Checklists and Illustrative Financial Statements for Life Insurance Companies

.01 The checklists and illustrative financial statements in this section have been developed by the staff of the Accounting and Auditing Publications Team of the AICPA as nonauthoritative technical practice aids. Readers should be aware of the following:

- The checklists and illustrative financial statements do not include all disclosures and presentation items promulgated; as a result, pronouncements deemed unlikely to be encountered in financial statements of life insurance companies are not included.
- The checklists and illustrative financial statements are “tools” and in no way represent official positions or pronouncements of the AICPA.

.02 The checklists and financial statements have been updated to include relevant disclosure guidance issued through December 31, 1998. Those pronouncements include:

- Statement of Financial Accounting Standards (SFAS) No. 134, Accounting for Mortgage-Backed Securities Retained after the Securitization of Mortgage Loans Held for Sale by a Mortgage Banking Enterprise
- FASB Interpretation No. 42, Accounting for Transfers of Assets in Which a Not-for-Profit Organization Is Granted Variance Power
- FASB Technical Bulletin No. 97-1, Accounting under Statement 123 for Certain Employee Stock Purchase Plans with a Look-Back Option
- AICPA Statement of Position (SOP) 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions
- AICPA Practice Bulletin 15, Accounting by the Issuer of Surplus Notes
- FASB Emerging Issues Task Force (EITF) consensus positions adopted at meetings of the EITF held through September 1998
- AICPA Statement on Auditing Standards (SAS) No. 87, Restricting the Use of an Auditor’s Report
- AICPA Statement on Standards for Accounting and Review Services (SSARS) No. 7, Omnibus Statement on Standards for Accounting and Review Services—1992
- AICPA Industry Audit Guide Audits of Stock Life Insurance Companies

.03 A description of the insurance industry and a description of common accounting and reporting features of stock life insurance companies are presented in the AICPA Industry Audit Guide Audits of Stock Life Insurance Companies.

.04 The checklists and illustrative financial statements should be used by, or under the supervision of, persons having adequate technical training and proficiency in the application of generally accepted accounting principles, generally accepted auditing standards, and statements on standards for accounting and review services.
.05 Users of the checklists and illustrative financial statements are urged to refer directly to applicable authoritative pronouncements when appropriate. If you have further questions, call the AICPA Technical Hotline at 1-888-777-7077.

Note: This publication was extracted from sections 20,000 through 20,600 of the AICPA Financial Statement Preparation Manual (FSP).
FSP Section 20,100

Introduction

.01 Life insurance companies provide for the pooling of risks among many persons who are exposed to similar risks. The provisions of the AICPA Industry Audit Guide Audits of Stock Life Insurance Companies, apply to stock life insurance companies. For mutual insurance companies, financial statements prepared on a statutory basis are considered, in practice, to be prepared in accordance with generally accepted accounting principles ("GAAP").1 AICPA Professional Standards, AU section 623.09, Special Reports, states that "when reporting on financial statements prepared on a comprehensive basis of accounting other than GAAP, the auditor should consider whether the financial statements (including accompanying notes) include all informative disclosures that are appropriate for the basis of accounting used." AU section 623.10 states that when "the financial statements (prepared on another comprehensive basis of accounting) contain items that are the same as, or similar to, those in financial statements prepared in conformity with GAAP, similar disclosures are appropriate." Therefore, the checklists and illustrative financial statements contained herein may apply to mutual life insurance companies as well as to statutory financial statements. The auditor should refer to AU section 623, Special Reports, Auditing Interpretation 9623, Evaluation of the Appropriateness of Informative Disclosures in Insurance Enterprises’ Financial Statements Prepared on a Statutory Basis, and the National Association of Insurance Commissioners’ ("NAIC") Annual Statement instruction, Annual Audited Financial Reports.

Significant Changes

.02 Presented below is a list of significant changes to the current edition of the Stock Life Insurance checklist. Changes normally result from new authoritative pronouncements issued since the last edition of the checklist. Changes may also represent improvements in the manner in which the checklist is presented.

