the prefix VS in their section numbers.

Consulting Services

Statement on Standards for Consulting Services appears with the prefix CS in its section number.

A topical index is provided for this division and is identified as CS Topical Index.

Quality Control

Statements on Quality Control Standards appear with the prefix QC in their section numbers.

Peer Review

Standards for Performing and Reporting on Peer Reviews and Peer Review Interpretations appear with the prefix PR in their section numbers.

Tax Services

Statements on Standards for Tax Services and Tax Services Interpretations appear with the prefix TS in their section numbers.

A topical index is provided for this division and is identified as TS Topical Index.

Personal Financial Planning

Statements on Responsibilities in Personal Financial Planning Practice appear with the prefix PFP in their section numbers.

A topical index is provided for this division and is identified as PFP Topical Index.

Continuing Professional Education

Policies for the CPE Membership Requirement and Statement on Standards for Continuing Professional Education (CPE) Programs appear with the prefix CPE in their section numbers.

A topical index is provided for this division and is identified as CPE Topical Index.

Topical Index

The topical indexes use the keyword method to facilitate reference to the pronouncements. The indexes are arranged alphabetically by topic and refer the reader to major divisions, sections, and paragraph numbers.

Part I

Applicability of AICPA Professional Standards and Public Company Accounting Oversight Board Standards

Background

As a result of the passage of the Sarbanes-Oxley Act of 2002 (the act), auditing and related professional practice standards to be used in the performance of and reporting on audits of the financial statements of public companies are now established by the PCAOB. Note that the term *public companies* is a general reference to the entities subject to the securities laws. The act more specifically defines these entities as *issuers*, the definition of which is provided in the section that follows.

Among other significant provisions, the act requires a public accounting firm that prepares or issues, or participates in the preparation or issuance of, any audit report with respect to any issuer to register with the PCAOB. Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of issuers. Moreover, the act authorizes the PCAOB to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for issuers.

Who Is an Issuer?

As provided in Section 2 of the act, the term *issuer* means an issuer (as defined in Section 3 of the Securities Exchange Act of 1934 [15 U.S.C. 78c]), the securities of which are registered under Section 12 of that act (15 U.S.C. 78l) or that is required to file reports pursuant to Section 15(d) [15 U.S.C. 78o(d)], or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn.

Accordingly, nonissuers are those entities not subject to the act or the rules of the SEC. For audits of nonissuers, the preparation and issuance of audit reports must be conducted in accordance with the AICPA Code of Professional Conduct (AICPA Code) and the standards promulgated by the AICPA Auditing Standards Board (ASB). Audits of nonissuers remain governed by generally accepted auditing standards (GAAS) and the Statements on Quality Control Standards (SQCS) as issued by the ASB.

Standards Applicable to the Audits of Nonissuers

With the formation of the PCAOB, the ASB was reconstituted and its jurisdiction amended to recognize the ASB as the body authorized to promulgate auditing, attestation and quality control standards relating to the preparation and issuance of audit reports for nonissuers.

Failure to follow ASB standards in the audit of a nonissuer would be considered a violation of Rule 201, *General Standards*, and Rule 202, *Compliance With*

Standards (ET sec. 201 par. .01 and ET sec. 202 par. .01), of the AICPA Code, or both.

As a caution to readers, pursuant to AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, interpretative publications are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. Interpretative publications, which include auditing interpretations, auditing guidance in AICPA Audit and Accounting Guides, and auditing guidance found in Statements of Position (SOPs), are issued under the authority of the ASB. Although interpretive publications are not auditing standards, AU-C section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit because interpretive publications are relevant to the proper application of GAAS in specific circumstances. If the auditor does not apply the auditing guidance included in an applicable interpretative publication, the auditor should document how the requirements of GAAS were complied with in the circumstances addressed by such auditing guidance.

The ASB continues to issue Statements on Auditing Standards (SASs) and interpretative publications that relate to audits of nonissuers and auditors should be alert to those issuances.

Standards Applicable to the Audits of Issuers

Rule 3100, *Compliance With Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board), issued by the PCAOB (see PCAOB Release No. 2003-009, dated June 30, 2003) generally requires all registered public accounting firms to adhere to the PCAOB's standards in connection with the preparation or issuance of any audit report on the financial statements of an issuer. Rule 3100 requires registered public accounting firms and their associated persons to comply with all applicable standards. Accordingly, if the PCAOB's standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board), issued by the PCAOB (see PCAOB Release No. 2004-007, dated June 9, 2004) defines the degree of responsibility imposed on the auditor by the use of certain terms in the PCAOB's auditing and related professional practice standards, including the interim standards adopted in Rule 3200T, *Interim Auditing Standards*; Rule 3300T, *Interim Attestation Standards*; Rule 3400T, *Interim Quality Control Standards*; and Rule 3500T, *Interim Ethics and Independence Standards*. Effectively, Rule 3101 creates three categories of professional responsibilities:

1. *Unconditional responsibility.* The words *must*, *shall*, and *is required* indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.
2. *Presumptively mandatory responsibility.* The word *should* indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the PCAOB's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were

sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

3. *Responsibility to consider.* The words *may*, *might*, *could*, and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

Compliance With Standards Applicable to the Audits of Issuers

Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards in connection with an audit of the financial statements of an issuer may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of the act. In addition, the act provides that any violation of the PCAOB's rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the PCAOB's rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations."

Rule 201 and Rule 202 require a member who performs auditing and other professional services to comply with standards promulgated by bodies designated by the AICPA Council. The AICPA Council has designated the PCAOB as the body authorized to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers.

The AICPA's Professional Ethics Division is able to hold an AICPA member who performs audits of the financial statements of issuers accountable under Rules 201 and 202 of the AICPA Code for complying with PCAOB's auditing and related professional practice standards when performing such audits.

PCAOB's Adoption of Interim Standards

The PCAOB is subject to SEC oversight. As such, rules and standards issued by the PCAOB must be approved by the SEC before they become effective.

Pursuant to PCAOB Release No. 2003-006, dated April 18, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary rules that refer to professional standards of auditing, attestation, quality control, ethics, and independence in existence on that date (known collectively as the Interim Professional Auditing Standards). The SEC granted approval to these rules (see SEC Release No. 33-8222, dated April 25, 2003).

Essentially, the interim standards that the PCAOB adopted were the auditing standards, attestation standards, quality control standards issued by the ASB, certain former AICPA SEC Practice Section (SECPS) membership requirements, certain AICPA ethics and independence rules, and Independence Standards Board (ISB) rules as they existed on April 16, 2003. These interim standards will remain in effect while the PCAOB conducts a review of standards applicable to registered public accounting firms. Based on this review,

the PCAOB may modify, repeal, replace, or adopt, in part or in whole, the interim standards. As reiterated in a succeeding paragraph, the PCAOB's interim independence standards are not to be interpreted to supersede the SEC's independence requirements. The PCAOB has also made certain conforming amendments to the interim standards to reflect the adoption of PCAOB standards.

If a provision of a PCAOB standard addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standard should be considered superseded or effectively amended.

The rules that comprise the PCAOB's interim standards consist of Rules 3200T, 3300T, 3400T, and 3500T, and are described in the paragraphs that follow.

Rule 3200T, *Interim Auditing Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with GAAS as described in AU section 150, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

Rule 3300T, *Interim Attestation Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3300T governs the conduct of engagements that (1) are described in the ASB's Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attest Engagements* (AT sec. 101), and (2) relate to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's SSAEs, and related interpretations and AICPA SOPs, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

Rule 3400T, *Interim Quality Control Standards*, as Amended by PCAOB Release No. 2003-026

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Pursuant to Rule 3400T, the PCAOB has provisionally designated the SQCSs (QC sections 20–40) proposed and issued by the ASB and certain former AICPA SECPS¹ membership requirements, as they existed, and as they applied to SECPS members, on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Quality Control Standards.

Because the PCAOB intends the Interim Quality Control Standards (QC sections 20–40) to preserve existing standards as they applied on April 16, 2003

¹ The Center for Audit Quality (CAQ) restructured and expanded the AICPA's Center for Public Company Audit Firms, which was the successor to the Securities and Exchange Commission Practice Section (SECPS). The CAQ, which began operating in January 2007, is an autonomous, nonpartisan, public policy organization affiliated with the AICPA and dedicated to enhancing investor confidence and public trust in the global capital markets by fostering high quality performance by auditors of public entities.

consistent with Section 103(a)(3) of the act, those Interim Quality Control Standards (QC sec. 20–40) adapted from the former AICPA SECPS requirements apply only to those firms that were members of the AICPA's SECPS on April 16, 2003.

Rule 3500T, *Interim Ethics and Independence Standards*, as Amended by PCAOB Release No. 2003-026 and Release No. 2013-010

Rule 3500T sets forth ethical and independence standards for registered public accounting firms and their personnel. Pursuant to Rule 3500T, the PCAOB has provisionally designated Rule 102, *Integrity and Objectivity*, and its interpretations (ET sec. 102 and .191) of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Ethics Standards. The PCAOB has also provisionally designated Rule 101, *Independence*, and its interpretations (ET sec. 101 and ET sec. 191) of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, along with Standard Nos. 2 and 3 and Interpretation No. 99-1 of the ISB, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Independence Standards (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). In addition, the PCAOB requires compliance with the SEC's independence rules. The PCAOB's Interim Independence Standards are not to be interpreted to supersede the SEC's independence requirements. Therefore, to the extent that a provision of the SEC's rule or policy is more restrictive—or less restrictive—than the PCAOB's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive requirement.

References to GAAS

Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), changed the requirement in the PCAOB's interim standards that the auditors include in their reports a reference to auditing standards promulgated by the ASB, examples of which include GAAS, U.S. GAAS, auditing standards generally accepted in the United States of America, and standards established by the AICPA. Instead, it requires that auditor's reports on the financial statements of issuers that are issued or reissued after the effective date of Auditing Standard No. 1 include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

Conforming amendments resulting from Auditing Standard No. 1 have not yet been reflected in the PCAOB's interim standards. Such conforming changes will be made after the PCAOB issues, and the SEC approves, such conforming amendments.

Standards Applicable If a Nonissuer's Financial Statements Are Audited in Accordance With Both GAAS and PCAOB Auditing Standards

AU-C section 700, *Forming an Opinion and Reporting on Financial Statements*, addresses the auditor's report for audits conducted in accordance with both

GAAS and another set of auditing standards. Paragraph .42 of AU-C section 700 explains that the auditor may indicate that the audit was conducted in accordance with GAAS and also conducted in accordance with another set of auditing standards (for example, the standards of the PCAOB). Paragraph .42 also states that the auditor should not refer to having conducted an audit in accordance with another set of auditing standards in addition to GAAS, unless the audit was conducted in accordance with both sets of standards in their entirety. Paragraph .43 of AU-C section 700 goes on to state that when the auditor's report refers to both GAAS and another set of auditing standards, the auditor's report should identify the other set of auditing standards, as well as their origin.

Standards Applicable to an Integrated Audit of a Nonissuer's Financial Statements

In October 2008, the ASB issued SSAE No. 15, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AT sec. 501), which establishes standards and provides guidance to practitioners performing an examination of a nonissuer's internal control over financial reporting in the context of an integrated audit (an audit of an entity's financial statements and an examination of its internal control). SSAE No. 15 supersedes extant AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*, and converges the standards practitioners use for reporting on a nonissuer's internal control with PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards).

AICPA Standards and the Audits of Issuers

If a registered public accounting firm performs an audit of *an issuer* in accordance with PCAOB standards, the auditor does not need to follow standards promulgated by the ASB. However, AICPA members are required to comply with the AICPA Code in addition to the ethics and independence rules and standards required by the SEC and PCAOB.

(continued)

⁴ To address practice issues, SAS No. 118, *Other Information in Documents Containing Audited Financial Statements*, was issued in February 2010 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for audits of financial statements for periods beginning on or after December 15, 2010. SAS No. 118 was previously codified as AU section 550 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 550 as AU-C section 720 but did not supersede SAS No. 118. AU-C section 720 contains conforming changes necessary due to the issuance of SAS No. 122.

⁵ To address practice issues, SAS No. 119, *Supplementary Information in Relation to the Financial Statements as a Whole*, was issued in February 2010 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for audits of financial statements for periods beginning on or after December 15, 2010. SAS No. 119 was previously codified as AU section 551 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 551 as AU-C section 725 but did not supersede SAS No. 119. AU-C section 725 contains conforming changes necessary due to the issuance of SAS No. 122.

935	<i>Compliance Audits</i>	SAS No. 117 ⁷

⁶ To address practice issues, SAS No. 120, *Required Supplementary Information*, was issued in February 2010 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for audits of financial statements for periods beginning on or after December 15, 2010. SAS No. 120 was previously codified as AU section 558 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 558 as AU-C section 730 but did not supersede SAS No. 120. AU-C section 730 contains conforming changes necessary due to the issuance of SAS No. 122.

⁷ To address practice issues, SAS No. 117, *Compliance Audits*, was issued in December 2009 as a SAS resulting from the Clarification and Convergence Project of the ASB, and became effective for compliance audits for fiscal periods ending on or after June 15, 2010. SAS No. 117 was previously codified as AU section 801 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122 redesignated AU section 801 as AU-C section 935 but did not supersede SAS No. 117. AU-C section 935 contains conforming changes necessary due to the issuance of SAS No. 122.

AU-C Introduction

Foreword

Clarified Statements on Auditing Standards

To address concerns over the clarity, length, and complexity of its standards, the Auditing Standards Board (ASB) established clarity drafting conventions and redrafted all its Statements on Auditing Standards (SASs) in accordance with those conventions, which include the following:

- Establishing objectives for each clarified SAS
- Including a definitions section, where relevant, in each clarified SAS
- Separating requirements from application and other explanatory material
- Numbering application and other explanatory material paragraphs using an A- prefix and presenting them in a separate section that follows the requirements section
- Using formatting techniques, such as bulleted lists, to enhance readability
- Including, when appropriate, special considerations relevant to audits of smaller, less complex entities within the text of the clarified SAS
- Including, when appropriate, special considerations relevant to audits of governmental entities within the text of the clarified SAS

This section contains "AU-C" section numbers instead of "AU" section numbers. As part of the clarification of the SASs, the AU section numbers as designated by SAS Nos. 1–121 were recodified and "AU-C" was selected as an identifier in order to avoid confusion with references to superseded "AU" sections. Superseded "AU" sections were deleted from *AICPA Professional Standards* in December 2013, by which time substantially all engagements for which the "AU" sections were still effective were expected to be completed. The superseded "AU" sections have been archived and can be accessed through the AICPA Online Professional Library.

Authority of the SASs

SASs are issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matters applicable to the preparation and issuance of audit reports for entities that are nonissuers. Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit (the auditor) of the financial statements of a nonissuer to comply with standards promulgated by the ASB. An auditor must comply with an unconditional requirement in all cases in which such requirement is relevant. An auditor also must comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant. However, if, in rare circumstances, an auditor judges it necessary to depart from a relevant presumptively mandatory requirement,

the auditor must document the justification for the departure and how the alternative audit procedures performed in the circumstances were sufficient to achieve the intent of that requirement.

Exhibits and interpretations to SASs are *interpretive publications*, as defined in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. Auditing interpretations of the generally accepted auditing standards are included in AU-C sections. AICPA Audit and Accounting Guides and Auditing Statements of Position are listed in AU-C appendix D, "AICPA Audit and Accounting Guides and Statements of Position."

AU-C Preface

Principles Underlying an Audit Conducted in Accordance With Generally Accepted Auditing Standards

This preface contains the principles underlying an audit conducted in accordance with generally accepted auditing standards (the principles). These principles are not requirements and do not carry any authority.

The Auditing Standards Board has developed the principles to provide a framework that is helpful in understanding and explaining an audit. The principles are organized to provide a structure for the codification of Statements on Auditing Standards. This structure addresses the purpose of an audit (purpose), personal responsibilities of the auditor (responsibilities), auditor actions in performing the audit (performance), and reporting (reporting).

Purpose of an Audit and Premise Upon Which an Audit Is Conducted

.01 The purpose of an audit is to provide financial statement users with an opinion by the auditor on whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. An auditor's opinion enhances the degree of confidence that intended users can place in the financial statements.

.02 An audit in accordance with generally accepted auditing standards is conducted on the premise that management and, when appropriate, those charged with governance, have responsibility

- a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- c. to provide the auditor with
 - i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation, and other matters;
 - ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and

- iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

Responsibilities

.03 Auditors are responsible for having appropriate competence and capabilities to perform the audit; complying with relevant ethical requirements; and maintaining professional skepticism and exercising professional judgment throughout the planning and performance of the audit.

Performance

.04 To express an opinion, the auditor obtains reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error.

.05 To obtain reasonable assurance, which is a high, but not absolute, level of assurance, the auditor

- plans the work and properly supervises any assistants.
- determines and applies appropriate materiality level or levels throughout the audit.
- identifies and assesses risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal control.
- obtains sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.

.06 The auditor is unable to obtain absolute assurance that the financial statements as a whole are free from material misstatement because of inherent limitations, which arise from

- the nature of financial reporting;
- the nature of audit procedures; and
- the need for the audit to be conducted within a reasonable period of time and so as to achieve a balance between benefit and cost.

Reporting

.07 Based on an evaluation of the audit evidence obtained, the auditor expresses, in the form of a written report, an opinion in accordance with the auditor's findings, or states that an opinion cannot be expressed. The opinion states whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework.

AU-C Glossary

Glossary of Terms^{1, 2}

accounting and auditing practice.³ A practice that performs engagements covered by QC section 10, *A Firm's System of Quality Control* (Redrafted), which are audit, attestation, compilation, review, and any other services for which standards have been promulgated by the AICPA Auditing Standards Board (ASB) or the AICPA Accounting and Review Services Committee (ARSC) under Rule 201, *General Standards* (ET sec. 201 par. .01), or Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), of the AICPA Code of Professional Conduct. Although standards for other engagements may be promulgated by other AICPA technical committees, engagements performed in accordance with those standards are not encompassed in the definition of an *accounting and auditing practice*.

accounting estimate. An approximation of a monetary amount in the absence of a precise means of measurement. This term is used for an amount measured at fair value when there is estimation uncertainty, as well as for other amounts that require estimation. When section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, addresses only accounting estimates involving measurement at fair value, the term *fair value accounting estimates* is used.

In the context of section 540, the term *accounting estimates* refers to those financial statement items that cannot be measured precisely but can only be estimated. Also see **auditor's point estimate or auditor's range, critical accounting estimates, fair value accounting estimates, management's point estimate, and outcome of an accounting estimate**.

accounting records. The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers; journal entries and other adjustments to the financial statements that are not reflected in journal entries; and records, such as work sheets and spreadsheets, supporting cost allocations, computations, reconciliations, and disclosures.

accounts receivable (in the context of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*). The entity's claims against customers that have arisen from the sale of goods or services in the normal course of business, and a financial institution's loans.

acknowledgment letter. See **awareness letter**.

¹ Unless otherwise indicated, this glossary lists the terms defined for purposes of generally accepted auditing standards (GAAS) in AU-C sections as designated by Statement on Auditing Standards No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and also lists certain terms included by the Auditing Standards Board. Terms defined for purposes of a specific AU-C section or for purposes of adapting GAAS to a compliance audit (section 935, *Compliance Audits*) are denoted as such. Terms may appear in more than one AU-C section.

² This glossary also lists terms defined in clarified QC section 10, *A Firm's System of Quality Control* (Redrafted), for purposes of the Statements on Quality Control Standards (SQCSs). Terms defined in AU-C sections and in QC section 10 are denoted as such.

³ Term defined in paragraph .13 of QC section 10 for purposes of SQCSs.

advisory accountant. See **reporting accountant.**

analytical procedures. Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.

The use of analytical procedures as risk assessment procedures may be referred to as *analytical procedures used to plan the audit*. The auditor's use of analytical procedures as substantive procedures is referred to as *substantive analytical procedures*. Also see **risk assessment procedures**, **scanning**, and **substantive procedure**.

analytical procedures used to plan the audit. See **analytical procedures.**

applicable compliance requirements (in the context of adapting generally accepted auditing standards [GAAS] to a compliance audit). Compliance requirements that are subject to the compliance audit.

applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate, those charged with governance in the preparation and fair presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation. The term also means the financial reporting framework that applies to the group financial statements. Also see **financial reporting framework**.

applied criteria (in the context of section 810, *Engagements to Report on Summary Financial Statements*). The criteria applied by management in the preparation of the summary financial statements.

appropriateness (of audit evidence). The measure of the quality of audit evidence (that is, its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based). Also see **audit evidence**.

arm's length transaction. A transaction conducted on such terms and conditions between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

assertions. Representations by management, explicit or otherwise, that are embodied in the financial statements as used by the auditor to consider the different types of potential misstatements that may occur.

audit documentation. The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as *working papers* or *workpapers* are also sometimes used). Also see **engagement documentation**.

audit evidence. Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. *Sufficiency of audit evidence* is the measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence. *Appropriateness of audit evidence* is the measure of the quality of audit evidence; that is,

its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based.

audit file. One or more folders or other storage media, in physical or electronic form, containing the records that constitute the audit documentation for a specific engagement.

audit findings (in the context of adapting GAAS to a compliance audit).

The matters that are required to be reported by the auditor in accordance with the governmental audit requirement.

audit risk. The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

Audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, *audit risk* is a technical term related to the process of auditing; it does not refer to the auditor's business risks, such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements. Also see **detection risk** and **risk of material misstatement**.

audit risk of noncompliance (in the context of adapting GAAS to a compliance audit). The risk that the auditor expresses an inappropriate audit opinion on the entity's compliance when material noncompliance exists. Audit risk of noncompliance is a function of the risks of material noncompliance and detection risk of noncompliance. Also see **detection risk of noncompliance** and **risk of material noncompliance**.

audit sampling (sampling). The selection and evaluation of less than 100 percent of the population of audit relevance such that the auditor expects the items selected (the sample) to be representative of the population and, thus, likely to provide a reasonable basis for conclusions about the population. In this context, *representative* means that evaluation of the sample will result in conclusions that, subject to the limitations of sampling risk, are similar to those that would be drawn if the same procedures were applied to the entire population.

audited financial statements. In the context of section 560, *Subsequent Events and Subsequently Discovered Facts*, reference to *audited financial statements* means the financial statements, together with the auditor's report thereon. In the context of section 810, the term *audited financial statements* refers to those financial statements audited by the auditor in accordance with GAAS and from which the summary financial statements are derived. Also see **financial statements**.

auditor. The term used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. When an AU-C section expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term *engagement partner* rather than *auditor* is used. *Engagement partner* and *firm* are to be read as referring to their governmental equivalents when relevant. Also see **component auditor**, **engagement partner**, **experienced auditor**, **firm**, **predecessor auditor**, **service auditor**, and **user auditor**.

auditor's consent (in the context of section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*). A statement signed and dated by the auditor that indicates that the

auditor consents to the use of the auditor's report, and other references to the auditor, in a registration statement filed under the Securities Act of 1933 (the 1933 Act).

auditor's external specialist. See **auditor's specialist**.

auditor's inability to obtain sufficient appropriate audit evidence. See **limitation on the scope of an audit**.

auditor's internal specialist. See **auditor's specialist**.

auditor's point estimate or **auditor's range.** The amount or range of amounts, respectively, derived from audit evidence for use in evaluating the recorded or disclosed amount(s). Also see **accounting estimate**.

auditor's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor's specialist may be either an auditor's internal specialist (who is a partner or staff, including temporary staff, of the auditor's firm or a network firm) or an auditor's external specialist. *Partner* and *firm* should be read as referring to their governmental equivalents when relevant.

In the context of section 620, *Using the Work of an Auditor's Specialist*, an individual with expertise in applying methods of accounting for deferred income tax is not a specialist because this constitutes accounting expertise; a specialist in taxation law is a specialist because this constitutes legal expertise. Also see **engagement team** and **management's specialist**.

awareness letter (in the context of section 925). A letter signed and dated by the auditor to acknowledge the auditor's awareness that the auditor's review report on unaudited interim financial information is being used in a registration statement filed under the 1933 Act. This letter is not considered to be part of the registration statement and is also commonly referred to as an *acknowledgment letter*.

basic financial statements (in the context of section 730, *Required Supplementary Information*). Financial statements presented in accordance with an applicable financial reporting framework as established by a designated accounting standards setter, excluding required supplementary information. Also see **financial statements**.

business risk. A risk resulting from significant conditions, events, circumstances, actions, or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies or from the setting of inappropriate objectives and strategies.

by-product report. An auditor's written communication that is based solely on matters identified by the auditor during the course of the audit engagement when identification of such matters is not the primary objective of the audit engagement.

capsule financial information (in the context of section 920, *Letters for Underwriters and Certain Other Requesting Parties*). Unaudited summarized interim financial information for periods subsequent to the periods covered by the audited financial statements or unaudited condensed interim financial information included in the securities offering. Capsule financial information may be presented in narrative or tabular form and is often provided for the most recent interim period and for the corresponding period of the prior year.

carve-out method. A method of reporting that excludes from the service auditor's report, when a service organization uses a subservice organization, the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. Also see **inclusive method**.

cash basis. A basis of accounting that the entity uses to record cash receipts and disbursements and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets).

The cash basis of accounting is commonly referred to as an *other comprehensive basis of accounting*. In the context of section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, the cash basis of accounting is not a regulatory basis of accounting. Also see **other comprehensive bases of accounting** and **special purpose framework**.

change period (in the context of section 920). The period ending on the cut-off date and ordinarily beginning, for balance sheet items, immediately after the date of the latest balance sheet in the securities offering and, for income statement items, immediately after the latest period for which such items are presented in the securities offering.

closing date (in the context of section 920). The date on which the issuer of the securities or selling security holder delivers the securities to the underwriter in exchange for the proceeds of the offering.

comfort letter (in the context of section 920). A letter issued by an auditor in accordance with section 920 to requesting parties in connection with an entity's financial statements included in a securities offering.

comparative financial statements. A complete set of financial statements for one or more prior periods included for comparison with the financial statements of the current period. Also see **financial statements**.

comparative information. Prior period information presented for purposes of comparison with current period amounts or disclosures that is not in the form of a complete set of financial statements. Comparative information includes prior period information presented as condensed financial statements or summarized financial information. Also see **condensed financial statements** and **summary financial statements**.

comparison date and comparison period (in the context of section 920). The date as of which, and period for which, data at the cut-off date and data for the change period are to be compared.

competencies and capabilities.⁴ The knowledge, skills, and abilities that qualify personnel to perform an engagement covered by QC section 10. Competencies and capabilities are not measured by periods of time because such a quantitative measurement may not accurately reflect the kinds of experiences gained by personnel in any given time period. Accordingly, for purposes of QC section 10, a measure of overall competency is qualitative rather than quantitative.

complementary user entity controls. Controls that management of the service organization assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve the control objectives

⁴ Term defined in paragraph .A18 of QC section 10 for purposes of SQCSs.

stated in management's description of the service organization's system, are identified as such in that description.

completion of the engagement quality control review. The completion by the engagement quality control reviewer of the requirements in section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.⁵ Also see **engagement quality control review**.

compliance audit (in the context of adapting GAAS to a compliance audit). A program-specific audit or an organization-wide audit of an entity's compliance with applicable compliance requirements.

compliance requirements (in the context of adapting GAAS to a compliance audit). Laws, regulations, rules, and provisions of contracts or grant agreements applicable to government programs with which the entity is required to comply.

component. An entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements.

In the context of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, an investment accounted for under the equity method constitutes a component. Investments accounted for under the cost method may be analogous to a component when the work and reports of other auditors constitute a major element of evidence for such investments. Also see **group** and **significant component**.

component auditor. An auditor who performs work on the financial information of a component that will be used as audit evidence for the group audit. A component auditor may be part of the group engagement partner's firm, a network firm of the group engagement partner's firm, or another firm.

In the context of section 600, auditors who do not meet the definition of a member of the group engagement team are considered to be component auditors. However, an auditor who performs work on a component when the group engagement team will not use that work to provide audit evidence for the group audit is not considered a component auditor. Also see **auditor**.

component management. Management responsible for preparing the financial information of a component. Also see **management**.

component materiality. The materiality for a component determined by the group engagement team for the purposes of the group audit.

components of internal control. The following five components, which provide a useful framework for auditors when considering how different aspects of an entity's internal control may affect the audit:

- a. The control environment
- b. The entity's risk assessment process
- c. The information system, including the related business processes relevant to financial reporting and communication

⁵ Paragraph .22 and, when applicable, compliance with paragraph .23 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

- d. Control activities
- e. Monitoring of controls

Also see **internal control**.

condensed financial statements. Historical financial information that is presented in less detail than a complete set of financial statements, in accordance with an appropriate financial reporting framework. Condensed financial statements may be separately presented as unaudited financial information or may be presented as comparative information. Also see **comparative information** and **financial statements**.

consolidation process. Reference to the *consolidation process* includes the following:

- a. The recognition, measurement, presentation, and disclosure of the financial information of the components in the group financial statements by way of inclusion, consolidation, proportionate consolidation, or the equity or cost methods of accounting
- b. The aggregation in combined financial statements of the financial information of components that are under common control

continuing accountant (in the context of section 915, *Reports on Application of Requirements of an Applicable Financial Reporting Framework*). An accountant who has been engaged to report on the financial statements of a specific entity or entities of which the specific entity is a component.

contractual basis. A basis of accounting that the entity uses to comply with an agreement between the entity and one or more third parties other than the auditor. Also see **special purpose framework**.

control risk. The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control. Also see **risk of material misstatement**.

control risk of noncompliance (in the context of adapting GAAS to a compliance audit). The risk that noncompliance with a compliance requirement that could occur and that could be material, either individually or when aggregated with other instances of noncompliance, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control over compliance. Also see **risk of material noncompliance**.

critical accounting estimates. Key assumptions and other sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities. Also may be referred to as *key sources of estimation uncertainty*. Also see **accounting estimate**.

current period. The most recent period upon which the auditor is reporting.

cut-off date (in the context of section 920). The date through which certain procedures described in the comfort letter are to relate.

date of approval of the financial statements. In some circumstances, final approval of the financial statements by governmental legislative bodies (or subsets of such legislative bodies) is required before the financial statements are issued. In these circumstances, final approval by such legislative

bodies (or subsets of such legislative bodies) is not necessary for the auditor to conclude that sufficient appropriate audit evidence has been obtained. The date of approval of the financial statements is the earlier date on which those with the recognized authority determine that all the statements that the financial statements comprise, including the related notes, have been prepared and that those with the recognized authority have asserted that they have taken responsibility for them. Also see **financial statements**.

date of the auditor's report. The date that the auditor dates the report on the financial statements, in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*.

date of the financial statements. The date of the end of the latest period covered by the financial statements. Also see **financial statements**.

deficiency in design. A deficiency in design exists when a control necessary to meet the control objective is missing or an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. Also see **deficiency in internal control** and **deficiency in internal control over compliance**.

deficiency in internal control. A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing, or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **internal control**.

deficiency in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, non-compliance on a timely basis. A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing, or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **material weakness in internal control over compliance** and **significant deficiency in internal control over compliance**.

deficiency in operation. A deficiency in operation exists when a properly designed control does not operate as designed or the person performing the control does not possess the necessary authority or competence to perform the control effectively. Also see **deficiency in internal control** and **deficiency in internal control over compliance**.

degree of interaction. The extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organization.

- designated accounting standards setter.** A body designated by the Council of the AICPA to promulgate generally accepted accounting principles (GAAP) pursuant to Rule 202 and Rule 203, *Accounting Principles* (ET sec. 203 par. .01), of the AICPA Code of Professional Conduct.
- detection risk.** The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements. Also see **audit risk** and **risk of material misstatement**.
- detection risk of noncompliance (in the context of adapting GAAS to a compliance audit).** The risk that the procedures performed by the auditor to reduce audit risk of noncompliance to an acceptably low level will not detect noncompliance that exists and that could be material, either individually or when aggregated with other instances of noncompliance. Also see **audit risk of noncompliance** and **risk of material noncompliance**.
- direct assistance.** The use of internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor.
- disagreements with management (in the context of section 260, *The Auditor's Communication With Those Charged With Governance*).** Disagreements that do not include differences of opinion based on incomplete facts or preliminary information that are later resolved.
- documentation.** See **audit documentation**.
- documentation completion date.** The date, no later than 60 days following the report release date, on which the auditor has assembled for retention a complete and final set of documentation in an audit file.
- documents containing audited financial statements (in the context of section 720, *Other Information in Documents Containing Audited Financial Statements*).** Refers to annual reports (or similar documents) that are issued to owners (or similar stakeholders) and annual reports of governments and organizations for charitable or philanthropic purposes that are available to the public that contain audited financial statements and the auditor's report thereon.
- dual purpose test.** Performing a test of controls and a test of details on the same transaction. Also see **substantive procedure** and **test of controls**.
- effective date (in the context of section 920).** The date on which the securities offering becomes effective.
- effective date of the registration statement (in the context of section 925).** The date on which the registration statement filed under the 1933 Act becomes effective for purposes of evaluating the auditor's liability under Section 11 of the 1933 Act.
- element of a financial statement or element (in the context of section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*).** Reference to this term means an element, account, or item of a financial statement.
- emphasis-of-matter paragraph.** A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements. Also see **other-matter paragraph**.

engagement documentation.⁶ The record of the work performed, results obtained, and conclusions that the practitioner reached (also known as *working papers* or *workpapers*). Also see **audit documentation**.

engagement partner.⁷ The partner or other person in the firm who is responsible for the audit engagement and its performance and for the auditor's report that is issued on behalf of the firm and who, when required, has the appropriate authority from a professional, legal, or regulatory body. *Engagement partner*, *partner*, and *firm* refer to their governmental equivalents where relevant. Also see **auditor, firm, group engagement partner, and partner**.

engagement quality control review.⁸ A process designed to provide an objective evaluation, before the report is released, of the significant judgments the engagement team made and the conclusions it reached in formulating the auditor's report. The engagement quality control review process is only for those audit engagements, if any, for which the firm has determined that an engagement quality control review is required, in accordance with its policies and procedures. Also see **completion of the engagement quality control review**.

engagement quality control reviewer.⁹ A partner, other person in the firm, suitably qualified external person, or team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments that the engagement team made and the conclusions it reached in formulating the auditor's report.

engagement team.¹⁰ All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform audit procedures on the engagement. This excludes an auditor's external specialist engaged by the firm or a network firm. Also see **auditor's specialist and group engagement team**.

entity (in the context of section 920). The party whose financial statements are the subject of the engagement.

entity's risk assessment process. The entity's process for

- a. identifying **business risks relevant to financial reporting objectives**,
- b. estimating **the significance of the risks**,
- c. assessing **the likelihood of their occurrence, and**
- d. deciding **about actions to address those risks**.

estimation uncertainty. The susceptibility of an accounting estimate and related disclosures to an inherent lack of precision in its measurement.

evidence. See **audit evidence**.

exception. A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

⁶ See footnote 3.

⁷ Term also defined in paragraph .13 of QC section 10 for purposes of SQCSs. Refer to QC section 10 for specific language.

⁸ See footnote 7.

⁹ See footnote 7.

¹⁰ See footnote 7.

experienced auditor. An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of

- a. audit processes;
- b. GAAS and applicable legal and regulatory requirements;
- c. the business environment in which the entity operates; and
- d. auditing and financial reporting issues relevant to the entity's industry.

Also see **auditor** and **practical audit experience**.

expertise. Skills, knowledge, and experience in a particular field.

extent of an audit procedure. Refers to the quantity of audit procedures to be performed (for example, a sample size or the number of observations of a control activity). Also see **nature of an audit procedure** and **timing of an audit procedure**.

external confirmation. Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), either in paper form or by electronic or other medium (for example, through the auditor's direct access to information held by a third party).

factual misstatements. Misstatements about which there is no doubt. Also see **judgmental misstatements**, **misstatement**, and **projected misstatements**.

fair presentation framework. See **financial reporting framework**.

fair value accounting estimates (in the context of section 540). Accounting estimates involving measurement at fair value. Also see **accounting estimate**.

financial reporting framework. A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements; for example, U.S. GAAP, International Financial Reporting Standards promulgated by the International Accounting Standards Board, or a special purpose framework.

The term *fair presentation framework* is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and

- a. acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- b. acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

A financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgments in *a* or *b* is not a fair presentation framework. Also see **applicable financial reporting framework**, **general purpose framework**, and **special purpose framework**.

financial statements. A structured representation of historical financial information, including related notes, intended to communicate an entity's economic resources and obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The related notes ordinarily comprise a summary of significant accounting

policies and other explanatory information. The term *financial statements* ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement.

In the context of section 700, reference to *financial statements* means a complete set of general purpose financial statements, including the related notes. In the context of section 800, reference to *financial statements* means a complete set of special purpose financial statements, including the related notes. Also see **audited financial statements, basic financial statements, comparative financial statements, condensed financial statements, date of approval of the financial statements, date of the financial statements, general purpose financial statements, group financial statements, historical financial information, special purpose financial statements, and summary financial statements.**

firm.¹¹ A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in the practice of public accounting. Also see **auditor** and **engagement partner**.

fraud. An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception that results in a misstatement in financial statements that are the subject of an audit.

Although fraud is a broad legal concept, the auditor is primarily concerned with fraud that causes a material misstatement in the financial statements.

fraud risk factors. Events or conditions that indicate an incentive or pressure to perpetrate fraud, provide an opportunity to commit fraud, or indicate attitudes or rationalizations to justify a fraudulent action.

GAGAS. See *Government Auditing Standards*.

general purpose financial statements. Financial statements prepared in accordance with a general purpose framework.

For audits of governmental entities, the term *general purpose financial statements*, in the context of section 700, would be considered or referred to as basic financial statements using the terms in the government's applicable financial reporting framework. Also see **financial statements**.

general purpose framework. A financial reporting framework designed to meet the common financial information needs of a wide range of users. Also see **financial reporting framework**.

generally accepted accounting principles (GAAP). Reference to *generally accepted accounting principles* in GAAS means generally accepted accounting principles promulgated by bodies designated by the Council of the AICPA pursuant to Rule 202 and Rule 203 of the AICPA Code of Professional Conduct.

generally accepted auditing standards (GAAS). Statements on Auditing Standards issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matter for nonissuers. Rule 202 of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit of a nonissuer to comply with standards promulgated by the ASB. Also see **nonissuer**.

¹¹ See footnote 7.

generally accepted government auditing standards. See *Government Auditing Standards*.

Government Auditing Standards. Standards and guidance issued by the Comptroller General of the United States, U.S. Government Accountability Office for financial audits, attestation engagements, and performance audits. *Government Auditing Standards* also is known as generally accepted government auditing standards (GAGAS) or the Yellow Book.

government program (in the context of adapting GAAS to a compliance audit). The means by which governmental entities achieve their objectives. For example, one of the objectives of the U.S. Department of Agriculture is to provide nutrition to individuals in need. Examples of government programs designed to achieve that objective are the Supplemental Nutrition Assistance Program and the National School Lunch Program. Government programs that are relevant to section 935, *Compliance Audits*, are those in which a grantor or pass-through entity provides an award to another entity, usually in the form of a grant, contract, or other agreement. Not all government programs provide cash assistance; sometimes non-cash assistance is provided (for example, a loan guarantee, commodities, or property).

governmental audit organization. A governmental entity, agency, or other department that is required or permitted by law or other authorization to audit other governmental entities, agencies, or departments.

governmental audit requirement (in the context of adapting GAAS to a compliance audit). A government requirement established by law, regulation, rule, or provision of contracts or grant agreements requiring that an entity undergo an audit of its compliance with applicable compliance requirements related to one or more government programs that the entity administers.

grantor (in the context of adapting GAAS to a compliance audit). A government agency from which funding for the government program originates.

group. All the components whose financial information is included in the group financial statements. A group always has more than one component. Also see **component** and **significant component**.

group audit. The audit of group financial statements. Also see **initial audit engagement, reaudit, and recurring audit**.

group audit opinion. The audit opinion on the group financial statements. Also see **modified opinion** and **unmodified opinion**.

group engagement partner. The partner or other person in the firm who is responsible for the group audit engagement and its performance and for the auditor's report on the group financial statements that is issued on behalf of the firm. When joint auditors conduct the group audit, the joint engagement partners and their engagement teams collectively constitute the group engagement partner and the group engagement team. *Group engagement partner* and *firm* refer to their governmental equivalents when relevant. Also see **engagement partner** and **partner**.

group engagement team. Partners, including the group engagement partner, and staff who establish the overall group audit strategy, communicate with component auditors, perform work on the consolidation process, and evaluate the conclusions drawn from the audit evidence as the basis for

forming an opinion on the group financial statements. Also see **engagement team**.

group financial statements. Financial statements that include the financial information of more than one component. The term *group financial statements* also refers to combined financial statements aggregating the financial information prepared by components that are under common control. Also see **financial statements**.

group management. Management responsible for the preparation and fair presentation of the group financial statements. Also see **management**.

group-wide controls. Controls designed, implemented, and maintained by group management over group financial reporting.

historical financial information. Information expressed in financial terms regarding a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past. Also see **financial statements** and **interim financial information**.

hypothetical transaction (in the context of section 915). A transaction or financial reporting issue that does not involve facts or circumstances of a specific entity.

included (in the context of section 920). References to information that is included in a document are to be read to also encompass information that is incorporated by reference in that document.

included or the inclusion of (in the context of section 925). References to *included* or *the inclusion of* in a registration statement means included or incorporated by reference in a registration statement filed under the 1933 Act.

inclusive method. A method of reporting that includes in the service auditor's report, when a service organization uses a subservice organization, the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. Also see **carve-out method**.

inconsistency. Other information that conflicts with information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor's opinion on the financial statements.

incorporated by reference. See **included** and **included or the inclusion of**.

independence.¹² Defined as:

- a. *Independence of mind.* The state of mind that permits the performance of an attest service without being affected by influences that compromise professional judgment, thereby allowing an individual to act with integrity and exercise objectivity and professional skepticism.
- b. *Independence in appearance.* The avoidance of circumstances that would cause a reasonable and informed third party, having

¹² Term defined in paragraph .06 of ET section 100-1, *Conceptual Framework for AICPA Independence Standards*.

knowledge of all relevant information, including safeguards applied, to reasonably conclude that the integrity, objectivity, or professional skepticism of a firm or a member of the attest engagement team had been compromised.

inherent risk. The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls. Also see **risk of material misstatement**.

inherent risk of noncompliance (in the context of adapting GAAS to a compliance audit). The susceptibility of a compliance requirement to noncompliance that could be material, either individually or when aggregated with other instances of noncompliance, before consideration of any related controls over compliance. Also see **risk of material noncompliance**.

initial audit engagement. An engagement in which either (a) the financial statements for the prior period were not audited, or (b) the financial statements for the prior period were audited by a predecessor auditor. Also see **group audit, reaudit, and recurring audit**.

inputs. Refers, in some cases, to assumptions that may be made or identified by a specialist to assist management in making accounting estimates. Inputs may also refer to the underlying data to which specific assumptions are applied. Also see **observable inputs** (or equivalent) and **unobservable inputs** (or equivalent).

inspection.¹³ A retrospective evaluation of the adequacy of the firm's quality control policies and procedures, its personnel's understanding of those policies and procedures, and the extent of the firm's compliance with them. Inspection includes a review of completed engagements.

interim financial information (in the context of section 930, *Interim Financial Information*). Financial information prepared and presented in accordance with an applicable financial reporting framework that comprises either a complete or condensed set of financial statements covering a period or periods less than one full year or covering a 12-month period ending on a date other than the entity's fiscal year end. Also see **historical financial information**.

internal audit function. A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes.

internal control. A process effected by those charged with governance, management, and other personnel that is designed to provide reasonable assurance about the achievement of the entity's objectives with regard to the reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Also see **components of internal control and deficiency in internal control**.

interpretive publications. Auditing interpretations of GAAS, exhibits to GAAS, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position.

issuer.¹⁴ An issuer (as defined in Section 3 of the Securities Exchange Act of 1934 [15 USC 78(c)]), the securities of which are registered under Section

¹³ See footnote 3.

¹⁴ Term defined in AU-C appendix B, *Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards*.

12 of that act (15 USC 78(1)), or that is required to file reports under Section 15(d) (15 USC 78o(d)), or that files or has filed a registration statement that has not yet become effective under the 1933 Act (15 USC 77a et seq.), and that it has not withdrawn. Also see **nonissuer**.

judgmental misstatements. Differences arising from the judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate. Also see **factual misstatements**, **misstatement**, and **projected misstatements**.

key sources of estimation uncertainty. See **critical accounting estimates**.

known questioned costs (in the context of adapting GAAS to a compliance audit). Questioned costs specifically identified by the auditor. Known questioned costs are a subset of likely questioned costs. Also see **likely questioned costs**.

legal counsel (in the context of section 501, *Audit Evidence—Specific Considerations for Selected Items*). The entity's in-house legal counsel and external legal counsel.

likely questioned costs (in the context of adapting GAAS to a compliance audit). The auditor's best estimate of total questioned costs, not just the known questioned costs. Likely questioned costs are developed by extrapolating from audit evidence obtained, for example, by projecting known questioned costs identified in an audit sample to the entire population from which the sample was drawn. Also see **known questioned costs**.

limitation on the scope of an audit. The auditor's inability to obtain sufficient appropriate audit evidence, which may arise from the following:

- a. Circumstances beyond the control of the entity
- b. Circumstances relating to the nature or timing of the auditor's work
- c. Limitations imposed by management

Also may be referred to as a *scope limitation*.

management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

In the context of section 210, *Terms of Engagement*, and section 580, *Written Representations*, references to *management* are to be read as "management and, when appropriate, those charged with governance" unless the context suggests otherwise. Also see **component management**, **group management**, and **those charged with governance**.

management bias. A lack of neutrality by management in the preparation and fair presentation of information.

management's point estimate. The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate. Also see **accounting estimate**.

management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements. Also see **auditor's specialist**.

material noncompliance (in the context of adapting GAAS to a compliance audit). In the absence of a definition of *material noncompliance* in the governmental audit requirement, a failure to follow compliance requirements or a violation of prohibitions included in the applicable compliance requirements that results in noncompliance that is quantitatively or qualitatively material, either individually or when aggregated with other noncompliance, to the affected government program.

material weakness. A deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. Also see **significant deficiency**.

material weakness in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a compliance requirement will not be prevented, or detected and corrected, on a timely basis. In section 935, a reasonable possibility exists when the likelihood of the event is either reasonably possible or probable as defined as follows:

probable. The future event or events are likely to occur.

reasonably possible. The chance of the future event or events occurring is more than remote but less than likely.

remote. The chance of the future event or events occurring is slight.

Also see **deficiency in internal control over compliance** and **significant deficiency in internal control over compliance**.

misstatement. A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error.

Misstatements also include those adjustments of amounts, classifications, presentations, or disclosures that, in the auditor's professional judgment, are necessary for the financial statements to be presented fairly, in all material respects. Also see **factual misstatements, judgmental misstatements, projected misstatements, and uncorrected misstatements**.

misstatement of fact. Other information that is unrelated to matters appearing in the audited financial statements that is incorrectly stated or presented. A material misstatement of fact may undermine the credibility of the document containing audited financial statements.

modified opinion. A qualified opinion, an adverse opinion, or a disclaimer of opinion. Also see **group audit opinion** and **unmodified opinion**.

monitoring.¹⁵ A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements, designed to provide the firm with reasonable assurance that its system of quality control is designed appropriately and operating effectively.

¹⁵ See footnote 7.

nature of an audit procedure. Refers to the purpose (test of controls or substantive procedure) and type (inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure) of an audit procedure. Also see **extent of an audit procedure** and **timing of an audit procedure**.

negative assurance (in the context of section 920). A statement that, based on the procedures performed, nothing has come to the auditor's attention that caused the auditor to believe that specified matters do not meet specified criteria (for example, that nothing came to the auditor's attention that caused the auditor to believe that any material modifications should be made to the unaudited interim financial information for it to be in accordance with GAAP).

negative confirmation request. A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request. Also see **positive confirmation request**.

network.¹⁶ An association of entities, as defined in ET section 92, *Definitions*.

network firm.¹⁷ A firm or other entity that belongs to a network, as defined in ET section 92.

noncompliance (in the context of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*). Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity or on its behalf by those charged with governance, management, or employees. *Noncompliance* does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management, or employees of the entity.

nonissuer.¹⁸ Any entity not subject to the Sarbanes-Oxley Act of 2002 or the rules of the U.S. Securities and Exchange Commission (SEC). Also see **generally accepted auditing standards (GAAS)** and **issuer**.

nonresponse. A failure of the confirming party to respond, or fully respond, to a positive confirmation request or a confirmation request returned undelivered.

nonroutine transactions. Transactions that are unusual, either due to size or nature, and that, therefore, occur infrequently.

nonsampling risk. The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk.

nonstatistical sampling. See **statistical sampling**.

notes to financial statements. See **financial statements**.

observable. In the context of a fair value accounting estimate, the term *observable* refers to data that is readily available, such as published interest rate data or exchange-traded prices of securities.

observable inputs (or equivalent). With respect to fair value accounting estimates, assumptions or inputs that reflect what market participants would

¹⁶ See footnote 7.

¹⁷ See footnote 7.

¹⁸ See footnote 14.

use in pricing an asset or a liability, developed based on market data obtained from sources independent of the reporting entity. Also see **inputs** and **unobservable inputs** (or equivalent).

omitted procedure. An auditing procedure that the auditor considered necessary in the circumstances existing at the time of the audit of the financial statements but which was not performed.

opening balances. Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

organization-wide audit (in the context of adapting GAAS to a compliance audit). An audit of an entity's financial statements and an audit of its compliance with the applicable compliance requirements as they relate to one or more government programs that the entity administers. Also see **program-specific audit**.

other auditing publications. Publications other than interpretive publications; these include AICPA auditing publications not defined as interpretive publications; auditing articles in the *Journal of Accountancy* and other professional journals; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.

other basis. A basis of accounting that uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements. Also see **other comprehensive bases of accounting** and **special purpose framework**.

other comprehensive bases of accounting. The cash basis, tax basis, regulatory basis, and other basis of accounting. Also see **cash basis**, **regulatory basis**, **tax basis**, and **other basis**.

other information. Financial and nonfinancial information (other than the financial statements and the auditor's report thereon) that is included in a document containing audited financial statements and the auditor's report thereon, excluding required supplementary information.

Other information does not encompass, for example, the following:

- A press release or similar memorandum or cover letter accompanying the document containing audited financial statements and the auditor's report thereon
- Information contained in analyst briefings
- Information contained on the entity's website

other-matter paragraph. A paragraph included in the auditor's report that is required by GAAS, or is included at the auditor's discretion, and that refers to a matter other than those presented or disclosed in the financial statements that, in the auditor's professional judgment, is relevant to users' understanding of the audit, the auditor's responsibilities, or the auditor's report. Also see **emphasis-of-matter paragraph**.

outcome of an accounting estimate. The actual monetary amount that results from the resolution of the underlying transaction(s), event(s), or condition(s) addressed by the accounting estimate. Also see **accounting estimate**.

owner-manager. The proprietor of a smaller entity who is involved in running the entity on a day-to-day basis.

partner.¹⁹ Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority. Also see **engagement partner** and **group engagement partner**.

pass-through entity (in the context of adapting GAAS to a compliance audit). An entity that receives an award from a grantor or other entity and distributes all or part of it to another entity to administer a government program.

performance materiality. The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, the term *performance materiality* also refers to the amount or amounts set by the auditor at less than the materiality level or levels for particular classes of transactions, account balances, or disclosures. Performance materiality is to be distinguished from tolerable misstatement. Also see **tolerable misstatement**.

performing initial procedures. On both client continuance and evaluation of relevant ethical requirements (including independence) at the beginning of the current audit engagement, performing initial procedures means that the procedures are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often begin shortly after (or in connection with) the completion of the previous audit.

personnel.²⁰ Partners and staff.

pervasive. A term used in the context of misstatements to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditor's professional judgment

- are not confined to specific elements, accounts, or items of the financial statements;
- if so confined, represent or could represent a substantial proportion of the financial statements; or
- with regard to disclosures, are fundamental to users' understanding of the financial statements.

population. The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

positive confirmation request. A request that the confirming party respond directly to the auditor by providing the requested information or indicating whether the confirming party agrees or disagrees with the information in the request. Also see **negative confirmation request**.

¹⁹ See footnote 7.

²⁰ See footnote 7.

practicable (in the context of section 705, *Modifications to the Opinion in the Independent Auditor's Report*). The term *practicable*²¹ means that omitted information is reasonably obtainable from management's accounts and records and that providing the information in the auditor's report does not require the auditor to assume the position of a preparer of financial information.

practical audit experience. Possessing the competencies and skills that would have enabled the auditor to perform the audit but does not mean that the auditor is required to have performed comparable audits. Also see **experienced auditor**.

preconditions for an audit. The use by management of an acceptable financial reporting framework in the preparation and fair presentation of the financial statements and the agreement of management and, when appropriate, those charged with governance, to the premise on which an audit is conducted.

predecessor auditor. The auditor from a different audit firm who has reported on the most recent audited financial statements or was engaged to perform but did not complete an audit of the financial statements. Also see **auditor**.

premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted (the premise). Management and, when appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with GAAS; that is, responsibility

- a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- c. to provide the auditor with
 - i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;
 - ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and
 - iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

The premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted may also be referred to as the *premise*.

²¹ As used in the context of paragraphs .18 and .20c of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

prescribed guidelines. The authoritative guidelines established by the designated accounting standards setter for the methods of measurement and presentation of the required supplementary information.

presumptively mandatory requirements.²² The category of professional requirements with which the auditor must comply in all cases in which such a requirement is relevant, except in rare circumstances discussed in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. GAAS use the word "should" to indicate a presumptively mandatory requirement. Also see **generally accepted auditing standards (GAAS)** and **unconditional requirements**.

private equity exchanges. Refers to entities that trade unregistered private equity securities on electronic trading platforms.

probable (in the context of adapting GAAS to a compliance audit). The future event or events are likely to occur. Also see **material weakness in internal control over compliance**.

professional judgment. The application of relevant training, knowledge, and experience, within the context provided by auditing, accounting, and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

professional skepticism. An attitude that includes a questioning mind, being alert to conditions that may indicate possible misstatement due to fraud or error, and a critical assessment of audit evidence.

professional standards.²³ Standards promulgated by the ASB or the ARSC under Rule 201 or Rule 202 of the AICPA Code of Professional Conduct, or other standards-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

program-specific audit (in the context of adapting GAAS to a compliance audit). An audit of an entity's compliance with applicable compliance requirements as they relate to one government program that the entity administers. The compliance audit portion of a program-specific audit is performed in conjunction with either an audit of the entity's or the program's financial statements. Also see **organization-wide audit**.

projected misstatements. The auditor's best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire population from which the samples were drawn. Also see **factual misstatements, judgmental misstatements, and misstatement**.

purchase agreement. See **underwriter**.

purpose of an audit procedure. See **nature of an audit procedure**.

questioned costs (in the context of adapting GAAS to a compliance audit). Costs that are questioned by the auditor because (a) of a violation or possible violation of the applicable compliance requirements, (b) the costs are not supported by adequate documentation, or (c) the incurred

²² Term also defined in paragraph .08 of QC section 10 for purposes of SQCSs. Refer to QC section 10 for specific language.

²³ See footnote 7.

costs appear unreasonable and do not reflect the actions that a prudent person would take in the circumstances.

readily available. Obtainable by a third-party user without any further action by the entity (for example, financial statements on an entity's website may be considered readily available, but being available upon request is not considered readily available).

reasonable assurance.²⁴ In the context of an audit of financial statements, a high, but not absolute, level of assurance.

reasonable period of time. A period of time not to exceed one year beyond the date of the financial statements being audited.

reasonably possible (in the context of adapting GAAS to a compliance audit). The chance of the future event or events occurring is more than remote but less than likely. Also see **material weakness in internal control over compliance**.

reaudit. An initial audit engagement to audit financial statements that have been previously audited by a predecessor auditor. Also see **group audit**, **initial audit engagement**, and **recurring audit**.

recurring audit. An audit engagement for an existing audit client for whom the auditor performed the preceding audit. Also see **group audit**, **initial audit engagement**, and **reaudit**.

reference to GAAP in GAAS. See **generally accepted accounting principles (GAAP)**.

regulatory basis. A basis of accounting that the entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject (for example, a basis of accounting that insurance companies use pursuant to the accounting practices prescribed or permitted by a state insurance commission).

The regulatory basis of accounting is commonly referred to as *other comprehensive bases of accounting*. Also see **other comprehensive bases of accounting** and **special purpose framework**.

related notes. See **financial statements**.

related party. A party defined as a *related party* in GAAP.

relevant assertion. A financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a *relevant assertion* is made without regard to the effect of internal controls.

relevant ethical requirements.²⁵ Ethical requirements to which the engagement team and engagement quality control reviewer are subject, which consist of the AICPA Code of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

remote (in the context of adapting GAAS to a compliance audit). The chance of the future event or events occurring is slight. Also see **material weakness in internal control over compliance**.

²⁴ See footnote 7.

²⁵ See footnote 7.

report on compliance. An auditor's report on an entity's compliance with aspects of contractual agreements or regulatory requirements, insofar as they relate to accounting matters, in connection with an audit of financial statements (commonly referred to as a *by-product report*). Also see **by-product report**.

report on management's description of a service organization's system and the suitability of the design of controls (referred to in section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, as a *type 1 report*). A report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether, in all material respects, and based on suitable criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date
- c. A service auditor's report that expresses an opinion on the matters in b(i–ii)

report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls (referred to in section 402 as a *type 2 report*). A report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether in all material respects and, based on suitable criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed throughout the specified period to achieve those control objectives
 - iii. the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives
- c. A service auditor's report that
 - i. expresses an opinion on the matters in b(i–iii)
 - ii. includes a description of the service auditor's tests of controls and the results thereof

report release date. The date the auditor grants the entity permission to use the auditor's report in connection with the financial statements.

reporting accountant (in the context of section 915). An accountant, other than a continuing accountant, in the practice of public accounting, as

described in ET section 92, who prepares a written report or provides oral advice on the application of the requirements of an applicable financial reporting framework to a specific transaction or on the type of report that may be issued on a specific entity's financial statements.²⁶ (A reporting accountant who is also engaged to provide accounting and reporting advice to a specific entity on a recurring basis is commonly referred to as an *advisory accountant*.)

representative sample. See **audit sampling (sampling)**.

requesting party (in the context of section 920). One of the following specified parties requesting a comfort letter, which has negotiated an agreement with the entity:

- An underwriter
- Other parties that are conducting a review process that is, or will be, substantially consistent with the due diligence process performed when the securities offering is, or if the securities offering was, being registered pursuant to the 1933 Act, as follows:
 - A selling shareholder, sales agent, or other party with a statutory due diligence defense under Section 11 of the 1933 Act
 - A broker-dealer or other financial intermediary acting as principal or agent in a securities offering in connection with the following types of securities offerings:
 - Foreign offerings, including Regulation S, Eurodollar, and other offshore offerings
 - Transactions that are exempt from the registration requirements of Section 5 of the 1933 Act, including those pursuant to Regulation A, Regulation D, and Rule 144A
 - Offerings of securities issued or backed by governmental, municipal, banking, tax-exempt, or other entities that are exempt from registration under the 1933 Act
 - The buyer or seller in connection with acquisition transactions in which there is an exchange of stock

required supplementary information. Information that a designated accounting standards setter requires to accompany an entity's basic financial statements. Required supplementary information is not part of the basic financial statements; however, a designated accounting standards setter considers the information to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. In addition, authoritative guidelines for the methods of measurement and presentation of the information have been established. Also see **supplementary information**.

retrospective application. An entity's application of a change in accounting principle to one or more prior periods that were included in previously issued financial statements, as if that principle had always been used.

risk assessment procedures. The audit procedures performed to obtain an understanding of the entity and its environment, including the entity's internal control, to identify and assess the risks of material misstatement,

²⁶ Paragraph .29 of ET section 92, *Definitions*.

whether due to fraud or error, at the financial statement and relevant assertion levels. Also see **analytical procedures**.

risk assessment process. See **entity's risk assessment process**.

risk of material misstatement. The risk that the financial statements are materially misstated prior to the audit. This consists of two components, described as follows at the assertion level:

inherent risk. The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.

control risk. The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control.

Also see **audit risk** and **detection risk**.

risk of material misstatement at the overall financial statement level.

Refers to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions.

risk of material noncompliance (in the context of adapting GAAS to a compliance audit). The risk that material noncompliance exists prior to the audit. This consists of two components, described as follows:

inherent risk of noncompliance. The susceptibility of a compliance requirement to noncompliance that could be material, either individually or when aggregated with other instances of noncompliance, before consideration of any related controls over compliance.

control risk of noncompliance. The risk that noncompliance with a compliance requirement that could occur and that could be material, either individually or when aggregated with other instances of noncompliance, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control over compliance.

Also see **audit risk of noncompliance** and **detection risk of noncompliance**.

sampling. See **audit sampling (sampling)**.

sampling risk. The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

- a. In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when, in fact, it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.
- b. In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when, in fact, it does not. This

type of erroneous conclusion affects audit efficiency because it would usually lead to additional work to establish that initial conclusions were incorrect.

sampling unit. The individual items constituting a population.

scanning. A type of analytical procedure involving the auditor's exercise of professional judgment to review accounting data to identify significant or unusual items to test. Also see **analytical procedures**.

scope limitation. See **limitation on the scope of an audit**.

securities offerings (in the context of section 920). One of the following types of securities offerings:

- Registration of securities with the SEC under the 1933 Act
- Foreign offerings, including Regulation S, Eurodollar, and other offshore offerings
- Transactions that are exempt from the registration requirements of Section 5 of the 1933 Act, including those pursuant to Regulation A, Regulation D, and Rule 144A
- Offerings of securities issued or backed by governmental, municipal, banking, tax-exempt, or other entities that are exempt from registration under the 1933 Act
- Acquisition transactions in which there is an exchange of stock

service auditor. A practitioner who reports on controls at a service organization. Also see **auditor**.

service organization. An organization or segment of an organization that provides services to user entities that are relevant to those user entities' internal control over financial reporting. Also see **subservice organization** and **user entity**.

service organization's system. The policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor's report. Management's description of the service organization's system identifies the services covered, the period to which the description relates (or in the case of a type 1 report, the date to which the description relates), the control objectives specified by management or an outside party, the party specifying the control objectives (if not specified by management), and the related controls.

significant component. A component identified by the group engagement team (a) that is of individual financial significance to the group, or (b) that, due to its specific nature or circumstances, is likely to include significant risks of material misstatement of the group financial statements. Also see **component** and **group**.

significant deficiency. A deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance. Also see **material weakness**.

significant deficiency in internal control over compliance (in the context of adapting GAAS to a compliance audit). A deficiency, or a combination of deficiencies, in internal control over compliance that is less severe than a material weakness in internal control over compliance, yet

important enough to merit attention by those charged with governance. Also see **deficiency in internal control over compliance** and **material weakness in internal control over compliance**.

significant risk. An identified and assessed risk of material misstatement that, in the auditor's professional judgment, requires special audit consideration.

single financial statement or specific element of a financial statement (in the context of section 805). Reference to this term includes the related notes. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information relevant to the financial statement or the specific element.

smaller, less complex entity. For purposes of specifying additional considerations to audits of smaller, less complex entities, this term refers to an entity that typically possesses qualitative characteristics, such as the following:

- a. Concentration of ownership and management in a small number of individuals; and
- b. One or more of the following:
 - i. Straightforward or uncomplicated transactions
 - ii. Simple record keeping
 - iii. Few lines of business and few products within business lines
 - iv. Few internal controls
 - v. Few levels of management with responsibility for a broad range of controls
 - vi. Few personnel, many having a wide range of duties

These qualitative characteristics are not exhaustive, they are not exclusive to smaller, less complex entities, and smaller, less complex entities do not necessarily display all of these characteristics.

special purpose financial statements. Financial statements prepared in accordance with a special purpose framework. Also see **financial statements**.

special purpose framework. A financial reporting framework other than GAAP that is one of the following bases of accounting:

- a. **cash basis.** A basis of accounting that the entity uses to record cash receipts and disbursements and modifications of the cash basis having substantial support (for example, recording depreciation on fixed assets).
- b. **tax basis.** A basis of accounting that the entity uses to file its tax return for the period covered by the financial statements.
- c. **regulatory basis.** A basis of accounting that the entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject (for example, a basis of accounting that insurance companies use pursuant to the accounting practices prescribed or permitted by a state insurance commission).
- d. **contractual basis.** A basis of accounting that the entity uses to comply with an agreement between the entity and one or more third parties other than the auditor.
- e. **other basis.** A basis of accounting that uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements.

The cash basis, tax basis, regulatory basis, and other basis of accounting are commonly referred to as *other comprehensive bases of accounting*. Also see **financial reporting framework**.

specialist. See **auditor's specialist**.

specific element of a financial statement. See **single financial statement**.

specific transaction (in the context of section 915). A completed or proposed transaction or group of related transactions or a financial reporting issue involving facts and circumstances of a specific entity.

specified parties. The intended users of the auditor's written communication.

staff.²⁷ Professionals, other than partners, including any specialists that the firm employs.

statistical sampling. An approach to sampling that has the following characteristics:

- a. Random selection of the sample items
- b. The use of an appropriate statistical technique to evaluate sample results, including measurement of sampling risk

A sampling approach that does not have characteristics *a* and *b* is considered nonstatistical sampling.

stratification. The process of dividing a population into subpopulations, each of which is a group of sampling units that have similar characteristics.

subsequent events. Events occurring between the date of the financial statements and the date of the auditor's report.

subsequently discovered facts. Facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

subservice organization. A service organization used by another service organization to perform some of the services provided to user entities that are relevant to those user entities' internal control over financial reporting. Also see **service organization** and **user entity**.

substantive analytical procedures. See **analytical procedures** and **substantive procedure**.

substantive procedure. An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise

- a. tests of details (classes of transactions, account balances, and disclosures) and
- b. substantive analytical procedures.

Also see **analytical procedures**, **dual purpose test**, and **test of controls**.

successor auditor. See **auditor**.

sufficiency (of audit evidence). The measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence. Also see **audit evidence**.

²⁷ See footnote 7.

suitably qualified external person.²⁸ An individual outside the firm with the competence and capabilities to act as an engagement partner (for example, a partner of another firm).

summary financial statements (in the context of section 810). Historical financial information that is derived from financial statements but that contains less detail than the financial statements, while still providing a structured representation consistent with that provided by the financial statements of the entity's economic resources or obligations at a point in time or the changes therein for a period of time. Summary financial statements are separately presented and are not presented as comparative information. Also see **comparative information** and **financial statements**.

supplementary information. Information presented outside the basic financial statements, excluding required supplementary information that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements. Also see **required supplementary information**.

tax basis. A basis of accounting that the entity uses to file its tax return for the period covered by the financial statements.

The *tax basis* of accounting is commonly referred to as an *other comprehensive basis of accounting*. In the context of section 800, the tax basis of accounting is not a regulatory basis of accounting. Also see **other comprehensive bases of accounting** and **special purpose framework**.

test of controls. An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level. Also see **dual purpose test** and **substantive procedure**.

those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager. Also see **management**.

threatened legal proceeding. A potential claimant has manifested to the auditor an awareness of, and a present intention to assert, a possible claim.

timing of an audit procedure. Refers to when an audit procedure is performed or the period or date to which the audit evidence applies. Also see **extent of an audit procedure** and **nature of an audit procedure**.

tolerable misstatement. A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population.

Tolerable misstatement is also the application of performance materiality to a particular sampling procedure. Also see **performance materiality**.

tolerable rate of deviation. A rate of deviation set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that

²⁸ See footnote 7.

the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

type 1 report. See **report on management's description of a service organization's system and the suitability of the design of controls.**

type 2 report. See **report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls.**

type of an audit procedure. See **nature of an audit procedure.**

unconditional requirements.²⁹ The category of professional requirements with which the auditor must comply in all cases in which such a requirement is relevant. GAAS use the word "must" to indicate an unconditional requirement. Also see **generally accepted auditing standards (GAAS)** and **presumptively mandatory requirements.**

uncorrected misstatements. Misstatements that the auditor has accumulated during the audit and that have not been corrected. Also see **misstatement.**

understanding of the entity. Obtaining an understanding of the entity and its environment, including the entity's internal control.

underwriter (in the context of section 920). As defined in the 1933 Act

any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking; but such term shall not include a person whose interest is limited to a commission from an underwriter or dealer not in excess of the usual and customary distributors' or sellers' commission. As used in this paragraph, the term "issuer" shall include, in addition to an issuer, any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer.

Except when the context otherwise requires, the word *underwriter* as used in section 920, refers to the managing, or lead, underwriter, who typically negotiates the underwriting agreement or purchase agreement (hereafter referred to as the *underwriting agreement*) for a group of underwriters whose exact composition is not determined until shortly before a securities offering becomes effective.

underwriting agreement. See **underwriter.**

unmodified opinion. The opinion expressed by the auditor when the auditor concludes that the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. Also see **group audit opinion** and **modified opinion.**

unobservable inputs (or equivalent). With respect to fair value accounting estimates, assumptions or inputs that reflect the entity's own judgments about what assumptions market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Also see **inputs** and **observable inputs** (or equivalent).

user auditor. An auditor who audits and reports on the financial statements of a user entity. Also see **auditor.**

²⁹ See footnote 22.

user entity. An entity that uses a service organization and whose financial statements are being audited. Also see **service organization** and **sub-service organization**.

working papers or **workpapers.** See **audit documentation** and **engagement documentation**.

written report (in the context of section 915). Any written communication that provides a conclusion on the appropriate application of the requirements of an applicable financial reporting framework to a specific transaction or on the type of report that may be issued on a specific entity's financial statements.

written representation. A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

Yellow Book. See *Government Auditing Standards*.

AU-C Sections 200–299

GENERAL PRINCIPLES AND RESPONSIBILITIES

The following is a Codification of Statements on Auditing Standards (SASs) resulting from the Clarification and Convergence Project of the Auditing Standards Board (ASB), and related Auditing Interpretations. SASs are issued by the ASB, the senior committee of the AICPA designated to issue pronouncements on auditing matters. Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), of the Code of Professional Conduct requires adherence to the applicable generally accepted auditing standards (GAAS) promulgated by the ASB. An auditor is required to comply with an unconditional requirement in all cases in which the circumstances exist to which the unconditional requirement applies. An auditor is also required to comply with a presumptively mandatory requirement in all cases in which the circumstances exist to which the presumptively mandatory requirement applies; however, in rare circumstances, an auditor may depart from a presumptively mandatory requirement provided the auditor documents justification for the departure and how the alternative procedures performed in the circumstances were sufficient to achieve the objectives of the presumptively mandatory requirement.

Exhibits in GAAS and auditing interpretations of GAAS are *interpretive publications*, as defined in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. Section 200 requires the auditor to consider applicable interpretive publications in planning and performing the audit. Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. Auditing interpretations of GAAS are included in AU-C sections. AICPA Audit and Accounting Guides and Auditing Statements of Position are listed in AU-C appendix D, *AICPA Audit and Accounting Guides and Statements of Position*.

AU-C Section 200

Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards

Source: SAS No. 122; SAS No. 123.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the independent auditor's overall responsibilities when conducting an audit of financial statements in accordance with generally accepted auditing standards (GAAS). Specifically, it sets out the overall objectives of the independent auditor (the auditor) and explains the nature and scope of an audit designed to enable the auditor to meet those objectives. It also explains the scope, authority, and structure of GAAS and includes requirements establishing the general responsibilities of the auditor applicable in all audits, including the obligation to comply with GAAS.

.02 GAAS are developed and issued in the form of Statements on Auditing Standards (SASs) and are codified into AU-C sections. GAAS are written in the context of an audit of financial statements by an auditor. They are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. GAAS do not address the responsibilities of the auditor that may exist in legislation, regulation, or otherwise, in connection with, for example, the offering of securities to the public. Such responsibilities may differ from those established in GAAS. Accordingly, although the auditor may find aspects of GAAS helpful in such circumstances, it is the responsibility of the auditor to ensure compliance with all relevant legal, regulatory, or professional obligations.

Association With Financial Statements

.03 An auditor is associated with financial information when the auditor has applied procedures sufficient to permit the auditor to report in

accordance with GAAS. Statements on Standards for Accounting and Review Services address the accountant's considerations when the accountant prepares and presents financial statements to the entity or to third parties.

An Audit of Financial Statements

.04 The purpose of an audit is to provide financial statement users with an opinion by the auditor on whether the financial statements are presented fairly, in all material respects, in accordance with an applicable financial reporting framework, which enhances the degree of confidence that intended users can place in the financial statements. An audit conducted in accordance with GAAS and relevant ethical requirements enables the auditor to form that opinion. (Ref: par. .A1)

.05 The financial statements subject to audit are those of the entity, prepared and presented by management of the entity with oversight from those charged with governance. GAAS do not impose responsibilities on management or those charged with governance and do not override laws and regulations that govern their responsibilities. However, an audit in accordance with GAAS is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged certain responsibilities that are fundamental to the conduct of the audit. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities. (Ref: par. .A2–.A13)

.06 As the basis for the auditor's opinion, GAAS require the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance is a high, but not absolute, level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level. Reasonable assurance is not an absolute level of assurance because there are inherent limitations of an audit that result in most of the audit evidence, on which the auditor draws conclusions and bases the auditor's opinion, being persuasive rather than conclusive. (Ref: par. .A32–.A56)

.07 The concept of materiality is applied by the auditor when both planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and uncorrected misstatements, if any, on the financial statements.¹ In general, misstatements, including omissions, are considered to be material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users that are taken based on the financial statements. Judgments about materiality are made in light of surrounding circumstances, and involve both qualitative and quantitative considerations. These judgments are affected by the auditor's perception of the financial information needs of users of the financial statements, and by the size or nature of a misstatement, or both. The auditor's opinion addresses the financial statements as a whole. Therefore, the auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by fraud or error, that are not material to the financial statements as a whole, are detected. (Ref: par. .A14)

.08 GAAS contain objectives, requirements, and application and other explanatory material that are designed to support the auditor in obtaining

¹ See section 320, *Materiality in Planning and Performing an Audit*, and section 450, *Evaluation of Misstatements Identified During the Audit*.

reasonable assurance. GAAS require that the auditor exercise professional judgment and maintain professional skepticism throughout the planning and performance of the audit and, among other things,

- identify and assess risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal control.
- obtain sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks.
- form an opinion on the financial statements, or determine that an opinion cannot be formed, based on an evaluation of the audit evidence obtained.

.09 The form of opinion expressed by the auditor will depend upon the applicable financial reporting framework and any applicable law or regulation.

.10 The auditor also may have certain other communication and reporting responsibilities to users, management, those charged with governance, or parties outside the entity, regarding matters arising from the audit. These responsibilities may be established by GAAS or by applicable law or regulation.²

Effective Date

.11 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Overall Objectives of the Auditor

.12 The overall objectives of the auditor, in conducting an audit of financial statements, are to

- a. obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with an applicable financial reporting framework; and
- b. report on the financial statements, and communicate as required by GAAS, in accordance with the auditor's findings.

.13 In all cases when reasonable assurance cannot be obtained and a qualified opinion in the auditor's report is insufficient in the circumstances for purposes of reporting to the intended users of the financial statements, GAAS require that the auditor disclaim an opinion or withdraw from the engagement, when withdrawal is possible under applicable law or regulation.

Definitions

.14 For purposes of GAAS, the following terms have the meanings attributed as follows:

Applicable financial reporting framework. The financial reporting framework adopted by management and, when appropriate,

² For examples, see section 260, *The Auditor's Communication With Those Charged With Governance*; section 265, *Communicating Internal Control Related Matters Identified in an Audit*; and paragraph .42 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

those charged with governance in the preparation and fair presentation of the financial statements that is acceptable in view of the nature of the entity and the objective of the financial statements, or that is required by law or regulation.

Audit evidence. Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information. *Sufficiency of audit evidence* is the measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence. *Appropriateness of audit evidence* is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based.

Audit risk. The risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.

Auditor. The term used to refer to the person or persons conducting the audit, usually the engagement partner or other members of the engagement team, or, as applicable, the firm. When an AU-C section expressly intends that a requirement or responsibility be fulfilled by the engagement partner, the term *engagement partner* rather than *auditor* is used. *Engagement partner* and *firm* are to be read as referring to their governmental equivalents when relevant.

Detection risk. The risk that the procedures performed by the auditor to reduce audit risk to an acceptably low level will not detect a misstatement that exists and that could be material, either individually or when aggregated with other misstatements.

Financial reporting framework. A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements; for example, U.S. generally accepted accounting principles, International Financial Reporting Standards (IFRSs) promulgated by the International Accounting Standards Board (IASB), or a special purpose framework.³

The term *fair presentation framework* is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and

- a. acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
- b. acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

³ See section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*.

A financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgments in (a) or (b) is not a fair presentation framework.

Financial statements. A structured representation of historical financial information, including related notes, intended to communicate an entity's economic resources and obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. The related notes ordinarily comprise a summary of significant accounting policies and other explanatory information. The term *financial statements* ordinarily refers to a complete set of financial statements as determined by the requirements of the applicable financial reporting framework, but can also refer to a single financial statement.

Historical financial information. Information expressed in financial terms regarding a particular entity, derived primarily from that entity's accounting system, about economic events occurring in past time periods or about economic conditions or circumstances at points in time in the past.

Interpretive publications. Auditing interpretations of GAAS, exhibits to GAAS, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA Auditing Statements of Position (SOP).

Management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

Misstatement. A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error.

Other auditing publications. Publications other than interpretive publications; these include AICPA auditing publications not defined as interpretive publications; auditing articles in the *Journal of Accountancy* and other professional journals; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.

Premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted (the premise). Management and, when appropriate, those charged with governance have acknowledged and understand that they have the following responsibilities that are fundamental to the conduct of an audit in accordance with GAAS; that is, responsibility

- a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair

General Principles and Responsibilities

- presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- c. to provide the auditor with
 - i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;
 - ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and
 - iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

The premise, relating to the responsibilities of management and, when appropriate, those charged with governance, on which an audit is conducted may also be referred to as the premise.

Professional judgment. The application of relevant training, knowledge, and experience, within the context provided by auditing, accounting, and ethical standards, in making informed decisions about the courses of action that are appropriate in the circumstances of the audit engagement.

Professional skepticism. An attitude that includes a questioning mind, being alert to conditions that may indicate possible misstatement due to fraud or error, and a critical assessment of audit evidence.

Reasonable assurance. In the context of an audit of financial statements, a high, but not absolute, level of assurance.

Risk of material misstatement. The risk that the financial statements are materially misstated prior to the audit. This consists of two components, described as follows at the assertion level:

Inherent risk. The susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.

Control risk. The risk that a misstatement that could occur in an assertion about a class of transaction, account balance, or disclosure and that could be material, either individually or when aggregated with other misstatements, will not be prevented, or detected and corrected, on a timely basis by the entity's internal control.

Those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager.

Requirements

Ethical Requirements Relating to an Audit of Financial Statements

.15 The auditor must be independent of the entity when performing an engagement in accordance with GAAS unless (a) GAAS provides otherwise or (b) the auditor is required by law or regulation to accept the engagement and report on the financial statements. When the auditor is not independent and neither (a) nor (b) are applicable, the auditor is precluded from issuing a report under GAAS.

.16 The auditor should comply with relevant ethical requirements relating to financial statement audit engagements. (Ref: par. .A15–.A21)

Professional Skepticism

.17 The auditor should plan and perform an audit with professional skepticism, recognizing that circumstances may exist that cause the financial statements to be materially misstated. (Ref: par. .A22–.A26)

Professional Judgment

.18 The auditor should exercise professional judgment in planning and performing an audit of financial statements. (Ref: par. .A27–.A31)

Sufficient Appropriate Audit Evidence and Audit Risk

.19 To obtain reasonable assurance, the auditor should obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion. (Ref: par. .A32–.A56)

Conduct of an Audit in Accordance With GAAS

Complying With AU-C Sections Relevant to the Audit

.20 The auditor should comply with all AU-C sections relevant to the audit. An AU-C section is relevant to the audit when the AU-C section is in effect and the circumstances addressed by the AU-C section exist. (Ref: par. .A57–.A62)

.21 The auditor should have an understanding of the entire text of an AU-C section, including its application and other explanatory material, to understand its objectives and to apply its requirements properly. (Ref: par. .A63–.A71)

.22 The auditor should not represent compliance with GAAS in the auditor's report unless the auditor has complied with the requirements of this section and all other AU-C sections relevant to the audit.

Objectives Stated in Individual AU-C Sections

.23 To achieve the overall objectives of the auditor, the auditor should use the objectives stated in individual AU-C sections in planning and performing the audit considering the interrelationships within GAAS to (Ref: par. .A72–.A74)

- a. determine whether any audit procedures in addition to those required by individual AU-C sections are necessary in pursuance of the objectives stated in each AU-C section; and (Ref: par. .A75)
- b. evaluate whether sufficient appropriate audit evidence has been obtained. (Ref: par. .A76)

Complying With Relevant Requirements

.24 Subject to paragraph .26, the auditor should comply with each requirement of an AU-C section unless, in the circumstances of the audit,

- a. the entire AU-C section is not relevant; or
- b. the requirement is not relevant because it is conditional and the condition does not exist. (Ref: par. .A77–.A78)

Defining Professional Responsibilities in GAAS

.25 GAAS use the following two categories of professional requirements, identified by specific terms, to describe the degree of responsibility it imposes on auditors:

- Unconditional requirements. The auditor must comply with an unconditional requirement in all cases in which such requirement is relevant. GAAS use the word "must" to indicate an unconditional requirement.
- Presumptively mandatory requirements. The auditor must comply with a presumptively mandatory requirement in all cases in which such a requirement is relevant except in rare circumstances discussed in paragraph .26. GAAS use the word "should" to indicate a presumptively mandatory requirement. (Ref: par. .A79)

.26 In rare circumstances, the auditor may judge it necessary to depart from a relevant presumptively mandatory requirement. In such circumstances, the auditor should perform alternative audit procedures to achieve the intent of that requirement. The need for the auditor to depart from a relevant presumptively mandatory requirement is expected to arise only when the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective in achieving the intent of the requirement. (Ref: par. .A80)

Interpretive Publications

.27 The auditor should consider applicable interpretive publications in planning and performing the audit. (Ref: par. .A81)

Other Auditing Publications

.28 In applying the auditing guidance included in an other auditing publication, the auditor should, exercising professional judgment, assess the relevance and appropriateness of such guidance to the circumstances of the audit. (Ref: par. .A82–.A84)

Failure to Achieve an Objective

.29 If an objective in a relevant AU-C section cannot be achieved, the auditor should evaluate whether this prevents the auditor from achieving the overall objectives of the auditor and thereby requires the auditor, in accordance with GAAS, to modify the auditor's opinion or withdraw from the engagement (when withdrawal is possible under applicable law or regulation). Failure to achieve

an objective represents a significant finding or issue requiring documentation in accordance with section 230, *Audit Documentation*.⁴ (Ref: par. .A85–.A86)

Application and Other Explanatory Material

An Audit of Financial Statements

Scope of the Audit (Ref: par. .04)

.A1 The auditor's opinion on the financial statements addresses whether the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework. Such an opinion is common to all audits of financial statements. The auditor's opinion, therefore, does not assure, for example, the future viability of the entity nor the efficiency or effectiveness with which management has conducted the affairs of the entity. In some circumstances, however, applicable law or regulation may require auditors to provide opinions on other specific matters, such as the effectiveness of internal control. Although GAAS include requirements and regarding such matters to the extent that they are relevant to forming an opinion on the financial statements, the auditor would be required to undertake further work if the auditor had additional responsibilities to provide such opinions.

Preparation and Fair Presentation of the Financial Statements (Ref: par. .05)

.A2 An audit in accordance with GAAS is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged and understand that they have responsibility

- a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework;
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- c. to provide the auditor with
 - i. access to all information of which management and, when appropriate, those charged with governance are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;
 - ii. additional information that the auditor may request from management and, when appropriate, those charged with governance for the purpose of the audit; and
 - iii. unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

.A3 The preparation and fair presentation of the financial statements by management and, when appropriate, those charged with governance require

- the identification of the applicable financial reporting framework, in the context of any relevant laws or regulations.

⁴ Paragraph .08c of section 230, *Audit Documentation*.

- the preparation and fair presentation of the financial statements in accordance with that framework.
- the inclusion of an adequate description of that framework in the financial statements.

The preparation and fair presentation of the financial statements require management to exercise judgment in making accounting estimates that are reasonable in the circumstances, as well as in selecting and applying appropriate accounting policies. These judgments are made in the context of the applicable financial reporting framework.

.A4 The auditor may make suggestions about the form or content of the financial statements, or assist management by preparing them, in whole or in part, based on information provided to the auditor by management during the performance of the audit.* However, the auditor's responsibility for the audited financial statements is confined to the expression of the auditor's opinion on them.

[Revised, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3.]

.A5 The financial statements may be prepared in accordance with the following:

- A general purpose framework (a financial reporting framework designed to meet the common financial information needs of a wide range of users); or
- A special purpose framework (a financial reporting framework, other than generally accepted accounting principles, which is a cash, tax, regulatory, contractual basis of accounting, or other basis of accounting; an other basis of accounting uses a definite set of logical, reasonable criteria that is applied to all material items appearing in financial statements).

[Revised, July 2013, to reflect conforming changes necessary due to the issuance of SAS No. 127.]

.A6 The applicable financial reporting framework often encompasses financial accounting standards promulgated by an authorized or recognized standards-setting organization, or legislative or regulatory requirements. In some cases, the financial reporting framework may encompass both financial accounting standards promulgated by an authorized or recognized standards-setting organization and legislative or regulatory requirements. Other sources may provide direction on the application of the applicable financial reporting framework. In some cases, the applicable financial reporting framework may encompass such other sources, or may even consist only of such sources. Such other sources may include the following:

- The legal and ethical environment, including statutes, regulations, court decisions, and professional ethical obligations regarding accounting matters;

* In January 2013, the Professional Ethics Executive Committee adopted a provision in the "Activities Related to Attest Services" section of Interpretation No. 101-3, "Nonattest Services," under Rule 101, *Independence* (ET sec. 101 par. .05), of the AICPA Code of Professional Conduct. This provision provides, among other things, that financial statement preparation is considered outside the scope of the attest engagement and, therefore, constitutes a nonattest service subject to the general requirements of the interpretation. The provision is effective for engagements covering periods beginning on or after December 15, 2014. [Footnote added, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3.]

- Published accounting interpretations of varying authority issued by standards-setting, professional, or regulatory organizations;
- Published views of varying authority on emerging accounting issues issued by standards-setting, professional, or regulatory organizations;
- General and industry practices widely recognized and prevalent; and
- Accounting literature.

When conflicts exist between the financial reporting framework and the sources from which direction on its application may be obtained, or among the sources that encompass the financial reporting framework, the source with the highest authority prevails.

.A7 The requirements of the applicable financial reporting framework determine the form and content of the financial statements. Although the framework may not specify how to account for or disclose all transactions or events, it ordinarily embodies sufficiently broad principles that can serve as a basis for developing and applying accounting policies that are consistent with the concepts underlying the requirements of the framework.

.A8 The financial accounting standards promulgated by organizations that are authorized or recognized to promulgate standards to be used by entities for preparing financial statements in accordance with a general purpose framework include Financial Accounting Standards Board (FASB) *Accounting Standards Codification*, issued by FASB; IFRSs, issued by the IASB; Statements of Federal Financial Accounting Standards, issued by the Federal Accounting Standards Advisory Board for U.S. federal government entities; and Statements of the Governmental Accounting Standards Board, issued by the Governmental Accounting Standards Board for U.S. state and local governmental entities.

.A9 The requirements of the applicable financial reporting framework also determine what constitutes a complete set of financial statements. In the case of many frameworks, financial statements are intended to provide information about the financial position, financial performance, and cash flows of an entity. For example, a complete set of financial statements might include a balance sheet, an income statement, a statement of changes in equity, a cash flow statement, and related notes. For some other financial reporting frameworks, a single financial statement and the related notes might constitute a complete set of financial statements. Examples of a single financial statement, each of which would include related notes, include the following:

- Balance sheet
- Statement of income or statement of operations
- Statement of retained earnings
- Statement of cash flows
- Statement of assets and liabilities
- Statement of changes in owners' equity
- Statement of revenue and expenses
- Statement of operations by product lines

.A10 Section 210, *Terms of Engagement*, establishes requirements and provides guidance on determining the acceptability of the applicable financial

reporting framework.⁵ Section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses engagements in which the auditor issues a report in connection with financial statements prepared in accordance with a special purpose framework.

.A11 Because of the significance of the premise to the conduct of an audit, the auditor is required to obtain the agreement of management and, when appropriate, those charged with governance, that they acknowledge and understand that they have the responsibilities set out in paragraph .A2 as a precondition for accepting the audit engagement.⁶

Considerations Specific to Audits of Governmental Entities

.A12 The requirements for audits of the financial statements of governmental entities may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of a governmental entity is conducted, may include additional responsibilities, such as the responsibility for the execution of transactions and events in accordance with law, regulation, or other authority. (See paragraph .A63.)

.A13 In audits of governmental entities, auditors may have a responsibility under law, regulation, contract, or grant agreement to report to third parties, such as funding agencies or oversight bodies.

Materiality (Ref: par. .07)

Considerations Specific to Audits of Governmental Entities

.A14 For most state or local governmental entities, the applicable financial reporting framework is based on multiple reporting units, and therefore requires the presentation of financial statements for its activities in various reporting units. Consequently, a reporting unit, or aggregation of reporting units, of the governmental entity represents an opinion unit to the auditor. Generally, the auditor expresses or disclaims an opinion on a government's financial statements as a whole by expressing an opinion or disclaiming an opinion on each opinion unit. In this context, the auditor is responsible for the detection of misstatements that are material to an opinion unit within a governmental entity, but is not responsible for the detection of misstatements that are not material to an opinion unit.

Ethical Requirements Relating to an Audit of Financial Statements (Ref: par. .16)

.A15 The auditor is subject to relevant ethical requirements relating to financial statement audit engagements. Ethical requirements consist of the AICPA Code of Professional Conduct together with rules of state boards of accountancy and applicable regulatory agencies that are more restrictive.

.A16 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence

⁵ Paragraph .06a of section 210, *Terms of Engagement*.

⁶ Paragraph .06b of section 210.

- Due care
- Scope and nature of services

.A17 In the case of an audit engagement, it is in the public interest and, therefore, required by this section, that the auditor be independent of the entity subject to the audit. The concept of independence refers to both independence in fact and independence in appearance. The auditor's independence from the entity safeguards the auditor's ability to form an audit opinion without being affected by influences that might compromise that opinion. Independence enhances the auditor's ability to act with integrity, to be objective, and to maintain an attitude of professional skepticism. Independence implies an impartiality that recognizes an obligation to be fair not only to management and those charged with governance of an entity but also users of the financial statements who may rely upon the independent auditor's report. Guidance on threats to independence is set forth in the AICPA's *Conceptual Framework for AICPA Independence Standards* (ET sec. 100-1).

.A18 When the auditor is not independent but is required by law or regulation to report on the financial statements, section 705, *Modifications to the Opinion in the Independent Auditor's Report*, applies.

.A19 Due care requires the auditor to discharge professional responsibilities with competence and to have the appropriate capabilities to perform the audit and enable an appropriate auditor's report to be issued.

.A20 QC section 10, *A Firm's System of Quality Control*, sets out the firm's responsibilities to establish and maintain its system of quality control for audit engagements, and to establish policies and procedures designed to provide it with reasonable assurance that the firm and its personnel comply with relevant ethical requirements, including those pertaining to independence.⁷ Section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, addresses the engagement partner's responsibilities regarding relevant ethical requirements. These include remaining alert for evidence of noncompliance with relevant ethical requirements by members of the engagement team, determining, in consultation with others in the firm as appropriate, the appropriate action if matters come to the engagement partner's attention, through the firm's system of quality control or otherwise, that indicate that members of the engagement team have not complied with relevant ethical requirements, and forming a conclusion on compliance with independence requirements that apply to the audit engagement.⁸ Section 220 recognizes that the engagement team is entitled to rely on a firm's system of quality control in meeting its responsibilities with respect to quality control procedures applicable to the individual audit engagement, unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties.

Considerations Specific to Audits of Governmental Entities

.A21 In addition to the AICPA Code of Professional Conduct and GAAS, *Government Auditing Standards*, which may be required by law, regulation, contract, or grant agreement in audits of governmental entities and entities that receive government awards, set forth relevant ethical principles and auditing standards, including standards on auditor independence, professional judgment, competence, and audit quality control and assurance.

⁷ Paragraphs .21–.25 of QC section 10, *A Firm's System of Quality Control*.

⁸ Paragraphs .11–.13 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

Professional Skepticism (Ref: par. .17)

.A22 Professional skepticism includes being alert to the following, for example,

- Audit evidence that contradicts other audit evidence obtained.
- Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.
- Conditions that may indicate possible fraud.
- Circumstances that suggest the need for audit procedures in addition to those required by GAAS.

.A23 Maintaining professional skepticism throughout the audit is necessary if the auditor is, for example, to reduce the risks of

- overlooking unusual circumstances.
- over-generalizing when drawing conclusions from audit observations.
- using inappropriate assumptions in determining the nature, timing, and extent of the audit procedures and evaluating the results thereof.

.A24 Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management and those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in light of the circumstances; for example, in the case when fraud risk factors exist and a single document, of a nature that is susceptible to fraud, is the sole supporting evidence for a material financial statement amount.

.A25 The auditor may accept records and documents as genuine unless the auditor has reason to believe the contrary. Nevertheless, the auditor is required to consider the reliability of information to be used as audit evidence.⁹ In cases of doubt about the reliability of information or indications of possible fraud (for example, if conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document may have been falsified), GAAS require that the auditor investigate further and determine what modifications or additions to audit procedures are necessary to resolve the matter.¹⁰

.A26 The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less than persuasive audit evidence when obtaining reasonable assurance.

Professional Judgment (Ref: par. .18)

.A27 Professional judgment is essential to the proper conduct of an audit. This is because interpretation of relevant ethical requirements and GAAS and

⁹ Paragraphs .07–.09 of section 500, *Audit Evidence*.

¹⁰ Paragraph .10 of section 500 and paragraphs .10–.11 and .16 of section 505, *External Confirmations*.

the informed decisions required throughout the audit cannot be made without the application of relevant knowledge and experience to the facts and circumstances. In particular, professional judgment is necessary regarding decisions about the following:

- Materiality and audit risk
- The nature, timing, and extent of audit procedures used to meet the requirements of GAAS and gather audit evidence
- Evaluating whether sufficient appropriate audit evidence has been obtained, and whether more needs to be done to achieve the objectives of GAAS and thereby, the overall objectives of the auditor
- The evaluation of management's judgments in applying the entity's applicable financial reporting framework
- The drawing of conclusions based on the audit evidence obtained; for example, assessing the reasonableness of the estimates made by management in preparing the financial statements

.A28 The distinguishing feature of professional judgment expected of an auditor is that such judgment is exercised based on competencies necessary to achieve reasonable judgments, developed by the auditor through relevant training, knowledge, and experience.

.A29 The exercise of professional judgment in any particular case is based on the facts and circumstances that are known by the auditor. Consultation on difficult or contentious matters during the course of the audit, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm, such as those required by section 220, assists the auditor in making informed and reasonable judgments.¹¹

.A30 Professional judgment can be evaluated based on whether the judgment reached reflects a competent application of auditing standards and accounting principles and is appropriate in light of, and consistent with, the facts and circumstances that were known to the auditor up to the date of the auditor's report.

.A31 Professional judgment needs to be exercised throughout the audit. It also needs to be appropriately documented. In this regard, the auditor is required to prepare audit documentation sufficient to enable an experienced auditor, having no previous connection with the audit, to understand the significant professional judgments made in reaching conclusions on significant findings or issues arising during the audit.¹² Professional judgment is not to be used as the justification for decisions that are not otherwise supported by the facts and circumstances of the engagement or by sufficient appropriate audit evidence.

Sufficient Appropriate Audit Evidence and Audit Risk (Ref: par. .19)

Sufficiency and Appropriateness of Audit Evidence

.A32 Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures

¹¹ Paragraph .20 of section 220.

¹² Paragraph .08 of section 230.

performed during the course of the audit. It may, however, also include information obtained from other sources such as previous audits (provided the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit¹³) or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared by a specialist employed or engaged by the entity. Audit evidence comprises both information that supports and corroborates management's assertions and any information that contradicts such assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor, and, therefore, also constitutes audit evidence. Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence.

A33 The sufficiency and appropriateness of audit evidence are interrelated. *Sufficiency* is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate for its poor quality.

A34 *Appropriateness* is the measure of the quality of audit evidence; that is, its relevance and its reliability in providing support for the conclusions on which the auditor's opinion is based. The reliability of evidence is influenced by its source and by its nature, and is dependent on the individual circumstances under which it is obtained.

A35 Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby to enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. Section 500, *Audit Evidence*, and other relevant AU-C sections, establish additional requirements and provide further guidance applicable throughout the audit regarding the auditor's considerations in obtaining sufficient appropriate audit evidence.

Audit Risk

A36 Audit risk is a function of the risks of material misstatement and detection risk. The assessment of risks is based on audit procedures to obtain information necessary for that purpose and evidence obtained throughout the audit. The assessment of risks is a matter of professional judgment, rather than a matter capable of precise measurement.

A37 For purposes of GAAS, audit risk does not include the risk that the auditor might express an opinion that the financial statements are materially misstated when they are not. This risk is ordinarily insignificant. Further, audit risk is a technical term related to the process of auditing; it does not refer to the auditor's business risks, such as loss from litigation, adverse publicity, or other events arising in connection with the audit of financial statements.

Risks of Material Misstatement

A38 The risks of material misstatement exist at two levels:

- The overall financial statement level

¹³ Paragraph .10 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

- The assertion level for classes of transactions, account balances, and disclosures

.A39 Risks of material misstatement at the overall financial statement level refer to risks of material misstatement that relate pervasively to the financial statements as a whole and potentially affect many assertions.

.A40 Risks of material misstatement at the assertion level are assessed in order to determine the nature, timing, and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk. Auditors use various approaches to accomplish the objective of assessing the risks of material misstatement. For example, the auditor may make use of a model that expresses the general relationship of the components of audit risk in mathematical terms to arrive at an acceptable level of detection risk. Some auditors find such a model to be useful when planning audit procedures.

.A41 The risks of material misstatement at the assertion level consist of two components: inherent risk and control risk. Inherent risk and control risk are the entity's risks; they exist independently of the audit of the financial statements.

.A42 Inherent risk is higher for some assertions and related classes of transactions, account balances, and disclosures than for others. For example, it may be higher for complex calculations or for accounts consisting of amounts derived from accounting estimates that are subject to significant estimation uncertainty. External circumstances giving rise to business risks may also influence inherent risk. For example, technological developments might make a particular product obsolete, thereby causing inventory to be more susceptible to overstatement. Factors in the entity and its environment that relate to several or all of the classes of transactions, account balances, or disclosures may also influence the inherent risk related to a specific assertion. Such factors may include, for example, a lack of sufficient working capital to continue operations or a declining industry characterized by a large number of business failures.

.A43 Control risk is a function of the effectiveness of the design, implementation, and maintenance of internal control by management to address identified risks that threaten the achievement of the entity's objectives relevant to preparation and fair presentation of the entity's financial statements. However, internal control, no matter how well designed and operated, can only reduce, but not eliminate, risks of material misstatement in the financial statements, because of the inherent limitations of internal control. These include, for example, the possibility of human errors or mistakes, or of controls being circumvented by collusion or inappropriate management override. Accordingly, some control risk will always exist. GAAS provide the conditions under which the auditor is required to, or may choose to, test the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures to be performed.¹⁴

.A44 GAAS do not ordinarily refer to inherent risk and control risk separately, but rather to a combined assessment of the risks of material misstatement. However, the auditor may make separate or combined assessments of inherent and control risk depending on preferred audit techniques or methodologies and practical considerations. The assessment of the risks of material misstatement may be expressed in quantitative terms, such as in percentages

¹⁴ Paragraph .08 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

or in nonquantitative terms. In any case, the need for the auditor to make appropriate risk assessments is more important than the different approaches by which they may be made.

.A45 Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, establishes requirements and provides guidance on identifying and assessing the risks of material misstatement at the financial statement and assertion levels.

Detection Risk

.A46 For a given level of audit risk, the acceptable level of detection risk bears an inverse relationship to the assessed risks of material misstatement at the assertion level. For example, the greater the risks of material misstatement the auditor believes exists, the less the detection risk that can be accepted and, accordingly, the more persuasive the audit evidence required by the auditor.

.A47 Detection risk relates to the nature, timing, and extent of the auditor's procedures that are determined by the auditor to reduce audit risk to an acceptably low level. It is therefore a function of the effectiveness of an audit procedure and of its application by the auditor. The following matters assist to enhance the effectiveness of an audit procedure and of its application and reduce the possibility that an auditor might select an inappropriate audit procedure, misapply an appropriate audit procedure, or misinterpret the audit results:

- Adequate planning
- Proper assignment of personnel to the engagement team
- The application of professional skepticism
- Supervision and review of the audit work performed

.A48 Section 300, *Planning an Audit*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, establish requirements and provide guidance on planning an audit of financial statements and the auditor's responses to assessed risks. Detection risk, however, can only be reduced, not eliminated, because of the inherent limitations of an audit. Accordingly, some detection risk will always exist.

Inherent Limitations of an Audit

.A49 The auditor is not expected to, and cannot, reduce audit risk to zero and cannot, therefore, obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because inherent limitations of an audit exist, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. The principal inherent limitations of an audit arise from

- the nature of financial reporting;
- the nature of audit procedures; and
- the need for the audit to be conducted within a reasonable period of time and so as to achieve a balance between benefit and cost.

The Nature of Financial Reporting

.A50 The preparation and fair presentation of financial statements involves judgment by management in applying the requirements of the entity's applicable financial reporting framework to the facts and circumstances of the entity. In addition, many financial statement items involve subjective decisions

or assessments or a degree of uncertainty, and a range exists of acceptable interpretations or judgments that may be made. Consequently, some financial statement items are subject to an inherent level of variability that cannot be eliminated by the application of additional auditing procedures. For example, this is often the case with respect to certain accounting estimates that are dependent on predictions of future events. Nevertheless, GAAS require the auditor to give specific consideration to whether accounting estimates are reasonable in the context of the applicable financial reporting framework and to related disclosures, and to the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.¹⁵

The Nature of Audit Procedures

.A51 There are practical and legal limitations on the auditor's ability to obtain audit evidence. For example:

- There is the possibility that management or others may not provide, intentionally or unintentionally, the complete information that is relevant to the preparation and fair presentation of the financial statements or that has been requested by the auditor. Accordingly, the auditor cannot be certain of the completeness of information, even though the auditor has performed audit procedures to obtain assurance that all relevant information has been obtained.
- Fraud may involve sophisticated and carefully organized schemes designed to conceal it. Therefore, audit procedures used to gather audit evidence may be ineffective for detecting an intentional misstatement that involves, for example, collusion to falsify documentation that may cause the auditor to believe that audit evidence is valid when it is not. The auditor is neither trained as nor expected to be an expert in the authentication of documents.
- An audit is not an official investigation into alleged wrongdoing. Accordingly, the auditor is not given specific legal powers, such as the power of search, which may be necessary for such an investigation.

Timeliness of Financial Reporting and the Balance Between Benefit and Cost

.A52 The matter of difficulty, time, or cost involved is not in itself a valid basis for the auditor to omit an audit procedure for which there is no alternative or to be satisfied with audit evidence that is less than persuasive. Appropriate planning assists in making sufficient time and resources available for the conduct of the audit. Notwithstanding this, the relevance of information, and thereby its value, tends to diminish over time, and there is a balance to be struck between the reliability of information and its cost. This is recognized in certain financial reporting frameworks (see, for example, FASB's Statements of Financial Accounting Concepts). Therefore, there is an expectation by users of financial statements that the auditor will form an opinion on the financial statements within a reasonable period of time and so as to achieve a balance between benefit and cost, recognizing that it is impracticable to address all information that may exist or to pursue every matter exhaustively on the assumption that information is fraudulent or erroneous until proved otherwise.

.A53 Consequently, it is necessary for the auditor to

- plan the audit so that it will be performed in an effective manner;

¹⁵ See section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, and section 700, *Forming an Opinion and Reporting on Financial Statements*.

- direct audit effort to areas most expected to contain risks of material misstatement, whether due to fraud or error, with correspondingly less effort directed at other areas; and
- use testing and other means of examining populations for misstatements.

.A54 In light of the approaches described in paragraph .A53, GAAS contain requirements for the planning and performance of the audit and requires the auditor, among other things, to

- have a basis for the identification and assessment of risks of material misstatement at the financial statement and assertion levels by performing risk assessment procedures and related activities;¹⁶ and
- use testing and other means of examining populations in a manner that provides a reasonable basis for the auditor to draw conclusions about the population.¹⁷

Other Matters That Affect the Inherent Limitations of an Audit

.A55 In the case of certain assertions or subject matters, the potential effects of the inherent limitations on the auditor's ability to detect material misstatements are particularly significant. Such assertions or subject matters include the following:

- Fraud, particularly fraud involving senior management or collusion. See section 240, *Consideration of Fraud in a Financial Statement Audit*, for further discussion.
- The existence and completeness of related party relationships and transactions. See section 550, *Related Parties*, for further discussion.
- The occurrence of noncompliance with laws and regulations. See section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, for further discussion.
- Future events or conditions that may cause an entity to cease to continue as a going concern. See section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

Relevant AU-C sections identify specific audit procedures to assist in lessening the effect of the inherent limitations. [Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

.A56 Because of the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS. Accordingly, the subsequent discovery of a material misstatement of the financial statements resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with GAAS. However, the inherent limitations of an audit are not a justification for the auditor to be satisfied with less than persuasive audit evidence. Whether the auditor has performed an audit in accordance with GAAS is determined by the audit procedures performed in the circumstances, the sufficiency and appropriateness of the audit evidence obtained as a result thereof, and the

¹⁶ See section 315.

¹⁷ See section 330, section 500, section 520, *Analytical Procedures*, and section 530, *Audit Sampling*.

suitability of the auditor's report based on an evaluation of that evidence in light of the overall objectives of the auditor.

Conduct of an Audit in Accordance With GAAS

Nature of GAAS (Ref: par. .20)

.A57 Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), of the AICPA Code of Professional Conduct requires an AICPA member who performs an audit to comply with standards promulgated by the Auditing Standards Board (ASB). The ASB develops and issues standards in the form of SASs through a process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified in AU-C sections.

.A58 GAAS provide the standards for the auditor's work in fulfilling the overall objectives of the auditor. GAAS address the general responsibilities of the auditor, as well as the auditor's further considerations relevant to the application of those responsibilities to specific topics.

.A59 The scope, effective date, and any specific limitation of the applicability of a specific AU-C section are made clear in the AU-C section. Unless otherwise stated in the AU-C section, the auditor is permitted to apply an AU-C section before the effective date specified therein.

.A60 In certain audit engagements, the auditor also may be required to comply with other auditing requirements in addition to GAAS. GAAS do not override law or regulation that governs an audit of financial statements. In the event that such law or regulation differs from GAAS, an audit conducted only in accordance with law or regulation will not necessarily comply with GAAS.

.A61 The auditor may also conduct the audit in accordance with both GAAS and

- auditing standards promulgated by the Public Company Accounting Oversight Board,
- International Standards on Auditing,
- *Government Auditing Standards*, or
- auditing standards of a specific jurisdiction or country.

In such cases, in addition to complying with each of the AU-C sections relevant to the audit, it may be necessary for the auditor to perform additional audit procedures in order to comply with the other auditing standards.

Considerations Specific to Audits of Governmental Entities

.A62 GAAS are relevant to financial statement audits of governmental entities. The auditor's responsibilities, however, may be affected by law, regulation, or other authority (such as government policy requirements or resolutions of the legislature), which may encompass a broader scope than an audit of financial statements in accordance with GAAS. These additional responsibilities are not addressed in GAAS. *Government Auditing Standards* are relevant for engagements to audit U.S. government entities, and when required by law, regulation, contract, or grant agreement. The appendix to *Government Auditing Standards* includes a listing of some of the laws, regulations, and guidelines that require use of *Government Auditing Standards*.

Contents of GAAS (Ref: par. .21)

.A63 In addition to objectives and requirements, an AU-C section contains related guidance in the form of application and other explanatory material. It may also contain introductory material that provides context relevant to a proper understanding of the AU-C section and definitions. The entire text of an AU-C section, therefore, is relevant to an understanding of the objectives stated in an AU-C section and the proper application of the requirements of an AU-C section.

.A64 When necessary, the application and other explanatory material provides further explanation of the requirements of an AU-C section and guidance for carrying them out. In particular, it may

- explain more precisely what a requirement means or is intended to cover.
- include examples of procedures that may be appropriate in the circumstances.

Although such guidance does not in itself impose a requirement, it is relevant to the proper application of the requirements of an AU-C section. The auditor is required by paragraph .21 to understand the application and other explanatory material; how the auditor applies the guidance in the engagement depends on the exercise of professional judgment in the circumstances consistent with the objective of the AU-C section. The words "may," "might," and "could" are used to describe these actions and procedures. The application and other explanatory material may also provide background information on matters addressed in an AU-C section.

.A65 Appendixes form part of the application and other explanatory material. The purpose and intended use of an appendix are explained in the body of the related AU-C section or within the title and introduction of the appendix itself.

.A66 Introductory material may include, as needed, such matters as explanation of the following:

- The purpose and scope of the AU-C section, including how the AU-C section relates to other AU-C sections.
- The subject matter of the AU-C section.
- The respective responsibilities of the auditor and others regarding the subject matter of the AU-C section.
- The context in which the AU-C section is set.

.A67 An AU-C section may include, in a separate section under the heading "Definitions," a description of the meanings attributed to certain terms for purposes of GAAS. These are provided to assist in the consistent application and interpretation of GAAS, and are not intended to override definitions that may be established for other purposes, whether in law, regulation, or otherwise. Unless otherwise indicated, those terms will carry the same meanings throughout GAAS.

.A68 When appropriate, additional considerations specific to audits of smaller, less complex entities and governmental entities are included within the application and other explanatory material of an AU-C section. These additional considerations assist in the application of the requirements of GAAS in the audit of such entities. They do not, however, limit or reduce the responsibility of the auditor to apply and comply with the requirements of GAAS.

Considerations Specific to Audits of Smaller, Less Complex Entities

.A69 For purposes of specifying additional considerations to audits of smaller, less complex entities, a *smaller, less complex entity* refers to an entity that typically possesses qualitative characteristics, such as the following:

- a. Concentration of ownership and management in a small number of individuals; and
- b. One or more of the following:
 - i. Straightforward or uncomplicated transactions
 - ii. Simple record keeping
 - iii. Few lines of business and few products within business lines
 - iv. Few internal controls
 - v. Few levels of management with responsibility for a broad range of controls
 - vi. Few personnel, many having a wide range of duties

These qualitative characteristics are not exhaustive, they are not exclusive to smaller, less complex entities, and smaller, less complex entities do not necessarily display all of these characteristics.

.A70 GAAS refer to the proprietor of a smaller entity who is involved in running the entity on a day-to-day basis as the *owner-manager*.

Considerations Specific to Governmental Entities

.A71 Considerations specific to governmental entities may also be applicable to nongovernmental entities that receive government awards. In audits of governmental entities, the considerations specific to audits of smaller, less complex entities may not apply, even if the governmental entity has few employees, simple operations, or a relatively small budget, because small governmental entities (1) may have complex transactions with federal and state governments, (2) are required to comply with laws, regulations, policies, and systems determined by a higher level of government, and (3) are subject to additional public expectations of accountability and transparency.

Objectives Stated in Individual AU-C Sections (Ref: par. .23)

.A72 Each AU-C section contains one or more objectives that provide a link between the requirements and the overall objectives of the auditor. The objectives in individual AU-C sections serve to focus the auditor on the desired outcome of the AU-C section, while being specific enough to assist the auditor in

- understanding what needs to be accomplished and, when necessary, the appropriate means of doing so; and
- deciding whether more needs to be done to achieve the objectives in the particular circumstances of the audit.

.A73 Objectives are to be understood in the context of the overall objectives of the auditor stated in paragraph .12. As with the overall objectives of the auditor, the ability to achieve an individual objective is equally subject to the inherent limitations of an audit.

.A74 In using the objectives, the auditor is required to consider the interrelationships among the AU-C sections. This is because, as indicated in paragraph .A58, the AU-C sections in some cases address general responsibilities and in others address the application of those responsibilities to specific topics. For example, this section requires the auditor to adopt an attitude of professional

skepticism; this is necessary in all aspects of planning and performing an audit but is not repeated as a requirement of each AU-C section. At a more detailed level, section 315 and section 330 contain, among other things, objectives and requirements that address the auditor's responsibilities to identify and assess the risks of material misstatement and to design and perform further audit procedures to respond to those assessed risks, respectively; these objectives and requirements apply throughout the audit. An AU-C section addressing specific aspects of the audit may expand on how the objectives and requirements of other AU-C sections are to be applied regarding the subject of that AU-C section, but does not repeat those objectives and requirements. For example, section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates and Related Disclosures*, expands on how the objectives and requirements of section 315 and section 330 are to be applied regarding the subject of section 540, but section 540 does not repeat those objectives and requirements. Thus, in achieving the objective stated in section 540, the auditor considers the objectives and requirements of other relevant AU-C sections.

Use of Objectives to Determine Need for Additional Audit Procedures (Ref: par. .23a)

.A75 The requirements of GAAS are designed to enable the auditor to achieve the objectives specified in GAAS, and thereby the overall objectives of the auditor. The proper application of the requirements of GAAS by the auditor is therefore expected to provide a sufficient basis for the auditor's achievement of the objectives. However, because the circumstances of audit engagements vary widely and all such circumstances cannot be anticipated in GAAS, the auditor is responsible for determining the audit procedures necessary to fulfill the requirements of GAAS and to achieve the objectives. In the circumstances of an engagement, there may be particular matters that require the auditor to perform audit procedures in addition to those required by GAAS to meet the objectives specified in GAAS.

Use of Objectives to Evaluate Whether Sufficient Appropriate Audit Evidence Has Been Obtained (Ref: par. .23b)

.A76 The auditor is required by paragraph .23b to use the objectives stated in the relevant AU-C sections to evaluate whether sufficient appropriate audit evidence has been obtained in the context of the overall objectives of the auditor. If, as a result, the auditor concludes that the audit evidence is not sufficient and appropriate, then the auditor may follow one or more of the following approaches to meeting the requirement of paragraph .23b:

- Evaluate whether further relevant audit evidence has been, or will be, obtained as a result of complying with other AU-C sections
- Extend the work performed in applying one or more requirements
- Perform other procedures judged by the auditor to be necessary in the circumstances

When none of the preceding is expected to be practical or possible in the circumstances, the auditor will not be able to obtain sufficient appropriate audit evidence and is required by GAAS to determine the effect on the auditor's report or on the auditor's ability to complete the engagement.

Complying With Relevant Requirements

Relevant Requirements (Ref: par. .24)

.A77 In some cases, an AU-C section (and therefore all of its requirements) may not be relevant in the circumstances. For example, if an entity does not have

an internal audit function, nothing in section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*,[†] is relevant.

.A78 Within a relevant AU-C section, there may be conditional requirements. Such a requirement is relevant when the circumstances envisioned in the requirement apply and the condition exists. In general, the conditionality of a requirement will either be explicit or implicit, for example:

- The requirement to modify the auditor's opinion if there is a limitation of scope¹⁸ represents an explicit conditional requirement.
- The requirement to communicate significant deficiencies and material weaknesses in internal control identified during the audit to management and those charged with governance,¹⁹ which depends on the existence and identification of such deficiencies, represents an implicit conditional requirement.

In some cases, a requirement may be expressed as being conditional on applicable law or regulation. For example, the auditor may be required to withdraw from the audit engagement, when withdrawal is possible under applicable law or regulation, or the auditor may be required to perform a certain action, unless prohibited by law or regulation. Depending on the jurisdiction, the legal or regulatory permission or prohibition may be explicit or implicit.

Presumptively Mandatory Requirements (Ref: par. .25)

.A79 If an AU-C section provides that a procedure or action is one that the auditor *should consider*, consideration of the procedure or action is presumptively required. Whether the auditor performs the procedure or action is based upon the outcome of the auditor's consideration and the auditor's professional judgment.

Departure From a Requirement (Ref: par. .26)

.A80 Section 230 establishes documentation requirements in those exceptional circumstances when the auditor departs from a relevant requirement.²⁰ GAAS do not call for compliance with a requirement that is not relevant in the circumstances of the audit.

Interpretive Publications (Ref: par. .27)

.A81 Interpretive publications are not auditing standards. *Interpretive publications* are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with GAAS. Auditing interpretations of GAAS are included in AU-C sections. AICPA Audit and Accounting Guides and auditing SOPs are listed in AU-C appendix D, *AICPA Audit and Accounting Guides and Statements of Position*.

[†] Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is rerafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

¹⁸ See section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

¹⁹ Paragraph .11 of section 265.

²⁰ Paragraph .13 of section 230.

Other Auditing Publications (Ref: par. .28)

.A82 Other auditing publications have no authoritative status; however, they may help the auditor understand and apply GAAS. The auditor is not expected to be aware of the full body of other auditing publications.

.A83 Although the auditor determines the relevance of these publications in accordance with paragraph .28, the auditor may presume that other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are appropriate. These other auditing publications are listed in AU-C appendix F, *Other Auditing Publications*.

.A84 In determining whether an other auditing publication that has not been reviewed by the AICPA Audit and Attest Standards staff is appropriate to the circumstances of the audit, the auditor may consider the degree to which the publication is recognized as being helpful in understanding and applying GAAS and the degree to which the issuer or author is recognized as an authority in auditing matters.

Failure to Achieve an Objective (Ref: par. .29)

.A85 Whether an objective has been achieved is a matter for the auditor's professional judgment. That judgment takes account of the results of audit procedures performed in complying with the requirements of GAAS, and the auditor's evaluation of whether sufficient appropriate audit evidence has been obtained and whether more needs to be done in the particular circumstances of the audit to achieve the objectives stated in GAAS. Accordingly, circumstances that may give rise to a failure to achieve an objective include those that

- prevent the auditor from complying with the relevant requirements of an AU-C section.
- result in it not being practicable or possible for the auditor to carry out the additional audit procedures or obtain further audit evidence as determined necessary from the use of the objectives in accordance with paragraph .23; for example, due to a limitation in the available audit evidence.

.A86 Audit documentation that meets the requirements of section 230 and the specific documentation requirements of other relevant AU-C sections provides evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor. Although it is unnecessary for the auditor to document separately (as in a checklist, for example) that individual objectives have been achieved, the documentation of a failure to achieve an objective assists the auditor's evaluation of whether such a failure has prevented the auditor from achieving the overall objectives of the auditor.

AU-C Section 210

Terms of Engagement

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities in agreeing upon the terms of the audit engagement with management and, when appropriate, those charged with governance. This includes establishing that certain preconditions for an audit, for which management and, when appropriate, those charged with governance are responsible, are present. Section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, addresses those aspects of engagement acceptance that are within the control of the auditor. (Ref: par. .A1)

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to accept an audit engagement for a new or existing audit client only when the basis upon which it is to be performed has been agreed upon through

- a. establishing whether the preconditions for an audit are present and
- b. confirming that a common understanding of the terms of the audit engagement exists between the auditor and management and, when appropriate, those charged with governance.

Definitions

.04 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Preconditions for an audit. The use by management of an acceptable financial reporting framework in the preparation and fair presentation of the financial statements and the agreement of management and, when appropriate, those charged with governance, to the premise¹ on which an audit is conducted.

¹ Paragraphs .05 and .A2 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

Recurring audit. An audit engagement for an existing audit client for whom the auditor performed the preceding audit.

.05 For purposes of this section, references to *management* are to be read hereafter as "management and, when appropriate, those charged with governance" unless the context suggests otherwise.

Requirements

Preconditions for an Audit

.06 In order to establish whether the preconditions for an audit are present, the auditor should

- a. determine whether the financial reporting framework to be applied in the preparation of the financial statements is acceptable and (Ref: par. .A2–.A8)
- b. obtain the agreement of management that it acknowledges and understands its responsibility (Ref: par. .A9–.A12 and .A17)
 - i. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework; (Ref: par. .A13)
 - ii. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and (Ref: par. .A14–.A16)
- iii. to provide the auditor with
 - (1) access to all information of which management is aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, and other matters;
 - (2) additional information that the auditor may request from management for the purpose of the audit; and
 - (3) unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

Management-Imposed Limitation on Scope Prior to Audit Engagement Acceptance That Would Result in a Disclaimer of Opinion

.07 If management or those charged with governance of an entity that is not required by law or regulation to have an audit impose a limitation on the scope of the auditor's work in the terms of a proposed audit engagement, such that the auditor believes the limitation will result in the auditor disclaiming an opinion on the financial statements as a whole, the auditor should not accept such a limited engagement as an audit engagement. If management or those charged with governance of an entity that is required by law or regulation to have an audit imposes such a scope limitation and a disclaimer of opinion is acceptable under the applicable law or to the regulator, the auditor is permitted, but not required, to accept the engagement. (Ref: par. .A18–.A19)

Other Factors Affecting Audit Engagement Acceptance

.08 If the preconditions for an audit are not present, the auditor should discuss the matter with management. Unless the auditor is required by law or regulation to do so, the auditor should not accept the proposed audit engagement

- a. if the auditor has determined that the financial reporting framework to be applied in the preparation of the financial statements is unacceptable or
- b. if the agreement referred to in paragraph .06b has not been obtained.

Agreement on Audit Engagement Terms

.09 The auditor should agree upon the terms of the audit engagement with management or those charged with governance, as appropriate. (Ref: par. .A20–.A21)

.10 The agreed-upon terms of the audit engagement should be documented in an audit engagement letter or other suitable form of written agreement and should include the following: (Ref: par. .A22–.A26)

- a. The objective and scope of the audit of the financial statements
- b. The responsibilities of the auditor
- c. The responsibilities of management
- d. A statement that because of the inherent limitations of an audit, together with the inherent limitations of internal control, an unavoidable risk exists that some material misstatements may not be detected, even though the audit is properly planned and performed in accordance with GAAS
- e. Identification of the applicable financial reporting framework for the preparation of the financial statements
- f. Reference to the expected form and content of any reports to be issued by the auditor and a statement that circumstances may arise in which a report may differ from its expected form and content

Initial Audits, Including Reaudit Engagements

.11 Before accepting an engagement for an initial audit, including a reaudit engagement, the auditor should request management to authorize the predecessor auditor to respond fully to the auditor's inquiries regarding matters that will assist the auditor in determining whether to accept the engagement. If management refuses to authorize the predecessor auditor to respond, or limits the response, the auditor should inquire about the reasons and consider the implications of that refusal in deciding whether to accept the engagement.

.12 The auditor should evaluate the predecessor auditor's response, or consider the implications if the predecessor auditor provides no response or a limited response, in determining whether to accept the engagement. (Ref: par. .A27–.A32)

Recurring Audits

.13 On recurring audits, the auditor should assess whether circumstances require the terms of the audit engagement to be revised. If the auditor concludes that the terms of the preceding engagement need not be revised for the current engagement, the auditor should remind management of the terms of the engagement, and the reminder should be documented. (Ref: par. .A33–.A34)

Acceptance of a Change in the Terms of the Audit Engagement

.14 The auditor should not agree to a change in the terms of the audit engagement when no reasonable justification for doing so exists. (Ref: par. .A35–.A37)

.15 If, prior to completing the audit engagement, the auditor is requested to change the audit engagement to an engagement for which the auditor obtains a lower level of assurance, the auditor should determine whether reasonable justification for doing so exists. (Ref: par. .A38–.A39)

.16 If the terms of the audit engagement are changed, the auditor and management should agree on and document the new terms of the engagement in an engagement letter or other suitable form of written agreement.

.17 If the auditor concludes that no reasonable justification for a change of the terms of the audit engagement exists and is not permitted by management to continue the original audit engagement, the auditor should

- a. withdraw from the audit engagement when possible under applicable law or regulation,
- b. communicate the circumstances to those charged with governance, and
- c. determine whether any obligation, either legal, contractual, or otherwise, exists to report the circumstances to other parties, such as owners, or regulators.

Additional Considerations in Engagement Acceptance

Auditor's Report Prescribed by Law or Regulation

.18 If law or regulation prescribes a specific layout, form, or wording of the auditor's report that significantly differs from the requirements of GAAS, the auditor should evaluate

- a. whether users might misunderstand the auditor's report and, if so,
- b. whether the auditor would be permitted to reword the prescribed form to be in accordance with the requirements of GAAS or attach a separate report.²

If the auditor determines that rewording the prescribed form or attaching a separate report would not be permitted or would not mitigate the risk of users misunderstanding the auditor's report, the auditor should not accept the audit engagement unless the auditor is required by law or regulation to do so. An audit performed in accordance with such law or regulation does not comply with GAAS. Accordingly, for such an audit, the auditor should not include any

² Paragraphs .22–.23 of section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*.

reference to the audit having been performed in accordance with GAAS within the auditor's report.³ (Ref: par. .A40–.A41)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The auditor's responsibilities regarding relevant ethical requirements in the context of the acceptance of an audit engagement, insofar as they are within the control of the auditor, are addressed in section 220. This section addresses those matters (or preconditions) that are within the control of the entity and upon which it is necessary for the auditor and the entity's management to agree.

Preconditions for an Audit

The Financial Reporting Framework (Ref: par. .06a)

.A2 An applicable financial reporting framework provides the criteria for management to present the financial statements of an entity, including the fair presentation of those financial statements. The criteria used by the auditor to evaluate or measure the subject matter, including, when relevant, a basis for presentation and disclosure, are also provided by the financial reporting framework. These criteria enable reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment.

.A3 Without an acceptable financial reporting framework, management does not have an appropriate basis for the preparation of the financial statements, and the auditor does not have suitable criteria for auditing the financial statements. In many cases, the auditor may presume that the applicable financial reporting framework is acceptable, as described in paragraphs .A6–.A8.

Determining the Acceptability of the Financial Reporting Framework

.A4 Factors that are relevant to the auditor's determination of the acceptability of the financial reporting framework to be applied in the preparation of the financial statements include the following:

- The nature of the entity (for example, whether it is a business enterprise, a governmental entity, or a not-for-profit organization)
- The purpose of the financial statements (for example, whether they are prepared to meet the common financial information needs of a wide range of users)
- The nature of the financial statements (for example, whether the financial statements are a complete set of financial statements or a single financial statement)
- Whether law or regulation prescribes the applicable financial reporting framework

.A5 Many users of financial statements are not in a position to demand financial statements tailored to meet their specific information needs. Although all the information needs of specific users cannot be met, financial information needs that are common to a wide range of users exist. Financial statements prepared in accordance with a financial reporting framework designed to meet

³ Paragraph .22 of section 800.

the common financial information needs of a wide range of users are referred to as *general purpose financial statements*.

.A6 *General purpose frameworks.* The sources of established accounting principles that are generally accepted are accounting principles promulgated by a body designated by the Council of the AICPA to establish such principles, pursuant to Rule 203, *Accounting Principles* (ET sec. 203 par. .01), of the AICPA Code of Professional Conduct. Such financial reporting standards often are identified as the applicable financial reporting framework in law or regulation governing the preparation of general purpose financial statements.

.A7 *Special purpose frameworks.* In some cases, the financial statements will be prepared in accordance with a special purpose framework. For example, law or regulation may prescribe the financial reporting framework to be used in the preparation of financial statements for certain types of entities. Such financial statements are referred to as *special purpose financial statements*. Section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, addresses the acceptability of special purpose frameworks.⁴

.A8 After the audit engagement has been accepted, the auditor may encounter deficiencies in the applicable financial reporting framework that indicate that the framework is not acceptable. When use of that framework is not prescribed by law or regulation, management may decide to adopt another framework that is acceptable. When management does so, the previously agreed-upon terms will have changed, and the auditor is required by paragraph .16 to agree upon new terms of the audit engagement that reflect the change in the framework.

Agreement of the Responsibilities of Management (Ref: par. .06b)

.A9 An audit in accordance with GAAS is conducted on the premise that management has acknowledged and understands that it has the responsibilities set out in paragraph .06b.⁵ The auditor may assist in preparing the financial statements, in whole or in part, based on information provided to the auditor by management during the performance of the audit.⁶ However, the concept of an independent audit requires that the auditor's role does not involve assuming management's responsibility for the preparation and fair presentation of the financial statements or assuming responsibility for the entity's related internal control and that the auditor has a reasonable expectation of obtaining the information necessary for the audit insofar as management is able to provide or procure it. Accordingly, the premise is fundamental to the conduct of an independent audit. To avoid misunderstanding, agreement is reached with management that it acknowledges and understands that it has such responsibilities as part of agreeing and documenting the terms of the audit engagement as required by paragraphs .09–.10.

[Revised, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3.]

⁴ Paragraph .10 of section 800.

⁵ Paragraphs .05 and .A2 of section 200.

⁶ In January 2013, the Professional Ethics Executive Committee adopted a provision in the "Activities Related to Attest Services" section of Interpretation No. 101-3, "Nonattest Services," under Rule 101, *Independence* (ET sec. 101 par. .05), of the AICPA Code of Professional Conduct. This provision provides, among other things, that financial statement preparation is considered outside the scope of the attest engagement and, therefore, constitutes a nonattest service subject to the general requirements of the interpretation. The provision is effective for engagements covering periods beginning on or after December 15, 2014. [Footnote added, October 2013, to reflect conforming changes necessary due to the revision of Ethics Interpretation No. 101-3.]

.A10 The way in which the responsibilities for financial reporting are divided between management and those charged with governance will vary according to the resources and structure of the entity and any relevant law or regulation and the respective roles of management and those charged with governance within the entity. In most cases, management is responsible for execution and those charged with governance have oversight of management. In some cases, those charged with governance will have, or will assume, responsibility for approving the financial statements or monitoring the entity's internal control related to financial reporting. In larger entities, a subgroup of those charged with governance, such as an audit committee, may be charged with certain oversight responsibilities.

.A11 Section 580, *Written Representations*, requires the auditor to request management to provide written representations that it has fulfilled certain of its responsibilities.⁶ It may therefore be appropriate to make management aware that receipt of such written representations will be expected, together with written representations required by other AU-C sections and, when necessary, written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements.

.A12 If management will not acknowledge its responsibilities or indicates that it will not provide written representations as requested, the auditor will be unable to obtain sufficient appropriate audit evidence.⁷ In such circumstances, it would not be appropriate for the auditor to accept the audit engagement unless law or regulation requires the auditor to do so. In cases when the auditor is required to accept the audit engagement, the auditor may need to explain to management the importance of these matters and the implications for the auditor's report.

Preparation and Fair Presentation of the Financial Statements (Ref: par. .06b(i))

.A13 In an audit of special purpose financial statements, the auditor is required by section 800 to obtain the agreement of management that it acknowledges and understands its responsibility to include all informative disclosures that are appropriate for the special purpose framework used to prepare the entity's financial statements.⁸ This agreement is a precondition of the audit included in the terms of the engagement.

Internal Control (Ref: par. .06b(ii))

.A14 Management maintains such internal control as it determines is necessary to enable the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives, due to the inherent limitations of internal control.

.A15 An independent audit conducted in accordance with GAAS does not act as a substitute for the maintenance of internal control necessary for the preparation and fair presentation of financial statements by management. Accordingly, the auditor is required to obtain the agreement of management that it acknowledges and understands that it has responsibility for the design, implementation, and maintenance of internal control necessary for this purpose. However, the agreement required by paragraph .06b(ii) does not imply that the

⁶ Paragraphs .10–.11 of section 580, *Written Representations*.

⁷ Paragraph .A34 of section 580.

⁸ Paragraph .11 of section 800.

auditor will find that internal control maintained by management has achieved its purpose or will be free from deficiencies.

.A16 Management has the responsibility to determine what internal control is necessary to enable the preparation and fair presentation of the financial statements. The term *internal control* encompasses a wide range of activities within components that may be described as the control environment; the entity's risk assessment process; the information system, including the related business processes relevant to financial reporting, and communication; control activities; and monitoring of controls. This division, however, does not necessarily reflect how a particular entity may design, implement, and maintain its internal control or how it may classify any particular component.⁹ An entity's internal control will reflect the needs of management, the complexity of the business, the nature of the risks to which the entity is subject, and relevant laws or regulations.

Considerations Relevant to Smaller Entities (Ref: par. .06b)

.A17 One of the purposes of agreeing upon the terms of the audit engagement is to avoid misunderstanding about the respective responsibilities of management and the auditor. For example, when the auditor or a third party has assisted with drafting the financial statements, it may be useful to remind management that the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework remains its responsibility.

Management-Imposed Limitation on Scope Prior to Audit Engagement Acceptance That Would Result in a Disclaimer of Opinion (Ref: par. .07)

.A18 Scope limitations may be imposed by management or by circumstances. Examples of scope limitations that would not preclude the auditor from accepting the engagement include the following:

- A restriction imposed by management that the auditor believes will result in a qualified opinion
- A restriction imposed by circumstances beyond the control of management

.A19 Employee benefit plans are an example of entities that are required to have an audit by law or regulation and a disclaimer of opinion is acceptable under the applicable law or to the regulator. For such entities, the auditor is neither precluded from accepting, nor required to accept, the engagement, regardless of whether management imposes a scope limitation that is expected to result in the auditor disclaiming an opinion on the financial statements as a whole.

Agreement on Audit Engagement Terms

Agreeing Upon the Terms of the Audit Engagement (Ref: par. .09)

.A20 The roles of management and those charged with governance in agreeing upon the terms of the audit engagement for the entity depend on the governance structure of the entity and relevant law or regulation. Depending on the entity's structure, the agreement may be with management, those charged with governance, or both. When the agreement on the terms of engagement is only with those charged with governance, nonetheless in accordance

⁹ Paragraph .A51 and appendix B, "Internal Control Components," of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

with paragraph .06, the auditor is required to obtain management's agreement that it acknowledges and understands its responsibilities.

.A21 When a third party has contracted for the audit of the entity's financial statements, agreeing the terms of the audit with management of the entity is necessary in order to establish that the preconditions for an audit are present.

***Audit Engagement Letter or Other Form of Written Agreement*¹⁰**
(Ref: par. .10)

.A22 Both management and the auditor have an interest in documenting the agreed-upon terms of the audit engagement before the commencement of the audit to help avoid misunderstandings with respect to the audit. For example, it reduces the risk that management may inappropriately rely on the auditor to protect management against certain risks or to perform certain functions that are management's responsibility.

Form and Content of the Audit Engagement Letter

.A23 The form and content of the audit engagement letter may vary for each entity. Information included in the audit engagement letter on the auditor's responsibilities may be based on section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.¹¹ Paragraph .06b of this section addresses the description of the responsibilities of management. In addition to including the matters required by paragraph .10, an audit engagement letter may make reference to, for example, the following:

- Elaboration of the scope of the audit, including reference to applicable legislation, regulations, GAAS, and ethical and other pronouncements of professional bodies to which the auditor adheres
- The form of any other communication of results of the audit engagement
- Arrangements regarding the planning and performance of the audit, including the composition of the audit team
- The expectation that management will provide written representations (see also paragraph .A11)
- The agreement of management to make available to the auditor draft financial statements and any accompanying other information in time to allow the auditor to complete the audit in accordance with the proposed timetable
- The agreement of management to inform the auditor of events occurring or facts discovered subsequent to the date of the financial statements, of which management may become aware, that may affect the financial statements
- The basis on which fees are computed and any billing arrangements
- A request for management to acknowledge receipt of the audit engagement letter and to agree to the terms of the engagement outlined therein, as may be evidenced by their signature on the engagement letter

¹⁰ In the paragraphs that follow, any reference to an audit engagement letter is to be taken as a reference to an audit engagement letter or other suitable form of written agreement.

¹¹ Paragraphs .04–.10 of section 200.

.A24 When relevant, the following points also could be made in the audit engagement letter:

- Arrangements concerning the involvement of other auditors and specialists in some aspects of the audit
- Arrangements concerning the involvement of internal auditors and other staff of the entity
- Arrangements to be made with the predecessor auditor, if any, in the case of an initial audit
- Any restriction of the auditor's liability when not prohibited
- Any obligations of the auditor to provide audit documentation to other parties
- Additional services to be provided, such as those relating to regulatory requirements
- A reference to any further agreements between the auditor and the entity

.A25 Reference to the expected form and content of any reports to be issued by the auditor may include a description of the types of reports to be issued. The auditor need not describe the type of opinion expected to be expressed. An example of an audit engagement letter is set out in the exhibit "Example of an Audit Engagement Letter."

.A26 *Audits of components.* When the auditor of a parent entity is also the auditor of a component, the factors that may influence the decision whether to obtain a separate audit engagement letter from the component include the following:

- Who engages the component auditor
- Whether a separate auditor's report is to be issued on the component
- Legal requirements regarding the appointment of the auditor
- Degree of ownership by parent
- Degree of independence of the component management from the parent entity

Initial Audits, Including Reaudit Engagements (Ref: par. .11–.12)

.A27 An auditor may make a proposal for an audit engagement before being granted permission to make inquiries of a predecessor auditor. The auditor may advise management in the proposal or otherwise that the auditor's acceptance of the engagement cannot be final until the inquiries have been made and the responses of the predecessor auditor have been evaluated.

.A28 When more than one auditor is considering accepting an engagement, the predecessor auditor is not expected to be available to respond to inquiries until an auditor has been selected by the entity and has accepted the engagement, subject to the evaluation of the communications with the predecessor auditor as provided in paragraph .12.

.A29 Relevant ethical and professional requirements guide the auditor's communications with the predecessor auditor and management, as well as the predecessor auditor's response. Such requirements provide that, except as permitted by the rules of the AICPA Code of Professional Conduct, an auditor is

precluded from disclosing confidential information obtained in the course of an engagement unless management specifically consents. Such requirements also provide that both the auditor and the predecessor auditor hold in confidence information obtained from each other. This obligation applies regardless of whether the auditor accepts the engagement.

.A30 In accordance with the AICPA Code of Professional Conduct, which states that members have a responsibility to cooperate with each other, the predecessor auditor is expected to respond to the auditor's inquiries promptly and, in the absence of unusual circumstances, fully, on the basis of known facts. If, due to unusual circumstances, such as pending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, the predecessor auditor decides not to respond fully to the inquiries, the predecessor auditor is expected to clearly state that the response is limited.

.A31 The communication with the predecessor auditor may be either written or oral. Matters subject to the auditor's inquiry of the predecessor auditor may include the following:

- Information that might bear on the integrity of management
- Disagreements with management about accounting policies, auditing procedures, or other similarly significant matters
- Communications to those charged with governance regarding fraud and noncompliance with laws or regulations by the entity
- Communications to management and those charged with governance regarding significant deficiencies and material weaknesses in internal control
- The predecessor auditor's understanding about the reasons for the change of auditors

Considerations Specific to Governmental Entities

.A32 When the auditor is required by law or regulation to audit a governmental entity, inquiries of the predecessor auditor for the purpose of obtaining information about whether to accept the engagement may not be relevant. However, inquiries of the predecessor auditor may still be relevant for the purpose of obtaining information that is used by the auditor in planning and performing the audit.¹²

Recurring Audits (Ref: par. .13)

.A33 The following factors may make it appropriate to revise the terms of the audit engagement:

- Any indication that management misunderstands the objective and scope of the audit
- Any revised or special terms of the audit engagement
- A change of senior management
- A significant change in ownership
- A significant change in the nature or size of the entity's business

¹² Section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*, addresses the auditor's responsibilities relating to opening balances when conducting an initial audit engagement.

- A change in legal or regulatory requirements
- A change in the financial reporting framework adopted in the preparation of the financial statements
- A change in other reporting requirements

A34 The auditor may remind management of the terms of the engagement in writing or orally. A written reminder might be a letter confirming that the terms of the preceding engagement will govern the current engagement. If the reminder is oral, audit documentation may include with whom the discussion took place, when, and the significant points discussed.

Acceptance of a Change in the Terms of the Audit Engagement

Request to Change the Terms of the Audit Engagement (Ref: par. .14)

A35 A request from management for the auditor to change the terms of the audit engagement may result from a change in circumstances affecting the need for the service, a misunderstanding about the nature of an audit as originally requested, or a restriction on the scope of the audit engagement, whether imposed by management or caused by other circumstances. The auditor, as required by paragraph .14, considers the justification given for the request, particularly the implications of a restriction on the scope of the audit engagement.

A36 A change in circumstances that affects management's requirements or a misunderstanding concerning the nature of the service originally requested may be considered a reasonable basis for requesting a change in the audit engagement.

A37 In contrast, a change may not be considered reasonable if the change appears to relate to information that is incorrect, incomplete, or otherwise unsatisfactory. An example might be when the auditor is unable to obtain sufficient appropriate audit evidence regarding receivables and management asks for the audit engagement to be changed to a review engagement to avoid a qualified opinion or a disclaimer of opinion.

Request to Change to a Review or Other Service (Ref: par. .15)

A38 Before agreeing to change an audit engagement to a review or other service, an auditor who was engaged to perform an audit in accordance with GAAS may need to assess, in addition to the matters referred to in paragraphs .A35–.A37, any legal or contractual implications of the change.

A39 If the auditor concludes that reasonable justification to change the audit engagement to a review or other service exists, the audit work performed to the date of change may be relevant to the changed engagement; however, the work required to be performed and the report to be issued would be those appropriate to the revised engagement. In order to avoid confusing the reader, the report on the other service would not include reference to the following:

- a. The original audit engagement
- b. Any procedures that may have been performed in the original audit engagement, except when the audit engagement is changed to an engagement to undertake agreed-upon procedures and, thus, reference to the procedures performed is a normal part of the report

Additional Considerations in Engagement Acceptance

Auditor's Report Prescribed by Law or Regulation (Ref: par. .18)

.A40 GAAS require that the auditor not represent compliance with GAAS unless the auditor has complied with all of the AU-C sections relevant to the audit.¹³ If the auditor is required by law or regulation to use a specific layout, form, or wording of the auditor's report, section 800 requires that the auditor's report refer to GAAS only if the auditor's report includes the minimum reporting elements.¹⁴ In accordance with section 800, if the specific layout, form, or wording of the auditor's report is not acceptable or would cause an auditor to make a statement that the auditor has no basis to make, the auditor is required to reword the prescribed form of report or attach an appropriately worded separate report.¹⁵ When the auditor concludes that rewording the prescribed form to be in accordance with the requirements of GAAS or attaching a separate report would not be permitted, the auditor may consider including a statement in the auditor's report that the audit is not conducted in accordance with GAAS. The auditor is, however, encouraged to apply GAAS, including the AU-C sections that address the auditor's report, to the extent practicable, notwithstanding that the auditor is not permitted to refer to the audit being conducted in accordance with GAAS.

Considerations Specific to Governmental Entities

.A41 For governmental entities, specific legal or regulatory requirements may exist; for example, the auditor may be required to report directly to the legislature or the public if management attempts to limit the scope of the audit.

¹³ Paragraph .22 of section 200.

¹⁴ Paragraph .22 of section 800.

¹⁵ Paragraph .23 of section 800.

.A42

Exhibit—Example of an Audit Engagement Letter (Ref: par. .A25)

The following is an example of an audit engagement letter for an audit of general purpose financial statements prepared in accordance with accounting principles generally accepted in the United States of America, as promulgated by the Financial Accounting Standards Board. This letter is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in this Statement on Auditing Standards. The letter will vary according to individual requirements and circumstances and is drafted to refer to the audit of financial statements for a single reporting period. The auditor may seek legal advice about whether a proposed letter is suitable.

To the appropriate representative of those charged with governance of ABC Company:¹

[The objective and scope of the audit]

You² have requested that we audit the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20XX, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter. Our audit will be conducted with the objective of our expressing an opinion on the financial statements.

[The responsibilities of the auditor]

We will conduct our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Because of the inherent limitations of an audit, together with the inherent limitations of internal control, an unavoidable risk that some material misstatements may not be detected exists, even though the audit is properly planned and performed in accordance with GAAS.

In making our risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. However, we will communicate to you in writing concerning any significant deficiencies or material weaknesses in internal control relevant to the audit of the financial statements that we have identified during the audit.

¹ The addressees and references in the letter would be those that are appropriate in the circumstances of the engagement, including the relevant jurisdiction. It is important to refer to the appropriate persons. See paragraph .A20.

² Throughout this letter, references to *you, we, us, management, those charged with governance, and auditor* would be used or amended as appropriate in the circumstances.

[The responsibilities of management and identification of the applicable financial reporting framework]

Our audit will be conducted on the basis that *[management and, when appropriate, those charged with governance]*³ acknowledge and understand that they have responsibility

- a. for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America;
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- c. to provide us with
 - i. access to all information of which *[management]* is aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation, and other matters;
 - ii. additional information that we may request from *[management]* for the purpose of the audit; and
 - iii. unrestricted access to persons within the entity from whom we determine it necessary to obtain audit evidence.

As part of our audit process, we will request from *[management and, when appropriate, those charged with governance]*, written confirmation concerning representations made to us in connection with the audit.

[Other relevant information]

[Insert other information, such as fee arrangements, billings, and other specific terms, as appropriate.]

[Reporting]

[Insert appropriate reference to the expected form and content of the auditor's report. Example follows:]

We will issue a written report upon completion of our audit of ABC Company's financial statements. Our report will be addressed to the board of directors of ABC Company. We cannot provide assurance that an unmodified opinion will be expressed. Circumstances may arise in which it is necessary for us to modify our opinion, add an emphasis-of-matter or other-matter paragraph(s), or withdraw from the engagement.

We also will issue a written report on *[Insert appropriate reference to other auditor's reports expected to be issued.]* upon completion of our audit.

Please sign and return the attached copy of this letter to indicate your acknowledgment of, and agreement with, the arrangements for our audit of the financial statements including our respective responsibilities.

³ Use terminology as appropriate in the circumstances.

XYZ & Co.

Acknowledged and agreed on behalf of ABC Company by

AU-C Section 220

Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards

Source: SAS No. 122.

