CHECKLISTS AND ILLUSTRATIVE FINANCIAL STATEMENTS FOR CORPORATIONS

.01 The checklists and illustrative financial statements included in this section have been developed by the staff of the Technical Information Division of the AICPA as nonauthoritative technical practice aids. Readers should be aware of the following:

- The checklists and illustrative financial statements do not include all disclosures and presentation items promulgated. Pronouncements deemed remote are not provided in the document.
- The checklists and illustrative financial statements are “tools” and in no way represent official positions or pronouncements of the AICPA.
- The checklists have been updated through SAS No. 74, SSARS No. 7, FASB Statement of Financial Accounting Standards No. 122, FASB Interpretation No. 41, FASB Technical Bulletin No. 94-1, AICPA Statement of Position 95-1, and EITF consensuses adopted up to and including the May 19, 1995 Emerging Issues Task Force meeting. The illustrative financial statements do not include disclosures for FASB Statement Nos. 112, 114-122. The checklists and illustrative financial statements should be modified, as appropriate, for subsequent pronouncements. In determining the applicability of a pronouncement, its effective date should also be considered.
- The checklists and illustrative financial statements should be used by, or under the supervision of, persons having adequate technical training and proficiency in the application of generally accepted accounting principles, generally accepted auditing standards, and statements on standards for accounting and review services.

.02 Users of the checklists and illustrative financial statements are urged to refer directly to applicable authoritative pronouncements when appropriate. If you have further questions, call the AICPA Technical Hotline.

Note: This publication was extracted from chapter 18 of the AICPA Comprehensive Engagement Manual.
Introduction

General Comments

.01 Illustrative financial statement formats are often helpful in developing a consistent style of presentation within a firm. However, the circumstances of engagements vary widely, and no set of illustrative financial statements can cover all situations likely to be encountered in practice, particularly when the client is engaged in a specialized industry. Accordingly, users should refer to the firm's own report files, illustrations in authoritative pronouncements, and other sources such as the AICPA Audit and Accounting Guides and Accounting Trends and Techniques, library collections of published financial reports, and the AICPA National Automated Accounting Research System (NAARS).

The Balance Sheet

.02 The companies surveyed in Accounting Trends and Techniques \(^1\) generally use the title "balance sheet" for their statements of assets, liabilities, and stockholder's equity. Other titles used by those companies are "statement of financial position" and "statement of financial condition."

.03 There are two basic ways that balance sheets are arranged:

a. Account Form—Assets are listed on the left-hand side and totaled to equal the sum of liabilities and stockholder's equity on the right-hand side.

b. Report Form—Assets are listed at the top of the page followed by liabilities and stockholder's equity. Sometimes total liabilities are deducted from total assets to equal stockholder's equity.

Statement of Income

.04 The companies surveyed for Accounting Trends and Techniques generally use the term "income" in the title of their presentations of the results of operations. Other terms used by those companies are "earnings" and "operations."

.05 The income statement is usually presented in one of the following formats:

a. Single-Step Format—The single-step format groups the components of net income into two categories: (1) revenues and gains and (2) expenses and losses. The difference between the two subtotals is net income or loss for the period.

b. Multiple-Step Format—The multiple-step format shows various intermediate components of net income. Generally, operating results are presented separately from nonoperating results, e.g., costs and expenses are deducted from sales followed by nonoperating revenues, gains, expenses, and losses, and are grouped by type or function. Intermediate components of net income that are frequently presented in multiple-step statements are gross profit, income from operations, and other income and expenses.

\(^1\)Accounting Trends and Techniques (New York, AICPA) 1994, p. 143.
Statements of Retained Earnings or Stockholder’s Equity

.06 Although separate statements of retained earnings and statements of stockholder’s equity are common presentations for public companies, their use by nonpublic companies is much less frequent. The required disclosure can often be made without presenting separate statements. This is a direct consequence of the generally much simpler capital structure of nonpublic entities and the fact that their securities are not frequently transferred.

.07 In most cases the only change in stockholder’s equity of a nonpublic company is the change in retained earnings resulting from net income (or loss). This charge can, generally, be adequately disclosed by expansion of the statement of income or in the balance sheet.