- SFAS No. 132, Employers’ Disclosures about Pensions and Other Postretirement Benefits, an amendment of FASB Statements No. 87, 88, and 106—This Statement revises employers’ disclosures about pension and other postretirement benefit plans. The disclosure and presentation requirements of this Statement have been added into the checklist.
- SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities—This statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. The disclosures of SFAS 133 has been incorporated into the checklist.
- SFAS 134, Accounting for Mortgage-Backed Securities Retained after the Securitization of Mortgage Loans Held for Sale by a Mortgage Banking Enterprise, an amendment of FASB Statement No. 65—This Statement amends SFAS 65 to require that after the securitization of mortgage loans held for sale, an entity engaged in mortgage banking activities classify the resulting mortgage-backed securities or other retained interests based on its ability and intent to sell or hold those investments. The disclosure requirements of this Statement have not been reflected in the checklist, due to the fact that SFAS 134 concerns accounting for mortgage-backed securities retained after securitization—an area not normally relative to insurance companies.

---

1 The AICPA has a project underway to prepare an Audit and Accounting Guide, Life and Health Insurance Entities, which covers audits of mutual life insurance companies as well as stock life insurance companies. The new Audit and Accounting Guide would replace the Industry Audit Guide Audits of Stock Life Insurance Companies.
• SOP 97-3, Accounting by Insurance and Other Enterprises for Insurance-Related Assessments—This SOP establishes the accounting by insurance and other enterprises for assessments related to insurance activities. The disclosure requirements of this Statement have been reflected in the checklist.

• SOP 98-7, Deposit Accounting: Accounting for Insurance and Reinsurance Contracts That Do Not Transfer Insurance Risk—This Statement provides guidance on how to account for insurance and reinsurance contracts that do not transfer insurance risk. The disclosure requirements of this Statement have been reflected in the checklist.
FSP Section 20,200
Checklists—General

.01 AICPA disclosure checklists have been designed as practice aids to assist accountants in the preparation of financial statements and to assist auditors in their evaluation of the adequacy of disclosures in the financial statements they audit. Authoritative literature does not require the use of checklists, nor does it prescribe their format or content.

.02 This checklist consists of a number of questions or statements that are accompanied by references to the established sources of GAAP in which the disclosure requirements are found. These sources include Statements of Financial Accounting Standards, FASB Interpretations, Accounting Principles Board Opinions, Accounting Research Bulletins, AICPA Audit and Accounting Guides, AICPA Statements of Position, and EITF consensuses. Checklists are designed to serve as convenient memory aids but should not be used as a substitute for direct reference to authoritative literature.

.03 To use this checklist, simply check “yes,” “no,” or “not applicable” for each question. If additional information needs to be documented, include separate cross-referenced memoranda. A “no” answer to a question indicates a potential GAAP departure. If a “no” answer is checked, then the auditor or accountant should investigate the reasons for the noncompliance and should determine the effects of the GAAP departure on the overall financial statements. All work and conclusions related to a “no” answer should be documented in the working papers. At the beginning of certain sections, a □ appears in the “N/A” column. If the entire section is deemed to be non-applicable, place a check mark in the □ and proceed to the next section.

.04 As you use this checklist, please remember that:

• The exercise of sound professional judgment is of paramount importance in applying the checklist provisions.
• The checklist may require modification based on the engagement circumstances.
• The checklist may not be all-inclusive.
• Users need to modify the checklist for any pronouncements issued subsequent to those mentioned in the checklist.
FSP Section 20,300
Financial Statements and Notes Checklist

.01 This checklist has been developed by the Accounting and Auditing Publications Team of the AICPA as a nonauthoritative practice aid for use by preparers and auditors of financial statements.

This checklist includes disclosures commonly encountered in the financial statements of stock life insurance companies and reporting issues likely to be encountered by accountants who audit, compile, and review those types of financial statements. They do not include all disclosures required by GAAP or address all reporting situations that may arise in performing engagements in accordance with GAAS and SSARS.

.03 Checklist Questionnaire:

This checklist is organized into the sections listed below. Carefully review the topics listed and consider whether they represent potential disclosure items for the life insurance company. Place a check mark by the topics or sections considered applicable; these sections should be completed. For example, if an entity did not enter into any business combinations during the year, do not place a check by General, Section T, "Business Combinations," and skip this section when completing the checklist.

6. An employer may combine disclosures about pension or postretirement benefit plans outside the United States with those for U.S. plans unless the benefit obligations of the plans outside the United States are significant relative to the total benefit obligation and those plans use significantly different assumptions.    [SFAS 132, par. 10 (AC P16.166, P40.178)]

13. Has the entity made the following disclosures about each significant concentration:

   a. Information about the (shared) activity, region, or economic characteristic that identifies the concentration?

   c. The entity’s policy of requiring collateral or other security to support financial instruments subject to credit risk, information about the entity’s access to that collateral or other security, and the nature and a brief description of the collateral or other security supporting those financial instruments?