Effective for engagements conducted in accordance with generally accepted auditing standards for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for engagements conducted in accordance with generally accepted auditing standards for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the specific responsibilities of the auditor regarding quality control procedures for an audit of financial statements. It also addresses, when applicable, the responsibilities of the engagement quality control reviewer. This section also applies, adapted as necessary, to other engagements conducted in accordance with generally accepted auditing standards (GAAS) (for example, a review of interim financial information conducted in accordance with section 930, *Interim Financial Information*). This section is to be read in conjunction with the AICPA Code of Professional Conduct and other relevant ethical requirements.

.02 Although Statements on Quality Control Standards are not applicable to auditors in government audit organizations, this section is applicable to auditors in government audit organizations who perform financial audits in accordance with GAAS.¹

System of Quality Control and the Role of the Engagement Teams

.03 Quality control systems, policies, and procedures are the responsibility of the audit firm. Under QC section 10, *A Firm's System of Quality Control*, the

¹ Paragraph .02 of QC section 10, *A Firm's System of Quality Control*.

firm has an obligation to establish and maintain a system of quality control to provide it with reasonable assurance that²

- a. the firm and its personnel comply with professional standards and applicable legal and regulatory requirements and
- b. reports issued by the firm are appropriate in the circumstances. (Ref: par. .A1)

.04 Within the context of the firm's system of quality control, engagement teams have a responsibility to implement quality control procedures that are applicable to the audit engagement and provide the firm with relevant information to enable the functioning of that part of the firm's system of quality control relating to independence.

.05 Engagement teams are entitled to rely on the firm's system of quality control, unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties. (Ref: par. .A2)

.06 The engagement partner may use the assistance of other members of the engagement team or other personnel within the firm in meeting the requirements of this section. The requirements imposed by this section on engagement partners do not relieve other members of the engagement team of any of their professional responsibilities.

Effective Date

.07 This section is effective for engagements conducted in accordance with GAAS for periods ending on or after December 15, 2012.

Objective

.08 The objective of the auditor³ is to implement quality control procedures at the engagement level that provide the auditor with reasonable assurance that

- a. the audit complies with professional standards and applicable legal and regulatory requirements and
- b. the auditor's report issued is appropriate in the circumstances.

Definitions

.09 For purposes of GAAS, the following terms have the meanings attributed as follows:

Engagement partner.⁴ The partner or other person in the firm who is responsible for the audit engagement and its performance and for the auditor's report that is issued on behalf of the firm and who, when required, has the appropriate authority from a professional, legal, or regulatory body.

Engagement quality control review. A process designed to provide an objective evaluation, before the report is released, of the significant judgments the engagement team made and the conclusions it reached in formulating the auditor's report. The

² Paragraph .12 of QC section 10.

³ See paragraph .14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, for the definition of auditor.

⁴ *Engagement partner, partner, and firm* refer to their governmental equivalents, when relevant.

engagement quality control review process is only for those audit engagements, if any, for which the firm has determined that an engagement quality control review is required, in accordance with its policies and procedures.

Engagement quality control reviewer. A partner, other person in the firm, suitably qualified external person, or team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments that the engagement team made and the conclusions it reached in formulating the auditor's report.

Engagement team. All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform audit procedures on the engagement. This excludes an auditor's external specialist engaged by the firm or a network firm.⁵

Firm. A form of organization permitted by law or regulation whose characteristics conform to resolutions of the Council of the AICPA and that is engaged in the practice of public accounting.

Monitoring. A process comprising an ongoing consideration and evaluation of the firm's system of quality control, including inspection or a periodic review of engagement documentation, reports, and clients' financial statements for a selection of completed engagements, designed to provide the firm with reasonable assurance that its system of quality control is designed appropriately and operating effectively.

Network. An association of entities, as defined in ET section 92, *Definitions*.

Network firm. A firm or other entity that belongs to a network, as defined in ET section 92.

Partner. Any individual with authority to bind the firm with respect to the performance of a professional services engagement. For purposes of this definition, *partner* may include an employee with this authority who has not assumed the risks and benefits of ownership. Firms may use different titles to refer to individuals with this authority.

Personnel. Partners and staff.

Professional standards. Standards promulgated by the AICPA Auditing Standards Board or the AICPA Accounting and Review Services Committee under Rule 201, *General Standards* (ET sec. 201 par. .01), or Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), of the AICPA Code of Professional Conduct, or other standards-setting bodies that set auditing and attest standards applicable to the engagement being performed and relevant ethical requirements.

Relevant ethical requirements. Ethical requirements to which the engagement team and engagement quality control reviewer are subject, which consist of the AICPA Code of Professional Conduct together with rules of applicable state boards of accountancy and applicable regulatory agencies that are more restrictive.

⁵ Paragraph .06 of section 620, *Using the Work of an Auditor's Specialist*, defines the term *auditor's specialist*.

Staff. Professionals, other than partners, including any specialists that the firm employs.

Suitably qualified external person. An individual outside the firm with the competence and capabilities to act as an engagement partner (for example, a partner of another firm).

Requirements

Leadership Responsibilities for Quality on Audits

.10 The engagement partner should take responsibility for the overall quality on each audit engagement to which that partner is assigned. In fulfilling this responsibility, the engagement partner may delegate the performance of certain procedures to, and use the work of, other members of the engagement team and may rely upon the firm's system of quality control. (Ref: par. .A3)

Relevant Ethical Requirements

.11 Throughout the audit engagement, the engagement partner and other members of the engagement team should remain alert for evidence of non-compliance with relevant ethical requirements by members of the engagement team. (Ref: par. .A4)

.12 If matters come to the engagement partner's attention, through the firm's system of quality control or otherwise, that indicate that members of the engagement team have not complied with relevant ethical requirements, the engagement partner, in consultation with others in the firm as appropriate, should determine that appropriate action has been taken.

Independence

.13 The engagement partner should form a conclusion on compliance with independence requirements that apply to the audit engagement. In doing so, the engagement partner should

- a. obtain relevant information from the firm and, when applicable, network firms to identify and evaluate circumstances and relationships that create threats to independence;
- b. evaluate information on identified breaches, if any, of the firm's independence policies and procedures to determine whether they create a threat to independence for the audit engagement; and
- c. take appropriate action to eliminate such threats or reduce them to an acceptable level by applying safeguards or, if considered appropriate, to withdraw from the audit engagement when withdrawal is possible under applicable law or regulation. The engagement partner should promptly report to the firm any inability to resolve the matter so that the firm may take appropriate action. (Ref: par. .A5–.A6)

Acceptance and Continuance of Client Relationships and Audit Engagements

.14 The engagement partner should be satisfied that appropriate procedures regarding the acceptance and continuance of client relationships and audit engagements have been followed and should determine that conclusions reached in this regard are appropriate. (Ref: par. .A7–.A8)

.15 If the engagement partner obtains information that would have caused the firm to decline the audit engagement had that information been available earlier, the engagement partner should communicate that information promptly to the firm so that the firm and the engagement partner can take the necessary action. (Ref: par. .A8)

Assignment of Engagement Teams

.16 The engagement partner should be satisfied that the engagement team and any auditor's external specialists, collectively, have the appropriate competence and capabilities to

- a. perform the audit engagement in accordance with professional standards and applicable legal and regulatory requirements and
- b. enable an auditor's report that is appropriate in the circumstances to be issued. (Ref: par. .A9–.A11)

Engagement Performance

Direction, Supervision, and Performance

.17 The engagement partner should take responsibility for the following:

- a. The direction, supervision, and performance of the audit engagement in compliance with professional standards, applicable legal and regulatory requirements, and the firm's policies and procedures (Ref: par. .A12–.A14 and .A19)
- b. The auditor's report being appropriate in the circumstances

Review

.18 The engagement partner should take responsibility for reviews being performed in accordance with the firm's review policies and procedures. (Ref: par. .A15–.A16 and .A19)

.19 On or before the date of the auditor's report, the engagement partner should, through a review of the audit documentation and discussion with the engagement team, be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued. (Ref: par. .A17–.A19)

Consultation

.20 The engagement partner should

- a. take responsibility for the engagement team undertaking appropriate consultation on difficult or contentious matters;
- b. be satisfied that members of the engagement team have undertaken appropriate consultation during the course of the engagement, both within the engagement team and between the engagement team and others at the appropriate level within or outside the firm;
- c. be satisfied that the nature and scope of such consultations are agreed with, and conclusions resulting from such consultations are understood by, the party consulted; and
- d. determine that conclusions resulting from such consultations have been implemented. (Ref: par. .A20–.A22)

Engagement Quality Control Review

.21 For those audit engagements, if any, for which the firm has determined that an engagement quality control review is required, the engagement partner should

- a. determine that an engagement quality control reviewer has been appointed;
- b. discuss significant findings or issues arising during the audit engagement, including those identified during the engagement quality control review, with the engagement quality control reviewer; and
- c. not release the auditor's report until the completion of the engagement quality control review. (Ref: par. .A23–.A25)

.22 The engagement quality control reviewer should perform an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the auditor's report. This evaluation should involve

- a. discussion of significant findings or issues with the engagement partner;
- b. reading the financial statements and the proposed auditor's report;
- c. review of selected audit documentation relating to the significant judgments the engagement team made and the related conclusions it reached; and
- d. evaluation of the conclusions reached in formulating the auditor's report and consideration of whether the proposed auditor's report is appropriate. (Ref: par. .A26–.A31)

Differences of Opinion

.23 If differences of opinion arise within the engagement team; with those consulted; or, when applicable, between the engagement partner and the engagement quality control reviewer, the engagement team should follow the firm's policies and procedures for resolving differences of opinion.

Monitoring

.24 An effective system of quality control includes a monitoring process designed to provide the firm with reasonable assurance that its policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively. The engagement partner should consider

- a. the results of the firm's monitoring process as evidenced in the latest information circulated to the engagement partner by the firm and, if applicable, other network firms and
- b. whether deficiencies noted in that information may affect the audit engagement. (Ref: par. .A32–.A34)

Documentation

.25 The auditor should include in the audit documentation the following:⁶ (Ref: par. .A35)

⁶ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- a. Issues identified with respect to compliance with relevant ethical requirements and how they were resolved
- b. Conclusions on compliance with independence requirements that apply to the audit engagement and any relevant discussions with the firm that support these conclusions
- c. Conclusions reached regarding the acceptance and continuance of client relationships and audit engagements
- d. The nature and scope of, and conclusions resulting from, consultations undertaken during the course of the audit engagement (Ref: par. .A36)

.26 The engagement quality control reviewer should document, for the audit engagement reviewed

- a. that the procedures required by the firm's policies on engagement quality control review have been performed;
- b. the date that the engagement quality control review was completed; and
- c. that the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments that the engagement team made and the conclusions it reached were not appropriate.

Application and Other Explanatory Material

System of Quality Control and the Role of the Engagement Teams (Ref: par. .02)

.A1 QC section 10 addresses the firm's responsibilities to establish and maintain its system of quality control for audit engagements. The system of quality control includes policies and procedures that address each of the following elements:

- Leadership responsibilities for quality within the firm
- Relevant ethical requirements
- Acceptance and continuance of client relationships and specific engagements
- Human resources
- Engagement performance
- Monitoring

Reliance on the Firm's System of Quality Control (Ref: par. .05)

.A2 Unless information provided by the firm or other parties suggests otherwise, the engagement team may rely on the firm's system of quality control regarding, for example

- competence of personnel through their recruitment and formal training.
- independence through the accumulation and communication of relevant independence information.
- maintenance of client relationships through acceptance and continuance systems.
- adherence to applicable legal and regulatory requirements through the monitoring process.

Leadership Responsibilities for Quality on Audits (Ref: par. .10)

.A3 The engagement partner's actions and communications with the other members of the engagement team demonstrate responsibility for the overall quality on each audit engagement when they emphasize

- a. the importance to audit quality of
 - i. performing work that complies with professional standards and applicable legal and regulatory requirements;
 - ii. complying with the firm's applicable quality control policies and procedures;
 - iii. issuing auditor's reports that are appropriate in the circumstances; and
 - iv. the engagement team's ability to raise concerns without fear of reprisals and
- b. the fact that quality is essential in performing audit engagements.

Relevant Ethical Requirements

Compliance With Relevant Ethical Requirements (Ref: par. .11)

.A4 The AICPA Code of Professional Conduct establishes the fundamental principles of professional ethics, which include the following:

- Responsibilities
- The public interest
- Integrity
- Objectivity and independence
- Due care

Threats to Independence (Ref: par. .13)

.A5 The engagement team may identify a threat to independence regarding the audit engagement that safeguards may not be able to eliminate or reduce to an acceptable level. In that case, as required by paragraph .13c, the engagement partner reports to the relevant person(s) within the firm to determine appropriate action, which may include eliminating the activity or interest that creates the threat or withdrawing from the audit engagement when withdrawal is possible under applicable law or regulation.

Considerations Specific to Governmental Entities

.A6 Law or regulation may provide safeguards for the independence of governmental audit organizations and the auditors employed by them. However, in the absence of law or regulation, governmental audit organizations may establish supplemental safeguards to assist the auditor or audit organization in maintaining independence. Additionally, when law or regulation does not permit withdrawal from the engagement, the auditor may disclose in the auditor's report the circumstances affecting the auditor's independence.

Acceptance and Continuance of Client Relationships and Audit Engagements (Ref: par. .14)

.A7 QC section 10 requires the firm to obtain information considered necessary in the circumstances before accepting an engagement with a new client, when deciding whether to continue an existing engagement, and when

considering acceptance of a new engagement with an existing client.⁷ Information such as the following assists the engagement partner in determining whether the conclusions reached regarding the acceptance and continuance of client relationships and audit engagements are appropriate:

- The integrity of the principal owners, key management, and those charged with governance of the entity
- Whether the engagement team is competent to perform the audit engagement and has the necessary capabilities, including time and resources
- Whether the firm and the engagement team can comply with relevant ethical requirements
- Significant findings or issues that have arisen during the current or previous audit engagement and their implications for continuing the relationship

Considerations Specific to Governmental Entities (Ref: par. .14–.15)

.A8 For some governmental entities, auditors may be appointed in accordance with law or regulation, and the auditor may not be permitted to decline or withdraw from the engagement. Accordingly, certain of the requirements and considerations regarding the acceptance and continuance of client relationships and audit engagements as set out in paragraphs .14–.15 and .A7 may not be relevant. Nonetheless, information gathered as a result of the process described may be valuable in planning the audit, performing risk assessments, and carrying out reporting responsibilities.

Assignment of Engagement Teams (Ref: par. .16)

.A9 A person with expertise in a specialized area of accounting or auditing is a member of the engagement team if that person performs audit procedures on the engagement. This applies whether that person is an employee of the firm or a nonemployee engaged by the firm. However, a person with such expertise is not a member of the engagement team if that person's involvement with the engagement is only consultation. Consultations are addressed in paragraphs .20 and .A20–.A22.

.A10 When considering the appropriate competence and capabilities expected of the engagement team as a whole, the engagement partner may take into consideration such matters as the team's

- understanding of, and practical experience with, audit engagements of a similar nature and complexity through appropriate training and participation.
- understanding of professional standards and applicable legal and regulatory requirements.
- technical expertise, including expertise with relevant IT and specialized areas of accounting or auditing.
- knowledge of relevant industries in which the entity operates.
- ability to apply professional judgment.
- understanding of the firm's quality control policies and procedures.

⁷ Paragraph .27 of QC section 10.

Considerations Specific to Governmental Entities (Ref: par. .16)

.A11 For audits of governmental entities, competence may include skills that are necessary to comply with applicable law or regulation. Such competence may include knowledge of *Government Auditing Standards* and an understanding of the applicable reporting requirements, including reporting to the legislature or other governing body or in the public interest. The scope of a governmental audit may include, for example, additional requirements with respect to detecting misstatements that result from violations of provisions of contracts or grant agreements that could have a direct and material effect on the determination of financial statement amounts or the need to examine and report on internal control over financial reporting or compliance.

Engagement Performance**Direction, Supervision, and Performance (Ref: par. .17a)**

.A12 Direction of the engagement team involves informing the members of the engagement team of matters such as the following:

- Their responsibilities, including the need to comply with relevant ethical requirements and to plan and perform an audit with professional skepticism as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*⁸
- Responsibilities of respective partners when more than one partner is involved in the conduct of an audit engagement
- The objectives of the work to be performed
- The nature of the entity's business
- Risk-related issues
- Problems that may arise
- The detailed approach to the performance of the engagement

Discussion among members of the engagement team allows team members to raise questions so that appropriate communication can occur within the engagement team.

.A13 Appropriate teamwork and training assist members of the engagement team to clearly understand the objectives of the assigned work.

.A14 Supervision includes matters such as the following:

- Tracking the progress of the audit engagement
- Considering the competence and capabilities of individual members of the engagement team, including whether they have sufficient time to carry out their work, they understand their instructions, and the work is being carried out in accordance with the planned approach to the audit engagement
- Addressing significant findings or issues arising during the audit engagement, considering their significance, and modifying the planned approach appropriately
- Identifying matters for consultation or consideration by qualified engagement team members during the audit engagement

⁸ Paragraphs .16–.17 of section 200.

Review

Review Responsibilities (Ref: par. .18)

.A15 Under QC section 10, the firm's review responsibility policies and procedures are determined on the basis that suitably experienced team members review the work of other team members.⁹ The engagement partner may delegate part of the review responsibility to other members of the engagement team, in accordance with the firm's system of quality control.

.A16 A review consists of consideration of whether, for example

- the work has been performed in accordance with professional standards and applicable legal and regulatory requirements;
- significant findings or issues have been raised for further consideration;
- appropriate consultations have taken place and the resulting conclusions have been documented and implemented;
- the nature, timing, and extent of the work performed is appropriate and without need for revision;
- the work performed supports the conclusions reached and is appropriately documented;
- the evidence obtained is sufficient and appropriate to support the auditor's report; and
- the objectives of the engagement procedures have been achieved.

The Engagement Partner's Review of the Work Performed (Ref: par. .19)

.A17 Timely reviews of the following by the engagement partner at appropriate stages during the engagement allow significant findings or issues to be resolved on a timely basis to the engagement partner's satisfaction on or before the date of the auditor's report:

- Critical areas of judgment, especially those relating to difficult or contentious matters identified during the course of the engagement
- Significant risks
- Other areas that the engagement partner considers important

The engagement partner need not review all audit documentation but may do so. However, as required by section 230, *Audit Documentation*, the partner documents the extent and timing of the reviews.¹⁰

.A18 An engagement partner taking over an audit during the engagement may apply the review procedures as described in paragraph .A17 to review the work performed to the date of the change in order to assume the responsibilities of an engagement partner.

Considerations Relevant When a Member of the Engagement Team With Expertise in a Specialized Area of Accounting or Auditing Is Used (Ref: par. .17–.19)

.A19 When the engagement team includes a member with expertise in a specialized area of accounting or auditing, direction, supervision, and review of

⁹ Paragraph .36 of QC section 10.

¹⁰ Paragraph .09c of section 230.

that engagement team member's work is the same as for any other engagement team member and may include matters such as the following:

- Agreeing with that member upon the nature, scope, and objectives of that member's work and the respective roles of, and the nature, timing, and extent of communication between, that member and other members of the engagement team
- Evaluating the adequacy of that member's work, including the relevance and reasonableness of that member's findings or conclusions and the consistency of those findings or conclusions with other audit evidence

Consultation (Ref: par. .20)

.A20 Members of the engagement team have a professional responsibility to bring to the attention of appropriate personnel matters that, in their professional judgment, are difficult or contentious and may require consultation.

.A21 Effective consultation on significant technical, ethical, and other matters within the firm or, when applicable, outside the firm can be achieved when those consulted

- are given all the relevant facts that will enable them to provide informed advice and
- have appropriate knowledge, authority, and experience.

.A22 The engagement team may consult outside the firm (for example, when the firm lacks appropriate internal resources). The engagement team may take advantage of advisory services provided by other firms, professional and regulatory bodies, or commercial organizations that provide relevant quality control services.

Engagement Quality Control Review

Completion of the Engagement Quality Control Review Before Releasing the Auditor's Report (Ref: par. .21c)

.A23 Conducting the engagement quality control review in a timely manner at appropriate stages during the engagement allows significant findings or issues to be promptly resolved to the engagement quality control reviewer's satisfaction.

.A24 *Completion of the engagement quality control review* means the completion by the engagement quality control reviewer of the requirements in paragraph .22 and, when applicable, compliance with paragraph .23. Documentation of the engagement quality control review may be completed after the report release date as part of the assembly of the final audit file. Section 230 establishes requirements and provides guidance in this regard.¹¹

.A25 When the engagement quality control review is completed after the auditor's report is dated and identifies instances where additional procedures or additional evidence is necessary, the date of the report is changed to the date when the additional procedures have been satisfactorily completed or the additional evidence has been obtained, in accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*.

¹¹ Paragraphs .15–.18 and .A24–.A29 of section 230.

Nature, Timing, and Extent of Engagement Quality Control Review (Ref: par. .22)

.A26 By remaining alert for changes in circumstances, the engagement partner is able to identify situations in which an engagement quality control review is necessary, even though at the start of the engagement such a review was not required.

.A27 The extent of the engagement quality control review may depend, among other things, on the complexity of the audit engagement and the risk that the auditor's report might not be appropriate in the circumstances. The performance of an engagement quality control review does not reduce the responsibilities of the engagement partner for the audit engagement and its performance.

.A28 Matters relevant to evaluating the significant judgments made by the engagement team that may be considered in an engagement quality control review include the following:

- Significant risks identified during the engagement in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and the responses to those risks in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, including the engagement team's assessment of, and response to, the risk of fraud in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*
- Judgments made, particularly with respect to materiality and significant risks
- The significance and disposition of corrected and uncorrected misstatements identified during the audit
- The matters to be communicated to management and those charged with governance and, when applicable, other parties, such as regulatory bodies

.A29 The engagement quality control reviewer may also consider the following:

- The evaluation of the firm's independence with regard to the audit engagement
- Whether appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters and the related conclusions arising from those consultations
- Whether audit documentation selected for review reflects the work performed regarding the significant judgments and supports the conclusions reached

Considerations Specific to Smaller, Less Complex Entities (Ref: par. .21-.22)

.A30 An engagement quality control review is required for audit engagements that meet the criteria established by the firm that subjects engagements to an engagement quality control review. In some cases, none of the firm's audit engagements may meet the criteria that would subject them to such a review.

Considerations Specific to Governmental Entities (Ref: par. .22)

.A31 A statutorily appointed auditor (for example, an auditor general or other suitably qualified person within the audit organization acting on behalf of the auditor general) may act in a role equivalent to that of engagement partner

with overall responsibility for the governmental audit. In such circumstances, when applicable, the selection of the engagement quality control reviewer includes consideration of the need for independence from the audited entity and the ability of the engagement quality control reviewer to provide an objective evaluation.

Monitoring (Ref: par. .24)

.A32 QC section 10 requires the firm to establish a monitoring process designed to provide it with reasonable assurance that the policies and procedures relating to the system of quality control are relevant, adequate, and operating effectively.¹²

.A33 In considering deficiencies that may affect the audit engagement, the engagement partner may consider measures the firm took to rectify the situation that the engagement partner considers sufficient in the context of that audit.

.A34 A deficiency in the firm's system of quality control does not necessarily indicate that a particular audit engagement was not performed in accordance with professional standards and applicable legal and regulatory requirements or that the auditor's report was not appropriate.

Documentation (Ref: par. .25)

.A35 Section 230 addresses the auditor's responsibility to prepare audit documentation for an audit of financial statements. Section 230 also states that it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit.¹³

.A36 Documentation of consultations with other professionals involving difficult or contentious matters that is sufficiently complete and detailed contributes to an understanding of

- the issue on which consultation was sought and
- the results of the consultation, including any decisions made, the basis for those decisions, and how they were implemented.

¹² Paragraph .52 of QC section 10.

¹³ Paragraph .A9 of section 230.

AU-C Section 230

Audit Documentation

Source: SAS No. 122; SAS No. 123.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to prepare audit documentation for an audit of financial statements. The exhibit, "Audit Documentation Requirements in Other AU-C Sections," lists other AU-C sections that contain specific documentation requirements and guidance. The specific documentation requirements of other AU-C sections do not limit the application of this section. Law, regulation, or other standards may establish additional documentation requirements.

Nature and Purposes of Audit Documentation

.02 Audit documentation that meets the requirements of this section and the specific documentation requirements of other relevant AU-C sections provides

- a. evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor;¹ and
- b. evidence that the audit was planned and performed in accordance with generally accepted auditing standards (GAAS) and applicable legal and regulatory requirements.

.03 Audit documentation serves a number of additional purposes, including the following:

- Assisting the engagement team to plan and perform the audit
- Assisting members of the engagement team responsible for supervision to direct and supervise the audit work and to discharge

¹ Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

their review responsibilities in accordance with section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*²

- Enabling the engagement team to demonstrate that it is accountable for its work by documenting the procedures performed, the audit evidence examined, and the conclusions reached
- Retaining a record of matters of continuing significance to future audits of the same entity
- Enabling the conduct of quality control reviews and inspections in accordance with QC section 10, *A Firm's System of Quality Control*
- Enabling the conduct of external inspections or peer reviews in accordance with applicable legal, regulatory, or other requirements
- Assisting an auditor who reviews a predecessor auditor's audit documentation
- Assisting auditors to understand the work performed in the prior year as an aid in planning and performing the current engagement

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

- .05 The objective of the auditor is to prepare documentation that provides
- a. a sufficient and appropriate record of the basis for the auditor's report; and
 - b. evidence that the audit was planned and performed in accordance with GAAS and applicable legal and regulatory requirements.

Definitions

.06 For purposes of GAAS, the following terms have the meanings attributed as follows:

Audit documentation. The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as *working papers* or *workpapers* are also sometimes used).

Audit file. One or more folders or other storage media, in physical or electronic form, containing the records that constitute the audit documentation for a specific engagement.

Documentation completion date. The date, no later than 60 days following the report release date, on which the auditor has assembled for retention a complete and final set of documentation in an audit file.

Experienced auditor. An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of (Ref: par. .A1)

² Paragraphs .17–.19 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

- a. audit processes;
- b. GAAS and applicable legal and regulatory requirements;
- c. the business environment in which the entity operates; and
- d. auditing and financial reporting issues relevant to the entity's industry.

Report release date. The date the auditor grants the entity permission to use the auditor's report in connection with the financial statements. (Ref: par. .A2)

Requirements

Timely Preparation of Audit Documentation

.07 The auditor should prepare audit documentation on a timely basis. (Ref: par. .A3)

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content, and Extent of Audit Documentation

.08 The auditor should prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand (Ref: par. .A4–.A7 and .A19–.A20)

- a. the nature, timing, and extent of the audit procedures performed to comply with GAAS and applicable legal and regulatory requirements; (Ref: par. .A8–.A9)
- b. the results of the audit procedures performed, and the audit evidence obtained; and
- c. significant findings or issues arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. (Ref: par. .A10–.A13)

.09 In documenting the nature, timing, and extent of audit procedures performed, the auditor should record

- a. the identifying characteristics of the specific items or matters tested; (Ref: par. .A14)
- b. who performed the audit work and the date such work was completed; and
- c. who reviewed the audit work performed and the date and extent of such review. (Ref: par. .A15)

.10 For audit procedures related to the inspection of significant contracts or agreements, the auditor should include abstracts or copies of those contracts or agreements in the audit documentation.

.11 The auditor should document discussions of significant findings or issues with management, those charged with governance, and others, including the nature of the significant findings or issues discussed, and when and with whom the discussions took place. (Ref: par. .A16)

.12 If the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant finding or issue, the auditor should document how the auditor addressed the inconsistency. (Ref: par. .A17–.A18)

Departure From a Relevant Requirement

.13 If, in rare circumstances, the auditor judges it necessary to depart from a relevant presumptively mandatory requirement,³ the auditor must document the justification for the departure and how the alternative audit procedures performed in the circumstances were sufficient to achieve the intent of that requirement. (Ref: par. .A21–.A22)

Matters Arising After the Date of the Auditor's Report

.14 If, in rare circumstances, the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report, the auditor should document (Ref: par. .A23)

- a. the circumstances encountered;
- b. the new or additional audit procedures performed, audit evidence obtained, and conclusions reached, and their effect on the auditor's report; and
- c. when and by whom the resulting changes to audit documentation were made and reviewed.

Assembly and Retention of the Final Audit File

.15 The auditor should document the report release date in the audit documentation.

.16 The auditor should assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis, no later than 60 days following the report release date. (Ref: par. .A24–.A26)

.17 After the documentation completion date, the auditor should not delete or discard audit documentation of any nature before the end of the specified retention period. Such retention period, however, should not be shorter than five years from the report release date. (Ref: par. .A27–.A29)

.18 In circumstances other than those addressed in paragraph .14 in which the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the documentation completion date, the auditor should, regardless of the nature of the modifications or additions, document (Ref: par. .A28)

- a. the specific reasons for making the changes; and
- b. when and by whom they were made and reviewed.

.19 The auditor should adopt reasonable procedures to maintain the confidentiality of client information.

Application and Other Explanatory Material

Definitions (Ref: par. .06)

Experienced Auditor

.A1 Having practical audit experience means possessing the competencies and skills that would have enabled the auditor to perform the audit but does not mean that the auditor is required to have performed comparable audits.

³ Paragraph .26 of section 200.

Report Release Date

.A2 In many cases, the report release date will be the date the auditor delivers the audit report to the entity. When there are delays in releasing the report, a fact may become known to the auditor that, had it been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report. Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses the auditor's responsibilities in such circumstances, and paragraph .14 addresses the documentation requirements in the rare circumstances in which the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report.

Timely Preparation of Audit Documentation (Ref: par. .07)

.A3 Preparing sufficient and appropriate audit documentation on a timely basis throughout the audit helps to enhance the quality of the audit and facilitates the effective review and evaluation of the audit evidence obtained and conclusions reached before the auditor's report is finalized. Documentation prepared at the time such work is performed or shortly thereafter is likely to be more accurate than documentation prepared at a much later time.

Documentation of the Audit Procedures Performed and Audit Evidence Obtained

Form, Content, and Extent of Audit Documentation (Ref: par. .08)

.A4 The form, content, and extent of audit documentation depend on factors such as

- the size and complexity of the entity.
- the nature of the audit procedures to be performed.
- the identified risks of material misstatement.
- the significance of the audit evidence obtained.
- the nature and extent of exceptions identified.
- the need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained.
- the audit methodology and tools used.
- the extent of judgment involved in performing the work and evaluating the results.

.A5 Audit documentation may be recorded on paper or on electronic or other media. QC section 10 addresses a firm's responsibility to establish procedures designed to maintain the integrity, accessibility, and retrievability of documentation; for example, when original paper documentation is electronically scanned or otherwise copied to another media for inclusion in the audit file.⁴ Examples of audit documentation include the following:

- Audit plans⁵
- Analyses
- Issues memorandums

⁴ Paragraph .A58 of QC section 10 No. 8, *A Firm's System of Quality Control*.

⁵ Paragraphs .07--.11 of section 300, *Planning an Audit*.

- Summaries of significant findings or issues
- Letters of confirmation and representation
- Checklists
- Correspondence (including e-mail) concerning significant findings or issues

.A6 The auditor need not include in audit documentation superseded drafts of working papers and financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

.A7 On their own, oral explanations by the auditor do not represent adequate support for the work the auditor performed or conclusions the auditor reached, but may be used to explain or clarify information contained in the audit documentation.

Documentation of Compliance With GAAS (Ref: par. .08a)

.A8 In principle, compliance with the requirements of this section will result in the audit documentation being sufficient and appropriate in the circumstances. Other AU-C sections contain specific documentation requirements that are intended to clarify the application of this section in the particular circumstances of those other AU-C sections. The specific documentation requirements of other AU-C sections do not limit the application of this section. Furthermore, the absence of a documentation requirement in any particular AU-C section is not intended to suggest that there is no documentation that will be prepared as a result of complying with that AU-C section.

.A9 Audit documentation provides evidence that the audit complies with GAAS. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file. For example:

- The existence of an adequately documented audit plan demonstrates that the auditor has planned the audit.
- The existence of a signed engagement letter in the audit file demonstrates that the auditor has agreed to the terms of the audit engagement with management or, when appropriate, those charged with governance.
- An auditor's report containing an appropriately qualified opinion on the financial statements demonstrates that the auditor has complied with the requirement to express a qualified opinion under the circumstances in accordance with GAAS.
- Regarding requirements that apply generally throughout the audit, there may be a number of ways in which compliance with them may be demonstrated within the audit file:
 - For example, there may be no single way in which the auditor's professional skepticism is documented. But the audit documentation may nevertheless provide evidence of the auditor's exercise of professional skepticism in accordance with GAAS. Such evidence may include specific procedures performed to corroborate management's responses to the auditor's inquiries.

- Similarly, that the engagement partner has taken responsibility for the direction, supervision, and performance of the audit in compliance with GAAS may be evidenced in a number of ways within the audit documentation. This may include documentation of the engagement partner's timely involvement in aspects of the audit, such as participation in the team discussions required by section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.⁶

Documentation of Significant Findings or Issues and Related Significant Professional Judgments (Ref: par. .08c)

.A10 Judging the significance of a finding or issue requires an objective analysis of the facts and circumstances. Examples of significant findings or issues include

- matters involving the selection, application, and consistency of significant accounting practices, including related disclosures. Such matters include, but are not limited to (a) accounting for complex or unusual transactions or (b) accounting estimates and uncertainties and, if applicable, the related management assumptions.
- matters that give rise to significant risks (as defined in section 315).⁷
- results of audit procedures (including identification of corrected and uncorrected misstatements)⁸ indicating (a) that the financial statements could be materially misstated or (b) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
- circumstances that cause the auditor significant difficulty in applying necessary audit procedures.
- findings that could result in a modification to the audit opinion or the inclusion of an emphasis-of-matter paragraph in the auditor's report.

.A11 An important factor in determining the form, content, and extent of audit documentation of significant findings or issues is the extent of professional judgment exercised in performing the work and evaluating the results. Documentation of the professional judgments made, when significant, serves to explain the auditor's conclusions and to reinforce the quality of the judgment. Such findings or issues are of particular interest to those responsible for reviewing audit documentation, including those carrying out subsequent audits when reviewing items of continuing significance (for example, when performing a retrospective review of accounting estimates).

.A12 Some examples of circumstances in which, in accordance with paragraph .08, it is appropriate to prepare audit documentation relating to the exercise of professional judgment include, when the findings, issues, and judgments are significant,

⁶ Paragraph .33 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

⁷ Paragraphs .28–.30 of section 315.

⁸ See section 450, *Evaluation of Misstatements Identified During the Audit*.

- the rationale for the auditor's conclusion when a requirement provides that the auditor *should consider* certain information or factors, and that consideration is significant in the context of the particular engagement.
- the basis for the auditor's conclusion on the reasonableness of areas of subjective judgments (for example, the reasonableness of significant accounting estimates).
- the basis for the auditor's conclusions about the authenticity of a document when further investigation (such as making appropriate use of a specialist or of confirmation procedures) is undertaken in response to conditions identified during the audit that caused the auditor to believe that the document may not be authentic.

.A13 The auditor may consider it helpful to prepare and retain as part of the audit documentation a summary (sometimes known as a completion memorandum) that describes the significant findings or issues identified during the audit and how they were addressed, or that includes cross-references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor's consideration of the significant findings or issues. It may also help the auditor to consider whether, in light of the audit procedures performed and conclusions reached, there is any individual relevant AU-C section objective that the auditor cannot achieve that would prevent the auditor from achieving the overall objectives of the auditor.

Identification of Specific Items or Matters Tested and of the Preparer and the Reviewer (Ref: par. .09)

.A14 Recording the identifying characteristics serves a number of purposes. For example, it improves the ability of the auditor to supervise and review the work performed and thus demonstrates the accountability of the engagement team for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the item or matter tested. For example:

- For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over a specified amount from the journal register for the period being audited).
- For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point, and the sampling interval (for example, a systematic sample of shipping reports selected from the shipping log for the period from April 1 to September 30, starting with report number 12345 and selecting every 125th report).
- For a procedure requiring inquiries of specific entity personnel, the auditor may record the inquiries made, the dates of the inquiries, and the names and job designations of the entity personnel.

- For an observation procedure, the auditor may record the process or matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.

.A15 Section 220 requires the auditor to review the audit work performed through review of the audit documentation.⁹ The requirement to document who reviewed the audit work performed and the extent of the review, in accordance with the firm's policies and procedures addressing review responsibilities, does not imply a need for each specific working paper to include evidence of review. The requirement, however, means documenting what audit work was reviewed, who reviewed such work, and when it was reviewed.

Documentation of Discussions of Significant Findings or Issues With Management, Those Charged With Governance, and Others (Ref: par. .11)

.A16 The audit documentation is not limited to documents prepared by the auditor but may include other appropriate documents such as minutes of meetings prepared by the entity's personnel and recognized by the auditor as an appropriate summary of the meeting. Others with whom the auditor may discuss significant findings or issues may include other personnel within the entity, and external parties, such as persons providing professional advice to the entity.

Documentation of How Inconsistencies Have Been Addressed (Ref: par. .12)

.A17 The requirement to document how the auditor addressed inconsistencies in information does not imply that the auditor needs to retain documentation that is incorrect or superseded.

.A18 The documentation of the inconsistency may include, but is not limited to, procedures performed in response to the information, and documentation of consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

Considerations Specific to Smaller, Less Complex Entities (Ref: par. .08)

.A19 The audit documentation for the audit of a smaller, less complex entity is generally less extensive than that for the audit of a larger, more complex entity. Further, in the case of an audit in which the engagement partner performs all the audit work, the documentation will not include matters that might have to be documented solely to inform or instruct members of an engagement team, or to provide evidence of review by other members of the team (for example, there will be no matters to document relating to team discussions or supervision). Nevertheless, the engagement partner complies with the overriding requirement in paragraph .08 to prepare audit documentation that can be understood by an experienced auditor, as the audit documentation may be subject to review by external parties for regulatory or other purposes.

.A20 When preparing audit documentation, the auditor of a smaller, less complex entity may also find it helpful and efficient to record various aspects of the audit together in a single document, with cross-references to supporting working papers as appropriate. Examples of matters that may be documented together in the audit of a smaller, less complex entity include the understanding of the entity and its internal control; the overall audit strategy and audit plan; materiality; assessed risks, significant findings or issues noted during the audit; and conclusions reached.

⁹ Paragraph .19 of section 220.

Departure From a Relevant Requirement (Ref: par. .13)

.A21 The requirements of GAAS are designed to enable the auditor to achieve the objectives specified in GAAS, and thereby the overall objectives of the auditor. Accordingly, other than in rare circumstances, GAAS call for compliance with each requirement that is relevant in the circumstances of the audit.

.A22 The documentation requirement applies only to requirements that are relevant in the circumstances. A requirement is not relevant¹⁰ only in the cases in which

- a. the AU-C section is not relevant (for example, if an entity does not have an internal audit function, nothing in section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*,[†] is relevant); or
- b. the requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion when there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

Matters Arising After the Date of the Auditor's Report (Ref: par. .14)

.A23 Examples of rare circumstances in which the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report include

- when, after the date of the auditor's report, the auditor becomes aware of facts that existed at that date and which, if known at that date, might have caused the financial statements to be revised or the auditor to modify the opinion in the auditor's report.¹¹
- when the auditor concludes that procedures necessary at the time of the audit, in the circumstances then existing, were omitted from the audit of the financial information.¹²

The resulting changes to the audit documentation are reviewed in accordance with the firm's quality control procedures as required by QC section 10.

Assembly and Retention of the Final Audit File (Ref: par. .16–.18)

.A24 Statutes, regulations, or the audit firm's quality control policies may specify a period of time shorter than 60 days following the report release date in which this assembly process is to be completed.

.A25 Certain matters, such as auditor independence and staff training, which are not engagement specific, may be documented either centrally within a firm or in the audit documentation for an audit engagement.

¹⁰ Paragraph .24 of section 200.

[†] Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

¹¹ Paragraphs .12 and .15 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

¹² Paragraph .07 of section 585, *Consideration of Omitted Procedures After the Report Release Date*.

.A26 The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process if they are administrative in nature. Examples of such changes include

- deleting or discarding superseded documentation.
- sorting, collating, and cross-referencing working papers.
- signing off on completion checklists relating to the file assembly process.
- documenting audit evidence that the auditor has obtained, discussed, and agreed with the relevant members of the engagement team before the date of the auditor's report.
- adding information received after the date of the auditor's report; for example, an original confirmation that was previously faxed.

.A27 Firms are required to establish policies and procedures for the retention of engagement documentation.¹³ Statutes, regulations, or the audit firm's quality control policies may specify a retention period longer than five years.

.A28 An example of a circumstance in which the auditor may find it necessary to modify existing audit documentation or add new audit documentation after the documentation completion date is the need to clarify existing audit documentation arising from comments received during monitoring inspections performed by internal or external parties.

.A29 Audit documentation is the property of the auditor, and some states recognize this right of ownership in their statutes. The auditor may make available to the entity at the auditor's discretion copies of the audit documentation, provided such disclosure does not undermine the effectiveness and integrity of the audit process.

¹³ Paragraph .50 of QC section 10.

.A30

Exhibit—Audit Documentation Requirements in Other AU-C Sections

The following lists the main paragraphs in other AU-C sections that contain specific documentation requirements. This list is not a substitute for knowledge of the AU-C sections:

- a. Paragraphs .10, .13, and .16 of section 210, *Terms of Engagement*
- b. Paragraphs .25–.26 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*
- c. Paragraphs .43–.46 of section 240, *Consideration of Fraud in a Financial Statement Audit*
- d. Paragraph .28 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*
- e. Paragraph .20 of section 260, *The Auditor's Communication With Those Charged With Governance*
- f. Paragraph .12 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*
- g. Paragraph .14 of section 300, *Planning an Audit*
- h. Paragraph .33 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- i. Paragraph .14 of section 320, *Materiality in Planning and Performing an Audit*
- j. Paragraphs .30–.33 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- k. Paragraph .12 of section 450, *Evaluation of Misstatements Identified During the Audit*
- l. Paragraph .20 of section 501, *Audit Evidence—Specific Considerations for Selected Items*
- m. Paragraph .08 of section 520, *Analytical Procedures*
- n. Paragraph .22 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*
- o. Paragraph .28 of section 550, *Related Parties*
- p. Paragraph .22 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- q. Paragraphs .49 and .64 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*
- r. Paragraph .13 of section 915, *Reports on Application of Requirements of an Applicable Financial Reporting Framework*
- s. Paragraphs .42–.43 of section 930, *Interim Financial Information*
- t. Paragraphs .39–.42 of section 935, *Compliance Audits*

[Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

AU-C Section 9230

Audit Documentation: Auditing Interpretations of Section 230

1. Providing Access to or Copies of Audit Documentation to a Regulator^{1,2}

.01 Question—Paragraph .19 of section 230, *Audit Documentation*, states that "the auditor should adopt reasonable procedures to maintain the confidentiality of client information." However, auditors are sometimes required by law, regulation, or audit contract³ to provide a regulator, or a duly appointed representative, access to audit documentation. For example, a regulator may request access to the audit documentation to fulfill a quality review requirement or to assist in establishing the scope of a regulatory examination. Furthermore, as part of the regulator's review of the audit documentation, the regulator may request copies of all or selected portions of the audit documentation during or after the review. The regulator may intend, or decide, to make copies (or information derived from the audit documentation) available to others, including other governmental agencies, for their particular purposes, with or without the knowledge of the auditor or the client. When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation pursuant to law, regulation, or audit contract, what steps may the auditor take?

.02 Interpretation—When a regulator requests access to audit documentation pursuant to law, regulation, or audit contract, the auditor may take the following steps:

- a. Consider advising the client that the regulator has requested access to (and possibly copies of) the audit documentation and that the auditor intends to comply with such request.⁴
- b. Make appropriate arrangements with the regulator for the review.
- c. Maintain control over the audit documentation, and
- d. Consider submitting the letter described in paragraph .05 of this interpretation to the regulator.

¹ The term *regulator(s)* includes federal, state, and local government officials with legal oversight authority over the entity. Examples of regulators who may request access to audit documentation include, but are not limited to, state insurance and utility regulators, various health care authorities, and federal agencies such as the Federal Deposit Insurance Corporation, the Department of Housing and Urban Development, the Department of Labor, and the Rural Electrification Administration.

² The guidance in this interpretation does not apply to requests from the IRS, firm practice-monitoring programs to comply with AICPA or state professional requirements such as peer or quality reviews, proceedings relating to alleged ethics violations, or subpoenas.

³ Paragraphs .11–.15 of this interpretation address situations in which the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation.

⁴ The auditor may wish (and in some cases may be required by law, regulation, or audit contract) to confirm in writing with the client that the auditor may be required to provide a regulator access to the audit documentation. Sample language that may be used follows:

The audit documentation for this engagement is the property of [name of auditor] and constitutes confidential information. However, we may be requested to make certain audit documentation

(continued)

.03 Making appropriate arrangements with the regulator may include establishing the specific details such as the date, time, and location of the review. The audit documentation may be made available to a regulator at the offices of the client, the auditor, or a mutually agreed-upon location. However, maintaining control of audit documentation is necessary in order for the auditor to maintain the integrity of the audit documentation and the confidentiality of client information. For example, the auditor (or the auditor's representative) may be present when the audit documentation is reviewed by the regulator.

.04 Ordinarily, the auditor may not agree to transfer ownership of the audit documentation to a regulator. Furthermore, the auditor may not agree, without client authorization, that the information contained therein about the client may be communicated to or made available to any other party. In this regard, the action of an auditor providing access to, or copies of, the audit documentation shall not constitute transfer of ownership or authorization to make them available to any other party.

.05 An audit performed in accordance with generally accepted auditing standards is not intended to, and does not, satisfy a regulator's oversight responsibilities. To avoid any misunderstanding, prior to allowing a regulator access to the audit documentation, the auditor may submit a letter to the regulator that

- a. sets forth the auditor's understanding of the purpose for which access is being requested;
- b. describes the audit process and the limitations inherent in a financial statement audit;
- c. explains the purpose for which the audit documentation was prepared, and that any individual conclusions must be read in the context of the auditor's report on the financial statements;
- d. states, except when not applicable, that the audit was not planned or conducted in contemplation of the purpose for which access is being granted or to assess the entity's compliance with laws and regulations;
- e. states that the audit and the audit documentation should not supplant other inquiries and procedures that should be undertaken by the regulator for its purposes;
- f. requests confidential treatment under the Freedom of Information Act or similar laws and regulations,⁵ when a request for the audit documentation is made, and that written notice be given to the auditor before transmitting any information contained in the audit documentation to others, including other governmental agencies, except when such transfer is required by law or regulation; and
- g. states that if any copies are to be provided, they will be identified as "Confidential Treatment Requested by [*name of auditor*, *address*, *telephone number*]."

(footnote continued)

available to [*name of regulator*] pursuant to authority given to it by law or regulation. If requested, access to such audit documentation will be provided under the supervision of [*name of auditor*] personnel. Furthermore, upon request, we may provide copies of selected audit documentation to [*name of regulator*]. The [*name of regulator*] may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

⁵ The auditor may need to consult the regulations of individual agencies and, if necessary, consult with legal counsel regarding the specific procedures and requirements necessary to gain confidential treatment.

The auditor may obtain a signed acknowledgment copy of the letter as evidence of the regulator's receipt of the letter.

.06 An example of a letter containing the elements described in paragraph .05 of this interpretation is presented as follows:

Illustrative Letter to Regulator⁶

[Date]

[Name and Address of Regulatory Agency]

Your representatives have requested access to our audit documentation in connection with our audit of the December 31, 20XX, financial statements of [name of client]. It is our understanding that the purpose of your request is [state purpose: for example, "to facilitate your regulatory examination"].⁷

Our audit of [name of client] December 31, 20XX, financial statements was conducted in accordance with auditing standards generally accepted in the United States of America,⁸ the objective⁹ of which is to form an opinion as to whether the financial statements, which are the responsibility and representations of management, present fairly, in all material respects, the financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.¹⁰ Under generally accepted auditing standards, we have the responsibility, within the inherent limitations of the auditing process, to design our audit to provide reasonable assurance that errors and fraud that have a material effect on the financial statements will be detected, and to exercise due care in the conduct of our audit. The concept of selective testing of the data being audited, which involves judgment both as to the number of transactions to be audited and as to the areas to be tested, has been generally accepted as a valid and sufficient basis for an auditor to express an opinion on financial statements. Thus, our audit, based on the concept of selective testing, is subject to the inherent risk that material errors or fraud, if they exist, would not be detected. In addition, an audit does not address the possibility that material errors or fraud may occur in the future. Also, our use of professional judgment and the assessment of materiality for the purpose of our audit means that matters may have existed that would have been assessed differently by you.

The audit documentation was prepared for the purpose of providing a sufficient and appropriate record of the basis for our report on [name of client] December 31, 20XX, financial statements and to aid in the conduct and supervision of our audit. The audit documentation is the principal record of auditing procedures

⁶ This letter may be modified appropriately when the audit has been performed in accordance with generally accepted auditing standards and also in accordance with additional auditing requirements specified by a regulatory agency (for example, the requirements specified in *Government Auditing Standards* issued by the Comptroller General of the United States).

⁷ If the auditor is not required by law, regulation, or audit contract to provide a regulator access to the audit documentation but otherwise intends to provide such access (see paragraphs .11–.15 of this interpretation), the letter may include a statement that "Management of [name of client] has authorized us to provide you access to our audit documentation for [state purpose]."

⁸ See footnote 6.

⁹ In an audit performed in accordance with the Single Audit Act of 1984, the Single Audit Act Amendments of 1996, and certain other federal audit requirements, an additional objective of the audit is to assess compliance with laws and regulations applicable to federal financial assistance. Accordingly, in these situations, the illustrative letter provided in this interpretation may be modified to include the additional objective.

¹⁰ If the financial statements have been prepared in conformity with regulatory accounting practices, the phrase "financial position, results of operations, and cash flows in conformity with generally accepted accounting principles" may be replaced with appropriate wording such as, in the case of an insurance company, the "admitted assets, liabilities . . . of the XYZ Insurance Company in conformity with accounting practices prescribed or permitted by the state of . . . insurance department."

performed, evidence obtained, and conclusions reached in the engagement. The auditing procedures that we performed were limited to those we considered necessary under generally accepted auditing standards¹¹ to enable us to formulate and express an opinion on the financial statements¹² taken as a whole. Accordingly, we make no representation as to the sufficiency or appropriateness, for your purposes, of either the information contained in our audit documentation or our auditing procedures. In addition, any notations, comments, and individual conclusions appearing on any of the audit documents do not stand alone, and should not be read as an opinion on any individual amounts, accounts, balances or transactions.

Our audit of [*name of client*] December 31, 20XX, financial statements was performed for the purpose stated above and has not been planned or conducted in contemplation of your [*state purpose: for example, "regulatory examination"*] or for the purpose of assessing [*name of client*] compliance with laws and regulations.¹³ Therefore, items of possible interest to you may not have been specifically addressed. Accordingly, our audit and the audit documentation prepared in connection therewith, should not supplant other inquiries and procedures that should be undertaken by the [*name of regulatory agency*] for the purpose of monitoring and regulating the financial affairs of the [*name of client*]. In addition, we have not audited any financial statements of [*name of client*] since [*date of audited balance sheet referred to in the first paragraph above*] nor have we performed any auditing procedures since [*date*], the date of our auditor's report, and significant events or circumstances may have occurred since that date.

The audit documentation constitutes and reflects work performed or evidence obtained by [*name of auditor*] in its capacity as independent auditor for [*name of client*]. The documents contain trade secrets and confidential commercial and financial information of our firm and [*name of client*] that is privileged and confidential, and we expressly reserve all rights with respect to disclosures to third parties. Accordingly, we request confidential treatment under the Freedom of Information Act or similar laws and regulations¹⁴ when requests are made for the audit documentation or information contained therein or any documents created by the [*name of regulatory agency*] containing information derived therefrom. We further request that written notice be given to our firm before distribution of the information in the audit documentation (or copies thereof) to others, including other governmental agencies, except when such distribution is required by law or regulation.

[If it is expected that copies will be requested, add:

Any copies of our audit documentation we agree to provide you will be identified as "Confidential Treatment Requested by [*name of auditor; address, telephone number*]."

[Firm signature]

.07 Question—A regulator may request access to the audit documentation before the audit has been completed and the report released. May the auditor allow access in such circumstances?

¹¹ See footnote 6

¹² See footnote 9.

¹³ See footnote 9.

¹⁴ This illustrative paragraph may not in and of itself be sufficient to gain confidential treatment under the rules and regulations of certain regulatory agencies. The auditor may tailor this paragraph to the circumstances after consulting the regulations of each applicable regulatory agency and, if necessary, may consult with legal counsel regarding the specific procedures and requirements to gain confidential treatment.

.08 Interpretation—When the audit has not been completed, the audit documentation is necessarily incomplete because (a) additional information may be added as a result of further tests and review by supervisory personnel and (b) any audit results and conclusions reflected in the incomplete audit documentation may change. Accordingly, it is preferable that access be delayed until all auditing procedures have been completed and all internal reviews have been performed. If access is provided prior to completion of the audit, the auditor may issue the letter referred to in paragraph .05 of this interpretation, appropriately modified, and including additional language along the following lines:

We have been engaged to audit in accordance with auditing standards generally accepted in the United States of America the December 31, 20XX, financial statements of XYZ Company, but have not as yet completed our audit. Accordingly, at this time we do not express any opinion on the Company's financial statements. Furthermore, the contents of the audit documentation may change as a result of additional auditing procedures and review of the audit documentation by supervisory personnel of our firm. Accordingly, our audit documentation is incomplete.

Because the audit documentation may change prior to completion of the audit, it is preferable that the auditor not provide copies of the audit documentation until the audit has been completed.

.09 Question—Some regulators may engage an independent party, such as another independent public accountant, to perform the audit documentation review on behalf of the regulatory agency. Are there any special precautions the auditor may observe in these circumstances?

.10 Interpretation—The auditor may obtain acknowledgment, preferably in writing, from the regulator stating that the third party is acting on behalf of the regulator and agreement from the third party that he or she is subject to the same restrictions on disclosure and use of audit documentation and the information contained therein as the regulator.

.11 Question—When a regulator requests the auditor to provide access to (and possibly copies of) audit documentation and the auditor is not otherwise required by law, regulation, or audit contract to provide such access, what steps may the auditor take?

.12 Interpretation—The auditor may obtain an understanding of the reasons for the regulator's request for access to the audit documentation and may consider consulting with legal counsel regarding the request. If the auditor decides to provide such access, reasonable procedures to maintain the confidentiality of client information include obtaining the client's consent, preferably in writing, to provide the regulator access to the audit documentation.

.13 Following is an example of language that may be used in the written communication to the client:

The audit documentation for this engagement is the property of [name of auditor] and constitutes confidential information. However, we have been requested to make certain audit documentation available to [name of regulator] for [describe the regulator's basis for its request]. Access to such audit documentation will be provided under the supervision of [name of auditor] personnel. Furthermore, upon request, we may provide copies of selected audit documentation to [name of regulator].

You have authorized [name of auditor] to allow [name of regulator] access to the audit documentation in the manner discussed above. Please confirm your

agreement to the above by signing below and returning to [*name of auditor, address*].

[*Firm signature*]

Agreed and acknowledged:

[*Name and title*]

[*Date*]

.14 If the client requests to review the audit documentation before allowing the regulator access, the auditor may provide the client with the opportunity to obtain an understanding of the nature of the information about its financial statements contained in the audit documentation that is being made available to the regulator. When a client reviews the audit documentation, the need to maintain control of the audit documentation is as discussed in paragraph .03 of this interpretation.

.15 The guidance in paragraphs .03–.10 of this interpretation, which provide guidance on making arrangements with the regulator for access to the audit documentation, maintaining control over the audit documentation, and submitting a letter describing various matters to the regulator, is also applicable.

[Issue Date: July, 1994; Revised: June, 1996; Revised: October, 2000; Revised: January, 2002; Revised: December, 2005; Revised: October, 2011, effective for audits of financial statements for periods ending on or after December 15, 2012.]

AU-C Section 240

Consideration of Fraud in a Financial Statement Audit

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to fraud in an audit of financial statements. Specifically, it expands on how section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, are to be applied regarding risks of material misstatement due to fraud.

Characteristics of Fraud

.02 Misstatements in the financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional.

.03 Although fraud is a broad legal concept, for the purposes of generally accepted auditing standards (GAAS), the auditor is primarily concerned with fraud that causes a material misstatement in the financial statements. Two types of intentional misstatements are relevant to the auditor—misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets. Although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determinations of whether fraud has actually occurred. (Ref: par. .A1–.A8)

Responsibility for the Prevention and Detection of Fraud

.04 The primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

It is important that management, with the oversight of those charged with governance, places a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals not to commit fraud because of the likelihood of detection and punishment. This involves a commitment to creating a culture of honesty and ethical behavior, which can be reinforced by active oversight by those charged with governance. Oversight by those charged with governance includes considering the potential for override of controls or other inappropriate influence over the financial reporting process, such as efforts by management to manage earnings in order to influence the perceptions of financial statement users regarding the entity's performance and profitability.

Responsibilities of the Auditor

.05 An auditor conducting an audit in accordance with GAAS is responsible for obtaining reasonable assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error. Due to the inherent limitations of an audit, an unavoidable risk exists that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with GAAS.¹

.06 As described in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud.² The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor. Such attempts at concealment may be even more difficult to detect when accompanied by collusion. Collusion may cause the auditor to believe that audit evidence is persuasive when it is, in fact, false. The auditor's ability to detect a fraud depends on factors such as the skillfulness of the perpetrator, the frequency and extent of manipulation, the degree of collusion involved, the relative size of individual amounts manipulated, and the seniority of those individuals involved. Although the auditor may be able to identify potential opportunities for fraud to be perpetrated, it is difficult for the auditor to determine whether misstatements in judgment areas, such as accounting estimates, are caused by fraud or error.

.07 Furthermore, the risk of the auditor not detecting a material misstatement resulting from management fraud is greater than for employee fraud because management is frequently in a position to directly or indirectly manipulate accounting records, present fraudulent financial information, or override control procedures designed to prevent similar frauds by other employees.

.08 When obtaining reasonable assurance, the auditor is responsible for maintaining professional skepticism throughout the audit, considering the potential for management override of controls, and recognizing the fact that audit procedures that are effective for detecting error may not be effective in detecting fraud. The requirements in this section are designed to assist the auditor in identifying and assessing the risks of material misstatement due to fraud and in designing procedures to detect such misstatement.

¹ Paragraphs .A55–.A56 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

² Paragraph .A55 of section 200.

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

- .10 The objectives of the auditor are to
- a. identify and assess the risks of material misstatement of the financial statements due to fraud;
 - b. obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and
 - c. respond appropriately to fraud or suspected fraud identified during the audit.

Definitions

.11 For purposes of GAAS, the following terms have the meanings attributed as follows:

Fraud. An intentional act by one or more individuals among management, those charged with governance, employees, or third parties, involving the use of deception that results in a misstatement in financial statements that are the subject of an audit.

Fraud risk factors. Events or conditions that indicate an incentive or pressure to perpetrate fraud, provide an opportunity to commit fraud, or indicate attitudes or rationalizations to justify a fraudulent action. (Ref: par. .A11, .A30, and .A56)

Requirements

Professional Skepticism

.12 In accordance with section 200, the auditor should maintain professional skepticism throughout the audit, recognizing the possibility that a material misstatement due to fraud could exist, notwithstanding the auditor's past experience of the honesty and integrity of the entity's management and those charged with governance.³ (Ref: par. .A9–.A10)

.13 Unless the auditor has reason to believe the contrary, the auditor may accept records and documents as genuine. If conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, the auditor should investigate further. (Ref: par. .A11)

.14 When responses to inquiries of management, those charged with governance, or others are inconsistent or otherwise unsatisfactory (for example, vague or implausible), the auditor should further investigate the inconsistencies or unsatisfactory responses.

³ Paragraph .17 of section 200.

Discussion Among the Engagement Team

.15 Section 315 requires a discussion among the key engagement team members, including the engagement partner, and a determination by the engagement partner of which matters are to be communicated to those team members not involved in the discussion.⁴ This discussion should include an exchange of ideas or brainstorming among the engagement team members about how and where the entity's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the entity could be misappropriated. The discussion should occur setting aside beliefs that the engagement team members may have that management and those charged with governance are honest and have integrity, and should, in particular, also address (Ref: par. .A12–.A13)

- a. known external and internal factors affecting the entity that may create an incentive or pressure for management or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables management or others to rationalize committing fraud;
- b. the risk of management override of controls;
- c. consideration of circumstances that might be indicative of earnings management or manipulation of other financial measures and the practices that might be followed by management to manage earnings or other financial measures that could lead to fraudulent financial reporting;
- d. the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement due to fraud; and
- e. how the auditor might respond to the susceptibility of the entity's financial statements to material misstatement due to fraud.

Communication among the engagement team members about the risks of material misstatement due to fraud should continue throughout the audit, particularly upon discovery of new facts during the audit.

Risk Assessment Procedures and Related Activities

.16 When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, including the entity's internal control, required by section 315, the auditor should perform the procedures in paragraphs .17–.24 to obtain information for use in identifying the risks of material misstatement due to fraud.⁵

Discussions With Management and Others Within the Entity

.17 The auditor should make inquiries of management regarding

- a. management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent, and frequency of such assessments; (Ref: par. .A14–.A15)

⁴ Paragraph .11 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

⁵ Paragraphs .05–.25 of section 315.

- b. management's process for identifying, responding to, and monitoring the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist; (Ref: par. .A16)
- c. management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud in the entity; and
- d. management's communication, if any, to employees regarding its views on business practices and ethical behavior.

.18 The auditor should make inquiries of management, and others within the entity as appropriate, to determine whether they have knowledge of any actual, suspected, or alleged fraud affecting the entity. (Ref: par. .A17–.A20)

.19 For those entities that have an internal audit function,⁶ the auditor should make inquiries of internal audit to obtain its views about the risks of fraud; determine whether it has knowledge of any actual, suspected, or alleged fraud affecting the entity; whether it has performed any procedures to identify or detect fraud during the year; and whether management has satisfactorily responded to any findings resulting from these procedures.

Those Charged With Governance

.20 Unless all of those charged with governance are involved in managing the entity,⁷ the auditor should obtain an understanding of how those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks. (Ref: par. .A21–.A23)

.21 Unless all of those charged with governance are involved in managing the entity, the auditor should make inquiries of those charged with governance (or the audit committee or, at least, its chair) to determine their views about the risks of fraud and whether they have knowledge of any actual, suspected, or alleged fraud affecting the entity. These inquiries are made, in part, to corroborate the responses received from the inquiries of management.

Unusual or Unexpected Relationships Identified

.22 Based on analytical procedures performed as part of risk assessment procedures,⁸ the auditor should evaluate whether unusual or unexpected relationships that have been identified indicate risks of material misstatement due to fraud. To the extent not already included, the analytical procedures,

⁶ Section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, provides guidance in audits of those entities that have an internal audit function. Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and was previously codified as AU section 322 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, redesignated AU section 322 as AU-C section 610, which will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

⁷ Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

⁸ Paragraphs .06(b) and .A7–.A10 of section 315.

and evaluation thereof, should include procedures relating to revenue accounts. (Ref: par. .A24–.A26 and .A46)

Other Information

.23 The auditor should consider whether other information obtained by the auditor indicates risks of material misstatement due to fraud. (Ref: par. .A27)

Evaluation of Fraud Risk Factors

.24 The auditor should evaluate whether the information obtained from the risk assessment procedures and related activities performed indicates that one or more fraud risk factors are present. Although fraud risk factors may not necessarily indicate the existence of fraud, they have often been present in circumstances in which frauds have occurred and, therefore, may indicate risks of material misstatement due to fraud. (Ref: par. .A28–.A32)

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

.25 In accordance with section 315, the auditor should identify and assess the risks of material misstatement due to fraud at the financial statement level, and at the assertion level for classes of transactions, account balances, and disclosures.⁹ The auditor's risk assessment should be ongoing throughout the audit, following the initial assessment.

.26 When identifying and assessing the risks of material misstatement due to fraud, the auditor should, based on a presumption that risks of fraud exist in revenue recognition, evaluate which types of revenue, revenue transactions, or assertions give rise to such risks. Paragraph .46 specifies the documentation required when the auditor concludes that the presumption is not applicable in the circumstances of the engagement and, accordingly, has not identified revenue recognition as a risk of material misstatement due to fraud. (Ref: par. .A33–.A35)

.27 The auditor should treat those assessed risks of material misstatement due to fraud as significant risks and, accordingly, to the extent not already done so, the auditor should obtain an understanding of the entity's related controls, including control activities, relevant to such risks, including the evaluation of whether such controls have been suitably designed and implemented to mitigate such fraud risks. (Ref: par. .A36–.A37)

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses

.28 In accordance with section 330, the auditor should determine overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level.¹⁰ (Ref: par. .A38)

.29 In determining overall responses to address the assessed risks of material misstatement due to fraud at the financial statement level, the auditor should

⁹ Paragraph .26 of section 315.

¹⁰ Paragraph .05 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

- a. assign and supervise personnel, taking into account the knowledge, skill, and ability of the individuals to be given significant engagement responsibilities and the auditor's assessment of the risks of material misstatement due to fraud for the engagement; (Ref: par. .A39–.A40)
- b. evaluate whether the selection and application of accounting policies by the entity, particularly those related to subjective measurements and complex transactions, may be indicative of fraudulent financial reporting resulting from management's effort to manage earnings, or a bias that may create a material misstatement; and (Ref: par. .A41)
- c. incorporate an element of unpredictability in the selection of the nature, timing, and extent of audit procedures. (Ref: par. .A42)

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level

.30 In accordance with section 330, the auditor should design and perform further audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement due to fraud at the assertion level.¹¹ (Ref: par. .A43–.A46)

Audit Procedures Responsive to Risks Related to Management Override of Controls

.31 Management is in a unique position to perpetrate fraud because of management's ability to manipulate accounting records and prepare fraudulent financial statements by overriding controls that otherwise appear to be operating effectively. Although the level of risk of management override of controls will vary from entity to entity, the risk is, nevertheless, present in all entities. Due to the unpredictable way in which such override could occur, it is a risk of material misstatement due to fraud and, thus, a significant risk.

.32 Even if specific risks of material misstatement due to fraud are not identified by the auditor, a possibility exists that management override of controls could occur. Accordingly, the auditor should address the risk of management override of controls apart from any conclusions regarding the existence of more specifically identifiable risks by designing and performing audit procedures to

- a. test the appropriateness of journal entries recorded in the general ledger and other adjustments made in the preparation of the financial statements, including entries posted directly to financial statement drafts. In designing and performing audit procedures for such tests, the auditor should (Ref: par. .A47–.A50 and .A55)
 - i. obtain an understanding of the entity's financial reporting process and controls over journal entries and other adjustments,¹² and the suitability of design and implementation of such controls;
 - ii. make inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments;

¹¹ Paragraph .06 of section 330.

¹² Paragraph .19 of section 315.

- iii. consider fraud risk indicators, the nature and complexity of accounts, and entries processed outside the normal course of business;
 - iv. select journal entries and other adjustments made at the end of a reporting period; and
 - v. consider the need to test journal entries and other adjustments throughout the period.
- b. review accounting estimates for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud. In performing this review, the auditor should
- i. evaluate whether the judgments and decisions made by management in making the accounting estimates included in the financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management that may represent a risk of material misstatement due to fraud. If so, the auditor should reevaluate the accounting estimates taken as a whole, and
 - ii. perform a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year. Estimates selected for review should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. (Ref: par. .A51–.A53)
- c. evaluate, for significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment and other information obtained during the audit, whether the business rationale (or the lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets. (Ref: par. .A54)

Other Audit Procedures

.33 The auditor should determine whether, in order to respond to the identified risks of management override of controls, the auditor needs to perform other audit procedures in addition to those specifically referred to previously (that is, when specific additional risks of management override exist that are not covered as part of the procedures performed to address the requirements in paragraph .32). (Ref: par. .A55)

Evaluation of Audit Evidence (Ref: par. .A56)

.34 The auditor should evaluate, at or near the end of the audit, whether the accumulated results of auditing procedures (including analytical procedures that were performed as substantive tests or when forming an overall conclusion) affect the assessment of the risks of material misstatement due to fraud made earlier in the audit or indicate a previously unrecognized risk of material misstatement due to fraud. If not already performed when forming an overall conclusion, the analytical procedures relating to revenue, required by paragraph .22, should be performed through the end of the reporting period. (Ref: par. .A57–.A58)

.35 If the auditor identifies a misstatement, the auditor should evaluate whether such a misstatement is indicative of fraud. If such an indication exists, the auditor should evaluate the implications of the misstatement with regard to other aspects of the audit, particularly the auditor's evaluation of materiality, management and employee integrity, and the reliability of management representations, recognizing that an instance of fraud is unlikely to be an isolated occurrence. (Ref: par. .A59–.A62)

.36 If the auditor identifies a misstatement, whether material or not, and the auditor has reason to believe that it is, or may be, the result of fraud and that management (in particular, senior management) is involved, the auditor should reevaluate the assessment of the risks of material misstatement due to fraud and its resulting effect on the nature, timing, and extent of audit procedures to respond to the assessed risks. The auditor should also consider whether circumstances or conditions indicate possible collusion involving employees, management, or third parties when reconsidering the reliability of evidence previously obtained. (Ref: par. .A60)

.37 If the auditor concludes that, or is unable to conclude whether, the financial statements are materially misstated as a result of fraud, the auditor should evaluate the implications for the audit. (Ref: par. .A61)

Auditor Unable to Continue the Engagement

.38 If, as a result of identified fraud or suspected fraud, the auditor encounters circumstances that bring into question the auditor's ability to continue performing the audit, the auditor should

- a. determine the professional and legal responsibilities applicable in the circumstances, including whether a requirement exists for the auditor to report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities;
- b. consider whether it is appropriate to withdraw from the engagement, when withdrawal is possible under applicable law or regulation; and
- c. if the auditor withdraws
 - i. discuss with the appropriate level of management and those charged with governance the auditor's withdrawal from the engagement and the reasons for the withdrawal, and
 - ii. determine whether a professional or legal requirement exists to report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities, the auditor's withdrawal from the engagement and the reasons for the withdrawal. (Ref: par. .A63–.A66)

Communications to Management and With Those Charged With Governance

.39 If the auditor has identified a fraud or has obtained information that indicates that a fraud may exist, the auditor should communicate these matters on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: par. .A67)

.40 Unless all of those charged with governance are involved in managing the entity, if the auditor has identified or suspects fraud involving

- a. management,
- b. employees who have significant roles in internal control, or
- c. others, when the fraud results in a material misstatement in the financial statements,

the auditor should communicate these matters to those charged with governance on a timely basis. If the auditor suspects fraud involving management, the auditor should communicate these suspicions to those charged with governance and discuss with them the nature, timing, and extent of audit procedures necessary to complete the audit. (Ref: par. .A68–.A70)

.41 The auditor should communicate with those charged with governance any other matters related to fraud that are, in the auditor's professional judgment, relevant to their responsibilities. (Ref: par. .A71)

Communications to Regulatory and Enforcement Authorities

.42 If the auditor has identified or suspects a fraud, the auditor should determine whether the auditor has a responsibility to report the occurrence or suspicion to a party outside the entity. Although the auditor's professional duty to maintain the confidentiality of client information may preclude such reporting, the auditor's legal responsibilities may override the duty of confidentiality in some circumstances. (Ref: par. .A72–.A74)

Documentation

.43 The auditor should include in the audit documentation¹³ of the auditor's understanding of the entity and its environment and the assessment of the risks of material misstatement required by section 315 the following:¹⁴

- a. The significant decisions reached during the discussion among the engagement team regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, and how and when the discussion occurred and the audit team members who participated
- b. The identified and assessed risks of material misstatement due to fraud at the financial statement level and at the assertion level (See paragraphs .16–.27.)

.44 The auditor should include in the audit documentation of the auditor's responses to the assessed risks of material misstatement required by section 330 the following:¹⁵

- a. The overall responses to the assessed risks of material misstatement due to fraud at the financial statement level and the nature, timing, and extent of audit procedures, and the linkage of those procedures with the assessed risks of material misstatement due to fraud at the assertion level
- b. The results of the audit procedures, including those designed to address the risk of management override of controls

.45 The auditor should include in the audit documentation communications about fraud made to management, those charged with governance, regulators, and others.

¹³ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

¹⁴ Paragraph .33 of section 315.

¹⁵ Paragraph .30 of section 330.

.46 If the auditor has concluded that the presumption that there is a risk of material misstatement due to fraud related to revenue recognition is overcome in the circumstances of the engagement, the auditor should include in the audit documentation the reasons for that conclusion.

Application and Other Explanatory Material

Characteristics of Fraud (Ref: par. .03)

.A1 Fraud, whether fraudulent financial reporting or misappropriation of assets, involves incentive or pressure to commit fraud, a perceived opportunity to do so, and some rationalization of the act, as follows:

- Incentive or pressure to commit fraudulent financial reporting may exist when management is under pressure, from sources outside or inside the entity, to achieve an expected (and perhaps, unrealistic) earnings target or financial outcome—particularly because the consequences to management for failing to meet financial goals can be significant. Similarly, individuals may have an incentive to misappropriate assets (for example, because the individuals are living beyond their means).
- A perceived opportunity to commit fraud may exist when an individual believes internal control can be overridden (for example, because the individual is in a position of trust or has knowledge of specific deficiencies in internal control).
- Individuals may be able to rationalize committing a fraudulent act. Some individuals possess an attitude, character, or set of ethical values that allow them knowingly and intentionally to commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them.

.A2 Fraudulent financial reporting involves intentional misstatements, including omissions of amounts or disclosures in financial statements to deceive financial statement users. It can be caused by the efforts of management to manage earnings in order to deceive financial statement users by influencing their perceptions about the entity's performance and profitability. Such earnings management may start out with small actions or inappropriate adjustment of assumptions and changes in judgments by management. Pressures and incentives may lead these actions to increase to the extent that they result in fraudulent financial reporting. Such a situation could occur when, due to pressures to meet expectations or a desire to maximize compensation based on performance, management intentionally takes positions that lead to fraudulent financial reporting by materially misstating the financial statements. In some entities, management may be motivated to reduce earnings by a material amount to minimize tax or to inflate earnings to secure bank financing.

.A3 An auditor conducting an audit in accordance with GAAS is responsible for obtaining reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether caused by fraud or error. Accordingly, the auditor is primarily concerned with fraud that causes a material misstatement of the financial statements. However, in conducting the audit, the auditor may identify misstatements arising from fraud that are not material to the financial statements. Paragraphs .35–.36 and .39–.42 address the auditor's responsibilities in such circumstances in evaluating audit evidence and in communicating audit findings, respectively.

.A4 Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor's objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error.¹⁶

.A5 Fraudulent financial reporting may be accomplished by the following:

- Manipulation, falsification (including forgery), or alteration of accounting records or supporting documentation from which the financial statements are prepared
- Misrepresentation in, or intentional omission from, the financial statements of events, transactions, or other significant information
- Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

.A6 Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively. Fraud can be committed by management overriding controls using such techniques as the following:

- Recording fictitious journal entries, particularly close to the end of an accounting period, to manipulate operating results or achieve other objectives
- Inappropriately adjusting assumptions and changing judgments used to estimate account balances
- Omitting, advancing, or delaying recognition in the financial statements of events and transactions that have occurred during the reporting period
- Concealing, or not disclosing, facts that could affect the amounts recorded in the financial statements
- Engaging in complex transactions that are structured to misrepresent the financial position or financial performance of the entity
- Altering records and terms related to significant and unusual transactions

.A7 Misappropriation of assets involves the theft of an entity's assets and is often perpetrated by employees in relatively small and immaterial amounts. However, it can also involve management, who is usually better able to disguise or conceal misappropriations in ways that are difficult to detect. Misappropriation of assets can be accomplished in a variety of ways including the following:

- Embezzling receipts (for example, misappropriating collections on accounts receivable or diverting receipts from written-off accounts to personal bank accounts)
- Stealing physical assets or intellectual property (for example, stealing inventory for personal use or for sale, stealing scrap for resale, or colluding with a competitor by disclosing technological data in return for payment)

¹⁶ Paragraph .12 of section 200.

- Causing an entity to pay for goods and services not received (for example, payments to fictitious vendors, kickbacks paid by vendors to the entity's purchasing agents in return for approving payment at inflated prices, or payments to fictitious employees)
- Using an entity's assets for personal use (for example, using the entity's assets as collateral for a personal loan or a loan to a related party)

Misappropriation of assets is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing or have been pledged without proper authorization.

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A8 The auditor of governmental entities and not-for-profit organizations may have additional responsibilities relating to fraud

- as a result of being engaged to conduct an audit in accordance with law or regulation applicable to governmental entities and not-for-profit organizations,
- because of a governmental audit organization's mandate, or
- because of the need to comply with *Government Auditing Standards*.

Consequently, the responsibilities of the auditor of governmental entities and not-for-profit organizations may not be limited to consideration of risks of material misstatement of the financial statements, but may also include a broader responsibility to consider risks of fraud.

Professional Skepticism (Ref: par. .12–.14)

.A9 Maintaining professional skepticism requires an ongoing questioning of whether the information and audit evidence obtained suggests that a material misstatement due to fraud may exist. It includes considering the reliability of the information to be used as audit evidence and the controls over its preparation and maintenance when relevant. Due to the characteristics of fraud, the auditor's professional skepticism is particularly important when considering the risks of material misstatement due to fraud.

.A10 Although the auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management and those charged with governance, the auditor's professional skepticism is particularly important in considering the risks of material misstatement due to fraud because there may have been changes in circumstances.

.A11 An audit performed in accordance with GAAS rarely involves the authentication of documents, nor is the auditor trained as, or expected to be, an expert in such authentication.¹⁷ However, when the auditor identifies conditions that cause the auditor to believe that a document may not be authentic, that terms in a document have been modified but not disclosed to the auditor, or that undisclosed side agreements may exist, possible procedures to investigate further may include

- confirming directly with the third party.

¹⁷ Paragraph .A51 of section 200.

- using the work of a specialist to assess the document's authenticity.

Appendix C, "Examples of Circumstances That Indicate the Possibility of Fraud," contains examples of circumstances that may indicate the possibility of fraud.

Discussion Among the Engagement Team (Ref: par. .15)

.A12 Discussing the susceptibility of the entity's financial statements to material misstatement due to fraud with the engagement team

- provides an opportunity for more experienced engagement team members to share their insights about how and where the financial statements may be susceptible to material misstatement due to fraud.
- enables the auditor to consider an appropriate response to such susceptibility and to determine which members of the engagement team will conduct certain audit procedures.
- permits the auditor to determine how the results of audit procedures will be shared among the engagement team and how to deal with any allegations of fraud that may come to the auditor's attention during the audit.

.A13 The discussion may lead to a thorough probing of the issues, acquiring of additional evidence as necessary, and consulting with other team members and, if appropriate, specialists in or outside the firm. The discussion may include the following matters:

- A consideration of management's involvement in overseeing employees with access to cash or other assets susceptible to misappropriation
- A consideration of any unusual or unexplained changes in behavior or lifestyle of management or employees that have come to the attention of the engagement team
- A consideration of the types of circumstances that, if encountered, might indicate the possibility of fraud
- A consideration of how an element of unpredictability will be incorporated into the nature, timing, and extent of the audit procedures to be performed
- A consideration of the audit procedures that might be selected to respond to the susceptibility of the entity's financial statements to material misstatement due to fraud and whether certain types of audit procedures are more effective than others
- A consideration of any allegations of fraud that have come to the auditor's attention

A number of factors may influence the extent of the discussion and how it may occur. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. Another factor in planning the discussions is whether to include specialists assigned to the audit team.

Risk Assessment Procedures and Related Activities

Inquiries of Management

Management's Assessment of the Risk of Material Misstatement Due to Fraud
(Ref: par. .17a)

.A14 Management accepts responsibility for the entity's internal control and for the preparation and fair presentation of the entity's financial statements. Accordingly, it is appropriate for the auditor to make inquiries of management regarding management's own assessment of the risk of fraud and the controls in place to prevent and detect it. The nature, extent, and frequency of management's assessment of such risk and controls may vary from entity to entity. In some entities, management may make detailed assessments on an annual basis or as part of continuous monitoring. In other entities, management's assessment may be less structured and less frequent. The nature, extent, and frequency of management's assessment are relevant to the auditor's understanding of the entity's control environment. For example, the fact that management has not made an assessment of the risk of fraud may, in some circumstances, be indicative of the lack of importance that management places on internal control.

.A15 *Considerations specific to smaller, less complex entities.* In some entities, particularly smaller entities, the focus of management's assessment may be on the risks of employee fraud or misappropriation of assets.

Management's Process for Identifying and Responding to the Risks of Fraud
(Ref: par. .17b)

.A16 In the case of entities with multiple locations, management's processes may include different levels of monitoring of operating locations or business segments. Management may also have identified particular operating locations or business segments for which a risk of fraud may be more likely to exist.

Discussions With Management and Others Within the Entity (Ref: par. .17-.19)

.A17 Inquiries of management and others within the entity are generally most effective when they involve an in-person discussion. The auditor may also determine it useful to provide the interviewee with specific questions and obtain written responses in advance of the discussion.

.A18 The auditor's inquiries of management may provide useful information concerning the risks of material misstatements in the financial statements resulting from employee fraud. However, such inquiries are unlikely to provide useful information regarding the risks of material misstatement in the financial statements resulting from management fraud. Making inquiries of others within the entity, in addition to management, may provide individuals with an opportunity to convey information to the auditor that may not otherwise be communicated. It may be useful in providing the auditor with a perspective that is different from that of individuals in the financial reporting process. The responses to these other inquiries might serve to corroborate responses received from management or, alternatively, might provide information regarding the possibility of management override of controls. The auditor may also obtain information about how effectively management has communicated standards of ethical behavior throughout the organization.

.A19 Examples of others within the entity to whom the auditor may direct inquiries about the existence or suspicion of fraud include the following:

- Operating personnel not directly involved in the financial reporting process
- Employees with different levels of authority
- Employees involved in initiating, processing, or recording complex or unusual transactions and those who supervise or monitor such employees
- In-house legal counsel
- Chief ethics officer or equivalent person
- The person or persons charged with dealing with allegations of fraud

.A20 Management is often in the best position to perpetrate fraud. Accordingly, when evaluating management's responses to inquiries with professional skepticism, the auditor may judge it necessary to corroborate responses to inquiries with other information.

Obtaining an Understanding of Oversight Exercised by Those Charged With Governance (Ref: par. .20)

.A21 Those charged with governance of an entity oversee the entity's systems for monitoring risk, financial control, and compliance with the law. In some circumstances, governance practices are well developed, and those charged with governance play an active role in oversight of the entity's assessment of the risks of fraud and of the relevant internal control. Because the responsibilities of those charged with governance and management may vary by entity, it is important that the auditor understands the respective responsibilities of those charged with governance and management to enable the auditor to obtain an understanding of the oversight exercised by the appropriate individuals.¹⁸

.A22 An understanding of the oversight exercised by those charged with governance may provide insights regarding the susceptibility of the entity to management fraud, the adequacy of internal control over risks of fraud, and the competency and integrity of management. The auditor may obtain this understanding in a number of ways, such as by attending meetings during which such discussions take place, reading the minutes from such meetings, or making inquiries of those charged with governance.

Considerations Specific to Smaller, Less Complex Entities

.A23 In some cases, all of those charged with governance are involved in managing the entity. This may be the case in a small entity in which a single owner manages the entity, and no one else has a governance role. In these cases, ordinarily, no action exists on the part of the auditor because no oversight exists separate from management.

Unusual or Unexpected Relationships Identified (Ref: par. .22)

.A24 Analytical procedures may include data analysis techniques ranging from a high-level review of data patterns, relationships, and trends to highly sophisticated, computer-assisted investigation of detailed transactions using electronic tools, such as data mining, business intelligence, and file query tools. The degree of reliance that can be placed on such techniques is a function primarily of the source (for example, financial, nonfinancial), completeness and reliability of the data, the level of disaggregation, and the nature of the analysis.

¹⁸ Paragraphs .A6–.A12 of section 260 discuss with whom the auditor communicates when the entity's governance structure is not well defined.

.A25 Analytical procedures relating to revenue that are performed with the objective of identifying unusual or unexpected relationships that may indicate a material misstatement due to fraudulent financial reporting may include

- a. a comparison of sales volume, as determined from recorded revenue amounts, with production capacity. An excess of sales volume over production capacity may be indicative of recording fictitious sales.
- b. a trend analysis of revenues by month and sales returns by month, during and shortly after the reporting period. This may indicate the existence of undisclosed side agreements with customers involving the return of goods, which, if known, would preclude revenue recognition.
- c. a trend analysis of sales by month compared with units shipped. This may identify a material misstatement of recorded revenues.

.A26 Analytical procedures performed during planning may be helpful in identifying the risks of material misstatement due to fraud. However, if such analytical procedures use data aggregated at a high level, generally the results of those analytical procedures provide only a broad initial indication about whether a material misstatement of the financial statements may exist. Accordingly, the results of analytical procedures performed during planning may be considered along with other information gathered by the auditor in identifying the risks of material misstatement due to fraud.

Other Information (Ref: par. .23)

.A27 In addition to information obtained from applying analytical procedures, other information obtained about the entity and its environment may be helpful in identifying the risks of material misstatement due to fraud. The discussion among team members may provide information that is helpful in identifying such risks. In addition, information obtained from the auditor's client acceptance and retention processes, and experience gained on other engagements performed for the entity, for example, engagements to review interim financial information, may be relevant in the identification of the risks of material misstatement due to fraud.

Evaluation of Fraud Risk Factors (Ref: par. .24)

.A28 The fact that fraud is usually concealed can make it very difficult to detect. Nevertheless, the auditor may identify events or conditions that indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud (fraud risk factors), such as the following:

- The need to meet expectations of third parties to obtain additional equity financing may create pressure to commit fraud.
- The granting of significant bonuses if unrealistic profit targets are met may create an incentive to commit fraud.
- A control environment that is not effective may create an opportunity to commit fraud.

.A29 Fraud risk factors cannot easily be ranked in order of importance. The significance of fraud risk factors varies widely. Some of these factors will be present in entities in which the specific conditions do not present risks of material misstatement. Accordingly, the determination of whether a fraud risk factor is present and whether it is to be considered in assessing the risks of material misstatement of the financial statements due to fraud requires the exercise of professional judgment.

.A30 Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are presented in appendix A, "Examples of Fraud Risk Factors." These illustrative risk factors are classified based on the three conditions that are generally present when fraud exists:

- An incentive or pressure to commit fraud
- A perceived opportunity to commit fraud
- An ability to rationalize the fraudulent action

The inability to observe one or more of these conditions does not necessarily mean that no risk of material misstatement due to fraud exists.

Risk factors reflective of an attitude that permits rationalization of the fraudulent action may not be susceptible to observation by the auditor. Nevertheless, the auditor may become aware of the existence of such information. Although the fraud risk factors described in appendix A cover a broad range of situations that may be faced by auditors, they are only examples and other risk factors may exist.

.A31 The size, complexity, and ownership characteristics of the entity have a significant influence on the consideration of relevant fraud risk factors. For example, in the case of a large entity, there may be factors that generally constrain improper conduct by management, such as

- effective oversight by those charged with governance.
- an effective internal audit function.
- the existence and enforcement of a written code of conduct.

Furthermore, fraud risk factors considered at a business segment operating level may provide different insights when compared with those obtained when considered at an entity-wide level.

Considerations Specific to Smaller, Less Complex Entities

.A32 In the case of a small entity, some or all of these considerations may be inapplicable or less relevant. For example, a smaller entity may not have a written code of conduct but, instead, may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example. Domination of management by a single individual in a small entity does not generally, in and of itself, indicate a failure by management to display and communicate an appropriate attitude regarding internal control and the financial reporting process. In some entities, the need for management authorization can compensate for otherwise deficient controls and reduce the risk of employee fraud. However, domination of management by a single individual can be a potential deficiency in internal control because an opportunity exists for management override of controls.

Identification and Assessment of the Risks of Material Misstatement Due to Fraud

Risks of Fraud in Revenue Recognition (Ref: par. .26)

.A33 Material misstatement due to fraudulent financial reporting relating to revenue recognition often results from an overstatement of revenues through, for example, premature revenue recognition or recording fictitious revenues. It may result also from an understatement of revenues through, for example, improperly shifting revenues to a later period.

.A34 The risks of fraud in revenue recognition may be greater in some entities than others. For example, there may be pressures or incentives on management to commit fraudulent financial reporting through inappropriate revenue recognition when, for example, performance is measured in terms of year over year revenue growth or profit. Similarly, for example, there may be greater risks of fraud in revenue recognition in the case of entities that generate a substantial portion of revenues through cash sales.

.A35 The presumption that risks of fraud exist in revenue recognition may be rebutted. For example, the auditor may conclude that no risk of material misstatement due to fraud relating to revenue recognition exists in the case in which a single type of simple revenue transaction exists, for example, leasehold revenue from a single unit rental property.

Identifying and Assessing the Risks of Material Misstatement Due to Fraud and Understanding the Entity's Related Controls (Ref: par. .27)

.A36 Management may make judgments on the nature and extent of the controls it chooses to implement, and the nature and extent of the risks it chooses to assume.¹⁹ In determining which controls to implement to prevent and detect fraud, management considers the risks that the financial statements may be materially misstated as a result of fraud. As part of this consideration, management may conclude that it is not cost effective to implement and maintain a particular control in relation to the reduction in the risks of material misstatement due to fraud to be achieved.

.A37 It is, therefore, important for the auditor to obtain an understanding of the controls that management has designed, implemented, and maintained to prevent and detect fraud. In doing so, the auditor may learn, for example, that management has consciously chosen to accept the risks associated with a lack of segregation of duties. Information from obtaining this understanding may also be useful in identifying fraud risks factors that may affect the auditor's assessment of the risks that the financial statements may contain material misstatement due to fraud.

Responses to the Assessed Risks of Material Misstatement Due to Fraud

Overall Responses (Ref: par. .28)

.A38 Determining overall responses to address the assessed risks of material misstatement due to fraud generally includes the consideration of how the overall conduct of the audit can reflect increased professional skepticism through, for example, increased

- sensitivity in the selection of the nature and extent of documentation to be examined in support of material transactions.
- recognition of the need to corroborate management explanations or representations concerning material matters.

Determining overall responses to address the assessed risks of material misstatement due to fraud also involves more general considerations apart from the specific procedures otherwise planned; these considerations include the matters listed in paragraph .29, which are discussed in the following sections.

¹⁹ Paragraph .A48 of section 315.

Assignment and Supervision of Personnel (Ref: par. .29a)

.A39 The auditor may respond to identified risks of material misstatement due to fraud by, for example, assigning additional individuals with specialized skill and knowledge, such as forensic and IT specialists, or by assigning more experienced individuals to the engagement.

.A40 The extent of supervision reflects the auditor's assessment of risks of material misstatement due to fraud and the competencies of the engagement team members performing the work.

Accounting Principles (Ref: par. .29b)

.A41 Management bias in the selection and application of accounting principles may individually or collectively involve matters such as contingencies, fair value measurements, revenue recognition, accounting estimates, related party transactions, or other transactions without a clear business purpose.

Unpredictability in the Selection of Audit Procedures (Ref: par. .29c)

.A42 Incorporating an element of unpredictability in the selection of the nature, timing, and extent of audit procedures to be performed is important because individuals within the entity who are familiar with the audit procedures normally performed on engagements may be better able to conceal fraudulent financial reporting. This can be achieved by, for example,

- performing substantive procedures on selected account balances and assertions not otherwise tested due to their materiality or risk.
- adjusting the timing of audit procedures from that otherwise expected.
- using different sampling methods.
- performing audit procedures at different locations or at locations on an unannounced basis.

Audit Procedures Responsive to Assessed Risks of Material Misstatement Due to Fraud at the Assertion Level (Ref: par. .30)

.A43 The auditor's responses to address the assessed risks of material misstatement due to fraud at the assertion level may include changing the nature, timing, and extent of audit procedures in the following ways:

- The nature of audit procedures to be performed may need to be changed to obtain audit evidence that is more reliable and relevant or to obtain additional corroborative information. This may affect both the type of audit procedures to be performed and their combination. For example:
 - Physical observation or inspection of certain assets may become more important, or the auditor may choose to use computer-assisted audit techniques to gather more evidence about data contained in significant accounts or electronic transaction files.
 - The auditor may design procedures to obtain additional corroborative information. For example, if the auditor identifies that management is under pressure to meet earnings expectations, there may be a related risk that

management is inflating sales by entering into sales agreements that include terms that preclude revenue recognition or by invoicing sales before delivery. In these circumstances, the auditor may, for example, design external confirmations not only to confirm outstanding amounts, but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor might find it effective to supplement such external confirmations with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms.

- The timing of substantive procedures may need to be modified. The auditor may conclude that performing substantive testing at or near the period end better addresses an assessed risk of material misstatement due to fraud. The auditor may conclude that, given the assessed risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period end would not be effective. In contrast, because an intentional misstatement—for example, a misstatement involving improper revenue recognition—may have been initiated in an interim period, the auditor may elect to apply substantive procedures to transactions occurring earlier in or throughout the reporting period.
- The extent of the procedures applied reflects the assessment of the risks of material misstatement due to fraud. For example, increasing sample sizes or performing analytical procedures at a more detailed level may be appropriate. Also, computer-assisted audit techniques may enable more extensive testing of electronic transactions and account files. Such techniques can be used to select sample transactions from key electronic files, to sort transactions with specific characteristics, or to test an entire population instead of a sample.

.A44 If the auditor identifies a risk of material misstatement due to fraud that affects inventory quantities, examining the entity's inventory records may help to identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis or to conduct inventory counts at all locations on the same date.

.A45 The auditor may identify a risk of material misstatement due to fraud affecting a number of accounts and assertions. These may include asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of segments of the business), and other significant accrued liabilities (such as pension and other postemployment benefit obligations, or environmental remediation liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. Information gathered through obtaining an understanding of the entity and its environment may assist the auditor in evaluating the reasonableness of such management estimates and underlying judgments and assumptions. A retrospective review of similar management judgments and assumptions applied in prior periods may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

.A46 Examples of possible audit procedures to address the assessed risks of material misstatement due to fraud, including those that illustrate the incorporation of an element of unpredictability, are presented in appendix B,

"Examples of Possible Audit Procedures to Address the Assessed Risks of Material Misstatement Due to Fraud." The appendix includes examples of responses to the auditor's assessment of the risks of material misstatement resulting from both fraudulent financial reporting, including fraudulent financial reporting resulting from revenue recognition, and misappropriation of assets.

Audit Procedures Responsive to Risks Related to Management Override of Controls

Journal Entries and Other Adjustments (Ref: par. .32a)

.A47 Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (a) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (b) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications.

.A48 The auditor's consideration of the risks of material misstatement associated with inappropriate override of controls over journal entries is important because automated processes and controls may reduce the risk of inadvertent error but do not overcome the risk that individuals may inappropriately override such automated processes, for example, by changing the amounts being automatically passed to the general ledger or to the financial reporting system. Furthermore, when IT is used to transfer information automatically, there may be little or no visible evidence of such intervention in the information systems.

.A49 When identifying and selecting journal entries and other adjustments for testing and determining the appropriate method of examining the underlying support for the items selected, the following matters may be relevant:

- *The assessment of the risks of material misstatement due to fraud.* The presence of fraud risk factors and other information obtained during the auditor's assessment of the risks of material misstatement due to fraud may assist the auditor to identify specific classes of journal entries and other adjustments for testing.
- *Controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and other adjustments may reduce the extent of substantive testing necessary, provided that the auditor has tested the operating effectiveness of the controls.
- *The entity's financial reporting process and the nature of evidence that can be obtained.* For many entities, routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments may involve both manual and automated procedures and controls. When IT is used in the financial reporting process, journal entries and other adjustments may exist only in electronic form.
- *The characteristics of fraudulent journal entries or other adjustments.* Inappropriate journal entries or other adjustments often have unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used

accounts; (b) made by individuals who typically do not make journal entries; (c) recorded at the end of the period or as postclosing entries that have little or no explanation or description; (d) made either before or during the preparation of the financial statements that do not have account numbers; or (e) containing round numbers or consistent ending numbers.

- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to misstatements in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain intercompany transactions, or (f) are otherwise associated with an identified risk of material misstatement due to fraud. In audits of entities that have several locations or components, consideration is given to the need to select journal entries from multiple locations.
- *Journal entries or other adjustments processed outside the normal course of business.* Nonstandard journal entries, and other entries such as consolidating adjustments, may not be subject to the same level of internal control as those journal entries used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements.

.A50 The auditor exercises professional judgment in determining the nature, timing, and extent of testing of journal entries and other adjustments. However, because fraudulent journal entries and other adjustments are often made at the end of a reporting period, paragraph .32a(iv) requires the auditor to select the journal entries and other adjustments made at that time. Further, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how the fraud is accomplished, paragraph .32a(v) requires the auditor to consider whether a need also exists to test journal entries and other adjustments throughout the period.

Accounting Estimates (Ref: par. .32b)

.A51 The preparation and fair presentation of the financial statements requires management to make a number of judgments or assumptions that affect significant accounting estimates and monitor the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting is often accomplished through intentional misstatement of accounting estimates. This may be achieved by, for example, understating or overstating all provisions or reserves in the same fashion so as to be designed either to smooth earnings over two or more accounting periods, or to achieve a designated earnings level in order to deceive financial statement users by influencing their perceptions about the entity's performance and profitability.

.A52 The purpose of performing a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year is to determine whether an indication exists of a possible bias on the part of management. This review is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

.A53 A retrospective review is also required by section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related*

*Disclosures.*²⁰ That review is conducted as a risk assessment procedure to obtain information regarding the effectiveness of management's prior period estimation process, audit evidence about the outcome, or when applicable, the subsequent reestimation of prior period accounting estimates that is pertinent to making current period accounting estimates, and audit evidence of matters, such as estimation uncertainty, that may be required to be disclosed in the financial statements. As a practical matter, the auditor's review of management judgments and assumptions for biases that could represent a risk of material misstatement due to fraud in accordance with this section may be carried out in conjunction with the review required by section 540.

Business Rationale for Significant Transactions (Ref: par. .32c)

.A54 Indicators that may suggest that significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual, may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets include the following:

- The form of such transactions appears overly complex (for example, the transaction involves multiple entities within a consolidated group or multiple unrelated third parties).
- Management has not discussed the nature of and accounting for such transactions with those charged with governance of the entity, and inadequate documentation exists.
- Management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- Transactions that involve nonconsolidated related parties, including special purpose entities, have not been properly reviewed or approved by those charged with governance of the entity.
- Transactions that involve previously unidentified related parties or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

Other Audit Procedures (Ref: par. .32a and .33)

.A55 Risks of material misstatement, including misstatements due to fraud, cannot be reduced to an appropriately low level by performing only tests of controls.²¹

Evaluation of Audit Evidence (Ref: par. .34–.37)

.A56 Section 330 requires the auditor, based on the audit procedures performed and the audit evidence obtained, to evaluate whether the assessments of the risks of material misstatement at the assertion level remain appropriate.²² This evaluation is primarily a qualitative matter based on the auditor's professional judgment. Such an evaluation may provide further insight into the risks of material misstatement due to fraud and whether a need exists to perform additional or different audit procedures. Appendix C contains examples of circumstances that may indicate the possibility of fraud.

²⁰ Paragraph .09 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

²¹ Paragraph .A9 of section 330.

²² Paragraph .27 of section 330.

Analytical Procedures Performed Near the End of the Audit in Forming an Overall Conclusion (Ref: par. .34)

.A57 Determining which particular trends and relationships may indicate a risk of material misstatement due to fraud requires professional judgment. Unusual relationships involving year-end revenue and income are particularly relevant. These might include, for example, uncharacteristically large amounts of income being reported in the last few weeks of the reporting period or unusual transactions or income that is inconsistent with trends in cash flow from operations.

.A58 Some unusual or unexpected analytical relationships may have been identified and may indicate a risk of material misstatement due to fraud because management or employees generally are unable to manipulate certain information to create seemingly normal or expected relationships. Some examples are as follows:

- The relationship of net income to cash flows from operations may appear unusual because management recorded fictitious revenues and receivables but was unable to manipulate cash.
- Changes in inventory, accounts payable, sales, or cost of sales from the prior period to the current period may be inconsistent, indicating a possible employee theft of inventory, because the employee was unable to manipulate all of the related accounts.
- A comparison of the entity's profitability to industry trends, which management cannot manipulate, may indicate trends or differences for further consideration when identifying risks of material misstatement due to fraud.
- A comparison of bad debt write-offs to comparable industry data, which employees cannot manipulate, may provide unexplained relationships that could indicate a possible theft of cash receipts.
- An unexpected or unexplained relationship between sales volume, as determined from the accounting records and production statistics maintained by operations personnel, which may be more difficult for management to manipulate, may indicate a possible misstatement of sales.

Consideration of Identified Misstatements (Ref: par. .35–.37)

.A59 Because fraud involves incentive or pressure to commit fraud, a perceived opportunity to do so, or some rationalization of the act, an instance of fraud is unlikely to be an isolated occurrence. Accordingly, misstatements, such as numerous misstatements at a specific location even though the cumulative effect is not material, may be indicative of a risk of material misstatement due to fraud.

.A60 The implications of identified fraud depend on the circumstances. For example, an otherwise insignificant fraud may be significant if it involves senior management. In such circumstances, the reliability of evidence previously obtained may be called into question because there may be doubts about the completeness and truthfulness of representations made and the genuineness of accounting records and documentation. There may also be a possibility of collusion involving employees, management, or third parties.

.A61 Section 450, *Evaluation of Misstatements Identified During the Audit*, and section 700, *Forming an Opinion and Reporting on Financial Statements*, address the evaluation and disposition of misstatements and the effect on the auditor's opinion in the auditor's report.

.A62 Section 580, *Written Representations*, addresses obtaining appropriate representations from management in the audit. In addition to acknowledging its responsibility for the financial statements, it is important that, irrespective of the size of the entity, management acknowledges its responsibility for internal control designed, implemented, and maintained to prevent and detect fraud.

Auditor Unable to Continue the Engagement (Ref: par. .38)

.A63 Examples of circumstances that may arise and bring into question the auditor's ability to continue performing the audit include the following:

- a. The entity does not take the appropriate action regarding fraud that the auditor considers necessary in the circumstances, even when the fraud is not material to the financial statements.
- b. The auditor's consideration of the risks of material misstatement due to fraud and the results of audit tests indicate a significant risk of material and pervasive fraud.
- c. The auditor has significant concern about the competence or integrity of management or those charged with governance.

.A64 Because of the variety of circumstances that may arise, it is not possible to describe definitively when withdrawal from an engagement is appropriate. Factors that affect the auditor's conclusion include the implications of the involvement of a member of management or of those charged with governance (which may affect the reliability of management representations) and the effects on the auditor of a continuing association with the entity.

.A65 The auditor has professional and legal responsibilities in such circumstances, and these responsibilities may vary by engagement. In some circumstances, for example, the auditor may be entitled to, or required to, make a statement or report to the person or persons who engaged the auditor or, in some cases, to regulatory authorities. Given the nature of the circumstances and the need to consider the legal requirements, the auditor may consider it appropriate to seek legal advice when deciding whether to withdraw from an engagement and in determining an appropriate course of action, including the possibility of reporting to regulators or others.²³

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A66 For governmental entities and not-for-profit organizations, the option of withdrawing from the engagement may not be available to the auditor due to the nature of the mandate, public interest considerations, contractual requirements, or law or regulation.

Communications to Management and With Those Charged With Governance

Communication to Management (Ref: par. .39)

.A67 When the auditor has obtained evidence that fraud exists or may exist, it is important that the matter be brought to the attention of the appropriate level of management as soon as practicable. This is true even if the

²³ Section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*, provides guidance on communications with an auditor replacing the existing auditor.

matter might be considered inconsequential (for example, a minor defalcation by an employee at a low level in the entity's organization). The determination of which level of management is the appropriate one is a matter of professional judgment and is affected by such factors as the likelihood of collusion and the nature and magnitude of the suspected fraud. Ordinarily, the appropriate level of management is at least one level above the persons who appear to be involved with the suspected fraud.

Communication With Those Charged With Governance (Ref: par. .40)

.A68 The auditor's communication with those charged with governance may be made orally or in writing. Section 260, *The Auditor's Communication With Those Charged With Governance*, identifies factors the auditor considers in determining whether to communicate orally or in writing.²⁴ Due to the nature and sensitivity of fraud involving senior management, or fraud that results in a material misstatement in the financial statements, the auditor communicates such matters on a timely basis and may consider it necessary to also communicate such matters in writing.

.A69 In some cases, the auditor may consider it appropriate to communicate with those charged with governance when the auditor becomes aware of fraud involving employees other than management that does not result in a material misstatement. Similarly, those charged with governance may wish to be informed of such circumstances. The communication process is assisted if the auditor and those charged with governance agree at an early stage in the audit about the nature and extent of the auditor's communications in this regard.

.A70 When the auditor has doubts about the integrity or honesty of management or those charged with governance, the auditor may consider it appropriate to obtain legal advice to assist in determining the appropriate course of action.

Other Matters Related to Fraud (Ref: par. .41)

.A71 Other matters related to fraud to be discussed with those charged with governance of the entity may include, for example

- concerns about the nature, extent, and frequency of management's assessments of the controls in place to prevent and detect fraud and of the risk that the financial statements may be misstated.
- a failure by management to appropriately address identified significant deficiencies or material weaknesses in internal control, or to appropriately respond to an identified fraud.
- the auditor's evaluation of the entity's control environment, including questions regarding the competence and integrity of management.
- actions by management that may be indicative of fraudulent financial reporting, such as management's selection and application of accounting policies that may be indicative of management's effort to manage earnings in order to deceive financial statement users by influencing their perceptions concerning the entity's performance and profitability.

²⁴ Paragraph .A40 of section 260.

- concerns about the adequacy and completeness of the authorization of transactions that appear to be outside the normal course of business.
- the absence of programs or controls to address risks of material misstatement due to fraud that are significant deficiencies or material weaknesses.²⁵

Communications to Regulatory and Enforcement Authorities (Ref: par. .42)

.A72 The auditor's professional duty to maintain the confidentiality of client information may preclude reporting fraud to a party outside the client entity. However, in certain circumstances, the duty of confidentiality may be overridden by statute, regulation, courts of law, specific requirements of audits of entities that receive government financial assistance, or waived by agreement. In some circumstances, the auditor has a statutory duty to report the occurrence of fraud to supervisory authorities. Also, in some circumstances, the auditor has a duty to report misstatements to authorities in those cases when management and those charged with governance fail to take corrective action.

.A73 The auditor may consider it appropriate to obtain legal advice to determine the appropriate course of action in the circumstances, the purpose of which is to ascertain the steps necessary in considering the public interest aspects of identified fraud.

Considerations Specific to Governmental Entities and Not-for-Profit Organizations

.A74 For governmental entities and not-for-profit organizations, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related law or regulation.

²⁵ See section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

.A75

Appendix A—Examples of Fraud Risk Factors (Ref: par. .11, .24, and .A30)

The fraud risk factors identified in this appendix are examples of such factors that may be faced by auditors in a broad range of situations. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives and pressures, (b) opportunities, and (c) attitudes and rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives and Pressures

Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by) the following:

- High degree of competition or market saturation, accompanied by declining margins
- High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
- Significant declines in customer demand and increasing business failures in either the industry or overall economy
- Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
- Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth
- Rapid growth or unusual profitability especially compared to that of other companies in the same industry
- New accounting, statutory, or regulatory requirements

Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for

example, overly optimistic press releases or annual report messages

- Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures
- Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
- Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- A need to achieve financial targets required in bond covenants
- Pressure for management to meet the expectations of legislative or oversight bodies or to achieve political outcomes, or both

Information available indicates that the personal financial situation of management or those charged with governance is threatened by the entity's financial performance arising from the following:

- Significant financial interests in the entity
- Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow¹
- Personal guarantees of debts of the entity

Management or operating personnel are under excessive pressure to meet financial targets established by those charged with governance, including sales or profitability incentive goals.

Opportunities

The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:

- Significant related party transactions not in the ordinary course of business or with related entities not audited or audited by another firm
- A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
- Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
- Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions
- Significant operations located or conducted across jurisdictional borders where differing business environments and regulations exist

¹ Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

- Use of business intermediaries for which there appears to be no clear business justification
- Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification

The monitoring of management is not effective as a result of the following:

- Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls.
- Oversight by those charged with governance over the financial reporting process and internal control is not effective.

The organizational structure is complex or unstable, as evidenced by the following:

- Difficulty in determining the organization or individuals that have controlling interest in the entity
- Overly complex organizational structure involving unusual legal entities or managerial lines of authority
- High turnover of senior management, legal counsel, or those charged with governance

Internal control components are deficient as a result of the following:

- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (when external reporting is required)
- High turnover rates or employment of accounting, internal audit, or IT staff who are not effective
- Accounting and information systems that are not effective, including situations involving significant deficiencies or material weaknesses in internal control
- Weak controls over budget preparation and development and compliance with law or regulation.

Attitudes and Rationalizations

- Communication, implementation, support, or enforcement of the entity's values or ethical standards by management, or the communication of inappropriate values or ethical standards that are not effective.
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting policies or the determination of significant estimates.
- Known history of violations of securities law or other law or regulation, or claims against the entity, its senior management, or those charged with governance alleging fraud or violations of law or regulation.
- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend.
- The practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts.

- Management failing to remedy known significant deficiencies or material weaknesses in internal control on a timely basis.
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons.
- Low morale among senior management.
- The owner-manager makes no distinction between personal and business transactions.
- Dispute between shareholders in a closely held entity.
- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality.
- A strained relationship between management and the current or predecessor auditor, as exhibited by the following:
 - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
 - Unreasonable demands on the auditor, such as unrealistic time constraints regarding the completion of the audit or the issuance of the auditor's report
 - Restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with those charged with governance
 - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

Risk Factors Arising From Misstatements Arising From Misappropriation of Assets

Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives and pressures, opportunities, and attitudes and rationalization. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and other deficiencies in internal control that are not effective may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives and Pressures

Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.

Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:

- Known or anticipated future employee layoffs

- Recent or anticipated changes to employee compensation or benefit plans
- Promotions, compensation, or other rewards inconsistent with expectations

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when the following exist:

- Large amounts of cash on hand or processed
- Inventory items that are small in size, of high value, or in high demand
- Easily convertible assets, such as bearer bonds, diamonds, or computer chips
- Fixed assets that are small in size, marketable, or lack observable identification of ownership

Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because the following exist:

- Inadequate segregation of duties or independent checks
- Inadequate oversight of senior management expenditures, such as travel and other reimbursements
- Inadequate management oversight of employees responsible for assets (for example, inadequate supervision or monitoring of remote locations)
- Inadequate job applicant screening of employees with access to assets
- Inadequate record keeping with respect to assets
- Inadequate system of authorization and approval of transactions (for example, in purchasing)
- Inadequate physical safeguards over cash, investments, inventory, or fixed assets
- Lack of complete and timely reconciliations of assets
- Lack of timely and appropriate documentation of transactions (for example, credits for merchandise returns)
- Lack of mandatory vacations for employees performing key control functions
- Inadequate management understanding of IT, which enables IT employees to perpetrate a misappropriation
- Inadequate access controls over automated records, including controls over and review of computer systems event logs

Attitudes and Rationalizations

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets

General Principles and Responsibilities

- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to take appropriate remedial action on known deficiencies in internal control
- Behavior indicating displeasure or dissatisfaction with the entity or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated
- The belief by some government or other officials that their level of authority justifies a certain level of compensation and personal privileges
- Tolerance of petty theft

.A76

Appendix B—Examples of Possible Audit Procedures to Address the Assessed Risks of Material Misstatement Due to Fraud (Ref: par. .22 and .A46)

The following are examples of possible audit procedures to address the assessed risks of material misstatement due to fraud resulting from both fraudulent financial reporting and misappropriation of assets. Although these procedures cover a broad range of situations, they are only examples and, accordingly, they may not be the most appropriate nor necessary in each circumstance. Also the order of the procedures provided is not intended to reflect their relative importance.

Consideration at the Assertion Level

Specific responses to the auditor's assessment of the risks of material misstatement due to fraud will vary depending upon the types or combinations of fraud risk factors or conditions identified, and the classes of transactions, account balances, disclosures, and assertions they may affect.

The following are specific examples of responses:

- Visiting locations or performing certain tests on a surprise or unannounced basis (for example, observing inventory at locations where auditor attendance has not been previously announced or counting cash at a particular date on a surprise basis)
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period
- Altering the audit approach in the current year (for example, contacting major customers and suppliers orally in addition to sending written confirmation, sending confirmation requests to a specific party within an organization, or seeking more or different information)
- Performing a detailed review of the entity's quarter-end or year-end adjusting entries and investigating any that appear to have an unusual nature or amount
- For significant and unusual transactions, particularly those occurring at or near year end, investigating the possibility of related parties and the sources of financial resources supporting the transactions
- Performing substantive analytical procedures using disaggregated data (for example, comparing sales and cost of sales by location, line of business, or month to expectations developed by the auditor)
- Conducting interviews of personnel involved in areas in which a risk of material misstatement due to fraud has been identified, to obtain their insights about the risk, and whether, or how, controls address the risk
- When other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches,

discussing with them the extent of work necessary to be performed to address the assessed risk of material misstatement due to fraud resulting from transactions and activities among these components

- If the work of an expert becomes particularly significant with respect to a financial statement item for which the assessed risk of misstatement due to fraud is high, performing additional procedures relating to some or all of the expert's assumptions, methods, or findings to determine that the findings are not unreasonable, or engaging another expert for that purpose
- Performing audit procedures to analyze selected opening balance sheet accounts of previously audited financial statements to assess how certain issues involving accounting estimates and judgments, for example, an allowance for sales returns, were resolved with the benefit of hindsight
- Performing procedures on account or other reconciliations prepared by the entity, including considering reconciliations performed at interim periods
- Performing computer-assisted techniques, such as data mining to test for anomalies in a population
- Testing the integrity of computer-produced records and transactions
- Seeking additional audit evidence from sources outside of the entity being audited

Specific Responses—Misstatement Resulting From Fraudulent Financial Reporting

Examples of responses to the auditor's assessment of the risks of material misstatement due to fraudulent financial reporting are as follows:

Revenue Recognition

- Performing substantive analytical procedures relating to revenue using disaggregated data; for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods or with revenue related to cash collections (computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions)
- Confirming with customers certain relevant contract terms and the absence of side agreements because the appropriate accounting often is influenced by such terms or agreements and basis for rebates or the period to which they relate are often poorly documented (for example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances)
- Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions

- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures
- For those situations for which revenue transactions are electronically initiated, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded

Inventory Quantities

- Examining the entity's inventory records to identify locations or items that require specific attention during or after the physical inventory count
- Observing inventory counts at certain locations on an unannounced basis or conducting inventory counts at all locations on the same date
- Conducting inventory counts at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period
- Performing additional procedures during the observation of the count; for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals (using the work of an expert may be helpful in this regard)
- Comparing the quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records
- Using computer-assisted audit techniques to further test the compilation of the physical inventory counts (for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication)

Management Estimates

- Using an expert to develop an independent estimate for comparison to management's estimate
- Extending inquiries to individuals outside of management and the accounting department to corroborate management's ability and intent to carry out plans that are relevant to developing the estimate

Specific Responses—Misstatements Due to Misappropriation of Assets

Differing circumstances would necessarily dictate different responses. Ordinarily, the audit response to an assessed risk of material misstatement due to fraud relating to misappropriation of assets will be directed toward certain account balances and classes of transactions. Although some of the audit responses noted in the preceding two categories may apply in such circumstances, the scope of the work is to be linked to the specific information about the misappropriation risk that has been identified.

Examples of responses to the auditor's assessment of the risk of material misstatements due to misappropriation of assets are as follows:

- Counting cash or securities at or near year end
- Confirming directly with customers the account activity (including credit memo and sales return activity as well as dates payments were made) for the period under audit
- Analyzing recoveries of written-off accounts
- Analyzing inventory shortages by location or product type
- Comparing key inventory ratios to industry norm
- Reviewing supporting documentation for reductions to the perpetual inventory records
- Performing a computerized match of the vendor list with a list of employees to identify matches of addresses or phone numbers
- Performing a computerized search of payroll records to identify duplicate addresses, employee identification or taxing authority numbers, or bank accounts
- Reviewing personnel files for those that contain little or no evidence of activity; for example, lack of performance evaluations
- Analyzing sales discounts and returns for unusual patterns or trends
- Confirming specific terms of contracts with third parties
- Obtaining evidence that contracts are being carried out in accordance with their terms
- Reviewing the propriety of large and unusual expenses
- Reviewing the authorization and carrying value of senior management and related party loans
- Reviewing the level and propriety of expense reports submitted by senior management

.A77

Appendix C—Examples of Circumstances That Indicate the Possibility of Fraud (Ref: par. .11, .A11, and .A56)

The following are examples of circumstances that may indicate the possibility that the financial statements may contain a material misstatement resulting from fraud.

Discrepancies in the accounting records, including the following:

- Transactions that are not recorded in a complete or timely manner or are improperly recorded by amount, accounting period, classification, or entity policy
- Unsupported or unauthorized balances or transactions
- Last minute adjustments that significantly affect financial results
- Evidence of employees' access to systems and records inconsistent with that necessary to perform their authorized duties
- Tips or complaints to the auditor about alleged fraud

Conflicting or missing evidence, including the following:

- Missing documents
- Documents that appear to have been altered
- Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist
- Significant unexplained items on reconciliations
- Unusual balance sheet changes, or changes in trends or important financial statement ratios or relationships; for example, receivables growing faster than revenues
- Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures
- Unusual discrepancies between the entity's records and confirmation replies
- Large numbers of credit entries and other adjustments made to accounts receivable records
- Unexplained or inadequately explained differences between the accounts receivable subledger and the control account, or between the customer statements and the accounts receivable subledger
- Missing or nonexistent cancelled checks in circumstances in which cancelled checks are ordinarily returned to the entity with the bank statement
- Missing inventory or physical assets of significant magnitude
- Unavailable or missing electronic evidence, inconsistent with the entity's record retention practices or policies
- Fewer responses to confirmations than anticipated or a greater number of responses than anticipated

- Inability to produce evidence of key systems development and program change testing and implementation activities for current-year system changes and deployments

Conditions relating to governmental entities or not-for-profit organizations:

- Significant transfers or transactions between funds or programs, or both, lacking supporting documents
- Abnormal budget conditions, such as
 - significant budget adjustments
 - requests for additional funding
 - budget adjustments made without approval
 - large amounts of over-or-under spending
 - programs with an emphasis on spending money quickly
- Procurement conditions, such as
 - lack of procurement legislation
 - recent changes to procurement legislation
 - complex or unclear legislation
 - involvement of significant monetary amounts (such as in the defense area)
 - investigation by regulatory authorities
 - complaints received from potential suppliers about questionable practices related to awarding of contracts
 - former governmental officials functioning as executives of companies to which contracts have been awarded
- Program conditions, such as
 - newly implemented programs without existing management and accountability structures
 - programs established for political purposes
 - programs established to deal with an immediate emergency or crisis
 - programs experiencing unusual growth due to conditions beyond the control of management
- Grant and donor funding conditions, such as
 - noncompliance with grant requirements
 - unclear grant requirements
 - grants not reaching the intended recipient
 - complaints from intended recipients or interest groups, and lack of monitoring of grantee compliance with applicable law or regulation

Problematic or unusual relationships between the auditor and management, including the following:

- Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought

- Undue time pressures imposed by management to resolve complex or contentious issues
- Complaints by management about the conduct of the audit or management intimidation of engagement team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management
- Unusual delays by the entity in providing requested information
- Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques
- Denial of access to key IT operations staff and facilities, including security, operations, and systems development personnel
- An unwillingness to add or revise disclosures in the financial statements to make them more complete and understandable
- An unwillingness to address identified deficiencies in internal control on a timely basis

Other circumstances, including the following:

- Unwillingness by management to permit the auditor to meet privately with those charged with governance
 - Accounting policies that appear to be at variance with industry norms
 - Frequent changes in accounting estimates that do not appear to result from changed circumstances
 - Tolerance of violations of the entity's code of conduct
-

AU-C Section 250

Consideration of Laws and Regulations in an Audit of Financial Statements

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to consider laws and regulations in an audit of financial statements. This section does not apply to other assurance engagements in which the auditor is specifically engaged to test and report separately on compliance with specific laws or regulations.¹

Effect of Laws and Regulations

.02 The effect on financial statements of laws and regulations varies considerably. Those laws and regulations to which an entity is subject constitute the legal and regulatory framework. The provisions of some laws or regulations have a direct effect on the financial statements in that they determine the reported amounts and disclosures in an entity's financial statements. Other laws or regulations are to be complied with by management, or set the provisions under which the entity is allowed to conduct its business, but do not have a direct effect on an entity's financial statements. Some entities operate in heavily regulated industries (such as banks and chemical companies). Others are subject only to the many laws and regulations that relate generally to the operating aspects of the business (such as those related to occupational safety and health and equal employment opportunity). Noncompliance with laws and regulations may result in fines, litigation, or other consequences for the entity that may have a material effect on the financial statements.

Responsibility for Compliance With Laws and Regulations (Ref: par. .A1–.A7)

Responsibility of Management

.03 It is the responsibility of management, with the oversight of those charged with governance, to ensure that the entity's operations are conducted in accordance with the provisions of laws and regulations, including compliance with the provisions of laws and regulations that determine the reported amounts and disclosures in an entity's financial statements.

¹ Section 935, *Compliance Audits*, addresses compliance audits performed in accordance with generally accepted auditing standards, the standards for financial audits under *Government Auditing Standards*, and government audit requirements.

Responsibility of the Auditor

.04 The requirements in this section are designed to assist the auditor in identifying material misstatement of the financial statements due to non-compliance with laws and regulations. However, the auditor is not responsible for preventing noncompliance and cannot be expected to detect noncompliance with all laws and regulations.

.05 The auditor is responsible for obtaining reasonable assurance that the financial statements as a whole are free from material misstatement, whether caused by fraud or error.² In conducting an audit of financial statements, the auditor takes into account the applicable legal and regulatory framework. Because of the inherent limitations of an audit, an unavoidable risk exists that some material misstatements in the financial statements may not be detected, even though the audit is properly planned and performed in accordance with generally accepted auditing standards (GAAS).³ In the context of laws and regulations, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater for the following reasons:

- Many laws and regulations relating principally to the operating aspects of an entity typically do not affect the financial statements and are not captured by the entity's information systems relevant to financial reporting.
- Noncompliance may involve conduct designed to conceal it, such as collusion, forgery, deliberate failure to record transactions, management override of controls, or intentional misrepresentations made to the auditor.
- Whether an act constitutes noncompliance is ultimately a matter for legal determination, such as by a court of law.

Ordinarily, the further removed noncompliance is from the events and transactions reflected in the financial statements, the less likely the auditor is to become aware of, or recognize, the noncompliance.

.06 This section distinguishes the auditor's responsibilities regarding compliance with the following two categories of laws and regulations:

- a. The provisions of those laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements, such as tax and pension laws and regulations (see paragraph .13)
- b. The provisions of other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the financial statements but compliance with which may be
 - i. fundamental to the operating aspects of the business,
 - ii. fundamental to an entity's ability to continue its business, or
 - iii. necessary for the entity to avoid material penalties

(for example, compliance with the terms of an operating license, regulatory solvency requirements, or environmental regulations); therefore, noncompliance with such laws and regulations may have a material effect on the financial statements (see paragraph .14).

² Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

³ Paragraph .A49 of section 200.

.07 In this section, differing requirements are specified for each of the previously mentioned categories of laws and regulations. For the category referred to in paragraph .06a, the auditor's responsibility is to obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of those laws and regulations. For the category referred to in paragraph .06b, the auditor's responsibility is limited to performing specified audit procedures that may identify noncompliance with those laws and regulations that may have a material effect on the financial statements.

.08 The auditor is required by this section to remain alert to the possibility that other audit procedures applied for the purpose of forming an opinion on financial statements may bring instances of identified or suspected noncompliance with laws and regulations to the auditor's attention. Maintaining professional skepticism throughout the audit, as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, is important in this context, given the extent of laws and regulations that affect the entity.⁴

Effective Date

.09 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.10 The objectives of the auditor are to

- a. obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of those laws and regulations generally recognized to have a direct effect on their determination (see paragraph .06a),
- b. perform specified audit procedures that may identify instances of noncompliance with other laws and regulations that may have a material effect on the financial statements (see paragraph .06b), and
- c. respond appropriately to noncompliance or suspected noncompliance with laws and regulations identified during the audit.

Definition

.11 For the purposes of this section, the following term has the meaning attributed as follows:

Noncompliance. Acts of omission or commission by the entity, either intentional or unintentional, which are contrary to the prevailing laws or regulations. Such acts include transactions entered into by, or in the name of, the entity or on its behalf by those charged with governance, management, or employees. Noncompliance does not include personal misconduct (unrelated to the business activities of the entity) by those charged with governance, management, or employees of the entity.

⁴ Paragraph .17 of section 200.

Requirements

The Auditor's Consideration of Compliance With Laws and Regulations

.12 As part of obtaining an understanding of the entity and its environment, in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the auditor should obtain a general understanding of the following:⁵ (Ref: par. .A8)

- a. The legal and regulatory framework applicable to the entity and the industry or sector in which the entity operates
- b. How the entity is complying with that framework

.13 The auditor should obtain sufficient appropriate audit evidence regarding material amounts and disclosures in the financial statements that are determined by the provisions of those laws and regulations generally recognized to have a direct effect on their determination (see paragraph .06a). (Ref: par. .A9–.A11)

.14 The auditor should perform the following audit procedures that may identify instances of noncompliance with other laws and regulations that may have a material effect on the financial statements (see paragraph .06b): (Ref: par. .A12–.A15)

- a. Inquiring of management and, when appropriate, those charged with governance about whether the entity is in compliance with such laws and regulations
- b. Inspecting correspondence, if any, with the relevant licensing or regulatory authorities (Ref: par. .A16)

.15 During the audit, the auditor should remain alert to the possibility that other audit procedures applied may bring instances of noncompliance or suspected noncompliance with laws and regulations to the auditor's attention. (Ref: par. .A17–.A18)

.16 In the absence of identified or suspected noncompliance, the auditor is not required to perform audit procedures regarding the entity's compliance with laws and regulations, other than those set out in paragraphs .12–.15 of this section and the requirement in section 580, *Written Representations*, related to requesting written representations from management regarding the entity's compliance with laws and regulations.⁶

Audit Procedures When Noncompliance Is Identified or Suspected

.17 If the auditor becomes aware of information concerning an instance of noncompliance or suspected noncompliance with laws and regulations, the auditor should obtain (Ref: par. .A19–.A20)

- a. an understanding of the nature of the act and the circumstances in which it has occurred and
- b. further information to evaluate the possible effect on the financial statements. (Ref: par. .A21)

⁵ Paragraph .12 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

⁶ Paragraph .13 of section 580, *Written Representations*.

.18 If the auditor suspects noncompliance may exist, the auditor should discuss the matter with management (at a level above those involved with the suspected noncompliance, if possible) and, when appropriate, those charged with governance. If management or, as appropriate, those charged with governance do not provide sufficient information that supports that the entity is in compliance with laws and regulations and, in the auditor's professional judgment, the effect of the suspected noncompliance may be material to the financial statements, the auditor should consider the need to obtain legal advice. (Ref: par. .A22–.A23)

.19 If sufficient information about suspected noncompliance cannot be obtained, the auditor should evaluate the effect of the lack of sufficient appropriate audit evidence on the auditor's opinion.

.20 The auditor should evaluate the implications of noncompliance in relation to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations,⁷ and take appropriate action. (Ref: par. .A24–.A25)

Reporting of Identified or Suspected Noncompliance

Reporting Noncompliance to Those Charged With Governance

.21 Unless all of those charged with governance are involved in management of the entity and aware of matters involving identified or suspected noncompliance already communicated by the auditor,⁸ the auditor should communicate with those charged with governance matters involving noncompliance with laws and regulations that come to the auditor's attention during the course of the audit, other than when the matters are clearly inconsequential. (Ref: par. .A26)

.22 If, in the auditor's professional judgment, the noncompliance referred to in paragraph .21 is believed to be intentional and material, the auditor should communicate the matter to those charged with governance as soon as practicable.

.23 If the auditor suspects that management or those charged with governance are involved in noncompliance, the auditor should communicate the matter to the next higher level of authority at the entity, if it exists. When no higher authority exists, or if the auditor believes that the communication may not be acted upon or is unsure about the person to whom to report, the auditor should consider the need to obtain legal advice.

Reporting Noncompliance in the Auditor's Report on the Financial Statements

.24 If the auditor concludes that the noncompliance has a material effect on the financial statements, and it has not been adequately reflected in the financial statements, the auditor should, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, express a qualified or adverse opinion on the financial statements.⁹ (Ref: par. .A27)

.25 If the auditor is precluded by management or those charged with governance from obtaining sufficient appropriate audit evidence to evaluate whether

⁷ Paragraphs .22–.26 of section 580.

⁸ Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

⁹ Paragraphs .08–.09 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

noncompliance that may be material to the financial statements has, or is likely to have, occurred, the auditor should express a qualified opinion or disclaim an opinion on the financial statements on the basis of a limitation on the scope of the audit, in accordance with section 705.¹⁰ (Ref: par. .A27)

.26 If the auditor is unable to determine whether noncompliance has occurred because of limitations imposed by the circumstances rather than by management or those charged with governance, the auditor should evaluate the effect on the auditor's opinion, in accordance with section 705.¹¹

Reporting Noncompliance to Regulatory and Enforcement Authorities

.27 If the auditor has identified or suspects noncompliance with laws and regulations, the auditor should determine whether the auditor has a responsibility to report the identified or suspected noncompliance to parties outside the entity. (Ref: par. .A28–.A29)

Documentation

.28 The auditor should include in the audit documentation a description of the identified or suspected noncompliance with laws and regulations and the results of discussion with management and, when applicable, those charged with governance and other parties inside or outside the entity.¹² (Ref: par. .A30)

Application and Other Explanatory Material

Responsibility for Compliance With Laws and Regulations (Ref: par. .03–.08)

Responsibility of Management

.A1 It is the responsibility of management, with the oversight of those charged with governance, to ensure that the entity's operations are conducted in accordance with laws and regulations. Laws and regulations may affect an entity's financial statements in different ways (for example, most directly, they may affect specific disclosures required of the entity in the financial statements, or they may prescribe the applicable financial reporting framework). They also may establish certain legal rights and obligations of the entity, some of which will be recognized in the entity's financial statements. In addition, laws and regulations may provide for the imposition of penalties in cases of noncompliance.

.A2 The following are examples of the types of policies and procedures an entity may implement to assist in the prevention and detection of noncompliance with laws and regulations:

- Monitoring legal requirements and ensuring that operating procedures are designed to meet these requirements
- Instituting and operating appropriate systems of internal control

¹⁰ [Footnote deleted, January 2012, to reflect conforming changes necessary due to the issuance of SAS No. 123.]

¹¹ [Footnote deleted, January 2012, to reflect conforming changes necessary due to the issuance of SAS No. 123.]

¹² Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- Developing, publicizing, and following a code of ethics or code of conduct
- Ensuring employees are properly trained and understand the code of ethics or code of conduct
- Monitoring compliance with the code of ethics or code of conduct and acting appropriately to discipline employees who fail to comply with it
- Engaging legal advisors to assist in monitoring legal requirements
- Maintaining a register of significant laws and regulations with which the entity has to comply within its particular industry and a record of complaints

In larger entities, these policies and procedures may be supplemented by assigning appropriate responsibilities to the following:

- An internal audit function
- An audit committee
- A legal function
- A compliance function

Responsibility of the Auditor

.A3 Because of the inherent limitations described in paragraph .05, an audit performed in accordance with GAAS provides no assurance that all non-compliance with laws and regulations will be detected or that any contingent liabilities that result will be disclosed.

.A4 Noncompliance by the entity with laws and regulations may result in a material misstatement of the financial statements. Detection of noncompliance, regardless of materiality, may affect other aspects of the audit, including, for example, the auditor's consideration of the integrity of management or employees. Noncompliance can result from fraudulent activity. Section 240, *Consideration of Fraud in a Financial Statement Audit*, addresses the auditor's responsibility if fraud or suspected fraud is detected.

.A5 Whether an act constitutes noncompliance with laws and regulations is a matter for legal determination, which ordinarily is beyond the auditor's professional competence to determine. Nevertheless, the auditor's training, experience, and understanding of the entity and its industry or sector may provide a basis to recognize that some acts coming to the auditor's attention may constitute noncompliance with laws and regulations.

.A6 In accordance with specific statutory requirements, the auditor may be specifically required to report, as part of the audit of the financial statements, on whether the entity complies with certain provisions of laws or regulations. In these circumstances, section 806, *Reporting on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements*, and section 935, *Compliance Audits*, set forth how these audit responsibilities are addressed in the auditor's report. Furthermore, when specific statutory reporting requirements exist, it may be necessary for the audit plan to include appropriate tests for compliance with these provisions of the laws and regulations.

Considerations Specific to Governmental Entities

.A7 Auditors of governmental entities may have additional responsibilities with respect to the consideration of laws and regulations, which relate to the

audit of financial statements or may extend to other aspects of the entity's operations.¹³

The Auditor's Consideration of Compliance With Laws and Regulations

Obtaining an Understanding of the Legal and Regulatory Framework (Ref: par. .12)

.A8 To obtain a general understanding of the legal and regulatory framework and how the entity complies with that framework, the auditor may, for example

- use the auditor's existing understanding of the entity's industry and regulatory and other external factors;
- update the understanding of those laws and regulations that directly determine the reported amounts and disclosures in the financial statements;
- inquire of management about other laws or regulations that may be expected to have a fundamental effect on the operations of the entity;
- inquire of management concerning the entity's policies and procedures regarding compliance with laws and regulations (including the prevention of noncompliance), if appropriate;
- inquire of management regarding the policies or procedures adopted for identifying, evaluating, and accounting for litigation claims;
- inquire of management regarding the use of directives issued by the entity and periodic representations obtained by the entity from management at appropriate levels of authority concerning compliance with laws and regulations; and
- consider the auditor's knowledge of the entity's history of noncompliance with laws and regulations.

Laws and Regulations Generally Recognized to Have a Direct Effect on the Determination of Material Amounts and Disclosures in the Financial Statements (Ref: par. .13)

.A9 Certain laws and regulations are well established, known to the entity and within the entity's industry or sector, and relevant to the entity's financial statements (as described in paragraph .06a). These laws and regulations generally are directly relevant to the determination of material amounts and disclosures in the financial statements and readily evident to the auditor. They could include those that relate to, for example

- the form and content of financial statements (for example, statutorily-mandated requirements);
- industry-specific financial reporting issues;
- accounting for transactions under government contracts (for example, laws and regulations that may affect the amount of revenue to be accrued); or

¹³ See section 935; *Government Auditing Standards*; and OMB Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*.

- the accrual or recognition of expenses for income tax or pension costs.

.A10 Some provisions in those laws and regulations may be directly relevant to specific assertions in the financial statements (for example, the completeness of income tax provisions), whereas others may be directly relevant to the financial statements as a whole. The auditor's responsibility regarding misstatements resulting from noncompliance with laws and regulations having a direct effect on the determination of material amounts and disclosures in the financial statements is the same as that for misstatements caused by fraud or error, as described in section 200.

.A11 Noncompliance with other provisions of such laws and regulations, and the laws and regulations described in paragraph .06*b*, may result in fines, litigation, or other consequences for the entity, the costs of which may need to be provided for or disclosed in the financial statements but are not considered to have a direct effect on the financial statements, as described in paragraph .06*a*.

Procedures to Identify Instances of Noncompliance—Other Laws and Regulations (Ref: par. .14)

.A12 Certain other laws and regulations may need particular attention by the auditor because they have a fundamental effect on the operations of the entity (as described in paragraph .06*b*). Noncompliance with laws and regulations that have a fundamental effect on the operations of the entity may cause the entity to cease operations or call into question the entity's continuance as a going concern. For example, noncompliance with the requirements of the entity's license or other entitlement to perform its operations could have such an impact (for example, for a bank, noncompliance with capital or investment requirements).

.A13 Many laws and regulations relating principally to the operating aspects of the entity do not directly affect the financial statements (their financial statement effect is indirect) and are not captured by the entity's information systems relevant to financial reporting. Their indirect effect may result from the need to disclose a contingent liability because of the allegation or determination of identified or suspected noncompliance. Those other laws or regulations may include those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. An auditor may not have a sufficient basis for recognizing possible noncompliance with such laws and regulations.

.A14 For the category referred to in paragraph .06*b*, the auditor's responsibility is limited to performing specified audit procedures (see paragraph .14) that may identify noncompliance with those laws and regulations that may have a material effect on the financial statements. Even when those procedures are performed, the auditor may not become aware of the existence of noncompliance unless there is evidence of noncompliance in the records, documents, or other information normally inspected in an audit of financial statements.

.A15 Because the financial reporting consequences of other laws and regulations can vary depending on the entity's operations, the audit procedures required by paragraph .14 are intended to bring to the auditor's attention instances of noncompliance with laws and regulations that may have a material effect on the financial statements.

.A16 In some cases, the amount of an entity's correspondence with licensing or regulatory authorities is voluminous. In exercising professional judgment

in such circumstances, the auditor may consider the following in determining the extent of inspection that may identify instances of noncompliance:

- The nature of the entity
- The nature and type of correspondence

Noncompliance Brought to the Auditor's Attention by Other Audit Procedures (Ref: par. .15)

.A17 Audit procedures applied to form an opinion on the financial statements may bring instances of noncompliance or suspected noncompliance with laws and regulations to the auditor's attention. For example, such audit procedures may include the following:

- Reading minutes
- Inquiring of the entity's management and in-house or external legal counsel concerning litigation, claims, and assessments
- Performing substantive tests of details of classes of transactions, account balances, or disclosures

.A18 Because the effect of laws and regulations on financial statements can vary considerably, written representations, as required by section 580, provide necessary audit evidence about management's knowledge of identified or suspected noncompliance with laws and regulations, the effects of which may have a material effect on the financial statements. However, written representations do not provide sufficient appropriate audit evidence on their own and, accordingly, do not affect the nature and extent of other audit evidence that is to be obtained by the auditor.¹⁴

Audit Procedures When Noncompliance Is Identified or Suspected

Indications of Noncompliance With Laws and Regulations (Ref: par. .17)

.A19 If the auditor becomes aware of the existence of, or information about, the following matters, it may be an indication of noncompliance with laws and regulations:

- Investigations by regulatory organizations and government departments or payment of fines or penalties
- Payments for unspecified services or loans to consultants, related parties, employees, or government officials or government employees
- Sales commissions or agent's fees that appear excessive in relation to those ordinarily paid by the entity or in its industry or to the services actually received
- Purchases made at prices significantly above or below market price
- Unusual payments in cash, purchases in the form of cashiers' checks payable to bearer, or transfers to numbered bank accounts

¹⁴ Paragraph .04 of section 580.

- Unusual transactions with companies registered in tax havens
- Payments for goods or services made other than to the country from which the goods or services originated
- Existence of an information system that fails, whether by design or accident, to provide an adequate audit trail or sufficient evidence
- Unauthorized transactions or improperly recorded transactions
- Adverse media comment
- Noncompliance with laws or regulations cited in reports of examinations by regulatory agencies that have been made available to the auditor
- Failure to file tax returns or pay government duties or similar fees that are common to the entity's industry or the nature of its business

Obtaining an Understanding of an Act of Identified or Suspected Noncompliance (Ref: par. .17)

.A20 Procedures an auditor may perform to address the requirements of paragraph .17 include the following:

- Examining supporting documents, such as invoices, cancelled checks, and agreements, and comparing with accounting records
- Confirming significant information concerning the matter with the other party to the transaction or intermediaries, such as banks or lawyers
- Determining whether the transaction has been properly authorized
- Considering whether other similar transactions or events may have occurred and applying procedures to identify them

Matters Relevant to the Auditor's Evaluation (Ref: par. .17b)

.A21 Matters relevant to the auditor's evaluation of the possible effect on the financial statements include the following:

- The quantitative effect of noncompliance. The potential financial consequences of noncompliance with laws and regulations on the financial statements may include the imposition of fines, penalties, or damages; the threat of expropriation of assets; enforced discontinuation of operations; and litigation.
- The qualitative materiality of the effect of noncompliance. For example, an illegal payment of an otherwise immaterial amount could be material if a reasonable possibility exists that it could lead to a material contingent liability or a material loss of revenue.
- Whether the potential financial consequences require accrual or disclosure under the applicable financial reporting framework. For example, if material revenue or earnings are derived from transactions involving noncompliance, or if noncompliance creates significant risks associated with material revenue or earnings, such as loss of a significant business relationship, that information may require disclosure. Loss contingencies resulting from noncompliance that may require disclosure may be evaluated in the same

manner as other loss contingencies under the applicable financial reporting framework.

- Whether the potential financial consequences are so serious as to call into question the fair presentation of the financial statements or otherwise make the financial statements misleading.

Audit Procedures (Ref: par. .18)

.A22 The auditor may discuss the findings with those charged with governance, in which case they may be able to provide additional audit evidence. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to transactions or events that have led to the possibility of noncompliance with laws and regulations.

.A23 If management or, as appropriate, those charged with governance do not provide sufficient information to the auditor that the entity is in fact in compliance with laws and regulations, the auditor may consider it appropriate to consult with the entity's in-house legal counsel or external legal counsel about the application of the laws and regulations to the circumstances, including the possibility of fraud, and the possible effects on the financial statements. The auditor may request management to arrange for such consultation with the entity's legal counsel. If it is not considered appropriate to consult with the entity's legal counsel or if the auditor is not satisfied with the legal counsel's opinion, the auditor may consider it appropriate to consult the auditor's own legal counsel about whether a violation of a law or regulation is involved; the possible legal consequences, including the possibility of fraud; and what further action, if any, the auditor may take.

Evaluating the Implications of Noncompliance (Ref: par. .20)

.A24 As required by paragraph .20, the auditor evaluates the implications of noncompliance with regard to other aspects of the audit, including the auditor's risk assessment and the reliability of written representations. The implications of particular instances of noncompliance identified by the auditor will depend on the relationship of the perpetration and concealment, if any, of the act to specific control activities and the level of management or employees involved, especially implications arising from the involvement of the highest authority within the entity.

.A25 The auditor may consider whether withdrawal from the engagement, when withdrawal is possible under applicable law or regulation, is necessary when management or those charged with governance do not take the remedial action that the auditor considers appropriate in the circumstances, even when the noncompliance is not material to the financial statements. Factors that may affect the auditor's decision may include the implications of the failure to take remedial action, which may affect the auditor's ability to rely on management representations, and the effects of continuing association with the entity. When deciding whether withdrawal from the engagement is necessary, the auditor may consider seeking legal advice. If withdrawal from the engagement is not possible under applicable law or regulation, the auditor may consider alternative actions, including describing the noncompliance in an other-matter(s) paragraph in the auditor's report.¹⁵

¹⁵ Paragraph .08 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*.

Reporting of Identified or Suspected Noncompliance

Reporting Noncompliance to Those Charged With Governance ***(Ref: par. .21)***

.A26 The communication of matters involving identified or suspected non-compliance may describe the act of identified or suspected noncompliance, the circumstances of its occurrence, and the effect on the financial statements. The auditor may reach agreement in advance with those charged with governance on the nature of matters that would be considered clearly inconsequential and, thus, need not be communicated.

Issuance of a Modified Opinion on the Financial Statements ***(Ref: par. .24–.25)***

.A27 If management or those charged with governance refuse to accept a modified opinion on the financial statements for the circumstances described in paragraphs .24–.25, the auditor may withdraw from the engagement, when withdrawal is possible under applicable law or regulation, and indicate the reasons for withdrawal in writing to those charged with governance.

Reporting Noncompliance to Regulatory and Enforcement Authorities ***(Ref: par. .27)***

.A28 The auditor's professional duty to maintain the confidentiality of client information may preclude reporting identified or suspected noncompliance with laws and regulations to a party outside the entity. However, the auditor's legal responsibilities vary by jurisdiction, and in certain circumstances, the duty of confidentiality may be overridden by statute, the law, or courts of law. In the following circumstances, a duty to notify parties outside the entity may exist:

- In response to inquiries from an auditor to a predecessor auditor, in accordance with the requirements of section 210, *Terms of Engagement*¹⁶
- In response to a court order
- In compliance with requirements for the audits of entities that receive financial assistance from a government agency

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may consult with legal counsel before discussing noncompliance with parties outside the entity.

Considerations Specific to Governmental Entities

.A29 The auditor of a governmental entity may be required to report on compliance with laws, regulations, and provisions of contracts or grant agreements as part of the audit of the governmental entity's financial statements (for example, in an audit conducted in accordance with *Government Auditing Standards*). The auditor also may be required to communicate instances of noncompliance to appropriate oversight bodies and funding agencies.

¹⁶ Paragraphs .11–.12 of section 210, *Terms of Engagement*.

Documentation (Ref: par. .28)

.A30 The auditor's documentation of findings regarding identified or suspected noncompliance with laws and regulations may include, for example

- copies of records or documents.
 - minutes of discussions held with management, those charged with governance, or other parties inside or outside the entity.
-

AU-C Section 260

The Auditor's Communication With Those Charged With Governance

Source: SAS No. 122; SAS No. 123; SAS No. 125.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to communicate with those charged with governance in an audit of financial statements. Although this section applies regardless of an entity's governance structure or size, particular considerations apply when all of those charged with governance are involved in managing an entity. This section does not establish requirements regarding the auditor's communication with an entity's management or owners unless they are also charged with a governance role.

.02 This section is written in the context of an audit of financial statements but may also be applied, adapted as necessary in the circumstances, to audits of other historical financial information when those charged with governance have a responsibility to oversee the preparation and fair presentation of the other historical financial information.