.08 When nonpublic companies do experience changes in other components of stockholder’s equity, e.g., issuance of stock, purchase of treasury stock, and stock splits, disclosure is generally made in the notes or in a separate statement of changes in stockholder’s equity.

Statement of Cash Flows

.09 A statement of cash flows is required as a part of a full set of financial statements for all business enterprises in place of a statement of changes in financial position as a result of the issuance of SFAS Statement 95. The primary purpose of a statement of cash flows is to provide relevant information about the cash receipts and cash payments of an entity during a period.

.10 A statement of cash flows classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities. Entities can report cash flows from operating activities directly by showing major classes of operating cash receipts and payments (the direct method).

.11 Entities that choose not to show operating cash receipts and payments are required to report the same amount of net cash flow from operating activities indirectly by adjusting net income to reconcile it to net cash flow form operating activities (the indirect or reconciliation method). If the direct method is used, a reconciliation of net income and net cash flow from operating activities is required to be provided in a separate schedule.

Notes to Financial Statements

.12 Authoritative pronouncements mandate many types of disclosures but do not mandate the manner of presentation. Some disclosures are best presented in separate notes rather than in the basic financial statements. Descriptions of accounting policies and notes to financial statements are recognized in SAS No. 29 as components of the "basic financial statements" necessary for a fair presentation in accordance with generally accepted accounting principles. Thus, notes are an integral part of financial statements. They should be used to present material disclosures required by generally accepted accounting principles that are not otherwise presented in the statements, i.e., on the face of the statements.
Checklists—General

.01 Many auditors and accountants find it helpful to use checklists as practice aids in the preparation of financial statements and reports. Some firms have developed their own checklists for internal use and may also have specialized checklists to meet the needs of their practices, such as checklists for clients in particular industries or clients that report to the SEC. Some state CPA societies have developed checklists as practice aids that may be available to other practitioners, as well as to their own members. Some commercial publishers also include checklists in certain of their publications. However, authoritative literature does not require the use of such checklists, nor does it prescribe their format or content, which vary.

.02 Checklists typically consist of a number of brief questions or statements that are accompanied by references to Statements on Auditing Standards, Statements on Standards for Accounting and Review Services, Statements of Financial Accounting Standards, Accounting Principles Board Opinions, Accounting Research Bulletins, AICPA Statements of Position and Emerging Issues Task Force Consensuses. Some checklists also include references to FASB Interpretations and to selected SEC disclosure requirements. The extent of detail included in checklists varies with the judgment of the preparers on how extensively to refer to and highlight authoritative literature without developing a checklist that is too long and unwieldy. Accordingly, checklists may serve as convenient memory aids but cannot be used as a substitute for direct reference to the authoritative literature.

.03 Checklists usually provide for checking off or initialling each question or point to show that it has been considered. The format used herein is a typical one; it provides for "yes," "no," and "not applicable" answers and presumes that remarks would be prepared on separate cross-referenced memorandums. Some preparers, however, prefer to include space for remarks in the body of the checklist, while others prefer alternative checklist formats. For example, a checklist format may provide for the following set of answers: "not applicable," "not material," "in statements," and "in note" (with provisions for indicating a cross-reference to the specific statement caption or note). Another format may provide for only two answers, "disclosed" and "not applicable." Firms and practitioners who develop their own checklists should adopt formats that suit their needs and preferences.

.04 Checklists are generally accompanied by caveats that include all of the following points:

- Use of the checklists requires the exercise of individual professional judgment and may likely require some modification based on the circumstances of individual engagements.

- The checklists are not all-inclusive and are not intended to present minimum requirements.

- Users need to modify the checklists for any pronouncements issued subsequent to those mentioned in the checklist.

.05 If widespread circulation is expected, the preparers also generally stress the nonauthoritative or unofficial status of the checklists and disclaim responsibility for the way they may be used.
FINANCIAL STATEMENTS AND NOTES CHECKLIST

.01 This checklist, as well as the "Auditors' Reports Checklist" and the "Accountants' Reports on Compiled or Reviewed Financial Statements of Nonpublic Entities Checklist" that appear later in this publication, include disclosures commonly encountered in the financial statements of a corporation and reporting issues likely to be encountered by accountants who audit, compile and review these types of financial statements. The do not include all disclosures required by GAAP or all reporting situations required by GAAS and SSARS. Further, the illustrative financial statements in this publication are intended to provide sample financial statement formats and disclosures for a hypothetical corporation; they are not intended to illustrate all disclosures required by GAAP, nor do they illustrate all of the disclosures covered in the checklist.