---

\(^{16}\) SFAS 107 paragraph 15b provides that these disclosure requirements do not apply to the following financial instruments, whether written or held:

   a. Financial instruments of a pension plan, including plan assets, when subject to the accounting and reporting requirements of SFAS 87 (Financial instruments of a pension plan, other than the obligations for pension benefits, when subject to the accounting and reporting requirements of SFAS 35, Accounting and Reporting by Defined Benefit Pension Plans, are subject to the reporting of paragraph 15a).

   b. The financial instruments described in paragraphs 8a, 8c, 8e, and 8f of SFAS 107, as amended by SFAS 112, Employers’ Accounting for Postemployment Benefits, SFAS 123, Accounting for Stock-Based Compensation, and SFAS 125, except for reinsurance receivables and prepaid reinsurance premiums.

16. Are the classification guidelines under EITF 96-13 followed for written put options involving a reporting entity’s own stock that give the reporting entity a choice of settlement methods? [EITF 96-13]

17. For securities classified as available-for-sale, has the reporting entity made the following disclosures by major-security type as of each date for which a statement of financial position is presented:
   
   a. Aggregate fair value?
   
   b. Total gains for securities with net gains in accumulated other comprehensive income?

   a. The proceeds from sales of available-for-sale securities and gross realized gains and losses that have been included in earnings as a result of those sales?

---

18 If SFAS 133, Accounting for Derivative Instruments and Hedging Activities, has been adopted, the phrase "forward contracts determined in conformity with the requirements of paragraphs 18 and 19 of SFAS 52 shall be considered transaction gains or losses" is replaced by "derivative instruments shall comply with paragraph 45 of SFAS 133." SFAS 133 is effective for all fiscal quarters of fiscal years beginning after June 15, 1999.

N. Futures Contracts

Note: If SFAS 133, Accounting for Derivative Instruments and Hedging Activities, has been adopted, Step 1 does not apply. See section L1 for the required disclosures. SFAS 133 is effective for all fiscal quarters of fiscal years beginning after June 15, 1999.

1. If a futures contract is accounted for as a hedge, does the disclosure include:
   a. The nature of the assets, liabilities, firm commitments, or anticipated transactions that are hedged with futures contracts?

   [SAS 58, par. 11c (AU 508.11c); SAS 59, as amended by SAS 64, par. 12 (AU 341.12)]

**Practice Tip**

In a going concern paragraph, the auditor should not use conditional language in expressing a conclusion concerning the existence of substantial doubt about the entity’s ability to continue as a going concern. See SAS 77 for an example.

11. If there has been a material change between periods in accounting principles or in the method of their application that has a material effect on the comparability of the reporting entity’s financial statements:

   [SAS 58, as amended by SAS 79, pars. 11e and 69 (AU 508.11e and .69)]

13. If financial statements of a prior period (presented for comparative purposes) have been audited by a predecessor auditor whose report is not presented:

77
(2) The date of the predecessor auditor's report?  
(3) The type of report issued by the predecessor auditor?  
(4) If the report was other than a standard report, the substantive reasons therefor including a description of the nature of and reasons for the explanatory paragraph added to the predecessor's report or his or her opinion qualification?

| b. If the financial statements have been restated, does the introductory paragraph indicate that the predecessor auditor reported on the financial statements of the prior period before restatement? [SAS 58, as amended by SAS 79, pars. 11e and 74 (AU 508.11e and .74)] |

[SAS 58, par. 11g (AU 508.11g); SAS 52, par. 8 (AU 558.08)]

16. If other information in a document containing audited financial statements is materially inconsistent with information appearing in the financial statements, has it been determined whether the financial statements, the auditor's report, or both require revision? [SAS 58, par. 11h (AU 508.11h); SAS 8, par. 4 (AU 550.04)]

17. If the auditor decides to emphasize a matter regarding the financial statements in the report, is the explanatory information presented in a separate paragraph that avoids use of phrases such as "with the foregoing (following) explanation"? [SAS 58, pars. 11 and 19, as amended by SAS 79 (AU 508.11 and .19); Interpretation 3 of SAS 1, sec. 410 (AU 9410.18); Interpretation 1 of SAS 57 (AU 9424.03)]

d. Does the wording in the opinion paragraph indicate that the qualification pertains to the possible effects on the financial statements and not the scope limitation itself?  
[SAS 58, as amended by SAS 79, pars. 22–27 (AU 508.22–.27)]

