INTRODUCTION

The U.S. banking system operates under comprehensive state and Federal rules and regulations. These rules and regulations greatly influence the accounting and financial reporting. Banks subject to reporting requirements of the Securities Exchange Act of 1934 administered by the Securities and Exchange Commission are subject to extensive additional financial and accounting disclosures.

Banks also are subject to examination by Federal and state bank examiners and periodic examinations by the Bank's board of directors.

Common accounting and reporting by banks include:

- Accrual basis of accounting is the only acceptable basis of accounting under GAAP, although some banks may report certain revenue and expense items on a cash or modified cash basis.
- Banks usually prepare a non-classified balance sheet.
- Regulatory accounting policy requires that "goodwill" should not be capitalized but written off against stockholders' equity. For GAAP, banks are required to capitalize the goodwill.
- Assets and liabilities of banks' trust accounts are not recorded in the balance sheet.
- Subordinated debt is classified as debt and not as capital.
- Trading account securities are presented at market value. Any unrealized appreciation or depreciation is included in the income statement.
- The income statement is usually reported on a "net interest income" basis. (Interest expense is deducted from interest revenues to arrive at net interest income.)
- The provision for loan losses is usually reported as a deduction from net interest income.
- Realized gains and losses on investment securities are presented on a separate line, on a pretax basis, in the "other income" section of the income statement.
- Transfers of securities from an investment account to the trading account are recorded at market on the transfer date. Unrealized gains are deferred until disposition; unrealized losses are recognized at the transfer date.
- Transfers from the trading account to the investment account are recorded at market on the transfer date. Unrealized gains or losses are included in income on the transfer date.
- The components and approximate market value of the investment security portfolio should be disclosed on the balance sheet or in the related notes.
• Note disclosures should include a break-down of loans by major types of lending activities, with disclosure of information about maturities and loans with fixed and floating rates of interest.

• Fixed assets are normally shown as a single caption on the balance sheet, net of accumulated depreciated and amortization with note disclosures of the components.

• The components of the deposit liability accounts should be disclosed on the balance sheet or in the related notes.

• The interest method is used to amortize unearned discount on loans and deferred loan origination fees and costs.

If a Bank owns a captive finance company, the accounting provisions of the AICPA Finance Companies Audit Guide apply.
Checklists--General

Many auditors and accountants find it helpful to use checklists as practice aids in the preparation of financial statements and reports. Some firms have developed their own checklists for internal use, and may also have specialized checklists to meet the needs of their practices, such as checklists for clients in particular industries or clients that report to the SEC. Some state CPA societies have developed checklists as practice aids which may be available to other practitioners as well as to their own members. Some commercial publishers also include checklists in certain of their publications. However, authoritative literature does not require the use of such checklists, nor does it prescribe their format or content, which may vary.

Checklists typically consist of a number of brief questions or statements that are accompanied by references to a GASB or FASB Statement or Interpretation, an APB Opinion, an AICPA Accounting Research Bulletin and AICPA Statements of Position. Some checklists also include references to FASB Interpretations, Industry Audit Guides and Emerging Issue Task Force proceedings. The extent of detail included in checklists varies with the judgment of the preparers on how extensively to refer to and highlight authoritative literature without developing a checklist that is too long and unwieldy. Accordingly, checklists may serve as convenient memory aids but cannot be used as a substitute for direct reference to the authoritative literature.

Checklists usually provide for checking off or initialling each question or point to show that it has been considered. The format used in this booklet is a typical one; it provides for "yes," "no," and "not applicable" answers and presumes that remarks would be prepared on separate cross-referenced memorandums. Some preparers, however, prefer to include space for remarks in the body of the checklist while others prefer alternative checklist formats. For example, a checklist format may provide for the following set of answers: "not applicable," "not material," "in statements" and "in notes" (with provisions for indicating a cross-reference to the specific statement caption or note). Another format may provide for only two answers, "disclosed" and "not applicable." Firms and practitioners who develop their own checklists should adopt formats that suit their needs and preferences.

Disclosure checklists are generally accompanied by caveats that include all of the following points:

- Use of the checklists requires the exercise of individual professional judgment and may likely require some modification based on the circumstances of individual engagements.
- The checklists are not all-inclusive and are not intended to present minimum requirements.
• Users need to modify the checklists for any pronouncements issued subsequent to those mentioned in the checklist.

If widespread circulation is expected, the preparers also generally stress the nonauthoritative or unofficial status of the checklists and disclaim responsibility for the way they may be used.