Carefully review the topics listed and consider whether they represent potential disclosure items for the entity. Place a check mark by the topics or sections considered not applicable; these sections need not be completed. For example, if the entity did not enter into any business combinations during the year, place a check by General, Section E, "Business Combinations," and skip this section when completing the checklist.

H. Financial Instruments

In October 1994, the FASB issued SFAS 119, *Disclosure about Derivative Financial Instruments and Fair Value of Financial Instruments*, which expands the disclosure requirements for entities that hold or issue derivative financial instruments (see Section R. for SFAS 119 disclosures). It also amends certain disclosure requirements of SFAS 105, *Disclosure of Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk*, and SFAS 107, *Disclosures about Fair Value of Financial Instruments*. This section has been updated to reflect SFAS 119's amendments to SFAS 105 and 107. SFAS 119 is effective for fiscal years ending after December 15, 1994, except for entities with less than $150 million in total assets in the current statement of financial position, for which the effective date is for fiscal years ending after December 15, 1995. Earlier application is encouraged. For entities that have not adopted SFAS 119, guidance is provided in certain footnotes in this section of the checklist for applying the disclosure requirements of SFAS 105 and 107 prior to adoption of SFAS 119.
1. For financial instruments with off-balance-sheet risk (except for those excluded in SFAS 105), are the following disclosed either in the body of the financial statements or in the notes by category of financial instrument:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>

</tr>
</tbody>
</table>

   a. The face or contract amount or notional principal amount if there is no face or contract amount?

   b. The nature and terms, including, at a minimum, a discussion of:

   (1) The credit and market risk of those instruments?

   (2) The cash requirements of those instruments?

2. Do the disclosures in Steps 1.a.-b. distinguish between financial instruments with off-balance-sheet risk held or issued for trading purposes, including dealing and other trading activities measured at fair value with gains and losses recognized in earnings, and financial instruments with off-balance-sheet risk held or issued for purposes other than trading?[^2]

[^2]: [SFAS 105, par. 17, as amended by SFAS 119, par. 14 (AC F25.112A)]

3. For financial instruments with off-balance-sheet credit risk (except for those excluded in SFAS 105), are the following disclosed either in the body of the financial statements or in the notes by category of financial instrument?

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>

   a. The amount of accounting loss the entity would incur if any party to the financial instrument failed completely to perform according to the terms of the contract and the collateral or other security, if any, if the amount due proved to be of no value to the entity?

---

1 "Category of financial instrument" refers to class of financial instrument, business activity, risk, or other category that is consistent with the management of those instruments. If disaggregation of financial instruments is other than by class, the entity also should describe for each category the classes of financial instruments included in that category. If the entity has not adopted SFAS 119, the disclosures in Steps 1.a.-b. should be made by class of financial instrument rather than by category.

2 Not applicable to entities that have not adopted SFAS 119.

3 See footnote 1. If the entity has not adopted SFAS 119, the disclosures in Step 3 should be made by class of financial instrument, rather than by category.
b. The entity’s policy of requiring collateral or other security to support financial instruments subject to credit risk, information about the entity’s access to that collateral or other security, and the nature and a brief description of the collateral or other security supporting those financial instruments? [SFAS 105, par. 18, as amended by SFAS 119, par. 14 (AC F25.113)]

4. Do disclosures of all significant concentrations of credit risk arising from all financial instruments, whether from an individual counterparty or groups of counterparties (except those excluded in SFAS 105), include:

   a. Information about the (shared) activity, region, or economic characteristic that identified the concentration?

   b. The amount of accounting loss due to credit risk the entity would incur if parties to the financial instruments that make up the concentration failed completely to perform according to the terms of the contracts and the collateral or other security, if any, for the amount due proved to be of no value to the entity?

   c. The entity’s policy of requiring collateral or other security to support financial instruments subject to credit risk, information about the entity’s access to that collateral or other security, and the nature and a brief description of the collateral or other security supporting those financial instruments? [SFAS 105, par. 20 (AC F25.115)]

