Technical Information Division

Checklists and Illustrative Financial Statements for Corporations has not been approved, disapproved, or otherwise acted upon by any senior technical committees of the American Institute of Certified Public Accountants or the Financial Accounting Standards Board and has no official or authoritative status.

American Institute of Certified Public Accountants
The checklists and illustrative financial statements included in this section have been developed by the staff of the Technical Information Division of the AICPA as nonauthoritative technical practice aids. Readers should be aware of the following:

- The checklists and illustrative financial statements are "tools" and in no way represent official positions or pronouncements of the AICPA.

- The checklists and illustrative financial statements have been updated through SAS No. 71, SSARS No. 6, FASB Statement of Financial Accounting Standards No. 109, FASB Interpretation No. 39, FASB Technical Bulletin No. 90-1, and AICPA Statement of Position 92-3. The checklists and illustrative financial statements should be modified, as appropriate, for subsequent pronouncements. In determining the applicability of a pronouncement, its effective date should also be considered.

- The checklists and illustrative financial statements should be used by or under the supervision of persons having adequate technical training and proficiency in the application of generally accepted accounting principles, generally accepted auditing standards, and statements on standards for accounting and review services.

- The checklists and illustrative financial statements do not represent minimum requirements and do not purport to be all inclusive. The checklists were developed for use in respect of the financial statements of general "for profit" companies and probably will require extensive modification if applied to the financial statements of "not-for-profit" organizations and companies in specialized industries. Pages 73-75 include a list of FASB Statements and Interpretations related to specialized industries which are not included in this checklist.

Users of these checklists and illustrative financial statements are urged to refer directly to applicable authoritative pronouncements when appropriate. If you have any further questions, call the AICPA Technical Hotline (see back cover).

INTRODUCTION

General Comments

Illustrative financial statement formats are often helpful in developing a consistent style of presentation within a firm. However, the circumstances of engagements vary widely, and no set of illustrative financial statements can cover all situations likely to be encountered in practice, particularly when the client is engaged in a specialized industry. Accordingly, users should refer to the firm's own report files, illustrations in authoritative pronouncements, and other sources such as AICPA industry audit guides and Accounting Trends and Techniques, library collections of published financial reports, and the AICPA National Automated Accounting Research System (NAARS).

The Balance Sheet

The companies surveyed in Accounting Trends and Techniques\(^1\) generally use the title "balance sheet" for their statements of assets, liabilities, and stockholder's equity. Other titles used by those companies are "statement of financial position" and "statement of financial condition."

There are two basic ways that balance sheets are arranged:

a. Account Form - Assets are listed on the left-hand side and totaled to equal the sum of liabilities and stockholder's equity on the right-hand side.

b. Report Form - Assets are listed at the top of the page followed by liabilities and stockholder's equity. Sometimes total liabilities are deducted from total assets to equal stockholder's equity.

Statement of Income

The companies surveyed for Accounting Trends and Techniques generally use the term "income" in the title of their presentations of the results of operations. Other terms used by those companies are "earnings" and "operations."

The income statement is usually presented in one of the following formats:

a. Single-Step Format - The single-step format groups the components of net income into two categories: (1) revenues and gains and (2) expenses and losses. The difference between the two subtotals is net income or loss for the period.

b. Multiple-Step Format - The multiple-step format shows various intermediate components of net income. Generally, operating results are presented separately from nonoperating results, e.g., costs and expenses are deducted from sales followed by nonoperating revenues, gains, expenses, and losses, and are grouped by type or function. Intermediate components of net income that are frequently presented in multiple-step statements are gross profit, income from operations, and other income and expenses.

**Statements of Retained Earnings or Stockholder's Equity**

Although separate statements of retained earnings and statements of stockholder's equity are common presentations for public companies, their use by nonpublic companies is much less frequent. The required disclosure can often be made without presenting separate statements. This is a direct consequence of the generally much simpler capital structure of nonpublic entities and the fact that their securities are not frequently transferred.

In most cases the only change in stockholder's equity of a nonpublic company is the change in retained earnings resulting from net income (or loss). This change can, generally, be adequately disclosed by expansion of the statement of income or in the balance sheet.

When nonpublic companies do experience changes in other components of stockholder's equity, e.g., issuance of stock, purchase of treasury stock, and stock splits, disclosure is generally made in the notes or in a separate statement of changes in stockholder's equity.