.03 Recognizing the importance of effective two-way communication in an audit of financial statements, this section provides an overarching framework for the auditor's communication with those charged with governance and identifies some specific matters to be communicated. Additional matters to be communicated are identified in other AU-C sections (see the exhibit, "Requirements to Communicate With Those Charged With Governance in Other AU-C Sections"). In addition, section 265, *Communicating Internal Control Related Matters Identified in an Audit*, establishes specific requirements regarding the communication of significant deficiencies and material weaknesses in internal control the auditor has identified during the audit to those charged with governance. Further matters not required by generally accepted auditing standards (GAAS) may be required to be communicated by agreement with those charged

with governance or management or in accordance with external requirements. Nothing in this section precludes the auditor from communicating any other matters to those charged with governance.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

- .05 The objectives of the auditor are to
- a. communicate clearly with those charged with governance the responsibilities of the auditor regarding the financial statement audit and an overview of the planned scope and timing of the audit.
 - b. obtain from those charged with governance information relevant to the audit.
 - c. provide those charged with governance with timely observations arising from the audit that are significant and relevant to their responsibility to oversee the financial reporting process.
 - d. promote effective two-way communication between the auditor and those charged with governance. (Ref: par. .A1–.A5)

Definitions

.06 For purposes of GAAS, the following terms have the meanings attributed as follows:

Management. The person(s) with executive responsibility for the conduct of the entity's operations. For some entities, management includes some or all of those charged with governance; for example, executive members of a governance board or an owner-manager.

Those charged with governance. The person(s) or organization(s) (for example, a corporate trustee) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity. This includes overseeing the financial reporting process. Those charged with governance may include management personnel; for example, executive members of a governance board or an owner-manager.

Requirements

Those Charged With Governance

.07 The auditor should determine the appropriate person(s) within the entity's governance structure with whom to communicate. (Ref: par. .A6–.A9)

Communication With the Audit Committee or Other Subgroup of Those Charged With Governance

.08 If the auditor communicates with a subgroup of those charged with governance, such as the audit committee or an individual, the auditor should

determine whether the auditor also needs to communicate with the governing body. (Ref: par. .A10–.A12)

When All of Those Charged With Governance Are Involved in Managing the Entity

.09 In some cases, all of those charged with governance are involved in managing the entity; for example, a small business in which a single owner manages the entity and no one else has a governance role. In these cases, if matters required by this section are communicated with a person(s) with management responsibilities and that person(s) also has governance responsibilities, the matters need not be communicated again with the same person(s) in that person's governance role. These matters are noted in paragraph .14. The auditor should, nonetheless, be satisfied that communication with person(s) with management responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity.

Matters to Be Communicated

The Auditor's Responsibilities With Regard to the Financial Statement Audit

.10 The auditor should communicate with those charged with governance the auditor's responsibilities with regard to the financial statement audit, including that (Ref: par. .A13–.A17)

- a. the auditor is responsible for forming and expressing an opinion about whether the financial statements that have been prepared by management, with the oversight of those charged with governance, are prepared, in all material respects, in accordance with the applicable financial reporting framework.
- b. the audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

Planned Scope and Timing of the Audit

.11 The auditor should communicate with those charged with governance an overview of the planned scope and timing of the audit. (Ref: par. .A18–.A22)

Significant Findings or Issues From the Audit

.12 The auditor should communicate with those charged with governance (Ref: par. .A23)

- a. the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures. When applicable, the auditor should (Ref: par. .A24–.A25)
 - i. explain to those charged with governance why the auditor considers a significant accounting practice that is acceptable under the applicable financial reporting framework not to be most appropriate to the particular circumstances of the entity and
 - ii. determine that those charged with governance are informed about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the

auditor's conclusions regarding the reasonableness of those estimates.

- b. significant difficulties, if any, encountered during the audit. (Ref: par. .A26)
- c. disagreements with management, if any. (Ref: par. .A28)
- d. other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their responsibility to oversee the financial reporting process. (Ref: par. .A27)

Uncorrected Misstatements

.13 The auditor should communicate with those charged with governance (Ref: par. .A29–.A30)

- a. uncorrected misstatements accumulated by the auditor and the effect that they, individually or in the aggregate, may have on the opinion in the auditor's report. The auditor's communication should identify material uncorrected misstatements individually. The auditor should request that uncorrected misstatements be corrected.
- b. the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

When Not All of Those Charged With Governance Are Involved in Management

.14 Unless all of those charged with governance are involved in managing the entity, the auditor also should communicate

- a. material, corrected misstatements that were brought to the attention of management as a result of audit procedures. (Ref: par. .A31)
- b. significant findings or issues, if any, arising from the audit that were discussed, or the subject of correspondence, with management. (Ref: par. .A32)
- c. the auditor's views about significant matters that were the subject of management's consultations with other accountants on accounting or auditing matters when the auditor is aware that such consultation has occurred.
- d. written representations the auditor is requesting. (Ref: par. .A33)

The Communication Process

Establishing the Communication Process

.15 The auditor should communicate with those charged with governance the form, timing, and expected general content of communications. (Ref: par. .A34–.A38)

Forms of Communication

.16 The auditor should communicate in writing with those charged with governance significant findings or issues from the audit (see paragraphs .12–.14) if, in the auditor's professional judgment, oral communication would not be adequate. This communication need not include matters that arose during the course of the audit that were communicated with those charged with governance and satisfactorily resolved. (Ref: par. .A39–.A41)

Restricted Use

.17 When the auditor communicates matters in accordance with this section in writing, the communication is considered a by-product report.¹ Accordingly, the auditor should indicate in the communication that it is intended solely for the information and use of those charged with governance and, if appropriate, management, and is not intended to be, and should not be, used by anyone other than these specified parties.

Timing of Communications

.18 The auditor should communicate with those charged with governance on a timely basis. (Ref: par. .A42–.A43)

Adequacy of the Communication Process

.19 The auditor should evaluate whether the two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor should evaluate the effect, if any, on the auditor's assessment of the risks of material misstatement and ability to obtain sufficient appropriate audit evidence and should take appropriate action. (Ref: par. .A44–.A46)

Documentation

.20 When matters required to be communicated by this section have been communicated orally, the auditor should include them in the audit documentation, including when and to whom they were communicated.² When matters have been communicated in writing, the auditor should retain a copy of the communication as part of the audit documentation. (Ref: par. .A47)

Application and Other Explanatory Material

Objectives

The Role of Communication (Ref: par. .05)

.A1 This section focuses primarily on communications from the auditor to those charged with governance. Nevertheless, effective two-way communication is important in assisting

- the auditor and those charged with governance in understanding matters related to the audit in context and in developing a constructive working relationship. This relationship is developed while maintaining the auditor's independence and objectivity.
- the auditor in obtaining from those charged with governance information relevant to the audit. For example, those charged with governance may assist the auditor in understanding the entity and its environment, in identifying appropriate sources of audit evidence, and in providing information about specific transactions or events.

¹ Paragraphs .06c and .07 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

² Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- those charged with governance in fulfilling their responsibility to oversee the financial reporting process, thereby reducing the risks of material misstatement of the financial statements.

.A2 Although the auditor is responsible for communicating specific matters in accordance with this section, management also has a responsibility to communicate matters of governance interest to those charged with governance. Communication by the auditor does not relieve management of this responsibility. Similarly, management's communication of these matters to those charged with governance does not relieve the auditor of the responsibility to also communicate them. However, communication of these matters by management may affect the form or timing of the auditor's communication.

.A3 Clear communication of specific matters required to be communicated by GAAS is an integral part of every audit. However, GAAS do not require the auditor to perform procedures specifically to identify other significant matters to communicate with those charged with governance.

Legal or Regulatory Restrictions on Communicating With Those Charged With Governance (Ref: par. .05)

.A4 Law or regulation may restrict the auditor's communication of certain matters with those charged with governance. For example, law or regulation may specifically prohibit a communication or other action that might prejudice an investigation by an appropriate authority into an actual, or suspected, illegal act. In some circumstances, potential conflicts between the auditor's obligations of confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider obtaining legal advice.

.A5 In certain circumstances, the auditor may be required to report to a regulatory or enforcement body certain matters that have been communicated with those charged with governance. For example, *Government Auditing Standards* requires auditors to report fraud, illegal acts, violations of provisions of contracts or grant agreements, and abuse directly to such parties in certain circumstances.

Those Charged With Governance (Ref: par. .07)

.A6 Governance structures vary by entity, reflecting influences such as size and ownership characteristics. For example:

- In some entities, those charged with governance hold positions (for example, company directors) that are integral parts of the entity's legal structure. For other entities, a body that is not part of the entity is charged with governance, as with some government agencies.
- In some cases, some or all of those charged with governance also have management responsibilities. In others, those charged with governance and management are different people.
- Parties charged with governance of governmental entities may include members or staff of a legislative oversight committee, oversight bodies, or other parties contracting for the audit.

.A7 In most entities, governance is the collective responsibility of a governing body, such as a board of directors; a supervisory board; partners; proprietors; a committee of management; trustees; or equivalent persons. In some smaller entities, however, one person may be charged with governance, such as the owner-manager, when there are no other owners, or a sole trustee. When governance is a collective responsibility, a subgroup, such as an audit committee or

even an individual, may be charged with specific tasks to assist the governing body in meeting its responsibilities.

.A8 Such diversity means that it is not possible for this section to specify for all audits the person(s) with whom the auditor is to communicate particular matters. Also, in some cases, the appropriate person(s) with whom to communicate may not be clearly identifiable from the engagement circumstances. An example of this is entities in which the governance structures are not formally defined, such as some family-owned entities, some not-for-profit organizations, and some government entities. When the appropriate person(s) with whom to communicate is not clearly identifiable, the auditor and the engaging party may need to discuss and agree on the relevant person(s) within the entity's governance structure with whom the auditor will communicate. In deciding with whom to communicate, the auditor's understanding of an entity's governance structure and processes obtained in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, is relevant. The appropriate person(s) with whom to communicate may vary depending on the matter to be communicated.

.A9 Section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, includes specific matters to be communicated by group auditors with those charged with governance.³ When the entity being audited is a component of a group, the appropriate person(s) with whom to communicate is dependent on the nature of the matter to be communicated and the terms of the engagement.

Communication With the Audit Committee or Other Subgroup of Those Charged With Governance (Ref: par. .08)

.A10 When considering communicating with a subgroup of those charged with governance, the auditor may take into account matters such as

- the respective responsibilities of the subgroup and the governing body.
- the nature of the matter to be communicated.
- relevant legal or regulatory requirements.
- whether the subgroup (a) has the authority to take action regarding the information communicated and (b) can provide further information and explanations the auditor may need.
- whether the auditor is aware of potential conflicts of interest between the subgroup and other members of the governing body.

.A11 When deciding whether there is also a need to communicate information, in full or in summary form, with the governing body, the auditor may be influenced by the auditor's assessment of how effectively and appropriately the subgroup communicates relevant information with the governing body. The auditor may make explicit in the terms of the engagement that the auditor retains the right to communicate directly with the governing body.

.A12 Audit committees (or similar subgroups with different names) exist in many entities. Although the specific authority and functions of audit committees may differ, communication with the audit committee, when one exists, is a key element in the auditor's communication with those charged with governance. Good governance principles suggest that

³ Paragraphs .45–.48 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

- the auditor has access to the audit committee as necessary.
- the chair of the audit committee and, when relevant, the other members of the audit committee meet with the auditor periodically.
- the audit committee meets with the auditor without management present at least annually, unless prohibited by law or regulation.

Matters to Be Communicated

The Auditor's Responsibilities With Regard to the Financial Statement Audit (Ref: par. .10)

.A13 The auditor's responsibilities with regard to the financial statement audit are often included in the engagement letter or other suitable form of written agreement that documents the terms of the engagement. Providing those charged with governance with a copy of that engagement letter or other suitable form of written agreement may be an appropriate way to communicate with them that

- the auditor is responsible for performing the audit in accordance with GAAS and that the audit is designed to obtain reasonable, rather than absolute, assurance about whether the financial statements as a whole are free from material misstatement.
- an audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting.
- the auditor is responsible for communicating significant matters related to the financial statement audit that are, in the auditor's professional judgment, relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. GAAS do not require the auditor to design procedures for the purpose of identifying other matters to communicate with those charged with governance.
- when applicable, the auditor is also responsible for communicating particular matters required by law or regulation, by agreement with the entity, or by additional requirements applicable to the engagement.

Independence (Ref: par. .10)

.A14 GAAS require independence for all audits. Relevant matters to consider in reaching a conclusion about independence include circumstances or relationships that create threats to auditor independence and the related safeguards that have been applied to eliminate those threats or reduce them to an acceptable level. Comprehensive material on threats to independence and safeguards, including application to specific situations, is set forth in the AICPA's *Conceptual Framework for AICPA Independence Standards* (ET sec. 100-1).

.A15 Although the auditor's report affirms the auditor's independence, in certain situations, the auditor may determine that it is appropriate to communicate with those charged with governance circumstances or relationships (for example, financial interests, business or family relationships, or nonaudit services provided or expected to be provided) that, in the auditor's professional judgment, may reasonably be thought to bear on independence, and to which

the auditor gave significant consideration, in reaching the conclusion that independence has not been impaired.

.A16 It may be particularly appropriate to communicate with those charged with governance those circumstances or relationships discussed in paragraph .A15 in audits of public interest entities. In addition to entities subject to Securities and Exchange Commission reporting requirements, the AICPA's *Conceptual Framework for AICPA Independence Standards* considers the following entities to be *public interest entities*: (1) employee benefit and health and welfare plans subject to Employee Retirement Income Security Act audit requirements; (2) governmental retirement plans; (3) entities or programs (including for-profit entities) subject to Single Audit Act OMB Circular A-133 audit requirements and entities or programs subject to similar program oversight; and (4) financial institutions, credit unions, and insurance companies. These entities are public interest entities because their audited financial statements are (1) directly relied upon by significant numbers of stakeholders to make investment, credit, or similar decisions or (2) indirectly relied upon through regulatory oversight (for example, in the case of pension plans, banks, and insurance companies) and, therefore, the potential extent of harm to the public from an audit failure involving one of these entities would generally be significant.

.A17 The form and timing of communications regarding independence may be affected by the entity's governance structure and whether a formal subgroup, such as an audit committee, exists. In situations in which all of those charged with governance are involved in managing the entity, the auditor may determine that those charged with governance have been informed of relevant facts regarding the auditor's independence through their management activities or through other means, such as the engagement letter. This is particularly likely when the entity is owner-managed and the auditor's firm has little involvement with the entity beyond a financial statement audit.

Planned Scope and Timing of the Audit (Ref: par. .11)

.A18 Care is required when communicating with those charged with governance about the planned scope and timing of the audit so as not to compromise the effectiveness of the audit, particularly when some or all of those charged with governance are involved in managing the entity. For example, communicating the nature and timing of detailed audit procedures may reduce the effectiveness of those procedures by making them too predictable. Certain factors described in paragraph .A39 may be relevant in determining the nature and extent of this communication.

.A19 Communication regarding the planned scope and timing of the audit may assist

- those charged with governance to discuss issues of risk and materiality with the auditor;
- those charged with governance to understand better the consequences of the auditor's work and to identify any areas in which they may request the auditor to undertake additional procedures; and
- the auditor to understand better the entity and its environment.

.A20 Matters communicated may include the following:

- How the auditor proposes to address the significant risks of material misstatement, whether due to fraud or error

- The auditor's approach to internal control relevant to the audit including, when applicable, whether the auditor will express an opinion on the effectiveness of internal control over financial reporting
- The application of materiality in the context of an audit, as discussed in section 320, *Materiality in Planning and Performing an Audit*
- If the entity has an internal audit function, the extent to which the auditor will use the work of internal audit and how the external and internal auditors can best work together

.A21 Other planning matters that may be appropriate to discuss with those charged with governance include

- the views of those charged with governance about the following matters:
 - The appropriate person(s) in the entity's governance structure with whom to communicate
 - The allocation of responsibilities between those charged with governance and management
 - The entity's objectives and strategies and the related business risks that may result in material misstatements
 - Matters those charged with governance consider as warranting particular attention during the audit and any areas for which they request additional procedures to be undertaken
 - Significant communications with regulators
 - Other matters those charged with governance believe are relevant to the audit of the financial statements
- the attitudes, awareness, and actions of those charged with governance concerning (a) the entity's internal control and its importance in the entity, including how those charged with governance oversee the effectiveness of internal control, and (b) the detection or the possibility of fraud.
- the actions of those charged with governance in response to developments in law, accounting standards, corporate governance practices, and other related matters.
- the actions of those charged with governance in response to previous communications with the auditor.

.A22 Although communication with those charged with governance may assist the auditor to plan the scope and timing of the audit, it does not change the auditor's sole responsibility to establish the overall audit strategy and the audit plan, including the nature, timing, and extent of procedures necessary to obtain sufficient appropriate audit evidence.

Significant Findings From the Audit (Ref: par. . 12)

.A23 The communication of significant findings from the audit may include requesting further information from those charged with governance in order to complete the audit evidence obtained. For example, the auditor may confirm that those charged with governance have the same understanding of the facts and circumstances relevant to specific transactions or events.

Qualitative Aspects of the Entity's Significant Accounting Practices (Ref: par. .12a)

.A24 Financial reporting frameworks ordinarily allow for the entity to make accounting estimates and judgments about accounting policies and financial statement disclosures. Open and constructive communication about qualitative aspects of the entity's significant accounting practices may include comment on the acceptability of significant accounting practices. The appendix, "Qualitative Aspects of Accounting Practices," identifies matters that may be included in this communication.

.A25 Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments. In communicating with those charged with governance about the process used by management in formulating particularly sensitive accounting estimates, including fair value estimates, and about the basis for the auditor's conclusions regarding the reasonableness of those estimates, the auditor may consider communicating

- the nature of significant assumptions,
- the degree of subjectivity involved in the development of the assumptions, and
- the relative materiality of the items being measured to the financial statements as a whole.

Significant Difficulties Encountered During the Audit (Ref: par. .12b)

.A26 Significant difficulties encountered during the audit may include matters such as

- significant delays in management providing required information.
- an unnecessarily brief time within which to complete the audit.
- extensive unexpected effort required to obtain sufficient appropriate audit evidence.
- the unavailability of expected information.
- restrictions imposed on the auditor by management.
- management's unwillingness to provide information about management's plans for dealing with the adverse effects of the conditions or events that lead the auditor to believe there is substantial doubt about the entity's ability to continue as a going concern.

In some circumstances, such difficulties may constitute a scope limitation that leads to a modification of the auditor's opinion.

Other Findings or Issues

.A27 The auditor may become aware that the entity is subject to an audit requirement that is not encompassed in the terms of the engagement. The communication to those charged with governance that an audit conducted in accordance with GAAS may not satisfy the relevant legal, regulatory, or contractual requirements may be necessary if, for example, an entity engages an auditor to perform an audit of its financial statements in accordance with GAAS and the auditor becomes aware that by law, regulation, or contractual agreement the entity also is required to have an audit performed in accordance with one or more of the following:

- a. *Government Auditing Standards*

- b. OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*
- c. Other compliance audit requirements, such as state or local laws or program-specific audits under federal audit guides

Disagreements With Management (Ref: par. .12c)

.A28 Discussions with those charged with governance include any disagreements with management that arose during the audit, regardless of whether they were satisfactorily resolved, about matters that, individually or in the aggregate, could be significant to the entity's financial statements or the auditor's report. Disagreements with management may occasionally arise over, among other things, the application of accounting principles to the entity's specific transactions and events and the basis for management's judgments about accounting estimates. Disagreements may also arise regarding the scope of the audit, disclosures to be included in the entity's financial statements, and the wording of the auditor's report. For purposes of this section, disagreements do not include differences of opinion based on incomplete facts or preliminary information that are later resolved.

Uncorrected Misstatements (Ref: par. .13)

.A29 The auditor is not required to accumulate misstatements that the auditor believes are trivial.⁴ When there are a large number of individually immaterial uncorrected misstatements, the auditor may communicate the number and overall monetary effect of the uncorrected misstatements, rather than the details of each individual uncorrected misstatement.

.A30 The auditor may discuss with those charged with governance the reasons for, and the implications of, a failure to correct misstatements, taking into account the size and nature of the misstatement judged in the surrounding circumstances, and possible implications with regard to future financial statements.

Corrected Misstatements (Ref: par. .14a)

.A31 The auditor also may communicate corrected immaterial misstatements, such as frequently recurring immaterial misstatements that may indicate a particular bias in the preparation of the financial statements.

Significant Findings or Issues Discussed or Subject to Correspondence With Management (Ref: par. .14b)

.A32 Significant findings or issues discussed, or the subject of correspondence, with management may include matters such as

- business conditions affecting the entity and business plans and strategies that may affect the risks of material misstatement.
- discussions or correspondence in connection with the initial or recurring engagement of the auditor including, among other matters, any discussions or correspondence regarding accounting practices or the application of auditing standards.

Written Representations (Ref: par. .14d)

.A33 The auditor may provide those charged with governance with a copy of management's written representations.

⁴ Paragraph .05 of section 450, *Evaluation of Misstatements Identified During the Audit*.

The Communication Process

Establishing the Communication Process (Ref: par. .15)

.A34 Clear communication of the following helps establish the basis for effective two-way communication:

- The auditor's responsibilities (paragraphs .10 and .A12–.A15)
- An overview of the planned scope and timing of the audit (paragraphs .11 and .A16–.A20)
- The expected general content of communications

.A35 Matters that may also contribute to effective two-way communication include discussion of

- the purpose of communications. When the purpose is clear, the auditor and those charged with governance are in a better position to have a mutual understanding of relevant issues and the expected actions arising from the communication process.
- the form in which communications will be made.
- the person(s) on the audit team and among those charged with governance who will communicate regarding particular matters.
- the auditor's expectation that communication will be two-way and that those charged with governance will communicate with the auditor matters they consider relevant to the audit. Such matters might include (a) strategic decisions that may significantly affect the nature, timing, and extent of audit procedures; (b) the suspicion or the detection of fraud; or (c) concerns with the integrity or competence of senior management.
- the process for taking action and reporting back on matters communicated by the auditor.
- the process for taking action and reporting back on matters communicated by those charged with governance.

.A36 The communication process will vary with the circumstances, including the size and governance structure of the entity, how those charged with governance operate, and the auditor's view of the significance of matters to be communicated. Difficulty in establishing effective two-way communication may indicate that the communication between the auditor and those charged with governance is not adequate for the purpose of the audit (see paragraph .A44).

Communication With Management

.A37 Many matters may be discussed with management in the ordinary course of an audit, including matters to be communicated with those charged with governance in accordance with this section. Such discussions recognize management's executive responsibility for the conduct of the entity's operations and, in particular, management's responsibility for the preparation and fair presentation of the financial statements.

.A38 Before communicating matters with those charged with governance, the auditor may discuss them with management unless that is inappropriate. For example, it may not be appropriate to discuss with management questions of management's competence or integrity. In addition to recognizing management's responsibility, these initial discussions may clarify facts and issues and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor

may discuss matters with the internal auditor before communicating with those charged with governance.

Forms of Communication (Ref: par. .16)

.A39 Effective communication may involve formal presentations and written reports as well as less formal communications, including discussions. The auditor may communicate matters other than those identified in paragraph .16 either orally or in writing. Written communications may include an engagement letter that is provided to those charged with governance.

.A40 In addition to the significance of a particular matter, the form of communication (for example, whether to communicate orally or in writing, the extent of detail or summarization in the communication, and whether to communicate in a formal or informal manner) may be affected by factors such as

- whether the matter has been satisfactorily resolved.
- whether management has previously communicated the matter.
- the size, operating structure, control environment, and legal structure of the entity being audited.
- legal or regulatory requirements that may require a written communication with those charged with governance.
- the expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- the amount of ongoing contact and dialogue the auditor has with those charged with governance.
- whether there have been significant changes in the membership of a governing body.
- in the case of an audit of special purpose financial statements, whether the auditor also audits the entity's general purpose financial statements.

.A41 When a significant matter is discussed with an individual member of those charged with governance, such as the chair of an audit committee, it may be appropriate for the auditor to summarize the matter in later communications so that all of those charged with governance have full and balanced information.

Timing of Communications (Ref: par. .18)

.A42 The appropriate timing for communications will vary with the circumstances of the engagement. Considerations include the significance and nature of the matter and the action expected to be taken by those charged with governance. The auditor may consider communicating

- planning matters early in the audit engagement and, for an initial engagement, as part of the terms of the engagement.
- significant difficulties encountered during the audit as soon as practicable if those charged with governance are able to assist the auditor in overcoming the difficulties or if the difficulties are likely to lead to a modified opinion.

.A43 Other factors that may be relevant to the timing of communications include

- the size, operating structure, control environment, and legal structure of the entity being audited.

- any legal obligation to communicate certain matters within a specified timeframe.
- the expectations of those charged with governance, including arrangements made for periodic meetings or communications with the auditor.
- the time at which the auditor identifies certain matters (for example, timely communication of a material weakness to enable appropriate remedial action to be taken).
- whether the auditor is auditing both general purpose and special purpose financial statements.

Adequacy of the Communication Process (Ref: par. .19)

.A44 The auditor need not design specific procedures to support the evaluation of the two-way communication between the auditor and those charged with governance. Rather, that evaluation may be based on observations resulting from audit procedures performed for other purposes. Such observations may include

- the appropriateness and timeliness of actions taken by those charged with governance in response to matters communicated by the auditor. When significant findings or issues raised in previous communications have not been dealt with effectively, it may be appropriate for the auditor to inquire about why appropriate action has not been taken and to consider raising the point again. This avoids the risk of giving an impression that the auditor is satisfied that the matter has been adequately addressed or is no longer significant.
- the apparent openness of those charged with governance in their communications with the auditor.
- the willingness and capacity of those charged with governance to meet with the auditor without management present.
- the apparent ability of those charged with governance to fully comprehend matters raised by the auditor, such as the extent to which those charged with governance probe issues and question recommendations made to them.
- difficulty in establishing with those charged with governance a mutual understanding of the form, timing, and expected general content of communications.
- when all or some of those charged with governance are involved in managing the entity, their apparent awareness of how matters discussed with the auditor affect their broader governance responsibilities as well as their management responsibilities.

.A45 As discussed in paragraph .A1, effective two-way communication assists both the auditor and those charged with governance. Further, section 315 identifies participation by those charged with governance, including their interaction with internal auditors (if any) and external auditors, as an element of the entity's control environment. Inadequate two-way communication may indicate an unsatisfactory control environment, which will influence the auditor's assessment of the risks of material misstatements. There is also a risk that the auditor may not have obtained sufficient appropriate audit evidence to form an opinion on the financial statements.

.A46 If the two-way communication between the auditor and those charged with governance is not adequate and the situation cannot be resolved, the auditor may take actions such as the following:

- Modifying the auditor's opinion on the basis of a scope limitation
- Obtaining legal advice about the consequences of different courses of action
- Communicating with third parties (for example, a regulator) or a higher authority in the governance structure that is outside the entity, such as the owners of a business (for example, shareholders in a general meeting), or the responsible government agency for certain governmental entities
- Withdrawing from the engagement when withdrawal is possible under applicable law or regulation

Documentation (Ref: par. .20)

.A47 Documentation of oral communication may include a copy of minutes prepared by the entity as part of the audit documentation if those minutes are an appropriate record of the communication.

.A48

Appendix—Qualitative Aspects of Accounting Practices

The communication required by paragraph .12a and discussed in paragraphs .A24–.A25 may include such matters as the following:

Accounting Policies

- The appropriateness of the accounting policies to the particular circumstances of the entity, considering the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements (when acceptable alternative accounting policies exist, the communication may include identification of the financial statement items that are affected by the choice of significant policies as well as information on accounting policies used by similar entities)
- The initial selection of, and changes in, significant accounting policies, including the application of new accounting pronouncements (the communication may include the effect of the timing and method of adoption of a change in accounting policy on the current and future earnings of the entity, and the timing of a change in accounting policies with regard to expected new accounting pronouncements)
- The effect of significant accounting policies in controversial or emerging areas (or those unique to an industry, particularly when there is a lack of authoritative material or consensus)
- The effect of the timing of transactions in relation to the period in which they are recorded

Accounting Estimates

- For items for which estimates are significant, issues discussed in section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, including the following examples:
 - Management's identification of accounting estimates
 - Management's process for making accounting estimates
 - Risks of material misstatement
 - Indicators of possible management bias
 - Disclosure of estimation uncertainty in the financial statements

Financial Statement Disclosures

- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures (for example, disclosures related to revenue recognition, going concern, subsequent events, and contingency issues)
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements

Related Matters

- The potential effect on the financial statements of significant risks and exposures and uncertainties, such as pending litigation, that are disclosed in the financial statements
- The extent to which the financial statements are affected by unusual transactions, including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements
- The factors affecting asset and liability carrying values, including the entity's bases for determining useful lives assigned to tangible and intangible assets (the communication may explain how factors affecting carrying values were selected and how alternative selections would have affected the financial statements)
- The selective correction of misstatements (for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings)

.A49

Exhibit—Requirements to Communicate With Those Charged With Governance in Other AU-C Sections

Requirements for the auditor to communicate with those charged with governance are included in other AU-C sections. This section does not change the requirements in

- a. paragraph .17 of section 210, *Terms of Engagement*
- b. paragraphs .21, .38c(i), and .39–.41 of section 240, *Consideration of Fraud in a Financial Statement Audit*
- c. paragraphs .14, .18, and .21–.23 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*
- d. paragraph .11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*
- e. paragraph .27 of section 550, *Related Parties*
- f. paragraphs .10b–c, .12a, .15a, .17a, and .18 of section 560, *Subsequent Events and Subsequently Discovered Facts*
- g. paragraph .19 of section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*
- h. paragraphs .45–.48 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*
- i. paragraphs .12, .14, .20, and .29 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*
- j. paragraph .09 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*
- k. paragraphs .08, .12, .15, and .18 of section 720, *Other Information in Documents Containing Audited Financial Statements*
- l. paragraph .06 of section 730, *Required Supplementary Information*
- m. paragraphs .23–.28 of section 930, *Interim Financial Information*
- n. paragraphs .36–.37 of section 935, *Compliance Audits*

[Revised: September 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

AU-C Section 265

Communicating Internal Control Related Matters Identified in an Audit

Source: SAS No. 122; SAS No. 125.

See section 9265 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to appropriately communicate to those charged with governance and management deficiencies in internal control that the auditor has identified in an audit of financial statements. This section does not impose additional responsibilities on the auditor regarding obtaining an understanding of internal control or designing and performing tests of controls over and above the requirements of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*. Section 260, *The Auditor's Communication With Those Charged With Governance*, establishes further requirements and provides guidance regarding the auditor's responsibility to communicate with those charged with governance regarding the audit.

.02 The auditor is required to obtain an understanding of internal control relevant to the audit when identifying and assessing the risks of material misstatement.¹ In making those risk assessments, the auditor considers internal control in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control. The auditor may identify deficiencies in internal control not only during this risk assessment process but also at any other stage of the audit. This section specifies which identified deficiencies the auditor is required to communicate to those charged with governance and management.

¹ Paragraph .13 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*. Paragraphs .A61–.A67 of section 315 provide guidance on obtaining an understanding of internal control relevant to the audit.

.03 Nothing in this section precludes the auditor from communicating to those charged with governance or management other internal control matters that the auditor has identified during the audit.

.04 This section is not applicable if the auditor is engaged to report on the effectiveness of an entity's internal control over financial reporting under AT section 501, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements*.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.06 The objective of the auditor is to appropriately communicate to those charged with governance and management deficiencies in internal control that the auditor has identified during the audit and that, in the auditor's professional judgment, are of sufficient importance to merit their respective attentions.

Definitions

.07 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Deficiency in internal control. A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing, or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in *operation* exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

Material weakness. A deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

Significant deficiency. A deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

Requirements

Determination of Whether Deficiencies in Internal Control Have Been Identified

.08 The auditor should determine whether, on the basis of the audit work performed, the auditor has identified one or more deficiencies in internal control. (Ref: par. .A1–.A4)

Evaluating Identified Deficiencies in Internal Control (Ref: par. .A5–.A14)

.09 If the auditor has identified one or more deficiencies in internal control, the auditor should evaluate each deficiency to determine, on the basis of the audit work performed, whether, individually or in combination, they constitute significant deficiencies or material weaknesses.

.10 If the auditor determines that a deficiency, or a combination of deficiencies, in internal control is not a material weakness, the auditor should consider whether prudent officials, having knowledge of the same facts and circumstances, would likely reach the same conclusion.

Communication of Deficiencies in Internal Control

.11 The auditor should communicate in writing to those charged with governance on a timely basis significant deficiencies and material weaknesses identified during the audit, including those that were remediated during the audit. (Ref: par. .A15–.A20 and .A28)

.12 The auditor also should communicate to management at an appropriate level of responsibility, on a timely basis (Ref: par. .A21 and .A28)

- a. in writing, significant deficiencies and material weaknesses that the auditor has communicated or intends to communicate to those charged with governance, unless it would be inappropriate to communicate directly to management in the circumstances. (Ref: par. .A16 and .A22–.A23)
- b. in writing or orally, other deficiencies in internal control identified during the audit that have not been communicated to management by other parties and that, in the auditor's professional judgment, are of sufficient importance to merit management's attention. If other deficiencies in internal control are communicated orally, the auditor should document the communication. (Ref: par. .A24–.A27)

.13 The communications referred to in paragraphs .11–.12 should be made no later than 60 days following the report release date. (Ref: par. .A16–.A17)

.14 The auditor should include in the auditor's written communication of significant deficiencies and material weaknesses (Ref: par. .A29–.A33)

- a. the definition of the term *material weakness* and, when relevant, the definition of the term *significant deficiency*.
- b. a description of the significant deficiencies and material weaknesses and an explanation of their potential effects. (Ref: par. .A29)
- c. sufficient information to enable those charged with governance and management to understand the context of the communication. In particular, the auditor should include in the communication the following elements that explain that (Ref: par. .A30–.A31)
 - i. the purpose of the audit was for the auditor to express an opinion on the financial statements.
 - ii. the audit included consideration of internal control over financial reporting in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control.

- iii. the auditor is not expressing an opinion on the effectiveness of internal control.
 - iv. the auditor's consideration of internal control was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies, and therefore, material weaknesses or significant deficiencies may exist that were not identified.
- d. an appropriate alert, in accordance with section 905, *Alert That Restricts the Use of the Auditor's Written Communication*.² (Ref: par. .A32)

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

.15 When the auditor issues a written communication stating that no material weaknesses were identified during the audit, the communication should include the matters in paragraph .14a and c–d. (Ref: par. .A34–.A36)

.16 The auditor should not issue a written communication stating that no significant deficiencies were identified during the audit. (Ref: par. .A34)

Application and Other Explanatory Material

Determination of Whether Deficiencies in Internal Control Have Been Identified (Ref: par. .08)

.A1 In determining whether the auditor has identified one or more deficiencies in internal control, the auditor may discuss the relevant facts and circumstances of the auditor's findings with the appropriate level of management. This discussion provides an opportunity for the auditor to alert management on a timely basis to the existence of deficiencies of which management may not have been previously aware. The level of management with whom it is appropriate to discuss the findings is one that is familiar with the internal control area concerned and that has the authority to take remedial action on any identified deficiencies in internal control. In some circumstances, it may not be appropriate for the auditor to discuss the auditor's findings directly with management (for example, if the findings appear to call management's integrity or competence into question [see paragraph .A22]).

.A2 In discussing the facts and circumstances of the auditor's findings with management, the auditor may obtain other relevant information for further consideration, such as

- management's understanding of the actual or suspected causes of the deficiencies.
- exceptions arising from the deficiencies that management may have noted (for example, misstatements that were not prevented by the relevant IT controls).
- a preliminary indication from management of its response to the findings.

² Paragraphs .06c, .07, and .11 of section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

Considerations Specific to Smaller, Less Complex Entities

.A3 Although the concepts underlying control activities in smaller entities are likely to be similar to those in larger entities, the formality with which controls operate will vary. Further, smaller entities may find that certain types of control activities are not necessary because of controls applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide effective control over important account balances and transactions, lessening or removing the need for more detailed control activities.

.A4 Also, smaller entities often have fewer employees, which may limit the extent to which segregation of duties is practicable. However, in a small owner-managed entity, the owner-manager may be able to exercise more effective oversight than in a larger entity. On the other hand, such increased management oversight also may increase the risk of management override of controls.

Evaluating Identified Deficiencies in Internal Control (Ref: par. .09–.10)

.A5 The severity of a deficiency, or a combination of deficiencies, in internal control depends not only on whether a misstatement has actually occurred but also on

- the magnitude of the potential misstatement resulting from the deficiency or deficiencies and
- whether there is a reasonable possibility that the entity's controls will fail to prevent, or detect and correct, a misstatement of an account balance or disclosure. A reasonable possibility exists when the chance of the future event or events occurring is more than remote.

Significant deficiencies and material weaknesses may exist even though the auditor has not identified misstatements during the audit.

.A6 Factors that affect the magnitude of a misstatement that might result from a deficiency, or deficiencies, in internal control include, but are not limited to, the following:

- The financial statement amounts or total of transactions exposed to the deficiency
- The volume of activity (in the current period or expected in future periods) in the account or class of transactions exposed to the deficiency

.A7 In evaluating the magnitude of the potential misstatement, the maximum amount by which an account balance or total of transactions can be overstated generally is the recorded amount, whereas understatements could be larger.

.A8 Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, in internal control will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following:

- The nature of the financial statement accounts, classes of transactions, disclosures, and assertions involved
- The cause and frequency of the exceptions detected as a result of the deficiency, or deficiencies, in internal control

- The susceptibility of the related asset or liability to loss or fraud
- The subjectivity, complexity, or extent of judgment required to determine the amount involved
- The interaction or relationship of the control(s) with other controls
- The interaction with other deficiencies in internal control
- The possible future consequences of the deficiency, or deficiencies, in internal control
- The importance of the controls to the financial reporting process—for example
 - general monitoring controls (such as oversight of management)
 - controls over the prevention and detection of fraud
 - controls over the selection and application of significant accounting policies
 - controls over significant transactions with related parties
 - controls over significant transactions outside the entity's normal course of business
 - controls over the period-end financial reporting process (such as controls over nonrecurring journal entries)

.A9 The evaluation of whether a deficiency in internal control presents a reasonable possibility of misstatement may be made without quantifying the probability of occurrence as a specific percentage or range. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

.A10 Controls may be designed to operate individually, or in combination, to effectively prevent, or detect and correct, misstatements.³ For example, controls over accounts receivable may consist of both automated and manual controls designed to operate together to prevent, or detect and correct, misstatements in the account balance. A deficiency in internal control on its own may not be sufficiently important to constitute a significant deficiency or a material weakness. However, a combination of deficiencies affecting the same significant account or disclosure, relevant assertion, or component of internal control may increase the risks of misstatement to such an extent to give rise to a significant deficiency or material weakness.

.A11 Indicators of material weaknesses in internal control include

- identification of fraud, whether or not material, on the part of senior management;
- restatement of previously issued financial statements to reflect the correction of a material misstatement due to fraud or error;
- identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control; and
- ineffective oversight of the entity's financial reporting and internal control by those charged with governance.

³ Paragraph .A68 of section 315. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

Considerations Specific to Governmental Entities

.A12 Law or regulation may require the auditor to communicate to those charged with governance or other relevant parties (such as regulators) deficiencies in internal control that the auditor has identified during the audit using specific terms and definitions that differ from those in this section. In such circumstances, the auditor uses such terms and definitions when communicating deficiencies in internal control in accordance with the requirements of the law or regulation and in accordance with this section.

.A13 When law or regulation requires the auditor to communicate deficiencies in internal control that the auditor has identified during the audit using specific terms, but such terms have not been defined, the auditor may use the definitions, requirements, and guidance in this section to comply with the law or regulation.

.A14 The requirements of this section remain applicable, notwithstanding that law or regulation may require the auditor to use specific terms or definitions.

Communication of Deficiencies in Internal Control (Ref: par. .11–.16)

Communication of Significant Deficiencies and Material Weaknesses to Those Charged With Governance (Ref: par. .11)

.A15 Communicating significant deficiencies and material weaknesses in writing to those charged with governance reflects the importance of these matters and assists those charged with governance in fulfilling their oversight responsibilities. Section 260 establishes relevant considerations regarding communication with those charged with governance when all of them are involved in managing the entity.⁴

.A16 Although the auditor is required by paragraph .13 to make the communications referred to in paragraphs .11–.12 no later than 60 days following the report release date, the communication is best made by the report release date because receipt of such communication may be an important factor in enabling those charged with governance to discharge their oversight responsibilities. Nevertheless, because the auditor's written communication of significant deficiencies and material weaknesses forms part of the final audit file, the written communication is subject to the overriding requirement for the auditor to complete the assembly of the final audit file on a timely basis, no later than 60 days following the report release date.⁵

.A17 Early communication to those charged with governance or management may be important for some matters because of their relative significance and the urgency for corrective follow-up action. Regardless of the timing of the written communication of significant deficiencies and material weaknesses, the auditor may communicate these orally in the first instance to management and, when appropriate, those charged with governance to assist them in taking timely remedial action to minimize the risks of material misstatement. However, oral communication does not relieve the auditor of the responsibility to

⁴ Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

⁵ Paragraph .16 of section 230, *Audit Documentation*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

communicate the significant deficiencies and material weaknesses in writing, as this section requires.

.A18 The level of detail at which to communicate significant deficiencies and material weaknesses is a matter of the auditor's professional judgment in the circumstances. Factors that the auditor may consider in determining an appropriate level of detail for the communication include, for example, the following:

- The nature of the entity. For example, the communication required for a governmental entity may be different from that for a non-governmental entity.
- The size and complexity of the entity. For example, the communication required for a complex entity may be different from that for an entity operating a simple business.
- The nature of significant deficiencies and material weaknesses that the auditor has identified.
- The entity's governance composition. For example, more detail may be needed if those charged with governance include members who do not have significant experience in the entity's industry or in the affected areas.
- Legal or regulatory requirements regarding the communication of specific types of deficiencies in internal control.

.A19 Management and those charged with governance may already be aware of significant deficiencies and material weaknesses that the auditor has identified during the audit and may have chosen not to remedy them because of cost or other considerations. The responsibility for evaluating the costs and benefits of implementing remedial action rests with management and those charged with governance. Accordingly, the requirements to communicate significant deficiencies and material weaknesses in paragraphs .11–.12 apply, regardless of cost or other considerations that management and those charged with governance may consider relevant in determining whether to remedy such deficiencies.

.A20 The fact that the auditor communicated a significant deficiency or material weakness to those charged with governance and management in a previous audit does not eliminate the need for the auditor to repeat the communication if remedial action has not yet been taken. If a previously communicated significant deficiency or material weakness remains, the current year's communication may repeat the description from the previous communication or simply reference the previous communication and the date of that communication. The auditor may ask management or, when appropriate, those charged with governance why the significant deficiency or material weakness has not yet been remedied. A failure to act, in the absence of a rational explanation, may in itself represent a significant deficiency or material weakness.

Communication of Deficiencies in Internal Control to Management ***(Ref: par. .12)***

.A21 Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the deficiencies in internal control and to take the necessary remedial action. For significant deficiencies and material weaknesses, the appropriate level is likely to be the CEO or CFO (or equivalent) because these matters also are required to be communicated to those charged with governance. For other deficiencies in internal control, the appropriate level may be operational management with more direct involvement in the control areas affected and with the authority to take appropriate remedial action.

Communication of Significant Deficiencies and Material Weaknesses in Internal Control to Management (Ref: par. .12a)

.A22 Certain identified significant deficiencies or material weaknesses in internal control may call into question the integrity or competence of management. For example, there may be evidence of fraud or intentional noncompliance with laws and regulations by management or management may exhibit an inability to oversee the preparation of adequate financial statements, which may raise doubt about management's competence. Accordingly, it may not be appropriate to communicate such deficiencies directly to management.

.A23 Section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, establishes requirements and provides guidance on the reporting of identified or suspected noncompliance with laws and regulations, including when those charged with governance are themselves involved in such noncompliance.⁶ Section 240, *Consideration of Fraud in a Financial Statement Audit*, establishes requirements and provides guidance regarding communication to those charged with governance when the auditor has identified fraud or suspected fraud involving management.⁷

Communication of Other Deficiencies in Internal Control to Management (Ref: par. .12b)

.A24 During the audit, the auditor may identify other deficiencies in internal control that are not significant deficiencies or material weaknesses but that may be of sufficient importance to merit management's attention. The determination regarding which other deficiencies in internal control merit management's attention is a matter of the auditor's professional judgment in the circumstances, taking into account the likelihood and potential magnitude of misstatements that may arise in the financial statements as a result of those deficiencies.

.A25 The communication of other deficiencies in internal control that merit management's attention need not be in writing. When the auditor has discussed the facts and circumstances of the auditor's findings with management, the auditor may consider an oral communication of the other deficiencies to have been made to management at the time of these discussions. Accordingly, a formal communication need not be made subsequently.

.A26 If the auditor has communicated deficiencies in internal control, other than significant deficiencies or material weaknesses, to management in a prior period and management has chosen not to remedy them for cost or other reasons, the auditor need not repeat the communication in the current period. The auditor also is not required to repeat information about such deficiencies if the information has been previously communicated to management by other parties, such as internal auditors or regulators. However, the auditor may consider it appropriate to recommunicate these other deficiencies if there has been a change of management or if new information has come to the auditor's attention that alters the prior understanding of the auditor and management regarding the deficiencies. Nevertheless, the failure of management to remedy other deficiencies in internal control that were previously communicated may become a significant deficiency requiring communication with those charged with governance. Whether this is the case depends on the auditor's professional judgment in the circumstances.

⁶ Paragraphs .21–.27 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

⁷ Paragraph .40 of section 240, *Consideration of Fraud in a Financial Statement Audit*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

.A27 In some circumstances, those charged with governance may wish to be made aware of the details of other deficiencies in internal control that the auditor has communicated to management or be briefly informed of the nature of the other deficiencies. Alternatively, the auditor may inform those charged with governance when a communication of other deficiencies has been made to management. In either case, the auditor may communicate orally or in writing to those charged with governance, as appropriate.

Considerations Specific to Governmental Entities (Ref: par. .11–.12)

.A28 Auditors performing audits of governmental entities may have additional responsibilities to communicate deficiencies in internal control that the auditor identified during the audit, in a different format, at a level of detail or to parties not envisioned in this section. For example, significant deficiencies and material weaknesses may have to be communicated to a governmental authority, and such communications may be required to be made publicly available. Law or regulation also may require auditors to report deficiencies in internal control, irrespective of their severity. Further, law or regulation may require auditors to report on broader internal control-related matters (for example, controls related to compliance with law, regulation, or provisions of contracts or grant agreements).⁸

Content of Written Communication of Significant Deficiencies and Material Weaknesses in Internal Control (Ref: par. .14–.16)

.A29 In explaining the potential effects of the significant deficiencies and material weaknesses, the auditor need not quantify those effects. The potential effects may be described in terms of the control objectives and types of errors the control was designed to prevent, or detect and correct, or in terms of the risk(s) of misstatement that the control was designed to address. The potential effects may be evident from the description of the significant deficiencies or material weaknesses.

.A30 The significant deficiencies or material weaknesses may be grouped together for reporting purposes when it is appropriate to do so. The auditor also may include in the written communication suggestions for remedial action on the deficiencies, management's actual or proposed responses, and a statement about whether the auditor has undertaken any steps to verify whether management's responses have been implemented (see paragraph .A33).

.A31 The auditor may consider it appropriate to include the following information as additional context for the communication:

- The general inherent limitations of internal control, including the possibility of management override of controls
- The specific nature and extent of the auditor's consideration of internal control during the audit

Restriction on Use (Ref: par. .14d)

.A32 In certain cases not involving *Government Auditing Standards*, law or regulation may require the auditor or management to furnish a copy of the auditor's written communication on significant deficiencies and material weaknesses to governmental authorities. When this is the case, the auditor's written communication may identify such governmental authorities in the paragraph

⁸ See section 935, *Compliance Audits*. [Footnote renumbered by the issuance of SAS No. 125, December 2011.]

containing the alert that restricts the use of the auditor's written communication. Section 905 does not permit the auditor to add parties, other than those identified in paragraph .07b of that section.⁹ [As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

Management's Written Response

.A33 Management may wish to or may be required by a regulator to prepare a written response to the auditor's communication regarding significant deficiencies or material weaknesses identified during the audit. Such management communications may include a description of corrective actions taken by the entity, the entity's plans to implement new controls, or a statement indicating that management believes the cost of correcting a significant deficiency or material weakness would exceed the benefits to be derived from doing so. If such a written response is included in a document containing the auditor's written communication to management and those charged with governance concerning identified significant deficiencies or material weaknesses, the auditor may add a paragraph to the written communication disclaiming an opinion on such information. The following is an example of such a paragraph:

ABC Company's written response to the significant deficiencies [*and material weaknesses*] identified in our audit was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

No Material Weakness Communications (Ref: par. .15–.16)

.A34 Management or those charged with governance may request a written communication indicating that no material weaknesses were identified during the audit. A written communication indicating that no material weaknesses were identified during the audit does not provide any assurance about the effectiveness of an entity's internal control over financial reporting. However, an auditor is not precluded from issuing such a communication, provided that the communication includes the matters required by paragraph .15. However, a written communication indicating that no significant deficiencies were identified during the audit is precluded by paragraph .16 because such a communication has the potential to be misunderstood or misused.

.A35 Exhibit B, "Illustrative No Material Weakness Communication," includes an illustrative communication indicating that no material weaknesses were identified during the audit.

Considerations Specific to Governmental Entities

.A36 A written communication indicating that no material weaknesses were identified during the audit may be required to be furnished to governmental authorities. As described in paragraph .A32, the auditor's written communication may identify the governmental authority as a specified party in the restricted use paragraph. The auditor is not permitted to add other parties as specified parties.

⁹ Paragraph .08 of section 905. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

.A37

Appendix—Examples of Circumstances That May Be Deficiencies, Significant Deficiencies, or Material Weaknesses

Paragraph .A11 identifies indicators of material weaknesses in internal control. The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses.

Deficiencies in the Design of Controls

The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses related to the design of controls:

- Inadequate design of controls over the preparation of the financial statements being audited.
- Inadequate design of controls over a significant account or process.
- Inadequate documentation of the components of internal control.
- Insufficient control consciousness within the organization (for example, the tone at the top and the control environment).
- Evidence of ineffective aspects of the control environment, such as indications that significant transactions in which management is financially interested are not being appropriately scrutinized by those charged with governance.
- Evidence of an ineffective entity risk assessment process, such as management's failure to identify a risk of material misstatement that the auditor would expect the entity's risk assessment process to have identified.
- Evidence of an ineffective response to identified significant risks (for example, absence of controls over such a risk).
- Absent or inadequate segregation of duties within a significant account or process.
- Absent or inadequate controls over the safeguarding of assets (this applies to controls that the auditor determines would be necessary for effective internal control over financial reporting).
- Inadequate design of IT general and application controls that prevents the information system from providing complete and accurate information consistent with financial reporting objectives and current needs.
- Employees or management who lack the qualifications and training to fulfill their assigned functions. For example, in an entity that prepares financial statements in accordance with generally accepted accounting principles (GAAP), the person responsible for the accounting and reporting function lacks the skills and knowledge to apply GAAP in recording the entity's financial transactions or preparing its financial statements.
- Inadequate design of monitoring controls used to assess the design and operating effectiveness of the entity's internal control over time.

- Absence of an internal process to report deficiencies in internal control to management on a timely basis.
- Absence of a risk assessment process within the entity when such a process would ordinarily be expected to have been established.

Failures in the Operation of Controls

The following are examples of circumstances that may be deficiencies, significant deficiencies, or material weaknesses related to the operation of controls:

- Failure in the operation of effectively designed controls over a significant account or process (for example, the failure of a control such as dual authorization for significant disbursements within the purchasing process).
- Failure of the information and communication component of internal control to provide complete and accurate output because of deficiencies in timeliness, completeness, or accuracy (for example, the failure to obtain timely and accurate consolidating information from remote locations that is needed to prepare the financial statements).
- Failure of controls designed to safeguard assets from loss, damage, or misappropriation. This circumstance may need careful consideration before it is evaluated as a significant deficiency or material weakness. For example, assume that a company uses security devices to safeguard its inventory (preventive controls) and also performs timely periodic physical inventory counts (detective control) with regard to its financial reporting. Although the physical inventory count does not safeguard the inventory from theft or loss, it prevents a material misstatement of the financial statements if performed effectively and timely. Therefore, given that the definitions of *material weakness* and *significant deficiency* relate to the likelihood of misstatement of the financial statements, the failure of a preventive control, such as inventory tags, will not result in a significant deficiency or material weakness if the detective control (physical inventory counts) prevents a misstatement of the financial statements. Material weaknesses relating to controls over the safeguarding of assets would only exist if the company does not have effective controls (considering both safeguarding and other controls) to prevent, or detect and correct, a material misstatement of the financial statements.
- Failure to perform reconciliations of significant accounts. For example, accounts receivable subsidiary ledgers are not reconciled to the general ledger account in a timely or accurate manner.
- Undue bias or lack of objectivity by those responsible for accounting decisions (for example, consistent understatement of expenses or overstatement of allowances at the direction of management).
- Misrepresentation by entity personnel to the auditor (an indicator of fraud).
- Management override of controls.
- Failure of an application control caused by a deficiency in the design or operation of an IT general control.
- An observed deviation rate that exceeds the number of deviations expected by the auditor in a test of the operating effectiveness of

a control. For example, if the auditor designs a test in which he or she selects a sample and expects no deviations, the finding of one deviation is a nonnegligible deviation rate because based on the results of the auditor's test of the sample, the desired level of confidence was not obtained.

.A38

Exhibit A—Illustrative Auditor's Written Communication

The following is an illustrative auditor's written communication encompassing the requirements in paragraph .14.

To Management and *[identify the body or individuals charged with governance, such as the entity's Board of Directors]* of ABC Company.

In planning and performing our audit of the financial statements of ABC Company (the "Company") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be *[material weaknesses or material weaknesses or significant deficiencies]* and therefore, *[material weaknesses or material weaknesses or significant deficiencies]* may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control that we consider to be *[material weaknesses or significant deficiencies or material weaknesses and significant deficiencies]*.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. *[We consider the following deficiencies in the Company's internal control to be material weaknesses:]*

[Describe the material weaknesses that were identified and an explanation of their potential effects.]

[A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in the Company's internal control to be significant deficiencies:]

[Describe the significant deficiencies that were identified and an explanation of their potential effects.]

[If the auditor is communicating significant deficiencies and did not identify any material weaknesses, the auditor may state that none of the identified significant deficiencies are considered to be material weaknesses.]

This communication is intended solely for the information and use of management, *[identify the body or individuals charged with governance]*, others within the organization, and *[identify any governmental authorities to which*

the auditor is required to report] and is not intended to be, and should not be, used by anyone other than these specified parties.¹

[*Auditor's signature*]

[*Auditor's city and state*]

[*Date*]

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

¹ When the engagement is also performed in accordance with *Government Auditing Standards*, the alert required by paragraph .14d may read as follows: "The purpose of this communication is solely to describe the scope of our testing of internal control over financial reporting and the results of that testing. This communication is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Company's internal control over financial reporting. Accordingly, this communication is not suitable for any other purpose." The AICPA Audit Guide *Government Auditing Standards and Circular A-133 Audits* provides additional interpretative guidance, including illustrative reports. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

.A39

Exhibit B—Illustrative No Material Weakness Communication

The following is an illustrative auditor's written communication indicating that no material weaknesses were identified during the audit of a not-for-profit organization.

To Management and [identify the body or individuals charged with governance, such as the entity's Board of Directors] of NPO Organization.

In planning and performing our audit of the financial statements of NPO Organization (the "Organization") as of and for the year ended December 31, 20XX, in accordance with auditing standards generally accepted in the United States of America, we considered the Organization's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Organization's internal control. Accordingly, we do not express an opinion on the effectiveness of the Organization's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

[If one or more significant deficiencies have been identified, the auditor may add the following: Our audit was also not designed to identify deficiencies in internal control that might be significant deficiencies. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We communicated the significant deficiencies identified during our audit in a separate communication dated [date].]

This communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the organization, and [identify any governmental authorities to which the auditor is required to report] and is not intended to be, and should not be, used by anyone other than these specified parties.¹

¹ When the engagement is also performed in accordance with *Government Auditing Standards*, the alert required by paragraph .14d may read as follows: "The purpose of this communication is solely to describe the scope of our testing of internal control over financial reporting and the results of that testing. This communication is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Company's internal control over financial reporting. Accordingly, this communication is not suitable for any other purpose." The AICPA Audit Guide *Government Auditing Standards and Circular A-133 Audits* provides additional interpretative guidance, including illustrative reports. [Footnote added, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

[Auditor's signature]

[Auditor's city and state]

[Date]

[As amended, effective for the auditor's written communications related to audits of financial statements for periods ending on or after December 15, 2012, by SAS No. 125.]

AU-C Section 9265

Communicating Internal Control Related Matters Identified in an Audit: Auditing Interpretations of Section 265

1. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Participants in Office of Management and Budget Single Audit Pilot Project

.01 Question—On October 7, 2009, the Office of Management and Budget (OMB) published the parameters of a pilot project, which is a collaborative effort between volunteer nonfederal entities expending American Recovery and Reinvestment Act of 2009 (ARRA) awards (auditees), the auditors performing compliance audits of auditees with ARRA expenditures under OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and the federal government. For auditees that volunteer, the pilot project requires their auditors to issue to management an early written communication of significant deficiencies and material weaknesses in internal control over compliance at an interim date, prior to the completion of the compliance audit. Such communication would be based on internal control work performed on specified compliance requirements for two major programs with ARRA expenditures chosen from a list of approved ARRA pilot project programs. This communication also would be required to be submitted by management to the cognizant agency for audit. May an auditor issue such an interim communication in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*?

.02 Interpretation—Yes. Section 265 permits an auditor to communicate to management identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. Regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with section 265.¹

.03 The following is an illustrative communication that an auditor may use to comply with the pilot project communication requirement to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim date prior to the completion of the compliance audit and are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control over compliance:

This communication is provided pursuant to the parameters of the 2009 Office of Management and Budget (OMB) pilot project. Such project requires auditors

¹ Paragraphs .11–.13 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

of entities that volunteer for the project to issue, in writing, an early communication of significant deficiencies and material weaknesses in internal control over compliance for certain federal programs having expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding at an interim date, prior to the completion of the compliance audit. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs], we are considering [Example Entity's] compliance with [list the applicable types of compliance requirements subject to the communication requirement in the pilot project (for example, activities allowed or unallowed, allowable costs and cost principles, cash management, eligibility, reporting, and special tests and provisions)] as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 2009. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs selected to be tested as a major program from the federal list of approved ARRA pilot project programs] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement² of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control

² Under Section 510(a)(1) of Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, the auditor's determination of whether a deficiency in internal control over compliance is a material weakness or significant deficiency for the purpose of reporting an audit finding is in relation to a type of compliance requirement for a major program or an audit objective identified in the *OMB Circular A-133 Compliance Supplement* (the *Compliance Supplement*). This reference to "type of compliance requirement" refers to the 14 types of compliance requirements (identified as A-N) described in part 3 of the *Compliance Supplement*. For purposes of reporting audit findings, auditors are alerted that certain of the types of compliance requirements may include multiple compliance requirements with multiple audit objectives (for example, compliance requirement "G" covers 3 separate requirements—matching, level of effort, and earmarking; and "N" covers separate requirements specific to each individual special test and provision).

over compliance, such that there is a reasonable possibility that material non-compliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.]³

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.]⁴

[Example Entity's] responses to our findings are described [insert either "in the preceding paragraph" or "in the accompanying schedule"]. We did not audit [Example Entity's] responses and, accordingly, we express no opinion on the responses.⁵

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 1994; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

2. Communication of Significant Deficiencies and Material Weaknesses Prior to the Completion of the Compliance Audit for Auditors That Are Not Participants in Office of Management and Budget Pilot Project

.04 Question—Part 6, "Internal Control," of the *OMB Circular A-133 Compliance Supplement* (the *Compliance Supplement*) stresses the importance of internal control testwork over major programs with ARRA expenditures and encourages early communication to management and those charged with governance of any significant deficiencies or material weaknesses in internal control:

³ The OMB pilot project requires the auditee, upon receipt of the interim communication from the auditor, to provide it to the federal cognizant agency for audit. Federal agencies are required to follow-up with the auditee concerning actions taken or needed to correct the finding. Therefore, to assist the federal agencies with this responsibility, significant deficiency and material weakness finding descriptions should include the level of detail required by both *Government Auditing Standards* and Section 510(b) of OMB Circular A-133. This would require the inclusion of, among other things, the views of responsible officials (see footnote 5).

⁴ See footnote 3.

⁵ The OMB pilot project requires the auditor to obtain management responses to the internal control matters identified and to include them in the interim communication.

Early communication by auditors to management, and those charged with governance, of identified control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control will allow management to expedite corrective action and mitigate the risk of improper expenditure of ARRA awards. Therefore, auditors are encouraged to promptly inform auditee management and those charged with governance during the audit engagement about control deficiencies related to ARRA funding that are, or likely to be, significant deficiencies or material weaknesses in internal control. The auditor should use professional judgment regarding the form of such interim communications.

.05 Although not required, if an auditor decides to make such a communication in writing at an interim date, may the auditor issue the interim communication in accordance with section 265?

.06 *Interpretation*—Yes. As noted in the previous question, section 265 permits an auditor to communicate to management and those charged with governance identified significant deficiencies and material weaknesses before the completion of a financial statement audit. It would be equally appropriate for a compliance audit. The auditor is reminded that, regardless of how the early communication is delivered, the auditor should communicate all significant deficiencies and material weaknesses in writing to management and those charged with governance in accordance with section 265.⁶

.07 If the auditor decides to make the interim communication encouraged in part 6 of the *Compliance Supplement* in writing, the following is an illustrative communication that an auditor may use to inform management and those charged with governance of deficiencies in internal control over compliance related to ARRA funding that have been identified at an interim date prior to the completion of the compliance audit and that are, or likely to be, in the auditor's judgment, significant deficiencies or material weaknesses in internal control:

This communication is provided pursuant to the *Office of Management and Budget (OMB) Circular A-133 Compliance Supplement*, which encourages auditors to communicate, at an interim date, control deficiencies related to federal programs with expenditures of American Recovery and Reinvestment Act of 2009 (ARRA) funding that are, or likely to be, significant deficiencies or material weaknesses in internal control over compliance. Accordingly, this communication is based on our audit procedures performed through [insert "as of date"], an interim period. Because we have not completed our compliance audit, additional significant deficiencies and material weaknesses may be identified and communicated in our final report on compliance and internal control over compliance issued to meet the reporting requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

In planning and performing our audit through [insert "as of date"] of [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program], we are considering [Example Entity's] compliance with the applicable types of compliance requirements as described in the *OMB Circular A-133 Compliance Supplement* for the year ended June 30, 20XX. We are also considering [Example Entity's] internal control over compliance with the requirements previously described that could have a direct and material effect on [identify the federal programs with ARRA expenditures selected by the auditor to be tested as a major program] in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test

⁶ See footnote 1.

and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the [Example Entity's] internal control over compliance.

Our consideration of internal control over compliance is for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined in the following paragraph. However, as discussed subsequently, based on the audit procedures performed through [insert "as of date"], we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and other deficiencies that we consider to be material weaknesses.

A *deficiency in internal control* over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement⁷ of a federal program on a timely basis. A *material weakness* in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the following deficiencies in internal control over compliance to be material weaknesses:

[Describe the material weaknesses that were identified either here or by reference to a separate schedule.]

A *significant deficiency* in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the following deficiencies in internal control over compliance to be significant deficiencies:

[Describe the significant deficiencies that were identified either here or by reference to a separate schedule.]

This interim communication is intended solely for the information and use of management, [identify the body or individuals charged with governance], others within the entity, [identify the legislative or regulatory body], federal awarding agencies, and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

[Issue Date: November 2009; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

3. Appropriateness of Identifying No Significant Deficiencies or No Material Weaknesses in an Interim Communication

.08 Question—In either of the previously described scenarios, may the auditor issue an interim communication in accordance with section 265 stating that as of the interim communication date, no significant deficiencies or material weaknesses have been noted?

⁷ See footnote 2.

.09 Interpretation—No. Section 265 states that the auditor should not issue a written communication stating that no significant deficiencies were identified during the audit.⁸ Such guidance would also apply to the interim communication contemplated in the previous two questions. Therefore, it would not be appropriate for an auditor to issue an interim communication stating that no significant deficiencies were identified.

.10 Although section 265 would permit the auditor to issue a communication at the end of an audit stating that no material weaknesses were identified by the auditor, it would not be appropriate for an auditor to do so at an interim date.⁹ Making such a communication at an interim date could lead to misinterpretation by management and those charged with governance, that there are no identified material weaknesses when, in fact, material weaknesses could be identified before completion of the compliance audit.

[Issue Date: November 2009; Revised: March 2010; Revised: January 2012, effective for audits of financial statements for periods ending on or after December 15, 2012.]

⁸ Paragraph .16 of section 265.

⁹ Paragraph .15 of section 265.

AU-C Section 300

Planning an Audit

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to plan an audit of financial statements. This section is written in the context of recurring audits. Additional considerations in an initial audit engagement are separately identified in this section. Matters related to planning audits of group financial statements are addressed in section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*. (Ref: par. .A1–.A3)

The Role and Timing of Planning

.02 Planning an audit involves establishing the overall audit strategy for the engagement and developing an audit plan. Adequate planning benefits the audit of financial statements in several ways, including the following:

- Helping the auditor identify and devote appropriate attention to important areas of the audit
- Helping the auditor identify and resolve potential problems on a timely basis
- Helping the auditor properly organize and manage the audit engagement so that it is performed in an effective and efficient manner
- Assisting in the selection of engagement team members with appropriate levels of capabilities and competence to respond to anticipated risks and allocating team member responsibilities
- Facilitating the direction and supervision of engagement team members and the review of their work

- Assisting, when applicable, in coordination of work done by auditors of components and specialists

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor is to plan the audit so that it will be performed in an effective manner.

Requirements

Involvement of Key Engagement Team Members

.05 The engagement partner and other key members of the engagement team should be involved in planning the audit, including planning and participating in the discussion among engagement team members. (Ref: par. .A4–.A5)

Preliminary Engagement Activities

.06 The auditor should undertake the following activities at the beginning of the current audit engagement:

- a. Performing procedures required by section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, regarding the continuance of the client relationship and the specific audit engagement
- b. Evaluating compliance with relevant ethical requirements in accordance with section 220
- c. Establishing an understanding of the terms of the engagement as required by section 210, *Terms of Engagement* (Ref: par. .A6–.A8)

Planning Activities

.07 The auditor should establish an overall audit strategy that sets the scope, timing, and direction of the audit and that guides the development of the audit plan.

.08 In establishing the overall audit strategy, the auditor should

- a. identify the characteristics of the engagement that define its scope;
- b. ascertain the reporting objectives of the engagement in order to plan the timing of the audit and the nature of the communications required;
- c. consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;
- d. consider the results of preliminary engagement activities and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the entity is relevant; and

- e. ascertain the nature, timing, and extent of resources necessary to perform the engagement. (Ref: par. .A9–.A13)

.09 The auditor should develop an audit plan that includes a description of the following:

- a. The nature and extent of planned risk assessment procedures, as determined under section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*
- b. The nature, timing, and extent of planned further audit procedures at the relevant assertion level, as determined under section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*
- c. Other planned audit procedures that are required to be carried out so that the engagement complies with generally accepted auditing standards (Ref: par. .A14)

.10 The auditor should update and change the overall audit strategy and audit plan, as necessary, during the course of the audit. (Ref: par. .A15)

.11 The auditor should plan the nature, timing, and extent of direction and supervision of engagement team members and the review of their work. (Ref: par. .A16–.A17)

Determining the Extent of Involvement of Professionals Possessing Specialized Skills

.12 The auditor should consider whether specialized skills are needed in performing the audit. If specialized skills are needed, the auditor should seek the assistance of a professional possessing such skills, who either may be on the auditor's staff or an outside professional.¹ In such circumstances, the auditor should have sufficient knowledge to communicate the objectives of the other professional's work; evaluate whether the specified audit procedures will meet the auditor's objectives; and evaluate the results of the audit procedures applied as they relate to the nature, timing, and extent of further planned audit procedures. Section 620, *Using the Work of an Auditor's Specialist*, addresses the auditor's use of the work of specialists in an audit. (Ref: par. .A18–.A19)

Additional Considerations in Initial Audit Engagements

.13 The auditor should undertake the following activities prior to starting an initial audit:

- a. Performing procedures required by section 220
- b. Communicating with the predecessor auditor when there has been a change of auditors, in accordance with section 210² (Ref: par. .A20)

Documentation

.14 The auditor should include in the audit documentation the following:³

- a. The overall audit strategy

¹ Paragraph .16 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

² Paragraph .11 of section 210, *Terms of Engagement*.

³ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- b. The audit plan
- c. Any significant changes made during the audit engagement to the overall audit strategy or the audit plan and the reasons for such changes (Ref: par. .A21–.A24)

Application and Other Explanatory Material

The Role and Timing of Planning (Ref: par. .01)

.A1 The nature and extent of planning activities will vary according to the size and complexity of the entity, the key engagement team members' previous experience with the entity, and changes in circumstances that occur during the audit engagement.

.A2 Planning is not a discrete phase of an audit but rather a continual and iterative process that often begins shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit engagement. Planning, however, includes consideration of the timing of certain activities and audit procedures that need to be completed prior to the performance of further audit procedures. For example, planning includes the need to consider, prior to the auditor's identification and assessment of the risks of material misstatement, such matters as the following:

- The analytical procedures to be applied as risk assessment procedures
- A general understanding of the legal and regulatory framework applicable to the entity and how the entity is complying with that framework
- The determination of materiality
- The involvement of specialists
- The performance of other risk assessment procedures

.A3 The auditor may decide to discuss elements of planning with the entity's management to facilitate the conduct and management of the audit engagement (for example, to coordinate some of the planned audit procedures with the work of the entity's personnel). Although these discussions often occur, the overall audit strategy and the audit plan remain the auditor's responsibility. When discussing matters included in the overall audit strategy or audit plan, care is required in order not to compromise the effectiveness of the audit. For example, discussing the nature and timing of detailed audit procedures with management may compromise the effectiveness of the audit by making the audit procedures too predictable.

Involvement of Key Engagement Team Members (Ref: par. .05)

.A4 The involvement of the engagement partner and other key members of the engagement team in planning the audit draws on their experience and insight, thereby enhancing the effectiveness and efficiency of the planning process. The engagement partner may delegate portions of the planning and supervision of the audit to other firm personnel.

.A5 Section 315 requires a discussion among the audit team about the susceptibility of the entity's financial statements to material misstatement.⁴

⁴ Paragraph .11 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

This discussion also may include the discussion regarding the risks of material misstatement due to fraud, as required by section 240, *Consideration of Fraud in a Financial Statement Audit*.⁵ The objective of this discussion is for members of the audit team to gain a better understanding of the potential for material misstatements of the financial statements resulting from fraud or error in the specific areas assigned to them and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.

Preliminary Engagement Activities (Ref: par. .06)

.A6 Performing the preliminary engagement activities, which are specified in paragraph .06, at the beginning of the current audit engagement assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability to plan and perform the audit engagement.

.A7 Performing these preliminary engagement activities enables the auditor to plan an audit engagement for which, for example

- the auditor maintains the necessary independence and ability to perform the engagement.
- the auditor has no issues with management integrity that may affect the auditor's willingness to continue the engagement.
- the auditor has no misunderstanding with the entity about the terms of the engagement.

.A8 The auditor's consideration of client continuance and relevant ethical requirements, including independence, occurs throughout the audit engagement as conditions and changes in circumstances occur. Performing initial procedures on both client continuance and evaluation of relevant ethical requirements (including independence) at the beginning of the current audit engagement means that they are completed prior to the performance of other significant activities for the current audit engagement. For continuing audit engagements, such initial procedures often begin shortly after (or in connection with) the completion of the previous audit.

Planning Activities

The Overall Audit Strategy (Ref: par. .07–.08)

.A9 The process of establishing the overall audit strategy assists the auditor to determine, subject to the completion of the auditor's risk assessment procedures, such matters as the following:

- The resources to deploy for specific audit areas, such as the use of appropriately experienced team members for high risk areas or the involvement of specialists on complex matters
- The amount of resources to allocate to specific audit areas, such as the number of team members assigned to observe the inventory count at material locations, the extent of review of component auditors' work in the case of group audits, or the audit budget (in hours) to allocate to high risk areas
- When these resources are to be deployed, such as whether at an interim audit stage or at key cut-off dates

⁵ Paragraph .15 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

- How such resources are managed, directed, and supervised, such as when team briefing and debriefing meetings are expected to be held, how the engagement partner and manager reviews are expected to take place (for example, on site or off site), and whether to complete engagement quality control reviews

.A10 The appendix, "Considerations in Establishing the Overall Audit Strategy," lists examples of considerations in establishing the overall audit strategy.

.A11 Once the overall audit strategy has been established, an audit plan can be developed to address the various matters identified in the overall audit strategy, taking into account the need to achieve the audit objectives through the efficient use of the auditor's resources. The establishment of the overall audit strategy and the detailed audit plan are not necessarily discrete or sequential processes but are closely interrelated because changes in one may result in consequential changes to the other.

Considerations Specific to Smaller, Less Complex Entities

.A12 In audits of smaller entities, the entire audit may be conducted by a very small audit team. Many audits of smaller entities involve the engagement partner (who may be a sole practitioner) working with one engagement team member (or without any engagement team members). With a smaller team, coordination of, and communication between, team members is easier. Establishing the overall audit strategy for the audit of a smaller entity need not be a complex or time consuming exercise; it varies according to the size and complexity of the entity, the complexity of the audit, and the size of the engagement team. For example, a brief memorandum prepared at the completion of the previous audit, based on a review of the working papers and highlighting issues identified in the audit just completed, updated in the current period, based on discussions with the owner-manager, can serve as the documented audit strategy for the current audit engagement if it covers the matters noted in paragraph .07.

Communications With Those Charged With Governance

.A13 Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance an overview of the planned scope and timing of the audit.⁶

The Audit Plan (Ref: par. .09)

.A14 The audit plan is more detailed than the overall audit strategy in that it includes the nature, timing, and extent of audit procedures to be performed by engagement team members. Planning for these audit procedures takes place over the course of the audit as the audit plan for the engagement develops. For example, planning of the auditor's risk assessment procedures occurs early in the audit process. However, planning the nature, timing, and extent of specific further audit procedures depends on the outcome of those risk assessment procedures. In addition, the auditor may begin the execution of further audit procedures for some classes of transactions, account balances, and disclosures before planning all remaining further audit procedures.

Changes to Planning Decisions During the Course of the Audit (Ref: par. .10)

.A15 As a result of unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures, the auditor may need

⁶ Paragraph .11 of section 260, *The Auditor's Communication With Those Charged With Governance*.

to modify the overall audit strategy and audit plan and, thereby, the resulting planned nature, timing, and extent of further audit procedures, based on the revised consideration of assessed risks. This may be the case when information comes to the auditor's attention that differs significantly from the information available when the auditor planned the audit procedures. For example, audit evidence obtained through the performance of substantive procedures may contradict the audit evidence obtained through tests of controls.

Direction, Supervision, and Review (Ref: par. .11)

.A16 The nature, timing, and extent of the direction and supervision of engagement team members and review of their work vary, depending on many factors, including the following:

- The size and complexity of the entity
- The area of the audit
- The assessed risks of material misstatement (for example, an increase in the assessed risk of material misstatement for a given area of the audit ordinarily requires a corresponding increase in the extent and timeliness of direction and supervision of engagement team members and a more detailed review of their work)
- The capabilities and competence of the individual team members performing the audit work

Section 220 contains further guidance on the direction, supervision, and review of audit work.

Considerations Specific to Smaller, Less Complex Entities

.A17 If an audit is carried out entirely by the engagement partner, questions of direction and supervision of engagement team members and review of their work do not arise. In such cases, the engagement partner, having personally conducted all aspects of the work, will be aware of all material issues. Forming an objective view on the appropriateness of the judgments made in the course of the audit can present practical problems when the same individual also performs the entire audit. If particularly complex or unusual issues are involved and the audit is performed by a sole practitioner, it may be desirable to consult with other suitably experienced auditors or the auditor's professional body.

Determining the Extent of Involvement of Professionals Possessing Specialized Skills (Ref: par. .12)

.A18 An auditor may decide to seek the assistance of a professional with specialized skills necessary to complete various aspects of the engagement. These professionals may include valuation experts, appraisers, actuaries, tax specialists, and IT professionals. For example, the use of professionals possessing IT skills to determine the effect of IT on the audit, understand the IT controls, or design and perform tests of IT controls or substantive procedures is a significant aspect of many audit engagements. In determining whether such a professional is needed on the audit team, the auditor may consider such factors as the following:

- The complexity of the entity's systems and IT controls and the manner in which they are used in conducting the entity's business
- The significance of changes made to existing systems or the implementation of new systems

- The extent to which data is shared among systems
- The extent of the entity's participation in electronic commerce
- The entity's use of emerging technologies
- The significance of audit evidence that is available only in electronic form

.A19 Audit procedures that the auditor may assign to a professional possessing IT skills include inquiring of an entity's IT personnel how data and transactions are initiated, authorized, processed, recorded, and reported and how IT controls are designed; inspecting systems documentation; observing the operation of IT controls; and planning and performing tests of IT controls.

Additional Considerations in Initial Audit Engagements (Ref: par. .13)

.A20 The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements. For an initial audit engagement, additional matters the auditor may consider in establishing the overall audit strategy and audit plan include the following:

- Arrangements to be made with the predecessor auditor (for example, to review the predecessor auditor's working papers [see section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*])⁷
- Any major issues (including the application of accounting principles or auditing and reporting standards) discussed with management in connection with the initial selection as auditor, the communication of these matters to those charged with governance, and how these matters affect the overall audit strategy and audit plan
- The audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances (see section 510)⁸
- Other procedures required by the firm's system of quality control for initial audit engagements (for example, the firm's system of quality control may require the involvement of another partner or senior individual to review the overall audit strategy prior to commencing significant audit procedures or to review reports prior to their issuance)

Documentation (Ref: par. .14)

.A21 The documentation of the overall audit strategy is a record of the key decisions considered necessary to properly plan the audit and communicate significant issues to the engagement team. For example, the auditor may summarize the overall audit strategy in the form of a memorandum that contains key decisions regarding the overall scope, timing, and conduct of the audit.

⁷ Paragraphs .07 and .A2–.A11 of section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*.

⁸ Paragraph .08 of section 510.

.A22 The documentation of the audit plan is a record of the planned nature, timing, and extent of risk assessment procedures and further audit procedures at the relevant assertion level in response to the assessed risks. It also serves as a record of the proper planning of the audit procedures that can be reviewed and approved prior to their performance. The auditor may use standard audit programs or audit completion checklists, tailored as needed to reflect the particular engagement circumstances.

.A23 A record of the significant changes to the overall audit strategy and the audit plan and resulting changes to the planned nature, timing, and extent of audit procedures explain why the significant changes were made and why the overall strategy and audit plan were finally adopted for the audit. It also reflects the appropriate response to the significant changes occurring during the audit.

Considerations Specific to Smaller, Less Complex Entities

.A24 As discussed in paragraph .A12, a suitable, brief memorandum may serve as the documented strategy for the audit of a smaller entity. For the audit plan, standard audit programs or checklists (see paragraph .A22) drawn up on the assumption of few relevant control activities, which is likely to be the case in a smaller entity, may be used, provided that they are tailored to the circumstances of the engagement, including the auditor's risk assessments.

.A25

Appendix—Considerations in Establishing the Overall Audit Strategy (Ref: par. .07–.08 and .A9–.A12)

This appendix provides examples of matters the auditor may consider in establishing the overall audit strategy. Many of these matters also will influence the auditor's detailed audit plan. The examples provided cover a broad range of matters applicable to many engagements. Although some of the following matters may be required by other AU-C sections, not all matters are relevant to every audit engagement, and the list is not necessarily complete.

Characteristics of the Engagement

The following are some examples of characteristics of the engagement:

- The financial reporting framework on which the financial information to be audited has been prepared, including any need for reconciliations to another financial reporting framework
- Industry specific reporting requirements, such as reports mandated by industry regulators
- The expected audit coverage, including the number and locations of components to be included
- The nature of the control relationships between a parent and its components that determine how the group is to be consolidated
- The extent to which components are audited by other auditors
- The nature of the business divisions to be audited, including the need for specialized knowledge
- The reporting currency to be used, including any need for currency translation for the audited financial information
- The need for statutory or regulatory audit requirements (for example, the Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*)
- The availability of the work of internal auditors and the extent of the auditor's potential use of such work
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them
- The expected use of audit evidence obtained in previous audits (for example, audit evidence related to risk assessment procedures and tests of controls)
- The effect of IT on the audit procedures, including the availability of data and the expected use of computer assisted audit techniques
- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews
- The availability of client personnel and data

Reporting Objectives, Timing of the Audit, and Nature of Communications

The following examples illustrate reporting objectives, timing of the audit, and nature of communications:

- The entity's timetable for reporting, including interim periods
- The organization of meetings with management and those charged with governance to discuss the nature, timing, and extent of the audit work
- The discussion with management and those charged with governance regarding the expected type and timing of reports to be issued and other communications, both written and oral, including the auditor's report, management letters, and communications to those charged with governance
- The discussion with management regarding the expected communications on the status of audit work throughout the engagement
- Communication with auditors of components regarding the expected types and timing of reports to be issued and other communications in connection with the audit of components
- The expected nature and timing of communications among engagement team members, including the nature and timing of team meetings and timing of the review of work performed
- Whether there are any other expected communications with third parties, including any statutory or contractual reporting responsibilities arising from the audit

Significant Factors, Preliminary Engagement Activities, and Knowledge Gained on Other Engagements

The following examples illustrate significant factors, preliminary engagement activities, and knowledge gained on other engagements:

- The determination of materiality, in accordance with section 320, *Materiality in Planning and Performing an Audit*, and, when applicable, the following:
 - The determination of materiality for components and communication thereof to component auditors in accordance with section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*
 - The preliminary identification of significant components and material classes of transactions, account balances, and disclosures
- Preliminary identification of areas in which there may be a higher risk of material misstatement
- The effect of the assessed risk of material misstatement at the overall financial statement level on direction, supervision, and review
- The manner in which the auditor emphasizes to engagement team members the need to maintain a questioning mind and exercise

Risk Assessment and Response to Assessed Risks

professional skepticism in gathering and evaluating audit evidence

- Results of previous audits that involved evaluating the operating effectiveness of internal control, including the nature of identified deficiencies and action taken to address them
- The discussion of matters that may affect the audit with firm personnel responsible for performing other services to the entity
- Evidence of management's commitment to the design, implementation, and maintenance of sound internal control, including evidence of appropriate documentation of such internal control
- Volume of transactions, which may determine whether it is more efficient for the auditor to rely on internal control
- Importance attached to internal control throughout the entity to the successful operation of the business
- Significant business developments affecting the entity, including changes in IT and business processes; changes in key management; and acquisitions, mergers, and divestments
- Significant industry developments, such as changes in industry regulations and new reporting requirements
- Significant changes in the financial reporting framework, such as changes in accounting standards
- Other significant relevant developments, such as changes in the legal environment affecting the entity

Nature, Timing, and Extent of Resources

The following examples illustrate the nature, timing, and extent of resources:

- The selection of the engagement team (including, when necessary, the engagement quality control reviewer [see section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*]) and the assignment of audit work to the team members, including the assignment of appropriately experienced team members to areas in which there may be higher risks of material misstatement
 - Engagement budgeting, including considering the appropriate amount of time to set aside for areas in which there may be higher risks of material misstatement
-

AU-C Section 315

Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix A of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements through understanding the entity and its environment, including the entity's internal control.

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and relevant assertion levels through understanding the entity and its environment, including the entity's internal control, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement.

Definitions

.04 For purposes of generally accepted auditing standards (GAAS), the following terms have the meanings attributed as follows:

Assertions. Representations by management, explicit or otherwise, that are embodied in the financial statements as used by the auditor to consider the different types of potential misstatements that may occur.

Business risk. A risk resulting from significant conditions, events, circumstances, actions, or inactions that could adversely affect an entity's ability to achieve its objectives and execute its strategies or from the setting of inappropriate objectives and strategies.

Internal control. A process effected by those charged with governance, management, and other personnel that is designed to provide reasonable assurance about the achievement of the entity's objectives with regard to the reliability of financial reporting, effectiveness and efficiency of operations, and compliance with applicable laws and regulations. Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to financial reporting and operations objectives.¹

Relevant assertion. A financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is made without regard to the effect of internal controls. (Ref: par. .A117)

Risk assessment procedures. The audit procedures performed to obtain an understanding of the entity and its environment, including the entity's internal control, to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and relevant assertion levels.

Significant risk. An identified and assessed risk of material misstatement that, in the auditor's professional judgment, requires special audit consideration.

Requirements

Risk Assessment Procedures and Related Activities

.05 The auditor should perform risk assessment procedures to provide a basis for the identification and assessment of risks of material misstatement at the financial statement and relevant assertion levels. Risk assessment procedures by themselves, however, do not provide sufficient appropriate audit evidence on which to base the audit opinion. (Ref: par. .A1–.A5)

.06 The risk assessment procedures should include the following:

- a. Inquiries of management and others within the entity who, in the auditor's professional judgment, may have information that is likely to assist in identifying risks of material misstatement due to fraud or error (Ref: par. .A6)
- b. Analytical procedures (Ref: par. .A7–.A10)
- c. Observation and inspection (Ref: par. .A11)

¹ This section recognizes the definition and description of *internal control* contained in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission.

.07 The auditor should consider whether information obtained from the auditor's client acceptance or continuance process is relevant to identifying risks of material misstatement.

.08 If the engagement partner has performed other engagements for the entity, the engagement partner should consider whether information obtained is relevant to identifying risks of material misstatement.

.09 During planning, the auditor should consider the results of the assessment of the risk of material misstatement due to fraud² along with other information gathered in the process of identifying the risks of material misstatements.

.10 When the auditor intends to use information obtained from the auditor's previous experience with the entity and from audit procedures performed in previous audits, the auditor should determine whether changes have occurred since the previous audit that may affect its relevance to the current audit. (Ref: par. .A12–.A13)

.11 The engagement partner and other key engagement team members should discuss the susceptibility of the entity's financial statements to material misstatement and the application of the applicable financial reporting framework to the entity's facts and circumstances. The engagement partner should determine which matters are to be communicated to engagement team members not involved in the discussion. (Ref: par. .A14–.A16)

Understanding the Entity and Its Environment, Including the Entity's Internal Control

The Entity and Its Environment (Ref: par. .A17)

.12 The auditor should obtain an understanding of the following:

- a. Relevant industry, regulatory, and other external factors, including the applicable financial reporting framework. (Ref: par. .A18–.A22)
- b. The nature of the entity, including
 - i. its operations;
 - ii. its ownership and governance structures;
 - iii. the types of investments that the entity is making and plans to make, including investments in entities formed to accomplish specific objectives; and
 - iv. the way that the entity is structured and how it is financed, to enable the auditor to understand the classes of transactions, account balances, and disclosures to be expected in the financial statements. (Ref: par. .A23–.A27)
- c. The entity's selection and application of accounting policies, including the reasons for changes thereto. The auditor should evaluate whether the entity's accounting policies are appropriate for its business and consistent with the applicable financial reporting framework and accounting policies used in the relevant industry. (Ref: par. .A28)

² See section 240, *Consideration of Fraud in a Financial Statement Audit*.

- d. The entity's objectives and strategies and those related business risks that may result in risks of material misstatement. (Ref: par. .A29–.A35)
- e. The measurement and review of the entity's financial performance. (Ref: par. .A36–.A41)

The Entity's Internal Control

.13 The auditor should obtain an understanding of internal control relevant to the audit. Although most controls relevant to the audit are likely to relate to financial reporting, not all controls that relate to financial reporting are relevant to the audit. It is a matter of the auditor's professional judgment whether a control, individually or in combination with others, is relevant to the audit. (Ref: par. .A42–.A67)

Nature and Extent of the Understanding of Relevant Controls

.14 When obtaining an understanding of controls that are relevant to the audit, the auditor should evaluate the design of those controls and determine whether they have been implemented by performing procedures in addition to inquiry of the entity's personnel. (Ref: par. .A68–.A70)

Components of Internal Control

.15 *Control environment.* The auditor should obtain an understanding of the control environment. As part of obtaining this understanding, the auditor should evaluate whether

- a. management, with the oversight of those charged with governance, has created and maintained a culture of honesty and ethical behavior and
- b. the strengths in the control environment elements collectively provide an appropriate foundation for the other components of internal control and whether those other components are not undermined by deficiencies in the control environment. (Ref: par. .A71–.A80)

.16 *The entity's risk assessment process.* The auditor should obtain an understanding of whether the entity has a process for

- a. identifying business risks relevant to financial reporting objectives,
- b. estimating the significance of the risks,
- c. assessing the likelihood of their occurrence, and
- d. deciding about actions to address those risks. (Ref: par. .A81–.A82)

.17 If the entity has established a risk assessment process (referred to hereafter as the *entity's risk assessment process*), the auditor should obtain an understanding of it and the results thereof. If the auditor identifies risks of material misstatement that management failed to identify, the auditor should evaluate whether an underlying risk existed that the auditor expects would have been identified by the entity's risk assessment process. If such a risk exists, the auditor should obtain an understanding of why that process failed to identify it and evaluate whether the process is appropriate to its circumstances or determine if a significant deficiency or material weakness exists in internal control regarding the entity's risk assessment process.

.18 If the entity has not established such a process or has an ad hoc process, the auditor should discuss with management whether business risks relevant to financial reporting objectives have been identified and how they have been addressed. The auditor should evaluate whether the absence of a documented risk

assessment process is appropriate in the circumstances or determine whether it represents a significant deficiency or material weakness in the entity's internal control. (Ref: par. .A83)

.19 *The information system, including the related business processes relevant to financial reporting and communication.* The auditor should obtain an understanding of the information system, including the related business processes relevant to financial reporting, including the following areas:

- a. The classes of transactions in the entity's operations that are significant to the financial statements.
- b. The procedures within both IT and manual systems by which those transactions are initiated, authorized, recorded, processed, corrected as necessary, transferred to the general ledger, and reported in the financial statements.
- c. The related accounting records supporting information and specific accounts in the financial statements that are used to initiate, authorize, record, process, and report transactions. This includes the correction of incorrect information and how information is transferred to the general ledger. The records may be in either manual or electronic form.
- d. How the information system captures events and conditions, other than transactions, that are significant to the financial statements.
- e. The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures.
- f. Controls surrounding journal entries, including nonstandard journal entries used to record nonrecurring, unusual transactions, or adjustments. (Ref: par. .A84–.A88)

.20 The auditor should obtain an understanding of how the entity communicates financial reporting roles and responsibilities and significant matters relating to financial reporting, including

- a. communications between management and those charged with governance and
- b. external communications, such as those with regulatory authorities. (Ref: par. .A89–.A90)

.21 *Control activities relevant to the audit.* The auditor should obtain an understanding of control activities relevant to the audit, which are those control activities the auditor judges it necessary to understand in order to assess the risks of material misstatement at the assertion level and design further audit procedures responsive to assessed risks. An audit does not require an understanding of all the control activities related to each significant class of transactions, account balance, and disclosure in the financial statements or to every assertion relevant to them. However, the auditor should obtain an understanding of the process of reconciling detailed records to the general ledger for material account balances. (Ref: par. .A91–.A97)

.22 In understanding the entity's control activities, the auditor should obtain an understanding of how the entity has responded to risks arising from IT. (Ref: par. .A98–.A101)

.23 *Monitoring of controls.* The auditor should obtain an understanding of the major activities that the entity uses to monitor internal control over financial reporting, including those related to those control activities relevant

to the audit, and how the entity initiates remedial actions to deficiencies in its controls. (Ref: par. .A102–.A103)

.24 If the entity has an internal audit function, the auditor should obtain an understanding of the following in order to determine whether the internal audit function is likely to be relevant to the audit:

- a. The nature of the internal audit function's responsibilities and how the internal audit function fits in the entity's organizational structure
- b. The activities performed or to be performed by the internal audit function (Ref: par. .A104–.A106)

.25 The auditor should obtain an understanding of the sources of the information used in the entity's monitoring activities and the basis upon which management considers the information to be sufficiently reliable for the purpose. (Ref: par. .A107)

Identifying and Assessing the Risks of Material Misstatement

.26 To provide a basis for designing and performing further audit procedures, the auditor should identify and assess the risks of material misstatement at

- a. the financial statement level and (Ref: par. .A108–.A111)
- b. the relevant assertion level for classes of transactions, account balances, and disclosures. (Ref: par. .A112–.A119)

.27 For this purpose, the auditor should

- a. identify risks throughout the process of obtaining an understanding of the entity and its environment, including relevant controls that relate to the risks, by considering the classes of transactions, account balances, and disclosures in the financial statements; (Ref: par. .A120–.A121)
- b. assess the identified risks and evaluate whether they relate more pervasively to the financial statements as a whole and potentially affect many assertions;
- c. relate the identified risks to what can go wrong at the relevant assertion level, taking account of relevant controls that the auditor intends to test; and (Ref: par. .A122–.A124)
- d. consider the likelihood of misstatement, including the possibility of multiple misstatements, and whether the potential misstatement is of a magnitude that could result in a material misstatement.

Risks That Require Special Audit Consideration

.28 As part of the risk assessment described in paragraph .26, the auditor should determine whether any of the risks identified are, in the auditor's professional judgment, a significant risk. In exercising this judgment, the auditor should exclude the effects of identified controls related to the risk.

.29 In exercising professional judgment about which risks are significant risks, the auditor should consider at least

- a. whether the risk is a risk of fraud;
- b. whether the risk is related to recent significant economic, accounting, or other developments and, therefore, requires specific attention;

- c. the complexity of transactions;
- d. whether the risk involves significant transactions with related parties;
- e. the degree of subjectivity in the measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty; and
- f. whether the risk involves significant transactions that are outside the normal course of business for the entity or that otherwise appear to be unusual. (Ref: par. .A125–.A129)

.30 If the auditor has determined that a significant risk exists, the auditor should obtain an understanding of the entity's controls, including control activities, relevant to that risk and, based on that understanding, evaluate whether such controls have been suitably designed and implemented to mitigate such risks. (Ref: par. .A130–.A132)

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence

.31 In respect of some risks, the auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures. Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions or account balances, the characteristics of which often permit highly automated processing with little or no manual intervention. In such cases, the entity's controls over such risks are relevant to the audit, and the auditor should obtain an understanding of them. (Ref: par. .A133–.A136)

Revision of Risk Assessment

.32 The auditor's assessment of the risks of material misstatement at the assertion level may change during the course of the audit as additional audit evidence is obtained. In circumstances in which the auditor obtains audit evidence from performing further audit procedures or if new information is obtained, either of which is inconsistent with the audit evidence on which the auditor originally based the assessment, the auditor should revise the assessment and modify the further planned audit procedures accordingly. (Ref: par. .A137)

Documentation

- .33** The auditor should include in the audit documentation³ the
- a. discussion among the engagement team required by paragraph .11, the significant decisions reached, how and when the discussion occurred, and the audit team members who participated;
 - b. key elements of the understanding obtained regarding each of the aspects of the entity and its environment specified in paragraph .12 and each of the internal control components specified in paragraphs .15–.25, the sources of information from which the understanding was obtained, and the risk assessment procedures performed;
 - c. identified and assessed risks of material misstatement at the financial statement level and at the relevant assertion level, as required by paragraph .26; and

³ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- d. risks identified and related controls about which the auditor has obtained an understanding as a result of the requirements in paragraphs .28–.31. (Ref: par. .A138–.A141)

Application and Other Explanatory Material

Risk Assessment Procedures and Related Activities (Ref: par. .05)

.A1 Obtaining an understanding of the entity and its environment, including the entity's internal control (referred to hereafter as an *understanding of the entity*), is a continuous, dynamic process of gathering, updating, and analyzing information throughout the audit. The understanding of the entity establishes a frame of reference within which the auditor plans the audit and exercises professional judgment throughout the audit when, for example

- assessing risks of material misstatement of the financial statements;
- determining materiality in accordance with section 320, *Materiality in Planning and Performing an Audit*;
- considering the appropriateness of the selection and application of accounting policies and the adequacy of financial statement disclosures;
- identifying areas for which special audit consideration may be necessary (for example, related party transactions, the appropriateness of management's use of the going concern assumption, considering the business purpose of transactions, or the existence of complex and unusual transactions);
- developing expectations for use when performing analytical procedures;
- responding to the assessed risks of material misstatement, including designing and performing further audit procedures to obtain sufficient appropriate audit evidence; and
- evaluating the sufficiency and appropriateness of audit evidence obtained, such as the appropriateness of assumptions and management's oral and written representations.

.A2 Information obtained by performing risk assessment procedures and related activities may be used by the auditor as audit evidence to support assessments of the risks of material misstatement. In addition, the auditor may obtain audit evidence about classes of transactions, account balances, or disclosures and relevant assertions and about the operating effectiveness of controls, even though such procedures were not specifically planned as substantive procedures or tests of controls. The auditor also may choose to perform substantive procedures or tests of controls concurrently with risk assessment procedures because it is efficient to do so.

.A3 The auditor is required to exercise professional judgment⁴ to determine the extent of the required understanding of the entity. The auditor's primary consideration is whether the understanding of the entity that has been obtained is sufficient to meet the objective stated in this section. The depth

⁴ Paragraph .18 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, requires the auditor to exercise professional judgment in planning and performing an audit.

of the overall understanding that is required by the auditor is less than that possessed by management in managing the entity.

.A4 The risks to be assessed include both those due to fraud and those due to error, and both are covered by this section. However, the significance of fraud is such that further requirements and guidance are included in section 240, *Consideration of Fraud in a Financial Statement Audit*, regarding risk assessment procedures and related activities to obtain information that is used to identify the risks of material misstatement due to fraud.

.A5 Although the auditor is required to perform all the risk assessment procedures described in paragraph .06 in the course of obtaining the required understanding of the entity (see paragraphs .12–.25), the auditor is not required to perform all of them for each aspect of that understanding. Other procedures may be performed when the information to be obtained therefrom may be helpful in identifying risks of material misstatement. Examples of such procedures include the following:

- Reviewing information obtained from external sources, such as trade and economic journals; reports by analysts, banks, or rating agencies; or regulatory or financial publications
- Making inquiries of the entity's external legal counsel or valuation specialists whom the entity has used

Inquiries of Management and Others Within the Entity (Ref: par. .06a)

.A6 Much of the information obtained by the auditor's inquiries is obtained from management and those responsible for financial reporting. However, the auditor also may obtain information or a different perspective in identifying risks of material misstatement through inquiries of others within the entity and other employees with different levels of authority. For example

- inquiries directed toward those charged with governance may help the auditor understand the environment in which the financial statements are prepared.
- inquiries directed toward internal audit personnel may provide information about internal audit procedures performed during the year relating to the design and effectiveness of the entity's internal control and whether management has satisfactorily responded to findings from those procedures.
- inquiries of employees involved in initiating, authorizing, processing, or recording complex or unusual transactions may help the auditor to evaluate the appropriateness of the selection and application of certain accounting policies.
- inquiries directed toward in-house legal counsel may provide information about such matters as litigation, compliance with laws and regulations, knowledge of fraud or suspected fraud affecting the entity, warranties, postsales obligations, arrangements (such as joint ventures) with business partners, and the meaning of contract terms.
- inquiries directed toward marketing or sales personnel may provide information about changes in the entity's marketing strategies, sales trends, or contractual arrangements with its customers.

Analytical Procedures (Ref: par. .06b)

.A7 Analytical procedures performed as risk assessment procedures may identify aspects of the entity of which the auditor was unaware and may assist

in assessing the risks of material misstatement in order to provide a basis for designing and implementing responses to the assessed risks. Analytical procedures performed as risk assessment procedures may include both financial and nonfinancial information (for example, the relationship between sales and square footage of selling space or volume of goods sold).

.A8 Analytical procedures may enhance the auditor's understanding of the client's business and the significant transactions and events that have occurred since the prior audit and also may help to identify the existence of unusual transactions or events and amounts, ratios, and trends that might indicate matters that have audit implications. Unusual or unexpected relationships that are identified may assist the auditor in identifying risks of material misstatement, especially risks of material misstatement due to fraud.

.A9 However, when such analytical procedures use data aggregated at a high level (which may be the situation with analytical procedures performed as risk assessment procedures), the results of those analytical procedures provide only a broad initial indication about whether a material misstatement may exist. Accordingly, in such cases, consideration of other information that has been gathered when identifying the risks of material misstatement together with the results of such analytical procedures may assist the auditor in understanding and evaluating the results of the analytical procedures.

Considerations Specific to Smaller, Less Complex Entities

.A10 Some smaller entities may not have interim or monthly financial information that can be used for purposes of analytical procedures. In these circumstances, although the auditor may be able to perform limited analytical procedures for purposes of planning the audit or obtain some information through inquiry, the auditor may need to plan to perform analytical procedures to identify and assess the risks of material misstatement when an early draft of the entity's financial statements is available.

Observation and Inspection (Ref: par. .06c)

.A11 Observation and inspection may support inquiries of management and others and also may provide information about the entity and its environment. Examples of such audit procedures include observation or inspection of the following:

- The entity's operations
- Documents (such as business plans and strategies), records, and internal control manuals
- Reports prepared by management (such as quarterly management reports and interim financial statements), those charged with governance (such as minutes of board of directors' meetings), and internal audit
- The entity's premises and plant facilities

Information Obtained in Prior Periods (Ref: par. .10)

.A12 The auditor's previous experience with the entity and audit procedures performed in previous audits may provide the auditor with information about such matters as

- past misstatements and whether they were corrected on a timely basis.
- the nature of the entity and its environment and the entity's internal control (including deficiencies in internal control).

- significant changes that the entity or its operations may have undergone since the prior financial period, which may assist the auditor in gaining a sufficient understanding of the entity to identify and assess risks of material misstatement.

.A13 Paragraph .10 requires the auditor to determine whether information obtained in prior periods remains relevant if the auditor intends to use that information for the purposes of the current audit. For example, changes in the control environment may affect the relevance of information obtained in the prior year. To determine whether changes have occurred that may affect the relevance of such information, the auditor may make inquiries and perform other appropriate audit procedures, such as walk-throughs of relevant systems.

Discussion Among the Engagement Team (Ref: par. .11)

.A14 The discussion among the engagement team about the susceptibility of the entity's financial statements to material misstatement

- provides an opportunity for more experienced engagement team members, including the engagement partner, to share their insights based on their knowledge of the entity.
- allows the engagement team members to exchange information about the business risks to which the entity is subject and about how and where the financial statements might be susceptible to material misstatement due to fraud or error.
- assists the engagement team members to gain a better understanding of the potential for material misstatement of the financial statements in the specific areas assigned to them and to understand how the results of the audit procedures that they perform may affect other aspects of the audit, including the decisions about the nature, timing, and extent of further audit procedures.
- provides a basis upon which engagement team members communicate and share new information obtained throughout the audit that may affect the assessment of risks of material misstatement or the audit procedures performed to address these risks.

This discussion may be held concurrently with the discussion among the engagement team that is required by section 240 to discuss the susceptibility of the entity's financial statements to fraud.⁵ Section 240 further addresses the discussion among the engagement team about the risks of fraud.

.A15 It is not always necessary or practical for the discussion to include all members in a single discussion (as in group audits), nor is it necessary for all the members of the engagement team to be informed of all the decisions reached in the discussion. The engagement partner may discuss matters with key members of the engagement team, including, if considered appropriate, those with specific skills or knowledge, and those responsible for the audits of components, while delegating discussion with others, taking account of the extent of communication considered necessary throughout the engagement team. A communications plan, agreed by the engagement partner, may be useful.

Considerations Specific to Smaller, Less Complex Entities

.A16 Many small audits are carried out entirely by the engagement partner (who may be a sole practitioner). In such situations, it is the engagement partner who, having personally conducted the planning of the audit, would be

⁵ Paragraph .15 of section 240.

responsible for considering the susceptibility of the entity's financial statements to material misstatement due to fraud or error.

Understanding the Entity and Its Environment, Including the Entity's Internal Control

.A17 Appendix A, "Understanding the Entity and Its Environment," contains examples of matters that the auditor may consider in obtaining an understanding of the entity and its environment. Appendix B, "Internal Control Components," contains a detailed explanation of the internal control components.

The Entity and Its Environment

Industry, Regulatory, and Other External Factors (Ref: par. .12a)

.A18 *Industry factors.* Relevant industry factors include industry conditions such as the competitive environment, supplier and customer relationships, and technological developments. Examples of matters the auditor may consider include

- the market and competition, including demand, capacity, and price competition.
- cyclical or seasonal activity.
- product technology relating to the entity's products.
- energy supply and cost.

.A19 The industry in which the entity operates may give rise to specific risks of material misstatement arising from the nature of the business or the degree of regulation. For example, long term contracts may involve significant estimates of revenues and expenses that give rise to risks of material misstatement. In such cases, it is important that the engagement team includes members with sufficient, relevant knowledge and experience, as required by section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

.A20 *Regulatory factors.* Relevant regulatory factors include the regulatory environment. The regulatory environment encompasses, among other matters, the applicable financial reporting framework and the legal and political environment. Examples of matters the auditor may consider include the following:

- Accounting principles and industry-specific practices
- Regulatory framework for a regulated industry
- Laws and regulations that significantly affect the entity's operations, including direct supervisory activities
- Taxation (corporate and other)
- Government policies currently affecting the conduct of the entity's business, such as monetary (including foreign exchange controls), fiscal, financial incentives (for example, government aid programs), and tariffs or trade restrictions policies
- Environmental requirements affecting the industry and the entity's business

.A21 Section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, includes some specific requirements related to the legal and regulatory framework applicable to the entity and the industry or sector in which the entity operates.

.A22 *Other external factors.* Examples of other external factors affecting the entity that the auditor may consider include the general economic conditions, interest rates and availability of financing, and inflation or currency revaluation.

Nature of the Entity (Ref: par. .12b)

.A23 An understanding of the nature of an entity enables the auditor to understand such matters as

- whether the entity has a complex structure (for example, with subsidiaries or other components in multiple locations). Complex structures often introduce issues that may give rise to risks of material misstatement. Such issues may include whether goodwill, joint ventures, investments, or investments in entities formed to accomplish specific objectives are accounted for appropriately.
- the ownership and relations between owners and other people or entities. This understanding assists in determining whether related party transactions and balances have been identified and accounted for appropriately. Section 550, *Related Parties*, addresses the auditor's considerations relevant to related parties.

.A24 Examples of matters that the auditor may consider when obtaining an understanding of the nature of the entity include

- business operations such as
 - the nature of revenue sources, products or services, and markets, including involvement in electronic commerce, such as Internet sales and marketing activities.
 - the conduct of operations (for example, stages and methods of production or activities exposed to environmental risks).
 - alliances, joint ventures, and outsourcing activities.
 - geographic dispersion and industry segmentation.
 - the location of production facilities, warehouses, and offices and the location and quantities of inventories.
 - key customers and important suppliers of goods and services.
 - employment arrangements (including the existence of union contracts, pension and other postemployment benefits, stock option or incentive bonus arrangements, and government regulation related to employment matters).
 - research and development activities and expenditures.
 - transactions with related parties.
- investments and investment activities such as
 - planned or recently executed acquisitions or divestitures.
 - investments and dispositions of securities and loans.
 - capital investment activities.
 - investments in nonconsolidated entities, including partnerships, joint ventures, and investments in entities formed to accomplish specific objectives.

- financing and financing activities such as
 - major subsidiaries and associated entities, including consolidated and nonconsolidated structures.
 - debt structure and related terms, including off balance sheet financing arrangements and leasing arrangements.
 - beneficial owners (local and foreign and their business reputation and experience) and related parties.
 - the use of derivative financial instruments.
- financial reporting such as
 - accounting principles and industry-specific practices, including industry-specific significant categories (for example, loans and investments for banks or research and development for pharmaceuticals).
 - revenue recognition practices.
 - accounting for fair values.
 - foreign currency assets, liabilities, and transactions.
 - accounting for unusual or complex transactions, including those in controversial or emerging areas (for example, accounting for stock-based compensation).

.A25 Significant changes in the entity from prior periods may give rise to, or change risks of, material misstatement.

.A26 *Entities formed to accomplish specific purposes.* An entity may form an entity that is intended to accomplish a narrow and well-defined purpose (for example, a variable interest entity), such as to effect a lease or a securitization of financial assets or to carry out research and development activities. It may take the form of a corporation, trust, partnership, or unincorporated entity. The entity on behalf of which an entity has been created may often transfer assets to the latter (for example, as part of a derecognition transaction involving financial assets), obtain the right to use the latter's assets, or perform services for the latter, and other parties may provide the funding to the latter.

.A27 Financial reporting frameworks often specify detailed conditions that are deemed to amount to control or circumstances under which an entity should be considered for consolidation. The financial reporting frameworks also may specify different bases for recognition of income related to transactions with these entities. The interpretation of the requirements of such frameworks often involves a detailed knowledge of the relevant agreements involving an entity formed for a specific purpose.

The Entity's Selection and Application of Accounting Policies (Ref: par. .12c)

.A28 An understanding of the entity's selection and application of accounting policies may encompass such matters as

- the methods the entity uses to account for significant and unusual transactions.
- the effect of significant accounting policies in controversial or emerging areas for which a lack of authoritative guidance or consensus exists.
- significant changes in the entity's accounting policies and disclosures and the reasons for such changes.
- financial reporting standards, and laws and regulations that are new to the entity and when and how the entity will adopt such requirements.

- the financial reporting competencies of personnel involved in selecting and applying significant new or complex accounting standards.

Objectives and Strategies and Related Business Risks (Ref: par. .12d)

.A29 The entity conducts its business in the context of industry, regulatory, and other internal and external factors. To respond to these factors, the entity's management or those charged with governance define objectives, which are the overall plans for the entity. Strategies are the approaches by which management intends to achieve its objectives. The entity's objectives and strategies may change over time.

.A30 Business risk is broader than the risk of material misstatement of the financial statements, though it includes the latter. Business risk may arise from change or complexity. A failure to recognize the need for change also may give rise to business risk. Business risk may arise, for example, from

- the development of new products or services that may fail;
- a market that, even if successfully developed, is inadequate to support a product or service; or
- flaws in a product or service that may result in liabilities and reputational risk.

.A31 An understanding of the business risks facing the entity increases the likelihood of identifying risks of material misstatement. This is because most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. However, the auditor does not have a responsibility to identify or assess all business risks because not all business risks give rise to risks of material misstatement.

.A32 Examples of matters that the auditor may consider when obtaining an understanding of the entity's objectives, strategies, and related business risks that may result in a risk of material misstatement of the financial statements include

- industry developments (a potential related business risk might be, for example, that the entity does not have the personnel or expertise to deal with the changes in the industry).
- new products and services (a potential related business risk might be, for example, product liability is increased).
- expansion of the business (a potential related business risk might be, for example, that the demand has not been accurately estimated).
- new accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation or a cost increase).
- regulatory requirements (a potential related business risk might be, for example, that legal exposure is increased).
- current and prospective financing requirements (a potential related business risk might be, for example, financing is lost due to the entity's inability to meet requirements).
- use of IT (a potential related business risk might be, for example, systems and processes are incompatible).

- the effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation).

.A33 A business risk may have an immediate consequence for the risk of material misstatement for classes of transactions, account balances, and disclosures at the assertion level or the financial statement level. For example, the business risk arising from a contracting customer base may increase the risk of material misstatement associated with the valuation of receivables. However, the same risk, particularly in combination with a contracting economy, also may have a longer term consequence, which may lead the auditor to consider whether those conditions, in the aggregate, indicate that substantial doubt could exist about the entity's ability to continue as a going concern.⁶ Whether a business risk may result in a risk of material misstatement is, therefore, considered in light of the entity's circumstances. Examples of conditions and events that may indicate risks of material misstatement are provided in appendix C, "Conditions and Events That May Indicate Risks of Material Misstatement."

.A34 Usually, management identifies business risks and develops approaches to address them. Such a risk assessment process is part of internal control and is discussed in paragraphs .16 and .A81–.A83.

.A35 *Considerations specific to governmental entities.* For the audits of governmental entities, management objectives may be influenced by concerns regarding public accountability and may include objectives that have their source in law or regulation.

Measurement and Review of the Entity's Financial Performance (Ref: par. .12e)

.A36 Management and others will measure and review those things they regard as important. Performance measures, whether external or internal, create pressures on the entity. These pressures, in turn, may motivate management or others to take action to improve the business performance or to misstate the financial statements. Accordingly, an understanding of the entity's performance measures assists the auditor in considering whether pressures to achieve performance targets may result in management actions that increase the risks of material misstatement, including those due to fraud. Section 240 addresses the risks of fraud.

.A37 The measurement and review of financial performance are not the same as the monitoring of controls (discussed as a component of internal control in paragraphs .23–.25 and .A102–.A107), though their purposes may overlap as follows:

- The measurement and review of performance is directed at whether business performance is meeting the objectives set by management (or third parties).
- Monitoring of controls is specifically concerned with the effective operation of internal control.

In some cases, however, performance indicators also provide information that enables management to identify deficiencies in internal control.

.A38 Examples of internally generated information used by management for measuring and reviewing financial performance, and which the auditor may consider, include

⁶ See section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*. [Footnote revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

- key performance indicators (financial and nonfinancial) and key ratios, trends, and operating statistics.
- period-on-period financial performance analyses.
- budgets; forecasts; variance analyses; segment information; and divisional, departmental, or other-level performance reports.
- employee performance measures and incentive compensation policies.
- comparisons of an entity's performance with that of competitors.

.A39 External parties also may measure and review the entity's financial performance. For example, external information, such as analysts' reports and credit rating agency reports, may represent useful information for the auditor. Such reports often can be obtained from the entity being audited.

.A40 Internal measures may highlight unexpected results or trends requiring management to determine their cause and take corrective action (including, in some cases, the detection and correction of misstatements on a timely basis). Performance measures also may indicate to the auditor that risks of misstatement of related financial statement information do exist. For example, performance measures may indicate that the entity has unusually rapid growth or profitability when compared with that of other entities in the same industry. Such information, particularly if combined with other factors, such as performance-based bonus or incentive remuneration, may indicate the potential risk of management bias in the preparation of the financial statements.

.A41 Considerations specific to smaller, less complex entities. Smaller entities often do not have processes to measure and review financial performance. Inquiry of management may reveal that management relies on certain key indicators for evaluating financial performance and taking appropriate action. If such inquiry indicates an absence of performance measurement or review, an increased risk of misstatements not being detected and corrected may exist.

The Entity's Internal Control

.A42 An understanding of internal control assists the auditor in identifying types of potential misstatements and factors that affect the risks of material misstatement and in designing the nature, timing, and extent of further audit procedures.

.A43 The following application material on internal control is presented in four sections:

- "General Nature and Characteristics of Internal Control"
- "Controls Relevant to the Audit"
- "Nature and Extent of the Understanding of Relevant Controls"
- "Components of Internal Control—Control Environment"

General Nature and Characteristics of Internal Control (Ref: par. .13)

.A44 *Purpose of internal control.* Internal control is designed, implemented, and maintained to address identified business risks that threaten the achievement of any of the entity's objectives that concern

- the reliability of the entity's financial reporting,
- the effectiveness and efficiency of its operations, and
- its compliance with applicable laws and regulations.

The way in which internal control is designed, implemented, and maintained varies with an entity's size and complexity.

A45 *Considerations specific to smaller, less complex entities.* Smaller entities may use less structured means and simpler processes and procedures to achieve their objectives. For example, smaller entities with active management involvement in the financial reporting process may not have extensive descriptions of accounting procedures or detailed written policies. For some entities, in particular very small entities, the owner-manager (the proprietor of an entity who is involved in running the entity on a day-to-day basis) may perform functions that in a larger entity would be regarded as belonging to several of the components of internal control. Therefore, the components of internal control may not be clearly distinguished within smaller entities, but their underlying purposes are equally valid.

A46 *Limitations of internal control.* Internal control, no matter how effective, can provide an entity with only reasonable assurance about achieving the entity's financial reporting objectives. The likelihood of their achievement is affected by the inherent limitations of internal control. These include the realities that human judgment in decision making can be faulty and that breakdowns in internal control can occur because of human error. For example, an error in the design of, or in the change to, a control may exist. Equally, the operation of a control may not be effective, such as when information produced for the purposes of internal control (for example, an exception report) is not effectively used because the individual responsible for reviewing the information does not understand its purpose or fails to take appropriate action.

A47 Additionally, controls can be circumvented by the collusion of two or more people or inappropriate management override of internal control. For example, management may enter into undisclosed agreements with customers that alter the terms and conditions of the entity's standard sales contracts, which may result in improper revenue recognition. Also, edit checks in a software program that are designed to identify and report transactions that exceed specified credit limits may be overridden or disabled.

A48 Further, in designing and implementing controls, management may make judgments on the nature and extent of the controls it chooses to implement and the nature and extent of the risks it chooses to assume.

A49 *Considerations specific to smaller, less complex entities.* Smaller entities often have fewer employees, which may limit the extent to which segregation of duties is practicable. However, in a small owner-managed entity, the owner-manager may be able to exercise more effective oversight than in a larger entity. This oversight may compensate for the generally more limited opportunities for segregation of duties.

A50 *Division of internal control into components.* The division of internal control into the following five components, for purposes of GAAS, provides a useful framework for auditors when considering how different aspects of an entity's internal control may affect the audit:

- a. The control environment
- b. The entity's risk assessment process
- c. The information system, including the related business processes relevant to financial reporting and communication
- d. Control activities
- e. Monitoring of controls

A51 The division does not necessarily reflect how an entity designs, implements, and maintains internal control or how it may classify any particular

component. Auditors may use different terminology or frameworks to describe the various aspects of internal control and their effect on the audit other than those used in this section, provided that all the components described in this section are addressed.

.A52 Application material relating to the five components of internal control as they relate to a financial statement audit is set out in paragraphs .A71–.A107.

.A53 *Characteristics of manual and automated elements of internal control relevant to the auditor's risk assessment.* An entity's system of internal control contains manual elements and often contains automated elements. The characteristics of manual or automated elements are relevant to the auditor's risk assessment and further audit procedures based thereon.

.A54 An entity's use of IT may affect any of the five components of internal control relevant to the achievement of the entity's financial reporting, operations, or compliance objectives and its operating units or business functions. For example, an entity may use IT as part of discrete systems that support only particular business units, functions, or activities, such as a unique accounts receivable system for a particular business unit or a system that controls the operation of factory equipment. Alternatively, an entity may have complex, highly integrated systems that share data and that are used to support all aspects of the entity's financial reporting, operations, and compliance objectives.

.A55 The following use of manual or automated elements in internal control also affects the manner in which transactions are initiated, authorized, recorded, processed, and reported:

- Controls in a manual system may include such procedures as approvals and reviews of transactions and reconciliations and follow-up of reconciling items. Alternatively, an entity may use automated procedures to initiate, authorize, record, process, and report transactions, in which case records in electronic format replace paper documents.
- Controls in IT systems consist of a combination of automated controls (for example, controls embedded in computer programs) and manual controls. Further, manual controls may be independent of IT or may use information produced by IT. They also may be limited to monitoring the effective functioning of IT and automated controls and to handling exceptions. When IT is used to initiate, authorize, record, process, or report transactions or other financial data for inclusion in financial statements, the systems and programs may include controls related to the corresponding assertions for material accounts or may be critical to the effective functioning of manual controls that depend on IT.

An entity's mix of manual and automated elements in internal control varies with the nature and complexity of the entity's use of IT.

.A56 Generally, IT benefits an entity's internal control by enabling an entity to

- consistently apply predefined business rules and perform complex calculations in processing large volumes of transactions or data;
- enhance the timeliness, availability, and accuracy of information;
- facilitate the additional analysis of information;

- enhance the ability to monitor the performance of the entity's activities and its policies and procedures;
- reduce the risk that controls will be circumvented; and
- enhance the ability to achieve effective segregation of duties by implementing security controls in applications, databases, and operating systems.

.A57 IT also poses specific risks to an entity's internal control, including, for example

- reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both.
- unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions. Particular risks may arise when multiple users access a common database.
- the possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties, thereby breaking down segregation of duties.
- unauthorized changes to data in master files.
- unauthorized changes to systems or programs.
- failure to make necessary changes to systems or programs.
- inappropriate manual intervention.
- potential loss of data or inability to access data as required.

.A58 Manual elements in internal control may be more suitable when judgment and discretion are required, such as for the following circumstances:

- Large, unusual, or nonrecurring transactions
- Circumstances in which errors are difficult to define, anticipate, or predict
- Changing circumstances that require a control response outside the scope of an existing automated control
- Monitoring of the effectiveness of automated controls

.A59 Manual elements in internal control may be less reliable than automated elements because they can be more easily bypassed, ignored, or overridden, and they also are more prone to simple errors and mistakes. Consistency of application of a manual control element cannot, therefore, be assumed. Manual control elements may be less suitable for the following circumstances:

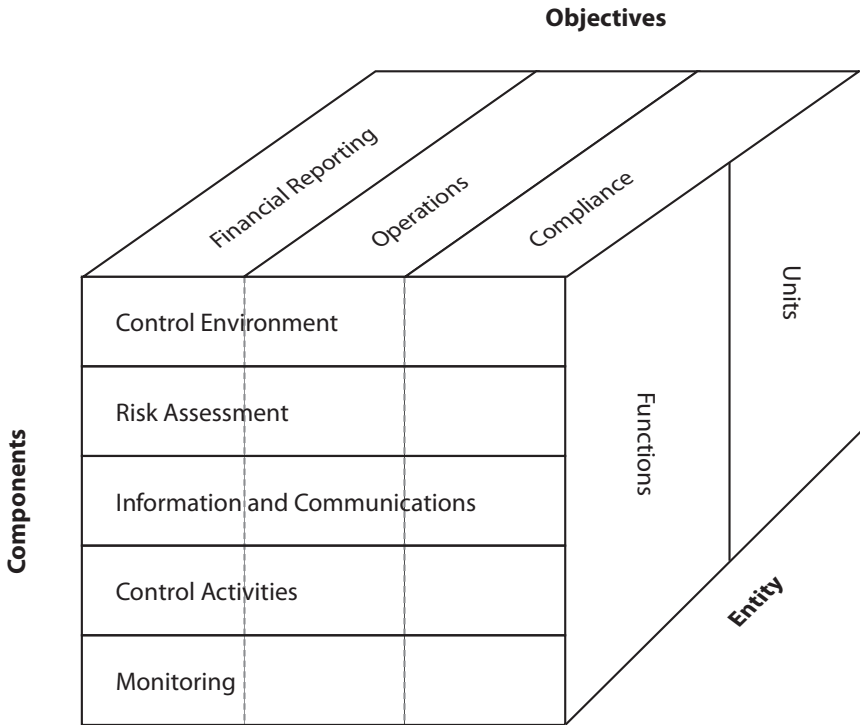

- High volume or recurring transactions or in situations in which errors that can be anticipated or predicted can be prevented, or detected and corrected, by control parameters that are automated
- Control activities in which the specific ways to perform the control can be adequately designed and automated

.A60 The extent and nature of the risks to internal control vary depending on the nature and characteristics of the entity's information system. For example, multiple users, either external or internal, may access a common database of information that affects financial reporting. In such circumstances, a lack of control at a single user entry point might compromise the security of the entire database, potentially resulting in improper changes to, or destruction of, data. When IT personnel or users are given, or can gain, access privileges beyond those necessary to perform their assigned duties, a breakdown in segregation

of duties can occur. This could result in unauthorized transactions or changes to programs or data that affect the financial statements. The entity responds to the risks arising from the use of IT or the use of manual elements in internal control by establishing effective controls in light of the characteristics of the entity's information system.

Controls Relevant to the Audit

.A61 A direct relationship exists between an entity's objectives and the controls it implements to provide reasonable assurance about their achievement. The entity's objectives and, therefore, controls relate to financial reporting, operations, and compliance; however, not all of these objectives and controls are relevant to the auditor's risk assessment. This relationship is depicted as follows:

Although internal control applies to the entire entity or any of its operating units or business functions, an understanding of internal control relating to each of the entity's operating units and business functions may not be necessary to the performance of the audit.

.A62 Factors relevant to the auditor's professional judgment about whether a control, individually or in combination with others, is relevant to the audit may include such matters as the following:

- Materiality
- The significance of the related risk
- The size of the entity

- The nature of the entity's business, including its organization and ownership characteristics
- The diversity and complexity of the entity's operations
- Applicable legal and regulatory requirements
- The circumstances and the applicable component of internal control
- The nature and complexity of the systems that are part of the entity's internal control, including the use of service organizations
- Whether and how a specific control, individually or in combination with other controls, prevents, or detects and corrects, material misstatements

.A63 Controls over the completeness and accuracy of information produced by the entity may be relevant to the audit if the auditor intends to make use of the information in designing and performing further audit procedures.

.A64 Controls relating to operations and compliance objectives also may be relevant to an audit if they relate to data the auditor evaluates or uses in applying audit procedures. For example, controls pertaining to nonfinancial data that the auditor may use in analytical procedures, such as production statistics, or controls pertaining to detecting noncompliance with laws and regulations that may have a direct effect on the determination of material amounts and disclosures in the financial statements,⁷ such as controls over compliance with income tax laws and regulations used to determine the income tax provision, may be relevant to an audit.

.A65 Internal control over safeguarding of assets against unauthorized acquisition, use, or disposition may include controls relating to both financial reporting and operations objectives. The auditor's consideration of such controls is generally limited to those relevant to the reliability of financial reporting. For example, use of access controls, such as passwords, that limit access to the data and programs that process cash disbursements may be relevant to a financial statement audit. Conversely, safeguarding controls relating to operations objectives, such as controls to prevent the excessive use of materials in production, generally are not relevant to a financial statement audit.

.A66 An entity generally has controls relating to objectives that are not relevant to an audit and, therefore, need not be considered. For example, an entity may rely on a sophisticated system of automated controls to provide efficient and effective operations (such as an airline's system of automated controls to maintain flight schedules), but these controls ordinarily would not be relevant to the audit.

.A67 *Considerations specific to governmental entities.* Governmental entity auditors often have additional responsibilities with respect to internal control (for example, to report on internal control over financial reporting and on internal control over compliance with law, regulation, and provisions of contracts or grant agreements, violations of which could have a direct effect on the determination of material amounts and disclosures in the financial statements). Governmental entity auditors also may have responsibilities to report on the compliance with law or regulation. As a result, their review of internal control may be broader and more detailed.

⁷ See section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

Nature and Extent of the Understanding of Relevant Controls (Ref: par. .14)

.A68 Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements. Implementation of a control means that the control exists and that the entity is using it. Assessing the implementation of a control that is not effectively designed is of little use, and so the design of a control is considered first. An improperly designed control may represent a significant deficiency or material weakness in the entity's internal control.

.A69 Risk assessment procedures to obtain audit evidence about the design and implementation of relevant controls may include

- inquiring of entity personnel.
- observing the application of specific controls.
- inspecting documents and reports.
- tracing transactions through the information system relevant to financial reporting.

Inquiry alone, however, is not sufficient for such purposes.

.A70 Obtaining an understanding of an entity's controls is not sufficient to test their operating effectiveness, unless some automation provides for the consistent operation of the controls. For example, obtaining audit evidence about the implementation of a manual control at a point in time does not provide audit evidence about the operating effectiveness of the control at other times during the period under audit. However, because of the inherent consistency of IT processing (see paragraph .A56), performing audit procedures to determine whether an automated control has been implemented may serve as a test of that control's operating effectiveness, depending on the auditor's assessment and testing of controls, such as those over program changes. Tests of the operating effectiveness of controls are further described in section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.⁸

Components of Internal Control—Control Environment (Ref: par. .15)

.A71 The control environment includes the governance and management functions and the attitudes, awareness, and actions of those charged with governance and management concerning the entity's internal control and its importance in the entity. The control environment sets the tone of an organization, influencing the control consciousness of its people. It is the foundation for all other components of internal control, providing discipline and structure.

.A72 Elements of the control environment that may be relevant when obtaining an understanding of the control environment include the following:

- a. *Communication and enforcement of integrity and ethical values.* Essential elements that influence the effectiveness of the design, administration, and monitoring of controls.
- b. *Commitment to competence.* Matters such as management's consideration of the competence levels for particular jobs and how those levels translate into requisite skills and knowledge.
- c. *Participation by those charged with governance.* Attributes of those charged with governance, such as

⁸ Paragraphs .08–.17 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

- i. their independence from management.
 - ii. their experience and stature.
 - iii. the extent of their involvement and the information they receive and the scrutiny of activities.
 - iv. the appropriateness of their actions, including the degree to which difficult questions are raised and pursued with management.
 - v. their interaction with internal and external auditors.
- d. *Management's philosophy and operating style.* Characteristics such as management's
- i. approach to taking and managing business risks.
 - ii. attitudes and actions toward financial reporting.
 - iii. attitudes toward information processing and accounting functions and personnel.
- e. *Organizational structure.* The framework within which an entity's activities for achieving its objectives are planned, executed, controlled, and reviewed.
- f. *Assignment of authority and responsibility.* Matters such as how authority and responsibility for operating activities are assigned and how reporting relationships and authorization hierarchies are established.
- g. *Human resource policies and practices.* Policies and practices that relate to, for example, recruitment, orientation, training, evaluation, counseling, promotion, compensation, and remedial actions.

.A73 *Audit evidence for elements of the control environment.* Relevant audit evidence may be obtained through a combination of inquiries and other risk assessment procedures, such as corroborating inquiries through observation or inspection of documents. For example, through inquiries of management and employees, the auditor may obtain an understanding of how management communicates to employees management's views on business practices and ethical behavior. The auditor may then determine whether relevant controls have been implemented by considering, for example, whether management has a written code of conduct and whether it acts in a manner that supports the code.

.A74 *Effect of the control environment on the assessment of the risks of material misstatement.* Some elements of an entity's control environment have a pervasive effect on assessing the risks of material misstatement. For example, an entity's control consciousness is influenced significantly by those charged with governance because one of their roles is to counterbalance pressures on management regarding financial reporting that may arise from market demands or remuneration schemes. The effectiveness of the design of the control environment with regard to participation by those charged with governance is therefore influenced by such matters as

- their independence from management and their ability to evaluate the actions of management.
- whether they understand the entity's business transactions.
- the extent to which they evaluate whether the financial statements are prepared in accordance with the applicable financial reporting framework.

.A75 An active and independent board of directors may influence the philosophy and operating style of senior management. However, other elements may be more limited in their effect. For example, although human resource policies and practices directed toward hiring competent financial, accounting, and IT personnel may reduce the risk of errors in processing financial information, they may not mitigate a strong bias by top management to overstate earnings.

.A76 The existence of a satisfactory control environment can be a positive factor when the auditor assesses the risks of material misstatement. However, although it may help reduce the risk of fraud, a satisfactory control environment is not an absolute deterrent to fraud. Conversely, deficiencies in the control environment may undermine the effectiveness of controls, particularly with regard to fraud. For example, management's failure to commit sufficient resources to address IT security risks may adversely affect internal control by allowing improper changes to be made to computer programs or data or unauthorized transactions to be processed. As explained in section 330, the control environment also influences the nature, timing, and extent of the auditor's further procedures.⁹

.A77 The control environment in itself does not prevent, or detect and correct, a material misstatement. It may, however, influence the auditor's evaluation of the effectiveness of other controls (for example, the monitoring of controls and the operation of specific control activities) and, thereby, the auditor's assessment of the risks of material misstatement.

.A78 *Considerations specific to smaller, less complex entities.* The control environment within smaller entities is likely to differ from larger entities. For example, those charged with governance in smaller entities may not include an independent or outside member, and the role of governance may be undertaken directly by the owner-manager when no other owners exist. The nature of the control environment also may influence the significance of other controls or their absence. For example, the active involvement of an owner-manager may mitigate certain risks arising from a lack of segregation of duties in a small entity; however, it may increase other risks (for example, the risk of override of controls).

.A79 In addition, audit evidence for elements of the control environment in smaller entities may not be available in documentary form, in particular when communication between management and other personnel may be informal, yet effective. For example, smaller entities might not have a written code of conduct but, instead, develop a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example.

.A80 Consequently, the attitudes, awareness, and actions of management or the owner-manager are of particular importance to the auditor's understanding of a smaller entity's control environment.

Components of Internal Control—The Entity's Risk Assessment Process (Ref: par. .16)

.A81 An entity's risk assessment process for financial reporting purposes is its identification, analysis, and management of risks relevant to the preparation and fair presentation of financial statements. If that process is appropriate to the circumstances, including the nature, size, and complexity of the entity, it assists the auditor in identifying risks of material misstatement. For example,

⁹ Paragraph .A2 of section 330.

risk assessment may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements. Risks relevant to reliable financial reporting also relate to specific events or transactions. Whether the entity's risk assessment process is appropriate to the circumstances is a matter of professional judgment.

.A82 Risks relevant to financial reporting include external and internal events and circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Risks can arise or change due to circumstances such as the following:

- Changes in operating environment
- New personnel
- New or revamped information systems
- Rapid growth
- New technology
- New business models, products, or activities
- Corporate restructurings
- Expanded foreign operations
- New accounting pronouncements
- Changes in economic conditions

.A83 *Considerations specific to smaller, less complex entities (Ref: par. 18).* A smaller entity is unlikely to have an established risk assessment process in place. In such cases, it is likely that management will identify risks through direct personal involvement in the business. Irrespective of the circumstances, however, inquiry about identified risks and how they are addressed by management is still necessary.

Components of Internal Control—The Information System, Including the Related Business Processes Relevant to Financial Reporting and Communication

.A84 *The information system, including related business processes relevant to financial reporting (Ref: par. 19).* The information system relevant to financial reporting objectives, which includes the accounting system, consists of the procedures and records designed and established to

- initiate, authorize, record, process, and report entity transactions (as well as events and conditions) and maintain accountability for the related assets, liabilities, and equity;
- resolve incorrect processing of transactions (for example, automated suspense files and procedures followed to clear suspense items out on a timely basis);
- process and account for system overrides or bypasses to controls;
- transfer information from transaction processing systems to the general ledger;
- capture information relevant to financial reporting for events and conditions other than transactions, such as the depreciation and amortization of assets and changes in the recoverability of accounts receivables; and

- ensure information required to be disclosed by the applicable financial reporting framework is accumulated, recorded, processed, summarized, and appropriately reported in the financial statements.

.A85 *Journal entries.* An entity's information system typically includes the use of standard journal entries that are required on a recurring basis to record transactions. Examples might be journal entries to record sales, purchases, and cash disbursements in the general ledger or to record accounting estimates that are periodically made by management, such as changes in the estimate of uncollectible accounts receivable.

.A86 An entity's financial reporting process also includes the use of non-standard journal entries to record nonrecurring, unusual transactions or adjustments. Examples of such entries include consolidating adjustments and entries for a business combination or disposal or nonrecurring estimates, such as the impairment of an asset. In manual general ledger systems, nonstandard journal entries may be identified through inspection of ledgers, journals, and supporting documentation. When automated procedures are used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may, therefore, be more easily identified through the use of computer assisted audit techniques.

.A87 *Related business processes.* An entity's business processes are the activities designed to

- develop, purchase, produce, sell, and distribute an entity's products and services;
- ensure compliance with laws and regulations; and
- record information, including accounting and financial reporting information.

Business processes result in the transactions that are recorded, processed, and reported by the information system. Obtaining an understanding of the entity's business processes, which includes how transactions are originated, assists the auditor to obtain an understanding of the entity's information system relevant to financial reporting in a manner that is appropriate to the entity's circumstances.

.A88 *Considerations specific to smaller, less complex entities.* Information systems and related business processes relevant to financial reporting in smaller entities are likely to be less sophisticated than in larger entities, but their role is just as significant. Smaller entities with active management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies. Understanding the entity's systems and processes may, therefore, be easier in an audit of smaller entities, and it may be more dependent on inquiry than on review of documentation. The need to obtain an understanding, however, remains important.

.A89 *Communication (Ref: par. .20).* Communication by the entity of the financial reporting roles and responsibilities and significant matters relating to financial reporting involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting. It includes such matters as the extent to which personnel understand how their activities in the financial reporting information system relate to the work of others and the means of reporting exceptions to an appropriate higher level within the entity. Communication may take such forms as policy manuals and financial reporting manuals. Open communication channels help ensure that exceptions are reported and acted on.

.A90 *Considerations specific to smaller, less complex entities.* Communication may be less structured and easier to achieve in a smaller entity than in a larger entity due to fewer levels of responsibility and management's greater visibility and availability.

Components of Internal Control—Control Activities (Ref: par. .21)

.A91 Control activities are the policies and procedures that help ensure that management directives are carried out. Control activities, whether within IT or manual systems, have various objectives and are applied at various organizational and functional levels. Examples of specific control activities include those relating to the following:

- Authorization
- Performance reviews
- Information processing
- Physical controls
- Segregation of duties

.A92 Control activities that are relevant to the audit are those that are

- required to be treated as such, being control activities that relate to significant risks and those that relate to risks for which substantive procedures alone do not provide sufficient appropriate audit evidence, as required by paragraphs .30–.31, respectively, or
- considered to be relevant in the professional judgment of the auditor.

.A93 The auditor's professional judgment about whether a control activity is relevant to the audit is influenced by the risk that the auditor has identified that may give rise to a material misstatement and whether the auditor thinks it is likely to be appropriate to test the operating effectiveness of the control in determining the extent of substantive testing.

.A94 The auditor's emphasis may be on identifying and obtaining an understanding of control activities that address the areas in which the auditor considers that risks of material misstatement are likely to be higher. When multiple control activities each achieve the same objective, it is unnecessary to obtain an understanding of each of the control activities related to such objective.

.A95 The auditor's knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control assists the auditor in determining whether it is necessary to devote additional attention to obtaining an understanding of control activities.

.A96 *Considerations specific to smaller, less complex entities.* The concepts underlying control activities in smaller entities are likely to be similar to those in larger entities, but the formality with which they operate may vary. Further, smaller entities may find that certain types of control activities are not relevant because of controls applied by management. For example, management's sole authority for granting credit to customers and approving significant purchases can provide strong control over important account balances and transactions, lessening or removing the need for more detailed control activities.

.A97 Control activities relevant to the audit of a smaller entity are likely to relate to the main transaction cycles, such as revenues, purchases, and employment expenses.

.A98 *Risks arising from IT (Ref: par. .22).* The use of IT affects the way that control activities are implemented. From the auditor's perspective, controls over IT systems are effective when they maintain the integrity of information and the security of the data such systems process and when they include effective general IT controls and application controls.

.A99 *General IT controls* are policies and procedures that relate to many applications and support the effective functioning of application controls. They apply to mainframe, miniframe, and end-user environments. General IT controls that maintain the integrity of information and security of data commonly include controls over the following:

- Data center and network operations
- System software acquisition, change, and maintenance
- Program change
- Access security
- Application system acquisition, development, and maintenance

They are generally implemented to deal with the risks referred to in paragraph .A57.

.A100 Although ineffective general IT controls do not by themselves cause misstatements, they may permit application controls to operate improperly and allow misstatements to occur and not be detected. For example, if deficiencies in the general IT controls over access security exist and applications are relying on these general controls to prevent unauthorized transactions from being processed, such general IT control deficiencies may have a more severe effect on the effective design and operation of the application control. General IT controls are assessed with regard to their effect on applications and data that become part of the financial statements. For example, if no new systems are implemented during the period of the financial statements, deficiencies in the general IT controls over application system acquisition and development may not be relevant to the financial statements being audited.

.A101 *Application controls* are manual or automated procedures that typically operate at a business process level and apply to the processing of transactions by individual applications. Application controls can be preventive or detective and are designed to ensure the integrity of the accounting records. Accordingly, application controls relate to procedures used to initiate, authorize, record, process, and report transactions or other financial data. These controls help ensure that transactions occurred, are authorized, and are completely and accurately recorded and processed. Examples include edit checks of input data and numerical sequence checks with manual follow-up of exception reports or correction at the point of data entry.

Components of Internal Control—Monitoring of Controls (Ref: par. .23)

.A102 Monitoring of controls is a process to assess the effectiveness of internal control performance over time. It involves assessing the effectiveness of controls on a timely basis and taking necessary remedial actions. Management accomplishes monitoring of controls through ongoing activities, separate evaluations, or a combination of the two. Ongoing monitoring activities often are built into the normal recurring activities of an entity and include regular management and supervisory activities.

.A103 *Considerations specific to smaller, less complex entities.* Management's monitoring of controls often is accomplished by management's or the owner-manager's close involvement in operations. This involvement often will

identify significant variances from expectations and inaccuracies in financial data leading to remedial action to the control.

.A104 *Internal audit function* (Ref: par. .24). The entity's internal audit function is likely to be relevant to the audit if the nature of the internal audit function's responsibilities and activities are related to the entity's financial reporting, and the auditor expects to use the work of the internal auditors to modify the nature or timing or reduce the extent of audit procedures to be performed. If the auditor determines that the internal audit function is likely to be relevant to the audit, section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*,* applies.

.A105 The objectives of an internal audit function and, therefore, the nature of its responsibilities and its status within the organization, vary widely and depend on the size and structure of the entity and the requirements of management and, when applicable, those charged with governance. The responsibilities of an internal audit function may include, for example, monitoring of internal control, risk management, and review of compliance with laws and regulations. On the other hand, the responsibilities of the internal audit function may be limited to the review of the economy, efficiency, and effectiveness of operations, for example, and, accordingly, may not relate to the entity's financial reporting.

.A106 If the nature of the internal audit function's responsibilities is related to the entity's financial reporting, the external auditor's consideration of the activities performed or to be performed by the internal audit function may include review of the internal audit function's audit plan for the period, if any, and discussion of that plan with the internal auditors.

.A107 *Sources of information* (Ref: par. .25). Much of the information used in monitoring may be produced by the entity's information system. If management assumes that data used for monitoring are accurate without having a basis for that assumption, errors that may exist in the information could potentially lead management to incorrect conclusions from its monitoring activities. Accordingly, an understanding of the following is required as part of the auditor's understanding of the entity's monitoring activities component of internal control:

- The sources of the information related to the entity's monitoring activities
- The basis upon which management considers the information to be sufficiently reliable for the purpose

Identifying and Assessing the Risks of Material Misstatement

Assessment of Risks of Material Misstatement at the Financial Statement Level (Ref: par. .26a)

.A108 Risks of material misstatement at the financial statement level refer to risks that relate pervasively to the financial statements as a whole and

* SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and was previously codified as AU section 322 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, redesignated AU section 322 as AU-C section 610, which will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

potentially affect many assertions. Risks of this nature are not necessarily risks identifiable with specific assertions at the class of transactions, account balance, or disclosure level. Rather, they represent circumstances that may increase the risks of material misstatement at the assertion level (for example, through management override of internal control). Financial statement level risks may be especially relevant to the auditor's consideration of the risks of material misstatement arising from fraud.

.A109 Risks at the financial statement level may derive, in particular, from a deficient control environment (although these risks also may relate to factors such as declining economic conditions). For example, deficiencies such as management's lack of competence may have a more pervasive effect on the financial statements and may require an overall response by the auditor.

.A110 The auditor's understanding of internal control may raise doubts about the auditability of an entity's financial statements. For example

- concerns about the integrity of the entity's management may be so serious to cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted.
- concerns about the condition and reliability of an entity's records may cause the auditor to conclude that it is unlikely that sufficient appropriate audit evidence will be available to support an unmodified opinion on the financial statements.

.A111 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, addresses the determination of whether a need exists for the auditor to express a qualified or adverse opinion or disclaim an opinion or, as may be required in some cases, to withdraw from the engagement when withdrawal is possible under applicable law or regulation.

Assessment of Risks of Material Misstatement at the Relevant Assertion Level (Ref: par. .26b)

.A112 Risks of material misstatement at the relevant assertion level for classes of transactions, account balances, and disclosures need to be considered because such consideration directly assists in determining the nature, timing, and extent of further audit procedures at the assertion level necessary to obtain sufficient appropriate audit evidence. In identifying and assessing risks of material misstatement at the relevant assertion level, the auditor may conclude that the identified risks relate more pervasively to the financial statements as a whole and potentially affect many relevant assertions.

The Use of Assertions

.A113 In representing that the financial statements are in accordance with the applicable financial reporting framework, management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of the various elements of financial statements and related disclosures.

.A114 Assertions used by the auditor to consider the different types of potential misstatements that may occur fall into the following three categories and may take the following forms:

- a. Assertions about classes of transactions and events for the period under audit, such as the following:
 - i. *Occurrence*. Transactions and events that have been recorded have occurred and pertain to the entity.

- ii. *Completeness*. All transactions and events that should have been recorded have been recorded.
 - iii. *Accuracy*. Amounts and other data relating to recorded transactions and events have been recorded appropriately.
 - iv. *Cutoff*. Transactions and events have been recorded in the correct accounting period.
 - v. *Classification*. Transactions and events have been recorded in the proper accounts.
- b. Assertions about account balances at the period-end, such as the following:
 - i. *Existence*. Assets, liabilities, and equity interests exist.
 - ii. *Rights and obligations*. The entity holds or controls the rights to assets, and liabilities are the obligations of the entity.
 - iii. *Completeness*. All assets, liabilities, and equity interests that should have been recorded have been recorded.
 - iv. *Valuation and allocation*. Assets, liabilities, and equity interests are included in the financial statements at appropriate amounts, and any resulting valuation or allocation adjustments are appropriately recorded.
- c. Assertions about presentation and disclosure, such as the following:
 - i. *Occurrence and rights and obligations*. Disclosed events, transactions, and other matters have occurred and pertain to the entity.
 - ii. *Completeness*. All disclosures that should have been included in the financial statements have been included.
 - iii. *Classification and understandability*. Financial information is appropriately presented and described, and disclosures are clearly expressed.
 - iv. *Accuracy and valuation*. Financial and other information is disclosed fairly and in appropriate amounts.

.A115 The auditor may use the assertions as described previously or may express them differently, provided that all aspects described previously have been covered. For example, the auditor may choose to combine the assertions about transactions and events with the assertions about account balances. As another example, there may not be a separate assertion related to cutoff of transactions and events when the occurrence and completeness assertions include appropriate consideration of recording transactions in the correct accounting period.