<table>

Scope limitations include situations in which the auditor is unable to obtain sufficient evidential matter to support management’s assertions about the nature of a matter involving an uncertainty and its presentation or disclosure in the financial statements. [SAS 58, as amended by SAS 79, par. 31]

**Practice Tip**

SAS 87, *Restricting the Use of an Auditor’s Report*, provides guidance to auditors in determining whether an engagement requires a restricted-use report and, if so, what elements to include in that report. SAS 87 is effective for reports issued after December 31, 1998.
FSP Section 20,500  
Supplemental Information for Life Insurance Companies That Are Securities and Exchange Commission Registrants

.01 Footnote 3 to SAS 69 states, in part, that for Securities and Exchange Commission (SEC) registrants, rules and releases of the SEC have an authority similar to other officially established accounting principles. Regulation S-X is the primary source of requirements for financial statements and related footnotes required to be included in documents filed with the SEC. In addition to Regulation S-X, preparers and auditors of financial statements should be familiar with the SEC’s Financial Reporting Releases (FRR) and Staff Accounting Bulletins (SAB). FRRs communicate the SEC’s position on accounting and auditing principles and practices. SABs represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant of the SEC. Insurance companies are subject to the requirements of Articles 1-4, 7, 10, and 12 of Regulation S-X.

When determining compliance with SEC requirements, preparers and auditors should refer to the appropriate SEC pronouncements to ensure compliance with SEC disclosure rules. In particular, the following documents should be consulted:

- Regulation S-X, Article 1, Application of Regulation S-X
- Regulation S-X, Article 2, Qualifications and Reports of Accountants
- Regulation S-X, Article 3, General Instructions as to Financial Statements
- Regulation S-X, Article 4, Rules of General Application
- Regulation S-X, Article 7, Insurance Companies
- Regulation S-X, Article 10, Interim Financial Statements
- Regulation S-X, Article 12, Form and Content of Schedules
- Staff Accounting Bulletins—SABs reflect the SEC staff’s views regarding accounting-related disclosure practices. They represent interpretations and policies followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the federal securities laws.

- SAB 98, Earnings per Share, was issued in 1998. The SAB provides conforming revisions to previously issued SABs that were effected by SFAS 128, Earnings per Share.

- Financial Reporting Releases (FRR)—FRRs adopt, change, or interpret requirements relating to accounting, auditing, and disclosure issues.
FSP Section 20,600

Illustrative Financial Statements

.01 This section contains illustrative financial statements prepared in conformity with generally accepted accounting principles (GAAP). The financial statements are for illustrative purposes only, are not intended to be comprehensive and are not intended to establish preference among alternative principles acceptable under GAAP. Decisions about the application of the GAAP discussed in the accounting and financial reporting sections of the AICPA Industry Audit Guide Audits of Stock Life Insurance Companies, should not be made by reference to the illustrative financial statements but by a careful reading to the specified authoritative literature. The illustrative financial statements reflect many of the minimum disclosure requirements for a life and health insurance entity but do not include all of the amounts or transactions discussed in other chapters of the Guide or that might be found in practice. For example, the illustrative notes indicate the subject matter generally required to be disclosed, but they should be expanded, reduced, or otherwise modified to suit individual circumstances based on a careful reading of the specified authoritative literature.

.02 The illustrative financial statements do not include other transactions not unique to life and health insurance entities, such as disclosures about segments, employee benefit plans, certain risks and uncertainties, or postemployment benefits other than pensions. Preparers and auditors should consult authoritative pronouncements for guidance on presenting such other information.

.03 The illustrative financial statements do not reflect rules and releases of the Securities and Exchange Commission (SEC) that, for SEC registrants, have an authority similar to other officially established accounting principles. SEC Regulation S-X, Article 7, Insurance Companies, should be referred to.

.04 The illustrative financial statements are in conformity with accounting standards issued up to and including SFAS No. 125, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. Preparers and auditors of financial statements should refer to subsequent FASB Statements and other GAAP for additional requirements.

.05 Life and health insurance entities generally present unclassified balance sheets.