**Statement of Cash Flows**

A statement of cash flows is required as a part of a full set of financial statements for all business enterprises in place of a statement of changes in financial position as a result of the issuance of SFAS Statement 95. The primary purpose of a statement of cash flows is to provide relevant information about the cash receipts and cash payments of an entity during a period.

A statement of cash flows classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities. Entities can report cash flows from operating activities directly by showing major classes of operating cash receipts and payments (the direct method).

Entities that choose not to show operating cash receipts and payments are required to report the same amount of net cash flow from operating activities indirectly by adjusting net income to reconcile it to net cash flow from operating activities (the indirect or reconciliation method). If the direct method is used,
a reconciliation of net income and net cash flow from operating activities is required to be provided a separate schedule.

Notes to Financial Statements

Authoritative pronouncements mandate many types of disclosures but do not mandate the manner of presentation. Some disclosures are best presented in separate notes rather than in the basic financial statements. Descriptions of accounting policies and notes to financial statements are recognized in SAS No. 29 as components of the "basic financial statements" necessary for a fair presentation in accordance with generally accepted accounting principles. Thus, notes are an integral part of financial statements. They should be used to present material disclosures required by generally accepted accounting principles that are not otherwise presented in the statements, i.e., on the face of the statements.
Checklists—General

Many auditors and accountants find it helpful to use checklists as practice aids in the preparation of financial statements and reports. Some firms have developed their own checklists for internal use, and may also have specialized checklists to meet the needs of their practices, such as checklists for clients in particular industries or clients that report to the SEC. Some state CPA societies have developed checklists as practice aids which may be available to other practitioners as well as to their own members. Some commercial publishers also include checklists in certain of their publications. However, authoritative literature does not require the use of such checklists, nor does it prescribe their format or content, which vary.

Checklists typically consist of a number of brief questions or statements that are accompanied by references to Statements on Auditing Standards, Statements on Standards for Accounting and Review Services, Statements of Financial Accounting Standards, Accounting Principles Board Opinions, Accounting Research Bulletins, and AICPA Statements of Position. Some checklists also include references to FASB Interpretations and to selected SEC disclosure requirements. The extent of detail included in checklists varies with the judgment of the preparers on how extensively to refer to and highlight authoritative literature without developing a checklist that is too long and unwieldy. Accordingly, checklists may serve as convenient memory aids but cannot be used as a substitute for direct reference to the authoritative literature.

Checklists usually provide for checking off or initialling each question or point to show that it has been considered. The format used in these sections is a typical one; it provides for "yes," "no," and "not applicable" answers and presumes that remarks would be prepared on separate cross-referenced memorandums. Some preparers, however, prefer to include space for remarks in the body of the checklist while others prefer alternative checklist formats. For example, a checklist format may provide for the following set of answers: "not applicable," "not material," "in statements," and "in note" (with provisions for indicating a cross reference to the specific statement caption or note). Another format may provide for only two answers, "disclosed" and "not applicable." Firms and practitioners who develop their own checklists should adopt formats that suit their needs and preferences.

Checklists are generally accompanied by caveats that include all of the following points:

• Use of the checklists requires the exercise of individual professional judgment and may likely require some modification based on the circumstances of individual engagements.

• The checklists are not all inclusive and are not intended to present minimum requirements.
• Users need to modify the checklists for any pronouncements issued subsequent to those mentioned in the checklist.

If widespread circulation is expected, the preparers also generally stress the nonauthoritative or unofficial status of the checklists and disclaim responsibility for the way they may be used.

2 Practices for grouping and separately identifying—classifying—similar financial instruments in statements of financial position, in notes to financial statements, and in various regulatory reports have developed and become generally accepted, largely without being codified in authoritative literature. In SFAS 105 [AC F25], class of financial instrument refers to those classifications.

Illustrative Financial Statements
Illustrative Independent Auditor's Report

We have audited the accompanying balance sheets of a Private Company and Subsidiaries as of December 31, 19X1 and 19X0, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of a Private Company and Subsidiaries as of December 31, 19X1 and 19X0, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

Illustrative Notes to Financial Statements

Illustrative Note: Summary of Significant Accounting Policies

- Principles of Consolidation
  The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, after elimination of all significant intercompany balances and transactions.