NOTE: The following steps relate to SFAS 107, *Disclosures about Fair Value of Financial Instruments*. For entities with less than $150 million in total assets, the effective date for SFAS 107 is for financial statements issued for fiscal years ending after December 15, 1995. (For entities with $150 million or more in total assets, the effective date was December 15, 1992.)
5. Is the fair value of financial instruments for which it is practicable to estimate that value (except for those excluded in paragraphs 8 and 13 of SFAS 107) disclosed, together with the related carrying amount in a form that makes it clear whether the fair value and carrying amount represent assets or liabilities and how the carrying amounts relate to what is reported in the statement of financial position? Yes No N/A

6. Do the disclosures in Step 5 distinguish between financial instruments held or issued for trading purposes, including dealing and other trading activities measured at fair value with gains and losses recognized in earnings, and financial instruments held or issued for purposes other than trading? Yes No N/A

7. Are the methods and significant assumptions used to estimate the fair value of financial instruments disclosed? Yes No N/A

8. If it is not practicable to estimate the fair market value of a financial instrument, do disclosures include:

   a. Information pertinent to estimating the fair value of the financial instrument or class of financial instruments, such as the carrying amount, effective interest rate, and maturity? Yes No N/A

   b. The reasons why it is not practicable to estimate fair value? Yes No N/A

---

4 If disclosed in more than a single note, one of the notes should include a summary table containing the fair value and related carrying amounts and cross-references to the location(s) of the remaining disclosures required by SFAS 107.

5 Not applicable to entities that have not adopted SFAS 119.
9. In disclosing the fair value of a derivative financial instrument, does the entity not?\(^6\)\(^7\)
   
   a. Combine, aggregate, or net the fair value with the fair value of a nonderivative financial instrument?  
   
   b. Net the fair value with the fair value of other derivative financial instruments?  
      [SFAS 107, par. 13, as amended by SFAS 119, par. 15 (AC F25.115)]

10. For all fiscal years subsequent to the year of transition, are SFAS 107 disclosures included for each year for which a statement of financial position is presented for comparative purposes?  
    [SFAS 107, par. 17]

I. Foreign Currency

1. Is the aggregate exchange gain or loss included in net income for the period disclosed?  
   [SFAS 52, par. 30 (AC F60.140)]

2. Is an analysis of changes during the period in the separate component of equity for cumulative translation adjustments included, and does it disclose:
   
   a. Beginning and ending amount of cumulative translation adjustments?  
   
   b. The aggregate adjustment for the period resulting from translation adjustments and gains and losses from certain hedges and intercompany balances?  
   
   c. The amount of income taxes for the period allocated to translation adjustments?

ILLUSTRATIVE FINANCIAL STATEMENTS, NOTES, AND AUDITOR'S REPORT

Independent Auditor's Report

To the Shareholders and Board of Directors
Private Company and Subsidiaries

We have audited the accompanying balance sheet of Private Company and Subsidiaries as of December 31, 19X2, and the related consolidated statements of operations, shareholders' equity and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Private Company and Subsidiaries at December 31, 19X2 and the results of its operations and its cash flows for the year then ended in conformity with generally accepted accounting principles.

Note A: Summary of Significant Accounting Policies

- **Nature of Operations**
  
  Private Company and Subsidiaries (the "Company") is predominantly engaged in the production and sale of high-precision tools for use in the construction industry. The Company is also engaged in the construction of small commercial buildings in Canada. This work is usually performed under fixed-price contracts.

- **Use of Estimates**
  
  The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

- **Consolidation**
  
  The consolidated financial statements of the Company include the accounts of Private Company and its wholly owned subsidiaries. Intercompany transactions and accounts have been eliminated. Investments in nonconsolidated companies where management exercises significant influence are accounted for using the equity method.

- **Cash Equivalents**
  
  Holdings of highly liquid investments with original maturities of three months or less and investments in money market funds are considered to be cash equivalents by the Company.

- **Inventories**
  
  Inventories are valued using the last-in, first-out (LIFO) method at certain domestic units. Remaining inventories are valued using the first-in, first-out (FIFO) method. All inventories are stated at the lower of cost or market.