Relevant Assertions

.A116 The auditor is required by paragraph .26*b* to use relevant assertions for classes of transactions, account balances, and disclosures in sufficient detail to form a basis for the assessment of risks of material misstatement and the design and performance of further audit procedures. The auditor also is required to use relevant assertions in assessing risks by relating the identified risks to what can go wrong at the relevant assertion, taking account of relevant controls that the auditor intends to test, and designing further audit procedures that are responsive to the assessed risks.

.A117 *Relevant assertions* are assertions that have a reasonable possibility of containing a misstatement or misstatements that would cause the financial

statements to be materially misstated and, as such, are assertions that have a meaningful bearing on whether the account is fairly stated. Not all assertions pertaining to a particular account balance will always be relevant. For example, valuation may not be relevant to the cash account unless currency translation is involved; however, existence and completeness are always relevant. Similarly, valuation may not be relevant to the gross amount of the accounts receivable balance but is relevant to the related allowance accounts. Additionally, the auditor might, in some circumstances, focus on the presentation and disclosure assertions separately in connection with the period-end financial reporting process.

.A118 For each significant class of transactions, account balance, and disclosure, the auditor is required to determine the relevance of each of the financial statement assertions. Identifying relevant assertions includes determining the source of likely potential misstatements in each significant class of transactions, account balance, and disclosure. Attributes indicating the potential relevance of an assertion include the

- a. nature of the assertion;
- b. volume of transactions or data related to the assertion; and
- c. nature and complexity of the systems, including the use of IT, by which the entity processes and controls information supporting the assertion.

Considerations Specific to Governmental Entities

.A119 When making assertions about the financial statements of governmental entities, in addition to those assertions set out in paragraph .A114, management asserts that transactions and events have been carried out in accordance with law or regulation. Such assertions may fall within the scope of the financial statement audit.

Process of Identifying Risks of Material Misstatement (Ref: par. .27a)

.A120 Information gathered by performing risk assessment procedures, including the audit evidence obtained in evaluating the design of controls and determining whether they have been implemented, is used as audit evidence to support the risk assessment. The risk assessment determines the nature, timing, and extent of further audit procedures to be performed.

.A121 Appendix C provides examples of conditions and events that may indicate the existence of risks of material misstatement.

Relating Controls to Assertions (Ref: par. .27c)

.A122 In making risk assessments, the auditor may identify the controls that are likely to prevent, or detect and correct, material misstatement in specific assertions. Generally, it is useful to obtain an understanding of controls and relate them to assertions in the context of processes and systems in which they exist because individual control activities often do not in themselves address a risk. Often, only multiple control activities, together with other components of internal control, will be sufficient to address a risk.

.A123 Conversely, some control activities may have a specific effect on an individual assertion embodied in a particular class of transactions or account balance. For example, the control activities that an entity established to ensure that its personnel are properly counting and recording the annual physical inventory relate directly to the existence and completeness assertions for the inventory account balance.

.A124 Controls can be either directly or indirectly related to an assertion. The more indirect the relationship, the less effective that control may be in preventing, or detecting and correcting, misstatements in that assertion. For example, a sales manager's review of a summary of sales activity for specific stores by region ordinarily is only indirectly related to the completeness assertion for sales revenue. Accordingly, it may be less effective in reducing risk for that assertion than controls more directly related to that assertion, such as matching shipping documents with billing documents.

Significant Risks

Identifying Significant Risks (Ref: par. .28–29)

.A125 Significant risks often relate to significant nonroutine transactions and matters that require significant judgment. *Nonroutine transactions* are transactions that are unusual, either due to size or nature, and that, therefore, occur infrequently. Matters that require significant judgment may include the development of accounting estimates for which a significant measurement uncertainty exists. Routine, noncomplex transactions that are subject to systematic processing are less likely to give rise to significant risks.

.A126 Risks of material misstatement may be greater for significant nonroutine transactions arising from matters such as the following:

- Greater management intervention to specify the accounting treatment
- Greater manual intervention for data collection and processing
- Complex calculations or accounting principles
- The nature of nonroutine transactions, which may make it difficult for the entity to implement effective controls over the risks
- Related party transactions

.A127 Risks of material misstatement may be greater for matters that require significant judgment, such as the development of accounting estimates, arising from matters such as the following:

- Accounting principles for accounting estimates or revenue recognition may be subject to differing interpretation.
- Required judgment may be subjective or complex or it may require assumptions about the effects of future events (for example, judgment about fair value).

.A128 Section 330 describes the consequences for further audit procedures of identifying a risk as significant.¹⁰

Significant Risks Relating to the Risks of Material Misstatement Due to Fraud

.A129 Section 240 further addresses the identification and assessment of the risks of material misstatement due to fraud.

Understanding Controls Related to Significant Risks (Ref: par. .30)

.A130 Although risks relating to significant nonroutine transactions or matters that require significant judgment are often less likely to be subject to routine controls, management may have other responses intended to deal with such risks. Accordingly, the auditor's understanding of whether the entity has designed and implemented controls for significant risks arising from nonroutine

¹⁰ Paragraphs .15 and .22 of section 330.

transactions or matters that require significant judgment includes whether and how management responds to the risks. Such responses might include

- control activities, such as a review of assumptions by senior management or specialists.
- documented processes for estimations.
- approval by those charged with governance.

.A131 For example, when nonrecurring events occur, such as the receipt of notice of a significant lawsuit, consideration of the entity's response may include such matters as whether it has been referred to appropriate specialists (for example, internal or external legal counsel), whether an assessment has been made of the potential effect, and how it is proposed that the circumstances are to be disclosed in the financial statements.

.A132 In some cases, management may not have appropriately responded to significant risks of material misstatement by implementing controls over these significant risks. Failure by management to implement such controls may be a significant deficiency or a material weakness. In these circumstances, the auditor also may consider the implications for the auditor's risk assessment.

Risks for Which Substantive Procedures Alone Do Not Provide Sufficient Appropriate Audit Evidence (Ref: par. .31)

.A133 Risks of material misstatement may relate directly to the recording of routine classes of transactions or account balances and the preparation of reliable financial statements. Such risks may include risks of inaccurate or incomplete processing for routine and significant classes of transactions, such as an entity's revenue; purchases; and cash receipts or cash payments.

.A134 When such routine business transactions are subject to highly automated processing with little or no manual intervention, it may not be possible to perform only substantive procedures regarding the risk. For example, the auditor may consider this to be the case when a significant amount of an entity's information is initiated, authorized, recorded, processed, or reported only in electronic form, such as in an integrated system. In such cases

- audit evidence may be available only in electronic form, and its sufficiency and appropriateness usually depend on the effectiveness of controls over its accuracy and completeness.
- the potential for improper initiation or alteration of information to occur and not be detected may be greater if appropriate controls are not operating effectively.

.A135 Examples of situations in which the auditor may find it impossible to design effective substantive procedures that, by themselves, provide sufficient appropriate audit evidence that certain relevant assertions are not materially misstated include the following:

- An entity that conducts its business using IT to initiate orders for the purchase and delivery of goods based on predetermined rules of what to order and in what quantities and to pay the related accounts payable based on system-generated decisions initiated upon the confirmed receipt of goods and terms of payment. No other documentation of orders placed or goods received is produced or maintained, other than through the IT system.
- An entity that provides services to customers via electronic media (for example, an Internet service provider or a telecommunications company) and uses IT to create a log of the services provided

to its customers, initiate and process its billings for the services, and automatically record such amounts in electronic accounting records that are part of the system used to produce the entity's financial statements.

.A136 The consequences for further audit procedures of identifying such risks are described in section 330.¹¹

Revision of Risk Assessment (Ref: par. .32)

.A137 During the audit, information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. For example, the risk assessment may be based on an expectation that controls are operating effectively. In performing tests of controls, the auditor may obtain audit evidence that they were not operating effectively at relevant times during the audit. Similarly, in performing substantive procedures, the auditor may detect misstatements in amounts or frequency greater than is consistent with the auditor's risk assessment. In such circumstances, the risk assessment may not appropriately reflect the true circumstances of the entity, and the further planned audit procedures may not be effective in detecting material misstatements. See section 330 for further guidance.

Documentation (Ref: par. .33)

.A138 The manner in which the requirements of paragraph .33 are documented is for the auditor to determine exercising professional judgment. For example, in audits of smaller entities, the documentation may be incorporated in the auditor's documentation of the overall strategy and audit plan.¹² Similarly, the results of the risk assessment may be documented separately, or they may be documented as part of the auditor's documentation of further audit procedures.¹³ The form and extent of the documentation is influenced by the nature, size, and complexity of the entity and its internal control; availability of information from the entity; and the audit methodology and technology used in the course of the audit.

.A139 For entities that have uncomplicated businesses and processes relevant to financial reporting, the documentation may be simple and relatively brief. It is not necessary to document the entirety of the auditor's understanding of the entity and matters related to it. Key elements of the understanding documented by the auditor include those on which the auditor based the assessment of the risks of material misstatement.

.A140 The extent of documentation also may reflect the experience and capabilities of the members of the audit engagement team. Provided that the requirements of section 230, *Audit Documentation*, are met, an audit undertaken by an engagement team comprising less experienced individuals may contain more detailed documentation to assist them to obtain an appropriate understanding of the entity than one that includes experienced individuals.

.A141 For recurring audits, certain documentation may be carried forward and updated as necessary to reflect changes in the entity's business or processes.

¹³ Paragraph .30 of section 330.

.A142

Appendix A—Understanding the Entity and Its Environment (Ref: par. .A17)

This appendix provides additional guidance on matters the auditor may consider when obtaining an understanding of the industry and regulatory and other external factors that affect the entity, the nature of the entity, objectives and strategies and related business risks, and the measurement and review of the entity's financial performance. The examples provided cover a broad range of matters applicable to many engagements; however, not all matters are relevant to every engagement, and the list of examples is not necessarily complete. Additional guidance on internal control is contained in appendix B, "Internal Control Components."

Industry, Regulatory, and Other External Factors

Examples of matters an auditor may consider include the following:

- Industry conditions, such as the following:
 - The market and competition, including demand, capacity, and price competition
 - Cyclical or seasonal activity
 - Product technology relating to the entity's products
 - Supply availability and cost
- Regulatory environment, such as the following:
 - Accounting principles and industry-specific practices
 - Regulatory framework for a regulated industry
 - Legislation and regulation that significantly affect the entity's operations, such as the following:
 - Regulatory requirements
 - Direct supervisory activities
 - Taxation (corporate and other)
 - Government policies currently affecting the conduct of the entity's business, such as the following:
 - Monetary, including foreign exchange controls
 - Fiscal
 - Financial incentives (for example, government aid programs)
 - Tariffs and trade restrictions
 - Environmental requirements affecting the industry and the entity's business
- Other external factors currently affecting the entity's business, such as the following:
 - General level of economic activity (for example, recession, growth, and so on)
 - Interest rates and availability of financing
 - Inflation and currency revaluation

Nature of the Entity

Examples of matters an auditor may consider include the following:

- Business operations, such as the following:
 - Nature of revenue sources (for example, manufacturer; wholesaler; banking, insurance, or other financial services; import-export trading; utility; transportation; and technology products and services)
 - Products or services and markets (for example, major customers and contracts, terms of payment, profit margins, market share, competitors, exports, pricing policies, reputation of products, warranties, backlog, trends, marketing strategy and objectives, and manufacturing processes)
 - Conduct of operations (for example, stages and methods of production, subsidiaries or divisions, delivery of products and services, and details of declining or expanding operations)
 - Alliances, joint ventures, and outsourcing activities
 - Involvement in e-commerce, including Internet sales and marketing activities
 - Geographic dispersion and industry segmentation
 - Location of production facilities, warehouses, and offices
 - Key customers
 - Important suppliers of goods and services (for example, long term contracts, stability of supply, terms of payment, imports, and methods of delivery, such as "just-in-time")
 - Employment (for example, by location, supply, wage levels, union contracts, pension and other postemployment benefits, stock option or incentive bonus arrangements, and government regulation related to employment matters)
 - Research and development activities and expenditures
 - Transactions with related parties
- Investments, such as the following:
 - Acquisitions, mergers, or disposals of business activities (planned or recently executed)
 - Investments and dispositions of securities and loans
 - Capital investment activities, including investments in plant and equipment and technology and any recent or planned changes
 - Investments in nonconsolidated entities, including partnerships, joint ventures, and investments in entities formed to accomplish specific objectives
 - Life cycle stage of enterprise (start-up, growing, mature, declining)

- Financing, such as the following:
 - Group structure of major subsidiaries and associated entities, including consolidated and nonconsolidated structures
 - Debt structure, including covenants, restrictions, guarantees, and off balance sheet financing arrangements
 - Leasing of property, plant, or equipment for use in the business
 - Beneficial owners (local and foreign business reputation and experience)
 - Related parties
 - Use of derivative financial instruments
- Financial reporting, such as the following:
 - Accounting principles and industry-specific practices
 - Revenue recognition practices
 - Accounting for fair values
 - Inventories (for example, locations and quantities)
 - Foreign currency assets, liabilities, and transactions
 - Industry-specific significant categories (for example, loans and investments for banks, accounts receivable and inventory for manufacturers, research and development for pharmaceuticals)
 - Accounting for unusual or complex transactions, including those in controversial or emerging areas (for example, accounting for stock-based compensation)
 - Financial statement presentation and disclosure

Objectives and Strategies and Related Business Risks

Examples of matters an auditor may consider include the following:

- Existence of objectives (that is, how the entity addresses industry, regulatory, and other external factors) relating to, for example, the following matters:
 - Industry developments (a potential related business risk might be, for example, the entity does not have the personnel or expertise to deal with the changes in the industry)
 - New products and services (a potential related business risk might be, for example, product liability has increased)
 - Expansion of the business (a potential related business risk might be, for example, the demand has not been accurately estimated)
 - New accounting requirements (a potential related business risk might be, for example, incomplete or improper implementation or increased costs)
 - Regulatory requirements (a potential related business risk might be, for example, legal exposure has increased)

Risk Assessment and Response to Assessed Risks

- Current and prospective financing requirements (a potential related business risk might be, for example, the entity's inability to meet requirements results in the loss of financing)
- IT (a potential related business risk might be, for example, systems and processes are not compatible)
- Risk appetite of managers and stakeholders
- Effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, for example, implementation is incomplete or improper)

Measurement and Review of the Entity's Financial Performance

Examples of matters an auditor may consider include the following:

- Key ratios and operating statistics
- Key performance indicators
- Employee performance measures and incentive compensation policies
- Trends
- Use of forecasts, budgets, and variance analysis
- Analyst reports and credit rating reports
- Competitor analysis
- Period-on-period financial performance (revenue growth, profitability, and leverage)

.A143

Appendix B—Internal Control Components (Ref: par. .04, .15–.25, and .A71–.A107)

This appendix further explains the components of internal control, as set out in paragraphs .04, .15–.25, and .A71–.A107, as they relate to a financial statement audit.

Control Environment

The control environment encompasses the following elements:

- a. *Communication and enforcement of integrity and ethical values.* The effectiveness of controls cannot rise above the integrity and ethical values of the people who create, administer, and monitor them. Integrity and ethical behavior are the products of the entity's ethical and behavioral standards, how they are communicated, and how they are reinforced in practice. The enforcement of integrity and ethical values includes, for example, management actions to eliminate or mitigate incentives or temptations that might prompt personnel to engage in dishonest, illegal, or unethical acts. The communication of entity policies on integrity and ethical values may include the communication of behavioral standards to personnel through policy statements and codes of conduct and by example.
- b. *Commitment to competence.* *Competence* is the knowledge and skills necessary to accomplish tasks that define the individual's job.
- c. *Participation by those charged with governance.* An entity's control consciousness is influenced significantly by those charged with governance. The importance of the responsibilities of those charged with governance is recognized in codes of practice and other laws and regulations or guidance produced for the benefit of those charged with governance. Other responsibilities of those charged with governance include oversight of the design and effective operation of whistle-blower procedures and the process for reviewing the effectiveness of the entity's internal control.
- d. *Management's philosophy and operating style.* Management's philosophy and operating style encompass a broad range of characteristics. For example, management's attitudes and actions toward financial reporting may manifest themselves through conservative or aggressive selection from available alternative accounting principles or conscientiousness and conservatism with which accounting estimates are developed.
- e. *Organizational structure.* Establishing a relevant organizational structure includes considering key areas of authority and responsibility and appropriate lines of reporting. The appropriateness of an entity's organizational structure depends, in part, on its size and the nature of its activities.
- f. *Assignment of authority and responsibility.* The assignment of authority and responsibility may include policies relating to appropriate business practices, knowledge and experience of key personnel, and resources provided for carrying out duties. In addition, it may include policies and communications directed at

ensuring that all personnel understand the entity's objectives, know how their individual actions interrelate and contribute to those objectives, and recognize how and for what they will be held accountable.

- g. *Human resource policies and practices.* Human resource policies and practices often demonstrate important matters regarding the control consciousness of an entity. For example, standards for recruiting the most qualified individuals, with an emphasis on educational background, prior work experience, past accomplishments, and evidence of integrity and ethical behavior, demonstrate an entity's commitment to competent and trustworthy people. Training policies that communicate prospective roles and responsibilities and include practices such as training schools and seminars illustrate expected levels of performance and behavior. Promotions driven by periodic performance appraisals demonstrate the entity's commitment to the advancement of qualified personnel to higher levels of responsibility.

The Entity's Risk Assessment Process

For financial reporting purposes, the entity's risk assessment process includes how management identifies business risks relevant to the preparation and fair presentation of financial statements in accordance with the entity's applicable financial reporting framework, estimates their significance, assesses the likelihood of their occurrence, and decides upon actions to respond to and manage them and the results thereof. For example, the entity's risk assessment process may address how the entity considers the possibility of unrecorded transactions or identifies and analyzes significant estimates recorded in the financial statements.

Risks relevant to reliable financial reporting include external and internal events, as well as transactions or circumstances that may occur and adversely affect an entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions of management in the financial statements. Management may initiate plans, programs, or actions to address specific risks or it may decide to accept a risk because of cost or other considerations. Risks can arise or change due to circumstances such as the following:

- *Changes in operating environment.* Changes in the regulatory or operating environment can result in changes in competitive pressures and significantly different risks.
- *New personnel.* New personnel may have a different focus on, or understanding of, internal control.
- *New or revamped information systems.* Significant and rapid changes in information systems can change the risk relating to internal control.
- *Rapid growth.* Significant and rapid expansion of operations can strain controls and increase the risk of a breakdown in controls.
- *New technology.* Incorporating new technologies into production processes or information systems may change the risk associated with internal control.
- *New business models, products, or activities.* Entering into business areas or transactions with which an entity has little experience may introduce new risks associated with internal control.

- *Corporate restructurings.* Restructurings may be accompanied by staff reductions and changes in supervision and segregation of duties that may change the risk associated with internal control.
- *Expanded foreign operations.* The expansion or acquisition of foreign operations carries new and often unique risks that may affect internal control (for example, additional or changed risks from foreign currency transactions).
- *New accounting pronouncements.* Adoption of new accounting principles or changing accounting principles may affect risks in preparing financial statements.

The Information System, Including the Related Business Processes Relevant to Financial Reporting and Communication

An information system consists of infrastructure (physical and hardware components), software, people, procedures, and data. Many information systems make extensive use of IT.

The information system relevant to financial reporting objectives, which includes the financial reporting system, encompasses methods and records that

- identify and record all valid transactions.
- describe on a timely basis the transactions in sufficient detail to permit proper classification of transactions for financial reporting.
- measure the value of transactions in a manner that permits recording their proper monetary value in the financial statements.
- determine the time period in which transactions occurred to permit recording of transactions in the proper accounting period.
- present properly the transactions and related disclosures in the financial statements.

The quality of system-generated information affects management's ability to make appropriate decisions in managing and controlling the entity's activities and to prepare reliable financial reports.

Communication, which involves providing an understanding of individual roles and responsibilities pertaining to internal control over financial reporting, may take such forms as policy manuals, accounting and financial reporting manuals, and memoranda. Communication also can be made electronically, orally, and through the actions of management.

Control Activities

Generally, control activities that may be relevant to an audit may be categorized as policies and procedures that pertain to the following:

- *Performance reviews.* These control activities include reviews and analyses of actual performance versus budgets, forecasts, and prior-period performance; relating different sets of data (operating or financial) to one another, together with analyses of the relationships and investigative and corrective actions; comparing internal data with external sources of information; and review of functional or activity performance.

- *Information processing.* The two broad groupings of information systems control activities are application controls, which apply to the processing of individual applications, and general IT controls, which are policies and procedures that relate to many applications and support the effective functioning of application controls by helping to ensure the continued proper operation of information systems. Examples of application controls include checking the arithmetical accuracy of records; maintaining and reviewing accounts and trial balances; automated controls, such as edit checks of input data and numerical sequence checks; and manual follow-up of exception reports. Examples of general IT controls are program change controls; controls that restrict access to programs or data; controls over the implementation of new releases of packaged software applications; and controls over system software that restrict access to, or monitor the use of, system utilities that could change financial data or records without leaving an audit trail.
- *Physical controls.* This includes controls that encompass the
 - physical security of assets, including adequate safeguards, such as secured facilities over access to assets and records.
 - authorization for access to computer programs and data files.
 - periodic counting and comparison with amounts shown on control records (for example comparing the results of cash, security, and inventory counts with accounting records).

The extent to which physical controls intended to prevent theft of assets are relevant to the reliability of financial statement preparation and, therefore, the audit, depends on circumstances such as when assets are highly susceptible to misappropriation.

- *Segregation of duties.* Assigning different people the responsibilities of authorizing transactions, recording transactions, and maintaining custody of assets. Segregation of duties is intended to reduce the opportunities to allow any person to be in a position to both perpetrate and conceal errors or fraud in the normal course of the person's duties.

Certain control activities may depend on the existence of appropriate higher level policies established by management or those charged with governance. For example, authorization controls may be delegated under established guidelines, such as investment criteria set by those charged with governance; alternatively, nonroutine transactions, such as major acquisitions or divestments, may require specific high level approval, including, in some cases, that of shareholders.

Monitoring of Controls

An important management responsibility is to establish and maintain internal control on an ongoing basis. Management's monitoring of controls includes considering whether they are operating as intended and that they are modified as appropriate for changes in conditions. Monitoring of controls may include activities such as management's review of whether bank reconciliations are being prepared on a timely basis, internal auditors' evaluation of sales personnel's compliance with the entity's policies on terms of sales contracts, and a legal department's oversight of compliance with the entity's ethical or business practice policies. Monitoring also is done to ensure that controls continue to

operate effectively over time. For example, if the timeliness and accuracy of bank reconciliations are not monitored, personnel are likely to stop preparing them.

Internal auditors or personnel performing similar functions may contribute to the monitoring of an entity's controls through separate evaluations. Ordinarily, they regularly provide information about the functioning of internal control, focusing considerable attention on evaluating the effectiveness of internal control; communicate information about strengths and deficiencies in internal control; and provide recommendations for improving internal control.

Monitoring activities may include using information from communications from external parties that may indicate problems or highlight areas in need of improvement. Customers implicitly corroborate billing data by paying their invoices or complaining about their charges. In addition, regulators may communicate with the entity concerning matters that affect the functioning of internal control (for example, communications concerning examinations by bank regulatory agencies). Also, management may consider communications relating to internal control from external auditors in performing monitoring activities.

.A144

Appendix C—Conditions and Events That May Indicate Risks of Material Misstatement (Ref: par. .A33 and .A121)

The following are examples of conditions and events that may indicate the existence of risks of material misstatement. The examples provided cover a broad range of conditions and events; however, not all conditions and events are relevant to every audit engagement, and the list of examples is not necessarily complete.

- Operations in regions that are economically unstable (for example, countries with significant currency devaluation or highly inflationary economies)
- Operations exposed to volatile markets (for example, futures trading)
- Operations that are subject to a high degree of complex regulation
- Going concern and liquidity issues, including loss of significant customers
- Constraints on the availability of capital and credit
- Changes in the industry in which the entity operates
- Changes in the supply chain
- Developing or offering new products or services or moving into new lines of business
- Expanding into new locations
- Changes in the entity, such as large acquisitions or reorganizations or other unusual events
- Entities or business segments likely to be sold
- The existence of complex alliances and joint ventures
- Use of off balance sheet finance, investments in entities formed to accomplish specific objectives, and other complex financing arrangements
- Significant transactions with related parties
- Lack of personnel with appropriate accounting and financial reporting skills
- Changes in key personnel, including departure of key executives
- Deficiencies in internal control, especially those not addressed by management
- Inconsistencies between the entity's IT strategy and its business strategies
- Changes in the IT environment
- Installation of significant new IT systems related to financial reporting
- Inquiries into the entity's operations or financial results by regulatory or government bodies

- Past misstatements, history of errors, or a significant amount of adjustments at period-end
 - Significant amount of nonroutine or nonsystematic transactions, including intercompany transactions and large revenue transactions at period-end
 - Transactions that are recorded based on management's intent (for example, debt refinancing, assets to be sold, and classification of marketable securities)
 - Application of new accounting pronouncements
 - Accounting measurements that involve complex processes
 - Events or transactions that involve significant measurement uncertainty, including accounting estimates
 - Pending litigation and contingent liabilities (for example, sales warranties, financial guarantees, and environmental remediation)
-

AU-C Section 320

Materiality in Planning and Performing an Audit

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to apply the concept of materiality in planning and performing an audit of financial statements. Section 450, *Evaluation of Misstatements Identified During the Audit*, explains how materiality is applied in evaluating the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements.

Materiality in the Context of an Audit

.02 Financial reporting frameworks often discuss the concept of materiality in the context of the preparation and fair presentation of financial statements. Although financial reporting frameworks may discuss materiality in different terms, they generally explain that

- misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence the economic decisions of users made on the basis of the financial statements.
- judgments about materiality are made in light of surrounding circumstances and are affected by the size or nature of a misstatement, or a combination of both.
- judgments about matters that are material to users of the financial statements are based on a consideration of the common financial information needs of users as a group. The possible effect of misstatements on specific individual users, whose needs may vary widely, is not considered.

.03 Such a discussion about materiality provides a frame of reference to the auditor in determining materiality for the audit. If the applicable financial reporting framework does not include a discussion of the concept of materiality, the characteristics referred to in paragraph .02 provide the auditor with such a frame of reference.

.04 The auditor's determination of materiality is a matter of professional judgment and is affected by the auditor's perception of the financial information needs of users of the financial statements. In this context, it is reasonable for the auditor to assume that users

- a. have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information in the financial statements with reasonable diligence;

- b. understand that financial statements are prepared, presented, and audited to levels of materiality;
- c. recognize the uncertainties inherent in the measurement of amounts based on the use of estimates, judgment, and the consideration of future events; and
- d. make reasonable economic decisions on the basis of the information in the financial statements.

.05 The concept of materiality is applied by the auditor both in planning and performing the audit; evaluating the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements; and in forming the opinion in the auditor's report. (Ref: par. .A1)

.06 In planning the audit, the auditor makes judgments about the size of misstatements that will be considered material. These judgments provide a basis for

- a. determining the nature and extent of risk assessment procedures;
- b. identifying and assessing the risks of material misstatement; and
- c. determining the nature, timing, and extent of further audit procedures.

The materiality determined when planning the audit does not necessarily establish an amount below which uncorrected misstatements, individually or in the aggregate, will always be evaluated as immaterial. The circumstances related to some misstatements may cause the auditor to evaluate them as material even if they are below materiality. Although it is not practicable to design audit procedures to detect misstatements that could be material solely because of their nature (that is, qualitative considerations), the auditor considers not only the size but also the nature of uncorrected misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements.¹

Effective Date

.07 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.08 The objective of the auditor is to apply the concept of materiality appropriately in planning and performing the audit.

Definition

.09 For purposes of generally accepted auditing standards (GAAS), the following term has the meaning attributed as follows:

Performance materiality. The amount or amounts set by the auditor at less than materiality for the financial statements as a whole to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality for the financial statements as a whole. If applicable, *performance materiality* also refers to the amount or amounts set by the auditor at less than the materiality level or levels for

¹ Paragraph .A23 of section 450, *Evaluation of Misstatements Identified During the Audit*.

particular classes of transactions, account balances, or disclosures. Performance materiality is to be distinguished from tolerable misstatement. (Ref: par. .A2)

Requirements

Determining Materiality and Performance Materiality When Planning the Audit

.10 When establishing the overall audit strategy, the auditor should determine materiality for the financial statements as a whole. If, in the specific circumstances of the entity, one or more particular classes of transactions, account balances, or disclosures exist for which misstatements of lesser amounts than materiality for the financial statements as a whole could reasonably be expected to influence the economic decisions of users, then, taken on the basis of the financial statements, the auditor also should determine the materiality level or levels to be applied to those particular classes of transactions, account balances, or disclosures. (Ref: par. .A3–.A13)

.11 The auditor should determine performance materiality for purposes of assessing the risks of material misstatement and determining the nature, timing, and extent of further audit procedures. (Ref: par. .A14)

Revision as the Audit Progresses

.12 The auditor should revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) in the event of becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially. (Ref: par. .A15–.A16)

.13 If the auditor concludes that a lower materiality than that initially determined for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) is appropriate, the auditor should determine whether it is necessary to revise performance materiality and whether the nature, timing, and extent of the further audit procedures remain appropriate.

Documentation

.14 The auditor should include in the audit documentation the following amounts and the factors considered in their determination:²

- a. Materiality for the financial statements as a whole (see paragraph .10)
- b. If applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures (see paragraph .10)
- c. Performance materiality (see paragraph .11)
- d. Any revision of (a)–(c) as the audit progressed (see paragraphs .12–.13)

² Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

Application and Other Explanatory Material

Materiality in the Context of an Audit

Materiality and Audit Risk (Ref: par. .05)

.A1 In conducting an audit of financial statements, the overall objectives of the auditor are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, thereby enabling the auditor to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework and to report on the financial statements and communicate, as required by GAAS, in accordance with the auditor's findings.³ The auditor obtains reasonable assurance by obtaining sufficient appropriate audit evidence to reduce audit risk to an acceptably low level.⁴ *Audit risk* is the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated. Audit risk is a function of the risks of material misstatement and detection risk.⁵ Materiality and audit risk are considered throughout the audit, in particular, when

- a. determining the nature and extent of risk assessment procedures to be performed;
- b. identifying and assessing the risks of material misstatement;⁶
- c. determining the nature, timing, and extent of further audit procedures;⁷ and
- d. evaluating the effect of uncorrected misstatements, if any, on the financial statements⁸ and in forming the opinion in the auditor's report.

Definition (Ref: par. .09)

.A2 *Tolerable misstatement* is the application of performance materiality to a particular sampling procedure. Section 530, *Audit Sampling*, defines *tolerable misstatement* and provides further application guidance about the concept.⁹

Determining Materiality and Performance Materiality When Planning the Audit

Considerations Specific to Governmental Entities (Ref: par. .10)

.A3 In the case of a governmental entity, legislators and regulators are often the primary users of its financial statements. Furthermore, the financial statements may be used to make decisions other than economic decisions. The determination of materiality for the financial statements as a whole (and,

³ Paragraph .12 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

⁴ Paragraph .19 of section 200.

⁵ Paragraph .14 of section 200.

⁶ See section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

⁷ See section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

⁸ Paragraph .11 of section 450.

⁹ Paragraph .A6 of section 530, *Audit Sampling*.

if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) in an audit of the financial statements of a governmental entity, therefore, may be influenced by law or regulation.

.A4 For most state or local governments, a governmental entity's applicable financial reporting framework is based on multiple reporting units, and generally, the auditor expresses or disclaims an opinion on a government's financial statements as a whole by providing opinions or disclaimers of opinion on each opinion unit. That is, a state or local governmental entity's applicable financial reporting framework requires the presentation of financial statements for its varied activities in various reporting units. Consequently, a reporting unit, or aggregation of reporting units, of the governmental entity represents an opinion unit to the auditor. Accordingly, in these cases, materiality is established for each opinion unit.

Use of Benchmarks in Determining Materiality for the Financial Statements as a Whole (Ref: par. .10)

.A5 Determining materiality involves the exercise of professional judgment. A percentage is often applied to a chosen benchmark as a starting point in determining materiality for the financial statements as a whole. Factors that may affect the identification of an appropriate benchmark include the following:

- The elements of the financial statements (for example, assets, liabilities, equity, revenue, or expenses)
- Whether items exist on which the attention of the users of the particular entity's financial statements tends to be focused (for example, for the purpose of evaluating financial performance, users may tend to focus on profit, revenue, or net assets)
- The nature of the entity, where the entity is in its life cycle, and the industry and economic environment in which the entity operates
- The entity's ownership structure and the way it is financed (for example, if an entity is financed solely by debt rather than equity, users may put more emphasis on assets, and claims on them, than on the entity's earnings)
- The relative volatility of the benchmark

.A6 Examples of benchmarks that may be appropriate, depending on the circumstances of the entity, include categories of reported income, such as profit before tax, total revenue, gross profit, and total expenses; total equity; or net asset value. Profit before tax from continuing operations is often used for profit-oriented entities. When profit before tax from continuing operations is volatile, other benchmarks may be more appropriate, such as gross profit or total revenues.

.A7 With regard to the chosen benchmark, relevant financial data ordinarily includes prior periods' financial results and financial positions; the period-to-date financial results and financial position, budgets, or forecasts for the current period, adjusted for significant changes in the circumstances of the entity (for example, a significant business acquisition); and relevant changes of conditions in the industry or economic environment in which the entity operates. For example, when, as a starting point, materiality for the financial statements as a whole is determined for a particular entity based on a percentage of profit before tax from continuing operations, circumstances that give rise to an exceptional decrease or increase in such profit may lead the auditor to conclude that materiality for the financial statements as a whole is more appropriately

determined using a normalized profit before tax from continuing operations figure based on past results.

.A8 Materiality relates to the financial statements that are being audited. When the financial statements are prepared for a financial reporting period of more or less than 12 months, such as may be the case for a new entity or a change in the financial reporting period, materiality relates to the financial statements prepared for that financial reporting period.

.A9 Determining a percentage to be applied to a chosen benchmark involves the exercise of professional judgment. A relationship exists between the percentage and the chosen benchmark, such that a percentage applied to profit before tax from continuing operations will normally be higher than a percentage applied to total revenue. For example, the auditor may consider a percentage of profit before tax from continuing operations to be appropriate for a profit-oriented entity in a manufacturing industry. Chapter 3 of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* provides further guidance about the use of benchmarks in determining materiality.

Considerations Specific to Smaller, Less Complex Entities

.A10 When an entity's profit before tax from continuing operations is consistently nominal, which might be the case for an owner-managed business in which the owner takes much of the profit before tax in the form of remuneration, a benchmark such as profit before remuneration and tax may be more relevant.

Considerations Specific to Governmental Entities

.A11 In an audit of a governmental entity, total cost or net cost (expenses less revenues or expenditures less receipts) may be appropriate benchmarks for program activities. When a governmental entity has custody of public assets, assets may be an appropriate benchmark.

Materiality Level or Levels for Particular Classes of Transactions, Account Balances, or Disclosures (Ref: par. .10)

.A12 Factors that may indicate the existence of one or more particular classes of transactions, account balances, or disclosures for which misstatements of lesser amounts than materiality for the financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements include the following:

- Whether law, regulation, or the applicable financial reporting framework affect users' expectations regarding the measurement or disclosure of certain items (for example, related party transactions and the remuneration of management and those charged with governance)
- The key disclosures with regard to the industry in which the entity operates (for example, research and development costs for a pharmaceutical company)
- Whether attention is focused on a particular aspect of the entity's business that is separately disclosed in the financial statements (for example, a newly acquired business)

.A13 In considering whether, in the specific circumstances of the entity, such classes of transactions, account balances, or disclosures exist, the auditor may find it useful to obtain an understanding of the views and expectations of those charged with governance and management.

Performance Materiality (Ref: par. .11)

.A14 Planning the audit solely to detect individual material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated and leaves no margin for possible undetected misstatements. *Performance materiality* (which, as defined, is one or more amounts) is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole. Similarly, performance materiality relating to a materiality level determined for a particular class of transactions, account balance, or disclosure is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in that particular class of transactions, account balance, or disclosure exceeds the materiality level for that particular class of transactions, account balance, or disclosure. The determination of performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. It is affected by the auditor's understanding of the entity, updated during the performance of the risk assessment procedures, and the nature and extent of misstatements identified in previous audits and, thereby, the auditor's expectations regarding misstatements in the current period.

Revision as the Audit Progresses (Ref: par. .12)

.A15 In some situations, the auditor may determine materiality for planning purposes before the financial statements to be audited are prepared. In those situations, the auditor's professional judgment about materiality might be based on the entity's annualized interim financial statements or financial statements of one or more prior annual periods. If it appears as though the actual financial results are likely to be substantially different from the anticipated results, such as when there are major changes in the entity's circumstances (for example, a significant merger) or relevant changes in the economy as a whole or the industry in which the entity operates, the auditor may be required, in accordance with paragraph .12, to revise materiality.

.A16 Materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) may need to be revised as a result of a change in circumstances that occurred during the audit (for example, a decision to dispose of a major part of the entity's business), new information, or a change in the auditor's understanding of the entity and its operations as a result of performing further audit procedures. For example, if, during the audit, it appears as though actual financial results are likely to be substantially different from the anticipated period-end financial results that were used initially to determine materiality for the financial statements as a whole, the auditor may be required, in accordance with paragraph .12, to revise materiality.

AU-C Section 330

Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to design and implement responses to the risks of material misstatement identified and assessed by the auditor in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and to evaluate the audit evidence obtained in an audit of financial statements. Section 700, *Forming an Opinion and Reporting on Financial Statements*, addresses the auditor's responsibility to form an opinion on the financial statements based on the evaluation of the audit evidence obtained.

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement through designing and implementing appropriate responses to those risks.

Definitions

.04 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Substantive procedure. An audit procedure designed to detect material misstatements at the assertion level. Substantive procedures comprise

- a. tests of details (classes of transactions, account balances, and disclosures) and
- b. substantive analytical procedures.

Test of controls. An audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

Requirements

Overall Responses

.05 The auditor should design and implement overall responses to address the assessed risks of material misstatement at the financial statement level. (Ref: par. .A1–.A3)

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Relevant Assertion Level

.06 The auditor should design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level. (Ref: par. .A4–.A9)

.07 In designing the further audit procedures to be performed, the auditor should

- a. consider the reasons for the assessed risk of material misstatement at the relevant assertion level for each class of transactions, account balance, and disclosure, including
 - i. the likelihood of material misstatement due to the particular characteristics of the relevant class of transactions, account balance, or disclosure (the inherent risk) and
 - ii. whether the risk assessment takes account of relevant controls (the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (that is, the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures), and (Ref: par. .A10–.A19)
- b. obtain more persuasive audit evidence the higher the auditor's assessment of risk. (Ref: par. .A20)

Tests of Controls

.08 The auditor should design and perform tests of controls to obtain sufficient appropriate audit evidence about the operating effectiveness of relevant controls if

- a. the auditor's assessment of risks of material misstatement at the relevant assertion level includes an expectation that the controls are operating effectively (that is, the auditor intends to rely on the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures) or
- b. substantive procedures alone cannot provide sufficient appropriate audit evidence at the relevant assertion level. (Ref: par. .A21–.A26)

.09 In designing and performing tests of controls, the auditor should obtain more persuasive audit evidence the greater the reliance the auditor places on the effectiveness of a control. (Ref: par. .A27)

Nature and Extent of Tests of Controls

.10 In designing and performing tests of controls, the auditor should

- a. perform other audit procedures in combination with inquiry to obtain audit evidence about the operating effectiveness of the controls, including
 - i. how the controls were applied at relevant times during the period under audit;
 - ii. the consistency with which they were applied; and
 - iii. by whom or by what means they were applied, including, when applicable, whether the person performing the control possesses the necessary authority and competence to perform the control effectively, and (Ref: par. .A28–.A32)
- b. determine whether the controls to be tested depend upon other controls (indirect controls) and, if so, whether it is necessary to obtain audit evidence supporting the operating effectiveness of those indirect controls. (Ref: par. .A33–.A34)

Timing of Tests of Controls

.11 The auditor should test controls for the particular time or throughout the period for which the auditor intends to rely on those controls, subject to paragraphs .12 and .15 that follow, in order to provide an appropriate basis for the auditor's intended reliance. (Ref: par. .A35)

Using Audit Evidence Obtained During an Interim Period

.12 If the auditor obtains audit evidence about the operating effectiveness of controls during an interim period, the auditor should

- a. obtain audit evidence about significant changes to those controls subsequent to the interim period and
- b. determine the additional audit evidence to be obtained for the remaining period. (Ref: par. .A36–.A37)

Using Audit Evidence Obtained in Previous Audits

.13 In determining whether it is appropriate to use audit evidence about the operating effectiveness of controls obtained in previous audits and, if so, the length of the time period that may elapse before retesting a control, the auditor should consider

- a. the effectiveness of other elements of internal control, including the control environment, the entity's monitoring of controls, and the entity's risk assessment process;
- b. the risks arising from the characteristics of the control, including whether the control is manual or automated;
- c. the effectiveness of general IT controls;
- d. the effectiveness of the control and its application by the entity, including the nature and extent of deviations in the application of the control noted in previous audits and whether there have been personnel changes that significantly affect the application of the control;
- e. whether the lack of a change in a particular control poses a risk due to changing circumstances; and
- f. the risks of material misstatement and the extent of reliance on the control. (Ref: par. .A38)

.14 If the auditor plans to use audit evidence from a previous audit about the operating effectiveness of specific controls, the auditor should perform audit procedures to establish the continuing relevance of that information to the current audit. The auditor should obtain this evidence by performing inquiry, combined with observation or inspection, to confirm the understanding of those specific controls, and

- a. if there have been changes that affect the continuing relevance of the audit evidence from the previous audit, the auditor should test the controls in the current audit. (Ref: par. .A39)
- b. if there have not been such changes, the auditor should test the controls at least once in every third audit and should test some controls during each audit to avoid the possibility of testing all the controls on which the auditor intends to rely in a single audit period with no testing of controls in the subsequent two audit periods. (Ref: par. .A40–.A42)

Controls Over Significant Risks

.15 If the auditor plans to rely on controls over a risk the auditor has determined to be a significant risk,¹ the auditor should test the operating effectiveness of those controls in the current period.

Evaluating the Operating Effectiveness of Controls

.16 When evaluating the operating effectiveness of relevant controls, the auditor should evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the relevant assertion being tested are effective. (Ref: par. .A43)

.17 If deviations from controls upon which the auditor intends to rely are detected, the auditor should make specific inquiries to understand these matters and their potential consequences and should determine whether

- a. the tests of controls that have been performed provide an appropriate basis for reliance on the controls,
- b. additional tests of controls are necessary, or
- c. the potential risks of misstatement need to be addressed using substantive procedures. (Ref: par. .A44)

Substantive Procedures

.18 Irrespective of the assessed risks of material misstatement, the auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure. (Ref: par. .A45–.A50)

.19 The auditor should consider whether external confirmation procedures are to be performed as substantive audit procedures. (Ref: par. .A51–.A56)

.20 The auditor should use external confirmation procedures for accounts receivable, except when one or more of the following is applicable: (Ref: par. .A55)

- a. The overall account balance is immaterial.

¹ Paragraphs .28–.30 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

- b. External confirmation procedures for accounts receivable would be ineffective. (Ref: par. .A54 and .A56)
- c. The auditor's assessed level of risk of material misstatement at the relevant assertion level is low, and the other planned substantive procedures address the assessed risk. In many situations, the use of external confirmation procedures for accounts receivable and the performance of other substantive procedures are necessary to reduce the assessed risk of material misstatement to an acceptably low level.

Substantive Procedures Related to the Financial Statement Closing Process

.21 The auditor's substantive procedures should include audit procedures related to the financial statement closing process, such as

- a. agreeing or reconciling the financial statements with the underlying accounting records and
- b. examining material journal entries and other adjustments made during the course of preparing the financial statements. (Ref: par. .A57)

Substantive Procedures Responsive to Significant Risks

.22 If the auditor has determined that an assessed risk of material misstatement at the relevant assertion level is a significant risk, the auditor should perform substantive procedures that are specifically responsive to that risk. When the approach to a significant risk consists only of substantive procedures, those procedures should include tests of details. (Ref: par. .A58)

Timing of Substantive Procedures

.23 If substantive procedures are performed at an interim date, the auditor should cover the remaining period by performing

- a. substantive procedures, combined with tests of controls for the intervening period, or
- b. if the auditor determines that it is sufficient, further substantive procedures only,

that provide a reasonable basis for extending the audit conclusions from the interim date to the period-end. (Ref: par. .A59–.A63)

.24 If misstatements that the auditor did not expect when assessing the risks of material misstatement are detected at an interim date, the auditor should evaluate whether the related assessment of risk and the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified. See section 240, *Consideration of Fraud in a Financial Statement Audit*.² (Ref: par. .A64)

Selecting Items for Testing to Obtain Audit Evidence

.25 When designing tests of controls and tests of details, the auditor should determine the means of selecting items for testing that are effective in meeting the purpose of the audit procedure. (Ref: par. .A65–.A71)

² Paragraphs .35–.36 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

Adequacy of Presentation and Disclosure

.26 The auditor should perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, is in accordance with the applicable financial reporting framework. (Ref: par. .A72)

Evaluating the Sufficiency and Appropriateness of Audit Evidence³

.27 Based on the audit procedures performed and the audit evidence obtained, the auditor should evaluate, before the conclusion of the audit, whether the assessments of the risks of material misstatement at the relevant assertion level remain appropriate. (Ref: par. .A73–.A74)

.28 The auditor should conclude whether sufficient appropriate audit evidence has been obtained. In forming a conclusion, the auditor should consider all relevant audit evidence, regardless of whether it appears to corroborate or contradict the assertions in the financial statements. (Ref: par. .A75)

.29 If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion, the auditor should attempt to obtain further audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor should express a qualified opinion or disclaim an opinion on the financial statements.⁴

Documentation

.30 The auditor should include in the audit documentation⁵

- a. the overall responses to address the assessed risks of material misstatement at the financial statement level and the nature, timing, and extent of the further audit procedures performed;
- b. the linkage of those procedures with the assessed risks at the relevant assertion level; and
- c. the results of the audit procedures, including the conclusions when such conclusions are not otherwise clear. (Ref: par. .A76)

.31 If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in previous audits, the auditor should include in the audit documentation the conclusions reached about relying on such controls that were tested in a previous audit.

.32 The auditor should include in the audit documentation the basis for any determination not to use external confirmation procedures for accounts receivable when the account balance is material.

.33 The auditor's documentation should demonstrate that the financial statements agree or reconcile with the underlying accounting records.

³ See section 700, *Forming an Opinion and Reporting on Financial Statements*.

⁴ Paragraphs .08–.10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*, address qualified, adverse, and disclaimer of opinions.

⁵ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

Application and Other Explanatory Material

Overall Responses (Ref: par. .05)

.A1 Overall responses to address the assessed risks of material misstatement at the financial statement level may include⁶

- emphasizing to the audit team the need to maintain professional skepticism.
- assigning more experienced staff or those with specialized skills or using specialists.
- providing more supervision.
- incorporating additional elements of unpredictability in the selection of further audit procedures to be performed.
- making general changes to the nature, timing, or extent of audit procedures (for example, performing substantive procedures at period-end instead of at an interim date or modifying the nature of audit procedures to obtain more persuasive audit evidence).

.A2 The assessment of the risks of material misstatement at the financial statement level and, thereby, the auditor's overall responses are affected by the auditor's understanding of the control environment. An effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity and, thus, for example, allow the auditor to conduct some audit procedures at an interim date rather than at the period-end. Deficiencies in the control environment, however, have the opposite effect (for example, the auditor may respond to an ineffective control environment by

- conducting more audit procedures as of the period-end rather than at an interim date,
- obtaining more extensive audit evidence from substantive procedures, and
- increasing the number of locations to be included in the audit scope).

.A3 Such considerations, therefore, have a significant bearing on the auditor's general approach (for example, an emphasis on substantive procedures [substantive approach] or an approach that uses tests of controls as well as substantive procedures [combined approach]).

Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Relevant Assertion Level

The Nature, Timing, and Extent of Further Audit Procedures (Ref: par. .06)

.A4 The auditor's assessment of the identified risks at the relevant assertion level provides a basis for considering the appropriate audit approach for designing and performing further audit procedures. For example, the auditor may determine that

⁶ Paragraphs .07–.08 of section 300, *Planning an Audit*, address the auditor's overall audit strategy.

- a. in addition to the substantive procedures that are required for all relevant assertions, in accordance with paragraph .18, an effective response to the assessed risk of material misstatement for a particular assertion can be achieved only by also performing tests of controls.
- b. performing only substantive procedures is appropriate for particular assertions, and therefore, the auditor excludes the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion or because testing controls would be inefficient, and therefore, the auditor does not intend to rely on the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures.
- c. a combined approach using both tests of controls and substantive procedures is an effective approach.

.A5 The nature of an audit procedure refers to its purpose (test of controls or substantive procedure) and its type (inspection, observation, inquiry, confirmation, recalculation, reperformance, or analytical procedure). See section 500, *Audit Evidence*, which provides further application guidance about audit procedures.⁷ The nature of the audit procedures is most important in responding to the assessed risks.

.A6 Timing of an audit procedure refers to when it is performed or the period or date to which the audit evidence applies.

.A7 Extent of an audit procedure refers to the quantity to be performed (for example, a sample size or the number of observations of a control activity).

.A8 Designing and performing further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed risks of material misstatement at the relevant assertion level provides a clear linkage between the auditor's further audit procedures and the risk assessment.

.A9 Because effective internal controls generally reduce but do not eliminate the risk of material misstatement, tests of controls reduce but do not eliminate the need for substantive procedures. In addition, analytical procedures alone may not be sufficient in some cases. For example, when auditing certain estimation processes, such as the allowance for doubtful accounts, the auditor may perform substantive procedures beyond analytical procedures (for example, examining cash collections subsequent to the period-end) due to the risk of management override of controls⁸ or the subjectivity of the account balance.

Responding to the Assessed Risks at the Assertion Level (Ref: par. .07a)

.A10 *Nature.* The auditor's assessed risks may affect both the types of audit procedures to be performed and their combination. For example, when an assessed risk is high, the auditor may confirm the completeness of the terms of a contract with the counterparty, in addition to inspecting the document. Further, certain audit procedures may be more appropriate for some assertions than others. For example, regarding revenue, tests of controls may be most responsive to the assessed risk of misstatement of the completeness assertion, whereas substantive procedures may be most responsive to the assessed risk of misstatement of the occurrence assertion.

⁷ Paragraphs .A10–.A26 of section 500, *Audit Evidence*.

⁸ The auditor is required by paragraphs .31–.33 of section 240 to perform audit procedures responsive to risks related to management override of controls.

.A11 The reasons for the assessment given to a risk are relevant in determining the nature of audit procedures. For example, if an assessed risk is lower because of the particular characteristics of a class of transactions without consideration of the related controls, then the auditor may determine that substantive analytical procedures alone provide sufficient appropriate audit evidence. On the other hand, if the assessed risk is lower because of internal controls and the auditor intends to base the substantive procedures on that low assessment, then the auditor performs tests of those controls, as required by paragraph .08a. This may be the case, for example, for a class of transactions of reasonably uniform, noncomplex characteristics that are routinely processed and controlled by the entity's information system.

.A12 *Timing.* The auditor may perform tests of controls or substantive procedures at an interim date or at the period-end. The higher the risk of material misstatement, the more likely it is that the auditor may decide it is more effective to perform substantive procedures nearer to or at the period-end rather than at an earlier date or to perform audit procedures unannounced or at unpredictable times (for example, performing audit procedures at selected locations on an unannounced basis). This is particularly relevant when considering the response to the risks of fraud. For example, the auditor may conclude that, when the risks of intentional misstatement or manipulation have been identified, audit procedures to extend audit conclusions from the interim date to the period-end would not be effective.

.A13 On the other hand, performing audit procedures before the period-end may assist the auditor in identifying significant issues at an early stage of the audit and consequently resolving them with the assistance of management or developing an effective audit approach to address such issues.

.A14 In addition, certain audit procedures can be performed only at or after the period-end. For example

- agreeing the financial statements to the accounting records,
- examining adjustments made during the course of preparing the financial statements, and
- procedures to respond to a risk that at the period-end the entity may have entered into improper sales contracts or transactions may not have been finalized.

.A15 Further relevant factors that influence the auditor's consideration of when to perform audit procedures include

- the effectiveness of the control environment.
- when relevant information is available (for example, electronic files may subsequently be overwritten, or procedures to be observed may occur only at certain times).
- the nature of the risk (for example, if there is a risk of inflated revenues to meet earnings expectations by subsequent creation of false sales agreements, the auditor may examine contracts available on the date of the period-end).
- the period or date to which the audit evidence relates.

.A16 *Extent.* The extent of an audit procedure judged necessary is determined after considering the materiality, assessed risk, and degree of assurance the auditor plans to obtain. When a single purpose is met by a combination of procedures, the extent of each procedure may be considered separately. In general, the extent of audit procedures increases as the risks of material misstatement increase. For example, in response to the assessed risks of material

misstatement due to fraud, increasing sample sizes or performing substantive analytical procedures at a more detailed level may be appropriate. However, increasing the extent of an audit procedure is effective only if the audit procedure itself is relevant to the specific risk.

.A17 The use of computer assisted audit techniques (CAATs) may enable more extensive testing of electronic transactions and account files, which may be useful when the auditor decides to modify the extent of testing (for example, in responding to the risks of material misstatement due to fraud). Such techniques can be used to select sample transactions from key electronic files, sort transactions with specific characteristics, or test an entire population instead of a sample.

.A18 *Considerations specific to governmental entities.* For the audits of governmental entities, the audit mandate and any other special auditing requirements may affect the auditor's consideration of the nature, timing, and extent of further audit procedures. For example, under some governmental audit requirements, the auditor is required to perform tests of controls, even if reliance is not planned.

.A19 *Considerations specific to smaller, less complex entities.* In the case of smaller entities, the auditor may not identify control activities, or the extent to which their existence or operation have been documented by the entity may be limited. In such cases, it may be more efficient for the auditor to perform further audit procedures that are primarily substantive procedures. In some rare cases, however, the absence of control activities or other components of control may make it impossible to obtain sufficient appropriate audit evidence.

Higher Assessments of Risk (Ref: par. .07b)

.A20 When obtaining more persuasive audit evidence because of a higher assessment of risk, the auditor may increase the quantity of the evidence or obtain evidence that is more relevant or reliable (for example by placing more emphasis on obtaining third party evidence or by obtaining corroborating evidence from a number of independent sources).

Tests of Controls

Designing and Performing Tests of Controls (Ref: par. .08)

.A21 Tests of controls are performed only on those controls that the auditor has determined are suitably designed to prevent, or detect and correct, a material misstatement in a relevant assertion. If substantially different controls were used at different times during the period under audit, each is considered separately.

.A22 Testing the operating effectiveness of controls is different from obtaining an understanding of and evaluating the design and implementation of controls. However, the same types of audit procedures are used. The auditor may, therefore, decide it is efficient to test the operating effectiveness of controls at the same time the auditor is evaluating their design and determining that they have been implemented.

.A23 Further, although some risk assessment procedures may not have been specifically designed as tests of controls, they may nevertheless provide audit evidence about the operating effectiveness of the controls and, consequently, serve as tests of controls. For example, the auditor's risk assessment procedures may have included the following:

- Inquiring about management's use of budgets

- Observing management's comparison of monthly budgeted and actual expenses
- Inspecting reports pertaining to the investigation of variances between budgeted and actual amounts

These audit procedures provide knowledge about the design of the entity's budgeting policies and whether they have been implemented but also may provide audit evidence about the effectiveness of the operation of budgeting policies in preventing, or detecting and correcting, material misstatements in the classification of expenses.

.A24 In addition, the auditor may design a test of controls to be performed concurrently with a test of details on the same transaction. Although the purpose of a test of controls is different from the purpose of a test of details, both may be accomplished concurrently by performing a test of controls and a test of details on the same transaction, which also is known as a *dual purpose test*. For example, the auditor may design and evaluate the results of a test to examine an invoice to determine whether it has been approved and to provide substantive audit evidence of a transaction. A dual purpose test is designed and evaluated by considering each purpose of the test separately.

.A25 In some cases, the auditor may find it impossible to design effective substantive procedures that, by themselves, provide sufficient appropriate audit evidence at the relevant assertion level.⁹ This may occur when an entity conducts its business using IT and no documentation of transactions is produced or maintained, other than through the IT system. In such cases, paragraph .08b requires the auditor to perform tests of relevant controls.

.A26 The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive analytical procedures in response to assessed risks. See section 520, *Analytical Procedures*, for further guidance.¹⁰

Audit Evidence and Intended Reliance (Ref: par. .09)

.A27 A higher level of assurance may be sought about the operating effectiveness of controls when the approach adopted consists primarily of tests of controls, in particular when it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.

Nature and Extent of Tests of Controls

.A28 *Other audit procedures in combination with inquiry (Ref: par. .10a)*. Inquiry alone is not sufficient to test the operating effectiveness of controls. Accordingly, other audit procedures are performed in combination with inquiry. In this regard, inquiry combined with inspection, recalculation, or reperformance may provide more assurance than inquiry and observation because an observation is pertinent only at the point in time at which it is made.

.A29 The nature of the particular control influences the type of audit procedure necessary to obtain audit evidence about whether the control was operating effectively. For example, if operating effectiveness is evidenced by documentation, the auditor may decide to inspect such documentation to obtain audit evidence about operating effectiveness. For other controls, however, documentation may not be available or relevant. For example, documentation of operation may not exist for some factors in the control environment, such as

⁹ Paragraph .31 of section 315.

¹⁰ Paragraph .A19 of section 520, *Analytical Procedures*.

assignment of authority and responsibility, or for some types of control activities, such as control activities performed by a computer. In such circumstances, audit evidence about operating effectiveness may be obtained through inquiry in combination with other audit procedures, such as observation or the use of CAATs.

A30 In some situations, particularly in smaller, less complex entities, an entity might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for an entity's financial reporting and associated controls, the auditor may take into account the combined competence of entity personnel and other parties that assist with functions related to financial reporting.

A31 *Extent of tests of controls.* When more persuasive audit evidence is needed regarding the effectiveness of a control, it may be appropriate to increase the extent of testing of the control. In addition to the degree of reliance on controls, matters the auditor may consider in determining the extent of tests of controls include the following:

- The frequency of the performance of the control by the entity during the period
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control
- The expected rate of deviation from a control
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control at the relevant assertion level
- The extent to which audit evidence is obtained from tests of other controls related to the relevant assertion

However, the rate of expected deviation may indicate that obtaining audit evidence from the performance of tests of controls will not be sufficient to reduce the control risk at the relevant assertion level. If the rate of expected deviation is expected to be high, tests of controls for a particular assertion may not provide sufficient appropriate audit evidence. Section 530, *Audit Sampling*, contains further guidance on the extent of testing.

A32 Because of the inherent consistency of IT processing, it may not be necessary to increase the extent of testing of an automated control. An automated control can be expected to function consistently unless the program (including the tables, files, or other permanent data used by the program) is changed. Once the auditor determines that an automated control is functioning as intended (which could be done at the time the control is initially implemented or at some other date), the auditor may consider performing tests to determine that the control continues to function effectively. Such tests might include determining that

- changes to the program are not made without being subject to the appropriate program change controls,
- the authorized version of the program is used for processing transactions, and
- other relevant general controls are effective.

Such tests also might include determining that changes to the programs have not been made, which may be the case when the entity uses packaged software applications without modifying or maintaining them. For example, the auditor

may inspect the record of the administration of IT security to obtain audit evidence that unauthorized access has not occurred during the period.

.A33 *Testing of indirect controls (Ref: par. .10b).* In some circumstances, it may be necessary to obtain audit evidence supporting the effective operation of indirect controls. For example, when the auditor decides to test the effectiveness of a user review of exception reports detailing sales in excess of authorized credit limits, the user review and related follow up is the control that is of direct relevance to the auditor. Controls over the accuracy of the information in the reports (for example, the general IT controls) are described as indirect controls.

.A34 Because of the inherent consistency of IT processing, audit evidence about the implementation of an automated application control, when considered in combination with audit evidence about the operating effectiveness of the entity's general IT controls (in particular, change controls), also may provide substantial audit evidence about its operating effectiveness.

Timing of Tests of Controls

.A35 *Intended period of reliance (Ref: par. .11).* Audit evidence pertaining only to a point in time may be sufficient for the auditor's purpose (for example, when testing controls over the entity's physical inventory counting at the period-end). If, on the other hand, the auditor intends to rely on a control over a period, tests that are capable of providing audit evidence that the control operated effectively at relevant times during that period are appropriate. Such tests may include tests of the entity's monitoring of controls.

.A36 *Using audit evidence obtained during an interim period (Ref: par. .12).* Relevant factors in determining what additional audit evidence to obtain about controls that were operating during the period remaining after an interim period, include the following:

- The significance of the assessed risks of material misstatement at the relevant assertion level
- The specific controls that were tested during the interim period and the results of those tests
- Significant changes to the controls since they were tested, including changes in the information system, processes, and personnel
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the auditor intends to reduce further substantive procedures based on the reliance of controls
- The effectiveness of the control environment

.A37 Additional audit evidence may be obtained, for example, by extending the testing of the operating effectiveness of controls over the remaining period or testing the entity's monitoring of controls.

.A38 *Using audit evidence obtained in previous audits (Ref: par. .13).* In certain circumstances, audit evidence obtained from previous audits may provide audit evidence, provided that the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit. For example, in performing a previous audit, the auditor may have determined that an automated control was functioning as intended. The auditor may obtain audit evidence to determine whether changes to the automated control have been made that affect its continued effective functioning through,

for example, inquiries of management and the inspection of logs to indicate what controls have been changed. Consideration of audit evidence about these changes may support either increasing or decreasing the expected audit evidence to be obtained in the current period about the operating effectiveness of the controls.

.A39 *Controls that have changed from previous audits (Ref: par. .14a).* Changes may affect the relevance of the audit evidence obtained in previous audits such that there may no longer be a basis for continued reliance. For example, changes in a system that enable an entity to receive a new report from the system probably do not affect the relevance of audit evidence from a previous audit; however, a change that causes data to be accumulated or calculated differently does affect it.

.A40 *Controls that have not changed from previous audits (Ref: par. .14b).* The auditor's decision on whether to rely on audit evidence obtained in previous audits for controls that

- have not changed since they were last tested and
- are not controls that mitigate a significant risk

is a matter of professional judgment. In addition, the length of time between retesting such controls is also a matter of professional judgment but is required by paragraph .14b to be at least once in every third audit. (This guidance may not be appropriate for audits not performed at least on an annual basis.)

.A41 In general, the higher the risk of material misstatement or the greater the reliance on controls, the shorter the time period elapsed, if any, is likely to be. Factors that may decrease the period for retesting a control or result in not relying on audit evidence obtained in previous audits at all include the following:

- A deficient control environment
- Deficient monitoring of controls
- A significant manual element to the relevant controls
- Personnel changes that significantly affect the application of the control
- Changing circumstances that indicate the need for changes in the control
- Deficient general IT controls

.A42 When there are a number of controls for which the auditor intends to rely on audit evidence obtained in previous audits, testing some of those controls in each audit provides corroborating information about the continuing effectiveness of the control environment. This contributes to the auditor's decision about whether it is appropriate to rely on audit evidence obtained in previous audits.

Evaluating the Operating Effectiveness of Controls (Ref: par. .16–.17)

.A43 In accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*, the identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control is an indicator of a material weakness.¹¹

¹¹ Paragraph .A11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

.A44 The concept of effectiveness of the operation of controls recognizes that some deviations in the way controls are applied by the entity may occur. Deviations from prescribed controls may be caused by such factors as changes in key personnel, significant seasonal fluctuations in volume of transactions, and human error. The detected rate of deviation, in particular, in comparison with the expected rate, may indicate that the control cannot be relied on to reduce risk at the relevant assertion level to that assessed by the auditor.

Substantive Procedures (Ref: par. .18)

.A45 Paragraph .18 requires the auditor to design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure, irrespective of the assessed risks of material misstatement. This requirement reflects the facts that (i) the auditor's assessment of risk is judgmental and may not identify all risks of material misstatement and (ii) inherent limitations to internal control exist, including management override.

Nature and Extent of Substantive Procedures

.A46 Depending on the circumstances, the auditor may determine the following:

- Performing only substantive analytical procedures will be sufficient to reduce audit risk to an acceptably low level, such as, for example, when the auditor's assessment of risk is supported by audit evidence from tests of controls.
- Only tests of details are appropriate.
- A combination of substantive analytical procedures and tests of details are most responsive to the assessed risks.

.A47 Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. Section 520 addresses the application of analytical procedures during an audit.

.A48 The nature of the risk and assertion is relevant to the design of tests of details. For example, tests of details related to the existence or occurrence assertion may involve selecting from items contained in a financial statement amount and obtaining the relevant audit evidence. On the other hand, tests of details related to the completeness assertion may involve selecting from items that are expected to be included in the relevant financial statement amount and investigating whether they are included. For example, the auditor might inspect subsequent cash disbursements and compare them with the recorded accounts payable to determine whether any purchases had been omitted from accounts payable.

.A49 Because the assessment of the risks of material misstatement takes account of internal control, the extent of substantive procedures may need to be increased when the results from tests of controls are unsatisfactory. However, increasing the extent of an audit procedure is appropriate only if the audit procedure itself is relevant to the specific risk.

.A50 In designing tests of details, the extent of testing is ordinarily thought of in terms of the sample size. However, other matters also are relevant, including whether it is more effective to use other selective means of testing. See paragraphs .A65–.A71.

Considering Whether External Confirmation Procedures Are to Be Performed (Ref: par. .19–.20)

.A51 External confirmation procedures frequently may be relevant when addressing assertions associated with account balances and their elements but need not be restricted to these items. For example, the auditor may request external confirmation of the terms of agreements, contracts, or transactions between an entity and other parties. External confirmation procedures also may be performed to obtain audit evidence about the absence of certain conditions. For example, a request may specifically seek confirmation that no "side agreement" exists that may be relevant to an entity's revenue cut-off assertion. Other situations in which external confirmation procedures may provide relevant audit evidence in responding to assessed risks of material misstatement include the following:

- Bank balances and other information relevant to banking relationships
- Inventories held by third parties at bonded warehouses for processing or on consignment
- Property title deeds held by lawyers or financiers for safe custody or as security
- Investments held for safekeeping by third parties or purchased from stockbrokers but not delivered at the balance sheet date
- Amounts due to lenders, including relevant terms of repayment and restrictive covenants
- Accounts payable balances and terms

.A52 Although external confirmations may provide relevant audit evidence relating to certain assertions, some assertions exist for which external confirmations provide less relevant audit evidence. For example, external confirmations provide less relevant audit evidence relating to the recoverability of accounts receivable balances than they do of their existence.

.A53 The auditor may determine that external confirmation procedures performed for one purpose provide an opportunity to obtain audit evidence about other matters. For example, confirmation requests for bank balances often include requests for information relevant to other financial statement assertions. Such considerations may influence the auditor's decision about whether to perform external confirmation procedures.

.A54 Factors that may assist the auditor in determining whether external confirmation procedures are to be performed as substantive audit procedures include the following:

- The confirming party's knowledge of the subject matter. Responses may be more reliable if provided by a person at the confirming party who has the requisite knowledge about the information being confirmed.
- The ability or willingness of the intended confirming party to respond. For example, the confirming party
 - may not accept responsibility for responding to a confirmation request,
 - may consider responding too costly or time consuming,
 - may have concerns about the potential legal liability resulting from responding,

- may account for transactions in different currencies, or
- may operate in an environment in which responding to confirmation requests is not a significant aspect of day-to-day operations.

In such situations, confirming parties may not respond, may respond in a casual manner, or may attempt to restrict the reliance placed on the response.

- The objectivity of the intended confirming party. If the confirming party is a related party of the entity, responses to confirmation requests may be less reliable.

.A55 For purposes of this section, *accounts receivable* means

- a. the entity's claims against customers that have arisen from the sale of goods or services in the normal course of business; and
- b. a financial institution's loans.

.A56 External confirmation procedures may be ineffective when, based on prior years' audit experience or experience with similar entities

- response rates to properly designed confirmation requests will be inadequate; or
- responses are known or expected to be unreliable.

If the auditor has experienced poor response rates to properly designed confirmation requests in prior audits, the auditor may instead consider changing the manner in which the confirmation process is performed, with the objective of increasing the response rates, or may consider obtaining audit evidence from other sources.

Substantive Procedures Related to the Financial Statement Closing Process (Ref: par. .21b)

.A57 The nature and also the extent of the auditor's examination of journal entries and other adjustments depends on the nature and complexity of the entity's financial reporting process and the related risks of material misstatement.

Substantive Procedures Responsive to Significant Risks (Ref: par. .22)

.A58 Paragraph .22 requires the auditor to perform substantive procedures that are specifically responsive to risks the auditor has determined to be significant risks. Audit evidence in the form of external confirmations received directly by the auditor from appropriate confirming parties may assist the auditor in obtaining audit evidence with the high level of reliability that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error. For example, if the auditor identifies that management is under pressure to meet earnings expectations, a risk may exist that management is inflating sales by improperly recognizing revenue related to sales agreements with terms that preclude revenue recognition or by invoicing sales before shipment. In these circumstances, the auditor may, for example, design external confirmation procedures not only to confirm outstanding amounts but also to confirm the details of the sales agreements, including date, any rights of return, and delivery terms. In addition, the auditor may find it effective to supplement such external confirmation procedures with inquiries of nonfinancial personnel in the entity regarding any changes in sales agreements and delivery terms.

Timing of Substantive Procedures (Ref: par. .23–.24)

.A59 In most cases, audit evidence from a previous audit's substantive procedures provides little or no audit evidence for the current period. However,

exceptions exist (for example, a legal opinion obtained in a previous audit related to the structure of a securitization to which no changes have occurred may be relevant in the current period). In such cases, it may be appropriate to use audit evidence from a previous audit's substantive procedures if that evidence and the related subject matter have not fundamentally changed and audit procedures have been performed during the current period to establish its continuing relevance.

.A60 *Using audit evidence obtained during an interim period (Ref: par. .23).*

In some circumstances, the auditor may determine that it is effective to perform substantive procedures at an interim date and compare and reconcile information concerning the balance at the period-end with the comparable information at the interim date to

- a. identify amounts that appear unusual,
- b. investigate any such amounts, and
- c. perform substantive analytical procedures or tests of details to test the intervening period.

.A61 Performing substantive procedures at an interim date without undertaking additional procedures at a later date increases the risk that the auditor will not detect misstatements that may exist at the period-end. This risk increases as the remaining period is lengthened. Factors such as the following may influence whether to perform substantive procedures at an interim date:

- The effectiveness of the control environment and other relevant controls
- The availability at a later date of information necessary for the auditor's procedures
- The purpose of the substantive procedure
- The assessed risk of material misstatement
- The nature of the class of transactions or account balance and relevant assertions
- The ability of the auditor to perform appropriate substantive procedures or substantive procedures combined with tests of controls to cover the remaining period in order to reduce the risk that misstatements that may exist at the period-end will not be detected

.A62 In circumstances in which the auditor has identified risks of material misstatement due to fraud, the auditor's responses to address those risks may include changing the timing of audit procedures. For example, the auditor might conclude that, given the risks of intentional misstatement or manipulation, audit procedures to extend audit conclusions from an interim date to the period-end reporting date would not be effective. In such circumstances, the auditor might conclude that substantive procedures performed at or near the end of the reporting period best address an identified risk of material misstatement due to fraud.

.A63 Factors such as the following may influence whether to perform substantive analytical procedures with respect to the period between the interim date and the period-end:

- Whether the period-end balances of the particular classes of transactions or account balances are reasonably predictable with respect to amount, relative significance, and composition

- Whether the entity's procedures for analyzing and adjusting such classes of transactions or account balances at interim dates and establishing proper accounting cutoffs are appropriate
- Whether the information system relevant to financial reporting will provide information concerning the balances at the period-end and the transactions in the remaining period that is sufficient to permit investigation of the following:
 - Significant unusual transactions or entries (including those at or near the period-end)
 - Other causes of significant fluctuations or expected fluctuations that did not occur
 - Changes in the composition of the classes of transactions or account balances

.A64 *Misstatements detected at an interim date (Ref: par. .24).* When the auditor concludes that the planned nature, timing, or extent of substantive procedures covering the remaining period need to be modified as a result of unexpected misstatements detected at an interim date, such modification may include extending or repeating, at the period-end, the procedures performed at the interim date.

Selecting Items for Testing to Obtain Audit Evidence (Ref: par. .25)

.A65 An effective test provides appropriate audit evidence to the extent that it will be sufficient for the auditor's purpose when taken with other audit evidence obtained or to be obtained. In selecting items for testing, the auditor is required by section 500 to determine the relevance and reliability of information to be used as audit evidence;¹² the other aspect of effectiveness (sufficiency) is an important consideration in selecting items to test. The means available to the auditor for selecting items for testing are

- a. selecting all items (100 percent examination),
- b. selecting specific items, and
- c. audit sampling.

.A66 The application of any one or combination of these means may be appropriate depending on the particular circumstances (for example, the risks of material misstatement related to the assertion being tested and the practicality and efficiency of the different means).

Selecting All Items

.A67 The auditor may decide that it will be most appropriate to examine the entire population of items that make up a class of transactions or account balance (or a stratum within that population). A 100 percent examination is unlikely in the case of tests of controls; however, it may be more common for tests of details. A 100 percent examination may be appropriate when, for example

- the population constitutes a small number of large value items,
- a significant risk exists and other means do not provide sufficient appropriate audit evidence, or

¹² Paragraph .07 of section 500.

- the repetitive nature of a calculation or other process performed automatically by an information system makes a 100 percent examination cost effective.

Selecting Specific Items

.A68 The auditor may decide to select specific items from a population. In making this decision, factors that may be relevant include the auditor's understanding of the entity, the assessed risks of material misstatement, and the characteristics of the population being tested. The judgmental selection of specific items is subject to nonsampling risk. Specific items selected may include

- high value or key items. The auditor may decide to select specific items within a population because they are of high value or exhibit some other characteristic (for example, items that are suspicious, unusual, particularly risk prone, or have a history of error).
- all items over a certain amount. The auditor may decide to examine items whose recorded values exceed a certain amount in order to verify a large proportion of the total amount of a class of transactions or account balance.
- items to obtain information. The auditor may examine items to obtain information about matters such as the nature of the entity or the nature of transactions.

.A69 Although selective examination of specific items from a class of transactions or account balance often will be an efficient means of obtaining audit evidence, it does not constitute audit sampling. Consequently, the results of audit procedures applied to items selected in this way cannot be projected to the entire population; furthermore, selective examination of specific items does not, by itself, provide sufficient appropriate audit evidence concerning the remainder of the population.

Audit Sampling

.A70 Audit sampling is designed to enable conclusions to be drawn about an entire population on the basis of testing a sample drawn from the population. Audit sampling is discussed in section 530.

.A71 Valid conclusions ordinarily may be drawn using sampling approaches. However, if the sample size is too small, the sampling approach or the method of selection is not appropriate to achieve the specific audit objective or exceptions are not appropriately followed up, an unacceptable risk will exist that the auditor's conclusion based on a sample may be different from the conclusion reached if the entire population was subjected to the same audit procedure. Section 530 addresses planning, performing, and evaluating audit samples.

Adequacy of Presentation and Disclosure (Ref: par. .26)

.A72 Evaluating the overall presentation of the financial statements, including the related disclosures, relates to whether the individual financial statements are presented in a manner that reflects the appropriate classification and description of financial information and the form, arrangement, and content of the financial statements, including the related notes. This includes, for example, the terminology used, the amount of detail given, the classification of items in the financial statements, and the basis of amounts set forth.

Evaluating the Sufficiency and Appropriateness of Audit Evidence (Ref: par. .27–.29)

.A73 An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing, or extent of other planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessments were based. For example

- the extent of misstatements that the auditor detects by performing substantive procedures may alter the auditor's professional judgment about the risk assessments and indicate a significant deficiency or material weakness in internal control.
- the auditor may become aware of discrepancies in accounting records or conflicting or missing evidence.
- analytical procedures performed at the overall review stage of the audit may indicate a previously unrecognized risk of material misstatement.

In such circumstances, the auditor may need to reevaluate the planned audit procedures, based on the revised consideration of assessed risks for all or some of the classes of transactions, account balances, or disclosures and related assertions. Section 315 contains further guidance on revising the auditor's risk assessment.¹³

.A74 The auditor cannot assume that an instance of fraud or error is an isolated occurrence. Therefore, the consideration of how the detection of a misstatement affects the assessed risks of material misstatement is important in determining whether the assessment remains appropriate.

.A75 The auditor's professional judgment about what constitutes sufficient appropriate audit evidence is influenced by such factors as the

- significance of the potential misstatement in the relevant assertion and the likelihood of its having a material effect, individually or aggregated with other potential misstatements, on the financial statements (see section 450, *Evaluation of Misstatements Identified During the Audit*).
- effectiveness of management's responses and controls to address the risks.
- experience gained during previous audits with respect to similar potential misstatements.
- results of audit procedures performed, including whether such audit procedures identified specific instances of fraud or error.
- source and reliability of the available information.
- persuasiveness of the audit evidence.
- understanding of the entity and its environment, including its internal control.

¹³ Paragraph .32 of section 315.

Documentation (Ref: par. .30)

.A76 The form and extent of audit documentation is a matter of professional judgment and is influenced by the nature, size, and complexity of the entity; internal control of the entity; availability of information from the entity; and the audit methodology and technology used in the audit.

AU-C Section 402

Audit Considerations Relating to an Entity Using a Service Organization

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the user auditor's responsibility for obtaining sufficient appropriate audit evidence in an audit of the financial statements of a user entity that uses one or more service organizations. Specifically, it expands on how the user auditor applies section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, in obtaining an understanding of the user entity, including internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement and in designing and performing further audit procedures responsive to those risks.

.02 Many entities outsource aspects of their business activities to organizations that provide services ranging from performing a specific task under the direction of the entity to replacing entire business units or functions of the entity. Many of the services provided by such organizations are integral to the entity's business operations; however, not all of those services are relevant to the audit.

.03 Services provided by a service organization are relevant to the audit of a user entity's financial statements when those services and the controls over them affect the user entity's information system, including related business processes, relevant to financial reporting. Although most controls at the service organization are likely to relate to financial reporting, other controls also may be relevant to the audit, such as controls over the safeguarding of assets. A service organization's services are part of a user entity's information system, including related business processes, relevant to financial reporting if these services affect any of the following:

Risk Assessment and Response to Assessed Risks

- a. The classes of transactions in the user entity's operations that are significant to the user entity's financial statements;
- b. The procedures within both IT and manual systems by which the user entity's transactions are initiated, authorized, recorded, processed, corrected as necessary, transferred to the general ledger, and reported in the financial statements;
- c. The related accounting records, supporting information, and specific accounts in the user entity's financial statements that are used to initiate, authorize, record, process, and report the user entity's transactions. This includes the correction of incorrect information and how information is transferred to the general ledger; the records may be in either manual or electronic form;
- d. How the user entity's information system captures events and conditions, other than transactions, that are significant to the financial statements;
- e. The financial reporting process used to prepare the user entity's financial statements, including significant accounting estimates and disclosures; and
- f. Controls surrounding journal entries, including nonstandard journal entries used to record nonrecurring, unusual transactions, or adjustments.

.04 The nature and extent of work to be performed by the user auditor regarding the services provided by a service organization depend on the nature and significance of those services to the user entity and the relevance of those services to the audit.

.05 This section does not apply to services that are limited to processing an entity's transactions that are specifically authorized by the entity, such as the processing of checking account transactions by a bank or the processing of securities transactions by a broker (that is, when the user entity retains responsibility for authorizing the transactions and maintaining the related accountability). In addition, this section does not apply to the audit of transactions arising from an entity that holds a proprietary financial interest in another entity, such as a partnership, corporation, or joint venture, when the partnership, corporation, or joint venture performs no processing on behalf of the entity.

Effective Date

.06 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.07 The objectives of the user auditor, when the user entity uses the services of a service organization, are to

- a. obtain an understanding of the nature and significance of the services provided by the service organization and their effect on the user entity's internal control relevant to the audit, sufficient to identify and assess the risks of material misstatement.
- b. design and perform audit procedures responsive to those risks.

Definitions

.08 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Complementary user entity controls. Controls that management of the service organization assumes, in the design of its service, will be implemented by user entities, and which, if necessary to achieve the control objectives stated in management's description of the service organization's system, are identified as such in that description.

Report on management's description of a service organization's system and the suitability of the design of controls (referred to in this section as a *type 1 report*). A report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether, in all material respects, and based on suitable criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented as of a specified date
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed to achieve those control objectives as of the specified date
- c. A service auditor's report that expresses an opinion on the matters in *b(i–ii)*

Report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls (referred to in this section as a *type 2 report*). A report that comprises the following:

- a. Management's description of the service organization's system
- b. A written assertion by management of the service organization about whether in all material respects and, based on suitable criteria
 - i. management's description of the service organization's system fairly presents the service organization's system that was designed and implemented throughout the specified period
 - ii. the controls related to the control objectives stated in management's description of the service organization's system were suitably designed throughout the specified period to achieve those control objectives
 - iii. the controls related to the control objectives stated in management's description of the service organization's system operated effectively throughout the specified period to achieve those control objectives
- c. A service auditor's report that
 - i. expresses an opinion on the matters in *b(i–iii)*
 - ii. includes a description of the service auditor's tests of controls and the results thereof

Service auditor. A practitioner who reports on controls at a service organization.

Service organization. An organization or segment of an organization that provides services to user entities that are relevant to those user entities' internal control over financial reporting.

Service organization's system. The policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor's report. Management's description of the service organization's system identifies the services covered, the period to which the description relates (or in the case of a type 1 report, the date to which the description relates), the control objectives specified by management or an outside party, the party specifying the control objectives (if not specified by management), and the related controls.

Subservice organization. A service organization used by another service organization to perform some of the services provided to user entities that are relevant to those user entities' internal control over financial reporting. (Ref: par. .A20)

User auditor. An auditor who audits and reports on the financial statements of a user entity.

User entity. An entity that uses a service organization and whose financial statements are being audited.

Requirements

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

.09 When obtaining an understanding of the user entity in accordance with section 315, the user auditor should obtain an understanding of how the user entity uses the services of a service organization in the user entity's operations, including the following:¹ (Ref: par. .A1–.A2)

- a. The nature of the services provided by the service organization and the significance of those services to the user entity, including their effect on the user entity's internal control (Ref: par. .A3–.A5)
- b. The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organization (Ref: par. .A6)
- c. The degree of interaction between the activities of the service organization and those of the user entity (Ref: par. .A7)
- d. The nature of the relationship between the user entity and the service organization, including the relevant contractual terms for the activities undertaken by the service organization (Ref: par. .A8–.A11)

.10 When obtaining an understanding of internal control relevant to the audit in accordance with section 315, the user auditor should evaluate the design and implementation of relevant controls at the user entity that relate to the services provided by the service organization, including those that

¹ Paragraph .12 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

are applied to the transactions processed by the service organization.² (Ref: par. .A12–.A14)

.11 The user auditor should determine whether a sufficient understanding of the nature and significance of the services provided by the service organization and their effect on the user entity's internal control relevant to the audit has been obtained to provide a basis for the identification and assessment of risks of material misstatement.

.12 If the user auditor is unable to obtain a sufficient understanding from the user entity, the user auditor should obtain that understanding from one or more of the following procedures:

- a. Obtaining and reading a type 1 or type 2 report, if available
- b. Contacting the service organization, through the user entity, to obtain specific information
- c. Visiting the service organization and performing procedures that will provide the necessary information about the relevant controls at the service organization
- d. Using another auditor to perform procedures that will provide the necessary information about the relevant controls at the service organization (Ref: par. .A15–.A20)

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organization

.13 In determining the sufficiency and appropriateness of the audit evidence provided by a type 1 or type 2 report, the user auditor should be satisfied regarding the following:

- a. The service auditor's professional competence and independence from the service organization
- b. The adequacy of the standards under which the type 1 or type 2 report was issued (Ref: par. .A21–.A22)

.14 If the user auditor plans to use a type 1 or type 2 report as audit evidence to support the user auditor's understanding about the design and implementation of controls at the service organization, the user auditor should

- a. evaluate whether the type 1 report is as of a date, or in the case of a type 2 report, is for a period that is appropriate for the user auditor's purposes;
- b. evaluate the sufficiency and appropriateness of the evidence provided by the report for the understanding of the user entity's internal control relevant to the audit; and
- c. determine whether complementary user entity controls identified by the service organization are relevant in addressing the risks of material misstatement relating to the relevant assertions in the user entity's financial statements and, if so, obtain an understanding of whether the user entity has designed and implemented such controls. (Ref: par. .A23–.A24)

Responding to the Assessed Risks of Material Misstatement

.15 In responding to assessed risks in accordance with section 330, the user auditor should

² Paragraph .13 of section 315.

- a. determine whether sufficient appropriate audit evidence concerning the relevant financial statement assertions is available from records held at the user entity and, if not,
- b. perform further audit procedures to obtain sufficient appropriate audit evidence or use another auditor to perform those procedures at the service organization on the user auditor's behalf. (Ref: par. .A25–.A29)

Tests of Controls

.16 When the user auditor's risk assessment includes an expectation that controls at the service organization are operating effectively, the user auditor should obtain audit evidence about the operating effectiveness of those controls from one or more of the following procedures:

- a. Obtaining and reading a type 2 report, if available
- b. Performing appropriate tests of controls at the service organization
- c. Using another auditor to perform tests of controls at the service organization on behalf of the user auditor (Ref: par. .A30–.A31)

Using a Type 2 Report as Audit Evidence That Controls at the Service Organization Are Operating Effectively

.17 If, in accordance with paragraph .16a, the user auditor plans to use a type 2 report as audit evidence that controls at the service organization are operating effectively, the user auditor should determine whether the service auditor's report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment by

- a. evaluating whether the type 2 report is for a period that is appropriate for the user auditor's purposes;
- b. determining whether complementary user entity controls identified by the service organization are relevant in addressing the risks of material misstatement relating to the relevant assertions in the user entity's financial statements and, if so, obtaining an understanding of whether the user entity has designed and implemented such controls and, if so, testing their operating effectiveness;
- c. evaluating the adequacy of the time period covered by the tests of controls and the time elapsed since the performance of the tests of controls; and
- d. evaluating whether the tests of controls performed by the service auditor and the results thereof, as described in the service auditor's report, are relevant to the assertions in the user entity's financial statements and provide sufficient appropriate audit evidence to support the user auditor's risk assessment. (Ref: par. .A32–.A40)

Type 1 and Type 2 Reports That Exclude the Services of a Subservice Organization

.18 If the user auditor plans to use a type 1 or a type 2 report that excludes the services provided by a subservice organization and those services are relevant to the audit of the user entity's financial statements, the user auditor should apply the requirements of this section with respect to the services provided by the subservice organization. (Ref: par. .A41)

Fraud, Noncompliance With Laws and Regulations, and Uncorrected Misstatements Related to Activities at the Service Organization

.19 The user auditor should inquire of management of the user entity about whether the service organization has reported to the user entity, or whether the user entity is otherwise aware of, any fraud, noncompliance with laws and regulations, or uncorrected misstatements affecting the financial statements of the user entity. The user auditor should evaluate how such matters, if any, affect the nature, timing, and extent of the user auditor's further audit procedures, including the effect on the user auditor's conclusions and user auditor's report. (Ref: par. .A42)

Reporting by the User Auditor

.20 The user auditor should modify the opinion in the user auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, if the user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organization relevant to the audit of the user entity's financial statements. (Ref: par. .A43)

.21 The user auditor should not refer to the work of a service auditor in the user auditor's report containing an unmodified opinion. (Ref: par. .A44)

.22 If reference to the work of a service auditor is relevant to an understanding of a modification of the user auditor's opinion, the user auditor's report should indicate that such reference does not diminish the user auditor's responsibility for that opinion. (Ref: par. .A44)

Application and Other Explanatory Material

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

Sources of Information (Ref: par. .09)

.A1 Information about the nature of the services provided by a service organization may be available from a wide variety of sources, such as the following:

- User manuals
- System overviews
- Technical manuals
- The contract or service level agreement between the user entity and the service organization
- Reports by service organizations, internal auditors, or regulatory authorities on controls at the service organization
- Reports by the service auditor, if available

.A2 Knowledge obtained through the user auditor's experience with the service organization—for example, through experience with other audit engagements—may also be helpful in obtaining an understanding of the nature of the services provided by the service organization. This may be particularly helpful if the services and controls at the service organization over those services are highly standardized.

Nature of the Services Provided by the Service Organization (Ref: par. .09a)

.A3 A user entity may use a service organization, such as one that processes transactions and maintains the related accountability for the user entity or records transactions and processes related data. Service organizations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others, mortgage servicers that service mortgages for others, and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions.

.A4 Examples of services provided by service organizations that may be relevant to the audit include the following:

- Maintenance of the user entity's accounting records
- Management of the user entity's assets
- Initiating, authorizing, recording, or processing transactions as an agent of the user entity

Considerations Specific to Smaller Entities

.A5 Smaller entities may use external bookkeeping services ranging from the processing of certain transactions (for example, payment of payroll taxes) and maintenance of their accounting records to the preparation of their financial statements. The use of such a service organization for the preparation of its financial statements does not relieve management of the smaller entity and, when appropriate, those charged with governance of their responsibilities for the financial statements.³

Nature and Materiality of Transactions Processed by the Service Organization (Ref: par. .09b)

.A6 A service organization may establish policies and procedures (controls) that affect the user entity's internal control. These controls are at least in part physically and operationally separate from the user entity. The significance of the controls at the service organization to the user entity's internal control depends on the nature of the services provided by the service organization, including the nature and materiality of the transactions it processes for the user entity. In certain situations, the transactions processed and the accounts affected by the service organization may not appear to be material to the user entity's financial statements, but the nature of the transactions processed may be significant and the user auditor may determine that an understanding of controls over the processing of those transactions is necessary in the circumstances.

The Degree of Interaction Between the Activities of the Service Organization and the User Entity (Ref: par. .09c)

.A7 The significance of the controls at the service organization to the user entity's internal control also depends on the degree of interaction between the service organization's activities and those of the user entity. The degree of interaction refers to the extent to which a user entity is able to and elects to implement effective controls over the processing performed by the service organization. For example, a high degree of interaction exists between the activities of the user entity and those at the service organization when the user entity

³ Paragraph .05 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

authorizes transactions and the service organization processes and accounts for those transactions. In these circumstances, it may be practicable for the user entity to implement effective controls over those transactions. On the other hand, when the service organization initiates or initially records, processes, and accounts for the user entity's transactions, a lower degree of interaction exists between the two organizations. In these circumstances, the user entity may be unable to, or may elect not to, implement effective controls over these transactions at the user entity and may rely on controls at the service organization.

Nature of the Relationship Between the User Entity and the Service Organization (Ref: par. .09d)

.A8 The contract or service level agreement between the user entity and the service organization may provide for matters such as the following:

- The information to be provided to the user entity and the responsibilities for initiating transactions relating to the activities undertaken by the service organization
- Complying with the requirements of regulatory bodies concerning the form of records to be maintained or access to them
- The indemnification, if any, to be provided to the user entity in the event of a performance failure
- Whether the service organization will provide a report on its controls and, if so, whether such a report will be a type 1 or type 2 report
- Whether the user auditor has rights of access to the accounting records of the user entity maintained by the service organization and other information necessary for the conduct of the audit
- Whether the agreement allows for direct communication between the user auditor and the service auditor

.A9 A direct relationship exists between the service organization and the user entity when the user entity enters into an agreement with the service organization, and between the service organization and the service auditor when the service organization engages the service auditor. These relationships do not create a direct relationship between the user auditor and the service auditor.

.A10 Communications between the user auditor and the service auditor usually are conducted through the user entity and the service organization. A user auditor may request through the user entity that a service auditor perform procedures for the benefit of the user auditor. For example, a service auditor may be engaged by the service organization to perform an agreed-upon procedures engagement related to testing controls at a service organization or performing procedures related to a user entity's transactions or balances maintained by the service organization. AT section 201, *Agreed-Upon Procedures Engagements*, establishes standards and provides guidance for agreed-upon procedures engagements.

Considerations Specific to Governmental Entities

.A11 For governmental entities, the auditor may be required to perform audit procedures with respect to the entity's compliance with laws and regulations. Such required procedures may include obtaining an understanding of internal control over compliance, performing tests of controls over compliance, and performing tests of compliance. Consequently, auditors of governmental

entities that use a service organization may determine that it is appropriate to request, through the governmental entity, that the service auditor perform specified compliance-related audit procedures with respect to services provided by the service organization.⁴

Understanding the Controls Relating to Services Provided by the Service Organization (Ref: par. .10)

.A12 The user entity may establish controls over the service organization's services that may be tested by the user auditor and that may enable the user auditor to conclude that the user entity's controls are operating effectively for some or all of the related assertions, regardless of the controls in place at the service organization. If a user entity, for example, uses a service organization to process its payroll transactions, the user entity may establish controls over the submission and receipt of payroll information that could prevent, or detect and correct, material misstatements. These controls may include the following:

- Comparing the data submitted to the service organization with reports of information received from the service organization after the data has been processed
- Recomputing a sample of the payroll amounts for clerical accuracy and reviewing the total amount of the payroll for reasonableness

.A13 In this situation, the user auditor may perform tests of the user entity's controls over payroll processing that would provide a basis for the user auditor to conclude that the user entity's controls are operating effectively for the assertions related to payroll transactions.

.A14 As noted in section 315, for some risks the auditor may judge that it is not possible or practicable to obtain sufficient appropriate audit evidence only from substantive procedures.⁵ Such risks may relate to the inaccurate or incomplete recording of routine and significant classes of transactions and account balances that may involve highly automated processing with little or no manual intervention. Risks related to such automated processing may be particularly present when the user entity uses a service organization. In such cases, the user entity's controls over such risks are relevant to the audit and the user auditor is required to obtain an understanding of and to evaluate such controls in accordance with paragraphs .09–.10 of this section.

Further Procedures When a Sufficient Understanding Cannot Be Obtained From the User Entity (Ref: par. .12)

.A15 The user auditor's decision regarding which procedure, individually or in combination, in paragraph .12 to undertake in order to obtain the information necessary to provide a basis for the identification and assessment of the risks of material misstatement regarding the user entity's use of the service organization, may be influenced by such matters as the following:

- The size of both the user entity and the service organization
- The complexity of the transactions at the user entity and the complexity of the services provided by the service organization
- The location of the service organization (for example, the user auditor may decide to use another auditor to perform procedures at the service organization on the user auditor's behalf if the service organization is in a remote location)

⁴ Section 935, *Compliance Audits*, addresses audits of an entity's compliance.

⁵ Paragraph .31 of section 315.

- Whether the procedure(s) is expected to effectively provide the user auditor with sufficient appropriate audit evidence
- The nature of the relationship between the user entity and the service organization

.A16 A service organization may engage a service auditor to report on the description and design of its controls (type 1 report) or on the description and design of its controls and their operating effectiveness (type 2 report). Type 1 or type 2 reports may be issued under Statement on Standards for Attestation Engagements No. 16, *Reporting on Controls at a Service Organization* (AT sec. 801), or under standards promulgated by an authorized or recognized standards-setting organization (for example, the International Auditing and Assurance Standards Board).

.A17 The availability of a type 1 or type 2 report generally will depend on whether the contract between the service organization and the user entity includes the provision of such a report by the service organization. A service organization may also elect, for practical reasons, to make a type 1 or type 2 report available to the user entities. However, in some cases, a type 1 or type 2 report may not be available to user entities.

.A18 In some circumstances, a user entity may outsource one or more significant business units or functions, such as its entire tax planning and compliance functions, finance and accounting functions, or the controllership function to one or more service organizations. As a report on controls at the service organization may not be available in these circumstances, visiting the service organization may be the most effective procedure for the user auditor to gain an understanding of controls at the service organization because there is likely to be direct interaction of management of the user entity with management of the service organization.

.A19 Another auditor may be used to perform procedures that will provide the necessary information about the relevant controls at the service organization. If a type 1 or type 2 report has been issued, the user auditor may use the service auditor to perform these procedures as the service auditor has an existing relationship with the service organization. The user auditor using the work of another auditor may find the guidance in section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, useful as it relates to understanding another auditor (including that auditor's independence and professional competence); involvement in the work of another auditor in planning the nature, extent, and timing of such work; and in evaluating the sufficiency and appropriateness of the audit evidence obtained.⁶

.A20 A user entity may use a service organization that in turn uses a subservice organization to provide some of the services provided to a user entity that are relevant to those user entities' internal control over financial reporting. The subservice organization may be a separate entity from the service organization or may be related to the service organization. A user auditor may need to consider controls at the subservice organization. In situations in which one or more subservice organizations are used, the interaction between the activities of the user entity and those of the service organization is expanded to include the interaction between the user entity, the service organization, and the subservice organizations. The degree of this interaction as well as the nature and materiality of the transactions processed by the service organization and the

⁶ Paragraphs .02 and .22 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

subservice organizations are the most important factors for the user auditor to consider in determining the significance of the service organization's and subservice organization's controls to the user entity's controls. (Ref: par. .08)

Using a Type 1 or Type 2 Report to Support the User Auditor's Understanding of the Service Organization (Ref: par. .13–.14)

.A21 The user auditor may make inquiries about the service auditor to the service auditor's professional organization or other practitioners and inquire whether the service auditor is subject to regulatory oversight. The service auditor may be practicing in a jurisdiction in which different standards are followed with respect to reports on controls at a service organization. In such a situation, the user auditor may obtain information about the standards used by the service auditor from the standards-setting organization in that jurisdiction.

.A22 Unless evidence to the contrary comes to the user auditor's attention, a service auditor's report implies that the service auditor is independent of the service organization. However, a service auditor need not be independent of the user entities.

.A23 A type 1 or type 2 report, along with information about the user entity, may assist the user auditor in obtaining an understanding of the following:

- a. The controls at the service organization that may affect the processing of the user entity's transactions, including the use of subservice organizations
- b. The flow of significant transactions through the service organization's system to determine the points in the transaction flow where material misstatements in the user entity's financial statements could occur
- c. The control objectives stated in the description of the service organization's system that are relevant to the user entity's financial statement assertions
- d. Whether controls at the service organization are suitably designed and implemented to prevent, or detect and correct, processing errors that could result in material misstatements in the user entity's financial statements

A type 1 or type 2 report may assist the user auditor in obtaining a sufficient understanding to identify and assess the risks of material misstatement of the user entity's financial statements. A type 1 report, however, does not provide any evidence of the operating effectiveness of the relevant controls.

.A24 A type 1 report that is as of a date, or a type 2 report that is for a period outside of the reporting period of a user entity, may assist the user auditor in obtaining a preliminary understanding of the controls implemented at the service organization if the report is supplemented by additional current information from other sources. If the description of the service organization's system is as of a date or for a period that precedes the beginning of the period under audit, the user auditor may perform procedures to update the information in a type 1 or type 2 report, such as the following:

- Discussing changes at the service organization with user entity personnel who would be in a position to know of such changes
- Reviewing current documentation and correspondence issued by the service organization
- Discussing the changes with service organization personnel

Responding to the Assessed Risks of Material Misstatement (Ref: par. .15)

.A25 Whether the use of a service organization increases a user entity's risk of material misstatement depends on the nature of the services provided and the controls over these services; in some cases, the use of a service organization may decrease a user entity's risk of material misstatement, particularly if the user entity itself does not possess the expertise necessary to undertake particular activities, such as initiating, processing, and recording transactions, or does not have adequate resources (for example, an IT system).

.A26 When the service organization maintains material elements of the accounting records of the user entity, direct access to those records may be necessary for the user auditor to obtain sufficient appropriate audit evidence relating to the operations of controls over those records, to substantiate transactions and balances recorded in them, or both. Such access may involve physical inspection of records at the service organization's premises or electronic interrogation of records, or both. When direct access is achieved electronically, the user auditor may also obtain evidence concerning the adequacy of the service organization's controls over the completeness and integrity of the user entity's data for which the service organization is responsible.

.A27 In determining the nature and extent of audit evidence to be obtained for financial statement balances representing assets held or transactions processed by a service organization for a user entity, the following procedures may be considered by the user auditor:

- a. *Inspecting records and documents held by the user entity.* The reliability of this source of evidence is determined by the nature and extent of the accounting records and supporting documentation retained by the user entity. In some cases, the user entity may not maintain independent detailed records or documentation of specific transactions undertaken on its behalf.
- b. *Inspecting records and documents held by the service organization.* The user auditor's access to the records of the service organization may be established as part of the contractual arrangements between the user entity and the service organization. The user auditor may also use another auditor, on its behalf, to gain access to the user entity's records maintained by the service organization, or ask the service organization through the user entity for access to the user entity's records maintained by the service organization.
- c. *Obtaining confirmations of balances and transactions from the service organization.* When the user entity maintains independent records of balances and transactions, confirmation from the service organization corroborating those records usually constitutes reliable audit evidence concerning the existence of the transactions and assets concerned. For example, when multiple service organizations are used, such as an investment manager and a custodian, and these service organizations maintain independent records, the user auditor may confirm balances with these organizations in order to compare this information with the independent records of the user entity. If the user entity does not maintain independent records, information obtained in confirmations from the service organization is merely a statement of what is reflected in the records maintained by the service organization. Therefore, such confirmations do not, taken alone, constitute reliable audit

evidence. In these circumstances, the user auditor may consider whether an alternative source of independent evidence can be identified.

- d. *Performing analytical procedures on the records maintained by the user entity or on the reports received from the service organization.* The effectiveness of analytical procedures is likely to vary by assertion and will be affected by the extent and detail of information available.

.A28 As noted in paragraph .A10, a service auditor may perform procedures under AT section 201 that are substantive in nature for the benefit of user auditors. Such an engagement may involve the performance by the service auditor of procedures agreed upon by the user entity and its user auditor and by the service organization and its service auditor. The findings resulting from the procedures performed by the service auditor are reviewed by the user auditor to determine whether they constitute sufficient appropriate audit evidence. In addition, requirements may be imposed by governmental authorities or through contractual arrangements whereby a service auditor performs designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organization may be used by the user auditor as part of the evidence necessary to support the user auditor's audit opinion. In these circumstances, it may be useful for the user auditor and the service auditor to establish an understanding prior to the performance of the procedures concerning the audit documentation or means of accessing the audit documentation that will be provided to the user auditor.

.A29 In certain circumstances, in particular when a user entity outsources some or all of its finance function to a service organization, the user auditor may face a situation in which a significant portion of the audit evidence resides at the service organization. Substantive procedures may need to be performed at the service organization by the user auditor or the service auditor on behalf of the user auditor. A service auditor may provide a type 2 report and, in addition, may perform substantive procedures on behalf of the user auditor. As noted in paragraph .A44, the involvement of a service auditor does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Accordingly, relevant information for the user auditor to consider when determining whether sufficient appropriate audit evidence has been obtained and whether the user auditor needs to perform further substantive procedures includes the user auditor's involvement with, or evidence of, the direction, supervision, and performance of the substantive procedures performed by the service auditor.

Tests of Controls (Ref: par. .16)

.A30 The user auditor is required by section 330 to design and perform tests of controls to obtain sufficient appropriate audit evidence concerning the operating effectiveness of relevant controls in certain circumstances.⁷ In the context of a service organization, this requirement applies when

- a. the user auditor's assessment of risks of material misstatement includes an expectation that the controls at the service organization are operating effectively (that is, the user auditor intends to

⁷ Paragraph .08 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

rely on the operating effectiveness of controls at the service organization in determining the nature, timing and extent of substantive procedures); or

- b. substantive procedures alone, or in combination with tests of the operating effectiveness of controls at the user entity, cannot provide sufficient appropriate audit evidence at the assertion level.

.A31 If a type 2 report is not available, a user auditor may contact the service organization through the user entity to request that a service auditor be engaged to perform a type 2 engagement that includes tests of the operating effectiveness of the relevant controls or the user auditor may use another auditor to perform agreed-upon procedures at the service organization that test the operating effectiveness of those controls. A user auditor may also visit the service organization and perform tests of relevant controls if the service organization agrees to it. The user auditor's risk assessments are based on the combined evidence provided by the service auditor's report and the user auditor's own procedures.

Using a Type 2 Report as Audit Evidence That Controls at the Service Organization Are Operating Effectively (Ref: par. .17)

.A32 A type 2 report may be intended to satisfy the needs of several different user auditors; therefore, specific tests of controls and results described in a type 2 report may not be relevant to assertions that are significant in the user entity's financial statements. The relevant tests of controls and results of the tests are evaluated to determine whether the type 2 report provides sufficient appropriate audit evidence about the effectiveness of the controls to support the user auditor's risk assessment. In doing so, the user auditor may consider the following factors:

- a. The time period covered by the tests of controls and the time elapsed since the performance of the tests of controls
- b. The scope of the service auditor's work and the services and processes covered, the controls tested and the tests that were performed, and the way in which tested controls relate to the user entity's controls
- c. The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls

.A33 For certain assertions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less audit evidence the test may provide. In comparing the period covered by the type 2 report to the user entity's financial reporting period, the user auditor may conclude that the type 2 report offers less audit evidence if little overlap exists between the period covered by the type 2 report and the period for which the user auditor intends to rely on the report. When this is the case, an additional type 2 report covering a preceding or subsequent period may provide additional audit evidence. In other cases, the user auditor may determine it is necessary to perform, or use another auditor to perform, tests of controls at the service organization in order to obtain sufficient appropriate audit evidence about the operating effectiveness of those controls.

.A34 It may also be necessary for the user auditor to obtain additional evidence about significant changes in the relevant controls at the service organization during a period outside the period covered by the type 2 report, or to determine what additional audit procedures need to be performed (for example, when little or no overlap exists between the period covered by the type 2 report and the period covered by the user entity's financial statements). Relevant factors in determining what additional audit evidence to obtain about controls at

the service organization that were operating outside the period covered by the service auditor's report may include the following:

- The significance of the assessed risks of material misstatement at the assertion level
- The specific controls that were tested during the interim period and significant changes to them since they were tested including changes in the information systems, processes, and personnel
- The degree to which audit evidence about the operating effectiveness of those controls was obtained
- The length of the remaining period
- The extent to which the user auditor intends to reduce further substantive procedures based on the reliance on controls
- The effectiveness of the control environment and monitoring controls at the user entity

.A35 Additional audit evidence may be obtained, for example, by performing tests of controls that operated during the remaining period or testing the user entity's monitoring controls.

.A36 If the service auditor's testing period is completely outside the user entity's financial reporting period, the user auditor will be unable to rely on such tests to conclude that the user entity's controls are operating effectively because the tests do not provide current audit period evidence of the effectiveness of the controls, unless other procedures are performed.

.A37 In certain circumstances, a service provided by the service organization may be designed with the assumption that certain controls will be implemented by the user entity. For example, the service may be designed with the assumption that the user entity will have controls in place for authorizing transactions before they are sent to the service organization for processing. In such a situation, the description of the service organization's system may include a description of those complementary user entity controls. The user auditor considers whether those complementary user entity controls are relevant to the service provided to the user entity.

.A38 If the user auditor believes that the service auditor's report may not provide sufficient appropriate audit evidence (for example, if a service auditor's report does not contain a description of the service auditor's tests of controls and results thereof), the user auditor may supplement his or her understanding of the service auditor's procedures and conclusions by contacting the service organization through the user entity to request a discussion with the service auditor about the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, the user auditor may contact the service organization through the user entity to request that the service auditor perform procedures at the service organization, or the user auditor may perform such procedures.

.A39 The service auditor's type 2 report identifies results of tests, including deviations, and other information that could affect the user auditor's conclusions. Deviations noted by the service auditor or a modified opinion in the service auditor's report do not automatically mean that the service auditor's report will not be useful for the audit of the user entity's financial statements in assessing the risks of material misstatement. Rather, the deviations and the matter giving rise to a modified opinion in the service auditor's type 2 report are considered in the user auditor's assessment of the tests of controls performed by the service auditor. In considering the deviations and matters giving rise to

a modified opinion, the user auditor may discuss such matters with the service auditor. Such communication is dependent upon the user entity contacting the service organization, and obtaining the service organization's approval for the communication to take place.

.A40 *Communication of significant deficiencies and material weaknesses in internal control identified during the audit.* The user auditor is required by section 265, *Communicating Internal Control Related Matters Identified in an Audit*, to communicate in writing to management and those charged with governance significant deficiencies and material weaknesses identified during the audit.⁸ Matters related to the use of a service organization that the user auditor may identify during the audit and may communicate to management and those charged with governance of the user entity include the following:

- Any needed monitoring controls that could be implemented by the user entity, including those identified as a result of obtaining a type 1 or type 2 report
- Instances when complementary user entity controls identified in the type 1 or type 2 report are not implemented at the user entity
- Controls that may be needed at the service organization that do not appear to have been implemented or that were implemented, but are not operating effectively

The auditor also may communicate other control related matters, including deficiencies that are not significant deficiencies or material weaknesses.

Type 1 and Type 2 Reports That Exclude the Services of a Subservice Organization (Ref: par. .18)

.A41 If a service organization uses a subservice organization, the service auditor's report may either include or exclude the subservice organization's relevant control objectives and related controls in the service organization's description of its system and in the scope of the service auditor's engagement. These two methods of reporting are known as the *inclusive method* and the *carve-out method*, respectively. If the type 1 or type 2 report excludes the controls at a subservice organization and the services provided by the subservice organization are relevant to the audit of the user entity's financial statements, the user auditor is required to apply the requirements of this section with respect to the subservice organization. The nature and extent of work to be performed by the user auditor regarding the services provided by a subservice organization depend on the nature and significance of those services to the user entity and the relevance of those services to the audit. The application of the requirement in paragraph .09 assists the user auditor in determining the effect of the subservice organization and the nature and extent of work to be performed.

Fraud, Noncompliance With Laws and Regulations, and Uncorrected Misstatements Related to Activities at the Service Organization (Ref: par. .19)

.A42 A service organization may be required under the terms of the contract with user entities to disclose to affected user entities any fraud, noncompliance with laws and regulations, or uncorrected misstatements attributable

⁸ Paragraphs .11–.12 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

to the service organization's management or employees. As required by paragraph .19, the user auditor makes inquiries of the user entity management regarding whether the service organization has reported any such matters and evaluates whether any matters reported by the service organization affect the nature, timing, and extent of the user auditor's further audit procedures. In certain circumstances, the user auditor may require additional information to perform this evaluation and may request that the user entity contact the service organization to obtain the necessary information.

Reporting by the User Auditor (Ref: par. .20)

.A43 When a user auditor is unable to obtain sufficient appropriate audit evidence regarding the services provided by the service organization relevant to the audit of the user entity's financial statements, a limitation on the scope of the audit exists. This may be the case when

- the user auditor is unable to obtain a sufficient understanding of the services provided by the service organization and does not have a basis for the identification and assessment of the risks of material misstatement;
- a user auditor's risk assessment includes an expectation that controls at the service organization are operating effectively and the user auditor is unable to obtain sufficient appropriate audit evidence about the operating effectiveness of these controls; or
- sufficient appropriate audit evidence is only available from records held at the service organization, and the user auditor is unable to obtain direct access to these records.

Whether the user auditor expresses a qualified opinion or disclaims an opinion depends on the user auditor's conclusion regarding whether the possible effects on the financial statements are material, pervasive, or both.⁹

Reference to the Work of the Service Auditor (Ref: par. .21–.22)

.A44 The fact that a user entity uses a service organization does not alter the user auditor's responsibility to obtain sufficient appropriate audit evidence to afford a reasonable basis to support the user auditor's opinion. Therefore, the user auditor does not make reference to the service auditor's report as a basis, in part, for the user auditor's opinion on the user entity's financial statements. However, when the user auditor expresses a modified opinion because of a modified opinion in a service auditor's report, the user auditor is not precluded from referring to the service auditor's report if such reference assists in explaining the reason for the user auditor's modified opinion. In such circumstances, the user auditor need not identify the service auditor by name and may need the consent of the service auditor before making such a reference.

⁹ Paragraphs .07–.10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

AU-C Section 450

Evaluation of Misstatements Identified During the Audit

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to evaluate the effect of identified misstatements on the audit and the effect of uncorrected misstatements, if any, on the financial statements. Section 700, *Forming an Opinion and Reporting on Financial Statements*, addresses the auditor's responsibility in forming an opinion on the financial statements based on the evaluation of the audit evidence obtained. The auditor's conclusion, required by section 700, takes into account the auditor's evaluation of uncorrected misstatements, if any, on the financial statements, in accordance with this section. Section 320, *Materiality in Planning and Performing an Audit*, addresses the auditor's responsibility to appropriately apply the concept of materiality in planning and performing an audit of financial statements.

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

- .03 The objective of the auditor is to evaluate the effect of
- a. identified misstatements on the audit and
 - b. uncorrected misstatements, if any, on the financial statements.

Definitions

.04 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Misstatement. A difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that is required for the item to be presented fairly in accordance with the applicable financial reporting framework. Misstatements can arise from fraud or error. (Ref: par. .A1)

Misstatements also include those adjustments of amounts, classifications, presentations, or disclosures that, in the auditor's

professional judgment, are necessary for the financial statements to be presented fairly, in all material respects.

Uncorrected misstatements. Misstatements that the auditor has accumulated during the audit and that have not been corrected.

Requirements

Accumulation of Identified Misstatements

.05 The auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial. (Ref: par. .A2–.A3)

Consideration of Identified Misstatements as the Audit Progresses

.06 The auditor should determine whether the overall audit strategy and audit plan need to be revised if

- a. the nature of identified misstatements and the circumstances of their occurrence indicate that other misstatements may exist that, when aggregated with misstatements accumulated during the audit, could be material or (Ref: par. .A4)
- b. the aggregate of misstatements accumulated during the audit approaches materiality determined in accordance with section 320.¹ (Ref: par. .A5)

Communication and Correction of Misstatements

.07 The auditor should communicate on a timely basis with the appropriate level of management all misstatements accumulated during the audit. The auditor should request management to correct those misstatements. (Ref: par. .A6–.A8)

.08 If, at the auditor's request, management has examined a class of transactions, account balance, or disclosure and corrected misstatements that were detected, the auditor should perform additional audit procedures to determine whether misstatements remain. (Ref: par. .A9–.A11)

.09 If management refuses to correct some or all of the misstatements communicated by the auditor, the auditor should obtain an understanding of management's reasons for not making the corrections and should take that understanding into account when evaluating whether the financial statements as a whole are free from material misstatement.² (Ref: par. .A12–.A15)

Evaluating the Effect of Uncorrected Misstatements

.10 Prior to evaluating the effect of uncorrected misstatements, the auditor should reassess materiality³ to confirm whether it remains appropriate in the context of the entity's actual financial results. (Ref: par. .A16–.A18)

¹ Paragraph .10 of section 320, *Materiality in Planning and Performing an Audit*.

² Paragraph .14 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

³ Paragraph .12 of section 320.

.11 The auditor should determine whether uncorrected misstatements are material, individually or in the aggregate. In making this determination, the auditor should consider

- a. the size and nature of the misstatements, both in relation to particular classes of transactions, account balances, or disclosures and the financial statements as a whole, and the particular circumstances of their occurrence and (Ref: par. .A19–.A24 and .A26–.A27)
- b. the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances, or disclosures and the financial statements as a whole. (Ref: par. .A25)

Documentation

.12 The auditor should include in the audit documentation⁴ (Ref: par. .A28)

- a. the amount below which misstatements would be regarded as clearly trivial; (See paragraph .05)
- b. all misstatements accumulated during the audit and whether they have been corrected; and (See paragraphs .05–.07)
- c. the auditor's conclusion about whether uncorrected misstatements are material, individually or in the aggregate, and the basis for that conclusion. (See paragraph .11)

Application and Other Explanatory Material

Definitions

Misstatement (Ref: par. .04)

.A1 Misstatements may result from fraud or error, such as

- a. an inaccuracy in gathering or processing data from which the financial statements are prepared,
- b. an omission of an amount or disclosure,
- c. a financial statement disclosure that is not presented in accordance with the applicable financial reporting framework,
- d. an incorrect accounting estimate arising from overlooking or clear misinterpretation of facts, and
- e. judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate.

Other examples of misstatements arising from fraud are provided in section 240, *Consideration of Fraud in a Financial Statement Audit*.⁵

Accumulation of Identified Misstatements (Ref: par. .05)

.A2 The auditor may designate an amount below which misstatements would be clearly trivial and would not need to be accumulated because the

⁴ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

⁵ Paragraphs .A1–.A8 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

auditor expects that the accumulation of such amounts clearly would not have a material effect on the financial statements. "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality determined in accordance with section 320 and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.

.A3 To assist the auditor in evaluating the effect of misstatements accumulated during the audit and in communicating misstatements to management and those charged with governance, the auditor may find it useful to distinguish between factual misstatements, judgmental misstatements, and projected misstatements, described as follows:

- *Factual misstatements* are misstatements about which there is no doubt.
- *Judgmental misstatements* are differences arising from the judgments of management concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate.
- *Projected misstatements* are the auditor's best estimate of misstatements in populations, involving the projection of misstatements identified in audit samples to the entire population from which the samples were drawn. Guidance on the determination of projected misstatements and evaluation of the results is set out in section 530, *Audit Sampling*.⁶

Consideration of Identified Misstatements as the Audit Progresses (Ref: par. .06)

.A4 A misstatement may not be an isolated occurrence. Evidence that other misstatements may exist include, for example, when the auditor identifies that a misstatement arose from a breakdown in internal control or from inappropriate assumptions or valuation methods that have been widely applied by the entity.

.A5 If the aggregate of misstatements accumulated during the audit approaches materiality,⁷ a greater than acceptably low level of risk may exist that possible undetected misstatements, when taken with the aggregate of uncorrected misstatements accumulated during the audit, could exceed materiality. Undetected misstatements could exist because of the presence of sampling risk and nonsampling risk.⁸

Communication and Correction of Misstatements (Ref: par. .07–.09)

.A6 Timely communication of misstatements to the appropriate level of management is important because it enables management to evaluate whether

⁶ Paragraphs .13–.14 of section 530, *Audit Sampling*.

⁷ Paragraph .12 of section 320.

⁸ Paragraph .05 of section 530.

the items are misstatements, inform the auditor if it disagrees, and take action as necessary. Ordinarily, the appropriate level of management is the one that has responsibility and authority to evaluate the misstatements and take the necessary action.

.A7 Law or regulation may restrict the auditor's communication of certain misstatements to management or others within the entity. For example, laws or regulations may specifically prohibit a communication or other action that might prejudice an investigation by an appropriate authority into an instance of noncompliance or suspected noncompliance with laws or regulations. In some circumstances, potential conflicts between the auditor's obligations of confidentiality and obligations to communicate may be complex. In such cases, the auditor may consider seeking legal advice.

.A8 The correction by management of all misstatements, including those communicated by the auditor, enables management to maintain accurate accounting books and records and reduces the risks of material misstatement of future financial statements because of the cumulative effect of immaterial uncorrected misstatements related to prior periods.

.A9 The auditor may request management to examine a class of transactions, account balance, or disclosure in order for management to understand the cause of a misstatement identified by the auditor; perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance, or disclosure; and make appropriate adjustments to the financial statements. Such a request may be made, for example, based on the auditor's projection of misstatements identified in an audit sample to the entire population from which it was drawn.

.A10 The auditor may request management to record an adjustment needed to correct all factual misstatements, including the effect of prior period misstatements (see paragraph .08), other than those that the auditor believes are clearly trivial.

.A11 When the auditor has identified a judgmental misstatement involving differences in estimates, such as a difference in a fair value estimate, the auditor may request management to review the assumptions and methods used in developing management's estimate.

.A12 Section 700 requires the auditor to evaluate whether the financial statements are presented fairly, in all material respects, in accordance with the requirements of the applicable financial reporting framework.⁹ This evaluation includes consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments, which may be affected by the auditor's understanding of management's reasons for not making the corrections (see section 700).¹⁰

.A13 Section 580, *Written Representations*, addresses management representations, including representations with respect to uncorrected misstatements.¹¹

⁹ Paragraph .13 of section 700.

¹⁰ Paragraph .15 of section 700.

¹¹ Paragraph .14 of section 580, *Written Representations*.

.A14 In accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*, identification by the auditor of a material misstatement of the financial statements under audit in circumstances that indicate that the misstatement would not have been detected by the entity's internal control is an indicator of a material weakness.¹²

.A15 Section 260, *The Auditor's Communication With Those Charged With Governance*, addresses matters to be communicated by the auditor to those charged with governance, including uncorrected misstatements.

Evaluating the Effect of Uncorrected Misstatements (Ref: par. .10–.11)

.A16 The auditor's determination of materiality in accordance with section 320 often is based on estimates of the entity's financial results because the actual financial results may not yet be known.¹³ Therefore, prior to the auditor's evaluation of the effect of uncorrected misstatements, it may be necessary to revise materiality determined in accordance with section 320 based on the actual financial results.

.A17 Section 320 explains that, as the audit progresses, materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances, or disclosures) is revised in the event of the auditor becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially.¹⁴ Thus, any significant revision is likely to have been made before the auditor evaluates the effect of uncorrected misstatements. However, if the auditor's reassessment of materiality determined in accordance with section 320 (see paragraph .10 of this section) gives rise to a lower amount (or amounts), then performance materiality and the appropriateness of the nature, timing, and extent of the further audit procedures are reconsidered in order to obtain sufficient appropriate audit evidence on which to base the audit opinion.

.A18 Materiality is determined based on the auditor's understanding of the user needs and expectations (see section 320).¹⁵ Although user expectations may differ based on inherent uncertainty associated with the measurement of particular items in the financial statements, these expectations have already been considered in the auditor's determination of materiality. For example, the fact that the financial statements include very large provisions with a high degree of estimation uncertainty (for example, provisions for insurance claims in the case of an insurance company; oil rig decommissioning costs in the case of an oil company; or, more generally, legal claims against an entity) may influence the auditor's assessment of what users might consider material. However, after materiality is reassessed, this section requires the auditor to evaluate any misstatements in accordance with that level of materiality, regardless of the degree of inherent uncertainty associated with the measurement of particular items in the financial statements.

.A19 Each individual misstatement is considered to evaluate its effect on the relevant classes of transactions, account balances, or disclosures, including

¹² Paragraph .A11 of section 265, *Communicating Internal Control Related Matters Identified in an Audit*.

¹³ Paragraph .10 of section 320.

¹⁴ Paragraph .12 of section 320.

¹⁵ Paragraph .10 of section 320.

whether the materiality level for that particular class of transactions, account balance, or disclosure, if any, has been exceeded.

.A20 The auditor is required by section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, to evaluate the effect on the group audit opinion of any uncorrected misstatement identified by the group engagement team or communicated by the component auditors.¹⁶

.A21 If an individual misstatement is judged to be material, it is unlikely that it can be offset by other misstatements. For example, if revenue has been materially overstated, the financial statements as a whole will be materially misstated, even if the effect of the misstatement on earnings is completely offset by an equivalent overstatement of expenses. It may be appropriate to offset misstatements within the same account balance or class of transactions; however, the risk that further undetected misstatements may exist is considered before concluding that offsetting even immaterial misstatements is appropriate. The auditor may need to reassess the risks of material misstatement for a specific account balance or class of transactions upon identification of a number of immaterial misstatements within that account balance or class of transactions.

.A22 Determining whether a classification misstatement is material involves the evaluation of qualitative considerations, such as the effect of the classification misstatement on debt or other contractual covenants, the effect on individual line items or subtotals, or the effect on key ratios. Circumstances may exist in which the auditor concludes that a classification misstatement is not material in the context of the financial statements as a whole, even though it may exceed the materiality level or levels applied in evaluating other misstatements. For example, a misclassification between balance sheet line items may not be considered material in the context of the financial statements as a whole when the amount of the misclassification is small in relation to the size of the related balance sheet line items and the misclassification does not affect the income statement or any key ratios.

.A23 The circumstances related to some misstatements may cause the auditor to evaluate them as material, individually or when considered together with other misstatements accumulated during the audit, even if they are lower than materiality for the financial statements as a whole. Circumstances that may affect the evaluation include the extent to which the misstatement

- affects compliance with regulatory requirements.
- affects compliance with debt covenants or other contractual requirements.
- relates to the incorrect selection or application of an accounting policy that has an immaterial effect on the current period's financial statements but is likely to have a material effect on future periods' financial statements.
- masks a change in earnings or other trends, especially in the context of general economic and industry conditions.
- affects ratios used to evaluate the entity's financial position, results of operations, or cash flows.

¹⁶ Paragraph .44 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

Risk Assessment and Response to Assessed Risks

- affects segment information presented in the financial statements (for example, the significance of the matter to a segment or other portion of the entity's business that has been identified as playing a significant role in the entity's operations or profitability).
- has the effect of increasing management compensation (for example, by ensuring that the requirements for the award of bonuses or other incentives are satisfied).
- is significant with regard to the auditor's understanding of known previous communications to users (for example, regarding forecast earnings).
- relates to items involving particular parties (for example, whether external parties to the transaction are related to members of the entity's management).
- is an omission of information not specifically required by the applicable financial reporting framework but that, in the professional judgment of the auditor, is important to the users' understanding of the financial position, financial performance, or cash flows of the entity.
- affects other information that will be communicated in documents containing the audited financial statements (for example, information to be included in a "Management Discussion and Analysis" or an "Operating and Financial Review") that may reasonably be expected to influence the economic decisions of the users of the financial statements. Section 720, *Other Information in Documents Containing Audited Financial Statements*, addresses the auditor's consideration of other information, on which the auditor has no obligation to report, in documents containing audited financial statements.
- is a misclassification between certain account balances affecting items disclosed separately in the financial statements (for example, misclassification between operating and nonoperating income or recurring and nonrecurring income items or a misclassification between restricted and unrestricted resources in a not-for-profit entity).
- offsets effects of individually significant but different misstatements.
- is currently immaterial and likely to have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- is too costly to correct. It may not be cost beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management.
- represents a risk that possible additional undetected misstatements would affect the auditor's evaluation.
- changes a loss into income or vice versa.
- heightens the sensitivity of the circumstances surrounding the misstatement (for example, the implications of misstatements involving fraud and possible instances of noncompliance with laws

or regulations, violations of contractual provisions, and conflicts of interest).

- has a significant effect relative to reasonable user needs (for example,
 - earnings to investors and the equity amounts to creditors,
 - the magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests [buy-sell agreement], and
 - the effect of misstatements of earnings when contrasted with expectations).
- relates to the definitive character of the misstatement (for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty).
- indicates the motivation of management (for example, [i] an indication of a possible pattern of bias by management when developing and accumulating accounting estimates, [ii] a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process, or [iii] an intentional decision not to follow the applicable financial reporting framework).

These circumstances are only examples—not all are likely to be present in all audits nor is the list necessarily complete. The existence of any circumstances such as these does not necessarily lead to a conclusion that the misstatement is material.

.A24 Section 240 explains how the implications of a misstatement that is, or may be, the result of fraud are required to be considered with regard to other aspects of the audit, even if the size of the misstatement is not material in relation to the financial statements.¹⁷

.A25 The cumulative effect of immaterial uncorrected misstatements related to prior periods may have a material effect on the current period's financial statements. Different acceptable approaches to the auditor's evaluation of such uncorrected misstatements on the current period's financial statements are available. Using the same evaluation approach provides consistency from period to period.

Considerations Specific to Governmental Entities

.A26 In the case of an audit of a governmental entity, the evaluation of whether a misstatement is material also may be affected by the auditor's responsibilities established by law or regulation to report specific matters, including, for example, fraud.

.A27 Furthermore, issues such as public interest, accountability, integrity, and ensuring effective legislative oversight, in particular, may affect the assessment of whether an item is material by virtue of its nature. This is particularly so for items that relate to compliance with law or regulation.

¹⁷ Paragraph .35 of section 240.

Documentation (Ref: par. .12)

.A28 The auditor's documentation of uncorrected misstatements may take into account the following:

- a.* The consideration of the aggregate effect of uncorrected misstatements
 - b.* The evaluation of whether the materiality level or levels for particular classes of transactions, account balances, or disclosures, if any, have been exceeded
 - c.* The evaluation of the effect of uncorrected misstatements on key ratios or trends and compliance with legal, regulatory, and contractual requirements (for example, debt covenants)
-

AU-C Section 500

Audit Evidence

Source: SAS No. 122.

See section 9500 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section explains what constitutes audit evidence in an audit of financial statements and addresses the auditor's responsibility to design and perform audit procedures to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion.

.02 This section is applicable to all the audit evidence obtained during the course of the audit. Other AU-C sections address

- specific aspects of the audit (for example, section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*);
- the audit evidence to be obtained regarding a particular topic (for example, section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*);
- specific procedures to obtain audit evidence (for example, section 520, *Analytical Procedures*); and
- the evaluation of whether sufficient appropriate audit evidence has been obtained (for example, section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, and section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*).

[Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor is to design and perform audit procedures that enable the auditor to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion.

Definitions

.05 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Accounting records. The records of initial accounting entries and supporting records, such as checks and records of electronic fund transfers; invoices; contracts; the general and subsidiary ledgers; journal entries and other adjustments to the financial statements that are not reflected in journal entries; and records, such as work sheets and spreadsheets, supporting cost allocations, computations, reconciliations, and disclosures.

Appropriateness (of audit evidence). The measure of the quality of audit evidence (that is, its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based).

Audit evidence. Information used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence includes both information contained in the accounting records underlying the financial statements and other information.

Management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

Sufficiency (of audit evidence). The measure of the quantity of audit evidence. The quantity of the audit evidence needed is affected by the auditor's assessment of the risks of material misstatement and also by the quality of such audit evidence.

Requirements

Sufficient Appropriate Audit Evidence

.06 The auditor should design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence. (Ref: par. .A1–.A26)

Information to Be Used as Audit Evidence

.07 When designing and performing audit procedures, the auditor should consider the relevance and reliability of the information to be used as audit evidence. (Ref: par. .A27–.A34)

.08 If information to be used as audit evidence has been prepared using the work of a management's specialist, the auditor should, to the extent necessary, taking into account the significance of that specialist's work for the auditor's purposes, (Ref: par. .A35–.A37)

- a. evaluate the competence, capabilities, and objectivity of that specialist; (Ref: par. .A38–.A44)
- b. obtain an understanding of the work of that specialist; and (Ref: par. .A45–.A48)
- c. evaluate the appropriateness of that specialist's work as audit evidence for the relevant assertion. (Ref: par. .A49)

.09 When using information produced by the entity, the auditor should evaluate whether the information is sufficiently reliable for the auditor's purposes, including, as necessary, in the following circumstances:

- a. Obtaining audit evidence about the accuracy and completeness of the information (Ref: par. .A50–.A51)
- b. Evaluating whether the information is sufficiently precise and detailed for the auditor's purposes (Ref: par. .A52)

Inconsistency in, or Doubts Over Reliability of, Audit Evidence

.10 If

- a. audit evidence obtained from one source is inconsistent with that obtained from another or
- b. the auditor has doubts about the reliability of information to be used as audit evidence,

the auditor should determine what modifications or additions to audit procedures are necessary to resolve the matter and should consider the effect of the matter, if any, on other aspects of the audit. (Ref: par. .A53)

Application and Other Explanatory Material

Sufficient Appropriate Audit Evidence (Ref: par. .06)

.A1 Audit evidence is necessary to support the auditor's opinion and report. It is cumulative in nature and is primarily obtained from audit procedures performed during the course of the audit. It may, however, also include information obtained from other sources, such as previous audits (provided that the auditor has determined whether changes have occurred since the previous audits that may affect its relevance to the current audit¹), or a firm's quality control procedures for client acceptance and continuance. In addition to other sources inside and outside the entity, the entity's accounting records are an important source of audit evidence. Also, information that may be used as audit evidence may have been prepared using the work of management's specialist. Audit evidence comprises both information that supports and corroborates management's assertions and any information that contradicts such assertions. In addition, in some cases, the absence of information (for example, management's refusal to provide a requested representation) is used by the auditor and, therefore, also constitutes audit evidence.²

¹ Paragraph .10 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

² Paragraph .A32 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

A2 Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence. Audit procedures to obtain audit evidence can include inspection, observation, confirmation, recalculation, reperformance, and analytical procedures, often in some combination, in addition to inquiry. Although inquiry may provide important audit evidence and may even produce evidence of a misstatement, inquiry alone ordinarily does not provide sufficient audit evidence of the absence of a material misstatement at the assertion level, nor is inquiry alone sufficient to test the operating effectiveness of controls.

A3 As explained in section 200, reasonable assurance is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level.³

A4 The sufficiency and appropriateness of audit evidence are interrelated. *Sufficiency* is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the auditor's assessment of the risks of misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also by the quality of such audit evidence (the higher the quality, the less may be required). However, obtaining more audit evidence may not compensate for its poor quality.

A5 *Appropriateness* is the measure of the quality of audit evidence (that is, its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based). The reliability of evidence is influenced by its source and nature and is dependent on the individual circumstances under which it is obtained.

A6 Section 330 requires the auditor to conclude whether sufficient appropriate audit evidence has been obtained.⁴ Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level and, thereby, enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment. Section 200 contains discussion of relevant factors when the auditor exercises professional judgment regarding whether sufficient appropriate audit evidence has been obtained.⁵

Sources of Audit Evidence

A7 Some audit evidence is obtained by performing audit procedures to test the accounting records (for example, through analysis and review, by reperforming procedures followed in the financial reporting process, and by reconciling related types and applications of the same information). Through the performance of such audit procedures, the auditor may determine that the accounting records are internally consistent and agree to the financial statements. However, accounting records alone do not provide sufficient appropriate audit evidence on which to base an audit opinion on the financial statements.

A8 More assurance is ordinarily obtained from consistent audit evidence obtained from different sources or of a different nature than from items of audit evidence considered individually. For example, corroborating information obtained from a source independent of the entity may increase the assurance that the auditor obtains from audit evidence that is generated internally, such

³ Paragraph .06 of section 200.

⁴ Paragraph .28 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

⁵ Paragraphs .A49–.A54 of section 200.

as evidence existing within the accounting records, minutes of meetings, or a management representation.

.A9 Information from sources independent of the entity that the auditor may use as audit evidence include confirmations from third parties, analysts' reports, and comparable data about competitors (benchmarking data).

Audit Procedures for Obtaining Audit Evidence

.A10 As required by and explained further in section 315 and section 330, audit evidence to draw reasonable conclusions on which to base the auditor's opinion is obtained by performing the following:^{6,7}

- a. Risk assessment procedures
- b. Further audit procedures, which comprise
 - i. tests of controls, when required by the AU-C sections or when the auditor has chosen to do so, and
 - ii. substantive procedures, which include tests of details and substantive analytical procedures.

.A11 The audit procedures described in paragraphs .A14–.A26 that follow may be used as risk assessment procedures, tests of controls, or substantive procedures, depending on the context in which they are applied by the auditor. As explained in section 330, audit evidence obtained from previous audits may, in certain circumstances, provide appropriate audit evidence, provided that the auditor has determined whether changes have occurred since the previous audit that may affect its relevance to the current audit.⁸

.A12 The nature and timing of the audit procedures to be used may be affected by the fact that some of the accounting data and other information may be available only in electronic form or only at certain points or periods in time. For example, source documents, such as purchase orders and invoices, may exist only in electronic form when an entity uses electronic commerce or may be discarded after scanning when an entity uses image processing systems to facilitate storage and reference.

.A13 Certain electronic information may not be retrievable after a specified period of time (for example, if files are changed and if backup files do not exist). Accordingly, the auditor may find it necessary, as a result of an entity's data retention policies, to request retention of some information for the performance of audit procedures at a later point in time or to perform audit procedures at a time when the information is available.

Inspection

.A14 Inspection involves examining records or documents, whether internal or external, in paper form, electronic form, or other media or a physical examination of an asset. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records for evidence of authorization.

.A15 Some documents represent direct audit evidence of the existence of an asset (for example, a document constituting a financial instrument such as a stock or bond). Inspection of such documents may not necessarily provide audit

⁶ Paragraphs .05–.06 of section 315.

⁷ Paragraphs .06–.07 of section 330.

⁸ Paragraph .A38 of section 330.

evidence about ownership or value. In addition, inspecting an executed contract may provide audit evidence relevant to the entity's application of accounting policies, such as revenue recognition.

.A16 Inspection of tangible assets may provide reliable audit evidence with respect to their existence but not necessarily about the entity's rights and obligations or the valuation of the assets. Inspection of individual inventory items may accompany the observation of inventory counting. For example, when observing an inventory count, the auditor may inspect individual inventory items (such as opening containers included in the inventory count to determine whether they are full or empty) to verify their existence.

Observation

.A17 Observation consists of looking at a process or procedure being performed by others (for example, the auditor's observation of inventory counting by the entity's personnel or the performance of control activities). Observation provides audit evidence about the performance of a process or procedure but is limited to the point in time at which the observation takes place and by the fact that the act of being observed may affect how the process or procedure is performed. Section 501, *Audit Evidence—Specific Considerations for Selected Items*, addresses the observation of the counting of inventory.⁹

External Confirmation

.A18 An external confirmation represents audit evidence obtained by the auditor as a direct written response to the auditor from a third party (the confirming party) in paper form or by electronic or other medium. External confirmation procedures frequently are relevant when addressing assertions associated with certain account balances and their elements. However, external confirmations need not be restricted to account balances only. For example, the auditor may request confirmation of the terms of agreements or transactions an entity has with third parties; the confirmation request may be designed to ask if any modifications have been made to the agreement and, if so, their relevant details. External confirmation procedures also are used to obtain audit evidence about the absence of certain conditions (for example, the absence of a side agreement that may influence revenue recognition). See section 505, *External Confirmations*, for further guidance.

Recalculation

.A19 Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation may be performed manually or electronically.

Reperformance

.A20 Reperformance involves the independent execution of procedures or controls that were originally performed as part of the entity's internal control.

Analytical Procedures

.A21 Analytical procedures consist of evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation as is necessary of identified fluctuations and relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. See section 520 for further guidance.

.A22 *Scanning* is a type of analytical procedure involving the auditor's exercise of professional judgment to review accounting data to identify significant

⁹ Paragraphs .11–.15 of section 501, *Audit Evidence—Specific Considerations for Selected Items*.

or unusual items to test. This may include the identification of unusual individual items within account balances or other data through the reading or analysis of, for example, entries in transaction listings, subsidiary ledgers, general ledger control accounts, adjusting entries, suspense accounts, reconciliations, and other detailed reports. Scanning may include searching for large or unusual items in the accounting records (for example, nonstandard journal entries), as well as in transaction data (for example, suspense accounts and adjusting journal entries) for indications of misstatements that have occurred. Electronic audit procedures may assist the auditor in identifying unusual items. When the auditor selects items for testing by scanning and those items are tested, the auditor obtains audit evidence about those items. The auditor's scanning also may provide some audit evidence about the items not selected for testing because the auditor has exercised professional judgment to determine that the items not selected are less likely to be misstated.

Inquiry

.A23 Inquiry consists of seeking information of knowledgeable persons, both financial and nonfinancial, within the entity or outside the entity. Inquiry is used extensively throughout the audit, in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.

.A24 Responses to inquiries may provide the auditor with information not previously possessed or with corroborative audit evidence. Alternatively, responses might provide information that differs significantly from other information that the auditor has obtained (for example, information regarding the possibility of management override of controls). In some cases, responses to inquiries provide a basis for the auditor to modify or perform additional audit procedures.

.A25 Although corroboration of evidence obtained through inquiry is often of particular importance, in the case of inquiries about management intent, the information available to support management's intent may be limited. In these cases, understanding management's past history of carrying out its stated intentions, management's stated reasons for choosing a particular course of action, and management's ability to pursue a specific course of action may provide relevant information to corroborate the evidence obtained through inquiry.

.A26 Regarding some matters, the auditor may consider it necessary to obtain written representations from management and, when appropriate, those charged with governance to confirm responses to oral inquiries. See section 580, *Written Representations*, for further guidance.

Information to Be Used as Audit Evidence

Relevance and Reliability (Ref: par. .07)

.A27 As noted in paragraph .A1, although audit evidence is primarily obtained from audit procedures performed during the course of the audit, it also may include information obtained from other sources (for example, previous audits, in certain circumstances, and a firm's quality control procedures for client acceptance and continuance). The quality of all audit evidence is affected by the relevance and reliability of the information upon which it is based.

Relevance

.A28 Relevance relates to the logical connection with, or bearing upon, the purpose of the audit procedure and, when appropriate, the assertion under consideration. The relevance of information to be used as audit evidence may

be affected by the direction of testing. For example, if the purpose of an audit procedure is to test for overstatement in the existence or valuation of accounts payable, testing the recorded accounts payable may be a relevant audit procedure. On the other hand, when testing for understatement in the existence or valuation of accounts payable, testing the recorded accounts payable would not be relevant, but testing such information as subsequent disbursements, unpaid invoices, suppliers' statements, and unmatched receiving reports may be relevant.

A29 A given set of audit procedures may provide audit evidence that is relevant to certain assertions but not others. For example, inspection of documents related to the collection of receivables after the period-end may provide audit evidence regarding existence and valuation but not necessarily cutoff. Similarly, obtaining audit evidence regarding a particular assertion (for example, the existence of inventory) is not a substitute for obtaining audit evidence regarding another assertion (for example, the valuation of that inventory). On the other hand, audit evidence from different sources or of a different nature may often be relevant to the same assertion.

A30 Tests of controls are designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level. Designing tests of controls to obtain relevant audit evidence includes identifying conditions (characteristics or attributes) that indicate performance of a control and identifying deviation conditions that indicate departures from adequate performance. The presence or absence of those conditions can then be tested by the auditor.

A31 Substantive procedures are designed to detect material misstatements at the assertion level. They comprise tests of details and substantive analytical procedures. Designing substantive procedures includes identifying conditions relevant to the purpose of the test that constitute a misstatement in the relevant assertion.

Reliability

A32 The reliability of information to be used as audit evidence and, therefore, of the audit evidence itself is influenced by its source and nature and the circumstances under which it is obtained, including the controls over its preparation and maintenance, when relevant. Therefore, generalizations about the reliability of various kinds of audit evidence are subject to important exceptions. Even when information to be used as audit evidence is obtained from sources external to the entity, circumstances may exist that could affect its reliability. Information obtained from an independent external source may not be reliable, for example, if the source is not knowledgeable or a management specialist lacks objectivity. While recognizing that exceptions may exist, the following generalizations about the reliability of audit evidence may be useful:

- The reliability of audit evidence is increased when it is obtained from independent sources outside the entity.
- The reliability of audit evidence that is generated internally is increased when the related controls, including those over its preparation and maintenance, imposed by the entity are effective.
- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence in documentary form, whether paper, electronic, or other medium, is more reliable than evidence obtained orally.

(for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of the matters discussed).

- Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies, facsimiles, or documents that have been filmed, digitized, or otherwise transformed into electronic form, the reliability of which may depend on the controls over their preparation and maintenance.

.A33 Section 520 provides further guidance regarding the reliability of data used for purposes of designing analytical procedures as substantive procedures.¹⁰

.A34 Section 240, *Consideration of Fraud in a Financial Statement Audit*, addresses circumstances in which the auditor has reason to believe that a document may not be authentic or may have been modified without that modification having been disclosed to the auditor.¹¹

Reliability of Information Produced by a Management's Specialist **(Ref: par. .08)**

.A35 The preparation of an entity's financial statements may require expertise in a field other than accounting or auditing, such as actuarial calculations, valuations, or engineering data. The entity uses a management's specialist in these fields to obtain the needed expertise to prepare the financial statements. Failure to do so when such expertise is necessary increases the risks of material misstatement and may be a significant deficiency or material weakness.¹²

.A36 When information to be used as audit evidence has been prepared using the work of a management's specialist, the requirement in paragraph .08 applies. For example, an individual or organization may possess expertise in the application of models to estimate the fair value of securities for which no observable market exists. If the individual or organization applies that expertise in making an estimate which the entity uses in preparing its financial statements, the individual or organization is a management's specialist and paragraph .08 applies. If, on the other hand, that individual or organization merely provides price data regarding private transactions not otherwise available to the entity which the entity uses in its own estimation methods, such information, if used as audit evidence, is subject to paragraph .07, but it is not the use of a management's specialist by the entity.

.A37 The nature, timing, and extent of audit procedures with regard to the requirement in paragraph .08 may be affected by such matters as the following:

- The nature and complexity of the matter to which the management's specialist relates
- The risks of material misstatement of the matter
- The availability of alternative sources of audit evidence
- The nature, scope, and objectives of the work of the management's specialist

¹⁰ Paragraph .05 of section 520, *Analytical Procedures*.

¹¹ Paragraph .A11 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

¹² See section 265, *Communicating Internal Control Related Matters Identified in an Audit*, for further guidance.

- Whether the management's specialist is employed by the entity or is a party engaged by it to provide relevant services
- The extent to which management can exercise control or influence over the work of the management's specialist
- Whether the management's specialist is subject to technical performance standards or other professional or industry requirements
- The nature and extent of any controls within the entity over the work of the management's specialist
- The auditor's knowledge and experience of the field of expertise management's specialist
- The auditor's previous experience of the work of that specialist

The Competence, Capabilities, and Objectivity of a Management's Specialist (Ref: par. .08a)

.A38 Competence relates to the nature and level of expertise of the management's specialist. Capability relates to the ability of the management's specialist to exercise that competence in the circumstances. Factors that influence capability may include, for example, geographic location and the availability of time and resources. Objectivity relates to the possible effects that bias, conflict of interest, or the influence of others may have on the professional or business judgment of the management's specialist. The competence, capabilities, and objectivity of a management's specialist, and any controls within the entity over that specialist's work, are important factors with regard to the reliability of any information produced by a management's specialist.