Note 1: Organization and Significant Accounting Policies

Organization. ABC Life Insurance Company (ABC or the Company) is a stock life insurance company incorporated in the state of ABC State that offers individual life, disability income, long-term care, annuity, and investment products. ABC does business in the continental United States, with a concentration in New York, New Jersey, and Connecticut.

Basis of Presentation. The significant accounting policies followed by ABC that materially affect financial reporting are summarized below. The accompanying financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) which differ from statutory accounting practices used for regulatory authorities. The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investments. Fixed maturity securities available for sale consist of bonds, notes, redeemable and nonredeemable preferred stock not classified as either trading or held to maturity and are reported at estimated fair value, adjusted for other than temporary declines in fair value, with unrealized gains and losses shown net of applicable taxes, deferred policy acquisition cost offsets for universal life type contracts and amounts attributable to certain participating contracts are included in shareholders’ equity as a separate component of shareholder’s equity. Fixed maturity securities held to maturity consist of bonds, notes, redeemable, and nonredeemable preferred stock which the insurance company has the intent and ability to hold to maturity, and are reported at amortized cost, and are adjusted for amortization of premiums or discounts and other than temporary declines in fair value. Trading account securities consist of bonds, notes, redeemable and nonredeemable preferred stock, and common stock held principally for resale in the near term, and are recorded at their estimated fair values. Realized and unrealized gains and losses on trading account securities are included in net realized gains (losses) on investments. Mortgage loans on real estate are carried at unpaid balances, and adjusted for amortization of premium or discount, less allowance for losses. Real estate held for sale is carried at the lower of depreciated cost or fair value less estimated selling costs and losses which are considered other than temporary. Real estate, including real estate acquired in satisfaction of debt, is carried at depreciated cost. Impaired real estate is written down to fair value with the impairment loss being included in net realized gains (losses) on investments. Upon foreclosure (including in-substance foreclosure), the carrying value of the property is recorded at the lower of cost or fair value (less selling costs if to be sold), which becomes its new cost basis. The estimated fair value for real estate is determined based upon independent appraisals and other available information about the property, which may take into consideration a number of factors, including: (a) discounted cash flows; (b) sales of comparable properties; (c) geographic location of property and related market conditions; and (d) disposition costs. Foreclosed properties are actively managed by the company in order to maximize their value. Subsequent to foreclosure, the carrying value of the property is periodically evaluated and a valuation allowance is established, if necessary, to reflect any additional amounts considered unrecoverable upon sale. At the time of the sale, the difference between the sales price and the carrying value is recorded as a realized gain or loss. Policy loans are carried at unpaid balances. Short-term investments are stated at amortized cost which approximates market value. Provisions for impairments are included in net realized gains and losses. Realized gains and losses are determined by specific identification.

Cash and Cash Equivalents. Cash equivalents are carried at cost which approximates market value. Cash equivalents are highly liquid financial instruments with an original maturity of three months or less.
Deferred Policy Acquisition Costs. Commissions and other costs of acquiring traditional life insurance, universal life insurance and investment products, and accident and health insurance, that vary with and are primarily related to the production of new and renewal business have been deferred. Traditional life insurance and accident and health insurance acquisition costs are being amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing future policy benefit liabilities. For universal life-type contracts and investment contracts that include significant surrender charges or that yield significant revenues from sources other than the investment of contracholders’ funds, the deferred contract acquisition cost amortization is matched to the recognition of gross profit.

Otherwise, deferred contract acquisition costs on investment contracts are amortized using an accounting method that recognizes acquisition as expenses at a constant rate applied to net policy liabilities.

Property and Equipment. Property and equipment are reported at cost, net of accumulated depreciation of $1,915,000 and $1,721,000 in 19X2 and 19X1, respectively, using the straight-line method of depreciation over their estimated useful lives.

Future Policy Benefits and Expenses. The liabilities for traditional life insurance and accident and health insurance contract benefits and expenses are computed using a net level premium method including assumptions as to investment yields, mortality, withdrawals, and other assumptions based on ABC’s experience modified as necessary to reflect anticipated trends and to include provisions for possible unfavorable deviations. Reserve interest assumptions are graded and range from 3 percent to 10 percent. Benefit liabilities for traditional life insurance contracts include certain deferred profits on limited-payment policies that are being recognized in income over the contract term. Contract benefit claims are charged to expense in the period that the claims are incurred.