Independent Auditor’s Report

The Board of Directors and Shareholders
Sample National Bank:

We have audited the accompanying consolidated statements of financial condition of Sample National Bank and Subsidiary as of December 31, 19X2 and 19X1, and the related consolidated statements of income, changes in shareholders’ equity and cash flows for each of the years then ended. These financial statements are the responsibility of the Bank’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Sample National Bank and Subsidiary at December 31, 19X2 and 19X1, and the consolidated results of their operations and their cash flows for each of the years then ended, in conformity with generally accepted accounting principles.

Note A
Summary of Significant Accounting Policies
Consolidation
The consolidated financial statements of Sample Bank (the Bank) include the accounts of the Bank and its wholly owned subsidiary which owns all of the Bank's premises. Significant intercompany transactions and amounts have been eliminated.

Investment Securities
Investment debt securities are those securities which the Bank has the ability and intent to hold to maturity. These securities are stated at cost adjusted for amortization of premium and accretion of discount, computed by the interest method. Generally, such securities are sold only to meet liquidity needs. Gains and losses on the sale of investment securities are computed on the basis of specific identification of the adjusted cost of each security. The investment marketable equity security is carried at the lower of cost or market value.

Trading Account Securities
Trading account securities are valued at estimated market value. Trading account gains and losses and fee income are included in other income.

Allowance for Credit Losses
The allowance is maintained at a level adequate to absorb probable losses. Management determines the adequacy of the allowance based upon reviews of individual credits, recent loss experience, current economic conditions, the risk characteristics of the various categories of loans and other pertinent factors. Credits deemed uncollectible are charged to the allowance. Provisions for credit losses and recoveries on loans previously charged off are added to the allowance.

Properties and Equipment
Properties and equipment are stated at cost, less accumulated depreciation. The provision for depreciation is computed principally by the straight-line method.

Interest Income on Loans
Interest on loans is accrued and credited to income based on the principal amount outstanding. The accrual of interest on loans is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet payments as they become due. Upon such discontinuance, all unpaid accrued interest is reversed.

Loan Origination Fees and Costs
Loan origination fees and certain direct origination costs are capitalized and recognized as an adjustment of the yield on the related loan.

Pension Costs
Pension costs are charged to salaries and employee benefits expense and are funded as accrued.

Postretirement Benefits
Note A
Summary of Significant Accounting Policies
Postretirement Benefits (continued)
that the accumulated postretirement benefit obligation be either charged in the income statement as a cumulative effect of a change in accounting in the period of adoption or delayed and amortized over future periods as part of future postretirement benefit costs. The Bank has not yet determined the impact on net income in the year of adoption. The amount paid for such benefits in 19x2 was $23,542.

Income Taxes
Provisions for income taxes are based on amounts reported in the statements of income (after exclusion of non-taxable income such as interest on state and municipal securities) and include deferred taxes on temporary differences in the recognition of income and expense for tax and financial statement purposes. Deferred taxes are computed on the liability method as prescribed in SFAS No. 109, “Accounting for Income Taxes.”

Net Income per share of Common Stock
Net income per share of common stock is computed by dividing net income by the weighted average number of shares of common stock outstanding during the period, after giving retroactive effect to stock dividends.

Trust Fees
Trust fees are recorded on the accrual basis.

Off-Balance-Sheet Financial Instruments
In the ordinary course of business the Bank has entered into off-balance-sheet financial instruments consisting of commitments to extend credit, commitments under credit card arrangements, commercial letters of credit and standby letters of credit. Such financial instruments are recorded in the financial statements when they become payable.

Cash and Cash Equivalents
For the purpose of presentation in the Statements of Cash Flows, cash and cash equivalents are defined as those amounts included in the balance sheet caption “Cash and Due from Banks.”

In 19x9, the Bank issued $290,000 of floating rate notes due in 19x6 in a private placement with an insurance company. Interest is calculated semiannually at the rate of ¾% over the six-month Eurodollar deposit rate (9¾% at December 31, 19x2). In September, 19x4, the notes may be redeemed without premium, in whole or in part at the option of the Bank. A portion of the notes qualifies as capital for bank regulatory purposes, which may limit the Bank's ability to repay the notes prior to maturity. At December 31, 19x2, $174,000 qualified as capital.

The 9% mortgage is payable in equal annual installments of $6,128 on December 15 each year through 19x5. The Bank may prepay between $2,400 and $6,128 annually without penalty and, in addition, may redeem the remaining notes at declining premiums (2.92% at December 31, 19x2).

The 9% subordinated term loan due May 31, 20X4, is from a non-affiliated bank and may not be repaid prior to June 30, 19x6.