.A39 Information regarding the competence, capabilities, and objectivity of a management's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership in a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- An auditor's specialist, if any, that assists the auditor in obtaining sufficient appropriate audit evidence with respect to information produced by the management's specialist

.A40 Matters relevant to evaluating the competence, capabilities, and objectivity of a management's specialist include whether that specialist's work is subject to technical performance standards or other professional or industry requirements, for example, ethical standards and other membership requirements of a professional body or industry association, accreditation standards of a licensing body, or requirements imposed by law or regulation.

.A41 Other matters that may be relevant include

- the relevance of the capabilities and competence of the management's specialist to the matter for which that specialist's work will be used, including any areas of specialty within that specialist's

field. For example, a particular actuary may specialize in property and casualty insurance but have limited expertise regarding pension calculations.

- the competence of the management's specialist with respect to relevant accounting requirements, for example, knowledge of assumptions and methods, including models, when applicable, that are consistent with the applicable financial reporting framework.
- whether unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures indicate that it may be necessary to reconsider the initial evaluation of the competence, capabilities, and objectivity of the management's specialist as the audit progresses.

.A42 A broad range of circumstances may threaten objectivity, for example, self-interest threats, advocacy threats, familiarity threats, self-review threats, and intimidation threats. Safeguards may reduce such threats and may be created either by external structures (for example, the profession, legislation, or regulation of the management's specialist) or by the work of the management's specialist environment (for example, quality control policies and procedures).

.A43 Although safeguards cannot eliminate all threats to the objectivity of a management's specialist, threats such as intimidation threats may be of less significance to a specialist engaged by the entity than to a specialist employed by the entity, and the effectiveness of safeguards such as quality control policies and procedures may be greater. Because the threat to objectivity created by being an employee of the entity will always be present, a specialist employed by the entity cannot ordinarily be regarded as being more likely to be objective than other employees of the entity.

.A44 When evaluating the objectivity of a specialist engaged by the entity, it may be relevant to discuss with management and that specialist any interests and relationships that may create threats to the specialist's objectivity and any applicable safeguards, including any professional requirements that apply to the specialist, and to evaluate whether the safeguards are adequate. Interests and relationships creating threats may include the following:

- Financial interests
- Business and personal relationships
- Provision of other services

Obtaining an Understanding of the Work of the Management's Specialist (Ref: par. .08b)

.A45 An understanding of the work of the management's specialist includes an understanding of the relevant field of expertise. An understanding of the relevant field of expertise may be obtained in conjunction with the auditor's determination of whether the auditor has the expertise to evaluate the work of the management's specialist, or whether the auditor needs an auditor's specialist for this purpose.¹³

.A46 Aspects of the field of the management's specialist relevant to the auditor's understanding may include

- whether that specialist's field has areas of specialty within it that are relevant to the audit.

¹³ Paragraph .07 of section 620, *Using the Work of an Auditor's Specialist*.

- whether any professional or other standards and regulatory or legal requirements apply.
- what assumptions and methods are used by the management's specialist and whether they are generally accepted within that specialist's field and appropriate for financial reporting purposes.
- the nature of internal and external data or information the management's specialist uses.

.A47 In the case of a management's specialist engaged by the entity, there will ordinarily be an engagement letter or other written form of agreement between the entity and that specialist. Evaluating that agreement when obtaining an understanding of the work of the management's specialist may assist the auditor in determining for the auditor's purposes the appropriateness of

- the nature, scope, and objectives of that specialist's work;
- the respective roles and responsibilities of management and that specialist; and
- the nature, timing, and extent of communication between management and that specialist, including the form of any report to be provided by that specialist.

.A48 In the case of a management's specialist employed by the entity, it is less likely that there will be a written agreement of this kind. Inquiry of the specialist and other members of management may be the most appropriate way for the auditor to obtain the necessary understanding.

Evaluating the Appropriateness of the Work of the Management's Specialist (Ref: par. .08c)

.A49 Considerations when evaluating the appropriateness of the work of the management's specialist as audit evidence for the relevant assertion may include

- the relevance and reasonableness of that specialist's findings or conclusions, their consistency with other audit evidence, and whether they have been appropriately reflected in the financial statements;
- if that specialist's work involves use of significant assumptions and methods, the relevance and reasonableness of those assumptions and methods; and
- if that specialist's work involves significant use of source data, the relevance, completeness, and accuracy of that source data.

Information Produced by the Entity and Used for the Auditor's Purposes (Ref: par. .09a–b)

.A50 In order for the auditor to obtain reliable audit evidence, information produced by the entity, including any management's specialist, that is used for performing audit procedures needs to be sufficiently complete and accurate. For example, the effectiveness of an audit procedure, such as applying standard prices to records of sales volume to develop an expectation of sales revenue, is affected by the accuracy of the price information and the completeness and accuracy of the sales volume data. Similarly, if the auditor intends to test a population (for example, payments) for a certain characteristic (for example, authorization), the results of the test will be less reliable if the population from which items are selected for testing is not complete.

.A51 Obtaining audit evidence about the accuracy and completeness of such information may be accomplished concurrently with the actual audit procedure applied to the information when obtaining such audit evidence is an integral part of the audit procedure itself. In other situations, the auditor may have obtained audit evidence of the accuracy and completeness of such information by testing controls over the preparation and maintenance of the information. In some situations, however, the auditor may determine that additional audit procedures are needed.

.A52 In some cases, the auditor may intend to use information produced by the entity for other audit purposes. For example, the auditor may intend to use the entity's performance measures for the purpose of analytical procedures or use the entity's information produced for monitoring activities such as internal auditor's reports. In such cases, the appropriateness of the audit evidence obtained is affected by whether the information is sufficiently precise or detailed for the auditor's purposes. For example, performance measures used by management may not be precise enough to detect material misstatements.

Inconsistency in, or Doubts Over Reliability of, Audit Evidence (Ref: par. .10)

.A53 Obtaining audit evidence from different sources or of a different nature may indicate that an individual item of audit evidence is not reliable, such as when audit evidence obtained from one source is inconsistent with that obtained from another. This may be the case when, for example, responses to inquiries of management, internal audit, and others are inconsistent or when responses to inquiries of those charged with governance made to corroborate the responses to inquiries of management are inconsistent with the response by management. Section 230, *Audit Documentation*, includes a specific documentation requirement if the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant finding or issue.¹⁴

¹⁴ Paragraph .12 of section 230, *Audit Documentation*.

AU-C Section 9500

Audit Evidence: Auditing Interpretations of Section 500

1. The Effect of an Inability to Obtain Audit Evidence Relating to Income Tax Accruals

.01 Question—The IRS's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "listed transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-.5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

.02 Concern over IRS access to tax accrual working papers might cause some entities to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements or to deny the independent auditor access to such information.

.03 What effect does this situation have on the auditor's opinion on the financial statements?

.04 Interpretation—The entity is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unmodified opinion on the financial statements.

.05 The auditor is required to design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence.¹

.06 If the entity does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to entity personnel responsible for making the judgments and estimates relating to the accrual, the auditor is required to conclude whether sufficient appropriate audit evidence has been obtained. If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion, the auditor is required to attempt to obtain further audit evidence.²

¹ Paragraph .06 of section 500, *Audit Evidence*.

² Paragraphs .28–.29 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

.07 If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor is required to express a qualified opinion or disclaim an opinion on the financial statements.³

.08 If the entity has appropriate documentation but denies the auditor access to it and to entity personnel who possess the information, the auditor is required to perform procedures to evaluate the consequence of an inability to obtain sufficient appropriate audit evidence due to a management-imposed limitation.⁴

.09 The auditor is required to request management to provide a written representation that it has provided the auditor with all relevant information and access, as agreed upon in the terms of the audit engagement.⁵ If management does not provide the written representations required by section 580, *Written Representations*, the auditor is required to disclaim an opinion on the financial statements in accordance section 705, *Modifications to the Opinion in the Independent Auditor's Report*, or withdraw from the engagement.⁶

.10 Question—An entity may allow the auditor to inspect its tax accrual workpapers but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The entity also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What are the auditor's requirements in deciding a response to such a request?

.11 Interpretation—Section 230, *Audit Documentation*, defines *audit documentation* as the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached.⁷ The auditor is required to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand

- a. the nature, timing, and extent of the audit procedures performed to comply with generally accepted auditing standards and applicable legal and regulatory requirements;
- b. the results of the audit procedures performed and the audit evidence obtained; and
- c. significant findings or issues arising during the audit, the conclusions reached thereon, and significant judgments made in reaching those conclusions.⁸

Section 500, *Audit Evidence*, states that other information includes information obtained by the auditor from inquiry, observation, inspection, and physical examination. The quantity, type, and content of audit documentation are matters of the auditor's judgment.

.12 The audit documentation of the results of auditing procedures directed at the tax accounts and related disclosures also includes sufficient appropriate audit evidence about the significant elements of the entity's tax liability contingency analysis. This audit documentation includes copies of the entity's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness

³ Paragraphs .08 and .10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

⁴ Paragraphs .11–.14 of section 705.

⁵ Paragraph .11a of section 580, *Written Representations*.

⁶ Paragraph .25 of section 580.

⁷ Paragraph .06 of section 230, *Audit Documentation*.

⁸ Paragraph .08 of section 230.

of the entity's accounting and disclosure of significant tax-related contingency matters. The audit documentation reflects the procedures performed and conclusions reached by the auditor and, for significant matters, include the entity's documentary support for its financial statement amounts and disclosures.

.13 The audit documentation includes the significant elements of the entity's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the audit documentation provides the entity's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intraperiod allocation of income tax expense or benefit to continuing operations and to items other than continuing operations. When applicable, the audit documentation also includes the entity's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" discussed in FASB ASC 740-30-25-17, including its specific plans for reinvestment of undistributed foreign earnings.

.14 Question—In some situations, an entity may furnish its external legal counsel or in-house legal or tax counsel with information concerning the tax contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

.15 In such circumstances, rather than inspecting and obtaining documentary evidence of the entity's tax liability contingency analysis and making inquiries of the entity, may the auditor consider the counsel as a management's specialist within the meaning of section 500 and rely solely on counsel's opinion as an appropriate procedure for obtaining audit evidence to support his or her opinion on the financial statements?

.16 Interpretation—No. The opinion of legal counsel in this situation does not provide sufficient appropriate audit evidence to afford a reasonable basis for an opinion on the financial statements. The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by the legal counsel's response to an auditor's letter of inquiry, can be useful to the auditor in forming his or her own opinion.

.17 An opinion from an entity's legal or tax counsel, similar to other work products obtained from a management's specialist, is useful in situations in which the auditor does not have adequate technical training and proficiency. In this case, however, the auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

.18 Therefore, while the opinion of legal counsel on specific tax issues can be useful to the auditor in forming his or her own opinion, the audit of income tax accounts requires a combination of tax expertise and knowledge about the entity's business that is accumulated during all aspects of an audit. Therefore, as previously stated, it is not appropriate for the auditor to rely solely on such legal opinion.

.19 Question—A entity may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third-party tax advisers? What audit evidence should the auditor obtain and include in the audit documentation?

.20 Interpretation—As discussed in paragraphs .16–.18 of this interpretation, the auditor cannot accept an entity's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the entity's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the auditor either disagrees with the position taken by the entity, or its advisers, or does not have sufficient appropriate audit evidence to support his or her opinion.

.21 If the entity's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor is required to obtain access to the opinion,⁹ notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation includes either the actual advice or opinions rendered by an outside adviser or other sufficient documentation or abstracts supporting both the transactions or facts addressed as well as the analysis and conclusions reached by the entity and adviser. Alternatives such as redacted or modified opinions may be considered but must, nonetheless, include sufficient content to articulate and document the entity's position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept an entity's analysis summarizing an outside adviser's opinion, but the entity's analysis must provide sufficient appropriate audit evidence for the auditor to formulate his or her conclusion. In addition, written representations may be obtained stating that the entity has not received any advice or opinions that are contradictory to the entity's support for the tax accrual.

.22 If the auditor is unable to accumulate sufficient appropriate audit evidence about whether there is a supported and reasonable basis for the entity's position, the auditor is required to consider the effect of this scope limitation on his or her opinion.¹⁰

[Issue Date: March 1981; Amended: April 9, 2003; Revised: December 2005; Revised: March 2006; Revised: March 2008; Revised: June 2009; Revised: October 2011, effective for audits of financial statements for periods ending on or after December 15, 2012.]

⁹ Paragraph .11 of this interpretation.

¹⁰ Paragraphs .11–.14 of section 705.

New GASB Pension Standards

In June 2012, the Governmental Accounting Standards Board (GASB) issued two new standards that will substantially change the accounting and financial reporting of public employee pension plans and the state and local governments that participate in such plans. GASB Statement No. 67, *Financial Reporting for Pension Plans*, revises existing guidance for the financial reports of most governmental pension plans. GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, revises and establishes new financial reporting requirements for most governments that provide their employees with pension benefits. GASB Statement No. 67 is effective for financial statements for periods beginning after June 15, 2013. GASB Statement No. 68 is effective for financial statements for fiscal years beginning after June 15, 2014.

Interpretation No. 2, "Auditor of Participating Employer in a Governmental Cost-Sharing Multiple-Employer Pension Plan" (paragraphs .23–.29), Interpretation No. 3, "Auditor of Participating Employer in a Governmental Agent Multiple-Employer Pension Plan" (paragraphs .30–.36), and Interpretation Nos. 1–2 of section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement*, are intended to assist both plan and employer auditors who are auditing entities that have implemented the new accounting standards.

2. Auditor of Participating Employer in a Governmental Cost-Sharing Multiple-Employer Pension Plan

.23 Question—GASB Statement No. 68 requires governmental entities (employers) participating in governmental cost-sharing multiple-employer pension plans (cost-sharing plan or plan) to present certain pension amounts in employer financial statements that are calculated by the plan or its actuary. Such amounts are based, in part, on records maintained only by the plan.

.24 Do the audited financial statements of the plan prepared in accordance with generally accepted accounting principles (GAAP) and additional unaudited information provided by the plan's management necessary to calculate the employer's net pension liability provide the employer's auditor with sufficient appropriate audit evidence upon which to base the opinion on the affected opinion units of the governmental employer financial reporting entity?

.25 Interpretation—No. GASB Statement No. 67 requires only the disclosure of the collective net pension liability for all participating employers in GAAP financial statements of cost-sharing plans, not each employer's proportionate share of the collective net pension liability. Further, GAAP does not require the plan to present deferred outflows of resources or deferred inflows of resources by category, pension expense, or each participating employer's share of collective pension amounts. Unaudited information provided by the plan's management to the employers to support allocations or pension amounts that has not been subjected to further audit procedures beyond those performed in the audit of the basic plan financial statements would not constitute sufficient appropriate audit evidence to support the relevant assertions in the employer's

financial statements related to the pension amounts, including required disclosures.

.26 Absent additional audit evidence from the cost-sharing plan (for example, auditor's opinions on the schedule of employer allocations and certain key elements including net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense in a schedule of pension amounts), the employer auditor would not likely be able to accumulate sufficient appropriate audit evidence to support the pension amounts and disclosures in the employer's financial statements. When pension amounts are material to one or more applicable opinion units of the employer's financial statements and the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements of those opinion units are free from material misstatement, the auditor should modify the audit opinion pursuant to section 705.

.27 Question—A plan has engaged its auditor to audit and report on the schedule of employer allocations and certain key elements including net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense in a schedule of pension amounts, as described in the AICPA's State and Local Governments Expert Panel white paper *Governmental Employer Participation in Cost-Sharing Multiple-Employer Plans: Issues Related to Information for Employer Reporting*. May an employer auditor use the plan auditor's report as evidence for the audit of the employer's financial statements?

.28 Interpretation—Yes. The employer auditor is solely responsible for the audit of the employer's financial statements and, therefore, is responsible for determining the sufficiency and appropriateness of audit evidence necessary to reduce audit risk to an appropriately low level. Nevertheless, the employer auditor may use the plan auditor's report on the schedules as evidence that the pension amounts allocated to the employer and included in the employer's financial statements are not materially misstated.

.29 Before using the report of the plan auditor as evidence, the employer auditor should evaluate whether the plan auditor's report and accompanying schedules are adequate and appropriate for the employer auditor's purposes. For example, the employer auditor may review the plan auditor's report and any related opinion modifications and assess other matters discussed in the report. Additionally, the employer auditor should evaluate whether the plan auditor has the necessary competence and independence for the employer auditor's purposes. Further, the employer auditor has a responsibility to verify and recalculate amounts specific to the applicable employer, including the employer amount used in the allocation percentage (that is, the numerator of the calculation), to recalculate the allocation percentage for the employer, and to recalculate the pension amounts allocated to the employer based on the allocation percentage.

[Issue Date: April 2014.]

3. Auditor of Participating Employer in a Governmental Agent Multiple-Employer Pension Plan

.30 Question—GASB Statement No. 68 requires governmental entities (employers) participating in governmental agent multiple-employer pension plans (agent plan or plan) to present certain pension amounts in employer

financial statements that are calculated by the plan or its actuary. Such amounts are based, in part, on records maintained only by the plan.

.31 Do the audited financial statements of the plan prepared in accordance with GAAP and additional unaudited information provided by the plan's management necessary to calculate the employer's net pension liability provide the employer's auditor with sufficient appropriate audit evidence upon which to base the opinion on the affected opinion units of the governmental employer financial reporting entity?

.32 Interpretation—No. GASB Statement No. 67 does not require the plan to present net pension liability, deferred outflows of resources or deferred inflows of resources by category, pension expense, or each participating employer's specific pension amounts. Unaudited information provided by the plan's management to the employers to support allocations or pension amounts that has not been subjected to further audit procedures beyond those performed in the audit of the basic plan financial statements would not constitute sufficient appropriate audit evidence to support the relevant assertions in the employer's financial statements related to the pension amounts, including required disclosures.

.33 Absent additional evidence obtained, for example, through the suggested best practices as described in the AICPA's State and Local Governments Expert Panel white paper *Governmental Employer Participation in Agent Multiple-Employer Plans: Issues Related to Information for Employer Reporting*, the employer auditor would not likely be able to accumulate sufficient appropriate audit evidence to support the pension amounts and disclosures in the employer's financial statements. When pension amounts are material to one or more applicable opinion units of the employer's financial statements and the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements of those opinion units are free from material misstatement, the auditor should modify the audit opinion pursuant to section 705.

.34 Question—A plan has engaged its auditor to audit and report on the schedule of changes in fiduciary net position by employer, as described in the AICPA's State and Local Governments Expert Panel white paper referenced in paragraph .33 of this interpretation. May an employer auditor use the plan auditor's report as evidence about the fiduciary net position and changes in fiduciary net position for the audit of the employer's financial statements?

.35 Interpretation—Yes. The employer auditor is solely responsible for the audit of the employer's financial statements and, therefore, is responsible for determining the sufficiency and appropriateness of audit evidence necessary to reduce audit risk to an appropriately low level. Nevertheless, the employer auditor may use the plan auditor's report on the schedule as evidence about both the fiduciary net position and changes in fiduciary net position of the employer. However, the employer auditor should consider whether the opinion is on the schedule as a whole or on each employer column. If the opinion is on the schedule as a whole, it is likely that the employer auditor will need additional evidence to support these amounts in the employer's financial statements (examples of such audit evidence are included in the white paper referenced in paragraph .33 of this interpretation).

.36 Before using the work of the plan auditor as evidence, the employer auditor should evaluate whether the plan auditor's report and accompanying schedule are adequate and appropriate for the employer auditor's purposes. For example, the employer auditor may review the plan auditor's report and any

related opinion modifications and assess other matters discussed in the report. Additionally, the employer auditor should evaluate whether the plan auditor has the necessary competence and independence for the employer auditor's purposes.

[Issue Date: June 2014.]

AU-C Section 501

Audit Evidence—Specific Considerations for Selected Items

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses specific considerations by the auditor in obtaining sufficient appropriate audit evidence, in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; section 500, *Audit Evidence*; and other relevant AU-C sections, regarding certain aspects of (a) investments in securities and derivative instruments; (b) inventory; (c) litigation, claims, and assessments involving the entity; and (d) segment information in an audit of financial statements.

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.03 The objective of the auditor is to obtain sufficient appropriate audit evidence regarding the

- a. valuation of investments in securities and derivative instruments;
- b. existence and condition of inventory;
- c. completeness of litigation, claims, and assessments involving the entity; and
- d. presentation and disclosure of segment information, in accordance with the applicable financial reporting framework.

Requirements

Investments in Securities and Derivative Instruments (Ref: par. .A1–.A3)

Investments in Securities When Valuations Are Based on the Investee's Financial Results (Excluding Investments Accounted for Using the Equity Method of Accounting)

.04 When investments in securities are valued based on an investee's financial results, excluding investments accounted for using the equity method of accounting, the auditor should obtain sufficient appropriate audit evidence in support of the investee's financial results, as follows: (Ref: par. .A4–.A8)

- a. Obtain and read available financial statements of the investee and the accompanying audit report, if any, including determining whether the report of the other auditor is satisfactory for this purpose.
- b. If the investee's financial statements are not audited, or if the audit report on such financial statements is not satisfactory to the auditor, apply, or request that the investor entity arrange with the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor entity.
- c. If the carrying amount of the investment reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, obtain sufficient appropriate audit evidence in support of such amounts.
- d. If the difference between the financial statement period of the entity and the investee has or could have a material effect on the entity's financial statements, determine whether the entity's management has properly considered the lack of comparability and determine the effect, if any, on the auditor's report. (Ref: par. .A9)

If the auditor is not able to obtain sufficient appropriate audit evidence because of an inability to perform one or more of these procedures, the auditor should determine the effect on the auditor's opinion, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

.05 With respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the auditor's report, the auditor should obtain and read available interim financial statements of the investee and make appropriate inquiries of management of the investor to identify such events and transactions that may be material to the investor's financial statements and that may need to be recognized or disclosed in the investor's financial statements. (Ref: par. .A10)

Investments in Derivative Instruments and Securities Measured or Disclosed at Fair Value

.06 With respect to investments in derivative instruments and securities measured or disclosed at fair value, the auditor should

- a. determine whether the applicable financial reporting framework specifies the method to be used to determine the fair value of the entity's derivative instruments and investments in securities and

- b. evaluate whether the determination of fair value is consistent with the specified valuation method. (Ref: par. .A11–.A13)

.07 If estimates of fair value of derivative instruments or securities are obtained from broker-dealers or other third-party sources based on valuation models, the auditor should understand the method used by the broker-dealer or other third-party source in developing the estimate and consider the applicability of section 500.¹ (Ref: par. .A14–.A15)

.08 If derivative instruments or securities are valued by the entity using a valuation model, the auditor should obtain sufficient appropriate audit evidence supporting management's assertions about fair value determined using the model. (Ref: par. .A16)

Impairment Losses

.09 The auditor should

- a. evaluate management's conclusion (including the relevance of the information considered) about the need to recognize an impairment loss for a decline in a security's fair value below its cost or carrying amount and
- b. obtain sufficient appropriate audit evidence supporting the amount of any impairment adjustment recorded, including evaluating whether the requirements of the applicable financial reporting framework have been complied with. (Ref: par. .A17–.A18)

Unrealized Appreciation or Depreciation

.10 The auditor should obtain sufficient appropriate audit evidence about the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized or that is disclosed because of the ineffectiveness of a hedge, including evaluating whether the requirements of the applicable financial reporting framework have been complied with. (Ref: par. .A19)

Inventory

.11 If inventory is material to the financial statements, the auditor should obtain sufficient appropriate audit evidence regarding the existence and condition of inventory² by

- a. attending physical inventory counting, unless impracticable, to (Ref: par. .A20–.A22)
 - i. evaluate management's instructions and procedures for recording and controlling the results of the entity's physical inventory counting, (Ref: par. .A23)
 - ii. observe the performance of management's count procedures, (Ref: par. .A24)
 - iii. inspect the inventory, and (Ref: par. .A25)
 - iv. perform test counts and (Ref: par. .A26)
- b. performing audit procedures over the entity's final inventory records to determine whether they accurately reflect actual inventory count results. (Ref: par. .A27–.A30)

¹ Paragraph .08 of section 500, *Audit Evidence*, addresses management's specialists.

² Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, addresses the auditor's procedures to respond to the assessed risks of material misstatements at the relevant assertion level.

.12 If physical inventory counting is conducted at a date other than the date of the financial statements, the auditor should, in addition to the procedures required by paragraph .11, perform audit procedures to obtain audit evidence about whether changes in inventory between the count date and the date of the financial statements are recorded properly. (Ref: par. .A31–.A33)

.13 If the auditor is unable to attend physical inventory counting due to unforeseen circumstances, the auditor should make or observe some physical counts on an alternative date and perform audit procedures on intervening transactions.

.14 If attendance at physical inventory counting is impracticable, the auditor should perform alternative audit procedures to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory. If it is not possible to do so, the auditor should modify the opinion in the auditor's report, in accordance with section 705. (Ref: par. .A34–.A36)

.15 If inventory under the custody and control of a third party is material to the financial statements, the auditor should obtain sufficient appropriate audit evidence regarding the existence and condition of that inventory by performing one or both of the following:

- a. Request confirmation from the third party regarding the quantities and condition of inventory held on behalf of the entity (Ref: par. .A37)
- b. Perform inspection or other audit procedures appropriate in the circumstances (Ref: par. .A38)

Litigation, Claims, and Assessments

.16 The auditor should design and perform audit procedures to identify litigation, claims, and assessments involving the entity that may give rise to a risk of material misstatement, including (Ref: par. .A39–.A45)

- a. inquiring of management and, when applicable, others within the entity, including in-house legal counsel;
- b. obtaining from management a description and evaluation of litigation, claims, and assessments that existed at the date of the financial statements being reported on and during the period from the date of the financial statements to the date the information is furnished, including an identification of those matters referred to legal counsel;³
- c. reviewing minutes of meetings of those charged with governance; documents obtained from management concerning litigation, claims, and assessments; and correspondence between the entity and its external legal counsel; and
- d. reviewing legal expense accounts and invoices from external legal counsel.

.17 For actual or potential litigation, claims, and assessments identified based on the audit procedures required in paragraph .16, the auditor should obtain audit evidence relevant to the following factors:

- a. The period in which the underlying cause for legal action occurred

³ For purposes of this section, the term *legal counsel* refers to the entity's in-house legal counsel and external legal counsel.

- b. The degree of probability of an unfavorable outcome
- c. The amount or range of potential loss

Communication With the Entity's Legal Counsel

.18 Unless the audit procedures required by paragraph .16 indicate that no actual or potential litigation, claims, or assessments that may give rise to a risk of material misstatement exist, the auditor should, in addition to the procedures required by other AU-C sections, seek direct communication with the entity's external legal counsel. The auditor should do so through a letter of inquiry prepared by management and sent by the auditor requesting the entity's external legal counsel to communicate directly with the auditor. (Ref: par. .A40 and .A46–.A63)

.19 In addition to the direct communications with the entity's external legal counsel referred to in paragraph .18, the auditor should, in cases when the entity's in-house legal counsel has the responsibility for the entity's litigation, claims, and assessments, seek direct communication with the entity's in-house legal counsel through a letter of inquiry similar to the letter referred to in paragraph .18. Audit evidence obtained from in-house legal counsel in this manner is not, however, a substitute for the auditor seeking direct communication with the entity's external legal counsel, as described in paragraph .18. (Ref: par. .A64)

.20 The auditor should document the basis for any determination not to seek direct communication with the entity's legal counsel, as required by paragraphs .18–.19.

.21 The auditor should request management to authorize the entity's legal counsel to discuss applicable matters with the auditor.

.22 As described in paragraphs .18–.19, the auditor should request, through letter(s) of inquiry, the entity's legal counsel to inform the auditor of any litigation, claims, assessments, and unasserted claims that the counsel is aware of, together with an assessment of the outcome of the litigation, claims, and assessments, and an estimate of the financial implications, including costs involved. Each letter of inquiry should include, but not be limited to, the following matters: (Ref: par. .A69)

- a. Identification of the entity, including subsidiaries, and the date of the audit
- b. A list prepared by management (or a request by management that the legal counsel prepare a list) that describes and evaluates pending or threatened litigation, claims, and assessments with respect to which the legal counsel has been engaged and to which the legal counsel has devoted substantive attention on behalf of the company in the form of legal consultation or representation
- c. A list prepared by management that describes and evaluates unasserted claims and assessments that management considers to be probable of assertion and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome with respect to which the legal counsel has been engaged and to which the legal counsel has devoted substantive attention on behalf of the entity in the form of legal consultation or representation
- d. Regarding each matter listed in item *b*, a request that the legal counsel either provide the following information or comment on

those matters on which the legal counsel's views may differ from those stated by management, as appropriate:

- i. A description of the nature of the matter, the progress of the case to date, and the action that the entity intends to take (for example, to contest the matter vigorously or to seek an out-of-court settlement)
 - ii. An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss (Ref: par. .A65)
 - iii. With respect to a list prepared by management (or by the legal counsel at management's request), an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete
- e. Regarding each matter listed in item *c*, a request that the legal counsel comment on those matters on which the legal counsel's views concerning the description or evaluation of the matter may differ from those stated by management
- f. A statement that management understands that whenever, in the course of performing legal services for the entity with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, the legal counsel has formed a professional conclusion that the entity should disclose or consider disclosure concerning such possible claim or assessment, the legal counsel, as a matter of professional responsibility to the entity, will so advise the entity and will consult with the entity concerning the question of such disclosure and the requirements of the applicable financial reporting framework (for example, the requirements of Financial Accounting Standards Board [FASB] *Accounting Standards Codification* [ASC] 450, *Contingencies*)
- g. A request that the legal counsel confirm whether the understanding described in item *f* is correct
- h. A request that the legal counsel specifically identify the nature of, and reasons for, any limitation on the response
- i. A request that the legal counsel specify the effective date of the response

.23 When the auditor is aware that an entity has changed legal counsel or that the legal counsel previously engaged by the entity has resigned, the auditor should consider making inquiries of management or others about the reasons such legal counsel is no longer associated with the entity. (Ref: par. .A55)

.24 The auditor should modify the opinion in the auditor's report, in accordance with section 705, if (Ref: par. .A56–.A65)

- a. the entity's legal counsel refuses to respond appropriately to the letter of inquiry and the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures or
- b. management refuses to give the auditor permission to communicate or meet with the entity's external legal counsel.

Segment Information

.25 The auditor should obtain sufficient appropriate audit evidence regarding the presentation and disclosure of segment information, in accordance with the applicable financial reporting framework, by (Ref: par. .A66–.A67)

- a. obtaining an understanding of the methods used by management in determining segment information and (Ref: par. .A68)
 - i. evaluating whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework and
 - ii. when appropriate, testing the application of such methods and
- b. performing analytical procedures or other audit procedures appropriate in the circumstances.

Application and Other Explanatory Material

Investments in Securities and Derivative Instruments (Ref: par. .04–.10)

.A1 Evaluating audit evidence for assertions about investments in securities and derivative instruments may involve professional judgment because the assertions, especially those about valuation, are based on highly subjective assumptions or are particularly sensitive to changes in the underlying circumstances. Valuation assertions may be based on assumptions about the occurrence of future events for which expectations are difficult to develop or on assumptions about conditions expected to exist over a long period (for example, default rates or prepayment rates). Accordingly, competent persons could reach different conclusions about estimates of fair values or estimates of ranges of fair values. Professional judgment also may be necessary when evaluating audit evidence for assertions based on features of the security or derivative and the requirements of the applicable financial reporting framework, including underlying criteria for hedge accounting, which are extremely complex. For example, determining the fair value of a structured note may require consideration of a variety of features of the note that react differently to changes in economic conditions. In addition, one or more other derivatives may be designated to hedge changes in cash flows under the note. Evaluating audit evidence about the fair value of the note, the determination of whether the hedge is highly effective, and the allocation of changes in fair value to earnings and other comprehensive income requires professional judgment.

.A2 This section addresses only certain specific aspects relating to auditing valuation of investments in securities and derivative instruments. Section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, addresses the auditor's responsibilities relating to accounting estimates, including fair value accounting estimates and related disclosures in an audit of financial statements. The Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* provides additional and more detailed guidance to auditors related to planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities.

Investments in Securities When Valuations Are Based on Cost

.A3 Procedures to obtain evidence about the valuation of securities that are recorded at cost may include inspection of documentation of the purchase

price, confirmation with the issuer or holder, and testing discount or premium amortization either by recomputation or through the use of analytical procedures.

Investments in Securities When Valuations Are Based on the Investee's Financial Results (Excluding Investments Accounted for Using the Equity Method of Accounting) (Ref: par. .04–.05)

.A4 Section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, addresses auditing investments accounted for using the equity method of accounting.

.A5 For valuations based on an investee's financial results (excluding investments accounted for using the equity method of accounting), obtaining and reading the financial statements of the investee that have been audited by an auditor whose report is satisfactory may be sufficient for the purpose of obtaining sufficient appropriate audit evidence. In determining whether the report of another auditor is satisfactory, the auditor may perform procedures such as making inquiries regarding the professional reputation and standing of the other auditor, visiting the other auditor, discussing the audit procedures followed and the results thereof, and reviewing the audit plan and audit documentation of the other auditor.

.A6 After obtaining and reading the audited financial statements of an investee, the auditor may conclude that additional audit procedures are necessary to obtain sufficient appropriate audit evidence. For example, the auditor may conclude that additional audit evidence is needed because of significant differences in fiscal year-ends, significant differences in accounting principles, changes in ownership, or the significance of the investment to the investor's financial position or results of operations. Examples of procedures that the auditor may perform are reviewing information in the investor's files that relates to the investee, such as investee minutes and budgets, and investee cash flow information and making inquiries of investor management about the investee's financial results.

.A7 The auditor may need to obtain evidence relating to transactions between the entity and investee to evaluate

- a. the propriety of the elimination of unrealized profits and losses on transactions between the entity and investee, if applicable, and
- b. the adequacy of disclosures about material related party transactions or relationships.

.A8 Section 540 and paragraphs .06–.08 of this section address auditing fair value accounting estimates. The Audit Guide *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* also provides guidance on audit evidence that may be relevant to the fair value of derivative instruments and securities and on procedures that may be performed by the auditor to evaluate management's consideration of the need to recognize impairment losses.

.A9 The date of the investor's financial statements and those of the investee may be different. If the difference between the date of the entity's financial statements and those of the investee has or could have a material effect on the entity's financial statements, the auditor is required, in accordance with paragraph .04d, to determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the difference between the financial statement period ends of the entity and investee is not consistent with the prior period in comparative statements

or because a significant transaction occurred during the time period between the financial statement period end of the entity and investee. If a change in the difference between the financial statement period end of the entity and investee has a material effect on the investor's financial statements, the auditor may be required, in accordance with section 708, *Consistency of Financial Statements*, to add an emphasis-of-matter paragraph to the auditor's report because the comparability of financial statements between periods has been materially affected by a change in reporting period.

.A10 Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses the auditor's responsibilities relating to subsequent events and subsequently discovered facts in an audit of financial statements.

Investments in Derivative Instruments and Securities Measured or Disclosed at Fair Value (Ref: par. .06–.08)

.A11 The method for determining fair value may be specified by the applicable financial reporting framework and may vary depending on the industry in which the entity operates or the nature of the entity. Such differences may relate to the consideration of price quotations from inactive markets and significant liquidity discounts, control premiums, and commissions and other costs that would be incurred to dispose of the derivative instrument or security.

.A12 If the determination of fair value requires the use of accounting estimates, see section 540, which addresses auditing fair value accounting estimates, including requirements and guidance relating to the auditor's understanding of the applicable financial reporting framework relevant to accounting estimates and the method used in making the estimate⁴ and the auditor's determination of whether management has appropriately applied the requirements of the applicable financial reporting framework relevant to the accounting estimate.⁵ The Audit Guide *Special Considerations in Auditing Financial Instruments* also provides guidance on audit evidence that may be relevant to the fair value of derivative instruments and investments in securities.

.A13 Quoted market prices for derivative instruments and securities listed on national exchanges or over-the-counter markets are available from sources such as financial publications, the exchanges, NASDAQ, or pricing services based on sources such as those. Quoted market prices obtained from those sources generally provide sufficient evidence of the fair value of the derivative instruments and securities.

.A14 For certain other derivative instruments and securities, quoted market prices may be obtained from broker-dealers who are market makers in them or through the National Quotation Bureau. However, using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed. For example, quotations published by the National Quotation Bureau may not be based on recent trades and may be only an indication of interest and not an actual price for which a counterparty will purchase or sell the underlying derivative instrument or security.

.A15 If quoted market prices are not available for the derivative instrument or security, estimates of fair value frequently may be obtained from broker-dealers or other third-party sources, based on proprietary valuation models, or

⁴ Paragraphs .08a, .08c, .A12–.A14, and .A23–.A25 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

⁵ Paragraphs .12a and .A53–.A57 of section 540.

from the entity, based on internally or externally developed valuation models (for example, the Black-Scholes option pricing model). Understanding the method used by the broker-dealer or other third-party source in developing the estimate may include, for example, understanding whether a pricing model or cash flow projection was used. The auditor also may determine that it is necessary to obtain estimates from more than one pricing source. For example, this may be appropriate if either of the following occurs:

- The pricing source has a relationship with an entity that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product.
- The valuation is based on assumptions that are highly subjective or particularly sensitive to changes in the underlying circumstances.

See also section 540.⁶

.A16 Examples of valuation models include the present value of expected future cash flows, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis. Refer to section 540 for the auditor's procedures to obtain evidence supporting management's assertions about fair value that are determined using a valuation model.

Impairment Losses (Ref: par. .09)

.A17 Regardless of the valuation method used, the applicable financial reporting framework might require recognizing, in earnings or other comprehensive income, an impairment loss for a decline in fair value that is other than temporary. Determinations of whether losses are other than temporary may involve estimating the outcome of future events and making judgments in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors:

- Fair value is significantly below cost or carrying value and
 - the decline is attributable to adverse conditions specifically related to the security or specific conditions in an industry or a geographic area.
 - the decline has existed for an extended period of time.
 - for an equity security, management has the intent to sell the security or it is more likely than not that it will be required to sell the security before recovery.
 - for a debt security, management has the intent to sell the security or it is more likely than not it will be required to sell the security before the security's anticipated recovery of its amortized cost basis (for example, if the entity's cash or working capital requirements or contractual or regulatory obligations indicate that the debt security will be required to be sold before the forecasted recovery occurs).
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.

⁶ Paragraphs .A68–.A89 of section 540.

- Dividends have been reduced or eliminated or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

.A18 Evaluating the relevance of the information considered may include obtaining evidence about factors such as those referred to in paragraph .A17 that tend to corroborate or conflict with management's conclusions.

Unrealized Appreciation or Depreciation (Ref: par. .10)

.A19 Obtaining audit evidence about the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized or that is disclosed because of the ineffectiveness of a hedge may include understanding the methods used to determine whether the hedge is highly effective and to determine the ineffective portion of the hedge.

Inventory

Attendance at Physical Inventory Counting (Ref: par. .11a)

.A20 Management ordinarily establishes procedures under which inventory is physically counted at least once per year to serve as a basis for the preparation of the financial statements and, if applicable, to ascertain the reliability of the entity's perpetual inventory system.

.A21 Attendance at physical inventory counting involves

- inspecting the inventory to ascertain its existence and evaluate its condition and performing test counts,
- observing compliance with management's instructions and the performance of procedures for recording and controlling the results of the physical inventory count, and
- obtaining audit evidence about the reliability of management's count procedures.

These procedures may serve as tests of controls or substantive procedures, or both, depending on the auditor's risk assessment, planned approach, and the specific procedures carried out.

.A22 Matters relevant in planning attendance at physical inventory counting (or in designing and performing audit procedures pursuant to paragraphs .11–.15) include, for example, the following:

- The risks of material misstatement related to inventory.
- The control risk related to inventory.
- Whether adequate procedures are expected to be established and proper instructions issued for physical inventory counting.
- The timing of physical inventory counting.
- Whether the entity maintains a perpetual inventory system.
- The locations at which inventory is held, including the materiality of the inventory and the risks of material misstatement at different locations, in deciding at which locations attendance is appropriate. Section 600 addresses the involvement of component auditors and, accordingly, may be relevant if such involvement is with regard to attendance of physical inventory counting at a remote location.

- Whether the assistance of an auditor's specialist is needed. Section 620, *Using the Work of an Auditor's Specialist*, addresses the use of an auditor's specialist to assist the auditor in obtaining sufficient appropriate audit evidence.

Evaluate Management's Instructions and Procedures (Ref: par. .11a(i))

.A23 Matters relevant in evaluating management's instructions and procedures for recording and controlling the physical inventory counting include whether they address, for example, the following:

- The application of appropriate control activities (for example, the collection of used physical inventory count records, accounting for unused physical inventory count records, and count and recount procedures)
- The accurate identification of the stage of completion of work in progress; slow moving, obsolete, or damaged items; and inventory owned by a third party (for example, on consignment)
- The procedures used to estimate physical quantities, when applicable, such as may be needed in estimating the physical quantity of a coal pile
- Control over the movement of inventory between areas and the shipping and receipt of inventory before and after the cutoff date

Observe the Performance of Management's Count Procedures (Ref: par. .11a(ii))

.A24 Observing the performance of management's count procedures (for example, those relating to control over the movement of inventory before, during, and after the count) assists the auditor in obtaining audit evidence that management's instructions and count procedures are designed and implemented adequately. In addition, the auditor may obtain copies of cutoff information, such as details of the movement of inventory, to assist the auditor in performing audit procedures over the accounting for such movements at a later date.

Inspect the Inventory (Ref: par. .11a(iii))

.A25 Inspecting inventory when attending physical inventory counting assists the auditor in ascertaining the existence of the inventory (though not necessarily its ownership) and in identifying obsolete, damaged, or aging inventory.

Perform Test Counts (Ref: par. .11a(iv))

.A26 Performing test counts (for example, by tracing items selected from management's count records to the physical inventory and tracing items selected from the physical inventory to management's count records) provides audit evidence about the completeness and accuracy of those records.

.A27 In addition to recording the auditor's test counts, obtaining copies of management's completed physical inventory count records assists the auditor in performing subsequent audit procedures to determine whether the entity's final inventory records accurately reflect actual inventory count results.

Use of Management's Specialists

.A28 Management may engage specialists who have expertise in the taking of physical inventories to count, list, price, and subsequently compute the total dollar amount of inventory on hand at the date of the physical count. For example, entities such as retail stores, hospitals, and automobile dealers may use specialists in this manner.

.A29 An inventory count performed by an external inventory firm engaged as a management specialist does not, by itself, provide the auditor with sufficient appropriate audit evidence. The auditor is required by section 500 to perform certain procedures if information to be used as audit evidence has been prepared using the work of a management's specialist.⁷ The auditor may, for example, examine the specialist's program, observe its procedures and controls, make or observe some physical counts of the inventory, recompute calculations of the submitted inventory on a test basis, and apply appropriate tests to the intervening transactions.

.A30 Although the auditor may adjust the extent of the work on the physical count of inventory because of the work of management's specialist, any restriction imposed on the auditor such that the auditor is unable to perform the procedures that the auditor considers necessary is a scope limitation. In such cases, section 705 requires the auditor to modify the opinion in the auditor's report as a result of the scope limitation.

Physical Inventory Counting Conducted Other Than at the Date of the Financial Statements (Ref: par. .12)

.A31 For practical reasons, the physical inventory counting may be conducted at a date, or dates, other than the date of the financial statements. This may be done irrespective of whether management determines inventory quantities by an annual physical inventory counting or maintains a perpetual inventory system. In either case, the effectiveness of the design, implementation, and maintenance of controls over changes in inventory determines whether the conduct of physical inventory counting at a date (or dates) other than the date of the financial statements is appropriate for audit purposes. Section 330 addresses substantive procedures performed at an interim date.⁸

.A32 When a perpetual inventory system is maintained, management may perform physical counts or other tests to ascertain the reliability of inventory quantity information included in the entity's perpetual inventory records. In some cases, management or the auditor may identify differences between the perpetual inventory records and actual physical inventory quantities on hand; this may indicate that the controls over changes in inventory are not operating effectively.

.A33 Relevant matters for consideration when designing audit procedures to obtain audit evidence about whether changes in inventory amounts between the count date, or dates, and the final inventory records are recorded properly include the following:

- Whether the perpetual inventory records are properly adjusted
- Reliability of the entity's perpetual inventory records
- Reasons for significant differences between the information obtained during the physical count and the perpetual inventory records

Attendance at Physical Inventory Counting Is Impracticable (Ref: par. .14)

.A34 In some cases, attendance at physical inventory counting may be impracticable. This may be due to factors such as the nature and location of the inventory (for example, when inventory is held in a location that may pose threats to the safety of the auditor). The matter of general inconvenience to

⁷ Paragraph .08 of section 500 addresses management's specialists.

⁸ Paragraphs .23–.24 of section 330.

the auditor, however, is not sufficient to support a decision by the auditor that attendance is impracticable. Further, as explained in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the matter of difficulty, time, or cost involved is not, in itself, a valid basis for the auditor to omit an audit procedure for which no alternative exists or to be satisfied with audit evidence that is less than persuasive.

.A35 In some cases, when attendance is impracticable, alternative audit procedures (for example, observing a current physical inventory count and reconciling it to the opening inventory quantities or inspection of documentation of the subsequent sale of specific inventory items acquired or purchased prior to the physical inventory counting) may provide sufficient appropriate audit evidence about the existence and condition of inventory. If the audit covers the current period and one or more periods for which the auditor had not observed or made some physical counts of prior inventories, alternative audit procedures, such as tests of prior transactions or reviews of the records of prior counts, may provide sufficient appropriate audit evidence about the prior inventories. The effectiveness of the alternative procedures that an auditor may perform is affected by the length of the period that the alternative procedures cover.

.A36 In other cases, however, it may not be possible to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by performing alternative audit procedures. In such cases, section 705 requires the auditor to modify the opinion in the auditor's report as a result of the scope limitation. In addition, section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*, addresses the auditor's procedures regarding inventory opening balances in initial audit engagements.⁹

Inventory Under the Custody and Control of a Third Party

Confirmation (Ref: par. .15a)

.A37 Section 505, *External Confirmations*, addresses external confirmation procedures.

Other Audit Procedures (Ref: par. .15b)

.A38 Depending on the circumstances (for example, when information is obtained that raises doubt about the integrity and objectivity of the third party), the auditor may consider it appropriate to perform other audit procedures instead of, or in addition to, confirmation with the third party. Examples of other audit procedures include the following:

- Attending, or arranging for another auditor to attend, the third party's physical counting of inventory, if practicable
- Obtaining another auditor's report on the adequacy of the third party's internal control for ensuring that inventory is properly counted and adequately safeguarded
- Inspecting documentation regarding inventory held by third parties (for example, warehouse receipts)
- Requesting confirmation from other parties when inventory has been pledged as collateral

⁹ Paragraph .A13 of section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements*.

Litigation, Claims, and Assessments

Completeness of Litigation, Claims, and Assessments (Ref: par. .16)

.A39 Litigation, claims, and assessments involving the entity may have a material effect on the financial statements and, thus, may be required to be recognized, measured, or disclosed in the financial statements.

.A40 Other legal matters involving the entity may not have a material effect on the entity's financial statements and, accordingly, would not give rise to risks of material misstatement. Examples of such other legal matters may be

- matters unrelated to actual or potential litigation, claims, or assessments, such as consulting services related to real estate or potential merger and acquisition transactions;
- matters in which the entity records indicate that management or the legal counsel has not devoted substantive attention to the matter;
- matters in which the entity's insurance coverage exceeds the amount of the actual or potential litigation, claim, or assessment sought against the entity; or
- matters that are clearly trivial to the financial statements.

.A41 Management is responsible for adopting policies and procedures to identify, evaluate, and account for litigation, claims, and assessments as a basis for the preparation of financial statements, in accordance with the requirements of the applicable financial reporting framework.

.A42 Management is the primary source of information about events or conditions considered in the financial accounting for, and reporting of, litigation, claims, and assessments because these matters are within the direct knowledge and, often, control of management. Accordingly, the auditor's procedures with respect to litigation, claims, and assessments include the following:

- Making inquiries of management as required by paragraph .16a, which may include a discussion about the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments involving the entity that may give rise to a risk of material misstatement
- Obtaining written representations from management, in accordance with section 580, *Written Representations*, that all known actual or possible litigation, claims, and assessments whose effects should be considered when preparing the financial statements have been disclosed to the auditor and accounted for and disclosed in accordance with the applicable financial reporting framework¹⁰

.A43 In addition to the procedures identified in paragraph .16, other relevant procedures include, for example, using information obtained through risk assessment procedures carried out as part of obtaining an understanding of the entity and its environment to assist the auditor to become aware of litigation, claims, and assessments involving the entity. Examples of such procedures are as follows:

¹⁰ Paragraph .15 of section 580, *Written Representations*.

- Reading minutes of meetings of stockholders; directors; governing bodies of governmental entities; and appropriate committees held during, and subsequent to, the period being audited
- Reading contracts, loan agreements, leases, correspondence from taxing or other governmental agencies, and similar documents
- Obtaining information concerning guarantees from bank confirmation forms
- Inspecting other documents for possible guarantees by the entity

Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, requires the auditor to obtain an understanding of the entity and its environment.¹¹ In addition, section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*, requires the auditor to obtain an understanding of the entity's legal and regulatory framework applicable to the entity and industry or sector in which the entity operates and how the entity is complying with that framework.

.A44 Audit evidence obtained for purposes of identifying litigation, claims, and assessments that may give rise to a risk of material misstatement also may provide audit evidence regarding other relevant considerations, such as valuation or measurement, regarding litigation, claims, and assessments. Section 540 establishes requirements and provides guidance relevant to the auditor's consideration of litigation, claims, and assessments requiring accounting estimates or related disclosures in the financial statements.

.A45 This section addresses inquiries of the entity's legal counsel with whom management has consulted. If management has not consulted legal counsel, the auditor would rely on the procedures required by paragraph .16 to identify litigation, claims, and assessments involving the entity, which may give rise to a risk of material misstatement, and the written representation of management regarding litigation, claims, and assessments, as required by section 580.

Communication With the Entity's Legal Counsel (Ref: par. .18–.24)

.A46 An auditor ordinarily does not possess legal skills and, therefore, cannot make legal judgments concerning information coming to the auditor's attention.

.A47 Direct communication with the entity's legal counsel assists the auditor in obtaining sufficient appropriate audit evidence about whether potentially material litigation, claims, and assessments are known and management's estimates of the financial implications, including costs, are reasonable.

.A48 The American Bar Association (ABA) has approved *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* (the ABA statement), which explains the concerns of the legal counsel and the nature of the limitations that an auditor is likely to encounter in connection with seeking direct communication with the entity's legal counsel about litigation, claims, assessments, and unasserted claims.¹²

¹¹ Paragraph .12 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

¹² The *Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information* is reprinted as exhibit A, "American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," for the convenience of readers but is not an integral part of this section.

.A49 A letter of inquiry to the entity's legal counsel is the auditor's primary means of obtaining corroboration of the information provided by management concerning material litigation, claims, and assessments. Audit evidence obtained from the entity's in-house general counsel or legal department may provide the auditor with the necessary corroboration.

.A50 In certain circumstances, the auditor also may judge it necessary to meet with the entity's legal counsel to discuss the likely outcome of the litigation or claims. This may be the case, for example, when

- the auditor determines that the matter is a significant risk.
- the matter is complex.
- a disagreement exists between management and the entity's external legal counsel.

Ordinarily, such meetings require management's permission and are held with a representative of management in attendance.

.A51 An external legal counsel's response to a letter of inquiry and the procedures set forth in paragraphs .16–.17 provide the auditor with sufficient appropriate audit evidence concerning the accounting for, and reporting of, pending and threatened litigation, claims, and assessments.

.A52 Audit evidence about the status of litigation, claims, and assessments up to the date of the auditor's report may be obtained by inquiry of management, including in-house legal counsel responsible for dealing with the relevant matters. The auditor may need to obtain updated information from the entity's legal counsel.

.A53 In accordance with section 700, *Forming an Opinion and Reporting on Financial Statements*, the auditor is required to date the auditor's report no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.¹³ Accordingly, it is preferable that the entity's legal counsel's response be as close to the date of the auditor's report as is practicable in the circumstances. Specifying the effective date of the entity's legal counsel's response to reasonably approximate the expected date of the auditor's report may obviate the need to obtain updated information from the entity's legal counsel.

.A54 Clearly specifying the earliest acceptable effective date of the response and the latest date by which it is to be sent to the auditor and informing the entity's legal counsel of these dates timely facilitates the entity's legal counsel's ability to respond timely and adequately. A two-week period between the specified effective date of the entity's legal counsel's response and the latest date by which the response is to be sent to the auditor is generally sufficient.

.A55 In some circumstances, the legal counsel may be required by relevant ethical requirements to resign the engagement if the legal counsel's advice concerning financial accounting and reporting for litigation, claims, and assessments is disregarded by the entity.

.A56 The legal counsel appropriately may limit the response to matters to which the legal counsel has given substantive attention in the form of legal consultation or representation. Also, the legal counsel's response may be limited to matters that are considered individually or collectively material to the financial statements, such as when the entity and auditor have reached an understanding on the limits of materiality for this purpose and management

¹³ Paragraph .41 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

has communicated such understanding to the legal counsel. Such limitations are not limitations on the scope of the audit.

A57 The legal counsel may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome sometimes may not be within the legal counsel's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available, and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, the legal counsel may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor may conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event that cannot be reasonably estimated. If the auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement, section 705 requires the auditor to modify the opinion in addressing the effect, if any, of the legal counsel's response on the auditor's report as a result of the scope limitation.¹⁴

A58 An external legal counsel's refusal to furnish the information requested in an inquiry letter either in writing or orally may cause a scope limitation of the audit sufficient to preclude an unmodified opinion.

A59 Although the auditor would consider the inability to review information that could have a significant bearing on the audit as a scope limitation, in recognition of the public interest in protecting the confidentiality of lawyer-client communications, such inability is not intended to require an auditor to examine documents that the client identifies as subject to the lawyer-client privilege. In the event of questions concerning the applicability of this privilege, the auditor may request confirmation from the entity's legal counsel that the information is subject to that privilege and that the information was considered by the legal counsel in responding to the letter of inquiry or, if the matters are being handled by another legal counsel, an identification of such legal counsel for the purpose of sending a letter of inquiry.

A60 If management imposes a limitation on the scope of the audit and the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures, the auditor is required by section 705 to either disclaim an opinion on the financial statements or, when practicable, withdraw from the audit.¹⁵

A61 In some cases, in order to emphasize the preservation of the attorney-client privilege or the attorney work-product privilege, some entities may include the following or substantially similar language in the audit inquiry letter to legal counsel:

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

For the same reason, some legal counsel may include the following or substantially similar language in their response letters to auditors:

The Company [*or other defined term*] has advised us that, by making the request set forth in its letter to us, the Company [*or other defined term*] does not intend

¹⁴ Paragraph .07 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

¹⁵ Paragraph .13 of section 705.

to waive the attorney-client privilege with respect to any information which the Company [or other defined term] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [or other defined term].

Explanatory language similar to the foregoing in the letters of the entity or legal counsel is not a limitation on the scope of the legal counsel's response. See exhibit B, "Report of the Subcommittee on Audit Inquiry Responses."

.A62 In order to emphasize the preservation of the attorney-client privilege with respect to unasserted possible claims or assessments, some legal counsel may include the following or substantially similar language in their responses to audit inquiry letters:

Please be advised that pursuant to clauses (b) and (c) of Paragraph 5 of the ABA Statement of Policy [*American Bar Association's Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*] and related Commentary referred to in the last paragraph of this letter, it would be inappropriate for this firm to respond to a general inquiry relating to the existence of unasserted possible claims or assessments involving the Company. We can only furnish information concerning those unasserted possible claims or assessments upon which the Company has specifically requested in writing that we comment. We also cannot comment upon the adequacy of the Company's listing, if any, of unasserted possible claims or assessments or its assertions concerning the advice, if any, about the need to disclose same.

Additional language similar to the foregoing in a letter from legal counsel is not a limitation on the scope of the audit. However, the ABA statement and the understanding between the legal and accounting professions assumes that the legal counsel, under certain circumstances, will advise and consult with the entity concerning the entity's obligation to make financial statement disclosure with respect to unasserted possible claims or assessments. Confirmation of this understanding is included in the legal counsel's response.

.A63 If the auditor believes that there may be actual or potential material litigation, claims, or assessments and the entity has not engaged external legal counsel relating to such matters, the auditor may discuss with the client the possible need to consult legal counsel to assist the client in determining the appropriate measurement, recognition, or disclosure of related liabilities or loss contingencies in the financial statements, in accordance with the applicable financial reporting framework. Depending on the significance of the matter(s), refusal by management to consult legal counsel in these circumstances may result in a scope limitation of the audit sufficient to preclude an unmodified opinion.

Direct Communication With the Entity's In-House Legal Counsel

.A64 In-house legal counsel can range from one lawyer to a large staff, with responsibilities ranging from specific internal matters to a comprehensive coverage of all of the entity's legal needs, including litigation with outside parties. Because both in-house and external legal counsel are bound by an applicable code of ethics, there should be no significant difference in their professional obligations and responsibilities. In some circumstances, external legal counsel, if used at all, may be used only for limited purposes, such as data accumulation or account collection activity. In such circumstances, in-house legal counsel may have the primary responsibility for corporate legal matters and may be in the best position to know and precisely describe the status of all litigation, claims, and assessments or to corroborate information provided by management.

Evaluation of the Outcome of Litigation, Claims, or Assessment (Ref: par. 22d(ii))

.A65 Although paragraph 5 of the ABA statement states that the legal counsel "may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is probable' or remote," the legal counsel is not required to use those terms in communicating the evaluation to the auditor. The auditor may find other wording sufficiently clear, as long as the terms can be used to classify the outcome of the uncertainty under one of the three probability classifications established in FASB ASC 450. Some examples of evaluations concerning litigation that may be considered to provide sufficient clarity that the likelihood of an unfavorable outcome is remote, even though they do not use that term, are the following:

- "We are of the opinion that this action will not result in any liability to the company."
- "It is our opinion that the possible liability to the company in this proceeding is nominal in amount."
- "We believe the company will be able to defend this action successfully."
- "We believe that the plaintiff's case against the company is without merit."
- "Based on the facts known to us, after a full investigation, it is our opinion that no liability will be established against the company in these suits."

Absent any contradictory information obtained by the auditor either in other parts of the legal counsel's letter or otherwise, the auditor need not obtain further clarification of evaluations such as the foregoing. Because of inherent uncertainties described in paragraph .A57 and the ABA statement, an evaluation furnished by the legal counsel may indicate significant uncertainties or stipulations about whether the client will prevail. The following are examples of the legal counsel's evaluations that are unclear about the likelihood of an unfavorable outcome:

- "This action involves unique characteristics wherein authoritative legal precedents do not seem to exist. We believe that the plaintiff will have serious problems establishing the company's liability under the act; nevertheless, if the plaintiff is successful, the award may be substantial."
- "It is our opinion that the company will be able to assert meritorious defenses to this action." (The term *meritorious defenses* indicates that the entity's defenses will not be summarily dismissed by the court; it does not necessarily indicate the legal counsel's opinion that the entity will prevail.)
- "We believe the action can be settled for less than the damages claimed."
- "We are unable to express an opinion as to the merits of the litigation at this time. The company believes there is absolutely no merit to the litigation." (If the entity's legal counsel, with the benefit of all relevant information, is unable to conclude that the likelihood of an unfavorable outcome is remote, it is unlikely that management would be able to form a judgment to that effect.)
- "In our opinion, the company has a substantial chance of prevailing in this action." (A *substantial chance*, a *reasonable opportunity*,

and similar terms indicate more uncertainty than an opinion that the company will prevail.)

If the auditor is uncertain about the meaning of the legal counsel's evaluation, clarification either in a follow-up letter or conference with the legal counsel and entity, appropriately documented, may be appropriate. If the legal counsel is still unable to give an unequivocal evaluation of the likelihood of an unfavorable outcome in writing or orally, the auditor is required by section 700 to determine the effect, if any, of the legal counsel's response on the auditor's report.

Segment Information (Ref: par. .25)

.A66 Depending on the applicable financial reporting framework, the entity may be required or permitted to disclose segment information in the financial statements. The auditor's responsibility regarding the presentation and disclosure of segment information is in relation to the financial statements as a whole. Accordingly, the auditor is not required to perform audit procedures that would be necessary to express an opinion on the segment information presented on a stand-alone basis.

Considerations Specific to Governmental Entities

.A67 For governmental entities required by the applicable financial reporting framework to disclose segment information, the auditor's responsibility regarding the presentation and disclosure of segment information is in relation to the financial statements of the opinion unit(s) on which the segment information is based.¹⁶

Understanding of the Methods Used by Management (Ref: par. .25a)

.A68 Depending on the circumstances, examples of matters that may be relevant when obtaining an understanding of the methods used by management in determining segment information and evaluating whether such methods are likely to result in disclosure in accordance with the applicable financial reporting framework include the following:

- Sales, transfers, and charges between segments and elimination of intersegment amounts
- Comparisons with budgets and other expected results (for example, operating profits as a percentage of sales)
- The allocation of assets and costs among segments
- Consistency with prior periods and the adequacy of the disclosures with respect to inconsistencies
- Management's process for identifying those segments that require disclosure in accordance with the entity's financial reporting framework

Appendix—Illustrative Audit Inquiry Letter to Legal Counsel (Ref: par. .22)

In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

[Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:]

In connection with an audit of our financial statements as of (balance-sheet date) and for the (period) then ended, please furnish our auditors, (name and address of auditors), with the information requested below concerning certain contingencies involving matters with respect to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. *[When a materiality limit has been established based on an understanding between management and the auditor, the following sentence should be added: This request is limited to contingencies amounting to (amount) individually or items involving lesser amounts that exceed (amount) in the aggregate.]*

Pending or Threatened Litigation (Excluding Unasserted Claims)

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] This letter will serve as our consent for you to furnish to our auditor all the information requested herein. Accordingly, please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters for which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

[Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:]

Regarding pending or threatened litigation, claims, and assessments, please include in your response: (1) the nature of each matter, (2) the progress of each matter to date, (3) how the Company is responding or intends to respond (for example, to contest the case vigorously or seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.

Unasserted Claims and Assessments (Considered by Management to be Probable of Assertion and That, if Asserted, Would Have at Least a Reasonable Possibility of an Unfavorable Outcome)

[Ordinarily management's information would include the following: (1) the nature of the matter; (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters for which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. Please specifically confirm to our auditors that our understanding is correct.

[Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:]

We have represented to our auditors that there are no unasserted possible claims or assessments that you have advised us are probable of assertion and must be disclosed in accordance with FASB ASC 450. We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of FASB ASC 450. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the Company, such as guarantees of indebtedness of others.]

[Alternative wording when management requests the lawyer to prepare the list that describes and evaluates pending or threatened litigation, claims, and assessments is as follows:]

Your response should include matters that existed as of (balance-sheet date) and during the period from that date to the effective date of your response. Please specifically identify the nature of and reasons for any limitations on your response. Our auditors expect to have the audit completed about (expected completion date). They would appreciate receiving your reply by that date with a specified effective date no earlier than (ordinarily two weeks before expected completion date).

[Wording that could be used in an audit inquiry letter, instead of the heading and first paragraph, when the client believes that there are no unasserted claims or assessments (to be specified to the lawyer for comment) that are probable of assertion and that, if asserted, would have a reasonable possibility of an unfavorable outcome as specified by Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies, is as follows:]

Unasserted claims and assessments—We have represented to our auditors that there are no unasserted possible claims that you have advised us are probable of assertion and must be disclosed, in accordance with Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies. (The second paragraph in the section relating to unasserted claims and assessments would not be altered.)

Exhibit A—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (Ref: par. .A48)

Note: This document, in the form herein set forth, was approved by the Board of Governors of the American Bar Association (ABA) in December 1975, which official action permitted its release to lawyers and accountants as the standard recommended by the ABA for the lawyer's response to letters of audit inquiry.

Source: Statement on Auditing Standards No. 12 section 337C, Exhibit II—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*

Preamble

The public interest in protecting the confidentiality of lawyer-client communications is fundamental. The American legal, political and economic systems depend heavily upon voluntary compliance with the law and upon ready access to a respected body of professionals able to interpret and advise on the law. The expanding complexity of our laws and governmental regulations increases the need for prompt, specific and unhampered lawyer-client communication. The benefits of such communication and early consultation underlie the strict statutory and ethical obligations of the lawyer to preserve the confidences and secrets of the client, as well as the long-recognized testimonial privilege for lawyer-client communication.

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems

* Statement on Auditing Standards No. 12 section 337C, *Exhibit II—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information*, has been superseded by this section.

with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and encouraging its readiness to seek advice of counsel and to act in accordance with counsel's advice.

Consistent with the foregoing public policy considerations, it is believed appropriate to distinguish between, on the one hand, litigation which is pending or which a third party has manifested to the client a present intention to commence and, on the other hand, other contingencies of a legal nature or having legal aspects. As regards the former category, unquestionably the lawyer representing the client in a litigation matter may be the best source for a description of the claim or claims asserted, the client's position (e.g., denial, contest, etc.), and the client's possible exposure in the litigation (to the extent the lawyer is in a position to do so). As to the latter category, it is submitted that, for the reasons set forth above, it is not in the public interest for the lawyer to be required to respond to general inquiries from auditors concerning possible claims.

It is recognized that the disclosure requirements for enterprises subject to the reporting requirements of the Federal securities laws are a major concern of managements and counsel, as well as auditors. It is submitted that compliance therewith is best assured when clients are afforded maximum encouragement, by protecting lawyer-client confidentiality, freely to consult counsel. Likewise, lawyers must be keenly conscious of the importance of their clients being competently advised in these matters.

Statement of Policy

NOW, THEREFORE, BE IT RESOLVED that it is desirable and in the public interest that this Association adopt the following Statement of Policy regarding the appropriate scope of the lawyer's response to the auditor's request, made by the client at the request of the auditor, for information concerning matters referred to the lawyer during the course of his representation of the client:

1. *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5,[†] promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying Commentary), to the extent hereinafter set forth, subject to the following:

[†] In July 2009, the Financial Accounting Standards Board (FASB) issued *FASB Accounting Standards Codification* (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance promulgated by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

- a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.
 - b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.
 - c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.
 - d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.
2. *Limitation on Scope of Response.* It is appropriate for the lawyer to set forth in his response, by way of limitation, the scope of his engagement by the client. It is also appropriate for the lawyer to indicate the date as of which information is furnished and to disclaim any undertaking to advise the auditor of changes which may thereafter be brought to the lawyer's attention. *Unless the lawyer's response indicates otherwise, (a) it is properly limited to matters which have been given substantive attention by the lawyer in the form of legal consultation and, where appropriate, legal representation since the beginning of the period or periods being reported upon, and (b) if a law firm or a law department, the auditor may assume that the firm or department has endeavored, to the extent believed necessary by the firm or department, to determine from lawyers currently in the firm or department who have performed services for the client since the beginning of the fiscal period under audit whether such services involved substantive attention in the form of legal consultation concerning those loss contingencies referred to in Paragraph 5(a) below but, beyond that, no review has been made of any of the client's transactions or other matters for the purpose of identifying loss contingencies to be described in the response.*[‡]
 3. *Response may be Limited to Material Items.* In response to an auditor's request for disclosure of loss contingencies of a client, it is appropriate for the lawyer's response to indicate that the response is limited to items which are considered individually or collectively material to the presentation of the client's financial statements.
 4. *Limited Responses.* Where the lawyer is limiting his response in accordance with the Statement of Policy, his response should so

[‡] As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

indicate (see Paragraph 8). If in any other respect the lawyer is not undertaking to respond to or comment on particular aspects of the inquiry when responding to the auditor, he should consider advising the auditor that his response is limited, in order to avoid any inference that the lawyer has responded to all aspects; otherwise, he may be assuming a responsibility which he does not intend.

5. *Loss Contingencies.* When properly requested by the client, it is appropriate for the lawyer to furnish to the auditor information concerning the following matters if the lawyer has been engaged by the client to represent or advise the client professionally with respect thereto and he has devoted substantive attention to them in the form of legal representation or consultation:
 - a. *overtly threatened or pending litigation*, whether or not specified by the client;
 - b. *a contractually assumed obligation* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor;
 - c. *an unasserted possible claim or assessment* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor.

With respect to clause (a), overtly threatened litigation means that a potential claimant has manifested to the client an awareness of and present intention to assert a possible claim or assessment unless the likelihood of litigation (or of settlement when litigation would normally be avoided) is considered remote. With respect to clause (c), where there has been no manifestation by a potential claimant of an awareness of and present intention to assert a possible claim or assessment, consistent with the considerations and concerns outlined in the Preamble and Paragraph 1 hereof, the client should request the lawyer to furnish information to the auditor only if the client has determined that it is probable that a possible claim will be asserted, that there is a reasonable possibility that the outcome (assuming such assertion) will be unfavorable, and that the resulting liability would be material to the financial condition of the client. Examples of such situations might (depending in each case upon the particular circumstances) include the following: (i) a catastrophe, accident or other similar physical occurrence in which the client's involvement is open and notorious, or (ii) an investigation by a government agency where enforcement proceedings have been instituted or where the likelihood that they will not be instituted is remote, under circumstances where assertion of one or more private claims for redress would normally be expected, or (iii) a public disclosure by the client acknowledging (and thus focusing attention upon) the existence of one or more probable claims arising out of an event or circumstance. In assessing whether or not the assertion of a possible claim is probable, it is expected that the client would normally employ, by reason of the inherent uncertainties involved and insufficiency of available data, concepts parallel to those used by the lawyer (discussed below) in assessing whether or not an unfavorable outcome is probable; thus, assertion of a possible claim

would be considered probable only when the prospects of its being asserted seem reasonably certain (i.e., supported by extrinsic evidence strong enough to establish a presumption that it will happen) and the prospects of nonassertion seem slight.

It would not be appropriate, however, for the lawyer to be requested to furnish information in response to an inquiry letter or supplement thereto if it appears that (a) the client has been required to specify unasserted possible claims without regard to the standard suggested in the preceding paragraph, or (b) the client has been required to specify all or substantially all unasserted possible claims as to which legal advice may have been obtained, since, in either case, such a request would be in substance a general inquiry and would be inconsistent with the intent of this Statement of Policy.

The information that lawyers may properly give to the auditor concerning the foregoing matters would include (to the extent appropriate) an identification of the proceedings or matter, the stage of proceedings, the claim(s) asserted, and the position taken by the client.

In view of the inherent uncertainties, the lawyer should normally refrain from expressing judgments as to outcome except in those relatively few clear cases where it appears to the lawyer that an unfavorable outcome is either "probable" or "remote"; for purposes of any such judgment it is appropriate to use the following meanings:

- i. probable*—an unfavorable outcome for the client is probable if the prospects of the claimant not succeeding are judged to be extremely doubtful and the prospects for success by the client in its defense are judged to be slight.
- ii. remote*—an unfavorable outcome is remote if the prospects for the client not succeeding in its defense are judged to be extremely doubtful and the prospects of success by the claimant are judged to be slight.

If, in the opinion of the lawyer, considerations within the province of his professional judgment bear on a particular loss contingency to the degree necessary to make an informed judgment, he may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is "probable" or "remote," applying the above meanings. No inference should be drawn, from the absence of such a judgment, that the client will not prevail.

The lawyer also may be asked to estimate, in dollar terms, the potential amount of loss or range of loss in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the amount or range of potential loss will normally be as inherently impossible to ascertain, with any degree of certainty, as the outcome of the litigation. Therefore, it is appropriate for the lawyer to provide an estimate of the amount or range of potential loss (if the outcome should be unfavorable) only if he believes that the probability of inaccuracy of the estimate of the amount or range of potential loss is slight.

The considerations bearing upon the difficulty in estimating loss (or range of loss) where pending litigation is concerned are obviously even more compelling in the case of unasserted possible

claims. In most cases, the lawyer will not be able to provide any such estimate to the auditor.

As indicated in Paragraph 4 hereof, the auditor may assume that all loss contingencies specified by the client in the manner specified in clauses (b) and (c) above have received comment in the response, unless otherwise therein indicated. The lawyer should not be asked, nor need the lawyer undertake, to furnish information to the auditor concerning loss contingencies except as contemplated by this Paragraph 5.

6. *Lawyer's Professional Responsibility.* Independent of the scope of his response to the auditor's request for information, the lawyer, depending upon the nature of the matters as to which he is engaged, may have as part of his professional responsibility to his client an obligation to advise the client concerning the need for or advisability of public disclosure of a wide range of events and circumstances. The lawyer has an obligation not knowingly to participate in any violation by the client of the disclosure requirements of the securities laws. In appropriate circumstances, the lawyer also may be required under the Code of Professional Responsibility to resign his engagement if his advice concerning disclosures is disregarded by the client. The auditor may properly assume that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment which may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client must disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements^{||} of FAS 5.
7. *Limitation on Use of Response.* *Unless otherwise stated in the lawyer's response, it shall be solely for the auditor's information in connection with his audit of the financial condition of the client and is not to be quoted in whole or in part or otherwise referred to in any financial statements of the client or related documents, nor is it to be filed with any governmental agency or other person, without the lawyer's prior written consent.[‡] Notwithstanding such limitation, the response can properly be furnished to others in compliance with court process or when necessary in order to defend the auditor against a challenge of the audit by the client or a regulatory agency, provided that the lawyer is given written notice of the circumstances at least twenty days before the response is so to be furnished to others, or as long in advance as possible if the situation does not permit such period of notice.[‡]*
8. *General.* This Statement of Policy, together with the accompanying Commentary (which is an integral part hereof), has been developed for the general guidance of the legal profession. In a

^{||} Under FAS 5, when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment, disclosure of an unasserted possible claim is required only if the enterprise concludes that (i) it is probable that a claim will be asserted, (ii) there is a reasonable possibility, if the claim is in fact asserted, that the outcome will be unfavorable, and (iii) the liability resulting from such unfavorable outcome would be material to its financial condition.

[‡] As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

particular case, the lawyer may elect to supplement or modify the approach hereby set forth. If desired, this Statement of Policy may be incorporated by reference in the lawyer's response by the following statement: "This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any loss contingencies' is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement)."

The accompanying Commentary is an integral part of this Statement of Policy.

Commentary

Paragraph 1 (Client Consent to Response)

In responding to any aspect of an auditor's inquiry letter, the lawyer must be guided by his ethical obligations as set forth in the Code of Professional Responsibility. Under Canon 4 of the Code of Professional Responsibility a lawyer is enjoined to preserve the client's confidences (defined as information protected by the attorney-client privilege under applicable law) and the client's secrets (defined as other information gained in the professional relationship that the client has requested be held inviolate or the disclosure of which would be embarrassing or would be likely to be detrimental to the client). The observance of this ethical obligation, in the context of public policy, ". . . not only facilitates the full development of facts essential to proper representation of the client but also encourages laymen to seek early legal assistance." (Ethical Consideration 4-1).

The lawyer's ethical obligation therefore includes a much broader range of information than that protected by the attorney-client privilege. As stated in Ethical Consideration 4-4: "The attorney-client privilege is more limited than the ethical obligation of a lawyer to guard the confidences and secrets of his client. This ethical precept, unlike the evidentiary privilege, exists without regard to the nature or source of information or the fact that others share the knowledge."

In recognition of this ethical obligation, the lawyer should be careful to disclose fully to his client any confidence, secret or evaluation that is to be revealed to another, including the client's auditor, and to satisfy himself that the officer or agent of a corporate client consenting to the disclosure understands the legal consequences thereof and has authority to provide the required consent.

The law in the area of attorney-client privilege and the impact of statements made in letters to auditors upon that privilege has not yet been developed. Based upon cases treating the attorney-client privilege in other contexts, however, certain generalizations can be made with respect to the possible impact of statements in letters to auditors.

It is now generally accepted that a corporation may claim the attorney-client privilege. Whether the privilege extends beyond the control group of the corporation (a concept found in the existing decisional authority), and if so, how far, is yet unresolved.

If a client discloses to a third party a part of any privileged communication he has made to his attorney, there may have been a waiver as to the whole communication; further, it has been suggested that giving accountants access to privileged statements made to attorneys may waive any privilege as to those

statements. Any disclosure of privileged communications relating to a particular subject matter may have the effect of waiving the privilege on other communications with respect to the same subject matter.

To the extent that the lawyer's knowledge of unasserted possible claims is obtained by means of confidential communications from the client, any disclosure thereof might constitute a waiver as fully as if the communication related to pending claims.

A further difficulty arises with respect to requests for evaluation of either pending or unasserted possible claims. It might be argued that any evaluation of a claim, to the extent based upon a confidential communication with the client, waives any privilege with respect to that claim.

Another danger inherent in a lawyer's placing a value on a claim, or estimating the likely result, is that such a statement might be treated as an admission or might be otherwise prejudicial to the client.

The Statement of Policy has been prepared in the expectation that judicial development of the law in the foregoing areas will be such that useful communication between lawyers and auditors in the manner envisaged in the Statement will not prove prejudicial to clients engaged in or threatened with adversary proceedings. If developments occur contrary to this expectation, appropriate review and revision of the Statement of Policy may be necessary.

Paragraph 2 (Limitation on Scope of Response)

In furnishing information to an auditor, the lawyer can properly limit himself to loss contingencies which he is handling on a substantive basis for the client in the form of legal consultation (advice and other attention to matters not in litigation by the lawyer in his professional capacity) or legal representation (counsel of record or other direct professional responsibility for a matter in litigation). Some auditors' inquiries go further and ask for information on matters of which the lawyer "has knowledge." Lawyers are concerned that such a broad request may be deemed to include information coming from a variety of sources including social contact and third party contacts as well as professional engagement and that the lawyer might be criticized or subjected to liability if some of this information is forgotten at the time of the auditor's request.

It is also believed appropriate to recognize that the lawyer will not necessarily have been authorized to investigate, or have investigated, all legal problems of the client, even when on notice of some facts which might conceivably constitute a legal problem upon exploration and development. Thus, consideration in the form of preliminary or passing advice, or regarding an incomplete or hypothetical state of facts, or where the lawyer has not been requested to give studied attention to the matter in question, would not come within the concept of "substantive attention" and would therefore be excluded. Similarly excluded are matters which may have been mentioned by the client but which are not actually being handled by the lawyer. Paragraph 2 undertakes to deal with these concerns.

Paragraph 2 is also intended to recognize the principle that the appropriate lawyer to respond as to a particular loss contingency is the lawyer having charge of the matter for the client (e.g., the lawyer representing the client in a litigation matter and/or the lawyer having overall charge and supervision of the matter), and that the lawyer not having that kind of role with respect to the matter should not be expected to respond merely because of having become aware of its existence in a general or incidental way.

The internal procedures to be followed by a law firm or law department may vary based on factors such as the scope of the lawyer's engagement and the

complexity and magnitude of the client's affairs. Such procedures could, but need not, include use of a docket system to record litigation, consultation with lawyers in the firm or department having principal responsibility for the client's affairs or other procedures which, in light of the cost to the client, are not disproportionate to the anticipated benefit to be derived. Although these procedures may not necessarily identify all matters relevant to the response, the evolution and application of the lawyer's customary procedures should constitute a reasonable basis for the lawyer's response.

As the lawyer's response is limited to matters involving his professional engagement as counsel, such response should not include information concerning the client which the lawyer receives in another role. In particular, a lawyer who is also a director or officer of the client would not include information which he received as a director or officer unless the information was also received (or, absent the dual role, would in the normal course be received) in his capacity as legal counsel in the context of his professional engagement. Where the auditor's request for information is addressed to a law firm as a firm, the law firm may properly assume that its response is not expected to include any information which may have been communicated to the particular individual by reason of his serving in the capacity of director or officer of the client. The question of the individual's duty, in his role as a director or officer, is not here addressed.

Paragraph 3 (Response May Cover only Material Items in Certain Cases)

Paragraph 3 makes it clear that the lawyer may optionally limit his responses to those items which are individually or collectively material to the auditor's inquiry. If the lawyer takes responsibility for making a determination that a matter is not material for the purposes of his response to the audit inquiry, he should make it clear that his response is so limited. The auditor, in such circumstance, should properly be entitled to rely upon the lawyer's response as providing him with the necessary corroboration. It should be emphasized that the employment of inside general counsel by the client should not detract from the acceptability of his response since inside general counsel is as fully bound by the professional obligations and responsibilities contained in the Code of Professional Responsibility as outside counsel. If the audit inquiry sets forth a definition of materiality but the lawyer utilizes a different test of materiality, he should specifically so state. The lawyer may wish to reach an understanding with the auditor concerning the test of materiality to be used in his response, but he need not do so if he assumes responsibility for the criteria used in making materiality determinations. Any such understanding with the auditor should be referred to or set forth in the lawyer's response. In this connection, it is assumed that the test of materiality so agreed upon would not be so low in amount as to result in a disservice to the client and an unreasonable burden on counsel.

Paragraph 4 (Limited Responses)

The Statement of Policy is designed to recognize the obligation of the auditor to complete the procedures considered necessary to satisfy himself as to the fair presentation of the company's financial condition and results, in order to render a report which includes an opinion not qualified because of a limitation on the scope of the audit. In this connection, reference is made to SEC Accounting Series Release No. 90 [*Financial Reporting Release No. 1, section 607.01(b)*], in which it is stated:

"A 'subject to' or 'except for' opinion paragraph in which these phrases refer to the scope of the audit, indicating that the accountant has not been able to satisfy himself on some significant element in the financial statements, is

not acceptable in certificates filed with the Commission in connection with the public offering of securities. The 'subject to' qualification is appropriate when the reference is to a middle paragraph or to footnotes explaining the status of matters which cannot be resolved at statement date."

Paragraph 5 (Loss Contingencies)

Paragraph 5 of the Statement of Policy summarizes the categories of "loss contingencies" about which the lawyer may furnish information to the auditor. The term loss contingencies and the categories relate to concepts of accounting accrual and disclosure specified for the accounting profession in Statement of Financial Accounting Standards No. 5[†] ("FAS 5") issued by the Financial Accounting Standards Board in March, 1975.

5.1 Accounting Requirements

To understand the significance of the auditor's inquiry and the implications of any response the lawyer may give, the lawyer should be aware of the following accounting concepts and requirements set out in FAS 5:[#]

- a. A "loss contingency" is an existing condition, situation or set of circumstances involving uncertainty as to possible loss to an enterprise that will ultimately be resolved when one or more events occur or fail to occur. Resolutions of the uncertainty may confirm the loss or impairment of an asset or the incurrence of a liability. (Para. 1)
- b. When a "loss contingency" exists, the likelihood that a future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. There are three areas within that range, defined as follows:
 - i. Probable—"The future event or events are likely to occur."
 - ii. Reasonably possible—"The chance of the future event or events occurring is more than remote but less than likely."
 - iii. Remote—"The chance of the future event or events occurring is slight." (Para. 3)
- c. *Accrual* in a client's financial statements by a charge to income of the period will be required if both the following conditions are met:
 - i. "Information available prior to issuance of the financial statements indicates that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements. It is implicit in this condition that it must be *probable* that one or more future events will occur confirming the fact of the loss." (emphasis added; footnote omitted)
 - ii. "The amount of loss can be reasonably estimated." (Para. 8)
- d. If there is no *accrual* of the loss contingency in the client's financial statements because one of the two conditions outlined in (c)

[†] In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification* (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance promulgated by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

[#] Citations are to paragraph numbers of FAS 5.

above are not met, disclosure may be required as provided in the following:

"If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, *disclosure of the contingency shall be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred. The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable.*" (emphasis added; footnote omitted) (Para. 10)

- e. The accounting requirements recognize or specify that (i) the opinions or views of counsel are not the sole source of audit evidence in making determinations about the accounting recognition or treatment to be given to litigation, and (ii) the fact that the lawyer is notable to express an opinion that the outcome will be favorable does not necessarily require an accrual of a loss. Paragraphs 36 and 37 of FAS 5 state as follows:

"If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

"The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement."

- f. Paragraph 38 of FAS 5 focuses on certain examples concerning the determination by the enterprise whether an assertion of an *unasserted possible claim* may be considered probable:

"With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10."

For a more complete presentation of FAS 5, reference is made to AU section 337B, *Exhibit I—Excerpts From Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies* [SAS No. 12 section 337B],** in which are set forth excerpts selected by the AICPA as relevant to a Statement on Auditing Standards, issued by its Auditing Standards Executive Committee, captioned "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments."

5.2 Lawyer's Response

Concepts of probability inherent in the usage of terms like "probable" or "reasonably possible" or "remote" mean different things in different contexts. Generally, the outcome of, or the loss which may result from, litigation cannot be assessed in any way that is comparable to a statistically or empirically determined concept of "probability" that may be applicable when determining such matters as reserves for warranty obligations or accounts receivable or loan losses when there is a large number of transactions and a substantial body of known historical experience for the enterprise or comparable enterprises. While lawyers are accustomed to counseling clients during the progress of litigation as to the possible amount required for settlement purposes, the estimated risks of the proceedings at particular times and the possible application or establishment

** Statement on Auditing Standards No. 12 section 337B, *Exhibit I—Excerpts From Financial Accounting Standards Board Accounting Standards Codification 450, Contingencies*, has been withdrawn by this section.

of points of law that may be relevant, such advice to the client is not possible at many stages of the litigation and may change dramatically depending upon the development of the proceedings. Lawyers do not generally quantify for clients the "odds" in numerical terms; if they do, the quantification is generally only undertaken in an effort to make meaningful, for limited purposes, a whole host of judgmental factors applicable at a particular time, without any intention to depict "probability" in any statistical, scientific or empirically-grounded sense. Thus, for example, statements that litigation is being defended vigorously and that the client has meritorious defenses do not, and do not purport to, make a statement about the probability of outcome in any measurable sense.

Likewise, the "amount" of loss—that is, the total of costs and damages that ultimately might be assessed against a client—will, in most litigation, be a subject of wide possible variance at most stages; it is the rare case where the amount is precise and where the question is whether the client against which claim is made is liable either for all of it or none of it.

In light of the foregoing considerations, it must be concluded that, as a general rule, it should not be anticipated that meaningful quantifications of "probability" of outcome or amount of damages can be given by lawyers in assessing litigation. To provide content to the definitions set forth in Paragraph 5 of the Statement of Policy, this Commentary amplifies the meanings of the terms under discussion, as follows:

"probable"—An unfavorable outcome is normally "probable" if, but only if, investigation, preparation (including development of the factual data and legal research) and progress of the matter have reached a stage where a judgment can be made, taking all relevant factors into account which may affect the outcome, that it is extremely doubtful that the client will prevail.

"remote"—The prospect for an unfavorable outcome appears, at the time, to be slight; i.e., it is extremely doubtful that the client will not prevail. Normally, this would entail the ability to make an unqualified judgment, taking into account all relevant factors which may affect the outcome, that the client may confidently expect to prevail on a motion for summary judgment on all issues due to the clarity of the facts and the law.

In other words, for purposes of the lawyer's response to the request to advise auditors about litigation, an unfavorable outcome will be "probable" only if the chances of the client prevailing appear slight and of the claimant losing appear extremely doubtful; it will be "remote" when the client's chances of losing appear slight and of not winning appear extremely doubtful. It is, therefore, to be anticipated that, in most situations, an unfavorable outcome will be neither "probable" nor "remote" as defined in the Statement of Policy.

The discussion above about the very limited basis for furnishing judgments about the outcome of litigation applies with even more force to a judgment concerning whether or not the assertion of a claim not yet asserted is "probable." That judgment will infrequently be one within the professional competence of lawyers and therefore the lawyer should not undertake such assessment except where such judgment may become meaningful because of the presence of special circumstances, such as catastrophes, investigations and previous public disclosure as cited in Paragraph 5 of the Statement of Policy, or similar extrinsic evidence relevant to such assessment. Moreover, it is unlikely, absent relevant extrinsic evidence, that the client or anyone else will be in a position to make an informed judgment that assertion of a possible claim is "probable" as opposed to "reasonably possible" (in which event disclosure is not required). In light of the legitimate concern that the public interest would not be well served by resolving uncertainties in a way that invites the assertion of claims or otherwise

causes unnecessary harm to the client and its stockholders, a decision to treat an unasserted claim as "probable" of assertion should be based only upon compelling judgment.

Consistent with these limitations believed appropriate for the lawyer, he should not represent to the auditor, nor should any inference from his response be drawn, that the unasserted possible claims identified by the client (as contemplated by Paragraph 5(c) of the Statement of Policy) represent all such claims of which the lawyer may be aware or that he necessarily concurs in his client's determination of which unasserted possible claims warrant specification by the client; within proper limits, this determination is one which the client is entitled to make—and should make—and it would be inconsistent with his professional obligations for the lawyer to volunteer information arising from his confidential relationship with his client.

As indicated in Paragraph 5, the lawyer also may be asked to estimate the potential loss (or range) in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the lawyer would provide an estimate only if he believes that the probability of inaccuracy of the estimate of the range or amount is slight. What is meant here is that the estimate of amount of loss presents the same difficulty as assessment of outcome and that the same formulation of "probability" should be used with respect to the determination of estimated loss amounts as should be used with respect to estimating the outcome of the matter.

In special circumstances, with the proper consent of the client, the lawyer may be better able to provide the auditor with information concerning loss contingencies through conferences where there is opportunity for more detailed discussion and interchange. However, the principles set forth in the Statement of Policy and this Commentary are fully applicable to such conferences.

Subsumed throughout this discussion is the ongoing responsibility of the lawyer to assist his client, at the client's request, in complying with the requirements of FAS 5 to the extent such assistance falls within his professional competence. This will continue to involve, to the extent appropriate, privileged discussions with the client to provide a better basis on which the client can make accrual and disclosure determinations in respect of its financial statements.

In addition to the considerations discussed above with respect to the making of any judgment or estimate by the lawyer in his response to the auditor, including with respect to a matter specifically identified by the client, the lawyer should also bear in mind the risk that the furnishing of such a judgment or estimate to any one other than the client might constitute an admission or be otherwise prejudicial to the client's position in its defense against such litigation or claim (see Paragraph 1 of the Statement of Policy and of this Commentary).

Paragraph 6 (Lawyer's Professional Responsibility)

The client must satisfy whatever duties it has relative to timely disclosure, including appropriate disclosure concerning material loss contingencies, and, to the extent such matters are given substantive attention in the form of legal consultation, the lawyer, when his engagement is to advise his client concerning a disclosure obligation, has a responsibility to advise his client concerning its obligations in this regard. Although lawyers who normally confine themselves to a legal specialty such as tax, antitrust, patent or admiralty law, unlike lawyers consulted about SEC or general corporate matters, would not be expected to advise generally concerning the client's disclosure obligations in respect of a matter on which the lawyer is working, the legal specialist should counsel his client with respect to the client's obligations under FAS 5 to the extent contemplated herein. Without regard to legal specialty, the lawyer should be mindful

of his professional responsibility to the client described in Paragraph 6 of the Statement of Policy concerning disclosure.

The lawyer's responsibilities with respect to his client's disclosure obligations have been a subject of considerable discussion and there may be, in due course, clarification and further guidance in this regard. In any event, where in the lawyer's view it is clear that (i) the matter is of material importance and seriousness, and (ii) there can be no reasonable doubt that its non-disclosure in the client's financial statements would be a violation of law giving rise to material claims, rejection by the client of his advice to call the matter to the attention of the auditor would almost certainly require the lawyer's withdrawal from employment in accordance with the Code of Professional Responsibility. (See, e.g., Disciplinary Rule 7-102 (A)(3) and (7), and Disciplinary Rule 2-110 (B)(2).) Withdrawal under such circumstances is obviously undesirable and might present serious problems for the client. Accordingly, in the context of financial accounting and reporting for loss contingencies arising from unasserted claims, the standards for which are contained in FAS 5, clients should be urged to disclose to the auditor information concerning an unasserted possible claim or assessment (not otherwise specifically identified by the client) where in the course of the services performed for the client it has become clear to the lawyer that (i) the client has no reasonable basis to conclude that assertion of the claim is not probable (employing the concepts hereby enunciated) and (ii) given the probability of assertion, disclosure of the loss contingency in the client's financial statements is beyond reasonable dispute required.

Paragraph 7 (Limitation on Use of Response)

Some inquiry letters make specific reference to, and one might infer from others, an intention to quote verbatim or include the substance of the lawyer's reply in footnotes to the client's financial statements. Because the client's prospects in pending litigation may shift as a result of interim developments, and because the lawyer should have an opportunity, if quotation is to be made, to review the footnote in full, it would seem prudent to limit the use of the lawyer's reply letter. Paragraph 7 sets out such a limitation.

Paragraph 7 also recognizes that it may be in the client's interest to protect information contained in the lawyer's response to the auditor, if and to the extent possible, against unnecessary further disclosure or use beyond its intended purpose of informing the auditor. For example, the response may contain information which could prejudice efforts to negotiate a favorable settlement of a pending litigation described in the response. The requirement of consent to further disclosure, or of reasonable advance notice where disclosure may be required by court process or necessary in defense of the audit, is designed to give the lawyer an opportunity to consult with the client as to whether consent should be refused or limited or, in the case of legal process or the auditor's defense of the audit, as to whether steps can and should be taken to challenge the necessity of further disclosure or to seek protective measures in connection therewith. It is believed that the suggested standard of twenty days advance notice would normally be a minimum reasonable time for this purpose.

Paragraph 8 (General)

It is reasonable to assume that the Statement of Policy will receive wide distribution and will be readily available to the accounting profession. Specifically, the Statement of Policy has been reprinted as Exhibit II to the Statement on Auditing Standards, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments," issued by the Auditing Standards Executive Committee of the American Institute of Certified Public Accountants. Accordingly,

the mechanic for its incorporation by reference will facilitate lawyer-auditor communication. The incorporation is intended to include not only limitations, such as those provided by Paragraphs 2 and 7 of the Statement of Policy, but also the explanatory material set forth in this Commentary.

Annex A

[Illustrative forms of letters for full response by outside practitioner or law firm and inside general counsel to the auditor's inquiry letter. These illustrative forms, which are not part of the Statement of Policy, have been prepared by the Committee on Audit Inquiry Responses solely in order to assist those who may wish to have, for reference purposes, a form of response which incorporates the principles of the Statement of Policy and accompanying Commentary. Other forms of response letters will be appropriate depending on the circumstances.]

Illustrative Form of Letter for Use by Outside Practitioner or Law Firm:

[Name and Address of Accounting Firm]

Re: *[Name of Client]* *[and Subsidiaries]*

Dear Sirs:

By letter date *[insert date of request]* Mr. *[insert name and title of officer signing request]* of *[insert name of client]* *[(the "Company") or (together with its subsidiaries, the "Company")]* has requested us to furnish you with certain information in connection with your examination of the accounts of the Company as at *[insert fiscal year-end]*.

[Insert description of the scope of the lawyer's engagement; the following are sample descriptions:]

While this firm represents the Company on a regular basis, our engagement has been limited to specific matters as to which we were consulted by the Company.

[or]

We call your attention to the fact that this firm has during the past year represented the Company only in connection with certain *[Federal income tax matters]* *[litigation]* *[real estate transactions]* *[describe other specific matters, as appropriate]* and has not been engaged for any other purpose.

Subject to the foregoing and to the last paragraph of this letter, we advise you that since *[insert date of beginning of fiscal period under audit]* we have not been engaged to give substantive attention to, or represent the Company in connection with, *[material]*^{††} loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[Describe litigation and claims which fit the foregoing criteria.]

[If the inquiry letter requests information concerning specified unasserted possible claims or assessments and / or contractually assumed obligations:]

With respect to the matters specifically identified in the Company's letter and upon which comment has been specifically requested, as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, we advise you, subject to the last paragraph of this letter, as follows:

[Insert information as appropriate]

^{††} **Note:** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

The information set forth herein is *[as of the date of this letter] [as of (insert date), the date on which we commenced our internal review procedures for purposes of preparing this response]*, except as otherwise noted, and we disclaim any undertaking to advise you of changes which thereafter may be brought to our attention.

[Insert information with respect to outstanding bills for services and disbursements.]

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5.[†] *[Describe any other or additional limitation as indicated by Paragraph 4 of the Statement]*

Very truly yours,

Illustrative Form of Letter for Use by Inside General Counsel:

[Name and Address of Accounting Firm]

Re: *[Name of Company] [and Subsidiaries]*

Dear Sirs:

As General Counsel^{‡‡} of *[insert name of client] [(the "Company")]* *[(together with its subsidiaries, the "Company")]*, I advise you as follows in connection with your examination of the accounts of the Company as at *[insert fiscal year-end]*.

I call your attention to the fact that as General Counsel^{‡‡} for the Company I have general supervision of the Company's legal affairs. *[If the general legal supervisory responsibilities of the person signing the letter are limited, set forth here a clear description of those legal matters over which such person exercises general supervision, indicating exceptions to such supervision and situations where primary reliance should be placed on other sources.]* In such capacity, I have reviewed litigation and claims threatened or asserted

[†] In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification* (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance promulgated by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

^{‡‡} It may be appropriate in some cases for the response to be given by inside counsel other than inside general counsel, in which event this letter should be appropriately modified.

involving the Company and have consulted with outside legal counsel with respect thereto where I have deemed appropriate.

Subject to the foregoing and to the last paragraph of this letter, I advise you that since [*insert date of beginning of fiscal period under audit*] neither I, nor any of the lawyers over whom I exercise general legal supervision, have given substantive attention to, or represented the Company in connection with, [*material*]^{††} loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[*Describe litigation and claims which fit the foregoing criteria.*]

[*If information concerning specified unasserted possible claims or assessments and / or contractually assumed obligations is to be supplied:*]

With respect to matters which have been specifically identified as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, I advise you, subject to the last paragraph of this letter, as follows:

[*Insert information as appropriate*]

The information set forth herein is [*as of the date of this letter*] as of [*insert date*], the date on which we commenced our internal review procedures for purposes of preparing this response, except as otherwise noted, and I disclaim any undertaking to advise you of changes which thereafter may be brought to my attention or to the attention of the lawyers over whom I exercise general legal supervision.

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy, this will confirm as correct the Company's understanding that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, I have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, I, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5.[†] [*Describe any other or additional limitation as indicated by Paragraph 4 of the Statement.*]

Very truly yours,

^{††} **Note:** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

[†] In July 2009, the Financial Accounting Standards Board (FASB) issued FASB *Accounting Standards Codification* (ASC) as authoritative. FASB ASC is now the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance promulgated by the Securities and Exchange Commission (SEC). As of July 1, 2009, all other nongrandfathered, non-SEC accounting literature not included in FASB ASC became nonauthoritative. FASB Statement No. 5, *Accounting for Contingencies*, has been codified as FASB ASC 450, *Contingencies*.

Exhibit B—Report of the Subcommittee on Audit Inquiry Responses¹

Because of a recent court case and other judicial decisions involving lawyers' responses to auditors' requests for information, an area of uncertainty or concern has been brought to the Subcommittee's attention and is the subject of the following comment:

This Committee's report does not modify the ABA Statement of Policy, nor does it constitute an interpretation thereof. The Preamble to the ABA Statement of Policy states as follows:

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political, and economic systems depend to an important extent on public confidence in published financial statements. To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and to act in accordance with counsel's advice.

Paragraph 1 of the ABA Statement of Policy provides as follows:

1. *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5, promulgated by the Financial Accounting Standards Board in March 1975 and discussed in

¹ Excerpted from "Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," *The Business Lawyer* 31, no. 3 (1976). Reprinted by permission of the American Bar Association.

Paragraph 5.1 of the accompanying commentary), to the extent hereinafter set forth, subject to the following:

- a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.
- b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.
- c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.
- d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.

In order to preserve explicitly the evidentiary privileges, some lawyers have suggested that clients include language in the following or substantially similar form:

We do not intend that either our request to you to provide information to our auditor or your response to our auditor should be construed in any way to constitute a waiver of the attorney-client privilege or the attorney work-product privilege.

If client's request letter does not contain language similar to that in the preceding paragraph, the lawyer's statement that the client has so advised him or her may be based upon the fact that the client has in fact so advised the lawyer, in writing or orally, in other communications or in discussions.

For the same reason, the response letter from some lawyers also includes language in the following or substantially similar form:

The Company [*or other defined term*] has advised us that, by making the request set forth in its letter to us, the Company [*or other defined term*] does not intend to waive the attorney-client privilege with respect to any information which the Company [*or other defined term*] has furnished to us. Moreover, please be advised that our response to you should not be construed in any way to constitute a waiver of the protection of the attorney work-product privilege with respect to any of our files involving the Company [*or other defined term*].

We believe that language similar to the foregoing in letters of the client or the lawyer simply makes explicit what has always been implicit, namely, it expressly states clearly that neither the client nor the lawyer intended a waiver. It follows that non-inclusion of either or both of the foregoing statements by the client or the lawyer in their respective letters at any time in the past or the future would not constitute an expression of intent to waive the privileges.

On the other hand, the inclusion of such language does not necessarily assure the client that, depending on the facts and circumstances, a waiver may not be found by a court of law to have occurred.

We do not believe that the foregoing types of inclusions cause a negative impact upon the public policy considerations described in the Preamble to the ABA Statement of Policy nor do they intrude upon the arrangements between the legal profession and the accounting profession contemplated by the ABA Statement of Policy. Moreover, we do not believe that such language interferes in any way with the standards and procedures of the accounting profession in the auditing process nor should it be construed as a limitation upon the lawyer's reply to the auditors. We have been informed that the Auditing Standards Board of the AICPA has adopted an interpretation of SAS 12 recognizing the propriety of these statements.

Lawyers, in any case, should be encouraged to have their draft letters to auditors reviewed and approved by the client before releasing them to the auditors and may wish to explain to the client the legal consequences of the client's consent to lawyer's response as contemplated by subparagraph 1(d) of the Statement of Policy.

AU-C Section 505

External Confirmations

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's use of external confirmation procedures to obtain audit evidence, in accordance with the requirements of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, and section 500, *Audit Evidence*. It does not address inquiries regarding litigation, claims, and assessments, which are addressed in section 501, *Audit Evidence—Specific Considerations for Selected Items*.

External Confirmation Procedures to Obtain Audit Evidence

.02 Section 500 indicates that the reliability of audit evidence is influenced by its source and nature and is dependent on the individual circumstances under which it is obtained.¹ Section 500 also includes the following generalizations applicable to audit evidence:²

- Audit evidence is more reliable when it is obtained from independent sources outside the entity.
- Audit evidence obtained directly by the auditor is more reliable than audit evidence obtained indirectly or by inference.
- Audit evidence is more reliable when it exists in documentary form, whether paper, electronic, or other medium.

Accordingly, depending on the circumstances of the audit, audit evidence in the form of external confirmations received directly by the auditor from confirming parties may be more reliable than evidence generated internally by the entity. This section is intended to assist the auditor in designing and performing external confirmation procedures to obtain relevant and reliable audit evidence.

.03 Other AU-C sections recognize the importance of external confirmations as audit evidence; for example

- section 330 discusses the auditor's responsibility (a) to design and implement overall responses to address the assessed risks of material misstatement at the financial statement level and (b) to design and perform further audit procedures whose nature, timing, and extent are based on, and are responsive to, the assessed

¹ Paragraph .A5 of section 500, *Audit Evidence*.

² Paragraph .A32 of section 500.

risks of material misstatement at the relevant assertion level.³ In addition, section 330 requires that, irrespective of the assessed risks of material misstatement, the auditor design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure.⁴ The auditor is required to consider whether external confirmation procedures are to be performed as substantive audit procedures and is required to use external confirmation procedures for accounts receivable unless

- the overall account balance is immaterial,
 - external confirmation procedures would be ineffective, or
 - the auditor's assessed level of risk of material misstatement at the relevant assertion level is low, and the other planned substantive procedures address the assessed risk.⁵
- section 330 requires that the auditor obtain more persuasive audit evidence the higher the auditor's assessment of risk.⁶ To do this, the auditor may increase the quantity of the evidence or obtain evidence that is more relevant or reliable, or both. For example, the auditor may place more emphasis on obtaining evidence directly from third parties or obtaining corroborating evidence from a number of independent sources. Section 330 also indicates that external confirmation procedures may assist the auditor in obtaining audit evidence with the high level of reliability that the auditor requires to respond to significant risks of material misstatement, whether due to fraud or error.⁷
 - section 240, *Consideration of Fraud in a Financial Statement Audit*, indicates that the auditor may design confirmation requests to obtain additional corroborative information as a response to address the assessed risks of material misstatement due to fraud at the assertion level.⁸
 - section 500 indicates that corroborating information obtained from a source independent of the entity (such as external confirmations) may increase the assurance the auditor obtains from evidence existing within the accounting records or representations made by management.⁹

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

³ Paragraphs .05–.06 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

⁴ Paragraph .18 of section 330.

⁵ Paragraphs .19–.20 of section 330.

⁶ Paragraph .07b of section 330.

⁷ Paragraph .A58 of section 330.

⁸ Paragraph .A43 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

⁹ Paragraph .A8 of section 500.

Objective

.05 The objective of the auditor, when using external confirmation procedures, is to design and perform such procedures to obtain relevant and reliable audit evidence.

Definitions

.06 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Exception. A response that indicates a difference between information requested to be confirmed, or contained in the entity's records, and information provided by the confirming party.

External confirmation. Audit evidence obtained as a direct written response to the auditor from a third party (the confirming party), either in paper form or by electronic or other medium (for example, through the auditor's direct access to information held by a third party). (Ref: par. .A1)

Negative confirmation request. A request that the confirming party respond directly to the auditor only if the confirming party disagrees with the information provided in the request.

Nonresponse. A failure of the confirming party to respond, or fully respond, to a positive confirmation request or a confirmation request returned undelivered.

Positive confirmation request. A request that the confirming party respond directly to the auditor by providing the requested information or indicating whether the confirming party agrees or disagrees with the information in the request.

Requirements

External Confirmation Procedures

.07 When using external confirmation procedures, the auditor should maintain control over external confirmation requests, including

- a. determining the information to be confirmed or requested; (Ref: par. .A2)
- b. selecting the appropriate confirming party; (Ref: par. .A3)
- c. designing the confirmation requests, including determining that requests are properly directed to the appropriate confirming party and provide for being responded to directly to the auditor; and (Ref: par. .A4–.A7)
- d. sending the requests, including follow-up requests, when applicable, to the confirming party. (Ref: par. .A8)

Management's Refusal to Allow the Auditor to Perform External Confirmation Procedures

.08 If management refuses to allow the auditor to perform external confirmation procedures, the auditor should

- a. inquire about management's reasons for the refusal and seek audit evidence about their validity and reasonableness; (Ref: par. .A9)
- b. evaluate the implications of management's refusal on the auditor's assessment of the relevant risks of material misstatement, including the risk of fraud, and on the nature, timing, and extent of other audit procedures; and (Ref: par. .A10)
- c. perform alternative audit procedures designed to obtain relevant and reliable audit evidence. (Ref: par. .A11)

.09 If the auditor concludes that management's refusal to allow the auditor to perform external confirmation procedures is unreasonable or the auditor is unable to obtain relevant and reliable audit evidence from alternative audit procedures, the auditor should communicate with those charged with governance, in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*.¹⁰ The auditor also should determine the implications for the audit and the auditor's opinion, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests

.10 If the auditor identifies factors that give rise to doubts about the reliability of the response to a confirmation request, the auditor should obtain further audit evidence to resolve those doubts. (Ref: par. .A12–.A22)

.11 If the auditor determines that a response to a confirmation request is not reliable, the auditor should evaluate the implications on the assessment of the relevant risks of material misstatement, including the risk of fraud, and on the related nature, timing, and extent of other audit procedures. (Ref: par. .A23)

Nonresponses and Oral Responses

.12 In the case of each nonresponse, the auditor should perform alternative audit procedures to obtain relevant and reliable audit evidence. (Ref: par. .A24–.A27)

When a Written Response to a Positive Confirmation Request Is Necessary to Obtain Sufficient Appropriate Audit Evidence

.13 If the auditor has determined that a written response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence, alternative audit procedures will not provide the audit evidence the auditor requires. If the auditor does not obtain such confirmation, the auditor should determine the implications for the audit and the auditor's opinion, in accordance with section 705. (Ref: par. .A28–.A29)

Exceptions

.14 The auditor should investigate exceptions to determine whether they are indicative of misstatements. (Ref: par. .A30–.A31)

¹⁰ Paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*.

Negative Confirmations

.15 Negative confirmations provide less persuasive audit evidence than positive confirmations. Accordingly, the auditor should not use negative confirmation requests as the sole substantive audit procedure to address an assessed risk of material misstatement at the assertion level, unless all of the following are present:

- a. The auditor has assessed the risk of material misstatement as low and has obtained sufficient appropriate audit evidence regarding the operating effectiveness of controls relevant to the assertion.
- b. The population of items subject to negative confirmation procedures comprises a large number of small, homogeneous account balances, transactions, or conditions.
- c. A very low exception rate is expected.
- d. The auditor is not aware of circumstances or conditions that would cause recipients of negative confirmation requests to disregard such requests. (Ref: par. .A32)

Evaluating the Evidence Obtained

.16 The auditor should evaluate whether the results of the external confirmation procedures provide relevant and reliable audit evidence or whether further audit evidence is necessary. (Ref: par. .A33–.A34)

Application and Other Explanatory Material

Definitions

External Confirmation (Ref: par. .06)

.A1 The auditor's direct access to information held by a third party (the confirming party) may meet the definition of an *external confirmation* when, for example, the auditor is provided by the confirming party with the electronic access codes or information necessary to access a secure website where data that addresses the subject matter of the confirmation is held. The auditor's access to information held by the confirming party may also be facilitated by a third-party service provider. When access codes or information necessary to access the confirming party's data is provided to the auditor by management, evidence obtained by the auditor from access to such information does not meet the definition of an *external confirmation*.

External Confirmation Procedures

Determining the Information to Be Confirmed or Requested (Ref: par. .07a)

.A2 External confirmation procedures frequently are performed to confirm or request information regarding account balances, elements thereof, and disclosures. They also may be used to confirm the terms of agreements, contracts, or transactions between an entity and other parties or to confirm the absence of certain conditions, such as a "side agreement."

Selecting the Appropriate Confirming Party (Ref: par. .07b)

.A3 Responses to confirmation requests provide more relevant and reliable audit evidence when confirmation requests are sent to a confirming party

who the auditor believes is knowledgeable about the information to be confirmed. For example, a financial institution official who is knowledgeable about the transactions or arrangements for which confirmation is requested may be the most appropriate person at the financial institution from whom to request confirmation.

Designing Confirmation Requests (Ref: par. .07c)

.A4 The design of a confirmation request may directly affect the confirmation response rate and the reliability and nature of the audit evidence obtained from responses.

.A5 Factors to consider when designing confirmation requests include the following:

- The assertions being addressed.
- Specific identified risks of material misstatement, including fraud risks.
- The layout and presentation of the confirmation request.
- Prior experience on the audit or similar engagements.
- The method of communication (for example, in paper form or by electronic or other medium).
- Management's authorization or encouragement to the confirming parties to respond to the auditor. Confirming parties may only be willing to respond to a confirmation request containing management's authorization.
- The ability of the intended confirming party to confirm or provide the requested information (for example, individual invoice amount versus total balance).

.A6 A positive external confirmation request asks the confirming party to reply to the auditor in all cases, either by indicating the confirming party's agreement with the given information or asking the confirming party to provide information. A response to a properly designed positive confirmation request ordinarily is expected to provide reliable audit evidence. A risk exists, however, that a confirming party may reply to the confirmation request without verifying that the information is correct. The auditor may reduce this risk by using positive confirmation requests that do not state the amount (or other information) on the confirmation request and that ask the confirming party to fill in the amount or furnish other information. On the other hand, use of this type of "blank" confirmation request may result in lower response rates because additional effort is required from the confirming parties to provide the requested information.

.A7 Determining that requests are properly addressed includes verifying the accuracy of the addresses, including testing the validity of some or all of the addresses on the confirmation requests before they are sent out, regardless of the confirmation method used. When a confirmation request is sent by e-mail, the auditor's determination that the request is being properly directed to the appropriate confirming party may include performing procedures to test the validity of some or all of the e-mail addresses supplied by management. The nature and extent of the necessary procedures is dependent on the risks associated with the particular type of confirmation or address. For example, a confirmation addressing a higher risk assertion or a confirmation address that appears to be potentially less reliable (for example, an electronic confirmation addressed in a manner that appears easier to falsify) may necessitate different

or more extensive procedures to determine that the request is directed to the intended recipient. See further guidance in paragraphs .A14–.A15.

Follow-Up on Confirmation Requests (Ref: par. .07d)

.A8 The auditor may send an additional confirmation request when a reply to a previous request has not been received within a reasonable time. For example, the auditor may, having reverified the accuracy of the original address, send an additional or follow-up request.

Management’s Refusal to Allow the Auditor to Perform External Confirmation Procedures

Reasonableness of Management’s Refusal (Ref: par. .08a)

.A9 A refusal by management to allow the auditor to perform external confirmation procedures is a limitation on the audit evidence the auditor seeks to obtain; therefore, the auditor is required to inquire about the reasons for the limitation. A common reason offered by management is the existence of a legal dispute or ongoing negotiation with the intended confirming party, the resolution of which may be affected by an untimely confirmation request. The auditor is required to seek audit evidence about the validity and reasonableness of the reasons for management's refusal because of the risk that management may be attempting to deny the auditor access to audit evidence that may reveal fraud or error.

Implications for the Assessment of Risks of Material Misstatement (Ref: par. .08b)

.A10 The auditor may conclude from the evaluation in paragraph .08b that it would be appropriate to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit procedures, in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.¹¹ For example, if management's request to not confirm is unreasonable, this may indicate a fraud risk factor that requires evaluation, in accordance with section 240.¹²

Alternative Audit Procedures (Ref: par. .08c)

.A11 The alternative audit procedures performed may be similar to those appropriate for a nonresponse, as set out in paragraphs .A24–.A27. Such procedures also would take into account the results of the auditor's evaluation in paragraph .08b.

Results of the External Confirmation Procedures

Reliability of Responses to Confirmation Requests (Ref: par. .10)

.A12 Section 500 indicates that even when audit evidence is obtained from sources external to the entity, circumstances may exist that affect its reliability.¹³ All responses carry some risk of interception, alteration, or fraud. Such risk exists regardless of whether a response is obtained in paper form

¹¹ Paragraph .32 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

¹² Paragraph .24 of section 240.

¹³ Paragraph .A32 of section 500.

or by electronic or other medium. Factors that may indicate doubts about the reliability of a response include whether it

- was received by the auditor indirectly or
- appeared not to come from the originally intended confirming party.

.A13 The auditor's consideration of the reliability of the information obtained through the confirmation process to be used as audit evidence includes consideration of the risks that

- a. the information obtained may not be from an authentic source,
- b. a respondent may not be knowledgeable about the information to be confirmed, and
- c. the integrity of the information may have been compromised.

When an electronic confirmation process or system is used, the auditor's consideration of the risks described in *a–c* includes the consideration of risks that the electronic confirmation process is not secure or is improperly controlled.

.A14 Responses received electronically (for example, by fax or e-mail) involve risks relating to reliability because proof of origin or identity of the confirming party may be difficult to establish, and alterations may be difficult to detect. The auditor may determine that it is appropriate to address such risks by utilizing a system or process that validates the respondent or by directly contacting the purported sender (for example, by telephone) to validate the identity of the sender of the response and to validate that the information received by the auditor corresponds to what was transmitted by the sender.

.A15 An electronic confirmation system or process that creates a secure confirmation environment may mitigate the risks of interception or alteration. Creating a secure confirmation environment depends on the process or mechanism used by the auditor and the respondent to minimize the possibility that the results will be compromised because of interception or alteration of the confirmation. If the auditor is satisfied that such a system or process is secure and properly controlled, evidence provided by responses received using the system or process may be considered reliable. Various means might be used to validate the source of the electronic information. For example, the use of encryption, electronic digital signatures, and procedures to verify website authenticity may improve the security of the electronic confirmation system or process. If a system or process that facilitates electronic confirmation between the auditor and the respondent is in place and the auditor plans to rely on the controls over such a system or process, an assurance trust services report (for example, Systrust) or another assurance report on that system or process may assist the auditor in assessing the design and operating effectiveness of the electronic and manual controls with respect to that system or process. Such an assurance report may address the risks described in paragraph .A13. If these risks are not adequately addressed in such a report, the auditor may perform additional procedures to address those risks.

.A16 The auditor is required by section 500 to determine whether to modify or add procedures to resolve doubts over the reliability of information to be used as audit evidence.¹⁴ The auditor may choose to verify the source and contents of a response to a confirmation request by contacting the confirming party (for example, as described in paragraph .A14). When a response has been returned to the auditor indirectly (for example, because the confirming party incorrectly

¹⁴ Paragraph .10 of section 500.

addressed it to the entity rather than the auditor), the auditor may request the confirming party to respond in writing directly to the auditor.

Disclaimers and Other Restrictions in Confirmation Responses

.A17 A response to a confirmation request may contain restrictive language regarding its use. Such restrictions do not necessarily invalidate the reliability of the response as audit evidence. Whether the auditor may rely on the information confirmed and the degree of such reliance will depend on the nature and substance of the restrictive language.

.A18 Restrictions that appear to be boilerplate disclaimers of liability may not affect the reliability of the information being confirmed. Examples of such disclaimers may include the following:

- Information is furnished as a matter of courtesy without a duty to do so and without responsibility, liability, or warranty, express or implied.
- The reply is given solely for the purpose of the audit without any responsibility on the part of the respondent, its employees, or its agents, and it does not relieve the auditor from any other inquiry or the performance of any other duty.

.A19 Other restrictive language also may not affect the reliability of a response if it does not relate to the assertion being tested. For example, in a confirmation of investments, a disclaimer regarding the valuation of the investments may not affect the reliability of the response if the auditor's objective in using the confirmation request is to obtain audit evidence regarding whether the investments exist.

.A20 Certain restrictive language may, however, cast doubt about the completeness or accuracy of the information contained in the response or on the auditor's ability to rely on such information. Examples of such restrictions may include the following:

- Information is obtained from electronic data sources, which may not contain all information in the respondent's possession.
- Information is not guaranteed to be accurate nor current and may be a matter of opinion.
- The recipient may not rely upon the information in the confirmation.

.A21 When the auditor has doubts about the reliability of the response as a result of restrictive language, then, in accordance with paragraph .10, the auditor is required to obtain further audit evidence to resolve those doubts. When the practical effect of the restrictive language is difficult to ascertain in the particular circumstances, the auditor may consider it appropriate to seek clarification from the respondent or seek legal advice.

.A22 If the auditor is unable to resolve the doubts about the reliability of a response as a result of restrictive language, then, in accordance with paragraph .11, the auditor is required to evaluate the implications on the assessment of the relevant risks of misstatement, including the risk of fraud, and on the related nature, timing, and extent of other audit procedures. The nature, timing, and extent of such procedures will depend on factors such as the nature of the financial statement item, the assertion being tested, the nature and substance of the restrictive language, and relevant information obtained through other audit procedures.

Unreliable Responses (Ref: par. .11)

.A23 When the auditor concludes that a response is unreliable, the auditor may need to revise the assessment of the risks of material misstatement at the assertion level and modify planned audit procedures accordingly, in accordance with section 315.¹⁵ For example, an unreliable response may indicate a fraud risk factor that requires evaluation, in accordance with section 240.¹⁶

Nonresponses and Oral Responses (Ref: par. .12)

.A24 The nature and extent of alternative procedures are affected by the account and assertion in question. Examples of alternative audit procedures the auditor may perform include the following:

- For accounts receivable balances, examining specific subsequent cash receipts (including matching such receipts with the actual items being paid), shipping documentation, or other client documentation providing evidence for the existence assertion
- For accounts payable balances, examining subsequent cash disbursements or correspondence from third parties and other records, such as receiving reports and statements that the client receives from vendors providing evidence for the completeness assertion

.A25 A nonresponse to a confirmation request may indicate a previously unidentified risk of material misstatement. In such situations, the auditor may need to revise the assessed risk of material misstatement at the assertion level and modify planned audit procedures, in accordance with section 315.¹⁷ For example, a fewer or greater number of responses to confirmation requests than anticipated may indicate a previously unidentified fraud risk factor that requires evaluation, in accordance with section 240.¹⁸

.A26 The auditor may determine that it is not necessary to perform additional alternative audit procedures beyond the evaluation of the confirmation results if such evaluation indicates that relevant and reliable audit evidence has already been obtained. This may be the case when testing for overstatement of amounts and (a) the nonresponses in the aggregate, projected as 100 percent misstatements to the population and added to the sum of all other unadjusted differences, would not affect the auditor's decision about whether the financial statements are materially misstated and (b) the auditor has not identified unusual qualitative factors or systematic characteristics related to the nonresponses, such as that all nonresponses pertain to year-end transactions.

.A27 An oral response to a confirmation request does not meet the definition of an *external confirmation* because it is not a direct written response to the auditor. Provided that the auditor has not concluded that a direct written response to a positive confirmation is necessary to obtain sufficient appropriate audit evidence, the auditor may take the receipt of an oral response to a confirmation request into consideration when determining the nature and extent of alternative audit procedures required to be performed for nonresponses, in accordance with paragraph .12. The auditor may perform additional procedures to address the reliability of the evidence provided by the oral response, such as initiating a call to the respondent using a telephone number that the auditor

¹⁵ Paragraph .32 of section 315.

¹⁶ Paragraph .24 of section 240.

¹⁷ Paragraph .32 of section 315.

¹⁸ Paragraph .24 of section 240.

has independently verified as being associated with the entity. For example, the auditor might call the main telephone number obtained from a reliable source and ask to be directed to the named respondent instead of calling a direct extension provided by the client or included in the statement or other correspondence received by the entity. The auditor may determine that the additional evidence provided by contacting the respondent directly, together with the evidence upon which the original confirmation request is based (for example, a statement or other correspondence received by the entity), is sufficient appropriate audit evidence. In appropriately documenting the oral response, the auditor may include specific details, such as the identity of the person from whom the response was received, his or her position, and the date and time of the conversation.

When a Written Response to a Positive Confirmation Request Is Necessary to Obtain Sufficient Appropriate Audit Evidence (Ref: par. .13)

.A28 In certain circumstances, the auditor may identify an assessed risk of material misstatement at the assertion level for which a response to a positive confirmation request is necessary to obtain sufficient appropriate audit evidence. Such circumstances may include the following:

- The information available to corroborate management's assertion(s) is only available outside the entity.
- Specific fraud risk factors, such as the risk of management override of controls or the risk of collusion, which can involve employee(s) or management, or both, prevent the auditor from relying on evidence from the entity.

.A29 When the auditor has determined that a written response is necessary to obtain sufficient appropriate audit evidence and the auditor has obtained only an oral response to a confirmation request, the auditor may request the confirming party to respond in writing directly to the auditor. If no such response is received, in accordance with paragraph .13, alternative audit procedures will not provide the audit evidence the auditor requires, and the auditor is required to determine the implications for the audit and the auditor's opinion, in accordance with section 705.

Exceptions (Ref: par. .14)

.A30 Exceptions noted in responses to confirmation requests may indicate misstatements or potential misstatements in the financial statements. When a misstatement is identified, the auditor is required by section 240 to evaluate whether such misstatement is indicative of fraud.¹⁹ Exceptions may provide a guide to the quality of responses from similar confirming parties or for similar accounts. Exceptions also may indicate a deficiency, or deficiencies, in the entity's internal control over financial reporting.

.A31 Some exceptions do not represent misstatements. For example, the auditor may conclude that differences in responses to confirmation requests are due to timing, measurement, or clerical errors in the external confirmation procedures.

Negative Confirmations (Ref: par. .15)

.A32 The failure to receive a response to a negative confirmation request does not indicate receipt by the intended confirming party of the confirmation request or verification of the accuracy of the information contained in the

¹⁹ Paragraph .35 of section 240.

request. Accordingly, a failure of a confirming party to respond to a negative confirmation request provides significantly less persuasive audit evidence than does a response to a positive confirmation request. Confirming parties also may be more likely to respond indicating their disagreement with a confirmation request when the information in the request is not in their favor but less likely to respond otherwise. For example, holders of bank deposit accounts may be more likely to respond if they believe that the balance in their account is understated in the confirmation request but less likely to respond when they believe the balance is overstated. Therefore, sending negative confirmation requests to holders of bank deposit accounts may be a useful procedure in considering whether such balances may be understated but is unlikely to be effective if the auditor is seeking evidence regarding overstatement.

Evaluating the Evidence Obtained (Ref: par. .16)

.A33 When evaluating the results of individual external confirmation requests, the auditor may categorize such results as follows:

- a.* A response by the appropriate confirming party indicating agreement with the information provided in the confirmation request or providing requested information without exception
- b.* A response deemed unreliable
- c.* A nonresponse
- d.* A response indicating an exception

.A34 The auditor's evaluation, when taken into account with other audit procedures the auditor may have performed, may assist the auditor in concluding whether sufficient appropriate audit evidence has been obtained or whether further audit evidence is necessary, as required by section 330.²⁰

²⁰ Paragraphs .28–.29 of section 330.

AU-C Section 510

Opening Balances—Initial Audit Engagements, Including Reaudit Engagements

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to opening balances in an initial audit engagement, including a reaudit engagement. In addition to financial statement amounts, opening balances include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments. When comparative financial statements are presented, the relevant requirements and guidance for comparative financial statements in section 700, *Forming an Opinion and Reporting on Financial Statements*, also apply. Section 300, *Planning an Audit*, includes additional requirements and guidance regarding activities prior to starting an initial audit. Section 708, *Consistency of Financial Statements*, also applies with respect to the auditor's evaluation of the consistency of accounting principles between the periods presented and covered by the auditor's opinion. Section 210, *Terms of Engagement*, includes requirements and guidance with respect to communications with a predecessor auditor before accepting an initial audit engagement, including a reaudit engagement.

.02 This section, with respect to predecessor auditors, does not apply if the most recent audited financial statements are more than one year prior to the beginning of the earliest period to be audited.

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor, in conducting an initial audit engagement, including a reaudit engagement, is to obtain sufficient appropriate audit evidence regarding opening balances about whether (Ref: par. .A1)

- a. opening balances contain misstatements that materially affect the current period's financial statements and
- b. appropriate accounting policies reflected in the opening balances have been consistently applied in the current period's financial

statements or changes thereto are appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Definitions

.05 For the purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Initial audit engagement. An engagement in which either (a) the financial statements for the prior period were not audited, or (b) the financial statements for the prior period were audited by a predecessor auditor.

Opening balances. Those account balances that exist at the beginning of the period. Opening balances are based upon the closing balances of the prior period and reflect the effects of transactions and events of prior periods and accounting policies applied in the prior period. Opening balances also include matters requiring disclosure that existed at the beginning of the period, such as contingencies and commitments.

Predecessor auditor. The auditor from a different audit firm who has reported on the most recent audited financial statements or was engaged to perform but did not complete an audit of the financial statements. (Ref: par. .A2)

Reaudit. An initial audit engagement to audit financial statements that have been previously audited by a predecessor auditor.

Requirements

Audit Procedures

.06 The auditor should read the most recent financial statements, if any, and the predecessor auditor's report thereon, if any, for information relevant to opening balances, including disclosures, and consistency in the application of accounting policies.

.07 In instances in which the prior period financial statements were audited by a predecessor auditor, the auditor should request management to authorize the predecessor auditor to allow a review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, thereby providing the auditor with information to assist in planning and performing the engagement. (Ref: par. .A3–.A11)

Opening Balances

.08 The auditor should obtain sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period's financial statements by

- a. determining whether the prior period's closing balances have been correctly brought forward to the current period or, when appropriate, have been restated;
- b. determining whether the opening balances reflect the application of appropriate accounting policies; and

- c. evaluating whether audit procedures performed in the current period provide evidence relevant to the opening balances and performing one or both of the following: (Ref: par. .A7–.A9 and .A12–.A14)
 - i. When the prior year financial statements were audited, reviewing the predecessor auditor's audit documentation to obtain evidence regarding the opening balances
 - ii. Performing specific audit procedures to obtain evidence regarding the opening balances

.09 If the auditor obtains audit evidence that the opening balances contain misstatements that could materially affect the current period's financial statements, the auditor should perform such additional audit procedures as are appropriate in the circumstances to determine the effect on the current period's financial statements. If the auditor concludes that such misstatements exist in the current period's financial statements, the auditor should communicate the misstatements to the appropriate level of management and those charged with governance, in accordance with section 260, *The Auditor's Communication With Those Charged With Governance*. If the prior period financial statements were audited by a predecessor auditor, the auditor should also refer to paragraphs .12–.13.

Consistency of Accounting Policies

.10 The auditor should obtain sufficient appropriate audit evidence about whether the accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements and whether changes in the accounting policies have been appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

Relevant Information in the Predecessor Auditor's Report

.11 If the prior period's financial statements were audited by a predecessor auditor, and a modification was made to the opinion, the auditor should evaluate the effect of the matter giving rise to the modification in assessing the risks of material misstatement in the current period's financial statements, in accordance with section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

Discovery of Possible Material Misstatements in Financial Statements Reported on by a Predecessor Auditor

.12 If the auditor becomes aware of information during the audit that leads the auditor to believe that financial statements reported on by the predecessor auditor may require revision, the auditor should request management to inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter. The auditor should communicate to the predecessor auditor information that the auditor believes the predecessor auditor may need to consider, in accordance with section 560, *Subsequent Events and Subsequently Discovered Facts*, which addresses the auditor's responsibilities when facts become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to amend the auditor's report. (Ref: par. .A15)

.13 If management refuses to inform the predecessor auditor that the prior period financial statements may need revision or if the auditor is not satisfied with the resolution of the matter, the auditor should evaluate (a) the

implications on the current engagement and (b) whether to withdraw from the engagement or, when withdrawal is not possible under applicable law or regulation, disclaim an opinion on the financial statements. (Ref: par. .A16)

Audit Conclusions and Reporting

.14 The auditor should not make reference to the report or work of the predecessor auditor as the basis, in part, for the auditor's own opinion.

Opening Balances

.15 If the auditor is unable to obtain sufficient appropriate audit evidence regarding the opening balances, the auditor should express a qualified opinion or disclaim an opinion on the financial statements, as appropriate, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*. (Ref: par. .A17)

.16 If the auditor concludes that the opening balances contain a misstatement that materially affects the current period's financial statements, and the effect of the misstatement is not appropriately accounted for or adequately presented or disclosed, the auditor should express a qualified opinion or an adverse opinion, as appropriate, in accordance with section 705.

Consistency of Accounting Policies

.17 If the auditor concludes that

- a. the current period's accounting policies are not consistently applied regarding opening balances, in accordance with the applicable financial reporting framework, or
- b. a change in accounting policies is not appropriately accounted for or adequately presented or disclosed, in accordance with the applicable financial reporting framework,

the auditor should express a qualified opinion or an adverse opinion, as appropriate, in accordance with section 705.

Modification to the Opinion in the Predecessor Auditor's Report

.18 If the predecessor auditor's opinion regarding the prior period's financial statements included a modification to the auditor's opinion that remains relevant and material to the current period's financial statements, the auditor should modify the auditor's opinion on the current period's financial statements, in accordance with section 705. (Ref: par. .A18)

Application and Other Explanatory Material

Objective (Ref: par. .04)

.A1 Audit evidence regarding opening balances and the consistency of accounting principles may include the most recent audited financial statements, the predecessor auditor's report thereon, the results of inquiry of the predecessor auditor, the results of the auditor's review of the predecessor auditor's audit documentation relating to the most recently completed audit, and audit procedures performed on the current period's transactions that may provide evidence about the opening balances or consistency.

Definitions

Predecessor Auditor (Ref: par. .05)

.A2 Two predecessor auditors may exist: the auditor who reported on the most recent audited financial statements and the auditor who was engaged to perform, but did not complete, an audit of any subsequent financial statements.

Audit Procedures (Ref: par. .07)

.A3 The auditor may initiate communications with management to authorize review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, either before or after accepting the engagement. Relevant ethical and professional requirements guide the auditor's communications with the predecessor auditor.

.A4 The predecessor auditor may request a consent and acknowledgment letter from the entity to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized. Exhibit B, "Illustrative Entity Consent and Acknowledgment Letter," contains an illustrative entity consent and acknowledgment letter.

.A5 It is customary for the predecessor auditor to make himself or herself available to the auditor and to make available for review certain audit documentation. The predecessor auditor determines which audit documentation is to be made available for review and which may be copied. The predecessor auditor ordinarily permits the auditor to review audit documentation, including documentation of planning; risk assessment procedures; further audit procedures; audit results; and other matters of continuing accounting and auditing significance, such as the schedule of uncorrected misstatements, working paper analysis of balance sheet accounts, and those relating to contingencies.

.A6 Before permitting access to the audit documentation, the predecessor auditor may request written confirmation of the auditor's agreement regarding the use of the audit documentation. Exhibit C, "Illustrative Successor Auditor Acknowledgment Letter," contains an illustrative successor auditor acknowledgment letter.

.A7 The extent, if any, to which a predecessor auditor permits access to the audit documentation or responds to inquiries from the auditor is a matter of the predecessor auditor's professional judgment. The predecessor auditor's denial or limitation of access may affect the auditor's assessment of risk regarding the opening balances or the nature, timing, and extent of the auditor's procedures with respect to the opening balances and consistency of accounting principles. (Ref: par. .07 and .08c)

.A8 If the predecessor auditor permits access to the audit documentation, the auditor may review the predecessor auditor's audit documentation for information relevant to planning and performing the audit. The auditor's determination whether to use information resulting from such review as part of the auditor's risk assessment procedures or as evidence regarding the opening balances is influenced by the auditor's assessment of the professional competence and independence of the predecessor auditor. Although the predecessor auditor is not a component auditor, as defined in section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, the auditor may make inquiries similar to those listed in section 600

concerning the professional competence and independence of the predecessor auditor.¹ (Ref: par. .07 and .08c)

.A9 The auditor's review of the predecessor auditor's audit documentation may provide audit evidence about the opening balances and consistency of accounting principles. However, the nature, timing, and extent of audit work performed and the conclusions reached are solely the responsibility of the auditor, as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*. (Ref: par. .07 and .08c)

Considerations Specific to Governmental Entities (Ref: par. .07)

.A10 In audits of governmental entities, law or regulation may limit the information that the auditor can obtain from a predecessor auditor. Certain information may be identified as classified or otherwise prohibited from disclosure by federal, state, or local laws or public safety or security concerns. For example, if a governmental entity that has previously been audited by a government audit organization (for example, the U.S. Government Accountability Office, a federal inspector general, an elected or statutorily appointed state auditor general, or other suitably qualified audit organization) engages a public accounting firm, the amount of access to audit documentation or other information that the government audit organization can provide an incoming auditor may be constrained by privacy or confidentiality laws or regulations. In situations when communications with a predecessor auditor are restricted, audit evidence may need to be obtained through other means and, if sufficient appropriate audit evidence cannot be obtained, consideration given to the effect on the auditor's opinion, in accordance with the requirement in paragraph .15.

.A11 If a government audit organization engages a public accounting firm in an agency capacity to perform an audit of a governmental entity and such firm did not audit the financial statements of the governmental entity in the prior period, this is usually regarded as a change in auditors; therefore, this section applies.

Opening Balances (Ref: par. .08c)

.A12 The nature and extent of audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances depend on such matters as the following:

- The accounting policies followed by the entity
- The nature of the account balances, classes of transactions and disclosures, and the risks of material misstatement in the current period's financial statements
- The significance of the opening balances relative to the current period's financial statements
- Whether the prior period's financial statements were audited and, if so, whether the predecessor auditor's opinion was modified

.A13 For current assets and liabilities, some audit evidence about opening balances may be obtained as part of the current period's audit procedures. For example, the collection (payment) of opening accounts receivable (accounts payable) during the current period will provide some audit evidence of their existence, rights and obligations, completeness, and valuation at the beginning

¹ Paragraph .22 of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

of the period. In the case of inventories, however, the current period's audit procedures on the closing inventory balance provide little audit evidence regarding inventory on hand at the beginning of the period. Therefore, additional audit procedures, such as one or more of the following, may be necessary to obtain sufficient appropriate audit evidence:

- Observing a current physical inventory count and reconciling it to the opening inventory quantities
- Performing audit procedures on the valuation of the opening inventory items
- Performing audit procedures on gross profit and cutoff

.A14 For noncurrent assets and liabilities, such as property, plant, and equipment; investments; and long-term debt, some audit evidence may be obtained by examining the accounting records and other information underlying the opening balances. In certain cases, the auditor may be able to obtain some audit evidence regarding opening balances through confirmation with third parties (for example, for long-term debt and investments). In other cases, the auditor may need to carry out additional audit procedures.

Discovery of Possible Material Misstatements in Financial Statements Reported on by a Predecessor Auditor

.A15 Section 560 provides reporting guidance to the predecessor auditor who is requested to reissue a previously issued report on financial statements of a prior period when those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period.² Section 700 provides reporting guidance to the auditor reporting on comparative financial statements when the predecessor auditor is unable or unwilling to reissue the auditor's report on prior period financial statements that have been restated.³ (Ref: par. .12)

.A16 If management refuses to inform the predecessor auditor that the prior period financial statements may need revision, or if the auditor is not satisfied with the resolution of the matter, the auditor may seek legal advice in determining an appropriate course of action, including evaluating whether to withdraw from the engagement when withdrawal is possible under applicable law or regulation. (Ref: par. .13)

Audit Conclusions and Reporting

Opening Balances (Ref: par. .15)

.A17 Section 705 addresses circumstances that may result in a modification to the auditor's opinion on the financial statements, the type of opinion appropriate in the circumstances, and the content of the auditor's report when the auditor's opinion is modified. The inability of the auditor to obtain sufficient appropriate audit evidence regarding opening balances may result in one of the following modifications to the opinion in the auditor's report:

- a. A qualified opinion or a disclaimer of opinion, as is appropriate in the circumstances.
- b. An opinion that is qualified or disclaimed, as appropriate, regarding the results of operations and cash flows, when relevant, and

² Paragraphs .19–.20 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

³ Paragraph .A52 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

unmodified regarding financial position. Exhibit A, "Illustration of Report With Disclaimer of Opinion on Results of Operations and Cash Flows and Unmodified Opinion on Financial Position," includes such an illustrative report.

***Modification to the Opinion in the Predecessor Auditor's Report
(Ref: par. .18)***

.A18 In some situations, a modification to the predecessor auditor's opinion may not be relevant and material to the opinion on the current period's financial statements. This may be the case when, for example, there was a scope limitation in the prior period but the matter giving rise to the scope limitation has been resolved in the current period.

.A19

Exhibit A—Illustration of Report With Disclaimer of Opinion on Results of Operations and Cash Flows and Unmodified Opinion on Financial Position

Circumstances include the following:

- The auditor did not observe the counting of the physical inventory at the beginning of the current period and was unable to obtain sufficient appropriate audit evidence regarding the opening balances of inventory.
- The possible effects of the inability to obtain sufficient appropriate audit evidence regarding opening balances of inventory are deemed to be material and pervasive to the entity's results of operations and cash flows.¹
- The financial position at year-end is fairly presented.
- A disclaimer of opinion regarding the results of operations and cash flows and an unmodified opinion regarding financial position is considered appropriate in the circumstances.

Independent Auditor's Report

[Appropriate Addressee]

Report on the Financial Statements²

We have audited the accompanying balance sheet of ABC Company as of December 31, 20X1, and were engaged to audit the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matters described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the income statement and the cash flow statement.

We conducted our audit of the balance sheet in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the balance sheet is free from material misstatement.

¹ If the possible effects, in the auditor's professional judgment, are considered to be material but not pervasive to the entity's results of operations and cash flows, the auditor would express a qualified opinion on the results of operations and cash flows.

² The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.³ Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our unmodified opinion on the financial position.

Basis for Disclaimer of Opinion on the Results of Operations and Cash Flows

We were not engaged as auditors of the Company until after December 31, 20X0, and, therefore, did not observe the counting of physical inventories at the beginning of the year. We were unable to satisfy ourselves by performing other auditing procedures concerning the inventory held at December 31, 20X0. Since opening inventories enter into the determination of net income and cash flows, we were unable to determine whether any adjustments might have been necessary in respect of the profit for the year reported in the income statement and the net cash flows from operating activities reported in the cash flow statement.

Disclaimer of Opinion on the Results of Operations and Cash Flows

Because of the matters described in the Basis for Disclaimer of Opinion on the Results of Operations and Cash Flows paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the results of operations and cash flows.

Opinion on the Financial Position

In our opinion, the balance sheet presents fairly, in all material respects, the financial position of ABC Company as of December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Auditor's signature]

[Auditor's city and state]

[Date of the auditor's report]

³ In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion." would not be included.

.A20

Exhibit B—Illustrative Entity Consent and Acknowledgment Letter (Ref: par. .07 and .A4)

Paragraph .07 requires that the auditor request management to authorize the predecessor auditor to allow a review of the predecessor auditor's audit documentation and for the predecessor auditor to respond fully to inquiries by the auditor, thereby providing the auditor with information to assist in planning and performing the engagement. Paragraph .A4 states that the predecessor auditor may request a consent and acknowledgment letter from the entity to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized. The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

ABC Enterprises

[Address]

You have given your consent to allow [*name of successor CPA firm*], as independent auditors for ABC Enterprises (ABC), access to our audit documentation for our audit of the December 31, 20X1, financial statements of ABC. You also have given your consent to us to respond fully to [*name of successor CPA firm*] inquiries. You understand and agree that the review of our audit documentation is undertaken solely for the purpose of obtaining an understanding about ABC and certain information about our audit to assist [*name of successor CPA firm*] in planning and performing the audit of the December 31, 20X2, financial statements of ABC.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Attached is the form of the letter we will furnish [*name of successor CPA firm*] regarding the use of the audit documentation.

Very truly yours,

[*Predecessor Auditor*]

Exhibit C—Illustrative Successor Auditor Acknowledgment Letter (Ref: par. .A6)

Paragraph .A6 states that the predecessor auditor may request that the auditor confirm in writing his or her agreement regarding the use of the predecessor auditor's audit documentation before permitting access to it. The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

[Successor Auditor]

[Address]

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the December 31, 20X1, financial statements of ABC Enterprises (ABC). We rendered a report on those financial statements and have not performed any audit procedures subsequent to the audit report date. In connection with your audit of ABC's 20X2 financial statements, you have requested access to our audit documentation prepared in connection with that audit. ABC has authorized our firm to allow you to review that audit documentation.

Our audit, and the audit documentation prepared in connection therewith, of ABC's financial statements were not planned or conducted in contemplation of your review. Therefore, items of possible interest to you may not have been specifically addressed. Our use of professional judgment and the assessment of audit risk and materiality for the purpose of our audit mean that matters may have existed that would have been assessed differently by you. We make no representation about the sufficiency or appropriateness of the information in our audit documentation for your purposes.

We understand that the purpose of your review is to obtain information about ABC and our 20X1 audit results to assist you in planning and performing your 20X2 audit of ABC. For that purpose only, we will provide you access to our audit documentation that relates to that objective.

Upon request, we will provide copies of audit documentation that provides factual information about ABC. You agree to subject any such copies or information otherwise derived from our audit documentation to your normal policy for retention of audit documentation and protection of confidential entity information. Furthermore, in the event of a third-party request for access to your audit documentation prepared in connection with your audits of ABC, you agree to obtain our permission before voluntarily allowing any such access to our audit documentation or information otherwise derived from our audit documentation, and to obtain on our behalf any releases that you obtain from such third party. You agree to advise us promptly and provide us a copy of any subpoena, summons, or other court order for access to your audit documentation that include copies of our audit documentation or information otherwise derived therefrom.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Very truly yours,

[Predecessor Auditor]

Even with management's consent, access to the predecessor auditor's audit documentation may still be limited. Experience has shown that the predecessor auditor may be willing to grant broader access if given additional assurance concerning the use of the audit documentation. Accordingly, the auditor might consider agreeing to the following additional limitations on the review of the predecessor auditor's audit documentation in order to obtain broader access:

- The auditor will not comment, orally or in writing, to anyone as a result of the review about whether the predecessor auditor's engagement was performed in accordance with generally accepted auditing standards.
- The auditor will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of the predecessor auditor's audit.
- The auditor accepts sole responsibility for the nature, timing, and extent of audit work performed and the conclusions reached in expressing an opinion on the 20X2 financial statements of ABC.

The following paragraph illustrates the previous text:

Because your review of our audit documentation is undertaken solely for the purpose described previously and may not entail a review of all our audit documentation, you agree that (1) the information obtained from the review will not be used by you for any other purpose, (2) you will not comment, orally or in writing, to anyone as a result of that review about whether our audit was performed in accordance with generally accepted auditing standards, (3) you will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of our audit, and (4) you accept sole responsibility for the nature, timing and extent of audit work performed and the conclusions reached in expressing your opinion on the 20X2 financial statements of ABC.

AU-C Section 520

Analytical Procedures

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's use of analytical procedures as substantive procedures (substantive analytical procedures). It also addresses the auditor's responsibility to perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion on the financial statements. Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, addresses the use of analytical procedures as risk assessment procedures (which may be referred to as analytical procedures used to plan the audit).¹ Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, addresses the nature, timing, and extent of audit procedures in response to assessed risks; these audit procedures may include substantive analytical procedures.²

Effective Date

.02 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.03 The objectives of the auditor are to

- a. obtain relevant and reliable audit evidence when using substantive analytical procedures and
- b. design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion about whether the financial statements are consistent with the auditor's understanding of the entity. (Ref: par. .A1)

Definition

.04 For the purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Analytical procedures. Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass

¹ Paragraph .06b of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

² Paragraphs .06 and .18 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount. (Ref: par. .A2–.A6)

Requirements

Substantive Analytical Procedures

.05 When designing and performing analytical procedures, either alone or in combination with tests of details, as substantive procedures in accordance with section 330, the auditor should³ (Ref: par. .A7–.A9)

- a. determine the suitability of particular substantive analytical procedures for given assertions, taking into account the assessed risks of material misstatement and tests of details, if any, for these assertions; (Ref: par. .A10–.A16)
- b. evaluate the reliability of data from which the auditor's expectation of recorded amounts or ratios is developed, taking into account the source, comparability, and nature and relevance of information available and controls over preparation; (Ref: par. .A17–.A20)
- c. develop an expectation of recorded amounts or ratios and evaluate whether the expectation is sufficiently precise (taking into account whether substantive analytical procedures are to be performed alone or in combination with tests of details) to identify a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated; and (Ref: par. .A21–.A23)
- d. determine the amount of any difference of recorded amounts from expected values that is acceptable without further investigation as required by paragraph .07 and compare the recorded amounts, or ratios developed from recorded amounts, with the expectations. (Ref: par. .A24)

Analytical Procedures That Assist When Forming an Overall Conclusion

.06 The auditor should design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion about whether the financial statements are consistent with the auditor's understanding of the entity. (Ref: par. .A25–.A27)

Investigating Results of Analytical Procedures

.07 If analytical procedures performed in accordance with this section identify fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount, the auditor should investigate such differences by

- a. inquiring of management and obtaining appropriate audit evidence relevant to management's responses and

³ Paragraph .18 of section 330.