Included in contracholders’ account balances is a provision for contracholder dividends. Benefit liabilities for contracholders’ account balances are computed under a retrospective deposit method and represent contract account balances before applicable surrender charges. Contract benefits and claims that are charged to expense include benefit claims incurred in the period in excess of related contract account balances. Interest crediting rates for universal life and investment products range from 5.50 percent to 9.25 percent. Benefits and expenses are charged against the account balance to recognize costs as incurred over the estimated lives of the contracts. Expenses include interest credited to contract account balances and benefits paid in excess of contract account balances.

Income Taxes. Federal income taxes are charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year. Deferred income taxes have been provided for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements using enacted income tax rates and laws.

Reinsurance. In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance enterprises or reinsurers under excess coverage and coinsurance contracts. The Company retains a maximum of $400,000 of coverage per individual life. Amounts paid or deemed to have been paid for reinsurance contracts are recorded as reinsurance receivable.

Insurace Premium Revenues. Traditional life premiums, which include those products with fixed and guaranteed premiums and benefits and consist principally of whole life insurance contracts, limited-payment life insurance contracts, and certain annuities with life contingencies, are generally recognized as revenue when due. Revenues on universal life and investment-type contracts consist of contract charges against contracholders’ funds for the cost of insurance, administration, surrender charges, actuarial margin and other fees. Accident and health insurance premiums are recognized as revenue pro rata over the terms of the contracts.

Separate Accounts. Separate account assets and liabilities generally represent funds maintained in accounts to meet specific investment objectives of contracholders who bear the investment risk. In-
Investment income and investment gains and losses accrue directly to such contractholders. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. The assets and liabilities are carried at market value. Deposits, net investment income, and realized and unrealized capital gains and losses on separate account assets are not reflected in the Statements of Income of ABC and are reflected directly in separate account liabilities.

Business Risks and Uncertainties. The development of liabilities for future policy benefits for the Company's products requires management to make estimates and assumptions regarding mortality, morbidity, lapse, expense, and investment experience. Such estimates are primarily based on historical experience and, future expectations of mortality, morbidity, expense, persistency, and investment assumptions. Actual results could differ materially from those estimates. Management monitors actual experience, and where circumstances warrant, revises its assumptions and the related future policy benefit estimates.

The Company's investments are primarily comprised of fixed maturity securities, equity securities, real estate, and mortgage loans. Significant changes in prevailing interest rates and geographic conditions may adversely affect the timing and amount of cash flows on such investments, as well as their related values. In addition, the value of these investments is often derived from an appraisal, an estimate or opinion of value. A significant decline in the market value of these investments could have an adverse affect on the Company's balance sheet.

The Company regularly invests in mortgaged backed securities and other securities subject to prepayment and call risk. Significant changes in prevailing interest rates may adversely affect the timing and amount of cash flows on such securities. In addition, the amortization of market premium and accretion of market discount for mortgage backed securities is based on historical experience and estimates of future payment speeds on the underlying mortgage loans. Actual prepayment speeds will differ from original estimates and may result in material adjustments to amortization or accretion recorded in future periods.

The Company’s mortgage portfolio is monitored closely through the review of loan and property information such as debt service coverage, annual operating statements, and property inspection.
reports. This information is evaluated in light of current economic conditions and other factors such as geographic and property-type loan concentrations. This evaluation is part of the regular review to determine whether adjustments to the allowance for potential loan losses are warranted. Management believes the mortgage loss reserve is sufficient to provide for potential loan losses. However, management cannot predict with assurance where the economy is headed or how the mortgage and real estate portfolios would be affect by various economic circumstances.

Impairment of loans having carrying values of $4,524,000 in 19X2 and $3,962,000 in 19X1 has been recognized in conformity with Statement of Financial Accounting Standards (SFAS) No. 114, Accounting by Creditors for Impairment of a Loan. The total allowance for credit losses related to those loans was $900,000 and $850,000 in 19X2 and 19X1, respectively. For impairment recognized in conformity with SFAS No. 114, the entire change in present value of expected cash flows is reported as bad debt expense in the same manner in which impairment initially was recognized or as a reduction in the amount of bad debt expense that otherwise would be reported.

The Company’s mortgage loan portfolio is highly concentrated in the northeast section of the country. Approximately 58 percent of the Company’s mortgages are in the Middle Atlantic region, predominantly New York City and State, with the remainder of the portfolio being fairly evenly dispersed among other geographic regions. The Company invests in a diversity of mortgages consisting of office, apartment, retail, industrial, and residential loans. Greater than 52 percent of these mortgages are invested in apartment and retail type investments. It is the Company’s policy to generally obtain a first mortgage on properties for which the loan to value of collateral ratio is less than 75 percent.

