CHECKLISTS AND ILLUSTRATIVE FINANCIAL STATEMENTS FOR LIFE INSURANCE COMPANIES

.01 The checklists and illustrative financial statements in this section have been developed by the staff of the Technical Information Division of the AICPA as nonauthoritative technical practice aids. Readers should be aware of the following:

- The checklists and illustrative financial statements are “tools” and in no way represent official positions or pronouncements of the AICPA.

- The checklists and illustrative financial statements have been updated to include relevant accounting pronouncements through AICPA Statement on Auditing Standards No. 73, FASB Statement of Financial Accounting Standards No. 117, FASB Interpretation No. 40, FASB Technical Bulletin No. 94-1, AICPA Statement of Position 94-1, the AICPA Audit and Accounting Guide, Audits of Stock Life Insurance Companies (with conforming changes as of May 1, 1994), AICPA Practice Bulletin No. 11, and EITF consensuses adopted up to and including the May 19, 1994, Emerging Issues Task Force meeting. In addition, a supplemental checklist outlines disclosure requirements for life insurance companies that are SEC registrants. The checklists and illustrative financial statements should be modified, as appropriate, for subsequent pronouncements. In determining the applicability of a pronouncement, its effective date should also be considered.

- The checklists and illustrative financial statements should be used by, or under the supervision of, persons having adequate technical training and proficiency in the application of generally accepted accounting principles, generally accepted auditing standards, and statements on standards for accounting and review services.

- The checklists and illustrative financial statements do not represent minimum requirements and do not purport to be all-inclusive. The referenced standards should be reviewed if clarification is needed to determine whether the disclosure indicated is required or suggested, and to what extent each disclosure is relevant to the statements being presented. The illustrative financial statements are reproduced from the AICPA Audit and Accounting Guide, Audits of Stock Life Insurance Companies, and do not necessarily include all required disclosures.

.02 Users of the checklists and illustrative financial statements are urged to refer directly to applicable authoritative pronouncements when appropriate. If you have further questions, call the AICPATEchnical Hotline.

Note: This publication was extracted from sections 19,000 through 19,600 of the AICPA Financial Statement Preparation Manual (FSP).
FSP Section 19,100

Introduction

.01 Life insurance companies provide for the pooling of risks among many persons who are exposed to similar risks. The provisions of the AICPA Audit and Accounting Guide, Audits of Stock Life Insurance Companies, apply to stock life insurance companies. For mutual insurance companies, financial statements prepared on a statutory basis are considered, in practice, to be prepared in accordance with generally accepted accounting principles ("GAAP"). AICPA Professional Standards section 623.09 Special Reports states that “when reporting on financial statements prepared on a comprehensive basis of accounting other than GAAP, the auditor should consider whether the financial statements (including accompanying notes) include all informative disclosures that are appropriate for the basis of accounting used.” Section 623.10 states that when “the financial statements (prepared on another comprehensive basis of accounting) contain items that are the same as, or similar to, those in financial statements prepared in conformity with GAAP, similar disclosures are appropriate.” Therefore, the checklists and illustrative financial statements contained herein may apply to mutual life insurance companies. The auditor should refer to section 623, Special Reports, Auditing Interpretation 9623, Evaluation of the Appropriateness of Informative Disclosures in Insurance Enterprises’ Financial Statements Prepared on a Statutory Basis, and the National Association of Insurance Commissioners’ ("NAIC") Annual Statement instruction, Annual Audited Financial Reports.