- Translation of Foreign Financial Statements
  Assets and liabilities of most foreign operations are translated at year-end rates of exchange, and the income statements are translated at the average rates of exchange for the year. Gains or losses resulting from translating foreign currency financial statements are accumulated in a separate component of stockholder's equity until the entity is sold or substantially liquidated.

  Gains or losses resulting from foreign currency transactions (transactions denominated in a currency other than the entity’s local currency) are generally included in net income. For operations in countries that have high rates of inflation (Brazil and Mexico), gains and losses from translating assets and liabilities at year-end rates of exchange, except for inventories and facilities, which are translated at historical rates, are included in net income.

- Short-term Interest Bearing Investments
  Short-term interest bearing investments consist of certificates of deposit and other income producing securities of less than one-year maturity. These investments are readily convertible to cash and are stated at cost which approximates market.

- Inventories
  Inventories are stated at the lower of cost (determined on a first-in, first-out basis) or market, and include material, labor and factory overhead.

- Property and Depreciation
  Property and equipment are recorded at cost. Depreciation is provided on the straight-line method over the estimated useful lives of the respective assets.

- Income Taxes
  Deferred income taxes in the accompanying financial statements reflect temporary differences in reporting results of operations for income tax and financial accounting purposes.

- Employee Benefits
  The Company and its consolidated subsidiaries have several defined benefit pension plans covering substantially all employees. The benefits are based on years of service and the employee’s final average monthly compensation. The Company’s funding policy is to contribute annually not less than the minimum required nor more than the maximum amount that can be deducted for federal income tax purposes. Contributions are intended to provide not only benefits attributed to service to date but also for those expected to be earned in the future.

- Intangible Assets
  The excess of cost over carrying value of net assets acquired is being amortized on a straight-line basis over a forty-year period. The cost of patents acquired in connection with business acquisitions is amortized on a straight-line basis over the remaining economic life of the respective patents, but in no event longer than the remaining legal life.

Illustrative Note: Restricted Cash

At December 31, 19X1 and 19X0 cash in the amount of $XX,XXX and $XX,XXX, respectively, was restricted as to use. The amounts represent unexpended proceeds from industrial revenue obligations, which may be used only for the purchase of additional equipment.
Illustrative Note: Marketable Securities

Gross unrealized gains and losses on non-current marketable securities were as follows:

<table>
<thead>
<tr>
<th></th>
<th>19X1</th>
<th>19X0</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gross unrealized gains</td>
<td>$XX,XXX</td>
<td>$XX,XXX</td>
</tr>
<tr>
<td>Gross unrealized losses</td>
<td>$XX,XXX</td>
<td>$XX,XXX</td>
</tr>
</tbody>
</table>

Net realized gains of $XX,XXX in 19X1 and $XX,XXX in 19X0 realized on the sale of marketable securities are included in the determination of net income. The cost of the securities sold was determined on the specific identification basis. Subsequent to December 31, 19X1, the Company had realized gains of $XX,XXX before income taxes on the sale of marketable securities. The valuation allowance included in stockholder’s equity increased $XX,XXX during 19X1 and decreased $XX,XXX during 19X0.

The current and non-current portfolios of marketable securities are each stated at the lower of aggregate cost or market value at the balance-sheet date and consist of common and preferred stocks and notes. Dividend and interest income are accrued as earned.

Illustrative Note: Imputation of Interest on Note Receivable

The Company’s note receivable is described below.

</tbody>
</table>

Property, plant and equipment includes capitalized lease obligations of $X,XXX and $XX,XXX and related accumulated depreciation of $XXX and $XXX at December 31, 19X1 and 19X0, respectively.

Illustrative Note: Cash Value Officer’s Life Insurance

The Company maintains life insurance policies on certain of its officers and employees. The policies are of two types, split-dollar insurance and key-man insurance. Under the split-dollar insurance, the Company pays the premium and receives, upon termination of the policy or the death of the insured, the cash surrender value of the policy and the insured designates a beneficiary to receive the balance of benefits paid. Under the key-man insurance, the Company receives the cash surrender value, if the policy is terminated, or receives all benefits payable upon the death of the insured.

Illustrative Note: Intangible Assets

Intangibles relate to businesses acquired and consist principally of the acquisition costs allocated to patents and to the difference between purchase price and fair value at date of acquisition of net tangible assets acquired (goodwill). At December 31, 19X1 and 19X0, unamortized costs allocated to patents were $X,XXX and $X,XXX, respectively. Patent amortization was $XXX in 19X1 and $XXX in 19X0. Amortization of goodwill was $XX in 19X1 and $XX in 19X0.