At December 31, 19X2, the Company had six commercial real estate loans, with an aggregate principal balance of $14,765,000 and accrued interest of $1,950,000 which were 60 days or more delinquent. All of these loans were in process of foreclosure. Included in the commercial real estate loans are loans with an aggregate principal balance of $8,092,000 that were non-income producing for the twelve-month period ending December 31, 19X2. At December 31, 19X2, the Company had established a mortgage loss reserve of $3,187,000 as an allowance for potential mortgage losses.

Real estate acquired through foreclosure or “in-substance foreclosure” during the year at December 31, 19X2 and 19X1 amounted to $410,000 and $147,000.

**Note 4: Fair Value of Financial Instruments**

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

**Short-Term Investments.** For those short term instruments amortized cost is a reasonable estimate of fair value.

**Investment Securities and Trading Account Assets.** For securities held for trading purposes and marketable equity securities held for investment purposes, fair values are based on quoted market prices or dealer quotes. For other securities held as investments, fair value equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

**Mortgage Loans on Real Estate and Policy Loans.** The fair value of mortgage loans on real estate is estimated using discounted cash flows. The fair value of policy loans is estimated by discounting the future cash flows using reasonable assumptions for mortality and repayments and using the current rates at which similar loans would be made to contractholders with similar credit ratings and the same remaining maturities.

The estimated fair values of ABC’s mortgage loans on real estate and policy loans are as follows:

**Note 6: Financial Instruments With Off-Balance-Sheet Risk and Concentrations of Credit Risk**

ABC enters into interest rate swap programs for the purpose of minimizing exposures to fluctuations in interest rates for certain assets and liabilities held. The notional amount of interest rate swaps outstanding at December 31, 19X2 and 19X1 was $500,000 and $800,000, respectively. The amount at risk, on a present value basis, of terminating or replacing at current market rates outstanding interest rate swaps in a loss position at December 31, 19X2 was $10,000. For 19X2 and
19X1, net gains (losses) of $200,000 and $(13,592), respectively, were recorded in connection with interest rate swap activity.

At December 31, 19X2, ABC held unrated or less-than-investment grade corporate debt securities of $8,000, net of reserves for losses, with an aggregate market value of $7,500. Those holdings amounted to 3 percent of ABC's corporate debt securities investments and less than 1 percent of total assets. The holdings of less-than-investment grade securities are widely diversified and of satisfactory quality based on ABC's investment policies and credit standards. ABC also invests in mortgage loans principally involving commercial real estate. At December 31, 19X2, 3 percent of such mortgages ($10,000) involved properties located in California and Arizona. Such investments consist of first mortgage liens on completed income-producing properties, and mortgages on individual properties do not exceed $5,000.

Note 7: Derivative Financial Instruments Held or Issued for Purposes Other Than Trading

The Company's principal objective in holding or issuing derivatives for purposes other than trading is asset-liability management. The operations of the Company are subject to a risk of interest-rate fluctuations to the extent that there is a difference between the amount of the Company's interest-earning assets and the amount of interest-bearing liabilities that mature or reprice in specified periods. The principal objective of the Company's asset-liability management activities is to provide maximum levels of net interest income while maintaining acceptable levels of interest-rate and liquidity risk and facilitating the funding needs of the Company. To achieve that objective, the Company uses a combination of derivative financial instruments, including interest-rate forwards, futures, forward rate agreements, swaps, options, caps, floors, and other conditional exchange contracts.

Interest-rate forward and futures contracts are commitments to either purchase or sell a financial instrument at a specific future date for a specified price and may be settled in cash or through delivery of the financial instrument. Forward rate agreements are forward-like contracts that settle in cash at a specified future date based on the differential between a specified market interest rate and a fixed interest rate applied to a notional principal amount.

An interest-rate swap is an agreement in which two parties agree to exchange, at specified intervals, interest payment streams calculated on an agreed-upon notional principal amount with at least one stream based on a specified floating-rate index. Interest-rate options are contracts that grant the purchaser, for a premium payment, the right to either purchase or sell a financial instrument at a specified price within a specified period of time or on a specified date from or to the writer of the option. Interest-rate caps and floors are option-like contracts that require the seller to pay the purchaser at specified future dates the amount, if any, by which a specified market interest rate exceeds the fixed cap rate or falls below the fixed floor rate, applied to a notional principal amount.