.02 Common accounting and reporting practices by life insurance companies include:

- Most life insurance companies maintain their general ledgers on a cash basis and convert to accrual basis of accounting for SAP and GAAP reporting.
- Insurance companies usually prepare non-classified balance sheets.
- The first item in the balance sheet is usually the company’s investments rather than cash.
- The actuarial assumptions and estimates used to determine annual revenue and costs applicable to life insurance contracts are extremely significant and involve considerable judgment.
- The auditor’s responsibility is to form a judgment as to the appropriateness of actuarial assumptions.
- Premium revenues are recognized as earned on a pro-rata basis over the contract period.
- The costs of acquiring new business are deferred and charged to operations in proportion to premium revenue.
- Reinsurance receivables and prepaid reinsurance premiums are reported as assets and estimated reinsurance receivables are recognized in a manner consistent with the liabilities relating to the underlying reinsured contracts.
- Debt securities classified as held-to-maturity are reported at amortized cost. Debt and equity securities classified as trading securities are reported at fair value with unrealized gains and losses included in earnings. Debt and equity securities classified as available-for-sale are reported at fair value with unrealized gains and losses excluded from earnings and reported in a separate component of shareholders’ equity.
FSP Section 19,200
Checklists—General

.01 Many auditors and accountants find it helpful to use checklists as practice aids in the preparation of financial statements and reports. Some firms have developed their own checklists for internal use and may also have specialized checklists to meet the needs of their practices, such as checklists for clients in particular industries or clients that report to the SEC. Some state CPA societies have developed checklists as practice aids that may be available to other practitioners, as well as to their own members. Some commercial publishers also include checklists in certain of their publications. However, authoritative literature does not require the use of such checklists, nor does it prescribe their format or content, which may vary.

.02 Checklists typically consist of a number of brief questions or statements that are accompanied by references to Statements on Auditing Standards, Statements of Financial Accounting Standards, Accounting Principles Board Opinions, Accounting Research Bulletins, AICPA Statements of Position, and EITF consensuses. Some checklists also include references to FASB Interpretations and the AICPA Audit and Accounting Guides. The extent of detail included in checklists varies with the judgment of the preparers on how extensively to refer to and highlight authoritative literature without developing a checklist that is too long and unwieldy. Accordingly, checklists may serve as convenient memory aids but cannot be used as a substitute for direct reference to the authoritative literature.

.03 Checklists usually provide for checking off or initialing each question or point to show that it has been considered. The format used in herein is a typical one; it provides for “yes,” “no,” and “not applicable” answers and presumes that remarks would be prepared on separate cross-referenced memorandums. Some preparers, however, prefer to include space for remarks in the body of the checklist, while others prefer alternative checklist formats. For example, a checklist format may provide for the following set of answers: “not applicable,” “not material,” “in statements” and “in notes” (with provisions for indicating a cross-reference to the specific statement caption or note). Another format may provide for only two answers, “disclosed” and “not applicable.” Firms and practitioners who develop their own checklists should adopt formats that suit their needs and preferences.

.04 Checklists are generally accompanied by caveats that include all of the following points:

- Use of the checklists requires the exercise of individual professional judgment and may likely require some modification based on the circumstances of individual engagements.

- The checklists are not all-inclusive and are not intended to present minimum requirements.

- Users need to modify the checklists for any pronouncements issued subsequent to those mentioned in the checklist.

.05 If widespread circulation is expected, the preparers also generally stress the nonauthoritative or unofficial status of the checklists and disclaim responsibility for the way they may be used.

The accompanying notes are an integral part of these financial statements.

* FASB 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*, has significantly changed the presentation of realized gains and losses. The results of the changes will be illustrated in a future update.
Notes*

1. The increase in liability for future policy benefits may be reclassified between death benefits, annuity benefits, and accident and health benefits. In such cases, the resulting amounts would be captioned "Provision for surrender and death (annuity) (accident and health) benefits." Acquisition costs incurred may be reclassified as an offset to appropriate expense accounts and amortization may be similarly charged or treated as a separate item.

2. Until generally accepted accounting principles for investment gains and losses are more clearly defined, some companies may wish to exclude realized investment gains and losses from income. In such cases, the last item in the income statement should be designated "Income excluding realized investment gains and losses."