- b. performing other audit procedures as necessary in the circumstances. (Ref: par. .A28–.A29)

Documentation (Ref: par. .A30)

.08 When substantive analytical procedures have been performed, the auditor should include in the audit documentation the following:⁴

- a. The expectation referred to in paragraph .05c and the factors considered in its development when that expectation or those factors are not otherwise readily determinable from the audit documentation
- b. Results of the comparison referred to in paragraph .05d of the recorded amounts, or ratios developed from recorded amounts, with the expectations
- c. Any additional auditing procedures performed in accordance with paragraph .07 relating to the investigation of fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount and the results of such additional procedures

Application and Other Explanatory Material

Objectives (Ref: par. .03b)

.A1 Analytical procedures performed near the end of the audit are intended to corroborate audit evidence obtained during the audit of the financial statements to assist the auditor in drawing reasonable conclusions on which to base the auditor's opinion.

Definition (Ref: par. .04)

.A2 Analytical procedures include the consideration of comparisons of the entity's financial information with, for example

- comparable information for prior periods.
- anticipated results of the entity, such as budgets or forecasts, or expectations of the auditor, such as an estimation of depreciation.
- similar industry information, such as a comparison of the entity's ratio of sales to accounts receivable and gross margin percentages with industry averages or other entities of comparable size in the same industry.

.A3 Analytical procedures also include consideration of relationships, for example

- among elements of financial information, such as gross margin percentages, that would be expected to conform to a predictable pattern based on recent history of the entity and industry.
- between financial information and relevant nonfinancial information, such as payroll costs to number of employees.

⁴ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

.A4 Various methods may be used to perform analytical procedures. These methods range from performing simple comparisons to performing complex analyses using advanced statistical techniques. Analytical procedures may be applied to consolidated financial statements, components, and individual elements of information.

.A5 *Scanning* is a type of analytical procedure involving the auditor's exercise of professional judgment to review accounting data to identify significant or unusual items to test. This type of analytical procedure is described further in section 500, *Audit Evidence*.⁵

.A6 A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary. The reasons that make relationships plausible are an important consideration because data sometimes appears to be related when it is not, which may lead the auditor to erroneous conclusions. In addition, the presence of an unexpected relationship may provide important evidence when appropriately scrutinized.

Substantive Analytical Procedures (Ref: par. .05)

.A7 The auditor's substantive procedures to address the assessed risk of material misstatement for relevant assertions may be tests of details, substantive analytical procedures, or a combination of both. The decision about which audit procedures to perform, including whether to use substantive analytical procedures, is based on the auditor's professional judgment about the expected effectiveness and efficiency of the available audit procedures to reduce the assessed risk of material misstatement to an acceptably low level.

.A8 The expected effectiveness and efficiency of a substantive analytical procedure in addressing risks of material misstatement depends on, among other things, (a) the nature of the assertion, (b) the plausibility and predictability of the relationship, (c) the availability and reliability of the data used to develop the expectation, and (d) the precision of the expectation.

.A9 The auditor may inquire of management about the availability and reliability of information needed to apply substantive analytical procedures and the results of any such analytical procedures performed by the entity. It may be effective to use analytical data prepared by management, provided that the auditor is satisfied that such data is properly prepared.

Suitability of Particular Substantive Analytical Procedures for Given Assertions (Ref: par. .05a)

.A10 When more persuasive audit evidence is desired from substantive analytical procedures, more predictable relationships are necessary to develop the expectation. Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment. Relationships involving income statement accounts tend to be more predictable than relationships involving only balance sheet accounts because income statement accounts represent transactions over a period of time, whereas balance sheet accounts represent amounts as of a point in time. Relationships involving transactions subject to management discretion may be less predictable. For example, management may elect to incur maintenance expense rather than replace plant and equipment, or they may delay advertising expenditures.

⁵ Paragraph .A22 of section 500, *Audit Evidence*.

.A11 Substantive analytical procedures are generally more effective for large volumes of transactions that tend to be predictable over time. The application of planned analytical procedures is based on the expectation that relationships among data exist and continue in the absence of known conditions to the contrary. Particular conditions that can cause variations in these relationships include, for example, specific unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements. The suitability of a particular analytical procedure will depend upon the auditor's assessment of how effective it will be in detecting a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated.

.A12 In some cases, even an unsophisticated predictive model may be effective as an analytical procedure. For example, when an entity has a known number of employees at fixed rates of pay throughout the period, it may be possible for the auditor to use this data to estimate the total payroll costs for the period with a high degree of accuracy, thereby providing audit evidence for a significant item in the financial statements and reducing the need to perform tests of details on the payroll. The use of widely recognized trade ratios (such as profit margins for different types of retail entities) can often be used effectively in substantive analytical procedures to provide evidence to support the reasonableness of recorded amounts.

.A13 Different types of analytical procedures provide different levels of assurance. Analytical procedures involving, for example, the prediction of total rental income on a building divided into apartments, taking the rental rates, the number of apartments, and vacancy rates into consideration, can provide persuasive evidence and may eliminate the need for further verification by means of tests of details, provided that the elements are appropriately verified. In contrast, calculation and comparison of gross margin percentages as a means of confirming a revenue figure may provide less persuasive evidence but may provide useful corroboration if used in combination with other audit procedures.

.A14 The determination of the suitability of particular substantive analytical procedures is influenced by the nature of the assertion and the auditor's assessment of the risk of material misstatement. For example, if controls over payroll processing are deficient, the auditor may need to perform more extensive tests of details for assertions related to compensation.

.A15 Particular substantive analytical procedures may also be considered suitable when tests of details are performed on the same assertion. For example, when obtaining audit evidence regarding the valuation assertion for accounts receivable balances, the auditor may apply analytical procedures to an aging of customers' accounts, in addition to performing tests of details on subsequent cash receipts, to determine the collectability of the receivables.

Considerations Specific to Governmental Entities

.A16 The relationships between individual financial statement items traditionally considered in the audit of for-profit businesses may not always be relevant in the audit of governmental entities. For example, relationships describing profitability or return on investment may have limited or no applicability. In addition, the nature of balances reported by a governmental entity may result in different expected relationships than those traditionally assumed for businesses. For example, relationships between revenue, receivables, and inventory may be different when revenue and receivables arise from nonexchange transactions and inventory does not represent products held for sale. Also, governmental entities' budgets are a source of data that may be used as a benchmark for evaluating individual financial statements.

The Reliability of the Data (Ref: par. .05b)

.A17 The reliability of data is influenced by its source and nature and is dependent on the circumstances under which it is obtained. Accordingly, the following are relevant when determining whether data is reliable for purposes of designing substantive analytical procedures:

- a. The source of the information available. For example, information may be more reliable when it is obtained from independent sources outside the entity.⁶
- b. The comparability of the information available. For example, broad industry data may need to be supplemented to be comparable to that of an entity that produces and sells specialized products.
- c. The nature and relevance of the information available. For example, whether budgets have been established as results to be expected rather than as goals to be achieved.
- d. Controls over the preparation of the information that are designed to ensure its completeness, accuracy, and validity. For example, controls over the preparation, review, and maintenance of budgets.

.A18 Data may be readily available to develop expectations for some assertions. For example, the auditor may consider whether financial information, such as budgets or forecasts, and nonfinancial information, such as the number of units produced or sold, is available to design substantive analytical procedures.

.A19 The auditor may consider testing the operating effectiveness of controls, if any, over the entity's preparation of information used by the auditor in performing substantive analytical procedures in response to assessed risks. When such controls are effective, the auditor may have greater confidence in the reliability of the information and, therefore, in the results of analytical procedures. The operating effectiveness of controls over nonfinancial information may often be tested in conjunction with other tests of controls. For example, in establishing controls over the processing of sales invoices, an entity may include controls over the recording of unit sales. In these circumstances, the auditor may test the operating effectiveness of controls over the recording of unit sales in conjunction with tests of the operating effectiveness of controls over the processing of sales invoices. Alternatively, the auditor may consider whether the information was subjected to audit testing. Section 330 addresses determining the audit procedures to be performed on the information to be used for substantive analytical procedures.⁷

.A20 The matters discussed in paragraph .A17a–d are relevant irrespective of whether the auditor performs substantive analytical procedures on the entity's period-end financial statements or at an interim date and plans to perform substantive analytical procedures for the remaining period. Section 330 addresses performing substantive procedures at an interim date.⁸

Evaluation of Whether the Expectation Is Sufficiently Precise (Ref: par. .05c)

.A21 In evaluating whether the expectation is sufficiently precise when performing a substantive analytical procedure, it is appropriate for the auditor

⁶ Paragraph .A32 of section 500.

⁷ Paragraph .25 of section 330.

⁸ Paragraphs .23–.24 of section 330.

to take into account whether substantive analytical procedures are the only substantive procedures planned to address a particular risk of misstatement at the relevant assertion level or whether the risk will be addressed through a combination of substantive analytical procedures and tests of details. A less precise expectation may be appropriate when evidence obtained from performing the substantive analytical procedure will be combined with audit evidence from performing tests of details. A more precise expectation, however, is necessary when the substantive analytical procedure is the only procedure planned to address a particular risk of misstatement for a relevant assertion.

.A22 As expectations become more precise, the range of expected differences becomes narrower, and accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. Matters relevant to the auditor's evaluation of whether the expectation can be developed with sufficient precision to identify a misstatement that, when aggregated with other misstatements, may cause the financial statements to be materially misstated, include the following:

- The accuracy with which the expected results of substantive analytical procedures can be predicted. For example, the auditor may expect greater consistency in comparing gross profit margins from one period to another than in comparing discretionary expenses, such as research or advertising.
- The degree to which information can be disaggregated. For example, substantive analytical procedures may be more effective when applied to financial information on individual sections of an operation or to financial statements of components of a diversified entity than when applied to the financial statements of the entity as a whole.

.A23 When expectations are developed at a more detailed level, it is more likely that the analytical procedure will more effectively address the assessed risk of misstatement to which it is directed. Monthly amounts may be more effective than annual amounts, and comparisons by location or line of business usually are more effective than companywide comparisons. The appropriate level of detail may be influenced by the nature of the entity, its size, and its complexity. The risk that material misstatements may be obscured by offsetting factors increases as an entity's operations become more complex and diversified. Disaggregation of the information helps reduce this risk.

Amount of Acceptable Difference of Recorded Amounts From Expected Values (Ref: par. .05d)

.A24 The auditor's determination of the amount of difference from the expectation that can be accepted without further investigation is influenced by materiality⁹ and the desired level of assurance, while taking into account the possibility that a misstatement, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated. Section 330 requires the auditor to obtain more persuasive audit evidence the higher the auditor's assessment of risk.¹⁰ Accordingly, as the assessed risk increases, the amount of difference considered acceptable without further investigation decreases in order to achieve the desired level of persuasive evidence.¹¹

⁹ Paragraph .A16 of section 320, *Materiality in Planning and Performing an Audit*.

¹⁰ Paragraph .07b of section 330.

¹¹ Paragraph .A20 of section 330.

Analytical Procedures That Assist When Forming an Overall Conclusion (Ref: par. .06)

.A25 A wide variety of analytical procedures may be used when forming an overall conclusion. These procedures may include reading the financial statements and considering (a) the adequacy of the evidence gathered in response to unusual or unexpected balances identified during the course of the audit and (b) unusual or unexpected balances or relationships that were not previously identified. Results of these analytical procedures may indicate that additional evidence is needed.

.A26 The results of analytical procedures designed and performed in accordance with paragraph .06 may identify a previously unrecognized risk of material misstatement. In such circumstances, section 315 requires the auditor to revise the auditor's assessment of the risks of material misstatement and modify the further planned audit procedures accordingly.¹²

.A27 The analytical procedures performed in accordance with paragraph .06 may be similar to those that would be used as risk assessment procedures.

Investigating Results of Analytical Procedures (Ref: par. .07)

.A28 Audit evidence relevant to management's responses may be obtained by evaluating those responses, taking into account the auditor's understanding of the entity and its environment and other audit evidence obtained during the course of the audit.

.A29 The need to perform other audit procedures may arise when, for example, management is unable to provide an explanation, or the explanation, together with the audit evidence obtained relevant to management's response, is not considered adequate.

Documentation (Ref: par. .08)

.A30 Section 230, *Audit Documentation*, addresses the auditor's responsibilities for preparing audit documentation and applies to substantive analytical procedures and analytical procedures performed near the end of the audit. Paragraph .08 of this section addresses specific requirements that apply to substantive analytical procedures but is not intended to provide a complete list of items that are required to be documented by section 230.

¹² Paragraph .32 of section 315.

AU-C Section 530

Audit Sampling

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section applies when the auditor has decided to use audit sampling in performing audit procedures. It addresses the auditor's use of statistical and nonstatistical sampling when designing and selecting the audit sample, performing tests of controls and tests of details, and evaluating the results from the sample. (Ref: par. .A1–.A2)

.02 This section complements section 500, *Audit Evidence*, which addresses the auditor's responsibility to design and perform audit procedures to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions as a basis for forming the auditor's opinion. Section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, provides guidance on the means available to the auditor for selecting items for testing, one of which is audit sampling.¹

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.04 The objective of the auditor, when using audit sampling, is to provide a reasonable basis for the auditor to draw conclusions about the population from which the sample is selected.

Definitions

.05 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Audit sampling (sampling). The selection and evaluation of less than 100 percent of the population of audit relevance such that the auditor expects the items selected (the sample) to be representative of the population and, thus, likely to provide a reasonable basis for conclusions about the population. In this context, *representative* means that evaluation of the sample will result in

¹ Paragraphs .A65–.A71 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

conclusions that, subject to the limitations of sampling risk, are similar to those that would be drawn if the same procedures were applied to the entire population. (Ref: par. .A3)

Nonsampling risk. The risk that the auditor reaches an erroneous conclusion for any reason not related to sampling risk. (Ref: par. .A4)

Population. The entire set of data from which a sample is selected and about which the auditor wishes to draw conclusions.

Sampling risk. The risk that the auditor's conclusion based on a sample may be different from the conclusion if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:

- a. In the case of a test of controls, that controls are more effective than they actually are, or in the case of a test of details, that a material misstatement does not exist when, in fact, it does. The auditor is primarily concerned with this type of erroneous conclusion because it affects audit effectiveness and is more likely to lead to an inappropriate audit opinion.
- b. In the case of a test of controls, that controls are less effective than they actually are, or in the case of a test of details, that a material misstatement exists when, in fact, it does not. This type of erroneous conclusion affects audit efficiency because it would usually lead to additional work to establish that initial conclusions were incorrect.

Sampling unit. The individual items constituting a population. (Ref: par. .A5)

Statistical sampling. An approach to sampling that has the following characteristics:

- a. Random selection of the sample items (Ref: par. .A16)
- b. The use of an appropriate statistical technique to evaluate sample results, including measurement of sampling risk

A sampling approach that does not have characteristics *a* and *b* is considered nonstatistical sampling.

Stratification. The process of dividing a population into subpopulations, each of which is a group of sampling units that have similar characteristics.

Tolerable misstatement. A monetary amount set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the monetary amount set by the auditor is not exceeded by the actual misstatement in the population. (Ref: par. .A6)

Tolerable rate of deviation. A rate of deviation set by the auditor in respect of which the auditor seeks to obtain an appropriate level of assurance that the rate of deviation set by the auditor is not exceeded by the actual rate of deviation in the population.

Requirements

Sample Design, Size, and Selection of Items for Testing

.06 When designing an audit sample, the auditor should consider the purpose of the audit procedure and the characteristics of the population from which the sample will be drawn. (Ref: par. .A7–.A11)

.07 The auditor should determine a sample size sufficient to reduce sampling risk to an acceptably low level. (Ref: par. .A12–.A14)

.08 The auditor should select items for the sample in such a way that the auditor can reasonably expect the sample to be representative of the relevant population and likely to provide the auditor with a reasonable basis for conclusions about the population. (Ref: par. .A15–.A17)

Performing Audit Procedures

.09 The auditor should perform audit procedures, appropriate to the purpose, on each item selected.

.10 If the audit procedure is not applicable to the selected item, the auditor should perform the procedure on a replacement item. (Ref: par. .A18)

.11 If the auditor is unable to apply the designed audit procedures, or suitable alternative procedures, to a selected item, the auditor should treat that item as a deviation from the prescribed control (in the case of tests of controls) or a misstatement (in the case of tests of details). (Ref: par. .A19–.A20)

Nature and Cause of Deviations and Misstatements

.12 The auditor should investigate the nature and cause of any deviations or misstatements identified and evaluate their possible effect on the purpose of the audit procedure and on other areas of the audit. (Ref: par. .A21–.A23)

Projecting the Results of Audit Sampling

.13 The auditor should project the results of audit sampling to the population. (Ref: par. .A24–.A25)

Evaluating the Results of Audit Sampling

.14 The auditor should evaluate

- a. the results of the sample, including sampling risk, and (Ref: par. .A26–.A27)
- b. whether the use of audit sampling has provided a reasonable basis for conclusions about the population that has been tested. (Ref: par. .A28)

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 The AICPA Audit Guide *Audit Sampling* provides interpretative guidance to apply the concepts in this section, including its definitions.

Considerations Specific to Governmental Entities

.A2 Chapter 11 of the AICPA Audit Guide *Government Auditing Standards and Circular A-133 Audits* provides interpretative guidance in designing an audit approach that includes audit sampling to achieve audit objectives related to both compliance and internal control over compliance in a Circular A-133 compliance audit or program-specific audit performed in accordance with Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*.

Definitions

Audit Sampling (Ref: par. .05)

.A3 There may be audit procedures that are not considered audit sampling but that involve examination of fewer than 100 percent of the items comprising an account balance or class of transactions. For example, an auditor may examine only a few transactions from an account balance or class of transactions to (a) gain an understanding of the nature of an entity's operations or (b) clarify the auditor's understanding of the entity's internal control. In such cases, the guidance in this section is not applicable.

Nonsampling Risk (Ref: par. .05)

.A4 Examples of nonsampling risk include the use of inappropriate audit procedures or misinterpretation of audit evidence and failure to recognize a misstatement or deviation. Nonsampling risk may be reduced to an acceptable level through such factors as adequate planning (see section 300, *Planning an Audit*) and proper conduct of a firm's audit practice (see section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*).

Sampling Unit (Ref: par. .05)

.A5 The sampling units might be physical items (for example, checks listed on deposit slips, credit entries on bank statements, sales invoices, or accounts receivable) or monetary units.

Tolerable Misstatement (Ref: par. .05)

.A6 The auditor is required by section 320, *Materiality in Planning and Performing an Audit*, to determine performance materiality.² Performance materiality is determined to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements in the financial statements exceeds materiality for the financial statements as a whole. *Tolerable misstatement* is the application of performance materiality to a particular sampling procedure. Tolerable misstatement may be the same amount or an amount smaller than performance materiality (for example, when the population from which the sample is selected is smaller than the account balance).

Sample Design, Size, and Selection of Items for Testing

Sample Design (Ref: par. .06)

.A7 Audit sampling enables the auditor to obtain and evaluate audit evidence about some characteristic of the items selected in order to form or assist in forming a conclusion concerning the population from which the sample is

² Paragraph .11 of section 320, *Materiality in Planning and Performing an Audit*.

drawn. Audit sampling can be applied using either statistical or nonstatistical sampling approaches.

.A8 When designing an audit sample, the auditor's consideration includes the specific purpose to be achieved and the combination of audit procedures that is likely to achieve that purpose. Consideration of the nature of the audit evidence sought and possible deviation or misstatement conditions or other characteristics relating to that audit evidence will assist the auditor in defining what constitutes a deviation or misstatement and what population to use for sampling. In fulfilling the requirement in section 500 when performing audit sampling, the auditor is required to perform audit procedures to obtain evidence that the population from which the audit sample is drawn is complete.³

.A9 The auditor's consideration of the purpose of the audit procedure, as required by paragraph .06, includes a clear understanding of what constitutes a deviation or misstatement so that all, and only, those conditions that are relevant to the assertions are included in the evaluation of deviations or projection of misstatements. For example, in a test of details relating to the existence of accounts receivable, such as confirmation, payments made by the customer before the confirmation date but received shortly after that date by the client are not considered a misstatement. Also, an incorrect posting between customer accounts does not affect the total accounts receivable balance. Therefore, it may not be appropriate to consider this a misstatement in relation to the relevant assertion even though it may have an important effect on other areas of the audit, such as the assessment of the risk of fraud or the adequacy of the allowance for doubtful accounts.

.A10 In considering the test objective and characteristics of a population for tests of controls, the auditor makes an assessment of the expected rate of deviation based on the auditor's understanding of the relevant controls. This assessment is made in order to design an audit sample and determine sample size. For example, if the expected rate of deviation is unacceptably high, the auditor will normally decide not to perform tests of controls. Similarly, for tests of details, the auditor makes an assessment of the expected misstatement in the population. If the expected misstatement is high, 100 percent examination or increasing the sample size may be appropriate when performing tests of details.

.A11 In considering the characteristics of the population from which the sample will be drawn, the auditor may determine that stratification or value-weighted selection is appropriate.

Sample Size (Ref: par. .07)

.A12 The level of sampling risk that the auditor is willing to accept affects the sample size required. The lower the risk the auditor is willing to accept, the greater the sample size necessary.

.A13 The sample size can be determined by the application of a statistically based formula or through the exercise of professional judgment. Various factors typically influence determination of sample size, as follows:

- For tests of controls:
 - The tolerable rate of deviation of the population to be tested
 - The expected rate of deviation of the population to be tested

³ Paragraph .09 of section 500, *Audit Evidence*.

- The desired level of assurance (complement of risk of overreliance) that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population; the auditor may decide the desired level of assurance based on the extent to which the auditor's risk assessment takes into account relevant controls
- The number of sampling units in the population if the population is very small
- For substantive tests of details:
 - The auditor's desired level of assurance (complement of risk of incorrect acceptance) that tolerable misstatement is not exceeded by actual misstatement in the population; the auditor may decide the desired level of assurance based on the following:
 - The auditor's assessment of the risk of material misstatement
 - The assurance obtained from other substantive procedures directed at the same assertion
 - Tolerable misstatement
 - Expected misstatement for the population
 - Stratification of the population when performed
 - For some sampling methods, the number of sampling units in each stratum

.A14 The decision whether to use a statistical or nonstatistical sampling approach is a matter for the auditor's professional judgment; however, sample size is not a valid criterion to use in deciding between statistical and nonstatistical approaches. An auditor who applies statistical sampling may use tables or formulas to compute sample size based on the factors in paragraph .A13. An auditor who applies nonstatistical sampling exercises professional judgment to relate the same factors used in statistical sampling in determining the appropriate sample size. Ordinarily, this would result in a sample size comparable with the sample size resulting from an efficient and effectively designed statistical sample, considering the same sampling parameters. This guidance does not suggest that the auditor using nonstatistical sampling also compute a corresponding sample size using an appropriate statistical technique.

Selection of Items for Testing (Ref: par. .08)

.A15 Audit sampling involves selection techniques that are probabilistic in nature. For example, through the assessment of the risk of material misstatement, an auditor might identify areas in which misstatement is relatively likely. The auditor might first separately examine those items deemed to be of relatively high risk and then use audit sampling (which will involve some form of probabilistic selection) to form an estimate of some characteristic of the remaining population.

.A16 Random selection techniques include the following:

- a. Simple random
- b. Systematic random
- c. Probability weighted, including monetary unit

A detailed discussion of selection techniques is included in the AICPA Audit Guide *Audit Sampling*.

.A17 With statistical sampling, sample items are selected using random selection techniques. The principal techniques of selecting a nonstatistical sample are the use of random selection and haphazard selection to select sample items.

Performing Audit Procedures (Ref: par. .10–.11)

.A18 An example of when it is necessary to perform the procedure on a replacement item is when a voided check is selected while testing for evidence of payment authorization. If the auditor is satisfied that the check has been properly voided such that it does not constitute a deviation, an appropriately chosen replacement is examined.

.A19 In some circumstances, the auditor may not be able to apply the planned audit procedures to selected sample items because, for example, the entity might not be able to locate supporting documentation. The auditor's treatment of unexamined items will depend on their effect on the auditor's evaluation of the sample. If the auditor's evaluation of the sample results would not be altered by considering those unexamined items to be misstated, it may not be necessary to examine the items, for example, if the aggregate amount of the unexamined items, if treated as misstatements or deviations, would not cause the auditor's assessment of the amount of the misstatement or deviation in the population to exceed tolerable misstatement or tolerable deviation, respectively. However, when this is not the case, the auditor is required by paragraph .11 to perform alternative procedures that provide sufficient appropriate audit evidence to form a conclusion about the sample item and use the results of these procedures in assessing the sample results. If alternative procedures cannot be satisfactorily performed in these cases, the auditor is required to treat the items as misstatements or deviations, as appropriate, in evaluating the results of the sample. Section 240, *Consideration of Fraud in a Financial Statement Audit*, also requires the auditor to consider whether the reasons for the auditor's inability to examine the items have implications with regard to assessing risks of material misstatement due to fraud, the assessed level of control risk that the auditor expects to be supported, or the degree of reliance on management representations.

.A20 An example of a suitable alternative procedure for an accounts receivable positive confirmation request for which no reply has been received might be the examination of subsequent cash receipts, together with evidence of their source and the items they are intended to settle.

Nature and Cause of Deviations and Misstatements (Ref: par. .12)

.A21 Section 450, *Evaluation of Misstatements Identified During the Audit*, explains that the auditor may request management to examine a class of transactions, account balance, or disclosure in order for management to understand the cause of a misstatement identified by the auditor; perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance, or disclosure; and make appropriate adjustments to the financial statements.⁴

⁴ Paragraph .A9 of section 450, *Evaluation of Misstatements Identified During the Audit*.

.A22 In analyzing the deviations and misstatements identified, the auditor may observe that many have a common feature (for example, type of transaction, location, product line, or period of time). In such circumstances, the auditor may decide to identify all items in the population that possess the common feature and extend audit procedures to those items. In addition, such deviations or misstatements may be intentional and may indicate the possibility of fraud.

.A23 In addition to the evaluation of the frequency and amounts of monetary misstatements, section 450 requires the auditor to consider the qualitative aspects of the misstatements.⁵ These include (a) the nature and cause of misstatements, such as whether they are differences in principle or application, are errors, or are caused by fraud or are due to misunderstanding of instructions or carelessness, and (b) the possible relationship of the misstatements to other phases of the audit. The discovery of fraud requires a broader consideration of possible implications than does the discovery of an error.

Projecting the Results of Audit Sampling (Ref: par. .13)

.A24 For tests of details, the auditor is required by paragraph .13 to project misstatements observed in an audit sample to the population in order to obtain a likely misstatement. Due to sampling risk, this projection may not be sufficient to determine an amount to be recorded.

.A25 For tests of controls, the sample deviation rate is also the projected deviation rate for the population as a whole. Section 330 addresses the auditor's response when deviations from controls upon which the auditor intends to rely are detected.⁶

Evaluating the Results of Audit Sampling (Ref: par. .14)

.A26 For tests of controls, an unexpectedly high sample deviation rate may lead to an increase in the assessed risks of material misstatement, unless further audit evidence substantiating the initial assessment is obtained. For tests of details, an unexpectedly high misstatement amount in a sample may cause the auditor to believe that a class of transactions or account balance is materially misstated, in the absence of further audit evidence that no material misstatement exists.

.A27 Considering the results of other audit procedures helps the auditor assess the risk that actual misstatement in the population exceeds tolerable misstatement; such risk may be reduced if additional audit evidence is obtained. In the case of tests of details, the *projected misstatement* is the auditor's best estimate of misstatement in the population. As the projected misstatement approaches or exceeds tolerable misstatement, the more likely that actual misstatement in the population exceeds tolerable misstatement. Also, if the projected misstatement is greater than the auditor's expectations of misstatement used to determine the sample size, the auditor may conclude that there is an unacceptable sampling risk that the actual misstatement in the population exceeds the tolerable misstatement. The AICPA Audit Guide *Audit Sampling* contains further guidance regarding the concept of sampling risk.

.A28 If the auditor concludes that audit sampling has not provided a reasonable basis for conclusions about the population that has been tested, the auditor may

⁵ Paragraph .11 of section 450.

⁶ Paragraph .17 of section 330.

- request management to investigate misstatements that have been identified and the potential for further misstatements and to make any necessary adjustments or
- tailor the nature, timing, and extent of those further audit procedures to best achieve the required assurance. For example, in the case of tests of controls, the auditor might extend the sample size, test an alternative control, or modify related substantive procedures.

Section 450 addresses misstatements identified by the auditor during the audit.

AU-C Section 540

Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to accounting estimates, including fair value accounting estimates and related disclosures, in an audit of financial statements. Specifically, it expands on how section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; and other relevant AU-C sections are to be applied with regard to accounting estimates. It also includes requirements and guidance related to misstatements of individual accounting estimates and indicators of possible management bias.

Nature of Accounting Estimates

.02 Some financial statement items cannot be measured precisely but can only be estimated. For purposes of this section, such financial statement items are referred to as *accounting estimates*. The nature and reliability of information available to management to support the making of an accounting estimate varies widely, which thereby affects the degree of estimation uncertainty associated with accounting estimates. The degree of estimation uncertainty affects, in turn, the risks of material misstatement of accounting estimates, including their susceptibility to unintentional or intentional management bias. (Ref: par. .A1–.A10 and .A136)

.03 The measurement objective of accounting estimates can vary, depending on the applicable financial reporting framework and the financial item being reported.¹ The measurement objective for some accounting estimates is to forecast the outcome of one or more transactions, events, or conditions giving rise to the need for the accounting estimate. For other accounting estimates, including many fair value accounting estimates, the measurement objective is different and is expressed in terms of the value of a current transaction or financial statement item based on conditions prevalent at the measurement date, such as estimated market price for a particular type of asset or liability. For example, the applicable financial reporting framework may require fair

¹ Paragraph .14 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, defines *financial report framework* and the term *fair presentation framework*.

value measurement based on an assumed hypothetical current transaction between knowledgeable, willing parties (sometimes referred to as *market participants* or equivalent) in an arm's length transaction, rather than the settlement of a transaction at some past or future date.²

.04 A difference between the outcome of an accounting estimate and the amount originally recognized or disclosed in the financial statements does not necessarily represent a misstatement of the financial statements; rather, it could be an outcome of estimation uncertainty (see paragraph .02). This is particularly the case for fair value accounting estimates because any observed outcome may be affected by events or conditions subsequent to the date at which the measurement is estimated for purposes of the financial statements.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objective

.06 The objective of the auditor is to obtain sufficient appropriate audit evidence about whether, in the context of the applicable financial reporting framework

- a. accounting estimates, including fair value accounting estimates, in the financial statements, whether recognized or disclosed, are reasonable and
- b. related disclosures in the financial statements are adequate.

Definitions

.07 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Accounting estimate. An approximation of a monetary amount in the absence of a precise means of measurement. This term is used for an amount measured at fair value when there is estimation uncertainty, as well as for other amounts that require estimation. When this section addresses only accounting estimates involving measurement at fair value, the term *fair value accounting estimates* is used.

Auditor's point estimate or auditor's range. The amount or range of amounts, respectively, derived from audit evidence for use in evaluating the recorded or disclosed amount(s).

Estimation uncertainty. The susceptibility of an accounting estimate and related disclosures to an inherent lack of precision in its measurement.

Management bias. A lack of neutrality by management in the preparation and fair presentation of information.

Management's point estimate. The amount selected by management for recognition or disclosure in the financial statements as an accounting estimate.

² Different definitions of *fair value* may exist among financial reporting frameworks.

Outcome of an accounting estimate. The actual monetary amount that results from the resolution of the underlying transaction(s), event(s), or condition(s) addressed by the accounting estimate.

Requirements

Risk Assessment Procedures and Related Activities

.08 When performing risk assessment procedures and related activities to obtain an understanding of the entity and its environment, including the entity's internal control, as required by section 315, the auditor should obtain an understanding of the following in order to provide a basis for the identification and assessment of the risks of material misstatement for accounting estimates:³ (Ref: par. .A11)

- a. The requirements of the applicable financial reporting framework relevant to accounting estimates, including related disclosures. (Ref: par. .A12–.A14)
- b. How management identifies those transactions, events, and conditions that may give rise to the need for accounting estimates to be recognized or disclosed in the financial statements. In obtaining this understanding, the auditor should make inquiries of management about changes in circumstances that may give rise to new, or the need to revise existing, accounting estimates. (Ref: par. .A15–.A20)
- c. How management makes the accounting estimates and the data on which they are based, including (Ref: par. .A21–.A22)
 - i. the method(s), including, when applicable, the model, used in making the accounting estimate; (Ref: par. .A23–.A25)
 - ii. relevant controls; (Ref: par. .A26–.A27)
 - iii. whether management has used a specialist; (Ref: par. .A28–.A29)
 - iv. the assumptions underlying the accounting estimates; (Ref: par. .A30–.A35)
 - v. whether there has been or ought to have been a change from the prior period in the method(s) or assumption(s) for making the accounting estimates and, if so, why; and (Ref: par. .A36)
 - vi. whether and, if so, how management has assessed the effect of estimation uncertainty. (Ref: par. .A37)

.09 The auditor should review the outcome of accounting estimates included in the prior period financial statements or, when applicable, their subsequent reestimation for the purpose of the current period. The nature and extent of the auditor's review takes account of the nature of the accounting estimates and whether the information obtained from the review would be relevant to identifying and assessing risks of material misstatement of accounting estimates made in the current period financial statements. However, the review is not intended to call into question the auditor's professional judgments made

³ Paragraphs .05–.06 and .12–.13 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

in the prior periods that were based on information available at the time. (Ref: par. .A38–.A44)

Identifying and Assessing the Risks of Material Misstatement

.10 In identifying and assessing the risks of material misstatement, as required by section 315, the auditor should evaluate the degree of estimation uncertainty associated with an accounting estimate.⁴ (Ref: par. .A45–.A46)

.11 The auditor should determine whether, in the auditor's professional judgment, any of those accounting estimates that have been identified as having high estimation uncertainty give rise to significant risks. (Ref: par. .A47–.A51)

Responding to the Assessed Risks of Material Misstatement

.12 Based on the assessed risks of material misstatement, the auditor should determine (Ref: par. .A52)

- a. whether management has appropriately applied the requirements of the applicable financial reporting framework relevant to the accounting estimate and (Ref: par. .A53–.A57)
- b. whether the methods for making the accounting estimates are appropriate and have been applied consistently and whether changes from the prior period, if any, in accounting estimates or the method for making them are appropriate in the circumstances. (Ref: par. .A58–.A59)

.13 In responding to the assessed risks of material misstatement, as required by section 330, the auditor should undertake one or more of the following, taking into account the nature of the accounting estimate:⁵ (Ref: par. .A60–.A62)

- a. Determine whether events occurring up to the date of the auditor's report provide audit evidence regarding the accounting estimate. (Ref: par. .A63–.A67)
- b. Test how management made the accounting estimate and the data on which it is based. In doing so, the auditor should evaluate whether (Ref: par. .A68–.A71)
 - i. the method of measurement used is appropriate in the circumstances, (Ref: par. .A72–.A77)
 - ii. the assumptions used by management are reasonable in light of the measurement objectives of the applicable financial reporting framework, and (Ref: par. .A78–.A89)
 - iii. the data on which the estimate is based is sufficiently reliable for the auditor's purposes. (Ref: par. .A70)
- c. Test the operating effectiveness of the controls over how management made the accounting estimate, together with appropriate substantive procedures. (Ref: par. .A90–.A92)
- d. Develop a point estimate or range to evaluate management's point estimate. For this purpose (Ref: par. .A93–.A97)

⁴ Paragraph .26 of section 315.

⁵ Paragraphs .05–.06 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

- i. if the auditor uses assumptions or methods that differ from management's, the auditor should obtain an understanding of management's assumptions or methods sufficient to establish that the auditor's point estimate or range takes into account relevant variables and to evaluate any significant differences from management's point estimate. (Ref: par. .A98)
- ii. if the auditor concludes that it is appropriate to use a range, the auditor should narrow the range, based on audit evidence available, until all outcomes within the range are considered reasonable. (Ref: par. .A99–.A101)

.14 In determining the matters identified in paragraph .12 or in responding to the assessed risks of material misstatement in accordance with paragraph .13, the auditor should consider whether specialized skills or knowledge with regard to one or more aspects of the accounting estimates is required in order to obtain sufficient appropriate audit evidence. (Ref: par. .A102–.A107)

Further Substantive Procedures to Respond to Significant Risks (Ref: par. .A108)

Estimation Uncertainty

.15 For accounting estimates that give rise to significant risks, in addition to other substantive procedures performed to meet the requirements of section 330, the auditor should evaluate the following:⁶

- a. How management has considered alternative assumptions or outcomes and why it has rejected them or how management has otherwise addressed estimation uncertainty in making the accounting estimate (Ref: par. .A109–.A112)
- b. Whether the significant assumptions used by management are reasonable (Ref: par. .A113–.A115)
- c. When relevant to the reasonableness of the significant assumptions used by management or the appropriate application of the applicable financial reporting framework, management's intent to carry out specific courses of action and its ability to do so (Ref: par. .A116)

.16 If, in the auditor's professional judgment, management has not addressed adequately the effects of estimation uncertainty on the accounting estimates that give rise to significant risks, the auditor should, if considered necessary, develop a range with which to evaluate the reasonableness of the accounting estimate. (Ref: par. .A117–.A118)

Recognition and Measurement Criteria

.17 For accounting estimates that give rise to significant risks, the auditor should obtain sufficient appropriate audit evidence about whether

- a. management's decision to recognize or not recognize the accounting estimates in the financial statements and (Ref: par. .A119–.A120)
- b. the selected measurement basis for the accounting estimates (Ref: par. .A121)

⁶ Paragraph .18 of section 330.

are in accordance with the requirements of the applicable financial reporting framework.

Evaluating the Reasonableness of the Accounting Estimates and Determining Misstatements

.18 The auditor should evaluate, based on the audit evidence, whether the accounting estimates in the financial statements are either reasonable in the context of the applicable financial reporting framework or are misstated. (Ref: par. .A122–.A127)

Disclosures Related to Accounting Estimates

.19 The auditor should obtain sufficient appropriate audit evidence about whether the disclosures in the financial statements related to accounting estimates are in accordance with the requirements of the applicable financial reporting framework. (Ref: par. .A128–.A129)

.20 For accounting estimates that give rise to significant risks, the auditor also should evaluate the adequacy of the disclosure of estimation uncertainty in the financial statements in the context of the applicable financial reporting framework. (Ref: par. .A108 and .A130–.A132)

Indicators of Possible Management Bias

.21 The auditor should review the judgments and decisions made by management in the making of accounting estimates to identify whether indicators of possible management bias exist. Indicators of possible management bias do not, themselves, constitute misstatements for the purposes of drawing conclusions on the reasonableness of individual accounting estimates. (Ref: par. .A133–.A134)

Documentation

.22 The auditor should include in the audit documentation⁷

- a. for those accounting estimates that give rise to significant risks, the basis for the auditor's conclusions about the reasonableness of accounting estimates and their disclosure and
- b. indicators of possible management bias, if any. (Ref: par. .A135)

Application and Other Explanatory Material

Nature of Accounting Estimates (Ref: par. .02)

.A1 Because of the uncertainties inherent in business activities, some financial statement items can only be estimated. Further, the specific characteristics of an asset, a liability, or a component of equity or the basis or method of measurement prescribed by the financial reporting framework may give rise to the need to estimate a financial statement item. Some financial reporting frameworks prescribe specific methods of measurement and the disclosures that are required to be made in the financial statements whereas other financial reporting frameworks are less specific.

⁷ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

.A2 Some accounting estimates involve relatively low estimation uncertainty and may give rise to lower risks of material misstatements. For example

- accounting estimates arising in entities that engage in business activities that are not complex.
- accounting estimates that are frequently made and updated because they relate to routine transactions.
- accounting estimates derived from data that is readily available, such as published interest rate data or exchange-traded prices of securities. Such data may be referred to as *observable* in the context of a fair value accounting estimate.
- fair value accounting estimates in which the method of measurement prescribed by the applicable financial reporting framework is simple and applied easily to the asset or liability requiring measurement at fair value.
- fair value accounting estimates in which the model used to measure the accounting estimate is well-known or generally accepted, provided that the assumptions or inputs to the model are observable.

.A3 However, for some accounting estimates, relatively high estimation uncertainty may exist, particularly when they are based on significant assumptions. For example

- accounting estimates relating to the outcome of litigation.
- fair value accounting estimates for derivative financial instruments not publicly traded.
- fair value accounting estimates for which a highly specialized entity-developed model is used or for which there are assumptions or inputs that cannot be observed in the marketplace.

.A4 The degree of estimation uncertainty varies based on the nature of the accounting estimate, the extent to which there is a generally accepted method or model used to make the accounting estimate, and the subjectivity of the assumptions used to make the accounting estimate. In some cases, estimation uncertainty associated with an accounting estimate may be so great that the recognition criteria in the applicable financial reporting framework are not met, and the accounting estimate cannot be made.

.A5 Not all financial statement items requiring measurement at fair value involve estimation uncertainty. For example, this may be the case for some financial statement items when an active and open market exists that provides readily available and reliable information on the prices at which actual exchanges occur, in which case the existence of published price quotations ordinarily is the best audit evidence of fair value. However, estimation uncertainty may exist even when the valuation technique and data are well-defined. For example, valuation of securities quoted on an active and open market at the listed market price may require adjustment if the holding is significant in relation to the market or is subject to restrictions in marketability. In addition, general economic circumstances prevailing at the time (for example, illiquidity in a particular market) may affect estimation uncertainty.

.A6 Additional examples of situations when accounting estimates, other than fair value accounting estimates, may be required include the following:

- Allowance for doubtful accounts
- Inventory obsolescence

- Warranty obligations
- Depreciation method or asset useful life
- Provision against the carrying amount of an investment when uncertainty regarding its recoverability exists
- Outcome of long-term contracts
- Costs arising from litigation settlements and judgments

.A7 Additional examples of situations when fair value accounting estimates may be required include the following:

- Complex financial instruments, which are not traded in an active and open market
- Share-based payments
- Property or equipment held for disposal
- Certain assets or liabilities acquired in a business combination, including goodwill and intangible assets
- Transactions involving the exchange of assets or liabilities between independent parties without monetary consideration (for example, a nonmonetary exchange of plant facilities in different lines of business)

.A8 Estimation involves judgments based on information available when the financial statements are prepared. For many accounting estimates, these include making assumptions about matters that are uncertain at the time of estimation. The auditor is not responsible for predicting future conditions, transactions, or events that, if known at the time of the audit, might have significantly affected management's actions or the assumptions used by management.

Management Bias

.A9 Financial reporting frameworks often call for neutrality (that is, freedom from bias). However, accounting estimates are imprecise and can be influenced by management judgment. Such judgment may involve unintentional or intentional management bias (for example, as a result of motivation to achieve a desired result). The susceptibility of an accounting estimate to management bias increases with the subjectivity involved in making it. Unintentional management bias and the potential for intentional management bias are inherent in subjective decisions that are often required in making an accounting estimate. For continuing audits, indicators of possible management bias identified during the audit of the preceding periods influence the planning and risk identification and assessment activities of the auditor in the current period.

.A10 Management bias can be difficult to detect at an account level. It may only be identified when considered in the aggregate of groups of accounting estimates or all accounting estimates or when observed over a number of accounting periods. Although some form of management bias is inherent in subjective decisions, in making such judgments, there may be no intention by management to mislead the users of financial statements. However, when intention to mislead exists, management bias is fraudulent in nature.

Risk Assessment Procedures and Related Activities (Ref: par. .08)

.A11 The risk assessment procedures and related activities required by paragraphs .08–.09 assist the auditor in developing an expectation of the nature and type of accounting estimates that an entity may have. The nature and extent of the risk assessment procedures and activities are matters of professional

judgment. The auditor's primary consideration is whether the understanding that has been obtained is sufficient to identify and assess the risks of material misstatement related to accounting estimates and to plan the nature, timing, and extent of further audit procedures. When the risk of material misstatement related to an accounting estimate has been significantly reduced by audit evidence relating to events occurring after management has made the estimate (for example, if litigation has been settled, the entity has sold an impaired asset, or receivables have been collected), the nature and extent of the procedures and activities required by paragraphs .08c and .09 may be significantly reduced or may not be necessary at all.

Obtaining an Understanding of the Requirements of the Applicable Financial Reporting Framework (Ref: par. .08a)

.A12 Obtaining an understanding of the requirements of the applicable financial reporting framework assists the auditor in determining, for example, whether it

- prescribes certain conditions for the recognition,⁸ or methods for the measurement, of accounting estimates.
- specifies certain conditions that permit or require measurement at a fair value.
- specifies required or permitted disclosures.

Obtaining this understanding also provides the auditor with a basis for discussion with management about how management has applied those requirements relevant to the accounting estimate and the auditor's determination of whether they have been appropriately applied.

.A13 Financial reporting frameworks may provide guidance for management on determining point estimates when alternatives exist. For example, some financial reporting frameworks require that the point estimate selected be the alternative that reflects management's judgment of the most likely outcome;⁹ others may require the use of a discounted probability-weighted expected value. In some cases, management may be able to make a point estimate directly. In other cases, management may be able to make a reliable point estimate only after considering alternative assumptions or outcomes from which it is able to determine a point estimate.

.A14 Financial reporting frameworks may require the disclosure of information concerning the significant assumptions to which the accounting estimate is particularly sensitive. Furthermore, when a high degree of estimation uncertainty exists, some financial reporting frameworks do not permit an accounting estimate to be recognized in the financial statements, but certain disclosures may be required in the notes to the financial statements.

Obtaining an Understanding of How Management Identifies the Need for Accounting Estimates (Ref: par. .08b)

.A15 The preparation and fair presentation of the financial statements requires management to determine whether a transaction, an event, or a condition gives rise to the need to make an accounting estimate and that all

⁸ Most financial reporting frameworks require incorporation in the balance sheet or income statement of items that satisfy their criteria for recognition. Disclosure of accounting policies or adding notes to the financial statements does not rectify a failure to recognize such items, including accounting estimates.

⁹ Different financial reporting frameworks may use different terminology to describe point estimates determined in this way.

necessary accounting estimates have been recognized, measured, and disclosed in the financial statements in accordance with the applicable financial reporting framework.

.A16 Management's identification of transactions, events, and conditions that give rise to the need for accounting estimates is likely to be based on

- management's knowledge of the entity's business and the industry in which it operates.
- management's knowledge of the implementation of business strategies in the current period.
- when applicable, management's cumulative experience of preparing the entity's financial statements in prior periods.

In such cases, the auditor may obtain an understanding of how management identifies the need for accounting estimates primarily through inquiry of management. In other cases, when management's process is more structured (for example, when management has a formal risk management function), the auditor may perform risk assessment procedures directed at the methods and practices followed by management for periodically reviewing the circumstances that give rise to the accounting estimates and reestimating the accounting estimates as necessary. The completeness of accounting estimates is often an important consideration of the auditor, particularly accounting estimates relating to liabilities.

.A17 The auditor's understanding of the entity and its environment obtained during the performance of risk assessment procedures, together with other audit evidence obtained during the course of the audit, assist the auditor in identifying circumstances or changes in circumstances that may give rise to the need for an accounting estimate.

.A18 Inquiries of management about changes in circumstances may include, for example, inquiries about whether

- the entity has engaged in new types of transactions that may give rise to accounting estimates.
- terms of transactions that gave rise to accounting estimates have changed.
- accounting policies relating to accounting estimates have changed as a result of changes to the requirements of the applicable financial reporting framework or otherwise.
- regulatory or other changes outside the control of management have occurred that may require management to revise, or make new, accounting estimates.
- new conditions or events have occurred that may give rise to the need for new or revised accounting estimates.

.A19 During the audit, the auditor may identify transactions, events, and conditions that give rise to the need for accounting estimates that management failed to identify. Section 315 addresses circumstances in which the auditor identifies risks of material misstatement that management failed to identify, including determining whether a significant deficiency or material weakness in internal control exists with regard to the entity's risk assessment processes.¹⁰

¹⁰ Paragraph .17 of section 315.

Considerations Specific to Smaller, Less Complex Entities

.A20 Obtaining this understanding for smaller entities is often less complex because their business activities are often limited, and transactions are less complex. Further, often, a single person (for example, the owner-manager) identifies the need to make an accounting estimate, and the auditor may focus inquiries accordingly.

Obtaining an Understanding of How Management Makes the Accounting Estimates (Ref: par. .08c)

.A21 The preparation and fair presentation of the financial statements also requires management to establish financial reporting processes for making accounting estimates, including adequate internal control. Such processes include the following:

- Selecting appropriate accounting policies and prescribing estimation processes, including appropriate estimation or valuation techniques, including, when applicable, the appropriate models
- Developing or identifying relevant data and assumptions that affect accounting estimates
- Periodically reviewing the circumstances that give rise to the accounting estimates and reestimating the accounting estimates as necessary

.A22 Matters that the auditor may consider in obtaining an understanding of how management makes the accounting estimates include, for example

- the types of accounts or transactions to which the accounting estimates relate (for example, whether the accounting estimates arise from the recording of routine and recurring transactions or whether they arise from nonrecurring or unusual transactions).
- whether and, if so, how management has used recognized measurement techniques for making particular accounting estimates.
- whether the accounting estimates were made based on data available at an interim date and, if so, whether and how management has taken into account the effect of events, transactions, and changes in circumstances occurring between that date and the period end.

Method of Measurement, Including the Use of Models (Ref: par. .08c(i))

.A23 In some cases, the applicable financial reporting framework may prescribe the method of measurement for an accounting estimate (for example, a particular model that is to be used in measuring a fair value estimate). In many cases, however, the applicable financial reporting framework does not prescribe the method of measurement or may specify alternative methods for measurement.

.A24 When the applicable financial reporting framework does not prescribe a particular method to be used in the circumstances, matters that the auditor may consider in obtaining an understanding of the method or, when applicable, the model used to make accounting estimates include, for example

- how management considered the nature of the asset or liability being estimated when selecting a particular method.
- whether the entity operates in a particular business, industry, or environment in which methods commonly used to make the particular type of accounting estimate exist.

.A25 There may be greater risks of material misstatement, for example, in cases when management has internally developed a model to be used to make the accounting estimate or is departing from a method commonly used in a particular business, industry, or environment.

Relevant Controls (Ref: par. .08c(ii))

.A26 Matters that the auditor may consider in obtaining an understanding of relevant controls include, for example, the experience and competence of those who make the accounting estimates and controls related to

- how management determines the completeness, relevance, and accuracy of the data used to develop accounting estimates.
- the review and approval of accounting estimates, including the assumptions or inputs used in their development, by appropriate levels of management and, when appropriate, those charged with governance.
- the segregation of duties between those committing the entity to the underlying transactions and those responsible for making the accounting estimates, including whether the assignment of responsibilities appropriately takes account of the nature of the entity and its products or services (for example, in the case of a large financial institution, relevant segregation of duties may include an independent function responsible for estimation and validation of fair value pricing of the entity's proprietary financial products staffed by individuals whose remuneration is not tied to such products).
- services provided by a service organization, if any, to provide fair value or other accounting estimates measurements or the data that supports the measurement. When an entity uses a service organization, section 402, *Audit Considerations Relating to an Entity Using a Service Organization*, applies.

.A27 Other controls may be relevant to making the accounting estimates, depending on the circumstances. For example, if the entity uses specific models for making accounting estimates, management may put into place specific policies and procedures around such models. These may include, for example, those established over

- the design and development or selection of a particular model for a particular purpose.
- the use of the model.
- the maintenance and periodic validation of the integrity of the model.
- security, such as controls that prevent changes to the model or data without authorization.

*Management's Use of Specialists*¹¹ (Ref: par. .08c(iii))

.A28 Management may have, or the entity may employ individuals with, the experience and competence necessary to make estimates. In some cases, however, management may need to engage a specialist to make estimates or assist in making them. This need may arise because of, for example

¹¹ See paragraph .08 of section 500, *Audit Evidence*, which addresses management's specialists.

- the specialized nature of the matter requiring estimation (for example, the measurement of mineral or hydrocarbon reserves in extractive industries).
- the technical nature of the models required to meet the relevant requirements of the applicable financial reporting framework, as may be the case in certain measurements at fair value.
- the unusual or infrequent nature of the condition, transaction, or event requiring an accounting estimate.

.A29 *Considerations specific to smaller, less complex entities.* Discussion with the owner-manager early in the audit process about the nature of any accounting estimates, the completeness of the required accounting estimates, and the adequacy of the estimating process may assist the owner-manager in determining the need to use a specialist.

Assumptions (Ref: par. .08c(iv))

.A30 Assumptions may be characterized by predictions of future conditions, transactions, or events used in making an estimate and are integral components of accounting estimates. Matters that the auditor may consider in obtaining an understanding of the assumptions underlying the accounting estimates include, for example

- the nature of the assumptions, including which of the assumptions are likely to be significant assumptions.
- how management assesses whether the assumptions are relevant and complete (that is, that all relevant variables have been taken into account).
- when applicable, how management determines that the assumptions used are internally consistent.
- whether the assumptions relate to matters within the control of management (for example, assumptions about the maintenance programs that may affect the estimation of an asset's useful life) and how they conform to the entity's business plans and the external environment or to matters that are outside its control (for example, assumptions about interest rates, mortality rates, potential judicial or regulatory actions, or the variability and timing of future cash flows).
- the nature and extent of documentation, if any, supporting the assumptions.

Assumptions may be made or identified by a specialist to assist management in making the accounting estimates. Such assumptions, when used by management, become management's assumptions.

.A31 In some cases, assumptions may be referred to as *inputs* (for example, when management uses a model to make an accounting estimate), though the term *inputs* may also be used to refer to the underlying data to which specific assumptions are applied.

.A32 Management may support assumptions with different types of information drawn from internal and external sources, the relevance and reliability of which will vary. In some cases, an assumption may be reliably based on applicable information from either external sources (for example, published interest rate or other statistical data) or internal sources (for example, historical information or previous conditions experienced by the entity). In other cases,

an assumption may be more subjective (for example, when the entity has no experience or external sources from which to draw).

.A33 In the case of fair value accounting estimates, assumptions reflect, or are consistent with, what knowledgeable, willing arm's length parties (sometimes referred to as *market participants* or equivalent) would use in determining fair value when exchanging an asset or settling a liability. Specific assumptions also will vary with the characteristics of the asset or liability being valued; the valuation technique used (for example, a market approach or an income approach); and the requirements of the applicable financial reporting framework.

.A34 With respect to fair value accounting estimates, assumptions or inputs vary in terms of their source and bases, as follows:

- a. Those that reflect what market participants would use in pricing an asset or a liability, developed based on market data obtained from sources independent of the reporting entity (sometimes referred to as *observable inputs* or equivalent)
- b. Those that reflect the entity's own judgments about what assumptions market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances (sometimes referred to as *unobservable inputs* or equivalent)

In practice, however, the distinction between *a* and *b* is not always apparent. Further, it may be necessary for management to select from a number of different assumptions used by different market participants.

.A35 The extent of subjectivity, such as whether an assumption or input is observable, influences the degree of estimation uncertainty and, thereby, the auditor's assessment of the risks of material misstatement for a particular accounting estimate.

Changes in Methods or Assumptions for Making Accounting Estimates (Ref: par. .08c(v))

.A36 In obtaining an understanding of how management makes the accounting estimates, the auditor is required to obtain an understanding about whether there has been or ought to have been a change from the prior period in the methods or assumptions for making the accounting estimates. A specific estimation method or assumption may need to be changed in response to changes in the environment or circumstances affecting the entity or in the requirements of the applicable financial reporting framework. If management has changed the method or assumption for making an accounting estimate, it is important that management can demonstrate that the new method or assumption is more appropriate or is responsive to such changes. For example, if management changes the basis of making an accounting estimate from a liquid market approach to an illiquid market approach, the auditor challenges whether management's assumptions about the marketplace are reasonable in light of economic circumstances.

Estimation Uncertainty (Ref: par. .08c(vi))

.A37 Matters that the auditor may consider in obtaining an understanding of whether and, if so, how management has assessed the effect of estimation uncertainty include, for example,

- whether and, if so, how management has considered alternative assumptions or outcomes by, for example, performing a sensitivity

analysis to determine the effect of changes in the assumptions on an accounting estimate.

- how management determines the accounting estimate when analysis indicates a number of outcome scenarios.
- whether management monitors the outcome of accounting estimates made in the prior period and whether management has appropriately responded to the outcome of that monitoring procedure.

Reviewing Prior Period Accounting Estimates (Ref: par. .09)

.A38 The nature and extent of the review of the outcome of accounting estimates included in the prior period financial statements is a matter of professional judgment. In performing the procedures required in paragraph .09, it may not be necessary to review the outcome of every accounting estimate included in the prior period.

.A39 The outcome of an accounting estimate will often differ from the accounting estimate recognized in the prior period financial statements. By performing risk assessment procedures to identify and understand the reasons for such differences, the auditor may obtain

- information regarding the effectiveness of management's prior period estimation process, from which the auditor can judge the likely effectiveness of management's current process;
- audit evidence that is pertinent to the reestimation, in the current period, of prior period accounting estimates; or
- audit evidence of matters that may be required to be disclosed in the financial statements, such as estimation uncertainty.

.A40 The review of prior period accounting estimates may also assist the auditor, in the current period, in identifying circumstances or conditions that increase the susceptibility of accounting estimates to, or indicate the presence of, possible management bias. The auditor's professional skepticism assists in identifying such circumstances or conditions and in determining the nature, timing, and extent of further audit procedures.

.A41 A retrospective review of management judgments and assumptions related to significant accounting estimates is also required by section 240, *Consideration of Fraud in a Financial Statement Audit*.¹² That review is conducted as part of the requirement for the auditor to design and perform procedures to review accounting estimates for biases that could represent a risk of material misstatement due to fraud, in response to the risks of management override of controls. As a practical matter, the auditor's review of prior period accounting estimates as a risk assessment procedure in accordance with this section may be carried out in conjunction with the review required by section 240.

.A42 The auditor may judge that a more detailed review is required for those accounting estimates that were identified during the prior period audit as having high estimation uncertainty or for those accounting estimates that have changed significantly from the prior period. On the other hand, for example, for accounting estimates that arise from the recording of routine and recurring transactions, the auditor may judge that the application of analytical procedures as risk assessment procedures is sufficient for purposes of the review.

¹² Paragraph .32 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

.A43 For fair value accounting estimates and other accounting estimates based on current conditions at the measurement date, more variation may exist between the fair value amount recognized in the prior period financial statements and the outcome (or the amount reestimated for the purpose of the current period). This is because the measurement objective for such accounting estimates deals with perceptions about value at a point in time, which may change significantly and rapidly as the environment in which the entity operates changes. Therefore, the auditor may focus the review on obtaining information that would be relevant to identifying and assessing risks of material misstatement. For example, in some cases, obtaining an understanding of changes in market participant assumptions that affected the outcome of a prior period fair value accounting estimate may be unlikely to provide relevant information for audit purposes. If so, then the auditor's consideration of the outcome of prior period fair value accounting estimates may be more appropriately directed toward understanding the effectiveness of management's prior estimation process (that is, management's track record) from which the auditor can judge the likely effectiveness of management's current process.

.A44 A difference between the outcome of an accounting estimate and the amount recognized in the prior period financial statements does not necessarily represent a misstatement of the prior period financial statements. However, it may do so if, for example, the difference arises from information that was available to management when the prior period's financial statements were finalized or that could reasonably be expected to have been obtained and taken into account in the preparation of those financial statements. Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses situations when facts become known to the auditor after the date of the auditor's report that, had they been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report. The applicable financial reporting framework may contain guidance on distinguishing between changes in accounting estimates that constitute misstatements and changes that do not and the accounting treatment required to be followed.

Identifying and Assessing the Risks of Material Misstatement

Estimation Uncertainty (Ref: par. .10)

.A45 The degree of estimation uncertainty associated with an accounting estimate may be influenced by factors such as

- the extent to which the accounting estimate depends on judgment.
- the sensitivity of the accounting estimate to changes in assumptions.
- the existence of recognized measurement techniques that may mitigate the estimation uncertainty (though the subjectivity of the assumptions used as inputs may, nevertheless, give rise to estimation uncertainty).
- the length of the forecast period and the relevance of data drawn from past events to forecast future events.
- the availability of reliable data from external sources.
- the extent to which the accounting estimate is based on observable or unobservable inputs.

The degree of estimation uncertainty associated with an accounting estimate may influence the estimate's susceptibility to bias.

.A46 Matters that the auditor considers in assessing the risks of material misstatement may also include the following:

- The actual or expected magnitude of an accounting estimate
- The recorded amount of the accounting estimate (that is, management's point estimate) in relation to the amount expected by the auditor to be recorded
- Whether management has used a specialist in making the accounting estimate
- The outcome of the review of prior period accounting estimates

High Estimation Uncertainty and Significant Risks (Ref: par. .11)

.A47 Examples of accounting estimates that may have high estimation uncertainty include the following:

- Accounting estimates that are highly dependent upon judgment (for example, judgments about the outcome of pending litigation or the amount and timing of future cash flows dependent on uncertain events many years in the future)
- Accounting estimates that are not calculated using recognized measurement techniques
- Accounting estimates in which the results of the auditor's review of similar accounting estimates made in the prior period financial statements indicate a substantial difference between the original accounting estimate and the actual outcome
- Fair value accounting estimates for which a highly specialized, entity-developed model is used or for which there are no observable inputs

.A48 A seemingly immaterial accounting estimate may have the potential to result in a material misstatement due to the estimation uncertainty associated with the estimation (that is, the size of the amount recognized or disclosed in the financial statements for an accounting estimate may not be an indicator of its estimation uncertainty).

.A49 In some circumstances, the estimation uncertainty is so high that a reasonable accounting estimate cannot be made. The applicable financial reporting framework may, therefore, preclude recognition of the item in the financial statements or its measurement at fair value. In such cases, the significant risks relate not only to whether an accounting estimate should be recognized or whether it should be measured at fair value but also to the adequacy of the disclosures. With respect to such accounting estimates, the applicable financial reporting framework may require disclosure of the accounting estimates and the high estimation uncertainty associated with them (see paragraphs .A128–.A131).

.A50 If the auditor determines that an accounting estimate gives rise to a significant risk, the auditor is required by section 315 to obtain an understanding of the entity's controls, including control activities.¹³

.A51 In some cases, the estimation uncertainty of an accounting estimate may lead the auditor to consider whether such estimation uncertainty indicates that substantial doubt could exist about the entity's ability to continue as a going concern. Section 570, *The Auditor's Consideration of an Entity's Ability to*

¹³ Paragraph .30 of section 315.

Continue as a Going Concern, addresses such circumstances. [Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

Responding to the Assessed Risks of Material Misstatement (Ref: par. .12)

.A52 Section 330 requires the auditor to design and perform audit procedures whose nature, timing, and extent are responsive to the assessed risks of material misstatement related to accounting estimates at both the financial statement and relevant assertion levels.¹⁴ Paragraphs .A53–.A121 focus on specific responses at the relevant assertion level only. Based on the assessed risks of material misstatement, the auditor is required to exercise professional judgment¹⁵ in determining the nature, timing, and extent of the procedures necessary to conclude whether management appropriately applied the requirements of the financial reporting framework, including that the methods used for making the estimates are appropriate.

Application of the Requirements of the Applicable Financial Reporting Framework (Ref: par. .12a)

.A53 Many financial reporting frameworks prescribe certain conditions for the recognition of accounting estimates and specify the methods for making them and required disclosures. Such requirements may be complex and require the application of judgment. Based on the understanding obtained in performing risk assessment procedures, the requirements of the applicable financial reporting framework that may be susceptible to misapplication or differing interpretations become the focus of the auditor's attention.

.A54 Determining whether management has appropriately applied the requirements of the applicable financial reporting framework is based, in part, on the auditor's understanding of the entity and its environment. For example, the measurement of the fair value of some items, such as intangible assets acquired in a business combination, may involve special considerations that are affected by the nature of the entity and its operations.

.A55 In some situations, additional audit procedures, such as the inspection by the auditor of the current physical condition of an asset, may be necessary to determine whether management has appropriately applied the requirements of the applicable financial reporting framework.

.A56 Collateral often is assigned for certain types of investments in debt instruments that either are required to be measured at fair value or are evaluated for possible impairment. If the collateral is an important factor in measuring the fair value of the investment or evaluating its carrying amount, it may be necessary for the auditor—in determining whether management has appropriately applied the requirements of the applicable financial reporting framework—to obtain sufficient appropriate audit evidence regarding the existence; value; rights; and access to, or transferability of, such collateral (including consideration of whether all appropriate liens have been filed and appropriate disclosures have been made).

.A57 The application of the requirements of the applicable financial reporting framework requires management to consider changes in the environment or circumstances that affect the entity. For example, the introduction of an

¹⁴ Paragraph .18 of section 330.

¹⁵ Paragraph .18 of section 200.

active market for a particular class of asset or liability may indicate that the use of discounted cash flows to estimate the fair value of such asset or liability is no longer appropriate.

Consistency in Methods and Basis for Changes (Ref: par. .12b)

.A58 The auditor's consideration of a change in an accounting estimate or in the method for making it from the prior period is important because a change that is not based on a change in circumstances or new information is considered arbitrary. Arbitrary changes in an accounting estimate result in inconsistent financial statements over time and may give rise to a financial statement misstatement or be an indicator of possible management bias.

.A59 Management often is able to demonstrate good reason for a change in an accounting estimate or the method for making an accounting estimate from one period to another based on a change in circumstances. What constitutes a good reason and the adequacy of support for management's contention that there has been a change in circumstances that warrants a change in an accounting estimate or the method for making an accounting estimate are matters of judgment.

Responses to the Assessed Risks of Material Misstatements (Ref: par. .13)

.A60 The auditor's decision about which response, individually or in combination, in paragraph .13 to undertake to respond to the risks of material misstatement may be influenced by such matters as the following:

- The nature of the accounting estimate, including whether it arises from routine or nonroutine transactions
- Whether the procedure(s) is expected to effectively provide the auditor with sufficient appropriate audit evidence
- The assessed risk of material misstatement, including whether the assessed risk is a significant risk

.A61 For example, when evaluating the reasonableness of the allowance for doubtful accounts, an effective procedure for the auditor may be to review subsequent cash collections in combination with other procedures. When the estimation uncertainty associated with an accounting estimate is high (for example, an accounting estimate based on a proprietary model for which unobservable inputs exist), it may be that a combination of the responses to assessed risks in paragraph .13 is necessary in order to obtain sufficient appropriate audit evidence.

.A62 Additional guidance explaining the circumstances in which each of the responses may be appropriate is provided in paragraphs .A63–.A101.

Events Occurring Up to the Date of the Auditor's Report (Ref: par. .13a)

.A63 Determining whether events occurring up to the date of the auditor's report provide audit evidence regarding the accounting estimate may be an appropriate response when such events are expected to

- occur and
- provide audit evidence that confirms or contradicts the accounting estimate.

.A64 Events occurring up to the date of the auditor's report may sometimes provide sufficient appropriate audit evidence about an accounting estimate. For example, sale of the complete inventory of a superseded product shortly after the period-end may provide audit evidence relating to the estimate of its net realizable value. In such cases, there may be no need to perform additional audit procedures on the accounting estimate, provided that sufficient appropriate evidence about the events is obtained.

.A65 For some accounting estimates, events occurring up to the date of the auditor's report are unlikely to provide audit evidence regarding the accounting estimate. For example, the conditions or events relating to some accounting estimates develop only over an extended period. Also, because of the measurement objective of fair value accounting estimates, information after the period-end may not reflect the events or conditions existing at the balance sheet date and, therefore, may not be relevant to the measurement of the fair value accounting estimate. Paragraph .13 identifies other responses to the risks of material misstatement that the auditor may undertake.

.A66 In some cases, events that contradict the accounting estimate may indicate that the amount recorded is misstated, that management has ineffective processes for making accounting estimates, or that management bias exists in the making of accounting estimates.

.A67 Even though the auditor may decide not to undertake the approach referred to in paragraph .13a with respect to specific accounting estimates, the auditor is required to comply with section 560. The auditor is required to perform audit procedures designed to obtain sufficient appropriate audit evidence that all subsequent events that require adjustment of, or disclosure in, the financial statements have been identified.¹⁶ Because the measurement of many accounting estimates, other than fair value accounting estimates, usually depends on the outcome of future conditions, transactions, or events, the auditor's work under section 560 is particularly relevant.

Testing How Management Made the Accounting Estimate (Ref: par. .13b)

.A68 Testing how management made the accounting estimate and the data on which it is based may be an appropriate response when the accounting estimate is a fair value accounting estimate developed on a model that uses observable and unobservable inputs. It may also be appropriate when, for example

- the accounting estimate is derived from the routine processing of data by the entity's accounting system.
- the auditor's review of similar accounting estimates made in the prior period financial statements suggests that management's current period process is likely to be effective.
- the accounting estimate is based on a large population of items of a similar nature that individually are not significant.

.A69 Testing how management made the accounting estimate and the data on which it is based may involve, for example, the following:

- Testing the extent to which data on which the accounting estimate is based is accurate, complete, and relevant and whether the accounting estimate has been properly determined using such data and management assumptions

¹⁶ Paragraphs .09 and .11 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

- Considering the source, relevance, and reliability of external data or information, including that received from management's specialists,¹⁷ to assist in making an accounting estimate
- Determining how management has taken into account the effect of events, transactions, and changes in circumstances occurring between the date that the estimate or inputs to the estimate were determined and the reporting date, if the estimate was not made as of a date that coincides with the reporting date (for example, a valuation by an independent appraiser may be as of a different date)
- Recalculating the accounting estimate and reviewing, for internal consistency, information used to determine the estimate
- Considering management's review and approval processes

.A70 In accordance with section 500, *Audit Evidence*, the auditor is required to evaluate whether the data on which the estimate is based is sufficiently reliable for the auditor's purposes, including, as necessary¹⁸

- a. obtaining audit evidence about the accuracy and completeness of the data.
- b. evaluating whether the data is sufficiently precise and detailed for the auditor's purposes.

.A71 *Considerations specific to smaller, less complex entities.* In smaller entities, the process for making accounting estimates is likely to be less structured than in larger entities. Smaller entities with active management involvement may have limited descriptions of accounting procedures, unsophisticated accounting records, or few written policies. Even if the entity has no formal established process, management may still be able to provide a basis upon which the auditor can test the accounting estimate.

.A72 *Evaluating the method of measurement (Ref: par. .13b(i)).* When the applicable financial reporting framework does not prescribe the method of measurement, evaluating whether the method used (including any applicable model) is appropriate in the circumstances is a matter of professional judgment.

.A73 For this purpose, matters that the auditor may consider include, for example, whether

- management's rationale for the method selected is reasonable.
- management sufficiently and appropriately has evaluated and applied the criteria, if any, provided in the applicable financial reporting framework to support the selected method.
- the method is appropriate and sufficient data is available in the circumstances, given the nature of the asset or liability being estimated and the requirements of the applicable financial reporting framework relevant to accounting estimates.

¹⁷ Paragraph .05 of section 500 defines a *management's specialist* as "[a]n individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements."

¹⁸ Paragraph .09 of section 500.

- the method is appropriate with regard to the business, industry, and environment in which the entity operates.

.A74 In some cases, management may have determined that different methods result in a range of significantly different estimates. In such cases, obtaining an understanding of how the entity has investigated the reasons for these differences may assist the auditor in evaluating the appropriateness of the method selected.

.A75 *Evaluating the use of models.* In some cases, particularly when making fair value accounting estimates, management may use a model. Whether the model used is appropriate in the circumstances may depend on a number of factors, such as the nature of the entity and its environment, including the industry in which it operates and the specific asset or liability being measured.

.A76 The extent to which the considerations in paragraph .A77 are relevant depends on the circumstances, including whether the model is one that is commercially available for use in a particular sector or industry, or a proprietary model. In some cases, an entity may use a management specialist¹⁹ to develop and test a model.

.A77 Depending on the circumstances, matters that the auditor may also consider in testing the model include, for example, whether

- the model is validated prior to usage, with periodic reviews to ensure it is still suitable for its intended use. The entity's validation process may include evaluation of
 - the model's theoretical soundness and mathematical integrity, including the appropriateness of model parameters.
 - the consistency and completeness of the model's inputs with market practices.
 - the model's output compared with actual transactions.
- appropriate change control policies and procedures exist.
- the model is periodically calibrated and tested for validity, particularly when inputs are subjective.
- adjustments are made to the output of the model, including in the case of fair value accounting estimates whether such adjustments reflect the assumptions that market participants would use in similar circumstances.
- the model is adequately documented, including the model's intended applications and limitations and its key parameters, required inputs, and results of any validation analysis performed.

.A78 *Assumptions used by management (Ref: par. .13b(ii)).* The auditor's evaluation of the assumptions used by management is based only on information available to the auditor at the time of the audit. Audit procedures dealing with management assumptions, including those used as inputs to valuation models, are performed in the context of the audit of the entity's financial statements and not for the purpose of providing an opinion on the assumptions themselves.

¹⁹ Paragraph .08 of section 500.

.A79 Matters that the auditor may consider in evaluating the reasonableness of the assumptions used by management include, for example

- whether individual assumptions appear reasonable.
- whether the assumptions are interdependent and internally consistent.
- whether the assumptions appear reasonable when considered collectively or in conjunction with other assumptions, either for that accounting estimate or for other accounting estimates.
- in the case of fair value accounting estimates, whether the assumptions appropriately reflect observable market assumptions.

.A80 In evaluating the reasonableness of the assumptions supporting an accounting estimate, the auditor may identify one or more significant assumptions. If so, the existence of one or more significant assumptions may be an indicator that the accounting estimate has high estimation uncertainty and may, therefore, give rise to a significant risk related to recognition, measurement, or disclosure. Additional responses to significant risks are described in paragraphs .A108–.A121.

.A81 The assumptions on which accounting estimates are based may reflect what management expects will be the outcome of specific objectives and strategies. In such cases, the auditor may perform audit procedures to evaluate the reasonableness of such assumptions by considering, for example, whether the assumptions are consistent with

- the general economic environment and the entity's economic circumstances.
- the plans of the entity.
- assumptions made in prior periods, if relevant.
- the experience of, or previous conditions experienced by, the entity to the extent this historical information may be considered representative of future conditions or events.
- other assumptions used by management relating to the financial statements.

.A82 The reasonableness of the assumptions used may depend on management's intent and ability to carry out certain courses of action. Management often documents plans and intentions relevant to specific assets or liabilities, and the financial reporting framework may require it to do so. Although the extent of audit evidence to be obtained about management's intent and ability is a matter of professional judgment, the auditor's procedures may include the following:

- Review of management's history of carrying out its stated intentions
- Review of written plans and other documentation, including, when applicable, formally approved budgets, authorizations, or minutes
- Inquiry of management about its reasons for a particular course of action
- Review of events occurring subsequent to the date of the financial statements and up to the date of the auditor's report
- Evaluation of the entity's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its existing commitments

Certain financial reporting frameworks, however, may not permit management's intentions or plans to be taken into account when making an accounting estimate. This is often the case for fair value accounting estimates because their measurement objective requires that assumptions reflect those used by market participants.

.A83 Matters that the auditor may consider in evaluating the reasonableness of assumptions used by management underlying fair value accounting estimates, in addition to those discussed previously, when applicable, may include, for example

- when relevant, whether and, if so, how management has incorporated market-specific inputs into the development of assumptions.
- whether the assumptions are consistent with observable market conditions and the characteristics of the asset or liability being measured at fair value.
- whether the sources of market-participant assumptions are relevant and reliable and how management has selected the assumptions to use when a number of different market participant assumptions exist.
- when appropriate, whether and, if so, how management considered assumptions used in, or information about, comparable transactions, assets, or liabilities.

.A84 Further, fair value accounting estimates may comprise observable inputs, as well as unobservable inputs. When fair value accounting estimates are based on unobservable inputs, matters that the auditor may consider include, for example, how management supports

- the identification of the characteristics of market participants relevant to the accounting estimate.
- modifications it has made to its own assumptions to reflect its view of assumptions market participants would use.
- whether it has incorporated appropriate information.
- when applicable, how its assumptions take account of comparable transactions, assets, or liabilities.

If there are unobservable inputs, it is more likely that the auditor's evaluation of the assumptions will need to be combined with other responses to assessed risks in paragraph .13 in order to obtain sufficient appropriate audit evidence. In such cases, it may be necessary for the auditor to perform other audit procedures (for example, examining documentation supporting the review and approval of the accounting estimate by appropriate levels of management and, when appropriate, those charged with governance).

.A85 Challenges may exist for management when fair value accounting estimates have unobservable inputs, in particular, as a result of illiquid markets. Management may not have the expertise internally to value illiquid or complex financial instruments, and there may be limited sources of information available to establish their values. It may be necessary for management to make assumptions, including assumptions utilized by management based upon the work of a specialist, to develop fair value measurements for illiquid assets.

.A86 The reliability of audit evidence is influenced by its source and nature. For example, management may use a broker quote to support a fair value measurement; however, when the quote is obtained from the institution that initially sold the instrument, this evidence may be less objective and may need

to be supplemented with evidence from one or more other brokers or information from a pricing service. Pricing services and brokers may use methods of valuation that are not known to management or the auditor. In accordance with paragraph .08c(i), the auditor is required to obtain an understanding of how such information was developed. For example, the auditor might inquire whether the value is based on private trades, trades of similar instruments, a cash flow model, or some combination of inputs. Inquiry into the nature of a broker quote is directed at its reliability and consistency with the objective of fair value measurement.

.A87 Changes in market conditions may require changes in valuation techniques. Consistency is generally a desirable quality in financial information but may be inappropriate if circumstances change. Paragraph .A57 gives the example of the introduction of an active market as an illustration of changed circumstances leading to a move from valuation by model to valuation by market price. In a period of market instability, the changes could be in the opposite direction because markets could become inactive. Even when models have been consistently used, a need for management to examine the continuing appropriateness of the assumptions exists. Further, models may have been calibrated in times when reasonable market information was available but may not provide reasonable valuations in times of unanticipated stress. Consequently, the degree of consistency of valuation techniques and the appropriateness of changes in technique or assumptions require the auditor's attention.

.A88 A change in valuation technique does not, however, justify a change in the underlying measurement objective (that is, fair value as defined in the financial reporting framework) to a different standard of value, such as an individual opinion of value. Section 500 addresses what constitutes audit evidence, the quantity and quality of audit evidence to be obtained, and the audit procedures that the auditor uses for obtaining that audit evidence. Unless management is able to support its valuations, it will be difficult for the auditor to obtain sufficient appropriate audit evidence. However, as evidence about assumptions and the validity of models is necessarily less reliable than evidence of a market price taken from an active market, it may be necessary to look at more sources of evidence to accumulate sufficient appropriate evidence because the audit evidence needed is affected by the risk of misstatement (the greater the risk, the more audit evidence is likely to be required). For example, an auditor or auditor's specialist may use an independent model to compare its results with those of the model used by management in order to evaluate whether the values determined by management's model are reasonable.

.A89 In addition, the auditor may consider whether external sources provide audit evidence to which the auditor could benchmark an entity's practices. For example, sources that track losses recorded by institutions may provide the auditor with audit evidence about whether the entity's valuations are reasonable if it has invested in similar instruments as those institutions.

Testing the Operating Effectiveness of Controls (Ref: par. .13c)

.A90 Testing the operating effectiveness of the controls over how management made the accounting estimate may be an appropriate response when management's process has been well-designed, implemented, and maintained. For example

- when controls exist for the review and approval of the accounting estimates by appropriate levels of management and, when appropriate, those charged with governance.
- when the accounting estimate is derived from the routine processing of data by the entity's accounting system.

.A91 Testing the operating effectiveness of the controls is required by section 330 when²⁰

- a. the auditor's assessment of risks of material misstatement at the relevant assertion level includes an expectation that controls over the process are operating effectively or
- b. substantive procedures alone do not provide sufficient appropriate audit evidence at the relevant assertion level.

.A92 *Considerations specific to smaller, less complex entities.* Controls over the process to make an accounting estimate may exist in smaller entities, but the formality with which they operate varies. Further, smaller entities may determine that certain types of controls are not necessary because of active management involvement in the financial reporting process. In the case of very small entities, however, there may not be many controls that the auditor can identify. For this reason, the auditor's response to the assessed risks is likely to be substantive in nature, with the auditor performing one or more of the other responses in paragraph .13.

Developing a Point Estimate or Range (Ref: par. .13d)

.A93 Developing a point estimate or range to evaluate management's point estimate may be an appropriate response when, for example

- an accounting estimate is not derived from the routine processing of data by the accounting system.
- the auditor's review of similar accounting estimates made in the prior period financial statements suggests that management's current period process is unlikely to be effective.
- the entity's controls within and over management's processes for determining accounting estimates are not well-designed or properly implemented.
- events or transactions between the period-end and the date of the auditor's report contradict management's point estimate.
- there are alternative sources of relevant data available to the auditor that can be used in developing a point estimate or range.

.A94 Even when the entity's controls are well-designed and properly implemented, developing a point estimate or range may be an effective and efficient response to the assessed risks. In other situations, the auditor may consider this approach as part of determining whether further procedures are necessary and, if so, their nature and extent.

.A95 The approach taken by the auditor in developing either a point estimate or range may vary based on what is considered most effective in the circumstances. For example, the auditor may initially develop a preliminary point estimate and then assess its sensitivity to changes in assumptions to ascertain a range with which to evaluate management's point estimate. Alternatively, the auditor may begin by developing a range for purposes of determining, when possible, a point estimate.

.A96 The ability of the auditor to develop a point estimate, as opposed to a range, depends on several factors, including the model used, the nature and extent of data available, and the estimation uncertainty involved with the accounting estimate. Further, the decision to develop a point estimate or range may be influenced by the applicable financial reporting framework, which may

²⁰ Paragraph .08 of section 330.

prescribe the point estimate that is to be used after consideration of the alternative outcomes and assumptions or prescribe a specific measurement method (for example, the use of a discounted probability-weighted expected value).

.A97 The auditor may develop a point estimate or range in a number of ways. For example, by

- using a model (for example, one that is commercially available for use in a particular sector or industry or a proprietary or an auditor-developed model).
- further developing management's consideration of alternative assumptions or outcomes (for example, by introducing a different set of assumptions).
- employing or engaging a person with specialized expertise to develop or execute the model or provide relevant assumptions.
- making reference to other comparable conditions, transactions, or events or, when relevant, markets for comparable assets or liabilities.

Understanding Management's Assumptions or Method (Ref: par. .13d(i))

.A98 When the auditor develops a point estimate or range and uses assumptions or a method different from those used by management, paragraph .13d(i) requires the auditor to obtain a sufficient understanding of the assumptions or method used by management in making the accounting estimate. This understanding provides the auditor with information that may be relevant to the auditor's development of an appropriate point estimate or range. Further, it assists the auditor to understand and evaluate any significant differences from management's point estimate. For example, a difference may arise because the auditor used different, but equally valid, assumptions, compared with those used by management. This may reveal that the accounting estimate is highly sensitive to certain assumptions and, therefore, subject to high estimation uncertainty, indicating that the accounting estimate may be a significant risk. Alternatively, a difference may arise as a result of a factual error made by management. Depending on the circumstances, the auditor may find it helpful in drawing conclusions to discuss with management the basis for the assumptions used and their validity and the difference, if any, in the approach taken to making the accounting estimate.

Narrowing a Range (Ref: par. .13d(ii))

.A99 When the auditor concludes that it is appropriate to use a range to evaluate the reasonableness of management's point estimate (the auditor's range), paragraph .13d(ii) requires that range to encompass all reasonable outcomes, rather than all possible outcomes. The range cannot be one that comprises all possible outcomes if it is to be useful because such a range would be too wide to be effective for purposes of the audit. The auditor's range is useful and effective when it is sufficiently narrow to enable the auditor to conclude whether the accounting estimate is materially misstated.

.A100 Ordinarily, a range that has been narrowed to be equal to or less than performance materiality (see section 320, *Materiality in Planning and Performing an Audit*) is adequate for the purposes of evaluating the reasonableness of management's point estimate.²¹ However, particularly in certain industries, it may not be possible to narrow the range to below such an amount. This does not necessarily preclude recognition of the accounting estimate. It

²¹ Paragraph .11 of section 320, *Materiality in Planning and Performing an Audit*.

may indicate, however, that the estimation uncertainty associated with the accounting estimate is such that it gives rise to a significant risk. Additional responses to significant risks are described in paragraphs .A108–.A121.

.A101 Narrowing the range to a position at which all outcomes within the range are considered reasonable may be achieved by

- a. eliminating from the range those outcomes at the extremities of the range judged by the auditor to be unlikely to occur and
- b. continuing to narrow the range, based on audit evidence available, until the auditor concludes that all outcomes within the range are considered reasonable. In some rare cases, the auditor may be able to narrow the range until the audit evidence indicates a point estimate.

Considering Whether Specialized Skills or Knowledge Are Required (Ref: par. .14)

.A102 In planning the audit, the auditor is required by section 300, *Planning an Audit*, to ascertain the nature, timing, and extent of resources necessary to perform the audit engagement.²² This may include, as necessary, the involvement of those with specialized skills or knowledge. In addition, section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, requires the engagement partner to be satisfied that the engagement team and any auditor's specialists who are not part of the engagement team collectively have the appropriate competence and capabilities to perform the audit engagement.²³ During the course of the audit of accounting estimates, the auditor may identify, in light of the experience of the auditor and the circumstances of the engagement, the need for specialized skills or knowledge to be applied regarding one or more aspects of the accounting estimates.

.A103 Matters that may affect the auditor's consideration of whether specialized skills or knowledge is required include, for example, the following:

- The nature of the underlying asset, liability, or component of equity in a particular business or industry (for example, mineral deposits, agricultural assets, or complex financial instruments)
- A high degree of estimation uncertainty
- Complex calculations or specialized models are involved (for example, when estimating fair values when no observable market exists)
- The complexity of the requirements of the applicable financial reporting framework relevant to accounting estimates, including whether there are areas known to be subject to differing interpretation or practice is inconsistent or developing
- The procedures that the auditor intends to undertake in responding to assessed risks

.A104 For the majority of accounting estimates, even when estimation uncertainty exists, it is unlikely that specialized skills or knowledge will be required. For example, it is unlikely that specialized skills or knowledge would be necessary for an auditor to evaluate an allowance for doubtful accounts.

²² Paragraph .08 of section 300, *Planning an Audit*.

²³ Paragraph .16 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

.A105 However, the auditor may not possess the specialized skills or knowledge required when the matter involved is in a field other than accounting or auditing and may need to obtain it from an auditor's specialist. Section 620, *Using the Work of an Auditor's Specialist*, addresses determining the need to employ or engage an auditor's specialist and the auditor's responsibilities when using the work of an auditor's specialist.

.A106 Further, in some cases, the auditor may conclude that it is necessary to obtain specialized skills or knowledge related to specific areas of accounting or auditing. Individuals with such skills or knowledge may be employed by the auditor's firm or engaged from an external organization outside of the auditor's firm. When such individuals perform audit procedures on the engagement, they are part of the engagement team, and accordingly, they are subject to the requirements in section 220.

.A107 Depending on the auditor's understanding of, and experience working with, the auditor's specialist or those other individuals with specialized skills or knowledge, the auditor may consider it appropriate to discuss matters such as the requirements of the applicable financial reporting framework with the individuals involved to establish that their work is relevant for audit purposes.

Further Substantive Procedures to Respond to Significant Risks (Ref: par. .15–.17 and .20)

.A108 In auditing accounting estimates that give rise to significant risks, the auditor's further substantive procedures are focused on the evaluation of

- a. how management has assessed the effect of estimation uncertainty on the accounting estimate and the effect that such uncertainty may have on the appropriateness of the recognition of the accounting estimate in the financial statements and
- b. the adequacy of related disclosures.

For estimates that give rise to significant risks, the procedures that the auditor is required to perform to address the requirements in paragraphs .12–.13 may be performed in conjunction with the procedures performed to address the requirements in paragraphs .15–.17.

Estimation Uncertainty

Management's Consideration of Estimation Uncertainty (Ref: par. .15a)

.A109 Management may evaluate alternative assumptions or outcomes of the accounting estimates through a number of methods, depending on the circumstances. One possible method used by management is to undertake a sensitivity analysis. This might involve determining how the monetary amount of an accounting estimate varies with different assumptions. Even for accounting estimates measured at fair value, there can be variation because different market participants will use different assumptions. A sensitivity analysis could lead to the development of a number of outcome scenarios, sometimes characterized as a range of outcomes by management, such as "pessimistic" and "optimistic" scenarios.

.A110 A sensitivity analysis may demonstrate that an accounting estimate is not sensitive to changes in particular assumptions. Alternatively, it may demonstrate that the accounting estimate is sensitive to one or more assumptions that then become the focus of the auditor's attention.

.A111 This is not intended to suggest that one particular method of addressing estimation uncertainty (such as sensitivity analysis) is more suitable than another or that management's consideration of alternative assumptions or outcomes needs to be conducted through a detailed process supported by extensive documentation. Rather, it is whether management has assessed how estimation uncertainty may affect the accounting estimate that is important, not the specific manner in which it is done. Accordingly, when management has not considered alternative assumptions or outcomes, it may be necessary for the auditor to discuss with management, and request support for how it has addressed, the effects of estimation uncertainty on the accounting estimate.

.A112 *Considerations specific to smaller, less complex entities.* Smaller entities may use simple means to assess the estimation uncertainty. In addition to the auditor's review of available documentation, the auditor may obtain other audit evidence of management consideration of alternative assumptions or outcomes by inquiry of management. In addition, management may not have the expertise to consider alternative outcomes or otherwise address the estimation uncertainty of the accounting estimate. In such cases, the auditor may explain to management the process or the different methods available for doing so and the documentation thereof. This would not, however, change the responsibilities of management for the preparation and fair presentation of the financial statements.

Significant Assumptions (Ref: par. .15b)

.A113 An assumption used in making an accounting estimate may be deemed to be significant if a reasonable variation in the assumption would materially affect the measurement of the accounting estimate.

.A114 Support for significant assumptions derived from management's knowledge may be obtained from management's continuing processes of strategic analysis and risk management. Even without formal established processes, such as may be the case in smaller entities, the auditor may be able to evaluate the assumptions through inquiries of, and discussions with, management, along with other audit procedures, in order to obtain sufficient appropriate audit evidence.

.A115 The auditor's considerations in evaluating assumptions made by management are described in paragraphs .A78–.A89.

Management Intent and Ability (Ref: par. .15c)

.A116 The auditor's considerations regarding assumptions made by management and management's intent and ability are described in paragraphs .A12 and .A82.

Development of a Range (Ref: par. .16)

.A117 In preparing the financial statements, management may be satisfied that it has adequately addressed the effects of estimation uncertainty on the accounting estimates that give rise to significant risks. In some circumstances, however, the auditor may view the efforts of management as inadequate. This may be the case, for example, when, in the auditor's professional judgment

- sufficient appropriate audit evidence could not be obtained through the auditor's evaluation of how management has addressed the effects of estimation uncertainty.
- it is necessary to explore further the degree of estimation uncertainty associated with an accounting estimate (for example, when the auditor is aware of wide variation in outcomes for similar accounting estimates in similar circumstances).

- it is unlikely that other audit evidence can be obtained (for example, through the review of events occurring up to the date of the auditor's report).
- indicators of management bias in the making of accounting estimates may exist.

.A118 The auditor's considerations in determining a range for this purpose are described in paragraphs .A93–.A101.

Recognition and Measurement Criteria

Recognition of the Accounting Estimates in the Financial Statements (Ref: par. .17a)

.A119 When management has recognized an accounting estimate in the financial statements, the focus of the auditor's evaluation is on whether the measurement of the accounting estimate is sufficiently reliable to meet the recognition criteria of the applicable financial reporting framework.

.A120 With respect to accounting estimates that have not been recognized, the focus of the auditor's evaluation is on whether the recognition criteria of the applicable financial reporting framework have, in fact, been met. Even when an accounting estimate has not been recognized and the auditor concludes that this treatment is appropriate, there may be a need for disclosure of the circumstances in the notes to the financial statements. The auditor may also determine that there is a need to draw the reader's attention to a significant uncertainty by adding an emphasis-of-matter paragraph to the auditor's report. Section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, addresses the use of such paragraphs.

Measurement Basis for the Accounting Estimates (Ref: par. .17b)

.A121 With respect to fair value accounting estimates, some financial reporting frameworks presume that fair value can be measured reliably as a prerequisite to either requiring or permitting fair value measurements and disclosures. In some cases, this presumption may be overcome when, for example, no appropriate method or basis for measurement exists. In such cases, the focus of the auditor's evaluation is on whether management's basis for overcoming the presumption relating to the use of fair value set forth under the applicable financial reporting framework is appropriate.

Evaluating the Reasonableness of the Accounting Estimates and Determining Misstatements (Ref: par. .18)

.A122 Based on the audit evidence obtained, the auditor may conclude that the evidence points to an accounting estimate that differs from management's point estimate. When the audit evidence supports a point estimate, the difference between the auditor's point estimate and management's point estimate constitutes a misstatement. When the auditor has concluded that using the auditor's range provides sufficient appropriate audit evidence, a management point estimate that lies outside the auditor's range would not be supported by audit evidence. In such cases, the misstatement is no less than the difference between management's point estimate and the nearest point of the auditor's range.

.A123 When management has changed an accounting estimate, or the method in making it, from the prior period based on a subjective assessment that there has been a change in circumstances, the auditor may conclude, based on the audit evidence, that the accounting estimate is misstated as a result of

an arbitrary change by management or may regard it as an indicator of possible management bias (see paragraphs .A133–.A134).

.A124 Section 450, *Evaluation of Misstatements Identified During the Audit*, provides guidance on distinguishing misstatements for purposes of the auditor's evaluation of the effect of uncorrected misstatements on the financial statements.²⁴ With regard to accounting estimates, a misstatement, whether caused by fraud or error, may arise as a result of

- misstatements about which no doubt exists (factual misstatements).
- differences arising from management's judgments concerning accounting estimates that the auditor considers unreasonable or the selection or application of accounting policies that the auditor considers inappropriate (judgmental misstatements).
- the auditor's best estimate of misstatements in populations involving the projection of misstatements identified in audit samples to the entire population from which the samples were drawn (projected misstatements).

In some cases involving accounting estimates, a misstatement could arise as a result of a combination of these circumstances, making separate identification difficult or impossible.

.A125 Evaluating the reasonableness of accounting estimates and related disclosures included in the notes to the financial statements, whether required by the applicable financial reporting framework or disclosed voluntarily, involves essentially the same types of considerations applied when auditing an accounting estimate recognized in the financial statements.

Written Representations

.A126 Part of the auditor's audit evidence includes obtaining representations from management about whether management believes significant assumptions used in making accounting estimates are reasonable. See section 580, *Written Representations*.²⁵

Communication With Those Charged With Governance

.A127 Section 260, *The Auditor's Communication With Those Charged With Governance*, addresses the auditor's communications of certain matters related to the conduct of an audit to those charged with governance. The auditor is required by section 260 to communicate the auditor's views about the qualitative aspects of the entity's significant accounting practices, including accounting estimates, and, when applicable, is required to determine that those charged with governance are informed about the process used by management in formulating particularly sensitive accounting estimates and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.²⁶

²⁴ Paragraph .A3 of section 450, *Evaluation of Misstatements Identified During the Audit*.

²⁵ Paragraph .16 of section 580, *Written Representations*.

²⁶ Paragraph .12 of section 260, *The Auditor's Communication With Those Charged With Governance*.

Disclosures Related to Accounting Estimates

Disclosures in Accordance With the Applicable Financial Reporting Framework (Ref: par. .19)

.A128 The presentation of financial statements in accordance with the applicable financial reporting framework includes adequate disclosure of material matters. The applicable financial reporting framework may permit or prescribe disclosures related to accounting estimates, and some entities may disclose voluntarily additional information in the notes to the financial statements. These disclosures may include, for example

- the assumptions used.
- the method of estimation used, including any applicable model(s).
- the basis for the selection of the method of estimation.
- the effect of any changes to the method of estimation from the prior period.
- the sources and implications of estimation uncertainty.

Such disclosures are relevant to users in understanding the accounting estimates recognized or disclosed in the financial statements, and sufficient appropriate audit evidence needs to be obtained about whether the disclosures are in accordance with the requirements of the applicable financial reporting framework.

.A129 In some cases, the applicable financial reporting framework may require specific disclosures regarding uncertainties. For example, some financial reporting frameworks prescribe the following:

- The disclosure of key assumptions and other sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities. Such requirements may be described using terms such as *key sources of estimation uncertainty* or *critical accounting estimates*.
- The disclosure of the range of possible outcomes and the assumptions used in determining the range.
- The disclosure of information regarding the significance of fair value accounting estimates to the entity's financial position and performance.
- Qualitative disclosures, such as the exposures to risk and how they arise; the entity's objectives, policies, and procedures for managing the risk; and the methods used to measure the risk, and any changes from the previous period of these qualitative concepts.
- Quantitative disclosures, such as the extent to which the entity is exposed to risk, based on information provided internally to the entity's key management personnel, including credit risk, liquidity risk, and market risk.

Disclosures of Estimation Uncertainty for Accounting Estimates That Give Rise to Significant Risks (Ref: par. .20)

.A130 Regarding accounting estimates having significant risk, even when the disclosures are in accordance with the applicable financial reporting framework, the auditor may conclude that the disclosure of estimation uncertainty is inadequate in light of the circumstances and facts involved. The auditor's evaluation of the adequacy of disclosure of estimation uncertainty increases

in importance the greater the range of possible outcomes of the accounting estimate in relation to materiality (see the related discussion in paragraphs .A98–.A101).

.A131 In some cases, the auditor may consider it appropriate to encourage management to describe the circumstances relating to the estimation uncertainty in the notes to the financial statements.

.A132 Section 705, *Modifications to the Opinion in the Independent Auditor's Report*, addresses the implications for the auditor's opinion when the auditor believes that management's disclosure of estimation uncertainty in the financial statements is inadequate or misleading.

Indicators of Possible Management Bias (Ref: par. .21)

.A133 During the audit, the auditor may become aware of judgments and decisions made by management that give rise to indicators of possible management bias (see paragraph .A9). Such indicators may affect the auditor's conclusion about whether the auditor's risk assessment and related responses remain appropriate, and the auditor may need to consider the implications for the rest of the audit. Further, they may affect the auditor's evaluation of whether the financial statements as a whole are free from material misstatement, as discussed in section 700, *Forming an Opinion and Reporting on Financial Statements*.

.A134 Examples of indicators of possible management bias with respect to accounting estimates include the following:

- Changes in an accounting estimate, or the method for making it, when management has made a subjective assessment that there has been a change in circumstances
- The use of an entity's own assumptions for fair value accounting estimates when they are inconsistent with observable market assumptions
- The selection or construction of significant assumptions that yield a point estimate favorable for management objectives
- The selection of a point estimate that may indicate a pattern of optimism or pessimism

Documentation (Ref: par. .22)

.A135 Documentation of indicators of possible management bias identified during the audit assists the auditor in concluding whether the auditor's risk assessment and related responses remain appropriate and in evaluating whether the financial statements as a whole are free from material misstatement. See paragraph .A134 for examples of indicators of possible management bias.

.A136

Exhibit—Examples of Accounting Estimates (Ref: par. .02)

The following are examples of accounting estimates that are included in financial statements. The list is presented for information only. It is not considered to be all-inclusive.

- **Receivables**
 - Uncollectible receivables
 - Allowance for loan losses
 - Valuation of long-term unconditional promises to give
- **Inventories**
 - Obsolete inventory
 - Net realizable value of inventories when future selling prices and future costs are involved
 - Losses on purchase commitments
- **Financial instruments**
 - Valuation of securities
 - Probability of high correlation of a hedge
 - Sales of securities with puts and calls
- **Productive facilities, natural resources, and intangibles**
 - Useful lives and residual values
 - Depreciation and amortization methods
 - Impairment analysis
 - Recoverability of costs
 - Recoverable reserves
- **Accruals**
 - Property and casualty insurance company loss reserves
 - Compensation in stock option plans and deferred plans
 - Warranty claims
 - Taxes on real and personal property
 - Renegotiation refunds
 - Actuarial assumptions in benefit costs
- **Revenues**
 - Airline passenger revenue
 - Subscription income
 - Freight and cargo revenue
 - Dues income
 - Losses on sales contracts

- **Contracts**
 - Revenue to be earned
 - Costs to be incurred
 - Percent of completion
 - **Leases**
 - Initial direct costs
 - Executory costs
 - **Litigation**
 - Probability of loss
 - Amount of loss
 - **Rates**
 - Annual effective tax rate in interim reporting
 - Imputed interest rates on receivables and payables
 - Gross profit rates under program method of accounting
 - **Other**
 - Losses and net realizable value on disposal of segment or restructuring of a business
 - Fair values in nonmonetary exchanges
 - Interim period costs in interim reporting
 - Current values in personal financial statements
-

AU-C Section 550

Related Parties

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to related party relationships and transactions in an audit of financial statements. Specifically, it expands on how section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*; section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*; and section 240, *Consideration of Fraud in a Financial Statement Audit*, are to be applied regarding risks of material misstatement associated with related party relationships and transactions.

.02 Section 700, *Forming an Opinion and Reporting on Financial Statements*, requires the auditor to evaluate whether the financial statements achieve fair presentation.¹ Section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, requires that, in audits of special purpose financial statements that contain related party transactions, the auditor evaluate whether the financial statements include informative disclosures similar to those required by generally accepted accounting principles (GAAP).² Section 800 also requires the auditor to evaluate whether additional disclosures beyond those specifically required by the framework and related to matters that are not specifically identified on the face of the financial statements or other disclosures may be necessary for the financial statements to achieve fair presentation.³ Thus, this section applies to all audits of financial statements. (Ref: par. .A1–.A3)

¹ Paragraph .17 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

² Paragraph .17 of section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*.

³ Paragraph .17 of section 800.

Nature of Related Party Relationships and Transactions (Ref: par. .A1–.A6)

.03 Many related party transactions are in the normal course of business. In such circumstances, they may carry no higher risk of material misstatement of the financial statements than similar transactions with unrelated parties. However, the nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties. For example

- related parties may operate through an extensive and complex range of relationships and structures, with a corresponding increase in the complexity of related party transactions.
- information systems may be ineffective at identifying or summarizing transactions and outstanding balances between an entity and its related parties.
- related party transactions may not be conducted under normal market terms and conditions (for example, some related party transactions may be conducted with no exchange of consideration).
- related party transactions may be motivated solely or in large measure to engage in fraudulent financial reporting or conceal misappropriation of assets.

Responsibilities of the Auditor

.04 Because related parties are not independent of each other, financial reporting frameworks establish specific accounting and disclosure requirements for related party relationships, transactions, and balances to enable users of the financial statements to understand their nature and actual or potential effects on the financial statements. Therefore, the auditor has a responsibility to perform audit procedures to identify, assess, and respond to the risks of material misstatement arising from the entity's failure to appropriately account for or disclose related party relationships, transactions, or balances. (Ref: par. .A3)

.05 In addition, an understanding of the entity's related party relationships and transactions is relevant to the auditor's evaluation of whether one or more fraud risk factors are present, as required by section 240, because fraud may be more easily committed through related parties.⁴

.06 Owing to the inherent limitations of an audit, an unavoidable risk exists that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with generally accepted auditing standards (GAAS).⁵ In the context of related parties, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are greater because of reasons such as the following:

- Management may be unaware of the existence of all related party relationships and transactions.
- Related party relationships may present a greater opportunity for collusion, concealment, or manipulation by management.

⁴ Paragraph .24 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

⁵ Paragraph .A56 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

.07 Planning and performing the audit with professional skepticism as required by section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, is, therefore, particularly important in this context, given the potential for undisclosed related party relationships and transactions.⁶ The requirements in this section are designed to assist the auditor in identifying and assessing the risks of material misstatement associated with related party relationships and transactions and in designing audit procedures to respond to the assessed risks.

Effective Date

.08 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.09 The objectives of the auditor are to

- a. obtain an understanding of related party relationships and transactions sufficient to be able to
 - i. recognize fraud risk factors, if any, arising from related party relationships and transactions that are relevant to the identification and assessment of the risks of material misstatement due to fraud.
 - ii. conclude, based on the audit evidence obtained, whether the financial statements, insofar as they are affected by those relationships and transactions, achieve fair presentation.
- b. obtain sufficient appropriate audit evidence about whether related party relationships and transactions have been appropriately identified, accounted for, and disclosed in the financial statements.

Definitions

.10 For purposes of GAAS, the following terms have the meanings attributed as follows:

Arm's length transaction. A transaction conducted on such terms and conditions between a willing buyer and a willing seller who are unrelated and are acting independently of each other and pursuing their own best interests.

Related party. A party defined as a related party in GAAP. (Ref. par. .A1)

.11 Reference to GAAP in GAAS means generally accepted accounting principles promulgated by bodies designated by the Council of the AICPA pursuant to Rule 202, *Compliance With Standards* (ET sec. 202 par. .01), and Rule 203, *Accounting Principles* (ET sec. 203 par. .01), of the AICPA Code of Professional Conduct.

⁶ Paragraph .17 of section 200.

Requirements

Risk Assessment Procedures and Related Activities

.12 As part of the risk assessment procedures and related activities that section 240 and section 315 require the auditor to perform during the audit, the auditor should perform the audit procedures and related activities set out in paragraphs .13–.18 to obtain information relevant to identifying the risks of material misstatement associated with related party relationships and transactions.^{7,8}

Understanding the Entity's Related Party Relationships and Transactions

.13 In connection with the engagement team discussion(s) that section 240 and section 315 require, the auditor should include specific consideration of the susceptibility of the financial statements to material misstatement due to fraud or error that could result from the entity's related party relationships and transactions.^{9,10} (Ref: par. .A7–.A8)

.14 The auditor should inquire of management regarding the following:

- a. The identity of the entity's related parties, including changes from the prior period (Ref: par. .A9–.A14)
- b. The nature of the relationships between the entity and these related parties
- c. Whether the entity entered into any transactions with these related parties during the period and, if so, the type and purpose of the transactions

.15 The auditor should inquire of management and others within the entity and perform other risk assessment procedures¹¹ considered appropriate to obtain an understanding of the controls, if any, that management has established to (Ref: par. .A15–.A20)

- a. identify, account for, and disclose related party relationships and transactions.
- b. authorize and approve significant transactions and arrangements with related parties. (Ref: par. .A21)
- c. authorize and approve significant transactions and arrangements outside the normal course of business.

Maintaining Alertness for Related Party Information When Reviewing Records or Documents

.16 During the audit, the auditor should remain alert when inspecting records or documents for arrangements or other information that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. In particular, the auditor should inspect the following for indications of the existence of related party

⁷ Paragraph .16 of section 240.

⁸ Paragraph .05 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

⁹ Paragraph .15 of section 240.

¹⁰ Paragraph .11 of section 315.

¹¹ Paragraph .06 of section 315.

relationships or transactions that management has not previously identified or disclosed to the auditor: (Ref: par. .A22–.A24)

- a. Bank and legal confirmations obtained as part of the auditor's procedures
- b. Minutes of meetings of shareholders and of those charged with governance
- c. Such other records or documents as the auditor considers necessary in the circumstances of the entity

.17 If the auditor identifies significant transactions outside the entity's normal course of business when performing the audit procedures required by paragraph .16 or through other audit procedures, the auditor should inquire of management about the following: (Ref: par. .A25–.A26)

- a. The nature of these transactions (Ref: par. .A27)
- b. Whether related parties could be involved (Ref: par. .A28)

Sharing Related Party Information With the Engagement Team

.18 The auditor should share with the other members of the engagement team the identity of the entity's related parties and other relevant information obtained about the related parties. (Ref: par. .A29–.A30)

Identification and Assessment of the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

.19 In meeting the requirement of section 315 to identify and assess the risks of material misstatement, the auditor should identify and assess the risks of material misstatement associated with related party relationships and transactions and determine whether any of those risks are significant risks.¹² In making this determination, the auditor should treat identified significant related party transactions outside the entity's normal course of business as giving rise to significant risks.

.20 If the auditor identifies fraud risk factors (including circumstances relating to the existence of a related party with dominant influence) when performing the risk assessment procedures and related activities in connection with related parties, the auditor should consider such information when identifying and assessing the risks of material misstatement due to fraud, in accordance with section 240.¹³ (Ref: par. .A31–.A33)

Responses to the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

.21 As part of the requirement in section 330 that the auditor respond to assessed risks, that the auditor respond to assessed risks, the auditor should design and perform further audit procedures to obtain sufficient appropriate

¹² Paragraph .26 of section 315.

¹³ Paragraph .24 of section 240.

audit evidence about the assessed risks of material misstatement associated with related party relationships and transactions.¹⁴ (Ref: par. .A34–.A37)

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

.22 If the auditor identifies arrangements or information that suggests the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor, the auditor should determine whether the underlying circumstances confirm the existence of those relationships or transactions.

.23 If the auditor identifies related parties or significant related party transactions that management has not previously identified or disclosed to the auditor, the auditor should

- a. promptly communicate the relevant information to the other members of the engagement team. (Ref: par. .A29 and .A38)
- b. request management to identify all transactions with the newly identified related parties for the auditor's further evaluation.
- c. inquire why the entity's controls over related party relationships and transactions failed to enable the identification or disclosure of the related party relationships or transactions.
- d. perform appropriate substantive audit procedures relating to such newly identified related parties or significant related party transactions. (Ref: par. .A39)
- e. reconsider the risk that other related parties or significant related party transactions may exist that management has not previously identified or disclosed to the auditor and perform additional audit procedures as necessary.
- f. evaluate the implications for the audit if the nondisclosure by management appears intentional (and, therefore, indicative of a risk of material misstatement due to fraud). (Ref: par. .A40)

Identified Significant Related Party Transactions Outside the Entity's Normal Course of Business

.24 For identified significant related party transactions outside the entity's normal course of business, the auditor should

- a. inspect the underlying contracts or agreements, if any, and evaluate whether
 - i. the business rationale (or lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets.¹⁵ (Ref: par. .A41–.A42)
 - ii. the terms of the transactions are consistent with management's explanations.
 - iii. the transactions have been appropriately accounted for and disclosed.
- b. obtain audit evidence that the transactions have been appropriately authorized and approved. (Ref: par. .A43–.A44)

¹⁴ Paragraphs .05–.06 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

¹⁵ Paragraph .32c of section 240.

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction

.25 If management has made an assertion in the financial statements to the effect that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, the auditor should obtain sufficient appropriate audit evidence about the assertion. (Ref: par. .A45–.A49)

Evaluation of the Accounting for, and Disclosure of, Identified Related Party Relationships and Transactions

.26 In forming an opinion on the financial statements, in accordance with section 700, the auditor should evaluate the following:¹⁶ (Ref: par. .A50)

- a. Whether the identified related party relationships and transactions have been appropriately accounted for and disclosed (Ref: par. .A51)
- b. Whether the effects of the related party relationships and transactions prevent the financial statements from achieving fair presentation (Ref: par. .A3)

Communication With Those Charged With Governance

.27 Unless all of those charged with governance are involved in managing the entity, the auditor should communicate with those charged with governance significant findings and issues arising during the audit in connection with the entity's related parties.¹⁷ (Ref: par. .A52)

Documentation

.28 The auditor should include in the audit documentation the names of the identified related parties and the nature of the related party relationships.¹⁸

Application and Other Explanatory Material

Nature of Related Party Relationships and Transactions (Ref: par. .02–.04, .10, and .26b)

.A1 GAAP frameworks include or refer to specific disclosure requirements for related party relationships and transactions. If the applicable financial reporting framework does not have specific disclosure requirements, the auditor, nonetheless, evaluates whether related party information is disclosed in a manner comparable to GAAP in order for the financial statements to achieve fair presentation.¹⁹

.A2 Certain accounting pronouncements prescribe the accounting treatment when related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from that which would be appropriate if the parties were

¹⁶ Paragraphs .13–.18 of section 700.

¹⁷ Paragraph .09 of section 260, *The Auditor's Communication With Those Charged With Governance*.

¹⁸ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

¹⁹ Paragraph .17 of section 800.

not related. In addition, the substance of a particular transaction may be significantly different from its form. Accordingly, financial statements prepared in accordance with GAAP generally recognize the substance of particular transactions rather than merely their legal form.

.A3 Related party relationships and transactions may cause the financial statements to fail to achieve fair presentation if, for example, the economic reality of such relationships and transactions is not appropriately reflected in the financial statements. For instance, fair presentation may not be achieved if the sale of a property by the entity to a controlling shareholder at a price above or below fair market value has been accounted for as a transaction involving a profit or loss for the entity when it may constitute a contribution or return of capital or the payment of a dividend.

.A4 Transactions that because of their nature may be indicative of the existence of related parties include the following:

- a. Borrowing or lending on an interest free basis or at a rate of interest significantly above or below market rates prevailing at the time of the transaction
- b. Selling real estate at a price that differs significantly from its appraised value
- c. Exchanging property for similar property in a nonmonetary transaction
- d. Making loans with no scheduled terms for when or how the funds will be repaid

.A5 Although many related party transactions are in the normal course of business, a possibility exists that transactions with related parties may have been motivated solely or in large measure by conditions similar to the following:

- a. Lack of sufficient working capital or credit to continue the business
- b. An overly optimistic earnings forecast
- c. Dependence on a single or relatively few products, customers, or transactions for the continued success of the venture
- d. A declining industry characterized by a large number of business failures
- e. Excess capacity
- f. Significant litigation, especially litigation between stockholders and management
- g. Significant obsolescence dangers because the company is in a high technology industry

For these reasons, related party transactions may indicate an increased risk of material misstatement of the financial statements.

Considerations Specific to Governmental Entities

.A6 For state and local governmental entities, related party relationships and transactions can result from interactions with other governments, not-for-profit entities, for-profit entities, and individuals. The applicable financial reporting framework used by most state and local governmental entities addresses related party relationships and transactions using terms that include *related parties*, *related organizations*, and *component units*, and can result in the inclusion of the related parties' financial statements as a reporting unit, inclusion within a reporting unit, disclosure of the related party transactions, or disclosure about why the related party or its transactions are not included.

In all such cases, the objectives described in paragraph .09 are relevant to the auditor.

Risk Assessment Procedures and Related Activities

Understanding the Entity's Related Party Relationships and Transactions

Discussion Among the Engagement Team (Ref: par. .13)

.A7 Matters that may be addressed in the discussion among the engagement team include the following:

- The nature and extent of the entity's relationships and transactions with related parties (using, for example, the auditor's record of identified related parties updated after each audit)
- An emphasis on the importance of maintaining professional skepticism throughout the audit regarding the potential for material misstatement associated with related party relationships and transactions
- The circumstances or conditions of the entity that may indicate the existence of related party relationships or transactions that management has not identified or disclosed to the auditor (for example, a complex organizational structure, use of entities formed to accomplish specific purposes,²⁰ or an inadequate information system)
- The records or documents that may indicate the existence of related party relationships or transactions
- The importance that management and those charged with governance attach to the identification of, appropriate accounting for, and disclosure of related party relationships and transactions and the related risk of management override of relevant controls

.A8 In addition, the discussion in the context of fraud may include specific consideration of how related parties may be involved in fraud. For example:

- Entities formed to accomplish specific purposes and that are controlled by management might be used to facilitate earnings management.
- Transactions between the entity and a known business partner of a key member of management could be arranged to facilitate misappropriation of the entity's assets.
- As indicated in paragraph .A2, the form of a related party transaction may mask its substance. For example, equity distributions or capital contributions may be structured as loans.
- Related party transactions may be subject to period-end window dressing. For example, a stockholder may pay a loan shortly before period-end, but the entity loans the same amount to the stockholder shortly after period-end.
- Certain entities, such as governmental entities or entities operating in regulated industries, may circumvent laws or regulations that limit or restrict their ability to engage in transactions with related parties.

²⁰ Entities formed to accomplish specific purposes are discussed in paragraphs .A26–.A27 of section 315.

The Identity of the Entity's Related Parties (Ref: par. .14a)

.A9 Information regarding the identity of the entity's related parties is likely to be readily available to management if the entity's information systems record, process, and summarize related party relationships and transactions to enable the entity to meet applicable disclosure requirements. Therefore, management may have a comprehensive list of related parties and changes from the prior period. For recurring engagements, making the inquiries specified by paragraph .14 provides a basis for comparing the information supplied by management with the auditor's record of related parties noted in previous audits.

.A10 However, if the entity does not have such information systems in place, management may not be aware of the existence of all related parties. Nevertheless, the requirement to make the inquiries specified by paragraph .14 still applies because management may be aware of parties that meet the related party definition set out in GAAP. In such a case, however, the auditor's inquiries regarding the identity of the entity's related parties are likely to form part of the auditor's risk assessment procedures and related activities performed in accordance with section 315 to obtain information regarding the following:²¹

- The entity's ownership and governance structures
- The types of investments that the entity is making and plans to make
- The way the entity is structured and how it is financed

In the particular case of common control relationships, because management is more likely to be aware of such relationships if they have economic significance to the entity, the auditor's inquiries are likely to be more effective if they are focused on whether parties with which the entity engages in significant transactions or shares resources to a significant degree are related parties.

.A11 In the context of a group audit, section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*, requires the group engagement team to provide each component auditor with a list of related parties prepared by group management and any other related parties of which the group engagement team is aware.²² When the entity is a component within a group, this information provides a useful basis for the auditor's inquiries of management regarding the identity of the entity's related parties.

.A12 The auditor also may obtain some information regarding the identity of the entity's related parties through inquiries of management during the engagement acceptance or continuance process.

.A13 Section 580, *Written Representations*, addresses requirements to obtain management representations, including representations that management and, when appropriate, those charged with governance have²³

- a. disclosed to the auditor the identity of the entity's related parties and all the related party relationships of which they are aware.
- b. appropriately accounted for and disclosed such relationships and transactions.

.A14 *Considerations specific to governmental entities.* Because of the variety of the types of relationships and transactions among governmental and

²¹ Paragraph .12 of section 315.

²² Paragraph .40c of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

²³ Paragraph .17 of section 580, *Written Representations*.

other entities, some of which are highly complex, identifying the nature of the related party relationship and its appropriate treatment in the financial statements relies heavily on a governmental entity's application of its financial reporting framework. Further, in some circumstances, the governmental entity may have no legal jurisdiction over the related party even when the application of the financial reporting framework concludes that the related party's financial statements are to be included in the governmental entity's financial statements. In such cases, the auditor's inquiries regarding the identity of the entity's related parties are likely to include the concepts and guidance from the applicable financial reporting framework to assist in making appropriate assessments about the existence and nature of related party relationships.

The Entity's Controls Over Related Party Relationships and Transactions (Ref: par. .15)

.A15 Others within the entity are those considered likely to have knowledge of the entity's related party relationships and transactions and the entity's controls over such relationships and transactions. These may include, to the extent that they do not form part of management, the following:

- Those charged with governance
- Personnel in a position to initiate, authorize, process, or record transactions that are both significant and outside the entity's normal course of business and those who supervise or monitor such personnel
- Internal auditors
- In-house legal counsel
- The chief ethics officer or equivalent person
- Chief compliance officer

.A16 The audit is conducted on the premise that management and, when appropriate, those charged with governance have acknowledged and understand that they have responsibility for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.²⁴ Accordingly, the preparation of the financial statements requires management, with oversight from those charged with governance, to design, implement, and maintain adequate controls over related party relationships and transactions so that these are identified and appropriately accounted for and disclosed. In their oversight role, those charged with governance monitor how management is discharging its responsibility for such controls. Those charged with governance may, in their oversight role, obtain information from management to enable them to understand the nature and business rationale of the entity's related party relationships and transactions.

.A17 In meeting the requirement of section 315 to obtain an understanding of internal control, the auditor may consider features or elements relevant to mitigating the risks of material misstatement associated with related party relationships and transactions, such as the following:²⁵

- Internal ethical codes, appropriately communicated to the entity's personnel and enforced, governing the circumstances in which the entity may enter into specific types of related party transactions

²⁴ Paragraphs .05 and .A2 of section 200.

²⁵ Paragraph .13 of section 315.

- Policies and procedures for open and timely disclosure of the interests that management and those charged with governance have in related party transactions
- The assignment of responsibilities within the entity for identifying, recording, summarizing, and disclosing related party transactions
- Timely disclosure and discussion between management and those charged with governance of significant related party transactions outside the entity's normal course of business, including whether those charged with governance have appropriately challenged the business rationale of such transactions (for example, by seeking advice from external professional advisors)
- Clear guidelines for the approval of related party transactions involving actual or perceived conflicts of interest, such as approval by a subcommittee of those charged with governance comprising individuals independent of management
- Periodic reviews by internal auditors, when applicable
- Proactive action taken by management to resolve related party disclosure issues, such as by seeking advice from the auditor or external legal counsel
- The existence of whistle-blowing policies and procedures, when applicable

.A18 Controls over related party relationships and transactions within some entities may be deficient or nonexistent for a number of reasons, such as the following:

- The low importance attached by management to identifying and disclosing related party relationships and transactions
- The lack of appropriate oversight by those charged with governance
- An intentional disregard for such controls because related party disclosures may reveal information that management considers sensitive (for example, the existence of transactions involving family members of management)
- An insufficient understanding by management of the applicable related party disclosure requirements

When such controls are ineffective or nonexistent, the auditor may be unable to obtain sufficient appropriate audit evidence about related party relationships and transactions. If this were the case, the auditor would, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, consider the implications for the audit, including the opinion in the auditor's report.

.A19 Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.²⁶ The risk of management override of controls is higher if management has relationships that involve control or significant influence with parties with which the entity does business because these relationships may present management with greater incentives and opportunities to perpetrate fraud. For example, management's financial interests in certain related parties may provide incentives for management to override controls by (a) directing the entity, against its

²⁶ Paragraph .31 of section 240.

interests, to conclude transactions for the benefit of these parties, or (b) colluding with such parties or controlling their actions. Examples of possible fraud include the following:

- Creating fictitious terms of transactions with related parties designed to misrepresent the business rationale of these transactions
- Fraudulently organizing the transfer of assets from or to management or others at amounts significantly above or below market value
- Engaging in complex transactions with related parties, such as entities formed to accomplish specific purposes, that are structured to misrepresent the financial position or financial performance of the entity

.A20 *Considerations specific to smaller entities.* Control activities in smaller entities are likely to be less formal, and smaller entities may have no documented processes for dealing with related party relationships and transactions. An owner-manager may mitigate some of the risks arising from related party transactions or potentially increase those risks through active involvement in all the main aspects of the transactions. For such entities, the auditor may obtain an understanding of the related party relationships and transactions, and any controls that may exist over these, through inquiry of management combined with other procedures, such as observation of management's oversight and review activities and inspection of available relevant documentation.

.A21 *Authorization and approval of significant transactions and arrangements (Ref: par. .15b).* Authorization involves the granting of permission by a party or parties with the appropriate authority (whether management, those charged with governance, or the entity's shareholders) for the entity to enter into specific transactions in accordance with predetermined criteria, whether or not judgmental. Approval involves those parties' acceptance of the transactions the entity has entered into as having satisfied the criteria on which authorization was granted. Examples of controls the entity may have established to authorize and approve significant transactions and arrangements with related parties or significant transactions and arrangements outside the normal course of business include the following:

- Monitoring controls to identify such transactions and arrangements for authorization and approval
- Approval of the terms and conditions of the transactions and arrangements by management, those charged with governance, or, when applicable, shareholders

Maintaining Alertness for Related Party Information When Reviewing Records or Documents

Records or Documents That the Auditor May Inspect (Ref: par. .16)

.A22 During the audit, the auditor may inspect records or documents that indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. Examples of those records or documents include the following:

- Third party confirmations obtained by the auditor (in addition to bank and legal confirmations)
- Entity income tax returns

- Information supplied by the entity to regulatory authorities
- Shareholder registers to identify the entity's principal shareholders
- Statements of conflicts of interest from management and those charged with governance
- Records of the entity's investments and those of its benefit plans
- Contracts and agreements with key management or those charged with governance
- Significant contracts and agreements not in the entity's ordinary course of business
- Specific invoices and correspondence from the entity's professional advisors
- Life insurance policies acquired by the entity
- Significant contracts renegotiated by the entity during the period
- Internal auditors' reports
- Capital financing arrangements with entities other than financial institutions (for example, construction of a governmental entity facility associated with the issuance of debt by a related not-for-profit entity)
- Economic development arrangements for capital additions (for example, a governmental entity's use and eventual ownership of properties and facilities financed and operated by a company or another governmental entity)

.A23 Additionally, the auditor may review the prior years' audit documentation for information about related party relationships and transactions. If applicable, the auditor may inquire of a predecessor auditor about the predecessor's knowledge of existing relationships and the extent of management involvement in material transactions.

.A24 *Arrangements that may indicate the existence of previously unidentified or undisclosed related party relationships or transactions.* An arrangement involves a formal or informal agreement between the entity and one or more other parties for such purposes as the following:

- The establishment of a business relationship through appropriate vehicles or structures
- The conduct of certain types of transactions under specific terms and conditions
- The provision of designated services or financial support

Examples of arrangements that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor include the following:

- Participation in unincorporated partnerships with other parties
- Agreements for the provision of services to certain parties under terms and conditions that are outside the entity's normal course of business
- Guarantees and guarantor relationships

Identification of Significant Transactions Outside the Normal Course of Business (Ref: par. .17)

.A25 Obtaining further information on significant transactions outside the entity's normal course of business enables the auditor to evaluate whether fraud risk factors, if any, are present and to identify the risks of material misstatement due to fraud.

.A26 Examples of transactions outside the entity's normal course of business may include the following:

- Complex equity transactions, such as corporate restructurings or acquisitions
- Transactions with offshore entities in jurisdictions with less rigorous corporate governance structures, laws, or regulations
- The leasing of premises or the rendering of management services by the entity to another party if no consideration is exchanged
- Sales transactions with unusually large discounts or returns
- Transactions with circular arrangements (for example, sales with a commitment to repurchase)
- Transactions under contracts whose terms are changed before expiration

.A27 *Understanding the nature of significant transactions outside the normal course of business (Ref: par. .17a).* Inquiring into the nature of the significant transactions outside the entity's normal course of business involves obtaining an understanding of the business rationale of the transactions and the terms and conditions under which these have been entered into.²⁷

.A28 *Inquiring into whether related parties could be involved (Ref: par. .17b).* A related party could be involved in a significant transaction outside the entity's normal course of business not only by directly influencing the transaction by being a party to the transaction but also by indirectly influencing it through an intermediary. Such influence may indicate the presence of a fraud risk factor.

Sharing Related Party Information With the Engagement Team (Ref: par. .18 and .23a)

.A29 Relevant related party information shared with the engagement team members may include the following:

- The nature of the related party relationships and transactions
- Significant or complex related party relationships or transactions that may require special audit consideration, particularly transactions in which management or those charged with governance are financially involved

The exchange of information is most useful if made at an early stage of the audit.

.A30 Section 600 addresses the communications that apply to group audits, particularly those that involve component auditors.

²⁷ Paragraph .32c of section 240.

Identification and Assessment of the Risks of Material Misstatement Associated With Related Party Relationships and Transactions

Fraud Risk Factors Associated With a Related Party With Dominant Influence (Ref: par. .20)

.A31 Related parties with the ability to exert control or significant influence may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risks of material misstatement due to fraud, as further explained in paragraphs .A32–.A33.

.A32 Domination of management by a single person or small group of persons without compensating controls is a fraud risk factor.²⁸ Indicators of dominant influence exerted by a related party include the following:

- The related party has vetoed significant business decisions taken by management or those charged with governance.
- Significant transactions are referred to the related party for final approval.
- Little or no debate occurs among management and those charged with governance regarding business proposals initiated by the related party.
- Transactions involving the related party (or a close family member of the related party) are rarely independently reviewed and approved.

Dominant influence also may exist, in some cases, if the related party has played a leading role in founding the entity and continues to play a leading role in managing the entity.

.A33 In the presence of other risk factors, the existence of a related party with dominant influence may indicate significant risks of material misstatement due to fraud. For example

- an unusually high turnover of senior management or professional advisors may suggest unethical or fraudulent business practices that serve the related party's purposes.
- the use of business intermediaries for significant transactions for which there appears to be no clear business justification may suggest that the related party could have an interest in such transactions through control of such intermediaries for fraudulent purposes.

Evidence of the related party's excessive participation in, or preoccupation with, the selection of accounting policies or the determination of significant estimates may suggest the possibility of fraudulent financial reporting.

Responses to the Risks of Material Misstatement Associated With Related Party Relationships and Transactions (Ref: par. .21)

.A34 The nature, timing, and extent of the further audit procedures that the auditor may select to respond to the assessed risks of material misstatement

²⁸ Paragraph .A75 of section 240.

associated with related party relationships and transactions depend upon the nature of those risks and the circumstances of the entity.

.A35 Examples of substantive audit procedures that the auditor may perform when the auditor has assessed a significant risk that management has not appropriately accounted for or disclosed specific related party transactions (whether due to fraud or error) include the following:

- Confirming the purposes, specific terms, or amounts of the transactions with the related parties (this audit procedure may be less effective when the auditor judges that the entity is likely to influence the related parties in their responses to the auditor).
- Inspecting evidence in possession of the other party or parties to the transaction.
- Confirming or discussing significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
- Referring to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
- With respect to material uncollected balances, guarantees, and other obligations, obtaining information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies.

.A36 If the auditor has assessed a significant risk of material misstatement due to fraud as a result of the presence of a related party with dominant influence, the auditor may, in addition to the general requirements of section 240, perform audit procedures such as the following to obtain an understanding of the business relationships that such a related party may have established directly or indirectly with the entity and to determine the need for further appropriate substantive audit procedures:

- Inquiries of, and discussion with, management and those charged with governance
- Inquiries of the related party
- Inspection of significant contracts with the related party
- Appropriate background research, such as through the Internet or specific external business information databases
- Review of employee whistle-blowing reports when these are retained

.A37 Depending upon the results of the auditor's risk assessment procedures, the auditor may consider it appropriate to obtain audit evidence without testing the entity's controls over related party relationships and transactions. In some circumstances, however, it may not be possible to obtain sufficient appropriate audit evidence from substantive audit procedures alone, regarding the risks of material misstatement associated with related party relationships and transactions. For example, when intragroup transactions between the entity and its components are numerous and a significant amount of information regarding these transactions is initiated, authorized, recorded, processed, or

reported electronically in an integrated system, the auditor may determine that it is not possible to design effective substantive audit procedures that by themselves would reduce the risks of material misstatement associated with these transactions to an acceptably low level. In such a case, in meeting the requirement of section 330 to obtain sufficient appropriate audit evidence about the operating effectiveness of relevant controls, the auditor is required to test the entity's controls over the completeness and accuracy of the recording of the related party relationships and transactions.²⁹

Identification of Previously Unidentified or Undisclosed Related Parties or Significant Related Party Transactions

Communicating Newly Identified Related Party Information to the Engagement Team (Ref: par. .23a)

.A38 Promptly communicating any newly identified related parties to the other members of the engagement team assists them in determining whether this information affects the results of, and conclusions drawn from, risk assessment procedures already performed, including whether the risks of material misstatement need to be reassessed.

Substantive Procedures Relating to Newly Identified Related Parties or Significant Related Party Transactions (Ref: par. .23d)

.A39 Examples of substantive audit procedures that the auditor may perform relating to newly identified related parties or significant related party transactions include the following:

- Making inquiries regarding the nature of the entity's relationships with the newly identified related parties, including inquiring of parties outside the entity who are presumed to have significant knowledge of the entity and its business, such as legal counsel, principal agents, major representatives, consultants, guarantors, or other close business partners.
- Conducting an analysis of accounting records for transactions with the newly identified related parties. Such an analysis may be facilitated using computer assisted audit techniques.
- Verifying the terms and conditions of the newly identified related party transactions and evaluating whether the transactions have been appropriately accounted for and disclosed.

Intentional Nondisclosure by Management (Ref: par. .23f)

.A40 The requirements and guidance in section 240 regarding the auditor's responsibilities relating to fraud in an audit of financial statements are relevant when management appears to have intentionally failed to disclose related parties or significant related party transactions to the auditor. The auditor also may consider whether it is necessary to reevaluate the reliability of management's responses to the auditor's inquiries and management's representations to the auditor.³⁰

²⁹ Paragraph .08b of section 330.

³⁰ Paragraphs .22–.24 and .26 of section 580.

Identified Significant Related Party Transactions Outside the Entity's Normal Course of Business

Evaluating the Business Rationale of Significant Related Party Transactions (Ref: par. .24a(i))

.A41 In evaluating the business rationale of a significant related party transaction outside the entity's normal course of business, the auditor may consider the following:

- Whether the transaction
 - is overly complex (for example, it may involve multiple related parties within a consolidated group)
 - has unusual terms of trade, such as unusual prices, interest rates, guarantees, and repayment terms
 - lacks an apparent logical business reason for its occurrence
 - involves previously unidentified related parties
 - is processed in an unusual manner
- Whether management has discussed the nature of, and accounting for, such a transaction with those charged with governance
- Whether management is placing more emphasis on a particular accounting treatment rather than giving due regard to the underlying economics of the transaction

If management's explanations are materially inconsistent with the terms of the related party transaction, the auditor is required to consider the reliability of management's explanations and representations on other significant matters.³¹

.A42 The auditor also may seek to understand the business rationale of such a transaction from the related party's perspective because this may help the auditor to better understand the economic reality of the transaction and why it was carried out. A business rationale from the related party's perspective that appears inconsistent with the nature of its business may represent a fraud risk factor.

Authorization and Approval of Significant Related Party Transactions (Ref: par. .24b)

.A43 Authorization and approval by management, those charged with governance, or, when applicable, the shareholders of significant related party transactions outside the entity's normal course of business may provide audit evidence that these have been duly considered at the appropriate levels within the entity, and that their terms and conditions have been appropriately reflected in the financial statements. The existence of transactions of this nature that were not subject to such authorization and approval, in the absence of rational explanations based on discussion with management or those charged with governance, may indicate risks of material misstatement due to fraud or error. In these circumstances, the auditor may need to be alert for other transactions of a similar nature. Authorization and approval alone, however, may not be sufficient in concluding whether risks of material misstatement due to fraud are absent because authorization and approval may be ineffective if there has been collusion between the related parties or if the entity is subject to the dominant influence of a related party.

³¹ Paragraph .10 of section 500, *Audit Evidence*.

.A44 *Considerations specific to smaller entities.* A smaller entity may not have the same controls provided by different levels of authority and approval that may exist in a larger entity. Accordingly, when auditing a smaller entity, the auditor may rely to a lesser degree on authorization and approval for audit evidence regarding the validity of significant related party transactions outside the entity's normal course of business. Instead, the auditor may consider performing other audit procedures, such as inspecting relevant documents, confirming specific aspects of the transactions with relevant parties, or observing the owner-manager's involvement with the transactions. The discussion of management domination in paragraph .A32 and the fraud considerations discussed in paragraph .A8 provide further relevant guidance.

Assertions That Related Party Transactions Were Conducted on Terms Equivalent to Those Prevailing in an Arm's Length Transaction (Ref: par. .25)

.A45 It will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related or, assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a transaction was consummated on terms equivalent to those that prevail in arm's length transactions.

.A46 Although audit evidence may be readily available regarding how the price of a related party transaction compares to that of a similar arm's length transaction, practical difficulties ordinarily limit the auditor's ability to obtain audit evidence that all other aspects of the transaction are equivalent to those of the arm's length transaction. For example, although the auditor may be able to confirm that a related party transaction has been conducted at a market price, it may be impracticable to confirm whether other terms and conditions of the transaction (such as credit terms, contingencies, and specific charges) are equivalent to those that would ordinarily be agreed between independent parties. Accordingly, there may be a risk that management's assertion that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction may be materially misstated.

.A47 The preparation and fair presentation of the financial statements requires management to substantiate an assertion included in financial statements that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, giving appropriate consideration to the difficulties described in paragraphs .A45–.A46. Management's support for the assertion may include the following:

- Comparing the terms of the related party transaction to those of an identical or similar transaction with one or more unrelated parties
- Engaging an external specialist to determine a market value and confirm market terms and conditions for the transaction
- Comparing the terms of the transaction to known market terms for broadly similar transactions on an open market

.A48 Evaluating management's support for this assertion may involve one or more of the following:

- Considering the appropriateness of management's process for supporting the assertion
- Verifying the source of the internal or external data supporting the assertion and testing the data to determine their accuracy, completeness, and relevance

.A49 If the auditor believes that management's assertion is unsubstantiated or the auditor cannot obtain sufficient appropriate audit evidence to support the assertion, the auditor, in accordance with section 705, considers the implications for the audit, including the opinion in the auditor's report.

Evaluation of the Accounting for, and Disclosure of, Identified Related Party Relationships and Transactions

Materiality Considerations in Evaluating Misstatements (Ref: par. .26)

.A50 Section 450, *Evaluation of Misstatements Identified During the Audit*, requires the auditor to consider both the size and nature of a misstatement and the particular circumstances of its occurrence when evaluating whether the misstatement is material.³² The significance of the transaction to the financial statement users may not depend solely on the recorded amount of the transaction but also on other specific relevant factors, such as the nature of the related party relationship.

Evaluation of Related Party Disclosures (Ref: par. .26a)

.A51 Evaluating the related party disclosures means considering whether the facts and circumstances of the entity's related party relationships and transactions have been appropriately summarized and presented so that the disclosures are understandable. Disclosures of related party transactions may not be understandable if

- a. the business rationale and the effects of the transactions on the financial statements are unclear or misstated.
- b. key terms, conditions, or other important elements of the transactions necessary for understanding them are not appropriately disclosed.

Communication With Those Charged With Governance (Ref: par. .27)

.A52 Communicating significant findings and issues arising during the audit in connection with the entity's related parties helps the auditor establish a common understanding with those charged with governance of the nature and resolution of these matters.³³ Examples of significant related party findings and issues include the following:

- Nondisclosure (whether or not intentional) by management to the auditor of related parties or significant related party transactions, which may alert those charged with governance to significant related party relationships and transactions of which they may not have been previously aware
- The identification of significant related party transactions that have not been appropriately authorized and approved, which may give rise to suspected fraud
- Disagreement with management regarding the accounting for, and disclosure of, significant related party transactions

³² Paragraph .11a of section 450, *Evaluation of Misstatements Identified During the Audit*.

³³ Paragraph .A10 of section 230 provides further guidance on the nature of significant findings or issues arising during the audit.

- Noncompliance with applicable laws or regulations prohibiting or restricting specific types of related party transactions
 - Difficulties in identifying the party that ultimately controls the entity
-

AU-C Section 560

Subsequent Events and Subsequently Discovered Facts

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to subsequent events and subsequently discovered facts in an audit of financial statements. It also addresses a predecessor auditor's responsibilities for subsequent events and subsequently discovered facts when reissuing the auditor's report on previously issued financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period. (Ref. par. .A1)

Subsequent Events and Subsequently Discovered Facts

.02 Financial statements may be affected by certain events that occur after the date of the financial statements. Many financial reporting frameworks specifically refer to such events. Such financial reporting frameworks ordinarily identify two types of events:

- a. Those that provide evidence of conditions that existed at the date of the financial statements
- b. Those that provide evidence of conditions that arose after the date of the financial statements

.03 Section 700, *Forming an Opinion and Reporting on Financial Statements*, explains that the date of the auditor's report informs the user of the auditor's report that the auditor has considered the effect of events and transactions of which the auditor becomes aware and that occurred up to that date.¹ Accordingly, this section addresses the auditor's responsibilities relating to subsequent events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements. It also addresses the auditor's responsibilities relating to subsequently discovered facts that become known to the auditor after the date of the auditor's report.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

¹ Paragraph .A38 of section 700, *Forming an Opinion and Reporting on Financial Statements*.

Objectives

.05 The objectives of the auditor are to

- a. obtain sufficient appropriate audit evidence about whether events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements are appropriately reflected in those financial statements in accordance with the applicable financial reporting framework and
- b. respond appropriately to facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

.06 The objective of a predecessor auditor who is requested to reissue a previously issued auditor's report on financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period is to perform specified procedures to determine whether the previously issued auditor's report is still appropriate before such report is reissued.

Definitions

.07 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Date of the auditor's report. The date that the auditor dates the report on the financial statements, in accordance with section 700.² (Ref: par. .A14)

Date of the financial statements. The date of the end of the latest period covered by the financial statements.

Subsequent events. Events occurring between the date of the financial statements and the date of the auditor's report.

Subsequently discovered facts. Facts that become known to the auditor after the date of the auditor's report that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

.08 Reference to *audited financial statements* in this section means *the financial statements, together with the auditor's report thereon*.

Requirements

Subsequent Events

.09 The auditor should perform audit procedures designed to obtain sufficient appropriate audit evidence that all subsequent events that require adjustment of, or disclosure in, the financial statements have been identified. The auditor is not, however, expected to perform additional audit procedures on matters to which previously applied audit procedures have provided satisfactory conclusions. (Ref: par. .A2–.A3)

.10 The auditor should perform the procedures required by paragraph .09 so that they cover the period from the date of the financial statements to the date of the auditor's report or as near as practicable thereto. The auditor should

² Paragraph .41 of section 700.

take into account the auditor's risk assessment in determining the nature and extent of such audit procedures, which should include the following: (Ref: par. .A4–.A5 and .A8–.A10)

- a. Obtaining an understanding of any procedures that management has established to ensure that subsequent events are identified
- b. Inquiring of management and, when appropriate, those charged with governance about whether any subsequent events have occurred that might affect the financial statements (Ref: par. .A6)
- c. Reading minutes, if any, of the meetings of the entity's owners, management, and those charged with governance that have been held after the date of the financial statements and inquiring about matters discussed at any such meetings for which minutes are not yet available (Ref: par. .A4 and .A7)
- d. Reading the entity's latest subsequent interim financial statements, if any

.11 If, as a result of the procedures performed as required by paragraphs .09–.10, the auditor identifies subsequent events that require adjustment of, or disclosure in, the financial statements, the auditor should determine whether each such event is appropriately reflected in the financial statements in accordance with the applicable financial reporting framework.

Subsequently Discovered Facts That Become Known to the Auditor Before the Report Release Date

.12 The auditor is not required to perform any audit procedures regarding the financial statements after the date of the auditor's report. However, if a subsequently discovered fact becomes known to the auditor before the report release date,³ the auditor should

- a. discuss the matter with management and, when appropriate, those charged with governance.
- b. determine whether the financial statements need revision and, if so, inquire how management intends to address the matter in the financial statements.

.13 If management revises the financial statements, the auditor should perform the audit procedures necessary in the circumstances on the revision. The auditor also should either (Ref: par. .A11–.A16)

- a. date the auditor's report as of a later date; extend the audit procedures referred to in paragraphs .09–.10 to the new date of the auditor's report on the revised financial statements; and request written representations from management as of the new date of the auditor's report, in accordance with the requirements of section 580, *Written Representations*, or
- b. include an additional date in the auditor's report on the revised financial statements that is limited to the revision (that is, dual-date the auditor's report for that revision), thereby indicating that the auditor's procedures subsequent to the original date of the auditor's report are limited solely to the revision of the financial statements described in the relevant note to the financial statements. In this circumstance, the auditor should request written

³ The term *report release date* is defined in paragraph .06 of section 230, *Audit Documentation*.

representations from management as of the additional date in the auditor's report about whether

- i. any information has come to management's attention that would cause management to believe that any of the previous representations should be modified.
- ii. any other events have occurred subsequent to the date of the financial statements that would require adjustment to, or disclosure in, those financial statements.

.14 If management does not revise the financial statements in circumstances when the auditor believes they need to be revised, the auditor should modify the opinion (express a qualified opinion or an adverse opinion), as required by section 705, *Modifications to the Opinion in the Independent Auditor's Report*. (Ref: par. .A17)

Subsequently Discovered Facts That Become Known to the Auditor After the Report Release Date

.15 If a subsequently discovered fact becomes known to the auditor after the report release date, the auditor should (Ref: par. .A18–.A20)

- a. discuss the matter with management and, when appropriate, those charged with governance.
- b. determine whether the financial statements need revision and, if so, inquire how management intends to address the matter in the financial statements.

.16 If management revises the financial statements, the auditor should

- a. apply the requirements of paragraph .13.
- b. if the audited financial statements (before revision) have been made available to third parties, assess whether the steps taken by management are timely and appropriate to ensure that anyone in receipt of those financial statements is informed of the situation, including that the audited financial statements are not to be relied upon. If management does not take the necessary steps, the auditor should apply the requirements of paragraph .18. (Ref: par. .A21–.A22)
- c. if the auditor's opinion on the revised financial statements differs from the opinion the auditor previously expressed, disclose the following matters in an emphasis-of-matter or other-matter paragraph, in accordance with section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*:
 - i. The date of the auditor's previous report
 - ii. The type of opinion previously expressed
 - iii. The substantive reasons for the different opinion
 - iv. That the auditor's opinion on the revised financial statements is different from the auditor's previous opinion

.17 If management does not revise the financial statements in circumstances when the auditor believes they need to be revised, then

- a. if the audited financial statements have not been made available to third parties, the auditor should notify management and those

charged with governance—unless all of those charged with governance are involved in managing the entity⁴—not to make the audited financial statements available to third parties before the necessary revisions have been made and a new auditor's report on the revised financial statements has been provided. If the audited financial statements are, nevertheless, subsequently made available to third parties without the necessary revisions, the auditor should apply the requirements of paragraph .17*b*.