- **Property**
  
  Property, plant and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of assets. Leasehold improvements are amortized over the life of the related asset or the life of the lease, whichever is shorter.

- **Intangibles**
  
  Intangible assets are amortized on a straight-line basis over periods not exceeding 40 years.
• Foreign Currency Translation

Foreign currency transactions and financial statements of foreign subsidiaries are translated into U.S. dollars at prevailing or current rates respectively, except for revenue, costs and expenses which are translated at average current rates during each reporting period. Gains and losses resulting from translation of financial statements are excluded from the statement of operations and are credited or charged directly to a separate component of shareholders’ equity.

• Revenue Recognition

The percentage-of-completion method of accounting is followed for long-term contracts. Under this method, earnings accrue as the contract progresses toward completion, based on the percentage of costs incurred or the units of product delivered. Revenues are primarily recognized as products are shipped and services rendered.

• Income Taxes

The Company accounts for its income taxes using Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes, which requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities, using enacted tax rates in effect for the year in which the differences are expected to reverse.

Note B: Accounts Receivable

Accounts receivable are net of allowances for returns and doubtful accounts of $4,416 at December 31, 19X2.

Note C: Inventories

Inventories at December 31, 19X2 consisted of the following:

<table>
<thead>
<tr>
<th>Description</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finished goods</td>
<td>$29,778</td>
</tr>
<tr>
<td>Work in process</td>
<td>31,539</td>
</tr>
<tr>
<td>Raw material and purchased parts</td>
<td>54,792</td>
</tr>
<tr>
<td>Total FIFO cost</td>
<td>116,109</td>
</tr>
<tr>
<td>Excess of FIFO cost over LIFO inventory value</td>
<td>(16,915)</td>
</tr>
<tr>
<td>Net carrying value</td>
<td>$99,194</td>
</tr>
</tbody>
</table>

Inventories valued using LIFO were approximately $39,950 at December 31, 19X2. During 19X2 reductions in inventory quantities resulted in liquidations of LIFO inventory layers carried at lower costs prevailing in prior years as compared with the cost of 19X2 purchases. The effects were to reduce the amount of beginning LIFO reserve and increase 19X2 pretax income by $3,500. Had cost of sales related to the LIFO inventory layers that were liquidated been valued using current costs, the effects would have been to decrease 19X2 net earnings by $1,950 in 19X2.

Progress payments, netted against work in process at year end, were $1,310 in 19X2.
Note D: Contracts in Progress

Contracts in progress of $13,050 at December 31, 19X2 is included in prepaid expenses and other assets. Contracts in progress represent revenue recognized on a percentage-of-completion basis over related progress billings of $30,008 at December 31, 19X2. Substantially all contracts in progress at year-end are billed during the subsequent year.

Note E: Property, Plant and Equipment

Property, plant and equipment at December 31, 19X2 consisted of the following:

<table>
<thead>
<tr>
<th>Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land</td>
<td>$5,750</td>
</tr>
<tr>
<td>Buildings and leasehold improvements</td>

<td>285,709</td>
</tr>
<tr>
<td>Less accumulated depreciation and amortization</td>
<td>(167,042)</td>
</tr>
<tr>
<td></td>
<td>$118,667</td>
</tr>
</tbody>
</table>

Note F: Income Taxes

At December 31, 19X2, the Company had net operating loss and tax credit carryforwards for income tax purposes of approximately $45,350 and $6,350, respectively, which expire in years 19X3 through 20X2 and acquired deductible temporary differences of approximately $24,450. These carryforwards and deductible temporary differences resulted from prior year acquisitions. For financial reporting purposes, a valuation allowance of $21,600 has been recognized to offset the deferred tax assets related to these items.