Interest-rate forward and swap agreements are used to modify the repricing characteristics of interest-earning assets, while options, caps, floors and other conditional exchange agreements are used to limit the interest expense associated with the Company's liabilities.

Income or expense on derivative financial instruments used to manage interest-rate exposure is recorded on an accrual basis as an adjustment to the yield of the related interest-earning assets or interest-bearing liabilities of the periods covered by the contracts. If a derivative financial instrument that is used to manage interest-rate risk is terminated early or results in a single payment based on the change in value of an underlying item, any resulting gain or loss is deferred and amortized as an adjustment to the yield of the designated assets or liabilities over the remaining periods originally covered by the derivative financial instrument.

Deferred gains totaling $675,000 at December 13, 19X2, resulting from terminated and expired option contracts are included in other liabilities and will be amortized as a reduction of interest expense from the Company's short-term liabilities over the next two years.
Note 8: Liability for Unpaid Claims

The liability for unpaid claims and claim adjustment expenses is based on the estimated amount payable on claims reported prior to the balance sheet date which have not yet been settled, claims reported subsequent to the balance sheet date which have been incurred during the period then ended, and an estimate (based on prior experience) of incurred but unreported claims relating to such period.

Activity in the liability for unpaid claims adjustment expenses for the Company's health and disability coverages is summarized as follows:

Note 9: Reinsurance

The Company utilizes indemnity reinsurance agreements to reduce its exposure to large losses in all aspects of its insurance business. Such reinsurance permits recovery of a portion of losses from reinsurers, although it does not discharge the primary liability of the Company as direct insurer of the risks reinsured. The Company evaluates the financial strength of potential reinsurers and continually monitors the financial condition of reinsurers. The following tables includes premium amounts ceded/assumed to/from other companies.

Note 10: Statutory Financial Information

Under the law of ABC State, the state of incorporation, the maximum dividend that may be paid (without prior approval of the (State) Insurance Department), in any 12-month period is the
greater of (i) net investment income for the preceding calendar year or (ii) 10 percent of contractholders' surplus at the end of the preceding calendar year. In general, net investment income for dividend purposes is interpreted by the Insurance Department to be the statutory pretax net investment income including net realized capital losses but excluding net realized capital gains. The maximum permissible amount of dividends for 19X3, based on statutory net investment income for 19X2, is $20,000.

The Company, which is domiciled in ABC State, prepares its statutory financial statements in accordance with accounting principles and practices prescribed or permitted by the ABC state insurance department. Prescribed statutory accounting practices include state laws, regulations, and general administrative rules, as well as a variety of publications of the National Association of Insurance Commissioners (NAIC). Permitted statutory accounting practices encompass all accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. Furthermore, the NAIC has a project to codify statutory accounting practices, the result of which is expected to constitute the only source of "prescribed" statutory accounting practices. Accordingly, that project, which is expected to be completed in 19X3, will likely change the definitions of what comprises prescribed versus permitted statutory accounting practices, and may result in changes to the accounting policies that insurance enterprises use to prepare their statutory financial statements.

[Note: Although the following statutory financial information is not required to be disclosed in financial statements prepared in conformity with generally accepted accounting principles, insurance entities sometimes include such disclosures to facilitate use of those financial statements for purposes of filing with state regulatory authorities.]

The accounting practices of insurance companies are prescribed by certain regulatory authorities. Certain of these practices differ from the generally accepted principles used in preparing the financial statements of ABC.

The following reconciles ABC's statutory net income and statutory surplus and capital stock determined in accordance with accounting practices prescribed or permitted by the Insurance Department of Connecticut with net earnings (loss) and equity on a GAAP basis.

Note 11: Commitments and Contingencies

Future minimum rental payments, principally for administrative offices, under noncancellable operating leases at December 31, 19X2, are (in thousands): 19X3, $1,113; 19X4, $1,064; 19X5, $1,011; 19X6, $976; 19X7, $976; and $3,906 thereafter. Rental expense was $1,164 in 19X2, and $1,184 in 19X1.

ABC is named as defendant in a number of legal actions arising primarily from claims made under insurance contracts or in connection with previous reinsurance agreements. These actions have been considered in establishing its contract benefit liability. Management and its legal counsel are of the opinion that the settlement of these actions will not have a material effect on ABC’s financial position or results of operations.