Illustrative Note: Short-term Obligations Expected to Be Refinanced

At December 31, 19X1, $XX,XXX of short-term obligations have been classified as long-term debt since the Company, as of January 31, 19X2, has converted these obligations into notes under a revolving credit agreement with the bank. The notes bear interest at XX% over prime rate. The amount which can be borrowed under the agreement is subject to reduction in the event of certain other borrowings.

Illustrative Note: Profit-Sharing and Compensation Agreements

The Company has a qualified profit-sharing plan. Annual contributions to the plan are made at the discretion of the Board of Directors. Provisions in the amount of $XX,XXX in 19X1 and $XX,XXX in 19X0 were accrued and charged against income. The Company has adopted a key-employee performance incentive plan. Under the plan, income accrues to each key employee based upon the appreciation of the market value of the Company’s common stock. In 19X1 and 19X0, $X,XXX and $X,XXX, respectively, was paid and charged against income.

Illustrative Note: Long-term Leases

All noncancelable leases have been categorized as capital or operating leases. The Company has leases for manufacturing plants, warehouses, administrative offices and machinery and equipment with terms (including renewal operations) ranging from one to fifty years. Under most leasing arrangements, the Company pays the property taxes, insurance, maintenance and expenses related to the leased property. Total rental expense under operating leases was $XX,XXX in 19X1 and $XX,XXX in 19X0.
Minimum future obligations on leases in effect at December 31, 19X1 are:

The present values of minimum future obligations shown above are calculated based on interest rates ranging from X% to XX%, with a weighted average of approximately X% determined to be applicable at the inception of the lease.

Interest expense on the outstanding obligations under capital leases was $XXX in 19X1 and $XXX in 19X0.

Illustrative Note: Long-term Debt

Long-term debt at December 31, 19X1 and 19X0 consists of the following:

<table>
<thead>
<tr>
<th></th>
<th>19X1</th>
<th>19X0</th>

The provisions of the unsecured credit agreement require the prior written consent of the creditor for additional borrowings, sale of property and acquisitions of the Company’s stock, and limit the payment of cash dividends. At December 31, 19X1, retained earnings of approximately $XX,XXX were available for the payment of dividends and other purposes under the agreement. Long-term debt maturing in the next five years consists of:

At December 31, 19X1, there are approximately $X,XXX of unused investment tax credits expiring in 20X2 available for tax purposes. In 19X1, the Company adopted Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes." The effect of adopting this statement in 19X1 on income from continuing operations was $XXX or $.XX per share. The effect on net income was $X,XXX or $.XX per share.

Illustrative Note: Pension Plan

Effective as of January 1, 19XX, the Company adopted Statement of Financial Accounting Standards No. 87, "Employers' Accounting for Pension." Adoption of the statement, which is accounted for prospectively without adjustment to prior years, increased the Company's 19XX net income by $X,XXX ($XX per share).

The weighted average discount rate and rate of increase in future compensation levels in determining the actuarial present value of the projected benefit obligation were X% and X%, respectively. The expected long-term rate of return of assets was X%.

In 19X1 and 19X0, $X,XXX and $XX,XXX, respectively, of the vested benefit portion of the projected benefit obligation were settled through the purchase of nonparticipating annuity contracts for certain retired participants and lump-sum payments for certain terminated participants. An amount equal to the $X par value of the additional common shares has been transferred from additional paid-in-capital to common stock; and common stock options outstanding, exercised and expired have been increased two-for-one and the exercise price reduced by one-half. In connection with the stock split, XX common shares were cancelled as a result of the payment of cash in lieu of fractional shares.

Illustrative Note: Major Supplier

A material amount of the Company’s raw materials inventory is acquired from a few suppliers, the loss of any one of which may have an adverse effect on the Company. If the Company were forced to change suppliers, it would incur substantial transportation costs for raw materials which would be difficult to pass along to customers.

For the year ended December 31, 19X1, one supplier accounted for $XX,XXX of raw materials purchased; for the year ended 19X0, one supplier accounted for $XX,XXX of raw materials purchased. Although there are no formal long-term supply agreements with these suppliers, the Company has done business with them for a minimum of five years.

There are claims and actions pending against the Company. In the opinion of management, the amounts, if any, which may be awarded in connection with these claims and actions would not be material to the Company’s financial position.