- b.* if the audited financial statements have been made available to third parties, the auditor should assess whether the steps taken by management are timely and appropriate to ensure that anyone in receipt of the audited financial statements is informed of the situation, including that the audited financial statements are not to be relied upon. If management does not take the necessary steps, the auditor should apply the requirements of paragraph .18. (Ref: par. .A21–.A22)

.18 If management does not take the necessary steps to ensure that anyone in receipt of the audited financial statements is informed of the situation, as provided by paragraphs .16*b* or .17*b*, the auditor should notify management and those charged with governance—unless all of those charged with governance are involved in managing the entity⁵—that the auditor will seek to prevent future reliance on the auditor's report. If, despite such notification, management or those charged with governance do not take the necessary steps, the auditor should take appropriate action to seek to prevent reliance on the auditor's report. (Ref: par. .A23–.A26)

Predecessor Auditor's Reissuance of the Auditor's Report in Comparative Financial Statements (Ref: par. .A27–.A28)

Predecessor Auditor's Report Reissued (Ref: par. .A29–.A30)

.19 Before reissuing a previously issued auditor's report on financial statements that are to be presented on a comparative basis with audited financial statements of a subsequent period, the predecessor auditor should perform the following procedures to determine whether the previously issued auditor's report is still appropriate:

- a.* Read the financial statements of the subsequent period to be presented on a comparative basis
- b.* Compare the prior period financial statements that the predecessor auditor reported on with the financial statements of the subsequent period to be presented on a comparative basis
- c.* Inquire of, and request written representations from, management of the former client, at or near the date of reissuance, about whether
 - i.* any information has come to management's attention that would cause management to believe that any of the previous representations should be modified

⁴ Paragraph .14 of section 260, *The Auditor's Communication With Those Charged With Governance*.

⁵ Paragraph .14 of section 260.

- ii. any events have occurred subsequent to the date of the latest prior period financial statements reported on by the predecessor auditor that would require adjustment to, or disclosure in, those financial statements
- d. Obtain a representation letter from the successor auditor stating whether the successor auditor's audit revealed any matters that, in the successor auditor's opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor

.20 If, in performing the procedures in paragraph .19, a subsequently discovered fact becomes known to the predecessor auditor, then

- a. the predecessor auditor should apply the requirements of paragraph .15.
- b. if management revises the financial statements and the predecessor auditor plans to issue a new auditor's report on the revised financial statements, the predecessor auditor should apply the requirements of paragraph .16.
- c. if management revises the financial statements and the predecessor auditor does not plan to issue a new auditor's report on the revised financial statements, or if management does not revise the financial statements in circumstances when the predecessor auditor believes they need to be revised, the predecessor auditor should assess the steps taken by management, as required by paragraph .17b.

Application and Other Explanatory Material

Scope of This Section (Ref: par. .01)

.A1 When audited financial statements are included in other documents subsequent to their issuance, the auditor may have additional responsibilities to consider, such as legal or regulatory requirements involving private placement offerings, exempt public offerings (including offerings pursuant to Securities and Exchange Commission [SEC] Rule 144A), or other offerings of securities to the public in jurisdictions outside the United States. Section 720, *Other Information in Documents Containing Audited Financial Statements*, may be applied, adapted as necessary in the circumstances, to such other documents. Section 925, *Filings With the U.S. Securities and Exchange Commission Under the Securities Act of 1933*, addresses the auditor's responsibilities in connection with financial statements of a nonissuer included in a registration statement filed with the SEC under the Securities Act of 1933, as amended.

Subsequent Events (Ref: par. .09–.11)

.A2 The period between the date of the financial statements and the date of the auditor's report may vary from a relatively short period to one or more months. Some phases of the audit will be performed during this period, whereas other phases will be substantially completed on or before the date of the financial statements. As an audit approaches completion, the auditor is not expected to perform additional audit procedures on matters to which previously applied audit procedures have provided satisfactory conclusions. New information, however, may be inconsistent with the audit evidence obtained, in which case the auditor is required to determine what modifications or additions to

audit procedures are necessary to resolve the matter and consider the effect of the matter, if any, on other aspects of the audit.⁶

.A3 Depending on the auditor's risk assessment, the audit procedures required by paragraphs .09–.10 may include procedures necessary to obtain sufficient appropriate audit evidence involving the review or testing of accounting records or transactions occurring between the date of the financial statements and the date of the auditor's report. The audit procedures required by paragraphs .09–.10 are in addition to procedures that the auditor may perform for other purposes that, nevertheless, may provide evidence about subsequent events (for example, to obtain audit evidence for account balances as of the date of the financial statements, such as cut-off procedures or procedures regarding subsequent receipts of accounts receivable).

.A4 Paragraph .10 stipulates certain audit procedures that the auditor is required to perform pursuant to paragraph .09. However, the subsequent events procedures that the auditor performs may depend on the information that is available and, in particular, the manner in which the accounting records have been maintained and the extent to which information has been prepared since the date of the financial statements. When interim financial statements (whether for internal or external purposes) or minutes of meetings of management or those charged with governance have not been prepared, relevant audit procedures may take the form of inspection of available books and records.

.A5 In addition to the audit procedures required by paragraphs .09–.10, the auditor may consider it necessary and appropriate to read the entity's latest available budgets, cash flow forecasts, and other related management reports for periods after the date of the financial statements. Paragraphs .A6–.A10 provide guidance on additional matters that the auditor may consider in the course of performing subsequent events procedures.

Inquiry (Ref: par. .10b)

.A6 In inquiring of management and, when appropriate, those charged with governance about whether any subsequent events have occurred that might affect the financial statements, the auditor may inquire about the current status of items that were accounted for on the basis of preliminary or inconclusive data and may make specific inquiries about the following matters:

- Whether new commitments, borrowings, or guarantees have been entered into
- Whether sales or acquisitions of assets have occurred or are planned
- Whether there have been increases in capital or issuance of debt instruments, such as the issue of new shares or debentures, or an agreement to merge or liquidate has been made or is planned
- Whether any assets have been appropriated by the government or destroyed (for example, by fire or flood)
- Whether there have been any developments regarding contingencies
- Whether any unusual accounting adjustments have been made or are contemplated

⁶ Paragraph .10 of section 500, *Audit Evidence*.

- Whether any events have occurred or are likely to occur that will bring into question the appropriateness of accounting policies used in the financial statements, as would be the case, for example, if such events call into question the validity of the going concern assumption
- Whether any events have occurred that are relevant to the measurement of estimates or provisions made in the financial statements
- Whether any events have occurred that are relevant to the recoverability of assets

Reading Minutes (Ref: par. .10c)

Considerations Specific to Governmental Entities

.A7 In audits of governmental entities, the auditor may, in performing the requirement in paragraph .10c, read the official records of relevant proceedings of the legislative or governing body, or other relevant regulatory or oversight body, and inquire about matters addressed in proceedings for which official records are not yet available.

Inquiries of Legal Counsel

.A8 Section 501, *Audit Evidence—Specific Considerations for Selected Items*, addresses the auditor's responsibility to seek direct communication with the entity's legal counsel concerning litigation, claims, and assessments through the date of the auditor's report.

Written Representations

.A9 Section 580 requires the auditor to request that management and, when appropriate, those charged with governance provide written representations as of the date of the auditor's report that all events occurring subsequent to the date of the financial statements, and for which the applicable financial reporting framework requires adjustment or disclosure, have been adjusted or disclosed.⁷ The auditor may consider whether written representations covering particular subsequent events or significant matters disclosed to the auditor in the performance of the audit procedures required by paragraphs .09–.10 may be necessary to support other audit evidence to obtain sufficient appropriate audit evidence.

.A10 The applicable financial reporting framework may require management to evaluate subsequent events through the date the financial statements are issued or available to be issued and to disclose the date through which subsequent events were evaluated in the financial statements. In most cases, this will result in the date that management discloses as the date through which management has evaluated subsequent events being the same date as the auditor's report. This is because section 700 requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements, including evidence that the audit documentation has been reviewed; that all the statements that comprise the financial statements, including related notes, have been prepared; and that management has asserted

⁷ Paragraph .18 of section 580, *Written Representations*.

that they have taken responsibility for those financial statements.⁸ Also, the auditor is concerned with subsequent events that require adjustment of, or disclosure in, the financial statements through the date of the auditor's report or as near as practicable thereto. Therefore, management's representations concerning events occurring subsequent to the date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure are required to be made as of the date of the auditor's report on the financial statements.⁹ To align the date disclosed by management in the financial statements, the representation letter date, and the auditor's report date, the auditor may discuss the dating requirements with management and may also include, in the terms of the audit engagement,¹⁰ that management will not date the subsequent event disclosure earlier than the date of the representation letter (also the date of the auditor's report).

Subsequently Discovered Facts That Become Known to the Auditor Before the Report Release Date (Ref: par. .12–.14)

Dating the Auditor's Report on the Revised Financial Statements (Ref: par. .13)

.A11 The auditor has two methods available for dating the auditor's report when the financial statements are revised after the original date of the auditor's report. The auditor may include an additional date limited to the revision (that is, dual-date the auditor's report for that revision) or date the auditor's report as of a later date. In the former instance, the auditor's responsibility for events occurring subsequent to the original date of the auditor's report is limited to the specific event described in the relevant note to the financial statements. In the latter instance, the auditor's responsibility for subsequent events extends to the new date of the auditor's report on the revised financial statements.

.A12 Generally, when the revision of the financial statements is specifically limited to the effects of the specific event described in the relevant note to the financial statements, the auditor may decide to limit the audit procedures to that revision, as provided by paragraph .13*b*. Even when the financial statements are revised and disclosure of the revision is made, the auditor is not precluded from extending the audit procedures referred to in paragraphs .09–.10 to the new date of the auditor's report on the revised financial statements, as provided by paragraph .13*a*.

.A13 When, in the circumstances described in paragraph .13*b*, the auditor includes an additional date limited to the revision (a dual date), the original date of the auditor's report on the financial statements prior to their subsequent revision by management remains unchanged because this date informs the reader about when the auditor obtained sufficient appropriate audit evidence with respect to those financial statements prior to their subsequent revision. However, an additional date is included in the auditor's report to inform users that the auditor's procedures subsequent to the original date of the auditor's report were limited to the subsequent revision of the financial statements. The following is an illustration of such wording:

(Date of auditor's report), except as to note Y, which is as of (date of completion of audit procedures limited to revision described in note Y).

⁸ Paragraph .41 of section 700.

⁹ Paragraph .20 of section 580.

¹⁰ Paragraph .A23 of section 210, *Terms of Engagement*.

.A14 As discussed in paragraph .A10, section 700 requires the auditor's report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements.¹¹ When management revises the financial statements and the auditor reports on the revised financial statements, the new date (or the dual date) included in the auditor's report cannot be earlier than the date on which the auditor carried out the audit procedures necessary in the circumstances on the revision, including that the documentation has been reviewed and management has prepared and asserted that they have taken responsibility for the revised financial statements.

Updated Written Representations

.A15 Section 580 requires the date of the written representations to be as of the date of the auditor's report on the financial statements.¹² If management revises the financial statements and, in accordance with paragraph .13a, the auditor dates the auditor's report on the revised financial statements as of a later date, written representations from management are required as of the later date to comply with section 580. The auditor may request management to provide a new representation letter or may agree with management on a form of written representations that update the written representations previously provided by addressing whether there are any changes to such written representations and, if so, what they are. An updated written representation letter may be in the form of the representations required by paragraph .13b when the auditor dual-dates the auditor's report for the revision.

Unaudited Events

.A16 To prevent the financial statements from being misleading, management may revise the financial statements by disclosing an event that arose after the original date of the auditor's report. When such event is included in a separate financial statement note that is labeled as unaudited (for example, when the event is captioned "Event (Unaudited) Subsequent to the Date of the Independent Auditor's Report"), the auditor is not required to perform any procedures on the revision, and the auditor's report carries the original date of the auditor's report.

Considerations Specific to Governmental Entities (Ref: par. .14)

.A17 In audits of governmental entities in which management does not revise the financial statements, the actions taken in accordance with paragraph .14 may also include reporting separately to the legislative or governing body, or other relevant regulatory or oversight body, on the implications of the subsequent event for the financial statements and the auditor's report and, if applicable, for the entity's internal control over financial reporting and compliance with law or regulation.

Subsequently Discovered Facts That Become Known to the Auditor After the Report Release Date (Ref: par. .15–.18)

Auditor's Responsibility After the Report Release Date (Ref: par. .15)

.A18 New information may come to the auditor's attention that, had such information been known to the auditor at the date of the auditor's report, may have caused the auditor to revise the auditor's report. When such information

¹¹ Paragraph .41 of section 700.

¹² Paragraph .20 of section 580.

becomes known to the auditor after the report release date, the requirements in paragraphs .15–.18 apply, even if the auditor has withdrawn or been discharged.

.A19 Because of the variety of conditions that might be encountered, the specific procedures or actions to be taken in a particular case may vary somewhat in light of the circumstances. For example, in determining whether the financial statements need revision, as required by paragraph .15*b*, the auditor may consider, in addition to the requirements of the applicable financial reporting framework, whether the auditor believes there are persons currently relying or likely to rely on the financial statements who would attach importance to the subsequently discovered facts. Consideration may be given, among other things, to the issuance of audited financial statements for a subsequent period, the time elapsed since the financial statements were issued and the auditor's report released, and any legal implications.

.A20 Section 708, *Consistency of Financial Statements*, addresses the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements, and the effect of that evaluation on the auditor's report.

Revision of Financial Statements by Management (Ref: par. .16b and .17b)

.A21 The steps taken by management to ensure that anyone in receipt of the audited financial statements is informed of the situation, including that the audited financial statements are not to be relied upon, depend on the circumstances. Management's steps may include the following:

- Notification to anyone who is known to be relying or who is likely to rely on the financial statements and the auditor's report that they are not to be relied upon and that revised financial statements, together with a new auditor's report, will be issued. This may be necessary when the issuance of revised financial statements and a new auditor's report is not imminent.
- Issuing, as soon as practicable, revised financial statements with appropriate disclosure of the matter.
- Issuing the subsequent period's financial statements with appropriate disclosure of the matter. This may be appropriate when issuance of the subsequent period's audited financial statements is imminent.

Considerations Specific to Governmental Entities

.A22 For audits performed under *Government Auditing Standards*, additional requirements exist, such as those pertaining to the evaluation of the timeliness and appropriateness of management's disclosure and actions to determine and correct misstatements in previously issued financial statements, reporting on the revised financial statements, and reporting directly to appropriate officials when management does not take the necessary steps.

Auditor Action to Seek to Prevent Reliance on the Auditor's Report (Ref: par. .18)

.A23 If management made the audited financial statements available to third parties despite the auditor's notification not to do so, or if the auditor believes that management or those charged with governance have failed to take the necessary steps to prevent reliance on the auditor's report on the previously issued audited financial statements despite the auditor's prior notification that the auditor will take action to seek to prevent such reliance, the auditor's course

of action depends upon the auditor's legal rights and obligations. Consequently, the auditor may consider it appropriate to seek legal advice.

.A24 The actions that the auditor may take to seek to prevent reliance on the auditor's report may depend upon the degree of certainty of the auditor's knowledge that persons or entities exist who are currently relying or who will rely on the audited financial statements, and who would attach importance to the information, and the auditor's ability as a practical matter to communicate with them. In addition to seeking legal advice, the auditor may consider taking the following steps to the extent applicable:

- Notify management and those charged with governance that the auditor's report is not to be relied upon.
- Notify regulatory agencies having jurisdiction over the entity that the auditor's report is not to be relied upon, including a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.
- Notify anyone known to the auditor to be relying on the financial statements that the auditor's report is not to be relied upon. In some instances, it will not be practicable for the auditor to give appropriate individual notification to stockholders or investors at large whose identities are unknown to the auditor; notification to a regulatory agency having jurisdiction over the entity will usually be the only practical means for the auditor to provide appropriate disclosure, together with a request that the agency take whatever steps it may deem appropriate to accomplish the necessary disclosure.

.A25 Depending on the circumstances, if the auditor is able to determine that the financial statements need revision, the auditor's notification to anyone in receipt of the audited financial statements may, if permitted by law, regulation, and relevant ethical requirements,

- include a description of the nature of the matter and of its effect on the financial statements, avoiding comments concerning the conduct or motives of any person.
- describe the effect that the matter would have had on the auditor's report if it had been known to the auditor at the date of the report and had not been reflected in the financial statements.

.A26 If the auditor was not able to determine whether the financial statements need revision, the notification to anyone in receipt of the audited financial statements may indicate that information became known to the auditor and that, if the information is true, the auditor believes that the auditor's report is not to be relied upon. The specific matter need not be detailed in the notification.

Predecessor Auditor's Reissuance of the Auditor's Report in Comparative Financial Statements (Ref: par. .19–.20)

.A27 An auditor may be requested by management or those charged with governance to furnish additional copies of the auditor's report after the report release date. Providing additional copies of the auditor's report is not a report reissuance. In such cases, the auditor has no responsibility to make further investigation or inquiry about events that may have occurred during the period between the date of the auditor's report and the date of the release of the additional copies.

.A28 Additional responsibilities relating to the reissuance of a previously issued auditor's report in connection with financial statements of a nonissuer included in a registration statement filed with the SEC under the Securities Act of 1933, as discussed in paragraph .A1, are addressed in section 925.

Predecessor Auditor's Report Reissued

.A29 A predecessor auditor may be requested to reissue the auditor's report by a former client when prior period financial statements audited by the predecessor auditor are to be presented on a comparative basis with audited financial statements of a subsequent period. A predecessor auditor's knowledge of the current affairs of the former client is limited in the absence of a continuing relationship. Accordingly, a predecessor auditor may be in a position to reissue the report if the predecessor auditor is able to make satisfactory arrangements with the former client to perform this service and if the predecessor auditor complies with paragraph .19 to determine whether the previous auditor's report is still appropriate. A predecessor auditor is not required to reissue the auditor's report. Either the current form or manner of presentation of the financial statements of the prior period or one or more events might make a predecessor auditor's previous report inappropriate.

.A30 Section 700 addresses the auditor's responsibilities when the auditor is engaged to audit and report on a revision to prior period financial statements audited by the predecessor auditor.¹³ It also addresses the auditor's responsibilities when the predecessor auditor's report will not be presented.¹⁴

¹³ Paragraph .A52 of section 700.

¹⁴ Paragraph .54 of section 700.

AU-C Section 570

The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern

Source: SAS No. 126.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities in an audit of financial statements with respect to evaluating whether there is substantial doubt about the entity's ability to continue as a going concern. This section applies to all audits of financial statements, regardless of whether the financial statements are prepared in accordance with a general purpose or a special purpose framework.¹ This section does not apply to an audit of financial statements based on the assumption of liquidation (for example, when [a] an entity is in the process of liquidation, [b] the owners have decided to commence dissolution or liquidation, or [c] legal proceedings, including bankruptcy, have reached a point at which dissolution or liquidation is probable).²

.02 Continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary. Ordinarily, information that significantly contradicts the going concern assumption relates to the entity's inability to continue to meet its obligations as they become due without substantial disposition of assets outside the ordinary course of business, restructuring of debt, externally forced revisions of its operations, or similar actions.

The Auditor's Responsibility

.03 The auditor's responsibility is to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The auditor's evaluation is based on the auditor's knowledge of relevant conditions or events that exist at, or have occurred prior to, the date of the auditor's report. Information about such conditions or events is obtained from the application of audit procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited, as described in section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

¹ *General purpose* and *special purpose frameworks* are defined in section 700, *Forming an Opinion and Reporting on Financial Statements*, and section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, respectively.

² See Interpretation No. 1, "Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting," of section 700, (sec. 9700 par. .01–.05).

.04 As described in section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the potential effects of inherent limitations on the auditor's ability to detect material misstatements are particularly significant for future conditions or events that may cause an entity to cease to continue as a going concern. The auditor cannot predict such future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to the auditor having substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of any reference to substantial doubt in an auditor's report cannot be viewed as a guarantee as to the entity's ability to continue as a going concern.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.06 The objectives of the auditor are to

- a. evaluate and conclude, based on the audit evidence obtained, whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time;
- b. assess the possible financial statement effects, including the adequacy of disclosure regarding uncertainties about the entity's ability to continue as a going concern for a reasonable period of time; and
- c. determine the implications for the auditor's report.

Definition

.07 For purposes of this section, the following term has the meaning attributed as follows:

Reasonable period of time. A period of time not to exceed one year beyond the date of the financial statements being audited.

Requirements

Evaluating Whether Substantial Doubt Exists

.08 The auditor should evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time based on the results of the audit procedures performed pursuant to paragraphs .09–.11 and .14.

Identifying Conditions or Events That Indicate Substantial Doubt Could Exist (Ref: par. .A1–.A2)

.09 The auditor should consider whether the results of the procedures performed during the course of the audit identify conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

The auditor should consider the need to obtain additional information about such conditions or events, as well as the appropriate audit evidence to support information that mitigates the auditor's doubt.

Consideration of Management's Plans When the Auditor Believes There Is Substantial Doubt

.10 If, after considering the identified conditions or events in the aggregate, the auditor believes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should obtain information about management's plans that are intended to mitigate the adverse effects of such conditions or events. The auditor should

- a. assess whether it is likely that the adverse effects would be mitigated by management's plans for a reasonable period of time;
- b. identify those elements of management's plans that are particularly significant to overcoming the adverse effects of the conditions or events and plan and perform procedures to obtain audit evidence about them, including, when applicable, considering the adequacy of support regarding the ability to obtain additional financing or the planned disposal of assets; and
- c. assess whether it is likely that such plans can be effectively implemented. (Ref: par. .A3)

.11 When prospective financial information is particularly significant to management's plans, the auditor should request management to provide that information and should consider the adequacy of support for significant assumptions underlying that information. The auditor should give particular attention to assumptions that are

- material to the prospective financial information.
- especially sensitive or susceptible to change.
- inconsistent with historical trends.

The auditor's consideration should be based on knowledge of the entity, its business, and its management and should include (a) reading the prospective financial information and the underlying assumptions and (b) comparing prospective financial information from prior periods with actual results and comparing prospective information for the current period with results achieved to date. If the auditor becomes aware of factors, the effects of which are not reflected in such prospective financial information, the auditor should discuss those factors with management and, if necessary, request revision of the prospective financial information.

Consideration of Financial Statement Effects (Ref: par. .A4)

.12 When, after considering management's plans, the auditor concludes there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should consider the possible effects on the financial statements and the adequacy of the related disclosure.

.13 When the auditor concludes, primarily because of the auditor's consideration of management's plans, that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time has been alleviated, the auditor should consider the need for, and evaluate the adequacy of, disclosure of the principal conditions or events that initially caused the auditor

to believe there was substantial doubt. The auditor's consideration of disclosure should include the possible effects of such conditions or events, and any mitigating factors, including management's plans.

Written Representations (Ref: par. .A5)

.14 If the auditor believes, before consideration of management's plans pursuant to paragraph .10, there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, the auditor should obtain written representations from management

- a. regarding its plans that are intended to mitigate the adverse effects of conditions or events that indicate there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time and the likelihood that those plans can be effectively implemented, and
- b. that the financial statements disclose all the matters of which management is aware that are relevant to the entity's ability to continue as a going concern, including principal conditions or events and management's plans.

Consideration of the Effects on the Auditor's Report (Ref: par. .A6–.A8)

.15 If, after considering identified conditions or events and management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should include an emphasis-of-matter paragraph³ in the auditor's report to reflect that conclusion.

.16 The auditor's conclusion about the entity's ability to continue as a going concern should be expressed through the use of the phrase "substantial doubt about its (the entity's) ability to continue as a going concern" or similar wording that includes the terms *substantial doubt* and *going concern*. In a going-concern emphasis-of-matter paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity's ability to continue as a going concern.

.17 If the auditor concludes that the entity's disclosures with respect to the entity's ability to continue as a going concern for a reasonable period of time are inadequate, the auditor should modify the opinion in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

.18 Nothing in this section precludes an auditor from disclaiming an opinion in cases involving uncertainties. When the auditor disclaims an opinion, the report should not include the going-concern emphasis-of-matter paragraph described in paragraph .15 of this section but, rather, describe the substantive reasons for the auditor's disclaimer of opinion in the auditor's report as required by section 705.⁴ The auditor should consider the adequacy of disclosure of the uncertainties and their possible effects on the financial statements as described in paragraph .12 of this section even when disclaiming an opinion.

³ Paragraphs .06–.07 of section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report*, address requirements concerning emphasis-of-matter paragraphs.

⁴ Paragraph .17 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Communication With Those Charged With Governance

.19 If, after considering identified conditions or events in the aggregate and after considering management's plans, the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains, the auditor should communicate the following to those charged with governance:

- a. The nature of the conditions or events identified
- b. The possible effect on the financial statements and the adequacy of related disclosures in the financial statements
- c. The effects on the auditor's report

Comparative Presentations

.20 If substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time existed at the date of prior period financial statements that are presented on a comparative basis, and that doubt has been removed in the current period, the going-concern emphasis-of-matter paragraph included in the auditor's report on the financial statements of the prior period should not be repeated. (Ref: par. .A9)

Eliminating a Going-Concern Emphasis-of-Matter Paragraph From a Reissued Report (Ref: par. .A10–.A11)

.21 The auditor may be requested to reissue an auditor's report and eliminate a going-concern emphasis-of-matter paragraph contained therein. Although an auditor has no obligation to reissue the report, if the auditor decides to reissue the report, the auditor should reassess the going-concern status of the entity by

- a. performing audit procedures related to the event or transaction that prompted the request to reissue the report without the going-concern emphasis-of-matter paragraph.
- b. performing the procedures listed in section 560, *Subsequent Events and Subsequently Discovered Facts*, at or near the date of reissuance.⁵
- c. considering the matters described in paragraphs .09–.11 and .14 of this section based on the conditions or circumstances at the date of reissuance.
- d. considering the implications for the auditor's report in accordance with section 560.⁶

Documentation

.22 If the auditor believes, before consideration of management's plans pursuant to paragraph .10, there is substantial doubt about the ability of the entity to continue as a going concern for a reasonable period of time, the auditor should document the following:

- a. The conditions or events that led the auditor to believe that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.

⁵ Paragraphs .09–.10 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

⁶ Paragraph .13 of section 560.

- b. The elements of management's plans that the auditor considered to be particularly significant to overcoming the adverse effects of the conditions or events.
- c. The audit procedures performed to evaluate the significant elements of management's plans and evidence obtained.
- d. The auditor's conclusion as to whether substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains or is alleviated. If substantial doubt remains, the auditor also should document the possible effects of the conditions or events on the financial statements and the adequacy of the related disclosures. If substantial doubt is alleviated, the auditor also should document the auditor's conclusion as to the need for, and, if applicable, the adequacy of, disclosure of the principal conditions or events that initially caused the auditor to believe there was substantial doubt.
- e. The auditor's conclusion with respect to the effects on the auditor's report.

Application and Other Explanatory Material

Evaluating Whether Substantial Doubt Exists

Identifying Conditions or Events That Indicate Substantial Doubt Could Exist (Ref: par. .09)

.A1 It is not necessary to design audit procedures solely to identify conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The results of audit procedures designed and performed to identify and assess risk in accordance with section 315, gather audit evidence in response to assessed risks in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*, and complete the audit are expected to be sufficient for that purpose. The following are examples of procedures that may identify such conditions or events:

- Analytical procedures
- Review of subsequent events
- Review of compliance with the terms of debt and loan agreements
- Reading of minutes of meetings of stockholders, board of directors, and important committees of the board
- Inquiry of an entity's legal counsel about litigation, claims, and assessments
- Confirmation with related and third parties of the details of arrangements to provide or maintain financial support

.A2 In performing audit procedures such as those described in paragraph **.A1**, the auditor may identify information about certain conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. The significance of such conditions or events will depend on

the circumstances, and some conditions or events may have significance only when viewed in conjunction with others. The following are examples of such conditions or events:

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize an entity's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood

Consideration of Management's Plans When the Auditor Believes There Is Substantial Doubt (Ref: par. .10)

.A3 The auditor's considerations relating to management's plans may include the following:

- Plans to dispose of assets
 - Restrictions on disposal of assets, such as covenants limiting such transactions in loan or similar agreements or encumbrances against assets
 - Apparent marketability of assets that management plans to sell
 - Possible direct or indirect effects of disposal of assets
- Plans to borrow money or restructure debt
 - Availability of debt financing, including existing or committed credit arrangements, such as lines of credit or arrangements for factoring receivables or sale-leaseback of assets
 - Existing or committed arrangements to restructure or subordinate debt or to guarantee loans to the entity
 - Possible effects on management's borrowing plans of existing restrictions on additional borrowing or the sufficiency of available collateral
- Plans to reduce or delay expenditures
 - Apparent feasibility of plans to reduce overhead or administrative expenditures, to postpone maintenance or research and development projects, or to lease rather than purchase assets

- Possible direct or indirect effects of reduced or delayed expenditures
- Plans to increase ownership equity
 - Apparent feasibility of plans to increase ownership equity, including existing or committed arrangements to raise additional capital
 - Existing or committed arrangements to reduce current dividend requirements or to accelerate cash distributions from affiliates or other investors

Consideration of Financial Statement Effects (Ref: par. .12–.13)

.A4 In considering the adequacy of disclosure, some of the information that might be disclosed includes the following:

- Principal conditions or events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time
- The possible effects of such conditions or events
- Management's evaluation of the significance of those conditions or events and any mitigating factors
- Possible discontinuance of operations
- Management's plans (including relevant prospective financial information)
- Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities

Written Representations (Ref: par. .14)

.A5 If the auditor determines that it is necessary to obtain one or more representations with respect to identified conditions or events that indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time pursuant to paragraph .09, section 580, *Written Representations*, applies.⁷

Consideration of the Effects on the Auditor's Report (Ref: par. .15–.18)

.A6 The inclusion of a going-concern emphasis-of-matter paragraph in the auditor's report is sufficient to inform the users of the financial statements that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time. The following is an illustration of a going-concern emphasis-of-matter paragraph when the auditor concludes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time:

Emphasis of Matter Regarding Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note X to the financial statements, the Company has suffered recurring losses from operations

⁷ Paragraph .19 of AU-C section 580, *Written Representations*.

and has a net capital deficiency that raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note X. The financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

.A7 Examples of conditional language that is inappropriate to use in the emphasis-of-matter paragraph include the following:

- "If the Company continues to suffer recurring losses from operations and continues to have a net capital deficiency, there may be substantial doubt about its ability to continue as a going concern."
- "The Company has been unable to renegotiate its expiring credit agreements. Unless the Company is able to obtain financial support, there is substantial doubt about its ability to continue as a going concern."

.A8 Disclaiming an opinion, rather than expressing an opinion and including a going-concern emphasis-of-matter paragraph in the auditor's report, does not obviate the need for disclosure in the auditor's report of the matter giving rise to the disclaimer.

Comparative Presentations (Ref: par. .20)

.A9 Substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time that arose in the current period does not imply that a basis for such doubt existed in the prior period and, therefore, does not affect the auditor's report on the financial statements of the prior period that are presented on a comparative basis. section 700, *Forming an Opinion and Reporting on Financial Statements*, provides guidance on reporting when financial statements of one or more prior periods are presented on a comparative basis with financial statements of the current period.

Eliminating a Going-Concern Emphasis-of-Matter Paragraph From a Reissued Report (Ref: par. .21)

.A10 After the auditor has issued the auditor's report containing a going-concern emphasis-of-matter paragraph, the auditor may be asked to reissue the auditor's report on the financial statements and eliminate the going-concern emphasis-of-matter paragraph that appeared in the original report. Such requests ordinarily occur after the conditions or events that gave rise to substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time have been resolved. For example, subsequent to the date of the auditor's original report, an entity might obtain needed financing.

.A11 The auditor may perform procedures in addition to those required by paragraph .21 that the auditor deems necessary in the circumstances when reassessing the entity's ability to continue as a going concern for a reasonable period of time.

AU-C Section 580

Written Representations

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibility to obtain written representations from management and, when appropriate, those charged with governance in an audit of financial statements.

.02 Exhibit D, "List of AU-C Sections Containing Requirements for Written Representations," lists other AU-C sections containing subject matter-specific requirements for written representations. The specific requirements for written representations of other AU-C sections do not limit the application of this section.

Written Representations as Audit Evidence

.03 *Audit evidence* is the information used by the auditor in arriving at the conclusions on which the auditor's opinion is based.¹ Written representations are necessary information that the auditor requires in connection with the audit of the entity's financial statements. Accordingly, similar to responses to inquiries, written representations are audit evidence. (Ref: par. .A1)

.04 Although written representations provide necessary audit evidence, they complement other auditing procedures and do not provide sufficient appropriate audit evidence on their own about any of the matters with which they deal. Furthermore, obtaining reliable written representations does not affect the nature or extent of other audit procedures that the auditor applies to obtain audit evidence about the fulfillment of management's responsibilities or about specific assertions.

Effective Date

.05 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.06 The objectives of the auditor are to

- a. obtain written representations from management and, when appropriate, those charged with governance that they believe that they have fulfilled their responsibility for the preparation and fair

¹ Paragraph .05 of section 500, *Audit Evidence*.

presentation of the financial statements and for the completeness of the information provided to the auditor;

- b. support other audit evidence relevant to the financial statements or specific assertions in the financial statements by means of written representations if determined necessary by the auditor or required by other AU-C sections; and
- c. respond appropriately to written representations provided by management and, when appropriate, those charged with governance or if management or, when appropriate, those charged with governance do not provide the written representations requested by the auditor.

Definition

.07 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Written representation. A written statement by management provided to the auditor to confirm certain matters or to support other audit evidence. Written representations in this context do not include financial statements, the assertions therein, or supporting books and records.

.08 For purposes of this section, references to *management* are to be read as "management and, when appropriate, those charged with governance" unless the context suggests otherwise.

Requirements

Management From Whom Written Representations Are Requested

.09 The auditor should request written representations from management with appropriate responsibilities for the financial statements and knowledge of the matters concerned. (Ref: par. .A2–.A6)

Written Representations About Management’s Responsibilities

Preparation and Fair Presentation of the Financial Statements

.10 The auditor should request management to provide a written representation that it has fulfilled its responsibility, as set out in the terms of the audit engagement,

- a. for the preparation and fair presentation of the financial statements in accordance with the applicable financial reporting framework; and
- b. for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.² (Ref: par. .A7–.A10, .A22, and .A29)

² Paragraph .06b(i–ii) of section 210, *Terms of Engagement*.

Information Provided and Completeness of Transactions

.11 The auditor should request management to provide written representations that

- a. it has provided the auditor with all relevant information and access, as agreed upon in the terms of the audit engagement, and
- b. all transactions have been recorded and are reflected in the financial statements. (Ref: par. .A7–.A10, .A22, and .A29)

Other Written Representations**Fraud**

.12 The auditor should request management to provide written representations that it

- a. acknowledges its responsibility for the design, implementation, and maintenance of internal controls to prevent and detect fraud;
- b. has disclosed to the auditor the results of its assessment of the risk that the financial statements may be materially misstated as a result of fraud;
- c. has disclosed to the auditor its knowledge of fraud or suspected fraud affecting the entity involving
 - i. management,
 - ii. employees who have significant roles in internal control, or
 - iii. others when the fraud could have a material effect on the financial statements; and
- d. has disclosed to the auditor its knowledge of any allegations of fraud or suspected fraud affecting the entity's financial statements communicated by employees, former employees, regulators, or others. (Ref: par. .A11)

Laws and Regulations

.13 The auditor should request management to provide written representations that all instances of identified or suspected noncompliance with laws and regulations whose effects should be considered by management when preparing financial statements have been disclosed to the auditor.³

Uncorrected Misstatements

.14 The auditor should request management to provide written representations about whether it believes the effects of uncorrected misstatements are immaterial, individually and in the aggregate, to the financial statements as a whole. A summary of such items should be included in, or attached to, the written representation. (Ref: par. .A12)

Litigation and Claims

.15 The auditor should request management to provide written representations that all known actual or possible litigation and claims whose effects should be considered by management when preparing the financial statements

³ Paragraph .A18 of section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements*.

have been disclosed to the auditor and accounted for and disclosed in accordance with the applicable financial reporting framework.

Estimates

.16 The auditor should request management to provide written representations about whether it believes significant assumptions used by it in making accounting estimates are reasonable. (Ref: par. .A13–.A14)

Related Party Transactions

.17 The auditor should request management to provide written representations that (Ref: par. .A15–.A16)

- a. it has disclosed to the auditor the identity of the entity's related parties and all the related party relationships and transactions of which it is aware and
- b. it has appropriately accounted for and disclosed such relationships and transactions.

Subsequent Events

.18 The auditor should request management to provide written representations that all events occurring subsequent to the date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure have been adjusted or disclosed. (Ref: par. .A17)

Additional Written Representations About the Financial Statements

.19 Other AU-C sections require the auditor to request written representations. If, in addition to such required representations, the auditor determines that it is necessary to obtain one or more written representations to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements, the auditor should request such other written representations. (Ref: par. .A18–.A22 and .A29)

Date of, and Period(s) Covered by, Written Representations

.20 The date of the written representations should be as of the date of the auditor's report on the financial statements. The written representations should be for all financial statements and period(s) referred to in the auditor's report. (Ref: par. .A23–.A26)

Form of Written Representations

.21 The written representations should be in the form of a representation letter addressed to the auditor. (Ref: par. .A27–.A28)

Doubt About the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt About the Reliability of Written Representations

.22 If the auditor has concerns about the competence, integrity, ethical values, or diligence of management or about management's commitment to,

or enforcement of, these, the auditor should determine the effect that such concerns may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: par. .A30)

.23 In particular, if written representations are inconsistent with other audit evidence, the auditor should perform audit procedures to attempt to resolve the matter. If the matter remains unresolved, the auditor should reconsider the assessment of the competence, integrity, ethical values, or diligence of management or of management's commitment to, or enforcement of, these and should determine the effect that this may have on the reliability of representations (oral or written) and audit evidence in general. (Ref: par. .A31)

.24 If the auditor concludes that the written representations are not reliable, the auditor should take appropriate action, including determining the possible effect on the opinion in the auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*, considering the requirement in paragraph .25 of this section.

Written Representations About Management's Responsibilities

.25 The auditor should disclaim an opinion on the financial statements in accordance with section 705 or withdraw from the engagement if (Ref: par. .A32–.A33)

- a. the auditor concludes that sufficient doubt exists about the integrity of management such that the written representations required by paragraphs .10–.11 are not reliable or
- b. management does not provide the written representations required by paragraphs .10–.11.

Requested Written Representations Not Provided

.26 If management does not provide one or more of the requested written representations, the auditor should

- a. discuss the matter with management;
- b. reevaluate the integrity of management and evaluate the effect that this may have on the reliability of representations (oral or written) and audit evidence in general; and
- c. take appropriate actions, including determining the possible effect on the opinion in the auditor's report in accordance with section 705, considering the requirement in paragraph .25 of this section. (Ref: par. .A34)

Application and Other Explanatory Material

Written Representations as Audit Evidence (Ref: par. .03)

.A1 Written representations are an important source of audit evidence. If management modifies or does not provide the requested written representations, it may alert the auditor to the possibility that one or more significant issues may exist. Further, a request for written rather than oral representations, in many cases, may prompt management to consider such matters more rigorously, thereby enhancing the quality of the representations.

Management From Whom Written Representations Are Requested (Ref: par. .09)

.A2 Written representations are requested from those with overall responsibility for financial and operating matters whom the auditor believes are responsible for, and knowledgeable about, directly or through others in the organization, the matters covered by the representations, including the preparation and fair presentation of the financial statements. Those individuals may vary depending on the governance structure of the entity; however, management (rather than those charged with governance) is often the responsible party. Written representations may therefore be requested from the entity's chief executive officer and chief financial officer or other equivalent persons in entities that do not use such titles. In some circumstances, however, other parties, such as those charged with governance, also are responsible for the preparation and fair presentation of the financial statements.

.A3 Due to its responsibility for the preparation and fair presentation of the financial statements and its responsibility for the conduct of the entity's business, management would be expected to have sufficient knowledge of the process followed by the entity in preparing the financial statements and the assertions therein on which to base the written representations.

.A4 In some cases, however, management may decide to make inquiries of others who participate in preparing the financial statements and assertions therein, including individuals who have specialized knowledge relating to the matters about which written representations are requested. Such individuals may include the following:

- An actuary responsible for actuarially determined accounting measurements
- Staff engineers who may have responsibility for environmental liability measurements
- Internal counsel who may provide information essential to provisions for legal claims

.A5 To reinforce the need for management to make informed representations, the auditor may request that management include in the written representations confirmation that it has made such inquiries as it considered appropriate to place it in the position to be able to make the requested written representations. It is not expected that such inquiries would usually require a formal internal process beyond those already established by the entity.

.A6 In some cases, management may include in the written representations qualifying language to the effect that representations are made to the best of its knowledge and belief. It is reasonable for the auditor to accept such wording if, in the auditor's professional judgment, the representations are being made by those with appropriate responsibilities and knowledge of the matters included in the representations.

Written Representations About Management's Responsibilities (Ref: par. .10–.11)

.A7 Audit evidence obtained during the audit that management has fulfilled the responsibilities referred to in paragraphs .10–.11 is not sufficient without obtaining confirmation from management that it believes that it has fulfilled those responsibilities. This is because the auditor is not able to judge solely on other audit evidence whether management has prepared and fairly

presented the financial statements and provided information to the auditor on the basis of the agreed acknowledgment and understanding of its responsibilities. For example, the auditor could not conclude that management has provided the auditor with all relevant information agreed upon in the terms of the audit engagement without asking management whether, and receiving confirmation that, such information has been provided.

.A8 The written representations required by paragraphs .10–.11 draw on the agreed acknowledgment and understanding of management of its responsibilities in the terms of the audit engagement by requesting confirmation that it has fulfilled them. In addition to requesting management to confirm that it has fulfilled its responsibilities, the auditor also may ask management to reconfirm its acknowledgment and understanding of those responsibilities in written representations. This is common but, in any event, may be particularly appropriate when

- those who signed the terms of the audit engagement on behalf of the entity no longer have the relevant responsibilities,
- the terms of the audit engagement were prepared in a previous year,
- any indication exists that management misunderstands those responsibilities, or
- changes in circumstances make it appropriate to do so.

Consistent with the requirement of section 210, *Terms of Engagement*, such reconfirmation of management's acknowledgment and understanding of its responsibilities is unconditional and is not made subject to the best of management's knowledge and belief (as discussed in paragraph .A6 of this section).

.A9 Relevant information may include such matters as the following:

- Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors or summaries of actions of recent meetings for which minutes have not yet been prepared
- Communications from regulatory agencies concerning noncompliance with, or deficiencies in, financial reporting practices

Considerations Specific to Governmental Entities

.A10 The legal or regulatory requirements for audits of the financial statements of governmental entities may be broader than those of other entities. As a result, the premise, relating to management's responsibilities, on which an audit of the financial statements of a governmental entity is conducted may give rise to additional written representations. These may include written representations confirming that transactions and events have been carried out in accordance with applicable law or regulation.

Other Written Representations

Fraud (Ref: par. .12)

.A11 The written representations relating to fraud required by paragraph .12 are important for the auditor to obtain, regardless of the size of the entity, because of the nature of fraud and the difficulties encountered by auditors in detecting material misstatements in the financial statements resulting from fraud.

Uncorrected Misstatements (Ref: par. .14)

.A12 Because the preparation of the financial statements requires management to adjust the financial statements to correct material misstatements, the auditor is required to request management to provide a written representation about uncorrected misstatements. In some circumstances, management may not believe that certain uncorrected misstatements are misstatements. For that reason, management may want to add to their written representation words such as "We do not agree that items . . . and . . . constitute misstatements because [*description of reasons*]." Obtaining this representation does not, however, relieve the auditor of the need to form a conclusion on the effect of uncorrected misstatements in accordance with section 450, *Evaluation of Misstatements Identified During the Audit*.

Estimates (Ref: par. .16)

.A13 Depending on the nature, materiality, and extent of estimation uncertainty, written representations about accounting estimates recognized or disclosed in the financial statements may include representations

- about the appropriateness of the measurement processes, including related assumptions and models, used by management in determining accounting estimates in the context of the applicable financial reporting framework and the consistency in the application of the processes.
- that the assumptions appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity when relevant to the accounting estimates and disclosures.
- that disclosures related to accounting estimates are complete and appropriate under the applicable financial reporting framework.
- that no subsequent event has occurred that would require adjustment to the accounting estimates and disclosures included in the financial statements.

.A14 For those accounting estimates not recognized or disclosed in the financial statements, written representations also may include representations about the following:

- The appropriateness of the basis used by management for determining that the criteria of the applicable financial reporting framework for recognition or disclosure have not been met⁴
- The appropriateness of the basis used by management to overcome a presumption relating to the use of fair value set forth under the entity's applicable financial reporting framework for those accounting estimates not measured or disclosed at fair value

Related Parties (Ref: par. .17)

.A15 Circumstances in which it may be appropriate to obtain written representations about related parties from those charged with governance in addition to management include the following:

- When they have approved specific related party transactions that (a) materially affect the financial statements or (b) involve management

⁴ Paragraph .A121 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

- When they have made specific oral representations to the auditor on details of certain related party transactions
- When they have financial or other interests in the related parties or the related party transactions

.A16 The auditor also may decide to obtain written representations regarding specific assertions that management may have made, such as a representation that specific related party transactions do not involve undisclosed side agreements.

Subsequent Events (Ref: par. .18)

.A17 Section 560, *Subsequent Events and Subsequently Discovered Facts*, addresses circumstances when the auditor includes an additional date on the auditor's report (that is, dual-dates the auditor's report for a revision relating to a subsequent event).⁵ In such circumstances, the auditor may determine that obtaining additional representations relating to the subsequent event is appropriate.

Additional Written Representations About the Financial Statements (Ref: par. .19)

.A18 In addition to the written representations required by paragraphs .10–.18, the auditor may consider it necessary to request other written representations about the financial statements. Such written representations may supplement, but do not form part of, the written representations required by paragraphs .10–.18. They may include representations about the following:

- Whether the selection and application of accounting policies are appropriate
- Whether matters such as the following, when relevant under the applicable financial reporting framework, have been recognized, measured, presented, or disclosed in accordance with that framework:
 - Plans or intentions that may affect the carrying value or classification of assets and liabilities
 - Liabilities, both actual and contingent
 - Title to, or control over, assets and the liens or encumbrances on assets and assets pledged as collateral
- Aspects of laws, regulations, and contractual agreements that may affect the financial statements, including noncompliance

Exhibit B, "Illustrative Specific Written Representations," contains illustrations of additional representations that may be appropriate in certain situations.

Additional Written Representations About Information Provided to the Auditor

.A19 In addition to the written representation required by paragraph .11, the auditor may consider it necessary to request management to provide a written representation that it has communicated to the auditor all deficiencies in internal control of which management is aware.

⁵ Paragraph .13 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

Written Representations About Specific Assertions

.A20 When obtaining evidence about or evaluating judgments and intentions, the auditor may consider one or more of the following:

- The entity's past history in carrying out its stated intentions
- The entity's reasons for choosing a particular course of action
- The entity's ability to pursue a specific course of action
- The existence, or lack thereof, of any other information obtained during the course of the audit that may be inconsistent with management's judgment or intent

.A21 In addition, the auditor may consider it necessary to request management to provide written representations about specific assertions in the financial statements; in particular, to support an understanding that the auditor has obtained from other audit evidence of management's judgment or intent regarding, or the completeness of, a specific assertion. For example, if the intent of management is important to the valuation basis for investments, it may not be possible to obtain sufficient appropriate audit evidence without a written representation from management about its intentions. Although such written representations provide necessary audit evidence, they do not provide sufficient appropriate audit evidence on their own for that assertion.

Communicating a Threshold Amount (Ref: par. .10–.11 and .19)

.A22 Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the representation letter in either qualitative or quantitative terms. Materiality considerations do not apply to those representations that are not directly related to amounts included in the financial statements (for example, management's representations about the premise underlying the audit). In addition, because of the possible effects of fraud on other aspects of the audit, materiality would not apply to management's acknowledgment regarding its responsibility for the design, implementation, and maintenance of internal control to prevent and detect fraud.

Date of, and Period(s) Covered by, Written Representations (Ref: par. .20)

.A23 Because written representations are necessary audit evidence, the auditor's opinion cannot be expressed, and the auditor's report cannot be dated, before the date of the written representations. Furthermore, because the auditor is concerned with events occurring up to the date of the auditor's report that may require adjustment to, or disclosure in, the financial statements, the written representations are dated as of the date of the auditor's report on the financial statements.

.A24 In some circumstances, it may be appropriate for the auditor to obtain a written representation about a specific assertion in the financial statements during the course of the audit. When this is the case, it may be necessary to request an updated written representation.

.A25 The written representations cover all periods referred to in the auditor's report because management needs to reaffirm that the written representations it previously made with respect to the prior periods remain appropriate.

The auditor and management may agree to a form of written representation that updates written representations relating to the prior periods by addressing whether there are any changes to such written representations and, if so, what they are.

.A26 Situations may arise in which current management was not present during all periods referred to in the auditor's report. Such persons may assert that they are not in a position to provide some or all of the written representations because they were not in place during the period. This fact, however, does not diminish such persons' responsibilities for the financial statements as a whole. Accordingly, the requirement for the auditor to request from them written representations that cover the whole of the relevant period(s) still applies.

Form of Written Representations (Ref: par. .21)

.A27 Occasionally, circumstances may prevent management from signing the representation letter and returning it to the auditor on the date of the auditor's report. In those circumstances, the auditor may accept management's oral confirmation, on or before the date of the auditor's report, that management has reviewed the final representation letter and will sign the representation letter without exception as of the date of the auditor's report thereby providing sufficient appropriate audit evidence for the auditor to date the report. However, possession of the signed management representation letter prior to releasing the auditor's report is necessary because paragraph .21 requires that the representations be in the form of a written letter from management. Furthermore, when there are delays in releasing the report, a fact may become known to the auditor that, had it been known to the auditor at the date of the auditor's report, might affect the auditor's report and result in the need for updated representations. Section 560 addresses the auditor's responsibilities in such circumstances.

.A28 Exhibit A, "Illustrative Representation Letter," provides an illustrative example of a representation letter.

Communication With Those Charged With Governance (Ref: par. .10–.11 and .19)

.A29 Section 260, *The Auditor's Communication With Those Charged With Governance*, requires the auditor to communicate with those charged with governance the written representations that the auditor has requested from management.⁶

Doubt About the Reliability of Written Representations and Requested Written Representations Not Provided

Doubt About the Reliability of Written Representations (Ref: par. .22–.23)

.A30 Concerns about the competence, integrity, ethical values, or diligence of management or about its commitment to, or enforcement of, these may cause the auditor to conclude that the risk of management misrepresentation in the financial statements is such that an audit cannot be conducted. In such a case, the auditor may consider withdrawing from the engagement, when withdrawal

⁶ Paragraph .14d of section 260, *The Auditor's Communication With Those Charged With Governance*.

is possible under applicable law or regulation, unless those charged with governance put in place appropriate corrective measures. Such measures, however, may not be sufficient to enable the auditor to issue an unmodified audit opinion.

.A31 In the case of identified inconsistencies between one or more written representations and audit evidence obtained from another source, the auditor may consider whether the risk assessment remains appropriate and, if not, may revise the risk assessment and determine the nature, timing, and extent of further audit procedures to respond to the assessed risks.

Written Representations About Management's Responsibilities ***(Ref: par. .25)***

.A32 As explained in paragraph .A7, the auditor is not able to judge solely on other audit evidence whether management has fulfilled the responsibilities referred to in paragraphs .10–.11. Therefore, if, as described in paragraph .25a, the auditor concludes that the written representations about these matters are unreliable or if management does not provide those written representations, the auditor is unable to obtain sufficient appropriate audit evidence. The possible effects on the financial statements of such inability are not confined to specific elements, accounts, or items of the financial statements and are hence pervasive. Section 705 requires the auditor to disclaim an opinion on the financial statements in such circumstances.⁷

.A33 A written representation that has been modified from that requested by the auditor does not necessarily mean that management did not provide the written representation. However, the underlying reason for such modification may affect the opinion in the auditor's report. For example

- the written representation about management's fulfillment of its responsibility for the preparation and fair presentation of the financial statements may state that management believes that, except for material noncompliance with a particular requirement of the applicable financial reporting framework, the financial statements are prepared and fairly presented in accordance with that framework. The requirement in paragraph .25 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effect of the noncompliance on the opinion in the auditor's report in accordance with section 705.
- the written representation about the responsibility of management to provide the auditor with all relevant information agreed upon in the terms of the audit engagement may state that management believes that, except for information destroyed in a fire, it has provided the auditor with such information. The requirement in paragraph .25 does not apply because the auditor concluded that management has provided reliable written representations. However, the auditor is required to consider the effects of the pervasiveness of the information destroyed in the fire on the financial statements and the effect thereof on the opinion in the auditor's report in accordance with section 705.

Requested Written Representations Not Provided (Ref: par. .26)

.A34 Management's refusal to furnish written representations constitutes a limitation on the scope of the audit. Such refusal is often sufficient to preclude

⁷ Paragraph .10 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

an unmodified opinion and, in particular with respect to the representations in paragraphs .12–.18, may cause an auditor to disclaim an opinion or withdraw from the engagement when withdrawal is possible under applicable law or regulation. However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate.

.A35

Exhibit A—Illustrative Representation Letter

The following illustrative letter includes written representations that are required by this and other AU-C sections in effect for audits of financial statements for periods ending on or after December 15, 2012. It is assumed in this illustration that the applicable financial reporting framework is accounting principles generally accepted in the United States, that the requirement in section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, to obtain a written representation is not relevant, and that no exceptions exist to the requested written representations. If there were exceptions, the representations would need to be modified to reflect the exceptions.

(Entity Letterhead)

(To Auditor)

(Date)

This representation letter is provided in connection with your audit of the financial statements of ABC Company, which comprise the balance sheet as of December 31, 20XX, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements, for the purpose of expressing an opinion on whether the financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States (U.S. GAAP).

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

Except where otherwise stated below, immaterial matters less than \$*[insert amount]* collectively are not considered to be exceptions that require disclosure for the purpose of the following representations. This amount is not necessarily indicative of amounts that would require adjustment to or disclosure in the financial statements.

We confirm that *[, to the best of our knowledge and belief, having made such inquiries as we considered necessary for the purpose of appropriately informing ourselves] [as of (date of auditor's report),]*:

Financial Statements

- We have fulfilled our responsibilities, as set out in the terms of the audit engagement dated *[insert date]*, for the preparation and fair presentation of the financial statements in accordance with U.S. GAAP. (par. .10a)
- We acknowledge our responsibility for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. (par. .10b)
- We acknowledge our responsibility for the design, implementation, and maintenance of internal control to prevent and detect fraud. (par. .12a)

- Significant assumptions used by us in making accounting estimates, including those measured at fair value, are reasonable. (par. .16)
- Related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the requirements of U.S. GAAP. (par. .17b)
- All events subsequent to the date of the financial statements and for which U.S. GAAP requires adjustment or disclosure have been adjusted or disclosed. (par. .18)
- The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole. A list of the uncorrected misstatements is attached to the representation letter. (par. .14)
- The effects of all known actual or possible litigation and claims have been accounted for and disclosed in accordance with U.S. GAAP. (par. .15)

[Any other matters that the auditor may consider appropriate (see paragraph .A21).]

Information Provided

- We have provided you with:
 - Access to all information, of which we are aware that is relevant to the preparation and fair presentation of the financial statements such as records, documentation and other matters; (par. .11a)
 - Additional information that you have requested from us for the purpose of the audit; (par. .11a) and
 - Unrestricted access to persons within the entity from whom you determined it necessary to obtain audit evidence. (par. .11a)
- All transactions have been recorded in the accounting records and are reflected in the financial statements. (par. .11b)
- We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud. (par. .12b)
- We have *[no knowledge of any]* *[disclosed to you all information that we are aware of regarding]* fraud or suspected fraud that affects the entity and involves:
 - Management;
 - Employees who have significant roles in internal control; or
 - Others when the fraud could have a material effect on the financial statements (par. .12c)
- We have *[no knowledge of any]* *[disclosed to you all information that we are aware of regarding]* allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others. (par. .12d)

- We have disclosed to you all known instances of non-compliance or suspected non-compliance with laws and regulations whose effects should be considered when preparing financial statements. (par. .13)
- We [*have disclosed to you all known actual or possible*] [*are not aware of any pending or threatened*] litigation, claims, and assessments whose effects should be considered when preparing the financial statements [and we have not consulted legal counsel concerning litigation, claims, or assessments] (par. .15)
- We have disclosed to you the identity of the entity's related parties and all the related party relationships and transactions of which we are aware. (par. .17a)

[Any other matters that the auditor may consider necessary (see paragraph A21).]

[Name of Chief Executive Officer and Title]

[Name of Chief Financial Officer and Title]

[Revised, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122. Revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 126.]

.A36

Exhibit B—Illustrative Specific Written Representations

As discussed in paragraph .19, the auditor may determine that a specific written representation is necessary to corroborate other audit evidence. Certain AICPA Audit and Accounting Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all-inclusive. The existence of a condition listed subsequently does not mean that the representation is required; professional judgment is necessary to determine whether corroborative audit evidence in the form of a specific written representation is necessary.

Condition	Illustrative Specific Written Representation
General	
Unaudited interim information accompanies the financial statements.	The unaudited interim financial information accompanying [presented in Note X to] the financial statements for the [identify all related periods] has been prepared and fairly presented in conformity with generally accepted accounting principles applicable to interim financial information. The accounting principles used to prepare the unaudited interim financial information are consistent with those used to prepare the audited financial statements.
The effect of a new accounting principle is not known.	We have not completed the process of evaluating the effect that will result from adopting the guidance in Financial Accounting Standards Board (FASB) Accounting Standards Update 20YY-XX, as discussed in Note [X]. The company is therefore unable to disclose the effect that adopting the guidance in FASB Accounting Standards Update 20YY-XX will have on its financial position and the results of operations when such guidance is adopted.
Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.	Note [X] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.
The possibility exists that the value of specific significant long-lived assets or certain identifiable intangibles may be impaired.	We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of the assets might not be recoverable and have appropriately recorded the adjustment.

<i>Condition</i>	<i>Illustrative Specific Written Representation</i>
<p><i>General</i></p> <p>The entity has a variable interest in another entity.</p>	<p>Variable interest entities (VIEs) and potential VIEs and transactions with VIEs and potential VIEs have been properly recorded and disclosed in the financial statements in accordance with generally accepted accounting principles.</p> <p>We have considered both implicit and explicit variable interests in (a) determining whether potential VIEs should be considered VIEs, (b) calculating expected losses and residual returns, and (c) determining which party, if any, is the primary beneficiary.</p> <p>We have provided you with lists of all identified variable interests in (i) VIEs, (ii) potential VIEs that we considered but judged not to be VIEs, and (iii) entities that were afforded the scope exceptions of Financial Accounting Standards Board (FASB) <i>Accounting Standards Codification</i> (ASC) 810, <i>Consolidation</i>.</p> <p>We have advised you of all transactions with identified VIEs, potential VIEs, or entities afforded the scope exceptions of FASB ASC 810.</p> <p>We have made available all relevant information about financial interests and contractual arrangements with related parties, de facto agents and other entities, including but not limited to, their governing documents, equity and debt instruments, contracts, leases, guarantee arrangements, and other financial contracts and arrangements.</p> <p>The information we provided about financial interests and contractual arrangements with related parties, de facto agents and other entities includes information about all transactions, unwritten understandings, agreement modifications, and written and oral side agreements.</p> <p>Our computations of expected losses and expected residual returns of entities that are VIEs and potential VIEs are based on the best information available and include all reasonably possible outcomes.</p> <p>Regarding entities in which the company has variable interests (implicit and explicit), we have provided all information</p>

Condition	Illustrative Specific Written Representation
General	
	<p>about events and changes in circumstances that could potentially cause reconsideration about whether the entities are VIEs or whether the company is the primary beneficiary or has a significant variable interest in the entity.</p> <p>We have made and continue to make exhaustive efforts to obtain information about entities in which the company has an implicit or explicit interest but that were excluded from complete analysis under FASB ASC 810 due to lack of essential information to determine one or more of the following: whether the entity is a VIE, whether the company is the primary beneficiary, or the accounting required to consolidate the entity.</p>
The work of a specialist has been used by the entity.	We agree with the findings of specialists in evaluating the <i>[describe assertion]</i> and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an effect on the independence or objectivity of the specialists.
Assets	
Cash Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, lines of credit, or similar arrangements.	Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements have been properly disclosed.
Financial Instruments Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.	Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities, to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.
Management considers the decline in value of debt or equity securities to be temporary.	We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.

(continued)

Condition	<i>Illustrative Specific Written Representation</i>
<p>Assets</p> <p>Management has determined the fair value of significant financial instruments that do not have readily determinable market values.</p>	<p>The methods and significant assumptions used to determine fair values of financial instruments are as follows: [<i>describe methods and significant assumptions used to determine fair values of financial instruments</i>]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.</p>
<p>Financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk exist.</p>	<p>The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements:</p> <ol style="list-style-type: none"> 1. The extent, nature, and terms of financial instruments with off-balance-sheet risk 2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments 3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments
<p>Investments</p> <p>Unusual considerations are involved in determining the application of equity accounting.</p>	<p>[<i>For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:</i>]</p> <ul style="list-style-type: none"> • The equity method is used to account for the company's investment in the common stock of [<i>investee</i>] because the company has the ability to exercise significant influence over the investee's operating and financial policies. • The cost method is used to account for the company's investment in the common stock of [<i>investee</i>] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.

Condition	Illustrative Specific Written Representation
Assets	
The entity had loans to executive officers, nonaccrued loans or zero interest rate loans.	Loans to executive officers have been properly accounted for and disclosed.
Liabilities	
<p>Debt</p> <p>Short-term debt could be refinanced on a long-term basis and management intends to do so.</p>	<p>The company has excluded short-term obligations totaling \$[amount] from current liabilities because it intends to refinance the obligations on a long-term basis. [Complete with appropriate wording detailing how amounts will be refinanced as follows:]</p> <ul style="list-style-type: none"> • The company has issued a long-term obligation [debt security] after the date of the balance sheet but prior to the issuance of the financial statements for the purpose of refinancing the short-term obligations on a long-term basis. • The company has the ability to consummate the refinancing, by using the financing agreement referred to in Note [X] to the financial statements.
Tax-exempt bonds have been issued.	Tax-exempt bonds issued have retained their tax-exempt status.
<p>Taxes</p> <p>Management intends to reinvest undistributed earnings of a foreign subsidiary.</p>	We intend to reinvest the undistributed earnings of [name of foreign subsidiary].
<p>Pension and Postretirement Benefits</p> <p>An actuary has been used to measure pension liabilities and costs.</p>	We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.
Involvement with a multiemployer plan exists.	<p>We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan.</p> <p style="text-align: center;">or</p> <p>We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of \$[XX].</p>

(continued)

<i>Condition</i>	<i>Illustrative Specific Written Representation</i>
<i>Liabilities</i>	
Postretirement benefits have been eliminated.	We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits. or We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of \$[XX].
Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.	Current employee layoffs are intended to be temporary.
Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.	We plan to continue to make frequent amendments to the pension or other postretirement benefit plans, which may affect the amortization period of prior service cost. or We do not plan to make frequent amendments to the pension or other postretirement benefit plans.
<i>Equity</i>	
Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements exist.	Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.

.A37

Exhibit C—Illustrative Updating Management Representation Letter

The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .A17 of this section. Management need not repeat all of the representations made in the previous representation letter.

If matters to be disclosed to the auditor exist, they may be listed following the representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

[Date]

To [Auditor]

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in accordance with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Name of Chief Executive Officer and Title]

[Name of Chief Financial Officer and Title]

[Paragraph added, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

.A38

Exhibit D—List of AU-C Sections Containing Requirements for Written Representations

This exhibit identifies paragraphs in other AU-C sections that require specific written representations that may not be required for every audit. The list is not a substitute for considering the requirements and related application and other explanatory material in AU-C sections:

- Paragraph .19 of section 560, *Subsequent Events and Subsequently Discovered Facts*
- Paragraph .52 of section 700, *Forming an Opinion and Reporting on Financial Statements*
- Paragraph .07g of section 725, *Supplementary Information in Relation to the Financial Statements as a Whole*
- Paragraph .23 of section 935, *Compliance Audits*

In addition, certain AICPA Audit and Accounting Guides suggest written representations concerning matters that are unique to a particular industry.

[Paragraph renumbered, March 2012, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

AU-C Section 585

Consideration of Omitted Procedures After the Report Release Date

Source: SAS No. 122.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities when, subsequent to the report release date, the auditor becomes aware that one or more auditing procedures that the auditor considered necessary in the circumstances existing at the time of the audit were omitted from the audit of the financial statements. Section 560, *Subsequent Events and Subsequently Discovered Facts*, is applicable when a fact becomes known to the auditor after the report release date that, had it been known to the auditor at that date, may have caused the auditor to revise the auditor's report.

.02 The provisions of this section do not apply to an engagement in which an auditor's work is at issue in a threatened or pending legal proceeding or regulatory investigation. A *threatened legal proceeding* means that a potential claimant has manifested to the auditor an awareness of, and a present intention to assert, a possible claim.

Effective Date

.03 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

Objectives

.04 The objectives of the auditor are to

- a. assess the effect of omitted procedures of which the auditor becomes aware on the auditor's present ability to support the previously expressed opinion on the financial statements, and
- b. respond appropriately.

Definition

.05 For purposes of generally accepted auditing standards, the following term has the meaning attributed as follows:

Omitted procedure. An auditing procedure that the auditor considered necessary in the circumstances existing at the time of the audit of the financial statements but which was not performed.

Requirements

.06 If, subsequent to the report release date, the auditor becomes aware of an omitted procedure, the auditor should assess the effect of the omitted procedure on the auditor's present ability to support the previously expressed opinion on the financial statements. (Ref: par. .A1–.A4)

.07 If the auditor concludes that an omitted procedure of which the auditor has become aware impairs the auditor's present ability to support a previously expressed opinion on the financial statements and the auditor believes that there are users currently relying, or likely to rely, on the previously released report, the auditor should promptly perform the omitted procedure, or alternative procedures, to determine whether there is a satisfactory basis for the auditor's previously expressed opinion. The auditor should include in the audit documentation the procedures performed, in accordance with the provisions of section 230, *Audit Documentation*.¹ (Ref: par. .A3–.A5)

.08 When, as a result of the subsequent performance of an omitted procedure or alternative procedures, the auditor becomes aware of facts regarding the financial statements that existed at the report release date that, had they been known to the auditor at that date, may have caused the auditor to revise the auditor's report, the auditor should apply the provisions of section 560.²

Application and Other Explanatory Material

.A1 The auditor's present ability to support the previously expressed opinion on the financial statements is dependent on whether the omitted procedure affects the auditor's conclusion that sufficient appropriate audit evidence was obtained. In accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*, the auditor is required to obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion.³ (Ref: par. .06)

.A2 After the report release date, the auditor has no responsibility to carry out any retrospective review of the audit work performed. However, situations may arise in which the auditor becomes aware that an auditing procedure considered necessary by the auditor in the circumstances existing at the time of the audit was omitted. For example, after the report release date, reports and supporting audit documentation for particular engagements may be subjected to review in connection with a firm's inspection or monitoring process,⁴ or otherwise, and the omission of a necessary audit procedure may be identified. (Ref: par. .06)

.A3 Procedures that the auditor may perform in connection with assessing the effect of an omitted procedure on the auditor's present ability to support a previously expressed opinion on financial statements include the following:

- Review of the audit documentation

¹ Paragraph .14 of section 230, *Audit Documentation*.

² Paragraphs .15–.18 of section 560, *Subsequent Events and Subsequently Discovered Facts*.

³ Paragraph .19 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

⁴ See QC section 10, *A Firm's System of Quality Control*, regarding inspection in the context of the monitoring element of quality control.

- Discussion of the circumstances with engagement personnel and others within the firm
- Reevaluation of the overall scope of the audit

The results of other audit procedures that were performed may tend to compensate for the omitted procedure or make the effect of its omission less significant. Additionally, subsequent audits may provide audit evidence in support of the previously expressed opinion. (Ref: par. .06–.07)

.A4 The period of time during which the auditor considers whether this section applies to the circumstances of a particular engagement and then takes the actions, if any, that are required hereunder may be important. Because of the legal implications that may be involved in taking the actions contemplated herein, the auditor may decide to seek legal advice in determining an appropriate course of action. (Ref: par. .06–.07)

.A5 If, in the circumstances addressed in paragraph .07, the auditor is unable to perform a previously omitted procedure, or alternative procedures, to determine that there is a satisfactory basis for the auditor's previously expressed opinion, the auditor may decide to seek legal advice to determine an appropriate course of action concerning the auditor's responsibilities to the entity; regulatory authorities, if any, having jurisdiction over the entity; and users relying, or likely to rely, on the auditor's report. (Ref: par. .07)

AU-C Section 600

Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)

Source: SAS No. 122; SAS No. 127.

See section 9600 for interpretations of this section.

Effective for audits of group financial statements for periods ending on or after December 15, 2012.

NOTE

In February 2014, the Auditing Standards Board issued SAS No. 128, *Using the Work of Internal Auditors* (sec. 610), which contains amendments to this section.

The amendments are effective for audits of group financial statements for periods ending on or after December 15, 2014, and can be viewed in appendix B of section 610 until the effective date, when they will be applied to this section.

Introduction

Scope of This Section

.01 Generally accepted auditing standards (GAAS) apply to group audits. This section addresses special considerations that apply to group audits, in particular those that involve component auditors.

.02 An auditor may find this section, adapted as necessary in the circumstances, useful when that auditor involves other auditors in the audit of financial statements that are not group financial statements. For example, an auditor may involve another auditor to observe the inventory count or inspect physical fixed assets at a remote location.

.03 A component auditor may be required by law or regulation or may have been engaged by component management for another reason to express an audit opinion on the financial statements of a component. The requirements of this section apply, nonetheless, regardless of whether the group engagement partner decides to make reference to the component auditor in the auditor's report on the group financial statements or to assume responsibility for the work of component auditors.

.04 Governmental entities frequently prepare group financial statements. The AICPA Audit and Accounting Guide *State and Local Governments* provides guidance to assist auditors in auditing and reporting on those financial statements in accordance with GAAS, including the requirements of this section.

.05 In accordance with section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, the group engagement partner is required to be satisfied that those performing the

group audit engagement, including component auditors, collectively possess the appropriate competence and capabilities.¹ The group engagement partner also is responsible for the direction, supervision, and performance of the group audit engagement. In this section, requirements to be undertaken by the group engagement partner are addressed to the group engagement partner. When the group engagement team may assist the group engagement partner in fulfilling a requirement, the requirement is addressed to the group engagement team. When it may be appropriate in the circumstances for the firm to fulfill a requirement, the requirement is addressed to the auditor of the group financial statements.

.06 The requirements of section 220 apply regardless of whether the group engagement team or a component auditor performs the work on the financial information of a component. This section assists the group engagement partner to meet the requirements of section 220 when component auditors perform work on the financial information of components.

.07 Audit risk is a function of the risk of material misstatement of the financial statements and the risk that the auditor will not detect such misstatements.² In a group audit, detection risk includes the risk that a component auditor may not detect a misstatement in the financial information of a component that could cause a material misstatement of the group financial statements and the risk that the group engagement team may not detect this misstatement. This section explains the matters that the group engagement team considers when determining the nature, timing, and extent of its involvement in the risk assessment procedures and further audit procedures performed by the component auditors on the financial information of the components. The purpose of this involvement is to obtain sufficient appropriate audit evidence on which to base the audit opinion on the group financial statements.

.08 The group engagement partner is responsible for deciding, individually for each component, to either

- assume responsibility for, and thus be required to be involved in, the work of a component auditor, insofar as that work relates to the expression of an opinion on the group financial statements, or
- not assume responsibility for, and accordingly make reference to, the audit of a component auditor in the auditor's report on the group financial statements.

The requirements in paragraphs .51–.65 are applicable only when the auditor of the group financial statements is assuming responsibility for the work of component auditors. All other requirements in this section apply to all audits of group financial statements.

Effective Date

.09 This section is effective for audits of group financial statements for periods ending on or after December 15, 2012.

Objectives

.10 The objectives of the auditor are to determine whether to act as the auditor of the group financial statements and, if so, to

¹ Paragraph .16 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

² Paragraph .A36 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

- a. determine whether to make reference to the audit of a component auditor in the auditor's report on the group financial statements;
- b. communicate clearly with component auditors; and
- c. obtain sufficient appropriate audit evidence regarding the financial information of the components and the consolidation process to express an opinion about whether the group financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

Definitions

.11 For purposes of GAAS, the following terms have the meanings attributed as follows:

Component. An entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements. (Ref: par. .A1–.A5)

Component auditor. An auditor who performs work on the financial information of a component that will be used as audit evidence for the group audit. A component auditor may be part of the group engagement partner's firm, a network firm of the group engagement partner's firm, or another firm. (Ref: par. .A9–.A11)

Component management. Management responsible for preparing the financial information of a component.

Component materiality. The materiality for a component determined by the group engagement team for the purposes of the group audit.

Group. All the components whose financial information is included in the group financial statements. A group always has more than one component.

Group audit. The audit of group financial statements.

Group audit opinion. The audit opinion on the group financial statements.

Group engagement partner. The partner or other person in the firm³ who is responsible for the group audit engagement and its performance and for the auditor's report on the group financial statements that is issued on behalf of the firm. When joint auditors conduct the group audit, the joint engagement partners and their engagement teams collectively constitute the group engagement partner and the group engagement team. This section does not, however, address the relationship between joint auditors or the work that one joint auditor performs in relation to the work of the other joint auditor.

Group engagement team. Partners, including the group engagement partner, and staff who establish the overall group audit strategy, communicate with component auditors, perform work on the consolidation process, and evaluate the conclusions drawn from the audit evidence as the basis for forming an opinion on the group financial statements.

³ *Group engagement partner and firm* refer to their governmental equivalents when relevant.

Group financial statements. Financial statements that include the financial information of more than one component. The term *group financial statements* also refers to combined financial statements aggregating the financial information prepared by components that are under common control.

Group management. Management responsible for the preparation and fair presentation of the group financial statements.

Group-wide controls. Controls designed, implemented, and maintained by group management over group financial reporting.

Significant component. A component identified by the group engagement team (i) that is of individual financial significance to the group, or (ii) that, due to its specific nature or circumstances, is likely to include significant risks of material misstatement of the group financial statements. (Ref: par. .A6–.A8)

.12 Reference to *the applicable financial reporting framework* means the financial reporting framework that applies to the group financial statements. Reference to *the consolidation process* includes the following:

- a. The recognition, measurement, presentation, and disclosure of the financial information of the components in the group financial statements by way of inclusion, consolidation, proportionate consolidation, or the equity or cost methods of accounting (Ref: par. .A12)
- b. The aggregation in combined financial statements of the financial information of components that are under common control

Requirements

Responsibility

.13 In accordance with section 220, the group engagement partner is responsible for (1) the direction, supervision, and performance of the group audit engagement in compliance with professional standards, applicable regulatory and legal requirements, and the firm's policies and procedures; and (2) determining whether the auditor's report that is issued is appropriate in the circumstances.⁴ (Ref: par. .A13–.A14)

Acceptance and Continuance

.14 The group engagement partner should determine whether sufficient appropriate audit evidence can reasonably be expected to be obtained regarding the consolidation process and the financial information of the components on which to base the group audit opinion. For this purpose, the group engagement team should obtain an understanding of the group, its components, and their environments that is sufficient to identify components that are likely to be significant components. (Ref: par. .A15–.A17)

.15 The group engagement partner should evaluate whether the group engagement team will be able to obtain sufficient appropriate audit evidence through the group engagement team's work or use of the work of component auditors (that is, through assuming responsibility for the work of component auditors or through making reference to the audit of a component auditor in

⁴ Paragraph .17 of section 220.

the auditor's report), to act as the auditor of the group financial statements and report as such on the group financial statements. (Ref: par. .A18–.A21)

.16 In some circumstances, the group engagement partner may conclude that it will not be possible, due to restrictions imposed by group management, for the group engagement team to obtain sufficient appropriate audit evidence through the group engagement team's work or use of the work of component auditors, and the possible effect of this inability, will result in a disclaimer of opinion on the group financial statements.⁵ In such circumstances, the auditor of the group financial statements should

- in the case of a new engagement, not accept the engagement, or, in the case of a continuing engagement, withdraw from the engagement when withdrawal is possible under applicable law or regulation, or
- when the entity is required by law or regulation to have an audit, having performed the audit of the group financial statements to the extent possible, disclaim an opinion on the group financial statements. (Ref: par. .A22–.A27)

Terms of Engagement

.17 The auditor of the group financial statements is required, in accordance with section 210, *Terms of Engagement*, to agree upon the terms of the group audit engagement.⁶ (Ref: par. .A28–.A29)

Overall Audit Strategy and Audit Plan

.18 The group engagement team should establish an overall group audit strategy and should develop a group audit plan. In developing the group audit plan, the group engagement team should assess the extent to which the group engagement team will use the work of component auditors and whether the auditor's report on the group financial statements will make reference to the audit of a component auditor, as discussed in paragraphs .24–.30.

.19 The group engagement partner should review and approve the overall group audit strategy and group audit plan. (Ref: par. .A30)

Understanding the Group, Its Components, and Their Environments

.20 The auditor is required to identify and assess the risks of material misstatement through obtaining an understanding of the entity and its environment.⁷ The group engagement team should

- a. enhance its understanding of the group, its components, and their environments, including group-wide controls, obtained during the acceptance or continuance stage.
- b. obtain an understanding of the consolidation process, including the instructions issued by group management to components. (Ref: par. .A31–.A37)

⁵ Paragraphs .11–.14 of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

⁶ Paragraph .09 of section 210, *Terms of Engagement*.

⁷ See section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

.21 The group engagement team should obtain an understanding that is sufficient to

- a. confirm or revise its initial identification of components that are likely to be significant.
- b. assess the risks of material misstatement of the group financial statements, whether due to fraud or error.⁸ (Ref: par. .A38–.A39)

Understanding a Component Auditor

.22 Regardless of whether reference will be made in the auditor's report on the group financial statements to the audit of a component auditor, the group engagement team should obtain an understanding of the following: (Ref: par. .A40–.A44)

- a. Whether a component auditor understands and will comply with the ethical requirements that are relevant to the group audit and, in particular, is independent (Ref: par. .A46)
- b. A component auditor's professional competence (Ref: par. .A47–.A48)
- c. The extent, if any, to which the group engagement team will be able to be involved in the work of the component auditor
- d. Whether the group engagement team will be able to obtain information affecting the consolidation process from a component auditor
- e. Whether a component auditor operates in a regulatory environment that actively oversees auditors (Ref: par. .A45)

.23 When a component auditor does not meet the independence requirements that are relevant to the group audit or the group engagement team has serious concerns about the other matters listed in paragraph .22*a–b*, the group engagement team should obtain sufficient appropriate audit evidence relating to the financial information of the component without making reference to the audit of that component auditor in the auditor's report on the group financial statements or otherwise using the work of that component auditor. (Ref: par. .A49–.A51)

Determining Whether to Make Reference to a Component Auditor in the Auditor's Report on the Group Financial Statements

.24 Having gained an understanding of each component auditor, the group engagement partner should decide whether to make reference to a component auditor in the auditor's report on the group financial statements. (Ref: par. .A52)

.25 Reference to the audit of a component auditor in the auditor's report on the group financial statements should not be made unless

- a. the group engagement partner has determined that the component auditor has performed an audit of the financial statements of the component in accordance with the relevant requirements of GAAS (Ref: par. .A53), and

⁸ See section 315.

- b. the component auditor has issued an auditor's report that is not restricted as to use.⁹

[As amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.26 If the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements, reference to the audit of a component auditor in the auditor's report on the group financial statements should not be made unless

- a. the measurement, recognition, presentation, and disclosure criteria that are applicable to all material items in the component's financial statements under the financial reporting framework used by the component are similar to the criteria that are applicable to all material items in the group's financial statements under the financial reporting framework used by the group, and
- b. the group engagement team has obtained sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to assume responsibility for, and, thus, be involved in, the work of the component auditor. (Ref: par. .A54–.A57)

[Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.27 When the group engagement partner decides to make reference in the auditor's report on the group financial statements to the audit of a component auditor, the group engagement team should obtain sufficient appropriate audit evidence with regard to such components by performing the following procedures:

- a. The procedures required by this section, except for those required by paragraphs .51–.65
- b. Reading the component's financial statements and the component auditor's report thereon to identify significant findings and issues and, when considered necessary, communicating with the component auditor in this regard

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Making Reference in the Auditor's Report

.28 When the group engagement partner decides to make reference to the audit of a component auditor in the auditor's report on the group financial statements, the report on the group financial statements should clearly indicate

- a. that the component was not audited by the auditor of the group financial statements but was audited by the component auditor.
- b. the magnitude of the portion of the financial statements audited by the component auditor.
- c. when the component's financial statements are prepared using a different financial reporting framework from that used for the group financial statements
 - i. the financial reporting framework used by the component and

⁹ See section 905, *Alert That Restricts the Use of the Auditor's Written Communication*. [Footnote revised, August 2012, to reflect conforming changes necessary due to the issuance of SAS No. 125.]

- ii. that the auditor of the group financial statements is taking responsibility for evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group.
- d. when
- i. the component auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, and
 - ii. the group engagement partner has determined that the component auditor performed additional audit procedures in order to meet the relevant requirements of GAAS
 - (1) the set of auditing standards used by the component auditor and
 - (2) that additional audit procedures were performed by the component auditor to meet the relevant requirements of GAAS. (Ref: par. .A58–.A60)

[Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.29 If the group engagement partner decides to name a component auditor in the auditor's report on the group financial statements

- a. the component auditor's express permission should be obtained.
- b. the component auditor's report should be presented together with that of the auditor's report on the group financial statements.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.30 If the opinion of a component auditor is modified or that report includes an emphasis-of-matter or other-matter paragraph, the auditor of the group financial statements should determine the effect that this may have on the auditor's report on the group financial statements. When deemed appropriate, the auditor of the group financial statements should modify the opinion on the group financial statements or include an emphasis-of-matter paragraph or an other-matter paragraph in the auditor's report on the group financial statements. (Ref: par. .A61) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.31 If the group engagement partner decides to assume responsibility for work of a component auditor, no reference should be made to the component auditor in the auditor's report on the group financial statements. (Ref: par. .A62) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Materiality

.32 The group engagement team should determine the following: (Ref: par. .A63)

- a. Materiality, including performance materiality, for the group financial statements as a whole when establishing the overall group audit strategy.¹⁰

¹⁰ See section 320, *Materiality in Planning and Performing an Audit*.

- b. Whether, in the specific circumstances of the group, particular classes of transactions, account balances, or disclosures in the group financial statements exist for which misstatements of lesser amounts than materiality for the group financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the group financial statements. In such circumstances, the group engagement team should determine materiality to be applied to those particular classes of transactions, account balances, or disclosures.
- c. Component materiality for those components on which the group engagement team will perform, or for which the auditor of the group financial statements will assume responsibility for the work of a component auditor who performs, an audit or a review. Component materiality should be determined taking into account all components, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of a component auditor. To reduce the risk that the aggregate of uncorrected and undetected misstatements in the group financial statements exceeds the materiality for the group financial statements as a whole, component materiality should be lower than the materiality for the group financial statements as a whole, and component performance materiality should be lower than performance materiality for the group financial statements as a whole. (Ref: par. .A64–.A66)
- d. The threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements. (Ref: par. .A67)

See paragraph .51 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Responding to Assessed Risks

.33 The auditor is required to design and implement appropriate responses to address the assessed risks of material misstatement of the financial statements.¹¹ If the nature, timing, and extent of the work to be performed on the consolidation process or the financial information of the components is based on an expectation that group-wide controls are operating effectively or when substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level, the group engagement team should test, or have a component auditor test on the group engagement team's behalf, the operating effectiveness of those controls. See paragraphs .52–.58 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. (Ref: par. .A68) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Consolidation Process

.34 In accordance with paragraph .20, the group engagement team obtains an understanding of group-wide controls and the consolidation process,

¹¹ See section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

including the instructions issued by group management to components. In accordance with paragraph .33, the group engagement team, or component auditor at the request of the group engagement team, tests the operating effectiveness of group-wide controls if the nature, timing, and extent of the work to be performed on the consolidation process are based on an expectation that group-wide controls are operating effectively or when substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.35 The group engagement team should design and perform further audit procedures on the consolidation process to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process. This should include evaluating whether all components have been included in the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.36 The group engagement team should evaluate the appropriateness, completeness, and accuracy of consolidation adjustments and reclassifications and should evaluate whether any fraud risk factors or indicators of possible management bias exist. (Ref: par. .A69) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.37 If the financial information of a component has not been prepared in accordance with the same accounting policies applied to the group financial statements, the group engagement team should evaluate whether the financial information of that component has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework. (Ref: par. .A57) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.38 The group engagement team should determine whether the financial information identified in a component auditor's communication (see paragraph .42b) is the financial information that is incorporated in the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.39 If the group financial statements include the financial statements of a component with a financial reporting period-end that differs from that of the group, the group engagement team should evaluate whether appropriate adjustments have been made to those financial statements in accordance with the applicable financial reporting framework. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events

.40 When the group engagement team or component auditors perform audits on the financial information of components, the group engagement team or the component auditors should perform procedures designed to identify events at those components that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements and that may require adjustment to, or disclosure in, the group financial statements. See paragraph .59 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. (Ref: par. .A70) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor

.41 The group engagement team should communicate its requirements to a component auditor on a timely basis. This communication should include the following:

- a. A request that the component auditor, knowing the context in which the group engagement team will use the work of the component auditor, confirm that the component auditor will cooperate with the group engagement team.
- b. The ethical requirements that are relevant to the group audit and, in particular, the independence requirements.
- c. A list of related parties prepared by group management and any other related parties of which the group engagement team is aware. The group engagement team should request the component auditor to communicate on a timely basis related parties not previously identified by group management or the group engagement team. The group engagement team should identify such additional related parties to other component auditors.
- d. Identified significant risks of material misstatement of the group financial statements, due to fraud or error, that are relevant to the work of the component auditor.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.42 The group engagement team should request a component auditor to communicate matters relevant to the group engagement team's conclusion, with regard to the group audit. Such communication should include the following:

- a. Whether the component auditor has complied with ethical requirements relevant to the group audit, including independence and professional competence
- b. Identification of the financial information of the component on which the component auditor is reporting
- c. The component auditor's overall findings, conclusions, or opinion

See paragraphs .60–.61 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Evaluating a Component Auditor's Communication and Adequacy of Their Work

.43 The group engagement team should evaluate a component auditor's communication (see paragraph .42). The group engagement team should discuss significant findings and issues arising from that evaluation with the component auditor, component management, or group management, as appropriate. See paragraphs .60–.63 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Sufficiency and Appropriateness of Audit Evidence

.44 The auditor is required to obtain sufficient appropriate audit evidence on which to base the audit opinion.¹² The group engagement team should evaluate whether sufficient appropriate audit evidence on which to base the group audit opinion has been obtained from the audit procedures performed on the consolidation process and the work performed by the group engagement team and the component auditors on the financial information of the components. (Ref: par. .A71) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.45 The group engagement partner should evaluate the effect on the group audit opinion of any uncorrected misstatements (either identified by the group engagement team or communicated by component auditors) and any instances in which there has been an inability to obtain sufficient appropriate audit evidence. (Ref: par. .A72) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management and Those Charged With Governance

.46 The group engagement team should communicate to group management and those charged with governance of the group material weaknesses and significant deficiencies in internal control that are relevant to the group (either identified by the group engagement team or brought to its attention by a component auditor during the audit), in accordance with section 265, *Communicating Internal Control Related Matters Identified in an Audit*. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.47 If fraud has been identified by the group engagement team or brought to its attention by a component auditor or information indicates that a fraud may exist, the group engagement team should communicate this on a timely basis to the appropriate level of group management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities. (Ref: par. .A73) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.48 When a component auditor has been engaged to express an audit opinion on the financial statements of a component, the group engagement team should request group management to inform component management of any matter of which the group engagement team becomes aware that may be significant to the financial statements of the component, but of which component management may be unaware. If group management refuses to communicate the matter to component management, the group engagement team should discuss the matter with those charged with governance of the group. If the matter remains unresolved, the group engagement team, subject to legal and professional confidentiality considerations, should consider whether to advise the component auditor not to issue the auditor's report on the financial statements of the component until the matter is resolved and whether to withdraw from the engagement. (Ref: par. .A74) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

¹² Paragraph .19 of section 200.

Communication With Those Charged With Governance of the Group

.49 The group engagement team should communicate the following matters with those charged with governance of the group, in addition to those required by section 260, *The Auditor's Communication With Those Charged With Governance*, and other AU-C sections: (Ref: par. .A75)

- a. An overview of the type of work to be performed on the financial information of the components, including the basis for the decision to make reference to the audit of a component auditor in the auditor's report on the group financial statements
- b. An overview of the nature of the group engagement team's planned involvement in the work to be performed by the component auditors on the financial information of significant components
- c. Instances in which the group engagement team's evaluation of the work of a component auditor gave rise to a concern about the quality of that auditor's work
- d. Any limitations on the group audit (for example, when the group engagement team's access to information may have been restricted)
- e. Fraud or suspected fraud involving group management, component management, employees who have significant roles in group-wide controls, or others in which a material misstatement of the group financial statements has or may have resulted from fraud

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Documentation

.50 The group engagement team should include in the audit documentation the following:¹³

- a. An analysis of components indicating those that are significant and the type of work performed on the financial information of the components
- b. Those components for which reference to the reports of component auditors is made in the auditor's report on the group financial statements
- c. Written communications between the group engagement team and the component auditors about the group engagement team's requirements
- d. For those components for which reference is made in the auditor's report on the group financial statements to the audit of a component auditor
 - i. the financial statements of the component and the report of the component auditor thereon

¹³ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- ii. when the component auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, the basis for the group engagement partner's determination that the audit performed by the component auditor met the relevant requirements of GAAS

See paragraph .65 for additional requirements that apply when the auditor of the group financial statements is assuming responsibility for the work of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Additional Requirements Applicable When Assuming Responsibility for the Work of a Component Auditor

Materiality (See paragraph .32)

.51 In the case of an audit of the financial information of a component in which the auditor of the group financial statements is assuming responsibility for the component auditor's work, the group engagement team should evaluate the appropriateness of performance materiality at the component level. (Ref: par. .A76–.A77) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Determining the Type of Work to Be Performed on the Financial Information of Components (See paragraph .33)

.52 For components for which the auditor of the group financial statements is assuming responsibility for the work of component auditors, the group engagement team should determine the type of work to be performed by the group engagement team or by component auditors on its behalf on the financial information of the components (see paragraphs .53–.56). The group engagement team also should determine the nature, timing, and extent of its involvement in the work of component auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Significant Components

.53 For a component that is significant due to its individual financial significance to the group, the group engagement team, or a component auditor on its behalf, should perform an audit of the financial information of the component, adapted as necessary to meet the needs of the group engagement team, using component materiality. (Ref: par. .A78) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.54 For a component that is significant not due to its individual financial significance but because it is likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances, the group engagement team, or a component auditor on its behalf, should perform one or more of the following: (Ref: par. .A79)

- a. An audit, adapted as necessary to meet the needs of the group engagement team, of the financial information of the component, using component materiality

- b. An audit, adapted as necessary to meet the needs of the group engagement team, of one or more account balances, classes of transactions, or disclosures relating to the likely significant risks of material misstatement of the group financial statements (Ref: par. .A80)
- c. Specified audit procedures relating to the likely significant risks of material misstatement of the group financial statements (Ref: par. .A81)

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Components That Are Not Significant Components

.55 For components that are not significant components, the group engagement team should perform analytical procedures at the group level. (Ref: par. .A82) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.56 In some circumstances, the group engagement team may determine that sufficient appropriate audit evidence on which to base the group audit opinion will not be obtained from the following:

- a. The work performed on the financial information of significant components
- b. The work performed on group-wide controls and the consolidation process
- c. The analytical procedures performed at group level

In such circumstances, the group engagement team should select additional components that are not significant components and should perform or request a component auditor to perform one or more of the following on the financial information of the individual components selected: (Ref: par. .A83–.A86)

- An audit, adapted as necessary to meet the needs of the group engagement team, of the financial information of the component, using component materiality
- An audit, adapted as necessary to meet the needs of the group engagement team, of one or more account balances, classes of transactions, or disclosures
- A review of the financial information of the component, adapted as necessary to meet the needs of the group engagement team, using component materiality
- Specified audit procedures

The group engagement team should vary the selection of such individual components over a period of time. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Involvement in the Work Performed by Component Auditors ***(Ref: par. .A87–.A88)***

Significant Components—Risk Assessment

.57 When a component auditor performs an audit or other specified audit procedures of the financial information of a significant component for which the auditor of the group financial statements is assuming responsibility for the component auditor's work, the group engagement team should be involved in

the risk assessment of the component to identify significant risks of material misstatement of the group financial statements. The nature, timing, and extent of this involvement are affected by the group engagement team's understanding of the component auditor but, at a minimum, should include the following:

- a. Discussing with the component auditor or component management the component's business activities of significance to the group.
- b. Discussing with the component auditor the susceptibility of the component to material misstatement of the financial information due to fraud or error.
- c. Reviewing the component auditor's documentation of identified significant risks of material misstatement of the group financial statements. Such documentation may take the form of a memorandum that reflects the component auditor's conclusion with regard to the identified significant risks.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Identified Significant Risks of Material Misstatement of the Group Financial Statements—Further Audit Procedures

.58 When significant risks of material misstatement of the group financial statements have been identified in a component for which the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the group engagement team should evaluate the appropriateness of the further audit procedures to be performed to respond to the identified significant risks of material misstatement of the group financial statements. Based on its understanding of the component auditor, the group engagement team should determine whether it is necessary to be involved in the further audit procedures. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events (See paragraph .40)

.59 When component auditors perform work other than audits of the financial information of components at the request of the group engagement team, the group engagement team should request the component auditors to notify the group engagement team if they become aware of events at those components that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements that may require an adjustment to, or disclosure in, the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor (See paragraph .42)

.60 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the communication required in paragraph .41 should set out the work to be performed and the form and content of the component auditor's communication with the group engagement team. It also should include, in the case of an audit or review of the financial information of the component, component materiality (and the amount or amounts lower than the materiality for particular classes of transactions, account balances, or disclosures, if applicable) and the threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements. (Ref: par. .A89–.A92) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.61 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, the communication requested from the component auditor, as required in paragraph .42, also should include the following:

- a. Whether the component auditor has complied with the group engagement team's requirements.
- b. Information on instances of noncompliance with laws or regulations at the component or group level that could give rise to a material misstatement of the group financial statements.
- c. Significant risks of material misstatement of the group financial statements, due to fraud or error, identified by the component auditor in the component and the component auditor's responses to such risks. The group engagement team should request the component auditor to communicate such significant risks on a timely basis.
- d. A list of corrected and uncorrected misstatements of the financial information of the component (the list need not include misstatements that are below the threshold for clearly trivial misstatements communicated by the group engagement team).
- e. Indicators of possible management bias regarding accounting estimates and the application of accounting principles.
- f. Description of any identified material weaknesses and significant deficiencies in internal control at the component level.
- g. Other significant findings and issues that the component auditor communicated or expects to communicate to those charged with governance of the component, including fraud or suspected fraud involving component management, employees who have significant roles in internal control at the component level, or others that resulted in a material misstatement of the financial information of the component.
- h. Any other matters that may be relevant to the group audit or that the component auditor wishes to draw to the attention of the group engagement team, including exceptions noted in the written representations that the component auditor requested from component management.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating a Component Auditor's Communication and Adequacy of Their Work (See paragraph .43)

.62 The group engagement team should determine, based on the evaluation required in paragraph .43, whether it is necessary to review other relevant parts of a component auditor's audit documentation. (Ref: par. .A93) [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.63 If the group engagement team concludes that the work of a component auditor is insufficient, the group engagement team should determine additional procedures to be performed and whether they are to be performed by the component auditor or by the group engagement team. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group (See paragraphs .46–.49)

.64 The group engagement team should determine which material weaknesses and significant deficiencies in internal control that component auditors have brought to the attention of the group engagement team should be communicated to group management and those charged with governance of the group. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Documentation (See paragraph .50)

.65 The group engagement team should include in the audit documentation the nature, timing, and extent of the group engagement team's involvement in the work performed by the component auditors on significant components, including, when applicable, the group engagement team's review of relevant parts of the component auditors' audit documentation and conclusions thereon. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Application and Other Explanatory Material

Definitions

Component (Ref: par. .11)

.A1 The structure of a group affects how components are identified. For example, the group financial reporting system may be based on an organizational structure that provides for financial information to be prepared by a parent and one or more subsidiaries, joint ventures, or investees accounted for by the equity or cost methods of accounting; by a head office and one or more divisions or branches; or by a combination of both. Some groups, however, may organize their financial reporting system by function, process, product or service (or by groups of products or services), or geographical locations. In these cases, the entity or business activity for which group or component management prepares financial information that is included in the group financial statements may be a function, process, product or service (or group of products or services), or geographical location.

.A2 An investment accounted for under the equity method constitutes a component for purposes of this section. Investments accounted for under the cost method may be analogous to a component for purposes of this section when the work and reports of other auditors constitute a major element of evidence for such investments.

.A3 Various levels of components may exist within the group financial reporting system, in which case it may be more appropriate to identify components at certain levels of aggregation rather than individually.

.A4 Components aggregated at a certain level may constitute a component for purposes of the group audit; however, such a component also may prepare group financial statements that incorporate the financial information of the components it encompasses (that is, a subgroup). This section may, therefore, be applied by different group engagement partners and teams for different subgroups within a larger group.

Considerations Specific to Audits of Governmental Entities

.A5 In audits of state and local governments, a component may be a separate legal entity reported as a component unit or part of the governmental entity, such as a business activity, department, or program.

Significant Component (Ref: par. .11)

.A6 As the individual financial significance of a component increases, the risks of material misstatement of the group financial statements ordinarily increase. The group engagement team may apply a percentage to a chosen benchmark as an aid to identify components that are of individual financial significance. Identifying a benchmark and determining a percentage to be applied to it involve the exercise of professional judgment. Depending on the nature and circumstances of the group, appropriate benchmarks might include group assets, liabilities, cash flows, revenues, expenditures, or net income. For example, the group engagement team may consider that components exceeding a specified percentage of the chosen benchmark are significant components.

.A7 The group engagement team also may identify a component as likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances (that is, risks that require special audit consideration¹⁴). For example, a component could be responsible for foreign exchange trading and, thus, expose the group to a significant risk of material misstatement, even though the component is not otherwise of individual financial significance to the group.

Considerations Specific to Governmental Entities

.A8 In audits of governmental entities, appropriate quantitative benchmarks for identifying significant components might include net costs or total budget. Qualitative considerations in audits of governmental entities may involve matters of heightened public sensitivity, such as national security issues, donor funded projects, or reporting of tax revenue.

Component Auditor (Ref: par. .11)

.A9 For purposes of this section, auditors who do not meet the definition of a member of the group engagement team are considered to be component auditors. However, an auditor who performs work on a component when the group engagement team will not use that work to provide audit evidence for the group audit is not considered a component auditor.

.A10 When two or more component auditors exist, the provisions of this section are applicable to each component auditor.

.A11 A member of the group engagement team may perform work on the financial information of a component for the group audit at the request of the group engagement team. When this is the case, such a member of the group engagement team also is a component auditor.

Consolidation Process (Ref: par. .12)*Considerations Specific to Governmental Entities*

.A12 In audits of state and local governments, the applicable financial reporting framework may be based on multiple reporting units. Therefore, the consolidation process may involve the inclusion, but separate presentation, of the financial statements of each reporting unit in the governmental entity.

¹⁴ Paragraphs .28–.30 of section 315.

Responsibility (Ref: par. .13)

.A13 Component auditors may perform work on the financial information of the components for the group audit and, as such, are responsible for their overall findings, conclusions, or opinions. However, regardless of whether reference is made in the auditor's report on the group financial statements to the report of a component auditor, the auditor of the group financial statements is responsible for the group audit opinion.

Considerations Specific to Governmental Entities

.A14 When the auditor of the group financial statements is engaged to express opinions on both the group financial statements and the separate financial statements of the components presented in the group financial statements, the auditor's reporting responsibilities with respect to the separate financial statements are the same as the auditor's responsibilities with respect to the group financial statements.

Acceptance and Continuance

Obtaining an Understanding at the Acceptance or Continuance Stage (Ref: par. .14)

.A15 In the case of a new engagement, the group engagement team's understanding of the group, its components, and their environments may be obtained from the following:

- Information provided by group management
- Communication with group management
- When applicable, communication with the previous group engagement team, component management, or component auditors

.A16 The group engagement team's understanding may include matters such as the following:

- The group structure, including both the legal and organizational structure (that is, how the group financial reporting system is organized)
- Components' business activities that are significant to the group, including the industry and regulatory, economic, and political environments in which those activities take place
- The use of service organizations, including shared service centers
- A description of group-wide controls
- The complexity of the consolidation process
- Whether component auditors that are not from the group engagement partner's firm or network will perform work on the financial information of any of the components and group management's rationale for engaging more than one auditor, if applicable
- Whether the group engagement team
 - will have unrestricted access to those charged with governance of the group, group management, those charged with governance of the component, component management, component information, and the component auditors (including relevant audit documentation sought by the group engagement team)

— will be able to perform necessary work on the financial information of the components

.A17 In the case of a continuing engagement, the group engagement team's ability to obtain sufficient appropriate audit evidence may be affected by significant changes, such as the following:

- Changes in the group structure (for example, acquisitions, disposals, reorganizations, or changes in how the group financial reporting system is organized)
- Changes in components' business activities that are significant to the group
- Changes in the composition of those charged with governance of the group, group management, or key management of significant components
- Concerns the group engagement team has with regard to the integrity and competence of group or component management
- Changes in group-wide controls
- Changes in the applicable financial reporting framework

Expectation to Obtain Sufficient Appropriate Audit Evidence (Ref: par. .15)

.A18 Relevant factors in determining whether to act as the auditor of the group financial statements include, among other things, the following:

- The individual financial significance of the components, as determined in accordance with the guidance in paragraph .A6, for which the auditor of the group financial statements will be assuming responsibility
- The extent to which significant risks of material misstatement of the group financial statements are included in the components for which the auditor of the group financial statements will be assuming responsibility
- The extent of the group engagement team's knowledge of the overall financial statements

.A19 A group may consist only of components not considered significant components. In these circumstances, the group engagement partner can reasonably expect to obtain sufficient appropriate audit evidence on which to base the group audit opinion if the group engagement team will be able to

- a. perform the work on the financial information of some of these components.
- b. use the work performed by component auditors on the financial information of other components to the extent necessary to obtain sufficient appropriate audit evidence.

.A20 When the auditor of the group financial statements is assuming responsibility for the work performed by a component auditor, the group engagement team is required by the provisions of this section to be involved in the work of the component auditor. Paragraph .27 describes the procedures to be followed to obtain sufficient appropriate audit evidence when the group engagement partner decides to make reference in the auditor's report on the group financial statements to the audit of a component auditor.

Considerations Specific to Governmental Entities

.A21 Additional factors in determining whether to act as the auditor of the group financial statements in audits of state and local governments include, the following:

- Engagement by the primary government as the auditor of the financial reporting entity
- Responsibility for auditing the primary government's general fund (or other primary operating fund)

Access to Information (Ref: par. .16)

.A22 The group engagement team's access to information may be restricted by group management, or it may be restricted by circumstances that cannot be overcome by group management (for example, laws relating to confidentiality and data privacy or denial by a component auditor of access to relevant audit documentation sought by the group engagement team).

.A23 When access to information is restricted by circumstances, the group engagement team may still be able to obtain sufficient appropriate audit evidence; however, this is less likely as the significance of the component increases. For example, the group engagement team may not have access to those charged with governance, management, or the auditor (including relevant audit documentation sought by the group engagement team) of a component that is accounted for by the equity method of accounting. If the component is not a significant component and the group engagement team has a complete set of financial statements of the component, including the auditor's report thereon, and has access to information kept by group management regarding that component, the group engagement team may conclude that this information constitutes sufficient appropriate audit evidence regarding that component. If the component is a significant component, however, and the auditor of the group financial statements is not making reference to the audit of a component auditor in the auditor's report on the group financial statements, then the group engagement team will not be able to comply with the requirements of this section that are relevant in the circumstances of the group audit. For example, the group engagement team will not be able to comply with the requirement in paragraphs .57–.58 to be involved in the work of a component auditor. Therefore, the group engagement team will not be able to obtain sufficient appropriate audit evidence regarding that component. The effect on the auditor's report of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

.A24 The group engagement team will not be able to obtain sufficient appropriate audit evidence if group management restricts the access of the group engagement team or a component auditor to the information of a significant component.

.A25 Although the group engagement team may be able to obtain sufficient appropriate audit evidence if such restriction relates to a component considered not a significant component, the reason for the restriction may affect the group audit opinion. For example, it may affect the reliability of group management's responses to the group engagement team's inquiries and group management's representations to the group engagement team.

.A26 Section 210 addresses circumstances when an entity is required by law or regulation to have an audit.¹⁵ In these circumstances, this section still applies to the group audit, and the effect of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of section 705.

.A27 Exhibit A, "Illustrations of Auditor's Reports on Group Financial Statements," contains an example of an auditor's report containing a qualified opinion based on the group engagement team's inability to obtain sufficient appropriate audit evidence regarding a significant component accounted for by the equity method of accounting when, in the group engagement team's professional judgment, the effect is material but not pervasive.

Terms of Engagement (Ref: par. .17)

.A28 The terms of engagement identify the applicable financial reporting framework.¹⁶ Additional matters that may be included in the terms of a group audit engagement include whether reference will be made to the audit of a component auditor in the auditor's report on the group financial statements, when relevant, or arrangements to facilitate the following:

- Unrestricted communication between the group engagement team and component auditors to the extent permitted by law or regulation
- Communication to the group engagement team of important communications between
 - the component auditors, those charged with governance of the component, and component management, including communications on significant deficiencies and material weaknesses in internal control
 - regulatory authorities and components related to financial reporting matters
- To the extent the group engagement team considers necessary
 - access to component information, those charged with governance of components, component management, and the component auditors (including relevant audit documentation sought by the group engagement team)
 - permission to perform work, or request a component auditor to perform work, on the financial information of the components

.A29 Certain restrictions imposed after acceptance of the group audit engagement result in an inability to obtain sufficient appropriate audit evidence that may affect the group audit opinion including, specifically, restrictions imposed on the following:

- The group engagement team's access to component information, those charged with governance of components, component management, or the component auditors (including relevant audit documentation sought by the group engagement team)

¹⁵ Paragraphs .07 and .A19 of section 210.

¹⁶ Paragraph .10 of section 210.

- The work to be performed on the financial information of the components

These restrictions may even lead to withdrawal from the engagement unless that is not possible under law or regulation. Section 705 addresses the auditor's responsibilities when management has imposed a limitation on the scope of the audit after the auditor has accepted the engagement.¹⁷

Overall Audit Strategy and Audit Plan (Ref: par. .19)

.A30 The group engagement partner's review of the overall group audit strategy and group audit plan is an important part of fulfilling the group engagement partner's responsibility for the direction of the group audit engagement.

Understanding the Group, Its Components, and Their Environments

Matters About Which the Group Engagement Team Obtains an Understanding (Ref: par. .20)

.A31 Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, contains guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity, including the applicable financial reporting framework; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity's financial performance.¹⁸ Appendix A, "Understanding the Group, Its Components, and Their Environments—Examples of Matters About Which the Group Engagement Team Obtains an Understanding," of this section contains guidance on matters specific to a group, including the consolidation process.

Instructions Issued by Group Management to Components (Ref: par. .20)

.A32 To achieve uniformity and comparability of financial information, group management ordinarily issues instructions to components. Such instructions specify the requirements for financial information of the components to be included in the group financial statements and often include financial reporting procedures manuals and a reporting package. A reporting package ordinarily consists of standard formats for providing financial information for incorporation in the group financial statements. Reporting packages generally do not, however, take the form of complete financial statements prepared and presented in accordance with the applicable financial reporting framework.

.A33 The instructions ordinarily cover the following:

- The accounting policies to be applied
- Statutory and other disclosure requirements applicable to the group financial statements, including the following:
 - The identification and reporting of segments
 - Related party relationships and transactions

¹⁷ Paragraphs .11–.14 and .A15–.A16 of section 705.

¹⁸ Paragraphs .A17–.A41 of section 315.

- Intragroup transactions and unrealized profits or losses
 - Intragroup account balances
 - A reporting timetable
- .A34** The group engagement team's understanding of the instructions may include the following:
- The clarity and practicality of the instructions for completing the reporting package
 - Whether the instructions
 - adequately describe the characteristics of the applicable financial reporting framework
 - provide for disclosures that are sufficient to comply with the requirements of the applicable financial reporting framework (for example, disclosure of related party relationships, related party transactions, and segment information)
 - provide for the identification of consolidation adjustments (for example, intragroup account balances, transactions, and unrealized profits or losses)
 - provide for the approval of the financial information by component management

Fraud (Ref: par. .20)

.A35 The auditor is required to identify and assess the risks of material misstatement of the financial statements due to fraud and to design and implement appropriate responses to the assessed risks.¹⁹ Information used to identify the risks of material misstatement of the group financial statements due to fraud may include the following:

- Group management's assessment of the risks that the group financial statements may be materially misstated as a result of fraud
- Group management's process for identifying and responding to the risks of fraud in the group, including any specific fraud risks identified by group management or account balances, classes of transactions, or disclosures for which a risk of fraud is likely
- Whether particular components exist for which a risk of fraud is likely
- How those charged with governance of the group monitor group management's processes for identifying and responding to the risks of fraud in the group and the controls group management has established to mitigate these risks
- Responses of those charged with governance of the group, group management, and internal audit (and, if considered appropriate, component management, the component auditors, and others) to the group engagement team's inquiry whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group

¹⁹ See section 240, *Consideration of Fraud in a Financial Statement Audit*.

Discussion Among Group Engagement Team Members and Component Auditors Regarding the Risks of Material Misstatement of the Group Financial Statements, Including Risks of Fraud (Ref: par. .20)

.A36 The key members of the engagement team are required to discuss the susceptibility of an entity to material misstatement of the financial statements due to fraud or error, specifically emphasizing the risks due to fraud. In a group audit, these discussions also may include the component auditors.^{20,21} The group engagement partner's determination of who to include in the discussions, how and when they occur, and their extent is affected by factors, such as prior experience with the group.

.A37 The discussions provide an opportunity to

- share knowledge of the components and their environments, including group-wide controls.
- exchange information about the business risks of the components or the group.
- exchange ideas about how and where the group financial statements may be susceptible to material misstatement due to fraud or error; how group management and component management could perpetrate and conceal fraudulent financial reporting; and how assets of the components could be misappropriated.
- identify practices followed by group or component management that may be biased or designed to manage earnings that could lead to fraudulent financial reporting (for example, revenue recognition practices that do not comply with the applicable financial reporting framework).
- consider known external and internal factors affecting the group that may create an incentive or pressure for group management, component management, or others to commit fraud; provide the opportunity for fraud to be perpetrated; or indicate a culture or environment that enables group management, component management, or others to rationalize committing fraud.
- consider the risk that group or component management may override controls.
- consider whether uniform accounting policies are used to prepare the financial information of the components for the group financial statements and, if not, how differences in accounting policies are identified and adjusted (when required by the applicable financial reporting framework).
- discuss fraud that has been identified in components or information that indicates the existence of a fraud in a component.
- share information that may indicate noncompliance with laws or regulations (for example, payments of bribes and improper transfer pricing practices).

Risk Factors (Ref: par. .21)

.A38 Appendix B, "Examples of Conditions or Events That May Indicate Risks of Material Misstatement of the Group Financial Statements," sets out

²⁰ Paragraph .15 of section 240.

²¹ Paragraph .11 of section 315.

examples of conditions or events that, individually or together, may indicate risks of material misstatement of the group financial statements, including risks due to fraud.

Risk Assessment (Ref: par. .21)

.A39 The group engagement team's assessment at group level of the risks of material misstatement of the group financial statements is based on information, such as the following:

- Information obtained from the understanding of the group, its components, and their environments and of the consolidation process, including audit evidence obtained in evaluating the design and implementation of group-wide controls and controls that are relevant to the consolidation
- Information obtained from the component auditors

Understanding a Component Auditor (Ref: par. .22)

Group Engagement Team's Procedures to Obtain an Understanding of a Component Auditor and Sources of Audit Evidence (Ref: par. .22)

.A40 Factors that may affect the group engagement partner's decisions whether to use the work of a component auditor to provide audit evidence for the group audit and whether to make reference to the audit of a component auditor in the auditor's report on the group financial statements include the following:

- Differences in the financial reporting framework applied in preparing the financial statements of the component and that applied in preparing the group financial statements
- Whether the audit of the financial statements of the component will be completed in time to meet the group reporting timetable
- Differences in the auditing and other standards applied by the component auditor and those applied in the audit of the group financial statements
- Whether it is impracticable for the group engagement team to be involved in the work of a component auditor

.A41 It will not be necessary to obtain an understanding of the auditors of those components for which the group engagement team plans to perform analytical procedures at group level only.

.A42 The nature, timing, and extent of the group engagement team's procedures to obtain an understanding of a component auditor are affected by factors, such as previous experience with, or knowledge of, the component auditor and the degree to which the group engagement team and the component auditor are subject to common policies and procedures, such as the following:

- Whether the group engagement team and a component auditor share the following:
 - Common policies and procedures for performing the work (for example, audit methodologies)
 - Common quality control policies and procedures
 - Common monitoring policies and procedures
- The consistency or similarity of the following:

- Laws and regulations or legal system
- Professional oversight, discipline, and external quality assurance
- Education and training
- Professional organizations and standards
- Language and culture

.A43 These factors interact and are not mutually exclusive. For example, the extent of the group engagement team's procedures to obtain an understanding of component auditor A, who consistently applies common quality control and monitoring policies and procedures and a common audit methodology or operates in the same jurisdiction as the auditor of the group financial statements, may be less than the extent of the group engagement team's procedures to obtain an understanding of component auditor B, who does not consistently apply common quality control and monitoring policies and procedures and a common audit methodology or operates in a different jurisdiction. The nature of the procedures performed regarding component auditors A and B also may be different.

.A44 The group engagement team may obtain an understanding of a component auditor in a number of ways. In the first year of involving a component auditor, the group engagement team may, for example

- determine through communication with a component auditor that
 - the component auditor is aware that
 - the financial statements of the component are to be included in the group financial statements on which the auditor of the group financial statements will report.
 - the component auditor's report thereon will be relied upon by the auditor of the group financial statements.
 - either the auditor of the group financial statements will make reference to the component auditor's report in the opinion on the group financial statements or the group engagement team will be involved in the work of the component auditor.
- a review will be made of matters affecting elimination of intercompany transactions and accounts and, if appropriate in the circumstances, the uniformity of accounting practices among the components included in the financial statements.
- evaluate the results of the quality control monitoring system when the group engagement team and component auditor are from a firm or network that operates under, and complies with, common monitoring policies and procedures.²²
- visit a component auditor to discuss the matters in paragraph .22a–d.
- request a component auditor to confirm the matters referred to in paragraph .22a–d in writing. Exhibit B, "Illustrative Component

²² Paragraph 57 of QC section 10, *A Firm's System of Quality Control*.

Auditor's Confirmation Letter," contains an example of written confirmations by a component auditor.

- request a component auditor to complete questionnaires about the matters in paragraph .22a–d.
- discuss a component auditor with colleagues in the group engagement partner's firm or with a reputable third party that has knowledge of the component auditor, such as other practitioners or bankers and other credit grantors.

In subsequent years, the understanding of a component auditor may be based on the group engagement team's previous experience with that component auditor. The group engagement team may request the component auditor to confirm whether anything regarding the matters listed in paragraph .22a–d has changed since the previous year.

.A45 Where independent oversight bodies have been established to oversee the auditing profession and monitor the quality of audits, awareness of the regulatory environment may assist the group engagement team in evaluating the independence and competence of a component auditor. Information about the regulatory environment and the public results of any inspections performed by oversight bodies may be obtained from the component auditor or information provided by the independent oversight bodies.

Ethical Requirements That Are Relevant to the Group Audit (Ref: par. .22a)

.A46 When performing work on the financial information of a component for a group audit, the component auditor is subject to ethical requirements that are relevant to the group audit. Such requirements may be different or in addition to those applying to the component auditor when performing an audit in the component auditor's jurisdiction. The group engagement team, therefore, obtains an understanding about the component auditor's understanding of, and compliance with, the ethical requirements that are relevant to the group audit and whether that is sufficient to fulfill the component auditor's responsibilities in the group audit. When the component auditor is not subject to the AICPA Code of Professional Conduct, compliance by the component auditor with the ethics and independence requirements set forth in the International Federation of Accountants *Code of Ethics for Professional Accountants* is sufficient to fulfill the component auditor's ethical responsibilities in the group audit.²³

A Component Auditor's Professional Competence (Ref: par. .22b)

.A47 Inquiries about the professional reputation and standing of a component auditor may be made of the AICPA, the state board of accountancy by which the component auditor is licensed, the applicable state society of CPAs, or the local chapter, or, in the case of an auditor from a foreign jurisdiction, the corresponding professional organization, and if applicable, the PCAOB. The group engagement team may obtain the peer review report, if available, on the component auditor's firm. Exhibit C, "Sources of Information," provides information about specific inquiries that may be directed to the AICPA.

²³ At its May 25–26, 2010, meeting, the AICPA Professional Ethics Executive Committee (PEEC) agreed that an AICPA member who is the group engagement partner of a U.S. consolidated entity should be considered to have performed an audit in accordance with generally accepted auditing standards, and in compliance with the AICPA Code of Professional Conduct, provided that component auditors that are not subject to the AICPA Code are in compliance with the ethics and independence requirements set forth in the International Federation of Accountants Code of Ethics. PEEC adopted a nonenforcement policy to this effect and agreed to pursue a revision to ET section 91, *Applicability*, of the code to make it authoritative.

.A48 The group engagement team's understanding of a component auditor's professional competence may include whether the component auditor

- possesses an understanding of the auditing and other standards applicable to the group audit, such as U.S. GAAS, that is sufficient to fulfill the component auditor's responsibilities.
- possesses the special skills (for example, industry-specific knowledge or knowledge of relevant financial reporting requirements for statements and schedules to be filed with regulatory agencies) necessary to perform the work on the financial information of the particular component.
- when relevant, possesses an understanding of the applicable financial reporting framework that is sufficient to fulfill the component auditor's responsibilities in the group audit (instructions issued by group management to components often describe the characteristics of the applicable financial reporting framework).

Application of the Group Engagement Team's Understanding of a Component Auditor (Ref: par. .23)

.A49 The group engagement team cannot overcome the fact that a component auditor is not independent by being involved in the work of the component auditor or by performing additional risk assessment or further audit procedures on the financial information of the component or by making reference in the auditor's report on the group financial statements to the audit of the component auditor.

.A50 However, the group engagement team may be able to overcome less than serious concerns about a component auditor's professional competency (for example, lack of industry-specific knowledge) or the fact that a component auditor does not operate in an environment that actively oversees auditors by being involved in the work of that component auditor or by performing additional risk assessment or further audit procedures on the financial information of the component.

.A51 When law or regulation prohibits access to relevant parts of the audit documentation of a component auditor, the group engagement team may request the component auditor to overcome this by preparing a memorandum that covers the relevant information.

Determining Whether to Make Reference to a Component Auditor in the Auditor's Report on the Group Financial Statements (Ref: par. .24)

.A52 In group audits involving two or more component auditors, the decision to make reference to the audit of a component auditor is made individually for each component auditor, regardless of the decision whether to refer to any other component auditor. The auditor of the group financial statements may make reference to any, all, or none of the component auditors. For example, if significant components are audited by a component auditor from a network firm and one component is audited by another firm, the group engagement partner may decide to assume responsibility for the work of the component auditor from the network firm and to make reference to the work of the component auditor from the other firm.

Determining Whether the Audit Was Conducted in Accordance With GAAS (Ref: par. .25a)

.A53 A component auditor's report stating that the audit was conducted in accordance with GAAS or, if applicable, the auditing standards promulgated by the PCAOB is sufficient to make the determination required by paragraph .25a. When the component auditor has performed an audit of the component financial statements in accordance with auditing standards other than GAAS or, if applicable, the auditing standards promulgated by the PCAOB, the group engagement partner may evaluate, exercising professional judgment, whether the audit performed by the component auditor meets the relevant requirements of GAAS. For the purposes of complying with paragraph .25a, relevant requirements of GAAS are those that pertain to planning and performing the audit of the component financial statements and do not include those related to the form of the auditor's report. Audits performed in accordance with International Standards on Auditing (ISAs) promulgated by the International Auditing and Assurance Standards Board (IAASB) are more likely to meet the relevant requirements of GAAS than audits performed in accordance with auditing standards promulgated by bodies other than the IAASB. The group engagement team may provide the component auditor with appendix B, *Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards*, that identifies substantive requirements of GAAS that are not requirements in the ISAs. The component auditor may perform additional procedures in order to meet the relevant requirements of GAAS. The communication requested of the component auditor required by paragraph .42 may address whether the audit of the component auditor met the relevant requirements of GAAS. The group engagement partner, having determined that all relevant requirements of GAAS have been met by the component auditor, may decide to make reference to the audit of that component auditor in the auditor's report on the group financial statements. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Determining Whether to Make Reference When the Financial Reporting Framework Is Not the Same (Ref: par. .26)

.A54 When the component's financial statements are prepared using a financial reporting framework that differs from the financial reporting framework used to prepare the group financial statements, the group engagement team is required by paragraph .37 to evaluate whether the financial information of the component has been appropriately adjusted for purposes of the preparation and fair presentation of the group financial statements in accordance with the applicable financial reporting framework. Evaluating whether the financial statements of the component have been appropriately adjusted to conform with the financial reporting framework used by the group is based on a depth of understanding of the component's financial statements that ordinarily is not obtained unless the auditor of the group financial statements assumes responsibility for, and, thus, is involved in, the work of the component auditor. In rare circumstances, however, the group engagement partner may conclude that the group engagement team can reasonably expect to obtain sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to assume responsibility for, and, thus, be involved in, the work of the component auditor. [Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A55 The greater the number of differences or the greater the significance of the differences between the criteria used for measurement, recognition, presentation, and disclosure of all material items in the component's financial statements under the financial reporting framework used by the component and the financial reporting framework used by the group, the less similar they are. Financial statements prepared and presented in accordance with International Financial Reporting Standards (IFRSs) and *International Financial Reporting Standard for Small and Medium-sized Entities*, as issued by the International Accounting Standards Board, are generally viewed as more similar to financial statements prepared and presented in accordance with accounting principles generally accepted in the United States of America (GAAP) than financial statements prepared and presented in accordance with jurisdiction-specific reporting frameworks or adaptations of IFRSs. In most cases, special purpose frameworks set forth in section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks*, are not similar to GAAP. [Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A56 Additional considerations in determining whether it may be appropriate to make reference to the audit of a component auditor in the auditor's report on the group financial statements when the component prepares financial statements using a different financial reporting framework than that used by the group include the

- effectiveness of groupwide controls and the adequacy of the consolidation process specifically related to the adjustments to convert the component's financial statements to the financial reporting framework used by the group, including the financial reporting competencies of personnel involved in the adjustments.
- depth of the group engagement team's understanding of the component and its environment, including the complexity of the events and transactions subject to the differing financial reporting requirements and the assessed risk of material misstatement related to the adjustments.
- extent of the group engagement team's knowledge of the financial reporting framework used to prepare the component financial statements.
- group engagement team's ability to obtain information from group or component management that is relevant to the adjustments.
- need and ability to seek, as necessary, the assistance of professionals possessing specialized skills or knowledge related to the adjustments.

[Paragraph added, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Considerations for Governmental Entities

.A57 When the applicable financial reporting framework used by the group provides for the inclusion of component financial statements that are prepared in accordance with a different financial reporting framework, the component financial statements are deemed to be in accordance with the applicable financial reporting framework used for the group financial statements. For example, both the financial reporting framework established by the Governmental

Accounting Standards Board and the financial reporting framework established by the Federal Accounting Standards Advisory Board have such provisions. Accordingly, when the provisions established by the applicable financial reporting framework for inclusion of those component financial statements have been followed, the requirements in paragraphs .26 and .28c are not relevant. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

Making Reference in the Auditor's Report (Ref: par. .28–.31)

.A58 The disclosure of the magnitude of the portion of the financial statements audited by a component auditor may be achieved by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly describes the portion of the financial statements audited by a component auditor. When two or more component auditors participate in the audit, the dollar amounts or the percentages covered by the component auditors may be stated in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A59 Reference in the auditor's report on the group financial statements to the fact that part of the audit was conducted by a component auditor is not to be construed as a qualification of the opinion, but rather is intended to communicate (1) that the auditor of the group financial statements is not assuming responsibility for the work of the component auditor, and (2) the source of the audit evidence with respect to those components for which reference to the audit of component auditors is made. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A60 Exhibit A contains examples of appropriate reporting in the auditor's report on the group financial statements when reference is made to the audit of a component auditor. [Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

.A61 If the modified opinion, emphasis-of-matter paragraph, or other-matter paragraph in the component auditor's report does not affect the report on the group financial statements and the component auditor's report is not presented, the auditor of the group financial statements need not make reference to those paragraphs in the auditor's report on the group financial statements. If the component auditor's report is presented, the auditor of the group financial statements may make reference to those paragraphs and their disposition. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A62 When the auditor of the group financial statements is assuming responsibility for the work of a component auditor, no reference is made to the component auditor in the report on the group audit because to do so may cause a reader to misinterpret the degree of responsibility being assumed. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Materiality (Ref: par. .32)

.A63 The auditor is required²⁴

- a.* when establishing the overall audit strategy

²⁴ Paragraphs .10–.11 of section 320.

- i. to determine materiality for the financial statements as a whole.
 - ii. to consider whether, in the specific circumstances of the entity, particular classes of transactions, account balances, or disclosures exist for which misstatements of lesser amounts than materiality for the financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements. In such circumstances, the auditor determines materiality to be applied to those particular classes of transactions, account balances, or disclosures.
- b. to determine performance materiality for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks.

In the context of a group audit, materiality is established for both the group financial statements as a whole and the financial information of those components on which the group engagement team will perform, or request a component auditor to perform, an audit or review. Materiality for the group financial statements as a whole is used when establishing the overall group audit strategy. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A64 Different materiality may be established for different components. The aggregate of component materiality may exceed group materiality. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A65 Consideration of all components, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of a component auditor, is necessary when determining component materiality to reduce the risk that the aggregate of detected and undetected misstatements in the group financial statements exceeds materiality for the group financial statements as a whole. Determining component materiality is necessary for the group engagement team to determine the overall group audit plan for the components for which the auditor of the group financial statements is not making reference to the component auditor. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A66 When the component is subject to an audit required by law or regulation or performed for another reason, the materiality used by the component auditor for purposes of such audit ordinarily can be expected to be less than the group materiality and, accordingly, be acceptable for purposes of the group audit. In the case of an equity method investment, the investee may be larger than the investor, and the auditor's evidence to support the investor's share of earnings from the investment may consist largely of the audited financial statements of the investee. In such cases, the materiality used by the investee's auditor may be larger than the materiality used by the investor's auditor. When such circumstances exist, the group engagement team may take into consideration matters such as the group's ownership percentage and its share of the investee's profits and losses when determining whether the component materiality used by the investee's auditor is appropriate for purposes of the audit of the group financial statements. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A67 A threshold for misstatements is determined in addition to component materiality. Misstatements identified in the financial information of the component that are above the threshold for misstatements of the group are

communicated to the group engagement team. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Responding to Assessed Risks (Ref: par. .33)

.A68 In an audit of group financial statements, appropriate responses to assessed risks of material misstatement for some or all accounts or classes of transactions may be implemented at the group level, without the involvement of component auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Consolidation Process

Consolidation Adjustments and Reclassifications (Ref: par. .36)

.A69 The consolidation process may require adjustments to amounts reported in the group financial statements that do not pass through the usual transaction processing systems and may not be subject to the same internal controls to which other financial information is subject. The group engagement team's evaluation of the appropriateness, completeness, and accuracy of the adjustments may include the following:

- Evaluating whether significant adjustments appropriately reflect the events and transactions underlying them
- Determining whether significant adjustments have been correctly calculated, processed, and authorized by group management and, when applicable, by component management
- Determining whether significant adjustments are properly supported and sufficiently documented
- Checking the reconciliation and elimination of intragroup account balances, transactions, and unrealized profits or losses
- Communicating with the component auditor, regardless of whether reference is made in the auditor's report on the group financial statements to the audit of the component auditor.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Subsequent Events (Ref: par. .40)

.A70 When the auditor's report on the group financial statements will make reference to the audit of a component auditor, procedures designed to identify subsequent events between the date of the component auditor's report and the date of the auditor's report on the group financial statements may include

- obtaining an understanding of any procedures that group management has established to ensure that such subsequent events are identified.
- requesting the component auditor to update subsequent events procedures to the date of the auditor's report on the group financial statements.
- requesting written representation from component management regarding subsequent events.

- reading available interim financial information of the component and making inquiries of group management.
- reading minutes of meetings of the governing board, or any other administrative board with management oversight, held since the financial statement date.
- reading the subsequent year's capital and operating budgets.
- inquiring of group management regarding currently known facts, decisions, or conditions that are expected to have a significant effect on financial position or results of operations for items that represent subsequent events.
- considering the implications for the auditor's report on the group financial statements if the group engagement team has been unable to obtain sufficient appropriate audit evidence regarding subsequent events.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Sufficiency and Appropriateness of Audit Evidence (Ref: par. .44–.45)

.A71 If the group engagement team concludes that sufficient appropriate audit evidence on which to base the group audit opinion has not been obtained, the group engagement team may request a component auditor to perform additional procedures. Alternatively, the group engagement team may perform its own procedures on the financial information of the component. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A72 The group engagement partner's evaluation of the aggregate effect of any misstatements (either identified by the group engagement team or communicated by component auditors) allows the group engagement partner to determine whether the group financial statements as a whole are materially misstated. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Group Management and Those Charged With Governance of the Group

Communication With Group Management (Ref: par. .46–.48)

.A73 Section 240, *Consideration of Fraud in a Financial Statement Audit*, contains requirements and guidance on communication of fraud to management and, when management may be involved in the fraud, those charged with governance.²⁵ [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A74 Group management may need to keep certain material sensitive information confidential. Examples of matters that may be significant to the financial statements of the component of which component management may be unaware include the following:

²⁵ Paragraphs .39–.41 of section 240.

- Potential litigation
- Plans for abandonment of material operating assets
- Subsequent events
- Significant legal agreements

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With Those Charged With Governance of the Group (Ref: par. .49)

.A75 The matters the group engagement team communicates to those charged with governance of the group may include those brought to the attention of the group engagement team by component auditors that the group engagement team judges to be significant to the responsibilities of those charged with governance of the group. Communication with those charged with governance of the group takes place at various times during the group audit. For example, the matters referred to in paragraph .49a–b may be communicated after the group engagement team has determined the work to be performed on the financial information of the components. On the other hand, the matter referred to in paragraph .49c may be communicated at the end of the audit, and the matters referred to in paragraph .49d–e may be communicated when they occur. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Additional Requirements Applicable When Assuming Responsibility for the Work of a Component Auditor

Materiality (Ref: par. .51)

.A76 Component materiality for those components whose financial information will be audited or reviewed as part of the group audit in accordance with paragraphs .53, .54a, and .56, is communicated to the component auditor and is used by the component auditor to evaluate whether uncorrected detected misstatements are material, individually or in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A77 In the case of an audit of the financial information of a component, section 320, *Materiality in Planning and Performing an Audit*, requires the component auditor (or group engagement team) to determine performance materiality for purposes of assessing the risks of material misstatement of the financial information of the component and to design further audit procedures in response to assessed risks.²⁶ This is necessary to reduce the risk that the aggregate of detected and undetected misstatements in the financial information of the component exceeds component materiality. In practice, the group engagement team may set component materiality at the level of performance materiality for the component. When this is the case, the component auditor uses component materiality for purposes of assessing the risks of material misstatement of the financial information of the component and to design further audit procedures in response to assessed risks, as well as for evaluating whether detected misstatements are material individually or in the aggregate. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

²⁶ Paragraph .11 of section 320.

Determining the Type of Work to Be Performed on the Financial Information of Components

Significant Components (Ref: par. .53–.54)

.A78 Adapting an audit of the financial information of a significant component to meet the specific needs of the group engagement team may include requesting the component auditor to

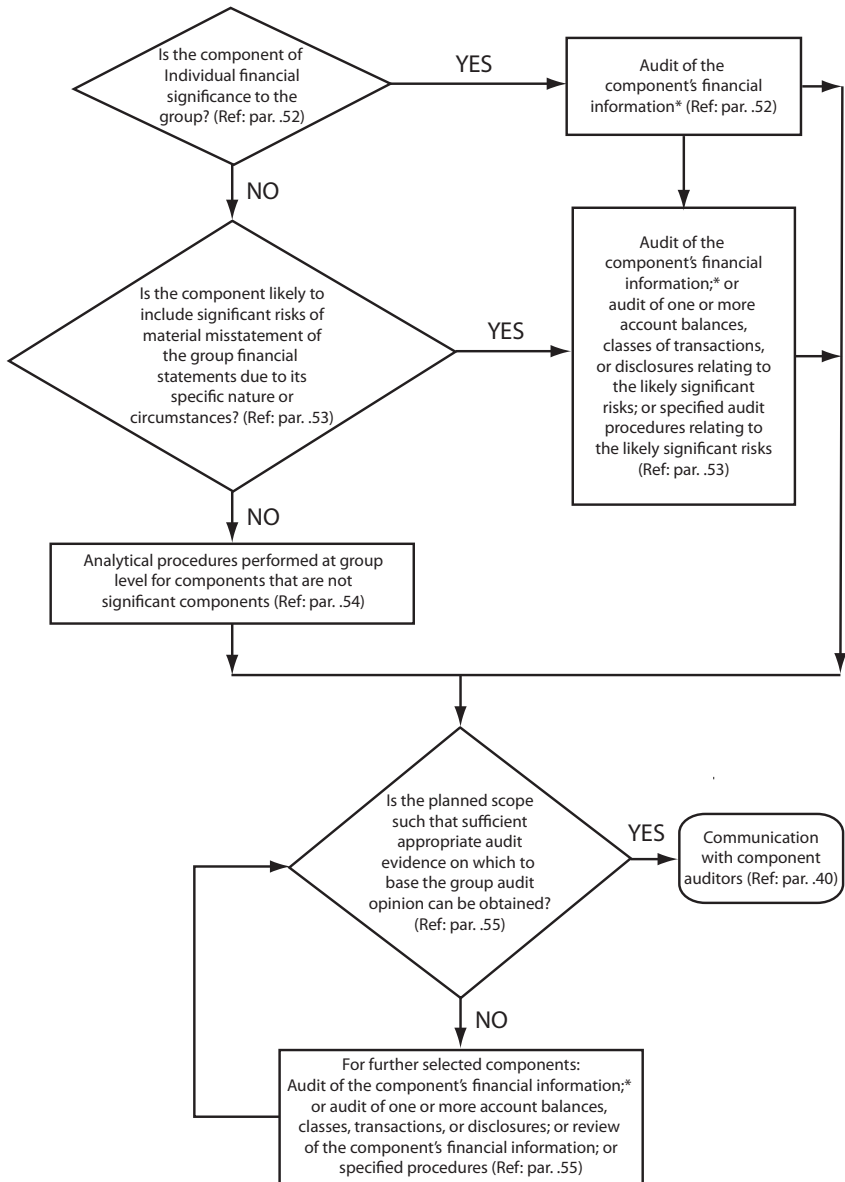

- perform an audit, using component materiality, in accordance with GAAS, with the exception of performing audit procedures on, for example, tax accounts or litigation, claims, and assessments because those procedures are performed at the group level.
- communicate the results of the audit in a form that is responsive to the needs of the group engagement team.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A79 The group engagement team's determination of the type of work to be performed on the financial information of a component and its involvement in the work of the component auditor is affected by the following:

- a. The significance of the component
- b. The identified significant risks of material misstatement of the group financial statements
- c. The group engagement team's evaluation of the design of group-wide controls and the determination of whether they have been implemented
- d. The group engagement team's understanding of the component auditor

The following diagram shows how the significance of the component affects the group engagement team's determination of the type of work to be performed on the financial information of the component.

*Adapted as necessary to meet the needs of the group engagement team using component materiality.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A80 The group engagement team may identify a component as a significant component because that component is likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances. In that case, the group engagement team may be able to identify the account balances, classes of transactions, or disclosures affected by the likely significant risks. When this is the case, the group engagement team may decide to perform or request a component auditor to perform an audit, adapted as necessary to meet the needs of the group engagement team, of only those account balances, classes of transactions, or disclosures. For example, in the situation described in paragraph .A7, the work on the financial information of the component may be limited to an audit of the account balances, classes of transactions, and disclosures affected by the foreign exchange trading of that component. When the group engagement team requests a component auditor to perform an audit of one or more specific account balances, classes of transactions, or disclosures, the communication of the group engagement team (see paragraph .41) takes account of the fact that many financial statement items are interrelated. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A81 The group engagement team may design audit procedures that respond to a likely significant risk of material misstatement of the group financial statements. For example, in the case of a likely significant risk of inventory obsolescence, the group engagement team may perform or request a component auditor to perform specified audit procedures on the valuation of inventory at a component that holds a large volume of potentially obsolete inventory but that is not otherwise significant. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Components That Are Not Significant Components (Ref: par. .55–.56)

.A82 Depending on the circumstances of the engagement, the financial information of the components may be aggregated at various levels for purposes of the analytical procedures. The results of the analytical procedures corroborate the group engagement team's conclusions that no significant risks of material misstatement exist of the aggregated financial information of components that are not significant components. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A83 The group engagement team's decision about how many components to select in accordance with paragraph .56, which components to select, and the type of work to be performed on the financial information of the individual components selected may be affected by factors, such as the following:

- The extent of audit evidence expected to be obtained on the financial information of the significant components
- Whether the component has been newly formed or acquired
- Whether significant changes have taken place in the component
- Whether internal audit has performed work at the component and any effect of that work on the group audit
- Whether the components apply common systems and processes
- The operating effectiveness of group-wide controls
- Abnormal fluctuations identified by analytical procedures performed at group level

- The individual financial significance of, or the risk posed by, the component in comparison with other components within this category
- Whether the component is subject to an audit required by law or regulation or performed for another reason

Including an element of unpredictability in selecting components in this category may increase the likelihood of identifying material misstatement of the components' financial information. The selection of components is often varied on a cyclical basis. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A84 An audit of a component that is not a significant component may have already been performed. Once the group engagement team decides to use that work to provide audit evidence for the group audit, the provisions of this section apply. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A85 A review of the financial information of a component may be performed in accordance with Statements on Standards for Accounting and Review Services, adapted as necessary in the circumstances. A review is designed to obtain only limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with the applicable financial reporting framework. The group engagement team also may specify additional procedures to supplement this work. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A86 As explained in paragraph .A19, a group may consist only of components that are not significant components. In these circumstances, the group engagement team can obtain sufficient appropriate audit evidence on which to base the group audit opinion by determining the type of work to be performed on the financial information of the components, in accordance with paragraph .56. It is unlikely that the group engagement team will obtain sufficient appropriate audit evidence on which to base the group audit opinion if the group engagement team or a component auditor only tests group-wide controls and performs analytical procedures on the financial information of the components. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Involvement in the Work Performed by Component Auditors ***(Ref: par. .57–.58)***

.A87 Factors that may affect the group engagement team's involvement in the work of a component auditor include the following:

- a. The significance of the component
- b. The identified significant risks of material misstatement of the group financial statements
- c. The group engagement team's understanding of the component auditor

In the case of a significant component or identified significant risks, the group engagement team performs the procedures described in paragraphs .57–.58. In the case of a component that is not a significant component, the nature, timing, and extent of the group engagement team's involvement in the work of the component auditor will vary based on the group engagement team's understanding of that component auditor. The fact that the component is not a significant component becomes secondary. For example, even though a component is not considered a significant component, the group engagement team, nevertheless, may decide to be involved in the component auditor's risk assessment because it

has concerns (although less than serious concerns) about the component auditor's professional competency (for example, lack of industry-specific knowledge), or the component auditor does not operate in an environment that actively oversees auditors. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A88 Forms of involvement in the work of a component auditor other than those described in paragraphs .43 and .57–.58 may, based on the group engagement team's understanding of the component auditor, include one or more of the following:

- Meeting with component management or the component auditor to obtain an understanding of the component and its environment.
- Reviewing the component auditor's overall audit strategy and audit plan.
- Performing risk assessment procedures to identify and assess the risks of material misstatement at the component level. These may be performed with the component auditor or by the group engagement team.
- Designing and performing further audit procedures. These may be designed and performed with the component auditor or by the group engagement team.
- Participating in the closing and other key meetings between the component auditor and component management.
- Reviewing other relevant parts of the component auditor's audit documentation.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Communication With a Component Auditor (Ref: par. .60)

.A89 If effective two-way communication does not exist between the group engagement team and component auditors, whose work the auditor of the group financial statements is assuming responsibility for, a risk exists that the group engagement team may not obtain sufficient appropriate audit evidence on which to base the group audit opinion. Clear and timely communication of the group engagement team's requirements forms the basis of effective two-way communication between the group engagement team and a component auditor. This two-way communication also may be initiated by the component auditor regarding matters that may be significant to the component audit such as

- transactions, adjustments, or other matters that have come to the group engagement team's attention that it believes require adjustment to or disclosure in the financial statements of the component being audited by the component auditor.
- any relevant limitation on the scope of the audit performed by the group engagement team.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A90 The group engagement team's requirements often are communicated in a letter of instruction. Appendix C, "Required and Additional Matters Included in the Group Engagement Team's Letter of Instruction," contains guidance on required and additional matters that may be included in such a letter of instruction. A component auditor's communication with the group engagement team often takes the form of a memorandum or report of work performed. Communication between the group engagement team and a component auditor, however, may not necessarily be in writing. For example, the group engagement

team may visit the component auditor to discuss identified significant risks or review relevant parts of the component auditor's audit documentation. Nevertheless, the documentation requirements of this section and other AU-C sections apply. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A91 In cooperating with the group engagement team, a component auditor, for example, would provide the group engagement team with access to relevant audit documentation, if not prohibited by law or regulation. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A92 When a member of the group engagement team is also a component auditor, the objective for the group engagement team to communicate clearly with the component auditor often can be achieved by means other than specific written communication. For example

- access by the component auditor to the overall audit strategy and audit plan may be sufficient to communicate the group engagement team's requirements set out in paragraph .41.
- a review of the component auditor's audit documentation by the group engagement team may be sufficient to communicate matters relevant to the group engagement team's conclusion set out in paragraph .42.

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Reviewing a Component Auditor's Audit Documentation (Ref: par. .62)

.A93 The parts of the audit documentation of a component auditor that will be relevant to the group audit may vary depending on the circumstances. Often, the focus is on audit documentation that is relevant to the significant risks of material misstatement of the group financial statements. The extent of the review may be affected by the fact that a component auditor's audit documentation has been subjected to the review procedures of the component auditor's firm. [Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A94

Appendix A—Understanding the Group, Its Components, and Their Environments—Examples of Matters About Which the Group Engagement Team Obtains an Understanding (Ref: par. .A31)

The examples provided cover a broad range of matters; however, not all matters are relevant to every group audit engagement, and the list of examples is not necessarily complete.

Group-Wide Controls

Group-wide controls may include a combination of the following:

- Regular meetings between group and component management to discuss business developments and review performance
- Monitoring of components' operations and their financial results, including regular reporting routines, which enables group management to monitor components' performance against budgets and take appropriate action
- Group management's risk assessment process (that is, the process for identifying, analyzing, and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements)
- Monitoring, controlling, reconciling, and eliminating intragroup account balances, transactions, and unrealized profits or losses at group level
- A process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components
- A central IT system controlled by the same general IT controls for all or part of the group
- Control activities within an IT system that are common for all or some components
- Monitoring of controls, including activities of internal audit and self-assessment programs
- Consistent policies and procedures, including a group financial reporting procedures manual
- Group-wide programs, such as codes of conduct and fraud prevention programs
- Arrangements for assigning authority and responsibility to component management

Internal audit may be regarded as part of group-wide controls, for example, when the internal audit function is centralized. Section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*,

addresses the group engagement team's evaluation of the competence and objectivity of the internal auditors when it plans to use their work.¹

Consolidation Process

The group engagement team's understanding of the consolidation process may include matters such as the following:

- Matters relating to the applicable financial reporting framework, such as the following:
 - The extent to which component management has an understanding of the applicable financial reporting framework
 - The process for identifying and accounting for components, in accordance with the applicable financial reporting framework
 - The process for identifying reportable segments for segment reporting, in accordance with the applicable financial reporting framework
 - The process for identifying related party relationships and related party transactions for reporting, in accordance with the applicable financial reporting framework
 - The accounting policies applied to the group financial statements, changes from those of the previous financial year, and changes resulting from new or revised standards under the applicable financial reporting framework
 - The procedures for dealing with components with financial year-ends different from the group's year-end
- Matters relating to the consolidation process, such as the following:
 - Group management's process for obtaining an understanding of the accounting policies used by components and, when applicable, ensuring that uniform accounting policies are used to prepare the financial information of the components for the group financial statements and that differences in accounting policies are identified and adjusted, when required, in terms of the applicable financial reporting framework. Uniform accounting policies are the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the components use to report

¹ Paragraphs .10–.11 of section 610, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*. SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and was previously codified as AU section 322 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, redesignated AU section 322 as AU-C section 610, which will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.