3. This caption is only applicable when dividends are not considered as a benefit in determining the liability for future policy benefits. Where dividends are considered as benefits, the caption in the operations statement should be described as "Dividends to policyholders".

4. A modification of the income statement presentation would reduce net investment income and the increase in liability for future policy benefits by required interest on funds accumulated.

* FASB 97, has significantly changed the presentation of realized gains and losses. The results of the changes will be illustrated in a future update.

Supplementary Data*

The following statements are illustrative of the form for supplementary data required to reconcile net income and stockholders' equity presented in financial statements prepared in accordance with regulatory practices to such amounts determined in conformity with generally accepted accounting principles. As an alternative, the necessary details may be set forth in a note to the financial statements or within the financial statements themselves as adjustments to the surplus and income statements.

Where a reconciliation of net income and stockholders' equity presented in financial statements prepared in conformity with generally accepted accounting principles to such amounts determined in accordance with regulatory practices is required by law or regulation, a similar format may be used.

*The supplementary data required to reconcile net income and stockholders' equity in accordance with regulatory practices to such amounts determined in conformity with GAAP is no longer required. See FASB 60, Accounting and Reporting by Insurance Enterprises.

ABC LIFE INSURANCE COMPANY

Notes to Financial Statements

An illustrative note describing some of the common differences between regulatory practices and generally accepted accounting principles is as follows: *

The accompanying financial statements have been prepared in conformity with accounting practices prescribed or permitted by the Insurance Department of the State of .......... which vary in some respects from generally accepted accounting principles. The more significant of these differences are as follows: (a) acquisition costs, such as commissions and other costs in connection with acquiring new business, are charged to current operations as incurred, whereas the premiums are taken into earnings over the premium paying period of the policies; (b) policy reserves are based on statutory mortality and interest requirements and without consideration of withdrawals, which may differ from reserves based on reasonably conservative estimates of mortality, interest, and withdrawals; (c) deferred income taxes are not provided for unrealized gains on investments, differences in reporting policy reserves, and other material book-tax timing differences; (d) a liability for undistributed earnings allocable to participating policyholders has not been recorded; (e) the mandatory securities valuation reserve is reported as a liability rather than as an appropriation of surplus; (f) certain assets designated as “nonadmitted assets” (principally furniture and equipment, agents’ debit balances, and certain other classes of receivables) have been charged to surplus.

The effects of these differences on stockholders’ equity and net income are shown in the accompanying supplemental statements of adjusted net income and adjusted stockholders’ equity.

Ordinarily, the effects of these differences on the statement of changes in financial position ** need not be disclosed because they will not affect the flow of funds.

In addition to those matters discussed in the foregoing illustration, other differences between regulatory accounting practices and generally accepted accounting principles may exist which will require disclosure. Among other things, such disclosure might include methods of accounting for investments in affiliates, prior service costs of pension plans, stock dividends, and reserve strengthening, or other matters related to financial statement classification or presentation. Other differences from generally accepted accounting principles may exist with respect to a particular company, but which may not be unique to the life insurance industry. These, of course, will have to be dealt with by the independent auditor as they arise.

In those cases where the supplementary data are to be included in the notes, the concluding paragraph of Note 1 might read, “The effect of these differences on the financial statements is shown (below) in the accompanying tabulations.” Such tabulations would be presented in the same form as the preceding examples of supplementary statements of adjustments to arrive at net income and stockholders’ equity.

The foregoing material attempts to set forth the most significant differences which are peculiar to life insurance regulatory accounting. Further, it would be preferable to avoid stating the per share amounts based on regulatory statements where the auditor’s opinion indicates that net income is not in accordance with generally accepted accounting principles.

* In a change to what is considered generally accepted accounting principles, this note is generally no longer presented.

**FASB 95, Statement of Cash Flows, as amended supersedes APB Opinion 19, Reporting Changes in Financial Position, and requires a statement of cash flows as part of a full set of financial statements for all business enterprises in place of a statement of changes in financial position.