The net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes are reflected in deferred income taxes. Significant components of the Company’s deferred tax assets and liabilities as of December 31, 19X2 are as follows:

Deferred tax assets:

Maturities of long-term debt through 19X7 are: 19X3 — $4,608; 19X4 — $1,943; 19X5 — $13,241; 19X6 — $91,119; 19X7 — $424.
The Company issued $50,000 of 5⅞% of Convertible Subordinated Notes due 20X2 in April 19X2. The Notes are convertible into Private Company common stock at a conversion rate of 6.33 shares of Common Stock for each $1 principal amount of Notes (equivalent to a conversion price of approximately $39.00 per share). The proceeds from the Notes were used to repay $12,500 of commercial paper and money market loans, $10,600 of commercial paper and money market loans (incurred to redeem $10,550 of its 87/8% Debentures due 19X9 and the associated premium), and the balance to repay other commercial paper and money market loans with a weighted average interest rate of 4.36%, and for general corporate purposes.

In July 19X2, the company entered two revolving credit agreements with expiration dates of July 15, 19X3 and July 18, 19X5. Each agreement permits borrowings of up to $100,000 at interest rates offered to prime customers. The agreement expiring July 18, 19X5 is convertible into a one-year term loan.

Money market loans and commercial paper are classified as long-term debt as the company intends to refinance them on a long-term basis either through continued short-term borrowing or utilization of available credit facilities.

**Note II: Fair Values of Financial Instruments**

Disclosure of fair value information about certain financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value is required by Financial Accounting Standards Board Statement (SFAS) No. 107, *Disclosure About Fair Value of Financial Instruments*. The following methods and assumptions were used in estimating fair values:

- **Cash and cash equivalents:** The carrying amount reported in the balance sheet approximates fair value.

- **Short- and long-term debt:** The carrying amounts of the Company's borrowings under its revolving credit agreements, as well as all short-term borrowings, approximate their fair values. The fair values of the Company's long-term debt were estimated using discounted cash flow analysis, based on the Company's current incremental borrowing rates for similar arrangements.

Financial guarantees and letters of credit were issued by the Company in the ordinary course of business as required. The fair value was based upon the face value of the underlying instruments.

The carrying amounts and fair values of the Company's financial instruments as December 31, 19X2 are as follows:

Note I: Contingencies and Commitments

- Litigation

The Company and certain of its subsidiaries are defendants in legal proceedings that arise in the ordinary course of its business activities. Although the ultimate disposition of these proceedings is not presently determinable, management does not expect the outcome to have a material adverse effect on the Company's financial position.

- Leases

The future minimum rental payments under leases with remaining noncancelable terms in excess of one year are:

</tr>
<tr>
<td>Subsequent to 19X7</td>

</tr>
<tr>

</tbody>
</table>

Included in these amounts are future minimum lease payments of equipment as follows: 19X3 — $3,400; 19X4 — $2,300; 19X5 — $1,950; 19X6 — $1,700; 19X7 — $1,500; and thereafter $5,600.

Minimum payments exclude sublease rentals of $1,500 under noncancelable subleases. Total rent expense in 19X2 was $12,450.

Note J: Environmental Matters

The Company is involved in various stages of investigation and remediation relative to environmental protection matters, arising out of its own initiative, from indemnification of purchasers of divested operations, or from legal or administrative proceedings, some of which include waste disposal sites. One of the Company's facilities has been listed on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 19Y0, as amended by the Superfund Amendments and Reauthorization Act of 19Y6 ("CERCLA"); the Company is engaged in litigation concerning the appropriateness of that listing. In certain instances, the Company may be exposed to joint and several liability for remedial action or damages. The Company, along with several other entities, has been named as a Potentially Responsible Party for remedial costs at certain third-party sites listed on the National Priorities List under CERCLA.

The potential costs related to such matters and the possible impact on future operations are uncertain due in part to the complexity of government laws and regulations and their interpretations, the varying costs and effectiveness of cleanup technologies, the uncertain level of insurance or other types of recovery, and the questionable level of the Company's responsibility. In management's opinion, after considering reserves established for such purposes, remedial actions for compliance with the present laws governing the protection of the environment are not expected to have a material adverse impact on the Company's results of operations or financial position.

- Common Stock Purchase Rights
  The Board of Directors declared a dividend distribution of two common stock purchase rights (Rights) for each share of common stock on June 5, 19W6. The rights expire on June 25, 19W6, unless redeemed earlier by the Company. Two Rights entitle its registered holder to purchase from the Company one share of common stock at a price of $75 per share, subject to adjustment to prevent dilution.