- Group management's process for ensuring complete, accurate, and timely financial reporting by the components for the consolidation.
 - The process for translating the financial information of foreign components into the currency of the group financial statements.
 - How IT is organized for the consolidation, including the manual and automated stages of the process and the manual and programmed controls in place at various stages of the consolidation process.
 - Group management's process for obtaining information on subsequent events.
- Matters relating to consolidation adjustments, such as the following:
 - The process for recording consolidation adjustments, including the preparation, authorization, and processing of related journal entries and the experience of personnel responsible for the consolidation
 - The consolidation adjustments required by the applicable financial reporting framework
 - Business rationale for the events and transactions that gave rise to the consolidation adjustments
 - Frequency, nature, and size of transactions between components
 - Procedures for monitoring, controlling, reconciling, and eliminating intragroup account balances, transactions, and unrealized profits or losses
 - Steps taken to arrive at the fair value of acquired assets and liabilities, procedures for amortizing goodwill (when applicable), and impairment testing of goodwill, in accordance with the applicable financial reporting framework
 - Arrangements with a controlling interest or noncontrolling interest regarding losses incurred by a component (for example, an obligation of the noncontrolling interest to compensate such losses)

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A95

Appendix B—Examples of Conditions or Events That May Indicate Risks of Material Misstatement of the Group Financial Statements (Ref: par. .A38)

The examples provided cover a broad range of conditions or events; however, not all conditions or events are relevant to every group audit engagement, and the following list of examples is not necessarily complete:

- A complex group structure, especially when there are frequent acquisitions, disposals, or reorganizations
- Poor corporate governance structures, including decision-making processes, that are not transparent
- Nonexistent or ineffective group-wide controls, including inadequate group management information on monitoring of components' operations and their results
- Components operating in foreign jurisdictions that may be exposed to factors, such as unusual government intervention in areas such as trade and fiscal policy, restrictions on currency and dividend movements, and fluctuations in exchange rates
- Business activities of components that involve high risk, such as long-term contracts or trading in innovative or complex financial instruments
- Uncertainties regarding which components' financial information requires incorporation in the group financial statements, in accordance with the applicable financial reporting framework (for example, whether any special purpose entities or nontrading entities exist and require incorporation)
- Unusual related party relationships and transactions
- Prior occurrences of intragroup account balances that did not balance or reconcile on consolidation
- The existence of complex transactions that are accounted for in more than one component
- Components' application of accounting policies that differ from those applied to the group financial statements
- Components with different financial year-ends, which may be utilized to manipulate the timing of transactions
- Prior occurrences of unauthorized or incomplete consolidation adjustments
- Aggressive tax planning within the group or large cash transactions with entities in tax havens
- Frequent changes of auditors engaged to audit the financial statements of components

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A96

Appendix C—Required and Additional Matters Included in the Group Engagement Team’s Letter of Instruction (Ref: par. .A87)

The following matters are relevant to the planning of the work of a component auditor:

[Required matters are italicized.]

- *A request for the component auditor, knowing the context in which the group engagement team will use the work of the component auditor, to confirm that the component auditor will cooperate with the group engagement team*
- The timetable for completing the audit
- Dates of planned visits by group management and the group engagement team and dates of planned meetings with component management and the component auditor
- A list of key contacts
- *The work to be performed by the component auditor, the use to be made of that work, and arrangements for coordinating efforts at the initial stage of and during the audit, including the group engagement team's planned involvement in the work of the component auditor*
- *The ethical requirements that are relevant to the group audit and, in particular, the independence requirements*
- *In the case of an audit or review of the financial information of the component, component materiality*
- *In the case of an audit or review of, or specified audit procedures performed on, the financial information of the component, the threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements*
- *A list of related parties prepared by group management and any other related parties of which the group engagement team is aware and a request that the component auditor communicates on a timely basis to the group engagement team related parties not previously identified by group management or the group engagement team*
- Work to be performed on intragroup account balances, transactions, and unrealized profits or losses
- Guidance on other statutory reporting responsibilities (for example, reporting on group management's assertion on the effectiveness of internal control)
- When a time lag between completion of the work on the financial information of the components and the group engagement team's conclusion on the group financial statements is likely, specific instructions for a subsequent events review

The following matters are relevant to the conduct of the work of the component auditor:

- The findings of the group engagement team's tests of control activities of a processing system that is common for all or some components and tests of controls to be performed by the component auditor
- *Identified significant risks of material misstatement of the group financial statements, due to fraud or error, that are relevant to the work of the component auditor and a request that the component auditor communicates on a timely basis any other significant risks of material misstatement of the group financial statements, due to fraud or error, identified in the component and the component auditor's response to such risks*
- The findings of internal audit, based on work performed on controls at or relevant to components
- A request for timely communication of audit evidence obtained from performing work on the financial information of the components that contradicts the audit evidence on which the group engagement team originally based the risk assessment performed at group level
- A request for a written representation on component management's compliance with the applicable financial reporting framework or a statement that differences between the accounting policies applied to the financial information of the component and those applied to the group financial statements have been disclosed
- Matters to be documented by the component auditor

Other information, such as the following:

- A request that the following be reported to the group engagement team on a timely basis:
 - Significant accounting, financial reporting, and auditing matters, including accounting estimates and related judgments
 - Matters relating to the going concern status of the component
 - Matters relating to litigation and claims
 - Material weaknesses in controls that have come to the attention of the component auditor during the performance of the work on the financial information of the component and information that indicates the existence of fraud
- A request that the group engagement team be notified of any significant or unusual events as early as possible
- A request that the matters listed in paragraph .49 be communicated to the group engagement team when the work on the financial information of the component is completed

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A97

Exhibit A—Illustrations of Auditor’s Reports on Group Financial Statements

Illustration 1—A Report With a Qualified Opinion When the Group Engagement Team Is Not Able to Obtain Sufficient Appropriate Audit Evidence on Which to Base the Group Audit Opinion (Ref: par. .A27)

Illustration 2—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Generally Accepted Auditing Standards (Ref: par. .A60)

Illustration 3—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using a Different Financial Reporting Framework From That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With GAAS (Ref: par. .A60)

Illustration 4—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Auditing Standards Other Than GAAS (Ref: par. .A60)

Illustration 1—A Report With a Qualified Opinion When the Group Engagement Team Is Not Able to Obtain Sufficient Appropriate Audit Evidence on Which to Base the Group Audit Opinion

In this example, the group engagement team is unable to obtain sufficient appropriate audit evidence relating to a significant component accounted for by the equity method because the group engagement team was unable to obtain the audited financial statements of the component as of December 31, 20X1 and 20X0, including the auditor's report thereon. In this example, the auditor of the group financial statements is not making reference to the report of a component auditor.

In the auditor's professional judgment, the effect on the group financial statements of this inability to obtain sufficient appropriate audit evidence is material but not pervasive.

If, in the auditor's professional judgment, the effect on the group financial statements of the inability to obtain sufficient appropriate audit evidence is material and pervasive, the auditor would disclaim an opinion, in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Independent Auditor's Report

[Appropriate Addressee]

Report on the Consolidated Financial Statements¹

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor

¹ The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.² Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Basis for Qualified Opinion

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at \$_____ and \$_____ at December 31, 20X1 and 20X0, respectively, or its equity in earnings of that affiliate of \$_____ and \$_____, which is included in net income for the years then ended as described in Note X to the consolidated financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in its earnings by other auditing procedures.

Qualified Opinion

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion paragraph, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Auditor's signature]

[Auditor's city and state]

[Date of the auditor's report]

² In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion." would not be included.

Illustration 2—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Generally Accepted Auditing Standards

In this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a component auditor in accordance with generally accepted auditing standards (GAAS).

Independent Auditor's Report

[Appropriate Addressee]

Report on the Consolidated Financial Statements¹

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements,

¹ The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.² Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Auditor's signature]

[Auditor's city and state]

[Date of the auditor's report]

² In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion." would not be included.

Illustration 3—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using a Different Financial Reporting Framework From That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With GAAS

In this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using a different financial reporting framework than that used for the group financial statements and performed by a component auditor in accordance with GAAS.

Independent Auditor's Report

[Appropriate Addressee]

Report on the Consolidated Financial Statements¹

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements, which were prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, were audited by other auditors, whose report has been furnished to us. We have applied audit procedures on the conversion adjustments to the financial statements of B Company, which conform those financial statements to accounting principles generally accepted in the United States of America. Our opinion, insofar as it relates to the amounts included for B Company, prior to these conversion adjustments, is based solely on the report of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

¹ The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.² Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Auditor's signature]

[Auditor's city and state]

[Date of the auditor's report]

² In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion." would not be included.

Illustration 4—A Report in Which the Auditor of the Group Financial Statements Is Making Reference to the Audit of the Financial Statements of a Component Prepared Using the Same Financial Reporting Framework as That Used for the Group Financial Statements and Performed by a Component Auditor in Accordance With Auditing Standards Other Than GAAS

In this example, the auditor of the group financial statements is making reference to the audit of the financial statements of a component prepared using the same financial reporting framework as that used for the group financial statements and performed by a component auditor in accordance with auditing standards other than GAAS or standards promulgated by the Public Company Accounting Oversight Board. The group engagement partner has determined that the component auditor performed additional audit procedures to meet the relevant requirements of GAAS. If additional procedures were not necessary for the audit of the component auditor to meet the relevant requirements of GAAS, illustration 2 is applicable.

Independent Auditor's Report

[Appropriate Addressee]

Report on the Consolidated Financial Statements¹

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of B Company, a wholly-owned subsidiary, which statements reflect total assets constituting 20 percent and 22 percent, respectively, of consolidated total assets at December 31, 20X1 and 20X0, and total revenues constituting 18 percent and 20 percent, respectively, of consolidated total revenues for the years then ended. Those statements were audited by other auditors in accordance with *[describe the set of auditing standards]*, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for B Company, is based solely on the report of, and additional audit procedures to meet the relevant requirements of auditing standards generally accepted in the United States

¹ The subtitle "Report on the Consolidated Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

of America performed by, the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.² Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, based on our audits and the report of, and additional audit procedures performed by, the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Auditor's signature]

[Auditor's city and state]

[Date of the auditor's report]

[Paragraph renumbered and amended, effective for audits of group financial statements for periods ending on or after December 15, 2012, by SAS No. 127.]

² In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion." would not be included.

Exhibit B—Illustrative Component Auditor’s Confirmation Letter (Ref: par. .A44)

The following is not intended to be a standard letter. Confirmations may vary from one component auditor to another and from one period to the next. In this example, confirmations expected only when the auditor of the group financial statements is assuming responsibility have been italicized.

Confirmations often are obtained before work on the financial information of the component commences.

[Component Auditor Letterhead]

[Date]

[To Audit Firm]

This letter is provided in connection with your audit of the group financial statements of *[name of parent]* as of and for the year ended *[date]* for the purpose of expressing an opinion on whether the group financial statements present fairly, in all material respects, the financial position of the group as of *[date]* and of the results of its operations and its cash flows for the year then ended in accordance with *[indicate applicable financial reporting framework]*.

We acknowledge receipt of your instructions dated *[date]*, requesting us to perform the specified work on the financial information of *[name of component]* as of and for the year ended *[date]*.

We confirm that:

1. *We will be able to comply with the instructions. / We advise you that we will not be able to comply with the following instructions [specify instructions] for the following reasons [specify reasons].*
2. *The instructions are clear, and we understand them. / We would appreciate it if you could clarify the following instructions [specify instructions].*
3. *We will cooperate with you and provide you with access to relevant audit documentation.*

We acknowledge that:

1. The financial information of *[name of component]* will be included in the group financial statements of *[name of parent]*.
2. *You may consider it necessary to be further involved in the work you have requested us to perform on the financial information of [name of component] as of and for the year ended [date].*
3. *You intend to evaluate and, if considered appropriate, use our work for the audit of the group financial statements of [name of parent].*

In connection with the work that we will perform on the financial information of *[name of component]*, a *[describe component, e.g., wholly-owned subsidiary, subsidiary, joint venture, investee accounted for by the equity or cost methods of accounting]* of *[name of parent]*, we confirm the following:

1. We have an understanding of *[indicate relevant ethical requirements]* that is sufficient to fulfill our responsibilities in the audit of the group financial statements and will comply therewith. In particular, and with respect to *[name of parent]* and the other components in the group, we are independent within the meaning of

[*indicate relevant ethical requirements*] and comply with the applicable requirements of [*refer to rules*] promulgated by [*name of regulatory agency*].

2. We have an understanding of auditing standards generally accepted in the United States of America and [*indicate other auditing standards applicable to the audit of the group financial statements, such as Government Auditing Standards*] that is sufficient to fulfill our responsibilities in the audit of the group financial statements and will conduct our work on the financial information of [*name of component*] as of and for the year ended [*date*] in accordance with those standards.
3. We possess the special skills (e.g., industry specific knowledge) necessary to perform the work on the financial information of the particular component.
4. We have an understanding of [*indicate applicable financial reporting framework or group financial reporting procedures manual*] that is sufficient to fulfill our responsibilities in the audit of the group financial statements.

We will inform you of any changes in the above representations during the course of our work on the financial information of [*name of component*].

[*Auditor's signature*]

Illustration of Potential Component Auditor Representations in Governmental Entities and Not-for-Profit Organizations

5. We have an understanding of relevant laws and regulations that may have a direct and material effect on the financial statements of [*name of component*]. In particular, we have an understanding of [*indicate relevant laws and regulations*].

[Paragraph renumbered by the issuance of SAS No. 127, January 2013.]

.A99**Exhibit C—Sources of Information (Ref: par. .A47)**

The AICPA Professional Ethics Team can respond to inquiries about whether individuals are members of the AICPA and whether complaints against members have been adjudicated by the Joint Trial Board. The team cannot respond to inquiries about public accounting firms or provide information about letters of required corrective action issued by the team or pending disciplinary proceedings or investigations. The AICPA Peer Review Program staff or the applicable state CPA society administering entity can respond to inquiries about whether specific public accounting firms are enrolled in the AICPA Peer Review Program and the date of acceptance and the period covered by the firm's most recently accepted peer review. AU-C Section 9600***Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors): Auditing Interpretations of Section 600*****New GASB Pension Standards**

In June 2012, the Governmental Accounting Standards Board (GASB) issued two new standards that will substantially change the accounting and financial reporting of public employee pension plans and the state and local governments that participate in such plans. GASB Statement No. 67, *Financial Reporting for Pension Plans*, revises existing guidance for the financial reports of most governmental pension plans. GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, revises and establishes new financial reporting requirements for most governments that provide their employees with pension benefits. GASB Statement No. 67 is effective for financial statements for periods beginning after June 15, 2013. GASB Statement No. 68 is effective for financial statements for fiscal years beginning after June 15, 2014.

Interpretation No. 1, "Auditor of Participating Employer in a Governmental Pension Plan," (paragraphs .01–.02) is intended to assist both plan and employer auditors who are auditing entities that have implemented the new accounting standards.

1. Auditor of Participating Employer in a Governmental Pension Plan

.01 Question—Many governmental entities (employers) provide pension benefits to their employees through governmental pension plans. In order to report pension amounts in accordance with GASB Statement No. 68, employers obtain certain information (for example, net pension liability) from the governmental pension plan. In this circumstance, is the governmental pension plan considered a component of the employer for purposes of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*?

.02 Interpretation—No. In this circumstance, a governmental pension plan is not a component of the employer for purposes of section 600. Accordingly, it would not be appropriate for an employer auditor to make reference to the audit report of the governmental pension plan auditor.

[Issue Date: April 2014.]

AU-C Section 610

Using the Work of Internal Auditors

Source: SAS No. 128.

Effective for audits of financial statements for periods ending on or after December 15, 2014.

Introduction

Scope of This Section

.01 This section addresses the external auditor's responsibilities if using the work of internal auditors. Using the work of internal auditors includes (a) using the work of the internal audit function in obtaining audit evidence and (b) using internal auditors to provide direct assistance under the direction, supervision, and review of the external auditor.

.02 This section does not apply if the entity does not have an internal audit function. (Ref: par. .A1–.A2)

.03 If the entity has an internal audit function, the requirements in this section relating to using the work of the internal audit function in obtaining audit evidence do not apply if

- a. the responsibilities and activities of the function are not relevant to the audit, or
- b. based on the external auditor's preliminary understanding of the function obtained as a result of procedures performed under section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, the external auditor does not expect to use the work of the function in obtaining audit evidence.

Nothing in this section requires the external auditor to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor; it remains the external auditor's decision to establish the overall audit strategy.

.04 Furthermore, the requirements in this section relating to using internal auditors to provide direct assistance do not apply if the external auditor does not plan to use internal auditors to provide direct assistance.

Relationship Between Section 315 and This Section

.05 Many entities establish internal audit functions as part of their internal control and governance structures. The objectives and scope of an internal audit function, the nature of its responsibilities, and its organizational status, including the function's authority and accountability, vary widely and depend on the size and structure of the entity and the requirements of management and those charged with governance. section 315 addresses how the knowledge and experience of the internal audit function can inform the external auditor's

understanding of the entity and its environment and identification and assessment of risks of material misstatement. section 315¹ also explains how effective communication between the internal and external auditors creates an environment in which the external auditor can be informed by the internal auditor of significant matters that may affect the external auditor's work.

.06 The external auditor may be able to use the work of the internal audit function in obtaining audit evidence in a constructive and complementary manner depending on

- the level of competency of the internal audit function,
- whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, and
- whether the function applies a systematic and disciplined approach, including quality control.

This section addresses the external auditor's responsibilities when, based on the external auditor's understanding of the internal audit function obtained as a result of procedures performed under section 315, the external auditor expects to use the work of the internal audit function in obtaining audit evidence (see paragraphs .13–.24 of this section). Such use of that work modifies the nature or timing, or reduces the extent, of audit procedures to be performed directly by the external auditor.

.07 This section also addresses the external auditor's responsibilities if the external auditor is considering using internal auditors to provide direct assistance under the direction, supervision, and review of the external auditor (see paragraphs .25–.32).

.08 There may be individuals in an entity that perform procedures similar to those performed by an internal audit function. However, unless performed by an objective and competent function that applies a systematic and disciplined approach, including quality control, such procedures would be considered control activities, and obtaining evidence regarding the effectiveness of such controls would be part of the external auditor's responses to assessed risks in accordance with section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

The External Auditor's Responsibility for the Audit

.09 The external auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the external auditor's use of the work of the internal audit function in obtaining audit evidence or use of internal auditors to provide direct assistance on the engagement. Although the function may perform audit procedures similar to those performed by the external auditor, neither the internal audit function nor the internal auditors are independent of the entity as is required of the external auditor in an audit of financial statements in accordance with section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.² This section, therefore, defines the

¹ Paragraph .A120 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

² Paragraph .15 of section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*.

conditions that are necessary for the external auditor to be able to use the work of internal auditors. It also defines the necessary work effort to obtain sufficient appropriate evidence that the work of the internal audit function or internal auditors providing direct assistance is adequate for the purposes of the audit. The requirements are designed to provide a framework for the external auditor's judgments regarding the use of the work of internal auditors to prevent over or undue use of such work.

Effective Date

.10 This section is effective for audits of financial statements for periods ending on or after December 15, 2014.

Objectives

.11 The objectives of the external auditor, when the entity has an internal audit function and the external auditor expects to use the work of internal auditors to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor, are as follows:

- a. To determine whether to use the work of the internal audit function in obtaining audit evidence or to use internal auditors to provide direct assistance, and if so, in which areas and to what extent
- b. If using the work of the internal audit function in obtaining audit evidence, to determine whether that work is adequate for purposes of the audit
- c. If using internal auditors to provide direct assistance, to appropriately direct, supervise, and review their work

Definitions

.12 For purposes of generally accepted auditing standards, the following terms have the meaning attributed as follows:

Direct assistance. The use of internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor.

Internal audit function. A function of an entity that performs assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes. (Ref: par. .A1–.A4)

Requirements

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used in Obtaining Audit Evidence

Evaluating the Internal Audit Function

.13 The external auditor should determine whether the work of the internal audit function can be used in obtaining audit evidence by evaluating

- a. the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; (Ref: par. .A5–.A11)
- b. the level of competence of the internal audit function; and (Ref: par. .A5–.A9)
- c. the application by the internal audit function of a systematic and disciplined approach, including quality control. (Ref: par. .A12–.A14)

.14 The external auditor should not use the work of the internal audit function in obtaining audit evidence if the external auditor determines that

- a. the function's organizational status and relevant policies and procedures do not adequately support the objectivity of internal auditors;
- b. the function lacks sufficient competence; or
- c. the function does not apply a systematic and disciplined approach, including quality control. (Ref: par. .A15–.A17)

Determining the Nature and Extent of Work of the Internal Audit Function That Can Be Used in Obtaining Audit Evidence

.15 As a basis for determining the areas and the extent to which the work of the internal audit function can be used, the external auditor should consider the nature, timing, and extent of the work that has been performed, or is planned to be performed, by the internal audit function and its relevance to the external auditor's overall audit strategy and audit plan. (Ref: par. .A18–.A23)

.16 The external auditor should make all significant judgments in the audit engagement, including when using the work of the internal audit function in obtaining audit evidence. (Ref: par. .A18)

.17 To prevent undue use of the internal audit function in obtaining audit evidence, the external auditor should plan to use less of the work of the function and perform more of the work directly: (Ref: par. .A19–.A24)

- a. The more judgment is involved in
 - i. planning and performing relevant audit procedures or
 - ii. evaluating the audit evidence obtained (Ref: par. .A24)
- b. the higher the assessed risk of material misstatement at the assertion level, with special consideration given to significant risks; (Ref: par. .A25–.A27)
- c. the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors; and
- d. the lower the level of competence of the internal audit function.

.18 The external auditor should also evaluate whether, in aggregate, using the work of the internal audit function in obtaining audit evidence to the extent planned, together with any planned use of internal auditors to provide direct assistance, would result in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed. (Ref: par. .A18–.A27 and .A44)

Communicating With Those Charged With Governance

.19 In communicating an overview of the planned scope and timing of the audit to those charged with governance in accordance with section 260,

The Auditor's Communication With Those Charged With Governance,³ the external auditor should communicate how the external auditor has planned to use the work of the internal audit function in obtaining audit evidence. (Ref: par. .A28)

Using the Work of the Internal Audit Function in Obtaining Audit Evidence

.20 If the external auditor plans to use the work of the internal audit function in obtaining audit evidence, the external auditor should discuss the planned use of the work with the function as a basis for coordinating their respective activities. (Ref: par. .A29–.A32)

.21 The external auditor should read the reports of the internal audit function, which relate to the work of the function that the external auditor plans to use to obtain an understanding of the nature and extent of audit procedures the internal audit function performed and the related findings.

.22 The external auditor should perform sufficient audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use to determine its adequacy for purposes of the audit, including evaluating whether

- a. the work of the function was properly planned, performed, supervised, reviewed, and documented;
- b. sufficient appropriate evidence was obtained to enable the function to draw reasonable conclusions; and
- c. conclusions reached are appropriate in the circumstances, and the reports prepared by the function are consistent with the results of the work performed. (Ref: par. .A33–.A36)

.23 The nature and extent of the external auditor's audit procedures should be responsive to the external auditor's evaluation of

- a. the amount of judgment involved in
 - i. planning and performing relevant audit procedures and
 - ii. evaluating the audit evidence obtained;
- b. the assessed risk of material misstatement;
- c. the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors; and
- d. the level of competence of the function. (Ref: par. .A33–.A35) (see paragraphs .16–.17)

The external auditor should also reperform some of the body of work of the internal audit function that the external auditor intends to use in obtaining audit evidence. (Ref: par. .A36)

.24 Before the conclusion of the audit, the external auditor should evaluate whether the external auditor's conclusions regarding the internal audit function in paragraph .13 and the determination of the nature and extent of use of the work of the function for purposes of the audit in paragraphs .16–.18 remain appropriate.

³ Paragraph .11 of section 260, *The Auditor's Communication With Those Charged With Governance*.

Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit

.25 If the external auditor plans to use internal auditors to provide direct assistance on the audit, the external auditor should evaluate the existence and significance of threats to the objectivity of the internal auditors who will be providing direct assistance, as well as any safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors who will be providing such assistance. (Ref: par. .A37–.A41)

.26 The external auditor should not use an internal auditor to provide direct assistance if

- a. the internal auditor lacks the necessary objectivity to perform the proposed work, or
- b. the internal auditor lacks the necessary competence to perform the proposed work. (Ref: par. .A37–.A41)

Determining the Nature and Extent of Work That Can Be Assigned to Internal Auditors Providing Direct Assistance

.27 In determining the nature and extent of work that may be assigned to internal auditors providing direct assistance and the nature, timing, and extent of direction, supervision, and review that is appropriate in the circumstances, the external auditor should consider

- a. the external auditor's evaluation of the existence and significance of threats to the internal auditors' objectivity, the effectiveness of the safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors who will be providing such assistance;
- b. the assessed risk of material misstatement; and
- c. the amount of judgment involved in
 - i. planning and performing relevant audit procedures and
 - ii. evaluating the audit evidence obtained. (Ref: par. .A42–.A43)

Communicating With Those Charged With Governance

.28 In communicating an overview of the planned scope and timing of the audit with those charged with governance in accordance with section 260,⁴ the external auditor should communicate how the external auditor plans to use internal auditors to provide direct assistance.

Using Internal Auditors to Provide Direct Assistance

.29 The external auditor should evaluate whether, in aggregate, using internal auditors to provide direct assistance to the extent planned, together with any planned use of the work of the internal audit function in obtaining audit evidence, would result in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed. (Ref: par. .A44)

⁴ See footnote 3.

.30 Prior to using internal auditors to provide direct assistance, the external auditor should obtain written acknowledgment from management or those charged with governance, as appropriate, that internal auditors providing direct assistance to the external auditor will be allowed to follow the external auditor's instructions, and that the entity will not intervene in the work the internal auditor performs for the external auditor. (Ref: par. .A45)

.31 The external auditor should direct, supervise, and review the work performed by internal auditors on the engagement in accordance with section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*. In so doing

- a. the nature, timing, and extent of direction, supervision, and review should be responsive to the outcome of the evaluation of the factors in paragraph .27 of this section;
- b. the external auditor should instruct the internal auditors to bring accounting and auditing issues identified during the audit to the attention of the external auditor; and
- c. the review procedures should include the external auditor testing some of the work performed by the internal auditors. (Ref: par. .A46–.A47)

.32 When directing, supervising, and reviewing the work performed by internal auditors, the external auditor should remain alert for indications that the external auditor's evaluations in paragraphs .25 and .29 are no longer appropriate.

Documentation

.33 If the external auditor uses the work of the internal audit function in obtaining audit evidence, the external auditor should include the following in the audit documentation:⁵

- a. The results of the evaluation of
 - i. the function's organizational status and relevant policies and procedures to adequately support the objectivity of the internal auditors;
 - ii. the level of competence of the function; and
 - iii. the application by the function of a systematic and disciplined approach, including quality control
- b. The nature and extent of the work used (including the period covered by, and the results of, such work) and the basis for that decision
- c. The audit procedures performed by the external auditor to evaluate the adequacy of the work used, including the procedures performed by the external auditor to reperform some of the body of work of the internal audit function in obtaining audit evidence

.34 If the external auditor uses internal auditors to provide direct assistance on the audit, the external auditor should include the following in the audit documentation:

- a. The evaluation of the existence and significance of threats to the objectivity of the internal auditors, as well as any safeguards applied to reduce or eliminate the threats, and the level of competence of the internal auditors used to provide direct assistance

⁵ Paragraphs .08–.12 and .A8 of section 230, *Audit Documentation*.

- b. The basis for the decision regarding the nature and extent of the work performed by the internal auditors
- c. The nature and extent of the external auditor's review of the internal auditors' work (including the testing, by the external auditor, of some of the work performed by the internal auditors) in accordance with section 230, *Audit Documentation*
- d. The working papers prepared by the internal auditors who provided direct assistance on the audit engagement

.35 If the external auditor uses either the work of the internal audit function in obtaining audit evidence or internal auditors to provide direct assistance, or both, the external auditor should include in the audit documentation the external auditor's evaluation of (see paragraphs .18 and .29) whether, either individually or in aggregate as applicable, using the work of the internal audit function in obtaining audit evidence and use of internal auditors to provide direct assistance resulted in the external auditor still being sufficiently involved in the audit, given the external auditor's sole responsibility for the audit opinion expressed.

Application and Other Explanatory Material

Definition of *Internal Audit Function* (Ref: par. .02 and .12)

.A1 The objectives and scope of internal audit functions typically include assurance and consulting activities designed to evaluate and improve the effectiveness of the entity's governance, risk management, and internal control processes, such as the following:

Activities Relating to Governance Process

- The internal audit function may assess the governance process in its accomplishment of objectives on ethics and values, performance management and accountability, communicating risk and control information to appropriate areas of the organization, and effectiveness of communication among those charged with governance, external and internal auditors, and management.

Activities Relating to Risk Management Process

- The internal audit function may assist the entity by identifying and evaluating significant exposures to risk and contributing to the improvement of risk management and internal control (including effectiveness of the financial reporting process).
- The internal audit function may perform procedures to assist the entity in the detection of fraud.

Activities Relating to Internal Control Process

- *Evaluation of internal control.* The internal audit function may be assigned specific responsibility for reviewing controls, evaluating their operation, and recommending improvements thereto. In doing so, the internal audit function provides assurance on the control. For example, the internal audit function might plan and perform tests or other procedures to provide assurance to management and those charged with governance regarding the design, implementation, and operating effectiveness of internal control, including those controls that are relevant to the audit.

- *Examination of financial and operating information.* The internal audit function may be assigned to review the means used to identify, recognize, measure, classify, and report financial and operating information and to make specific inquiry into individual items, including detailed testing of transactions, balances, and procedures.
- *Review of operating activities.* The internal audit function may be assigned to review the economy, efficiency, and effectiveness of operating activities, including nonfinancial activities of an entity.
- *Review of compliance with laws and regulations.* The internal audit function may be assigned to review compliance with laws, regulations, and other external requirements and with management policies and directives and other internal requirements.

Not all the activities discussed in this paragraph need to be present for an internal audit function to be used in the audit of the financial statements. The external auditor may be able to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor in obtaining audit evidence if the nature of the internal audit function's responsibilities and assurance activities is related to the entity's financial reporting, as further discussed in section 315.⁶

.A2 Activities similar to those performed by an internal audit function may be conducted by functions with other titles within an entity. Some or all of the activities of an internal audit function may also be outsourced to a third-party service provider. Neither the title of the function nor whether it is performed by the entity or a third-party service provider are sole determinants of whether the external auditor can use the work of internal auditors. Rather, it is the nature of the activities, the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, competence of the internal auditors, and systematic and disciplined approach of the function that are relevant. References in this section to the work of the internal audit function include relevant activities of other functions or third-party providers that have these characteristics.

.A3 However, those in the entity with operational and managerial duties and responsibilities outside of the internal audit function would ordinarily face threats to their objectivity that would preclude them from being treated as part of an internal audit function for the purpose of this section, although they may perform control activities that can be tested in accordance with section 330.⁷ For this reason, monitoring controls performed by an owner-manager would not be considered equivalent to an internal audit function.

.A4 Although the objectives of an entity's internal audit function and the external auditor differ, the function may perform audit procedures similar to those performed by the external auditor in an audit of financial statements. If so, the external auditor may make use of the function for purposes of the audit in one or both of the following ways:

- To obtain information that is relevant to the external auditor's assessments of the risks of material misstatement due to error or fraud. In this regard, section 315⁸ requires the external auditor

⁶ Paragraph .A117 of section 315.

⁷ Paragraph .10 of section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained*.

⁸ Paragraphs .06a and .24 of section 315.

to obtain an understanding of the nature of the internal audit function's responsibilities, its status within the organization, and the activities performed, or to be performed, and make inquiries of appropriate individuals within the internal audit function (if the entity has such a function).

- The external auditor, after appropriate evaluation, may decide to use work that has been performed by the internal audit function that is relevant to the period being audited to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor (that is, the external auditor can use the work of the internal audit function in partial substitution for audit evidence to be obtained directly by the external auditor) (see paragraphs .13–.24 of this section).

In addition, the external auditor may use internal auditors to perform audit procedures under the direction, supervision, and review of the external auditor (referred to as *direct assistance* in this section) (see paragraphs .25–.32 of this section).

Determining Whether, in Which Areas, and to What Extent the Work of the Internal Audit Function Can Be Used in Obtaining Audit Evidence

Evaluating the Internal Audit Function

Objectivity and Competence (Ref: par. .13a–b)

.A5 The external auditor exercises professional judgment in determining whether the work of the internal audit function can be used in obtaining audit evidence and the nature and extent to which the work of the internal audit function can be used in the circumstances.

.A6 The extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors and the level of competence of the function are particularly important in determining whether to use the work of the internal audit function in obtaining audit evidence and, if so, the nature and extent of the use of the work of the function that is appropriate in the circumstances.

.A7 *Objectivity* refers to the ability to perform tasks without allowing bias, conflict of interest, or undue influence of others to override professional judgments. Factors that may affect the external auditor's evaluation of objectivity include the following:

- Whether the organizational status of the internal audit function, including the function's authority and accountability, supports the ability of the function to be free from bias, conflict of interest, or undue influence of others to override professional judgments (for example, whether the internal audit function reports to those charged with governance or an officer with appropriate authority, or if the function reports to management, whether it has direct access to those charged with governance)
- Whether the internal audit function is free of any conflicting responsibilities (for example, having managerial or operational duties or responsibilities that are outside of the internal audit function)

- Whether those charged with governance oversee employment decisions related to the internal audit function (for example, determining the appropriate remuneration policy)
- Whether any constraints or restrictions placed on the internal audit function by management or those charged with governance exist (for example, in communicating the internal audit function's findings to the external auditor)
- Whether the internal auditors are members of relevant professional bodies and their memberships obligate their compliance with relevant professional standards relating to objectivity or whether their internal policies achieve the same objectives

.A8 *Competence* of the internal audit function refers to the attainment and maintenance of knowledge and skills of the function as a whole at the level required to enable assigned tasks to be performed diligently and with the appropriate level of quality. Factors that may affect the external auditor's determination about competence include the following:

- Whether the internal audit function is adequately and appropriately resourced relative to the size of the entity and the nature of its operations.
- Whether established policies for hiring, training, and assigning internal auditors to internal audit engagements exist.
- Whether the internal auditors have adequate technical training and proficiency in auditing. Relevant criteria that may be considered by the external auditor in making the assessment may include, for example, the internal auditors' possession of a relevant professional designation and experience.
- Whether the internal auditors possess the required knowledge relating to the entity's financial reporting and the applicable financial reporting framework and whether the internal audit function possesses the necessary skills (for example, industry-specific knowledge) to perform work related to the entity's financial statements.
- Whether the internal auditors are members of relevant professional bodies or have certifications that oblige them to comply with the relevant professional standards, including continuing professional education requirements.

.A9 Objectivity and competence may be viewed as a continuum. The more the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors and the higher the level of competence of the function, the more likely the external auditor may make use of the work of the function in obtaining audit evidence and make use of it in more areas. However, an organizational status and relevant policies and procedures that provide strong support for the objectivity of the internal auditors cannot compensate for the lack of sufficient competence of the internal audit function. Equally, a high level of competence of the internal audit function cannot compensate for an organizational status and policies and procedures that do not adequately support the objectivity of the internal auditors. Additionally, neither a high level of competence nor strong support for the objectivity of the internal auditors compensate for the lack of a systematic and disciplined approach.

Considerations Specific to Governmental Entities (Ref: par. .13a)

.A10 *Generally Accepted Government Auditing Standards (GAGAS)*, established by the U.S. Government Accountability Office, addresses the evaluation of the internal audit function in a government environment, including consideration of whether the internal audit function

- reports to senior management, such as a city manager or finance director,
- reports to the governing body,
- is elected, and, thus, is accountable to the citizens, or
- reports to an audit committee, which may comprise the governing body or a subcommittee thereof, members of senior management, appointed citizens, or any combination thereof.

.A11 The GAGAS conceptual framework approach provides auditors a practicable approach to address threats to independence and can be applied to varying circumstances that could potentially create threats to independence. The GAGAS conceptual framework may be useful in evaluating the objectivity of the internal audit function of a governmental entity.

Application of a Systematic and Disciplined Approach, Including Quality Control (Ref: par. .13c)

.A12 The application of a systematic and disciplined approach to planning, performing, supervising, reviewing, and documenting its activities distinguishes the activities of the internal audit function from other monitoring control activities that may be performed within the entity.

.A13 Factors that may affect the external auditor's determination of whether the internal audit function applies a systematic and disciplined approach include the following:

- The existence, adequacy, and use of documented internal audit procedures or guidance covering such areas as risk assessments, work programs, documentation, and reporting, the nature and extent of which is commensurate with the nature and size of the internal audit function relative to the complexity of the entity.
- Whether the internal audit function has appropriate quality control policies and procedures (for example, those relating to leadership, human resources, and engagement performance) or quality control requirements in standards set by relevant professional bodies for internal auditors. Such bodies may also establish other appropriate requirements, such as conducting periodic external quality assessments.

.A14 The external auditor's determination of whether the internal audit function applies a systematic and disciplined approach is intended to address the risk that the external auditor inappropriately uses internal audit-like work performed in an informal, unstructured, or ad hoc manner. However, the level of formality of an acceptable approach may vary depending on the nature and size of the internal audit function relative to the complexity of the entity.

Circumstances in Which Work of the Internal Audit Function Cannot Be Used (Ref: par. .14)

.A15 The external auditor's evaluation of whether the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, the level of competence of the internal audit function, and whether it applies a systematic and disciplined

approach may indicate that the risks to the quality of the work of the function are too significant and, therefore, it is not appropriate to use any of the work of the function as audit evidence.

.A16 Consideration of the factors in paragraphs .A7–.A8 and .A13, individually and in aggregate, is important because an individual factor is often not sufficient to conclude that the work of the internal audit function cannot be used for purposes of the audit. For example, the internal audit function's organizational status is particularly important in evaluating threats to the objectivity of the internal auditors. If the internal audit function reports to management other than in an administrative capacity, this may impair the function's objectivity absent safeguards applied to reduce or eliminate the threat (for example, having direct access and performance accountability to those charged with governance).

.A17 In addition, when the external auditor accepts an engagement to provide internal audit services to an audit client, and the results of those services will be used in conducting the audit, a self-review threat is created in regards to the external auditor's independence. This is because of the possibility that the engagement team will use the results of the internal audit service without properly evaluating those results or without exercising the same level of professional skepticism as would be exercised when the internal audit work is performed by individuals who are not members of the firm.

Determining the Nature and Extent of Work of the Internal Audit Function That Can Be Used in Obtaining Audit Evidence

Factors Affecting the Determination of the Nature and Extent of the Work of the Internal Audit Function That Can Be Used (Ref: par. .15–.18)

.A18 Because the external auditor has sole responsibility for the audit opinion expressed, the external auditor is required to make the significant judgments in the audit engagement in accordance with paragraph .16. Significant judgments include, but are not limited to, the following:

- Assessing the risks of material misstatement
- Evaluating the sufficiency of tests performed
- Evaluating the appropriateness of management's use of the going concern assumption and whether substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time
- Evaluating significant accounting estimates
- Evaluating the adequacy of disclosures in the financial statements and other matters affecting the external auditor's report

.A19 Once the external auditor has determined that the work of the internal audit function can be used for purposes of the audit, a first consideration is whether the planned nature and scope of the work of the internal audit function that has been performed, or is planned to be performed, is relevant to the overall audit strategy and audit plan that the external auditor has established in accordance with section 300, *Planning an Audit*.

.A20 In accordance with section 330, the external auditor is required to design and perform further audit procedures whose nature, timing, and extent are based on, and responsive to, the assessed risks of material misstatement at the relevant assertion level.⁹ Further audit procedures comprise tests of

⁹ Paragraph .06 of section 330.

controls and substantive procedures. Procedures planned or performed by the internal audit function may be the same as, or be similar to, the further audit procedures that the external auditor would design and perform. Accordingly, subject to the requirements of this section, the external auditor may determine that it is appropriate to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of further audit procedures to be performed directly by the external auditor. The internal audit function may have performed, or may be planning to perform

- tests of relevant controls upon which the external auditor intends to rely in determining the nature, timing, and extent of substantive procedures. For example, the work of the internal audit function may include tests of relevant controls that address the risks of material misstatement related to the completeness of accounts payable. The results of the internal audit function's tests may provide evidence about the effectiveness of controls and, accordingly, the external auditor may be able to use such tests of controls performed by the internal audit function to modify the nature or timing, or reduce the extent of, testing of controls the external auditor would otherwise have performed directly.
- substantive procedures. For example, the internal audit function, as part of its work, may confirm certain accounts receivable and observe certain physical inventories. By using such work of the internal audit function in obtaining audit evidence, the external auditor may be able to change the timing of the confirmation procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

The internal audit function's plan may also include procedures related to financial information of components of a group. The external auditor may coordinate work with the internal auditors (in accordance with paragraph .20 of this section) and reduce the number of the entity's components at which the external auditor would otherwise need to perform audit procedures in accordance with the requirements of section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*.

.A21 Other examples of work of the internal audit function that can be used in obtaining audit evidence by the external auditor include the following:

- Tracing transactions through the information system relevant to financial reporting
- Testing of compliance with regulatory requirements

.A22 The external auditor's determination of the planned nature and extent of use of the work of the internal audit function in obtaining audit evidence will be influenced by the external auditor's evaluation of the extent to which the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors and the level of competence of the internal audit function in paragraph .13. In addition, the amount of judgment needed in planning, performing, and evaluating such work and the assessed risk of material misstatement at the assertion level are inputs to the external auditor's determination. Further, as described in paragraph .14, circumstances exist in which the external auditor cannot use the work of the internal audit function in obtaining audit evidence for purpose of the audit.

.A23 When evaluating whether, in aggregate, using the work of the internal audit function to the extent planned, together with any use of internal auditors to provide direct assistance, would result in the external auditor still being sufficiently involved in the audit, the external auditor may consider the external auditor's responsibility to address all relevant requirements of this section, as well as the other standards (for example, in accordance with paragraph .16, the external auditor is required to make all significant judgments). It is not anticipated that the external auditor's evaluation of using work of the internal audit function would be based on a quantitative analysis (for example, percentage of hours spent by internal audit personnel in respect of the work being used by the external auditor relative to total engagement hours).

Judgments in Planning and Performing Audit Procedures and Evaluating Results (Ref: par. .17a)

.A24 As the degree of judgment involved in planning and performing the audit procedures or evaluating the audit evidence increases, the need for the external auditor to perform more procedures directly in accordance with paragraph .17 increases.

Assessed Risk of Material Misstatement (Ref: par. .17b)

.A25 For a particular account balance, class of transaction, or disclosure, the higher an assessed risk of material misstatement at the assertion level, the more judgment is often involved in planning and performing the audit procedures and evaluating the results thereof. In such circumstances, the external auditor will need to perform more procedures directly in accordance with paragraph .17 and, accordingly, make less use of the work of the internal audit function in obtaining sufficient appropriate audit evidence. Furthermore, as explained in section 200,¹⁰ the higher the assessed risks of material misstatement, the more persuasive the audit evidence required by the external auditor will need to be and, therefore, the external auditor will need to perform more of the work directly.

.A26 As explained in section 315,¹¹ significant risks require special audit consideration and, therefore, the external auditor's ability to use the work of the internal audit function in relation to significant risks will be restricted to procedures that involve limited judgment. In addition, when the risks of material misstatement is other than low, the use of the work of the internal audit function in obtaining audit evidence alone is unlikely to reduce audit risk to an acceptably low level and eliminate the need for the external auditor to perform some tests directly.

.A27 Carrying out procedures in accordance with this section may cause the external auditor to reevaluate the assessment of the risks of material misstatement. Consequently, this may affect the external auditor's determination of whether and how to use the work of the internal audit function in obtaining audit evidence.

Communicating With Those Charged With Governance (Ref: par. .19)

.A28 In accordance with section 260,¹² the external auditor is required to communicate an overview of the planned scope and timing of the audit with those charged with governance. The planned use of the work of the internal

¹⁰ Paragraph .A33 of section 200.

¹¹ Paragraph .04 of section 315.

¹² Paragraph .11 of section 260.

audit function in obtaining audit evidence is an integral part of the external auditor's overall audit strategy and, therefore, is relevant to those charged with governance for their understanding of the proposed audit approach.

Using the Work of the Internal Audit Function in Obtaining Audit Evidence

Discussion and Coordination With the Internal Audit Function in Obtaining Audit Evidence (Ref: par. .20)

.A29 In discussing the planned use of the work of the internal audit function in obtaining audit evidence, as a basis for coordinating the respective activities, it may be useful to address the following:

- The timing of such work
- The nature of the work performed
- The extent of audit coverage
- Materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances, or disclosures) and performance materiality
- Proposed methods of item selection and sample sizes
- Documentation of the work performed
- Review and reporting procedures

.A30 Coordination between the external auditor and the internal audit function is effective when, for example

- discussions take place at appropriate intervals throughout the period.
- the external auditor informs the internal audit function of significant matters that may affect the function.
- the external auditor is advised of, and has access to, relevant reports of the internal audit function and is informed of any significant matters that come to the attention of the function when such matters may affect the work of the external auditor so that the external auditor is able to consider the implications of such matters for the audit engagement.

Although the external auditor is not precluded from using work that the internal audit function has already performed, coordination of activities between the external auditor and internal audit function is likely to be most effective when appropriate interaction occurs before the internal audit function performs the work.

.A31 Section 200¹³ addresses the importance of the external auditor planning and performing the audit with professional skepticism, including being alert to information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.

.A32 Communication with the internal audit function throughout the engagement may provide opportunities for internal auditors to bring matters that may affect the work of the external auditor to the external auditor's attention.¹⁴

¹³ Paragraphs .17 and .A22 of section 200.

¹⁴ Paragraph .A120 of section 315.

The external auditor is then able to take such information into account in the external auditor's identification and assessment of risks of material misstatement. In addition, if such information may be indicative of a heightened risk of a material misstatement of the financial statements or may be regarding any actual, suspected, or alleged fraud, the external auditor can take this into account in the external auditor's identification of risk of material misstatement due to fraud in accordance with section 240, *Consideration of Fraud in a Financial Statement Audit*.

Procedures to Determine the Adequacy of the Work of the Internal Audit Function (Ref: par. .22-.23)

.A33 The external auditor's audit procedures on the body of work of the internal audit function as a whole that the external auditor plans to use provide a basis for evaluating the overall quality of the function's work and the objectivity with which it has been performed.

.A34 The procedures the external auditor may perform to evaluate the quality of the work performed and the conclusions reached by the internal audit function, in addition to reperformance in accordance with paragraph .23, include the following:

- Making inquiries of appropriate individuals within the internal audit function
- Observing procedures performed by the internal audit function
- Reviewing the internal audit function's work program and working papers

.A35 The more judgment involved, the higher the assessed risk of material misstatement, the less the internal audit function's organizational status and relevant policies and procedures adequately support the objectivity of the internal auditors, or the lower the level of competence of the internal audit function, the more audit procedures are needed to be performed by the external auditor on the overall body of work of the internal audit function to support the decision to use the work of the function in obtaining sufficient appropriate audit evidence on which to base the audit opinion.

Reperformance (Ref: par. .23)

.A36 For purposes of this section, *reperformance* involves the external auditor's independent execution of procedures to validate the conclusions reached by the internal audit function. This objective may be accomplished by examining items already examined by the internal audit function or sufficient other similar items not actually examined by the internal audit function. Reperformance provides more persuasive evidence regarding the adequacy of the work of the internal audit function compared to other procedures the external auditor may perform, as described in paragraph .A34. Although it is not necessary for the external auditor to reperform some of the work of the internal audit function in each area that is being used, some reperformance is required on the body of work of the internal audit function as a whole that the external auditor intends to use in accordance with paragraph .23. The external auditor is more likely to focus reperformance in those areas where more judgment was exercised by the internal audit function in planning, performing, and evaluating the results of the audit procedures and in areas of higher risk of material misstatement.

Determining Whether, in Which Areas, and to What Extent Internal Auditors Can Be Used to Provide Direct Assistance

Determining Whether Internal Auditors Can Be Used to Provide Direct Assistance for Purposes of the Audit (Ref: par. .25–.26)

.A37 The external auditor may obtain direct assistance from the internal auditors to carry out audit procedures that otherwise would be performed directly by the external auditors themselves. In such circumstances, the internal auditors are under the direction, supervision, and review of the external auditor.

.A38 In accordance with paragraph .25, the external auditor evaluates the existence and significance of any threats to the objectivity and level of competence of the internal auditors who will be providing direct assistance on the audit before assigning them to specific tasks. Evaluating the existence and significance of threats to objectivity includes evaluating safeguards applied to reduce or eliminate the threats.

.A39 As stated in paragraph .A7, *objectivity* refers to the ability to perform the proposed work without allowing bias, conflict of interest, or undue influence of others to override professional judgments. In evaluating the existence and significance of any threats to the objectivity of an individual internal auditor, the external auditor may consider the extent to which the internal audit function's organizational status and relevant policies and procedures support the objectivity of the internal auditors, including, for example, policies and procedures addressing association with the division or department in the entity to which the work relates. Additionally, other matters may come to the external auditor's attention that may be relevant to the external auditor's evaluation of the objectivity of the internal auditor.

.A40 In evaluating the level of competence of an internal auditor, many of the factors in paragraph .A8 may also be relevant but in the context of individual internal auditors and the work to which they may be assigned.

.A41 The external auditor may determine it is necessary to specifically instruct the internal auditors to keep confidential specific matters, as instructed by the external auditor, and to inform the external auditor of any threat to their objectivity. In some situations, the external auditor may determine it to be necessary to request written acknowledgment from the internal auditors of having understood such instruction by the external auditor.

Determining the Nature and Extent of Work That Can Be Assigned to Internal Auditors Providing Direct Assistance (Ref: par. .27)

.A42 Paragraphs .A18–.A27 also provide relevant guidance in determining the nature and extent of work that may be assigned to the internal auditors providing direct assistance. As the materiality of the financial statement amounts increases and either the assessed risks of material misstatement or the amount of judgment involved increases, the need for the external auditor to perform procedures directly increases. As these factors decrease, the need for the external auditor to perform procedures directly decreases.

.A43 In determining the nature of work that may be assigned to internal auditors providing direct assistance, the external auditor is careful to limit such work to those areas that would be appropriate for internal auditors to be assigned. Examples of activities and tasks that would not be appropriate for internal auditors to provide direct assistance include the following:

- Making required inquiries of entity personnel or those charged with governance related to the identification of fraud risks and determining the procedures to respond to such risks¹⁵
- Determination of unpredictable audit procedures as addressed in section 240

***Using Internal Auditors to Provide Direct Assistance
(Ref: par. .18 and .29–.31)***

.A44 If the external auditor plans to use the internal audit function in obtaining audit evidence and also plans to use internal auditors to provide direct assistance, only one evaluation would be necessary to address the requirements of paragraphs .18 and .29.

.A45 The written acknowledgment required by paragraph .30 may be included within the audit engagement letter (or other suitable form of written agreement of the terms of engagement)¹⁶ or could be included in a separate document prepared by the external auditor and acknowledged in writing by management or those charged with governance, as appropriate.

.A46 The direction, supervision, and review by the external auditor of the audit procedures performed by the internal auditors need to be sufficient in order for the external auditor to be satisfied that sufficient appropriate audit evidence has been obtained to support the conclusions based on that work. Because individuals in the internal audit function are not independent of the entity as is required of the external auditor when expressing an opinion on financial statements, the external auditor's involvement in these circumstances may be of a different nature or more extensive than if members of the engagement team perform the work.

.A47 The nature, timing, and extent of direction, supervision, and review of the audit procedures performed by the internal auditors is also dependent on the outcome of the external auditor's evaluation of the objectivity and the level of competence of, and the nature and extent of audit procedures to be performed by, the internal auditors. Directing and supervising the internal auditors involves informing them of their responsibilities, the objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. In reviewing the work performed by the internal auditors, the external auditor's considerations include whether the evidence obtained is sufficient and appropriate in the circumstances, and that it supports the conclusions reached.

¹⁵ Paragraphs .17–.21 of section 240, *Consideration of Fraud in a Financial Statement Audit*.

¹⁶ See paragraph .10 of section 210, *Terms of Engagement*.

.A48

Appendix A—Amendments to SAS No. 122 Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*

(**Boldface italics** denotes new language. Deleted text is shown in ~~strike through~~.)

[No amendments to paragraphs .01–.05.]

.06 The risk assessment procedures should include the following:

- a. Inquiries of management, ***appropriate individuals within the internal audit function (if such function exists)***, and others within the entity who, in the auditor's professional judgment, may have information that is likely to assist in identifying risks of material misstatement due to fraud or error (Ref: par. .A6)
- b. Analytical procedures (Ref: par. .A7–.A10)
- c. Observation and inspection (Ref: par. .A11)

[No amendments to paragraphs .07–.23.]

.24 If the entity has an internal audit function,³ the auditor should obtain an understanding of ~~the following in order to determine whether the internal audit function is likely to be relevant to the audit:~~

- ~~a. The~~***the*** nature of the internal audit function's responsibilities, how the function fits in the entity's organizational structure, ***and***
- ~~b. The~~***the*** activities performed or to be performed by ~~the internal audit function~~ (Ref: par. .A104–.A106)

³ ***Paragraph .13 of section 610, Using the Work of Internal Auditors, defines the term internal audit function for purposes of GAAS.***

[Footnotes 3–4 renumbered.]

[No amendments to paragraphs .25–.A5.]

Inquiries of Management and Others Within the Entity (Ref: par. .06a)

.A6 Much of the information obtained by the auditor's inquiries is obtained from management and those responsible for financial reporting. ***Information may also be obtained by the auditor through inquiries with the internal audit function, if the entity has such a function, and others within the entity.***

.A7 ~~However, the~~***The*** auditor also may obtain information or a different perspective in identifying risks of material misstatement through inquiries of others within the entity and other employees with different levels of authority. For example

- inquiries directed toward those charged with governance may help the auditor understand the environment in which the financial statements are prepared. ***Section 260^b identifies the importance of effective two-way communication in assisting the auditor to obtain information from those charged with governance in this regard.***
- ~~inquiries directed toward internal audit personnel may provide information about internal audit procedures performed during the year relating to the design and effectiveness of the entity's internal~~

~~control and whether management has satisfactorily responded to findings from those procedures.~~

- inquiries of employees involved in initiating, authorizing, processing, or recording complex or unusual transactions may help the auditor to evaluate the appropriateness of the selection and application of certain accounting policies.
- inquiries directed toward in-house legal counsel may provide information about such matters as litigation, compliance with laws and regulations, knowledge of fraud or suspected fraud affecting the entity, warranties, postsales obligations, arrangements (such as joint ventures) with business partners, and the meaning of contract terms.
- inquiries directed toward marketing or sales personnel may provide information about changes in the entity's marketing strategies, sales trends, or contractual arrangements with its customers.
- *inquiries directed to the risk management function (or those performing such roles) may provide information about operational and regulatory risks that may affect financial reporting.*
- *inquiries directed to information systems personnel may provide information about system changes, system or control failures, or other information system-related risks.*

⁶ Paragraph .05d of section 260, The Auditor's Communication With Those Charged With Governance.

.A8 Because obtaining an understanding of the entity and its environment is a continual, dynamic process, the auditor's inquiries may occur throughout the audit engagement.

Inquiries of the Internal Audit Function

.A9 If an entity has an internal audit function, inquiries of the appropriate individuals within the function may provide information that is useful to the external auditor in obtaining an understanding of the entity and its environment and in identifying and assessing risks of material misstatement at the financial statement and assertion levels. In performing its work, the internal audit function is likely to have obtained insight into the entity's operations and business risks and may have findings based on its work, such as identified control deficiencies or risks, that may provide valuable input into the external auditor's understanding of the entity, the external auditor's risk assessments, or other aspects of the audit. The external auditor's inquiries, therefore, are made regardless of whether the external auditor expects to use the work of the internal audit function to modify the nature or timing or reduce the extent of audit procedures to be performed.⁷ Inquiries of particular relevance may be about matters the internal audit function has raised with those charged with governance and the outcomes of the function's own risk assessment process.

⁷ The relevant requirements are contained in section 610, Using the Work of Internal Auditors.

.A10 If, based on responses to the external auditor's inquiries, it appears that there are findings that may be relevant to the entity's financial reporting and the audit, the external auditor may consider it appropriate to read related reports of the internal audit function. Examples of reports of the internal audit function that may be relevant include the

function's strategy and planning documents and reports that have been prepared for management or those charged with governance describing the findings of the internal audit function's examinations.

.A11 In addition, in accordance with section 240,⁸ if the internal audit function provides information to the external auditor regarding any actual, suspected, or alleged fraud, the auditor takes this into account in the external auditor's identification of risk of material misstatement due to fraud.

⁸ Paragraph .19 of section 240.

.A12 Appropriate individuals within the internal audit function with whom inquiries are made are those who, in the external auditor's judgment, have the appropriate knowledge, experience, and authority (such as the chief internal audit executive or, depending on the circumstances, other personnel within the function). The external auditor may also consider it appropriate to have periodic meetings with these individuals.

Considerations Specific to Governmental Entities (Ref: par. .06a)

.A13 External auditors of governmental entities often have additional responsibilities with regard to internal control and compliance with applicable laws and regulations. Inquiries of appropriate individuals in the internal audit function can assist the external auditors in identifying the risk of material noncompliance with applicable laws and regulations and the risk of deficiencies in internal control over financial reporting.

[Paragraphs .A7–.A73 renumbered. Footnotes 6–13 renumbered.]

[Paragraph .A80 included for contextual information only.]

~~.A73.~~ *.A80 Audit evidence for elements of the control environment.* Relevant audit evidence may be obtained through a combination of inquiries and other risk assessment procedures, such as corroborating inquiries through observation or inspection of documents. For example, through inquiries of management and employees, the auditor may obtain an understanding of how management communicates to employees through management's views on business practices and ethical behavior. The auditor may then determine whether relevant controls have been implemented by considering, for example, whether management has a written code of conduct and whether it acts in a manner that supports the code.

.A81 The auditor may also consider how management has responded to the findings and recommendations of the internal audit function regarding identified deficiencies in internal control relevant to the audit, including whether and how such responses have been implemented and whether they have been subsequently evaluated by the internal audit function.

[Paragraphs .A74–.A103 renumbered.]

.A112 Internal audit function (Ref: par. .24). If the entity has an internal audit function, obtaining an understanding of that function contributes to the external auditor's understanding of the entity and its environment, including internal control; this also includes the role that the function plays in the entity's monitoring of internal control over financial reporting. This understanding, together with the information obtained from the external auditor's inquiries in paragraph .06a, may also provide information that is directly relevant to the external

auditor's identification and assessment of the risks of material misstatement.

~~A104~~ **.A113** *Internal audit function (Ref. par. 24).* The entity's internal audit function is likely to be relevant to the audit if the nature of the internal audit function's responsibilities and assurance activities are related to the entity's financial reporting, and the auditor expects to use the work of the internal auditors to modify the nature or timing or reduce the extent of audit procedures to be performed. If the auditor determines that the internal audit function is likely to be relevant to the audit, section 610, ***Using the Work of Internal Auditors, The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements***, *fn* † applies.

fn † ~~SAS No. 65, The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, Statements on Auditing Standards: Clarification and Recodification, and will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), Using the Work of Internal Auditors, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.~~

~~A105~~ **.A114** The objectives ***and scope*** of an internal audit function and therefore, the nature of its responsibilities and its status within the organization, ***including the function's authority and accountability***, vary widely and depend on the size and structure of the entity and the requirements of management and those charged with governance. ***These matters may be set out in an internal audit charter or terms of reference.***

~~A115~~ The responsibilities of an internal audit function may include ~~for example, monitoring of internal control, risk management, and review of compliance with laws and regulations.~~ ***performing procedures and evaluating the results to provide assurance to management and those charged with governance regarding the design and effectiveness of risk management, internal control, and governance processes. The internal audit function may play an important role in the entity's monitoring of internal control over financial reporting.*** On the other hand ~~However~~, the responsibilities of the internal audit function may be limited to the review ~~focused on evaluating~~ of the economy, efficiency, and effectiveness of operations; ~~for example, and, accordingly, may not relate to the entity's financial reporting and, if so, the work of the function may not directly relate to the entity's financial reporting.~~

~~A116~~ **.A116** *The external auditor's inquiries of appropriate individuals within the internal audit function, in accordance with paragraph .06a, help the external auditor obtain an understanding of the nature of the internal audit function's responsibilities. If the external auditor determines that the function's responsibilities are related to the entity's financial reporting, the external auditor may obtain further understanding of the activities performed, or to be performed, by the internal audit function by reviewing the internal audit function's audit plan for the period, if any, and discussing that plan with the appropriate individuals within the function.*

~~A106~~ **.A117** If the nature of the internal audit function's responsibilities ***and assurance activities*** ~~is~~ ***is*** related to the entity's financial reporting, the external auditor's consideration of the activities performed ~~or to be performed by the internal audit function~~ may include review of the internal

~~audit function's audit plan for the period, if any, and discussion of that plan with the internal auditors. *the external auditor may be able to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed directly by the external auditor in obtaining audit evidence. External auditors may be more likely to use the work of an entity's internal audit function when it appears, for example, based on experience in previous audits or the external auditor's risk assessment procedures, that the entity has an internal audit function that is adequately and appropriately resourced relative to the size of the entity and the nature of its operations and has a direct reporting relationship to those charged with governance.*~~

.A118 If, based on the external auditor's preliminary understanding of the internal audit function, the external auditor expects to use the work of the internal audit function to modify the nature or timing, or reduce the extent, of audit procedures to be performed, section 610 applies.

.A119 As is further discussed in section 610, the activities of an internal audit function are distinct from other monitoring controls that may be relevant to financial reporting, such as reviews of management accounting information that are designed to contribute to how the entity prevents or detects misstatements.

.A120 Establishing communications with the appropriate individuals within an entity's internal audit function early in the engagement, and maintaining such communications throughout the engagement, can facilitate effective sharing of information. It creates an environment in which the external auditor can be informed of significant matters that may come to the attention of the internal audit function when such matters may affect the work of the external auditor. Section 200 addresses the importance of the external auditor planning and performing the audit with professional skepticism, including being alert to information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence. Communication with the internal audit function throughout the engagement may provide opportunities for internal auditors to bring such information to the external auditor's attention. The external auditor is then able to take such information into account in the external auditor's identification and assessment of risks of material misstatement.

[Paragraphs .A107–.A144 renumbered.]

Appendix B—Amendment to Statement on Quality Control Standards No. 8 and Other Amendments to SAS No. 122

Amendment to Statement on Quality Control Standards No. 8, *A Firm's System of Quality Control (Redrafted)* (AICPA, *Professional Standards*, QC sec. 10)

(***Boldface italics*** denotes new language. Deleted text is shown in ~~strike through~~.)

[No amendments to paragraphs .01–.12.]

Definitions

.13 For purposes of SQCSs, the following terms have the meanings attributed as follows:

[Paragraph .13 is reproduced here in part. There are no additional amendments to paragraph .13.]

Engagement team. All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform procedures on the engagement. This excludes external specialists engaged by the firm or a network firm.^{fn 1}

The term engagement team also excludes individuals within the client's internal audit function who provide direct assistance on an audit engagement when the external auditor complies with the requirements of section 610, Using the Work of Internal Auditors.

^{fn 1} [Footnote omitted for purposes of this section.]

[No amendments to paragraphs .14–.A81.]

Other Amendments to SAS No. 122

(***Boldface italics*** denotes new language. Deleted text is shown in ~~strike through~~.)

Section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards*

[No amendments to paragraphs .01–.A76.]

Complying With Relevant Requirements

Relevant Requirements (Ref: par. .24)

.A77 In some cases, an AU-C section (and therefore all of its requirements) may not be relevant in the circumstances. For example, if an entity does not have an internal audit function, nothing in section 610, ***Using the Work of Internal Auditors, The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements***,^{fn 2} is relevant.

~~^{fn 5} SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is redrafted for clarity and convergence with *International Standard on Auditing 610 (Revised), Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.~~

[No amendments to paragraphs .A78–.A86.]

Section 220, Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards

[No amendments to paragraphs .01–.08.]

Definitions

.09 For purposes of GAAS, the following terms have the meanings attributed as follows:

[Paragraph .09 is reproduced here in part. There are no additional amendments to paragraph .09.]

Engagement team. All partners and staff performing the engagement and any individuals engaged by the firm or a network firm who perform audit procedures on the engagement. This excludes an auditor's external specialist engaged by the firm or a network firm.^{fn 5}

The term engagement team also excludes individuals within the client's internal audit function who provide direct assistance on an audit engagement when the external auditor complies with the requirements of section 610, Using the Work of Internal Auditors.

^{fn 5} [Footnote omitted for purposes of this proposed section.]

[No amendments to paragraphs .10–.A36.]

Section 230, Audit Documentation

[No amendments to paragraphs .01–.A21.]

.A22 The documentation requirement applies only to requirements that are relevant in the circumstances. A requirement is not relevant^{fn 10} only in the cases in which

- a. the AU-C section is not relevant (for example, if an entity does not have an internal audit function, nothing in section 610, **Using the Work of Internal Auditors**, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*^{fn 1} is relevant); or
- b. the requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion when there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

^{fn 10} [Footnote omitted for purposes of this section.]

~~^{fn 1} Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial*~~

Statements, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

[No amendments to paragraphs .A23–.A30.]

Section 240, Consideration of Fraud in a Financial Statement Audit

[No amendments to paragraphs .01–.18.]

.19 For those entities that have an internal audit function,^{fn 6} the auditor should make inquiries of **appropriate individuals within the internal audit function** to obtain **their** ~~its~~ views about the risks of fraud; determine whether **they have** ~~it has~~ knowledge of any actual, suspected, or alleged fraud affecting the entity; whether **they have** ~~it has~~ performed any procedures to identify or detect fraud during the year; and whether management has satisfactorily responded to any findings resulting from these procedures.

^{fn 6} Section 610, *Using the Work of Internal Auditors*, provides guidance in audits of those entities that have an internal audit function. ~~Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.~~

Appendix A—Examples of Fraud Risk Factors (Ref: par. .11, .24, and .A30)

.A75

[Paragraph .A75 is reproduced here in part. There are no additional amendments to paragraph .A75.]

Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

Opportunities

Internal control components are deficient as a result of the following:

- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (when external reporting is required)
- High turnover rates or employment of **staff in** accounting, ~~internal audit, or IT, or the internal audit function who~~ staff are not effective

- Accounting and information systems that are not effective, including situations involving significant deficiencies or material weaknesses in internal control
- Weak controls over budget preparation and development and compliance with law or regulation.

[No amendments to paragraphs .A77–.A78.]

Section 260, *The Auditor's Communication With Those Charged With Governance*

[No amendments to paragraphs .01–.A19.]

.A20 Matters communicated may include the following:

- How the auditor proposes to address the significant risks of material misstatement, whether due to fraud or error
- The auditor's approach to internal control relevant to the audit including, when applicable, whether the auditor will express an opinion on the effectiveness of internal control over financial reporting
- The application of materiality in the context of an audit, as discussed in section 320, *Materiality in Planning and Performing an Audit*
- If the entity has an internal audit function, ~~the extent to which~~ **how** the auditor will use the work of internal audit and how the ~~external~~ and **the** internal auditors can best work together **in a constructive and complementary manner; including any planned use of the work of the internal audit function in obtaining audit evidence and the nature and extent of any planned use of internal auditors to provide direct assistance.**

[No amendments to paragraphs .A21–.A37.]

.A38 Before communicating matters with those charged with governance, the auditor may discuss them with management unless that is inappropriate. For example, it may not be appropriate to discuss with management questions of management's competence or integrity. In addition to recognizing management's responsibility, these initial discussions may clarify facts and issues and give management an opportunity to provide further information and explanations. Similarly, when the entity has an internal audit function, the auditor may discuss matters with ~~the~~ **appropriate individuals within the function** ~~internal auditor~~ before communicating with those charged with governance.

[No amendments to paragraphs .A39–.A44.]

.A45 As discussed in paragraph .A1, effective two-way communication assists both the auditor and those charged with governance. Further, section 315 identifies participation by those charged with governance, including their interaction with **the** internal auditors ~~the~~ **function** (if any) and external auditors, as an element of the entity's control environment. Inadequate two-way communication may indicate an unsatisfactory control environment, which will influence the auditor's assessment of the risks of material misstatements. There is also a risk that the auditor may not have obtained sufficient appropriate audit evidence to form an opinion on the financial statements.

[No amendments to paragraphs .A46–.A49.]

Section 265, *Communicating Internal Control Related Matters Identified in an Audit*

[No amendments to paragraphs .A1–.A25.]

.A26 If the auditor has communicated deficiencies in internal control, other than significant deficiencies or material weaknesses, to management in a prior period and management has chosen not to remedy them for cost or other reasons, the auditor need not repeat the communication in the current period. The auditor also is not required to repeat information about such deficiencies if the information has been previously communicated to management by other parties, such as *the* internal auditors *function* or regulators. However, the auditor may consider it appropriate to recommunicate these other deficiencies if there has been a change of management or if new information has come to the auditor's attention that alters the prior understanding of the auditor and management regarding the deficiencies. Nevertheless, the failure of management to remedy other deficiencies in internal control that were previously communicated may become a significant deficiency requiring communication with those charged with governance. Whether this is the case depends on the auditor's professional judgment in the circumstances.

[No amendments to paragraphs .A27–.A39.]

Section 300, *Planning an Audit*

[No changes to paragraphs .01–.A24.]

.A25

[Paragraph .A25 is reproduced here in part. There are no additional amendments to paragraph .A25.]

Appendix—Considerations in Establishing the Overall Audit Strategy (Ref: par. .07–.08 and .A9–.A12)

Characteristics of the Engagement

The following are some examples of characteristics of the engagement:

- The financial reporting framework on which the financial information to be audited has been prepared, including any need for reconciliations to another financial reporting framework
- Industry specific reporting requirements, such as reports mandated by industry regulators
- The expected audit coverage, including the number and locations of components to be included
- The nature of the control relationships between a parent and its components that determine how the group is to be consolidated
- The extent to which components are audited by other auditors
- The nature of the business divisions to be audited, including the need for specialized knowledge
- The reporting currency to be used, including any need for currency translation for the audited financial information
- The need for statutory or regulatory audit requirements (for example, the Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*)

- ~~The availability of the work of internal auditors and the extent of the auditor's potential use of such work~~ ***Whether the entity has an internal audit function and, if so, whether (in which areas and to what extent) the work of the internal audit function can be used in obtaining audit evidence or whether internal auditors can be used to provide direct assistance***
- The entity's use of service organizations and how the auditor may obtain evidence concerning the design or operation of controls performed by them
- The expected use of audit evidence obtained in previous audits (for example, audit evidence related to risk assessment procedures and tests of controls)
- The effect of IT on the audit procedures, including the availability of data and the expected use of computer assisted audit techniques
- The coordination of the expected coverage and timing of the audit work with any reviews of interim financial information and the effect on the audit of the information obtained during such reviews
- The availability of client personnel and data

Section 402, Audit Considerations Relating to an Entity Using a Service Organization

[No changes to paragraphs .01–.22.]

Obtaining an Understanding of the Services Provided by a Service Organization, Including Internal Control

Sources of Information (Ref: par. .09)

.A1 Information about the nature of the services provided by a service organization may be available from a wide variety of sources, such as the following:

- User manuals
- System overviews
- Technical manuals
- The contract or service level agreement between the user entity and the service organization
- Reports by service organizations, ***the internal auditor's function***, or regulatory authorities on controls at the service organization
- Reports by the service auditor, if available

[No changes to paragraphs .A2–.A44.]

Section 500, Audit Evidence

[No changes to paragraphs .01–.A51.]

.A52 In some cases, the auditor may intend to use information produced by the entity for other audit purposes. For example, the auditor may intend to use the entity's performance measures for the purpose of analytical procedures or use the entity's information produced for monitoring activities such as ~~internal auditor's reports~~ ***of the internal audit function***. In such cases, the appropriateness of the audit evidence obtained is affected by whether the

information is sufficiently precise or detailed for the auditor's purposes. For example, performance measures used by management may not be precise enough to detect material misstatements.

[No changes to paragraph .A53.]

Section 550, *Related Parties*

[No changes to paragraphs .01–.A14.]

The Entity's Controls Over Related Party Relationships and Transactions (Ref: par. .15)

.A15 Others within the entity are those considered likely to have knowledge of the entity's related party relationships and transactions and the entity's controls over such relationships and transactions. These may include, to the extent that they do not form part of management, the following:

- Those charged with governance
- Personnel in a position to initiate, authorize, process, or record transactions that are both significant and outside the entity's normal course of business and those who supervise or monitor such personnel
- ~~The internal auditors~~ **function**
- In-house legal counsel
- The chief ethics officer or equivalent person
- Chief compliance officer

[No changes to paragraph .A16.]

.A17 In meeting the requirement of section 315 to obtain an understanding of internal control, the auditor may consider features or elements relevant to mitigating the risks of material misstatement associated with related party relationships and transactions, such as the following.^{fn 25}

- Internal ethical codes, appropriately communicated to the entity's personnel and enforced, governing the circumstances in which the entity may enter into specific types of related party transactions
- Policies and procedures for open and timely disclosure of the interests that management and those charged with governance have in related party transactions
- The assignment of responsibilities within the entity for identifying, recording, summarizing, and disclosing related party transactions
- Timely disclosure and discussion between management and those charged with governance of significant related party transactions outside the entity's normal course of business, including whether those charged with governance have appropriately challenged the business rationale of such transactions (for example, by seeking advice from external professional advisors)
- Clear guidelines for the approval of related party transactions involving actual or perceived conflicts of interest, such as approval by a subcommittee of those charged with governance comprising individuals independent of management
- Periodic reviews by **the internal auditors function**, when applicable

- Proactive action taken by management to resolve related party disclosure issues, such as seeking advice from the auditor or external legal counsel
- The existence of whistle-blowing policies and procedures, when applicable

^{fn 25} [Footnote omitted for purposes of this section.]

[No changes to paragraphs .A18–.A21.]

Maintaining Alertness for Related Party Information When Reviewing Records or Documents

Records or Documents That the Auditor May Inspect (Ref: par. .16)

.A22 During the audit, the auditor may inspect records or documents that indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. Examples of those records or documents include the following:

- Third party confirmations obtained by the auditor (in addition to bank and legal confirmations)
- Entity income tax returns
- Information supplied by the entity to regulatory authorities
- Shareholder registers to identify the entity's principal shareholders
- Statements of conflicts of interest from management and those charged with governance
- Records of the entity's investments and those of its benefit plans
- Contracts and agreements with key management or those charged with governance
- Significant contracts and agreements not in the entity's ordinary course of business
- Specific invoices and correspondence from the entity's professional advisors
- Life insurance policies acquired by the entity
- Significant contracts renegotiated by the entity during the period
- ~~Internal auditors'~~ ***Reports of the internal audit function***
- Capital financing arrangements with entities other than financial institutions (for example, construction of a governmental entity facility associated with the issuance of debt by a related not-for-profit entity)
- Economic development arrangements for capital additions (for example, a governmental entity's use and eventual ownership of properties and facilities financed and operated by a company or another governmental entity)

[No changes to paragraphs .A23–.A52.]

Section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*

[No changes to paragraphs .01–.A34.]

Fraud (Ref: par. .20)

.A35 The auditor is required to identify and assess the risks of material misstatement of the financial statements due to fraud and to design and implement appropriate responses to the assessed risks.^{fn19} Information used to identify the risks of material misstatement of the group financial statements due to fraud may include the following:

- Group management's assessment of the risks that the group financial statements may be materially misstated as a result of fraud
- Group management's process for identifying and responding to the risks of fraud in the group, including any specific fraud risks identified by group management or account balances, classes of transactions, or disclosures for which a risk of fraud is likely
- Whether particular components exist for which a risk of fraud is likely
- How those charged with governance of the group monitor group management's processes for identifying and responding to the risks of fraud in the group and the controls group management has established to mitigate these risks
- Responses of those charged with governance of the group, group management, ***appropriate individuals within the*** ~~and~~ internal audit ***function*** (and, if considered appropriate, component management, the component auditors, and others) to the group engagement team's inquiry whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group

^{fn 19} [Footnote omitted for purposes of this section.]

[No changes to paragraphs .A36–.A82.]

.A83 The group engagement team's decision about how many components to select in accordance with paragraph .56, which components to select, and the type of work to be performed on the financial information of the individual components selected may be affected by factors, such as the following:

- The extent of audit evidence expected to be obtained on the financial information of the significant components
- Whether the component has been newly formed or acquired
- Whether significant changes have taken place in the component
- Whether ***the*** internal audit ***function*** has performed work at the component and any effect of that work on the group audit
- Whether the components apply common systems and processes
- The operating effectiveness of group-wide controls
- Abnormal fluctuations identified by analytical procedures performed at group level
- The individual financial significance of, or the risk posed by, the component in comparison with other components within this category

- Whether the component is subject to an audit required by law or regulation or performed for another reason

Including an element of unpredictability in selecting components in this category may increase the likelihood of identifying material misstatement of the components' financial information. The selection of components is often varied on a cyclical basis.

[No changes to paragraphs .A84–.A93.]

.A94

[Paragraph .A94 is reproduced here in part. There are no additional amendments to paragraph .A94.]

Appendix A—Understanding the Group, Its Components, and Their Environments—Examples of Matters About Which the Group Engagement Team Obtains an Understanding (Ref: par. .A31)

The examples provided cover a broad range of matters; however, not all matters are relevant to every group audit engagement, and the list of examples is not necessarily complete.

Group-Wide Controls

Group-wide controls may include a combination of the following:

- Regular meetings between group and component management to discuss business developments and review performance
- Monitoring of components' operations and their financial results, including regular reporting routines, which enables group management to monitor components' performance against budgets and take appropriate action
- Group management's risk assessment process (that is, the process for identifying, analyzing, and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements)
- Monitoring, controlling, reconciling, and eliminating intragroup account balances, transactions, and unrealized profits or losses at group level
- A process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components
- A central IT system controlled by the same general IT controls for all or part of the group
- Control activities within an IT system that are common for all or some components
- Monitoring of controls, including activities of *the* internal audit *function* and self-assessment programs
- Consistent policies and procedures, including a group financial reporting procedures manual
- Group-wide programs, such as codes of conduct and fraud prevention programs
- Arrangements for assigning authority and responsibility to component management

~~The internal audit function may be regarded as part of group-wide controls, for example, when the internal audit function is centralized. Section 610, **Using the Work of Internal Auditors** *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, addresses the group engagement team's evaluation of the **whether the internal audit function's organizational status and relevant policies and procedures adequately support the** ~~competence and objectivity of the internal auditors, **the level of competence of the internal audit function, and whether the function applies a systematic and disciplined approach** when the group engagement team expects it plans to use their~~ **the function's** work.^{fn 1}~~

^{fn 1} Paragraphs .14–.15 of section 610, **Using the Work of Internal Auditors**. *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*. SAS No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, is currently effective and codified as AU section 322. SAS No. 65 has been included in section 610, as designated by SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, and will be superseded when it is redrafted for clarity and convergence with International Standard on Auditing 610 (Revised), *Using the Work of Internal Auditors*, as part of the Clarification and Convergence project of the Auditing Standards Board. Until such time, section 610 has been conformed to reflect updated section and paragraph cross references but has not otherwise been subjected to a comprehensive review or revision.

[No changes to paragraph .A95.]

.A96

Appendix C—Required and Additional Matters Included in the Group Engagement Team's Letter of Instruction (Ref: par. .A90)

[Paragraph .A96 is reproduced here in part. There are no additional amendments to paragraph .A96.]

The following matters are relevant to the conduct of the work of the component auditor:

[Required matters are italicized.]

- The findings of the group engagement team's tests of control activities of a processing system that is common for all or some components and tests of controls to be performed by the component auditor
- *Identified significant risks of material misstatement of the group financial statements, due to fraud or error, that are relevant to the work of the component auditor and a request that the component auditor communicates on a timely basis any other significant risks of material misstatement of the group financial statements, due to fraud or error, identified in the component and the component auditor's response to such risks*
- The findings of **the** internal audit **function**, based on work performed on controls at or relevant to components
- A request for timely communication of audit evidence obtained from performing work on the financial information of the components that contradicts the audit evidence on which the group engagement team originally based the risk assessment performed at group level
- A request for a written representation on component management's compliance with the applicable financial reporting

framework or a statement that differences between the accounting policies applied to the financial information of the component and those applied to the group financial statements have been disclosed

- Matters to be documented by the component auditor

[No changes to paragraphs .A97–.A99.]

.A50

Exhibit—Comparison of Section 610, *Using the Work of Internal Auditors*, With International Standard on Auditing 610 (Revised 2013), *Using the Work of Internal Auditors*

This analysis was prepared by the Audit and Attest Standards staff to highlight substantive differences between section 610, *Using the Work of Internal Auditors*, and International Standard on Auditing (ISA) 610 (Revised 2013), *Using the Work of Internal Auditors*, and the rationale therefore. This analysis is not authoritative and is prepared for informational purposes only. It has not been acted on or reviewed by the Auditing Standards Board (ASB).

The ASB also made various changes to the language throughout this section in comparison with ISA 610 (Revised 2013). Such changes were made to use terms applicable in the United States and to make section 610 easier to read and apply. The ASB believes that such changes will not create differences between the application of ISA 610 (Revised 2013) and the application of section 610 and, accordingly, these differences are not subsequently discussed.

Using Internal Auditors to Provide Direct Assistance

Substantive differences related to the requirements of this section and ISA 610 (Revised 2013) are subsequently described.

Determining the Nature and Extent of Work That Can Be Assigned to Internal Auditors Providing Direct Assistance

The ASB did not include paragraph 30 of ISA 610 (Revised 2013) in this section; this paragraph precludes the external auditor's use of internal auditors to provide direct assistance in specified circumstances. The ASB believes that the requirements in paragraphs 30a and 30b were not necessary in the context of audits of nonissuers in the United States. These requirements are partly redundant when compared to the requirement in paragraph .27 of this section regarding the need for the auditor to consider the amount of judgment involved in determining the nature and extent of work to assign to internal auditors and the nature, timing, and extent of the review thereof. Additional application guidance was added to paragraph .A42 of this section to further emphasize that as materiality of the financial statement amounts increases, and either the assessed risks of material misstatement or the amount of judgment involved increases, the need for the external auditor to perform procedures directly increases. The ASB further concluded that the requirements in paragraphs 30c and 30d were not necessary because an appropriate assessment of the objectivity of the internal auditors in accordance with this section would result in a conclusion that it would not be appropriate for internal auditors' work to be used in the situations addressed by those paragraphs.

Paragraph 31 of ISA 610 (Revised 2013) establishes a requirement that, in communicating with those charged with governance, an overview of the planned

scope and timing of the audit in accordance with ISA 260, *Communication with Those Charged with Governance*, the external auditor should communicate the nature and extent of the planned use of internal auditors to provide direct assistance so as to reach a mutual understanding that such use is not excessive in the circumstances of the engagement. The ASB decided to revise paragraph 31 of ISA 610 (Revised 2013) to improve the clarity of the requirement and eliminate the requirement to explicitly obtain a mutual understanding with those charged with governance that the proposed nature and extent of the use of internal auditors to provide direct assistance is not excessive because it was not considered necessary in the context of audits of nonissuers in the United States. Making the communication required by paragraph .28 of this section provides those charged with governance the opportunity to voice any concerns.

Using Internal Auditors to Provide Direct Assistance

Paragraph 33b of ISA 610 (Revised 2013) requires that, prior to using internal auditors to provide direct assistance for purposes of the audit, the external auditor obtain written agreement from the internal auditors that they will keep confidential specific matters as instructed by the external auditor and inform the external auditor of any threat to their objectivity. Given the established practice and historical experience of using internal auditors to provide direct assistance, the ASB did not believe that it was necessary to include this requirement for the audits of nonissuers in the United States. However, the ASB added application material to indicate that the auditor may determine it necessary to instruct the internal auditors to keep specific matters confidential, and in some situations, may determine it to be necessary to request written acknowledgement from the internal auditors of having understood such instruction (see paragraph .A41).

Paragraph 34a of ISA 610 (Revised 2013) states the following:

The external auditor shall direct, supervise and review the work performed by internal auditors on the engagement in accordance with ISA 220. In so doing:

- a. The nature, timing and extent of direction, supervision, and review shall recognize that the internal auditors are not independent of the entity and be responsive to the outcome of the evaluation of the factors in paragraph 29 of this ISA.

In paragraph .31a of this section, the ASB decided to delete the phrase *recognize that the internal auditors are not independent of the entity* because the ASB did not believe there was any incremental effect of the phrase on the nature, timing, and extent of the external auditor's required actions. The ASB also believes that the fact that internal auditors are not independent of the entity is already implicit in, and encompassed by, the external auditor's evaluation of the factors in paragraph .27 of this section.

The ASB decided to add paragraph .31b, which represents a requirement to instruct internal auditors to bring accounting and auditing issues to the attention of the external auditors. The ASB believes that it is important to include this requirement, which is included in this section.

Finally, in paragraph .31c, the ASB decided to revise paragraph 34b of ISA 610 (Revised 2013) to express the requirement in terms more commonly understood in the United States and that are more consistent with the terminology in this section.

AU-C Section 610A

The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

(Supersedes SAS No. 9.)

Source: SAS No. 65; SAS No. 122.

Effective for audits of financial statements for periods ending after December 15, 1991, unless otherwise indicated.

NOTE

Statement on Auditing Standards (SAS) No. 65, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, was previously codified as AU section 322 until December 2013, when all AU sections were deleted from AICPA *Professional Standards*, as described in the AU-C Foreword. SAS No. 122, *Statements on Auditing Standards: Clarification and Recodification*, redesignated AU section 322 as section 610. In February 2014, SAS No. 65 was superseded by SAS No. 128, *Using the Work of Internal Auditors*, which is now section 610. SAS No. 65 has been retained in section 610A until SAS No. 128 becomes effective for audits of financial statements for periods ending on or after December 15, 2014.

.01 The auditor considers many factors in determining the nature, timing, and extent of auditing procedures to be performed in an audit of an entity's financial statements. One of the factors is the existence of an internal audit function.¹ This section provides the auditor with guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor in an audit performed in accordance with generally accepted auditing standards (GAAS).

Roles of the Auditor and the Internal Auditors

.02 One of the auditor's responsibilities in an audit conducted in accordance with GAAS is to obtain sufficient appropriate audit evidence to provide a reasonable basis for the opinion on the entity's financial statements. In fulfilling this responsibility, the auditor maintains independence from the entity.² [Revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 105.]

¹ An *internal audit function* may consist of one or more individuals who perform internal auditing activities within an entity. This section is not applicable to personnel who have the title *internal auditor* but who do not perform internal auditing activities as described herein.

² Although internal auditors are not independent from the entity, The Institute of Internal Auditors' *Standards for the Professional Practice of Internal Auditing* defines internal auditing as an

(continued)

.03 Internal auditors are responsible for providing analyses, evaluations, assurances, recommendations, and other information to the entity's management and those charged with governance. To fulfill this responsibility, internal auditors maintain objectivity with respect to the activity being audited. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of SAS No. 114.]

Obtaining an Understanding of the Internal Audit Function

.04 An important responsibility of the internal audit function is to monitor the performance of an entity's controls. When obtaining an understanding of internal control,³ the auditor should obtain an understanding of the internal audit function sufficient to identify those internal audit activities that are relevant to planning the audit. The extent of the procedures necessary to obtain this understanding will vary, depending on the nature of those activities.

.05 The auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'

- a. organizational status within the entity.
- b. application of professional standards (see paragraph .11).
- c. audit plan, including the nature, timing, and extent of audit work.
- d. access to records and whether there are limitations on the scope of their activities.

In addition, the auditor might inquire about the internal audit function's charter, mission statement, or similar directive from management or those charged with governance. This inquiry will normally provide information about the goals and objectives established for the internal audit function. [Revised, April 2007, to reflect conforming changes necessary due to the issuance of SAS No. 114.]

.06 Certain internal audit activities may not be relevant to an audit of the entity's financial statements. For example, the internal auditors' procedures to evaluate the efficiency of certain management decision-making processes are ordinarily not relevant to a financial statement audit.

.07 Relevant activities are those that provide evidence about the design and effectiveness of controls that pertain to the entity's ability to initiate, authorize, record, process, and report financial data consistent with the assertions embodied in the financial statements or that provide direct evidence about potential misstatements of such data. The auditor may find the results of the following procedures helpful in assessing the relevancy of internal audit activities:

(footnote continued)

independent appraisal function and requires internal auditors to be independent of the activities they audit. This concept of independence is different from the independence the auditor maintains under the AICPA Code of Professional Conduct.

³ Section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*, describes the procedures the auditor follows to obtain an understanding of internal control and indicates that the internal audit function is part of the entity's monitoring component. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 109. Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

- a. Considering knowledge from prior-year audits
- b. Reviewing how the internal auditors allocate their audit resources to financial or operating areas in response to their risk-assessment process
- c. Reading internal audit reports to obtain detailed information about the scope of internal audit activities

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of SAS No. 94. Revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 106.]

.08 If, after obtaining an understanding of the internal audit function, the auditor concludes that the internal auditors' activities are not relevant to the financial statement audit, the auditor does not have to give further consideration to the internal audit function unless the auditor requests direct assistance from the internal auditors as described in paragraph .27. Even if some of the internal auditors' activities are relevant to the audit, the auditor may conclude that it would not be efficient to consider further the work of the internal auditors. If the auditor decides that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of audit procedures, the auditor should assess the competence and objectivity of the internal audit function in light of the intended effect of the internal auditors' work on the audit.

Assessing the Competence and Objectivity of the Internal Auditors

Competence of the Internal Auditors

.09 When assessing the internal auditors' competence, the auditor should obtain or update information from prior years about such factors as

- educational level and professional experience of internal auditors.
- professional certification and continuing education.
- audit policies, programs, and procedures.
- practices regarding assignment of internal auditors.
- supervision and review of internal auditors' activities.
- quality of working-paper documentation, reports, and recommendations.
- evaluation of internal auditors' performance.

Objectivity of the Internal Auditors

.10 When assessing the internal auditors' objectivity, the auditor should obtain or update information from prior years about such factors as

- the organizational status of the internal auditor responsible for the internal audit function, including
 - whether the internal auditor reports to an officer of sufficient status to ensure broad audit coverage and adequate consideration of, and action on, the findings and recommendations of the internal auditors.
 - whether the internal auditor has direct access and reports regularly to those charged with governance.

- whether those charged with governance oversee employment decisions related to the internal auditor.
- policies to maintain internal auditors' objectivity about the areas audited, including
 - policies prohibiting internal auditors from auditing areas where relatives are employed in important or audit-sensitive positions.
 - policies prohibiting internal auditors from auditing areas where they were recently assigned or are scheduled to be assigned on completion of responsibilities in the internal audit function.

[Revised, April 2007, to reflect conforming changes necessary due to the issuance of SAS No. 114.]

Assessing Competence and Objectivity

.11 In assessing competence and objectivity, the auditor usually considers information obtained from previous experience with the internal audit function, from discussions with management personnel, and from a recent external quality review, if performed, of the internal audit function's activities. The auditor may also use professional internal auditing standards⁴ as criteria in making the assessment. The auditor also considers the need to test the effectiveness of the factors described in paragraphs .09–.10. The extent of such testing will vary in light of the intended effect of the internal auditors' work on the audit. If the auditor determines that the internal auditors are sufficiently competent and objective, the auditor should then consider how the internal auditors' work may affect the audit.

Effect of the Internal Auditors' Work on the Audit

.12 The internal auditors' work may affect the nature, timing, and extent of the audit, including

- procedures the auditor performs when obtaining an understanding of the entity's internal control (paragraph .13).
- procedures the auditor performs when assessing risk (paragraphs .14–.16).
- substantive procedures the auditor performs (paragraph .17).

When the work of the internal auditors is expected to affect the audit, the guidance in paragraphs .18–.26 should be followed for considering the extent of the effect, coordinating audit work with internal auditors, and evaluating and testing the effectiveness of internal auditors' work.

Understanding of Internal Control

.13 The auditor obtains a sufficient understanding of the design of controls relevant to the audit of financial statements to plan the audit and to determine

⁴ Standards have been developed for the professional practice of internal auditing by The Institute of Internal Auditors and the General Accounting Office. These standards are meant to (a) impart an understanding of the role and responsibilities of internal auditing to all levels of management, boards of directors, public bodies, external auditors, and related professional organizations; (b) permit measurement of internal auditing performance; and (c) improve the practice of internal auditing.

whether they have been placed in operation. Since a primary objective of many internal audit functions is to review, assess, and monitor controls, the procedures performed by the internal auditors in this area may provide useful information to the auditor. For example, internal auditors may develop a flowchart of a new computerized sales and receivables system. The auditor may review the flowchart to obtain information about the design of the related controls. In addition, the auditor may consider the results of procedures performed by the internal auditors on related controls to obtain information about whether the controls have been placed in operation. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of SAS No. 78.]

Risk Assessment

.14 The auditor assesses the risk of material misstatement at both the financial-statement level and the account-balance or class-of-transaction level.

Financial-Statement Level

.15 At the financial-statement level, the auditor makes an overall assessment of the risk of material misstatement. When making this assessment, the auditor should recognize that certain controls may have a pervasive effect on many financial statement assertions. The control environment and accounting system often have a pervasive effect on a number of account balances and transaction classes and therefore can affect many assertions. The auditor's assessment of risk at the financial-statement level often affects the overall audit strategy. The entity's internal audit function may influence this overall assessment of risk as well as the auditor's resulting decisions concerning the nature, timing, and extent of auditing procedures to be performed. For example, if the internal auditors' plan includes relevant audit work at various locations, the auditor may coordinate work with the internal auditors (see paragraph .23) and reduce the number of the entity's locations at which the auditor would otherwise need to perform auditing procedures.

Account-Balance or Class-of-Transaction Level

.16 At the account-balance or class-of-transaction level, the auditor performs procedures to obtain and evaluate audit evidence concerning management's assertions. The auditor assesses control risk for each of the significant assertions and performs tests of controls to support assessments below the maximum. When planning and performing tests of controls, the auditor may consider the results of procedures planned or performed by the internal auditors. For example, the internal auditors' scope may include tests of controls for the completeness of accounts payable. The results of internal auditors' tests may provide appropriate information about the effectiveness of controls and change the nature, timing, and extent of testing the auditor would otherwise need to perform. [Revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 105.]

Substantive Procedures

.17 Some procedures performed by the internal auditors may provide direct evidence about material misstatements in assertions about specific account balances or classes of transactions. For example, the internal auditors, as part of their work, may confirm certain accounts receivable and observe certain physical inventories. The results of these procedures can provide evidence the auditor may consider in restricting detection risk for the related assertions. Consequently, the auditor may be able to change the timing of the confirmation

procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

Extent of the Effect of the Internal Auditors' Work

.18 Even though the internal auditors' work may affect the auditor's procedures, the auditor should perform procedures to obtain sufficient appropriate audit evidence to support the auditor's report. Evidence obtained through the auditor's direct personal knowledge, including physical examination, observation, computation, and inspection, is generally more persuasive than information obtained indirectly.⁵ [Revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 105.]

.19 The responsibility to report on the financial statements rests solely with the auditor. Unlike the situation in which the auditor uses the work of other independent auditors,⁶ this responsibility cannot be shared with the internal auditors. Because the auditor has the ultimate responsibility to express an opinion on the financial statements, judgments about assessments of inherent and control risks, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the auditor.

.20 In making judgments about the extent of the effect of the internal auditors' work on the auditor's procedures, the auditor considers

- a. the materiality of financial statement amounts—that is, account balances or classes of transactions.
- b. the risk (consisting of inherent risk and control risk) of material misstatement of the assertions related to these financial statement amounts.
- c. the degree of subjectivity involved in the evaluation of the audit evidence gathered in support of the assertions.⁷

As the materiality of the financial statement amounts increases and either the risk of material misstatement or the degree of subjectivity increases, the need for the auditor to perform his or her own tests of the assertions increases. As these factors decrease, the need for the auditor to perform his or her own tests of the assertions decreases.

.21 For assertions related to material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is high, the auditor should perform sufficient procedures to fulfill the responsibilities described in paragraphs .18–.19. In determining these procedures, the auditor gives consideration to the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions. However, for such assertions, the consideration of internal auditors' work cannot alone reduce audit risk to an acceptable level to eliminate the necessity to perform tests of those assertions directly by the auditor. Assertions about the valuation of assets and liabilities

⁵ See paragraph .A32 of section 500, *Audit Evidence*. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 106. Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

⁶ See section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)*. [Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

⁷ For some assertions, such as existence and occurrence, the evaluation of audit evidence is generally objective. More subjective evaluation of the audit evidence is often required for other assertions, such as the valuation and disclosure assertions.

involving significant accounting estimates, and about the existence and disclosure of related-party transactions, contingencies, uncertainties, and subsequent events, are examples of assertions that might have a high risk of material misstatement or involve a high degree of subjectivity in the evaluation of audit evidence.

.22 On the other hand, for certain assertions related to less material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is low, the auditor may decide, after considering the circumstances and the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions, that audit risk has been reduced to an acceptable level and that testing of the assertions directly by the auditor may not be necessary. Assertions about the existence of cash, prepaid assets, and fixed-asset additions are examples of assertions that might have a low risk of material misstatement or involve a low degree of subjectivity in the evaluation of audit evidence.

Coordination of the Audit Work With Internal Auditors

.23 If the work of the internal auditors is expected to have an effect on the auditor's procedures, it may be efficient for the auditor and the internal auditors to coordinate their work by

- holding periodic meetings.
- scheduling audit work.
- providing access to internal auditors' working papers.
- reviewing audit reports.
- discussing possible accounting and auditing issues.

Evaluating and Testing the Effectiveness of Internal Auditors' Work

.24 The auditor should perform procedures to evaluate the quality and effectiveness of the internal auditors' work, as described in paragraphs .12–.17, that significantly affects the nature, timing, and extent of the auditor's procedures. The nature and extent of the procedures the auditor should perform when making this evaluation are a matter of judgment depending on the extent of the effect of the internal auditors' work on the auditor's procedures for significant account balances or classes of transactions.

.25 In developing the evaluation procedures, the auditor should consider such factors as whether the internal auditors'

- scope of work is appropriate to meet the objectives.
- audit programs are adequate.
- working papers adequately document work performed, including evidence of supervision and review.
- conclusions are appropriate in the circumstances.
- reports are consistent with the results of the work performed.

.26 In making the evaluation, the auditor should test some of the internal auditors' work related to the significant financial statement assertions. These tests may be accomplished by either (a) examining some of the controls, transactions, or balances that the internal auditors examined or (b) examining similar

controls, transactions, or balances not actually examined by the internal auditors. In reaching conclusions about the internal auditors' work, the auditor should compare the results of his or her tests with the results of the internal auditors' work. The extent of this testing will depend on the circumstances and should be sufficient to enable the auditor to make an evaluation of the overall quality and effectiveness of the internal audit work being considered by the auditor.

Using Internal Auditors to Provide Direct Assistance to the Auditor

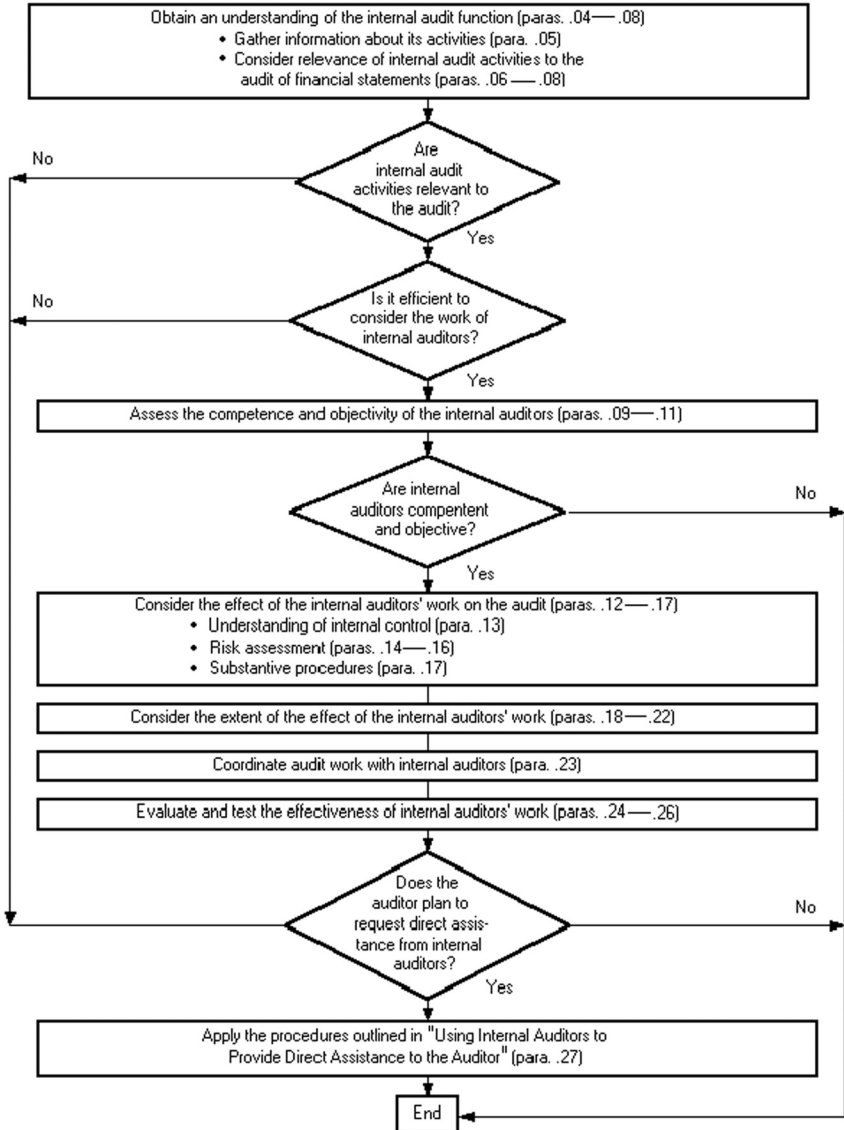

.27 In performing the audit, the auditor may request direct assistance from the internal auditors. This direct assistance relates to work the auditor specifically requests the internal auditors to perform to complete some aspect of the auditor's work. For example, internal auditors may assist the auditor in obtaining an understanding of internal control or in performing tests of controls or substantive tests, consistent with the guidance about the auditor's responsibility in paragraphs .18–.22. When direct assistance is provided, the auditor should assess the internal auditors' competence and objectivity (see paragraphs .09–.11) and supervise,⁸ review, evaluate, and test the work performed by internal auditors to the extent appropriate in the circumstances. The auditor should inform the internal auditors of their responsibilities, the objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. The auditor should also inform the internal auditors that all significant accounting and auditing issues identified during the audit should be brought to the auditor's attention.

Effective Date

.28 This section is effective for audits of financial statements for periods ending after December 15, 1991. Early application of the provisions of this section is permissible.

⁸ See paragraphs .17–.19 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, for the type of supervisory procedures to apply. [Footnote revised, March 2006, to reflect conforming changes necessary due to the issuance of SAS No. 108. Footnote revised, October 2011, to reflect conforming changes necessary due to the issuance of SAS No. 122.]

Appendix—The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

AU-C Section 620

Using the Work of an Auditor's Specialist

Source: SAS No. 122.

See section 9620 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after December 15, 2012.

Introduction

Scope of This Section

.01 This section addresses the auditor's responsibilities relating to the work of an individual or organization possessing expertise in a field other than accounting or auditing when that work is used to assist the auditor in obtaining sufficient appropriate audit evidence.

.02 This section does not address

- a. situations in which the engagement team includes a member or consults an individual or organization with expertise in a specialized area of accounting or auditing, which are addressed in section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*, and section 300, *Planning an Audit*,^{1,2} or
- b. the auditor's use of the work of an individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements (a management's specialist), which is addressed in section 500, *Audit Evidence*.³

The Auditor's Responsibility for the Audit Opinion

.03 The auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the auditor's use of the work of an auditor's specialist. Nonetheless, if the auditor using the work of an auditor's specialist, having followed this section, concludes that the work of that specialist is adequate for the auditor's purposes, the auditor may accept that specialist's findings or conclusions in the specialist's field as appropriate audit evidence.

Effective Date

.04 This section is effective for audits of financial statements for periods ending on or after December 15, 2012.

¹ Paragraphs .A10 and .A20–.A22 of section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards*.

² Paragraph .12 of section 300, *Planning an Audit*.

³ Paragraphs .A35–.A49 of section 500, *Audit Evidence*.

Objectives

- .05 The objectives of the auditor are
- a. to determine whether to use the work of an auditor's specialist and
 - b. if using the work of an auditor's specialist, to determine whether that work is adequate for the auditor's purposes.

Definitions

.06 For purposes of generally accepted auditing standards, the following terms have the meanings attributed as follows:

Auditor's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the auditor to assist the auditor in obtaining sufficient appropriate audit evidence. An auditor's specialist may be either an auditor's internal specialist (who is a partner⁴ or staff, including temporary staff, of the auditor's firm or a network firm) or an auditor's external specialist. (Ref: par. .A1–.A4)

Expertise. Skills, knowledge, and experience in a particular field.

Management's specialist. An individual or organization possessing expertise in a field other than accounting or auditing, whose work in that field is used by the entity to assist the entity in preparing the financial statements.

Requirements

Determining the Need for an Auditor's Specialist

.07 If expertise in a field other than accounting or auditing is necessary to obtain sufficient appropriate audit evidence, the auditor should determine whether to use the work of an auditor's specialist. (Ref: par. .A5–.A10)

Nature, Timing, and Extent of Audit Procedures

.08 The nature, timing, and extent of the auditor's procedures with respect to the requirements in paragraphs .09–.13 will vary depending on the circumstances. In determining the nature, timing, and extent of those procedures, the auditor should consider matters including (Ref: par. .A11)

- a. the nature of the matter to which the work of the auditor's specialist relates;
- b. the risks of material misstatement in the matter to which the work of the auditor's specialist relates;
- c. the significance of the work of the auditor's specialist in the context of the audit;
- d. the auditor's knowledge of, and experience with, previous work performed by the auditor's specialist; and
- e. whether the auditor's specialist is subject to the auditor's firm's quality control policies and procedures. (Ref: par. .A12–.A14)

⁴ *Partner* and *firm* should be read as referring to their governmental equivalents when relevant.

The Competence, Capabilities, and Objectivity of the Auditor's Specialist

.09 The auditor should evaluate whether the auditor's specialist has the necessary competence, capabilities, and objectivity for the auditor's purposes. In the case of an auditor's external specialist, the evaluation of objectivity should include inquiry regarding interests and relationships that may create a threat to the objectivity of the auditor's specialist. (Ref: par. .A15–.A22)

Obtaining an Understanding of the Field of Expertise of the Auditor's Specialist

.10 The auditor should obtain a sufficient understanding of the field of expertise of the auditor's specialist to enable the auditor to (Ref: par. .A23–.A24)

- a. determine the nature, scope, and objectives of the work of the auditor's specialist for the auditor's purposes and
- b. evaluate the adequacy of that work for the auditor's purposes.

Agreement With the Auditor's Specialist

.11 The auditor should agree, in writing when appropriate, with the auditor's specialist regarding (Ref: par. .A25–.A29)

- a. the nature, scope, and objectives of the work of the auditor's specialist; (Ref: par. .A30)
- b. the respective roles and responsibilities of the auditor and the auditor's specialist; (Ref: par. .A31–.A32)
- c. the nature, timing, and extent of communication between the auditor and the auditor's specialist, including the form of any report to be provided by the auditor's specialist; and (Ref: par. .A33)
- d. the need for the auditor's specialist to observe confidentiality requirements. (Ref: par. .A34)

Evaluating the Adequacy of the Work of the Auditor's Specialist

.12 The auditor should evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes, including

- a. the relevance and reasonableness of the findings and conclusions of the auditor's specialist and their consistency with other audit evidence. (Ref: par. .A35–.A37)
- b. If the work of the auditor's specialist involves the use of significant assumptions and methods,
 - i. obtaining an understanding of those assumptions and methods and
 - ii. evaluating the relevance and reasonableness of those assumptions and methods in the circumstances, giving consideration to the rationale and support provided by the specialist, and in relation to the auditor's other findings and conclusions. (Ref: par. .A38–.A40)
- c. If the work of the auditor's specialist involves the use of source data that is significant to the work of the auditor's specialist, the

relevance, completeness, and accuracy of that source data. (Ref: par. .A41–.A42)

.13 If the auditor determines that the work of the auditor's specialist is not adequate for the auditor's purposes, the auditor should (Ref: par. .A43)

- a. agree with the auditor's specialist on the nature and extent of further work to be performed by the auditor's specialist or
- b. perform additional audit procedures appropriate to the circumstances.

Reference to the Auditor's Specialist in the Auditor's Report

.14 The auditor should not refer to the work of an auditor's specialist in an auditor's report containing an unmodified opinion.

.15 If the auditor makes reference to the work of an auditor's external specialist in the auditor's report because such reference is relevant to an understanding of a modification to the auditor's opinion, the auditor should indicate in the auditor's report that such reference does not reduce the auditor's responsibility for that opinion. (Ref: par. .A44)

Application and Other Explanatory Material

Definitions

Auditor's Specialist (Ref: par. .06)

.A1 Expertise in a field other than accounting or auditing may include expertise regarding such matters as the following:

- The valuation of complex financial instruments and nonfinancial assets and liabilities measured at fair value such as land and buildings, plant and machinery, jewelry, works of art, antiques, intangible assets, assets acquired and liabilities assumed in business combinations, and assets that may have been impaired
- The actuarial calculation of liabilities associated with insurance contracts or employee benefit plans
- The estimation of oil and other mineral reserves
- The valuation of environmental liabilities and site cleanup costs
- The interpretation of contracts, laws, and regulations
- The analysis of complex or unusual tax compliance issues
- The determination of physical characteristics relating to quantity on hand or condition (for example, quantity or condition of minerals, or materials stored in stockpiles)

.A2 In many cases, distinguishing between expertise in accounting or auditing and expertise in another field will be straightforward, even when this involves a specialized area of accounting or auditing.⁵ For example, an individual with expertise in applying methods of accounting for deferred income tax can often be easily distinguished from a specialist in taxation law. The former is not a specialist for the purposes of this section because this constitutes

⁵ Paragraphs .A18–.A19 of section 300 address the auditor's determination of the extent of involvement of professionals possessing specialized skills.

accounting expertise; the latter is a specialist for the purposes of this section because this constitutes legal expertise. Similar distinctions also may be able to be made in other areas (for example, between expertise in methods of accounting for financial instruments and expertise in complex modeling for the purpose of valuing financial instruments). However, in some cases, particularly those involving an emerging area of accounting or auditing expertise, distinguishing between specialized areas of accounting or auditing and expertise in another field will be a matter of professional judgment. Applicable professional rules and standards regarding education and competency requirements for accountants and auditors may assist the auditor in exercising that judgment.

.A3 An individual may possess expertise in accounting or auditing, as well as expertise in a field other than accounting or auditing (for example, an actuary also may be an accountant). In that circumstance, the determination of whether that individual is an auditor or an auditor's specialist depends on the nature of the work performed by that individual that the auditor is using for purposes of the audit.

.A4 It is necessary to apply professional judgment when considering how the requirements of this section are affected by the fact that an auditor's specialist may be either an individual or an organization. For example, when evaluating the competence, capabilities, and objectivity of an auditor's specialist, it may be that the specialist is an organization the auditor has previously used, but the auditor has no prior experience with the individual specialist assigned by the organization for the particular engagement, or it may be the reverse (that is, the auditor may be familiar with the work of an individual specialist but not with the organization that specialist has joined). In either case, both the personal attributes of the individual and the managerial attributes of the organization (such as systems of quality control the organization implements) may be relevant to the auditor's evaluation.

Determining the Need for an Auditor's Specialist (Ref: par. .07)

.A5 An auditor's specialist may be needed to assist the auditor in one or more of the following:

- Obtaining an understanding of the entity and its environment, including its internal control
- Identifying and assessing the risks of material misstatement
- Determining and implementing overall responses to assessed risks at the financial statement level
- Designing and performing additional audit procedures to respond to assessed risks at the relevant assertion level, which may comprise tests of controls or substantive procedures
- Evaluating the sufficiency and appropriateness of audit evidence obtained in forming an opinion on the financial statements

.A6 The risks of material misstatement may increase when expertise in a field other than accounting is needed for management to prepare the financial statements, for example, because this may indicate some complexity or because management may not possess knowledge of the field of expertise. If, in preparing the financial statements, management does not possess the necessary expertise, a management's specialist may be used in addressing those risks. Relevant controls, including controls that relate to the work of a management's specialist, if any, also may reduce the risks of material misstatement.

.A7 If the preparation of the financial statements involves the use of expertise in a field other than accounting, the auditor, who is skilled in accounting and auditing, may not possess the necessary expertise to audit those financial statements. The engagement partner is required by section 220 to be satisfied that the engagement team and any external auditor's specialists who are not part of the engagement team, collectively, have the appropriate competence and capabilities to perform the audit engagement.⁶ Further, the auditor is required by section 300 to ascertain the nature, timing, and extent of resources necessary to perform the engagement.⁷ The auditor's determination of whether to use the work of an auditor's specialist, and, if so, when and to what extent, assists the auditor in meeting these requirements. As the audit progresses or as circumstances change, the auditor may need to revise earlier decisions about using the work of an auditor's specialist.

.A8 An auditor who is not a specialist in a relevant field other than accounting or auditing may nevertheless be able to obtain a sufficient understanding of that field to perform the audit without an auditor's specialist. This understanding may be obtained through, for example

- experience in auditing entities that require such expertise in the preparation of their financial statements.
- education or professional development in the particular field. This may include formal courses or discussion with individuals possessing expertise in the relevant field for the purpose of enhancing the auditor's own capacity to deal with matters in that field. Such discussion differs from consultation with an auditor's specialist regarding a specific set of circumstances encountered on the engagement in which that specialist is given all the relevant facts that will enable the specialist to provide informed advice about the particular matter (see section 220).⁸

.A9 In other cases, however, the auditor may determine that it is necessary, or may choose, to use an auditor's specialist to assist in obtaining sufficient appropriate audit evidence. Considerations when deciding whether to use an auditor's specialist may include the following:

- Whether management has used a specialist in preparing the financial statements (see paragraph .A10)
- The nature and significance of the matter, including its complexity
- The risks of material misstatement of the matter
- The expected nature of procedures to respond to identified risks, including the auditor's knowledge of, and experience with, the work of specialists regarding such matters and the availability of alternative sources of audit evidence

.A10 When management uses a management specialist in preparing the financial statements, the auditor's decision on whether to use an auditor's specialist also may be influenced by such factors as the following:

- The nature, scope, and objectives of the work of the management's specialist
- Whether the management's specialist is employed by the entity or is a party engaged by it to provide relevant services

⁶ Paragraph .16 of section 220.

⁷ Paragraph .08e of section 300.

⁸ Paragraph .A21 of section 220.

- The extent to which management can exercise control or influence over the work of the management's specialist
- The competence and capabilities of the management's specialist
- Whether the management's specialist is subject to technical performance standards or other professional or industry requirements
- Any controls within the entity over the work of the management's specialist
- The auditor's ability to evaluate the work and findings of the management's specialist without the assistance of an auditor's specialist.

Section 500 addresses the effect of the competence, capabilities, and objectivity of management's specialists on the reliability of audit evidence.⁹

Nature, Timing, and Extent of Audit Procedures (Ref: par. .08)

.A11 The following factors may suggest the need for different or more extensive procedures than would otherwise be the case:

- The work of the auditor's specialist relates to a significant finding or issue that involves subjective and complex judgments.
- The auditor has not previously used the work of the auditor's specialist and has no prior knowledge of that specialist's competence, capabilities, and objectivity.
- The auditor's specialist is performing procedures that are integral to the audit rather than being consulted to provide advice on an individual matter.
- The specialist is an auditor's external specialist and is not, therefore, subject to the firm's quality control policies and procedures.

The Auditor's Firm's Quality Control Policies and Procedures (Ref: par. .08e)

.A12 An auditor's internal specialist may be a partner or staff, including temporary staff, of the auditor's firm and, therefore, subject to the quality control policies and procedures of that firm in accordance with QC section 10, *A Firm's System of Quality Control*.¹⁰ An auditor's internal specialist also may be a partner or staff, including temporary staff, of a network firm, which may share common quality control policies and procedures with the auditor's firm.

.A13 In accordance with section 220, engagement teams are entitled to rely on the firm's system of quality control unless the engagement partner determines that it is inappropriate to do so based on information provided by the firm or other parties.¹¹ The extent of that reliance will vary with the circumstances and may affect the nature, timing, and extent of the auditor's procedures with respect to such matters as the following:

- Competence and capabilities through recruitment and training programs.

⁹ Paragraphs .A38–.A44 of section 500.

¹⁰ Paragraph .13 of QC section 10, *A Firm's System of Quality Control*.

¹¹ Paragraph .05 of section 220.

- Objectivity. The auditor's internal specialists are subject to relevant ethical requirements, including those pertaining to independence.
- Agreement with the auditor's specialist.
- The auditor's evaluation of the adequacy of the work of the auditor's specialist. For example, the firm's training programs may provide the auditor's internal specialists with an appropriate understanding of the interrelationship of their expertise with the audit process. Reliance on such training and other firm processes, such as protocols for scoping the work of the auditor's internal specialists, may affect the nature, timing, and extent of the auditor's procedures to evaluate the adequacy of the work of the auditor's specialist.
- Adherence to regulatory and legal requirements through monitoring processes.

Such reliance does not reduce the auditor's responsibility to meet the requirements of this section.

.A14 An auditor's external specialist is not a member of the engagement team and is not subject to quality control policies and procedures in accordance with QC section 10.¹²

The Competence, Capabilities, and Objectivity of the Auditor's Specialist (Ref: par. .09)

.A15 The competence, capabilities, and objectivity of an auditor's specialist are factors that significantly affect whether the work of the auditor's specialist will be adequate for the auditor's purposes. Competence relates to the nature and level of expertise of the auditor's specialist. Capability relates to the ability of the auditor's specialist to exercise that competence in the circumstances of the engagement. Factors that influence capability may include, for example, geographic location and the availability of time and resources. Objectivity relates to the possible effects that bias, conflict of interest, or the influence of others may have on the professional or business judgment of the auditor's specialist.

.A16 Information regarding the competence, capabilities, and objectivity of an auditor's specialist may come from a variety of sources, such as the following:

- Personal experience with previous work of that specialist
- Discussions with that specialist
- Discussions with other auditors or others who are familiar with that specialist's work
- Knowledge of that specialist's qualifications, membership in a professional body or industry association, license to practice, or other forms of external recognition
- Published papers or books written by that specialist
- The quality control policies and procedures of the auditor's firm and such other procedures the auditor considers necessary in the circumstances (see paragraphs .A12–.A13).

¹² Paragraph .13 of QC section 10.

.A17 Matters relevant to evaluating the competence, capabilities, and objectivity of the auditor's specialist include whether that specialist's work is subject to technical performance standards or other professional or industry requirements (for example, ethical standards and other membership requirements of a professional body or industry association, accreditation standards of a licensing body, or requirements imposed by law or regulation).

.A18 Other matters that may be relevant include the following:

- The relevance of the competence of the auditor's specialist to the matter for which that specialist's work will be used, including any areas of specialty within that specialist's field. For example, a particular actuary may specialize in property and casualty insurance but have limited expertise regarding pension calculations.
- The competence of the auditor's specialist with respect to relevant accounting and auditing requirements (for example, knowledge of assumptions and methods, including models, when applicable, that are consistent with the applicable financial reporting framework).
- Whether unexpected events, changes in conditions, or the audit evidence obtained from the results of audit procedures indicate that it may be necessary to reconsider the initial evaluation of the competence, capabilities, and objectivity of the auditor's specialist as the audit progresses.

.A19 A broad range of circumstances may threaten objectivity (for example, self-interest threats, advocacy threats, familiarity threats, self-review threats, and intimidation threats). Safeguards may eliminate or reduce such threats and may be created by external structures (for example, the profession, legislation, or regulation of the auditor's specialist) or by the work environment of the auditor's specialist (for example, quality control policies and procedures). There also may be safeguards specific to the audit engagement.

.A20 The evaluation of the significance of threats to objectivity and of whether a need exists for safeguards may depend upon the role of the auditor's specialist and the significance of the specialist's work in the context of the audit. There may be some circumstances in which safeguards cannot reduce threats to an acceptable level (for example, if a proposed auditor's specialist is an individual who has played a significant role in preparing the information that is being audited [that is, if the proposed auditor's specialist is a management's specialist]).

.A21 When evaluating the objectivity of an auditor's external specialist, the auditor may

- a. inquire of the entity and the auditor's specialist about any known interests or relationships that the entity has with the auditor's external specialist that may affect that specialist's objectivity or
- b. discuss with that specialist any applicable safeguards, including any professional requirements that apply to that specialist, and evaluate whether the safeguards are adequate to reduce threats to an acceptable level. Interests and relationships that may be relevant to discuss with the auditor's specialist include the following:
 - i. Financial interests
 - ii. Business and personal relationships

- iii. Provision of other services by the specialist, including by the organization in the case of an external specialist that is an organization

In some cases, the auditor may obtain a written representation from the auditor's external specialist about any interests or relationships with the entity of which that specialist is aware.

.A22 If the auditor believes a relationship between the entity and the auditor's specialist might impair the objectivity of the auditor's specialist, the auditor may perform additional procedures with respect to some or all of the assumptions, methods, or findings of the auditor's specialist to determine that the findings are reasonable or may engage another auditor's specialist for that purpose.

Obtaining an Understanding of the Field of Expertise of the Auditor's Specialist (Ref: par. .10)

.A23 The auditor may obtain an understanding of the field of expertise of the auditor's specialist through the means described in paragraph .A8 or through discussion with the auditor's specialist.

.A24 Aspects of the field of the auditor's specialist relevant to the auditor's understanding may include the following:

- Whether that field of the auditor's specialist has areas of specialty within it that are relevant to the audit (see paragraph .A18)
- Whether any professional or other standards and regulatory or legal requirements apply
- What assumptions and methods, including models, when applicable, are used by the auditor's specialist, and whether they are generally accepted within that field of the auditor's specialist and appropriate for financial reporting purposes
- The nature of internal and external data or information the auditor's specialist uses

Agreement With the Auditor's Specialist (Ref: par. .11)

.A25 The following matters may vary considerably with the circumstances:

- a. The nature, scope, and objectives of the work of the auditor's specialist
- b. The respective roles and responsibilities of the auditor and the auditor's specialist
- c. The nature, timing, and extent of communication between the auditor and the auditor's specialist.

Therefore, it is required that these matters are agreed between the auditor and the auditor's specialist regardless of whether the specialist is an auditor's external specialist or internal specialist.

.A26 The matters noted in paragraph .08 may affect the level of detail and formality of the agreement between the auditor and the auditor's specialist, including whether it is appropriate that the agreement be in writing. For example, the following factors may suggest the need for a more detailed agreement than would otherwise be the case or for the agreement to be in writing:

- The auditor's specialist will have access to sensitive or confidential entity information.

- The respective roles or responsibilities of the auditor and the auditor's specialist are different from those normally expected.
- Multijurisdictional legal or regulatory requirements apply.
- The matter to which the work of the auditor's specialist relates is highly complex.
- The auditor has not previously used work performed by the auditor's specialist.
- The auditor's use of the work of the auditor's specialist and its significance in the context of the audit is extensive.

.A27 In establishing the agreement with the auditor's specialist, an important consideration is whether the work of the auditor's specialist is subject to any reservation, limitation, or restriction and whether this has implications for the auditor.

.A28 The agreement between the auditor and an auditor's external specialist is generally in the form of an engagement letter. The appendix "Considerations for Agreement Between the Auditor and an Auditor's External Specialist" lists matters that the auditor may consider for inclusion in such an engagement letter or in any other form of agreement with an auditor's external specialist.

.A29 When no written agreement exists between the auditor and the auditor's specialist, evidence of the agreement may be included in, for example

- planning memoranda or related working papers, such as the audit program.
- the policies and procedures of the auditor's firm. In the case of an auditor's internal specialist, the established policies and procedures to which the auditor's specialist is subject may include particular policies and procedures regarding the work of the auditor's specialist. The extent of documentation in the auditor's working papers depends on the nature of such policies and procedures. For example, no documentation may be required in the auditor's working papers if the auditor's firm has detailed protocols covering the circumstances in which the work of such an auditor's specialist is used.

Nature, Scope, and Objectives of Work (Ref: par. .11a)

.A30 It often may be relevant when agreeing on the nature, scope, and objectives of the work of the auditor's specialist to include discussion of any relevant technical performance standards or other professional or industry requirements that the auditor's specialist will follow.

Respective Roles and Responsibilities (Ref: par. .11b)

.A31 Agreement on the respective roles and responsibilities of the auditor and the auditor's specialist may include the following:

- Whether the auditor or the auditor's specialist will perform detailed testing of source data
- Consent for the auditor to discuss the findings or conclusions of the auditor's specialist with the entity and others and to include details of the findings or conclusions of the auditor's specialist in the basis for a modified opinion in the auditor's report, if necessary (see paragraph .A44)

- Any agreement to inform the auditor's specialist of the auditor's conclusions concerning the work of the auditor's specialist

Working Papers

.A32 Agreement on the respective roles and responsibilities of the auditor and the auditor's specialist also may include agreement about access to, and retention of, each other's working papers. When the auditor uses the work of an internal specialist, the working papers of the auditor's specialist form part of the audit documentation. Subject to any agreement to the contrary, the auditor's external specialist's working papers are its own and do not form part of the audit documentation.

Communication (Ref: par. .11c)

.A33 Effective two way communication facilitates the proper integration of the nature, timing, and extent of the procedures of the auditor's specialist with other work on the audit and appropriate modification of the objectives of the auditor's specialist during the course of the audit. For example, when the work of the auditor's specialist relates to the auditor's conclusions regarding a significant risk, both a formal written report at the conclusion of the work of the auditor's specialist and oral reports as the work progresses may be appropriate. Identification of specific partners or staff who will interact with the auditor's specialist and procedures for communication between the auditor's specialist and the entity assist timely and effective communication, particularly on larger engagements.

Confidentiality (Ref: par. .11d)

.A34 It is necessary for the confidentiality provisions of relevant ethical requirements that apply to the auditor also to apply to the auditor's specialist.¹³ Additional requirements may be imposed by law or regulation. The entity also may have requested that specific confidentiality provisions be agreed with the auditor's external specialists.

Evaluating the Adequacy of the Work of the Auditor's Specialist (Ref: par. .12)

.A35 The auditor's evaluation of the competence, capabilities, and objectivity of the auditor's specialist; the auditor's familiarity with the field of expertise of the auditor's specialist; and the nature of the work performed by the auditor's specialist affect the nature, timing, and extent of audit procedures to evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes.

The Findings and Conclusions of the Auditor's Specialist (Ref: par. .12a)

.A36 Specific procedures to evaluate the adequacy of the work of the auditor's specialist for the auditor's purposes may include the following:

- Making inquiries of the auditor's specialist
- Reviewing the working papers and reports of the auditor's specialist
- Performing corroborative procedures, such as
 - observing the work of the auditor's specialist;

¹³ See also paragraph .001 of ET section 391, *Ethics Rulings on Responsibilities to Clients*.

- examining published data, such as statistical reports from reputable, authoritative sources;
 - confirming relevant matters with third parties;
 - performing detailed analytical procedures; and
 - reperforming calculations
- Engaging in discussion with another specialist with relevant expertise when, for example, the findings or conclusions of the auditor's specialist are not consistent with other audit evidence
 - Discussing the report of the auditor's specialist with management

.A37 Relevant factors when evaluating the relevance and reasonableness of the findings or conclusions of the auditor's specialist, whether in a report or other form, may include whether they are

- presented in a manner that is consistent with any standards of the profession or industry of the auditor's specialist;
- clearly expressed, including reference to the objectives agreed with the auditor, the scope of the work performed, and standards applied;
- based on an appropriate period and take into account subsequent events, when relevant; and
- based on appropriate consideration of errors or deviations encountered by the auditor's specialist.

Assumptions, Methods, and Source Data

Assumptions and Methods (Ref: par. .12b)

.A38 When the purpose of the work of the auditor's specialist is to evaluate underlying assumptions and methods, including models, when applicable, used by management in developing an accounting estimate, the auditor's procedures are likely to be primarily directed to evaluating whether the auditor's specialist has adequately reviewed those assumptions and methods. When the purpose of the work of the auditor's specialist is to develop an auditor's point estimate or an auditor's range for comparison with management's point estimate, the auditor's procedures may be primarily directed to evaluating the assumptions and methods, including models, when appropriate, used by the auditor's specialist.

.A39 Section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*, discusses the assumptions and methods used by management in making accounting estimates, including the use, in some cases, of highly specialized, entity-developed models.¹⁴ Although that discussion is written in the context of the auditor obtaining sufficient appropriate audit evidence regarding management's assumptions and methods, it also may assist the auditor when evaluating the assumptions and methods of an auditor's specialist.

.A40 When the work of an auditor's specialist involves the use of significant assumptions and methods, the appropriateness and reasonableness of those assumptions and methods used and their application are the responsibility of the auditor's specialist. Factors relevant to the auditor's evaluation of those assumptions and methods include whether they are

¹⁴ Paragraphs .08, .13, and .15 of section 540, *Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures*.

- generally accepted within the field of the auditor's specialist;
- consistent with the requirements of the applicable financial reporting framework;
- dependent on the use of specialized models;¹⁵ and
- consistent with those of management and, if not, the reason for, and effects of, the differences.

Source Data Used by the Auditor's Specialist (Ref: par. .12c)

.A41 When the work of an auditor's specialist involves the use of source data that is significant to the work of the auditor's specialist, procedures such as the following may be used to test that data:

- Verifying the origin of the data, including obtaining an understanding of and, when applicable, testing the internal controls over the data and, when relevant, its transmission to the auditor's specialist
- Reviewing the data for completeness and internal consistency

.A42 In many cases, the auditor may test source data. However, in other cases, when the nature of the source data used by an auditor's specialist is highly technical in relation to the field of the auditor's specialist, that specialist may test the source data. If the auditor's specialist has tested the source data, inquiry of the auditor's specialist by the auditor or supervision or review of the test of the auditor's specialist may be an appropriate way for the auditor to evaluate that data's relevance, completeness, and accuracy.

Inadequate Work (Ref: par. .13)

.A43 If the auditor concludes that the work of the auditor's specialist is not adequate for the auditor's purposes and the auditor cannot resolve the matter through the additional audit procedures required by paragraph .13, which may involve additional work being performed by both the auditor's specialist and the auditor or include employing or engaging another specialist, it may be necessary to express a modified opinion in the auditor's report in accordance with section 705, *Modifications to the Opinion in the Independent Auditor's Report*.

Reference to the Auditor's Specialist in the Auditor's Report (Ref: par. .14–.15)

.A44 It may be appropriate to refer to the auditor's external specialist in an auditor's report containing a modified opinion to explain the nature of the modification. In such circumstances, the auditor may need the permission of the auditor's specialist before making such a reference.

¹⁵ Paragraph .14 of section 540 addresses the auditor's consideration of whether specialized skills or knowledge with regard to one or more aspects of the accounting estimates is required in order to obtain sufficient appropriate audit evidence.

.A45

Appendix—Considerations for Agreement Between the Auditor and an Auditor's External Specialist (Ref: par. .A28)

This appendix lists matters that the auditor may consider for inclusion in any agreement with an auditor's external specialist. The following list is illustrative and is not exhaustive; it is intended only to be a guide that may be used in conjunction with the considerations outlined in this section. Whether to include particular matters in the agreement depends on the circumstances of the engagement. The list also may be of assistance in considering the matters to be included in an agreement with an auditor's internal specialist.

Nature, Scope, and Objectives of the Auditor's External Specialist's Work

The following matters are examples of the nature, scope, and objectives of the auditor's external specialist's work:

- The nature and scope of the procedures to be performed by the auditor's external specialist
- The objectives of the auditor's external specialist's work in the context of materiality and risk considerations concerning the matter to which the auditor's external specialist's work relates and, when relevant, the applicable financial reporting framework
- Any relevant technical performance standards or other professional or industry requirements the auditor's external specialist will follow
- The assumptions and methods, including models, when applicable, the auditor's external specialist will use and their authority
- The effective date of, or, when applicable, the testing period for, the subject matter of the auditor's external specialist's work and requirements regarding subsequent events

The Respective Roles and Responsibilities of the Auditor and the Auditor's External Specialist

The following matters are examples of the respective roles and responsibilities of the auditor and the auditor's external specialist:

- Relevant auditing and accounting standards and relevant regulatory or legal requirements
- The consent of the auditor's external specialist to the auditor's intended use of the report of the auditor's specialist, including any reference to it or disclosure of it to others (for example, reference to it in the basis for a modified opinion in the auditor's report, if necessary, or disclosure of it to management or an audit committee)
- The nature and extent of the auditor's review of the auditor's external specialist's work

- Whether the auditor or the auditor's external specialist will test source data
- The auditor's external specialist's access to the entity's records, files, personnel, and specialists engaged by the entity
- Procedures for communication between the auditor's external specialist and the entity
- The auditor's and the auditor's external specialist's access to each other's working papers
- Ownership and control of working papers during and after the engagement, including any file retention requirements
- The auditor's external specialist's responsibility to perform work with due skill and care
- The auditor's external specialist's competence and capability to perform the work
- The expectation that the auditor's external specialist will use all knowledge that the specialist has that is relevant to the audit or, if not, will inform the auditor
- Any restriction on the auditor's external specialist's association with the auditor's report
- Any agreement to inform the auditor's external specialist of the auditor's conclusions concerning the work of the auditor's external specialist

Communications and Reporting

The following matters are examples of communications and reporting:

- Methods and frequency of communications, including the following:
 - How the auditor's external specialist's findings or conclusions will be reported (for example, written report, oral report, ongoing input to the engagement team)
 - Identification of specific persons within the engagement team who will liaise with the auditor's external specialist
- When the auditor's external specialist will complete the work and report findings or conclusions to the auditor
- The auditor's external specialist's responsibility to communicate promptly any potential delay in completing the work and any potential reservation or limitation on the findings and conclusions of the auditor's specialist
- The auditor's external specialist's responsibility to communicate promptly instances in which the entity restricts the access to records, files, personnel of the auditor's external specialist, or management's specialists engaged by the entity
- The auditor's external specialist's responsibility to communicate to the auditor all information that the auditor's external specialist believes may be relevant to the audit, including any changes in circumstances previously communicated

- The auditor's external specialist's responsibility to communicate circumstances that may create threats to the objectivity of the auditor's external specialist and any relevant safeguards that may eliminate or reduce such threats to an acceptable level

Confidentiality

The following matters are examples of confidentiality:

- The need for the auditor's specialist to observe confidentiality requirements, including the following:
 - The confidentiality provisions of relevant ethical requirements that apply to the auditor
 - Additional requirements that may be imposed by law or regulation, if any (for example, specific confidentiality provisions requested by the entity)
-

AU-C Section 9620***Using the Work of an Auditor's Specialist:
Auditing Interpretations of Section 620***

Interpretation No. 1, "The Use of Legal Interpretations as Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40," has not been updated to reflect the issuance of Financial Accounting Standards Board (FASB) Statement No. 166, *Accounting for Transfers of Financial Assets*. FASB Statement No. 166 was incorporated into FASB *Accounting Standards Codification* (ASC) by FASB Accounting Standards Update No. 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*, and is discussed in FASB ASC 860, *Transfers and Servicing*.

In addition, this interpretation has not been updated for changes to the Federal Deposit Insurance Corporation's (FDIC's) safe harbor for financial assets transferred in connection with securitizations and participations. The FDIC's final amendments to the safe harbor, *Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection With a Securitization or Participation After September 30, 2010* (www.fdic.gov/news/news/press/2010/pr10216.html), were issued in September 2010. The safe harbor provides important protections for securitizations and participations by confirming that in the event of a bank failure, the FDIC would not try to reclaim loans transferred into such transactions.

In light of the issuance of FASB Statement No. 166 and the FDIC's changes to the safe harbor, the AICPA's Auditing Standards Board is currently in the process of revising this interpretation. Auditors should be alert for such revisions; however, the guidance in this interpretation continues to be relevant.

1. The Use of Legal Interpretations as Audit Evidence to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraphs 7–14 of Financial Accounting Standards Board *Accounting Standards Codification* 860-10-40

.01 Introduction—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 860,^[1] *Transfers and Servicing*, requires that a transferor of financial assets must surrender control over the financial assets to account for the transfer as a sale. According to FASB ASC 860-10-40-5(a), one of several conditions that must be met to provide evidence of surrender of control is that the transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

Paragraphs 8–10 of FASB ASC 860-10-40 describe in greater detail the evidence required to support management's assertion that transferred financial assets have been isolated:

Derecognition of transferred assets is appropriate only if the available evidence provides reasonable assurance that the transferred assets would be beyond the reach of the powers of a bankruptcy trustee or other receiver for the transferor or any *consolidated affiliate of the transferor*² that is not a special-purpose corporation or other entity designed to make remote the possibility that it would enter bankruptcy or other receivership (see FASB ASC 860-10-55-23[c]). The nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. FASB ASC 860 does not provide guidance as to the type and amount of evidence that must be obtained to conclude that transferred financial assets have been isolated from the transferor. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law.

A determination about whether the isolation criterion has been met to support a conclusion regarding surrender of control is largely a matter of law. This aspect of surrender of control, therefore, is assessed primarily from a legal perspective.

.02 Effective Date and Applicability—This interpretation is effective for auditing procedures related to transfers of financial assets that are required to be accounted for under FASB ASC 860.³

^[1] [Footnote deleted, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

² The Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary defines *consolidated affiliate of the transferor* as "an entity whose assets and liabilities are included with those of the transferor in the consolidated, combined, or other financial statements being presented." [Footnote added, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

³ [Footnote renumbered and deleted, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Question—What are the auditor's responsibilities in determining whether to use the work of a legal specialist⁴ to obtain persuasive evidence to support management's assertion that a transfer of financial assets meets the isolation criterion of FASB ASC 860-10-40-5(a)?

.04 Interpretation—Section 500, *Audit Evidence*, states that the "preparation of an entity's financial statements may require expertise in a field other than accounting or auditing, such as actuarial calculations, valuations, or engineering data. The entity uses a management's specialist in these fields to obtain the needed expertise to prepare the financial statements."⁵

.05 Use of a management's specialist may not be necessary to obtain appropriate audit evidence to support management's assertion that the isolation criterion is met in certain situations, such as when there is a routine transfer of financial assets that does not result in any continuing involvement by the transferor.⁶

.06 Many transfers of financial assets involve complex legal structures, continuing involvement by the transferor, or other legal issues that, in the auditor's judgment, make it difficult to determine whether the isolation criterion is met. In these situations, use of a legal specialist usually is necessary. A legal specialist formulating an opinion about whether a transfer isolates the transferred assets beyond the reach of the transferor and its creditors may consider, among other things, the structure of the transaction taken as a whole, the nature of any continuing involvement, the type of insolvency or other receivership proceedings to which the transferor might become subject, and other factors pertinent under applicable law.

.07 If a legal opinion is used as evidence to support the accounting conclusion related to multiple transfers under a single structure, and such transfers occur over an extended period of time under that structure, the auditor is required to evaluate the appropriateness of the legal opinion,⁷ which includes evaluating the need for management to obtain periodic updates of that opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may change the applicability of the previous opinion to such transfers. The auditor also is required to evaluate the need for management to obtain periodic updates of an opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may affect the conclusions reached in the previous opinion in the case of other transfers (see FASB ASC 860-10-40-41 and FASB ASC 860-20-25).

.08 If management's assertion with respect to a new transaction is that the transaction structure is the same as a prior structure for which a legal opinion that complies with this interpretation was used as evidence to support

⁴ Client's internal or external attorney who is knowledgeable about relevant sections of the U.S. Bankruptcy Code and other federal, state, or foreign laws, as applicable. [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁵ Paragraph .A35 of section 500, *Audit Evidence*.

⁶ FASB ASC 860-10-55-28 characterizes no continuing involvement with the transferred assets as "no servicing responsibilities, no participation in future cash flows, no recourse obligations other than standard representations and warranties that the financial assets transferred met the delivery requirements under the arrangement, no further involvement of any kind. The transferee is significantly limited in its ability to pledge or exchange the transferred assets."

If a contractual provision (such as a call or removal of accounts provision) gives the transferor the unilateral ability to require the return of specific financial assets, the auditor should consider the effect of FASB ASC 860-10-40-5(c). [Footnote renumbered and revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁷ Paragraph .08c of section 500.

an assertion that the transfer of assets met the isolation criterion, the auditor is required⁸ to determine whether management needs to obtain an update of that opinion to confirm that there have been no changes in relevant law, applicable regulations, or in the pertinent facts of the transaction that may affect the applicability of the previous opinion to the new transaction.

.09 Question—If the auditor determines that the use of a management's legal specialist is required, what should he or she consider in assessing the adequacy of the legal opinion?

.10 Interpretation—In assessing the adequacy of the legal opinion, the auditor is required to evaluate the competence and capabilities⁹ of the legal specialist to determine whether the legal specialist has experience with relevant matters, including knowledge of the U.S. Bankruptcy Code, and other federal, state, or foreign law, as applicable, as well as knowledge of the transaction upon which management's assertion is based. For transactions that may be affected by provisions of the Federal Deposit Insurance Act (FDIA), it is important to consider whether the legal specialist has experience with the rights and powers of receivers, conservators, and liquidating agents under that act. The auditor is required to obtain an understanding of the work of the specialist,¹⁰ which includes obtaining an understanding of the assumptions that are used by the legal specialist, and make appropriate tests of any information that management provides to the legal specialist and upon which the specialist indicates it relied. For example, testing management's information underlying a legal specialist's assumption regarding the adequacy of consideration received may depend on the nature of the transaction and the relationship of the parties. When the legal specialist's opinion has assumed the adequacy of consideration for transfers from a particular legal entity to its wholly owned subsidiary, changes in the subsidiary's capital accounts plus other consideration generally would be sufficient audit evidence about the adequacy of consideration. In the case of other transfers, such as those that are not to a wholly owned subsidiary of a particular legal entity that is the transferor, obtaining additional audit evidence may be necessary to evaluate management's assertion with regard to the adequacy of consideration upon which the legal specialist relied, because changes in the transferee's capital accounts do not solely benefit the transferring entity.

.11 The auditor also is required to evaluate the appropriateness of that specialist work as audit evidence for the relevant assertion,¹¹ which includes considering the form and content of the documentation that the legal specialist provides and evaluating whether the legal specialist's findings support management's assertions with respect to the isolation criterion. The requirement in FASB ASC 860 regarding reasonable assurance that the transferred assets would be isolated provides the basis for what the auditor is required to consider in evaluating the work of a legal specialist.

.12 Findings of a legal specialist that relate to the isolation of transferred financial assets are often in the form of a reasoned legal opinion that is restricted to particular facts and circumstances relevant to the specific transaction. The reasoning of such opinion may rely upon analogy to legal precedents that may not involve facts and circumstances that are comparable to that specific

⁸ Paragraph .10 of section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement*.

¹¹ Paragraph .08c of section 500.

transaction. It is important to consider the effect of any limitations or disclaimers of opinion in assessing the adequacy of any legal opinion.

.13 An example of the conclusions in a legal opinion for an entity that is subject to the U.S. Bankruptcy Code that provides persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in bankruptcy or other receivership, follows:

We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become a Debtor, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of the Seller's estate for purposes of [the relevant sections] of the U.S. Bankruptcy Code.

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist. For example, if a so-called two-step structure has been used to achieve isolation, this paragraph usually will be required with respect to the transferee in the first step of such structure (see paragraph .15 [and related footnotes] of this interpretation for additional guidance on the second step of a two-step structure as described in paragraphs 22–23 of FASB ASC 860-10-55). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

Based upon the assumptions of fact and the discussion set forth previously, and on a reasoned analysis of analogous case law, *we are of the opinion that in a properly presented and argued case, as a legal matter, in a proceeding under the U.S. Bankruptcy Code,*¹² in which the Seller is a Debtor, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller in a case involving the insolvency of the Seller under the doctrine of substantive consolidation.

In the case of a transferor that is not entitled to become a debtor under the U.S. Bankruptcy Code, a legal opinion regarding whether the isolation criterion is met would consider whether isolation is satisfactorily achieved under the insolvency or receivership laws that apply to the transferor.

.14 Following are two examples of the conclusions in a legal opinion for an entity that is subject to receivership or conservatorship under provisions of the Federal Deposit Insurance Corporation (FDIC). The conclusions in these two examples provide persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in conservatorship or receivership. Insolvency and receivership laws applicable to depository institutions, and how those laws affect the legal isolation criterion, differ depending upon the nature of the depository institution and its chartering

¹² For an entity subject to additional regulation (for example, a broker-dealer subject to the Securities Investor Protection Act), the legal opinion also generally should address the effect of such regulation and the policies of the regulators implementing such regulations (for example, the Securities Investor Protection Corporation). [Footnote renumbered, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

authority. Accordingly, legal opinions addressing the legal isolation criterion may be formulated in different ways to accommodate those differences.¹³

Example 1. *We believe (or it is our opinion) that* in a properly presented and argued case, as a legal matter, in the event the Seller were to become subject to receivership or conservatorship, the transfer of the Financial Assets from the Seller to the Purchaser *would be considered to be a sale* (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of, or subject to repudiation, reclamation, recovery, or recharacterization by, the receiver or conservator appointed with respect to the Seller.¹⁴

Example 2. The Federal Deposit Insurance Corporation (FDIC) has issued a regulation, 'Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection with a Securitization or Participation,' 12 CFR section 360.6 (the Rule). Based on and subject to the discussion, assumptions, and qualifications herein, it is our opinion that:

- A. Following the appointment of the FDIC as the conservator or receiver for the Bank:
 - (i) The Rule will apply to the Transfers,
 - (ii) Under the Rule, the FDIC acting as conservator or receiver for the Bank could not, by exercise of its authority to disaffirm or repudiate contracts under 12 U.S.C. §821(e), reclaim or recover the Transferred Assets from the Issuer or recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank,
 - (iii) Neither the FDIC (acting for itself as a creditor or as representative of the Bank or its shareholders or creditors) nor any creditor of the Bank would have the right, under any bankruptcy or insolvency law applicable in the conservatorship or receivership of the Bank, to avoid the Transfers, to recover the Transferred Assets, or to require the Transferred Assets to be turned over to the FDIC or such creditor, and
 - (iv) There is no other power exercisable by the FDIC as conservator or receiver for the Bank that would permit the FDIC as such conservator or receiver to reclaim or recover the Transferred Assets from the Issuer, or to recharacterize the Transferred