The notes of the Bank's subsidiary represent amounts due to prior owners of certain of the Bank's premises. Such notes mature at various dates through 19x5. These notes are unsecured and have interest rates from 9.5% to 11%.

Except for the Floating rate notes due in 19x6, there are no significant amounts of long-term debt due in any one year.

Note H
Employee Benefits
The Bank has a defined contribution pension plan in effect for substantially all full-time employees. Salaries and employee benefits expense includes $26,493 in 19x2, and $24,053 in 19x1, for such plans. Contributions under the defined contribution plan are made at the discretion of the Board of Directors, but have amounted to 4% of gross salaries for the past five years.
Note I

Income Taxes

The consolidated provision for income taxes consisted of the following:

The components of deferred income taxes were principally related to the allowance for credit losses, to depreciation, to loan origination fees and costs, and to employee benefits.

Note J

Related Parties

The Bank has entered into transactions with its directors, significant shareholders and their affiliates (Related Parties). Such transactions were made in the ordinary course of business on substantially the same terms and conditions, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other customers, and did not, in the opinion of management, involve more than normal credit risk or present other unfavorable features. The aggregate amount of loans to such related parties at December 31, 19x2, was $443,850. During 19x2, new loans to such related parties amounted to $127,400 and repayments amounted to $122,100.

Note K

Contingent Liabilities and Commitments

The Bank’s consolidated financial statements do not reflect various commitments and contingent liabilities which arise in the normal course of business and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities are commitments to extend credit, commercial letters of credit, and standby letters of credit. A summary of the Bank’s commitments and contingent liabilities at December 31, 19x2, is as follows:

<table>
<thead>
<tr>
<th>Commitments</th>
<th>Notional Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commitments to extend credit</td>
<td>$560,000</td>
</tr>
<tr>
<td>Credit card arrangements</td>
<td>12,000</td>
</tr>
<tr>
<td>Commercial letters of credit</td>
<td>25,000</td>
</tr>
<tr>
<td>Standby letters of credit</td>
<td>50,000</td>
</tr>
</tbody>
</table>
Commitments to extend credit, credit card arrangements, commercial letters of credit, and standby letters of credit all include exposure to some credit loss in the event of nonperformance of the customer. The Bank’s credit policies and procedures for credit commitments and financial guarantees are the same as those for extension of credit that are recorded on the consolidated statements of condition. Because these instruments have fixed maturity dates, and because many of them expire without being drawn upon, they do not generally present any significant liquidity risk to the Bank. The Bank’s experience has been that approximately sixty percent of loan commitments are drawn upon by customers. While approximately 90% of commercial letters of credit are utilized, a significant portion of such utilization is on an immediate payment basis. The remainder are secured by the goods acquired by the customer with the letter of credit. The Bank has not been required to perform on any financial guarantees during the past two years. The Bank has not incurred any losses on its commitments in either 19x2 or 19x1.

The Bank and its subsidiaries are parties to litigation and claims arising in the normal course of business. Management, after consultation with legal counsel, believes that the liabilities, if any, arising from such litigation and claims will not be material to the consolidated financial position.

Note L
Concentrations of Credit
All of the Bank’s loans, commitments, and commercial and standby letters of credit have been granted to customers in the Bank’s market area. All such customers are depositors of the Bank. Investments in state and municipal securities also involve governmental entities within the Bank’s market area. The concentrations of credit by type of loan are set forth in Note C. The distribution of commitments to extend credit approximates the distribution of loans outstanding. Commercial and standby letters of credit were granted primarily to commercial borrowers. The Bank, as a matter of policy, does not extend credit to any single borrower or group of related borrowers in excess of $500,000.

Note M
Regulatory Matters
The Bank, as a National Bank, is subject to the dividend restrictions set forth by the Comptroller of the Currency. Under such restrictions, the Bank may not, without the prior approval of the Comptroller of the Currency, declare dividends in excess of the sum of the current year’s earnings (as defined) plus the retained earnings (as defined) from the prior two years. The dividends, as of December 31, 19x2, that the Bank could declare, without the approval of the Comptroller of the Currency, amounted to approximately $635,000. The Bank is also required to maintain minimum amounts of capital to total “risk weighted” assets, as defined by the banking regulators. At December 31, 19x2, the Bank is required to have minimum Tier 1 and Total capital ratios of 4.00% and 8.00%, respectively. The Bank’s actual ratios at that date were 7.85% and 9.20%, respectively. The Bank’s leverage ratio at December 31, 19x2, was 7.00%.