  The Rights are not exercisable and cannot be transferred separately from the common stock until:
  (1) a person or group publicly announces the acquisition of, or obtains the right to acquire, 30% or more of the outstanding shares of the Company's common stock; or (2) a tender or exchange offer is announced or commenced that would result in such an acquisition. Within 15 days after such a 30% interest has actually been obtained, the Company is entitled to redeem all of the Rights at a price of five cents per Right.

Note L: Employee Benefit Plans

- Pension Plans
  Substantially all salaried and hourly paid employees are covered by the Company's pension plans. Benefit payments are provided by the plans, using a formula based on an employee's compensation and length of service or, in some cases, stated amounts for each year of service. The Company funds pension plans in amounts equal to the minimum funding requirements of the Employee Retirement Income Security Act of 19V4, plus additional amounts that may be approved from time to time. Substantially all plan assets are invested in cash and short-term investments or listed stocks and bonds and real estate. Plan assets and obligations of subsidiaries are not considered material.
The periodic net pension income for 19X2 related to continuing operations is comprised of the following:

- Service cost — benefits earned during the period $5,705
- Interest cost on projected benefit obligation 15,090
- Actual return on assets (9,343)
- Net amortization and deferral (19,732)
- Net pension income $(8,280)

The following table shows the plan's funded status and amounts recognized in the balance sheet as of December 31, 19X2.

**Actuarial present value of benefit obligations:**

- Vested benefit obligation $(161,064)
- Accumulated benefit obligation $(173,669)
- Projected benefit obligation (185,092)
- Fair value of plan assets 263,150
- Plan assets in excess of projected benefit obligation 78,058
- Unrecognized net gain (25,524)
- Prior service cost not yet recognized in net pension cost 5,908
- Unrecognized net asset (26,895)
- Prepaid pension cost $31,547

**The actuarial assumptions used were:**

- Discount rate 8.75%
- Rate of increase in compensation levels 6.50%
- Expected long-term rate of return on assets 9.50%

- Nonpension Retirement Benefits

The Company and its subsidiaries have postretirement plans that provide health and life insurance benefits for retirees. Some of these plans require employee contributions at varying rates. Not all employees are eligible to receive these benefits, with eligibility depending on the plan in effect at a particular location.

The Company changed its method of accounting for postretirement benefits other than pensions from the pay-as-you-go method to the accrual method, as required by SFAS No. 106, on January 1, 19X2. A charge of $77,500 to the 19X2 earnings, net of approximately $31,300 of income tax benefits, was the result of the cumulative effect of adopting SFAS No. 106 as of January 1, 19X2.

The accumulated postretirement benefit obligation was determined using the terms of the Company's various plans, together with relevant actuarial assumptions and healthcare cost trend rates projected at annual rates ranging from 13% in 19X2 and 12.1% in 19X3 to 6% through the year 20X4 and a discount rate of 8.75%.

A 1% annual increase in these assumed cost trend rates would increase the accumulated postretirement benefit obligation by approximately $12,750 and annual service costs by approximately $1,350.
The net periodic postretirement benefit cost related to continuing operations for 19X2 is comprised of the following:

Service cost-benefits attributed to service during the period $925
Interest cost on the accumulated postretirement benefit obligation 6,460
Net amortization and deferral (60)
Net periodic postretirement benefit cost $7,325

The following table shows the plans' funded status and amounts recognized in the balance sheet as of December 31, 19X2 and January 1, 19X2 (the date of adoption):

The unrecognized prior service cost at December 31, 19X2 represents unamortized amounts for plan amendments resulting from revisions to Company-sponsored health plans during 19X2 which reduced benefit levels.
Note M: Discontinued Operations

In 19X0, the Company adopted a plan to dispose of substantially all of its sea transportation sector, comprised of its New York Boat and General Seaway units and several minor related businesses. During the first half of 19X1, the Company completed the sale of substantially all the net assets of New York Boat and General Seaway. During the fourth quarter of 19X1, the Company provided a $4,900 after-tax charge relating to the discontinued businesses. Certain operations related to these businesses have not been sold or disposed of as of December 31, 19X2 and certain outstanding obligations remain unsettled.

Note N: Supplemental Cash Flow Information

During 19X2 the Company paid $14,201 and $13,369 for interest and taxes, respectively.
